36th YEAR-NEWS SECTION-FOURTEEN PAGES

TORONTO SUNDAY MORNING APRIL 23 1916

Entered as Second-class Matter, Pebruary 15th, 1911, at the Post-office at Buffalo, N. Y., under the Act of Congress of March 3, 1879. VOL. XXXVI.—No. 12,947

THER SUCCESS IN EAST AFRICAN CA FIGHTING RESUMED; NO ADDITIONAL GROUND TAKEN SARY CELEBRATED BY VICTORY IN SAME REGION

the River Meuse.

FAILED TO MAKE GAIN

Additional Ground Was Taken in Spite of the Vigor of Attack.

LONDON, April 22,-The Germans have resumed the offensive before Verdun, putting their infantry in action on both banks of the Meuse, but failing to gain additional ground, according to the French war office bulletin.

The principal attempt to advance was made to the east of the Meuse, following an intense bombardment. Paris reports that the French artillery folled the attempt and caused the Gernians heavy losses. The scene of this fighting was between the river and Fort Vaux.

To the west, just beyond the Meuse, the Germans put liquid fire into play in attacking the French lines north of the Caurette wood, but the assault is

ARTILLERY STOPS ADVANCE BETWEEN MEUSE AND VAUX

Intense Bombardment Followed by an Attempt to Move Prevented by Heavy Fire.

PARES, April 22, 12.50 p.m.—An intense bombardment of the French front before Verdun, between the Meuse and Fort Vaux, was followed, last night, by an attempt on the part of the German troops to advance. The war office announcement of this afternoon says the advance was prevented by the articlery fire of the French which inflicted heavy losses on the Germans. The statement also says a German attack north of Caurettes Wood, which liquid fire was used, also was repulsed.

in all parts of the world, commenced on Saturday a commemoration of the in all parts of the world, commenced on Saturday a commemoration of the first anniversary of the Sattle of St. Julien in honor of thousands of their countrymen, living 67 dead, who by self-sacrifice, heroism and gallantry, made for a Canada a name which will be illustrious for all time to come.

For three days flags will float at full mast from every public building house and will represent only very smallest token of esteen and appreciation which can be accorded to the men who were willing to sacrifice their all for the empire they loved. It had been suggested that the Union Jacks should be floated at half-mast, but it was the unanimous opinion of the Dominion Government that the only appropriate honor which could be paid would be to fly the flags at the very top of the poles.

It is fitting that the people of Toronto should be especially prominent in paying homage to the bravemen who "saved the situation" in that terrific engagement, for those who suffered most belonged to one of Toronto's own regiments, the 48th Highlanders. It was they who, in the advance trenches, separated from their comrades and practically overcome by the terrible poisonous gases, used for the first time by the Hins, battled with and slaughtered a force for four times their own strength. Although their comrades and practically overcome by the terrible poisonous gases, used for the first time by the Hins, battled with and slaughtered a force for four times their own strength. Although the first time by the Hins of the police and advance trenches, separated from their comrades and practically overcome by the terrible poisonous gases, used for the first time by the Hins of the police and the police and advance trenches, separated from the law of the police and the police and first anniversary of the Battle of St. Julien in honor of thousands of their

Citizens and Military Commemorate Glorious Stand of Canadians.

ENTHUSIASTIC SCENE

Contests, Sporting Events and Review By Gen. Logie in Great Amphitheatre.

Saturday was the first anniversary of the day when a few thousand gallant Canadians jumped into the gap at Ypres and for four days held at bay ten times their number of Germans pushing towards Calais. To commemorate the occasion a crowd of 15,000 people swarmed the grass slopes of Riverdale Park and were entertained by a series of sporting events, music and also listened to reest any other "The man who does not do his duty does not justify his existence," one of the recruiting sergeants announced

right place. The reference to the French-Canadians was greeted with boos and hisses. Sports Big Attraction. Altho the speecnes and music drew a fair proportion of the thousands, the splendid sporting program proved the big attraction. Every one of the fifteen thousand in the parks voted the teen thousand in the parks voted the boxing bouts away above par; at least those lucky enough to get near enough to see them did. And the ten-mile marathon, which Corp. Jimmy Corkery just managed to win from Tom Longboat, was a corking race, with a hair-raising finish, even if nobody did take the trouble to take the winner stime. An impromptu entertainment was provided by the Buffs, one of whose officers sang fitting words to the numerous bugle calls sounded by a squad.

a squad.

Best Meet Yet.

The sports constituted the first athletic meet conducted by the head-quarters staff of the Toronto Military. Athletic Association of this district. Capt. Tom Flanagan was in charge, and he was enthusiastic in his remarks of commendation on the variance.

THE WEEK'S EVENTS REVIEWED

BY W. H. STEWART.

IN the Armenian Theatre of the war it was announced on Monday that the Russians had won a big victory over the Turks, 17 miles west of Trebizond, and the next night it was announced from Petrograd that Trebizond, the chief Turkish port on the Black Sea, had been captured in a combined operation by land and sea. The Russians are continuing the pursuit of the rapidly retreating Turkish forces on the roads along the Black Sea shore west of Trebizond. The Christian population of the city welcomed the Russian troops artillery duel raging in France, and with acclamations and the Turkish population fled. Along the upper son of Hon. J. D. Hazen, minister of Tchoruk River the Russians, who are advancing on Baiburt, dislodged marine and fisheries, was a great perthe Turks from strongly fortified heights. South of Bitlis the Turks were also defeated in a battle with Russian detachments and fled southward. It was intimated from Petrograd that Turkish overtures for peace had not been entertained by Russia and that the decree

WAR SUMMARY

of the allies was, "Turkey must go." On the British front in France there was considerable fighting between Ypres and St. Eloi. Excepting from two craters at St. Eloi and a trench on the Ypres-Langemarck road, the Germans were repulsed everywhere. They had directed their attacks principally on leaves by the four points of St. Eloi, the Bluff, Wieltje and the Ypres-Langemarck road. It is said that the Canadians were engaged in this fighting. Considerable mining, trench-mortar, and artillery activity has prevailed on the British front in the past week.

In the Mesopotamia theatre of the war there has been rather heavy fighting. The British advanced on the right bank of the Tigris River and captured Turkish advanced lines for a distance of a mile and a half to three miles. The Turks counter-attacked the British when they thought that the British advanced troops had been isolated by the flood and were severely repulsed, altho they gained a few hundred yards of ground. It was estimated by General Lake that the Turkish losses in dead alone were 3000 men, and they also lost in wounded in a correspondingly heavy manner. Many German officers who led the Turks on to the attack were shot down. A message that officers commanding C.E.F. units was read in the British house of commons from General Townshend, must persuade all suitable men to take advantage of an offer of purwho is surrounded by the Turks in Kut-el-Amara, saying that all was

In the sector of Verdun, the Germans have made no progress in the past week, but on the contrary, they have weakened and lost some ground, both east and west of the Meuse. The French Sunday by May 1 the number of N.C.O.'s and men to be granted furlough.

Captured some ground from the enemy in a counter-attack. The

GREATEST SESSIONS

Many Bills of Great Import-Swore Pierce Threatened Him ance Passed in Record and Other Licensed Time.

HYDRO LEGISLATION

Public Mind-Beck's Absence Significant.

During the session just over the Ontario Legislature has made Ontario "dry," has placed a comptroller over the finances of the hydro, has undertaken the development of Niagara water power, has voted \$8,350,000 to gain control of the Seymour power interests in the Trent Valley, has widened the powers of the Hydro Commission, has laid down the policy of restriction of radial construction during the war, has undertaken the development of the north country along advanced lines, and has done a number of other things which will make it stand out as one of the most important sessions in the history of this province.

Among the things that the government has failed to do during the session are: To deal with the question of the nickel industry until the nickel commission shall have reported, to make any change in the bilingual situation, to fill the gap in the transportation system on Yonge street, and to make the hydro bills explicit as to the intentions of the government.

The legislature did pass legislation to

ment.

The legislature did pass legislation to take advantage of the recent judgments handed down in Osgoode Hall. By laws passed in the last hours of the session, school taxes for separate schools have been placed definitely in the hands of the commission. The suggestion of N. W. Rowell, leader of the opposition, that an investigation should be made by a specially-appointed committee, representative of the jarring factions, to see what progress had been made since the first commission reported, was not approved. The government roundly accused Mr. Rowell of having received instructions from Sir Wilfrid Laurier to fall in with a plan adopted in Ottawa to stir up dissension and make party capital from the situation.

The policy of government loans to settlers in northern Ontario has been laid down. Money has been set aside to advance not more than \$500 each to such settlers on the security of their holdings. The policy of limiting colonization to suitable sections for the improvement of social life and the reduction of expense in road-building has also been placed on the statute book.

A new tax has been placed on amusements and on race tracks. The marriage license has been raised from \$2 to \$5.

Arrangement has been made for the municipalities to take their share of the \$300,000 additional cost of the Toronto-Hamilton highway above the estimated cost.

of the province.

These are among the outstanding features of a session during which some 135 bills were passed, which lasted 36 days, and which ended in a sitting of 13 hours, during which some of the most important legislation ever passe din Queen's Park was cramme dthru.

Victuallers.

MEMBER ON THE STAND

Wording Has Left Doubts in Pierce Says He Did Not Say He Could Get Men to Do Anything.

> (Continued From Page 1.) see a man from Winnipeg and take it up with him.

Carroll. He said Carroll wanted to put up an election fund of something, while Pierce said he had promised members money to vote against the bill. Pierce said Carroll would not entertain his proposition at all. He said he had asked Carroll for \$50,000. He said he had promised the boys this money. He said he told Carroll the boys did not want any election fund, as a lot of them did not want to run anyway.

Witness also told of his conversation with Cawthorpe, Cawthorpe said Pierce could not hold the members any longer, that they would stampede if he die, not come thru quick. He said the Carroll. He said Carroll wanted to

Pierce could not hold the members any longer, that they would stampede if he die, not come thru quick. He said the boys did not want any campaign funds, they wanted money right away.

"I did not pay any money, and I was opposed to even getting out that petition the licensed victualiers got out. Both Calder and Turgeon told me the bill had to go thru, and that was why I did not even attend the executive meetings or anything," said Brumner.

"They said there would be no use opposing the bill."

Brumner categorically denied a number of statements made on the stand by Pierce.

Pierce.

He said he knew of the big funds, and so forth, only thru Pierce, "Pierce was keeping very busy," said Brumner. Conversation Related.

Brumner related a conversation he said he had with Pierce a short time before the 1916 session of the legislature, at which he swore Pierce threatened him and other members of the licensed victualiers with arrest on trumped up charges to discredit their evidence in any investigation.

charges to discredit their evidence in any investigation.

Arthur Mason was next called. He was vice-president of the licensed victualiers in 1915 and attended a meeting of the legislature when Premier Scott and nounced his policy.

Neither at this meeting nor in private talk with other hotelmen, had he heard sny talk about bribing members of the legislature. No steps, so far as he knew, were taken along that line.

"That's all the evidence I have to submit on this charge," said Mr. Sampson, prosecuting attorney.

H. C. Pierce Recalled.

H. C. Pierce, M.L.A., was recalled to the stand by Bigelow.

"Did you tell R. J. Barry you could not get Brumner and Waddell to do anything in the spring of 1913?" "No, I did not," said Pierce.

R. J. Barry, Saskatoon related a con-

The Show Review

Brain Centres So Situated That Mastication Drives Out Melancholia

chewing, Dr. Anna Dwyer, chief physician of the Morals Court of Chicago, states in a recent issue of The Chicago Herald that it is a physical impossibility for worriment and depres-

sion to come upon an individual who in using chewing gum.

"The brain centres," says Dr. Dwyer, "are so situated that when the act of mastication is begun all sense of depression and of melancholin leaves the mind. From a purely mechanical standpoint worriment is impossible while the jaws are moving rapidly. Whon an individual chews gum he, or more frequently she, has no concorn or worry for the world.

"I prescribe chewing gum to those of my patients who are habitually depressed. I advocate it on account of the undoubted benefits it brings to those who are threatened with nervous troubles.

Where aley and Serson Live.

those who are threatened with nervous troubles.

Where Joy and Serrow Live.

"The reason for this is very obvious when you analyze the brain and its contributing blood and nervous systems. At the base of the brain is the medulia oblongata, a short connecting link between the spinal cord and the brain. Within this very important section of the nervous system lie, closely adjacent, the centres confidence in the consecution of the nervous system lie, closely adjacent, the centres confidence in the control the whole street. "They had even put a 'whitewash' sign outside the house," he continued despite the fact that this is a residential street. "They had even put a 'whitewash' sign outside the house," he continued despite the fact that this is a residential street. "They had even put a 'whitewash' sign outside the house," he continued. "despite the fact that this is a residential street."

"The committee doesn't want to say that these people must get out just because they are colored," said Ald. McBride: "Is it more detrimental to have colored people than a nice store?"

My recommittee doesn't want to say that these people must get out just because they are colored," said Ald. McBride: "Is it more detrimental to have colored people than a nice store?"

My recommittee doesn't want to say that these people must get out just because they are colored," said Ald. McBride: "Is it more detrimental to have colored people than a nice store?"

My recommittee doesn't want to say that these people must get out just because they are colored," said Ald. McBride: "Is it more detrimental to have colored people than a nice store?"

My recommittee doesn't want to say that these people must get out just because they are colored."

Ald. McBride: "Is it more detrimental to have colored people than a nice store?"

My recommittee doesn't want to say that t

lays the message. The blood floods to meet the demand of the rapidly moving jaws and the near-by centre of depression becomes inactive. As soon as the act of chewing is well under way the feeling of sadness leaves. The downcast countenance clears and content comes upon the individual. He is said to 'get his mind off his troubles.' "It relieves the situation automatically and invariably. To those who cannot sleep at night from some worriment I urge the chewing of gum. I have known it to stop insomnia if followed diligently.

have known it to stop insomnia if followed diligently.

Good for the Teeth.

"Dental experts have recently been dwelling on the importance of developing the jaw bones and muscles, thus giving the teeth ample opportunity for development. An alarming percentage of school children were discovered to possess teeth of inferior quality and malformation. Chewing gum sorves to strengther the face and jaw muscles, exercising the teeth, massaging the gums and removing particles of food that lodge in or between the teeth, causing decay.

Used in Hospitals.

"In some of the largo hospitals chewing gum is now given to fever convalescents. It has been discovered that the gum is relished for its cooling and soothing properties, for its good influence in destroying bad taste and in giving the patient something to look forward to that is toothsome, agreeable and sedative in its action upon the nerves."

"What did you say your age was?" he remarked, between dances.
"Well, I didn't say," smartly returned the girl, "but I've just reached 21."
"Is that so?" he returned, consolingly, "What detained you?"

BELGIAN PRIMA DONNA TO SING FOR BANTAMS

Big Reception Planned for Mile. Verlet When She Arrives

What promises to be one of the biggest musical events of the year in Toronto, will be presented at Massey Hall next Wednesday evening, when Alice Verlet, the famous "Belgian Queen of Song," Elizabeth Spencer, the noted New York concert contralts and Vernon Archibald, the well-known baritone, with other artists, sing in the benefit concert for Burton's Bantam Battalion.

Battalion.

Mile, Verlet will arrive in Toronto the day before the concert and will be met at the depot by the brass band contingent from the Bantams, who will escort her in state to the city hall, where the mayor will welcome her.

Mile, Verlet is well-known to Toronto music lovers having appeared.

the Russian delegates to the forthcom-ing meeting of the International Red Cross Commission at Stockholm, and asking the prince to act as an intermediary in ascertaining the views of Gormany and Austria regarding the Portugal incident.

DARING YOUNG BANDIT

hought to Be Same Man Who Stopped Limited at Corlett Junction.

WLINS, Wyo., April 22.—A sheriff's of two dozen men, mounted on fast as, early touay resumed the chase in last night for the bandit who heid hearly fifty passengers on the Union file Limited train west of Hanna,

n, Wyoming.

About \$200 was gathered in the obrvation car.

At the entrance to the second sleeping
g, a brakeman and James Sherlock,
enductor, faced the robber. Sherlock
sitated a moment about raising his
sads, and the bandit fired, the shot goig wild. In the sleeper the brakeman
ras pressed into service, and another
100 was dropped into the hat.

When the collection was finished, the
sber handed the guard a watch.
There's the watch I got on my last
old-up, and which I promised to return
his time," he said.

"If you'll slow down the train, I'll get
ff here; otherwise I'll go to Rawlins
rith you."

As the train slackened speed for the
dison tunnel, the man dropped to the

As the train slackened speed for the Edison tunnel, the man dropped to the ground and ran in the direction of the "Robbers' Roost" country in the Elk Mountain region.

The bandit who robbed the Union Padific Overland Limited at Corlett Junction promised the porter who collected for him on that occasion he would return a watch he had taken, upon his next exploit.

HOTEL ST. CHARLES INAUGURATES DANCING

Spacious Belgian Room Beautifully Decorated, Opens

Monday. With the announcement of the management of the Hotel St. Charles of the inauguration of dancing in the spacious Belgian room during the dinner period and at the after-theatre supper, a long-felt want in the city will be supplied. Metropolitan in many ways, Toronto has been rather backward in developing a high-class restaurant where its patrons may dance if they so desire. It is generally conceded that the service of the Hotel St. Charles the service of the Hotel St. Charles and the cuisine is unexcelled, and with

and the cuisine is unexcelled, and with an a la carte service in effect, the price arrangement is more than satisfactory. Commencing Easter Monday night, the management will open the beautiful, handsomely-appointed Belgian room for the first of the new dinner and after-theatre dances. Romanelli's special dance orchestra has been engaged, while the floor is everything that could be desired. It is the intention of the management to provide entering the management of the provide entering the management of the mana tion of the management to provide en-tertainment for its patrons, and, to this end a cabaret that for excellence of

end a cabaret that for excellence of artists and general ability to entertain in pleasing, wholesome fashion will not be surpassed in Canada, will shortly be provided.

Every effort to amuse and entertain, besides dispensing dishes calculated to please the most fastidious epicure, at a price that is moderate, is the aim of the management. Nothing will be left undone to make the Hotel St. Charles like up to the reputation which it has live up to the reputation which it has always held of being "Toronto's Favo-

SUPERINTEND FORMATION OF NEW AMERICAN UNIT

General Bates Arrived in Toronto Saturday, to Complete Arrangements.

Brigadier-General R. J. Bates (retired) will take command of the preliminary organization of the 213th Battalion, one of the constituent units of the American Brigade. He arrived at the Carls-Rite Hotel from Sault Ste. Marie, Mich., on Saturday for a conference with Major C. S. Bullock, in whose hands the arganization of the new American battallons has been placed by Major-General Sir Sam Hughes.

perience in the United States. For some years before his recent retire-ment he was in command of the NOTE HAS BEEN SENT Michigan state militia.

The 213th is the American Brigade being raised in the east. The other two new battalions, the 211th and the

212th, are being raised in the west. TYPOGRAPHICAL UNION

WILL ELECT OFFICERS

Date is May Twenty-fourth for Ballot Taken Thruout Canada and U.S.

INDIANAPOLIS, April 22.—The annual election of officers of the International Typographical Union will be held May 24 thruout the United States and Canada, according to an announcement made today by Marsden G. Scott, president of the organization, at the head-quarters in this city. Neither President Walter W. Barrett of Chicago will have opposition, but John W. Hays, secretary-treasurer, w'' have as his opponent, W. E. Merritt of Houston, Texas.

Six candidates for delegates to the annual meeting, four to be elected, have been endorsed. They are: Frank Morrison, Chicago; Max S. Hays, Cleveland; H. W. Dennett, Los Angeles; T. W. McCullough, Omenia; Hugh Stevenson, To-fonto, and U. B. Pittenger, Mount Harris, Pa. It is said that about 60,000 votes will be cast and that it will require about two weeks to count the ballots.

LARGE DETACHMENT

GOING TO MEXICO for trial, with references from detact ment of infantry left here today to strengthen, it is believed, the American line of communication in Mexico. The destination of the troops was not announced, and military headquarters would make no statement regarding the poyement.

John J. M. April 22.—A large immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write today to Mrs. M. Summers, Box would make no statement regarding the poyement.

The Rev. Geo. Adam is one of the younger clerg, men of England who has come rapidly to the front in church circles and been prominent during the war in service for the troops. He is the pastor of Forest Clate Congregational Church, one of the largest in the neighborhood of London, and the still young, is considered a prospective occupant of the famous City Temple pulpit. He is of Scotten parts, escacated in Edinburgh University, was a prominent athlete in his college days, having played three years for Scottand in the International Soccer League.

for Scotland in the International Soccer League.

He is not only prominent in the church, but also on the public platform. So influential is he in public affairs that he has been invited by Lloyd George to enter public life. He continues, however, to devote himself to religious activity. Much of his time has been spent in work in the military camps under the auspices of the Y.M.C.A., and he comes for a brief visit to Canada able to tell in his own eloquent way how the Y.M.C.A., both of Great Britain and Canada, is helping to win the war. win the war.

Mr. Adam will speak tomorrow in Central Methodist Church at the morning service, at a meeting to men in Central Branch Y.M.C.A. at 3 o'clock in the afternoon, and in Bloor St. Presbyterian Church at the evening service.

C. W. A. INVESTIGATING SPENCER BROS.' CASE

Riding at Newark is the Mystery -No Championship Meets This Year.

The Canadian Wheelmen's Association held their 36th annual meeting in the Queen's Hotel Saturday afternoon. President Ald. Louis Rubenstein occupled the chair and called the meeting at 3 o'clock with a few members in Stratford ,a noted track rider of former days, was a prominent visitor and took part several times in the various dis-

The most important business to be brought up at the meeting was the susbrought up at the meeting was the suspending of championship race meets during the present year and the Spencer Brothers case. Both these questions caused considerable discussion at the meeting, but the decisions in the cases were passed unanimously.

On the recommendation of President Rubenstein, it was decided to hold no championship races in Canada this year. Sanctions will be granted for bicycle races at fall fairs, military meets and meets for patrictle purposes. Racing eyclists will be obliged to take out licenses this year as usual, but boys under skyten will be granted cards without cost.

The report faces to the meets of the cases with the control of the cases of the property of the cases and meets for patrictle purposes. Racing eyclists will be obliged to take out licenses this year as usual, but boys under skyten will be granted cards without cost.

Wilbert Robinson Talks on Baseball—Dodgers Are Stronger This Year,

BROOKLYN, N.Y., April 22.—"It looks to me as if most of the strength in the National League is held by the eastern clubs this year," said Wilbert Robinson, while discussing baseball in general. "I am glad of it in a way, for it means that the Brooklyn Club will be stacked against the hardest sledding at the outset of the race. This is a good break for us, for the Superbas are in splendid physical trim to begin the campaign and I expect them to get away to a good start.

physical trim to begin the campaign and i expect them to get away to a good start.

"If they do it will mean that they have met the strongest opposition and have more than held their own against it. It will tend to imbue the players with a wealth of confidence and that means something in these days of baseball. The club carries more ability than any Brocklyn team has in several years. Certainly we boast a pitching staff that compares favorably with any in baseball. The infield is strong and the outfield is fast and possessed of batting strength. Behind the bat we are strong.

"Chief Myers looks mighty good to me. He had an off season last year, but I feel sure that he will be just as good as he ever was in this race, and that means that he will be as good as any catcher in the business. There are few backstops who know as much about holding up a pitcher as Myers does. He has the faculty to help steady pitchers when things are breaking against them. "It is my pitching staff that affords me the greatest pleasure. It is evenly balanced all along the line. I have a galaxy of right-handed twirlers and enough left-handers to lead the defensive work of the club. On the whole I feel sure that the "fans' of Brooklyn are to be represented by a real ball club this season."

NEW YORK, April 22.—The annual ocean-to-ocean telegraphic bowling tournament for the trophy presented by Robert M. Thompson of this city will be held tonlight. It is considered one of the important bowling events of the year, as representatives of many of the large athletic clubs thrucut the country compete. Each club rolls three games on its own alleys simultaneously at 10 p.m., eastern time.

its own alleys simultaneously at 10 p.m., eastern time.

Clubs in San Francisco, Seattle and Portland are to bowl at 7 p.m., Pacific coast time. Other clubs to be represented are in Montreal, Cleveland, Detroit, Chicago, Minneapolis, Brooklyn, Pittsburg and New York:

Scores will be telegraphed among the cities at the end of each of the three games. The team rolling the largest total wins the trophy.

CHICAGO, April 22.—Walter Mayer, catcher of the Chicago Americans, today was released to the Milwaukee club of the American Association.

New Orleans immediately proceeded to strain his vocal cords, emitting loud challenges to anyone with lightweight inclinations.

He sought out Leonard and Dundee, Both regarded him askance, and as Leach Cross once remarked to "Willie" Ritchie, told him to go and make a name for himself before daring to transgress upon their preserves. Even the offer of a \$500 bonus to meet him in the ring was not attractive enough

mand.

"The chances are they received first-hand information regarding my bout with 'Charley' White at Chattanooga in February, when only the amateurish actions of a referee prevented me from being credited with a knockout over the Chicago lightweight. I knocked White down in the first round, but before starting to count the referee was so flabbergasted that he was unable to tackle the job of tolling off the seconds. When he finally began to count White arose at the count of five, but persons at the ringside insisted that White had been on the floor for 15 seconds."

WHITE SOX MANAGER

Infield and Outfield Strong
Hurlers Must Stand Up to

CHICAGO. April 22.—Among the teams figured this year as strong contonders for the Asserican League pennant is the Chicago White Sox. According to Malcolm MacLean, a local critic, who has been traveling with the Sox all spring. Rowland's chances to finish first depend mainly upon his pitchers. He views the situation as follows:

"Viewing the situation at close range, it looks as if the pennant depends on the pitchers now under Rowland's charge. If the pitchers deliver and nothing serious happens to cripple the staff the Wiste Sox have a rosy chance. The pitchers can make or break the situation.

"Last year the pitchers went fine the

White sox have a rosy chance. The pitchers can make or break the situation.

"Last year the pitchers went fine the early part of the season. Especially was this the case with Faber and Scott. Lame arms developed and just as prospets looked bright the stuff was off. Howland has been lucky in picking up some strength this year. Danforth and one of them at least should be a regular worker on the slab. Benz should be more effective than last season. "Red Faber reached a high pinnacle last year, and still is in the full glory of his strength. Many think Faber is way he seems to throw his spitter. It is the general belief he uses his arm almost exclusively, but Faber himself, says there is little strain and that he puts his whole body in his throw." "Reb Russell has worked hard this spring, and his arm has given him no best again. This time last year he best again. This time last year he couldn't straighten his left arm out. The old kink was there. Hot Texas weather and average labor has put him in the pink, and the big fellow has been wisq enough to see that he must go right or the other left-handers wift be after him.

"Mel Wolfgang is still on deck with his puzzling delivery. With this array of talent and the possibility of Eiler's coming across as a star spitballer the Sox pitching staff looks better, if any-othing, than it has in years."

OPEN AIR BOXING

Chill Winds Failed to Cool Spirit of Boys at Riverdale Park.

Toronto's sport lovers were treated to one of the finest programs of sporting events ever held in the city at the great

events ever held in the city at the great entertainment organized by the Second Division Amateur Athletic Association at Riverdale Park on Saturday afternoon. The marathon race drew the attention of everybody on the grounds and those living in the neighborhood of the park. Forty-seven entries were received for the event, which was won in fine style by Corp. Jim Corkery, 180th Batt., who beat Corp. Tom Longboat, 180th Batt., in the last few laps by a good margin. The entries included in addition to Longboat and Corkery several well-known runners, among them being George Ernie Wood, and Percy Sellers.

At 2.45 thirty-nine runners started in the race at the Gerrard street end of the park, the course being laid along the Don up Winchester Hill, and down Broadview avenue. Corkery, who only arrived from Boston at noon, led for the first mile or so, with Longboat and Black not far behind. In a few minutes the great majority of the runners were far behind with Longboat in the lead and Corkery and Black following. On the second turn the steep hiff proved a stumbling block to many of the runners, but the above three ran nicely down Broadview avenue. Corkery still being second, with Black at striking distance. Considerable speed was put on in the last lap, and Corkery ran away from Longboat, beating him by about ten yards. Black was third, being 20 yards behind.

of the 92nd met Shea, but was knocked out in the third round.

There was no stopping Danny Johns-ton in his fight with Pte. J. Olson of the 92nd. The latter was all in when the bout was stopped at the end of the first bout was stopped at the end of the first round.

Ptes. Ted Picton and Chas. Christie of the 190th fought hard, and the bout ended with honors even.

In the heavyweight class, Pte. Chuntony. Banks could have wiped the floor with Pte. Foster of the 92nd. The former knew too much about boxing for Foster, but let him down easy. The 92nd private will turn out to be a good man if his style is anything to go by.

The great fight of the afternoon came when Danny Johnston of the 180th met Pte. Painter of the 92nd in the 145-pound class. For three rounds they went at it hammer and tongs, and an extra round had to be boxed. Johnston got the decision.

TO MEET FREDDIE WELSH

LACROSSE NOT PLAYED AS IN OLDEN DAYS

OTTAWA, April 22 .- Alf Smith, who OTTAWA, April 22.—Alf Smith, who played the grand oid game of lacrosse when it was played right, and who is one of the most active workers in the effort to bring the game back to its own in Ottawa, does not see why the players now adays cannot go without being padd from head to foot, as they did when played the game.

In those days the players used to I without the heavy padded gloves or cand they wore short-sleeved jerseys. If did not then have to take their lives their hands every time they went on field, as they do nowadays.

The Capital team of 1899 was the last of those playing in the league in those days to don the long-sleeved shirts, and the last to use the pads. Harry Westwick was the last of the Capital players to resort to the padded outfits.

STANFORD UNIVERSITY WINS.

OAKLAND, Cal., April 22.—The crew of the Leland Stanford University wou by five lengths the annual race with the University of California today over the three-mile course of the Oakland estuary. The unofficial time was 18.23, which was slow for the course. The Stanford crew will go east for the Poughkeepsie meet in June.

SCOTT GOING TO WASHINGTON.

SOUTH BETHELHEM, Pa., April 22.—Bethlehem Soccer and Football team, defeated the Pullmans of Chicago here today, 2 to 1 in the semifinal game for the cup emblematic of the United States championship, and Owens.

Nabors and Meyer. UmSAN ANTONIO, Texas, April 22.—
General Scott probably will leave here for Washington tomorrow morning it was announced inte today at General Fundamental and Nunnamaker; Harper and Henry, Umpires—Connolly and Owens.

HELP WEAKER CLUBS

It An Even Race All

CHICAGO, April 22.—Two prominent baseball deals recently consummated furnish conclusive proof that "Ban" Johnson has instituted a new policy in the American League. The slogan of the organization now is, "Help the Weaker Clubs." It is a policy destined to prove of great financial benefit to the eight clubs, individually and collectively. It is a policy which should have been enforced some years ago, especially in this clearing house for baseball currency.

in this clearing house for baseball currency.

The deals referred to are those whereby Frank Baker was cached in a Yankee uniform and "Tris" Speaker became the property of the Cleveland Indians.

When the Yankees were negotiating for the purchase of Baker's release from the Philadelphia Athletics there were other club owners in the league who watched the progress of the negotiations with covetous eyes. To even the furthest removed outsider it was apparent that a restraining power held these owners in check. Otherwise they would have been in the bidding, and the price of Baker's release would have been sent soaring beyond all limits of reason and fairness. By holding them back and leaving the field to the Yankees the New York Club was enabled to procure Baker's release for a price greatly under what might have been permitted to auction the player's release to the highest bidder.

by Jackson's transfer to the Clan Comiskey.

This new policy is founded upon the basic principle that it is more effective financially to have baseball strength distributed in as many teams in the league as possible rather than that one or two or three should stand out as virtual Gibraltars among sand dunes.

If four or five clubs can be fortified with baseball strength it means that all the clubs in the league will benefit materially as regards the capturing of the elusive dollar. The few remaining weak clubs—or comparatively weak clubs—naturally share in the patronage that is a winning club's.

It is not syndicate baseball; in fact, it is far removed from such a condition that would prove the ruination of the national spart. Clubs holding star players are are not forced to dispose of any of their holdings. Nor in limiting the field of bidders is any one club enabled to purchase a player's release for a price below the player's real value. The policy simply affords clubs whose band rolls are below the player's real value. The policy simply affords clubs whose band rolls are not as heavy as some others the opportunity to bolster up depleted ranks and assume a position other than that of a poor also ran.

Glover Made Good In Swimming Tank Wins Junior Title

WASHINGTON, D.C.. April 22.—In Tom Sawyer, Washington has the greatest comedian on the diamond. Compared with this nimble-tongued and athletic pantomimist, Germany Schaefer and Nick Altrock are funereal in manner. The antics of Sawyer, who sprang into life on the coaching line in the recent New York Saker.

Washington, D.C.. April 22.—In Tom Sawyer, Washington has the greatest comedian on the diamond. Compared with this nimble-tongued and athletic pantomimist, Germany Schaefer and Nick Altrock are funereal in manner. The antics of Sawyer, who sprang into life on the coaching line in the recent New York Series, had the crowds in roars. His imitation of a jackass was inimitable. With two pieces of paper behind his Baker.

The 40-yard back race was won by Will Beatty by a close margin over Archie Perkins (second), and Jimmie Watt (third). Time 38 1-5 secs.

In winning the junior diving event, Richardson Glover made a remarkable showing, this being his first meet. Russell McEwan, who also participated in his first swimming event, was second, only one point behind Glover; Leslie Bartlett was third, one-half point behind McEwan.

Bartlett was third, one-half point behind McEwan.

The result of the senior diving was just as close, Douglas Graham winning and Taavi Tigert and Robt. Hanks being tie for second. The tie was decided by an extra dive, Bobby Hanks getting second by a quarter of a point.

In the 200-yard event L. Bartlett and W. Beatty were tie for third, the winner of third place being decided by the toss of a coin.

Some fancy swimming by W. D. Nicol was another feature of the meet.

Officials Handicapper and starter; Walter D. Nicol; judges, H. W. Kingerley, A. G. T. Ferriman, H. Montgomery and R. Nurse.

ORR DROS.' FIVEPIN LEAGUE.

Orr Bros.' Fivepin League finished a most successful season on Thursday evening. The Beaches, winners of the first series, played off for the championship, or first money, with the Elks, winners of the second series. The Elks carried off the bacon, winning two games from the Beaches.

The Dreadnaughts rolled off with the Yorks for third and fourth money, the Dreadnaughts winning third money and the Yorks fourth money.

The high single game was won by John Watson, with 213 plns.

The prize for high three consecutive games was won by W. A. Pringle, with 525 plns. The high average prize was won by W. A. Pringle, with 7363 pins for 51 games; average, 1261-3.

—Prize-Winners.—

Elks, first prize, \$59.15, R. J. Orr captain; Beaches, second prize, \$42.25, O. Cowdy captain; Dreadnaughts, third

AUTHORITIES RELEASE A CONSULAR EMPLOYE

Arrest Provoked Blockade Candia on the Island of Crete.

LONDON, April 22.—The judicial authorities of Candia, on the Island of Crete, have released the British consular employe whose arrest provoked the blockade of that port, says an Athens despatch to the Exchange Tele-

Allied warships were reported to have declared a blockade of Candia on March 29, after the alleged discovery that German agents there were storing and shipping supplies to Austro-German submarines. The above despatch is the first mention of the arrest of a British consular agent at Candia.

BELGIUM'S RATION REACHES MINIMUM

Horace Fletcher Sees Starvation Ahead and Canada Must Do Her Share to Help.

Horace Fletcher, the great authority on diets—so great an authority, in fact, name—has returned to this side of the Atlantic, after having spent some months in Belgium studying food conmonths in Belgium studying food conditions. Mr. Fletcher is one who believes that nourishment is not naturally, commensurate with the amount of food consumed, but with the manner in which it is masticated. He believes that the assimilation is due to the treatment of the food.

He investigated the rations dealt out to the Belgian people—millions of them—who are under the care of the Belgian relief committee, and this is what he says in concluding his summing up of conditions:

lie says in concluding his summing up of conditions:

"There are three million cases, many of whom will die of starvation if food is not sent them."

Mr. Fletcher believes in the minimum ration, and yet he sees that Beltium's ration has gone below the lowest. Food must be sent. Canada, of all Belgium's allies, has the food in plenty, and the money in plenty, with which to buy the necessary food. The war's drain on Canada has been less than on any other of the integral parts of the empire, and it devolves upon the Dominion to bear a share of this burden proportionate to this.

minion to bear a share of this burden proportionate to this.

Canada cannot in justice sit back and see three millions of her allies starve. It is equivalent to shooting in the back the men who are fighting for us. With the sense of fairness and justice which is the keynote of the life of a British subject, Canada will hear the appeal of the Belgian relief committee and meet it with funds and food to raise the ration dealt out to starving Belgium far above the medium.

The only safe way to send this aid to Belgium is through the recognized crganization of the Belgian relief committee, 59 St. Peter street, Montreal, or through one of its branches.

ENGLISH COMEDIENNE WITH "A PAIR OF OUEENS"

Kathleen Clifford Featured in the Latest Frazee Farce.

Miss Kathleen Clifford, who was the first star to play at the Alexandra when it opened with "The Top of the World," is one of the featured comediennes with H. H. Frazee's new farce comedy sensation, "A Pair of Queens," which has its premier at the Alexandra tomorrow night. "A Pair of Queens" goes direct to Chicago, following the week's engagement here. This being the last week of the big shows this season, and the fact that Eeaster is here, will mean record houses all week at the Alexandra, so it would be advisable to book your reservations immediately, if you your reservations immediately, if you desire to see this big laughig festival. A matinee at popular prices will be given Wednesday, and the evening and Saturday matinee prices will be the usual Alexandra scale.

SPECIAL DECORATIONS FOR FRENCH SOLDIERS

PARIS, April 22.—Gen. Roques, min-ister of war, has decided that chev-rons shall be worn by all soldiers who have served at the front one year or more, or have been wounded in ac-tion. One chevron on the left sleeve will indicate a year's service and each will indicate a year's service and each additional six months will be designated by another chevron. For each wound received in the armed service a chevron will be worn on the right

The minister also has revived the The minister also has revived the alguliette, or shoulder tag, to recall gallant actions of regiments in the field. Officers and men present when a regiment is cited will wear, attached to the left shoulder and hanging under the arm, the alguliette braided in red and green, the colors of the war arms. It will be considered part of cross. It will be considered part of the regulation uniform of regiments thus cited.

