DISTRICT AND GENERAL
Strathroy fair board have a surplus of \$500 from the fall fair.
Standard time will be resumed on the railroads on October 27.
An epidemic of red measles is prevalent in Alvinston and vicinity.
In Kansas City there were 350 applications for divorce in one day.
The crop of chestnuts in Caradoc this fall is one of the largest in years.
A sixty-year-old woman at Altoona, Pa., cut 17½ acres of corn in 17 days.
Daniel McIntyre of Dorchester, a well-known cattle and hog buyer, is dead.
Wardsville board of education have engaged Mr. and Mrs. Horton as janitors.

A bill introduced in the House of Commons provides for an increase in the salaries of postmasters.
A Michigan man charged with allowing a fire to start on his farm to spread to a government forest was fined \$298.
Laura Dorothy, the seven years old daughter of Harold Brock, near Petrolia, died of a week's illness.

From two and a half acres Jesse White, near Woodville, picked 1,267 bushels of tomatoes, which he sold at 50 cents a bushel.
There are about 750 different kinds of rodents in the United States, and the annual loss they cause to crops is estimated at \$50,000,000.
The two years old daughter of John McGill of Bridgen was burned to death by her clothing catching fire while lighting paper at the kitchen stove.

The death occurred at Crinan, the family residence, Wednesday night of Duncan MacCallum, aged 46 years. Mr. MacCallum was sick only two weeks.

Gordon Brock, thirteen years of age, eldest son of Harold Brock, near Petrolia, died a few days ago after an operation for the removal of tonsils and adenoids.
Alleging his wife concealed from him a standing milk wagon in Brooklyn. The horse ran away and crashed through a plate glass window, doing \$200 damage.

Miss Freda Clement, daughter of William Clement, Ridgeway, died on Oct. 6 from an attack of diphtheria. The health authorities immediately closed the public school and took other precautionary measures.
In a speech at Sheffield Thursday, Premier Lloyd George called upon the British people to see that the peace was a real peace. "It is not the British habit," he said, "to nag, harry, insult and trample bleeding foes. So long as Germany conforms to the conditions we have laid down, we must give her a clear chance to lead a decent, peaceable and honorable existence. This is in the interests not merely of Germany, but of Great Britain and the whole world."

This rich bit of sane common sense appeared recently in an Ontario weekly, and was worthy of being preserved in every family scrap album. "The happiest man in the world is the common, every day chap, who makes his own living, pays his own bills and has the respect of his neighbors. He saves a little money as he goes along, but doesn't try to get a corner on his local output and he is not a slave to ambition or society. He never expects to wear out his trousers in the senate, and when he glides out of bed in the morning he never wastes any time trying to pick out the right tint of socks, suspenders and necktie that will blend with the general effect."

"NELSON DAY" DRIVE
HAS GREAT OBJECT
Appeal of the Navy League is Directed to all Classes of Citizens
Canadians all over the Dominion will remember how in September of last year the Navy League of Canada made an appeal for one million dollars for the relief of the dependents of dead and injured seamen of the merchant marine who were the victims of the German submarine campaign.
It will be remembered how under the name of "Sailors' Week"—thanks to the thorough-going co-operation of the public with the workers—the campaign was a complete success and the objective was reached and passed.
The Navy League of Canada again appeals to all citizens for funds urgently needed to carry on its work. The "Nelson Day" campaign has been launched and on Oct. 21-22-23 the sum of \$500,000 will be raised by voluntary contribution.
The money will be devoted to the payment of the debt of gratitude to the Canadian seamen lost in the war; to provide protection and home comforts for seamen who come to Canadian ports; to educate the people to the need of a strong navy and a strong mercantile marine and to train native-born lads for service in the navy and Canadian merchant ships. All the money accruing from the "Nelson Day" campaign will be spent in Canada.

"Six days shalt thou labor," says the Bible. "Five," say the miners. Many a fisherman waits with baited breath.
The Pennsylvania coal miners demand a 60 per cent. raise in wages, a six-hour day, a closed shop and a two-year agreement. All we consumers ask is for a mild winter.

PRINCE WILL BE HERE TODAY
Royal Train to Arrive This Afternoon—Arranging for Demonstration
His Royal Highness the Prince of Wales is officially scheduled to spend fifteen minutes in Glencoe this afternoon. The royal train en route to Windsor from London by the Grand Trunk is expected to reach here at 2:30 and leave at 2:45, standard time. The local authorities were on Sunday notified officially that the request to have the prince visit here for a short time had been granted.

A portable platform has been erected at the depot, where Reeve A. J. Wright, Councilors McPherson, Keith, Lumley and Hagerty and President J. N. Currie of the Soldiers' Aid Committee, will welcome the prince.
Reeve Wright will give a verbal address of welcome, and children from the schools of the town will sing patriotic songs, under the direction of Professor Gordon of Strathroy. Local war veterans will gather at the station for inspection.

GREAT TEMPERANCE VICTORY
The returns to hand so far cover, it is estimated, about four-fifths of the votes polled, with results as follows:
Yes No Majority
1. 204,115 442,921 238,804
2. 221,500 415,902 194,402
3. 214,299 429,293 215,094
4. 251,282 394,484 143,202
Related results on the temperance referendum all go to pile up the majorities for the "drys" on all four questions, the latest figures available show that there is absolutely no doubt that the majority of voters in the province are in favor of retaining the Ontario Temperance Act with all its restrictions unamended.

SOME REFERENDUM RETURNS

Question	Yes	No
Glencoe	1 61 368	2 65 364
Wardsville	3 66 363	4 81 348
Newbury	1 15 104	2 19 105
	3 23 115	4 22 112
	1 22 111	2 22 114
	3 26 113	4 26 103

MR. LETHBRIDGE'S MAJORITY
As near as can be learned until the official cast-up is made by the returning officer, the majority for J. G. Lethbridge, U. F. O. candidate in West Middlesex in Monday's election, is about 2,200 over D. C. McKenzie, Conservative. The only municipality in which Mr. Lethbridge failed to secure a majority was Glencoe, where the vote stood 250 for McKenzie and 117 for Lethbridge.
Wardsville—Lethbridge 76, McKenzie 42. Newbury—Lethbridge 66, McKenzie 57.

NOTABLE BIRTHDAY PARTY
Mrs. Catharine Switzer, one of the oldest residents of Ekfrid township, celebrated her 85th birthday last Saturday at the home of her son, Wm. Switzer, when eighteen of her children and grandchildren gathered to extend their congratulations and partake of festivities fitting for the occasion. A splendid dinner was served and the day was spent very pleasantly in music, games, etc. Mrs. Switzer, who is still hale and hearty and intellectually bright, was one of the most faithful workers in the local patriotic society during the war, spending practically all her time in knitting socks and other comforts for the soldiers.

As a birthday gift Mrs. Switzer was presented with an oak rocker and a purse of money.
Married—on October 15, at the parsonage, Thamesville, by Rev. Mr. Whiteall, Marjory, second daughter of Mr. and Mrs. David Watterworth, to George L. Paddock, son of Mr. and Mrs. T. Paddock of Dawn. After the ceremony the happy couple left for a motor trip to Essex, Beamsville and Cullowee. Upon their return they will reside on the groom's farm near Florence.

PADDICK-WATTERWORTH
A handful of common sense is worth a bushel of book learning.
Youths sowing their wild oats nowadays can't mix in so much. The most obstinate corns and warts fall to resist Halloway's Corn Cure. Try it.

STANDING OF THE PARTIES
While a number of polls in sparsely settled districts of the North country have not been heard from, the standing of the various groups in the new Legislature can now be stated with a fair degree of certainty. Unless the tardy polls upset calculations, the parties will line up in the House as follows:
United Farmers.....44
Liberals.....28
Conservatives.....26
Laborites.....11
Soldier-Independents.....2
Total.....111

Sir William Hearst's two movements in conference with the members of his Cabinet upon the unprecedented situation growing out of the defeat of his Government at the polls. The Prime Minister will discuss with his colleagues the immediate action to be taken, but it is not unlikely that several conferences will be necessary before a final course is agreed upon.
Although, constitutionally, the Government remains in power until defeated in the House, in practice the Prime Minister within a reasonable time—a few weeks or a month—considers his resignation to the Lieutenant-Governor and suggests the name of the leader of the Opposition as his successor. The Lieutenant-Governor can then accept the suggestion and call upon the Opposition leader or, if he thinks that gentlemen cannot command a majority of the members in the House, may call upon any other member or even an outsider to form a Government. Or he may invite the defeated Prime Minister or one of his colleagues to form a new Government.

Any of these courses is a probability, but the real decision lies with the United Farmers. Without their consent no Government can hope to remain in power, though they cannot, alone, or even in a working alliance with the Labor men, take over the government of the province themselves. They repeatedly declared throughout the campaign that they would link up with neither of the old parties, and if they adhere to this stand, there are only two courses available—a coalition of some sort, or an election. The latter would with public opinion in its present state result in further gains for the Farmer and Labor groups and this would inevitably compel them to accept the responsibilities of Government.

The U. F. O. leaders appreciate the weight of the decision they must make and an important conference is being held to discuss the attitude of the organization. Should the farmers favor supporting a coalition Government, it is probable that they will insist upon a leader who has not been deeply dyed with partisanship, and in this connection only two names have been mentioned so far, Sir Adam Beck and Hon. Dr. Coe. It is believed that either man would be acceptable to the farmers.

MOSA COUNCIL
A meeting of the council of the township of Mosa was held at Glencoe on Sept. 20th. Members all present. The minutes of the last meeting were read and adopted.
Moved by A. Gardiner, seconded by C. S. Morrison, that the report of the C. S. Morrison, C. E., on the proposed Kelly drain be adopted, and the clerk is hereby instructed to prepare a by-law in accordance with said report.
Carried.
Moved by I. Watterworth, seconded by F. J. James, that Alex. D. McLachlin be paid \$31 for sheep killed by dogs.
Carried.
Moved by A. Gardiner, seconded by John T. Lethbridge and others, requesting the council to cause the area described in the petition to be drained, he accepted, and the clerk is hereby instructed to request Jas. McGregor, C. E., to make an examination of the area described and report to the council.
Carried.
Moved by F. J. James, seconded by C. S. Morrison, that the council grant to the Mosa & Ekfrid Agricultural Society the sum of \$50, providing that the township of Ekfrid and village of Glencoe each grant the same amount of \$50, and that a grant of \$10 be made to the Wardsville school fair, and \$5 to the Newbury school fair.
Carried.
Moved by A. Gardiner, seconded by I. Watterworth, that a rate of 10 mills on the dollar be levied on the rateable property of the township to meet the requirements of the council for the current year.
Carried.
Moved by I. Watterworth, seconded by F. J. James, that the following accounts be paid:—A. M. Leitch, \$15, for sheep killed by dogs; Municipal World, \$2.88, for drainage blank forms; A. E. Sutherland, \$3.65, for printing voters' lists, etc.; A. Gardiner \$3, Jas. Armstrong \$3, Joseph Babcock \$3, L. Babcock \$3, Dan Munro \$3, Russell Smith \$3, for assistance surveying the McRae drain; Thos. Clements \$2, Stephen Kelly \$2, Matthew Armstrong \$2, Andrew Gardiner \$2, Chas. Morrison \$2, Joseph Armstrong \$2, for assistance surveying the Kelly drain; Jas. M. McGregor, O. L. S., \$28.50, for survey, plans and report on the Kelly drain.
Carried.
Moved by F. J. James, seconded by C. S. Morrison, that the council adjourn to meet at Newbury on October 18th at 10 a. m.
Carried.
C. C. McNAUGHTON, Clerk.

STORAGEKEEPER HELD UP
Harry Harvey of Woodgreen Has An Exciting Experience
A daring hold-up took place at Woodgreen, on the Longwoods Road between Wardsville and Strathroy, Tuesday afternoon about four o'clock, when the store of Harry Harvey, treasurer of Mosa township, was the scene of a rather exciting occurrence for a few minutes.
Two well-dressed men drove up to the store in an automobile and spent about half an hour in the store eating lunch. Several people of the neighborhood were in the store at the time talking over election matters. These took their departure one by one, and when the last of them had gone, one of the two strangers suddenly closed the front door of the store while the other covered the proprietor with a revolver and demanded his money. Although the revolver was placed within two inches of his nose, Mr. Harvey was not to be cowed but grappled with the man and was getting rather the best of him when the man at the door, with revolver in hand, started over to assist his companion. Being unarmed, Mr. Harvey thought it the better part of valor to retreat and ran to the back door and called for help. Left to themselves the hold-up men endeavored to open and rob the till, but hearing footsteps approaching they fled before they could accomplish their object, and jumping into their car drove hastily away towards the east.
Mr. Harvey followed the men in his car, first telephoning to Strathroy and Melbourne a description of the men and number of their car. Being hatless and unarmed Mr. Harvey had to abandon the chase when near Strathroy.
The strangers came from the west and are reported to have stopped at a Wardsville garage for some time. The number on their car when at Woodgreen was 7881, but the evidently changed the number when they made a halt at Battle Hill, as parties who saw them further east took their number as 7659.

THE NEXT ATTRACTION
The second of the series of lyceum and chautauque entertainments to be given in Glencoe will be The Morrison Girls in "Stories and Songs of Today and Yesterday." Thursday, October 30.
In this we are promised an evening long, long to be remembered and cherished an evening of delightful vocal and instrumental music and readings, heart-satisfying thoughts and thoughts. Under auspices of L. O. D. E. for War Memorial. Plan open at Lumley's drug store next Saturday.

A WINDSOR ANNIVERSARY
A large number of friends surprised Mr. and Mrs. Archie Munroe, 115 Albert street, Windsor, on Friday evening, Oct. 10, the occasion being their first wedding anniversary. During the evening the host was presented with a handsome morris chair and a hostess with a handsome cut glass water set and a lovely set of silver. A buffet lunch was served. The out-of-town guests were Mr. and Mrs. Neil Munroe of Glencoe and Leon Auckland of Rodney.

BUYS UNDERTAKING BUSINESS
The St. Thomas Times-Journal says: The undertaking business recently purchased from W. J. Kerr of his city by E. E. Sporenburg of Windsor has been sold to Charles Dean of Glencoe, who will take possession about November 1. The sale was effected by Mr. Kerr. Mr. Dean has had several years' experience in this line.

TO THE ELECTORS OF THE WEST RIDING OF MIDDLESEX
Ladies and Gentlemen:
Permit me to thank my numerous friends throughout the riding who have given me the cause I represent such enthusiastic support. We have demonstrated the fact that old party ties can be severed when a great principle is at stake. Our victory is largely due to the splendid band of workers who so ably assisted me in presenting to the electors our platform and the broad principles for which we stand. This is especially true of the lady workers who were so untiring in their efforts to raise politics to a higher level and present the facts in their true light and particularly the facts regarding the temperance issue, on which the United Farmers give no uncertain sound.
I feel you have laid on me a great responsibility, especially at this critical reconstruction period. I shall endeavor to prove faithfully to the trust you have reposed in me.
Again thanking you, I am,
Your obedient servant,
J. G. LETHBRIDGE.

"Yes," said the Sunday school teacher, when Deilah cut Samson's hair he lost all his courage and strength, and became mild as a lamb. Can you understand that?" "Well, ma'am," replied Tommy, "it does make yer feel shamed when a woman cuts yer hair!"

Internally and Externally it is Good.
—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and many hundred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

KRONSTADT SURRENDERS TO BRITISH; FALL OF PETROGRAD AT HAND

General Yudenitch Continues Victorious March, Nearing Russian Capital—Reds Refuse to Defend City.

