The Synod at Lausanne.

In the Canton de Vaud our brethren of the Free Church have been again able to hold their annual Synod at Lausanne, under the presidency of M. CHARNIS. Forty churches were represented, and the reports were cheering from all parts of the Canton. Pruned by persecution, the vine yields more abundant fruit, spiritually increases, congregations multiply, and funds have so far risen that the schemes of evangelization for the next year have been considerably enlarged. The representatives from the evangelical church of Geneva, and the united evangelical churches of France, related the condition of their respective communions, and thus began to be realized the principle laid down in the fourth article of the constitution of the Free Protestant Church, which declares its intention to entertain fraternal relations, and, if possible, to unite itself yet more intimately with all churches that live the same spiritual life, and profess the same faith. That association, notwithstanding some diversity in forms of Government and discipline, the French-speaking churches, individually small and unequal to the achievement of any very extensive labour, appear more than half disposed to give evidence at the same time of unity of life, by engaging all together in one benevolent enterprise, for the spread of vital Christianity in French Colonies, where they are not yet represented by existing churches. A committee of the Synod, composed of Messrs. MAREY, CHARNIS, and others, have been appointed to consider the expediency of such a union, and to report to the next Synod. The subject is one of great importance, and one which will be warmly received by all who are interested in the progress of the Gospel in France.

the theatres and other places of amusement were densely crowded. And the consequence of this irreligion appears in the dreadfully increasing poverty of Berlin, the decay of trade, and a desolation being so great, that in some streets of the city it has been necessary to mow down the grass that has vegetated too rapidly this summer to be trodden down by the feet of passers by. The criminal statistics of the city correspond to the impurity and poverty. There are every year 12,000 apprehended for assault, theft, and other offences; more than 2,000 marked as old offenders; 3,000 persons having no home, and of these 400 are houseless children, existing on the fruits of vagrancy; 200 divorcees, and 2,000 illegitimate births; and in 1848, 30 died of delirium tremens. In vain many humanitarians toil to dry up this torrent of iniquity, while even the Lutheran dissent cannot agree as to the dogma, and while religion does not make the day an honour and a delight.

WESLEYAN CONFERENCE IN IRELAND

(The Conference was held in Dublin.)

Report of the Wesleyan and Schools in Ireland.

The Wesleyan Conference in Ireland was held in Dublin, on the 10th of July, 1850. It was the first time since the year 1830 that the Conference was held in Ireland. The Conference was held in the Wesleyan Chapel, Dublin, and was attended by 100 brethren from all parts of the country. The Conference was held in the Wesleyan Chapel, Dublin, and was attended by 100 brethren from all parts of the country. The Conference was held in the Wesleyan Chapel, Dublin, and was attended by 100 brethren from all parts of the country. The Conference was held in the Wesleyan Chapel, Dublin, and was attended by 100 brethren from all parts of the country.

SIDENT thanked the brethren for the kind manner in which they had received him. It gave him great pleasure to see their faces again. He briefly referred to the last year as a year of labour and anxiety; but, by the providence of God, good health had been given him; his mind had been supported, comforted and cheered, and he had no doubt days of good would continue in the Commission. The President referred to Mr. Wesley's advice, at the early Conference, to occupy as much time as possible in private devotions. He also spoke of the pleasure he felt in having such companions with him, and in the business of the Conference, as Dr. Newton and Dr. Hannah. Dr. Newton then addressed the Conference. He rejoiced that he had the pleasure of visiting Ireland, and being found once more among the brethren, as for many years he had enjoyed much happiness in his visits to this country. Amidst all the difficulties he saw many things to encourage the brethren in that part of the vineyard. He referred to his late visit to Belfast, and the delight he had in seeing the chapel again erected, and filled with members. He also spoke of the work in different parts of the United Kingdom, and of the prospect of many places of great goodness. Dr. HASSALL followed, and also referred to the pleasure he felt in the kind reception given him. He was thankful that he had once more among the brethren, and that they had opportunity of seeing him. He was glad to see the brethren in Ireland. He was glad to see the brethren in Ireland. He was glad to see the brethren in Ireland.

feel that mother is a holy and a peculiar name—this is home; and here is the birth place of every virtuous impulse, and every sacred thought. Here the church is first formed, and here for their origin and their growth, we share our heritage. The mother's love, which gives us our birth, is a love that is never broken, and which is the only love that is true. In the relations there established, we find through the child's life, a love that is never broken, and which is the only love that is true. What friends desire to know, we find through the child's life, a love that is never broken, and which is the only love that is true. What friends desire to know, we find through the child's life, a love that is never broken, and which is the only love that is true. What friends desire to know, we find through the child's life, a love that is never broken, and which is the only love that is true.

