CREAM AND EGGS WANTED
Cream received, tested and paid for
daily at the Glencoe Butter Factory.
Phone 73 if you want our delivery
truck to call. Cash for eggs.
LAMBTON CREAMERY CO.
Alex. McNeil, Local Manager.

Notice
During January, February and
March we have decided to take our
truck off the road. When we draw
your cream these cold months the
samples freeze, therefore we think we
can give our patrons better satisfac-
tion if they bring in the cream, which
I will be at my office to receive every
day of the week. In the spring I
will be ready to give you the same prompt
service as in the past. We pay cash
as soon as tested.

MOTOR CAR STANDARDS ARE IN
THE HANDS OF THE CONSUMERS

"It is within the power of the mot-
oring public to make automobiles
measure up to their requirements,"
says N. & M. Graham, local dealer in
Chevrolet passenger and commer-
cial cars.
"The success of any automobile de-
pends on the degree to which it gives
purchasers what they want and need."
"In buying a car see that you get
all that your money calls for. If you
are not a judge of mechanical con-
struction find out from owners that
service their cars afford. The testi-
mony of not one but many owners is
necessary to establish a reliable rep-
utation. The reputation and resources
of the manufacturer are guides to the
quality of the car."
"Service and economy are the chief
points to be considered."
"Of what use are all the comforts
and conveniences of equipment if the
car itself doesn't stand up? When en-
joyment is there in them if the car it-
self is a continuous extravagance?"
"Complete satisfaction can only be
experienced with a car that not only
includes every essential of modern
equipment but which affords depend-
able and inexpensive performance."
"These are the standards by which
a car should be judged. Purchasers
can secure cars that measure up to
them if they insist upon it."
"Satisfy yourself that the car you
decide upon is fully equipped at the
start. But above all make sure that
the motor and other vital parts of its
construction are such as to insure you
dependable, economical and lasting
service in return for your investment.
By doing this you will advance the
standards of the industry and benefit
the motoring public as a whole."
"Make sure that you don't get mixed
up with experiments that may not be
on the market six months hence. Past
history repeats itself. The Chevrolet
has stood the test of time. In some
sections they are sold exclusively.
The epidemic seems to have struck
Glencoe, as every new car sold here
for the last 16 months were Chev-
rolets, with one or two exceptions."

Complete sets, and pieces sold
separately, in the Adam pattern.
Also a full line of 1847 Old Colony
always in stock.

insurance Agent, representing the
greatest fire insurance companies of
the world and the leading mutual fire
insurance companies of Ontario. Of-
fice at residence, first door south of
the Presbyterian church, Glencoe.

DISTRICT AND GENERAL

Miss Jean Archer of Newbury has
opened a millinery store in Thames-
ville.

New binder twine prices have been
issued and are considerably lower
than those of last year.

Harry Brodie has sold his farm in
Caradoc and purchased the general
store and postoffice at Muncey village.

The London Methodist Conference
has exceeded its objective of \$550,000
by \$27,121 in the Forward Movement
campaign.

Isaac Hill, an Indian living alone on
the Moravian reserve, was burned to
death in his house which was destroyed
by fire.

The newspapers of Bruce county
have decided to increase the price of
subscriptions to \$2 a year, to com-
mence some time during the summer.

The story of a young boy having
been floating down the river near
Thamesville on a large sheet of ice
and afterwards having been found
frozen to death near Chatham proved
to be a hoax.

There will be no stronger beer for
Ontario than that now allowed to be
sold. The Government refuses the re-
quest of the brewers for permission to
sell beer containing two and a half
per cent. of alcohol.

Inspection of the Kingsville schools
by the lady physician appointed by
the Department of Education brought
out the fact that there were only 12
normal children in the 301 examined.
There were 68 with defective vision
and 119 had enlarged tonsils.

Nancy Ferguson, wife of Henry Tay-
lor of Abston, died on March 17 af-
ter a short illness. Deceased, who
was a pioneer of this district, being
85 years of age, had long suffered with
a cancer. Besides her husband she
leaves to mourn one sister, Margaret
Ferguson of Mossa township, who is
now 81 years of age.

According to R. A. Finn, at the Mid-
dlesex office of the Department of Ag-
riculture, London, considerable dam-
age has been done to the orchards in
Middlesex during the winter by mice.
The real harm has been done to young
trees, those about two years old. The
mice have gnawed the young trees
and bridge grafting will be necessary
to save them.

A telephone dispatching system
reaching from Hamilton to Sarnia,
a distance of 150 miles, and costing in
the neighborhood of \$200,000, is to be
installed by the Grand Trunk during
the summer. Telephone dispatching
is also carried out in many other
sections of the G. T. R., but in the Lon-
don district the dispatching is being
done by telegraph at present.

A program of road improvements
that will cost about \$200,000 was de-
cided upon at a meeting of the Board
of Road Overseers of Middlesex. Un-
der this program the county under-
takes to improve and maintain all
main arteries not already assumed by
the Government. It is expected that
work will be begun at once on the
concrete highway between London and
Lambeth.

Mrs. John Milliken, who resided a
few miles from Strathroy, died very
suddenly Tuesday afternoon of last
week. She was predeceased by one
daughter and two sons, one of whom
was killed at Vimy Ridge in 1917. She
was survived by her husband, two sons,
Rev. F. S. Milliken of Harrison and
J. Knox at home, and five daughters,
three at home, Minnie E. of Lawson
and Mrs. John Strachan of Glencoe.

CONSOLIDATION DEFEATED
A vote of the ratepayers was taken
last Thursday on a proposition to con-
solidate the public schools in the
Criman district of Aldborough town-
ship. A fairly representative vote was
polled and there were only eleven
votes in favor of the scheme.

MAIL COURIER APPRECIATED
On Wednesday evening of last week
a surprise party representing the mail
box holders on No. 3 rural route, Ek-
frid, gathered at the home of the pop-
ular courier, John Cyster, and pre-
sented him with a generous purse in
appreciation of his long and faithful
services.

A complimentary address was read
also and Mr. Cyster made feeling ac-
knowledge of the gift and kindly
expressions. "Few, indeed," the ad-
dress recited, "were the days on
which our mail was not safely de-
posited in our mail boxes, regardless
of the condition of roads or weather.
Many of us are also deeply indebted
to you for accommodations that were
entirely outside the duties prescribed
by your agreement. The faithful per-
formance of routine duties and the
abundant evidence of your willingness
to cheerfully do a good "turn" for a
neighbor constrain us to regret the
circumstances that make necessary
the withdrawal of your services from
this route."

Lunch was served by the ladies, and
after a number of brief addresses fit-
ting the occasion the balance of the
evening was prolonged into the small
hours with dancing.

INDUSTRIAL ASSOCIATION

The Glencoe Industrial Association
was called for its annual meeting at
the town hall on Thursday evening.
J. N. Currie, the president, presided
and there was an attendance of about
twenty. Mr. Currie reviewed a part
of the association's work and expressed
the hope that now that Glencoe
was connecting up with hydro-electric
power there would be better oppor-
tunity of accomplishing things than
had been in the past.

Dr. McClachlan, Geo. Innes, A. B.
McDonald, Rev. Dr. Stalker, Reeve
Allan McPherson, Thos. O. Simpson,
Councillor P. E. Lumley, Lewis Sul-
ter and others took part in an inter-
esting discussion of ways and means
for enhancing the town's interests.

Mr. McDonald reported for the com-
mittee appointed last year to award
\$25 in prizes for best kept lawns and
premises. He stated that they had
difficulty in securing judges for this
competition, and finally it got too late
in the season to make the awards sat-
isfactorily.

Dr. Stalker, in an encouraging ad-
dress, said that Glencoe's rally cry
should be "Co-operation." Make the
town as inviting as possible. Clean
up; paint up. He believed that the
time was far distant when the
large manufacturing enterprises would
for various reasons seek location in
the small centres in preference to the
cities.

Reeve McPherson thought it would
be a calamity to do away with the In-
dustrial Association, which, however,
should embrace more of the young
men. Encourage them more and get
them into office. Speaking of hydro-
electric power he stated that there
had been some delay in getting the
work along as rapidly as was expected
owing to scarcity of help. It was
now hoped to have the power here by
the first of July at latest. This year
the council hoped to get better drain-
age through as one of the objectives,
besides the Currie drain improvement
which would be under way in a few
days.

Mr. Simpson said the people of
Glencoe do not properly realize what
a gold mine they have in their railway
facilities. He thought the farmers
and townspeople should co-operate in
making this one of the leading towns
in Ontario.

Mr. Sulter was glad to see W. A.
Currie, a recently returned soldier, in
attendance and taking an interest in
the meeting. Mr. Currie briefly ac-
knowledge the compliment and was
heartily cheered. Speaking of hydro-
electric power he stated that there
had been some delay in getting the
work along as rapidly as was expected
owing to scarcity of help. It was
now hoped to have the power here by
the first of July at latest. This year
the council hoped to get better drain-
age through as one of the objectives,
besides the Currie drain improvement
which would be under way in a few
days.

"BILL" DOBIE FAREWELL
A chicken supper was held at Mc-
Lachlan's restaurant on Friday even-
ing in honor of W. J. Dobie of London,
who recently left Glencoe to reside in
that city. Fifty of the gentlemen
friends and well-wishers of Mr. Dobie
sat at the tables and an enjoyable so-
cial evening was spent. C. O. Smith,
president of the Athletic Association,
acted as toastmaster and introduced
among other speakers Revs.
Garbutt, Lloyd and Charlton, G. A.
Dickson and James McAlpine, all of
whom spoke very highly of Mr. Dobie
and regretted that a young man so
keenly alive to church work and in
sporting circles was being lost to
Glencoe. During the early part of
the evening "Bill," as he is familiarly
known in the hockey rink and on the
baseball diamond, was made the re-
cipient of a handsome club bag. Af-
terwards a smoker and euchre party
was held at the Oddfellows' Hall.

CONSOLIDATION DEFEATED
A vote of the ratepayers was taken
last Thursday on a proposition to con-
solidate the public schools in the
Criman district of Aldborough town-
ship. A fairly representative vote was
polled and there were only eleven

PERSONAL AND SOCIAL

—Miss Jean Egan of Appin spent
Sunday at Dr. McIntyre's.

—George Grant of Belle River spent
Monday at his home here.

—Mrs. W. A. Currie is spending a
few days in Toronto this week.

—Joseph Munroe of Strathroy was
here for a couple of days last week.

—Mr. and Mrs. John Strachan were
at Strathroy last week attending the
funeral of Mrs. Strachan's mother,
Mrs. Milliken.

—Mrs. L. D. Tait has returned to
her home in Rochester, N. Y., after
visiting Mrs. Diggon.

—Mrs. Neil Leitch of Strathroy
spent a few days with relatives in
Glencoe and Kilmartin.

—Ferg. Huston of London was in
town on Tuesday to see his sister,
Mrs. George Parrott, who is seriously
ill.

—Lorne McCallum of Sarnia and
Mrs. Chas. Needham of Hilderton spent
the week-end with Mr. and Mrs. Geo.
McCallum.

—Among those who attended the
funeral of the late Mrs. Donald Mc-
Rae, whose remains were brought
here from Windsor for interment on
Wednesday last were Mr. and Mrs. W.
D. McIntyre and John A. McRae, De-
troit, and Mr. and Mrs. J. E. Laughlin
and son Donald and Mrs. Thatcher,
Windsor.

BERLIN UNDER MARTIAL LAW: MUCH FIGHTING IN OTHER DISTRICTS

Spartan Control Mining Region — President Ebert and Cabinet Return to Berlin — Reds Gaining in West Germany.

Coblenz, March 21.—The Spartans gained control of the Ruhr district today. The Red army won Duisburg, Gelsenkirchen, Mülheim and Mettmann, west of Düsseldorf.

A report at noon states that the State troops from Duisburg have cut their way through to Dinslaken, south of Weesell, where a State troop concentration is apparently taking place.

A direct report from Duisburg says that a Soviet Government has been set up there. No private telephone conversations are permitted except for the procuring of food and coal.

Three thousand persons were killed in the fighting at Leipzig before the Government troops captured the town Friday, according to statements made by three American business men who arrived here to-night from Leipzig, which place they left Saturday night.

Up to Wednesday there was strike agitation in Leipzig against the Kapp regime, then anarchy and Soviet control until the Government troops shelled the Volkshaus and Labor headquarters Friday afternoon.