A despatch from London says:—Kronstadt is reported to have surrendered to the British fleet. General Yudenitch, Commander of the Russian Northwestern Army, has captured Gatchina and is victoriously advancing toward Kraonoye Selo and Tsarskoye Selo, eighteen and fifteen miles from Petrograd.

Reports from Revel and Helsingfors say that Yudenitch is meeting with feeble resistance, although Gatchina was strongly fortified. Reports from aviators show that the few barricades on the road to Petrograd and trenches and entanglements outside of the capital are not formidable.

It is also announced that the Bolsheviks are evacuating Petrograd owing to a mutiny among the Red troops. Reports from Russia generally chronicle successes for the anti-Bolshevik forces in all sections of the country, but, with the exception of the Eastern front, where Admiral Kolchak maintains that he is advancing along the whole of the line, the Reds are putting up resistance.

CREW OF ONATO DID NOT MUTINY

Captain and Mate of Ship Were Accidentally Killed.

Philadelphia, Penna., Oct. 19.—The four survivors of the crew of the British schooner Onato, who were charged with mutiny by Captain Sullivan, of the American steamship Zirkel, were exonerated today by T. P. Porter, the British Consul, after an enquiry into the charges. They will be sent to their homes in Newfoundland in a few days as shipwrecked seamen.

The four survivors, Thomas Moulton, Ernest Fizzaro, Douglas Nicholls and Lorenzo Ash, drifting helplessly in their little craft, were picked up by the Zirkel in mid-ocean Oct. 8, and the schooner set adrift. Capt. Brushett, master of the Onato, and his brother, Ernest, the first mate, had been killed. Believing there had been a mutiny on board, Captain Sullivan, of the rescue ship, placed the survivors in irons and turned them over to the authorities upon his arrival here last Thursday.

FORTY MILLION DOLLAR TRADE WITH GREECE

Only Ten Million Dollars of This Sum Financed Under Government Credit.

A despatch from London says:—Up to date Canada has done some \$40,000,000 worth of business with Greece. Of this sum only \$10,000,000 have been financed under the Canadian Government credit to that country; the remaining business having been done on a cash basis. Our exports have ranged from wheat to soldiers' housewares. The Roumanian credit is now practically used up. Only about half a million dollars' worth of business has been done under the Belgian credit. Under the French credit we have done nothing at all, principally because of the prohibitive French surtaxes. There are time clauses in these contracts which terminate them at the end of the present year. It is considered doubtful whether the French credit will be renewed or the Belgian credit extended, as these countries apparently wish to do all their own work of reconstruction.

EXPULSION OF GERMANS AFTER TWO YEARS

Belgium Will Not Allow Any to Remain.

London, Oct. 19.—Belgium has announced the Moresnet district to the Province of Liege according to an announcement received in a wireless message from Berlin. The inhabitants of Moresnet with the exception of those of German origin, become Belgians, the announcement says, while citizens of Germany are given two years to declare for Belgium or Germany. If they decide for Germany they must leave the district.

521 Persons Killed In Paris During War

Paris, Oct. 19.—The total casualties in Paris resulting from air raids and shells thrown by German long-distance guns were 521 persons killed and 1,224 wounded. These figures were given today by M. Evain, president of the Municipal Council, in an address in connection with the conferring of the Croix de Guerre on the Day of Paris.

BOLSHEVIKI DEFEAT IS IMMINENT

British Trade Offensive Is Planned to Follow Collapse of Reds.

A despatch from London says:—The imminent collapse of the whole Bolshevik movement is being foretold by optimists. It is predicted that the Bolsheviks will be driven to Tashkent, and thence to the borders of Afghanistan, which development causes some anxiety here.

In the meantime, all the British commercial forces are being mobilized for a great trade offensive, which is expected fruitfully to follow the Bolshevik defeat. Under the aegis of the Overseas Trade Department of the Foreign Office a British Central Russian Institute is being organized here, the object of which is said to be "the collection and dissemination of exact information about Russia. Every sort of Government aid is being given to assist British traders in meeting other countries on favorable terms on the great commercial battlefield which Russia is expected to provide."

Side by side with the perpetual complaints that Great Britain is being left behind in the commercial race come startling proofs of the unremitting energy that British manufacturers have all along been quietly devoting to meeting the demands of after-the-war trade.

Towns Visited in Balance of H.R.H.'s Tour

The itinerary of the Prince of Wales' tour through Ontario was as follows: Cobalt and Timmins, 16th; Hamilton, 17th and 18th; Niagara Falls, 18th and 20th; Brantford, afternoon of 20th; Guelph and Stratford, 21st; Woodstock and Chatham, 22nd; London, afternoon of 22nd to afternoon of 23rd; Windsor, 23rd and 24th; Galt, 24th; Kingston, 25th to 27th; Montreal, 27th to November 2nd; Toronto, Nov. 2nd to 5th.

Thence to Ottawa, where the Prince will address the Canadian Club, Saturday, Nov. 8. One hour's stop will be made at Brockville, Oct. 27, and some side trips out of Montreal are being arranged for. The Prince will visit the eastern townships, Oct. 29, including Sherbrooke and St. Anne's, Nov. 2.

National Debt of Britain Nearly Eight Billion Pounds

A despatch from London says:—In a recent speech Mr. Lloyd George urged the imperative need of greater productivity on the part of the nation. He pointed out that the national debt was nearly eight billion pounds. He said wages had doubled, the hours of work curtailed, and the standard living was higher than ever, but that that standard could not be preserved by a concourse of tribunals or the decisions of labor conferences.

50% of Space on Liners Has Been Requisitioned

Ottawa, Oct. 19.—The announcement that fifty per cent. of the space on liners of British registry has been requisitioned for November, the same as October, is increasing the difficulties of Canadian shipping agencies, which have demand for more commercial space to principal British ports than they can supply. The heavy movement of wheat and other foodstuffs at this season calls for extra accommodation. The Canadian Trade Commission has made representations to London for release of more space.

Part of a great demonstration in London at which the slogan to the government was "Get after the Profiteers or get out."

Grain and Live Stock

Breadstuffs.
Toronto, Oct. 21.—Manitoba wheat—No. 1 Northern, \$2.30; No. 2 Northern, \$2.27; No. 3 Northern, \$2.23, in store Fort William.

Beans—Canadian hand-picked, bus., \$5.25 to \$5.75; primes, \$4.25 to \$4.75; Japan, \$4.75 to \$5; imported hand-picked, Burma, \$4; Lima, 17 to 18c.
Honey—Extracted clover, 5-lb. tins, 24 to 26c; 10-lb. tins, 23½ to 24c; 60-lb. tins, 23 to 24c; buckwheat, 60-lb. tins, 18 to 20c; Comb, 16-oz., \$4.50 to \$5.00 doz.; 10-oz., \$3.50 to \$4.00 doz.
Maple products—Syrup, per imperial gallon, \$3.15; pure 5 imperial gallons, \$3.00; sugar, lb., 27 to 28c.
Provision—Wholesale.
Smoked meats—Hams, med., 43 to 44c; do, heavy, 36 to 38c; cooked, 56 to 58c; rolls, 33 to 35c; breakfast bacon, 46 to 50c; backs, plain, 46 to 48c; boneless, 51 to 53c.
Cured meats—Long clear bacon, 32 to 33c; clear bellies, 31 to 32c.
Lard—Pure tierces, 30 to 30½c; tubs, 30½ to 31c; palis, 30c; to 31½c; prints, 31½ to 32c; Compound tierces, 27½ to 28c; tubs, 28 to 28½c; pails, 28½ to 28¾c; prints, 29½ to 30c.
Montreal Market.
Montreal, Oct. 21.—Oats, extra No. 1 feed, 91½c; flour, new standard grade, \$11 to \$11.10; rolled oats, bag 90 lbs., \$4.45 to \$5; bran, \$4½; shorts, \$5½; hay, No. 2, per ton, car lots, \$22 to \$23. Cheese, finest eastern, 25c; butter, choice, creamery, 60 to 61c; eggs, fresh, 68c; eggs, selected, 62 to 64c; eggs, No. 1 stock, 56 to 57c; eggs, No. 2 stock, 52 to 54c; potatoes, per bag, car lots, \$1.30 to \$1.35; dressed hogs, abattoir killed, \$25 to \$26; lard, pure, wood pails, 20 lbs. net, 30 to 30½c.

ITALIAN INVENTS NEW DIRIGIBLE

Can Carry 20 Tons and Attain Speed of 72 Miles Per Hour.

A despatch from Rome says:—Celestino Uselli, one of the pioneers of aviation in Italy, claims to have invented a new dirigible, 880 yards long and 80 yards wide, and provided with six motors of 500 horsepower each, with which he intends to fly from Rome to South America, stopping at Dakar, West Africa.

The dirigible, it is claimed by Signor Uselli, is capable of transporting a weight of 20 tons, and can attain a speed of 45 miles an hour with one motor, 52 miles an hour with two motors, and 72 miles an hour with all six motors working. Using one motor at once, it is said the dirigible can navigate for six days and cover more than 5,000 miles.

Signor Uselli asserts the dirigible is so constructed that it can float, but he is not certain that it can weather a storm at sea.

Signor Uselli expects it will take six days to fly from Rome to South America. He will make a trial flight the early part of November.

Compel Mennonites to Obey School Law

A despatch from Regina says:—The Great War Veterans' Association of Swift Current has passed a resolution endorsing the action of the Saskatchewan Department of Education in enforcing compulsory school attendance upon the Mennonites in that district. "We pledge ourselves to support to the fullest degree the Department of Education in its efforts to educate all children in the Province, as they should be, in the English language," says the resolution, after referring to the fact that "there are groups of people who resist education as provided by the legislation of this Province."

Hungarian Premier Favors Restoring King to Throne

A despatch from Budapest says:—Stephen Friedrich, the Hungarian Premier, addressing a Royalist deputation, said he was personally convinced that a majority of the Hungarian people were Royalist and wished their King back on the throne. He added that the whole people, regardless of racial, class or religious differences, could be united under a monarchy.

Costs Four Times as Much To Furnish a House Now

A despatch from London says:—It costs a newly-married couple today about four times as much to furnish a house as their parents had to pay. Despite the profiteering act and public outcry against the scandal of high prices, the cost of living in this country continues to increase, and everywhere serious unrest is manifest. Many of the necessities of life have risen by 300 per cent. since 1914, the working classes being the greatest sufferers.

PRINCE PRESENTED TWELVE DECORATIONS

Features of H. R. H.'s Visit to Brantford.

A despatch from Brantford says:—One of the most interesting features of the visit of the Prince of Wales to Brantford was the presentation by the Royal Highness of twelve decorations won in the war to local officers and men. The recipients were: Military Cross—Lieut. C. D. Smith, Lieut. A. A. McQueen, Lieut. M. F. Verity, Lieut. V. Curtis, Lieut. H. K. Wood.

Distinguished Flying Cross—Capt. H. A. White.

Military Medal—Lance-Corpl. W. J. Davey, Pte. W. Brecken, Gnr. W. G. Chinery, Pte. F. H. McDougald, Pte. E. B. P. Davies (deceased), presented to Mrs. L. Davies.

Another feature of more than ordinary interest was the unveiling of a tablet of bronze to the 88 members of the Six Nation Indians, all volunteers, who gave their lives in the great war, headed by Lieut. Cameron D. Brant, who was a lineal descendant of the great warrior Chief, Capt. Joseph Brant, and was killed in the attack by the 4th Battalion at the second battle of Ypres, and Lieut. J. D. Moses, the first Indian aviator, who died in a German prison camp after a crash.

SILVER AND GOLD NUGGETS FOR H.R.H.

Prince Sees Ontario Mining Centre and Receives Souvenirs.

A despatch from Englehart, Ont., says:—(En route with Prince of Wales' Special Train.)—"The town is yours. Faint it any color you like." This was the text of a sign which greeted the Prince of Wales at Cobalt on Thursday, and expressed the spirit which informed the welcome extended the Prince Thursday by the Porcupine people.

At Cobalt the Royal party met with a welcome which was none the less genuine for the fact that nearly everybody stayed at their work and showed the Prince how the country's silver was mined. Presents of silver nuggets at Cobalt and gold nuggets at Timmins were showered upon the Prince with warm expressions of loyalty from the miners and their families. At Timmins, New Liskeard and smaller towns along the way brief stops brought out entire communities to greet the Prince. At Timmins a vigorous welcome was extended by several thousand people assembled for a review of returned men and a public reception before the Prince visited the Hollinger Gold Mines and received the engraved nuggets of precious metal as souvenirs.

\$23,261 for a Bull Calf; \$8,788 for 7-month-old Heifer

A despatch from London says:—A world record in prices for cattle was established at a sale of Shorthorns at the Aberdeenshire Show. The first bull calf to enter the ring was knocked down for \$32,261. The calf was bred by the famous Shorthorn king, William Durthe, of Collynie. This figure is the highest price ever paid for a bull calf. Another world's record was established by James Durno, of Uppermill, who obtained £2,100 (\$8,788) for a seven-month-old heifer calf.

Soldiers Uncover Tombs 2,500 Years Old

A despatch from Salonica says:—Military excavations, trench making, carried on in the Greek parts of Macedonia during the war by the Allied armies, have brought to light a large number of antiquities, such as ancient instruments, vases of geometrical design and jewellery of iron, silver and gold of great archaeological value. Tombs of the fifth and sixth centuries before Christ have also been discovered. These antique articles, which have been taken possession of by M. Pelekidis, director of antiquities, prove that the civilization which existed at that ancient time in Macedonia was identical with that in Greece.

Not the British Habit to Insult Bleeding Foe

A despatch from London says:—In a recent speech at Sheffield Lloyd George called upon the British people to see that the peace was a real peace. "It is not the British habit," he said, "to nag, harry, insult and trample a bleeding foe. So long as Germany conforms to the conditions we have laid down, we must give her a clear chance to lead a decent, peaceable and honorable existence. This in the interests not merely of Germany, but of Great Britain and the whole world."

80-Minute Air Trip London to Paris

A despatch from Paris says:—A new record for the airplane trip from London to Paris was set on Thursday afternoon by Capt. Gathemo, who made the flight in one hour and twenty minutes. He left Farnborough at 1.10 p.m., arriving at Bourget at 2.30 o'clock.

Viscount Allenby Appointed Commissioner for Egypt

A despatch from London says:—Field Marshal Viscount E. H. H. Allenby, former commander-in-chief of the victorious British forces in Palestine, has been appointed British High Commissioner for Egypt and the Sudan. Viscount Allenby succeeds General Sir E. Reginald Wingate.

Need For Thrift is Imperative.

Saving is not always looked upon as a saving grace. If it were, there would be over five per cent. of the inhabitants of the United States and probably an equally large percentage of Canadians who are dependent upon public charity. During the past five years practically all commodity prices have risen steadily, yet vast sums in the aggregate are now being spent for goods that the purchasers could very well do without. The production of luxuries requires the labor of thousands of men and the use of capital and materials that could be turned to better account in producing and distributing necessities. It is surely obvious that such needless expenditures influence in a marked degree the trend of prices in general.

No right-thinking nation or individual desires to become a pauper, but to avoid such a fate thrift is a prime necessity. At no other time in the history of Canada has thriftiness been more imperative. At no other time has prodigality been so much the rule. It may be only a reaction following the enforced frugality of the later war years. It may be due to the anxious currency which war industries brought into being. But in any case, the general result is harmful and tends toward pauperism. If the discount on Canadian currency abroad is to be wiped out and the prices of necessities reduced, national and personal thrift is a precept which must be put into practice.