His earnest wish was to return once more to his mother, and to die in his childhood's home. He was fast ebbing away, and he needed friends to care of him. But this wish was denied him. An officer was sent for him, and irons were put round his thin wrists, and sick and dying he was, he was hurried back to his former cell in the State Prison, nearly three hundred miles off. And there in that gloomy cell, away from all friends, and no kind mother to tend him, he was left.

Boys! Always mind your mothers! Always read the Bible and remember what you read. Avoid the company of bad boys, whether at home or at school. Always remember those four short words in the Bible. "Thou, God, seest no flint that young man remembered them, and a that verse, "If sinners entice thee, consent them not," he would now probably have been a good and happy man.—11<sup>th</sup> Spring.

For Farmers.

Drainage.

Although the advantages of draining is almost universally conceded, yet how rarely is it done in our travels in this country, we drained or thoroughly reclaimed swamps, wet low lands. Such lands, abounding in most every district, when neglected, are not only unproductive and unprofitable, but are a source of pestilence and disease. On the contrary, such lands, if properly drained, are the most interesting and productive. They have the deposits of freshets and floods for ages, and by receiving more or less of the manure and a face soil gradually carried from time to time from the surrounding knolls and hill side. When thoroughly drained and stirred up proper cultivation, and the inert vegetable substance brought into action by the supply of the usual decomposing agents, such lands are distinguished for their enduring utility.

Much money, however, is fruitlessly expended in the operation of draining. A few of our native American farmers are skillful in the art, and like every other branch of farming, it will pay best when best performed. It is by no means necessary that a bog or swamp should have a "great fall," or inclination, to be well drained. It is customary to dig the ditches down to the gravel, instead of digging three or four ditches in depth into gravel stratum, which, by the bye, is one great secret in draining. Where springs abound either above or below the surface, they of course all be let down into under-drains. An expert ditcher will not often be dece about the location or source of blind springs under the surface, which generally do mischief. Such springs develop themselves by the peculiar character of the vegetation which covers them, or can be discovered by the tread. The location of drains is of utmost importance. Twenty-four or thirty inches will be found in most places a sufficient depth. Thirty inches wide at the top, sloped to 18 inches at the bottom, are the most dimensions of a good ditch; but if gravel substratum be shallow, the depth will always be determined by it. Stones for many reasons form the best material for filling up drains. After clearing the bottom of the drain of gravel or mud, the layer of stone for a foot in depth of be set in a vertical position, leaving no crevice or culvert; the stone afterwards interlevelled promiscuously within eight inches of the surface, reserving the smallest stone for the top; this done, cover the stone, first, the inverted sod, carefully cut from the face of the ditch, and preserved for this purpose. Lastly, fill in over the sod all the dirt that has been dug out, which will elevate the surface, but it will settle down in due time. The method of draining I have practised, and fer it to all others. An inexperienced ditcher would profit by employing an expert ditcher from Scotland or Ireland.—J. Cultivator.

Thrifty and Unthrifty Farmers

The great difference between a thrifty farmer, and one who does not thrive, is not in the soil, but in the fractions, the other. In farming, nothing should be neglected; every thing should be done at the proper time, every thing should be put in its proper place, every thing should be performed by its proper implement. When these rules are observed, the farmer will surely prosper—though his gains may not be great, they will be certain and sure.—Practical Address.

Putting hot water, say a couple of gallons into a churn, and shaking it about a while before using it, will, it is said, make the butter in a short time.

STANDING REGULATIONS.