There were 2,000 persons in the building, who were shot down as they made their exit. The shells finally set fire to the building, killing other hundreds.

Berlin, March 21.—Berlin is under rigid martial law and the troops are preventing a renewal of the last two days' battles, but there is much fighting in other places in Germany. It is reported that the Communists hold Dortmund, Duesberg, Meuselheim, Düsseldorf, Gotha and Cottbus.

Severe measures, amounting to a state of siege, were placed in effect today by President Ebert for Berlin. All persons are ordered off the streets after sundown, and anyone carrying arms will be shot without further parley.

All Schwerin is torn by a general strike and plundering.

In the Vogtland coal district the Communists are gaining the upper hand. The miners threaten to destroy the mines if the Communists are defeated.

Our Bacon "Snapped Up At Once."

"Why don't you ship more Canadian bacon?" This is a question asked here from one Canadian to another. It is a source of great regret that I had to reply that Canadian packers were not able to ship more bacon because more hogs were not being produced in the country. In these words, Brig. Gen. J. A. Egan, President of Gunns Limited, Toronto, who has just returned from Great Britain, where he spent three months investigating conditions, stated the position of the Canadian bacon industry.

"Conclusive evidence of the value of Canadian bacon on the English market and a fact which the country will, I am sure, be interested in," he went on, "is that while shipments of bacon from other countries may be put into storage from time to time because of lack of demand, yet not one pound of Canadian bacon goes into storage in England. It is snapped up for immediate consumption as fast as it arrives. Besides, for every case of Canadian bacon sold, the buyer has to take a few cases of other brands. The popularity of Canadian bacon makes it possible to distribute with it grades which are not so popular to fill orders."

"I explained to business men that high prices for grain feeds and the uncertain market conditions of the past season had seriously curtailed hog production in Canada. But I believe the prospects for the future are so good that the preservation of our breeding stock is a vital national concern which should engage the attention of all classes. If there is one thing which should convince the Canadian farmer that our bacon has a place for itself on the British market it is that the price being paid in Canada for hogs is far in excess of what the American farmer is getting. Previous to the war, Canadian bacon found its way into certain parts of England only. Today, wherever you go, from Land's End to John O'Groats, you find the Canadian public familiar with Canadian bacon and asking for it. After a close study of the markets of Great Britain and Europe, I consider that if Canada is to reap the reward commensurate with the service she must follow it up by a national peace effort. The name of 'Canada' is the finest introduction to European markets today. No one class in Canada must endeavor to impose upon this international trade situation any conditions which will jeopardize the position of our country."

No one class in Canada must endeavor to impose upon this international trade situation any conditions which will jeopardize the position of our country."

As the war, Canadian bacon found its way into certain parts of England only. Today, wherever you go, from Land's End to John O'Groats, you find the Canadian public familiar with Canadian bacon and asking for it. After a close study of the markets of Great Britain and Europe, I consider that if Canada is to reap the reward commensurate with the service she must follow it up by a national peace effort. The name of 'Canada' is the finest introduction to European markets today. No one class in Canada must endeavor to impose upon this international trade situation any conditions which will jeopardize the position of our country."

WARSHIP FLEET FOR CANADA

Britain Offers Dominion Ships Worth \$16,500,000.

A despatch from Ottawa says:—Examination of the report of Admiral Jellicoe, recently tabled in the House of Commons, shows that the British Government is prepared to present to Canada a fleet of ships which, at present prices, would be worth \$16,500,000, and at present prices would have a much higher value. These vessels, as indicated in table number four of the Admiral's report, are as follows: One light cruiser, four torpedo-boat destroyers, eight patrol boats, one flotilla leader, eight submarines and four mine-sweepers. In connection with the gift of these vessels, the suggestion of Admiral Jellicoe is that Canada adopt a naval scheme the cost of which for the first year would be \$5,000,000. Of this amount, however, \$800,000 would be used for the construction of ships, which could be postponed until a convenient date, and \$4,200,000 more would be for the maintenance of the fleet.

The necessary expenditure to give Canada a small navy, which would have necessitated no capital outlay, will therefore appear to be about \$4,500,000 annually.

Admiral Jellicoe's scheme provides for an increase by construction of new cruisers in Canada, but this need not be undertaken until the finances of the country would warrant it.

Until these vessels are built the annual expenditure would be between four and a half and five million dollars.

In connection with the manning of the vessels, it is understood that a personnel of 1,500 men would be required for this purpose. As a result of the war the Canadian navy has now 500 well-trained men on the books of the ships, and a number of other men who served during the war and acquired considerable experience would probably be ready to enlist.

Sinn Feiners' Chiefs Rounded Up at Kerry

Dublin, March 21.—There was a round-up of prominent Sinn Feiners throughout Kerry yesterday. A number of them were put aboard a destroyer by the military authorities, their destination presumably being an English prison.

The conditions under which Justice Moore and Justice Gordon are being held in court at Roscommon are considered indicative of the precautions being taken to protect some of the public men.

Six armed policemen guard their lodgings at night, others follow their carriage when they drive to the court, and while they are preading at sessions the court-room is guarded by plainclothesmen.

MAYOR OF CORK SHOT IN HIS HOME

Latest Irish Victim Prominent Sinn Feiner.

A despatch from London says:—The Lord Mayor of Cork was shot dead at 1 o'clock on Saturday morning. The revolver was fired by masked persons, whose identity is unknown. They entered his residence, and after firing the shot, escaped in an automobile.

A half-dozen men knocked at the door of the home of the Lord Mayor, Thomas MacGurk. Mrs. MacGurk opened the door and the men rushed in. Some of them held her while others ran upstairs to the Mayor's bedroom. They took him to the landing and shot him in the chest. They then fled hurriedly.

Mrs. MacGurk telephoned immediately for a doctor and a priest. The Mayor died soon after the arrival of the priest.

Mayor MacGurk, who is a prominent Sinn Feiner, was interned after the Easter Rebellion.

Twenty-seven police and Government employees had been assassinated in Ireland since January 1 of last year, according to an official announcement made in the House of Commons Thursday by the Chief Secretary for Ireland, James Macpherson.

The latest previous outrage in the Cork district was perpetrated on the night of March 11, when Constable Scully was shot at Glenties. Two soldiers and a number of civilians were killed by gangs in the same vicinity the day before.

Allies Warn Turks Regarding Massacres

A despatch from Constantinople says:—The Allied High Commissioner here has issued a statement declaring that the Allies have no intention of destroying the authority of the Sultan, but wish to strengthen his power. It also says the Allies will adhere to their intention not to deprive the Turks of Constantinople, but that they may be compelled to modify this decision if massacres and disorders continue.

The Allies have occupied the Ministries of War and Navy and assumed control of the posts, telegraphs and telephones, which have been temporarily suspended. Shipping also has been suspended.

Workers' Vengeance On Baltic Soldiers

A despatch from Berlin says:—Police and workmen are now hunting down scattered Baltic soldiers still in the city. Four officers trying to escape in an automobile were halted by the police tank at the Brandenburg Gate. The officers used their revolvers and a grenade, but were immediately overpowered and slain. Several civilians were wounded in the fight.

Weekly Market Report

Breadstuffs
Toronto, Mar. 23.—Manitoba wheat—No. 1 Northern, \$2.80; No. 2 Northern, \$2.77.

Manitoba oats—No. 2 C.W., \$1.00; No. 3 C.W., 97½¢; extra No. 1 feed, 97½¢; No. 1 feed, 96½¢; No. 2 feed, 96½¢, in store Fort William.

Manitoba barley—No. 3 C.W., \$1.75; No. 4 C.W., \$1.35½¢; rejected, \$1.42, in store Fort William.

American corn, 65¢ to 66¢; choice, \$1.96; No. 4 yellow, \$1.83, track Toronto; prompt shipment.

Ontario oats—No. 3 white, \$1.00 to \$1.02, according to freight outside.

Ontario wheat—No. 1 winter, per car, \$2.00 to \$2.01; No. 2 do, \$1.98 to \$2.01; No. 3 do, \$1.92 to \$1.93, f.o.b. shipping points, according to freight.

Peas—No. 2, \$3.00.
Barley—Malt, \$1.80 to \$1.82, according to freight outside.

Buckwheat—\$1.65 to \$1.70, according to freight outside.

Rye—No. 3, \$1.85 to \$1.88, according to freight outside.

Manitoba flour—Government standard, \$13.25, Toronto.

Ontario flour—Government standard, \$10.80 to \$11.00, Montreal; standard, \$10.80 in jute bags, prompt shipment.

Milled—Car lots—Delivered Montreal freight, bags included—Bran, 52¢; good feed flour, \$3.60 to \$3.75.

Hay—No. 1, per ton, \$28.00 to \$30.00; mixed, per ton, \$27.00 track, Toronto.

Straw—Car lots, per ton, \$16.00 to \$17.00, track, Toronto.

Country Produce—Wholesale
Eggs—New laid, 50¢ to 60¢; Butter—Creamery, 36¢ to 38¢; heavy, 38¢ to 40¢; 55¢ to 57¢; Ordinary dairy prints, 48¢ to 51¢; Bakers, 43¢ to 45¢; Oleomargarine (best grade) 31¢ to 35¢; Cheese—Large, 29¢ to 30¢; Swiss, 30¢ to 30½¢; Honey—White, 60¢, 25¢; 10½, 26¢; 5½, 27¢; Churning Cream—Toronto butter-makers are offering 68¢ per lb, f.o.b. shipping points, for churning cream.

Provisions—Wholesale
Smoked meats—Ribs, 30¢ to 31¢; hams, medium, 36¢ to 38¢; heavy, 38¢ to 40¢; cooked hams, 50¢ to 52¢; backs, plain, 49¢ to 50¢; backs, bone-

less, 52¢ to 56¢; breakfast bacon, 42¢ to 46¢; cottage rolls, 35¢ to 34¢.

Barrelled meats—Pickled pork, 44¢; mess pork, 44¢.

Green meats—Out of pickle 1¢ less than smoked.

Dry salted meats—Long clear, in tons, 32½¢; in cases, 28¢ to 29¢; clear bellies, 27¢ to 28½¢; fat backs, 32¢ to 33¢.

Lard—Tierces, 30¢ to 30½¢; tubs, 30½¢ to 31¢; pails, 30½¢ to 31¢; prints, 31½¢ to 32¢. Compound lard, tierces, 28½¢ to 29¢; tubs, 29¢ to 29½¢; pails, 29½¢ to 29¢; prints, 31¢ to 31½¢.

Montreal Markets
Montreal, March 23.—Oats—Canadian Western, No. 2, \$1.18½; No. 3, \$1.14½.

Flour—New standard grade, \$13.25 to \$13.55. Rolled oats—Bugs, 80 lbs, \$5.50 to \$5.60. Bran, \$4.25.

Shorts, \$5.25. Hay—No. 2, per ton, \$28.00; do, medium, \$28.75 to \$29.25; do, common, \$29.00 to \$29.50.

Finest easterns, 28½¢ to 27¢. Butter, choicest creamery, 65¢ to 67¢; second, 62¢ to 64¢. Eggs, fresh, 62¢; selected, 64¢.

Potatoes, per bag, car lots, \$3.60 to \$3.65. Lard, pure, wood pails, 20 lb net, \$1 to \$1½¢.

Live Stock Markets
Toronto, Mar. 23.—Choice heavy steers, \$18.50 to \$19.25; good heavy steers, \$12.50 to \$13.25; butcher's cattle, choice, \$12.50 to \$13.25; do, good, \$11.25 to \$11.75; do, medium, \$10.50 to \$10.75; do, common, \$8.00 to \$8.50.

Bulls, choice, \$10.50 to \$11.50; do, medium, \$9.50 to \$10.00; do, rough, \$7.50 to \$8.00; Butcher's cows, choice, \$10.50 to \$11.50; do, good, \$9.50 to \$10.00; do, medium, \$8.50 to \$9.00; do, common, \$7.50 to \$8.00; Stockers, \$8.50 to \$10.50; Feeders, \$10.00 to \$11.00; Canners and cutters, \$6.25 to \$6.50; Makers, good to choice, \$10.00 to \$10.50; do, corn and meat, \$6.50 to \$7.00; Springers, \$9.00 to \$10.00.