Good Ploughing.

Ploughing matches in years gone by were common and very interesting events. They became less popular as two-furrow and power ploughs came into use, until ploughing threatened to become a decadent art. The aim seemed to be to plough the greatest possible area regardless of how the work was performed. Efforts are now being made to revive interest in better ploughing. Junior Farmers' competitions and local matches were held in many places this autumn and an interprovincial Ploughing Match and Tractor and Machinery Demonstration was held at Ottawa on October 14th, 15th and 16th. Classes were open to boys, young men and mature ploughmen. This was an educational event, intended to stimulate interest in better ploughing and better farming. Good ploughing nearly always means better farming throughout. Attention should and can be paid to the quality as well as to the quantity of the work done.

Telling Epigrams by Tiger of France

A despatch from Paris says:—Premier Clemenceau's recent speech on the Peace Treaty contained two epigrams. One was: "If France was large families you may put into your treaties the finest articles you like, you will do in vain whatever you try. France will be lost because there won't be any more Frenchmen."

The second was: "The future of the German Empire is not on water, as it used to be, but under the water."

First Instalment of War Indemnity Paid

Berlin, Oct. 19.—The Cologne Gazette says that it understands Germany has paid the first instalment of the war indemnity. The newspaper says it consisted of deliveries of various commodities amounting to 20,000,000, 000 marks.

Darkest Day of the War.

Official figures given out recently in London show that the darkest day of the war for England was on July 1, 1918, when casualties in killed and wounded numbered 170,000. It was the opening day of the first battle of the Somme.

BRINGING UP FATHER

FOUND IN THE FISHERMAN'S NET

QUEER HAULS OFF BRITAIN'S COASTS.

Floor of Sea Littered With Wreckage Causing Loss to Fisher-Folk.

North Sea fishermen are having anything but a happy time of it, says an English newspaper. Although the stock of fish is larger and more plentiful than it has been for thirty years past, there is much besides fish lying about on the great Digger banks, and the amount of gear lost, in consequence, is a very serious matter.

If a trawl gets caught in a sunken wreck, there is nothing for it but to cut the warp and the loss. All sorts of relics of the sea fights of the past four years are being fished up. Only the other day a trawler brought up a rusty machine-gun which proved to have belonged to one of the many private U-boats which our men sent to the bottom.

It fetched \$137.50.

The trawl net, remember, is like a great purse which is dragged, for hours on end, slowly along the bottom, and which gathers not only fish—principally soles, turbot and plaice—but also a mass of every sort of rubbish that litters the floor of the sea.

Among the rubbish are sometimes found objects of real interest or value. Small pieces of amber, for instance. Amber is the fossilized gum of a tree which once grew over the forgotten country which is now the broad North Sea, and fragments are often washed up on our East Coast after storms. A year or two before, a Lowestoft trawler found in her net a lump of amber weighing just on two pounds—the finest piece discovered for very many years. The lucky finder sent it to London and sold it for \$137.50.

In 1906 another Lowestoft trawler, when working on the northern edge of the Digger, got her trawl hung up in what at first her people thought must be an old anchor. There are plenty of these at the bottom of the sea. But by degrees the object was worked loose and came up.

Worth Thousands of Dollars.

It proved to be the right hand trunk of a mastodon. It was eight feet long, and so heavy that it took three men to lift it. How many millions years ago its original owner lived it is impossible to say. The find was sold to a museum for seven pounds.

Bones of extinct animals are quite commonly found in trawls. Unfortunately, the fishermen generally throw them overboard as rubbish.

Trawling in the Channel, a British craft brought up a queer old vase, black with age and long immersion in salt water. The skipper kept it as a curiosity, and when he returned to port, stuck it up in his room, on a shelf. Some years later a visitor who happened to notice it, offered him a sovereign for it. The offer was accepted; he took it home, had it cleaned, and found that it was solid silver, a very fine specimen of French sixteenth century work, and worth several thousand dollars.

An Ostend trawler had a strange experience a few years ago. Working off the Belgian coast, she began to wind up her net, when her men found that she had an extraordinarily heavy capture. To their astonishment they found it was another net.

The Message in the Bottle.

But this feeling was nothing to their amazement when it was discovered that the net was their own old one which they had lost in a sudden storm just a year previously.

On one occasion, off the Isle of Wight, a trawler's crew got hold of a torpedo, and managed to bring it ashore. It was one that had been lost during practice, and they claimed and obtained the regular \$25 reward from the Admiralty.

Another fiver was more easily earned by two French fishermen of Etretat. They found in their net a little carefully corked and sealed which, being opened, proved to contain a sheet of paper on which were these words: "\$25 will be given to whoever brings or sends me this scrap of paper. Address—Greenwich Street, New York." The bottle had been dropped overboard by a New Yorker on his way across the Atlantic.

Non-Effective.

Tommy announced his intention of going to the river for a bath, and his mother was rather scared. But she was wise, and decided to try a new method.

"I was reading in the paper this morning," she said, "about a little boy who was drowned, while he was bathing."

Tommy smiled cynically.

"Was he any relation, I wonder," said he, "to the little boy who was killed last week on his way to school?"

Fellow Feeling.

District visitor (proudly to old cottager)—"I've just got a letter from my son Arthur saying he has just won a schoolship. I can't tell you how pleased I am."

Old Cottager—"I can understand your feelin's mum. I felt quite the same when our pig won a medal at the agricultural show."

AN UP-TO-DATE COSTUME

No. 9133—Ladies' Coat. Price, 25 cents. Adjustable collar; 42 or 38-inch length. Cut in 7 sizes, 34, 36, 38, 40, 42, 44 and 46 ins. bust. Size 36 requires, 42-inch length, without nap, 3 yds. 48 ins. wide; with nap, 2 1/2 yds. 54 ins. wide; 38-inch length, without nap, 2 1/2 yds. 48 ins. wide; with nap, 2 1/2 yds. 54 ins. wide; lining, 42-inch length, 3 yds. 36 ins. wide.

No. 9138—Ladies' Two-Piece Skirt. Price, 20 cents. High waistline; 39 or 37-inch length. Cut in 9 sizes, 22 to 38 ins. waist measure. Size 26 requires, 39-inch length, 2 1/2 yds. 36 ins. wide, or 34 yds. 54 ins. wide; 37-inch length, 2 1/2 yds. 36 ins. wide, or 1 1/2 yds. 54 ins. wide. Width around bottom 1 1/2 yds.

These patterns may be obtained from your local McCall dealer, or from The McCall Co., 70 Bond Street, Toronto, Ont.

He Meant to be Polite.

It is the part of wisdom to close the mouth firmly when the conversation begins to include words the sound of which is unfamiliar to you. This soldier who is the hero of this little incident "took a chance"—and probably wished he had not.

While in the army, says a writer, I was accompanied by a sergeant who tried to give the impression that he was one of the brainiest men in the army. On pass one Sunday, in a certain town, a young woman asked us to let her have a cup of coffee. On arriving, she introduced us to her mother, who made excuses in regard to her appearance. She then remarked, "I'll go and put on the perculator."

A Double Explanation.

One morning a woman walked into a village grocery store with a majestic stride. It was easy to see, by the sternness of her expression, that she was somewhat disturbed.

"This," she sarcastically explained, throwing a package on the counter, "is the soap that does the washing itself. It's the soap that makes washing a pleasure. It's the soap—"

"That isn't soap, madam," interrupted the grocer, examining the package. "Your little girl was in here yesterday for a half a pound of cheese and a half a pound of soap. This is the cheese."

"U-m, that accounts for it!" said the woman as the light of understanding began to glow. "I wondered all night what made the Welsh rabbit we had for supper taste so queer."

Stirring Sight for a Veteran.

The young man who had seen four years of service and fought on most of the fronts was at home, demobilized, sitting in the old-home kitchen, rather puzzled how to occupy the unaccustomed leisure.

"Don't you know what to do with yourself, George?" asked the fond mother. "Why don't you 'ave a walk down the road?"

Then father spoke up. He had his bit of excitement to propose.

"He ain't seen the corner where they pulled down Simmond's fish shop, 'as 'e, ma?" he asked.

70 Square Miles of Potash.

The potash deposits which France has obtained through the cession of Alsace covers nearly 70 square miles, and are unusually rich in potash salts.

PAINFUL NEURALGIA

Is Caused by Thin, Watery Blood and Cured by Enriching the Blood.

Most people think of neuralgia as a pain in the head or in the face, but neuralgia may affect any nerve in the body. Different names are given to it when it affects certain nerves. Thus neuralgia of the sciatic nerve is called sciatica, but the character of the pain and the nature of the disease are the same. The cause being the same, the cure to be effective must be the same. The pain in neuralgia is caused by starved nerves. The blood which carries nourishment to the nerves has become thin and impure and no longer does so, and the pain you feel is the cry of the nerves for their natural food. You may ease the pain of neuralgia with hot applications, but you can only cure the trouble by enriching and purifying the blood. For this purpose we know of no medicine that can equal Dr. Williams' Pink Pills. These pills actually make new, rich blood and thus act as the most efficient of nerve tonics. If you are suffering from this most dreaded of troubles, or any form of nerve trouble, give these pills a fair trial, and see how speedily you will be restored to good health.

You can get Dr. Williams' Pink Pills from any medicine dealer, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

How to Handle Ditches.

Many farmers have asked how to handle ditches that are spoiling good land on their farms. For small ditches, where the land is not steep, a good way is to fill them with brush, corn stalks and the like. Stake the brush down so floods will not wash it out. Flood waters will soon fill the ditch with dirt.

For larger ditches it is better to build dams in them, arranging tile through each dam so that water will flow through the tile after it reaches a certain height behind the dam. The ponds above the dams will soon be filled with dirt which settles out of the water. Just above the dam the tile should turn upright and project nearly as high as the dam.

Where washing begins in a narrow gulch on a hillside, run terraces out from the middle of the gulch along the sides of the hill. Where a terrace leaves the gulch make a small dam to turn the water behind the terrace. The terrace ridges should run exactly on the level, but run slightly down hill. The water should run some distance behind each ridge and then run over the ridge in a broad sheet. This will prevent washing. If the field is to be cultivated, the terrace ridges should be broad and flat so that cultivating implements can be run over them. Another plan is to plant honey-locust in the ditches and then sow sweet clover. These will catch drift and prevent washing.

Never Cramp Your Mind.

It never pays to cramp up a good idea so that it can't get out. Even a woodchuck will dig for dear life if you plug up the hole where it went in.

Sometimes we think we have hatched up something wonderful. The thought rattles around in our upper storey till we think nothing but a two-inch auger will let it out. But we find a pegging-awl is plenty big enough. We give our wonderful idea vent. There is a little p-sh-h, and that is all there is of it.

But what if that is so two or three times? That little bit of a thought did something worth while before it got out. It pushed and crowded around till it made our thinking-cap larger. Thought always does that. And if we keep thinking and trying and using the thoughts we have, the time will come when we will really have an idea that will come out with a bang. The good thought of to-day is the forerunner of a better one to-morrow.

October is the month to plant tulip, crocus, narcissus and hyacinth bulbs. Do it now!

Geese that have been pastured until about four months of age and only given a light grain feeding can be fattened by giving a mash containing nothing but corn meal for about four or five weeks. Six-week-old goslings are sometimes fattened on ration of equal parts of corn meal and bran. Feed this mash three times each day.

Mormonism in the Old Land.

The Anti-Mormon Society in England has appealed to the British Government for help against the growing evil of Mormonism in the United Kingdom. In the present social unrest over there, Mormon missionaries are having unprecedented success in securing converts.

One advantage of being a Mormon is that, on joining the church, one becomes a saint right away. In other religions there are bothersome preliminaries.

Eighty-two years have elapsed since Joseph Smith dug out of a hill not far from Palmyra, N.Y., the original book, written by a prophet named Mormon on thin plates of gold fastened together with three gold rings, which contained a revelation. It was packed in a stone box, and an angel told Smith where to dig for it.

Afterward the angel flew away with the book, so that it is no longer extant in the original, but eleven "witnesses" (two of them brothers of Smith) swore that they saw it.

The book was written in strange characters described by Smith as "reformed Egyptian." He could not read even English very well, but the problem of translation proved not at all difficult, inasmuch as the angel had been so thoughtful as to provide him for the purpose with a pair of supernatural spectacles—two crystals set in a silver bow. With the aid of these he dictated a copy in English of scriptural style.

Smith, like other great men, had his little weakness. It was for the ladies. Sixteen years after the digging of the Mormon Bible he had another revelation. The angel came back and told him to issue an ecclesiastical edict approving polygamy. Whereunto he himself took steps to annex the wives of a number of the true believers. At least two of the husbands objected, and a tremendous row followed, the upshot being the incarceration of Smith at Carthage, Ill.—the Mormon settlement being then at Nauvoo. A mob broke into the jail and shot him to death.

His unmitigated leader-in-chief of the Mormons was later assumed by Brigham Young, who was one of the original Twelve Apostles. It was he who led the persecuted Latter Day Saints out to Utah, one of the wagons carrying a small flour mill, which during the pilgrimage ground wheat newly reaped from fields previously sown along the route by an advance guard.

Smith started the polygamy business, but Young, an exceedingly able man, developed it. He had forty-odd wives, and under his influence the population of Salt Lake City rapidly grew.

When it is necessary to load a plow or other heavy implement on the wagon, call for help. By planning things right, you can get such jobs done before the hands are away at something else.

Make steps for the back door that are easy to climb.

Pride has broken many a back. How many times have you lifted far beyond your strength, just to show that you could do it? Better go slow. We have just one body to wear out. Let us try to make it last as long as we can.

MONEY ORDERS.

Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Really Heavy Food.

The British Tommy takes his hardships lightly if we are to believe half the stories that came back from the front. One such represents two artillerymen discussing some trench pudding that they had looked forward to as a treat, but that came to them half cooked and soke.

"This 'ere puddin' ain't half 'eavy stuff, said Alf with a grimace.

"Oh, that's nothing!" replied Bill. My missus made some pudding one day that we couldn't eat; so she gave it to the ducks. A few minutes later a little neighbor boy knocked at the door and said, "Missus Jofies, yer ducks have sunk!"

Minard's Liniment Relieves Neuralgia.

In Georgia they tell a story of a politician who was seeking to win the votes of his district to the end that he might be sent to the House of Representatives. In one speech he thought it might be well to refer to some trench pudding that he had looked forward to as a treat, but that came to them half cooked and soke.

"Gentlemen," he said oratorically, "I got my start in life by working in a general store for three dollars a week, yet I managed to save money."

As he paused impressively a shrill voice from the group of auditors demanded, "Was that before they invented cash registers?"

The Wrong Reaction.

In Georgia they tell a story of a politician who was seeking to win the votes of his district to the end that he might be sent to the House of Representatives. In one speech he thought it might be well to refer to some trench pudding that he had looked forward to as a treat, but that came to them half cooked and soke.

"Gentlemen," he said oratorically, "I got my start in life by working in a general store for three dollars a week, yet I managed to save money."

As he paused impressively a shrill voice from the group of auditors demanded, "Was that before they invented cash registers?"

Minard's Liniment Co., Limited.

Dear Sirs,—I can recommend MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results.

Yours truly,
T. B. LAVERS,
St. John.

World's Deepest Well.

One of the seven experimental boreholes being sunk for oil in Derbyshire has now been drilled to a depth of nearly 4,000 feet, according to latest reports.

There is a well in South Africa that is over 8,000 feet deep, and there are at least a score in the United States whose depths vary between 6,000 feet and 7,000 feet.