Correspondents must send their communications written in a legible hand, and, unless they contain the names of new subscribers, or donations, free of postage; and entrust us in confidence, with their proper names and address.

THE WESLEYAN.

Halifax, Saturday Morning, August 1, 1850.

THE TRUE ELEVATOR OF SOCIETY.

THE morally degraded condition of the greater portion of the human family forces itself on the attention of speculative minds. A few bright spots, like stars in a night of storms, appear to relieve by their striking contrast the general gloom.

lation of the world, and infix within their breasts principles which shall influence them for good throughout life, and fit them for the duties and responsibilities inseparable from their being, and prepare them for the happiness of an ulterior and higher state of existence, we maintain, fearless of the shafts discharged by nerveless sciolism, that the instrument of that up-lifting must be pervaded and supported by evangelical truth.

THE BRITISH CONFERENCE.

THE BRITISH CONFERENCE, according to previous arrangement, was to have commenced its annual sittings in London on Wednesday last. In the course of a week or two we shall receive accounts of its doings, a synopsis of which we shall lay before our readers.

THE WESLEYAN METHODISM IN ENGLAND.

WE have a very curious account of the subject of the late exhibition of all Nations, to be held in London in May 1851. This exhibition is to be a grand display of the progress of civilization and improvement, and will be a grand opportunity for the Wesleyan Methodists to show their power and influence.

tion. JAMES FORMAN JUNR., Esquire, a member of the Board, will act as Treasurer, and acknowledge the receipt of all sums remitted him for Exhibition purposes. To prevent unnecessary expense, by having too many specimens of the same description of material forwarded to the Capital, Catalogues of the Articles which each District can supply, with a brief historical or general account of the articles, are requested.

WESLEYAN METHODISM IN ENGLAND.

ACCORDING to the accounts published in the Watchman of July 17th, the state of religion in English Circuits is encouraging. Notwithstanding the recent agitations, the work of God advances, and contributions to the support of the cause of God are liberal.

THE WESLEYAN METHODISM IN ENGLAND.

THE Wesleyan Methodists in England are doing well. The work of God is advancing, and contributions to the support of the cause of God are liberal. The Wesleyan Methodists in England are doing well.

On the 21st of June, a contemporary commentary, thus darkness is too often induced by the depth. Many a faithful, whose shadow will be cast by the gleam of doubt, is converted "a very deep fellow" by his shadow.

Firmness of Principle.

The following anecdote relates to the late Mr. More of the celebrated Dr. Johnson's moral principles:—I asked him, says Mrs. More, if he did not think the Dean of Derry a very agreeable man, to which he made no answer, and, on my repeating the question, "Child," said he, "I will not speak any thing in favour of a Sabbath-breaker, to please you or any one else."

A Bouquet for Florists.

On the shady banks of the Rio Magdalena in South America, there grows a climbing Aristolochia, bearing flowers four feet in circumference, which the Indian boys draw over their heads in sport, and wear as hats or helmets. And in the islands of the Indian Archipelago, the flower of the Rafflesia is nearly three feet in diameter, and weighs about fourteen pounds.

Dr. Webster.

Littlefield, the principal witness for the government against Prof. Webster, has had an interview with the condemned man. The Professor received him cordially, acknowledged the injustice he had done him, and asked his forgiveness, which Littlefield readily granted. Both parties were much affected during the interview and parted with mutual good feelings.

Too Much Altogether.

The annual cost of intemperance is said to be, in the United States, \$40,000,000; in Sweden, \$3,000,000; in Great Britain, \$15,000,000; and in France, \$20,000,000; and this immense sum is exclusive of the cost of prisons, police, workhouses, &c., &c., which intoxicating drinks render necessary.

A boy, who a short time ago fell overboard from H. M. Sloop Sappho in the Bay of Fundy, not far from St. Andrews, and who was in great danger of perishing, was rescued from a watery grave by the gallant conduct of the Commander, Hon. A. A. Cochrane, son of the Earl Dundonald, who plunged into the water and succeeded in saving him.

H. M. S. Plumper went ashore on Thursday, the 24th ult., at the entrance of Digby Gut, but was a few hours afterwards got off, not however without considerable loss.