Lambs, per cwt., \$18.00 to \$22.00; Sheep, \$7.00 to \$14.00; Hogs, fed and watered, \$20.25; do, weighed off cars, \$20.50; do, f.o.b., \$19.25; do, do, country points, \$19.00.

Montreal, Mar. 23.—Butcher steers, common, \$9.50 to \$11.00; common, \$7.00 to \$9.00; butchers cows, medium, \$6.00 to \$7.00; butchers bulls, common, \$8.50 to \$9.50; good veal, \$15.00 to \$17.00; medium, \$10.00 to \$15.00; grass, \$7.00 to \$7.50; ewes, \$12.00 to \$14.00; lambs, good, \$17.00 to \$18.00; common, \$15.00 to \$17.00; Hogs, \$20.50 to \$21.00; lights, \$20.00 to \$21.00; sows, \$17.00.

U.F.O.—U.F.W.O.

A just cause. This was dealt with in our last issue—not fairly, for there are so many sides to this question—but sufficiently to vindicate our claim.

We shall confine the discussion this week to the matter of organization, why organize? Let us clearly understand that the only just reason that any industrial factor of national life can give for organization is that the workers may thus do more effective work as national factors.

It is very desirable, of course, that the industry flourish for the person, but that the only just reason that any industrial factor of national life can give for organization is that the workers may thus do more effective work as national factors.

That farming, as an industry, has no national status, needs no proof. We have at the present time Provincial status, but examine the personnel of any national Board, even the "Wheat Board," and notice the very limited representation that agriculture is given. A town woman represents the farm women on an existing national committee to-day. She is president of the W. L. and a very fine, capable woman, but utterly unacquainted with rural conditions and could represent urban women thoroughly.

How many farmers were on Food Boards, etc., during those years of stress. Upon what products were prices set absolutely? Just one—wheat. All other set prices provided for a stated profit, and the rate of profit on many manufactured articles of absolute necessity, both of food and clothing, was and is a standing disgrace to Canada. These profits were shown by appointed Commissions to range as high as 80% on some food products, and from 7% to 15% on material for clothing.

It is interesting to note that the profits of a co-operative company are limited to 7%, while those of a private individual or corporate firm are not really limited at all, for the watered stock which all such carry makes evasion of the law a matter of no great difficulty.

As units, the farming element of this country has entirely failed to establish for itself any status, or to exert any influence either for self-aggrandizement or self-protection. Much less has it been any safeguard for other industries, even though the absolute necessities for food and clothing are produced by it. Through organization it has begun to make itself felt.

The Grain Growers of the West handled the wheat for the Allies during the war. Their business last year amounted to about \$800,000,000. Our Ontario companies transacted about \$8,000,000 last year.

If, and when, the farmer becomes so organized that, like the workers of other industries, he can control his business, farming will become financially sound. That it is not on a paying basis to-day is proven by four outstanding facts: 1. The decrease of rural population; 2. No farm can be rented for interest on investment; 3. No farm can be sold for value of land and buildings if the latter be in any degree modern; 4. Organized capital is not investing in agriculture. These must be overcome and can only be done through organization. Raising strawberries, tobacco, sugar beets, pure-bred cattle, is not going to decrease the cost of staple necessities of food. These lines of farming, and these alone, pay.

Through organization we must compel our legislatures to give to agriculture, the basic industry of our country, the consideration its worth demands. Sir John A. Macdonald used to say that the farmer never asked anything and therefore never got anything, and as a class we actually took that remark as a compliment, though probably the great statesman intended it to be a reproach to us, for if we "got nothing" we could not prosper as a class and if the basic industry failed to prosper, what of those based upon it?—Margery Mills.

A Baffling Case.

A physician who writes of some of the interesting experiences of his life tells the following amusing story: When I was attending medical college, our old professor of materia medica and general practice told us one day that he had a remarkable case that he proposed to exhibit the next morning in clinic.

"I have persuaded the man to allow you to examine him in the interests of science," he said. "You will each make an independent diagnosis in writing."

The patient appeared the next day. He was a big, strapping fellow, and, without any preliminaries, he peeled off his clothes and took his place on the table. We examined him in squads, thumping his chest, listening to his lungs, feeling his pulse, taking his temperature, and doing everything else we could think of.

I soon discovered valvular disease of the heart in an advanced stage, but, according to the rule, said nothing, and in clinic.

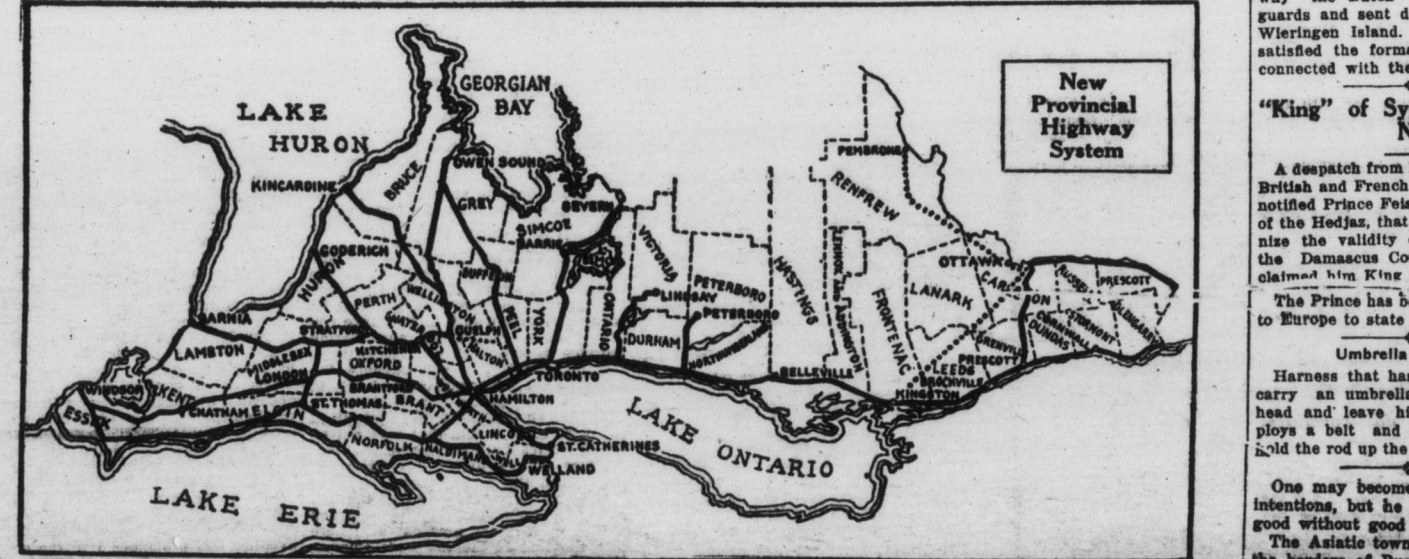

I set up nearby an "X-ray" machine. When the professor took his place on the platform at lecture hour his desk was heaped high with our written reports.

"Well, gentlemen," he said blandly, "I find here forty-six diagnoses, each describing a different disease. I consider the variety of your discoveries as very remarkable, especially,—"

—he paused and deliberately polished his eyeglasses—"especially, gentlemen, as there was nothing whatever the matter with the patient."

The silence that ensued was so thick that it seemed to me you could have cut it with an axe.

ROAD MAP OF GOOD ROADS IN ONTARIO.

The roads indicated will be built by the Province during the next five years at an expenditure in the neighborhood of eighteen million dollars. The Federal Government pays six million dollars or forty per cent, and the municipalities through which the highway passes 20 per cent. of the cost of construction. The maintenance charges will be borne by the Province and municipalities.

British Air Liner to be Put in Trade Service

London, March 21.—The R-34, the British air-liner which crossed the Atlantic, is to be used in commercial service between England, Scandinavia and the continent, according to an announcement made to-day.

The R-33 and R-34 arrived Saturday at the Howden Airfield, in Hull, after a trip from Pulham, Norfolk.

Hull is considered the probable starting point of the commercial air service with Scandinavia.

"King" of Syria Not Recognized

A despatch from London says:—The British and French Governments have notified Prince Feisal, son of the King of the Hedjaz, that they cannot recognize the validity of the decision of the Damascus Congress which proclaimed him King of Syria.

The Prince has been invited to come to Europe to state his case.

Umbrella Harness.

Harness that has been patented to carry an umbrella over a person's head and leave his hands free, employs a belt and shoulder straps to hold the rod up the centre of his back.

One may become bad without bad intentions, but he can never become good without good intentions.

The Atlantic town of Malwachi, on the borders of Russia, is peopled by men only. Women are forbidden entrance there.

SOUTHWARD HO! CRY POLAR PARTY

BY AIRPLANE, SHIP, AND SLEDGES.

British Explorers to Make Complete Survey of Ant- arctic Continent.

To Antarctica, roof of the world, for six years' work, is shortly to sail the most completely outfitted polar expedition ever assembled. As for romance, however, its aim is not glory, but a complete commercial survey of the white continent and the encircling seas. The British Imperial Antarctic Expedition, as it is called, is backed by great governmental, scientific, and financial interests, which have raised \$750,000 to insure its complete success.

First of all, cartographers want the coast line charted, and limits found for the great central plateau. Then, they ask, does the mountain chain along the west coast of Ross Sea stretch unbroken across the continent, forming a continuation, except for 650 miles, of the South American Andes? Here, obviously, is work for the expedition's airplane, of which again, more later. With the nation's pocket-book in mind, Britain wants to know the extent of the coal, manganese, granite, marble, and ruby deposits already located. Where, again, are the breeding places, the secret rendezvous of the whales, 12,000 of whom in a recent year yielded \$10,000,000 worth of oil, glycerin, soap, margarine, fertilizer, and other by-products? Australia, New Zealand, and South Africa want Antarctica's climate charted, that the meteorologists at home may trace the cyclones of the southern hemisphere from their inception. Scientists throughout the world, finally, are demanding information of electrical conditions near the pole, that they may found on established fact their intricate studies in terrestrial magnetism.

On the Stout Ship "Terra Nova." The ship chosen to bear the party to Antarctica is the "Terra Nova," a seasoned whaler whose wooden sides have withstood the battering of many voyages within the polar circle. The vessel was first heard of when it went to Captain Scott's rescue in 1904. Admiring then its strength and general layout, the captain later chose it to bear him southward in 1910 on the trip that won the pole but cost his life. But the "Terra Nova" of 1910 is to be even better adapted to her work than the ship of 1910.

Thus splendidly equipped, the British Imperial Antarctic Expedition will sail from England in June of this year. Wellington, New Zealand, will be the last port of call, and will be left behind in October. A thousand miles through the mingled waters of the Indian and Pacific oceans will then bring the adventurers to the limit of the floating ice, and a day or two later, to Macquarie Island, which will be surveyed in short order. Another southward journey of the same length, through constantly thickening ice floes, will bring them to Scott Island, where three scientists, with their hut, will be marooned for a year's investigation. The ship will now be in the midst of the pack, ceaselessly dodging icebergs, and often ramming the scattered floes, which in a few months will cement themselves into a continuous mass. Antarctica's "summer" months, it must be remembered, are November, December, January, and February. During this time the unsetting sun brings the mercury very nearly to 50 deg. F. This the explorers call "hot weather."

To Pole by Airplane. Meanwhile, the "Terra Nova" will have sailed along the barrier's 400-mile front to the Bay of Whales, where the airplane will be put together, and a start made, about Christmas Day, 1920, for the pole, 800 miles to the south. A nonstop flight unfortunately will be impossible, as the level expanse of the barrier is terminated, 400 miles to the south, by the mountainous escarpments of the central plateau. So, at the foot of Axel Heiberg Glacier, discovered and named by Amundsen during his rush to the pole in 1911, will be established a depot of food and gasoline. Lightened in every possible way, the big plane will then rise from the barrier surface, make its spiral climb for altitude, and finally dart southward at 11,000 feet. If the plane comes to grief on the polar plateau, the crew of three, under Captain Wilkins, will attempt to draw their sledge back to the depot. On their return to the Bay of Whales the "Terra Nova" will pick them up, then cruise north at full speed, for the days will be growing short and the pack will be showing a desire to catch and hold the ship for the winter.