The world's deepest well, however, is situated in the neighborhood of Gobelins. Boring was started in 1892, and continued intermittently up till the outbreak of war, when the extraordinary depth of 18,000 feet had been reached, at a total cost of \$200,000.

Weird From the Start.

Visitor—"So this is the haunted house? How did it get such a reputation?"

Native—"Well, there's been something uncanny about it from the beginning. Even when it was built it didn't exceed the contractor's estimate."

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruit taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California!"

Save Your Back From Aching.

Rig up some pulleys and ropes over the big barn floor to take off the heavy wagon-box and the hay rigging; do not lift it off by main force.

Get a small tackle-block, fit it up with ropes and use it to lower barrels of vinegar and other heavy things into the cellar.

When building a ladder, put the rungs close together. For long ladders, those that can be extended by one man are best. Some long ladders are so heavy that you need to have a neighborhood raising every time you put one up. Don't try it alone; liable to bring on rupture or dislocated vertebrae.

In setting the crate along when digging potatoes, let somebody help you. Don't say, "I can do it myself." You can, but a hand on the other end of the crate will save the backache.

When it is necessary to load a plow or other heavy implement on the wagon, call for help. By planning things right, you can get such jobs done before the hands are away at something else.

Make steps for the back door that are easy to climb.

Pride has broken many a back. How many times have you lifted far beyond your strength, just to show that you could do it? Better go slow. We have just one body to wear out. Let us try to make it last as long as we can.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others. It works!

WELL SATISFIED WITH BABY'S OWN TABLETS

Mrs. A. Bernard, La Presentation, Que., writes:—"I have used Baby's Own Tablets for my baby and am well satisfied with them. I have recommended them to several of my friends who have also used them with beneficial results. The Tablets are a mild but thorough laxative which regulate the stomach and bowels and thus prove of benefit in cases of indigestion, constipation, colic, colds, etc. They are sold by medicine dealers or by mail, at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Obeying Instructions.

As he weighed out the sugar the grocer's boy whistled lustily.

"Don't you know that it is very rude to whistle while you are waiting on a lady?" said the elderly customer, severely.

"Well, the gov'nor told me to do it when I served you," explained the boy.

"He told you to whistle," said the customer in great surprise.

"Yes, 'nt." He said, "if ever we sold you anything we'd have to whistle for the money."

Minard's Liniment Co., Limited.

Dear Sirs,—I can recommend MINARD'S LINIMENT for Rheumatism and Sprains, as I have used it for both with excellent results.

Yours truly,
T. B. LAVERS,
St. John.

World's Deepest Well.

One of the seven experimental boreholes being sunk for oil in Derbyshire has now been drilled to a depth of nearly 4,000 feet, according to latest reports.

There is a well in South Africa that is over 8,000 feet deep, and there are at least a score in the United States whose depths vary between 6,000 feet and 7,000 feet.

The world's deepest well, however, is situated in the neighborhood of Gobelins. Boring was started in 1892, and continued intermittently up till the outbreak of war, when the extraordinary depth of 18,000 feet had been reached, at a total cost of \$200,000.

Weird From the Start.

Visitor—"So this is the haunted house? How did it get such a reputation?"

Native—"Well, there's been something uncanny about it from the beginning. Even when it was built it didn't exceed the contractor's estimate."

Save Your Back From Aching.

Rig up some pulleys and ropes over the big barn floor to take off the heavy wagon-box and the hay rigging; do not lift it off by main force.

Get a small tackle-block, fit it up with ropes and use it to lower barrels of vinegar and other heavy things into the cellar.

When building a ladder, put the rungs close together. For long ladders, those that can be extended by one man are best. Some long ladders are so heavy that you need to have a neighborhood raising every time you put one up. Don't try it alone; liable to bring on rupture or dislocated vertebrae.

In setting the crate along when digging potatoes, let somebody help you. Don't say, "I can do it myself." You can, but a hand on the other end of the crate will save the backache.

When it is necessary to load a plow or other heavy implement on the wagon, call for help. By planning things right, you can get such jobs done before the hands are away at something else.

Make steps for the back door that are easy to climb.

Pride has broken many a back. How many times have you lifted far beyond your strength, just to show that you could do it? Better go slow. We have just one body to wear out. Let us try to make it last as long as we can.

Laugh When People Step On Your Feet

Try this yourself then pass it along to others. It works!

WELL SATISFIED WITH BABY'S OWN TABLETS

Mrs. A. Bernard, La Presentation, Que., writes:—"I have used Baby's Own Tablets for my baby and am well satisfied with them. I have recommended them to several of my friends who have also used them with beneficial results. The Tablets are a mild but thorough laxative which regulate the stomach and bowels and thus prove of benefit in cases of indigestion, constipation, colic, colds, etc. They are sold by medicine dealers or by mail, at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Obeying Instructions.

As he weighed out the sugar the grocer's boy whistled lustily.

"Don't you know that it is very rude to whistle while you are waiting on a lady?" said the elderly customer, severely.

"Well, the gov'nor told me to do it when I served you," explained the boy.

"He told you to whistle," said the customer in great surprise.

"Yes, 'nt." He said, "if ever we sold you anything we'd have to whistle for the money."

BITS OF HUMOR

FROM HERE & THERE

A Failure?

Agent: "How are you gettin' on with your incubator?"

Farmer Meddlergrass: "Why, the dern thing hain't laid an egg since I got it."

Wanted to be Located.

Doctor (to old dorky patient)—"I shall call again to-morrow, but will leave this prescription in case you suffer pain in the interim."

Patient—"War'bouts is dis yar interin', doctah, so A'll know when Ah feels de pain comin' on."

Frightened.

"What became of that young man who was paying so much attention to you?"

"I don't know. I let him walk to the grocery store one afternoon with me and after he saw how much we had to pay for things to eat he just quit coming to see me."

"FIDDLE-FIT"

Keep Liver and Bowels Clean and Active with "Cascarets"

Sick headache, biliousness, constipated tongue, sour, gassy stomach—always trace this to torpid liver; delayed fermenting food in the bowels.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret to-night will have you feeling clear, rosy and as fit as a fiddle by morning. They work while you sleep.

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription — to addresses in Canada and all parts of the Empire, \$1.50 per year. If for eight months, to address in the United States, \$2.00 per year — advance in advance.
ADVERTISING — The Transcript has a large and constantly growing circulation. A limited amount of advertising will be accepted, at moderate rates. Prices on application.
JOB PRINTING — The Transcript has a superior equipment for printing on premium stock, pamphlets, circulars, posters, book forms, programmes, cards, envelopes, office and wedding stationery, etc.
Address all communications and make remittances payable to A. E. SUTHERLAND.

THURSDAY, OCTOBER 23, 1919

THIS IS NO FAIRY TALE

As a matter of fact, merchants cannot sell cheap footwear, or more properly, footwear at a cheap price. People refuse to buy it. Ask a woman \$8.50 for a pair of shoes and she turns up her nose. Ask her \$10 or \$12 for the same shoe and the sale is made. This is no fairy tale. The truth of the statement has been tested many times over both in the United States and in Canada, and no longer ago than last week Governor Cox of Ohio, who was investigating the subject, told of instances where boot and shoe dealers could not interest buyers in good substantial footwear at moderate prices, but that these same dealers were selling immense quantities of boots and shoes at absurdly high prices, mostly to people who apparently could ill afford to buy them. The sum and substance of Governor Cox's verdict was that the people of his State had gone mad. And there seems to be reason in his argument. — Saturday Night.

WHAT ABOUT IT, MOTHERS?

Do you ever visit the little red school house? Do you ever go over at an afternoon just to see how things are going and get acquainted with conditions there?
Mrs. H. G. Laws of Cayuga, who is becoming well known through her connection with the U. F. O. and the U. F. W. O., has taught school in rural districts for twenty-two years, and she says frankly that she can count on the fingers of one hand the mothers who have come to visit her school because they were interested in the school and the progress of their children. She would have welcomed and appreciated their interest keenly at any time.
Mrs. Laws maintains that if we are to better the educational conditions in the rural communities of Ontario, we must first interest and get the cooperation of the mothers. Ninety-nine out of every hundred farm women do not see farther than their door step. "Consolidated" schools won't help; technical schools won't solve the problem. Nothing in Heaven will help it, but the awakening of the women of the country to their duty in this regard.
In the city of Ottawa there are so many government employees that it is hardly safe for anyone to openly criticize the service or to hint that more people than are needed are employed. — Niagara Falls Review.

GLENCOE FAIR PRIZE LIST

(Continued from last week)

Grain and Seeds
Fall wheat, white — 1 John Gould, 2 Wm. Gould, 3 W. A. McCutcheon.
Fall wheat, red — D. M. Gillies.
Barley, bearded — W. A. McCutcheon.
O. A. C. oats — 1 W. A. McCutcheon, 2 John Gould, 3 D. N. Munroe.
Black oats — W. A. McCutcheon.
Oats, any other kind — 1 W. A. McCutcheon, 2 D. M. Gillies, 3 Frank Siddall.
Peas — W. A. McCutcheon.
Beans — W. A. McCutcheon.
Corn, yellow, in ear — 1 Chas. Osier, 2 W. A. McCutcheon.
Corn, White Flint, in ear — 1 Wm. Gould, 2 W. A. McCutcheon, 3 D. M. Gillies.
Corn, Red Glaze, in ear — W. A. McCutcheon.
Corn, Golden Dent, in ear — 1 John Gould, 2 Frank Siddall, 3 Walter Hallstone.
Corn, Yellow Dent, in ear — 1 Wm. Gould, 2 John Gould.
Corn, Whitecap Dent, in ear — 1 Frank Siddall, 2 W. A. McCutcheon, 3 D. M. Gillies.
Corn, Wisconsin No. 7, in ear — 1 Wm. Gould, 2 Chas. Osier, 3 Louis Osier.
Corn, any other kind, in ear — Louis Osier.
Popcorn — 1 W. A. McCutcheon, 2 W. A. Hagerty, 3 Wm. Gould.
Best corn for husking — 1 Wm. Gould, 2 John Gould, 3 D. M. Gillies.
Clover seed, alsike — W. A. McCutcheon.
Timothy seed — W. A. McCutcheon.
Alfalfa seed — D. A. Coulthard.
Spring wheat — 1 D. A. Coulthard, 2 D. M. Gillies, 3 Frank Siddall.
Special for best white oats — John Gould.
Special for best sheaf of oats from binder — 1 John Gould, 2 James H. Walker, 3 Wm. Gould.
Roots and Vegetables
Variety of potatoes, properly named — Wm. McCutcheon.
Mangels, long red — 1 John Gould, 2 Wm. McCutcheon.
Mangels, any other kind — Wm. McCutcheon.
Sugar beets — 1 Chas. Osier, 2 Hugh McCutcheon.
Swede turnips — 1 Roy Goff, 2 Walter Hallstone.
Carrots, long white — 1 John Gould, 2 Wm. McCutcheon.
Blood beets, long — 1 Louis Osier, 2 Wm. Gould.
Turnip beets — 1 Edway Hurdle, 2 Wm. Gould.
Table carrots, long — 1 Edway Hurdle, 2 D. A. Campbell.
Table carrots, short — 1 D. A. Coulthard, 2 Wm. Gould.
Parsnips — 1 Edway Hurdle, 2 Louis Osier.
Onions from seed, yellow — 1 Wm. McCutcheon, 2 John Gould.
Onions from seed, red — 1 Wm. McCutcheon, 2 Wm. Gould.
Onions, Prize Taker — 1 Wm. McCutcheon, 2 Wm. Gould.
Onions from small tops — Wm. McCutcheon.
Silverskin onions — Wm. McCutcheon.
Onions with small tops — Wm. McCutcheon.

GLENCOE FAIR PRIZE LIST

White cabbage — 1 Wm. Gould, 2 W. A. McCutcheon.
Red cabbage — Wm. Gould.
Cauliflower — 1 Wm. McCutcheon, 2 Wm. Gould.
Red peppers — 1 Hugh McCutcheon, 2 Wm. McCutcheon.
Cucumbers, ripe — 1 Wm. McCutcheon, 2 W. R. Quick.
Citrons — 1 Louis Osier, 2 Charles Osier.
Watermelons — Wm. Gould.
Mammoth squash — 1 Hugh McCutcheon, 2 Edway Hurdle.
Hubbard squash — 1 Louis Osier, 2 Hugh McCutcheon.
Squash, any other kind — Edway Hurdle.
Tomatoes, red — 1 Wm. Gould, 2 Hugh McCutcheon.
Tomatoes, yellow — Wm. McCutcheon.
Pumpkins, field — 1 Hugh McCutcheon, 2 John Gould.
Display garden roots and vegetables — 1 Wm. McCutcheon, 2 Hugh McCutcheon.
Potatoes, Irish Cobbler — 1 Wm. Gould, 2 D. A. Coulthard.
Dooley potatoes — 1 D. A. Coulthard, 2 Walter Hallstone.
Green Mountain potatoes — Wm. Gould.
Early Rose potatoes — Wm. Gould.
Potatoes, any other kind — 1 Wm. McCutcheon, 2 Wm. Gould.
Special for best collection roots — Wm. McCutcheon.
Special for best Yellow Globe onions — Wm. McCutcheon.
Special for best sugar beets — Chas. Osier.
Fruit
Variety of apples, properly named — Wm. Gould.
Northern Spy apples — 1 James Lethbridge, 2 Wm. Gould.
Golden Russet apples — John Gould.
American Russet apples — John Gould.

Ben Davis apples — 1 Wm. Gould, 2 John Gould.
Mann apple — 1 James Lethbridge, 2 Wm. Gould.
Ribson Pippin apple — Wm. Gould.
Talmont Sweet apple — Wm. Gould.
Wealthy apple — James Lethbridge.
Fall pears — 1 Wm. Gould, 2 W. A. McCutcheon.
Winter pears — 1 J. H. Walker, 2 Wm. Gould.
Crab apples — 1 W. R. Quick, 2 D. A. Campbell.
Special for person taking most first prizes on fruit — Wm. Gould.
Plants and Flowers
Coleus — Edway Hurdle.
Asters, 1 variety and color — D. A. Campbell.
Dahlias — James Walker.
Margolds — D. A. Campbell.
Zinnias — D. A. Campbell.
Table bouquet or basket — James Walker.
Domestic Manufactures
Rag floor runner or rug — 1 John Thomson, 2 Sarah Munroe.
Braided floor rug or mat — 1 D. A. Campbell, 2 Mrs. W. A. McCutcheon.

TODAY

HELP HIM!

Support the Boys' Naval Brigades

Because these are the only organizations training Canadian boys for service in our merchant fleet now being built.

Canadians Must Sail the Seas

Because we cannot leave our growing export trade at the mercy of foreign seamen.

Canada Needs Trained Canadian Seamen

The Naval Brigades Train Our Boys

\$500,000 is Needed

Because the work of the Boys' Naval Brigades and the other branches of the Navy League's activities are financed by public contributions.

The Campaign Must Be a Success

Because Canada must be assured that her increasing surplus products will reach overseas markets.

The Race for Export Markets

is on. One quarter of the world's shipping was lost in the war. Canada cannot buy or rent ships and so is building them, and must be in a position to man them with trained Canadian seamen.

NELSON DAY CAMPAIGN

for \$500,000 October 21-22-23

"Canadians Must Sail The Seas"

Campaign Committee for the Province of Ontario:
Chairman: SIR JOHN C. EATON Vice-Chairman: A. M. HOBBERLIN
Hon. Treas.: SIR EDMUND WALKER Assist. Treasurer: N. L. MARTIN
34 King Street West, Toronto

We are Showing
a
Wonderful Collection of
Velvet Gowns
at \$25
Women's and Misses

One can judge by the sketch, how smart and simple are the styles. The Coatee model is bound with silk braid while the model with Pannier sides is braided as shown. Collarless styles with heavy silk girdles. Colors — navy, brown and black.