The Rev. John Mackenzie, the Rev. Charles Elliot, and the Rev. John Smith, James Cairns, Alex. Forrest, M. D., and James Cairns, Esquires, have been appointed Commissioners of Schools for the County of Pictou.

John Hall and Samuel Chipman, Esquires, have been appointed Deputies from King's County to the Portland Convention. \$25,000 of stock, we understand, have been pledged to be taken in any line passing through the County.

On Friday last we had a pouring down rain for some hours. We are to be glad, in an evening, would receive some rain. The weather has been warm and seasonable. The good Providence should be devoutly acknowledged in all our good.

We are informed that the Directors of the Royal Mail Steam Packet Company have accepted tenders for the improvement of the construction of five magnificent Atlantic Steamships of the voyages from Southampton to the Isthmus of Panama.

According to the estimate of Smith it is the intention of the owners of the British and North American B.M. Steamships to purchase a line of screw steamships of great size and power, to convey goods and passengers to and from New York and Liverpool.

Letters addressed to Cabinet Ministers or officers of Government and to be forwarded through the Post Office in the future.

Frederick Jones Swift, Esq., has succeeded in extracting Nephthys from the Pitch Lake, which he exhibited publicly in the town of Port of Spain. The light was remarkably brilliant, and can be supplied at the rate of 2 cents per hour. The light in one of the patent lamps was equal to that of 24 wax candles. Light is certainly increased 200 in the world.

The Kingston, Jamaica, Market is simply supplied with sugar. No sugar is sold at all. White Pine Lumber is sold at 10 per cent. Cedar shingles are worth 10 to 15 per cent.

A numerous meeting has been held in Turk's Island for the purpose of expressing sympathy with the sufferers in the late calamity at Nassau.

Heavy rains have injured the oat making in Nassau. The process would not be fit to raise for some time. The health of the Island was good.

On and from Sept. 2nd next, a modification of the present West India mail route scheme will come into operation. The steamers will no longer call at Bermuda, but will call direct, both on the 2nd and 17th of the month, at St. Thomas and Chicago, returning by the same route. British steamers will carry the mails to and from St. Thomas and Jamaica, the Mexican Gull, the Spanish Gull, and the Warwick and Liverpool Islands.

Dr. Vines of Trinidad has presented to England a communication to the British Government an alleged violation of the laws of the island. The Doctor says he has discovered more than 1000 slaves in the island, and that he has discovered that the members of the Senate, and other persons, are kept in person at all times, and that the slaves are entirely unassisted. There will be a further statement of the case, and I have not yet received the result.

Summary of News.

BY THE R. M. STEAMER.

The R. M. Steamer *Comet* arrived at this port on Thursday morning last. The voyage was prosperous. We have below a summary of the news.

Great Britain.

The House of Commons has decided on the 12th inst. to send out a Commission, and confining the duties which attach to its possession to the case of Sir Thomas Wilde, that learned gentleman was sworn in on Monday as Lord High Chancellor of Great Britain. The two-fold functions, however, of a Lord Chancellor, of that important office as at present denoted, will be vested in him, pending the constitution of the arrangements in process for some time past for the separation of the duties of the Chief Justice of the Chancery from those of the Speaker in the House of Commons. The political office—when, it is understood, will be distinguished as that of Lord Keeper—it will be the one finally retained by Sir Thomas Wilde, the presidency of the Court of Chancery becoming a distinct appointment. The production of Sir Thomas Wilde has necessarily incurred a number of other changes. He has been succeeded by Sir John Jervis as Chief Justice of the Common Pleas, who has been raised to the rank of Attorney-General by Sir John B. Millar, a member of the House of Commons, and a distinguished lawyer.

It is stated that the Directors of the Royal Mail Steamship Company have accepted tenders for the construction of five magnificent Atlantic Steamers, and the voyage from Southampton to the Indian Archipelago.

It may last we had a pouring down rain for some time, and the prospect in general would have been gloomy. The weather has been warm and seasonable. The Providence should be devoutly acknowledged in good.

France.

