THE CADETS' TRUMPET.

An Amateur Monthly Devoted to Temperance.

Vol. 1. WINDSOR, NOVA SCOTIA, APRIL, 1880. No. 3.

SELECT POETRY.

DARE TO SAY "NO."

Dare to say "no" when you're tempted to drink,
Pause for a moment, my brave boy, and think,—
Think of the wrecks on life's ocean tossed
For answering "yes" without counting the cost;
Think of the mother who bore you in pain,
Think of the tears that will fall like the rain;
Think of the heart, and how cruel the blow;
Think of her love and at once answer "no."

Think of the hopes that are drowned in the bowl,
Think of the dangers to body and soul,
Think of sad lives, as pure as the snow,
Look at them now, and at once answer "no."
Think of a manhood with ruminated breath,
Think of the homes that, low shadowed with woe,
Might have been heaven had the answer been "no."

Think of the lone graves, both unwept and unknown,
Hiding fond hopes that were fair as your own;
Think of proud forms now forever laid low,
That still might be here, had they learned to say "no."

Think of the demon that lurks in the bowl,
Driving to ruin both body and soul;
Think of all this, as life's journey you go,
And when you're assailed by the tempter say "no!"—*The Contributor.*

ORIGINAL STORY.

[Written for the Cadets' Trumpet.]

SAVED.

BY H. F. J. O. W.

Our story opens upon a cold, blustering night in the month of January, 18—.

The wind was blowing so hard, and the snow flying about so furiously, that Dick Bently, the hero of our story, found it very hard work to make his way along the street; in fact he often had to turn around, as the wind and snow, blowing in his face, would take away his breath.

Dick was returning home from the Cadets' Room, where he had spent the evening, and in spite of the stormy state of the weather there had been a good attendance, and they all had done their share towards making the evening pass pleasantly, and now on his way home, he was thinking who he could get to join the "Section."

Dick was a great worker in the temperance cause, a cause that he loved to think of and labor for, and every Section night saw the fruits of his labor either in recitations, readings etc., or new members. Even

at school he would go among the boys, trying to get those that did not belong to enrol themselves with the young soldiers of temperance.

In this way he was very successful. Although there were some he could not get, on account of their fathers being drunkards, or in the habit of using wine at their tables.

There was another class of drinkers also, (we have some in Windsor) the kind that could take a glass or leave it alone, just as they wished. It is well known how much that assertion is worth.

There was one boy in particular that Dick tried hard to get.

Tom Astly was himself quite willing to be a Cadet, but his father would not hear of it, saying that he "didn't believe in those temperance societies, they were all a set of money-grabbers." So after several attempts Dick, saw that he would have to wait till something would change Mr. Astly's opinions with regard to temperance.

And something did happen that changed his views considerably, as you will see further on.

We left Dick making his way home, and a hard time he had, forcing his way against the wind and through the snow.

As he was drawing near the end of the block, there came an awful squall of wind, accompanied by such clouds of snow, that it brought our young friend to a stand-still, and seeing a light in a narrow lane that came out to the street which he was traversing, he made towards it with all possible speed, to wait till the squall passed.

After clearing the snow out of his eyes, he walked toward the light that had attracted his attention.

As he drew near he found that it came through a rent in an old curtain that covered the window of a bar-room, and on looking through he observed through the clouds of smoke that filled the room, about a dozen men lounging around; some drinking at the bar, and the "Devil's Agent" dealing out "Death and Perdition" at seven cents a glass, while others sat around the stove, smoking and reading.

As Dick was preparing to leave the shelter and start for home, the bar keeper commenced to relate how a poor fellow had, a short time before, come into the shop and asked for a drink, being half drunk at the time, and when asked what he had to pay for it, he had drawn out from under his tattered coat an old pair of child's shoes.

This was enough for Dick, and as the bar keeper, echoed by the crowd, burst into a fit of laughter, he ran off as fast as he could.

The wind had abated considerably by this time, and Dick found that he could make his way along much faster and better than before, although it was still very cold.

But our hero did not mind this at all, as he was covered with a long overcoat, reaching to his heels, and had his fur cap pulled down over his ears, putting one in mind of a great black bear, walking on his hind legs. As he hurried along, trying to think who the bar keeper referred to, his foot struck something in the snow which sent him headlong into a drift; picking himself up, he found that he had fallen over

(Continued in our next.)