We Accept Canadian Money at Par

— 1 Willie McMillan, 2 Mrs. John Thomson.
Marine, copy — Willie McMillan.
Fish or game, copy — 1 Mrs. John Thomson, 2 Willie McMillan.
Figures or group, copy — Mrs. John Thomson.
Still life — 1 Mrs. John Thomson, 2 Willie McMillan.
Fruits, grouped, from object — Mrs. John Thomson.
Pencil drawing, free hand — D. A. Campbell.
Pen and ink drawing — Willie McMillan.
Best piece of original art work — Willie McMillan.
Special for best display of amateur photographs — D. A. Campbell.
Special for party taking most first

prizes in arts — Willie McMillan.

The Bowels Must Act Healthily — In most ailments the first care of the medical man is to see that the bowels are open and fully performing their functions. Parmelee's Vegetable Pills are so compounded that certain ingredients in them act on the bowels solely and they are the very best medicine available to produce healthy action of the bowels. Indeed, there is no other specific so serviceable in keeping the digestive organs in healthful action.

 RHEUMATISM, NEURITIS, SCIATICA, LUMBAGO, NEURALGIA, GOUT ETC.
 ASSURE RELIEF FOR THE WORST HEADACHE
 \$1.50 PER BOX
 (TEMPLETON'S PHARMACY, 112 KING ST. W., TORONTO)

Humanity has lacked a practical rheumatic remedy since time began. Fortune is spent yearly at hot springs, electric baths and hospitals to obtain relief, yet better results are achieved right at home by using T.R.C.'s—the common sense treatment. Just compare cost and results with any other treatment and you will be convinced. Ask your druggist or write us for our new booklet. It is interesting and costs you nothing (Templeton's, 112 King St. W., Toronto). We mail anywhere on receipt of \$1.00.

Sole Agent for Glencoe, H. I. Johnston, Pharm. B., Druggist, Optician and Stationer.

GRAND TRUNK RAILWAY SYSTEM

THE DOUBLE TRACK ROUTE

between MONTREAL, TORONTO, DETROIT and CHICAGO

Unexcelled Dining-car Service.
 Sleeping Cars on night trains and Parlor Cars on principal day trains.

Full information from any Grand Trunk Ticket Agent or C. E. Horning, District Passenger Agent, Toronto, C. O. Smith, Agent, Glencoe; telephone No. 5.

WOODGREEN

Mrs. Daum and Miss Kate Lumley have returned home after spending a week with friends in Stratford, Mitchell and Fullarton.
 Wm. Weekes of London spent the week-end with his parents, Mr. and Mrs. Edwin Weekes.
 Dick Jackson of Windsor spent the week-end at the home of Thos. Simpson, River road.
 Mrs. George Scrimshaw spent a few days in Glencoe last week.

Wedding invitations printed in the latest style and with neatness and despatch at The Transcript office.

The Rural Deanery meeting which was postponed by the Bishop some time ago will be held in St. John's church on Friday, November 7. This date has been fixed by the Bishop himself and he will give the special addresses.

The Presbyterian missionary auxiliary monthly meeting will be held in the school room on Monday afternoon, October 27, at 8 o'clock. A cordial invitation is extended to all the ladies of Glencoe and neighboring churches to hear Miss Mitchell, field secretary, speak.

It is pleasing to read that Sir Adam Beck has intimated that, despite his defeat as member for London, he has no intention of presenting or resigning his position as chairman of the hydro-electric commission. The country can ill afford to lose the services of so useful a man as Sir Adam.

The Fletcher Manufacturing Company recently installed a complete system of fire protection in their works at Glencoe, including a rock well which furnishes abundance of sparkling clear water, wholesome for drinking purposes. Here is a good foundation for a waterworks system for the town.

The annual free distribution of samples of seed grain is being conducted at the Central Experimental Farm, Ottawa, by the Dominion Cerealists. Applications must be on printed forms which may be obtained from the Dominion Cerealists. As the stock of seed is limited, farmers are advised to apply early.

A serious accident on the G. T. R. train No. 16, from Detroit to Montreal, was averted by the cool action of John Sheehy, engineer of the train, when the engine's tender jumped the track Saturday night near Chatham and tore up the ties for a quarter of a mile. Only by the sound judgment and consummate skill of Mr. Sheehy was the train, which was traveling at 35 miles an hour, brought to a stand without any loss of life.

SPECIAL NOTICES

The Morrison Girls, Oct. 30.
 Money to loan for farm property. Write to Box 34, Wardsville, 90.
 Good home in Glencoe for sale cheap. Apply to G. M. Barker.
 Chopping Tuesdays, Thursdays and Saturdays.—W. R. Stephenson, Appin.
 Alex. McAlpine & Son, dealers in flour and feed, coal, salt, cement, etc.
 Flour and feed for sale at store corner of Main and McKellar streets.—J. D. McKellar, 237.
 I still have some good bargains in second-hand and rebuilt automobiles.—Wm. McCallum.

Five thoroughbred registered Lincoln bucks, yearlings, for sale.—D. D. Graham, lot 2, con. 3, Mosa.

An ever-changing succession of melody and entertainment—opera house, Glencoe, Thursday, Oct. 30. Don't miss it.

Mr. and Mrs. Alex. Dewar announce the engagement of their daughter, Nettie Mae, to Raymond Russell Tyrrell of Detroit, Mich.

The Battle Hill Relief Society will meet at the home of Mrs. Ed. Currie on Friday afternoon, October 24th, instead of Thursday as previously announced.

G. W. V. A. Glencoe branch will meet on Saturday night at 8 o'clock in the rooms of the O. D. E. opposite post office, for the election of officers and other business.

The Morrison Girls in "Stories and Songs of Today and Yesterday"—opera house, Glencoe, Thursday, October 30. Seats on sale next Saturday at Lumley's drug store.

One slightly-used top buggy and one nearly new double-seated top carriage; one set of double driving harness, as good as new, and one set of single harness.—Wm. McCallum.

Registered Shorthorns for sale—2 six-year-old cows, three-year-old cow with bull calf, 2 yearling heifers, 2 heifer calves, and 2 bull calves about 5 months old. Priced right for quick sale.—Wm. A. McCutcheon, 91.

All returned soldiers of Glencoe and district are invited to meet at the G. T. R. station on Thursday, October 23, at 2:15 to take part in the welcome to H. R. H. Edward, Prince of Wales. To secure uniformity, puttees will be worn with uniforms where possible.

Having bought out the grocery business of Charles Dean Main street, Glencoe, I would respectfully solicit a fair share of your patronage. Full stock of choice fresh groceries will always be at his store. Prices right, and a square deal.—George Westcott.

"We have added another forge to our blacksmithing business and will be able to handle all work entrusted to very expeditiously and in a satisfactory manner. Joe Baldwin, from Darlington, Wisconsin, a blacksmith with 19 years' experience and an expert horse-shoer, is now with us.—Don H. Love.

Just in—A full line of rubber footwear, including rubber boots in grey and black, overshoes, mackinaws, plain rubbers to fit any shoe in men's, women's and children's at last year's prices. Our stock of shoes is more complete than ever and nearly all bought before the last big raise in price, so that we can save you dollars in shoes.—Charles George.

The Junior W. A. of St. John's church will give an entertainment in the Sunday school room on Wednesday, October 29, at 8 o'clock. The program will consist of readings, recitations, solos and instrumentalists. A most humorous one-act play by the young people entitled "Our Aunt From California" will be included in the program. Concessions and help our missions. Admission—adults 25c, children 10c.

PERSONAL AND SOCIAL

—Mrs. Ireland of Bothwell is spending a few days with Mrs. John Hayter.
 —Mr. and Mrs. Harry Farnan of London are visiting Mr. and Mrs. Wm. McCallum.
 —Miss Mayne Rankin left on Saturday to take a position at 84 Stanley street, London.
 —Miss Jennie Reycraft has arrived home after spending a month with friends in Windsor and Detroit.
 —Dr. and Mrs. T. F. Cole and Mr. and Mrs. Godley of Romulus, N. Y., spent last week at A. H. Copeland's.
 —Miss Helen Crothers of London spent the week-end with Mrs. Wm.

"I Hope Every City and District Will Win My Flag"

When Edward, Prince of Wales—eager, bright eyed, smiling and sincere—arrived in Canada in August, and when he voiced his great admiration of the wonderful achievements of Canadians, on the fields of battle and at home, once again we were thrilled with joyous pride.

He asked concerning Canada's reconstruction programme, and when he was told of the Victory Loan 1919, he graciously consented to the use of his Coat of Arms on a flag, which is to be the prize of honour for districts achieving their quota in the loan.

In dedicating "The Prince's Flag" at Ottawa on Labor Day, His Royal Highness said in part:—"It is a great joy to me to be associated with the loan, which is the bridge between war and peace, and which is finishing off the job."

"I hope every city and district will win my flag," Striking, and beautiful in design, this flag will form not only a unique memento of Victory Year, but a lasting and outstanding souvenir of the visit of His Royal Highness—a visit which will remain as one of the most memorable events in Canada's history.

The reproduction above shows the design of the flag. The body is white, the edge red; in the upper left hand corner is the Union Jack, and in the lower right hand corner the Prince of Wales' Coat of Arms.

The flag is made in two sizes, 4 feet 6 inches by 9 feet for small cities, towns and villages, and 7 feet by 13 feet 6 inches for cities of over 10,000 population.

Canada has been divided into canvassing districts by the Victory Loan Organization. Each city forms one district. Other districts have been determined according to population.

Each of these canvassing districts has been allotted a certain amount in Victory Bonds to sell. To win the Prince's Flag, therefore, a district has to sell its allotment. That is the one and simple condition.

Anticipating that many districts will buy far beyond their allotment, the organization decided that for each twenty-five per cent. excess of the quota one Prince of Wales' Crest be awarded. Thus the workers in a district doubling its quota will be the proud winners of four small crests for their Honour Flag. These crests will be sewn to the flag. The Prince's Crest—

the three ostrich plumes—is shown at the top of the coat of arms.

To every organization with fifty or more employees, where seventy-five per cent. of the enrollment invests a total of ten per cent. of the annual payroll in Victory Bonds, a supplementary Prince of Wales Flag in smaller form—48 inches by 34 inches—will be awarded.

The allotment for each district has been carefully considered, and is based on a conservative estimate of the purchasing power of the district.

Your district can sell its allotment and thus win the Prince's Flag, provided each person does his or her share.

You will gladly do your part and encourage your neighbour to do his. Remember YOUR purchase may be the one that decides whether or not your district is to be the proud possessor of the Prince's Flag.

The Prince's Motto is "I Serve" Will You also Serve?

Victory Loan 1919

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada.

614

Stevenson and other friends in Glencoe.

—Mr. and Mrs. Nell McKellar arrived here on Friday from the West and purpose making their home in Glencoe.

—Mr. and Mrs. Frank Hurley of West Lorne and Mr. and Mrs. Archer of Wardsville spent Sunday at Will Hurley's.

—Charles Tassie of Dresden and Miss Blanche Tassie of Detroit spent Sunday with Mr. and Mrs. James M. McGregor.

—Mrs. Duncan A. McRae of Chico, California, is on a visit to her mother, Mrs. Margaret Gillies, C. P. R. Diamond, Mosa.

—Mr. and Mrs. William Innes, who have been visiting their daughter, Mrs. J. A. Johnston of Mildmay, returned home on Monday.

—Harry Hick of Sarnia, who has just returned from a visit in England, is spending a few days with his uncle, John Hick, Glencoe.

—Miss Georgina McIntyre of London and Miss Eleanor McIntyre of Glencoe spent the week-end with Miss Sarah Gates, Napier.

—Mr. and Mrs. William McCallum and Miss Marguerita Garner left for Toronto yesterday where they will spend a few days. On their return they will bring several new ears with them.

McClary's Pandora

IT is every woman's right to have the best kitchen equipment that can be had. The Pandora saves trouble, saves work, and gives a woman the joy of baking things just as she wants them.

It is a woman's choice. Let us show you the smoothly working grates, the clear oven door, the fine thermometer. Let us explain why the oven is so evenly heated. You want the best for your kitchen. Then see the Pandora.

Sold by Jas. Wright & Son

sex county, by the London city council.
 —Mrs. Stanley R. Luckham and two children of Richards, Alberta, Mrs. T. F. Paul of Netherhill, Sask., Cecil and Thomas McCormick of Watford, Mr. and Mrs. H. G. Small of Ridgeway and Scott Luckham of Walkerville were Sunday visitors at the home of Mrs. Luckham.
 Victory—bought but not paid for.
 Blank oil leases for sale at The Transcript office.
 Want of principle is the principal want of a mean man.
 Some men would rather go to jail than hustle for a living.

Kitchen Economy

If you consider its body-building powers Bovril is probably the most economical food you can buy. No other food, no matter how high its price, has been proved to possess Bovril's wonderful body building powers. Bovril saves but-hers' bills and is a great economiser in the kitchen.

Woman's Interests

Training For Citizenship.

Increasingly insistent is the demand that the schools of this Dominion teach citizenship—that they equip the child to do the full duty of a good citizen. It is not forgotten that the schools have for generations done excellent work; but the experience of the last four years has brought the realization that a change in method and in subject-matter—a shifting of emphasis—is urgently required. A young man may be an expert in arithmetic, in spelling, in writing, grammar, geography, and every other subject on the curriculum, and may, none the less, display qualities of brutality, inhumanity, wastefulness, and treason. It is not, indeed, a Bolshevik. An altered type of training, a new view of relative values, must come. A knowledge of the fundamentals on which rests the structure of democracy must be a part of all instruction worthy of the name. Education may make or mar a nation—it has done so in Europe and elsewhere.

What are the fundamentals? Honesty is one. Industry is another, and there are many more. Frugality is an important one, and one that is being overlooked in this new country. Civility was built or thrift, among other things—the pioneers were specialists in thrift.

Thrift is not hoarding; it is not miserliness; it consists not with the hoarding of money and resources, conservation of them, wise and thoughtful expenditure. The thrifty man is an optimist; he has stored up power.

And thrift must be taught in the schools. This will not add to the teachers' burdens, for every subject of study can be so taught that it helps to cultivate the practice of thrift. A Thrift Club in the classroom works wonders in the discipline of the subject; it gives the pupils something worth while to talk about and something worth while to think about. United for a common aim, they learn esprit de corps. They come to know the value of money and the principles of business; they are imbuing the necessary preparation for citizenship. For the attractive investment of small savings, War-Savings Stamps afford an excellent medium. This plan has been highly successful in the schools of Great Britain, of the United States, and of Canada.

Thrift taught in the schools encourages industry because children wish to earn so that they may save. And, more than ever in its history, the world needs to go to work. Production must be increased. Produce, save, invest, must become the universal slogan.

Cold Water vs. the Doctor.

Few people realize the value to the general health of the habit of drinking plenty of pure fresh water. It is said that to make up for the liquid waste of the body, about three pints should be drunk every day.

Often one will get up in the morning with a dull headache; the digestive system is in some way out of order. Often a glass or two of water will in a little while relieve the trouble. Again in the morning the stomach is full of mucus which makes it unfit for the immediate receipt of food. This mucus would mingle with the food and hinder digestion. A glass or two of water, drunk on getting up, will wash this mucus out of the stomach and leave it ready for breakfast. And, by washing out the system daily, it will surely prevent headache and derangement of the liver and kidneys.