The French Assembly has decided on the 12th inst. to send out a Commission, and confining the duties which attach to its possession to the case of Sir Thomas Wilde, that learned gentleman was sworn in on Monday as Lord High Chancellor of Great Britain.

Spain.

The Spanish people have not experienced a severe deprivation. On the 13th inst. their Queen gave birth to a Prince, who expired in a few minutes afterwards. Her subjects had been prepared to hail with joy the birth of a child who should furnish a living guarantee for the perpetuation of the present dynasty, and prevent the accession of a son of the House of Orleans to the throne of that ancient kingdom.

Portugal.

The American Commission of the Portuguese Government have not yet arrived at a satisfactory adjustment. The Lisbon Cabinet have resolved, for the sake of peace, to submit to all the portions of the demand except that which refers to the destruction of the General Armstrong, though protesting against their equivalent amount.

Denmark and the Duchies.

Telegraphic messages from Hamburg on the 13th inst. state that General Willison marched into Schleswig towards Ekersdorf. The Danes are advancing beyond Hadersleben. From the Duchies there is news dated Rendsburg, the 10th, Flensburg the 11th, and Kiel, the 13th inst. A great number of young men of the city of Halberstadt have repaired to Rendsburg, to enter the ranks of the patrie army. They marched into Rendsburg with a great banner, were received with acclamations, and well treated by the upper classes.

Canada.

The Canadian Board of Agriculture.—The Canadian Agriculturist for June contains an account of the proceedings of the Provincial Agricultural Association at a recent meeting held at Toronto.

By the new Bill to provide for the better organization of Agricultural Societies of Upper Canada, it is proposed that the Inspector General and Professor of Agriculture in the University of Toronto be ex-officio members. The Chairman is to be nominated by the Governor-General in Council from among the members of the Legislative Assembly or Legislative Council.

A Bill was before the Provincial Parliament entitled, "An Act to Incorporate the Farmers' Societies of the Wesleyan Methodist Church in Canada." The Preamble recites that certain Ministers and Members of the Wesleyan Methodist Church have established various institutions, and are desirous of extending the same to other parts of the Province.

WEATHER AND CROPS.—On Monday last, the weather was very fine, and the crops were in a state of great improvement.

THE CANADIAN PARLIAMENT.—The members of the Canadian Parliament have met at Toronto, and are engaged in the discussion of various important questions.

It is reported that a modification of the present West India mail route scheme will come into operation. The steamers will no longer call at Bermuda, but will direct, both on the 2nd and 17th of the month, to London and Glasgow, returning by the same route.

4 Sleep without supping, and wake without swine.

5 Good men are a public good.

6 All vice, envy is the most inconsistent with the character of a social being.

7 Opportunity is the cream of time.

8 Do not till evening what the morning may accomplish.

Portugal.

The American Commission of the Portuguese Government have not yet arrived at a satisfactory adjustment. The Lisbon Cabinet have resolved, for the sake of peace, to submit to all the portions of the demand except that which refers to the destruction of the General Armstrong.

Denmark and the Duchies.

Telegraphic messages from Hamburg on the 13th inst. state that General Willison marched into Schleswig towards Ekersdorf. The Danes are advancing beyond Hadersleben.

Canada.

The Canadian Board of Agriculture.—The Canadian Agriculturist for June contains an account of the proceedings of the Provincial Agricultural Association at a recent meeting held at Toronto.

Canada.

By the new Bill to provide for the better organization of Agricultural Societies of Upper Canada, it is proposed that the Inspector General and Professor of Agriculture in the University of Toronto be ex-officio members.

Canada.

A Bill was before the Provincial Parliament entitled, "An Act to Incorporate the Farmers' Societies of the Wesleyan Methodist Church in Canada."

WEATHER AND CROPS.—On Monday last, the weather was very fine, and the crops were in a state of great improvement.

THE CANADIAN PARLIAMENT.—The members of the Canadian Parliament have met at Toronto, and are engaged in the discussion of various important questions.

It is reported that a modification of the present West India mail route scheme will come into operation. The steamers will no longer call at Bermuda, but will direct, both on the 2nd and 17th of the month, to London and Glasgow, returning by the same route.