BERLIN CLAIMS TO KNOW. BERLIN, April 22, via wireless to Sayville,-According to reports from Geneva, says the Overseas News Agency, "Great Britain has offered to Spain possession of Tangler if she will seize the German ships in Spanish ports, and will consent to the closing of the Straits of Gibraltar to all neutral ships except those flying the Span-ish flag."

Mrs. John Cawthra and Mr. A. Adam-on have returned from Halifax, Nova

Mr. C. J. Scandrett gave a bridge party last night of five tables at the flat in the Athelma which he and Mr. Harry Grubbe occupy conjointly. A few of those present were: Mr. and Mrs. Harold Scandrett, Mr. and Mrs. Challoner, Miss Katherine Hagarty, Miss Alleen Robertson, Mr. Hopkirk.

Mrs. Wallace Nesbitt and Mrs. W. H. Beatty were in Vancouver last week, and left for Victoria on Thursday. They will make a short stay in Vancouver on their return. The Hon. Wallace Nesbitt, K.C., accompanied them as far as Edmonton, but had to return from there to Ottawa on business.

the latter in a white suit, and carrying the ring in an Easter lily. Mrs. Hunter held a reception after the ceremony, wearing black charmeuse and lace with corsage bouquet of mauve sweet peas. Mrs. Miller was in rainbow silk, with overdress of black chiffon and satin, black hat with flowers, and a corsage bouquet of pink roses. Miss Margaret Russell caught the bride's bouquet. Later in the afternoon Mr. and Mrs. Mointosh left by motor for Bobcaygeon the bride traveling in a navy blue silk tailormade, and Panama hat with French Major Tidy tells that the men in the trenches much appreciate camphor bags. Mrs. Edmund Phillips, 80 Beverley street, will be glad to receive scraps of flannel flannelette, tape and ribbon to make them of, as the camphor, having advanced in price, it would save buying material to make the bags if her friends could help in this way and the Trench Comforts League will make them.

made, and Panama hat with French flowers. Mrs. Allan Lennox and her daughter have left for New York and Atlantic

Miss Marjorie Greenians, of 427
Manning avenue, entertained her club friends prior to removing to her summer house at the Island. A very enjoyable evening was spent in cards and dancing. Among those present were the Misses Hazet Dodd, Marjorie Inglis, Lucile Inglis, Verna Furter, Vera Wilkinson Stella Talbot, Evelyn Hudson, the Messrs. Gordon Mills, Douglas Ward, Harold Brown, Percy Dunk, Wm. Henderson, Walter Williams.

The marriage of Ethel Winnifred (daughter of Mr. and Mrs. Herbert M. Sheppard, McGee street, to Mr. Melvin L. Green, son of Mr. and Mrs. S. M. Green, Prospect street, was solemized at the bride's home on Thursday evening. April 20, at eight o'clock, by the Rev. Dr. W. T. Graham. The bride, who was given away by her father, wore white pussy willow taffets with Juliet cap and veil, and carried a shower of Kilarney roses. Little Miss Marjorie Dingle, the bride's niece, was flower girl wearing pink silk and

flams.

A tea was given at the house of Mrs. Josiah Aikins, 72 Salem avenue, in honor of the coming marriage of her daughter. Alberta Mabel (Bertie), to Mr. William Victor Anderson, Hawkestone, Mrs. Aikins received her guests wearing a becoming gown of gray silk with antique gold ornaments. The table was decorated with pink carnations and Easter lilies. Mrs. N. N. Butler, aunt of the bride elect, poured out the tea, wearing a handsome black silk gown. Soveral appropriate selections were played on the Victrola, and Miss Olive Morton sang "All Joy Be Thine," Mrs. Will Furnish, acccompanist. Among those present acccompanist. Among those present were Mrs. Sarah Aikins, Mr. and Mrs. D. B. Barnhardt, Mr. Tom Leigh, Miss D. B. Barmardt, Mr. Tom Leigh, Miss Beatrice Barnhardt, Master Kenneth Aikins. Miss Jessie Barrett, Miss Min-nic Aikins, Miss Alma Barnhardt, Mr. Jos. Aikins, Mr. Will Anderson, Miss Phyllis Aitken, Mr. N. N. Butler, Mrs. Vasilla, Mr. Will Furnish, Mr. Tom Aikins

MRS. A. E. KEMP'S MUSICALE.

MRS. A. E. KEMP'S MUSICALE.

Mrs. A. E. Kemp gave a most successful musicale in aid of field comforts on Tuesday night at Beautiful Castle Frank, when she received the 150 guests, looking very handsome in black embroidered with silver and jet, with fine diamonds. Mrs. A. H. C. Proctor, who had arranged the program, was most unfortunately unable to be present owing to a sore throat. Mrs. John A. Walker, who assisted Mrs. Kemp, was very smart in black, with a corsage bouquet of pink sweet peas. His honor the lieutenant-governor was present, accompanied by Lady Hendrie in black tuile and yet, with diamond and pearl ornaments, and Miss Hendrie, in pale green, with filet to match in her hair. His honor was attended by Col. Fraser. Those who so generously gave the program included Mrs. James-Kennedy, who sang magnificently and looked exceedingly pretty in white satin and crystal. She was encored again and again. Mrs. H. M. Blight played the organ: Mr. Jan Hambourg the violin: Mr. Arthur George sang very acceptably and was encored. Miss Garden and Mr. Harvey Robb played some of the accompaniments, Mrs. Kinghorn playing for Mrs. James-Kennedy most artistically. At the close of the program, which opened with God Save the King on the organ, Mrs. Freyseng singing it: supper was served in the dining-room and library, the rooms and halls being decorated with bowls of daffodils and snapdragon, and some very effective draecenas. A few of those present were: Mrs. McAgy, looking very well in black velvet: Mr. and Mrs. Scott Waldie, Mr. and Mrs. Walker. Captain and Mrs. Scott Waldie, Mr. and Mrs. Mason, Mr. A. H. C. Proctor. Mrs. Proctor, Miss Allce Burritt, Mrs. George Dunbar, Mrs. Reid, Miss Sell (Vancouver), Mrs. Arthur Pepler, Mrs. Dack, Mrs. Harny Love, Mrs. Mrs. W. J. Gage, Mr. Jan Hambourg, Mrs. Hambourg (who looked very handsome in white and silver), Mr. and Mrs. Frank Beer, Mr. and Mrs. Henming. M

A very quiet wedding took place on Wednesday afternoon, April 12, at St. Anne's Church, Gladstone avenue, when Alberta Mabel, second daughter of Mr. and Mrs. Josiah Aikins, 72 Salem avenue, was married to Mr. Salem avenue, was married to Mr. William Victor Anderson, Hawkestone, William Victor Anderson, Hawkestone, Ont., the Rev. Lawrence Skey, officiating. The bride wore her pretty traveling suit of navy blue serge, with an old rose hat; she carried an ivory prayer book. Miss Minnie Aikins assisted her sister in a becoming gown of shepherd's plaid and a chic black hat. The groom was assisted by Men

To put sleeves correctly, put the under arm seam of a sleeve just the length of your second finger ahead of the underseam of the waist. This is an easy way, and they are always in the right place.

Society at the Capital

Mrs. J. Secretan Dunbar gave "twin" bridges during the week, when a large number of guests enjoyed the game.

Mrs. Arthur Sladen, who has been visiting her cousin, Miss Clemow in Nassau, Bahamas, for the past month, has returned to the capital. At Cobourg, Ont. the marriage took place last week of Mr. Harold Wilber Boyce Winter, Toronto, to Miss Edith Nuals Ivey, daughter of Dr. and Mrs. J. A. Ivey, Cobourg. The groom is a son of Mr. and Mrs. C. H. Winter, Cobourg. The wedding was solemnized at the residence of the bride's parents by Cant the Rev. H. R. Kenny, chap-

Lieut, William Wylie, son of Mr. and Mrs. W. A. Wylie of St. Catharines, and nephew of General Logic of Toronto, has arrived in the capital and is attached to the Canadian Engineers.

Lady Egan was the hostess of a very charming luncheon at the Coun-try Club recently, given in special honor of Miss Kathleen Burke, who honor of Miss Kathleen Burke, who was in town for a few days. Those invited to meet Miss Burke were: Miss Dorothy Yorkee Madame T. Chase Casgrain, Mrs. J. G. Foster, Mrs. Charles Coutlee, Mrs. Fred Carling, Mrs. W. C. Edwards, Mrs. E. C. Grant, Mrs. Robert Fraser, Mrs. Herbert Thomas and Mrs. Walter Douglas of New York.

Capt. and Mrs. Fred Ahearn have been spending a week in New York, returning last week

Eng., who has been in Toronto for the past few months, is the guest of the Misses Wicksteed in Albert street for Easter week.

Lord and Lady Aberdeen are expected to arrive in the capital on May 2, and will be the guests of Their Royal Highnesses the Duke and Duchess of Connaught, at Government

when Edith Jean, daughter of Dr. and Mrs. D. A. McPherson, was married to Mr. Courtlandt H. Peaker, son of Mrs. Peaker and the late Dr. John W. Peaker. Rev. Dr. Jas. Henderson, pastor, assisted by Rev. A. G. Hudson, uncle of the groom, officiated, and Mr. Dalton Baker presided at the organ. The bride, who was brought in by her father, wore ivory duchess satin, Chantilly lace and pearls. Her veil an heir Miss Grace Drayton has returned from Toronto where she spent a short time with Hon. Mr. Justice and Mrs. Frank Hodgins.

ding on Wednesday evening at 7.20 when Edith Jean, daughter of Dr. and House, for a few days.

When the spring cleaning and painting are in process, let us not forget to give the kitchen a generous share of attention. In these days of discussion about workroom improvements, it may not be amiss to consider the number of hours spent ir our kitchens—kitchens which in town houses are often in the basement, and which are not always planned with proper consideration for the kitchen with a dark color, so that much cleaning should not be necessary is no longer considered creditable household economy. The very modern kitchen is a light, pleasant room, encouraging cleanliness and cheer.

Why not make the old kitchen conform to this idea? It may be done with comparatively little expense, and will insure an increase of good will and efficiency in the low.

"My," said the skinny-nosed woman,
"it's clean scandalous! they say as how

Massed Bands' Selections.

Opening the event this afternoon was a concert of patriotic and appropriate selections by a massed band composed

stounds. Before 2.30 o'clock it was estimated that 5000 soldiers and citizens were present.

A spectacular feature of the program was the parade of nine companies of one hundred men each, commanded by a captain and four licutenants for each company, which marched past the reviewing stand, occupied by Lt.-Col. Bickford and other officers.

As the companies swung thru the grounds, and marched to martial airs played by the bands, their appearance evoked enthusiastic cheers and applause from hundreds of people.

Each company marched seven miles from its individual battalion headquarters, choosing its own route, to the park, and after being reviewed by Col. Bickford, broke ranks. The company which, in the opinion of Col. Bickford, made the best appearance and was the most soldierly in its march will later be awarded with a silver cup.

With the conclusion of the parade, col. Bickford presented Capt. Glipin, in the absence of Lieut.-Col. Price, the battalion commander, with a silver cup for his 204th Battalion, which secured the largest number of recruits recently.

Capt. O'Regan of Burton's Bantam Battalion was also presented with a silver cup. The cup was awarded for the most novel display at the last recruiting rally in Riverdale Park and won by the Bantam Band in their burlesque imitation of a German band.

An exhibition of physical drill, showing what can be accomplished after eight days' drilling, was given by a corps of 5 men from the Physical Training and Bayonet Fighting School. The men went thru a series of rapid drills and exercises. out, and relieves itening and scalp dis-

THE PIONEER BATTALION IN NEED OF TRADESMEN

AT RIVERDALE PARK Many Appointments Yet to Be Filled—Presented With Instruments.

> Messrs. Bate, McMahon & Co. have presented the 5th O. S. Pioneer Battalion with a set of "Besson" brass band instruments, which are now in

hand at hendquarters. In this connection, a bandmaster and about 20 musicians will be required. These men will be enlisted as privates for general service, as is the case with the whole establishment. As the battalion will go into mobilization as so as possible, cooks for compani sergts.' mess and officers' mess are quired. The appointments of so cook and segt, shoemaker have not been filled. These are staff appoin ments, but the men will be selecfrom the battalion at large.

Capt. F. S. Dyke, the recruiting ficer for 'A" Company has already ceived a number of applications transfer from men in other battalio transfer from men in other battalions who are specially qualified for piones work. The recruiting office for this district is at 215 Simcoe street. Mechanics, engineers, construction men, carpenters, woodsmen and general handy men are required, and experienced men in the above and allied lines who enroll early will stand a good chance of speedy promotion.

AEROPLANES AT SOFIA.

GEORGE LAWRENCE, BAKER.

Otherwise State Department Will Not Give Up Papers Seized From Von Igel.

WASHINGTON, April 22.—Papers seized in New York by the department of justice from Wolfe Von 1gel, former secretary of Capt. Franz Von Papen, H. Leighton, 2103 Davenport, W. Torecalled German military attache, will not be restored to the German emlassy until Count Von Bernstorff returns to Washington from a week-endirip. The German embass: has been informed the documents will be sealed and retained meanwhile by the state department. State department officials reiterated today that Count Von Bernstorff will be asked to distinguish between the official and personal matter in the documents.

It was not believed.

Bernstorff will be asked to distinguish between the official and personal matter in the documents.

It was not believed today the German embassy would agree to this procedure, contending there is no authority for the removal of papers of any kind from the person or possession of a diplomatic agent. Embassy officials are disturbed at the idea that the department of justice intends to keep photographic copies of the papers, and it was said today that Count Von Bernstorff would demand not only the originals, but all photographic copies, plates and a catalog of the documents which is understood to have been made by the justice department. Ambassador Bernstorff is understood to be awiting instructions from Berlin.

The documents arrived at the Dojicoday from New York. They comprise the contents of two portfolios and soveral letter files. There are several hundred papers in all. While officials declined to discuss the papers, it was pointed out that some of the documents were said to have passed between Count Von Bernstorff and Capt. Von Papen, the withdrawn military German attache, dealing with matters affecting American neutrality. Some department of justice officials reiter-

TWELVE MORE HEROES TO ARRIVE HOME TODAY

Sixteenth Contingent of Wounded Men to Return to Tor-

This Sunday morning twelve more wounded soldiers will arrive back in Toronto at 7.30 on the C.P.R. train. They form the sixteenth contingent of NEW SITUATION ARISES

NEW SITUATION ARISES

Documents Said to Have Dealt With Matters Affecting American Neutrality,

They form the sixteenth contingent of war heroes to return to this city. Five of the men to arrive today are Torontonians, two have their homes in Hamilton, one in Cobalt, one in Oshawa, and one in Bracebridge. They will all be met at the station by a military guard of honor, afterwards being taken to the Military Convalseent Home, College street, for breakfast and then sent to their own homes on leave. These are the war veterans who will return this morning:

The Queen's Canadian Hospital Aides is a club of young women who for some time past have been doing excellent work in raising funds and making surgical supplies for the Queen's Canadian Military Hospital, Beachborough Park, Shorncliffe, England.

Club officers are: Mrs. Edmund Bristol, hon. president; Miss Kathleen Kells, president; Miss Vera Kirkwood, vice.-president; Miss Edith MacMahon, sec.-treasurer.

Some weeks ago they presented the Greek comedy, "Pygmalion and Galatea" with so much success, that, at the request of a number of people, a second performance is being given on Wednesday evening next, at the Margaret

Caton School.

Miss Josephine Hodgson will give several beautiful solo dances, and a number of her pupils will be seen in classical and interpretative dances. Broadus Farmer, the noted violinist, will give severa Isolos.

Miss Stella Rowntree, A.T.J.C.M., will act as accompanist.

Miss Kathleen Clifford, who arrived in Toronto this morning from New York, through her manager, Mr. Rosenbaum, has consented to appear at the Star Theatre Sunday night to help Lieut.-Col. T. H. Lennox and his 208th Irish Battalion in his patriotic concert and big recruiting rally. Miss Clifford has done much to help recruiting abroad, and is only too pleased to assist the 208th Irish Battalion during her stay here in To-ronto the coming week, where she appears at the Royal Alexandra in

Proposal of Germany Would Enable Her to Swallow Territory More Readily.

oue on account of German aggressiveness respecting smail nationalities at the end of the war.

In connection with the visit to Berlin, made by Baron Burlan, Austro-Hungarian foreign minister, it is suggested that Germany proposed that the Hapsburg monarchy should be divided into small autonomous states, presumably in order that they may be more casily swallowed up by Germany. The Slav nationalities, it is hinted, are to be given the minimum of liberty, Galicia also receiving autonomy.

The correspondent says that the Hungarians have taken umbrage, feeling that their turn would come next, and that the Magyars would thus succumb to German predominance.

New York hits are rendered by 12 musicians, claimed to be the leaders in this city. Spectators as well as dancers find these concerts a real musical treat. You can find no better place anywhere to enjoy the popular pastime than one cup of boiled rice, one ounce of melted butter, two soft-boiled eggs, pepper, salt and a teaspoon of mustard. Mix thoroly, cook a few minutes at 1 o'clock, and parade to the Beach.

KEGEREE.

Flake two cups of cold boiled fish and add to them one cup of boiled rice, one ounce of melted butter, two soft-boiled eggs, pepper, salt and a teaspoon of mustard. Mix thoroly, cook a few minutes at 1 o'clock, and parade to the Beach.

fords an ample supply of fresh air to each person. Another feature is the class of patronage the place receives, some of the best people in the city going there.

For those wishing to learn the latest denses. Peytown is the place where dances, Pavlowa is the place where you should go. Only standard steps are taught in the newest New York society dances.

THE NEW TABLE LAMPS. Do you know that if your table lamp is the latest thing of its kind it must be chiefly in wood? Tall and of substantial base, the main portion of the lamp may be in carved oak, mahogany finished in Spanish gold, hardwood painted yellow and black or white enamel and gold. Naturally, the design of the lamp's tall standard matches that of the furni-ture—Adam, Jacobean, Chippendale, Queen Anne, Renaissance—of the room which it illumines. Plain silk shades They may be trimmed to accord with the painting of the wood, but flowered effects look frivolous and cheap above

uch dignified standards. WHEAT PRICES DOWN.

CHICAGO, April 22.—Uncertainties of the diplomatic outlook tended today to pull down prices in the wheat market. The bearish nature of the Kansas crop report had also a perceptible influence. On the other hand, the fact that weather conditions northwest threatened further delay to spring seeding operated somewhat as a check on declines.

Opening quotations, which varied from the same as Thursday's close to one-half lower, with May at 113% to 114 and July at 113% to 113%, or the same as Thursday's close to one-half lower, with May at 113% to 114 and July at 113% to 113%, were followed by slight rallies and then a decided set-back all around.

POTATO LOAVES. One pound potatocs, boiled and mashed; one ounce butter, one teaspoon milk, one egg, butter, salt and cayenne pepper, two teaspoons chopped parsley.

Add butter, milk, egg, parsley and seasoning to cold boiled mashed potatoes. Turn out and roll thin. Divide into equal portions and make each into a loaf. Put onto a buttered baking sheet, glaze with the white of an egg. Bake in a quick oven for five or ten minutes.

MICE HELP TO CATCH MORE MICE AND SO ON

Little Device Transforms Any Standard Preserving Jar Into a First-Class Trap.

A LITTLE device has just been patented which transforms any standard preserving jer into a mouse trap. The traps which kill the little rodents lose their usefulness after a time by reason of the fact that the odor left by the deceased varmint acts as a warning to the acute noses of others, so that to be of use the trap must be scalied or otherwise junuasted at reruler intervals. The mescrying for mouse tray does not licid any odor, and,

SOUNDED CALL OF DUTY

W. F. Maclean, M.P., Hon. Thos. Crawford, M.L.A., W. D. Mc-Pherson, M.L.A., Speakers.

AT OAKWOOD LAST NIGHT

Held Under Auspices of Primrose League in Connection With Beavers' Campaign.

Under the auspices of the Primrose eague a patriotic concert was held in connection with the 204th Battalion, Lieut.-Col. W. H. Price, M.L.A., O.C., in Oakwood Collegiate Institute. West St. Clair ave. and Oakwood, Friday evening. Hon. Thomas Crawford, M.L.A., occupied the chair. Among those present were: W. D. McPherson, M.L.A.; W. F. Maclean, M.P. for South York: Thomas Jones, president Wychwood Conservative Association; Lieut.Col. W. H. Price, Dr. G. W. McIntosh, J. R. Mac-Nichol and Clifford E. Blackburn, J.P. "In these strenuous times when such paramount, great work has been done in raising men and money to fight for truth and righteousness," said the chair-man in his opening remarks. "The quarman in his opening remarks. "The quarrel was thrust upon us and was not of our seeking. It was providential perhaps that the war started when it did. Had it come later we might have been in a very bad position. As it was we were caught almost unprepared. But what do we see today?" asked the speaker, "300,000 Canadians prepared to lay down their lives in the sacred cause of liberty."

their lives in the sacred cause of liberty."

W. D. McPherson, in a powerful address, reviewed the war from the commencement, and pointed out the urgent need for more recruits. "I venture to say, if we search the Dominion of Canada, it would be difficult to find any part of it which has done better than the northwest of Toronto," he said. "No other part of the city or province, or the Dominion of Canada, rallied more quickly than the men from the northwest section. They are amongst those who have brought great fame and lustre on Canada.

Nobility of Labor Should Be
Taught in the Schools, Says
J. J. Kelso.

In an article published by the Imperial on the industrial training of children, J. J. Keles advances some sensible views that should receive consideration from the educational authorities. He favors the extension of the kindergarten principle of learning by doingand having public school children spend half their time in some practical form of work.

"All large industries," he says, "should be encouraged to establish auxiliary that the conflict wareast by the confideration of the says, "should be encouraged to establish auxiliary that the conflict wareast by the factors of the great American republic, which will devent the conflict wareast by the first line of the principal of the war looks more serious than ever, still we have the endorsation of the great American republic, which will devent the conflict wareast by the first line of the principal of the princ still we have the endorsation of the great American republic, which will declare that the conflict waged by Germany is against liberty and civilization. We are, however, making headway. Russia is making headway in a new direction, but Germany still dominates Belgism and northern France, and we must still continue with all our might to conquer. Great Britain today is preserving the liberty of the seas.

"These are strenuous times," said Mr. Maclean, "and you would not be true to your cause if you did not respond and make eastifices. We are endeavoring to put down a nation which is trying to crush the smaller nations of Europe. The real thing today is to send men and more men and no one will ever respect it. We are living in the greatest and most momenious time in the world's ristory.

"The Canadian people are better by the making of the sacrifices such as they are making at present and there will come a day when Canada will be proud of the work which she has and will accomplish," declared South York's member.

Lieut.-Col. W. H. Price spoke of the obstacles which the late Lord Beaconsfield had to overcome in his day and the able manner in which he guided the empire thru the crisis of that period. The following artists contributed to a high-class program: Bert Spence, Miss Florence Ralston, Master Mottram.

Mer

On

Amid the never-ceasing reports of the tremendous loss of life occasioned by the present European war there has been a growing curiosity to know just how many of the wounded who are brought back to the hospital recover. In previous wars where intruments of death were less thoro it was known that the death rate in military hospitals was about 30 per cent.

cent.

Dr. Jaques Bertilion, who is in charge of the medico-surgical statistics for the entire French army, has just stated that the mortality at present is only 2 per cent. His figures, made up and averaged from the reports from all French military hospitals, at last give an authoritative answer to queries. He says: "Out of every 100 patients at present being received and treated at our hospitals, 98 are said away in recovery."

This was the cry that turned the Clyde iner Apache, Captain A. P. Watson in

away in recovery."

Toward the first of the war the mortality was 4.5 per cent., he states, but since the improvement of the medical service and the discovery of a remarkable number of new treatments the advantage of science has been materially increased.

"DOG OVERBOARD,

roduction and

GAIN or no gain the cause before the farmers of Canada is as clear as it was last year—they must produce abundantly in order to meet the demands that may be made, and I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle."-HON. MARTIN BURRELL, Minister of Agriculture.

THE FOLLOWING STATEMENTS ARE BASED ON REPORTS CONTAINED IN "THE AGRICULTURAL WAR BOOK, 1916," PUBLISHED BY THE DEPARTMENT OF AGRICULTURE, OTTAWA, ONT.

have been greatly reduced. When the war is over there will be a great demand for breeding stock. Canadian farmers should keep this in mind.

MEATS-In 1915 Great Britain imported 664,508 tons of beef, mutton and lamb, of which 364,245 tons came from without the Empire. Out of 480,420 tons of beef only 104,967 tons came from within the Empire.

The demands of the Allies for frozen beef, canned beef, bacon and hams will increase rather than diminish. Orders are coming to Canada. The decreasing tonnage space available will give Canada an advantage if we have the supplies.

LIVE STOCK-The herds and flocks of Europe | DAIRYING-Home consumption of milk, butter and cheese has increased of late years. The war demands for cheese have been unlimited. The Canadian cheese exports from Montreal in 1915 were nearly \$6,500,000 over 1914. Prices at Montreal-Cheese: January 1915, 151/4 to 17 cents; January 1916, 181/4 to 181/2 cents. Butter: January 1915, 24 to 28% cents; January 1916, 82 to 38 cents.

EGGS Canada produced \$80,000,000 worth of eggs in 1915 and helped out Great Britain in the shortage. Shippers as well as producers have a duty and an oppostunity in holding a place in that market.

SAVE MATERIALS FROM WASTE

WRITE TO THE DOMINION DEPARTMENT OF AGRICULTURE AND TO YOUR PROVINCIAL DEPARTMENT FOR BULLETINS ON THESE SUBJECTS

Tens of thousands of Canada's food producers have enlisted and gone to the front. It is only fair to them that their home work shall be kept up as far as possible. The Empire needs all the food that we can produce in 1916.

AVIATORS DOING WELL

Keeping Enemy Craft Back

and Using More Scientific

LONDON, April 8.—Col. Repington, The Times' military correspondent, who has just made a trip to the Verdun front, pays a very high tribute to the valor of the French troops and the military judgment of their commanders in the following despatch:

"We must render great homage to the stubborn defenders of Polvre Hill, the Mort Homme, Vaux fort and the other French positions on the Verdun front for their magnifecent fighting thru the great Verdun battle.

"The French aviators also deserve the highest praise. During my visit I saw many aviators brave the enemy's anti-aircraft guns with the greatest intrepidity, but I did not see a single German aviator cross our front. In a single day the French accounted for six German aeroplanes without themselves sustaining any loss.

"From my personal experience I am of the opinion that the French anti-aircraft guns are superior to those of the Germans, and it also appears to me that cur allies employ this artillery upon more scientific principles.

"Gen. Petain realized the role which artillery was to play in this war after the second month of the conflagration. He rapidly learned to appreciate the watter of curtain fire. This marvelous operation of modern artillery is particularly suited to the French genius and to the terribly destructive fire of the famous solvante-quinze."

"Nevertheless, it is in the employment of heavy artillery extraordinarily supple and the heavy guns have become a battle instrument of marvelous efficacy. Gen. Joffre spoke to me with entinusiasm of the method whereby the French medium-

Thirty Divisions There.

"The Germans have engaged all their available troops in this battle and, after the arrival of a division withdrawn from the Russian front a few days ago, they now have thirty divisions in the Verdun theatre.

"The estimate, according to which the Germans lost 150,000 men during the first month of the battle is a moderate one. The enemy is given no breathing space. The French have the superiority in artillery. They fire night and day keeping under their fire all possible routes, reserved positions, woods and cantonment zones. When the Germans abandon the main routes and take to paths the French aviators discover them and the paths are swept by artillery fire in their turn.

"Gen. Petain does not hesitate to abandon a piece of ground if the Germans are obstinate in their efforts to obtain it and if, as at Malancourt, it does not form an easily-defended salient. But he always makes sure the chemy shall pay the maximum price and he does hot allow him to advance unless he is ready to sacrifice three lives for one. The whole northeastern front is littered with German dead.

"One evening a French patrol was sent out to examine an advanced trench

The whole northeastern front is littered with German dead.

"One evening a French patrol was sent out to examine an advanced trench which was reported by the aviators to be full of men. The patrol found that the trench was indeed crowded, but every one of its occupants was dead.

"We must admit the importance of the positions occupied by the German artillery and also the number and range of their guns. Gen. Petain is holding out solldly, however, and very interesting news may be expected from Verdun in the near future.

"What magnificent lads the French soldiers are! I have visited them in their trenches, and I have seen them go out to fight and return from the charge. I have observed their fine discipline and their gaiety and I have admired the good feeling which exists between them and their officers, I believe the morale of the French army has never been higher. The French believe in their commanders and in themselves, They have confidence in victory and they are consecrating themselves to its at-

SCHOOL QUESTION BEING DISCUSSED

Governor General Answers Letter Asking His Aid Towards Settlement.

APPRECIATES GRAVITY

Hopes Equitable Solution May Soon Establish Peace and Harmony.

MONTREAL, April 22.-The Duke of Connaught, governor-general, has communicated to Mgr. Bruchesi, Archbishop of Montreal, his hope that peace will soon be established between the French and English factnons at issue in Ontario over the bilingual question. Mgr. Bruchesi made a statement to this effect today in the course of an explanation of the attitude of the episcopacy on the school question and the fact that his grace and other prelates had not signed a petition to the governor-general sanctioned and signed by Cardinal Begin. The archbishop said: "There can be no question as to the perfect solidarity of the French-Ca-

nadian episcopacy touching the windi-cation of the rights of the French tongue in this country. Together with two of my colleagues, I adopted another formula in the interest of a cause which is dear to us all. We cause which is dear to us hit. We addressed ourselves directly to his excellency the governor-general, pointing out the acute stage upon which the Ontario school question has unfortunately entered, and respectfully asking his excellency to use his influence and employ any means which tion and authorized the secretary of state to organize a responsible cabinet, it was announced today that a new cabinet was being constructed. Yuan Chi-Jui, former minister of war, has accepted the premiership and the war portfolio. The following other members of the cabinet, which is being formed under the direction of Yuan Chi-Jui, have been virtually selected: Foreign affairs—Lu Cheng-Hsiang, the present incumbent. he might judge appropriate to put an end to a situation which is becoming graver day by day. These are the facts in all their simplicity, and the reply which came to us without de-lay, written in beautiful French, coniained these encouraging words:
'His royal highness fully appreciates
the gravity of the situation and hopes
that an equitable solution will soon
establish peace and harmony between the two nationalities compos-ing the greater part of the population of Canada."

ister of finance.

Interior—Wang Yih-Ting, former minister of trade and commerce.

Marine—Admiral Liu Kuang-Hsun, Forming Committee.

A committee is being formed of Protestant English citizens of Montireal to aid in solving the existing Marine—Admiral Liu Kuang-Hsun, the present incumbent.
Communications—Tsao Yulin, now vice-minister of foreign affairs.
Chow Tsu-Chi, minister of agriculture, becomes director-general of the Bank of China.

President Yuan Shi-Kai has agreed to surrender all civil authority to the new cabinet. The Pekin Government hopes that the premiership of Yuan Chi-Jui, who is a staunch Republican, will reconcile the southern provinces and put an end to the uprising. difficulties concerning the Ontario W. D.Lighthall, K.C., in making this announcement, says the committee deplores the struggle in Ontario during war time, and suggests that the difficulties of arriving at a fair solution are exaggerated and the facts misunderstood. It is also stated that the committee considers the wording of regulation 17 as unnecessarily provo-cative and could be altered so as to better obtain the educational object by providing for adequate instruction. Joy! Joy! We shall soon be able to put our winter clothes in pawn and get hold of some warm weather glad rags.

Are You One?

-of the many people in Toronto who would give almost anything to be able to play the piano.

How you have yearned all your life for that coveted

How you have regretted that you did not learn when you

And even now, while you sit there reading these words, you STILL wish that you could play.

But!

-It is not too late!

To-night you can have in your home an instrument that will allow you to leave the ranks of listeners and become a CREATOR of music.

You-yes, you yourself-can possess the power to play all of the best music ever written, as the great artists would play it.

Did you ever stop to think of the actual pleasure, the many hours of enjoyment and recreation that this great instrument will mean to you and your family? If not, you have deprived yourself of one of the greatest joys in life—that of personally producing music to suit your mood-of instilling your very feelings into your playing. Not until you possess this instrument can you know what actual joy and pleasure music will bring into your home.

Everyone can play and enjoy this wonderful

WILLIAMS Maester-touch Player-piano

READY TO KII

Former Munitions Worker of St. Catharines Had Designs on J. P. Morgan's Life.

HAD MADE A PROMISE

Various Schemes Under Consideration According to Sworn Statement in the Tombs.

NEW YORK, April 22,-Harry L. Newton, a former munitions worker in St. Catharines, Ont., who was arrested here Thursday after entering into an alleged agreement to blow up a munitions plant, was prepared to kill J.

nitions plant, was prepared to kill J.

P. Morgan, according to an affidavit submitted today in the Tompe police court. On the strength of this document, Newton was held for examination next Tuesday.

In the affidavit, made by Lieut. Detective Barnitz, and corroborated by Felix W. Galley, a Fifth avenue contractor, it is sworn Newton promised to kill Mr. Morgan if well paid for it, by running an automobile at full speed into the banker's car.

If the scheme failed, Newton promised, according to the affidavit, to carry a time bomb into Mr. Morgan's offices and leave it there. Newton declared Bartniz swore that he could accomplish this by displaying a button, inscribed 'In His Majesty's Service,' which he used while working in the Canadian used while working in the Canadian munition factory. Newton was held in the court today

on a charge of violating a section of the penal code, dealing with "an at-tempt to commit a crime." Bail was fixed at \$5000.

Plots in Canada.

Newton was arrested after he was alleged to have agreed with detectives to destroy munitions plants in Dunkirk, N.Y., and Canada. He was arraigned yesterday and charged with bringing explosives from Canada. Exonerated of this accusation by the court he was next held on a complaint that he had a bomb in his possession in Buffalo.

This also was discarded, and he

This also was discarded, and he was then charged with conspiring to blow up the federal building in this city, for which he was held until the new charge was entered against him today. Newton is described as an expert mechanic and a native-born

ROWELL WILL STAY IN ONTARIO LEGISLATURE

No Truth in Rumor That He In nds Going to Ottawa Under Laurier.

C. M. Bowman, chief Liberal whip, laughed when he heard of the rumor that N. W. Rowell, leader of his party, was about to leave the Ontario Legislature to go to Ottawa as Sir Wilfrid Laurier's right-hand man. He laughed, too, at the alleged reason that Mr. Ricwell felt that his work in this province was now accomplished with the

Rev. Joseph Bond Clarke died suddenly of heart failure on Friday at Lacdu Bonnet, Manitoba. A wire announcing his death was received by his mother, Mrs. S. J. Clarke, 122 Baldwin street. Rev. Mr. Clarke had been at Lac du Bonnet about six years. Prior to leaving for the Keewatin Diocese he was in charge of the Leaside Episcopal Mission for about a similar time and mademany friends in that parish. His mother and four sisters survive.

SECOND LEGION TO START RECRUITING

New American Unit, Under Gen. Bates, Opens Campaign Monday.

CHURCH PARADE

Big Field Day Has Been Arranged for Tuesday— Beavers Muster.

Tomorrow, Monday, active recruiting is expected to commence for the second American Legion, to be raised in Toronto and district. The new unit will be commanded by Brig.-Gen, Robert J. Bates, formerly commander of the Michigan State National Guard. He was at Exhibition Camp on Saturday, and plans to open headquarters for the new battalion, the 213th, at Exhibition Park tomorrow.

The 213th will be recruited in the district from Fort William to the Atlantic, but it will be mobilized in Toronto. The he ranks a brigadier-general in the United States army, Robert J. Bates will only rank as a lieutenant-colonel in the Canadian army. He was born in Flesherton, Grey County, Ontario, of Scottish parents.

Toronto Men on List.

Saturday's casualty list included the names of three Toronto men: Ptc. Nigel Miller, 248 Symington avenue, killed in action; Ptc. Wallis Clarke, 29 Alberta street, wounded; and Ptc. Angus William R. Sinclair, King and Sherbourne streets, wounded. All three were infantrymen.

The 4th Canadian Division will have a new sanitary unit, to be commanded by Capt. R. R. McClennan, A.M.C., at present in charge of the laboratory at Exhibition Camp. He will have about 25 men under him.

The 6th University Company, just authorized, will be commanded by Lieut. G. O. Smith of the Toronto University staff. The company will reinforce the Princess Patricia's Light Infantry.

Church Parade Today.

fantry.

Church Parade Today.

The regular church parade of the active service troops will be held today, services being conducted in the quarters of the various units. A large number of the soldiers are on Easter leave, and will have an opportunity of attending church with their families.

If weather conditions permit, a field day will be held on Tuesday, the \$2nd, 95th, 123rd and 124th Battallons, together with the 47th and 48th Batteries, being slated to take part in the manoeuvres.

teries, being slated to take part in the manoeuvres.

Two hundred and sixty men of the 48th Highlanders, who went overseas with the first Canadian contingent, are in German prison camps. The 48th Highlanders' Regiment of Toronto sends a five-shillings' parcel of food and comforts to the Highlander prisoners in Germany every week.

The 204th Beaver Battalion held its first muster parade at Bayside Park on Saturday. Six hundred and fifty members answered the rollcall.

Duke of Connaught Advised Authorities He Would Be Unable to Attend.

con at the alleged reason that Mr. Rowell felt that his work in this province was now accomplished with the passing of the Ontario Temperance Act, which makes Ontario dry for three years after Sept. 15.

"It is all news to me," he said. "I can state definitely that I have heard nothing of it. I think that if there was any foundation for it, it is reasonably certain that I should have heard of it. "I state this definitely: There has been no meeting of the Liberal party called for next week. As far as I know, there is no intention of calling one. "From my observation of Mr. Rowell in the house this session, I do not think that he has any intention of leaving contario. I think his mind is entirely occupied with the problems that face this province."

eenstituents?

He left here in anything but the joyini mood befitting the celebration of Easter. He observed with mingled emotions General Sam's triumphant entry into Ottawa on Palm Sunday. If e were a government supporter from ontario the omen may have struck him is inauspicious. Then, too, his thoughts nay have wandered from the pageant pefore him to the peaceful countryside when he heard that military band at

"Home, Sweet Home."