It is said that the sipping of hot water has a most beneficial effect on the heart action and that it regulates the flow of the bile. But especially in our hurried Canadian life, early in the morning very few people have time to sit up and sip at a cup of hot water. Busy people will surely never adopt this habit; there is too much pressing to be done.

Neither should the water be drank cold, because this will lower the temperature of the stomach too much. The water is perhaps best heated to a little higher than the blood temperature, for then one may pause from other activities from time to time to take a swallow. If a little salt is added to the water, its beneficial qualities will be enhanced and the flavor will be less unpleasant. Better still would be a few teaspoonfuls of lemon juice with no sugar. The lemon juice acts on the liver. Yet, if one has plenty of time, there is no good reason why he may not sip hot water to his heart's content and get out of it the full physical benefit. The thing necessary is that in some manner a cup or two of hot or warm water should be taken into the system the first thing in the morning. Water should not be drunk in any large quantity with or just after a hearty meal, because it thins the gastric juice and thus hinders digestion.

Some acids and alkalies combined will chicken a pudding or a gravy, because with heat it expands in volume. Also that is why any starchy food, such as potatoes or rice, for instance, must be thoroughly exposed to a high temperature so that the cellulose structure of the starch may be thoroughly broken, and thus made digestible.

Some acids and alkalies combined will chicken a pudding or a gravy, because with heat it expands in volume. Also that is why any starchy food, such as potatoes or rice, for instance, must be thoroughly exposed to a high temperature so that the cellulose structure of the starch may be thoroughly broken, and thus made digestible.

Heat has the opposite effect on sugar, as it dissolves it. Any dish having contained a sugary mixture should be cleaned with hot water from the very start.

Heat in combination with moisture has what might be called an explosive effect upon starch, for it causes the tiny cells that compose any starchy food to swell. That is why a tablespoonful of cornstarch, for example, will thicken a pudding or a gravy, because with heat it expands in volume. Also that is why any starchy food, such as potatoes or rice, for instance, must be thoroughly exposed to a high temperature so that the cellulose structure of the starch may be thoroughly broken, and thus made digestible.

CHAP. XVI.—(Cont'd.)

"Yes, and don't you see? I'm not going to mind now ever what he says and does, no how glum he is; for I know down inside he's got a heart. And only think, I look like her!" finished Betty, suddenly springing to her feet, and whirling about in ecstasy. "Oh, it's so exciting, isn't it?"

But her mother did not answer. She did not seem to have heard, perhaps because her back was turned. She had crossed the room to the window. Betty, following her, put a loving arm about her shoulders.

"Oh, and, mother, look!" she exclaimed eagerly. "I was going to tell you. I discovered it last Sunday. You can see the Denby House from here. Did you know it? It's so near dark now, it isn't very clear, but there's a light in the library windows, and others upstairs, too. See? Right through the trees, set in the middle of that open space. That's the lawn, and you can just make out the tall white pillars of the verandah. See?"

"Oh, yes, I see. Yes, so you can, can't you?"

Helen's voice was light and cheery, and carefully impersonal, carrying no hint of her inward tumult, for which she was devoutly thankful.

CHAPTER XVII.

It was shortly before Christmas that Frank Gleason ran up to Dalton. He went first to see Burke Denby. As they sat at dinner, with disconcerting abruptness, came the question: "Where'd you get that girl, Gleason?"

"G-girl?" The doctor waved a minute to think. Incidentally he was trying to swallow his heart—that big lump in his throat.

"Miss Darling?" Oh! The doctor waved his hand inconspicuously. He still wanted time. He was still swallowing at that lump. "Why, she—she—she's the daughter of an old friend. Why, isn't she all right?" He feigned the deepest concern.

"All right!"

Voice and manner carried a message of satisfaction that was unmistakable. But the doctor chose to ignore it. The doctor felt himself now on sure ground. He summoned a still deeper concern to his countenance.

"Why, Denby, you don't mean she isn't all right?—or don't you like her ways?"

"But I mean she is all right, man," asserted the other impatiently. "Why, Gleason, she's a wonder!"

Gleason managed to utter a cool— "Really? Well, I'm glad, I'm sure."

"Well, she is. She's no ordinary girl. (If he could but hear that!) He smiled at the doctor to himself. "What do you think? She can actually tell me some things about my own curios!"

"Then they are more than—potatoes to her? You know you said—"

"Yes, I know I did. But just bear this. In spite of her seeming intelligence and capability, I'd been dreading to open those cabinets and let her touch those things and I had sent so many dear years together gathering. But, of course, I knew that that was silly. One of my chief reasons for getting her was the cataloguing; and it was about that, wasn't it?"

"So one day, after everything else was done, I explained what I wanted, and told her to go ahead."

"Well, and did she?" prompted the doctor, as the other paused. "She did—exactly that. She went ahead—way ahead of what I told her to do. Why, when I got home, I was amazed to see what she'd done. But best of all was her interest and her enthusiasm, and the fact that she knew and appreciated what they were. You see that's one of the things I'd been dreading—her ignorance—her indifference; but I'm glad she didn't."

whole self a Hallelujah Chorus of rejoicing. His countenance was still aglow with joy when, a little later, he rang the bell of a West Hill apartment house suite bearing the name, "Mrs. Helen Darling."

To his joy he found Helen alone; but hardly had he given her a hasty account of his visit to Burke Denby, and assured her that he was positive everything was working out finely, when Betty came in from the corner grocery store, breezy and smiling.

"Oh, it's Dr. Gleason!" she welcomed him. "Now, I'm glad mother didn't go with me to-night, after all—for we'd both be out then, and we should—"

"Which would have been my great loss," bowed the man gallantly, his approving eyes on Betty's glowing face.

"Oh, but ours, too—especially mine," she declared. "You see, I've been wishing you'd come. I wanted to thank you."

"To thank me?"

"Yes; for finding this lovely place for me."

"You like it, then?"

"I love it. Why, Dr. Gleason, you have no idea the wonderful things that man—"

"But you said you knew him," she broke in suddenly. "Don't you know him?"

"Oh, yes, very well."

"Then you've been there, of course."

"Many times."

"Oh, how silly of me!" she laughed. "As if I could tell you anything about antiques and curios! But hasn't he some beautiful things?"

"He has, indeed. But how about the man? You haven't told me at all how you like Mr. Denby himself."

Betty glanced at her mother with a rough shrug.

"Well, as I tell mother, now that I've got him trained, he does very well."

"My dear!" murmured her mother. "Trained?" The question was the doctor's.

"Yes, you see at first he was such a bear."

"Oh, Betty!" exclaimed her mother, in very genuine distress.

But Betty plainly was in one of her most mischievous moods. With another merry glance at her mother she turned to the doctor.

"It's only this, doctor. You see, at first he was so silent and solemn, and Benton and Sarah and Mrs. Gowing were so scared, and the whole house was so dark and silent and solemn, that it seemed some days as if I should scream, just to make a little excitement. But it's all very different now. Benton and Sarah are all smiles, Mrs. Gowing actually laughs sometimes, and the only trouble is there isn't time enough for Mr. Denby to get in all the talking he wants to."

"Then Mr. Denby seems happier?"

"Oh, very much. Of course, at first it was very much of a shock, but he's been in other ways. Why, the other day he found I could play and sing a bear."

"And he asked me to sing for him. And I did."

"Helen sat suddenly erect in her chair."

"Sing? You sang for Mr. Denby?"

she cried, plainly very much interested. "You hadn't told me—that!"

"I hadn't done it till this afternoon, just before I came home," laughed Betty.

"But what did you sing? Oh, you—you didn't sing any of those foolish, sentimental songs, did you?" implored Helen, half rising from her chair.

"But I did," bridled Betty. Then, as her mother fell back dismayed, she cried: "Did you suppose I'd risk sentimental things to a man who had just learned to laugh?"

"But, ragtime!" moaned Helen, "when he's always hated it so!"

"Always hated it so!" echoed Betty, with puzzled eyes. "Why, I hadn't played it before, dearie, I hadn't played anything!"

"No, no, I—I mean always hated everything gay and lively like ragtime," corrected Helen, her cheeks abnormal pink, as she carefully avoided the doctor's eyes. "Why didn't you play some of your good music, dear?"

"Oh, I did, afterwards, of course—Mazell and Schubert, and that jolly old love. But he liked the ragtime, too, all right. I know he did. Besides, it just did me good to live up the old house a bit. I know Benton was listening in the hall, and I'm positive Sarah and the cook had the dining room door open. As for Mrs. Gowing, she—dear old soul—just sat and frankly cried. And the merrier I sang, the faster the tears rolled down her face—but it was for joy. I could see that. And once I heard her mutter: 'To think that ever again I should hear music and laughter—here!' Dr. Gleason did Mr. Denby ever love somebody once, and do I look like her?"

Taken utterly by surprise, the doctor, for one awful minute, floundered in appalled confusion. It was Helen this time who came to the rescue.

"I shall tell the doctor he needn't answer that question, Betty," she said, with just a shade of reproval in her voice. "If he did know of such a thing, do you think he ought to tell you, or anybody else?"

Betty laughed and colored a little. "No, dear, of course not. And I shouldn't have asked it, should I?"

"But what makes you think he has?" queried the doctor.

"Because he said twice that I reminded him of some one, particularly with my hat on; and both times, afterwards, he looked so romantic and solemn—"

Betty's eyes began to twinkle—"that I thought maybe I was on the track of a real, live love-story, you see. But he hasn't said anything

Tone as delivered by The Brunswick

—Is really natural. This is due to the all-wood tone-chamber, oval moulded entirely from choice woods. No metal whatever. This superior construction complies with the approved law of acoustics. Like the soundboard of a fine piano or violin it gives the resiliency that unfolds—amplifies—and projects true tone. With this feature the Brunswick gives you also the

Ultona—that wonderful invention which plays every make of record exactly as it should be played. By a mere twist of the wrist the "Ultona" provides the exact weight, the correct diaphragm and the precise needle for any make of record.

—And out for yourself! Hear the Brunswick at your nearest dealer's. But first mail the coupon below, and let us show you the simple yet 100% efficient Brunswick new method of reproduction.

about it lately; so perhaps I was mistaken, after all. You see, really, he's quite like folks, now, since we've been working on the curios."

"And how are you getting along with those?"

"Very well, only it's slow, of course. There is such a mass of material, and so much to look up and study up besides. We're just getting it together and tabulating it now on temporary sheets. We shan't begin the real cataloguing on the final cards until we have all our material in hand, Mr. Denby says."

"But you aren't getting tired of it?"

"Not a bit! I love it—even the digging after dates. I'm sure you can understand that," she smiled.

"Yes, I can understand that," he smiled back at her. And now, for the first time for long minutes, he dared to look across the room into Helen Denby's eyes.

(To be continued.)

The Home Flower.

The home-flower! Grows it everywhere Where human folk abide? Men name a place, and speak it fair, Where one may breathe a fragrance rare, And rest just satisfied!

A place? Aye! There must be a place For everything that grows; A meadow, crag, a tiny space, A life small spot, but full of grace, If life in radiance flows!

A place where kindly words entreat And gentle touches be, Where joy and tender tear-drop meet, Where thorn and cross are counted sweet, And some one waits for me!

A place? Aye! Just one holy spot Where grows the biggemoss fair! The name! The where, they matter not, If only I am not forgot, And she awaits me there!

The annual production of sugar in the Philippines, approaching 1,000,000 pounds, and it soon may become the leading export of the islands.

Servant, Girl—"I'm so awfully sleepy in the morning doctor." "Ah! Have you a sweetheart, may I ask?" "Servant, Girl (blushing)—"Yes."

"Who is he, may I ask?" "He's the night policeman." "Ah, then, give him up, and fall in love with the milkman."

The Shah of Persia.

The Shah's correct title is "Shah-in-Shah," or "King of Kings."

He is also known as "Lord of Lords," "A god among mortals," and "Glorious beyond all compare."

Europeans have invented for him such titles as "The Footpath of Heaven," but these belong more to the realm of comic opera than reality.

The hereditary title to the Persian throne is known as "The Sword of the King."

The first Shah to visit Europe was Nasser-odeen Khan, who made a tour of Russia, France, Italy, and England in 1872-73, and was made much of when he came to London. The present Shah will visit Britain in the near future.

Thus a vessel ascending the Congo proceeds only ninety miles before reaching at Matadi, the first great rapids. Its passengers or freight, to get around the latter, must be transferred to a train for a "portage" of 250 miles; and further on there are two other long stretches that have to be covered in the same way.

By steamer and rail one can travel all the way from the Congo's mouth to Bukama, 2,500 miles up. In its upper reaches the river, though still wide, becomes very shallow, so that the steamboats plying those waters are small craft, such as one sometimes sees in Florida, with stern wheels and drawing no more than three feet.

From Bukama the journey may be continued by rail to Lake Tanganyika (a body of fresh water 400 miles long) down the lake 200 miles by steamer and by rail across what used to be German East Africa to a seaport, Dar-es-Salaam, on the Indian Ocean, a short distance south of Zanzibar.

Thus may one cross the whole of middle Africa to-day by steam.

"The reason why so few marriages are happy is because young ladies spend their time in making nets, not in making cages."—Swift.

In normal years the spice islands of Zanzibar produce 90 per cent. of the world's supply of cloves, an average crop approximating 14,000,000 pounds.

PROPOSED GARDEN SUBURB FOR QUEBEC

MODELLED AFTER SIMILAR ENGLISH TOWNS.

Canada's Diamond Jubilee to be Celebrated in Worthy Manner.

A group of influential citizens of Quebec city, including university professors, lawyers, journalists, medical and other professional men and government officials, have presented a memorial to the Mayor of Quebec asking for encouragement to form a housing company on the lines of the Co-partnership Tenants of England with a view to building a model garden suburb in Quebec, to commemorate the Diamond Jubilee of Canadian Confederation, July 1, 1927.

The committee wish to proceed under the Federal Housing Act and declare their willingness to accept its provisions. They propose to incorporate a housing company in the interests of better housing for working people, with a limited dividend of 6 per cent., the capital to be redeemed in a thirty years' period. They undertake to supply private capital to the extent of \$25,000 (15 per cent. of the estimated cost) and ask assurance from the city of Quebec that a loan will be granted from the Quebec apportionment under the Federal housing grant equal to \$1,275,000 (85 per cent. of the estimated cost). The committee estimate the cost of the project at approximately \$1,500,000. The allocation to the province of Quebec under the Federal grant is \$7,000,000.

An interesting project.

The memorial includes a plan of a "confederation garden village" with all streets and boulevards converging to a circular civic centre named "Canada" with provision for "places" named after the principal cities of the Dominion, such as "Toronto Place."

A special district is set aside for manufacturing purposes so as to prevent the familiar encroachment of residential property and of the elements of domestic life. The garden suburb is surrounded by four playgrounds named Ungava, Keewatin, Newfoundland and Alaska. This plan is intended as a guide in the development of the project.

The annual rent of the houses will be fixed at 10 per cent. of the total cost of the house and lot and the rents will be from \$15 upward. A determined effort will be made to supply houses for families of small incomes, though there is no intention of segregating any one class of residents.

The project has qualities of idealism, but such projects are no longer "castles in the air." They have been built on solid ground in other countries and they are the deliberately chosen methods for the restoration of the devastated regions of France and Belgium. They are admitted to be economically sound by the serious students of sociology and the best solution for the multitude of social evils attendant upon the uncontrolled development of cities.

In African Waters.