The plane is expected to prove valuable, too, for the transportation of supplies sent inland from the ship. The "Terra Nova" will, of course, be locked in the pack ice every winter, but probably far enough from shore to escape the annihilation which overtook Shackleton's "Endurance" in 1915. In the early summer of 1925, if everything goes well, the "Terra Nova" will reach New Harbour once more, take aboard the long-exiled scientists with their precious reports and specimen cases, and sail north for Wellington, which should be reached in February, the following year.

OUT O' LUCK
Never mind! Just take
Cascarets if Bilious,
Constipated

Everyone must occasionally give to the bowels some regular help or else suffer from constipation, bilious attacks, stomach disorders and sick headache. But do not whip the bowels into activity with harsh cathartics.

What the liver and bowels need is a gentle and natural tonic, one that can constantly be used without harm. The gentlest liver and bowel tonic is "Cascarets." They put the liver to work and cleanse the colon and bowels of all waste, toxins and poisons without gripping—they never sicken or inconvenience you like Calomel, Salts, Oil, or Purgatives.

Twenty-five million boxes of Cascarets are sold each year. They work while you sleep. Cascarets cost so little too.

In Smoky Glasgow. A thrifty Glasgow man was approached by his small son the other day with regard to a birthday present. Sandy pondered over the matter for some time, and then said: "No, I can't give ye a present, but if you are a gude laddie I'll clean the windows so that you can see the buses go by!"

Annual Climbing Vines

While waiting for clematis, wisteria, and other permanent vines to make sufficient growth, annual vines may be grown each year on porch or window. They make a very desirable screen or shade when trained on a trellis of proper construction, and most of them bloom profusely from midsummer till killed by frost. A more pleasing effect will usually result where several kinds are planted together.

For luxuriant growth and dense shade, there is nothing equal to the wild cucumber, but the lower leaves are likely to turn yellow late in the summer, unless the vines are kept well watered.

The moonflower and morning glory, in various colors, are favorites; a trellis covered with them presents a solid mass of blooms against the dark green foliage as long as growth continues.

Cypress vine possesses a delicate beauty that makes it very desirable to grow before a window. Balloon vine is of slower growth, but when planted in connection with morning glory or wild cucumber, the contrast creates a pleasing effect.

It is a common mistake to plant vines too near a porch or house wall. A suitable bed should be spaded up at least two feet from the foundation of the house, and the soil should be made rich with leaf mold or manure of a similar nature. If wild cucumbers

are allowed to grow two feet apart, the vines will make sufficient growth to cover a trellis ten or twelve feet high. Morning-glory and moonflower should stand no more than a foot apart, and the other vines about the same.

A suitable trellis is made by setting two substantial posts of the right length in the ground, and stretching poultry netting of the right length from one to the other. The trellis should be provided before the vines form tendrils. When vines are trained upon a trellis of this kind, they do not cling to the wall and discolor the woodwork. The shade is more effective, while the air circulates freely between vines and wall. When the vines have reached the top of the trellis, they may be trained to form a canopy on strings leading to the wall over the window or porch.

If early cultivation is given, and water supplied in abundance, there is no growth about the place that will prove more attractive throughout the season than a trellis covered with annual climbing vines.

Another use for vines, besides shading porches and windows, is screening unsightly buildings—outdoor toilets, for instance. Also, fences can be made more pleasant when covered with vines. Rubbish piles can be hidden by a screen of vines. A small packet of seeds will screen the view of an unpleasant landscape.

Dr. Williams' Pink Pills are a tonic, not a stimulant. They build up the blood, and not only the disastrous after-effects of influenza but also troubles due to poor blood, such as anaemia, rheumatism, indigestion and the generally worn-out feeling that affects so many people, disappear. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Mighty Kitchens.

The kitchen of the Waldorf Astoria Hotel in New York is an acre in extent. Dinners for more than 3,500 persons can therefore be cooked at one time. At the kitchen of the Bon Marche in Paris, which has hitherto been regarded as the biggest thing of its kind, a roasting-pan will hold no less than 200 cutlets, which represent several sheep, while potatoes are baked at the rate of four bushels in each pan. Nearly 8,000 eggs are broken on omelette days by the sixty cooks and the hundred assistants who officiate in this gigantic cuisine. No fewer than twelve hams and sixty fowls can be bottled simultaneously in one pot. At the Mansion House, London, and in the kitchen of Christ Church, Oxford, there is facility for cooking a baron of beef of 200 lb.

You can write it down as gospel. With the flags of peace unfurled. The boys that run the furrow. Are the boys that rule the world.

SPRING WEATHER HARD ON BABY

The Canadian Spring weather—one day mild and bright; the next raw and blustery, is extremely hard on the baby. Conditions are such that the mother cannot take the little one out for the fresh air so much to be desired. He is confined to the house which is often over-heated and badly ventilated. He catches cold; his little stomach and bowels become disordered and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. They regulate the stomach and bowels, thus preventing or relieving colds, simple fevers, colic or any other of the many minor ills of childhood. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Do Comets Send Disease?

A scientist has stated that comets actually sprinkle our world with disease germs!

The old belief that pestilence follows in the wake of meteors may, therefore, have a great deal of truth in it.

A short time ago a meteor fell into Lake Michigan, U.S.A., and since then the attention of scientists has been focused upon the fact that our earth is at present undergoing the greatest known visitation of comets.

The pestilence known as the Black Death, which visited Europe and Asia in the fifteenth century, and caused the most appalling mortality, followed the visit of a great comet.

The mysterious influenza from which the world has suffered so much lately began soon after we were immersed in the tail of Halley's comet.

It has been proved that while some comets are only masses of gas, most of them are made up of enormous swarms of meteors of all sizes.

Scientists, including Lord Kelvin and Sir Oliver Lodge, hold that the majority of comets are fragments of worlds torn to pieces by some cause or other. In those comets which originated in the destruction of worlds, the disease germs or organisms would have been carried away with the debris and remained in a dormant state in the cold of space.

There is no limit to the time certain germs can remain asleep. They are known to remain dormant for countless ages in the sun-baked deserts of the world and on the frozen soil of the Pole.

When, therefore, these germs are projected into our temperate atmosphere by comets, it is thought by authorities that they awaken from their long sleep and are again rendered active and dangerous to the earth's inhabitants.

Annual Climbing Vines

While waiting for clematis, wisteria, and other permanent vines to make sufficient growth, annual vines may be grown each year on porch or window. They make a very desirable screen or shade when trained on a trellis of proper construction, and most of them bloom profusely from midsummer till killed by frost. A more pleasing effect will usually result where several kinds are planted together.

For luxuriant growth and dense shade, there is nothing equal to the wild cucumber, but the lower leaves are likely to turn yellow late in the summer, unless the vines are kept well watered.

The moonflower and morning glory, in various colors, are favorites; a trellis covered with them presents a solid mass of blooms against the dark green foliage as long as growth continues.

Cypress vine possesses a delicate beauty that makes it very desirable to grow before a window. Balloon vine is of slower growth, but when planted in connection with morning glory or wild cucumber, the contrast creates a pleasing effect.

From All Quarters.

The Japanese Government is going to equip its railway trains with wireless, to be used in place of other signals which sometimes fail during storms.

A wange craft, suggestive of an ark, is being built in his garden by an adventurous man at Oakland, California. He and his daughter propose to sail round the world in it.

A Swiss milkmaid with a musical voice obtains better wages than one who cannot sing, as a cow that is soothed with a pleasing melody during milking will, it is said, yield one-fifth more milk.

A mechanical painter is being used for painting omnibuses in the omnibus factory in Caledonian Road, London. It does in two and a half minutes work that ordinarily takes two and a half hours.

The first lifeboat ever made is still in existence in Yorkshire. It was constructed in 1802, to be used "for saving life in storms or other dangers to ships." A poor shipwright invented and made it, and Parliament considered his labor and skill so meritorious that it voted him the sum of \$6,000.

AFTER EFFECTS OF INFLUENZA OFTEN SERIOUS

Victims Are Left Weak, Tired
and Mentally Depressed—Tonic
Treatment Is Strongly
Recommended.

No pestilence in years has caused so many people suffering than the epidemic of influenza which swept over Canada in the fall and winter of 1918-19 and again this winter. The danger from this trouble is seldom over when the characteristic symptoms, the fever, headache and the depression of spirits have passed away. Influenza leaves behind it weakened vitality, the organs of the body function naturally. In fact, building up the blood will vitalize the whole system.

The experience of Mr. Andrew Marty, Bathurst, N.B., will prove of value to a host of influenza sufferers who still suffer from the effects of the disease. Mr. Marty says:—"The new life and consequently new hope brought into my life through the use of Dr. Williams' Pink Pills is almost beyond my power of expression. Following a severe attack of influenza in 1918 I found myself rapidly falling in health, and was naturally much alarmed. I began to lose in weight, could not eat, did not sleep well, and in a word I was reduced to a mere shadow of my former self. I was forced to discontinue work because of my weakened condition and things had a very blue outlook. I tried a number of suggested remedies, but without benefit. And then one day Dr. Williams' Pink Pills were suggested to me. I acted on my friend's advice, began taking these pills and soon felt an improvement. Every day I seemed to grow stronger, and after four weeks' treatment I felt fully restored to my old-time health. From my own experience I feel that, if given a fair trial, there is no medicine superior to Dr. Williams' Pink Pills in building up a run down system."

Dr. Williams' Pink Pills are a tonic, not a stimulant. They build up the blood, and not only the disastrous after-effects of influenza but also troubles due to poor blood, such as anaemia, rheumatism, indigestion and the generally worn-out feeling that affects so many people, disappear. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

RHEUMATISM

This is just the season when Rheumatism with its grinding pain and stiffening of joints gets hold of you. Fight it with

Templeton's Rheumatic Capsules

Templeton's Rheumatic Capsules bring certain relief, and permanent results. They are recommended by doctors, and sold by reliable druggists everywhere for \$1.04 a box, or write to Templeton, 142 King St. W., Toronto, for a list of prices.

ASTHMA

Templeton's RAZ-MAN Capsules are guaranteed to relieve ASTHMA. Don't suffer another day. Write Templeton, 142 King St. W., Toronto, for free sample. Reliable druggists sell them at \$1.04 a box.

A One-Legged Skater.

The unconquerable spirit of the crippled veteran has seldom manifested itself so strikingly as in the case of a mechanical draftsman of Toronto, who before the war was an accomplished skater. When, as a British soldier, he lost a leg in France, his skating days seemed past. Returning to Canada, however, he applied himself patiently to his old art, and eventually learned to skate once more. Now he has become so skillful with his one skate that public exhibitions take up much of his spare time.

Marion Bridge, C.B., May 20, '02. I have handled MINARD'S LINIMENT during the past year. It is always the first Liniment asked for here, and unquestionably the best seller of all the different kinds of Liniment I handle.

NEIL FERGUSON.

Too Much of a Good Thing. Sandy had been staying with some friends for about a month, and while he and his host were out for a walk one day they called at a wayside inn for a drink. As his host was about to pay for it Sandy stopped him. "Na, na," he said, "I'll not allow it. Ye've been keeping me in everything at yer house for a month, and ye've treated me to the theatres and cab fares and paid for all the drinks. I tell ye, I'll have na mair of it; we'll toss for aye."

MONEY ORDERS.

Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Thoroughness and concentration are undoubtedly necessary to success. Half-hearted work never pays. Unless your work becomes your pleasure it is not good work. It will not succeed.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, callus, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. "Ruly! No humbug!"

GET SLOAN'S FOR
YOUR PAIN RELIEF

You don't have to rub it in to get quick, comforting relief

Once you've tried it on that stiff joint, sore muscle, sciatic pain, rheumatic twinge, lame back, you'll find a warm, soothing relief you never thought a liniment could produce.

Won't stain the skin, leaves no marks, wastes no time in applying, sure to give quick results. A large bottle means economy. Your own or any other druggist has it. Made in Canada, 70c, 75c, \$1.10.

BITS OF HUMOR

FROM HERE & THERE

As Seen Through Love's Eyes! Mr. Justward—"Here's my discharge from the army. Nice, isn't it?" His Bride—"Let see. 'Had gray eyes, brown hair, light complexion—Why, Edwin, that's horrid. It doesn't say a word about those dear amber glints in your eyes, nor that soft, tempting wave of your hair, nor your simply adorable complexion.'"