"ONLY TIGHT."

How flushed, how weak, he is! What is the matter with him?

"Only tight."

"Tight?"

"Only tight." Man's best gift, his mind, degraded: the power that raises him above the brute section trodden down under debasing appetites.

"Only tight." The gentle sister whose strongest love through life has been given to her handsome, talented brother, shrinks with contempt and disgust from his embrace, and brushes away the hot, impure kiss he imprints upon her cheek.

"Only tight," and his young bride stops in the glad run she is making to meet him, and checks the welcome on her lips, to gaze in terror on the reeling form and flushed face of him who was her idol.

"Only tight," and the father's face grows dark and sad, as with bitter sigh, he stoops over the sleeping form of his first born.

He has brought sorrow to all those affectionate hearts; he has excited an appetite that will crave the poison cup again; he has fallen from high and noble manhood to babbling idiocy; brought grief to his mother, distrust to his sister, despair to his bride, and bowed his father's head with sorrow. But they say, "He is only tight."

EDITORIAL.

Owing to the number of interesting articles which we have received this month, and for which we tender our sincere thanks to our contributors, we feel that it would be superfluous for us to supplement it with anything of our own. We have some very interesting subjects which we wish to lay before our readers, but will defer them till such time as we shall have more space at our disposal.

CORRESPONDENCE.

DEAR MR. EDITOR:—Allow me, at my first appearance in your columns, to congratulate you on the successful launch of your craft into the literary ocean. The "ways" on which she was built stand firm and bore her well out in the current. Unlike some other late Windsor enterprises she did not "stick in the mud." Your trial is a six months voyage. May you reach safely your "desired haven," and being encouraged, proceed to a long, useful, and successful career. Your ship should be not only a merchantman, bearing rich freights which shall fill the coffers of her owners, and bring "good things" to her readers, but also a ship of war carrying destruction and ruin to the forces of the demon rum, and to the agents at work corrupting the morals of the youth of our land.

Amateurs you profess to be; as such reasonable critics will accept your efforts kindly, and will certainly say that your enterprise is deserving of success. There are those who would crush you; and there are those who despise your youth. Fear neither! Not the former, for yours is a good cause and cannot be crushed. Not the latter, because they are a set of carping humbugs, whose timidity or carelessness prevents them from doing any good themselves, and whose cheap wit is expended to discourage or despise the earnest, though weak efforts of those who are

endeavouring to improve themselves, and ameliorate the sufferings of their less fortunate and inebriate fellows. Boys of the Cadets, don't be ashamed of the first "toot" of your TRUMPET! Though it may be feeble now, it may by the blessing of Heaven, grow strong enough and loud enough in future to rouse some of the sleeping and indifferent temperance men of Windsor and elsewhere to earnestness and zeal in the good cause.

To succeed, you require the co-operation and support of all who have at heart the cause of morality and temperance. Such help is surely to be had in our town. I trust it may be given with a will.

Although I am not a member of your organization, yet I am an Amateur, and as such would encourage the Cadets to follow the example of an outsider by contributing something to the pages of their society organ. Here is a field in which they may improve and cultivate their literary gifts. Nothing can be a greater stimulus to improvement in writing than to see our own youthful productions appear in public print. No boy need be at all ashamed to begin in a small way, whether he be aspiring to be a literary man, a professional man or a man of business. In fact, he who tries to do great things all at once, usually fails in the end. Those hard working students, who are sometimes termed "plodders" are generally the most thoroughly successful while the *genius* often fails from lack of diligence and too great dependence in his known talents. The greatest fortunes too, are, for the most part, the careful accumulations of industrious years. It is the exception rather than the rule that men grow wealthy in a day. They seldom do it honorably. Our wealthiest Windsorians are not ashamed to say that they once handled the broadaxe or the sythe.