The Congo will be called the Amazon of the Dark Continent. They are the two greatest rivers in the world if measured by the volume of water they discharge into the ocean.

In one very important respect, however, they are strikingly different. For whereas the Amazon is comfortably navigable for more than 2,300 miles from its mouth, the Congo is beset by long stretches of impassable rapids.

The vast basin of the Amazon is low lying, flat territory, through which the mighty river and its tributaries (some of the latter huge streams) flow sluggishly. But the Congo, to reach the sea, breaks through a mountainous plateau.

Thus a vessel ascending the Congo proceeds only ninety miles before reaching at Matadi, the first great rapids. Its passengers or freight, to get around the latter, must be transferred to a train for a "portage" of 250 miles; and further on there are two other long stretches that have to be covered in the same way.

By steamer and rail one can travel all the way from the Congo's mouth to Bukama, 2,500 miles up. In its upper reaches the river, though still wide, becomes very shallow, so that the steamboats plying those waters are small craft, such as one sometimes sees in Florida, with stern wheels and drawing no more than three feet.

From Bukama the journey may be continued by rail to Lake Tanganyika (a body of fresh water 400 miles long) down the lake 200 miles by steamer and by rail across what used to be German East Africa to a seaport, Dar-es-Salaam, on the Indian Ocean, a short distance south of Zanzibar.

Thus may one cross the whole of middle Africa to-day by steam.

Danger in Stalk Fields.

Some stockmen are puzzled to know how to use the fodder remaining in the corn fields after husking time. Some years they turn stock into the fields and have no ill luck; other years the so-called "corn-stalk disease" has killed many of their best cattle and horses. Just why the stalks prove harmless some years, and deadly now and then, has never been rightly explained, but it seems likely that climate or atmospheric conditions have much to do with it.

Many cases of alleged corn-stalk disease now are known to be really cases of deadly hemorrhagic septicaemia. In these cases the animals have a discharge of frothy, bloody fluid from the nostrils or mouth, or bloody flux (dysentery) may precede death. After death, blood spots are found studding the mucous membrane lining the intestines and serous membranes of closed cavities. Red blotches also are found under the skin. In other cases impaction of the paunch (rumen) occurs and ends in death, the affected animal showing crazy symptoms similar to those seen in ordinary corn-stalk disease, some cases of hemorrhagic septicaemia and in lead-poisoning.

There are other possible causes of loss in corn-stalk fields. We have known of at least one serious loss of cattle turned into a stalk field in which wild mustard had grown ripe and withered. The paunches of the dead cattle reeked with the fumes of mustard when opened. Other losses have been attributed to formation of salt-peter (nitrate of potassium) in the joints of corn killed by drought, wet weather or root-worms, while potassium acid has been blamed in instances where cattle have died from eating withered or second growth sorghum.

Whenever possible, cut, shock, and husk corn. Little if any loss ever has been attributed to corn fodder or corn stalks. Use a large part of the corn crop on every stalk farm in the form of well made and carefully stored silage. Silage is safe feed if free from mold and judiciously fed.

Keep all pregnant animals out of cornstalk fields. Let no horse pasture cornstalks. Such feed is far more dangerous for horses than cattle. Muzzle all horses used on wagons when standing corn is being husked. Have all cattle and sheep that are to be pastured on cornstalk fields vaccinated against hemorrhagic septicaemia before turning them into such fields. So far as valuable pure-bred or high-grade cattle are concerned test stalk fields by turning in a scrub or two before the other animals are allowed to pasture. Provide all animals pastured in cornstalk fields free access to pure drinking water at all times. Supply salt liberally. At first feed hay before turning cattle into stalk fields and gradually accustom them to the stalks. Fence off any portion of the corn field that has been killed by drought, wet weather or root-worms, or that has grown up to noxious weeds, such as mustard, jimson, etc.

In conclusion, shocked corn should be hauled from the field promptly when dry—not left there to waste and mold—and that when cornstalk disease is prevalent cattle should be yard fed on sound feed.

How to Make Tractors Pay on Small Farms.

There are hundreds of farms running in size from sixty to 100 acres. It is interesting to know what some of the owners think about tractors. One thing seems certain—the greater the acreage owned the more favorable the tractor appears to the owner.

Most owners of farms of sixty acres or more think that a tractor would be of much service to them, but they realize that it would not entirely supplant their horses. Therefore, they say that if they purchased a tractor they would be increasing capital invested—which they think is already very great—without materially increasing their revenue. It would be, in most cases, simply a means of en-

abbing them to do their work more easily and quickly.

If you should suggest to them that they could increase their earnings by working more land, most of them would tell you either that they can not get any land near their farms or else that they do not care to increase their acreage. Yet because of the advantages which a tractor offers—of doing work quickly and easily—some would like to have the services of a tractor.

One solution of this problem is that four or five farmers owning medium-sized adjoining farms club together and purchase one tractor to be used jointly by all, the horses furnishing the auxiliary power. By doing this the cost would be greatly reduced, because each used would pay according to the number of acres farmed. For instance, if one man farmed sixty acres, another one forty acres, a third eighty acres and a fourth 100 acres—a total of 240 acres—then the first would pay three-sevenths of the price of the tractor, the second two-sevenths, the third farmer four-sevenths and the fourth farmer eight-sevenths. Only the actual number of acres worked should be counted in making this basis of cost.

An objection raised is that all might want to use the tractor at the same time. It is certain that a tractor can work only at one place at a time, but it works rapidly enough that the work to be done on any one medium-sized farm can be done in a very short time, and then the tractor is ready to go to work on the next farm. Also, because of the small acreage of the farms, no great inconvenience because of delay in waiting for the tractor is likely to occur on account of conflict in the time of using. Furthermore, the idea is to use the tractor only for the heavier work.

Another advantage of this plan is this: In any group of men there is usually one who seems to have a natural ability along mechanical lines. If arrangements are made for such a man to handle the tractor on all the farms, greater service can be had from it; at the same time it will be better cared for and better maintained.

The plan of having a community tractor is well worth trying. Here is a chance to put into effect that magic word—co-operation. Why not talk it over with your neighbors, decide upon the number of farms one tractor can serve and purchase one?

Force Asparagus For Winter.

Crisp, fresh asparagus tips can be obtained in a continuous supply this winter by forcing.

Lifting the crowns from the field and placing them in cellars is the common method of forcing. Plow up the crowns late in the fall when the soil is moist, so as to have as much soil as possible adhere to them. Leave them exposed in the field until frozen, then cover with litter or remove to a shed in order to prevent alternate freezing and thawing, which is harmful. Store the crowns in a cool cellar or pit and bed as needed to supply a succession of shoots.

When ready for forcing, bring the crowns to the cellar and bed on two or three inches of loose soil on the floor. Place the clumps close together, fill the spaces between clumps with loose soil, and cover the crowns to the depth of about an inch. Moisten the soil thoroughly and keep it moist all the time, but never allow it to become drenched. For white shoots the light should be excluded.

For the first ten days after the crowns are placed, the temperature should be kept rather low, 45 to 50 deg. F. After this period a temperature of 55 to 60 deg. F. is satisfactory, although a higher temperature will not be injurious.

In about six weeks after bedding, the cutting can begin and will continue until the crowns are exhausted. As soon as the crowns become exhausted they should be removed and a new supply put in.

Increase Hog Production.

H. S. Arkell, Live Stock Commissioner, who has recently returned from a trip to Europe where he has reviewed the live stock market situation, has expressed his views, regarding Canada's position, in the October number of The Agricultural Gazette. He states that the London agents of our Canadian packers reviewed in disappointment the orders for Canadian goods—bacon, eggs, etc.—for which they could obtain but a tenth of the product they required. The unwarranted high price of hogs in Canada during the past month is but a reflection on the reputation of Canadian bacon, as compared with American, and demonstrates the effort of our packers to maintain their connection with old established clients in the face of short supplies. Since Denmark, within a year, will again be a factor on the bacon market, our only security for the future is full production and such a substantial export supply as must command recognition by its volume and quality. Short hog production is unquestionably the most dangerous policy Canada can adopt. This is true of eggs as well as bacon.

Buy Thrift Stamps.

Poultry

When building a poultry house money is saved by simple construction. First, select a well-drained site, if possible where there is protection from a windbreak or other farm buildings. Then build a house that is about twenty feet deep so that the wind will not strike the birds on the roosts, even when the front of the house is open during storms. Have plenty of windows for fresh air and sunshine as that is an important factor in keeping the farm flock in health.

Egg producers often keep flocks of five hundred Leghorns in one poultry house, but we seldom see more than one hundred birds of the heavier breeds to a flock. Of course, the Leghorns are active and seem to thrive better than heavier birds when large numbers are together. However, it seems as if some large farms have a capacity of more of the heavier birds than they are carrying and some flocks of Plymouth Rocks and Wyandottes might be managed in large numbers if the birds were given a large range and the best sanitary measures were used in the house. It is largely a matter of skill in management and the less a farmer is interested in poultry the smaller the flock he can manage with safety. It takes much work to handle large flocks of farm poultry in a large range, and few general farmers have the time to do it exactly right.

Nut Candies for Hollow'en.

Since no Hollow'en party is complete without candy and no Hollow'en candy without nuts, the following recipes will serve a good purpose at this time of the year. They are not too expensive even for these days, but, especially if the nuts, raisins, and perhaps some of the other ingredients can be obtained at first hand.

Butternut Caramels.—Boil together one cupful of brown sugar, two cupfuls of light-colored molasses, one cupful of sour cream or of sweet milk, and one-quarter pound of chocolate until the mixture turns hard in cold water. When it has reached the brittle state, stir in one large cupful of butternut meats—or hickorynut meats, if they are preferred—and pour the candy into buttered tins. The quantity should make about a hundred caramels.

Seed Grain Distribution.

The annual free distribution of samples of seed grain is being conducted at the Central Experimental Farm, Ottawa, by the Dominion Cerealists.

The following kinds of seed grain will be sent out this season:

Spring Wheat (in about 5-lb. samples), White Oats (about 4 lbs.), barley (about 5 lbs.), field peas (open garden peas) (about 5 lbs.), field beans (early ripening, only about 2 lbs.), flax for seed (about 2 lbs.), and flax for fibre (about 2 lbs.). Only one sample can be sent to each applicant.

Application must be on printed forms, which may be obtained from the Dominion Cerealists at any time after Sept. 1st.

As the stock of seed is limited, farmers are advised to apply early to avoid disappointment. No application forms will be furnished after Feb. 1st, 1920. C. E. Sanders, Dominion Cerealists.

Keeping Seed Corn From Mice.

Here is a good way to fight away the mice from the seed corn, we have found. After seed corn has dried out thoroughly it can be placed in microproof boxes having heavy wire screen sides, if such boxes are staked in single file with adequate distance between the stacks. Enough distance must be between them to allow a good and free circulation of air. These boxes should be made of uniform size so that each will act as a cover for the under one, thus requiring an extra cover for the top one of a stack only. Corn should be dry enough by the first of the year to store in this way. Some seasons some artificial heat might be needed, however, to make storing safe. Boxes should be of convenient size for handling. Three feet long and wide enough to admit the longest ears make a nice size, and will admit of easy handling. Solid board bottoms and ends are used. If made strong such boxes will last a lifetime, and will come in handy every year.

To Keep Faith in Your Banker.

Chances are you have never borrowed a dollar from your local banker, and you have been going to him all these years to have your various cheques cashed. All these years he has been hoping that you would come along some day and borrow some of his capital as working resource in your farm operations. Better not do it, though, if you are not going to have gumption to pay it back when due, and keep your word good always with him.

We have borrowed hundreds of dollars from our bankers to carry on operations. When you want to build, or buy a bunch of pigs, a cow, some sheep, a flock of hens, some good seed grain, just notice how gladly your banker will advance you the money to get it, providing you do not have the ready cash. You must come across with good paper, though, and it is easy to do this if once you establish a good credit with your bank, and then keep it good.

THE CHEERFUL CHERUB.

I'll fill my house with little dreams—When other folks live here you see My dreams will creep around at night And say hello to them for me.

Catarra in Children.

At the onset of catarra in a child, a hot bath may be given, with a hot lemonade, containing some such sweating medicine as sweet spirits of nitre (10 drops to a child of one year), or acetate of ammonium (20 drops). The child is put to bed, or confined, at any rate, in one room. The treatment is begun with a teaspoonful of castor oil. If the child is old enough, the throat may be sprayed three or four times daily with a solution of histriene (one teaspoonful to the ounce—8 teaspoonful). Or it may, if not too expensive even for these days, be done with a solution of salicylate of sodium (one-half teaspoonful of common salt to a tumblerful of water as hot as can be borne).

After the dry stage of the cold has passed, quinine may be given in one to two grain doses. (They may be had of the druggist as quinine chocolates, one grain to the chocolate). Or, if this causes headache and the throat is still sore, two grains of salicylate of sodium may be given every two or three hours.

We must remember that oftentimes acute nasal catarra may be associated with gastric or intestinal disturbances. A laxative is then helpful (a teaspoonful of syrup of figs at bedtime, also three times a day two grains of soda bicarbonate. It is well known, indeed, that a great many children have runny noses because they are given too much sweets and starchy food; this fact should be taken into account in the treatment.)

The child should be kept indoors a few days, especially when there is any liability to bronchitis; otherwise he may begin to go about if the weather is fine.

A child must not be over-dressed, lest it become susceptible to catarra. Always keep the child's feet warm and dry, and when taking it outdoors adapt its clothing to the surrounding atmosphere. As for indoors, there is so more reason for dressing a child

than that it should be dressed thus in summer.

Questions and Answers.
We are two sisters—the older, 19 years, is 5 ft. 4 in. in height, weight 112 lbs.; the other, 17 years old, 5 ft. 2 in., weight 107 1/2 lbs. Will you kindly give us our correct weight in regard to healthful standing. A younger sister is 9 years old, 45 1/2 in. high, weight 46 lbs. This child has been sickly, but of late is feeling well and eats plenty and regular.

Answer—The 19-year-old should tip the scales at 125, the 17-year-old at 112. For the 9-year-old I cannot give weight, but she appears to be considerably underweight. You seem to be a slim set of girls, and information for filing you out is being mailed.

I am troubled with bronchitis and have been ever since I was a child. I am thirty-five years of age but until the spring of last year I have not had to lose any time from work on account of it. For the last three years I have been exposed to the fumes of acids used in the making of T. N. T. and at present I am exposed to acetylene, aldehyde and acetic fumes. I had better tell you that I smoke cigarettes. I am more or less subject to changes in the weather, particularly as the winter draws to a close. All the time for the past two years I have become so exhausted as to be unable to work for two weeks or so. I only breathe through one nostril on account of a deformed nose, and if I go to sleep at night with my mouth closed I awaken with the pain that is caused behind my nose.

Answer—Many cases of bronchitis are due to the inhalation of fumes such as you describe. You must absolutely give up such work. And you have to quit smoking until you are fully restored to health. A good physician should give your nose local treatment. Further information is being mailed you.

Dig up canna roots as soon as the plants are killed. Cut the tops away and store the clumps whole; do not break them up until ready to set out again next spring. Leave plenty of soil on the clumps. Store in a moderately cool place where the roots will not freeze. The house cellar is generally suitable. There is little danger of heat injuring them unless they are too moist.

House all orchard machinery before cold weather—sprayers, cultivators, and the like.

SPOHN'S DISTEMPER
or Strateges in stalling, broad mures, cuts and all other most dangerous. The germ causing disease must be removed from the body of the animal. To prevent the trouble the same must be done.