Why He Ran. Johnnie having accidentally broken a pane of glass in a window was making the best of his way out of sight, but unfortunately the proprietor stole a march on him. Seizing Johnnie by the collar, he exclaimed: "You broke my window, did you not?" "Yes, sir," said Johnnie, "but didn't you see me running for money to pay for it?"

Ask for Minard's and take no other. The jawbone of the average whale is twenty-five feet in length. The tongue will yield a ton of oil.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

RED PIMPLES
ITCHED TERRIBLY

On Chest, Face, Arms, Burned Badly. Cuticura Heals.

"Ever since I can remember, my chest, face, and arms were filled with dry, red pimples. They were scattered all over me, and itched terribly at times, and I scratched them, causing them to fester and get sore. Sometimes they would dry away and form scales which burned badly."

"Then I used Cuticura Soap and Ointment. I had used them two or three times when I felt better and I was healed with one box of Cuticura Soap." (Signed) Miss Bertha Kass, Russell, Manitoba, February 19, 1919.

Use Cuticura Soap and Ointment for all toilet purposes. Soap to cleanse, Ointment to heal.

See 25c. Ointment 25c. and 50c. Sold throughout the Dominion. Canadian Depot: London, Limited, 10, Peel St., Montreal.

Get Cuticura Soap above without map.

Important Notice!

Department of Finance Dominion of Canada

**Your Income Tax
Return Should be Filed
at Once!!**

All persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:

Every unmarried person, or widow, or widower, without dependents as defined by the Act, who during the calendar year, 1919, received or earned \$1,000 or more.

All other individuals, who during the calendar year 1919, received or earned \$2,000 or more.

Every corporation and joint stock company, whose profits exceeded \$2,000 during the fiscal year ended in 1919.

CLASS 1

Forms to be used in filing returns on or before the 31st of March, 1920:

Trustees, executors, administrators, agents and assignees must use Form T 3.

Employers making a return of the names and amounts paid to all directors, officials, agents or other employees must use Form T 4.

Corporations and Joint Stock Companies making a return of all dividends and bonuses paid to shareholders and members during 1919, must use Form T 5.

NOTE.—Individuals comprising partnership must file return in their individual capacity on Form T 1 or T 1 A.

PENALTY

Every person who is required to make this return, who fails to do so within the time limit, shall be subject to a penalty of \$10.00 for each day during which the default continues—and all such penalties shall be assessed and collected from the person liable to make the return in the same manner in which taxes are assessed and collected.

Time Limit

All persons in Class 1, as shown hereon, must file on or before the 31st of March, 1920.

All persons in Class 2, as shown hereon, must file on or before the 30th of April, 1920.

General Instructions

Obtain Forms from the Inspectors or Assistant Inspectors of Taxation, or from Postmasters.

Read carefully all instructions on Form before filling it in.

Prepay postage on letters and documents forwarded by mail to Inspectors of Taxation.

Make your returns promptly, and avoid penalties

Address of Inspector of Taxation for this District.

WANTED

Raw furs by parcel post, by express any way. What have you—what price? Prompt returns.—Held Bros., Bothwell, Ont. 01-13

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring all worm troubles to an end. They are a strengthening

and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

"Save the surface and you save all"—Paint & Varnish
NEU-TONE

**The Flat Oil Paint
For Interior Decoration**

For the walls and ceilings of any room in your house, most delicate and harmonious effects can be secured by the use of NEU-TONE. It is cheaper and more sanitary than wall paper and will last much longer because it can be washed without injury. It positively will not rub off.

NEU-TONE is made in eighteen shades, and by the use of various tints most pleasing combinations may be secured.

**MARTIN-SENOUR
PAINTS AND VARNISHES**

NEU-TONE is easy to apply. It covers well and leaves no brush marks, producing a dull, soft, velvety finish which will lend charm to any room in the house.

Any surface may be successfully treated with NEU-TONE—Plaster, wood, burlap or metal.

Call and let us explain the merits of this and other MARTIN-SENOUR finishes. For every purpose—For every surface. Our stock is complete and we can give you full information.

In Memoriam
WALKER—In loving memory of Hugh L. Walker, who died one year ago today, March 22, 1919: One year of loneliness; A year of loneliness; But still we smile amid our tears in thinking Our loss is but his gain.
—Wife and Son.

TOWN AND VICINITY

Mrs. George McBean is seriously ill. Wm. C. Burchell has taken a position in the Glencoe post office. Mrs. Wm. Weekes is seriously ill at the home of her daughter, Mrs. Fred Aldred. The Soldiers' Aid Commission met Tuesday evening and transacted routine business. Wm. Stinson is a jurymen at a sitting of the high court being held in London this week. Peter McCracken is resuming the blacksmithing business and has rented Isaac McCracken's shop. A. W. Morley, blacksmith, left town on Saturday with his family and will locate at Peace River, Alberta. A. Linden and family of Wardsville have moved to their farm in Aldborough formerly owned by Jas. Ellison. George Bechill has received a 1914-1915 Star which was awarded posthumously to his son Cecil who was killed in action. Wm. Cyster left for St. Joseph's Hospital, London, on Monday evening to undergo a surgical operation for a nasal obstruction. D. R. McEae, South Ekfrid, has four Lincoln ewes which accomplished the remarkable feat of producing twelve lambs this spring. Rev. Dr. Stalker preached in the morning and Rev. Kenneth McLean in the evening in Glencoe Presbyterian church last Sunday. The High School girls will give their opera "Isle of Jewels" at the Opera House Friday and Saturday evenings of this week. Up to April first subscriptions to the London Advertiser may be renewed at The Transcript office at the old rate. After that date the rate will be \$5 per year. Robert Clananahan, postmaster, has sold his handsome residence on the corner of Syme and Elizabeth streets to Gordon Dickson, manager of the Royal Bank. Miss Fay Anderson of Ridgeway advertised in the papers of that town a Glencoe hotel for sale, doing a good business and with twelve bedrooms furnished, for \$4,000. This is the glorious season of the year when you wear an overcoat one

day, a thin coat the next day, a porous plaster the next day, and run a doctor's bill on the fourth.

Importations of tomatoes from the south will be held up by the exchange rate, and local epicures will have to stick to the canned variety unless things alter very materially. The little son of Duncan P. McCalm, Moss, fell a couple of steps downstairs a few days ago, sustaining injuries which caused partial paralysis. He was reported yesterday to be much improved. It is proposed to organize a baseball team in each of the churches in town as a means of adding more interest to this popular summer sport. The town will also have the regular league team. Your income tax return should be filed at once. Read the important notice from the commissioner of taxation in this issue of The Transcript. Delay in this matter may mean a heavy penalty for you. The directors of the Ekfrid Fire Insurance Company held a business meeting at Glencoe on Saturday and adjusted the claim of Hugh Taylor, whose house was recently destroyed by fire recently.

Bruce McAlpine has purchased from Gilbert McAlpine the old American Hotel property on Main street and grain warehouse on McKee street. He has also purchased McAlpine & Son's interests in the coal and feed business. Miss Nannie McEae, a sister of Mrs. Alfred Aldred of Aldborough, died suddenly at Kewanee, Illinois, on March 3 from pneumonia. The funeral took place from the family residence at Kewanee on March 5 to Elmira cemetery. Owing to sickness the Carolina girls were unable to fill their Christmas engagement last Saturday evening. In place of this entertainment the Jordan Family have been secured for a concert to be given on some evening in April.

Mrs. Alex. Munroe has sold the west half of the south half of lot 6, con. 1, Moss, fifty acres, to John Reyer, for \$3,000, and the east fifty acres of the same lot, with house and other buildings, to Wm. Hillman for \$4,200. The entertainment given by St. John's Dramatic Club on St. Patrick's Night was patronized by a capacity house. The young entertainers did exceedingly well and their humorous play "Popping the Question" was particularly good. The vaccination ban at the Detroit river has been lifted and Canadians may again cross the border freely. During the 125 days that the edict was in force it is estimated that 60,000 persons were vaccinated at the Detroit side of the border. Eddie Watts, a Thamesville hockey player, had the misfortune to get a bone in his nose broken through coming in contact with an opponent in the recent game with Glencoe at Thamesville. The injury was sustained in a purely accidental manner. The death occurred quite suddenly at Kinistino, Sask., a few days ago of Mrs. ———, formerly Miss Carrie Ramsay of Glencoe. She was found dead sitting in a chair with her child two years old in her arms, having expired about seven hours previous from heart failure. A farewell supper was given at the home of J. W. Munroe one night last week for Alex. Duncanson, who is leaving Glencoe to reside in Detroit. During the evening Mr. Duncanson was presented with a beautiful umbrella from his gentlemen friends who attended the supper. J. C. Elliott of Elliott & Moss, bar-risters here, has entered into partnership with the late Ivey & Ivey of London. The London firm will be known as Ivey, Elliott & Ivey. Mr. Elliott still retains his connection with the firm of Elliott & Moss at Glencoe, where he will continue to reside. The death occurred at an advanced age at his home in Stratford on Friday of Edward J. Yorke, who for many years resided on the Longwoods road near Wardsville. The remains were taken to Alvinston for interment. Mrs. Art Johnson and Mrs. Wm. Reader of that place are daughters of the deceased. The Grand Trunk Railway was compelled to send all freight and passenger trains, usually run over the Windsor line, by way of Sarnia and Port Huron for two or three days last week as the result of the flooding of several miles of track at Prairie Siding by the Thames River, which was blocked at the mouth with large fields of ice. Duncan Mitchell's home, a new two-story ship, was the scene of a pleasant evening on Friday last when their many friends and neighbors surprised them prior to their leaving the town. Mr. and Mrs. Mitchell were presented with a handsome purse of money, while their little daughter, Margaret, was given a beautiful bracelet. The remainder of the evening was spent in dancing and games. Mr. and Mrs. Mitchell and family are moving to Detroit. An informal social evening was held at the hall of the I. O. E. on Tuesday to bid farewell to Mrs. Barker and daughter Annie who are leaving Glencoe to make their home in Hamilton. During the evening Mrs. Hetley read an address expressing the esteem and good wishes of the daughters, with whom Mrs. and Miss Barker have been identified since their organization here. A brief program consisting of a solo by Mrs. McCleach, a reading by Miss Mary Westcott and a piano solo by Miss Ethel Stinson was given. Lunch was served and the usual greetings were exchanged. The commodious residence of Mrs. Rose Stuart always noted for its hospitality was more than usually so on Monday evening when the Glencoe Book Club were given possession for their annual social evening. Members of the club and their husbands and sweethearts to the number of forty or fifty were gathered for the occasion. The evening took the form of a progressive high tea, following which were games and other amusements which made the hours pass all too quickly. A guessing contest in musical terms and a birthday musical melange were interesting as well as amusing, the whole concluding with an old-time "ho-down" to music (?) furnished by the club's own and only Arabian jazz orchestra. A vote of thanks to Mrs. Stuart and the national anthem concluded one of the most enjoyable gatherings the club has ever held.

AUCTION SALES

On south half lot 4, range 3 south L. W. R., Ekfrid, on Friday, March 26, at 1:30 o'clock—1 gelding rising 5 yrs. old; 1 mare rising 4 years old; 1 gelding rising 2 years old; 1 pony mare rising 4 years old; 1 pony mare rising 11 years old; (These horses are all broken to harness.) 1 cow 7 years old, due to freshen April 10; 1 cow 5 years old, due to freshen April 10; 1 Holstein cow, due to freshen about time of sale; 20 brown Leghorn hens; 10 Plymouth Rock hens; 1 broad-tire Bain wagon; 1 set bobblehairs; 1 cutter; 1 cutter pole; 1 road wagon; 1 side-spring top buggy in good repair; 1 set lance-tooth harrows; 1 set wooden harrows; 1 plow; 1 hay rack; 1 set scales; 1200 lbs. cap.; 1 wheelbarrow; 3 sugar kettles; 1 thirty-gal. crock; 2 sets single light harness; 1 barrel churn; a few tons of good hay; other articles of farm equipment, such as forks, chains, whiffletrees, etc.—Mrs. John A. Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

Is Your Tractor Ready for Spring Work?

If your experience is at all like mine you will know that there are many things you forgot to do last fall. Perhaps you didn't drain the fuel line, oil the valves and cylinders carefully, clean out the hard oilers, wipe the engine up in general, or replace a broken spark plug.

In order that we do things up in good shape as we go, it will be a good plan to start with the dirtiest work and make a clean sweep of things all the way through.