What are the people at home thinking about just now? he may have asked himself rather anxiously. Talk that passes current among politicians in ottawa is not always convincing the man and the man and the man asked himself rather anxiously. Ottawa is not always convincing when erving vater on the side-road or con-cession line. The M. P. home for the holidays has to answer a good many questions but one question that is going to be asked of Mr. M. P. when he meets Old Man Ontario on the

seventh concession is this:
"Why does parliament have to
meet again after Easter?"
But before we attempt to answer this
question for him let us linger a moment to talk about the most talked of
Canadian, Major-General Sir Sam

pression was grave when the train pulled into the station last Sunday. He pulled into the station last Sunday. He seemed to be stirred by deep emotion when, in his speech in the house last Tuesday, he referred to our soldirs united in perli at the front while we at home are bickering among ourselves. He may have felt that his recall would have been unnecessary had the government fought the Kyte charges as he would have fought them had he been in the parliamentary trenwhen, in his speech in the house last Tuesday, he referred to our soldirs united in peril at the front while we at home are bickering among ourselves. He may have felt that his recall would have been unnecessary had the government fought the Kyte charges as he would have fought them had he been in the parliamentary trenches. Sir Thomas White was officer in command on that famous occasion altho the Commander-in-Chief. Sir Robert Borden, was also upon the field. One might infer that Sir Sam did not think Sir Thomas was quite wide awake when Kyte sprang from the shoulders of Carvell over the parapot. Otherwise how can we explain that

Otherwise how can we explain that glanding wound inflicted by Sir Sam Hughes, K. C. B., upon his brother-inarms, Sir Thomas White, K. C. M. G.? In the course of his speech on Tuesday when denying the charges of wholesale graft, Sir Sam is reported by hensered experience. by hansard as saying: This house and this country are

told that these men pocketed these huge sums, and there is not a par-ticle of truth in the statement. Then, the finance minister (Sir Thomas White) speaks. They even wakened him up with the sound of these big figures—and he does not deal in small sums. They roused him from his slumbers, and he asked a question.

ward railway legislation.

If it did so the Grand Trunk Pacific

with a squeal of delight would throw her arms around the poor old govern-

Sir Robert Borden has more than once reproached Sir Wilfred Laurier for rearing these two hungry children and leaving them as it were on his

doorstep. In sheer desperation he took the National Transcontinental part of the Grand Trunk Pacific between Winnipeg and Moncton and undertook to run it himself. Just now that road is in the care and custody of the LD Reid acting minister of

Hon. J. D. Reid, acting minister of railways and canals, but Mr. Pugsley

Mr. Graham and other Liberal mem bers think Dr. Reid a cruel stepmother.
Mr. Graham has some reputation as

a joker and Dr. Pugsley has an unfailing flow of delightful humor, but they outdid themselves when the rail-

way estimates were up on Wednesday. They found fault with the way the government operated the line between Cochrane and Quebec, and they be-

sought Dr. Reid to complete the road to the satisfaction of the Grand Trunk Pacific. and meanwhile permit that company to operate the N. T. R. be-

tween Winnipeg and Moncton.
That the Grand Trunk Pacific should

want to take over 1800 more miles of railway caused a broad smile, but the acting minister took it quite seriously.

He pointed out that the company had

to get financial aid in order to operate the line it had between Prince Rupert and Winnipeg. How could it

therefore take over and equip and op-erate the still leaner line between Winnipeg and Moncton except by drawing enormous subsidies from the

Sir Sam in his speech on Tuesday observed in effect that some people who thought it a crime to make a

profit out of the sale of munitions had no scruples about making all the money they could when it came to

money they could when it came to selling sausages to the government. People are still wondering if he had any particular person in view. That every member in the house who had a desk absent mindedly scrawled the initials J.W.F. upon the blotting pad before him was no doubt the marrest co-

fore him was no doubt the merest coincidence. Yet there are people who think that a good deal of Mr. Carveil's ammunition was in some way trickled out to him from the magazines

ment and say "I am yours."

asked a question.

The minister of militia so fills the public eye when he appears upon the stage that lesser lights fade away like stafs before the rising sun. The outcry for an investigation was, in the main, directed against the Shells Committee, but the minute a stray shell glanced in the direction of Sir Sam Hughes everybody seemed to forget that the Shells Committee ever existed. Perhaps it is on this account that they have employed two big inwyers to represent them before the Meredith-Duff commission, one of them loaned Duff commission, one of them loaned by the major-general himself.

It is possible that the inquiry may much more seriously embarass some members of the Shells Committee than the minister of militia. Indeed, with the fuse contracts up to date the gentral is connected by only a slender eral is connected by only a slender thread. It is said that he had nothing to do with the making of the contracts and only ratified the same as a matter of form in order to meet the demands of the trust company and upon the request and by the direction of the imperial government. He volunteered more than anyone knew when, in his speech on Tuesday last, he admitted

d munition sheds of the Imperial

Some people think that the government lost its head on the night that Mr. Kyte made his wild assault upon the government trenches. If what Gen. Sam says is true a vigorous defence and even a successful counterattack was possible. If Sir Sam had been there the artillery duel might have resulted thus:

Kyte.—"The fuse companies had an

have resulted thus:

Kyte.—"The fuse companies had only \$4000 capital."

Hughes.—"Wrong. Their aggregate capital is one billion dollars!"

Kyte.—"They have no factories and employ no men."

Hughes.—"They have a \$6,000,000 factory and employ 8000 men."

Kyte.—"They are not delivering fuses, their prices are exorbitant and the British Government is disgusted."

Hughes.—"They have delivered millions of fuses and the British Government is so well pleased that it has given them an order for 5,000,000 more at the same price."

The important thing, more important even than the findings of the judges, or even the testimony admitted in evidence will be the impression that lingers in the public mind. If the popular verdict is not one of vindication it will matter little to Gen. Hughes what the royal commission may decide upon the law and the evidence. It is the general who is on trial, and if the verdict of the public is not in his favor we may soon look for the long anticipated and long deferred recorganization of the cabinet.

Interest and the British Government is so well pleased that it has given them an order for 5,000,000 more at the same price."

Kyte.—"The shells committee advanced \$3,000,000 to two irresponsible companies who divided the money with allison and a lot of promoters."

Hughes,—"The money was advanced to a trust company for the manufacturers. The trust company gave a bond for its proper application. Every cent went into material and labor, and not one cent has gone to Allison or any other promoter."

Kyte.—"Here's an agreement for

But to go back to Old Man Ontario's question.

"Why does parliament have to meet again after Easter?"

But to go back to Old Man Ontario's question.

"Why does parliament have to meet again after Easter?"

But to go back to Old Man Ontario and Lignanti.

Hughes.—"If you say

"Why does parliament have to meet again after Easter?"

The government program for the session as announced early in January could be summed up in the words of it's John Macdonald as "a scrimpy chicken." A more slender menu wis never laid upon the table of parliament. All the government asked parliament. All the government asked parliament. chicken." A more slender menu was never laid upon the table of parliament. All the government asked parliament to do was to extend the parliamentary term for one year, and to vote a war credit of \$250,000,000.

The first proposal went thru the house of commons in exactly one hourand twenty-five minutes 'The second could have been adopted at any time by a rising vote. There were the estimates of course, but they never detain the house when there is no other business to do.

A month ago it was dollars to doughnuts that the session would be wound up by the middle of April, Then came the Kyte charges, the cable to General Hughes, the appointment of the royal commission, and some delay was inevitable. But, even with the conserved however pinning any Victoriam conserved home conserved however pinning any Victoriam conserved home conserved however pinning any Victoriam conserved home conserved h

The point is that the shells com-mittee and all its works have ap-parently passed from the parliament-ary arena, and are now before the

royal commission. There is some supply to be voted, but that might have been put thru by working longer hours per day if necessary. There are rumors of a bilingual debate, but the government has certainly not pro-longed the session for the pleasure of

hearing it. We may therefore be ex-cused for thinking that the govern-ment is cautiously feeling its way toan Ontario Conservative M.P. leaving for home the other night, said that no doubt commissions to the extent of \$1,000,000 would be paid in connection with the fuse contracts but that under the circumstances they were not aversive. He added however:

If your Conservative member from certain ridings in Ontario flinches when the mem of the sideroad wants to know why parliament did not prorogue at Easter, it is because he is a little uncertain how this constituent will view any further fluencial assistance to either the Canadian Northern or the Grand Thank Fallic. The Mark is pretty certain that there is to lie railway estilation and he is emfait raseed by the fact that he does not know any store flue, his humbest constituent what the festation is government itself does not know what it intends to propose to parliament, but it is a fair surmise that the proposal will be in the nature of extending some financial aid to the railway companies above mentioned.

Such aid has been extended in the past, and no doubt will be extended again in the future. The Canadian Northern as usual, will go ahead, take all the hard knocks, but when it floos make out a case and receive some financial assistance from parliament; will be constituent as well as fire and the constituent of the fluency of the fluency

If candles are placed in a refrigerator or in a very cold temperature for a couple of days before being lighted, they will burn twice as long. Moreover, the wax will be consumed as it melts, and will not trickle down the candle and over the rim of the candlestick. all the hard knocks, but when it does make out a case and receive some tinancial assistance from parliament the Grand Trunk Pacific may be counted upon to pass up its plate and modestly surrmur "Me, too." The Grand Trunk Pacific always seems to get as big a helping as the other fellow. Every time the Canadian Northern comes around the government threatens to take it over, but the government knows better than to make that threat to the Grand Trunk Pacific. If it did so the Grand Trunk Pacific

Quackery and Corns

Hundreds of treatments have been offered for corns. Some were sedatives to quiet pain. Some were acids, harsh and risky. Some mere quackery.

But one man—a famous chemist—studied corns for 25 years. And finally discovered Blue-jay.

That is now the standard treatment gentle certain scientific. It

That is now the standard treatment, gentle, certain, scientific. It is used on a million corns monthly. It has stopped the corn pain instantly, 70 million times. It has ended the corns completely within 48 hours, in 91 per cent of the cases. The others take a little longer. Stop paring corns. Stop treating them in wrong ways. Use Blue-jay, and that ends them in a gentle, easy way. Prove that tonight.

Men Who Have Come to Canada From Other Countries. Eager to Join.

KEEP FRIENDS TOGETHER

Many Reasons Why These Men Do Not Link Up With Present Units.

when the wild Irishman from Nova Scotia ran amuck. He has not been observed however pinning any Victoria Crosses or Distinguished Service medals upon the manly breast of the member for Grenville. Some of Gen. Sam's friends in New York are quoted as threatening dire vengeance against "Jack Reid" if they find that he "ratted" on "Sam Hughes." But these gentlemen will probably have enough to do taking care of themselves before the royal commission without mixing in Canadian politics.

Meanwhile Hon. George Graham is going around with a bomb under his coat which may turn out to be a squib. But he is going to touch it off one of these days, and those near him say it will be hurled at the Dominion minister of customs and his particular friend in a certain provincial government!

An Ontario Conservative M.P. leaving for home the other night said that no doubt commissions to the commissions of the commission without mixing in the principle of keeping friends together in a platoon is recognized by the British military authorities as helping to make efficient soldiers. That idea is being used here in Toronto. We have here, not only Canadian, Scotch, Irish, but even an American

idea is being used here in Toronto. We have here, not only Canadian, Scotch, Irish, but even an American Battalion. Then why not a foreign legion battalion, thus giving the opportunity to bring together this element of our population, so that they can'do their but in the cause of the Empire at this critical stage of our national existence.

Have Personal Reasons.

The Poles, Russians and Jews being good citizens of Canada, have also their own personal reasons to wish to serve in the army. The occupation of Russian Poland by Germans and attocities committed by them in the villages and homes, and upon the persons of their fathers and mothers, and brothers and sisters and children, is reason enough for any man with any red blood in him, to be "up and doing."

I can assure you that the Slavs and Hebrews are ready to enlist under the British flag in the fight against the arch-enemy of civilization.

The World, by helping along this idea of a Foreign Legion Battalion, helps the cause of the Empire, the cause of justice, and renders a good service to the Canadians of foreign descent, in giving them the opportunity to show that they are true citizens of

service to the Canadians of foreign de-scent, in giving them the opportunity to show that they are true citizens of Canada, their adopted land.

This is no new idea. I advocated the forming of a Foreign Legion Bat-talion as soon as the war started.

The idea was frowned upon at that time, no doubt for good and sufficient reasons. Men are wanted, and it is not yet too late.

reasons. Men and not yet too late.
Yours truly.
Louis Gurofsky.

PUTTING THINGS AWAY FOR THE SUMMER TIME

Newspaper. is Housewife's Best Friend in This Work and It Keeps Dust Out.

This is the season when woolen garments, blankets and other household articles are packed away for the summer months. Newspaper in the housewife's best friend at this time. It is plentiful and at hand, and it shields from dust whatever is intrusted to it. After brushing and cleaning all garments, turning the pockets wrong side out to catch the shreds of dust there. ments, turning the pockets wrong side out to catch the shreds of dust there, fold them carefully and wrap them in soveral thicknesses of newspaper. The the bundles carefully and lay them away in a trunk that has been wiped out with a damp cloth.

After the blankets have been washed fold them and incase them in newspaper; then the them up in a linencloth and lay them away. If pillows that are not regularly used are well

that are not regularly used are well aired and put away in this fashion, they will keep in excellent condition. In putting away bresses, grate fix-tures or other brass ornaments, it is tures or other brass ornaments, it is wise to clean them thoroly, then lightly smear each piece with lard. After this they should be rolled in several thicknesses of newspaper and laid away in a dry closet. When removed from their wrappings in the full, the pieces may be easily cleaned by interesting with a dry, sort cloth.

Plush or velvet draperies, after being well brushed and cleaned, should not be folded, but carefully rolled on a wooden roller and wrapped in several thicknesses of newspaper. The roller should be at least eight inches in diameter and preferably hollow. The ends should be tightly covered after the curtains have been rolled.

CUBAN SANDWICHES. Cut the crusts from the bread; do not butter: then lay between the slices first some crisp fresh lettuce leaves spread with saiad dressing, then a layer of soft mild cheese, and, lastly, some very, very thin slices of dill pickle or cucumber.

Cold cooked cauliflower or cabbage can be made into a most appetizing dish by following this recipe.

WAR SUMMARY

THE WEEK'S EVENTS REVIEWED BY W. H. STEWART.

(Continued from Page 1).

The bombardment was heavy on both banks of the Meuse on Tuesday. The French reported that Wednesday the Germans made three attacks at Les Eparges, southeast of Verdun, but, after they had entered 200 yards of French trenches, they were ejected and repulsed. The French Thursday and Friday gained ground at Le Mort Homme and in the Cailette wood, where they captured positions previously lost to the enemy. The Germans were repulsed Thursday night in an attack on a front of a mile and a quarter between Douaumont fort and Vaux pond,

It was announced from Paris Thursday that a big force of Rus- Arrival of Russians sian troops had arrived at Marseilles in a large fleet of transports and were being disembarked to aid the allies in the western theatre of the less surprise to the Germans to hear that a large force of Russians, safemated that a quarter of a million Russian soldiers would be transported sea by French and British warships, to the west this spring.

The United States sent a strong ultimatum to Germany on Wed-ay demanding that submarine attacks against merchant ships clally since it has been said that, posnesday demanding that submarine attacks against merchant ships cease on pain of dismissal of Count Von Bernstorff, the German ambassador, and the severence of diplomatic relations with Germany. The note of President Wilson was delivered to the German foreign office at Berlin on Friday and its text published in the German news- and the French can more readily furnpapers. Press comment was against yielding to the United States.

Sea, however, was of great service to the Russians in the replenishment of

It is not generally known that the

with Bag and will then be cut There is also a southern route by came across the desert from Damascus, thru

system.

Self-Contained Unit.

Last week has been marked by the following important events in the war:

1. Capture of Trebizond by the Russian army of the Caucasus, and the breaking down of Turkish resistance at other points in this theatre, followed by the energetic purshit of the Turkish forces retreating from Trebizond along the coast westward.

2. Arrival of a large force of Russian troops at Marsoilles, France, probably transported from the new ports of Kola and Ekatrinograd, with the intimation that possibly 250,000 Russians in all will arrive in France this spring.

3. Ultimatum from President Wilson

The dassistance of the flect on the Black Sea, however, was of great service to

3. Ultimatum from President Wilson of the United States to Germany de-

manding a cessation of submarine warfare against merchantmen on pain of dismissal of Count Von Bernstorff, and the severance of diplomatic relations with Germany.

Fall of Trebizond

The capture of Trebizond, which, it will be remembered, was conceded to the Russians in these columns several weeks ago, is the most important event in the war this week. This premier scaport of Turkey on the Black Sea was taken by an amphibious operation, a force marching on it along the shore and another force being landed from the fleet. Short work, it seems, was made of the Turkish resistance, and the Turks scuttled from the town like frightened rabbits. The Russians then entered it and took possession in the name of their

mperor.
The occupation of this port is the first step in the second phase of the Russian campaign against Turkey. Before the second phase has been completed the Russians will have to occupy Erzinjan, Kharput and Dia-bekr, and they will then be in position for the thrusting out of one wing, and the seizing of Nisbin, the western railhead of the Bagdad railway. Once that railhead is in their possession, if they plan to continue the campaign against Turkey, they are within strik-ing distance of Aleppo and the Syrian

Trebizond First Step

Properly drawn maps of Asia Minor show that Trobizond, Erzinjan, Knarput, are in a practically straight line running south from the Black Sea. The occupation of Trebizond is necessarily the first step in the further campaign which the Grand Duke is believed to have planned. It is said that his conception of the operation was so daring that many military experts hed grave doubts as to whether it could be carried out. But he selected in General Judenitch, a lieutenant, who appears to be a genius, and who has not only carried out the program of his chie without a hitch, but has improved upon it, and is well ahead of schedule. Great credit for the success of the operations is also due to the octogenarian cavalry leader, Count Voronzio-Dachkoz, who by untiring preparation and personal supervision, has worked and personal supervision, has worked a wonderful efficiency in all branches of the Caucasian army.

Make Rapid Advance

Since the campaign started in the rigors of a Caucasus mid-January, the Russians have swept onward over a mountainous region at a compara-tively rapid rate. They first smashed the Turkish centre established near their frontier by a night attack during a heavy snowstorm. Pursuing the demoralized and frightened Turks, they followed them to Erzerum, and not only carried in an assault, lasting five days, the fifteen powerful modern forts which the German engineers had thrown about the town, but also, they carried the great series of outworks on the Deve Boyun ridge. It is to be noted that whereas it took the Germans ten days at the opening of their campaign to reduce the forts of Liege, and fourteen days to reduce the forts at Maubeuge, two pre-war, old style fortifications not calculated to stand bombardment from high explosive shells, it took the Russians only five days to capture Erzerum, which was refortified according to the most approved ideas of the Germans. Trebizond, also a German fortified city equipped with the largest and latest Krupp heavy guns, fell, apparently in only a few hours. Its possession now cuts the Turks off from the Black Sea, and from munitionment by water. It is also the second and last great Turkish fortress in the eastern part of Asia Minor, and the Turks will therefore have only bad roads and an imperfect transport to depend on for their sup-

Will Affect Balkans

The capture of Trebizond, following the capture of Erzerum two months ago, will greatly contribute to the ending of Turkey. It ought also to affect the Balkans profoundly. Rou-mania should give heed. The suc-cesses afford the most striking testimony to the excellence of the Russian guns and gunners, and the demoraliza-tion of the Turks. They and their German instructors have hitherto suffered no reverses at all comparable to the present one. The letest triumph is certain to echo far and wide thruout the Turkish empire, to Bagdad, Pale-German prestige is sure to suffer at There can be the Golden Horn. question that the German general staff actually spared no efforts that are within its power to avert such a signal series of disasters to the Turkish arms. Failure to pay 2 Erzerine was a proof of

had arrived at Marseilles to help the British and French in the war. The sibly, a quarter of a million Russians will be transferred to the west before spring is over. Russia has millions of men and her handicap has mainly been lack of equipment. The British and the Franch can more readily turned. ish them with accourrements and munitions than they can send these accourrements and munitions to Russia. These things are much more bulky and dangerous to transport for long distances than men. So, instead of sending the mountain to Mohamet, the allies are adopting as far as pos-sible, the more feasible plan of send-ing Mohamet to the mountain.

How Foe Views it

To the German general staff this transference of Russians would be sized up in this manner: "The allied general staffs evidently plan some great stroke against Germany. They great stroke against Germany. They have plainly been considering the launching of some important military operation, and have decided that a certain minimum of men will be required to give them chances of success. We do not know the route by which these troops came, and we must find out. Russia has probably completed her new port of Kola and Ekatrinograd earlier than we expected that she would be able to, and the allies have come to a realization of how to exercise the power that command of the seas confers, a fact which we have never admitted in Germany, but nevertheless a fact which we shall have to take increasingly into account. But sea command secures secrecy in the transportation of troops, and since the allies have hit upon the plan of arming vast hordes of Russians, we shall have many more vilnerable. The Times points out that on the more vessels for the collection of the shipping to the merchant fleets of the world would also release the tightness in transportation and freights. It would also release

bably been opened for automobile traffic, and it may well be the one on which the Turks now principally rely.

Arrival of Russians

It, no doubt, has come as a boundless surprise to the Germans to hear that a large force of Russians, safely convoyed and conveyed over the the whole force of Germany available to make our defences feel at all secure.'

Thus will the great German general staff soliloquise, and a great many more things will be said, but not for

Advantage of Move

The advantage of transferring men from east to west and vice-versa, countries nearer. For, if should circumstances demand it, was the greatest that the Germans outside interior lines, they could remain on support to the allies, the defensive in one theatre while they fare. But the opening of ice-bound ports by Russia, and the sending of Russian forces to the west has eliminated all that advantage. Owing to the greater carrying capacity of steamers over trains, one fairly large ship being able to carry as many men as eight or ten trains, the allies it will be found, by their new manoeuvre, have the abili-ty to transfer men as rapidly back-wards and forwards as the Germans.

Big German Failure

As everybody can see the Germans have failed in their offensive before Verdun, tho by keeping up their bombardment of certain spots in the French defences, it is probable that, after bringing up more troops from the Russian and Balkan fronts, they will once more hurl their men forward to the grand assault.

Here is the way The New York Times, a neutral paper, looks on the outcome of the Verdun fighting:
"The tradition of German invinci-"The tradition of German invinci-bility has been shaken at Verdun, and the addition of this shipping to that is a fact of real importance; but, the merchant fleets of the world would

It has also pro- at Saloniki, and the whole huge force be saved. There was prepared such a

deluge of gas, flame, and high-exposive shells as had never been suffered on earth before. To hurl these devastating forces against the French vastating forces against the French in an overwhelming manner to sweep the ground as by a tidal wave, and then almost as bloodlessly to occupy the positions—that was the German idea. It had been already tried in the Balkan campaign, where the "cultivation" of the terrain for the footsteps of the advancing troops was developed to an intense degree. But at Verdun it reckoned without the Frenchman, and failed. This fact of a failure in mediated. failed. This fact of a failure in method is perhaps even more important than the humiliation of the legend that nothing can withstand the German in

French Qualities Superior

But the French troops developed qualities of clinging to the terrain de-spite the torrents of the German de-luge of iron and flame. As the Ger-

President Wilson's final warning to Germany that Von Bernstorff will be sent home, and that diplomatic rela-tions between Germany and the United States will be severed the instant chat a submarine sinks another merchant ship does not necessarily denote that Germany and the United States will go to war. But it brings a formal declaration of war between the two relations are severed, and Germany sinks some American ships, there will of machinery, which has now been be a great clamor in the States for overcome, possessed. By moving on going to war, and giving adequate be a great clamor in the States for

Room is afforded for the intellectual exercise of boundless speculation as to transferred the bulk of their forces to the other, and waged offensive war- what the United States will do and not do. But it should be remembered that when the Lusitania was sunk a year ago, things looked more like war be-tween Germany and the United States than they ever have since. The note of the president still leaves room for equivocation, and Germany may be exected to make the most of it.

As to sending an army to France, it would take the United States a couple of years to raise a respectable force and train it for fighting against European troops. As to supplying munitions to the allies, she is doing about all that can be done, that is, furnishing about eight per cent. of the munitions required by Great Britain. Even at that the American manufac turers are away behind in their deliv eries.

The moral influence of the United States breaking with Germany would be a great advantage for the allies. It would encourage the republics South America to commandeer G the allies have hit upon the plan of arming vast hordes of Russians, we shall have many more vulnerable points to watch than before. Formerly it was comparatively simple, only Russia and France. Now, we have opened a new orifice in the Balkans. What if a faillion Russians are landed what if a faillion Russians are landed of the saved. There was prepared such a state of the carriage of troops. As to whether Germany will desist from sinking ships at sight or not, it is not safe to predict. Her government to bring another enemy into the lists against her, especially since the failure of her arms at Verdun. Her miliure of her arms at Verdun. Her military guides have certainly enough worries of their own. But Germany has so filled her people with notions that she is invincible, that her armies can win victories wherever they turn, that the German people believe that the only thing in the way of forcing peace on Russia and France is the ob-duracy of the British empire, which is determined to destroy Germany. She pinched by the British naval blockade. German public opinion recently made itself felt when Von Tirpitz was dismissed and led by Maximilian Harden, the public raised a great clamor for the continuance of submarine warfare. The German government yielded. The Sussex and other ships were attacked. Now, on hearing of the ultimatum of President Wilson, some of the German newspapers have already begun to a great outcry against stopping the practice of piracy.

EARLY SEEDING OUTLOOK GOOD IN YORK COUNTY

A well-known York county farmer in the city Saturday said that not in 20 years had the outlook for an early seeding been less promising than at the present. The land was wet and the present. The land was wet and continued unfavorable weather had run it together, which would make seeding more difficult than ordinary. He did not anticipate that any great scarcity of farm hands would occur, as most of the farmers in the county had secured their help, and the return of many of the soldiers belonging to the 127th York Rangers would help

DEATH OF MRS. HORNER.

er life of York County passed away in the city Friday in the person of Mrs. Jane Horner, who died at the residence of her daughter, Mrs. Thompson Elliott, 146A Souroran avanual of the cayengal are of 99 years. An outstanding figure in the pionenue, at the advanced age of 99 years Until within the last two weeks Mrs Horner was comparatively active and took lively interest in all current matters. She followed the progress of the war from day to day and in this as in all other matters, was fully abreast of the times. Three daughters, Mrs Thompson Elliott, 146A Souraran avenue Mrs. John Williams, Sutton West, and Mrs. James Murphy of this city, and four sons, Samuel and Thomas of Toronto; William, of Sutton West, and Benjamin of Chicago survive. Mrs. Horner was predeceased by her husband a number of years. Mrs. Thomas Williamson of Stouffville is the only surviving sister of a large family. Interment will take place at Baker Hill Cemetery, on Monday.

GOOD WEATHER OUT WEST.

A letter received by a friend from J. M. Walton, Aurora banker, now actively engaged in putting in his 1000-acre farm near Edmonton, stated that on April 15 seeding was in full progress, trees were rapidly budding and the air was balmy and spring like. Mr. Walton left three weeks ago and will be absent for three months. NOT R. A. GILBERT OF TORONTO

HOTELMEN DON'T LIKE LEGISLATION

Declare "Standard Hotel" Clause is an Insult to Trade.

WANT TRADEMARK

Government Should Protect Those Who Intend to Continue Business.

BY HEW TRILL.

Toronto hotelmen with advanced dard hotel" legislation included in the Ontario Temperance Act. Some go so far as to say that it was an insult.

Their ideal was that in exchange for the bar license, in the present situa-tion, the government should make the word "hotel" the trademark of a build-ing for the accommodation of the pub-lic, where the name "hotel" would be an assurance of government supervi-sion and sanction of rates of service

and equipment. The clauses regarding "standard ho-tels" provide that hotels may take out a license for \$1, and in view of that may have the exclusive right among hotels of selling soft drinks, cigars, cigarets and tobacco, and ice cream, with provision that they may conduct a general cafe business. In view of these privileges, which the hotels had before, these hotels will come under the supervision of the license board.

There is also provision for remission of taxation, wholy or in part.

Definition of Hotel.

The definition of "hotel" as approved by the National Congress of American Hotel Associations, both this year and

"Every building or other structure objects kept used and advertised, or held out to the public as a place where food is truth."

PERSHING IS TOLD TO KEEP ON ALERT

Authorized to Prepare for Despite Weakness of New York, Any Aggression in Orders Just Out.

NEW LIVES AND BASES

Said to Have Been Talked of in Conference Held By Officers.

San Antonio, April 22.—General Funston has received reports showing movements of Carranza troops in the district penetrated by General Fershing authorizing him to prepare for any aggression.

Carranza officials have given plausible reasons for moving the forces of Gen. Arnulfo Gomez eastward from Sonora, the troops of Gen. Luis Herrera south from Chimushua to Parral and a considerable force towards Casas Grandes, but should the war office at Mexico City decide later to use these forces to prevent further American military operations Gen. Pershing will be prepared for any situation.

Until late last night Gens. Scott and Funston discussed the developments of the pursuit of Villa that began with promised co-operation by Carranza troops and ended or practically ended with a warning to Col. Brown at Santa Craz by a Carranza official that he must not advance south of that point.

Establish New Lines.

It is understood that the establishment of other bases and new lines of communication were talked of, but the details of the fighting at Parral and the abrupt halt in operations that came as a result were discussed at length.

Gen. Pershing's reports, which are said to contain recommendations that

Gen. Pershing's reports, which are said to contain recommendations that radical changes be authorized, probably will be gone over carefully to-Overnight despatches from the front

Overnight despatches from the front indicated no renewed offensive activity. The pursuit of the bandit chieftain remained practically at a standstill, and the impression is gaining strength at departmental headquarters that the troops will be withdrawn.

CAN MOVE U. S. FORCE EITHER WAY QUICKLY

Disposition of Troops is Such That This Can Be Accomplish-ed Without Difficulty.

EL PASO, April 22.—Bricadier-General Pershing has made such disposition of his forces that the American or withdraw from Mexico when the future course of operations is determined by the administration at Wash-

The troops can be retired from Mexico in ten days, according to army officers at Fort Bliss.

Carranza officials at Jusrez reported the situation generally quiet thruout upper Mexico and said every preparation has been made to suppress any disorders that might arise. The Baral district is being filled with Carranza troops and guards have been thrown about mining properties.

VILLA BANDITS SURRENDER TORREON. April 21, via El Paso
Junction, April 22.—General Severino
Coniceros and his command of Villa
bandits have surrendered to the military commander in Durango City and
have been granted an amnesty. The
situation in Durango is steadily improving.

Record of Yesterday's Markets

TORONTO STOCK EXCHANGE. NEW YORK STOCKS. Erickson Perkins & Co., 14 West King street, report the following fluctuations on the New York Stock Exchange; Op. High. Low. Cl. Sales. —Railroads. do. preferred . Canada Cement do. preferred . Can. St. Lines co A bad break in the New York market on Saturday was not without some influence on domestic stocks. The effect locally was to curtail support until a clearer view of the American position in relation to Mexico and Germany could be had. Sales of securities came, therefore, on a most unwilling market, and taking this into consideration, prices held much better than might have been expected. The only active issues were Steamships, Steel of Canada, Cement and N. S. Steel. Prices of each of these stocks were at declines from Thursday's close. The disposition among traders was to do nothing, but when offerings were forced, floor traders bought on the prospect of a turn in Tuesday's market. The outlook was more uncertain than usual, but some took the view that the Wall Street influence would only be of a temporary nature, and that the Canadian markets would adjust themselves to domestic conditions next week.

"Any fashions in that paper, Daddy?"

to Health

SURGICAL REMOVAL of diseased organs is now needless through the statements of the schievements. its daily achievements.

MANY CASES pronounced hopeless, after ordinary medical and surgical procedure have responded to scientific spinal adjustment, and health has re-Crompton & Knowles
Looms.

Mule Spinners, male
and female.

Worsted Spinners, male nitallible way.

NO MAN has yet been able to duplicate the tremendous powers, as demonstrated by hydraulic forces, shown in the true peristaltic action of intestines—which can be restored to its normal after spinal adjustments.

TRUE CHIROPRACTIC science stands alone in this achievement.

Prophecy

THRU OUR PERSONAL EXPERIENCE
after years righting the worst diseases
siven up by the best in medical effort—
we can safely predict that in less,
than ten years from now the whole
world will enjoy the knowledge and the
benefits which Chiropractic has already
siven to thousands in United States
and Canada.
THE FUTURE FAMILY ADVISER and
friend will use spinal adjustments and
ordinary common sense to combat
disease. All he will need to take with
him to the home is brains, a clean pair
of hands and a thorough knowledge of
Chiropractic science.
THE FOUNTAIN HEAD SCHOOL in
Davenport, Iowa, teaches the art and
philosophy of Chiropractic in a threeyear course to five hundred students in
resident. No correspondence diplomas
or short courses allowed.

A Special Study

THE SPINE is the Chiropractor's special study. The people of this vocation are spine specialists. No other health profession gives this most important part of the body the careful and scientific consideration that the student Chiropractor gives it.

MODERN RESEARCH has discovered the importance of the spinal column as a health factor. Conscientious study on the part of intelligent men through two decades has served to confirm the theory that as a causative factor in relation to health, the spine controls the supply of health energy passing from the brain to individual tissue cells in every part of the body.

CLINICAL PROOF in large volume exists to confirm the logic of the theory.

THE THEORY is conscientiously followed has finally reached a stage of progress where it is being investigated, and adopted by leading exponents of other health methods, some of whom at one time mistakenly condemned the Chiropractic idea which they now accept, practice as a profession, and urger upon their clientele in quest of a harmless and helpful health mode.

NO DRUGS NO SURGERY NO OSTEOPATHY

all parts of the body through herver currents, which is the intellectual engage of the body in all organs and muscle tissue.

Hisopractic is an art as well as a true science and owes its growing popularity to results obtained when all other methods have failed.

His MESSAGE may mean both health and happiness to you or yours, if you put prejudice aside and make deep personal investigation.

CONSULTATION WILL prove most interesting to those in need of health; both acute and chronic troubles are adjusted with great success.

KINDLY TAKE warning of unscrupulous people representing themselves as Chiropractors, who give electricity and massage with three weeks' diploma, presuming that the public do not unser derstand the difference.

TRUE CHIROPRACTORS use only the hands to adjust the spine, and Nature restores health and strength through responsive action when the bone pressure is removed from the nerves.

DR. CHATTOE, CHIROPRACTOR, RESIDENCE, 36 SHUTERIUM, TELEPHONE APPOINTMENT.

Murphy The German Spy

MULDOON and I had both thought the law of averages and if we watch that we should do something for our country at such a time as this. I am sure that had we both not had such absolute confidence in our inability to stand long route marches we would have been into lchaki from the beginning. However, our rather degenerated physiques furnished the necessary excuse so we

was eating the meal, that attracted our attention, but what he was eating about to my one-roomed apartment over the grocery store reading about to Muldoon from the interesting volume entitled. "How To Be a Detective for Ten Cents." I came to a sentence which read something like this: "To find a Criminal you must often look to one with the least suspiction surrounding him." Muldoon interrupted me at this. "I have an idea," he said. "What's to prevent Murphy, the Irishman around the corner, who keeps the pool-room, from being a German by the name of Murphy?" I said sarcastically. "Who ever heard of a German by the name of Murphy?" I said sarcastically. "Who ever heard of a German by the name of Mackenzie? It's a Scotch name, but still we have Field Marshall von Mackenzie." said Muldoon had said. "That's right," I replied, "he's just as apt to be a spy as anyone else. If we wish to do our duty we must keep our eyes on everyone in Toronto whom

rather degenerated physiques furnished the necessary excuse, so we consoled each other by saying that if the opportunity presented itself that we would do all for our country that a civilian could do. Muldoon had agreed with me when I had said that the German spy system was the greatest menace to us of all Germany's unfair methods of war, so we had decided to unite our efforts with the object of locating all parties of a suspicious nature.

Stores on Queen Muldoon and I went into one of the downtown popular booze bazaars with the intention of obliterating a couple of buckets of suds, and there, at the other side of suds, and there,

how is this for detective work?" and he unfolded a photograph from a comic supplement and held it before my face. "It's Murphy," I said, "but the uniform he has on?" "It's that of a German Uhlan, Muidoon said, with a wise smile. "I have been hanging around the pool-room aid day to get some evidence, and just by chance I happened to see the corner of this sticking out from underneath the cash register." In spite of the fact that the gas mantle in my room resembled very much some of the spots in Rheims, we were able to make out every detail of the photograph quite distinctly. There was Murphy's Irish face and there was no mistaking that aitho the uniform did not look exactly like the active service uniform of the German army, we were unanimous in

German spy. As Murphy lived over his pool-room As Murphy lived over his pool-room we kept our eyes on the building all that night it rained quite heavily that night, but we did not mind that, we wanted to do our duty. We flipped Two Bits in the morning for the honor of disposing of our discovery. It fell to me, and, with joy in my heart, I started for the armories. I rushed in, holding out the photograph, and started for the armories. I rushed in holding out the photograph, and shoved it in front of the face of an Irish officer who sat at a desk near the entrance. "Look," I said, "I have found a German spy." "German spy nothing," said the officer, "It's Pat Murphy." "But the uniform," I said, argumentively." "Knights of Columbus," said the officer. "I belong to the same lodge."

I went back to Muldoon by way of a back street.

Read BURROUGHES' Great itchen Cabinet Club Offer

NE DOLLAR DOWN AND ONE DOLLAR A WEEK entitles you to take your choice of any Kitchen Cabinet in the store and have it delivered to your home as soon as the first dollar has been paid.

Burroughes are all ready with the new stock of Kitchen Cabinets. No matter what your idea of a Cabinet may be, it is safe to say that you'll be able to pick out the very thing you need. Even among the highest grades of white enamel and sliding front Cabinets there's a big range of styles and all moderately priced.

You Don't Pay a Cent Extra For the Casserole Set

With every Cabinet priced at \$21 or over we give a high-grade Casserole set. You don't pay any more for the Cabinet or anything for the Casserole set. You see, we're going to sell so many more Kitchen Cabinets through this Club plan that we're well able to cut down profits to the smallest margin. We figure that the extra sales will pay for the sets.

One Dollar Delivers a Cabinet and the Casserole Set

You don't have to wait for the use of the Cabinet or Casserole set until you have paid in several dollars, but you get it delivered right after you have joined the as soon as you possibly can.

IT'S A COSTLY JOB

Expense Runs From Ten to Fifteen Thousand Dollars, it Is Found.