SPOHN'S DISTEMPER COMPOUND
will do both—cure the sick and prevent those exposed from having the disease. Sold by your druggist or the manufacturers.

THREE NONSENSE GAMES

Although mystery and secrecy are supposed to be the keynote of a Halloween entertainment, there is nothing like a brisk nonsense game to wind up the evening successfully and send everyone away laughing. Here are three that will furnish plenty of fun, especially if a competent, quick-witted leader is chosen to conduct them. They may be simplified for use at children's parties.

"History Tangles.—The players are divided into two equal companies, which are drawn up opposite each other. The leader, who may be numbered with either side, suddenly tosses a bean bag or some other article to the player on the opposite side who appears to be least expecting it, and at the same time makes a glib misstatement of some important historical fact, such as, "Christopher Columbus won the battle of Queenston Heights." The recipient of the bag must instantly throw it back to another player with a sentence that in one breath corrects the previous misstatement and makes another equally inaccurate; for example, "Sir Isaac Brock won electricity from the air." If the third player thinks quickly enough of Benjamin Franklin he asserts that he was cast on a desert island, and throws the bag to an opponent. When a player is unable to take his cue promptly, he forfeits his throw, and the other side scores a point. The side wins that first makes a required number of points or that runs up the highest score in a given time.

"Find Your Neighbor.—This is a good game to play early in the evening, as it will quickly break the ice and promote sociability. After the players are seated in a circle, the leader advances from the centre and bows to one of the company with the greeting, "Your neighbor wishes to change seats with you." "How shall I know him?" the player asks, whereupon the leader briefly describes the neighbor and then begins to count twenty. If he says, "By his blue tie and gold scarf-pin," the player must make haste to exchange seats, before the counting stops, with a person whom the description fits. It will make no difference if the person whom he selects is not the one that the leader had in mind; a blue tie and a gold scarf-pin will justify his choice. It is important that the wearer of the tie and the pin shall keep quiet and not aid the searcher. If the player fails, he must pay a forfeit and take his neighbor's place. After ten or more forfeits have been paid they must be redeemed with amusing "stunts" in the usual way.

"Jolly Travelers.—The players are drawn up in two equal companies on opposite sides of the room. The leader, advancing and bowing to a player on the opposite side, announces, "I am a jolly traveler and have travelled far." He then makes a fantastic statement in regard to his adventures, as, for example, "While in Japan I had a cup of tea with the Mikado," and accompanies the statement with a pantomime of the tea-drinking. The second player now takes his turn, which is more difficult, for, after bowing to a third player, he must reproduce exactly the words and gestures of the first before he goes through his own performance. After enacting the tea-drinking scene, he may add, with illustrations, "And once I shooed an ostrich across the Sahara sands." The third player will of course have two absurd performances to go through besides his own. The longer the game lasts, the more ludicrous and difficult it grows. Some of the imaginary experiences may include kissing the Blarney stone in Ireland, fighting with a cinnamon bear in North America and fleeing from a Hottentot in Africa. If a player is unable to tell a travel tale or to repeat anecdotes of trips, he must join the ranks of the enemy. The game ends when one side or the other has taken all the players.

Leaves Are Valuable Fertilizer.
Because of their value as a fertilizer, leaves should be placed on garden and truck soil rather than allowed to be washed away or to be burned. Based on recent prices for fertilizer, 100 pounds of leaves contain fertilizing elements which would cost fifty-six cents if purchased in chemical fertilizer.

While leaf ash is also valuable as a fertilizer, the nitrogen in the leaves is lost when they are burned; more than one-half of their fertilizing value is represented by this element, which in the form of nitrate of soda sells for thirty-five cents a pound. Practically all the fertilizing compounds are quickly leached into the soil when the leaves are spread over the garden, thus reducing the chance for plant food loss as compared with burning and spreading the ash over the ground.

Plan on using the poultry manure to the best advantage by mixing it with hardwood ash and working it into the garden soil in the fall. Some crops are injured by spreading poultry manure near them in the spring, but if it is added to the soil in the fall, much of the caustic properties will be gone when the plants start to grow next spring. It pays to store the poultry manure gathered from the houses in dry barrels until enough has accumulated to make spreading profitable. At the present value of all fertilizers the manure from the poultry houses is well worth careful attention.

The Transcript.

THURSDAY, OCTOBER 23, 1919

NEWBURY

The death of Mary Ann McKenzie, widow of the late James Endlander, occurred at her home in Toronto last week. The remains were taken to Lacknow for burial. Deceased was the mother of the late Mrs. G. W. Snelgrove and was well known here. Her family will have the sympathy of friends here.

J. E. Burgess and wife of Dresden spent Sunday with his mother, Mrs. Armstrong.

Mrs. Sinclair of Toronto is visiting her daughter, Mrs. Wm. J. Armstrong. Mrs. Wm. Clarke of Pace was in town last week attending the funeral of her uncle, the late Robert Armstrong.

The Children's Day services in Christ church on Sunday were most interesting. The children marched into the church, the wee tots leading, all singing as they came and took their places in the chancel. The service was a splendid liturgical one, in which the children took part. Their singing was much appreciated. Rev. R. J. Murphy gave a helpful talk on the duty of the parents to the child and the child's duty to the parents.

NORTH EKFRID

The marriage of Miss Myrtle Klemm and James McDonald took place Wednesday, Oct. 16.

Wm. Down, jr., has been seriously ill and under the doctor's care.

Mrs. Sarah Hardy is home from a visit at Mount Brydges.

F. Graham has purchased two lots from Harry Hardy, on which he intends to build.

A large crowd gathered at the home of Sam Ramey last Friday evening with a wedding shower for Mr. and Mrs. Floyd Webber before they leave for their future home in Toronto.

NEWBURY CASH STORE

Large White Onions 90c per peck.
Sugar by the 100 lbs.
Best Red Salmon in stock.
All kinds of Dried Meats at lowest prices.

W. H. PARNALL

WARDSVILLE

Mrs. Jackson, who was visiting her sons in St. Thomas, has returned home.

Mrs. T. Mulligan has returned home after spending some time with her daughter, Mrs. Graham.

Mrs. Porter has returned home after visiting friends in Rodney and Highgate.

Miss Verna Husser has gone to London to take a position.

Mrs. Wood of Selkirk is visiting her brother, W. Dykes.

Gerald Randles had the misfortune to break his arm while cranking his car last week.

Arthur Atchison of New Ontario spent a few days at his home here last week.

Mrs. Hobbs of Birr is visiting her daughter, Mrs. J. Mulligan.

Mrs. John Mulligan, who was visiting her sister, came home Monday.

Will Minna spent the week-end at his home here.

Henry Dracey of Dakota is visiting his sister, Mrs. Purdy.

We are pleased to know that Mrs. John Bliton, who underwent a serious operation in London last week, is improving.

MELBOURNE

Mr. and Mrs. Kelly of Smith's Falls spent a few days with Mrs. Caven of this village.

Rev. Mr. Stewart, representative of the Ontario referendum committee, was in the Methodist church on Sunday morning, at Riverside in the afternoon and at Middlemiss in the evening.

Robert Hardy and family moved to their new home in London a few days ago.

Joseph Wellman and family have moved into the house vacated by Robert Hardy, and George Bees and family have moved into the Temperance House, which Mr. Bees recently purchased from Mr. Wellman.

George Robinson has purchased the house and lot of Mr. Bees and will move shortly.

A little daughter has arrived at the home of Mr. and Mrs. Sandy Williamson.

PARKDALE

Mrs. Donald Campbell, Komoka, and daughters, Miss Floss and Mrs. C. Westbrook, London, spent the week-end with the former's daughter, Mrs. Will Thompson.

Mrs. Cotte has returned to London after a visit with her daughter, Mrs. A. Bramer.

The Misses Haggitt spent Monday evening at R. Campbell's.

James Haggitt spent Sunday with friends at Clachan.

Mrs. E. Blain is slowly convalescing after her recent illness.

Misses Beattie and Ida Haggitt visited over Sunday with their friend, Mrs. Willick, Wardsville.

The Misses Smith, "Hillcrest," Wardsville, are improving their farm here by having some of the primitive rail fences removed and putting up wire fence.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

CAIRO

J. M. McGregor, C.E., of Glencoe is surveying the Burr drain.

Miss Cora Smith, after visiting friends here during the week, left for her home in London on Monday.

Quite a number from this vicinity attended the Armstrong anniversary on Sunday last.

Saturday the council met and transacted business. Among the items discussed was the resignation tendered by the clerk, D. M. Smith, who was appointed in 1882. The council refused to take action, and at present it is unknown who will be appointed.

On the 14th inst. a shower was tendered Miss Myrtle Curran, eldest daughter of Mr. and Mrs. John Curran, who is expected to enter matrimony soon. A number of valuable gifts were presented. An excellent program was arranged and carried out. The young ladies manifested their regard by preparing a bountiful lunch, after which the party dispersed.

Voting is proceeding vigorously, and it is expected that a large vote will be polled, as the ladies are quite an addition to the male element.

The temperance vote will carry if the ladies in this municipality can have their way.

ELMSVILLE

Mr. and Mrs. Fred F. Balsdon have returned to their home in St. Thomas after attending the bedside of the latter's brother, William G. Plaine, who has been very ill.

Miss Flora Hillman has returned to her home in Newbury.

Miss Irene McVicar has returned home after spending the week with her grandmother, Mrs. Yates, Newbury.

Miss Violet Plaine, who was called home from Jarvis to the bedside of her brother, William, who has been very ill, has taken a position in Glencoe with J. C. Elliott.

Arthur Joyce has bought the farm of the late Catharine Harris.

Mrs. Isabelle Armstrong is ill with a severe cold.

KILMARTIN

Miss Mary McAlpine left for London on Monday.

Mr. and Mrs. Donald Mitchell and family of Brooke spent Sunday at Alex. Dewar's.

Mr. and Mrs. D. Leitch and Mr. and Mrs. J. Summers of Oakdale spent a day this week with friends here.

Mr. and Mrs. Pierce and Mr. and Mrs. McDougald of Mount Brydges spent Sunday at John Secord's.

Mrs. Janet McIntyre is visiting friends in St. Thomas and Yarmouth.

Mr. and Mrs. Neil Munroe returned home last week after visiting their sons in Windsor.

Mrs. Hannah Little of Chatham has returned after spending some time at John Little's.

On Tuesday evening, Oct. 28, Miss Mitchell, travelling secretary of the W. M. S., will give an address in the church. Everybody welcome.

Mr. and Mrs. George F. Munroe and Mr. and Mrs. Duncan Leitch visited in Dawn recently.

We have Victory, but it is not paid for yet.

And this Victory Loan this fall.

THE DAILY MISERY OF ILL-HEALTH

Three Years of Suffering Quickly Relieved by "FRUIT-A-TIVES"

MR. GASPARD DUBORD

159 Avenue Pius IX, Montreal.

"For three years, I was a terrible sufferer from Dyspepsia and my general health was very bad. I consulted a physician and took his medicine and faithfully carried out his instructions; but I did not improve and finally the doctor told me I could not be cured. At this time, a friend advised me to try 'Fruit-a-tives' and I did so. After taking two boxes of 'Fruit-a-tives', I was greatly relieved; and gradually this marvelous fruit medicine made me completely well. My digestion and general health are splendid—all of which I owe to 'Fruit-a-tives'."

GASPARD DUBORD.

50c a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

CASHMERE

Misses Bessie and Ida Haggitt of Parkdale spent Sunday with Mr. and Mrs. Henry Willick.

Mr. and Mrs. Gordon Freer and children of Petrolia are spending a few days with Mr. and Mrs. Allen Sittler.

Mrs. J. Willick and daughter, Miss Bessie, of Bothwell are spending a few days here.

Mr. and Mrs. John Moyer and Sam Moyer of Inwood are visiting relatives in this vicinity.

Mr. and Mrs. Ed. Dawson of Bridgeburg have returned home after spending a week with the former's parents, Mr. and Mrs. Isaac Dawson.

A family reunion was held at the home of Mr. and Mrs. Thos. Darke on Thursday, Oct. 16. It was the birthday of Mr. Darke, sr., he being the extraordinary age of 94 years, and also of Mrs. James Dent, his granddaughter, and of Elmer Knowler, his great-grandson.

The standing at Denning was 82 majority for Lethbridge and 242 for Ontario referendum.

Don't Submit to Asthma.—If you suffer without hope of breaking the chains which bind you, do not put off another day the purchase of Dr. J. D. Kellogg's Asthma Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

APPIN

John Mullins is seriously ill and some of his family have arrived home to see him. He is past 86 years of age.

There are two sugar beets, grown by Angus Galbraith on the J. W. Macfie farm, on exhibition at H. B. Waterworth's bakery shop. One weighs 17 lbs. and the other 13 lbs. Can you beat it?

We are glad to hear that Thomas Brownlee is getting along very nicely after having his leg broken three weeks ago.

Dan McIntyre has finished taking off his sugar beets. He had 250 tons from 20 acres.

Howard Waterworth, wife and daughter spent Sunday at H. B. Waterworth's.

Wallace Pierce arrived home from overseas last week.

Mr. McGillivray of the Royal Bank is away on his holidays and Mr. Windchester of Toronto is relieving.

Mr. and Mrs. Miers of Toronto called on friends here on their way home from attending the funeral at Windsor of Mr. Miers' father.

The organized class of the Appin Methodist Sunday school were entertained to a social evening on Friday at the home of their teacher, Mrs. Lotan.

Several of the residents of this district are going to the big provincial plowing match at which H. R. H. the Prince of Wales will be present.

The regular monthly meeting of the Appin Women's Institute will be held on Thursday, Nov. 6, at 2.30 p. m. in the town hall. It is hoped that a good representation from the Appin Institute will be present at the Women's Institute convention to be held in London on Tuesday and Wednesday, Oct. 28 and 29, as there promises to be a very interesting program. A good attendance is hoped for at the meeting on Nov. 6, as the ladies intend to quilt a quilt, also the report of the convention will be given at this meeting.—Christena Bardwell, Secretary.

Your neighbor's affairs are nothing to speak of.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring all worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Prepare to pay for Victory.

OPENING DAY OF VICTORY LOAN, 1919

Big Campaign Starts Monday Morning to Obtain Three Hundred Millions

Wake up! Wake up! Monday is the day that the Victory Loan opens. Monday is the day that Canada shows the rest of the world that she is still on the job.

Monday is the day when we clean up the last spot left by the war.

Monday is the day when we have another chance to invest in bonds paying 3½ per cent. and backed by a wonderful guarantee.

Monday is the day that Canada gathers into her treasury the necessary cash to fulfil her obligations to her soldiers and to the dependents of her glorious dead.

Monday is the day when Canada assures herself that prosperity will continue in the country.

They are all watching us. Some of them say we can't do it. We'll show 'em. Victory Loan 1919.

THE VISIT OF THE PRINCE OF WALES

The Prince of Wales will end his Canadian tour in a few days with the regret of all Canadians. He has certainly endeared himself to all who have had the good fortune to meet him. A splendid portrait of the Prince size 16 x 22 inches and bearing a copy of the Prince's autograph has been issued by the Family Herald and Weekly Star. Every subscriber for 1920 is to receive a copy of the portrait free. The Family Herald and Weekly Star has been vastly improved lately and is without doubt the greatest value for the money the world over. The subscription price is \$1.25 a year including the Prince's portrait. To old and young, rich and poor, the Family Herald and Weekly Star is a great favorite and the publishers are to be congratulated in supplying such a handsome portrait of the Prince. As might have been expected the Family Herald and Weekly Star's circulation is increasing by leaps and bounds. It is in the highest sense a great paper.