The first equipment you need is a big bunch of waste and a bucket of kerosene. Clean all of the dust and grease off the engine and engine frame, so that when you get at the inside work there will be no grease and grit to slip in where it is not wanted.

Remove all of the hard oilers, scrape out the old grease and open up the passage to the bearings with a nail or a piece of stiff wire. Then fill the cup full, and turn in at least three good big-cupfuls of grease so that the bearing is well covered with a coat of five lubricant.

Having finished that job, start in on the transmission. The case will need draining so that all of the sediment will be removed from the bottom of the casting. Wash the case out clean with kerosene. Pay close attention to the condition of the gears; there may be a badly worn one that will need replacing before the season is done. If everything seems in good shape, put in fresh oil and replace the cover.

There is one other dirty job to do, and I hate it most of all; it is cleaning up the crank-case. It is a good plan to take the bottom off the case, so that the work may be done thoroughly. Take a piece of string and tie the oil gauge up so that it will not be damaged when the pan is let

down or replaced. Drain off the oil and loosen the pan. Scrape out the dirt and slime that will hang to the pan and wash it clean with kerosene.

While the case is out of the way, is a good time to look for a loose connecting rod. If there is one, it takes only a few minutes to remove one of the thin shims from each side of the bearing and tighten the rod as it should be. The bearing must be snug, with no vertical play; a little side play will do no harm.

When the bearings are in shape, put the pan back in place and pour about two gallons of kerosene in the crank-case. Turn the engine over several times so that the old oil will be washed off the crank-shaft and inside of the case. Do not run the engine with kerosene in the crank-case. This is dangerous, for it is very easy to heat a bearing that is not well lubricated, and kerosene is not a lubricant. After rinsing the case, remove the kerosene, fill the case with fresh lubricating oil and turn the engine a few times so that the oil will work into the bearings before the engine is called upon to do any work.

That is about all of the heavy work. Next, take off the cylinder head and inspect the valves. There is a possibility that one, or more, is in need of grinding after the heavy fall plowing and silo filling that was done last fall. If they seem to fit snug, let them alone. You might grind on a valve a half-day and not get the finish on it that has been put there by the continual tapping of the valve upon its seat.

When the cylinder head is off, clean out all of the carbon deposit. There are several good carbon removers on the market. But when I think of an engine filled up with carbon I recall a paragraph in an old tractor book that came with an old tractor that I used to operate:

"When carbon has deposited, there

is only one safe way to remove it—scrape the cylinder and head, piston rings and grooves. Do not rely upon patent carbon removers—they are ineffective in most cases."

The engine is now almost ready to put to work. Put everything together and we will start on another part that will not be so greasy and dirty to handle. Examine the radiator to see if it leaks, the pump to see if it needs repacking, and the hose connections. If there are new connections around the shop, put that down on the repair list.

As a matter of precaution, clean the lime and settings out of the cooling system. Caustic soda or a dilute solution of hydrochloric acid will do the job in good shape.

The fuel line usually needs a little attention. Drain the tank and remove the little catch pot at the bottom. This probably has in it an accumulation of dirt and water that has settled out of the fuel tank during the season.

On most machines there are one or two little screens through which the fuel must pass on its way to the carburetor. These should be taken out and cleaned so that the fuel will have a clear path. After this is done, the fuel line will be in readiness for service when the carburetor is cleaned up.

Try the magneto; if it gives a good spark, then you are in luck; just let it alone. If you fool with it, you may have something to fix that requires closer attention. If some of the wiring is oil-soaked, it should be replaced with clean wire. New contacts should be soldered on to the ends so that good connections may be made easily, both at the magneto and the spark plug terminals.

Remove the spark plugs and clean them up, set the points with a gap of one-thirty-second of an inch, and put them back.

Now fill the fuel tank, fill the radiator, open the needle valve and set the impulse starter. After turning the engine over several times, it should start off in fine style. The carburetor will probably need changing a little, but aside from that the machine is ready for a good season's work.

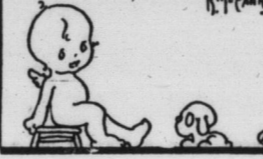

This is What Limits Your Profits

Are the profits from farming limited? Yes, I suppose one must answer that they are, for crop yields are limited by the weather, climate, cultural conditions, seed, soils, etc. But in other ways they are certainly unlimited.

I make it a practice frequently, after the day's work is over, to crank up the car and ride about the country. I am never disappointed, for each time I discover something new and something interesting and worth while to my business of farming and dairying. One evening last summer while riding I noticed a field of wheat, cut and shocked, which was exceptional. We have had a very dry, poor season for small grains in this section—so I drove into the yard and asked the owner how he had such a fine crop of wheat when others were so comparatively poor. He told me that it was planted on new ground, ground that had raised only one previous crop, and that he expected it would raise good crops for several years yet.

THE CHEERFUL CHERUB

How strange those righteous beings are Who never care for fun But simply spend their time on earth Reforming everyone!

I told him he might make it always raise exceptional crops if he would give it proper treatment, but he shook his head and advised me to look around the country some more, and see if I found any fields which were producing exceptionally that had been under cultivation as long even as twenty years. I know of only one such field within a radius of ten miles of my farm. But in a few years I am going back to the same man, invite him to ride home with me, and then I shall show him a whole farm that is producing exceptionally, and one that has been in crops for sixty years.

I did not stop long enough to discover this man's theory in soil fertility, but long enough to know that he believes his yields must necessarily increase each year. This belief limits his profits accordingly. Nearly everyone knows now that we may steadily build up our soil, and that it will pay a good profit while we are making it as fertile as it was in its virgin state. And if we go even further than that and actually make it richer than it ever was, who can say what the limit of production per acre may be?

One of us who read this paper are stockmen, or at least we keep some stock. And if the profits from farming and crop production are unlimited, they are certainly so from stock-raising, horse-raising, dairying, etc., for no one can say just how much milk our cattle will produce, or what price we may receive for our surplus stock, if they be pure-bred. Many bulls, both beef and dairy, have sold for tens of thousands of dollars, and horses and hogs and sheep have likewise brought tremendous prices.

So when we feel respondent about farming as a business, when we think how little profit we are receiving let's think, too, how very unlimited our opportunities are. Let's resolve that we will build up our soil each year, and that we will raise registered pure-bred stock, and we will find our profits increasing until we will wonder ourselves if they really are limited. And then when he began to wonder, and think, the answer will come: Yes, the profits which a farm may yield are limited. They are limited by the size, broadness, progressiveness, and capacity of ourselves.

The Welfare of the Home

The Fresh Air Cure.

"How is Nannie this morning, sister?" Mrs. Edwards carefully closed the outside door before she answered her breezy visitor. "Not any better than I can see. She just coughs and coughs until I am nearly wild—go in and see her."

Aunt Nancy pushed open the bedroom door. In the hot, stuffy little room lay a young girl. "Hello, Nannie," she said, and then she bent over and whispered mysteriously, "I am going to tell you a secret: I have come to abduct you."

The flushed spot on the thin white cheeks grew a little deeper and the big eyes almost sparkled. "What do you mean, auntie? You don't look very bold and bad."

"Well, I am, and the coach is at the door. Come in, sister," she called to Mrs. Edwards. "Give us your blessing; were going to elope."

Nannie's mother appeared, worried and anxious. Worn out with the care of an always sick family, she had little resistance to offer to her sister's brisk, authoritative ways. Now she could only quaver a troubled, "What ever do you mean, Nannie?"

"I mean I am going to steal Nannie and take her home with me."

"Oh, I would never dare let her. She hasn't been out of this room for three weeks. If she should catch cold now—"

"But she isn't going to catch cold. It's as warm as wax out of doors. All she needs is to be fastened up on some of this fresh air and sunshine."

In spite of Mrs. Edwards' protests Aunt Nancy began to collect what would be needed for the trip. "Don't worry, Ella," she went on, "I'll return her better than raw, and I'll give you a little rest as well. You have your hands more than full with the other children. Just fix an egg and some milk for Nannie and we'll get started so we can reach home while the sun is still high."

A little later, curled back comfortably in the automobile, Nannie was trying to find words to express her delight. "I never dreamed it was so lovely! I can't see it fast enough, or hard enough. I just want to eat this air in big chunks—it's exactly like getting out of a prison."

"That's exactly what it is, child, when the world is just spilling over with the only thing that you need!"

When they reached the end of the long ride Aunt Nancy ushered her niece up the stairs. "Why, what have you been doing, auntie? What is that new door at the end of the hall?"

"Just wait a minute. Didn't I tell you there was a surprise? Come in here first and get off some of those wraps."

"But what are all those interesting things on the bed?" She held up a wonderful warm, woolly dressing gown as she spoke.

"Slip right into it," commanded Aunt Nancy. "It's 'most big enough for two of you, but I expect you to grow into it. Now, here's a little cap."

You certainly do look 'spiffy', as Jessie would say. Now this way for the great mystery!"

Reaching the end of the hall she threw open the new French door. "Behold the bride's bower!"

Nannie gasped. "Oh, auntie, what a beautiful sleeping porch!"

The daintiest of beds was waiting for her. "Pop right in; Jessie has it ready—she's coming in a minute with some nice, fresh milk."

Nestled down in the big white bed, Nannie sighed happily. "Do you know that lovely little poem, 'May be building her house, Auntie? I feel right in the midst of it.'"

The branches of a tree almost brushed against her cheek, and at that moment a friendly cardinal swayed lightly on a little twig and pecked out a lusty cheer, cheer, cheer!"

"Bless his heart, that's just the way I feel. The only trouble is, I'm afraid I'll get well too soon, and then I'll not have any excuse for staying here."

"I'll tell you, Nannie. Presently, when you get to looking real chipper, we will send for your mother and the children to come and spend the day. She's always been afraid to let any of you have any fresh air, but when she sees what it does for you she will change her mind. Your father has paid out enough in doctors' bills to build several porches like this—and you never will want to sleep indoors again, winter or summer. You know we always slept out before we came here, and we just loved it in the winter, too. One learns something wonderful every season. When you get to hobnobbing with the birds and the trees and the stars, little worries don't amount to much—and then you feel so well all the time that trifles don't matter."

Under the new treatment Nannie fairly blossomed. Dozens of fresh eggs and quarts of warm, creamy milk added to unlimited fresh air, soon made Nannie look truly like new. "To think that my own sister had been giving those children, and that poor sick girl, separated milk! Of course she didn't know what she was doing."

Hard enough. I just want to eat this air in big chunks—it's exactly like getting out of a prison."

"That's exactly what it is, child, when the world is just spilling over with the only thing that you need!"

When they reached the end of the long ride Aunt Nancy ushered her niece up the stairs. "Why, what have you been doing, auntie? What is that new door at the end of the hall?"

"Just wait a minute. Didn't I tell you there was a surprise? Come in here first and get off some of those wraps."

"But what are all those interesting things on the bed?" She held up a wonderful warm, woolly dressing gown as she spoke.

"Slip right into it," commanded Aunt Nancy. "It's 'most big enough for two of you, but I expect you to grow into it. Now, here's a little cap."

"That's exactly what it is, child, when the world is just spilling over with the only thing that you need!"

When they reached the end of the long ride Aunt Nancy ushered her niece up the stairs. "Why, what have you been doing, auntie? What is that new door at the end of the hall?"

SAFETY FIRST.

We heard a great deal about safety during the war, and as far back as history goes we have the story of ways in which men have endeavored to safeguard themselves, from coats of mail to dugouts deep in the ground and covered with fathoms of solid concrete and steel. When the Covenanters of Scotland were driven from their homes into the mountain fastnesses, one small company seeking safety from the dragoons found refuge in a cave far up a ravine among the mountains. They accepted this retreat as the best protection to be found, and, although they knew that they were not altogether safe even here, their confidence was not in the earthly rock, but in the Rock of Ages, in whom they had always trusted and who had never failed them.

They remembered the promise, "He that dwelleth in the secret place of the Most High shall abide under the shadow of the Almighty." He is my refuge and my fortress."

Making themselves as comfortable as possible, they ate their cold supper and lay down in their cloaks to get such rest as they could under the circumstances. As they slept, a spider dropped from the mouth of the cave to the ground below and made the first strand of a web across the opening. Back and forth it ran, then round and round, weaving a silken cloth so fragile that a stroke of the finger would destroy it, yet so strong that it furnished a better protection to the sleeping wanderers than a wall of solid stone could have done.