PUBLIC CAN

Tag Day Gives Everyone

Chance to "Pay His

after careful enquiry and checking up and applies to the battalions now out on the streets for recruits, as well as to the battalions which are already organized. As there are six battalions recruiting actively at present, and as there does not seem to be any let-up for the future. It looks as the fifty or sixty thousand dollars could be very well used in bringing these units up to strength, so the public knows what is expected

Here is an itemized statement se cured from one Toronto battalion showing total recruiting expenses in the neighborhood of \$13,000, all ex-penses being for things which the overnment does not supply but which the battalion found absolutely necessary if they were to get the men and look after them properly once they got them. The first set of figures shows what it cost to raise the battalion's first 600 men as fol-

What It Costs. Advertising Motor car repairs, gasoline, etc.... Dodgers, recruiting letters, 328 08 street car fare Signs for depots and meetings Printing office supplies.... Office supplies Telephones Rental of recruiting halls

Fitting up headquarters.. Fitting up recruiting de-61 82 men, etc..... Stenographers while organizing Sundry expenses

Total \$4,170 93 Estimate to recruit balance \$4,000 00

are getting only \$1.10 a day it does not seem unreasonable to supply them with car tickets when they are asked to do night work. Each of the other items may be dealt with in the same manner, and a little thought will show that the expenditure is in-evitable if the battalion is to be

Must Buy Band Goods. Coming down to some of the larger items, there is a big sum set aside for the brass and bugle band instruments. These are expensive articles to purchase, and while one would expect them to be supplied by the government, such is not the case. The \$2500 item for two field kitchens is practically the only one on the list upon which a rebate will be secured by the battalion later on. Two such kitchens are supplied by the government when the unit leaves for over-seas but in the meantime the men It was claimed not sol oong ago by must eat, and the only way the com-a certain organization which bears a manding officer can keep them in

As a matter of fact, the organization said that a tag day is not necessary expenses of every battalion which are not thoroly acquainted with the point about the picture itself is that it in from \$10,000 | facts. And at the same time it must to \$15,000 in items which are not paid be remembered that it is hardly a In plot and even in setting it is the for by the government and which can wise thing for a commanding officer same as the Lasky version, in which for by the government and which can be met only by private donations.

Do not run away with the idea that this is aimed at the government or at the military authorities, for it is not. The sole object is to show the public that when tag day comes on May 4 there are a good many reasons why the givers should be particularly generous.

The Cost is Great.

The above total was furnished only the expense.

Wise thing for a commanding to start overseas with a depleted treasury. That would be the same as in the case of the c the expense.

MISS EVELYNE GRAHAM

prano, made her debut this season and has been singing at many concerts. She will appear in Massey Hall, April 29th, to sing at the Benefit Con-cert for Rev. J. D. Morrow's Church.

COLUMBUS FOLLOWED THE BIRDS TO LAND

Estimate to recruit balance \$4,000 00
Brass and bugle bands... 2,000 00
Miscellaneous expenses ... 1,000 00
Miscellaneous expenses ... 1,000 00
Total ... \$1,000 00
Total ... \$1,500 00
Total ... \$1,500 00
Total ... \$1,500 00
Glancing down thru the list one cannot find an item of expenditure which does not seem legitimate. Advertising is essential as well as costly. It is absolutely impossible to raise a battalion without the use of a motor car. As a matter of fact there is so much work to be done that each battalion requires several machines. In many cases the commanding officer supplies his own machine, and several of his officers do the same thing, while in other cases they have to rely upon the generosity of their contents of the many cases the use of the content for many, many years.

It was only after many, many many long years that Columbus finally found some-body willing to believe in him to the expenditure. The place of the stack in the stack. The elevator works on pulleys attached to a stiff frame on wheels, rope drawn by horses lifts the weight to the desired height, when a catch is released by the operator and the platiture of their annual fall journey, if Columbus to return, and there is no telling what might have happened. It is in the realm of possibilities that the crew might have forced Columbus to return, and there is no telling what might have happened. It is in the realm of possibilities that the crew might have forced Columbus to return, and there is no telling what might have set back the discovery of a continent for many, many years.

CHEESE AIGRETTES.

One-fourth pound flour two ounces SAVORY CHEESE PUDDING. It was only after many, many long

to rely upon the generosity of their friends to let them have the use of cars free.

Everyone knows what recruiting dodgers, letters, etc., mean, and will recognize at the same time the hopelessness of raising men without letters and water into saucepan; when boiling, add the flour and cook until the mixture leaves the side of the pan. Take from the fire, add the eggs, one at a time, beating well after each. Add the cheese and seasoning. Turn onto plate, in the bands and the men to special meetings in the evenings, and when it is remembered that these workers are remembered that these workers.

Everyone knows what recruiting one yolk, two ounces grated cheese, perper, salt and cayenne.

Put butter and water into saucepan; when boiling, add the flour and cook until the mixture leaves the side of the pan. Take from the fire, add the eggs, one at a time, beating well after each. Add the cheese and seasoning. Turn onto plate. Serve with tomato sauce.

One-half pound of cheese grated, one ounce of butter oil, pepper, salt, one teather of the mixture leaves the side of the pan. Take from the fire, add the eggs, one at a time, beating well after each. Add the cheese and seasoning. Turn onto plate. Chinese Corks is the rather quaint in an old cookery book, and, the I have never tried them, they sound as the they will take about five minutes to cook thru.

The Strand Presents This Week Noted Comedian in Latest, Greatest Picture.

The much-heralded and eagerly awaited Charlie Chaplin burlesque of "Carmen," in four big acts of rollicking and uproarious fun, will be presented at the Strand Theatre all this week, At the private showing for the press in New York the S. R. O. sign was hung on the projection room door, and this a certain organization which bears a patriotic name that there is no need for a tag day in Toronto to help battalions in recruiting. They claimed that the government supplied all the essentials in the raising of a battalion, but the reverse is just the case.

From the above it becomes quite evident that the 'people who have said that a tag day is not present the long that the solder victim of the heartless Carmen. Parkans the best learners. may be taken as a safe indication that heartless Carmen. Perhaps the best stays close to the story of "Carmen." Geraldine Farrar was seen. Its funmaking, tho admittedly slap-stick, is not aimless; it is real burlesque. It is "Carmen" Chaplinized, but it is "Carmen" nevertheless. The only important change is that the dagger used in the death scene is a stage dagger and so the story ends happily. Chaplain, of course, makes the most of his uniform, his soldier's heimet, his sword, and his typical Chaplin boots. Chaplin is funny when he stumbles over a stone, he is funny when he eats beans with his sword, he is funny when he sniffs garlic and registers strength; one cannot think of any other comedian who would making, tho admittedly slap-stick, is think of any other comedian who would be really funny in like circumstances.

> **NEW TINNING METHOD** OF WIRE SAVES METAL

Economy of Dollar a Ton Effected Thru Use of Dome Shaped Casting.

A system of tinning wire which effects considerable saving by preventing oxidation of the melted metal has been ntroduced in England. The melting pot introduced in England. The meltins pot of the furnace is surmounted by a dome-shaped casting thru which pass the waste gases from the Bunsen burners that heat the pot. Because of this oxygen-free atmosphere there is an absence of oxidation of the melted metal, which results in a saving of \$1 per ton, it is estimated. The metal is maintained at the proper fluidity by a thermostat which governs the flow of gas. The gas is fed from the municipal mains at low pressure without the use of fans, blowers, or compressors. The wire is run thru the melting chamber and into the melting pot, a method of spring control preventing the breaking of the strands. A fixed wiper, which acts on the wire as it leaves the melting pot, causes the drips to fall back into the melted mass.

-PRICE FIVE CENTS

Meaning of Easter's Dawn To Entire Christian World

If You Have Not Seen the Glorious Sun Dance Then Your Eyes Were Opaque and Your Soul Deadened by Greed for Worldly Gain.

D D YOU see the sun dance this morning? Did you watch the glorious dawn of Easter as it broke in amber and flame thru which broke in amber and flame thru which the rays shot in golden glowing arrows, every stroke quivering with the joy of sacrifice and worship? If these things were unseen by you, then were yourgres opaque, blinded thru the encrustrations of years spent in the dust and cobwebs of material things. The accumulation of the golden metal has deadened you to the more subtle gold of the breaking dawn, and things patent to the eyes of babyhood were to you invisible because you have ceased to remember that this "is the day that the Lord has made," you have failed

The accumulation of the golden metal has deadened you to the more subtle gold of the breaking dawn, and things patient to the eyes of babyhood were to you invisible because you have ceased to remember that this "is the day that the Lord has made," you have failed to recombe that this "is the day that the cord has made," you have failed to recombe that this "is the day that the cord has made," you have failed to recombe that this "is the day that the form dance on Easter morning in homage to the great Resurrection, which is the coping-stone of the Christian faith. Little ones in the nursery have peeped forth from white cots and have stared with wide-open eyes of delight as the rays came in at their window chasing one another in the light and glow of the Easter day. Nature remembers when man is tongetful, and even the clouds might obscure this drama of the heavy ens, yet is it still in progress, and to-day throught the world the bonds of winter are broken and flower and field live again in the birth and glory of mow resurrection.

Spring has always been the most specified with nymphs and sprites, when gods and goddesses swayed the thoughts of morning the proposed with nymphs and sprites, when gods and goddesses swayed the thoughts of morning the cord of the Paschal lamb. Then came the passed over" the houses of the Israelity for which everything is less had been merely a marking out of the seam they gove all others, is given the name of the Easter flower. The pure thanks for their deliverance from producing and from the view of the seam of the proof the land of the Phanchs "passed over" the houses of the Israelity for which everything else had been merely a marking out of the seam of the ground and produced the produced the

which the people find individual participation in the festive spirit of the greatest feast of the ecclesiastical year. England has a great many quaint customs, some of which cluster about the egg which has long been regarded as the emblem of life and resurrection. Eggs which have been colgarded as the emplem of hie and re-surrection. Eggs which have been col-ored with various dyes, are placed on the table or exchanged between friends on Easter Sunday much the same way

Joy seeks always to find expression, so in addition to the religious rites and ceremonies of Easter, customs have grown up in many countries by

SO THEY TELL ME

MARIE CORELLI ON WHAT WILL HAPPEN TO GERMANY WHEN SHE LOSES THE WAR

One Man-or at Most Two-Primarily Responsible for Every General Upheaval, and in This Case the Kaiser Has Thrown to the Four Winds the Lead Which Had Been Attained in a Commercial and Industrial Way, and Has Watched the Nation's Manhood Being Destroyed Forever.

poleon and many other would-be Alexanders of ambition; but of all the tragic blunderers of time surely none can equal or surpass the "War Lord" of

Germany. Here is a man who had the splendid chance of securing for his country and people the largest share of the commerce of Europe; it lay easily within its grasp. Yet he has let it go, like a handful of sand and shells dropped by

industry and commerce give. All that we call "progress" should fortify the

basis. Kaiser Thows Prosperity Away. It is not necessary, it is not even sone or decent that any people should tolerate what Carlyle describes as "the spectacle of men with clenched teeth and hell-fire eyes hacking one another's flesh, converting precious living hodies and priceless living souls into nameless masses of putrescence, useful only for turnip manure"-which is a rough but accurate picture of war deprived of all its devlish excitement and

glamor. To Kaiser Wilhelm more than to any other monarch of his line was given the glorious chance of becoming the greatest benefactor of Germany which that realm had ever known. He could have created for his people such conditions of peace, happiness and prosperity as were almost incalculable. He stood in the broad sunshine of ripening trade-the markets of the world were open to him-fields of wealth were spreading around him on all sides, and his cheerfully working millions had but to reap the grain their industries had sown and gather in a rich and plenteous harvest. Why, then, in the name of all that is great, noble and pitiful, has he chosen to make a harvest of death instead of life?

45.000 Dead Soldiers. During the grim and ghastly struggle at Verdun we are told the kaiser, standing "at safe distance," watched thru his field glasses the fiery mowing down of his countrymen to the number of forty-five thousand! Does anyone, reading this, take the trouble Forty-five thousand strong, brave men in the flower of manhood (for let us hope we are none of us so unjust as to generous nor hospitable as careless trayed the innocent blood!"

In every great national crisis, when war or revolution brings haveo on existing civilization and works sudden and violent change in all social, political and diplomatic relations, we are invariably able to discover One Man—or, at the most, perhaps two or three men—primarily responsible for the general upheaval.

History is impressively explicit concerning these personages. She never fails to show us how, by some strange lack of the most ordinary foresignt and common sense, they stumble when apparently on the height of success, and commit irreparable blunders which hasten their careers to a disastrous close. Such was the case with Napoleon and many other would-be Alex—

dendry our enemies their strength or their courage); forty-five thousands on their courage); forty-five thousands of their overty developed and bone of future generations—saughter—and their every the state did nothed the memperor, their sworn defender and protector, and endeavor left the country in shoals to make fortunes in other lands many firms established themselves in Germany in order to win the rewards dender the many in order to win the rewards dender the many in order to win the rewards dender the many in order to win the rewards dender to conceive the nature and tenil.

What a "Harvest Home!" Are we although the many in order to win the rewards dender or their connector of the substitute of their seried ranks and "massed formations," resulting in such the advance of their seried ranks and "massed formations," resulting in such the advance of their seried ranks and "massed formations," resulting in such them in their native home!

Mourning desolation and his love and admiration for Great Britain she had possessed herself of many of our trades; his people? Mourning desolation and his love and admiration for Great Britain she had possessed herself of many of our trades; his people? his people? Mourning, desolation and irremediable misery! No triumph, no victory can atone for such a deluge of blood and tears! That capricious perlery, her glass, her woollens, her linens, her dyes, her silver and copper ware, her chemicals—why, even our very window-frames were "Made in Germany"! She was at work in our mines and coalfields; she was ahead of us in science, in invention, in industry and general "thoroness."

And let us not forget that we were, or superred to blood and tears! That capricious perbolous whom Wilhelm calls "Unser Gott," may possibly resent the deliberate casting away of golden opportunities on the part of his crowned earthly "familiar," attached to this union. The lady first to whom a peaceful world was offered, to whom a peaceful world was offered. or appeared to be supinely indifferent only to be kicked aside for a batter-to her inroads on all that we used to ed helmet and broken sword!

generous hospitality." This is not quite accurate, since we were neither so "I have sinned in that I have be-

By Lou Skuce ENTHUSIASM REIGNS ALL ABOUT VERDUN

Best Place to Have Pessimism Taken Away Says Recent Visitor.

INVINCIBLE CONFIDENCE

Germans Will Never be Able to Make Any Appreciable Advance."

BY HENRI FERRER. A friend, who so far is the only imerican journalist permitted to visit Verdun, has come back to Paris with a most heartening tale. The thing which struck him most, he tells me, was the invincible confidence of everybody, from generals on the headquarters staff to simple soldiers,

muddy and tired from the battle. He says that Verdun is the place to go to get cheered up. The atmosphere so to get cheered up. The atmosphere there is so charged with the electricity of enthusiasm and never-say-die that it would change the gloomiest pessimist into an optimist in three breaths. At Verdun, and everywhere within range of the battle there is only one answer to questions regarding the likely issue of the long fight: "The Germans will never put a foot in Verdun. Not only so, but they will not be able to make any appreciable advance from their present, positions. They did their worst in the first days, when we had fewer men and munitions, now we could hold back the whole German army."

we could hold back the whole German army."

Just Where They Were.

One interesting thing my friend told me was that in reality the Germans, tho they claim to have gained a lot of ground, are actually occupying practically the same ground they held a year ago, and from which the French drove them. It is, evident that the slight falling back of the French was dictated more by strategical reasons than because of force majeure. They retired to higher and stronger positions, and now any advance of the Germans must be over a sparsely sheltered valley covered by the French batteries, which know the exact range of every knoll.

The Germans have so persistently circulated the report that Verdun is a strong fortress that it cannot be too often insisted that for long months there have neither been guns nor soldiers in the town. The French have learned from the speedy fall of Antwerp, Liege, Namur, and other strong-holds, that against heavy as the server was the server.

werp, Liege, Namur, and other strong-holds, that against heavy guns stono walls and cement buttresses are of no avail. So Verdun was dismantled. The town itself, tho here and there it had suffered from shells, still stood up bravely, and showed comparatively little sign of damage. Compared with Arras, or even with Senlis, it seemed untouched.

untouched.

From a height above the town my informant had pointed out to him line after line of trenches and barbed wire entanglements which stretched far across the valley on all sides. An officer of artillery said to him with pride: "The Germans have to take all that before they reach Verdun, They don't seem too eager to begin."

TRICKS THAT SPIES **USE AGAINST ENEMY**

One Was Caught Who Was Apparently Driving Some Geese But Giving Information.

BY HENRI FERRER.

The ingenious tricks that spies of all armies have devised in this war would fill a volume. A favorite trick has been for the spy to establish himself inside the belfry of a clock-tower, and from there signal to the enemy by means of the clock hands. Of course, a pre-arranged set of signals is agreed upon, and the enemy artillery observing officer knows at a glance just where his shells are falling.

A good story is told of a supposed French infantryman, who came along driving a flock of geese. Unconsciously, it appeared, he came to a standstill just in front of a concealed battery of guns. For some seconds he remained there, and then passed on his way, presumably to drive the geese to a field kitchen. But when, shortly after he had gone on his way, the German guns opened fire on that very spot, killing many French gunners, and putting some of the guns out of action, suspicion was aroused. The infantryman was followed and caught: later he BY HENRI FERRER.

suspicion was aroused. The infantry-man was followed and caught; later he proved to be a spy in the enemy's pay, and he had arranged to stop just in front of that concealed battery. His end was swift and just.

LONDON WOMAN POLICE CLAIM TO BE SWORN IN

Say Men Have Received Them With "Open Arms" and Desire Recognition as Officers.

LONDON, April 22.—"The men police have received us with 'open arms." said Miss Damer Dawson, chief officer of the Women Police Ser-vice, to a large audience in the Mansion House, to support the claim of the women police patrols to official re-

"The men have appreciated the value of our services and they have often said to us, We would give you this said to us. We would give you this work but you are not sworn in, and therefore we can't. We must be sworn in." said Miss Damer Dawson. "We want more training, we want to be allowed to go to the policemen's lectures, and we want the individual touch which is known only to the

Grace Cunard Is Still in Second Position, But She Is Quite a Few Letes Behind for the First Time Since the Contest Stand-Next Count Appears Wednesday.

ITTLE MARY'S legion of Canadian admirers are at last aroused. Miss Pickford regained the lead from Grace Cunard in the standing published in The Toronto World of Wednesday morning and she holds it today with the substantial margin of 642 votes.

One other feature of the contest this week has been the phenomenal rise of Ella Hall, another universal star, pretty nearly as well known as Miss Cunard. Miss Hall, with the handsome total of 1464 votes, has passed Francis X. Bushman and is now in fourth place. Judging by the many letters which have been received in her behalf, her followers are working hard and the leaders may have reason to pay some attention to her progress before the contest is ended.

Contest Correspondence

Motion Picture Editor: I enclose herewith one vote for Mary Pickford. I only wish I could vote a great many more times, as I presume she is a splendid actress. I noticed in the contest correspondence this week on writer saying: "Mary Pickford could take baby parts very well," in a very sarcastic way, which ought to make Mary's admirers wery indignant. I wish they had seen her playing in "Madam Butterfly." She played her part wonderfully well, which was no baby's part, either. I think she is a very emotional actress. Those people who sent 52 and 47 votes in favor of "everybody's darling," Mary Pickford. We do not understand how people could compare Mary to Grace Cunard. Mary is a sweet little girl, while Grace Cunard is a robust woman. We have seen Mary Pickford act in every kind of drams that has ever yet seen one picture in which Mary did not greatly excell Miss Cunard in acting, personality, expression and versatility.

Madeline Tait. Motion Picture Editor : I enclose hereple who sent 52 and 47 votes for Mary certainly spoke some honest truths. Theda Bara comes second, to my liking. I think her good, too. I always make a grab for The Sunday World, as soon as it comes into the house. Hoping to see Mary at the top this week.

It was not practicable to present the photoplay again at the Strand for various reasons. But Robert S. Marvin, who is president of the Metropolitan Theatres, Ltd., which concern operates that theatre, has been able to make arrangements personally. able to make arrangements personally to present "The Battle Cry of Peace" at Massey Hall for the entire week commencing May 8. It will be possiso far. When I asked them to sign one of the coupons they would say: "Why certainly I will vote for Grace Cunard, but no one else." I am glad to see Grace Cunard was ahead, but sorry to see her fall to second place, I frust that she will climb to the top again. You people who favor Grace Cunard wake up and send in your votes. They are very much needed now. Hurry, time is precious. ble to reserve seats a fortnight in ad-

Massey Hall, there should be "room enough for all." But even this is probeminent photo-drama of the day ex-

Mr. Marvin is stopping at no expense to present the photoplay worthily. He has engaged a special symphony orchestra to discourse that spe-cial music which does so much to heighten the poignancy and the pathos of the terribly realistic drama. He has secured a whole car-load of effects, and has engaged a perfect army of men to work them. In short, the guess can safely be hazarded that before has "The Battle Cry of Peace," been presented with such per-fection of taste, and such complete adfuncts calculated to enhance its appear It should be added that a special This will have the effect of giving an absolutely excellent view from every seat in Massey Hall. MR. CARLYLE BLACKWELL.

Motion Picture Editor: Enclosed find coupon for popularity contest, in which my favorite is Mr. Carlyle Blackwell.

I have seen him in but one photoplay, namely, "The Puppet Crown," and I think him the best and most unaffected male actor I have yet seen. However, here's wishing him every success.

"STRANGE CASE OF MARY PAGE" TO BE SEEN AT U-KUM THEATRE

Henry B. Walthall and Edna Mayo.

April 26 and 27, and on each Wednesday and Thursday following until further notice, "The Strange Case of Mary l'age," one of the most powerful ser-ials now being shown, will be seen at the U-Kum Theatre, College and Dovercourt. For refined and at the same time thrilling melo-dramatic interest, this series of pictures is exceptional because of the importance of the stars who enact the leading roles. Henry

Regularly, beginning this week, on B. Walthall, who has earned the repu B. Walthall, who has earned the reputation of being the screen's most finished actor, plays opposite Miss Edna Mayo, whose unfailing charm as an actress is never-failing. The story is one of unconquerable love, "Did Mary Page murder the man she hated?" is the apparently unanswerable question which runs thru every episode. Her sweetheart, played by Mr. Walthall, gives an emphatic "No" as his answer, and his efforts to free her of the charge form the plot.

Henri hurls Richard against the andirons, killing him instantly. Henri and the maid decide to lay the murder onto Jim, who is lying on the lounge in a drunken stupor. Jim is aroused and induced to flee for his life. Meanwhile, Fidele has stumbled into the back yard of the Webster home, and witnesses the murder, but does not see Jim on the couch. Henri finally breaks down and confesses and is

"THE GREAT RUBY" ALSO TO BE SHOWN AT STRAND

In addition to the Charlie Chaplin burlesque of "Carmen," there will be resented at the Strand Theatre all this week "The Great Ruby," by Cecil with sensations. This thrilling photomost successful melodrama produced a thrilling detective story by the same author, entitled "For the Defence." The story of "For the Defence" has to do with the adventures of Fidele Rioget, a little French novice, who is sent by the Sisters to a convent in Montreal. Arriving in New York, she is persuaded by a runner of a disreputable house to go with him. Fidele is taken to the house, but escapes by climbing out of the window and down the fire escape, where she finds herself in a network of backyards. Jim Webster and his friend, Richard tries to kiss the maid, and Henri, at Richard tries to kiss the maid, and Henri, the finest portrayer of western types, another opportunity to win additional laurels. But sharing the glory of the leading part is shown a little by who has been the hero of motion capacity houses all the time. The plot, which is woven with all Cecil Raleigh's well-known skill, centres around the time scores in as the grown-up hero.

With the aptitude of an exceptional mind, he grasps the essentials, and is very earnest to make it seem that it is hor, Dustin, that is playing. This hero, Dustin, that is playing. This hero, Dustin, that is playing. This hor, Gordon Griffith, is very fearless, and did not hesitate to leap from the roof of the Webster home, and, finally, a maid slips down and lets them in the butlar, her sweetheart, rushes to her protection. During the fight that follows life many thrills in "Ben Blaip." within living memory. In its stage ver

For Film Fans

PEOPLE LAUGH, YELL

The Charlie Chaplin burlesque of "Carmen," with Edna Purviance in the title role, has created a furore in New York, the like of which no film has ever done before. It is to be presented all this week at the Strand Theatre in this city.

this city.

Leon D. Langsfeld, manager of the Broadway Theatre, New York, admitted that in all his experience he had never seen anything like the sensation caused by the Chaplin exhibition

sation caused by the Chaplin exhibition.

"Ever since the opening day," said Mr. Langsfeld, "I have been inundated with requests by telephone, telegraph and mail for blocks of reserved seats. Societies, literary clubs, private parties, even church organizations, in the city and out of it. People actually offered me as high as \$2.50 a seat. It goes hard to have to refuse easy money like that, but what can one do under the circumstances.

"Accustomed as I am to seeing people give way to different emotions when viewing films, I must confess that Chaplin's "Carmen" furnished me the surprise of my life in that particular. There was simply an epidemic of laughing from the first moment they glimpsed his face on the soreen, up to the final close-up. And talk about hysteria. The first day we had a dozen odd cases of women and children who started with grins, indulged in mild ha-ha's, and wound up with yells, screams and tears. They just got started and couldn't stop. I was obliged to hire an extra matron to look after the hysterical cases, and I kept her on duty all week. That sounds like comic paper stuff, but it happened to be the simple truth. A man who can exercise such influence over his fellow creatures certainly belongs in a class by himself.

Heports from Boston, Philadelphia, Chicago, Cincinnati and other impor-

Reports from Boston, Philadelphia. Chicago, Cincinnati and other important centres indicate that the new Chaplin film is playing to crowded houses at every performance.

Elsie Janis Finds Electrical

Premier Mimic Headliner at Shea's Lets Her Mother Tell the Story of Her Life Her Age and Birthplace are Deep, Dark Secrets.

"Delighted—the Chaplin of the opera, I congratulate you."

LIKES COMEDY ROLES.

Elsie Janis, premiere caricaturist, the idol of countless numbers of theatre-goers, is back in town. The inimitable Elsie has returned to vaudeville and will headline the bill at Shea's this week. Success has not turned her head. Quaint, girlish and unassuming, she is just the same modest little person that first made her vaudeville appearance in Toronto over a decade age.

"I love vaudeville," she confessed.

"Of course that sounds trite and conventional, but, while the two performances each day are hard the response

ances each day are hard, the response of the variety audience is an electric al encouragement. Somehow I think there is more of the slapstick in the two-a-day than a year or so ago." Then, between the star and her mother, the story of "our Elsie's" rise to fame

Her age and birthplace are secrets, not to be divulged. Mother Janis says so. Fliste wasn't born in Columbus, Ohio, as frequently noted. Mother emphatically says so. Nor was she born in Delaware, Ohio. Mother also born in Delaware, Ohio. Mother also says that What was the birthplace? says that. What was the birthplace?
Ah!—that's part of the secret. And
so is Elsie's age. Unofficially, we
might remark that it's somewhere
around 27. But unofficially, of course.
Elsie made her debute in Columbus
in 1897 as little Cain in "The Charity
Ball" and a year later the reactive

Ball," and, a year later, she was in stock in Cincinnati, playing the child parts of such solid pre-movie oldtimers as "Little Lord Fauntleroy." "East Lynne," and "The Galley Slave." Then Mother Janis decided upon Then Mot Broadway.

"I brought little Elsie to New York in 1900," said Mrs. Janis, "and we managed to get her into the cast of Edward E. Rice's company on the Casino Theatre roof. She made a hit of her own. Then we tried vaudeville. I can vividly remember going up to Springfield, Mass., to try out for Pat Shay. Elsie went very well, and our bookings followed."

Things weren't all sunshine, how-ever. There were many struggles. Elsie began to forge ahead in musical comedy. It was not until 1906 that comedy. It was not until 1906 that she became a star in "The Vanderbilt Cup." Then she folloyed in the stellar roles of "The Hoyden." "The Fair Co-Ed," "The Slim Princess," "A Star for a Night." The Lady of the Slipper." and recently in "Miss Information." In the interim, Miss Janis found time to cross the Atlantic and make an unit cross the Atlantic, and make an unusual London hit.
"The night of Elsie's first success in

London is one of the wonderful events of my life," her mother added. "I remember weeping in the wings as they called Elsie back again and again. And the last night over there! A huge crowd waited outside the stage door, and when we appeared they lifted Elsie upon their shoulders. So they carried her to our automobile, singing: 'For She's a Jolyl Good Fellow.'"
Elsie is said to be a mingling of Holland Dutch and Alsatian French on her mother's side, and on her father's of pure Scotch. Being absolutely neutral, we'll jump briskly over our discussion of the war. "I sang day after day in the London hospitals." footlights Elsie said. "It was a marvelous experience—a sort of ghastly cabaret.

Elsie Janis, headliner at Shea's.

of the best of the Janusian "impres-

antiy,
"Oh, yes, I can get up there!" returned Elsie. And her voice was a
perfect replica of the mature Barry-

umor. There's no doubt of that. She has a keen literary taste, too.

They liked 'Tipperary' best of all, and CAINE, YOUNGER, IS it was strange to hear the wounded boys sing my songs with me." Elsie Janis doesn't like to talk about her bits of mimicry. "I used to the asked eternally about them by newspaper men," she remarked, "until I felt like wearing a sign reading: 'I love my imitations,' 'I feel my imitations,' 'I try to make them please tractions of the state of POPULAR IN ENGLAND carictures, or something like that. I detest talking about them."

de Has Appeared in His Father's Only a short time ago Miss Janis met Ethel Barrymere in a New York Hotel. Now, Miss Barrymere is one Play, "Pete," Four Hundred Times. "You can't get your voice up where mine is now," laughed Ethel, triumph-

One of the most important attrac-

One of the most important attractions of the season at the Alexandra Theatre, and the last of this senson's high-class shows, will be the new farce contedly entitled "A Pair of Queens," which goes direct to the Court Theatre, Chicago, for an all summer run following the week's engagement here.

"A Pair of Queens" is produced by H. H. France, who has given to the public such comedy sensations as "A Pair of Sixes," "A Full House," "Madame Sherry," "Jumping Jupiter," etc. it was written by O. A. Mauerbach, who wrots the books for "Madame Sherry," "High Jinks," "Katinka," "Rright Eyes," "Three Twins" and many others. A. Seymour Brown, author of many famous vaudeville sketches, and such song hits as "Chin-Chin," "You're a Great Big Blue-Byed Baby," "Oh, You Beautiful Doll," etc., and Harry Lewis, one of New York's youngest attorneys. This trio have conceived a plot and written dialog that Mr. Frazee predicts will make it the biggest laughing hit of the century.

Mr. Frazee's cast is one that contains the names of many famous comedians and comediennes. The list includes: Joseph Santley (last seen here use the star of "When Dreams Compains and comediennes. > Grand Derwent Hall Caine

Derwent Hall Caine, son of the fa-Derwent Hall Caine, son of the famous English novelist, has been booked for an engagement at the Grand Opera House for one week, beginning Easter Monday matinee, in "Pete," the most successful play Hall Caine has contributed to the English stage. The younger Caine is an established English star and one of the most popular actors on the London stage. His present tour, however, will offer his first appearance in America. He terminated appearance in America. He terminated a revival run of "Pete" at the Alwych Theatre in London last year to report for duty at Deal with the Royal Naval Division, but his navy career was brief. A recurrence of physical disability, resulting from a serious accident suffered severay years ago, caused the capty that satisfied by attending a performance of the "Smiling Beauties." Jacobs' & Jermon's latest output, which is the attraction at the Gayety Theatre next week. The piquanteries of the dainty entertainment are brought out to good advant dent suffered severay years ago, caused the naval sufferens to retire him from

the naval surgeons to retire him from active duty.

"Pete" ranks as the most popular play from the pen of Hall Caine ever produced on an English stage. Its record of success cellpses even those of "The Christian" and "The Eternal City." "Pete" was produced at the Lyceum Theatre in London in 1908 and scored an overwhelming triumph. It has been revived in London six times in the last six years, and each revival rivaled the popularity of the original run. It has been equally successful in Australia, New Zealand, India and South Africa, and translations of the gripping drama have won extraordinary success in Russia, Holland and the Scandinavian countries. andinavian countries.

Loew's

The "toy comedian," Master Gabriel, internationally famous, will appear for the first time in several years in Toronto, when he heads the bill all of the coming week at Loew's Yonge Street Theatre in a clever new sketch just written for him by Al. Lamar, entitled "Little Kick." There are three people in the act, Lamar, who has people in the act, Lamar, who has been connected with Gabriel for many years and Miss Vida Perrin, Toronto beauty; known thruout Canada for her grace and charm. Miss Perrin posed for two years in Paris as an artist's model, and several years ago won a big Canadian beauty contest. The sketch, "Little Kick," deals with a poor little boy who wanders into a rich man's home, and is royally treated, finally to discover that his new found friend is really his own uncle. In the friend is really his own uncle. In the course of the sketch Gabriel will introduce impersonations of himself as he appeared in the characters of "Little Nemo" and "Buster Brown,"

ASTER GABRIEL, who will appear at Loew's Yonge Street like an ordinary man reciting his A B C's. He can memorize more dialog in a play than any other little man ever a play than any other little man ever known, and has been known to learn a part in a play in one day that it would take an ordinary actor a week to learn. He can spell any word in the English language, pronounce all difficult names and is the master of three languages. Master Gabriel's manager, Al Lamar, has posted \$1000 that Gabriel can learn and play "Hamlet" in ten days. Gabriel is also a 32nd degree Mason and a member of Mecca Shrine, New York City. He is the

smallest Shriner or Mason in the world Miss Vida Perrin, who appears with Master Gabriel is known as the \$10,000 Canadian beauty, she having carried off the prize at the Toronto exposition for three consecutive years. Miss Per-rin has been a member of the Anna Held beauty chorus and was chose by New York theatrical managers as one of the ten most beautiful women of the American stage today.

E. H. Robins, Frances Neilson and Cast of Tried Favorites Present "Under Cover."

GREAT SEASON PROMISED

No doubt the phenomenal success achieved by the Robins Players during their short stay at the Alexandra Theatre last summer is still fresh in the minds of the theatre-going public of Toronto. Instrumental towards this success was the up-to-date series this success was the up-to-date series of plays and also the superb company of players selected for their presentation. There were no plays of the "old stock"; none of the breed that were in vogue years ago, as is generally presented by permanent companies. Last summer Mr. Robins eliminated the old and substituted the new, thereby enhancing his established re-putation as a leading man and stock

For this coming summer he has completed arrangements for numerous New York successes of last year, for presentation in Toronto, obtaining these been paid to the staging of the various ensembles. A carload of scenery and beautiful wardrobe together with forty-five people, make up the company.

E. H. Robins, who brings his stock company to the Alexandra week.

be a banner one. Without going into the usual ceremonies of telling the history of each player, as has been the custom in former years, it will suffice to say that the cast contains all the old favorites, including:
Reina Caruthers, Emma Campbell,

old favorites, including:
Reina Caruthers, Emma Campbell,

Engineers Guard the Interests of Motorists

President Russell Huff of the Society of Automobile Engineers Points to Reduction of Operation by Standardization, and Claims That Experts are Mastering Fuel Problem—A Kerosene Car?

BY RUSSELL HUFF, lent Society of Automobile Engineers.

TTH all the legislative and other sures being taken to lower umer the part taken by the engineers in decreasing the rating cars cannot be ig-The automobile engineer is enly engaged in devising means of as better use of gasoline or of us-

As a matter of fact there is no funimmental reason why automobile enines will not operate satisfactorily on
isonance. If raseline should cost so
much that the usor can be persuaded
to sive up his gasoline engine, which is
naturally the favorite at present benause of the universal familiarity with
its operation and because of the high
standard of development it has attaind—then the engineering workers of
the industry can be depended upon to
provide an engine that will operate
sufficiently on some other fuel.

Gasolina, however, is only one out of
many items of expense in running an
automobile. Of course it is an important item and we all hope its price
will soon fall back to its former level.
What the owner wants and what he
should have is a car that will have a
few total cost of maintenance. The
locatety of Automobile Engineers is
make avoring to reduce maintenance
locates by promoting the principles of
interchange of manufacture. These
principles are laid down by the Standinds Committee of the society, the
work of which has been far reaching in
its effect on the industry.

A recent investigation among the
asses automobile manufacturers has

its effect on the industry.

A recent investigation among the large automobile manufacturers has shown that a large majority are using extensively the standards established by the Secisty of Automobile Engineers. The S. A. E. screw and bolt standard, which has been especially developed to meet the needs of the automobile industry, is used by ninety-four per cent. of the companies from whom reports were received; S. A. E. look washors, consisting of thirty-five sizes, instead of three hundred or four hundred sizes formerly used, are standard practice with ninety per cent. of the makers, and the S. A. E. spark plug is used by ninety-three per cent. of those from whom information was received. These figures show the esteem in which the S. A. E. standardization movement is held among manufacturers. The user has benefited thru the steady reduction in price of cars, accompanied by an actual increase in quality.

work of standardization is never ced. The automobile industry is oping so rapidly that constant inrestigation and research work are re-quired. The work of standardization is office constantly carried on by the professor minds aroung automobile to

Only last month the result of painstaking labor by these men was officially adopted by the Society of Automobile Engineers and is thus made available to the whole industry. The standards adopted include specifications for electric cable for gasoline automobiles, mileage and speed ratings for electric trucks; specifications for electric trucks; specifications for electric trucks; specifications for electric trucks; specifications for steel, covering the manufacture, purchase and methods of making chemical analyses and physical tests; standard locations of disputations who first staff prevented Gov. Bilbo of Mississippi with a new Willyskings of license plates, standard locations for making chemical states of disputations who first staff prevented Gov. Bilbo of Mississippi with a new Willyskings of license plates, standard locations for successions and provides and

The manufacture of engines for agricultural tractors are using S. A. E. standards as a basis for specifications, and thus in the future the farmers of the country will benefit by the work started by the automobile engineers. Organizations of motor boat and deroplane engines are also arranging to use S. A. E. standards as a foundation in their own standards as a foundation in their own standards adopted originally for the automobile is in itself a tribute to the soundness and adequacy of the work of the Society of Automobile Engineers. The older organization is giving every assistance to the motor boat and aeronautical engineers, and is gladly using its accumulated experience in forwarding what has been, and is likely to be in the future, the strongest factor in the success. If American industry.