It is said that trivial occurrences are frequently productive of great results. That is very true, but the greatest results are seldom attained without labor. The simple falling of an apple suggested to Sir Isaac Newton's mind that there existed certain laws in nature for the government of matter in motion. But it was not until after years of failure, not until wearisome days and nights had been spent in experiment and observation that Newton discovered and demonstrated to the world, the laws of gravitation. Columbus saw a branch bearing unknown fruit, drifting on the shores of Spain, and from this, and other circumstances, he judged that there existed somewhere, an undiscovered land. But there were many discouragements, there was much scorn and the laughter of nations to face before the great discoverer achieved the great object on which he had set his heart. And so with a thousand discoveries. Chief among these are the discoveries in the manufacture of pottery in its finer branches. Men went through almost insufferable difficulties to discover secrets

suggested by trivial circumstances. So with steam, discovered almost a century ago, but only lately applied. So with electricity. The experiments of Galvani and Volta with their *zinc* and heterogeneous metals, of which we read in our school books of Physics, were but the A B C's of the science of electricity as we have it today.

Boys, let us begin modestly, work hard, and as Dickens advises, "Do all the good we can and make no fuss about it," and we shall certainly succeed ourselves, and make the TRUMPET a success.

Yours sincerely,

A WINDSOR BOY.

TEMPERANCE NOTES.

—The Sunday afternoon Prayer Meetings of the Reform Club are pretty well attended. They are very interesting, and we think are a step in the right direction.

—On Tuesday evening, the 16th ult., Robert Motton, Esq., of Halifax, addressed the public meeting of the Reform Club. His remarks were well chosen and appropriate and highly appreciated by his audience. We hope Mr. Motton will at some future time favor us with another address on the same subject, Temperance.

—SOCIABLE.—Avon Division S. of T., and Victoria Section C. of T., celebrated their 32nd and 2nd Anniversaries respectively, on Thursday last, 25th March. The tables was bounteously spread with all the richest viands of the land, and all appeared to enjoy it. After tea we were called upon to hear a literary treat by the members of the two Societies. All passed off well, and at 10.30 the National Anthem was sung, and all departed for their homes well pleased with the evening's entertainment. We understand that the remains of the supper were collected and given to the chairman of the committee to be distributed among the poor.

—The following are the officers elect of Avon Division, No. 12 S. of T., for the ensuing quarter:—W. P., F. B. Wood; W. A., John McDonald; R. S., H. H. Whittier; A. R. S., Miss Bessie O'Brien; T., John W. Smith; F. S., Miss Lottie Smith; Chaplin, Noah A. Dimock; C., Miss Clara Roach; A. C., Miss Rhubina Card; I. S., Gussie Dimock; O. S., Edward Trider.

—At a regular meeting of Victoria Section No. 13 C. of T., the following officers were elected for the ensuing quarter:—W. P., Jesse P. Smith; A. P.'s, A. J. Lawrance and G. McElhiney; W. A., Henry Dore; V. A., Chas. Curry; S., Clyde Futherland; A. S., Geo. Seals; F. S., Louis N. Geldert; T., Ralph Hobart; G., Chas. Banks; U., J. Chisholm; I. W., G. Curry; O. W., Hulet Crowell.

ITEM—GRAPHS.

—Spring! Spring! I! gen—Oh!

—April 1st, all fools day.

—Public installation of officers at Victoria Section on Friday evening, April 2nd.

—Boys, persuade your girls to do without candy for one week, and subscribe for the TRUMPET, which is far better.

—J. F. N.—Your poem received, will appear in our next.

—H. I. F. O. W.—Yours as you see is accepted.

—We are told that nothing is made in vain, how about Miss—— isn't she maiden vain?

—Our readers would do well to peruse carefully the letter in this issue from "A Windsor Boy," it deserves your attention.

—We were very much amused on the evening of the Sociable, at a very officious person, who was continually offering to assist people down the stairs. Of course his little help was declined, as the steps were very icy.

—The girls in the principal towns in Hants County are noted as follows:—Windsor, the sweetest and most substantial. Ellershouse, the most intellectual. Brooklyn, the most refined and lady-like. Avon Dale, the most graceful and entertaining in conversation. Falmouth, the most indifferent. Hantsport, the handsomest and gayest flirts.

AMATEURDOM.

AMATEURDOM.

—Spunk is a spicy little sheet from New Jersey—little but spunky.

—The Index, Lowell, Mass., is decidedly one of our best exchanges.

—What we want to know is—has the *Polio* evaporated, or sunk into oblivion? Come Grant show up.

—Looking over our exchanges, we notice particularly the *Press*, a six by nine sheet, with original illustrations, to all appearances produced by a master artist, with a jack-knife, on the end of a fence rail.