Morning broke and as the light appeared a company of soldiers with their guns and sabres crept stealthily up the mountain side among the trees and rocks, searching for the fugitives who had slept in the cave and were now shut in by the spider's slender web.

They came to the mouth of the cave and, thinking that they had perhaps found the retreat of those they sought, were about to enter, when suddenly the one ahead stopped, and the quiet watchers within heard him say to his companions: "There is no use in taking time to search here. The mouth of the cave is covered with a spider's web. They would surely have broken it down if they had entered."

So they passed on, leaving those who had dwelt in the secret place of the Most High abiding in safety under the shadow of the Almighty's wing. Great rocks would have been rolled away; walls would have been scaled or broken down; but a spider's web was a perfect protection to those who were in the keeping of God.

It is well to take all precaution against disease and danger. It is well to choose your companions and your path in life to keep away from temptation and to guard yourself from sin. But it is most important of all that you put yourself into the hands of God, for then, though every contrivance that you can conceive has failed, you can still have peace because you have made the Lord your refuge, even the Most High your habitation.

Increase Your Grain Crops

without extra land, labor or seed

It's purely a question of supplying more—and better—fertilizer. This is not theory. It is FACT. Grain needs nitrogen or ammonia to grow the straw; Phosphoric Acid to hasten ripening and fatten the kernel; Potash to assist in the formation of starch. Harab-Davies Fertilizers possess these plant foods in readily soluble form—the identical plant foods that are supplied to the soil by barn-yard manure, but in larger quantities and in more concentrated form. Experience is the great teacher. There is no substitute. Read, then, of the experience that scores of Farmers in all sections of Canada have had in greatly increasing grain yields with Harab-Davies Fertilizers. "Fertilizer Results by Satisfied Users" is the title of a most interesting book let along this line. Write for a copy—sent FREE on Request.

Here Is Where The Macartney Excels

15 Reasons for Selecting the Macartney Machine Milker

Read About Its Many Exclusive Features. It has the best type of teat cup (double acting) and the best milking action of any double-acting teat cup ever invented. The rubber inducer in Macartney teat cups will last longer than the teat cup inducers of any other milker.

Macartney milker has only one size of teat cup, which fits any and all sizes of teats. The ends of the teat cups are cushioned with rubber. The Macartney pulser has the most positive action of any pulser ever made. It is as steady and unvarying in its action as a 21-wheel watch movement. It is the one absolutely simple and fool-proof pulser—only three working parts.

The pulser is instantly detachable from the lid so that the lid may be placed in water for washing. Teat Cup release air is not drawn through pulser—no milk, dirt or sterilizing solution can get into milking parts. It is the biggest labor saver—it not only gives you more milk from your cows, but actually takes less time, less labor and less expense for labor than any other milker.

There is more brains in the construction of the Macartney than is used in any other milker. The milker head is all brass. There are no cheap or inferior materials of any kind. The Macartney Milker is the easiest to keep clean. It is the most sanitary. It requires the smallest upkeep expense. Any boy or girl can operate the Macartney. You get life-long, dependable service and freedom from annoyance and expense of frequent replacement of parts.

Particulars Free—Mail Coupon—

Whether you figure on buying a machine milker or not, this information will interest you. It will tell you what Agricultural Colleges and successful dairy men everywhere say of the Macartney Milker. Just fill in name and address and number of cows on line indicated. Then send coupon to us. You'll get all particulars by return.

What Does the Country Need?

For years we have heard much regarding the work of the farmer, the needs of the rural school and the value of the rural church. There seemed to be the feeling that if the farmer was enabled to raise big crops and sell these crops for fair prices, if we could have up-to-date churches and schools in our country districts everyone would be happy. And so speakers eulogized or pitied the farmer as the case seemed to demand, much oratory was forthcoming regarding the schools and volumes have been written regarding the country church. What is the surprise of the public to find suddenly that the country woman refuses to be satisfied with a recipe for mustard pickles and patterns for tatted medallions? They are coming to realize that they have a profession as dignified and demanding quite as much expert knowledge as that of the farmer, the teacher or the minister.

Someone has well said, "The home is that institution for which all other institutions exist." That being the case, does not the home-maker have something of a task, and isn't it time that we brought to her some of the information now at hand for improving her profession? Men in all kinds of work are studying to make themselves more proficient in their work. They try to take advantage of every discovery of science, every bit of useful information and all the skill they can acquire. Most interested workers are collecting their own libraries on subjects bearing on their work. It is safe to venture that not one home-maker in twenty has yet a professional library, but many of them are realizing the need for it and are seeking for help in selecting books.

But why this new interest in her work? Some people—only a few—have begun to realize that the late Col. Roosevelt was right when he said, "The farmer should realize that the person who most needs consideration on the farm is his wife." She makes a very large contribution to the success of the farm business besides raising her family.

On a farm not far from ours there lived a splendid farmer. He knew his business and worked hard and intelligently, but as the neighbors expressed it, "Charlie just seems to

never get on." And he didn't. His wife had not lived on a farm before. She could not bear to work with "those dirty chickens," wouldn't "mess around" with milk and butter and never had hoes in a garden and never expected to. Moreover, it was too hard to can the surplus fruit and vegetables so she bought hers ready canned. She "adored" extravagant clothes, and then she wanted some place to wear them, and as the country woman had little time for social affairs she had to have a horse and buggy at her disposal. She was constantly so she could drive into the village to numerous parties and "functions" of other kinds. Do you wonder that the neighbors said, "Poor Charlie. Jane surely leads him a merry chase. She's no good as a farmer's wife. He ought to have known better than to have married her." It took all he could make to pay the rent and keep up the household expenses and he never had any time for a vacation himself. However, this one good thing came out of having this couple in the neighborhood. Some of the men began to appreciate just how much a home-maker can do to make or mar the success of his venture as a farmer.

After all, the farmer and his family are seeking just what all of us are seeking—a well-rounded, abundant, satisfying life. And many of them are just now realizing that the great country life interests are human interests, that good fat steers and cribs overflowing with corn are not ends in themselves, but are worth working for only because of what they will purchase for the family in the way of satisfaction and happiness. And that is why the purchaser needs the assistance of trained persons quite as much, no, we would say more than does the producer. Intelligent consumption must keep pace with intelligent production if the largest satisfaction is to be had.

Think it over! Would it not be the part of wisdom to give to the wife as good conveniences, as good a working plant, the same opportunities through the press, through lectures and through the association with trained leaders to learn what would be valuable to her in her profession, as it is to give these things to the farmer?

Spokane

Which breed will produce most the most profitably? We believe that the American breeds are the best, such as the Plymouth Rocks, Wyandottes and Rhode Island Reds. The Barred Rocks are vigorous and mature early. White Wyandottes are possibly the premier broiler chicken because of the plump carcass free from all dark pin feathers.

White Leghorns are good for squab broilers and they mature rapidly but for the trade demanding a two and a half to three pound bird, the American breeds seem to meet with more favor. The heavy Asiatic breeds, like the Brahmas and Cochins, grow to a large size, but their growth is not rapid and broilers must be developed quickly and have a frame containing meat as well as feathers and bone. The feed bills determine the profit on the broiler and this makes the factor of early maturity of prime importance.

Select the breeding stock with regard for early maturity and vigor. The birds that are slow in feathering are apt to be lacking in vigor and, of course, they are not easily developed into good broilers. It stands to reason that their progeny is apt to be endowed with the same characteristics. By selecting the best birds for breeders we can develop a strain in most any breed that will show a vast improvement in the quality of the broiler stock.

Do not try to make quality broilers out of black feathered breeds. Undoubtedly the quality of the meat will be first-class but the customer will not know that. Broilers are difficult enough to pick clean without having black pin feathers to complicate the work.

The man who earns more than he gets is in line for promotion. Set out at least one hard maple tree this spring; more if you can. Raising a tree is next to raising a boy or girl.

The boy who plays truant from school seldom brags about it after he grows up. One of the finest things in life is making father and mother comfortable and happy in their declining years.

Young folks should be a little critical before marriage and a little less critical afterward if they are looking for conjugal happiness.

Spokane Dairy

We have raised many bulls on our farm, and I do not know whether it is due to our method of raising a bull or that our bulls are of a good-natured strain, but we have seldom had an ugly or vicious one. It is a fact that the older the bull gets the more likelihood of his getting vicious. There are, however, certain things that should be taken into consideration by every bull raiser.

No matter how gentle a bull may look and act, look upon him with suspicion, for any bull, no matter how well you know him, remains a rather dangerous and unreliable farm animal. When cleaning his pens or using him for service, it is best to keep an eye on him and walk backward out of the pen. This may sound ridiculous to a reader who has full confidence in his bull, but it deserves recommendation, for one minute of carelessness may result in hours of regret. On our farm we have many pet animals, but never a pet bull. The bull calf is always treated rather harshly. He gets his feed, but is never caressed; and when he refuses to play he is soon brought back to his place, so that he learns that his owner is not a plaything, but his master.

Teasing or beating should not be allowed, for the day will come when he will repay you in his own way. Another important lesson that should be taught early is leading and tying. If the bull is accustomed to these two things while still a calf, he does not know anything else. We ring our bulls when they are about a year old, and teach them to lead with a staff. When these things are left until an older age the bull is liable to be angered and attempt to retaliate.

The young bull that is ready for service should never be kept in a narrow stall or in the dark, for these things certainly are hard on his temper, and are liable to cause difficult handling and viciousness.

A bull should enjoy freedom, plenty of fresh air, and sufficient light. Keep him in a well-lighted stall with an outside paddock, and water him at least twice a day or, still better, have fresh water in reach at any time. It is a well-understood thing that bulls should never be left loose with a herd of good dairy cows.

I want again to urge you never to trust a bull. You can never be sure of what he is going to do.

Maple Syrup For Every-body.

Most of the articles on the making of maple syrup are of interest only to those who have a large number of trees. A great majority do not belong to that class. Any family having from eight to fifty trees should save money by making maple syrup every year.

The outfit is not expensive. Mine costs less than three dollars, and from fifty trees the past two years we made twenty-one and seventeen gallons respectively of fine syrup for which we could have taken three dollars per gallon.

The first essential is a good sap spout. Ours are made of steel, with hooks on which to hang the sap cans. Insert these in holes bored on the well side of the trees about two feet from the ground. Our sap pans were secured from the local bakery, they being galvanized cans in which pie material is packed. Near the top edge of each of these we punched a hole with a ten-penny nail to enable us to hang the pans on the spouts. This kept the receptacles up where the wind would not blow the sap outside and waste it.

For boiling we use a sheet steel pan five inches deep by 22x22 inches for our four-hole stove. If one has a six-hole stove a pan 22x22 inches is the proper size. Remove the lids and the other parts and set the pan on, filling it about one-third full of sap. At the same time clean out the reservoir and fill it with sap to be heating for replenishing the supply in the pan as it boils down.

Each morning strain the contents of the pan in a preserving kettle to finish off by carefully boiling to the right consistency after clarifying by the addition of a small amount of sweet milk. Can the syrup in glass cans or jugs while it is still hot.

This whole outfit will not cost to exceed three dollars, and a single cord of wood will boil down about eleven gallons of syrup. Remember one can do this at a time when there is very little else to do. The time spent not only brings good returns but the product adds to the satisfaction of living. A hen that makes a lot of fuss over an egg is seldom a good layer.

Eggs produced by the back yard flock are fresh. Store eggs? Well hardly.

Spohn's Distemper Compound

to break it up and get them back in condition. Spohn's Distemper Compound is a powerful remedy for all diseases of the throat, lungs and sinuses. It is a preventive, acts equally well as a cure. Sold by Your Druggist. SPORN MEDICAL COMPANY, Goshen, Ind., U.S.A.