The keen interest of the automobile engineer in the construction of the economically operated automobile is shown by the nature of recent meetings held by the local organizations, or sections, of the society. For example, the metropolitan section held a largely attended meeting in New York at which the automobile fuel situation was considered in all its phases. It was the general opinion that the fuel problem would utilimately be solved by the development of engines that would uso kerosene.

The Cleveland section of the society

The Cleveland section of the society at its April meeting discussed recent developments in carburetion that are expected to have an important bearing in reducing fuel consumption and in in reducing fuel consumption and in permitting the use of cheaper fuels than are at present possible. The Indiana section held a most enthusiastic meeting in March, at which was described a new method of converting the heat of the fuel into useful work. It is said that this method will practically double the thermal efficiency of the double the thermal efficiency of the engine, or, in other words, with the

engine, or, in other words, with the new construction, the fuel cost per mile will be halved.

These local meetings and the ostablishment of widely used standards are an expression of the value of the society's work both to the public and to its members. The society is continually growing because it meets the demand for a co-ordinate body of the automobile industry wherein technical matters can be authoritatively discussed, preferable ongineering practice recommended and friendship and fellowship fostered. The co-operation and interchange of knowledge resulting from the activities of the Society of Automobile Engineers benefit its members directly and thru them every one interested in any way, as user, dealer or maker, in the automobile industry.

SEATTLE, Wash., April 22.—According to figures just issued by officials in the State of Washington, the

overing the manufacture, purnd methods of making chemical
s and physical tests; standard
license plates, standard locaengine and chassis numbers;

Members of his staff prevented Gov.
Blibo of Mississippi with a new WillysKnight car, which adds him to the list
of dignitaries who drive Knight-motored automobiles.

SAXONS PLAY PART IN CHASING VILLISTAS

Paso Saxon Dealer Donates Cars to Quartermaster. Corps Officers Have Others.

BEST CAMELS ON DESERT

I. W. Ford, President of Saxon Co., Is a Strong Supporter of Preparedness Movement.

S AXON motor cars are playing a part in the chase of the United States troops after Pancho Villa, bandit and Mexican revolution leader.
Just as the sturdy race which gave Just as the sturdy race which gave them their name alway played a prominent part in the warfare of the British Isles and the northern part of Europe, so are the motor cars giving their best to the service of Uncle Sam along the sluggish Rio Grande. At El Paso, Texas, where a large number of troops have been stationed since the border mobilization in 1213, three Saxon motor cars were sold to United States army cars were sold to United States army officers before the pursuit of Villa and they were used by the officers for trips about the border.

about the border.

First Lieutenant Guy H. Wyman of the Elighth Cavalry is the owner of a Saxon Six and Second Lieutenants Wellton M. Modisette and William A. Robarg of the Fifteenth Cavalry both have Saxon Four moadsters.

When the United States decided to enter Mexico in pursuit of Villa and the border was thrown into a fever of excitement, these three officers found a practical use for their motor cars in patrol duty and messenger service in and about El Paso. The cars were pressed into service because they covered the ground faster than a horse and because the sand and mesquite of the border country offered no obstruction to them.

At the same time F. O. Cavin, Sayon

At the same time F. O. Cavin, Saxon dealer at El Paso, placed three other machines at the service of the government. He took cars from his stock for this purpose and offered them to the army officers. Mr. Cavin hesitated a bit at doing this but finally decided to give them without consulting the factory. When he wired what he had done he had the unqualified approval of H. W. Ford, president and general manager of the Saxon Company.

Mr. Ford is a strong believer in preparedness and has himself taken an active interest in the movement for military training in this country. He assured Mr. Cavin that the Saxon Company stood ready to help the government in its great task of supplying the flying column of General Pershing.

The cars which were loaned to the army were all Saxon "Sixes" and they have found a ready use in the quartermaster corps. One of them is being used daily by a major of that department and it has traveled hundreds of miles in the last two weeks.

The sturdy construction of the Saxon nuctor cars makes them particularly adaptable to the rough roads and prairies of the border country, according to Mr. Cavin. Their light weight permits them to travel thru the sand and their mechanical perfection has given them a reliability that is needed for this sort of work. Except for the motor truck companies there are few motor cars being used by the forces now in Mexico. The country makes them less practical than horses for motor car is feasible and Saxon has its place at the ton among the typos. motor car is feasible and Saxon has its piace at the top among the types

Little Has Been Done To Promote Alcohol As Fuel

There In Evidently a Big Field for Alcohol as a Substitute Fuel for Gasoline—An Objection and its Remedy— Kerosene Would Only Provide Temporary Relief.

DURING the present agitation regarding the high price of gasoline, why has not something been done to bring alcohol to the front as a motor fuel or to discover its possibilities as a fuel?

port. This extra lubrication is given to protect the walls of the cylinder against the condensation of the steam after the engine is stopped. In starting again the cylinder is flooded with oil until well started, after which the cylinder is flooded with oil until well started, after which the cylinder is flooded with oil until well started, after which the cylinder is some contents.

There have been spasmodic at-tempts to bring alcohol to the front at times when gasoline jumped skywards but on the reduction of the price of gasoline all thoughts of alcohol were abandoned.

tion as to whether alcohol could be used as a fuel or as regards its limita-Possibly some of the limitations might be overcome were they to be brought forward by a series of experi-

brought forward by a series of experiments.

It has been suggested that one of the limitations was the condensation of the gas, which affected the walls of the cylinder by rushing, and if this is a fact could not this condition be overcome as in transatlantic steamers? The companies only lubricate their steamers going in and out of the cars, to discover a substitute for gasoline.

Kerosene has been strongly touted as a substitute for gasoline, for kerosene emanates from the same raw material, and it must be evident that what controls the price of one will consider the price of the other. The law of supply and demand will naturally bring the price of kerosene to a high point in price.

oil is shut off entirely. This overcomes the question of condensation, which has caused rust in the steamer cylin-

That there is a big field for alcohol as a fuel engineers state, and whether the condition of the gasoline market is due to a natural or artificial condition the effect upon the individuals is the same, and it would seem to be up to the makers, both for their own protection and for the protection of the people who buy the ears, to discover a substitute for gasoline.

to long distance touring and spread

derstood, but the long-time and excellent work carried on by the national touring bureaus of the American Automobile Association both at its Washington and at its New York City headquarters, came to be appreciated as clearing houses of touring data and knowledge.

Automobile owners in every section of the United States took advantage of this condition, and applied for in-formation that covered nearly every possible route combination that could be imagined.

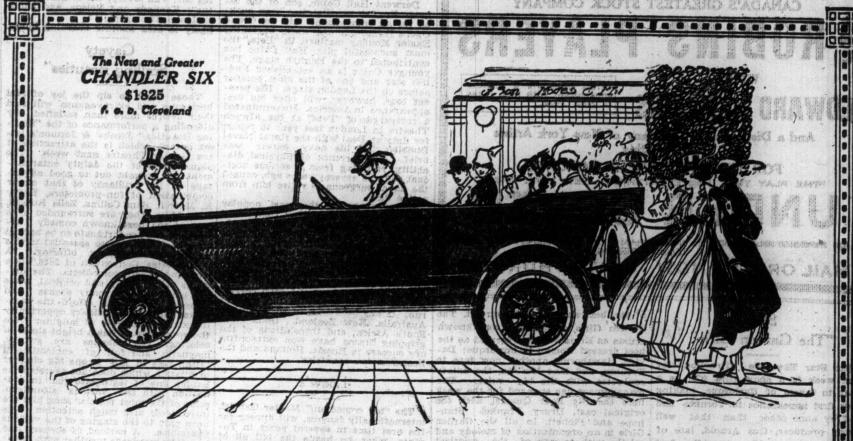

In these groups were many who made their inquiry with curiosity as their incentive, and when they found that route combinations could be linked together they turned from passive of the Willys-Overland Co., automotive the control of th

the propaganda.
While the touring bureaus of the A A. A. have a long record of requests for touring information, never in their years of work has the volume reached anything like the proportions received this spring. One of the results of this entire situation is that the A. A. is reissuing all its road maps, bringing them up to date for the touring season of 1916.

EX-NEWSPAPERMEN WITH AUTOMOBILE COMPANY.

ed by the ex-newspapermen on the state inquiries to active tourists.

In many instances their experiences were so superior to anything they had hoped for, and, in all instances finding that automobile touring is the only way to both see and know their country, they became fixed converts to the Overland's employ.

We Cannot Describe the Beauty of the New and Greater Chandler

IF you have seen the new Chandler touring car body you understand why we do not attempt to describe it. If you have not seen it come in today and get a new idea of motor car beauty.

This new touring car is the most beautiful car of the year. There can hardly be any argument as to that. Someone having reason to be biased might dispute this, but you are unprejudiced—you will look with open mind for grace of line and beauty of finish-and you will agree with what countless thousands at the automobile shows have said very positively. They have said the Chandler is the most beautiful car of the year. So come in and see.

The walnut-paneled tonneau cowl has pleased the public everywhere. It will please you. It gives the car a very unusual air of complete finish. It reflects, too, the thought which the Chandler Company gives to details throughout the car, inside and outside. And remember this, any type of

touring body other than the Chandler ton-neau-cowl type will be old-fashioned and out of date before the season is over. The old style design, with the backs of the front seats projecting abruptly above the body, looks odd even now.

Come see the Chandler. You will be delighted with the style of the car and you know now that you can depend on it mech-anically—depend on it for all the power, speed, flexible control and day-in-and-day-out service that you could ask for in a car, at any price.

For the Chandler chassis, distinguished by the Marvelous Chandler Motor, has been proven right through three years of service in the hands of thousands of owners. It is free from any hint of experimentation, free from any hint of untried theory.

In spite of higher prices of all materials entering into it, the Chandler is still noted for high quality construction throughout and the finest equipment.

Carburetor Troubles are Among the Common Problems of the Motorist-How to Diagnose and Remedy Them-Adjustment for Economic and Efficient Operation.

ADJUSTMENT AND REPAIR

Back-firing, popping in the carburetor and muffer, smoky exhaust, etc., are the products, so to speak, of faulty caused by a lean mixture, which because of its slow burning tendencies is not completely consumed at the end of the power stroke, but continues to burn in the combustion chamber after the inlet valve opens on the suction that the grain of dust restauted by a sort of this way the gasoline allowed to enter the float chamber is kept at a constant level and in proportion to the requirements of the engine.

If the grain of dust restauted by a sort of this way the gasoline allowed to enter the float chamber is kept at a constant level and in proportion to the requirements of the engine. the inlet valve opens on the suction stroke. Then this flame in the computation chamber flashes back to the carburetor and causes the annoyances shown as back-firing; this is liable to prove disastrous should there happen is be a leak in the pipe line between the carburetor and tank or should the carburetor have a chronic case of flooding. Many cars have taken fire and not a few have been completely burnd because of this condition.

Over-rich mixtures at times act in

Over-rich mixtures at times act in a similar way, due to their slow burn-ing characteristics, but they more usu-ally evidence themselves by causing a moky exhaust, with its consequent soting of the combustion chambers, spark plugs, piston heads, etc., all of which eventually creates trouble.

Symptoms, Cause and Cure The cause of a lean or rich mixture requestly can be traced either to an meessive or to an insufficient flow of rasoline. The symptoms are generally to be found in the first case due to looding, with its waste of gasoline and high fuel consumption, and in the secend case to difficulty in starting, and, when started, popping or back-firing in the induction pipe or carburetor. Not a bad rule for a beginner to follow, when diagnosing carburetor difficulties, is to remember that a flooded carburetor tends to provide easy starting. buretor tends to provide easy starting, the this is not necessarily always so and at the same time gives an unsatisfactory performance at high speeds. The reverse is the case when the carburetor is starved for want of fuel;

in this case back-firing will generally Suppose a case of flooded carburetor is discovered, either by a constant disbling of gasoline from it or because of the continued moist appearance of the entire carburetor. The question naturally is, What causes the flooding? naturally is. What causes the flooding?
Nine drivers out of ten will answer that the needle valve in the float chamber requires grinding, but the mora likely reason would be that dirt or grit has become lodged between the surface of the valve needle and its seating, preventing the needle from seating properly and permitting gasoline to continue to enter the float chamber.

Why the little speck of dirt can cause flooding is due to the method employed in most carburetors, for con-

THE carburetor is fitted to your en-gine for the purpose of properly mixing gasoline and air into a when that predetermined amount has mixing gasoline and air into a combustible mixture. A simple statement, to be sure, but a process that is rather delicate, for variations in the quality of mixture can be but slight if good results are to be obtained from the engine.

Correct proportions of air and gasoline produce a gas whose combustion will be very rapid; an excess of gasoline of the chamber is used the float settles into its seat. Having done this, the further flow of gasoline into the chamber is prevented. When part of the fuel in the float chamber is used the float settles lower as the gasoline passes out of the chamber, the needle valve opens and more gasoline is admitted.

This series of operations continues while the engine is in operation. There is not necessarily a continual up and down movement of the float, but a

down movement of the float. balaheing effect, so to speak, is estab-lished; that is, the use of gas by the engine is taken care of by a sort of midway position held by the float. In

M the valve needle does seat snugly and no trace of grit or dirt can be found on its seating, the difficulty may possibly be due to a worn needle, a condition which is likely after a year's use. This also will cause flooding, and in order to cure it a grinding process may be necessary. The valve seet in may be necessary. The valve seat is generally of a soft metal such as rass generally of a soft metal such as rass, and very little grinding will be necessary; indeed, great care must be exercised not to overdo this, as otherwise the height of the fuel level will be altered. Crocus powder, or even talcum powder at times, will suffice to gain the necessary proper seating if the needle has not worn excessively. Only inspection can determine this. Only inspection can determine this.

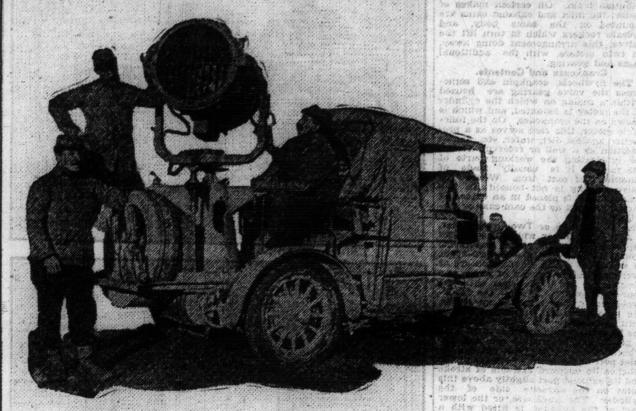

If after the seating has been corrected flooding still persists, the trouble may be due to the valve needle

sticking. Sometimes in the cheaper forms of carburetors the hole in the forms of carburetors the noise in the float chamber cover is not concentric with the needle valve seat, and the needle binds, preventing its free working. Enlargeing the hole in the cover is the easiest roadside cure for this. Then, again, a persistent case of flooding may be due to a leaky float or one that has become gasoline-logged. Many carburetor floats are made of thin metal, soldered together at the joints. The seams start or wear and a leak in the float results. To test for a leaky float, remove it and shake it near the ear; if there is gasoline inside the float will make itself heard.

Not all carburetor floats are made of metal. A good proportion of them are floated to the car steps should be taken to add one as soon as possible, as much trouble may be saved by so doing.

Not all carburetor floats are made of metal. A good proportion of them are made of cork so treated that they will not readily become gasoline-logged. Even at that, cork cannot be considered exactly the best material for the purpose, because its buoyancy varies. A cork float from constant use becomes logged to a greater or less extent, and its buoyancy decreases accordingly. On the other hand, if it has not been in

use for some time and is left dry the protecting varnish may crack and chip off, not only causing the float to become readily logged, but also causing flooding, due to particles of varnish finding their way on to the needle valve seat. It is wise to look over the carburger float once the a while to see carburetor float once in a while to see whether it needs attention. Watch the operating mechanism, too,

or it is necessary that the toggle levers, and in fact all mechanism which makes up your carburetor, should work freely, so that none of the moving parts bind or jam. There is also a possibility that flooding will result if the carburetor happens to be one of delicate de-Enormous Demand Exceeds the Mammoth Production of the Automobile Industry,

General Increase in the Price of Motor Cars Will Take Place Before Mid-Summer?

be the cause, altho this is not always the case. The first thing to do is to set if the gasoline is turned on full, if ANUFACTURERS of automobile MANUFACTURERS of automobiles see no material relief in sight for the near future. In spite of the freight car situation making it difficult to ship cars, the rim situation brought about thru the machination of L. H. Periman of New York, and his Periman Rim Corporation, and the ever-increasing cost of materials, the manufacturers are continuing to make record-breaking strides in production. In one way and mother all difficulties have thus far been overcome. Whether the makers are been overcome. Whether the makers are clearing a profit is another question. There have been a considerable number of price increases within the last fortnight, but prediction is freely made that by July 1 the price increase must be general all along the line. It is unfortunate, for the manufacturer, that this chormous demand for cars should come at a time when the price of materials makes profit sharing a great big question of doubt.

The indications are that the factories will soon have marketed every car that can be made for 1916, and that the demand will be for many thousands more than can possibly be manufactured. Many factories have reported an increase of daily outputs which amount oftentimes to 25 per cent. The demand has been for more, but lack of material has held back greater increases.

Four-cylinder, six-cylinder, eight-cylinder and twelve-cylinder cars of every price share in the popular favor, and the question of cylinders does not seem to enter into the discussion at all as the manufacturers of cars, no matter what the style of the engine, all make practically the same report. The demand is for more cars than they can make.

The records broken in January and

make.

The records broken in January and February for the number of freight cars used by the manufacturers will be broken for March, and the heaviest shipping times of the year in the past have been during the spring months. It is going to be more than ever a question of freight cars in the future, and the traffic department of the National Automobile Chamber of Commerce and of the Detroit Board of Commerce are both making every possible endeavor to solve the difficulties and to pave the way for a sufficient number of freight cars to take care of the large increases of output and of heavier shippings during April and May. The situation in shipping has been slightly clarified by the removal of many freight embargoes to points in the east, which in the past have been almost totally unable to secure cars for winter delivery.

choke up in time either with dust or with water, and starving may be traced to a chokage of the filter. There is also a possibility of small passages in the carburetor being filled with sediment, and in order to take time by the forelock it is advisable that these be cleaned out from time to time to prevent having to attend to the matter on the road, when condition may be inconvenient. Choked Jet-The Remedy

Choked Jet—The Remedy

The most frequent trouble in regard to starving is due to a choked jet, a particle of dust or dirt having become lodged in the tiny passage. If this has occurred the jet should be removed for cleaning purposes, unless perhaps there is provision for the passing of a fine wire thru the jet. It is not always necessary to dismantle a carburetor to clear the jet, but rapid acceleration of the engine and holding it for a second or two at high speed, then suddenly closing the air intake, and at the same time opening the throttle, causes a sharp suction on the jet that may draw out the obstruction. If this does not suffice, use the thin wire. Do not use a hard instrument, such as a fine awl or a needle, for this operation. Manipulation with these tools is liable to cause two things. The needle may break off in the jet and leave you in a worse

in the jet and leave you in a worse state than before, while the awl will enlarge the opening of the jet and the entire balance of the carburetor will be upset.

Many foolish mistakes can be made in attempting to diagnose carburetor troubles. These should not occur, since there are really only two requirements necessary for one to see quirements necessary for one to as-certain the difficulty. They are a good knowledge of the particular carburstor used and common, ordinary horse sense. If a carburetor floods it cannot possibly be due to a choked gasoline pipe; similarly if the carburetor is starved the needle valve cannot want

Now America's Standard Warning Signal

Warning Signal

The commanding blast of the Stewart Warning Signal is now familiar to pretty nearly every American.

You hear it in the west-over all the mountains and prairies; you hear it in the south-in the cotton belt and around the ranch houses; you hear it in the north—penetrating through the great forests, along rivers, streams and the great lakes; you hear it on Fifth Avenue, New York, as it makes the surging crowds stop, look and listen. In short, you hear it everywhere.

The Stewart Warning Signal was the last to enter the field and now stands first in sales.

The hand operated Stewart costs but \$4,75-the motor driven

No others are better, although all others cost more.

Get a Stewart for your car.

Interesting Happenings In the Motorcycle World

Chapter 1.—The Motor. Chapter 1.—The Moter.

MOTORS used on motorcycles, with but few exceptions, are internal combustion engines working on the four-stroke cycle. An internal-combustion motor is one in which the mechanical energy is obtained directly by burning the fuel inside the cylinder of the motor, while an external combustion motor; has the fuel burned separately in another cylinder or vessel and then uses it in the motor cylinder. An example of such a motor is the steam engine, in which the fuel is used to generate steam in a boiler by its heat, the resulting steam being used in the cylinder of the engine.

The Internal Combustion Meter.

The Internal Combustion Motor.

When the fuel is used in an internal combustion motor, it is sent in in the combustion motor, it is sent in in the form of a mixture of gas, and air, and exploded by an electric spark to generate the "power" necessary to operate the motor. This explosion causes a rapid expansion of the mixture, exerting a force upon a piston fitting close within the cylinder. As this piston is connected to a crank and shaft by means of a connecting-rod or pitman, the energy generated by the explosion and expansion of the mixture is converted into a rotary motion of the shaft. Heavy flywheels, fixed to the shaft, acquire momentum from the downward motion of the piston and force it backward, when the burned mixture is exhausted thru a "port" opened by mechanical means. The continued momentum of the flywheels again draws the piston downward, and opened by mechanical mesins. The continued momentum of the flywheels again draws the piston downward, and another port is opened, thru which a fresh charge of mixture is drawn into the cylinder. This downward motion is again followed by another upward one, during which the new charge is compressed into a small space called the "combustion chamber." The upward and downward, or inward and cutward motions of the piston cause a continuous running of the motor, and are called its "cycle."

As the fuel used in such motors is a mixture of gas and air, they are called gas engines, and the source from which the gas is derived gives them a distinctive name. Thus a motor in which the gas is derived from gasoline is called a gasoline motor. As gasoline is used almost invariably as fuel for motorcycles and automobiles, motors fitted in these vehicles are more generally known by the latter name. Gasoline motors are of either the fourstroke or two-stroke type.

The Four-Stroke Cycle.

The four-stroke cycle, or four-cycle, as it is generally called, gives one power stroke in four, or one impulse to every two revolutions of the flywheels. As the remaining three strokes are non-power ones, the flywheels must be

every two revolutions of the flywheels. As the remaining three strokes are non-power ones, the flywheels must be relatively heavy to acquire sufficient momentum to carry the motor over until the next power impulse. The order of stroke is: admission, compression, power, exhaustion.

(a) Admission stroke. The piston is at the top of the cylinder and commences to descend under the momentum of the flywheels. It creates a vacuum in the cylinder, and the outside (atmospheric) air rushing thru a device for mixing the air and gas (the carburger), causes the mixture to device for mixing the air and gas carbureter), causes the mixture

valve, and in the second, a mechanical inlet valve, as it is mechanically operated, usually by means of a cam acting upon the end of its stem. When

operated, usually by means of a cam acting upon the end of its stem. When the piston has reached its lowest position, the vacuum ceases and the cylinder is filled with mixture. The inlet valve is then closed; if automatic, because there is no longer any suction to keep it open; or the cam has been withdrawn from the end of the valve stem, and a spring causes the mechanical inlet valve to close.

(b) Compression stroke. The piston starts to ascend under the influence of the still-revolving flywheels. If the gas was fired during the admission stroke the explosion would be weak and without power, hence it is necessary to compress it to get a high-pressure explosion. The piston, rising, compresses the gas contents of the cylinder into the small space at the top known as the combustion chamber. This compression continues until the piston has risen or moved upward to the limit of its motion, called the dead centre.

(c) Power or explosion stroke. At the instant the piston reaches the dead centre an electric spark jumps between two points on a device (spark plug), fitted in the combustion chamber. As the piston reaches a point a trifle past the centre on the succeeding stroke, the mixture which has been ignited by the spark explodes, forcing the piston downwards until it reaches the lower limit of its stroke. The stroke gives increased momentum to the flywheels and also furnishes the driving power.

(d) Exhaust stroke. The piston as-

the flywheels and also furnishes the driving power.

(d) Exhaust stroke. The piston ascends under the newly acquired momentum of the flywheels. At the beginning of this stroke, a cam driven like the cam operating the mechanical inlet valve, from the motor shaft, lifts the exhaust valve and holds it open until the piston reaches its upper dead centre again. The burnt inixture is thus swept out of the cylinder and combustion chamber so that the motor will be ready to draw in the next fresh charge of mixture. With this stroke, the four strokes of the "cycle" are completed. These four strokes are repeated in the order given as long as the motor runs.

Distribution Gearing.

As the inlet and exhaust valves are opened only at every other stroke, it is necessary to fit gearing to accomplish this, at the proper times. A gear fitted on the motor shaft would revolve once every revolution of the latter; hence this shaft gear is meshed with another in the contract of the cycle.

every revolution of the latter; hence this shaft gear is meshed with another for each cam, of twice the number of

The cams themselves are steel pieces in the segment of a circle and have a double duty. They raise or lower the valve and keep it open for the required period. The side faces attend to the litting and lowering and the top face or profile determines by its length the period of time during which the valve is to remain open or lifted. Cams act during their rotation in connection with their reason and are consecutive. device for mixing the air and gas (the during their rotation in connection carbureter), causes the mixture to enter the cylinder and fill the vacuum. The admission of this mixture is thru an inlet valve, opened either by the suction of the descending piston or by mechanical means. In the first case, the valve is called an automatic inlet

before, there being two distribution trains. On four cylinder metors, the cams are mounted on long shatfs, inlets on one and exhausts on the other, and each shaft is driven by the distribution train. On certain makes of motor, the inlet and exhaust cams are mounted on the same body, and operate rockers which in turn lift the valves, this arrangement doing away, on twin motors, with the additional cams and gearing.

Crankcase and Contents.

The flywheels, crankpin and sometimes the valve gearing are housed within a casing on which the cylinder of the motor is mounted, and which is known as the crankcase. On the four-cycle motor, this case serves as a protection against dirt, water, etc., and in addition as a well or reservoir for oil for histographs.

addition as a well or reservoir for oil for lubricating the working parts of the motor. It is usually made of aluminum or cast iron. Where the valve gearing is not housed in the crankcase, it is placed in an extension therete known as the cam case or dis-

tribution case.
The Two-Stroke or Two-Cycle Motor
A type of motor which has severa
representatives in the motorcycle
world is the two-stroke or two-cycle world is the two-streke or two-cycle, in which the power impulse occurs at every revolution instead of every two revolutions, as is the case with the four-cycle motor. Unlike the four-cycle motor, this type has no valves, the admission and exhaustion being thru ports uncovered by the motion of the piston. Such a motor is fitted with a piston and connecting rod, and flywheels like the other type, but has the inlet port at the point where the piston reaches its outward extreme of stroke and its exhaust port slightly above this and its exhaust port slightly above this point on the opposite side of the cylinder. The crankcase, or the lower cylinder. The crankcase, or the lower part of the cylinder, is fitted with a valve communicating with the fuel-mixing device and another which communicates with the cylinder inlet port by means of a passage known as a transfer passage. On the head of the piston is a deflecting plate to prevent the burned gases from igniting the fresh charge of mixture as it enters the cylinder.

the cylinder.
The strokes of a two-cycle motor are as follows: as follows:

(a) Downward stroke. As the charge is exploded by the spark from the points of the spark plug, the piston descends. Moving downward toward its limit of stroke it first uncovers the exhaust port, out of which the burnt charge passes to the muffler. Still descending to its limit it finally uncovers the inlet port, when the fresh mixture enters, passing over the deflecting plate and assisting in sweeping the cylinder free from the burnt charge. It is also deflected upward by the plate to help fill the cylinder quickly.

While the piston descends it is compressing the fresh charge in the crankcase, so that when the piston uncovers the transfer port, this partly-compressed mixture will flow quickly its the available.

this shaft gear is messive.

for each cam, of twice the number of teeth. This train of gears has the result of rotating the cams but once in every two revolutions, which gives the desired time of operation, i. e. every other stroke. This gearing is known as the valve-gearing or distribution that in the crankease, upon which the inlet port opens, and a fresh charge of mixture is sucked in. On reaching the dead centre the spark on the power-part compression or first stroke. This sequence is repeated as long as the motor runs.

From the above it will be seen that the cycle is completed in two strokes, hence the name two-cycle or twostroke cycle.

esting winter motorcycle pictures contributed by Ed. Drier, an en-thusiastic driver of a Powerplus Indian and sidecar. Mr. Drier has driven all winter over the worst kind of roads and even the deep snow did not stop him and his powerful outfit.

particularly. The ordinary twin has its cylinders at an angle less than 180 degs. from each other, thus having twice as many power impulses per four strokes of the motor as a single, and with the same small crankcase The usual angle is 45 degs., but there are well known examples of 42deg., 50-deg. and 90-deg. motors in use. The four-cylinder motor is fitted lengthwise in the frame of the muchino and has a four-throw crankshaft with the two ends and the two throws together (360 degs.), while the inner and outer pairs inner are 180 degs, apart. The two-cylinder opposed, rarely seen in this country, has the cylinders horizontally opposed on opposite sides of the crankcase and cylinder vertical has both connecting

The question of balance is a comolicated one, but as regards running balance, the types stand in the following order: Four-cylinder, two-cylinder opposed, two-cylinder vertical, 90-deg. twin, 50-deg. twin, 45 and 42-deg. twin, single cylinder. The single two-stroke motor ranks with the two-

stroke motors; the two-stroke motor is

cylinder vertical in running balance.

Separable Head Construction.

Most motors have the cylinder and cylinder head in one piece, while the remainder have the head separate from the cylinder. In the latter case the joint between the head and cylinder is a ground one. Cylinders so constructed are known as separable head cylin-

Piston Rings.

To ensure gas-tightness of the piston, it is provided with rings fitting in grooves in the circumference and bearing against the walls of the cylinder. The rings are usually three in number, all near the head of the number, all near the head of the piston. Some motors have a ring near the tail or lower part, as an additional safeguard against leakage of the explosive charge past the piston, and the arrangement of the rings is various when this construction is employed. The two rings may be near the head or there may be three rings at the head and a fourth near the tail. These rings, being of cast iron, are very brittle and care must be employed in putting them being of cast iron, are very brittle and care mist be employed in putting them in place or taking them off the piston. They are slotted to permit this being done. When the ring is removed from the piston, it will be seen to have the finner circumference eccentric to the outer one ond the slot cut in the thinnest section. This allows the ring to expand considerably under the heat of the successive explosions and fit closely to the cylinder walls at all times. The proper way to remove a piston ring from the piston is as follows:

Carefully open the ends of the ring ring from the piston is as follows:
Carefully open the ends of the ring by means of a pair of thin nosed pliers or a like tool. When the ring is thus slightly expanded, a narrow strip of very thin tin or brass should be pushed thru the opening and carefully worked around to the opposite side of the slot. Open the ring a trifle more and insert additional strips near the ends. The ring can then be worked off easily with little chance of breakage, which would be the case if the ring were expanded much larger than the piston diameter.

The proper way to remove a piston is as follows:

Power, I take it that he must consider every other machine "dead easy," else why should he particularize as he does.

If my surmise is correct it would afford the writer and the rest of the voys here much pleasure to have Mr.

Porter and his Reading Standard come up to Hamilton in the near future (say make the with the rider of another well known make of machine (which I don't mind mentioning is likewise of American manufacture). And just to make the matter interesting as a sporting why should he particularize as he does.

If my surmise is correct it would afford the writer and the rest of the vice the with pleasure to have Mr.

Porter and his Reading Standard come up to Hamilton in the near future (say make the with the rider of another well known make of machine "dead easy," else why should he particularize as he does.

If my surmise is correct it would afford the writer and the rest of the vice the with pleasure to have Mr.

Porter and his Reading Standard come up to Hamilton in the near future (say make the with the rider of another well known make of machine "dead easy," else why should he particularize as he does.

If my surmise is correct it would afford the writer and the rest of the witer and the

ring can then be worked off easily with little chance of breakage, which would be the case if the ring were expanded much larger than the piston diameter. It is a good plan to mark each ring for its own groove and, where the rings are not pinned from sliding around, to mark the piston where the ends of the rings should come. Where three rings are used, the slots should be 120 degs, apart; where two only are used, the slots should be opposite each other, and not on the same side of the piston. In replacing a ring, proceed in the reverse manner from that given above. Putting Piston in Cylinder.

In putting a piston in its cylinder, it is usual to contract the rings in their grooves so that the cylinder can be slipped over the piston. The rings may be tied with strong twine until they are flush with the outside of the piston, and as the cylinder is slipped over it pushes down on the twine holding the top ring and releases the ring, which springs outward to fit the cylinder walls. A continued motion will push clear all the twine can be removed. Care must be taken that the twine holds the ring in its groove until pushed down by the cylinder lower edge as should a ring spring out it is likely to be broken with the weight of the cylinder on it. This is especially true on the larger single-cylinder motors; on the smaller cylinders, the fingers only need be employed to contract the rings.

Piston rings should fit in the

When a new ring is found too tight, ! the edges on a sheet of 00-emery clot fastened to a board planed perfectly fiat. The ring should be rubbed gently fiat. The ring should be rubbed gently to and fro with a slight downward pressure. The pins used in piston grooves for pinning are very short and are threaded at one end to fit into a tapped hole in the groove. The rings each have a small hole at one end which fits over the pin. Care must be taken to have the pins below the piston surface, as they will otherwise score the cylinder, and necessitate reboring. The pins should be located with relation to each other, as explained in the paragraph on removing piston rings.

paragraph on removing piston rings.

Connecting Rod.

The connecting rod bears the greatremedy. The end of the rod which attaches to the piston is called the small-end, and there is a bearing in the rod end that works on a pin in the piston, known as the wristpin. This bearing takes its name from the pin

bearing takes its name from the pin and is called the small-end bearing.

Flywheels.

The flywheels are used to carry the motor over the tille strokes, admission, compression, and exhaustion on the four-cycle type. They serve to counteract the speed fluctuations, and are quite heavy the greater powering of the quite heavy, the greater portion of the weight being in the rims. On both single and twin motors, the flywheels are pored or counter-weighted to assist in the balance of the motor, but on the four-cylinder motors, they serve to counteract the speed fluctuations only.

The Crankcase.

The crankcase is of aluminum or cast iron, and generally suffers only from cracks due to falls or blows, or its function is to protect the cranks and bearings from dirt and to form a bath of oil into which the big-ends of the connecting-rods dip.-The Motorcycle Manual.

A Challenge From Hamilton.
The following letter and challenge is self explanatory, and we hope a good contest will materialize:
Hamilton, April 20, 1916. Hamilton, April 20, 1916.
Editor World:—In the motorcyclingnotes recently published in your widely read journal, I understand that Mr.
W. J. Forter, of Brunswick avenue, is W. J. Forter, of Brunswick avenue, is reported as having made the claim that he now has the agency for a machine which "will pull any Matchless backwards." Now, inasmuch as Mr. Porter, when agent for "Matchless" motorcycles used to contend that said machine had all other motorcycles backed off the map as regards pulling said machine had all other motorcycles backed off the map as regards pulling power, I take it that he must consider every other machine "dead easy," else why should he particularize as he does. If my surmise is correct it would afford the writer and the rest of the hove here much pleasure to have Mere.

hefore the cylinder is fitted down on the flange the twine can be removed. Care must be taken that the twine holds the ring in its groove until pushed down by the cylinder lower edge, as should a ring spring out it is likely to be broken with the weight of the cylinder on it. This is especially true on the larger single-cylinder motors; on the smaller cylinders, the fingers only need be employed to contract the rings.

Fit of Rings.

Piston rings should fit in the grooves so that they can be walked or revolved around the circumference of the piston and rotated on their own axes without binding at any point.

7. Best three out of five heats shall decide winner.

8. Referee shall be chosen by mutual consent, prior to contest.

9. "Matchiess" machine shall have the option of a "pull off" with winner. The above challenge is not confined to Mr. Porter, but is open to any or all motorcyclists of the Queen City who may feel disposed; so bring along your Reading-Standards, Indians, Excelsiors, Harley-Davidsons, Hendersons, etc., and we will have a bunch of fun anyway. The more the merrier!—but remember Bill Porter has first call.

J. J. Cutler,
For Hamilton Motorcycle Club, Room 7, Federal Life, Hamilton.

More Than 35,000 Saxon Motor Cars

will be shipped during 1916

Little more than 2 years ago-February 1914— the first SAXON Motor Car was built.

Today there are more than 40,000 satisfied owners driving SAXONS

This year — 1916 — over 35,000 signed orders have been already received for SAXON Motor Cars.

Is not this unequalled record of instantaneous success significant of something more than ordinary - everyday - value in this

Where, in any other motor car selling at the price of this SAXON SIX, will you find in its mechanism such a combination of known

And surely known quality is a matter of vital importance to you, more particularly, in the selection of a motor car—a power-driven vehicle.

Compare the Rear Axle - the Front Axle—the Bearings and the High Speed Six Cylinder Motor of this SAXON SIX with any high-priced motor car you know of.

Refer to any experienced motorist or to any first class mechanic with whom you may be acquainted and let them tell you, that no matter what price you are prepared to pay for your car, you cannot buy better quality, more dependable quality, more lasting quality than has been built into this SAXON SIX.

But come and see this great Motor Car that offers you such extraordinary value. Note its Beautiful, Yacht-line, Piano-finish Body. See how easily it rocks upon its Vanadium Steel Cantilever Springs. Lift the hood and view its Powerful, Six-Cylindered, Clean-cut Motor, noting particularly the accessibility of its working parts.

Examine this SAXON SIX from stem to stern-inside and out.

Now take the wheel in your own hands and feel how easily it steers its course - how short it turns. Then test it on the roughest roads and up the steepest hills. Convince yourself, by actual experience, that a child could operate the silent, easy Gear Shift of a SAXON. Let the car slow down to a snail's pace in high gear and observe how quickly it accelerates with a gradual opening of the throttle to 20, 30, 40, 50 and 60 miles an hour, if you wish.

Then you will be convinced, as have 40,000 other SAXON owners, that this is your SIX.

Why not arrange to take your demonstration today?

conditions, however, soon adjusted themselves and the result was that young men, realizing the possibilities of the new occupation, drilled themselves in the mechanical side of motors and shortly found openings in the field of truck driving when the old teamsters were put to work along other lines as the commercial cars were introduced.

Artemus Ward, Jr., President of the King Motor Car Co., Discusses Spring Suspension.

riding a pleasure. While there are several types of springs there seems to be the cantilever spring and the semi-elliptic for the rear scring sus-

pension on motorcars.