It is stated that the Government of England have decided to send a large number of troops to the East Indies, to be stationed at the various ports of the Bay of Bengal.

It is reported that a modification of the present West India mail route scheme will come into operation. The steamers will no longer call at Bermuda, but will direct, both on the 2nd and 17th of the month, to London and Glasgow, returning by the same route.

It is stated that the Government of England have decided to send a large number of troops to the East Indies, to be stationed at the various ports of the Bay of Bengal.

MISCELLANEOUS.

A STARTLING DISCOVERY.—confirmatory of the truth of the book of Jonah, has been made by Mr. Lazard. In excavating the city of Nineveh he discovered the name of Jonah inscribed upon the ruins. That prophet, as our readers know, was sent to announce to the people of Nineveh the destruction of the city. His eloquence converted many of them, and "God repented him" of the doom. He had pronounced, and spared the city for that time. Jonah then became the prophet of Nineveh, and was revered by the inhabitants. As was the Oriental custom, they doubtless inscribed his name in conspicuous places on the walls of the public edifices, and the inscriptions engraved by Assyrian hands a thousand years before the Christian era, have been found by Mr. Lazard. This is one of the most extraordinary demonstrations of the accuracy of Biblical history we have ever heard of.—New York Paper.

GLASS SURFACE FOR IRON WARE.—Iron door panels, iron tubes, iron dinner-plates, saucepans, griddles, frying-pans, kettles, cauldrons, &c. are now coated with glass. The iron is cleaned with an acid wash, smeared with a glutinous preparation, covered with pounded glass, and placed in a furnace. The glutinous matter evaporates, and the glass becomes incorporated by fusion with the surface of the iron. Dinner-plates (beautifully ornamented in colours) each weigh four ounces less than plates of earthenware; and as they may fall without breaking, the master's pocket and the mistress's temper are spared. This important invention may hereafter be applied to numerous purposes in decorative building and architecture.—English Paper.

SINGULAR ATTACK AND DEFENCE.—Last week the wife of James Garth, farmer, of Whitfield Hays, near Rochdale, Lancashire, went into a field, and was there attacked by a cow, and had her arm broken in two places, besides receiving bruises in different parts of her body. Another cow in the same pasture immediately came to Mrs. Garth's rescue, drove away Mrs. Garth's torment into the middle of the field, and then returned to Mrs. Garth licked the blood from her wound, and stood over her as a protectress till assistance was rendered.—

A SHIP STRUCK AND DAMAGED BY LIGHTNING.—A serious accident has occurred to an emigrant ship, off the Eddystone Lighthouse, by lightning. The vessel was a Norwegian barque, with 200 passengers, bound to Quebec. She encountered a fearful storm of lightning and thunder, in the course of which the electric fluid struck the mainmast, splitting it into fragments, and knocking down several of the crew who were on deck. Many of them were most seriously injured. The vessel, immediately put into Falmouth to make good the damage.—

CROSSING THE ATLANTIC IN SEVEN DAYS.—A petition has been presented to the Legislature of the State of Maine for the survey of a new line of Railroad in the direction of St. John, New Brunswick, with a view of its continuation to Halifax, or some good harbour on the coast of Nova Scotia.—The object is to have the railway connected with the interior lines in our country, to carry passengers to the said port in Nova Scotia, from which swift steamers are to carry them to Galway, Ireland, thence by railroad to Dublin, and from Dublin across to Wales to the Holyhead railroad. If this scheme were carried out, there can be no question of the practicability of going from New York to London in eight days, and perhaps seven. Halifax might yet become the entrepot of mail intercourse between the east of our continent and the west of Europe. We have no wish to see this result, but by good management and prudent investment of wealth on the part of Great Britain, the Provinces of Nova Scotia and New Brunswick might yet become as famous as either the States of New York or Pennsylvania.—Scientific American.