The Transcript

THURSDAY, MARCH 25, 1920

NEWBURY

A. Holman, reeve, was in London on Thursday on business with the jail committee, of which he is chairman. Joseph Soper of North Toronto spent a few days last week with his brother-in-law, E. Connelly. Mrs. Wm. Bayne spent the weekend in London the guest of Mrs. and Miss Graham. E. Connelly was in London on Friday. Reeve Holman sold the boiler and engine of the electric light plant on Saturday to Mr. Fletcher of Merlin for \$400. Much sympathy is expressed to Marshall Moore and family in the death of Mrs. Moore, who passed away Friday evening after a few days' illness with influenza and pneumonia. The death was saddened by the fact that the whole family of seven children were sick at the time. The eldest is sixteen years and youngest six months old. The funeral services were conducted at the home on Sunday at one o'clock by Rev. R. J. Murphy. Rev. Kenneth McLean of Stayner preached in Knox church on Sunday afternoon. Miss Elsie Pringley spent the weekend in London. Her father having sold their home there, the family will come here for the present. Gordon Haggith was in town last week. He has quite recovered from the effects of a recent operation for appendicitis. Fred T. Cherrington and Miss Besse Jeffery are spending a few days in Chatham the guest of their uncle, Ed. Jeffery. Mrs. D. Smith of London is spending a few days in our village the guest of Mrs. John A. Smith. Mr. and Mrs. B. F. Jeffery of the Commercial House announce the engagement of their daughter, Ella May, to Edwin Hoxie of Detroit, the marriage to take place in April. James Collier and William G. Jeffery of Melbourne spent the weekend with the latter's parents, Mr. and Mrs. W. H. Jeffery. Mr. and Mrs. Archie Sinclair and Miss Mildred McCugan spent Sunday with Mrs. Robert Armstrong.

WALKERS

D. H. McLachlan has bought the 50 acres adjoining Walkers from John E. McKellar of Brooke for \$2,300. Mr. and Mrs. John A. Walker attended the funeral of the late Neil Walker of Alvinston to St. Thomas. A literary will be held in Walkers school house on Friday evening, Mar. 26. The main feature of the evening is a debate, "Resolved that the progress of men of the church has played and still continues to play a more important part than the school." Speakers for the affirmative are Menzo Leitch and Mac Leitch, while two gentlemen from Calvert will uphold the negative—Reg. E. Warmoll and Mr. Dodds. Stuart McCallum made a business trip to London on Thursday. The most obstinate corns and warts fail to resist Holloway's Corn Cure. Try it.

MELBOURNE

Rev. Mr. Bowen of London preached in the Presbyterian church on Sunday last in the interests of the Bible Society. The evening service in the Methodist church was withdrawn, a unit service being held in the Presbyterian church. Ernest Stevenson spent Sunday at his home here. Miss Edna Petch of London spent the weekend here. A number from this village attended the party at Hector McDougald's on Friday evening. The Ladies' Aid of the Methodist church held a social evening in the Sunday school room on the 17th inst. After an oyster supper was served, a splendid program was given. Solos by Gordon Knapp of London were very much enjoyed by all. Margaret and Gilbert Stevenson, Melbourne's young artists, who are always ready and willing to assist in a worthy cause, were present and gave a number of selections. Andrew McLachlan, our own violinist, gave a number of his best selections, his sister, Miss Eliza McLachlan, accompanying him. Miss Bole gave a reading from Ralph Connor which was much appreciated. Mrs. Vance, Mrs. Theaker and Mrs. Clarke, members of the choir, also assisted in the program. Rev. Vance, pastor, occupied the chair. Arthur Gough, who has been ill for some time, is improving. We are pleased to see Rev. John Elder, pastor of the Presbyterian church here, out again after his illness.

BETHEL-MACKSVILLE

Mrs. D. E. McAlpine is visiting friends in Windsor. Peter McIntyre had a very successful sale of thoroughbred stock last week. Good prices were realized, one cow bringing \$300. Mrs. Chas. J. Towers is on the sick-list. Thurman Gough is moving to his new farm in Metcalfe recently purchased from Mr. Case. Sugar-making is the order of the day in this vicinity. Owing to the h. c. 1. and advanced prices of sugar, no doubt the big maple will get a big squeeze at the end of the season. Owing to the flu epidemic the meetings of the U. F. O. have been cancelled up to the present time, but a meeting will be held on Friday, March 26th, in S. S. No. 4. H. A. Eddie shipped a fine bunch of fat stock to the U. F. O. at Toronto recently. Mr. Eddie making the trip to Toronto later.

EKFRIID STATION

Mrs. Florence McDonald has disposed of her farm here to Alex. F. McTavish of Alvinston. Mrs. Alfred Skinner, who has been ill, is improving. Mrs. Bertha Ardies has sold her property to Wellington McLean of Melbourne. W. C. Cornell has purchased a car. Mrs. George Smith and C. P. Cornell have returned after visiting in St. Thomas.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

NEWBURY CASH STORE

Garden Seeds, bulk and package, from best houses.

For housecleaning time Soaps, with one or two exceptions, still 10c.

Sun and Magic Ammonia, old package, old price.

Cash or trade for Good Butter or Fresh Eggs.

W. H. PARNALL NEWBURY

CAIRO

Lieut. V. K. Annett, who returned from overseas a few weeks ago, has secured a lucrative job in Windsor and left for that city yesterday. Mr. and Mrs. O. Gage spent Sunday at the home of D. King, Newbury. Council met on Saturday last and transacted business. Syrup-making is all the go these days. B. L. Burdon, assessor, is attending to his duties these days. Mr. and Mrs. G. W. Young were entertained by Mr. and Mrs. John Randall on Sunday evening. John Temple of Alvinston has located on the Les. Sullivan farm. Mr. and Mrs. Fred Sullivan are London visitors today.

Don't Submit to Asthma.—If you suffer without hope of breaking the chains which bind you, do not put off another day the purchase of Dr. J. D. Kellogg's Asthma Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

APPIN

Duncan Hyndman is in London this week as a jurymen at the spring assizes. Appin Women's Institute will meet at the town hall on Thursday afternoon of this week at 2:30 o'clock, when Mrs. Fisher of Glen Oak will give an address. There will be a good program in addition and lunch will be served at the close of the meeting. The Young People's Dramatic Club of St. John's church, Glencoe, will give their highly humorous play "Popping the Question" in Appin town hall on Monday evening, March 29, under the auspices of the Women's Institute. There will also be a splendid program of music, readings, etc., at this entertainment. Commences at 8 o'clock. Don't miss it. Admission 25 cents.

KILMARTIN

Mrs. Robertson left on Tuesday to spend a few days with her son, Will, at Guelph. Mr. Robertson has been ill with the flu but is improving. A number from here attended the funeral of Mrs. Thos. Warren, an old resident of Alvinston, and formerly of Walkers. Archie McPhail of Wallaceburg was at Donald McGregor's on Sunday when over to attend the funeral of Mrs. Warren at Alvinston. Mrs. R. E. McAlpine and daughter Mary, who spent the winter in London, have returned. Russell McAlpine of Alvinston spent Sunday at his home here. Mr. and Mrs. Donald McAlpine of Dutton visited at Donald McGregor's last week after attending the funeral of Archie McCahill of Alvinston.

PARKDALE

Earl Martin of the Royal Bank staff, Glencoe, spent Sunday at his home here. George Campbell of Merlin visited the weekend with his parents, Mr. and Mrs. Robert Campbell. Wm. Martin left last week for Windsor, where he has accepted a position. Mr. and Mrs. Wm. Thompson entertained a few friends on Wednesday evening last. Sap's runnin', and all those who have sugar groves are working overtime gathering and boiling down their harvest of sap. They should worry about the prevailing high price of cane sugar. Buzz bees are the order of the day. Edythe Thompson spent Sunday with her friend, Wilma Martin.

CASHMERE

Miss Jean Tunks has returned home from Wallaceburg after a week's visit with relatives there. Ralph McIntyre of London is spending a few days at his home here. We are glad to say that Mrs. Alex. McIntyre, who has pleuro-pneumonia, is very much improved. Mr. Cadogan of Wallaceburg is visiting his aunt, Mrs. Charles Tunks. This is moving week in this vicinity. Will Smith moves to Bothwell, where he has purchased Mr. Mahler's house; Ross Willick to Garnet Long's farm, and Garnet Long to Will Smith's farm. The two latter have bought the respective farms. League as usual on Wednesday. The Willing Workers met on Saturday afternoon at the church. They are planning to have a box social on April 1st.

NORTH EKFRID

The ladies' mission met at Mrs. George Chisholm's Thursday afternoon. Seventeen ladies were present and the afternoon was spent in quilting. Charles Roemmle had a wood bee and Mrs. Roemmle a quilting bee on Friday afternoon. George Pettit left here Monday to work for Den. Laughton for the summer months. Mrs. Adam Roemmle spent Monday, March 15, at her brother's, Henry Pettit's, it being her birthday. Mrs. Foster had a wood bee Wednesday afternoon. Got eleven cords sawed. Will Cobbin has gone to the hospital at London for treatment. He got his eye hurt. Russell Roemmle arrived home on Tuesday from visiting Mr. and Mrs. Ketchum, Dearborn, Mich. Wedding bells will be ringing in this vicinity soon. School has been closed here this week on account of the teacher, Walter Stephenson, having trouble with a wound he received at the war. Wm. Pierce is engaged to teach until Easter. Some of the farmers around here have tapped their maple trees.

MIDDLEMISS

Lucas Bros. are selling their property here and intend moving to Windsor. F. H. McDonald was in St. Thomas Saturday. Mrs. George Graham is in Bothwell on a visit with friends. Joe Watson has purchased a steel barn from McDonald & Son. Lucas Bros. are having a clearing sale on March 30. Angus McGeachy has moved to his farm. Syrup-making is the order and good runs are reported. The robins have come again. So has the auto. Looks like spring. The land is in fine condition for seeding. With a few dry, warm days spring work will be in full swing.

WOODGREEN

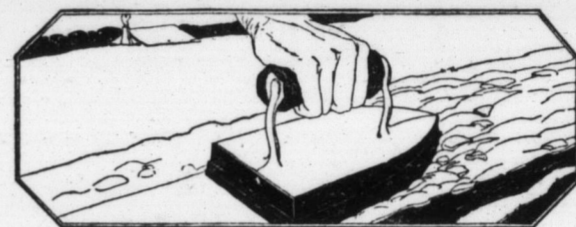

Many of the friends and neighbors of Mr. and Mrs. Lorne Goff and family who are leaving here to reside near Cairo met at their home on Monday evening and presented them with a writing desk and complimentary address as a testimony of the regard in which they are held in the community. On behalf of the gathering the presentation was made by Earl Winger and Alfred Jones while the address was read by Miss McEachren. A pleasant social evening was spent and lunch was served by the ladies. Mr. and Mrs. Goff and family left on Tuesday for their new home.

WARDSVILLE

Mrs. Douglas is in London attending a meeting of the executive of the London Conference W. M. S. She is the Strangers' Secretary of the society. Rev. Kenneth McLean, who is visiting his home at Tat's Corners, preached in the Presbyterian church Sunday. The A. Y. P. A. of the Anglican church gave a St. Patrick's party at the rectory Wednesday evening last. A very pleasant time was spent. V. Campbell of Sault Ste. Marie is spending a few days at his uncle's, F. Henderson's. Word has been received of the death of Mrs. John Cady, formerly of this place. Mrs. Wilson Turk has taken her babe to the hospital at London for treatment. L. Harvey has rented Mr. Petch's farm.

New Triplex Springs Iron Out the Wrinkles of the Rough Roads

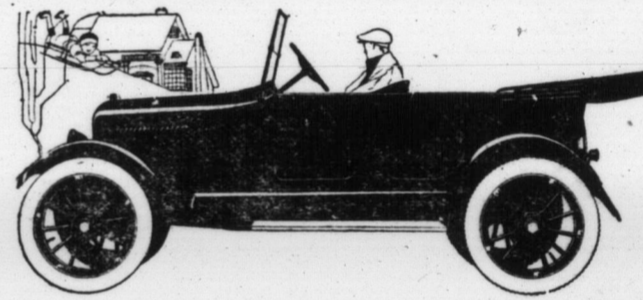

THE wrinkles of rough roads seem smoothed out completely by the wonderful springs of Overland 4.

These springs hold the wheels to the road, while the passengers ride in even comfort. The astonishing qualities of these diagonally attached Triplex Springs have created an utterly new conception of light car riding ease.

Best of all, this heavy car kind of comfort is now obtainable with economy in fuel and tires and remarkably low upkeep cost.

Overland 4 is started and lighted by two-unit electric starting and lighting system. It has rain-vision windshield and unit power plant. It is equipped with all the latest car essentials and conveniences.