For pleasure cars the types of rear springs used have been the semi-elliptic, the three-quarter elliptic, the full elliptic, platform and cantilever

full elliptic, platform and cantilever type.

In nearly all cases, except for the very light and small cars, it is generally conceded that the semi-elliptic type of spring for the front springs are the most satisfactory, the reason for this being the fact that the front end of a motor car does not want what spring engineers term a soft ride. There must be something steady there to hold the car on the road and prevent ducking By using a long semi-elliptic spring in the rear of the car a soft ride can be obtained.

The full elliptic has had its day.

The Walkerville Factories Are Taxed to Capacity in Endeavor to Meet Demand for Cars.

PREVIOUS RECORDS BROKEN

Plant Busier During Dullest Period This Year Than During Busiest Period Last Year.

F the motor car outlook in Canada for 1916 may be gauged by the situation at the great Studebaker factories in Walkerville, this is desfactories in Walkerville, this is destined to be a banner year both in production and sales of automobiles.

Word has just reached here that not only is the Studebaker plant working full force in the endeavor to meet the demand for the series 17 Studebaker cars, but further information is to the effect that more men have been kept at work in the Walkerville factory during the dullest period than were on the job last year during the busiest time. The automobile industry, from every indication, is at the threshold of the largest year it has ever experienced. During the winter months, which ordinarily are considered light months by comparison with some other seasons of

inarily are considered light months by comparison with some other seasons of the year, the Studebaker output was the largest in Studebaker history. More cars were being produced steadily than at the busiest time last year. Even with the herculean efforts being extended at Walkerville to take care of the demand for the Studebaker automobiles, it is declared certain that the capacity output at these factories will be inadequate this year, and that those who are delaying the purchase

will be inadequate this year, and that those who are delaying the purchase of Studebakers will either have to wait or be disappointed entirely.

"The output of Studebaker cars has been more than doubled for 1916," says J. E. Grady, Canadian sales managon of the Studebaker Corporation. "We surely thought that by producing twice as many cars this year as last year we would be able to meet the demand. But the way orders are coming in now from all parts of the country, it looks doubtful if there will be enough Studebakers to go around."

UNIFORM MARKERS FOR

There Will be Eight Signs to Every Mile and Two at Every Turn Thruout Route.

PLAN IS WIDELY APPROVED

Coast to Coast in Hands of Expert Crews.

C. OSTERMANN, field secretary of the Lincoln Highway Association, has just announced plans for repainting and standardizing the road markers on the route of the Lincoln Highway all across the country. This important step will be undertaken in the immediate future and will be of the greatest benefit to the tourlists making the cross-country trip. It is planned to send a trained crew

Automobile Owners, Attention!

Car owners have been disappointed so often with gasoline saving devices that the hardest part is to get a "compensating vapor plug" on a car. But once it is on we have a different story.

You will never know the Power, Speed and Economy there really is in that car you are driving until you equip it with a "COMPENSATING VAPOR PLUG."

Tire Mileage Varies Directly With Care---Timely Pointers

SUNDAY MORNING

You Will Save the Difference in the Cost of Gasoline by Keeping Tires Fully Infla ted, Avoiding Car Tracks and Bad Roads and by Promp tly Repairing Small Cuts.

The fact that the individual care which a tire receives at the hands of its owner and the individual conditions under which it is operated have an enormous bearing on the life of the tire is most strikingly illustrated in the decision of a number of the large tire manufacturers to discontinue the mileage guarantee of 3500 or 5000 miles, as the case may be, and base their adjustment upon the actual condition of the tire and the service which it has given rather than the actual number of miles it has given.

The Combination Rubber Manufacturing Company has no set time or period that eliminates the adjustments of the tires. The looks of the tires when returned for adjustment is the criterion upon which adjustments are made. There are a number of other tire manufacturers whose adjustments are made not on the basis of the actual mileage as a set figure, but upon the condition of use and the service it has given.

On the other hand, there is a large proportion of tire makers who make

In explaining this method let us quote the Goodyear Tire and Rubber Company upon this question. A statement of this tiremaker is as follows: - "Adjustments on the different types of our tires are based on the types of our tires are based on the merits of each particular case rather than ea any definite tire or mileago basis, the idea being to handle each adjustment to the satisfaction of the customer. If a tire is presented to us and if it isn't perfect in the least we adjust it. The basis on which we adjust depends on various things, such as the care with which it was used, the service which still remains in it, etc.

Proper Care Rewarded

"Obviously a motorist 'who

least \$500 or \$5000 miles of usage from first quality tires of standard make puncture their bank accounts needlessly, according to Darwin S. Hatch, who reports on an investigation of the subject in Motor Age.

Physicians say that practically every ailment of the human body can be remedled if correctly diagnosed and the treatment begun before the trouble has been allowed to progress too far. Tire treatment must be carried out on the same basis. The diagnoses of ailments of casings is not so difficult a matter as that of the human body, the determination of whether or not the tire is worth the expenditure of money to repair in the case of serious damage requires so very thore inspection.

The chief trouble with tires that are turned back to the itre company for adjustment or turned over to a tire repairman is that the owner usually waits until tire inspection becomes a post mortem examination rather than a clinio. No more can be done for a tire after its heart, the fabric, is gone than can be accomplished toward saving a man whose heart has stopped beating—and there is no pulmotor to resuscitate the defunct tires. If a pump has been used to give them more air while their cryans still were rein operation, there would be a greater number of them still on the road.

Thermal Efficiency

The Combination Rubber Manufact—is an an examination rather than a clinio. No more can be done for a present of the manufactures and there is no pulmotor to resuscitate the defunct tires. If a pump has been used to give them more air while their cryans still were remained and the reaction of the more air while their cryans still were remained and the reacting and the recombination. The more air while their cryans still were remained and the results of the limit of the more air while their cryans still were remained to the individual treatment of the minute of the minute

Regarding Adjustments

JESS WILLARD CHOOSES "EIGHT"

Just prior to the recent championship battle in New York, Jess Willard placed an order with the Cole factory for one of their new Model 860 Cole Eight's. This is the second Cole Eight that Mr. Willard has had. His wife is at present driving his first car. Mr. Willard will be entertained by the athletes of Chicago within a few days and at the time of the receptor. tion the car will be turned over to him. In the picture Mr. Willard is seen at the extreme left seated in the tonneau. He is handing a check for his car to R. P. Henderson of the Cole Motor Car Company. Next to Mr. Willard is his secretary, and in the front seat, facing outward, is his manager, Tom E. Jones.

character of the roads upon which the tires are used has a distinct bearing upon their life and thus upon the tire

upkeep cost to the owner. Practically all of the manufacturers the condition of use and the service it has given.

On the other hand, there is a large proportion of tire makers who make adjustments upon a definite mileage of roads over which they are used is considered it so only incidental as depairs, but the care which has been given the tires and any unusual conditions of use are taken into considera. basis, but the care which has been given the tires and any unusual conditions of use are taken into consideration just as surely under this plan as they are under the plan which does not consider a definite number of miles various localities nature of the roads in various localities naturally will affect the individual adjustments to a great-

anteed to give 3500 miles of service without puncture, and if punctured at less than 3500 miles by any object which penetrates the inner tube a refund is made, varying from \$6 for a three inch tire to \$14 for a five and one-half inch tire, and, in addition, the tire is repaired free of charge. The most common mileage adjustment is on the basis of 3500 miles, such as Goodrich, Usco, Nassau, etc., but there is which are driven on smooth of the same to their full length, kept his arms close to his body, assumed an attitude of such contracts. It is the experience of most tire

that the principal determining factor in the life of a tire is the frequency and degree of violence with which these obstacles are encountered.

Poor roads, no matter what their

construction or surface materials, are a shortener of tire life: for instance, the Empire tires in the northern part of this country show a very much greater mileage than they do in the southern territory, where the roads as a whole are poor.

Keep Tires Fully Inflated

Go and talk to a tire man about troubles and ninety-nine times out of a hundred his first words will be, "Keep them pumped up." According to all the customs of tire writing, that sentence should be emblazoned in glaring capitals at the top of the first page, for tire inflation is the keynote of tire service. This subject has been enlarged upon so frequently that it is only necessary to reiterate tire makers' injunctions to keep the inflation pressure up to that recommended by them.

Just a hint here. Do not try to make the tire men believe that you have not been running with soft tires if the contrary is the case for these

the contrary is the case, for they can read the history of the tire from its appearance more easily than a physiognomist can tell your own life's

physiognomist can tell your own life's history from your face.

"See here," says the tire man, laying his hand on one casing among the dozens on hangers glong one wall of the branch's service department. "See this casing? Well, the man that brought this in said that it had only one thousand miles service and that it was always pumped up to eight-five pounds. Now either the said that in their effort to obliterate all factors that might serve to keep alive the Christian spirit, there is today no bell to be found in the clapping of hands being the instrument used by the Mussulman as the signal of call to prayer. At Easter in a special manner the bell seems to peal out its hallelujahs and praise.

Easter comes after the forty days of

"See this scoring all the way around where the rim strikes? Rim cut tires too flat. This ditch on one side means that he has been running in the car tracks. Notice this little cut here on the tread? Now, then, I'll open it up so that you see the inside. The fabric is broken clean thru, but you can't see much damage on the outside.

as a permanent repair.

Hunter's green sweaters are very popular this season. One is trimmed with a band around the bottom and has cuffs, collar and belt of white corduroy. Still another has a trimming of Scotch plaid, woven like a border at the edges, while the belt is woven to match. Another has a border of woven banding in black, with a white polka dot. This sweater is double, having a white lining.

tires which are driven on smooth streets or boulevards naturally will give considerably greater mileage than those used on rough streets or on sharp rock roads.

Of course the state of the road in regard to loose objects and surface holes has considerable bearing on the ultimate life of the tire; in fact, the pneumatic tire's reason for existence lies in its ability to absorb the shocks consequent upon irregularities in the road surface, whatever their nature, and it follows, as a matter of course, that the principal determining factor

peatedly impressively.

Then, breaking off abruptly, he cried out in a loud voice, looking down

cried out in a loud voice, looking down at his comrade on the ground:

"Lazarus, come forth."

"At these words," the story continues, "the child who impersonated Lazarus joyously arose and, taking an empty basket that was held out to him by one of his companions, he passed it around among the group of people who had gathered as spectators."

Several dropped into the basket col-cred eggs, such as are used at Easter as gifts in token of good will. One or two guests of the humble inn donated small coin, and presently the children ran blithely away, to repeat their little sacred drama, which was in no wise irreverantly meant, before other houses of the village, and to collect more gaily tinted eggs and, sometimes, perchance, a small alms from a well-to-do vil-

lager or generous stranger.
Bells, too, seem to have a particular connection with the Easter season, their ringing proclaiming that the penitential season of Lent is at an end and that the time for rejoicing is now with us. The significance of the bell and what it may interpret to the Christian mind seems to have been more than assimilated by the Moslem under-standing, for it is said that in their ef-

one thousand miles service and that it was always pumped up to eighty-five pounds. Now, altho we did not tell him so, we know he was not telling the truth. Wily, you can see for yourself! That tread has worn so that the outer edges are rounded: the outside has been on the road as much, nearly, as the middle of the tread. If the tire had been pumped up enough that worn band would have been less than two inches wide and the outer edges of these knobs would have been sharp. He couldn't have worn the casings away that much in one thousand miles, not even on stone roads.

Tire Tells Story

"See this scoring all the way around where the rim strikes? Rim cut tires too flat. This ditch on one side means that he has been running in the car tracks. Notice this little cut the day par excellence for ball games and attendance at the theatre. Truly, strange things come about with the

here on the tread? Now, then, I'll open it up so that you see the inside. The fabric is broken clean thru, but you can't see much damage on the outside.

"That was nothing but a stone bruise that chipped a very small chunk out of the tread, but at the same time broke or weakened some of the fibres in the fabric. The owner paid no attention to it—kept on running, probably half flat, till the constant flexion of the unprotected fabric caused the neighboring strands of the fabric to break, till finally it ripped clear across here with a bang, and the owner cussed us for selling him a bum tire. The wonder is that it did not blow out before, "See how the tread has separated from the fabric? Water. All he needed to do was to clean out the cut outside.

And attendance at the theatre. Truly, strange things come about with the passage of time.

Modern life in our great cities has given us the "Easter bonnet" imperative and the "Easter holidays the long-looked-for joy of the schoolboy. Easter has impressed itself in many ways, but in nothing has it marked itself more than in the character it has given the music of the Church, which is the most joyous of the entire year. Solemnity is not forgetten but gladness, faith and hope are expressed in the words of the canticles sung in the beautiful notes of Handel's arrangement of "I Know That My Redeemer Liveth," in the glandeur of Gound's Sanctus and in the hallelujahs that sound from the chancels and lofts of millions of Christian temples.

CHALMERS DOES RECORD BUSINESS

March Sales Eclipse Records Greatest Year's Business Is Confidently Forecasted.

MARCH 31 WAS BIGGEST DAY

Upwards of Four Million Dollars Worth of Cars Were Shipped During March.

OLLOWING the recent announcement of a \$40 rise in the price of Chalmers Six-30 touring cars, Micials of the Chalmers Motor Company have released figures indicating the greatest year's business in the history of the company.

"During the twenty-seven working days of March we shipped cars valued at \$8,865,000," said Paul Smith, vicepresident in charge of the selling division, yesterday.

are a number of tires upon which the mileage guarantee is extended to cover 5000 miles. Among these are the U. S., Afax, Pennsylvania, Victor, the Empire red tire, the National, Standard, Alliance and a number of others. Penna, Kelly-Springfield and Globe would have found the weak spot in tires are guaranteed for 6000 miles. Kelly-Springfield, in Ford sizes, for 7500 miles. Ohio tires carry a 4000 mile guarantee. Wilson's are guaranteed for 10,000 miles. The possibly lost a customer, There are many of these plastic compounds on the market for filling the largest single day's shipment of cars since the organization of the company. Altho we have established new production and sales records in the last twould have been as good as ever. As it is, he has lost a tire and we have possibly lost a customer, There are many of these plastic compounds on the market for filling up small holes and cuts in the tready an assured fact."

There are many of these plastic compounds on the market for filling up small holes and cuts in the tready and sasured fact."

Made Canada With All Canadian Capital

Guaranteed 7000 miles on Small Cars. 6000 miles

on Large

Cars.

We Are Not Afraid

To guarantee our tires for 6000 miles on large cars and 7000 miles on Chevrolets, Fords, Regals, Saxons and all cars using 30 x 3 1/2 tires.

Because

K. & S. TIRES

Are hand made of the highest grade of material which money can buy. This is the reason that our tires give thousands of miles more than we guarantee.

Of Course

We could make a tire with a great deal less trouble and expense, which we could guarantee for 5000 miles, 3500 miles or any stated number of miles that would sell at less money with more profit for us.

That is Not Our Policy

Because we painstakingly build the quality into "K. & S."
Tires so that they will deliver to you thousands of miles' service
with the trouble left out.

Additional Motion Picture News MARGUERITE SNOW IS AT | UNIVERSAL AND GRACE

Well Known Star Featured in "A Popular Star and Her Partner, Corner In Cotton," Metro Francis Ford, Were "Let Out" Production. Last Week.

> The news that Francis Ford and Grace Cunard and the Universal had parted company came as a big surprise parted company came as a big surprise to the manufacturers and the public. There was a rumor that these popular players had "quit" in the middle or the serial story they were producing and appearing in. It seems that they did not "quit," but had trouble with the management, and were given no-tices that their services were no long-

It seems a great pity all round for the severance of connections loses Mr. Ford and Miss Cunard audiences who love them, and the big "U" have lost two very good artists. Whatever the cause which led to the rupture, it is all very regrettable.

PEARL WHITE RUINS GOWN IN "IRON CLAW."

Thousand Dollar Costume Is Not Fit to Wear After Struggle With Villain.

Miss Pearl White, the daring hero-ine who is now starring in "The Iron Claw," the new Pathe serial, has been euqipped with no less than thirty-four gowns, thirteen suits, eleven cloaks and coats, innumerable hats and other accessories costing the Pathe Company \$25,000, a record sum even in these days of extravagantly produced screen plays. Miss White declares she will do better work in "The Iron Claw" than in any of her previous successes. "To be well dressed is half the battle," she says, "and I know I can take care of the other half."

One of the most striking of Miss White's gowns is one of sapphire blue sequins on shaded gren and blue chiffon, bound at the edges with silver ribbon and trimmed with small silver oalls. The skirt is of sequin, finished with an eight-inch flounce of blue net and hemstitched in silver. The bodice Corner in Cotton," at the Hippodrome this week.

GENERAL PERSHING IN DODGE BROTHERS' CAR

Commander-in-Chief of American Expeditionary Force Is Using Dodge Personally.

NEW SHIPS OF THE DESERT

Other Dodge Brothers Motor Car's Were Used to Transport Supplies Pending Arrival of Trucks.

A CCORDING to detailed advices now arriving from the border, Dodge Brothers' motor cars have played a prominent part in the invasion of Mexico in pursuit of Villa.
When General Pershing, led his troops across the border he travelled in a Dodge Brothers' motor car, and four other tourning cars were used in the transportation of supplies. These cars have, of course, been since sup-planted in this work by the big trucks shipped to Mexico but the touring cars are still in use by the army.

partment they have made wonderful records in the desert travel after the Reporting on the performance of the Dodge Brothers' car that carried at steps can be traced in periods of fleeing Mexican bandit.

According to the transportation de-

the Dodge Brothers' car that carried General Pershing on the first advance, an army officer said:

"We had practically to make our own roads and from what the Dodge Brothers' car showed on that trip I believe it could climb a wall. The car went thru mountain passes and over others, where it was necessary for the in not longer to be noted, and the last went thru mountain passes and over places where it was necessary for the

From Bear Creek, Yukon, the Children Are Taken to School in Dawson City by Motor.

OURTEEN miles to school and back, over the frozen Yukon country! Surely this was a terrific handicap to the children of Bear Creek, Yukon territory. But a live wire commissioner suggested that instead of establishing a school of lesser efficiency at Bear Creek, the town should purchase a Ford car and take the children to Dawson City and back each day where they could get a first class schooling at less expense. The plan proved a decided success. In fact, this remarkable car of unlimited utility is fast replacing dog teams for many transportation purposes in the

Every day during the winter school term, the little Ford, undeterred by snow, ice or 60 below zero weather, has carried its load of happy young-sters over the 14-mile round trip to school at Dawson. At times it has taken as many as sixteen or seventeen children safely and quickly to their destination. And they are never late and are much more rarely absent than usual. The Bear Creek Commissioner's splendid plan might well solve the educational problem of many a village in the Dominion.

for the Ford Motor Company with an output of 58,829 cars. Also March 25 saw the biggest day's production in the history of the company, 2,768 cars be-

ing built on that day.

The quantity of material entering into the manufacturing of 58,329 cars reaches figures which are astonishing Blanche Sweet in "The Black List," a Lasky Feature. Designers Turn Attention to Interior Treatment of Bodies

Masters of the Art and Science of Coachmanship Have Done Wonders in Evolving the Modern Superstructure - The Trend in Internal Arrangement and Color Schemes in Closed Cars Make for Sociability, Beauty

ment and been the subjects of so much sales talk that the interior of the car large sum have bodies which depart has been somewhat overlooked. This from the general standard practise in is not because improvement has been going on in this direction,

simply because the trends on the outside of the car were far more radical than they were on the inside.

The car of 1914 could be readily distinguished from that of 1913 by the outside lines. The car of 1916 cannot be so readily distinguished from that of so readily distinguished from that of 1915. The tonneau on the old type of car was much higher than the front compartment, and the result was that the people in the rear had a birdseye view of the surrounding country. Now they are on a level with the driver. This naturally causes a great differ-ence in the exterior appearance of the car. As this change was not made all

places where it was necessary for the engineering corps to blast out a trail before the trucks coming after could get thru at all."

COLLOCI INFO IC MANT

sign should come in.

The tendency in vehicle design always seems to lean toward the straight line. Once we have reached that point it semes to stay stationary as far as the exterior is concerned. The railway coach is a good example of this. Study the pictures of the old-time rail coaches and look at those of today. The cars have lengthened out and the lines have become straight. The freight cars of today are nothing more than rectangular packing cases on wheels, and the picture of the finest jobs have the advantage that they can be of any color desired, that they can be of any color desired, that they can be of any color desired in this way the interior of the car can be decorated in the same sort of color scheme as the rooms in a house.

If you were compelled to have every passenger cars are so nearly the same proposed in the same sort of color scheme as the rooms in a house.

Four-Cylinder Models

forms have attracted so much com-Only the expensive custom jobs or the cars to be found costing quite a a few scattered instances. Not that the straight line bodies of the day would not permit of individuality, but simply because in the rush of big production little time is found for it. The

> corporate what is really the finest in up-to-date carriage work.
>
> If beautiful seating arrangements is to be mentioned on closed cars, the makers of the electrics must be given due credit for breaking away from convention and giving us something that is artistic as well as practical. The circular seating scheme was first to be found in these cars, and it is now setting into the gasoline coupes, road-sters and even, in a few isolated in-stances, into the touring cars. The pas-sengers need not all sit forward in a

straight line—they may be spread around the car so that they can conerse while the car is traveling along. At the same time it is part of the scheme that the passengers should not interfere with the view of the driver. He, or she, must sit slightly in advance of the other passengers so that the outlook is clear to the left and the right, as well as the front. With the glass sides having but little interruption from the framework of the car, the viewpoint is better than from a touring car with the top and side curtains in position. A chummy seating arrangement is possible and the plan works out nicely from all

passenger cars are so nearly the same room in the house decorated with wall paper of the same color, you would be

If that color had to be a gray or brown or black, it would be still more uninteresting. That is the situation with leather. There were a few colors that could be used, but for the wealthy man who has perhaps three or four cars in his garage, it was rather tiresome to interiors of these special jobs, how-ever, merit close attention, as they inhave to depend on colors possible with leather for car decoration. The use of the corded importations solves the problem nicely, as these goods not only have a rich color in themselves, but it is possible to blend them with similar

fabrics of another color.

A great advantage of the cloth upholstery work for the interior of the enclosed car is that the color on the inside can be made to match or blend with the exterior paint work. It is in this blending of interior and exterior decoration that the custom-built car differs from its more commonples. car differs from its more commonplace stock car brother. As far as the car itself goes, it will not give any more service than the less artistically de-corated job, yet there is no doubt that for those who appreciate and can afford beautiful coach work the differ-

ence is worth the price.
Some of the big enclosed cars, such as the Berlines, are fitted up just as luxuriously as a drawing-room. The chairs are spread around to give the utmost in comfort and convenience, and the windows are fitted with silken shades. Light is shed into these travelling parlors by the most beautiful of dome lamps, and the feet rest on rare rugs. The cushioning in the seats of these cars is even made the subject of special study and there are springly. of special study and there are springs inside them which absorb the jar and

limousines of Berlines it is possible to stand on the curb and look over the car. The roof does not seem low from the inside even on these cars, because the floor is so low hung that there is no difference in the interior

Another one of the tendencies to be noted is in connection with the in-strument board. It used to be the practise, even in the finest of the enclosed cars, to place the instruments in the same place as they are mounted on the touring car; that is, across the dash. This is not done on many of the fine custom bodies now. The instruments are placed around the foot of the steering column instead. So that the owner of the car, as well as the chauffeur, will know how fast the car is going, and so that there will be two persons to argue with the policeman instead of one, there is generally an additional speedometer placed in the rear of the car.

The divided front seat tendency which is so noticeable in the touring cars_of this year is carried out quite thoroly in the closed cars. This is quite natural when you stop to think of the trouble of getting out of a finely finished car into a muddy road and back into the car again should it be necessary to shift from the front seat to the rear or vice versa. At the same time, without considering the utility of the scheme, a divided front seat adds to the style of a car.

When there are a number of indi-vidual chairs, the effect is one of comfort and refinement. When you enter a Pullman coach, it is the individual to be transmitted to the body.

The interior of bodies have their tendencies and trends just the same as the exteriors and as the machinery.

One of the late tendencies is the decrease in the execution that the comfort of the Pullman coach, it is the individual seating arrangement that the comfort of the Pullman railcrease in the overall height of the road car is superior to the ordinary closed car. On some of the late model day coach.

The Plants at Walkerville-your guarantee of QUALITY and Quick Service

Studebaker ideals of quality and the GREAT Studebaker plants at Walkerville-these are your guarantees of quality in Studebaker cars. And especially, the Walkerville plants. For they represent one of the most complete automobile manufactories that any country knows—a guarantee not only of quality but of Quick Service.

This new SERIES 17 Studebaker FOUR is the supreme effort of these great factories backed by all of Studebaker's resources. Dollar for dollar of the price, it gives more real, actual VALUE than any other 4-cylinder car on the market—FORTY horse power—room for SEVEN—112-inch. wheelbase - 34 x 4 tires - upholstery of the finest leather - DIVIDED front seats - and scores of other Studebaker refinements that set this new Studebaker in the very forefront of the market.

No man can safely invest a dollar in a car until he knows what Studebaker, one of the industry's leaders, offers. And we urge every man to see this SERIES 17 FOUR—the biggest value that is "Made in Canada."

A New Invention Adds 80% to Motor Efficiency in the

Hudson Super-Six

F you buy a fine car this year there are new facts to consider. Hudson engineers have discovered a new motor principle. Its newness is attested by patent. This principle is applied to a light-weight Six, simple and economical. And it adds 80% to efficiency.

80% LESS WEAR

What we have done is to wipe out vibration— the vibration which caused friction. The Super-Six is the smoothest-running motor ever known.

The result shows in bird-like motion. It shows in endurance. The loss of power through friction in the motor is reduced by 80 per cent.

The Super-Six is identical in size with the former Hudson Light Six.

In old-type motors, that also at its best delivered 42 horse-power. In the Super-Six it delivers 76 horsepower — an increase of 80 per cent.

76 HORSEPOWER

out-performs any other stock car in the world.

This vast reserve power shows in quick response. The car fairly dashes to speed.

It shows in effortless hill-climbing. It shows in flez-fbility, in speed. No situation taxes the Super-Six. It is rarely run at more than half load.

Outrivaled At Sheepshead Bay, under A. A. A. supervision, a 7-passenger uper-Six stock car excelled all

former stock cars in these levts.
100 miles in 80 min., 21.4
sec., averaging 74.67 miles per
hour, with driver and passenger.
75.69 miles in one hour with 75.69 miles in one hour with driver and passenger.
Standing start to 50 miles an hour in 16.2 esc.
During these tests the carwas driven 1350 miles at top capacity, at speed exceeding 70 miles per hour, without discoverable wear on any part.

This is all proved by the performance of the Super-Sia. And you can prove it by a half-All Other Cars

Come and find out what the Super-Six means to you. See the six new luxury bodies. You will then concede that the Hudson Super-Six is the only fine car to consider.

Verdun the Undoing of Germau Imperial Family

Verdun may prove to be the undoing of the German Imperial family. It was expected by the Great General Staff that the attack on the French position would sweep all before it and that the way to Paris would be laid open, even as it was expected that the first treachezous advance thru Belgium would carry all before it and

leave Paris at the mercy of its implacable foe. But the French are a different people today from the French of 1870, and this is one of the things the Great General Staff left out of its calculations. Scarcely anything is so certain to overthrow a man or a nation as conceit. Kipling was rightly inspired when he prayed for humility, "Lest we ferget, Lest we forget!" The Germans forget, and it is doubtful if they have the faculty of remembering. If they remember it is the wrong things. At all events the German attacks on Verdun have wholly failed of their object. Out-generalled, out-manoeuvred, out-soldiered at every turn, the Germans have had to admit that the French are their masters in defence, and they are learning with slow but deadly certainty that defence may be as fatal as attack, and, as at Mons, that retreat is no less mortal than advance. The Germans have paid too dearly for all their gains, and their gains have proven to be empty trophies. The experts regard Verdun as marking the opening of the third phase of the war as the battle of the Marne marked the opening of the second phase. This third phase is a ruinous one. Germany must go on attacking, where there is nothing to be gained by attack and everything to be lost. Germany would like to abandon Verdun, but to do so would be to admit defeat, and dishearten her people and her army. And the proud demands that were heard in the first month of the war have been softened down to the most modest requirements. Germany will not now even ask for her colonies to be returned and she will not require an indemnity from France. The German people have a better peace in store for them than this if they assert their democracy, dismiss their Prussian autocrats, and adopt a form of government more in harmony

y interesting discussion has arisen over the parade of the Irish Guards on St. Patrick's Day, when the King addressed Interesting Discusthe regiment and the Queen distributed the sion Concerning Shamrocks according to the custom set by the Flag of Ireland Queen mother. His Majesty, who presented medals and other honors to members of the regiment, referred to "the unquenchable spirit of the Irish," and the occasion was one of much gratification to all the Irishry. The Duchess of Abercorn raised the

with their relation to European civilization.

question by a letter to The Morning Post that certain flags sold in London and emblazoned with a harp without a crown, were not the proper caper for loyal Irishmen. These flags had been sold for the benefit of the sick and wounded and prisoners of war of the Ulster Division, and it has been understood in Ulster that the harp without the crown is a disloyal emblem. It will be a revelation to many that the exact opposite is the case, and that the use of the crown with the harp is an infringement of the royal prerogative, none but the King having the right to use the growned harp, as it is his own private badge, as his English badge is a growned rose, and his Scottish badge a crowned thistle. The King at ms has given his statement of the case, that the arms, and therefore the fiag of Ireland, is a gold harp with silver strings on a blue ground. The badge of Ireland is a crowned harp, and this badge is "one of the ornaments of His Majesty's State," and like other parts of the King's heraldic insignia, cannot be used for other purposes without his consent. The belief that the harp of Ireland should be surmounted by a crown will therefore have to be abandoned, but so, also, will the erroneous idea that the Irish flag should be of a green color. It has long been the case that St. Patrick's flag is blue, which is the color of the Order of St. Patrick.

. . .

Mental Discipline Training for Commercial Life

An old debate is being revived in educational circles, and a tremendous sensation is promised when the heavy guns of the new educationists are brought to bear on the ancient strongholds of classical learning, pure mathematics, formal grammar, and the tra-

ditional teaching of history. It has been found that men who are trained to use their minds are better fitted for the struggle of life than men not so trained. But it has not been proved that men trained to use their minds in a particular way, to wit, in learning Latin or Greek, are better fitted for the life of a modern man of affairs than the man who has been trained to use his mind in learning Russian or Japanese, or even Esperanto. The boys who are turned out of school after years of mental training at Greek or Latin or some other mental discipline, and who present no whit more of intelligence than the boys who are trained without any of these ancient canons, are an argument which cannot be explained away, and which mere tradition will find itself more and more troubled to confute. Mental discipline communicated by means of Latin and Greek cannot show any better results than mental discipline communicated thru some of the nature school methods, or thru the methods of the technical and manual training methods which are coming into general use in all enlightened communities. It should be evident that if the study of a language like Latin or Greek is an advantage the study of a language like Russian, French or Spanish would furnish similar mental discipline and at the same time an equipment of real value in modern commercial life.

While the United States Secretary of State is telling his people to be calm it is Wilson's Last Notes probable that the President of the United States is farther away from a state of serenity as Frequent as than he has ever been since he assumed his ex-Patti Farewells alted office. There is no doubt in the minds of any American any longer that the torpedoing of the Sussex and other vessels has been deliberate and in open violation of the undertakings of the German government to the government at Washington. No doubt the Germans were convinced that President Wilson had no stomach for a fight, and that even if he had, he had no weapons to fight with. So they flouted him at their pleasure, read his notes with contempt, and

proceeded to give him subject matter for new ones. His positively last notes have been as frequent as Patti farewells. But there is an end to all things and the end of the labors of what Mr. Roosevelt has called the Washington literary correspondence bureau must be nearly in sight. No one will be able to say, should action of a hostile character be taken To quit the noble game! by the Washington government, that there has not been ample provoca-Prizes plucked from land and sea tion, and a high official has been reported as saying that it was desired to have the record so complete that those who read the history of the crisis a hundred years hence would be able to say that the Wilson administration did all it could and went to the limit of endurance to avoid a History will also determine, should a break occur, whether it might not have been more advantageous for humanity had the break occurred somewhat earlier in the bloody struggle. Come on and play the game!

GOOD LUCK, JOHN

CHRONICLES BY THE KHAN

The World Series was Von Kluck, went in to pitch;

He is a star like Matty.
To see him heave was rare and rich;
He had the batters batty.
But all too soon he missed the plate,
The bats did on him swing,
They benched Von Kluck, for such is fate,
He had a crippled wing.

The Crown Prince then went in to heave; His work was rather squalid, Altho' a star, you must believe,

They'd got him from the Royal Club; He came straight from the throne head, And yet the grandstand called him "dub" And "bonehead, bonehead, bonehead!" For he had nothing up his sleeve; His fielders were the main checks

And those who paid to see him heave, They all demanded rain checks. Far and wide, thro out the stand, The people words did bandy. They called him raw and rotten, and His arm was made of candy!

Wild Bill, himself, the mound did take, To try and please the gluttons; They hollered that his head would make A stack of collar buttons! With no one out—the bases full; Oh, friends, count up his sinnings; He walked six men—oh, what a pull In just one little innings!

The umpire? Is it Uncle Sam? His bungling most immense is; Oh, hear the glad pop bottle's slam Against the stands and fences! The crowd will up and kill him sure, They're too much interested-And worse!-This thing we must endure,

The game will be protested! The Gamblers! We're gamblers all—our game is war; Our wits are sharp and keen. We play a game—the greatest far—

The world hath ever seen. We play the game of Destiny Upon a field of flame. For we're the Gamblers of God and we Shall surely play the game!

The Croupier, lo! His name is Fate; Each day the board he rakes. Thrones bedecked in royal state And nations are the stakes! We're gamblers all—the high, the low-We put all fear to shame For we're the Gamblers of God and so

The good, the bad-the ups, the downs, We boldly take the breaks; Twenty thousand, thriving towns, Behold, these are the stakes! Many's the time we lose-but, oh! Our souls they cannot tame,
For we're the Gamblers of God, and so,
We play the splendid game!

We play the mighty game!

The stars look down upon the strife, Each watching planet quakes For civilization, love and life, And liberty are the stakes: Generations yet unborn Shall anthem forth our fame, For we're the Gamblers of God-we scorn

Are on the table tossed, Many a noble Argosy, Great ships are staked—and lost! We stake ourselves-we stake our sons, Upon the field of flame, For we're the Gamblers of God—ye, Huns, More Frightfulness

T'S a wonder the Lord don't up'n put a stop to them Jarmins," quoth Ole Dad Sevenpiper, laying down his newspaper and looking at Ma Sevenpiper precise confirmation has been dis-avoid as what to imitate. ever his specs.

"But they shorely wouldn't do a wicked onchrischin thing like that!" insisted Ma.

Jetu to the author of the plays. Sit turns," is taken from a play in which a traveller does return and not once or twice only. One may begin as a peasant in Shakspere and live discoverable or imaginable step in pere one has to go to the plays. In speech the tongue of Shakspere has his dealings with his fellows he was bound the world to the empire that seemed to care nothing for public interests as long as his own were grew out of the few millions of Shakspere's day. We can scarcely exaggerate the influence of Shakspere's tongue on the men who secure. This appears in the narra- speak it, and on those who hear and tive of the attempt of the Combes to enclose the common lands at Stratford. The citizens protested vehemently against this encroachment, seas and lands. It is the language but Shakspere did not make common of freedom and bears in its syllables cause with them, but came to terms the liberties of all people. The indictment of Corolanus was, "You have not, indeed, loved the common count, on October 28, 1614, articles people." The seed-thought of a being drafted "indemnifying the great democracy is coming to birth dramatist and his heirs against any in the days in which we live and we loss from the scheme of the enclosure" (p. 475). It was John Ward, vicar of Stratford in the time gin to realize, that the dramatist of Charles II., who recorded that spoke when he wrote:-Shakspere, Jonson and Drayton "had a merry meeting" and Shakspere "itt seems drank too hard, for he died of a feavour there contracted." Sir Sidney says the cause of his death is undetermined. "Chapel Lane which ran beside his house was known as a noisome resort of straying pigs, and the insanitary atmosphere is likely to have prejudiced the failing health of a neighboring resident." Whether from the influence of the pigs or the potations he passed away on this day three hundred years ago. On the same day by a curious coincidence there died the author of Don Quixote, Cervantes, "one of the greatest authors of

poraries.

MME. JENNY'S DISPLAY SHOWS LOVELY GOWNS

Simplicity in Design Is One of the Keynotes in Season's Fashions.

FROCK OF PINK TULLE

Among the More Charming Creations Is This Simple Dress for Dancing.

DARIS. France.-Among the charming and wearable frocks that Madame Jenny has brought out the coming season is a dancing frock of pink tulle. It has a founda tion skirt of pink satin over which the full skirt of tulle is draped in slight pannier effect on each side. All around the edge of the tullo is a border of flat pink roses of a distinctly darker tint. The bodice of tulle is entirely covered with the same roses, and is held over the shoulders with narrow bands of white pearl beading. Surely nothing could be more charming than this, and it is typical of the simplicity that characterizes a number of Madame Jenny's models, which fact has given them immense popularity. There is nothing eccentric or extreme in her collection; very few pannier draperies are seen, the skirts being for the most part plain, the very full in many cases. What draperies are used are cases. What draperies are used are generally found in evening gowns.

Perhaps the most noticeably characteristic thing about the day gowns is the large number of short sleeves. In some cases, they are even shorter than elbow length, and, almost invariably, the armhole seam is very low. Short full puffs that stand out quite straight, attached at this low armhole, form many of the sleeves; and those that consist of short ruffles of tulle falling from the same lines, are popular. Quite novel are the pretty blouses in Russian form that go with the tailor suits. Some of them are long, falling half way to the knees. One of this sort, to wear with a navy blue faille suit, is made of thin black lace; over the body part are loose perpendicular rows of navy blue ribbon matching the the body part are loose perpendicular ows of navy blue ribbon matching th

Two Tailor Suits.

There are, among the models, two tailor suits that attracted particular attention. One is of beige gabardine, and has a moderately short coat with two narrow belts that cross low in the coat with two particular transfers. and has a moderately short coat with two narrow belts that cross low in front, holding pleats. The collar is prettily embroidered in blue. The skirt hangs very straight and is box pleated on the sides. When the coat is removed, a blouse is shown of the same color chiffon, trimmed with heavy oream lace, arranged over the shoulders and around the blouse, giving a bolero effect. This blouse tucks in under the skirt. The second suit is of navy blue, made on very plain lines. The coat is open in front, something after the order of a man's evening coat. It buttons with two buttons and shows a beaded vest. When the coat is removed, this vest proves to be a blouse of beige, with its front cut below the belt and embroidered with the beads in the shape of a waistcoat.