EDUCATION IN OREGON AND CALIFORNIA.—The Baptists were at the last accounts, laying the foundation of a college in Oregon City, upon a lot of 10 acres of land. It is to be styled the Oregon City College, and is to contain a theological department. The Methodist Episcopal Church have an Academy at Salem City, in Oregon, called the Oregon Institute. The buildings are excellent for the country. Rev. B. Bannister will go out to California as principal of an academy to be founded there under the patronage of the Methodist Missionary Society.

WOODSTOCK N.B.—A very interesting meeting was held in the Hall of the Mechanics' Institute in this place on Friday last. It was composed chiefly of land owners, residing on the river lots between the Malheur and El river. The object was to take into consideration the property of granting to the St. Andrews and Quebec Railroad Company, a right of way through their respective farms, for the projected road, free of expense. We are happy to add that a deed was signed by every one of the gentlemen present, giving to the Company a strip of land through any part of their farms—not to interfere with buildings—100 feet wide.—Woodstock Sentinel.

SUSSEX RAIL ROAD MEETING.—A large and respectable meeting, chiefly composed of proprietors of lands, through which the contemplated Great Eastern Railway will pass, was held at Skeel's Hotel, at Sussex Vale, on Saturday the 20th inst., where but one opinion prevailed as to the necessity and propriety of the measure.—St. John Observer.

PROSPECTS OF THE CANADA WHEAT CROP.—A gentleman of this city, who has recently been on the other side of Lake Ontario, says that the Canadian wheat crop is to be a remarkably fine and abundant one. The fields are numerous, with a stout and clean growth of straw. The wheat crop of Canada has heretofore been of importance to the

States, as much of it is marketed here.—Syracuse Journal.

ANTIOCHA.—The weather, we are happy to report has for the week ending June 20, been most propitious, and planting throughout the island is being generally and vigorously attended to. We cannot be sufficiently grateful for the bountiful rains with which the island has been favored.

TRINIDAD.—The papers from this colony contain but little beyond the discovery of a gold mine, on the Savanna, about twelve leagues from the Yurary river, which has thrown the inhabitants of Trinidad into a state of great excitement. Already has a vessel been advertised to sail for these auriferous regions, should sufficient encouragement be afforded; and the gold is said to be of a superior description to that found in California.

STRAWBERRIES BY THE TON.—During the four days of last week one hundred and seventy-two thousand baskets of strawberries were brought to New York over the Erie Railroad alone. Calculating each basket to weigh four ounces, the aggregate weight of the whole would be twenty-one and a half tons! The fruit was grown in Rockland county.

LONG TRAIN.—The Hudson River Railroad, on Thursday, the 4th, brought down a train of twenty-three large cars, having 1,750 passengers. The train was half a mile in length—the heaviest, probably, ever drawn in this country by a single locomotive.

POPULATION OF MASSACHUSETTS.—The returns of the late census of the several towns make the population of the State in the neighbourhood of 970,000. At the census in 1810 it was 740,000. Gain in ten years, 230,000. Middlesex is still the most populous county by twelve thousand. There are three counties containing over 100,000 inhabitants. The increase in the counties bordering upon railroads is quite remarkable.

ATLANTIC AND ST. LAWRENCE RAILROAD.—The bill to authorize the city of Portland to grant additional aid to the Atlantic and St. Lawrence Railroad, has passed the Maine House of Representatives by a vote of 78 to 21.

A petition is before the Legislature for the survey of a Railroad route from Bangor to the boundary of the State in the direction of St. John.

APPOINTMENTS IN NOVA SCOTIA.—The following appointments have been gazetted:

The Honorable Herbert Huntington, Hugh Bell, and George R. Young, to form a Board of Registration and Statistics, under the Act for taking the Census of the Province.

Dr. McDowall to be a Coroner for the County of Hants.

William McDowall to be Street Commissioner for Maitland.

Whitman Freeman, Samuel Freeman, senr., Charles Harlow, Silvanus Morton, and Nathan Tupper, to be Commissioners for the purposes of the Act entitled An Act to provide for the removal of obstructions from the Liverpool River.

John Morrow to be a Notary and Tabelion Public.

Joseph Crane to be a Collector of Excise and Light Duties for the Township of Horton.

Edward Lockwood to be Collector of Excise and Light Duty in the Township of Cornwallis.