The sleeves of the blouse are elbow length, being wide at the elbows and entirely untrimmed. Other suits have coats with loose backs that, in effect, are capes, while the fronts fit closely. There is a particularly smart white suit of this sort, the front of the coat being short, while the loose back hangs in a point quite low behind. being short, while the loose back hangs in a point quite low behind. Also, some of the separate long coats are made with this cape effect, in one

case, the sleeves are formed in one with the loose cape that falls behind, a very original cut. Many Long Wraps.

Madame Jenny has many long wraps in her collection, both the tailor sort and those for more elaborate wear. Among the former is one having a collar, made of a long straight piece of the goods, arranged much as a man the goods, arranged much as a man wears a muffler to protect his shirt front, crossed over low on the chest with one large button to fasten it. Among the long wraps that are like full loose capes, is one of a gray green aloth that has a huge rolling collar of black sifk falling quite to the waist behind. Another of black satin is lined with blue crepe de chine. Another, of brilliant blue taffetas, is unusual in being trimmed with uncurled ostrich feather. This trimming, matching the silk in color, borders the entire lower edge of the cape and trims the deep puff.

Trimmings are important in the present fashion, many old-fashioned ones being revived. Madame Jenny uses frayed silk frills a great deal. On a navy blue silk frock, she has put rows of double ruching with frayed edges on the skirt, so that they show under the coquille drapery of an over skirt. This is one of the several day gowns that have blouses cut almost gowns that have blouses cut almost decollete the sleeves consisting merely of blue tulle ruffles that do not fall quite to the elbows. A pelerine to go with this has a wide double ruche around the neck. Purple is a promin-ent color in this collection, there being one particularly quaint purple gown with an Eton linen collar.

Some of the evening gowns are very claborate, with gold and silver lace.
One of the most beautiful is a dark blue tuile, over a foundation of silver cloth. The tulle is bordered with deep silver lace which also forms the decollete bodice. Then, there is a long train of the tulle which hangs loose from the short skirt. Many of the evening gowns have skirts that are short, with panels that hang to the ground behind, an uneven line at the being in order. There are two lovely gowns that combine pink and blue chiffon and net with charming effect. Also a pink chiffon, embroidered with black and trimmed with black shadow lace, is beautiful. There are many black nets with jet trimmings; one is trimmed with black ostrich places uncurled, and used as fringe. only real panniers are on three taffetas evening gowns of cerise, mauve, and blue. These are much taffetas evening gowns of cerise, some tailleur of gabardine. All well and good—mauve, and blue. These are much puffed and trimmed with fringed founces, and are quite distinctly difterent from the other models.

LAST MINUTE HELPFUL HINTS

Number of Suggestions to Help Round Out

the List of Ever Important

Accessories.

A 'KERCHIEF in sheerest lawn, organdie or delicately tinted crepe de chine will, of course, be included in madame's array of exquisite Easter accessories. The border may be in flesh, deep rose, lavender, or in fact, any of the modish pastel tints provided it harmonizes unobtrusively with the "toute ensemble" of the cos-

Easter veils are many and smart, Worn in variety of modes quite bewildering, they play the three-fold part of protecting the face, confining mischievous locks, that just love to slip out of place, and accentuating the best lines of the cha-

place, and accentuating the best lines of the chapeau with which they are worn. The newest meshes are very fine, with a heavy border, or coarser meshed with very little ornamentation in the way of chenille spots, or gold threaded designing. Lace veils are among the very newest innovations, as, indeed, is everything employing the use of real lace.

If milady has chosen navy blue for her Easter costume, Dame Fashion will smile serenely and lead her triumphantly to the head of the fashion parade; if any of the other reliable spring shades such as tetre de negre, jungle brown, hunter's

green, wistaria, grey or serge be the choice a very prominent place—not first, but near the first—will be accorded the faithful little devotee—but, and it is a great big "but," this favor is conditional. Accessories in any case must be faultless. There is absolutely no quarter given the carelessly chosen accessory.

Be sure that the hose to go with your new high-

top boots are a perfect match—pale grey for pale grey, light cream for light cream, oyster white for oyster white, and so on. Plain finished hose are best choise for the present, and are given every preference over embroidered designs for wear with the exclusive street costume.

the exclusive street costume.

The enterprising devotee will carry a tall-handled parasol to harmonize with her costume. A dull lavender shade is considered extremely chic with the navy costume, while many inconspicuous shades) present themselves for wear with the shepherd's plaid models so chic for the moment.

Perhaps instead of wearing a fluffy little beruffled suit of taffeta, you will have chosen a handsome tailleur of gabardine. All well and good—

accessory.

ON EASTER THINGS TO WEAR

BAKST CAPE'S DEBUT EARLY THIS SEASON

Reason Is Special Appeal to Women Who Are Going South.

ARE MADE OF PONGEE

Free Use of Arms Allowed and Point Cut Open to Neck.

THE Bakst capes have made their debut a little early in the season, perhaps, but the reason is their

debut a little early in the season, perhaps, but the reason is their especial appeal to women who are going south. Capes are made of pongee, cut much after the fashion of the Indian poncho, as if one's head had been pushed thru a hole cut in the centre of a square shawl. The point in front is cut open to the neck, and the points at the sides are cut up far enough to allow free movement of the arms. In some of the capes the point at the back and the points at the sides are rounded by way of variety, and the capes are variously trimmed.

One wrap is trimmed with a two-inch border of black silk and has a black silk rollover collar. At either side of the front, and just below the collar, there are six-inch black silk squares ornamented with satin pipings an eightth of an inch wide, in green, red and white, squared off into lines. At the back of the cape, three two-inch black silk stripes, ornamented like the squares and set two inches apart, run from the back of the neck three-quarters of the way down the cape, the outer stripes being two inches shorter than the centre ones.

Another cape has the black silk border piped with red and is ornamented with the white and green pipings. It has a shirred black silk collar. Below this, just across the shoulders, there is a large black silk diamond, piped like the border. In the front of the cape there is a small black silk diamond at one side.

The capes are very unusual and attractive. They come not only in the

diamond at one side.

The capes are very unusual and attractive. They come not only in the pongee but in the other coarsely woven outing silks, such as motora, Tussor, khaki-kool and canvass pongee.

The Bakst hats that go with the capes mark an interesting era in millinery. One scarlet straw turbanshaped hat is faced with purple satin; the crown is piped around and around the crown is piped around and around with green, black and white pipings, and finished at the front with a pur-

ple velvet plum. Another Bakst hat is in wide-brim-Another Bakst hat is in wide-brimmed, soft grass straw, the upper part of the brim being faced with old blue mult; ornaments of pink, yellow and green satin and velvet are applied partly on top of the brim and partly running up the side of the crown, being finished at the edges with an odd black stitchery. The brim is so shaped that, when the hat is on the head, it ripples slightly and falls lower on the right side than on the left, giving a most picturesque effect. One other hat worthy of description is made of one-inch-wide cotton tape in yellow and white. The tape is so in yellow and white. The tape is so crossed that it gives to the hat the effect of being made of a plaided material. Around the crown there are tiny blue flowers and green leaves of crocheted worsted, spaced two inches

crocheted worsted, spaced two inches apart.

The Bakst influence promises to make itself felt in gowns and blouses, as it has already done in wraps and hats, and will vie with the Spanish and Japanese effects that are becoming more noticeable every day in fashion centres. This is to be a gay colored summer, with a sort of go-asyou-please note sounded in each woman's wardrobe. man's wardrobe.

LACE SHAWLS TO BE USED AS ACCESSORY

Report Is That They Will Shortly Be Ushered In.

MANTILLA IS NEXT STEP

This Means Revival of More or Less Distinction for Other Things.

OF DECIDED interest is the rumor that lace shawls are to be used as an essential dress accessory. These shawls, in many instances, will be draped on the dresses after the manner of broad fichus. But aside from this report says that shawls, as a separate and distinct affair, will shortly be ushered in for correct acment of the modernized Goya or Velasquez dress.

Then the mantilla is the next step. of black or ivory tinted lace; and this means that the red rose, the high-back comb, the flirtatious fan, the lace mitt, et cetera, will all have a revival of more or less distinction. The beautifully embroidered Chinese shawl which one associates with the Carmen of Calve has, as a matter of fact, very

little place in Spanish costume,

little place in Spanish costume.

Calve was a great artist, but she erred in her sartorial trappings and always drassed the cigaret girl quite too sumptuously for her humble position. One should not confound the gress worn by the heroine of Bizet's opers with that of the aristocratic Spanish woman. The two are quite incompatible, and the stage version of one should not be taken as an authentic guide to that of the other.

Between the Spanish influence and that of the Russian the prospectus indicate gay chromatics. Unfortunately, we shall very likely have to go thru a color probation before the bad and the indifferent are eliminated from the worth-while and satisfactory. Most of us are quite willing to express the joy of living thru the medium of colored clothes. Nevertheless, one should have regard for the eternal fitness of things and not attempt to vivify the canvasses of old or near-old masters for the clothes models of moderns, whose times and manners of life can at the best make them but a faraway reflection of the originals.

In some quarters there is an effort apparent to advance Shantung silks.

In some quarters there is an effort apparent to advance Shantung silks, taffetas and ribbbed weaves in Bayedere stripes. It is likely such will be taken more for sport apparel than for the average dress.

PRETTY WINDOW BOX IS VERY ATTRACTIVE

Few Home Builders Seem to Rezlize Value for Decorative Purposes.

HOW TO PREPARE THEM

Good Soil Essential and Plants do Better When Drainage Supplied.

F EW homebuilders seem to realize window or porch boxes for deceration, as against potted plants on stands of wire or wood. The length of the boxes depends upon their use. Boxes about eight inches wide and seven inches high are of convenient size, and these are about the best pro-

portions for my plan. The soil should a composed of about one-fourth we' .ted and pulverized T IS QUITE possible that madame will take a flying trip to one of the other cities over Easter, or, perhaps, she will spend the week at a fashionable watering-place. In either case her requirements in the dress department will include a careful choice of dainty negliges. Nowadays, boudoir attire is a subject of utmost importance with the woman who wishes to be known as "weil dressed." She knows the value of tastefully chosen lingerie whether it be a boudoir cap, a camisole, or a full-flounced petiticoat. Daintiness must be the keynote in models of simplicity or elegance.

First thoughts are directed to the choice of foundation garments and lounging robes which bear such close relation to the costumes, frocks, and gowns with which they are worn. The fluid of the skirt is most often effected by the invisibly distended petiticoat, and certainly the exquisite and or marred by the choice of the camisole.

Equally important is the choice of boudoir attire for it undoubtedly expresses the personality of the wearer. The lounging wrap being launched at present are novel as well as beautiful. Intended for wear over the six yard-round-the-hem petiticoat they are fashioned of chiffon, lace, crepesilis, and ribbon, and result in fairy-like concections that will giadden the heart of the true devotes.

Choice of Styles.

Almost any style is permitted in this negliges jacket which varies in length to suit the whim of the wearer. Ribbon ties, ruches and French flowers garnish the most exclusive of models, and caps, are made invariably to match. One symphony in lavender had a pleated chiffon petiticathung on silver shoulder straps and weighted at the hem with a tiny garland of allere buds. The jacket which varies in length to suit the whim of the wearer. Ribbon ties, ruches and French flowers garnish the most exclusive of models, and caps, are made invariably to match. One symphony in lavender had a pleated chiffon petiticathung on silver shoulder straps and weighted at the hem with a tiny garland of allere buds. The jacket of t manure from : cow lot, one-fourth leaf mold from one woods, and the re-

GARDENING AND POULTRY RAISING FOR AMATEURS

ONE OF THE VERY BEST PLANTS FOR TOWN GARDEN IS THE DAHLIA

The There Has Been Considerable Improvement, it Is by No Means as Popular a Flower

O'E of the very best town garden plants is the dahlia, and since now is the time to propagate it by cuttings or by seed, an article on this time-honored flower will not be this time-honored flower will not be amiss, says a writer in The Gentlewoman (London). Of recent years, although the has been considerable improvement made in the dahlia, yet it is by no means the popular flower that it should be. This is partly due to the introduction of new flowers, and also the vast improvement made in many of the old; added to this that the greater while used to the old

decoration, it is much to be wondered at that it is not more grown, anyway in the environment of towns and cities. The methods of cultivation, too, are simple, and altho, like many

The usual method of propagation is by cuttings, division, and seed. In the case of cuttings, the time for taking these is from February to August. The best cuttings are procured from the tubers, and, if carefully taken and planted, they seldom fail to grow. The young tops are taken off at a joint, and, carefully potted up, will root well

in the following spring.

All cuttings should be potted up in

will be seen by the pods brown; separate seeds and dry them or boxes, and, when the seedlings are large enough, transplant them into small pots, never putting more than the ground well around the plant. Place some small bushy twigs to the plants of them to cling to and the plants. one seedling in a pot. As soon as they are large enough, plant them out

in rows a foot apart.

When they flower, select only those that are of good shape and color to grow on and develop into large plants.

The dahlia requires rich soil that has or placed in boxes. Avoid keeping the been well broken up and trenched to roots over-warm, else they will very a good depth, say 18 inches to two possibly develop growth before they feet apart. It is a mistake unless the soil is very poor to manure too heavily. Use only old manure before plant- tings of each variety that have been ing, and, when the plants become well established, fork a quantity of the same into the surface of the bed. All dahlas should be well tied and stakdefinite should be well tied and stakd, since, the boughs being heavy and
brittle, a rough wind may easily destroy many of the best plants. When
first placed out, it will be found a
good plan to cover up each young
plant at night with a large clean flowsood plan to cover up each young plant at night with a large clean flower pot. Like many other flowers, the dahlia will bloom freely so long as all flowers that are over are picked off and not allowed to go to seed. In the autumn cut back the plants and lift the tubers at once for storing. All stems should be cut back to about two inches from their base, and a

SWEET PEAS FOR EXHIBITION

(By W. R. READER, Calgary Park's Superintendent)

(By W. R. READER, Calgary Park's Superintendents)

(By W. R. READER, Calgary Park superine park shell for the fall of the finding park of the fich in humus, and the fich in humus, and the fich in humus, and the the fall and the fich in humus, and the fall the fich in humus, and the deep for the spound into this condition it is subset. As a subset of the plant and the foliate his of the plant and the fich in humus, and the fich in humus, sweet peas to germinate. This is more noticeable with some varieties than with others. It is due to hardiness of the shell, and these hard shelled peas will lie dormant unless the skins are care in its early stages of growth, yet, when planted out and established, very little requires to be done beyond watering and hoeing.

After Germination.

After germination has taken place bring the plants along slowly in a cool temperature. It is a mistake to force the growth along. A warm temperature will cause the plants to start away weakly and no amount of hardening weakly and no amount of hardening afterwards will restore their full vigor. Plants raised in a greenhouse should be moved to a cold frame as soon as they are up. Protect well on cold nights by covering the frames with burlap or sacks. In the daytime afford all the light and air possible. As the season advances the lights can be entirely removed and used only on frostericky removed and used only on frostericky. the following spring.

All cuttings should be potted up in rich loam. When filling the flower it, do not fill it up to the rim: firm all the light and air possible. As the soil and level the surface, adding layer of sliver sand on the top, layer of sliver sand on the top, are cutting should then be inserted all placed in a gentle heat. Water aringly and shade from bright sun, two or three weeks they will be tund to have rooted yell, when they be potted up in 3½-inch pots.

The following spring.

The following spring the flower and with litities of the blossoms and the b a rich loam. When filling the flower pet, do not fill it up to the rim: firm the soil and level the surface, adding a layer of silver sand on the top. The cutting should then be inserted ty nights. Planting out can be done to the surface of the cutting should then be inserted to the cutting should then be inserted to the plants in the p sparingly and shade from bright sun. This is somewhat different to plant. This is som When propagating by division, the roots may be divided downwards from the crown. If too early to plant out, these should be potted up. The middle or end of April will be found quite and rake over, leaving a slight hollow along the row where the plants are to or end of April will be found quite early enough to plant the dahlia out of doors.

When propagating by seed, select seed only from the best varieties. It should be gathered when ripe, which will be seen by the pods becoming cient depth that the roots may be straightened out. After planting firm

It is a wise plan to keep a few cut-

ing of the foliage is also beneficial at such times, as this counteracts the hardening of the stem which condition would result in short stemmed flowers. Varieties of orange and salmon shades which burn and fade in bright sunlight must be shaded with cheese cloth. If aphis puts in an appearance spray with tobacco solution.

Blossoms to Select. Select for exhibition only such blossoms as are in their prime. Flowers that are past their prime or unopened buds spoil the appearance of an exhibit. Cut the flowers the evening before the exhibition and stand in water. Wrap the stems in moist absorban paper to transport them to the exhibi-tion building. In packing place in box-es one layer deep only.

Displaying sweet peas,-It is a misening of the shades one into another.
These exhibits invariably received the
favorable attention of competent
judges, and excite the attention of the public. Grouping in this way calls for talent of a somewhat high order, and that is why arrangements that appeal to the artistic eye are so rarely seen. Two very common faults are excessive formality and overcrowding the the quality and freshness of the flowers are very important items with

the judges.
There are so very many excellent exhibition varieties which are being added to annually that a list is hardly necessary. A good selection can be made from the list of any reputable

Now Is the Time for **Baby Chicks**

The eggs from the breeding hens are

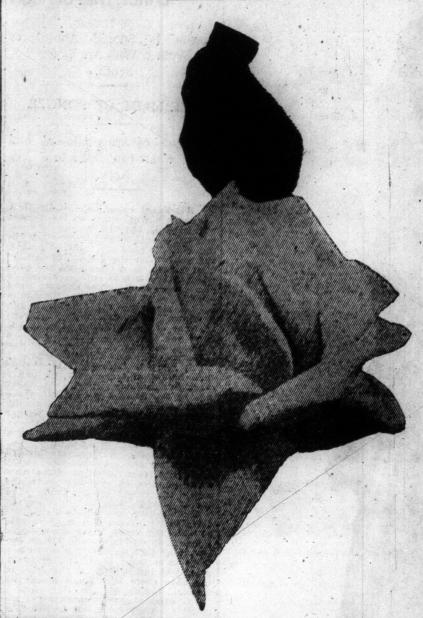

being gathered often, sorted and Much may be written on this admirable flower, dealing with the selection of varieties and the like, but much depacked carefully away these days. Things mysterious are happening in pends on whether the grower intends the cellar and poultry houses. On the poultry farm bundles of corrugated paper boxes are arriving in which the baby chicks will later be shipped, and the chick will later be shipped, and it will not be long before the peep of the chick will be heard in the land. On many plants the baby chick has already appeared. February chicks fill a place both as layers and early broifers. They come high and the chances of raising them are less than later in the season but where one has a wall. the season, but where one has a well the season, but where one has a well equipped brooder house they are worth the extra labor. Not only are the eggs from which they are hatched expensive, but fertility is apt to run low. The advantages are that the cockrels even Leghorns can be disposed of for broilers at a profit and the pullets will lay in the fall, when eggs are high and the hens have mostly ceased laying. box without cover or bottom over, fall or early winter and be to the filling this with desired the filling the filling this with the filling the fall or early winter and be unproduc-tive most of the coldest months, but such pullets are perfectly safe to use for breeders in the spring.

Ordinarily March is as early as most egg farmers care to have chicks come April is considered the banner month. There are still others who prefer later chicks. A successful chicken grower can bring May and June Leg. forn chicks to laying by November, where the equipment is not suited to the earlier birds these are good months, as the loss and labor is ma-terially less than for early chicks, tho they do not mature at quite as large

The person with one small incubator and hatching from a small flock will probably have baby chicks during all these months, and this may be a profitable way on a combination poultry farm using the larger breeds of fowls. With Leghorns on a commercial egg farm, it is desirable to have all the chicks come at one or two hatches. Some comparatively small egg farms do this, preferring to buy chicks in one or two large lots to hatching a number of times. That is an advantage one has when located near a custom hatchery—he can get chicks all at one time, it he can secure the eggs. Many quite arge farms depend on purchasing chicks, thus doing away with the and the uncertainty of the fertility of eggs. If the order is placed early mough all the chicks wanted can be secured at one time, and should one total be successful in raising the desired number of pullets another can be secured later.

The easiest insect to growing Canadian wild roses would make good stocks. The briar stocks are either propagated from cuttings can be secured later.

Or, where there is usually a good covering of snow, they may be bent down and partly, or entirely, covered with soil or covered with evergree boughs as for dwarf roses. Te roses are the most tender and should be earthed up as described for Hybrid Perpetuals and Hybrid Teas, and in addition. for best results, covered with a box filled with dry leaves as described. The degree of protection will depend on what part of Canada

will depend on what part of Canada
the grower lives in, but at least one
of the methods described should be
suitable for most conditions.
Insects anad Fungous Enemies and
How to Treat Them.
Good foliage is essential to the production of good roses, and, moreover,
cond foliage is desirable in a rose Good foliage is essential to the production of good roses, and, moreover, good foliage is desirable in a rose garden because of its appearance. Leaves badly curled, mildewed, spotted or eaten take away very much from the attractive appearance of a rose garden. The easiest insect to control is the Rose Sing, a green stock or grand while rose would stock. The brief stocks most used in propagating roses are dog rose or briar stock (rosa canina), a wild rose of Great Britain, and the manetti, a European stock originally coming from Italy. The sweet briar (rosa rubiginosa) also makes a very good stock. It is possible that some of the strong-growing Canadian wild roses would stocks. chicks, thus doing away with the bother of incubation, the cost of incubators, the trouble and expense of keeping up a breeding establishment Leaves badly curied, mildewed, spotand the uncertainty of the fertility of ted or eaten take away very much

with one ounce copper carbonate, four-fifths of a pint of ammonia and eight gallons of water. Dissolve the copper carbonate in ammonia. The ammonia and concentrated solution should be kept in glass or stone jars tightly corked. When the disease is in a plantation, every effort should be made by thoro spraying to control and destroy it as soon as possible. Plants should be sprayed about once a week after the disease is first noticed, and where it has occurred previously, begin as soon as the foliage is out.

Propagation.
The enthusiastic rose grower will want to propagate roses himself, and it adds much to the pleasure of growing this charming flower if one is able to

grow one's own plants.
Roses grown in the open are usually propagated by budding. Raising them rom cuttings is not very satisfactory in Canada, altho it can be done fairly in Canada, altho it can be done lainly successfully with some varieties. Grafting is rarely resorted to outside, being confined almost entirely to under glass, and even then it is done to

a very limited extent.

Stocks.—The stocks most used in

HARDY ROSES

erymen, and the rose grower himself can readily raise them from seed. There will be a year's saving in time, at least, by planting the rooted cuttings. The rooted stocks, which are usually received early in the spring, should be planted about a foot apart in rows three feet apart. The soil should be kept well cultivated so as to induce the plants to start into growth promptly in order that by the budding season there will be an abundance of sap under the bark. The soil should season there will be an abundance sap under the bark. The soil should also be earthed up about the stocks for also be earthed up about the stocks for at the desired height. The buds are at the desired height. The buds are also be earthed up about the stocks for a few inches during the summer, as this will keep the bark softer and easier to work. If stocks are grown from seed, it should be sown in the autumn in rows about six inches apart in well-prepared soil. The young plants should appear early in the spring and, if the surface soil is kept loose, will make nice little plants by autumn. Before winter, or early in the autumn. Before winter, or early in the following spring, they should be transfor the imported stocks. Some of them should then be ready for budding that three or four inches of the stock to season. They should be confined to one main stem but all side branches left on. While budding by amateurs is usually more successfully done on the Manetti stock, it is not so desirable growers who let the stocks grow growers who let the stocks growers. Propagating from Cuttings (Roses on Their Own Roots).—Careless rose growers who let the stocks grow up and smother the budded variety are as the briar as, if suckers come up, the foliage is difficult to distinguish from some of the named varieties of roses. Moreover, the roses are not so long-

lived on the Manetti as on the briar. Where standard roses are desired, and these are only suitable for the milder parts of Canada, the stocks will need to be a year older before they are bud-ded than for the ordinary dwarf or Budding—The budding of roses is much like the budding of fruits, and any one who is at all skilful with his any one who is at all skilful with his hands can do it very successfully. The time for budding varies somewhat in different parts of Canada, but from the later part of July until September the stocks should be in condition in some part of the Dominion. The time that budding may be started is as soon as good buds can be obtained. The stocks are ready any time from then until the growth becomes so slow that there is not enough sap to permit raising the bark easily. When the growth is fairly rapid there is no difficulty. The buds are in condition when they are well developed but dormant with Crimson Rambler and Dorsothy Perkins strike readily from cut-tings, whereas many of the Hybrid Perpetuals and Hybrid Teas are rather difficult to strike unless one follow taking ripe wood cuttings of about six to eight inches in length and planting them outside in nursery rows deep enough so that only one bud will be above the surface of the conditions are obtained. In most parts of Canada, little success will follow taking ripe wood cuttings of about six to eight inches in length and planting them outside in nursery rows deep enough so that only one bud will be above the surface of the firm of the Hybrid Perpetuals and Hybrid Teas are the difficult to strike unless one rather difficult to strike unless one at the difficult to strike unless one at the promoter of the Hybrid Teas are the difficult to strike unless one at the Hybrid Teas are the difficult to strike unless one at the Hybrid Teas are the difficult to strike unless one at the difficult to strike unless one at the Hybrid Teas are the difficult to strike unless one at the difficult to strike un they are well developed but dormant and the wood on which they are is firm and what may be termed half ripe. In the early part of the budding season this is after a shoot has flowered. Later on in the season the buds will be sufficiently developed on shoots where the flowers have not yet correct. will be sufficiently developed on shoots where the flowers have not yet opened. At the proper season pieces of the shoots called "bud sticks" with several good buds on them are cut, and immediately after cutting the leaves are all removed to prevent transpiration of moisture, leaving about an inch of the leaf steam attached to the shoot.

The "bud sticks" are the base; remove the leaves except the two nearest the top, and plant them in coarse sand in a cold frame. But even treated in this way they are difficult to root. The soil in the frame must be kept constantly moist and the air must be kept as moist as no she without the cuttings. winter protection.

Roses of the first group need little or no protection in many parts of Canada. In the prairie provinces, where the country is open, it is desirable to bend some of them down and where evergreen boughs can be obtained, to put some of these over them as well. A little soil taken from one side of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the whole of the bush falt down, so that the bush cannot be covered. Should the server the branches some the server he boughs, canvas or any material which will protect the bush falt and sun. wood cuttings of t inches in length outside in nursery

Since there is a right way and a wrong way of doing most things in this busy world, it is just as well to try to do even the smallest thing for baby in the right way. In the end it saves time and worry, altho you may find some of the old school grumbling in perfectly modern fashion over the length of time consume "fussing with new-fangled ways."

"fussing with new-fangled ways."

I am not claiming that my way of bathing a baby is the only right way; but it is a very good way, and I pass it on in the hope that my experience may help another mother over the strange, new road of babydom.

Just the thought of giving baby his first bath gives the little, new mother a wonderful thrill. At first it is a thrill of joy at doing something all by herself for the new toy—later, when she feels the warm, little body in her trembling hands the thrill becomes one of terror. She wonders how she will ever get the tiny person how she will ever get the tiny person into the tub, and once in, how on earth an she get him safely out again. It is a nervous ordeal, that first bath, and is just as well to have some person selp finish the performance before mether gets too tired. Next day she can do more. one realizes the importance of hav-

Have the Reem Warm.

R does not matter what room you choose to give baby his bath in so long as it is warm. Not too warm. Many a girl has fainted just because she exposed the baby and herself to boiler room atmosphere. Seventy-five to eighty degrees Fahrenheit is about right, with no draughts. Get the table ready first. Place on it a pad, then a large, soft, bath towel, then a smaller towel or a large diaper. Put the bath the one hundred degrees Fahrenheit. Undress baby on the table, but do not leave his clothing on the towels. Ship the left arm under his head and shoulders, and grasp his left arm at the shoulder with your left hand. With your right hand hold his feet firmly together. Lower him gently into the water. Keep your left hand in its position, and with the right wash the baby's head and face. Do not hesitete to use pure castile soap on his head. A piece of absorbent cotton makes the most sanitary washeleth.

Lift him out and lay him on the towels. Wrap him up quickly, covering him completely. Uncover his head and dry his head and face by gentle patting. Uncover and dry his arms, then his body and legs. He will be almost dry before you touch him, for the soft towels absorb all the moisture. Then powder all folds of the

Dress him quickly, slipping his garments over his feet whenever posat-ble. Once you have tried this me-thod, you will never attempt to bathe or dress baby on your knee. You will let the table bear; his weight and nts, and reserve your strength

Care of the Eyes.

After baby is bathed and drossed, his eyes, mouth and nostrils are cleaned with absorbent cotton, satur-

ated in boracic acid solution.

It is estimated that over thirty per cent, of the blindness of the world has been brought about by infection of the eyes at birth. This means, that in a great number of cases the children were born with normal eyes and eyesight, but became infected at birth, and for want of proper care the sight was destroyed.

was destroyed.

The great cause of this condition is infection of the covering of the eye with the germ of gonorrhea.

Of all the special senses we count sight Of all the special senses we count sight the most precious and any one who neglects a baby's eyes at birth is guilty of a crime. It is the custom to use positive methods of prevention, the idea being to kill this germ before it has a chance to grow.

Immediately after birth, the eyes are bathed with a boric acid solution, then a drop of a one per cent. solution of nitrate of silver is dropped into each cye by means of a medicinedropper. The eyes should be held well open while this is being done, so that

dropper. The eyes should be held well open while this is being done, so that the solution really reaches the inner eye. Afterwards the eyes are again washed with the boracic solution.

Of course this work is attended to by the doctor and nurse; but it is well to let mothers understand these

One realizes the importance of haying everything right at hand for this ceremony. Any waiting or hurrying to look for things is very bad for the baby and worrying for mother.

Have the Roem Warm.

R does not matter what room you choose to give baby his bath in so long as it is warm. Not too warm. Many a girl has fainted just because she exposed the baby and herself to boiler noom atmosphere. Seventy-five to eighty degrees Fahrenheit is about right, with no draughts. Get the table yeady first. Flace on it a pad, then a of cotton be used for both eyes, nor even twice for one eye. Dipping the corner of a towel or cloth into the solution and then washing out the eyes is a bad practice, and is responsible for many cases of yery sore eyes. for many cases of very sore eyes, There is an old idea that breast milk is good to wash out baby's eyes. This is foolish and unclean, and should not be done.

Cold in the Eyes.
Sometimes a baby catches cold in his eyes, the white of the eye becomes red and inflamed, and a slight discharge of pus is seen. I have heard that there is an epidemic of sore hesitate to use pure castile soap on his head. A piece of absorbent cotton makes the most sanitary washtest.

Wash the baby well, turn 18 over and wash the back, keeping the left arm as support.

Lift him out and lay him on the towels. Wrap him up quickly, covering him completely. However, his beed.

Shield the Eyes.

The eyes of a baby are very sensitive to a bright light, and while sunsitive to A bright light, and while sunshine is most essential to the health of the little one, great care should be taken to place him in such a position that he cannot stare up at the sun, nor get its direct rays in his face. It there is a form of cruelty that seems to me to be particularly burbarous it is to have a peak in a numerous ed. is to pue a baby in an uncovered go-cart and march him along directly facing a blazing sun. Never leave a light burning in the bedroom. Injury from a bright light can be done even when the child is sleeping.

Dear Smilers: I would like very much to join your Smiling Face Club, and I would be glad to wear the button, and always smile at whatever happens to make the world brighter. Dorothy Snowdon.

Mahone Bay, Nova Scotla.

Dear Dorothy: I suppose you have seen your name on our list before this, so you are a Smiler from new on.

Sincerely yours, C. A. M.

Dear Smilers: We get The Sunday World overy week, and I never miss the S. F. Page. I am trying my best to make the world brighter. I am

sending a few riddles.
Q. Why is a fishmonger never generous?

ous?

A. Because his business makes him sell fish (selfish).
Q. What is that flies high, flies low, has not feet and yet wears shoes?
A. Dust.
With lots of Smiles,
Muriel Longwell,
40 Cluny Aye., Toronto.
Dear Muriel: Was glad to receive your nice little letter. Thank you for the riddles.
Sincerely yours,
C. A. M.

Dear C. A Macphie:

A Lesson For Everybody.

A wise old owl lived in an oak;
The more he saw, the less he spoke.
The less he spoke, the more he heard,
Why can't we be like that old bird?
I would like very much to be a
Smiler, and join your club. Please
send me a button.

Yours truly.

Yours truly,
Jean Hutchinson,
56 Woody Crescent ave., Toronto, Ont.
Dear Jean: That was a wise old owl,
wasn't it? We are not sending out
buttons; but see our little pledge.
Sincerely, yours, C. A. M.

There was once a little girl who lived with her aunty on a farm. She had never read or seen a story book or paper, and she felt very lonely because she had nobody to play with. Once day her uncle went to the city. When he came back he brought a Sunday World with him for the little girl. She was very pleased with it, and at once began to open it. The first page she opened was the Smilling Face Page. She read the letters and stories, and then sat down and wrote a letter to The Sunday World. A very happy little girl went to bed that night. Yours sincerely.

Yours sincerely, Elsie Nicholson, 82 Ferrier ave. Q. Why do dentists make best soldiers?

A. Because they are drilling most of the time.

The Duel.

The gingham dog and the calico cat, Side by side on the table sat;
'Twas half-past twelve, and what do you think, Nor one nor t'other had slept a wink

The old Dutch clock and the Chinese Appeared to know as sure as fate, There was going to be a terrible spat; I wasn't there; I simply state What was told to me by the Chinese

The Gingham dog went "Bow-wow And the calico cat replied "Mee-wow!" The air was littered an hour or so, With bits of gingham and calico, While the old Dutch clock in the

chinney place, Up with its hands before its face; For it always dreaded a family row. Now mind, I'm only telling you What the old Dutch clock declars is true:

The Chinese plate looked very blue, And wailed: "Oh, dear! what shall we do?" But the gingham dog and the calico

Wallowed this way and tumbled that-Employing every tooth and claw In the awfuliest way you ever saw— And, oh! how the gingham and called flew!
(Don't fancy I exaggerate;
I got my views from the Chinese plate.)

Next morning, where the two had sat They found no trace of dog or cat; And some folks think unto this day That burglars stole the pair away: But the truth about the cat and the

Is this: They ate each other up!
Now, what do you really think of that?
(The old Dutch clock, it told me so,
And that is how I came to know.)

WOMEN AND THE VEGETABLE GARDEN

Twomen only knew the enjoyment and the satisfaction to be found in caring for a vegetable garden, I telleve many of them would substitute such a garden for the profitless pursuits and pleasures they now in-dulge in and for which they have nothing to show when they've done."

Miss Anna Barrows, instructor in the school of household arts of Columbia University, New York City, and a lecturer on domestic arts, states that one mestic arts, states that one of the things the housewife needs to develop is a friendly connection be-

tween the house and the vegetable "There is no more absorbing and worth while recreation than tending a well-planned kitchen garden," she went on, "and the satisfaction of putting on the table freshly gathered vegetables the table freshly gathered vegetables that one has raised onself is quite

equal. I'm convinced, to that of a high tennis score. There is really no reason why every woman should not establish this pleasant relationship between herself and the soil and go to market every morning in summer in her own sarden. There is scarcely a patch of ground too small to grow some sturdy vegetable in. Even the city back yard, it it has proper sunlight and the soil is slightly enriched, will yield enough simple vegetables to convince the city woman that they do not grow in wooden boxes in grocery windows,

"The suburban woman ought to have a good big patch of ground given over to vegetables, alternating them, per haps, with rows of flowers, if the space is too limited for two gardens. Many low-growing vegetables can be tucked away nicely between rows of

taller flowers, and nobody be the wise: until dinner is served. The woman with a country place has, of course, the best chance of all to have a kitchen pest chance of all to have a kitchen garden that will meet every need for the summer. If given regular attention, such a garden need not be a burden to care for; instead, it becomes a sort of outdoor sport in which the player is always the winner.

"There is an increasing attention given to the cultivation of vegetable

given to the cultivation of vegetable toods nowadays, with the result that the quality is better and the texture less fibrous. The housekeeper unfa-miliar with the country garden hardly knows when different vegetables are in season, and she often buys them at abvegetables gathered at just the right moment, freshly cooked within an hour or two of being picked, and at no extra

"It has been said that it costs more to raise one's own vegetables than it does to buy them at the markets. Of course it does if a man is hired to cul-tivate them and this expense is added to the really small original outlay. But, if the woman regards her garden as a tables are much superior to those one

"Too often in the country the gar-den is neglected that money crops' may have more attention. If a garden plot is intelligently arranged and its products are properly prepared for the table, it often yields more profit than any corresponding acres on a farm. Many a small garden, a quarter acre or even less, wisely arranged, will bring to the family table more food than could be secured by any similar expenditure of money and labor.

to make beautiful flower gardens and do all the work in them onself. There is really just as much satisfaction in garden, and from being a producer as

EXPERIMENTING

CONCERNING OUR CHILDREN

more in the hands of women—the mothers—than in the hands of those who possess power. We must cultivate women, who are the educators of

"That's just what I said," was the triumphant reply. "But my wife said it was rat poison. You might try it again to make sure."

Indicers, but the rulers of communities, are concerned with the physical welfare of the children, so that strong, healthy citizens may result. And just as the strength of maturity depends upon the care given the early growth, so does the adult character depend

upon the training given the child.

All Have Instincts.

Every child is born with instincts, and every action he performs is an outward sign of these instincts. We love to watch a baby; we laugh at the funny things he does we received

funny things he does; we marvel at the cleverness displayed, but do we seriously consider that these very actions are worthy of serious study be-cause they show us the mental devel-opment of the child? The mother is bound so closely her baby that she above all others, is best fitted to train him when his im-

pressions of life are being formed. Si has, naturally, the impulse that prompts her to train the little one cor-rectly, but she does not always know

may intelligently meet the varied dimands of their Httle ones.

anyone comes into the house.

This is one of the times when you wish you could keep them busy.

Give them, no matter how tiny they

This is where explicit directions and careful training prove their value. The children understand the form of greeting. They know they must not alt down while an older person stands. They realize it is not considerate to interrupt a conversation. They have learned a set phrase with which to express degives a prever of questions or

people. Let the children play a "manners" Let the children play a "manners" game in which they can practice those little graces and become accustomed to their use. Let there be a certain amount of formality in the morning greetings, and in the ordinary, necessary table talk. You undorstand me? Never let your courtesy towards your children be so different in the presence of strangers, that the poor, bewildered youngsters will be ontirely at a loss to know what you mean or what you expect them to de,

THE LARGE HAT HAS DEFINITELY RETURNED, BUT THE SMALL-BRIMMED MODEL IS STILL IN FAVOR

"IN THAT direction,' the Cat said, waving his right paw round, 'lives a Hatter; and in THAT direction,' waving the other paw, 'lives a March Hare. Visit either you ("Alice's Adventures in Wonderland")

HERE is such a bewildering assortment of smart spring hats that one is prone to agree with the Cat and wonder if hatters are really just a bit "mad"? The designers who created the new millinery must have allowed their imaginations to run away with them, for there are no two alike and each one seems more lovely

They run the gamut as to size, shape, color and trimming. Whatever you desire in the form of a hat is there before you. Spring hats are charming! Take, for instance, the modification of the chimney-pot hat, with its towering seewn and next-to-nothing brim. It possesses a chic that will win the immediate

approval of the woman who is partial to smart tailored suits. This attractive model is of black lacquered chip straw, with two snow-white pigeons, with outspread wings, poised gracefully on top of the crown. The chimney-pot, heretofore, was not a "pretty style, but the modern hatter has given it the right proportions, and has thus made it

The large hat has come into its own again, and it is represented in this group by a wide-brimmed sailor of exceptional style and charm. The upper brim and crown band are a delightful combination of hand-blocked English chintz in tones of old-blue rose and green, and plain old-blue eponge. The top of the crown and the facing of the brim are of old-blue Georgette crepe. The brim is turned back in front and caught in place with a flat bow of white grosgrain ribbon.

Since the broad-brimmed sailor is not becoming to all faces, the designers have provided a goodly assortment of narrow-brimmed models for the matron. One exquisite hat is of mulberry colored hemp straw, ornamented with two French plumes

of the same color arranged high at the back and with the ends drooping over the

In direct contrast to the dignified elegance of the mulberry colored hat is the yery youthful large sailor of black straw. This hat is appropriate for the girl who is under 20, and is of the loosely woven Japanese straw that has suddenly gained such enviable popularity. It is simply trimmed with a band of Nattier blue silk, drawn

softly about the rather high crown. Black silk tassels, placed at regular intervals on the silk, add an unusual touch to this fascinating bit of headgear.

No collection of hats would be complete without a sports-hat covered with striped material. Dark blue and white striped English homespun is used effectively to form the brim and crown-band. The stripes run diagonally about the crown, while on the brim they radiate from the centre in "pinwheel" fashion. The top of the crown is covered with softest, white, glazed kid. A rosette fashioned of the striped material ornaments one side.

IMPORTANT FACTORS

Certain Practices Should Adopted if Best Results Are to Be Obtained.

DUST BATH ESSENTIAL

Vermin Must be Avoided as Much As Possible and This Requires

THERE are many poultry-keepers who prefer to use hens for hatching chicks. But certain pratices should be adopted with setting hens to get the best results. When hens are set in March, April or May, they require more care and attention than if set later. For early hatching a warm place to set hens, their regular cars, daily observation of the ergs and care, daily observation of the eggs and nest and a good dust bath are important factors in winning success

a good dust bath is essential for a setting from to help keep down the lice. This pest is apt to multiply quite rapidly under conditions of natural inon. If lice become abundant easy, break one or more of the eggs and thus spoil the chances of a good hatch. If eggs get broken the others which have become soiled should be which have become soiled should be carefully washed in warm water and replaced in the nest while the hen is feeding. eeding. If eggs are allowed to remain esmeared with the contents proken egg it either means that those eggs will not hatch or weak chicks might result if they do hatch. It is a matter of no small importance to keep down lice and other parasites on seting hens as much as possible.

Setting hens should have an opportunity of dusting themselves by being provided with a good dust bath. But some hens will not dust themselves for some reason. In that case the hen should be thoroly dusted with some plan to hold the hen by the feet and let the powder sink down between the feathers. It is also a good plan to dust

der should be applied under the wings, between the legs and around the vent. A little insect powder sprinkled in the nest before the eggs are set will also help to keep down lice.

If eggs are set as early as March not more than eleven or twelve should not more than eleven or twelve should be placed under a hen. While the air in a warm room or cellar may not seem cold, at the same time it is not summer heat and eggs are apt to chill on cold days. The developing embryo is an exceedingly delicate organism in the early stages of its development, and too much care cannot be exercised in guarding against the eggs being ed in guarding against the eggs being unduly exposed to a temperature of 70 degrees Fahrenheit or lower. Under these circumstances during the early part of the hatching season, better results will be secured with ter results will be secured with a smaller than a larger num-ber of eggs. In the process of

incubation heat is the controlling factor for success. Thus the conditions surrounding a setting hen have much to do with the production of a good number of vigorous chicks.

Many poultrymen do not disturb a setting hen at all while the hatch is

setting hen at all while the hatch is coming off. A great deal, however, depends upon the hen. Some hens are very restless, while others are clumsy. They may break the eggs or crush the hatching chicks The poultry-keeper must be governed by circumstances as must be governed by circumstances as to the best course to pursue. For my own part, I usually remove the chicks from ander the hen, several times during the hatch. The hen is carefully removed and the eggs examined. With some hens I leave them entirely alone. If chicks are removed I keep them in a flannel-lined basket, cover them with a knit wool shawl, and keep them in a warm place. Many a chick that would not otherwise be able to get out of its shell because of its being crushed can thus be saved by a little care and attention. By paying heed to just such details as those outlined above, a good hatch may usually be above, a good hatch may usually be secured if the eggs have been pro-duced by heathy, vigorous stock:

THE VICTIM.

It was a wizened little man who appeared before the judge and charged his wife with cruel and abusive treatment. His better half was a big,

"In the first place," asked the judge, "where did you meet this woman who has treated you so dreadfully?"
"Your Honor," replied the little man, "I never did meet her. She just kind of overtook me."

Don't try to raise chicks on corn the hen thoroly before setting her on the eggs. In that case the insect pow-commercial chick feed.

ANSWERS TO HEALTH QUESTIONS

By Dr. Hirshberg

A.—Eat plenty of green vegetables, spinach, rice, water creas, young peas, vogetables with salad oil, rigs, cereals, stewed pears, prune juice, prunes, carrots, fresh fruits and dried fruits. Sieep at least 10 hours in the 24 in a weliventilated room, and be outdoors in the fresh air and sunshine as much as possible. Take six charcoal tablets atter meals, a tablespoonful of milk of magnesia before meals and a wineglassful of olive oil about half an hour after meals.

Mrs. E. J.P., Sudbury, Ont.: Q.—Kindly advise a remedy for fingers that go to sleep and the joints ache.

A.—Apply a small electric battery to the painful parts and massage the fingers. Hot applications and dry heat also help.

Mrs. R.M., Lindaay; Q.—Kindly advise a remedy to help one decrease the weight. I have tried dieting and exer-cise without avail. A.—In connection with dieting and active exercise take a corpus intermediately after meals.

A.—Head noises and hearing may be benefited by a small electric battery used in the ear. Apply a little of 6 grains of ammoniated mercury to half ounce of white vaseline to the nostrils twice a day. But an operation shelling out the tonsils and adenoids, and compressing the turbinate bone of the nose is better.

M.S.F., Toronto, Ont.—Q.—Kindly advise what I can do to make my hair more crisp. It is very soft and will not stay parted.

A.—Purchase some quince seed jelly at the drug store and add a little rose water to this. This will help the hair to curl and in this way will also help it to stay parted.

R.J.E., Toronto. Ont.—Q.—1—Kindly advise what will help red hands.
2—What will remove dadruff from the hair?
3—Kindly advise a remedy for perspiration about the legs.

A.-1-Just after a wash or bath and while still wet, dry the hands with the

A Mother of Four. Toronto: Q.—1. My daughter has a sore spot on her tongue. It comes in the form of a pimple, cracks and then spreads in a ring. Kindly advise a remedy.

2. I have an unnatural stare in one eye. What will remedy this?

3. When I sit down my spine seems to touch the chair and becomes very sore. What do you advise for this?

A.—1. This may be due to some error in the tooth paste or tooth powder or some disturbance of the stomach. Find the cause and correct it.

2. Have the eyes examined by a specialist and the correct glasses made.

3. Sit on a cushion, have the spine massaged, also an internal examination made.

C.F. Toronto: Q.—Kindiy advise a remedy to relieve an itching sensation of the skin. There is no rash, the flesh simply itches. A.—Apply each night to the affected parts a little of the following: Calamine, 2½ drams; zinc oxide, 2 drams; phenoi, ½-dram; glycerine, 2 drams, and lime water and rose water enough to make

Mrs. J. D., Toronto: Q.—Kindly advise how I can increase the flow of breast milk.

A.—Never drink porter, malt, liquors or beer to make breast milk. That is a ter-rible fallacy of old doctors. It really dries up the milk. The fluids which make milk in the human breast must hot centain one drop of alcohol. They are

Perplexed, Toronto: Q.—Since my child was born, seven months ago, I have been week and constipated. Kindly give me your advice.

A.—Eat plenty of green vegetables,

A.—Eat plenty of green vegetables, spinach, rice, water cress, young peas, vegetables with salad oil, rigs, cereals, stewed pears, prune juice, prunes, carrots, fresh fruits and dried fruits. Heep at least 10 hours in the 24 in a well-ventilated room and be outdoors in the fresh air and sunshine as much as possible. Take six charcoal tablets after meals, a tablespoonful of milk of magnesia before meals and a wineglassful of oilive oil about half an hour after meals.

A.B., Toronto; Q.—I am a girl 16 years

A.B., Toronto: Q.—I am a girl 16 years of age and was born without any eye-lashes or eyebrows. Kindly advise it there is any way to make them grow.

A.—Skin grafts with hair roots in them may help your condition. Consult you doctor about this treatment. Hard Working, Toronto: Q.—Is there my way to remedy "pop-eyes," due to wothyropexy goitre?

A.—Operation on the goitre usually takes the eyes less prominent.

A.E.S., Toronto: Q.—Kindly advise what I can do for bleeding gums. I have had my teeth attended to by a dentist, but the gums are still in the same con-

A.—The gums must be hardened by pecac and glycerine. Use a good cream or paste for the teeth.

M.C.A., Toronto, Ont.: Q.—1. My little firl's legs are always twitching when she is asleep. What do you advise for this? 2. My mother, 64 years old; has fainting and dizzy spells. What will neipher?

A.-1. Something is irritating the child. Sometimes the adenoids or infected joints or some other trouble have to be searched for and corrected.

2. It is advisable that your mother avoid all excitement, obtain lots or sleep and rest and do not let her exert herself. She should keep the bowers active; avoid hot dishes, sait, pepper and other condiments, seasonings, highly cooked foods, muts, peas and beans and drink three quarts of distilled water daily. Have her take a Bulgaria tablet with the meals.

Mrs. M.D., Toronto: Q.—Kindly advise how to increase the circulation and qual-ity of the blood. A.—Obtain plenty of sunshine and out-door exercise and keep the bowels active. Eat sood nourishing food and take pure cod liver oil.

G. E.. Toronto, Ont.: Q.—Kindly advise a remedy to help one who is troubled with constipation.

A.—Eat plenty og green vegetables, spinach, rice, watercress, young peas, vegetables with salad oil, figs, cereals, stewed pears, prune juice, prunes, carrots, fresh fruits and dried fruits. Sleep at least ten hours in the twenty-four in a well-ventilated room, and be outdoors in the fresh air and sunshine as much as possible. Take six charcoal tablets after meals, a tablespoonful of milk of magnesia before meals, and a wineglassful of olive oil about half an hour after meals.

Mrs. C. H. Toronto, Ont.—Q.—1—Kindly advise a remedy to remove freekles from my little girl's face.

2—The skin on my hands and face is very dry. What can I do for this?

3—What will make brittle nails on the fingers softer?

A.—1—Salicylic acid used in the form of a plaster mull is good. Most so-called freckle remedies contain mercury and may cause serious internal trouble if employed. In any case, no matter what is used, freckles usually return, and if the skin peels it is hetter to stop the use of all remedies, because more harm

A.—Take 5 grains of carbonate of iron after each meal.

D.C., Toronto: Q.—What will relieve dropping in the back of the throat? I had my tonsils and adenoids removed years ago.

Seventeen, Toronto, Ont.—A.—If you will send a stamped, self-addressed envelope, repeating your query, I will be slad to advise you.

vise a remedy for cold feet.

A.—Cold feet come from loss of health, sleep, poor food, over dressing the feet, and keeping them too warm, wrong food, also high blood pressure. The feet are kept warm better by wearing thin hose and low shoes, cold baths and vigorous massage, and active exercise outdoors, especially walking, than by inactive, indoor life.

R. B., Toronto, Ont.—Q.—1. Kindly give a remedy to thicken the eyelashes.

2. What will make the eyebrows heavy?

A.—1. White vaseline applied to the eyelashes each night will promote the growth.

2. Cocoa butter, electricity, ½ dram capsicum vaseline to an ounce of white vaseline or ammonia liniment massaged into the eyebrows will help the growth.

F. A. H., Toronto, Ont.—Q.—Will you kindly tell me what will cure writer's cramp? I work in an office and have been troubled with it of late. A.—You should take a short rest. The arm affected should not be used for a time. Try massaging it, electricity may be used, too.

E. R. H., Toronto, Ont .- Q. Will you A.—Massage it with olive oil, sweet oil, or cottonseed oil. Eat oily, hot, greasy rich and highly seasoned foods, sweets, pastries, chocolates and thick gravies. Join a gymnasium and learn to swim. Take an active interest in outdoor sports. A tablespoonful of olive oil taken about half an hour before meals is also beneficial.

the feet smaller, but dancing exercises help to make the feet more slender. 2. The hair can be kept light without bleaching it by washing it in boracid acid water every three weeks. 3. If you will use clean (disinfect with formalin), hair brushes and combs; massage the scalp 3 times a day until it is red from friction with cold water—tothing else—and rub in any good liquid sulphur at night, then wash off with castile soap in the morning, it will save your hair.

I. D. K., Toronto, Ont.—A.—If you will kindly send a stamped, self-addressed envelope with your query repeated, I will be glad to give you the desired information.

M. M., Toronto, Ont.—Q.—I am a young girl of 22, and my hair is turning grey. Will you kindly advise me what to do for this?

A.—Use burnt cork in the form of crayon grease paint or home-made with vaseline. Fluid extract of walnut is also years good.

A. P. Toronto, Ont.—Q.—Will you please tell me if there is anything that will cure the drink habit? A.—The cure is best carried out in a hospital or sanitarium. It is not successful at home. The drugs are dangerous except in a physician's hands.

I. C. M., Toronto, Ont.—Q.—I have been troubled lately with a continual noise in the head, which makes my hearing very bad? Could I have caught cold? What would you advise doing for this? A.—Have the nose and throat examined, sometimes the fault is found therein. Apply a little of the following to the nostrils each night: Ammoniated mercury, 6 grains; white vaseline, 1 ounce. Use the electric battery in the ears, and apray them with warm boracic acid water twice a day.

By ADELE PETERS McLEAN

Away in the East, where God's throne abideth,
I watch for the glimmer of God's gracious light;
Away, where the earth the horizon divideth,
Where the God of our glory is kept from our sight.

Away over hills and o'er vales of earth's making, Away over palaces, dull of the light; Away where the clouds their dew tears are shaking,

Where shadows and darkness are using their might. I watch and I wait, with blinded eyes striving

To pierce to the innermost core of the light Shadows, the darkness is forcefully driving; Sweet, quivering light rays are dazzling the sight. But how can a mortal, born so full of shadows.

Peep into the censor of God's cladsome light?
The rays glinting thru to glorify meadows
And make of the world an angel's delight.

Yet I peep, and I glance, and I shiver with gladness
At the first virgin beam that proclaims, all of light;
The world is born fresh from its pitiless sadness,
And angels divideth the wrong from the right. Yet I peer and I strain, all my weak, stirring soul

To gather the glimmering, sparkling flashed light; I feel the bless'd thrill that proclaims all a whole, God and the universe breaks on my sight.

'Tis the dawn, the gladsome, bless'd rising Of God's only Son, the Master of Light; All the vain shadows, the sun is revising, The glory of God is revealed to the sight.

IRISH LACE IS USED FOR NEWEST LINGERIE

Return to Certain Garnitures That Have Been Neglected During Recent Years.

THE NEWEST lingerie from Paris indicates a return to certain garnitures that have been neglected during recent years. This is especially true of Irish crochet lace, which now reappears on some of the daintiest of the underwear sent over from France.

This trimming is in direct contrast with many of the lingeric pieces, which are absolutely devoid of decoration, except in so far as one may term beaded seams and hemstitched edges a decoration. Nevertheless, there is reason to believe that American women will welcome the fine nainsock and linen undergarments with their inset motifs and edgings of lace and hand-embroidery.

"And Rose was much interested in the bird.

"Birds is shore sensible," she observed. "You kin learn 'em anything. I useter work for a lady dat had a bird in a clock an' every hour it uster come out an' say 'Chuckoo' jest as many times as de time was."

"Go 'long!" said Arabella incredulously.

"Shore thing" replied Rose: "and de

pieces, and some of these range in price—for the set—as high as \$500. To be sure, this represents exquisite hand work, such as may, with care, be handed down as heirlooms even unto the third and fourth generations.

While handkerchief linen, batiste and organdic are favored materials, silk linen also is approved by fastidious women. Sometimes it is offered in pale pink and again it is shown in pure white or in ivory.

A MARVEL OF TRAINING. Rose had called on her afternoon out

sion she would then have a home of her own, but of course the firm stepped in and dismissed the groom-to-be, and now there certainly is the home and happy lovers, but very shortly there will be no dollars forthcoming to pay the rent and supply the table, and then will come the awakening. Cases like this are happening every day. Girls are announcing on every hand that they are about to be on every hand that they are about to be married. They apparently see nothing serious about it, or do not think it a subject deserving of any serious considera-

nic, which must simply wear itself

Horatio Bottomley, editor of "John Bull," has been throwing a few dampers on the party in England who are rewomen of Britain to go to the farms, and there do the work formerly done by men. Writing to "Everywoman's" Mr. Bottomley says: "The women whom the cranks are trying to inveigle to the land in the form of farm laborers must think out the situation for themselves. They weather is warm, plenty of air must must ask themselves: Is this a step for-ward in the scheme of things or a long stride back into the Dark Ages? If I more air day by day until the plants were a woman I should look upon it as the latter. From early dawn until late at night the general farm laborer has to plants to be transplanted to the open ground. slop about in all kinds of weather. There are heavy burdens to be lifted, big, or from plants clumsy horses to be handled, filthy styes in the house. to be cleaned, weighty plows to be steered thru clinging soil, hay to be mown and pitch-forked on to wagons, the open, and the remuneration for all is not gilt-edged nor overwhelmingly tempting. Our agricultural workers have never been paid wages good enough to tempt city-bred workmen to throw men and women from the countrysidenot the countryside to the towns; and the whilst the war lasts wages on farms may be higher than they have ever been before, yet women must ask themselves: Will it last? Are they going into the country to learn something that will enable them to live in competition with men when beace comes again."

Then this man who is on the ground and who has been studying the situation and has been giving the most patriotic advice possible along many lines answers the last question by saying: "They are not; no amount of sophistry will explain away facts. Not one woman in fifty thousand will make as good a farm laborer as the ordinary man. They are not fashioned by nature to do it, because farm work demands physique and muscle; it calls for special hardihood to withstand the elements, and the man who says otherwise is talking clap-trap, or he is ignorant of his subject."

In summing up the situation the writer says: "Let us not build a fool's castle because it may look pretty. When peace comes our farmers will have to enter into competition with farm-grown foods of all kinds from many lands, including our own colonies. The sea will be free from all commerce destroyers, and competition will be very keen-so keen that the British farmer will have to get the most for his money he can in the shape of labor. Women will not be kept on for sentimental reasons; the fittest will be employed and in work of this nature—rough, hard, continuous and weary—the average woman will not be able to compete with the average man; it's a sheer physical impossibility and the woman will have to go. Now if she has undermined her health what is to become of her? We want to save the British farmer, but not at the expense of thousands of British women."

From a generally utilitarian standpoint, and as applied to England, the comments of Mr. Bottomley are probably correct. In Canada it is scarcely likely that women will ever be called upon in the thousands to go into the work of farmage. In the past, however, there have been cases in this pioneer country of ours where women have done their share of the hard work, just as well and just as generally as have the men, and while it is to be hoped that they will never be needed to go into the laboring part again to any great extent, still we feel

Have you noticed the epidemic of weddings that has swept over the country? Perhaps epidemic is not the right word in this connection, because marriage as a general thing is supposed to carry with it all kinds of untold blessings, and the word epidemic of this point, which would be far from the meaning meant to be carried forth to the public. The war of course is responsible for a good number of the picturesque weddings, which, if smiling faces and pretty bridal array-count for anything, give promise of leading the principals into a perfect garden of Eden. For such there is nothing but best wishes and the hope that the groom in khuki may come home decorated with the Victoria Cross, and may both "live long and die happy."

But there are other weddings for which it is hard to account except from the general disturbance of things, and the bysteria in the air which leads people to acts which in saner moments they would never contemplate. To illustrate:

Among the ready to take whatever risk there may be just to help along the situation as long at the annual meeting of the Imperial Order. Daughters of the Empire, will be one from British Columbia, which has already been introduced at the Vancouver branch by Lady Tupper, and which we may take for granted has met the approval of the women of the west, otherwise it would not have been passed on for consideration; this is that the order petition the federal government to see that provincial governments bring in a system of universal training, such as now prevails in Australia and New Zealand. The proposition seems to be one which, if carried out as the resolution indicates, could not but be productive of good. It is the opinion of many thinkers that if every nation were prepared for war the world would never know anything but peace. Universal training, however, might mean simply that men would be taught to use their muscless and limbs to the best possible physical advantage. It would, of course, include a knowledge of arms, but knowledge need not be abused, and to be sim

be bysteria in the air which loads people to acts which in saner moments they would never contemplate. To illustrate:

A few days ago a woman clerk in a big store cordided to a customer who was in the habit of leaving a weekly order and with whom she had come to be many and setting the people in this store. Why I never go down to the basement but the whole place is covered with rice. Someone just been married or just announced that she is about to be be and what they marry on, or how they can stford, beats me, Now just take a case. We had a nice sunart girl in this department who was getting twelve decided to continue the work of the same was a man who was not good at anything particular. Just knocking around in a general way and getting nine dollars a week, which was a good deal more than he was wort. Now you know the firm won't allow a man to marry on this samel was ear that for generations were whish. But what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her mind to marry this nine dollar a week man, and what did she do but make up her position to marry under the delusion she would then have a home of the first way to design the position to marry under the delusion she would then have a home of the first way to design the many of the work and the work would then have a home of the first was a new than the tensor of the day and string the tensor of the day and string the tensor of the first was many the content

GARDEN NOTES

An acre of tilled land, eight inches it is just something in the nature of an deep, is estimated to weigh 2,000,000 pounds. In applying fertilizers it is a simple matter to figure what is being supplied to the soil and the propor

An acre is 43,560 square feet. This is practically a plot 208 feet by 208 sponsible for the call to thousands of the feet, or a plot 104 by 416 feet. Estimates of quantities of fertilizers required for any given plot can easily figured.

> Transplanted plants must be shaded from the bright sun the first few days and watered carefully. If the ground from conservatories, hot beds or from plants raised in pots or boxes

Ground tankage is a product of slaughter houses and a good source of extremes of heat and cold to be faced in organic ammonia. It also contains phosphoric acid.

All seedling plants must be carefully handled and "pricking off," as the gardeners express it, is simply the to tempt city-bred workmen to throw transplanting of seedling plants from up their jobs in the towns to grapple with farm life; it has been the case that the towns and cities have attracted the they will have more room to grow stronger.

As soon as seedlings can be conveni-ently handled, transplant in pots or boxes, giving ample room on all sides The plant may be lifted with a forked stick without damage, altho professional gardeners invariably transplant

In addition to the plant food which stable manure contains it is valuable for the humus which it adds to the soil carries, which hastens the decomposi-tion of the manure and any other ve-getable matter that may be in the soil. The bacteria causes chemical action which makes plant food available. The best treatment for sod land be-fore plowing is to spread the manure evenly over the fleid and then disc harrow thoroly after plowing.

Soils, for convenience, may be classified under three heads: Sand, loam and clay, but there are many sub-divisions and combinations. Sand is coarse grained, and admits of free drainage of water, while the clay is composed of very fine grains that it together closely and hold the water.

Beets, carrots, salsify, parsnips and most of the root vegetables require a deep soil; that is, soil that has been worked deep enough for the roots to strike down easily without having to push thru a hard bed. Have you seen carrots with stumpy, irregular ends That is often the result of growing in too shallow soils.

Nothing Succeeds Like Failure.

His 1916 strawberry crop was just about out in two-but the stand is in fine condition for 1916.

Grapes were a total failure—but he takes the blame and is hunting for the trouble.

Celery was a partial failure—but he knows why.

Other things fizzled, too, yet this "one-horse farmer" is wholly optimistic. "What I could do in a favorable season is unknown," says he. "I is unknown," says he. haven't yet had that kind."

THE ROCKY ROAD TO SUCCESS By a Successful Father

T IS of course a truism that the boy born of wealthy parents, instead of having the proverbial spoon in his :nouth, enters life under a serious handicap. The youth of well-to-do parents who makes a distinctive suc-cess in this world beyond the coms entitled to a high measure of credit. learning the most valuable lesson in life, the one that enriches the experi-ence of every poor youth who is de-termined to rise and make something worth while of himself in this world. And that is the lesson of SELF-

The power of self-denial is the foundation on which real success is built. To be able to deny oneself of so cheerfully the allurements which beset the path of youth-not-merely those that are victous but those w'uch est accomplishments of ... successful

T is now quite generally conceded this, but it is not often that we raise a flock of large birds from samil parents. If one has a male that is undersized, but exceptionally good in

selecting and mating our breeding stock.

But how is constitutional vigor to be measured is the vital question. To my mind, there is only one absolute method, and that is to test our stock during the pullet and cockerel year.

Then the second year we would be is too small and refined it indicates in the second year.

The best specimens should possess medium-sized head, with short, short from the eyes to the end of the beak, broad between the eyes, with be of good size, bright, clear and snappy. The face should have a good healthy color.

The neck of the bird should not be

course we want to apply this test to the hen also, but if she is good layer herself we naturally expect her daughters to be good layers, if the sire is of the right composition.

The neck of the bird should not be too long, but fairly short, as such a reck indicates strength. It should be well curved, bringing the head well back over the front part of the breast, so as to give the specimen as compact any appearance as possible.

and practically useless to our domestic fowls, the shorter and plumper we get them the better. Birds with split or twisted wings should be rejected, as these defects are inheritable.

The back should be broad and straight, not only broad across the shoulders just back of the neck, but the breadth should be carried back to the tail. One of the great weaknesses of birds is the narrowing of the back from neck to tail. Avoid the double pitch-proof type of back. This section is an extremely important part of the specimen, as it forms the framework of the body. Again, the reproductive organs its just below the back, and we want these organs to have plenty of room. This portion of the specimen should be long as well as broad, but we do not want the length to be out of proportion to the breadth and give it a narrow appearance.

The tail should be of medium length, well saveed and carried neither too.

The tail should be of medium length, well spread and carried neither too high nor too low. When the tail is carried too high it makes the bird appear short and sawed off behind, and when carried too low gives it and and whon carried too low gives it a droopy appearance. Most of our varieties look best carrying their tails at an angle of about 45 degrees.

TO FORTIFY THEMSELVES.

Tired Nervous Mothers

A mother who is overworked, tired, nervous, irritable—on the verge of hysteria makes an unhappy home. The very thing she does not want to do.

Such a condition often develops a serious derangement of the feminine organs, causing irritability, despondency, sleepless nights and nervous prostration. At such times remember there is a tried and true remedy,

Lydia E. Pinkham's Vegetable Compound

For forty years this famous Vegetable Medicine has been conquering the ills of women and the very best proof of this is such letters as these:

Northport, N.Y.—"I suffered from a female trouble and doctored for a time, using all kinds of treatments. The doctor said I would have nervous prostration. I was so nervous and had such bearing down feelings and

Denison, Texas.—"After my little girl was born two years ago I began suffering with female trouble and could hardly do my work. I was very nervous but just kept dragging on until last summer when I got where I could not do my work. I would have a chill every day and hot flashes and dizzy spells and my head would almost burst. I got where I was almost a walking skeleton and life was a burden to me until one day my husband's step-sister told my husbandif he did not do something for me I would not last long and told him to get your medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three doses I began to improve. I continued its use, and have

Bridgeton, N.J.-"I cannot speak too highly of Lydia E. Pinkham's Vegetable Compound for inflammation and other weaknesses. I was very irregular and would kept dragging on until last summer when I got where I could have a chill every day and other weaknesses. I was very irregular and would headaches, and my housework kept me on my feet so rouch that I had to do something, and I was persuaded against my will to try Lydia E. Pinkham's Vegetable Compound. I found the first bottle helped me and I continued its use so I am able to do all my work. I got where I was almost a walking skeleton and life was a burden to me until one day my husbandif he did not do something for me I would not last long and told him to get your medicine. So he got Lydia E. Pinkham's Vegetable Compound, taking it regularly, and I now consider myself a well woman. I have told lots of women about it. Some would rather pay a doctor, but some have tried it and found it helped them as I said it would."—Mrs. John Alexander, Northport, N.Y.

Isaid it would."—Mrs. John Alexander, Northport, N.Y.

Kept dragging on until last summer when I got where I could have a chill every day and hot flashes and dizzy spells and my head would almost burst. I got where I was almost a walking skeleton and life was a burden to me until one day my husbandif he did not do something. I later took Lydia E. Pinkham's Vegetable Compound and felt a change for the better after the your medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and after taking the first three dable Compound for me, and other weaknesses. I was developed and other weaknesses. I was developed and other weaknesses. I was developed and other weakn Sometimes I would be so miserable that I could not sweep a room. I doctored part of the time but felt no change. I later took Lydia E. Pinkham's Vegetable Compound and felt a change for the better after the second day. I took it until I was in a good healthy condition. I recommend the Pinkham remedies to all wo-

For many years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No one sick with woman's ailments does justice to herself if she does not try this famous medicine made from roots and herbs, it has restored so many suffering women to health. Lydia E. Pinkham Medicine Co., Lynn, Mass.

THOUGHTS ON THINGS

By ISABEL PATERSON

HE name of Garibaldi came out of Italy the other day, in some connection that I cannot recall

name itself seems to stand for all the incredible hardships that men thruout the ages have suffered for conscience and patriotism. money, except as counters to play his game with. To one like myself, who find the simplest arithmetical opera-

but for the free Italy of his dreams, money for love just as truly as Remtold the men who fought with him that brandt painted and Shakspere wrote told the men who fought with him that he and Italy could promise them nothing at all but a hard and dangerous life and a violent and almost certain death. Yet they followed him and the dream, and few ever turned back. He even found a woman to share his life, just as it was and must be. She lived in the saddle and slept on the naked earth beside him. Apparently she never regretted the beauty and youth and luxury left behind.

Is it not strange?

"Not at all," said a friend to whom I was thinking aloud. Don't you see that once they committed themselves, it was the easiest thing in the world? It was definite, a plain road before them. Their minds were at ease, once they had made a final choice. Even their bodies were at ease, in spite of the hardships, because they were allered, we may be a solution.

Is a triple as truly as Remarked and Shakspere wrote for the same reason. And he was a "big man" because he happened to be born in an age of large financial operations. It gave him his chance to express himself.

Napoleon, at the age of 20, thought seriously of suicide. (Yes, I know; he would hardly have thought of it frivolously.) The alternative, which he prepared to accept, was the life of a gentleman farmer in a small way. At 23 I believe he was a general, The times had altered, not Napoleon. His buried aspirations were released by the earthquake shock of the great revolution.

Grant was 40 and a failure when the civil war broke out. Ten years later he was president of the United States. Had he been born 20 years sooner, or later, he might have died a failure.

the hardships, because they were already dead men, relieved of the anxiety of self-preservation. They were free The choice may have been difficult but once it was made, everything was besutifully simple. It is the ordinary, hamdrum life that is hard and wearing. In times of stross, people seldom ask themselves whether life is worth living. They even believe that death is worth dying."

Turned the Page.

So I turned over the page, but had the some back to the issue from another angle in a moment.

"Is that why the professional optimist finds the readiest market for his wares among the comfortable, the bourgeois, and in times of peace?" I asked. "I suppose the well-fed ones, not having that inner conviction, want to be told again and again just how pleasant their lives are. Otherwise they are bored." I had just found a new "message of contentment." lately sent out by James Whitcomb Riley (who should have known better). This is one verse of it:

"I turned the Page.

Chilid. Children have rights, Miss Key points out. One must concede that they have a case against their parents. They did not choose them; and nowadays they are quite prone to say so to those parents. And Miss Key explains somewhere that parents should not thwart the development of their children. Children are represented as growing organisms, with parents above them like a paving stone over a young plant. Always, in this theory, the children are the radicals and the parents conservatives.

But the parents, They out. One must concede that they have a case against their parents. They did not choose them; and nowadays they are quite prone to say so to those parents. And Miss Key explains somewhere that parents should not thwart the development of their children. Children are represented as growing organisms, with parents above them like a paving stone over a young plant. Always, in this theory, the children are the radicals and the parents, and nowadays they are parents. They did not choose them; and nowadays they are unit parents. They are the parents. They did not choose them; and nowadays they are parents. They did not choose them; and nowadays they are parents. They did not choose them; and nowadays they are parents. They did not choose them; and nowadays they are parents. They did not choose them; and nowadays they are parents. They did not choose them; and nowadays they are parents. They did not choose them; and nowadays they are

s one verse of it: Then take things as God sonds 'em Se more and more contenteder, Without a-askin' why."

Without a askin' why."

Now that is simply nonsense, and pernicious nonsense withal. It reminds me of the old Scotch woman who objected puritanically to a stained glass window in the kirk. "I prefer the glass juist as God made it," she signed piously.

If we really took things as God sends them, we should walk about in our natural integument, eat roots and pernicious and dwell in cayes or tree.

There is nothing else left for the children; we have sone about as far

corns, and dwell in caves or tree. fops. We should, also, make signs and grunt at each other instead of writing poetry. Which is a fact for Mr. Riley to ponder every time he looks at

person who lives with an optimist."

If we took things as they happen to be at present, even with all the fruits of our ancestors "divine discontent" to the good, we should never advance to marry the heroine. She were mother's heart if she (the daughter) ever married. Mother was an anarchever married. the good, we should never advance another step in any line of human endeavor. Women would be petrified into pannier skirts and piebald shoes, as it were, for all eternity. In the year the looking glass, like Alice, and come out on the other side. And I plead out on the other side. And I plead would still grind out "Tipperary." When Gabriel came to blow his trump he would interrupt many worthy peo-ple in their mirthful contemplation of Charile Chaplin juggling a custard pie.
We might, perhaps, put up a tent or
so en the site of the house of parliament, but that would be stretching a
point: following Mr. Riley's instructons exactly, we should simply let the winds of heaven disperse those historic ashes, and forgot all about it, con-

tentedly.
But the factor that makes life not only endurable, but even exciting and pleasurable, is that we do not have to take things as we find them, and may spend our spare hours in perpetually spend our spare hours in perpetually asking why. Omar wanted to shatter the world to bits and then remold it he world to beart's desire. He was nearer to the heart's desire. He was born out of time, and in the wrong place, the unquestioning east. spirit of the western world, the Cau-casian world, is forever at work shattering the world to bits, occasionally considerable noise and anguish and explosiveness; and always remold-

Lack of Forethought. This question of being born in due season and in one's proper environment "In Zululand," says a proverb, "the biggest flar is king." Fashions in success vary with time and place. The great financier of today would be individualism run mad.

connection that I cannot recall, except that it had to do with the war. Everything in the world touches the war at some point nowadays:

This was the son of the great Liberator who was mentioned. But the effect, he was a millionaire. He told me that he liked the green of finences. And such theirs are not readily interchangeable. A man must love his work to make much headway with it. He must love the work itself even more than the fruits of it. I once asked a millionaire—I should add, perhaps that I only know one—why, in effect, he was a millionaire. He told me that he liked the game of finance. He really did not care over much for

Garibaldi, speaking not for himself but for the free Italy of his dreams, but I realized at last that he made

civil war broke out. Ten years later he was president of the United States. Had he been born 20 years sooner, or later, he might have died a failure. Therefore, if you are contemplating being born, it would be well to pay

some heed to the when and the where All Are Born Children. Of course, if you take Ellen Key literally, you may think you can't go wrong. She says this is the century of the child, Practically everyone is born

But the parents, if they would be so ungracious, have an obvious retort. Neither did they choose their children. They really didn't, you know. Look at some of the children of your friends, and ask yourself if any sane person could have chosen

children; we have gone about as far in radicalism as possible. I mean the advanced few have. Such as Ellen Key and Mrs. Havelock Ellis and Isadora Duncan, and Emma Goldman and Inez Gillmore. I first realized that quite lately, on reading a novel depicting a very "advanced" love affair. The hero wanted to marry the heroine. She

child is perpetually shocked and hor-rified at the parental outbreaks. For inflexible judges in the world. And there is no tradition whereby a child may disown its parents. Therefore None except the entire abolition of the home. And as soon as you have abolished the home, the radical thing

to do will be to re-establish it. Nothing Too Ridiculous. You think that is too ridiculouseither way, gentle reader. Either that the home can't be abolished, if you are a good stand-patter, or that being once done away with, nobody would want it back? Nothing is too ridiculous for humanity. Imagine the diffi-culties of a super-radical trying to restore the home! The arguments he would have to meet! "What! turn over the tender, growing mind of child to the arbitrary influence of a single person, and that person the one least fitted to deal with it, the parent, blinded by the prejudice of affection and intoxicated with the possession of absolute power. It would be criminal Who knows less of the real hature of is one deserving of more attention than a child than its parents? The parent it receives. I cannot but think that is the one person in whom the child most of us stand convicted of a lack of forethought in the matter.

great financier of today would have been a nonentity in feudal times, when the fighting man led. The fighter stood

ENTER THE "DOUBLE TRAIN" TALE OF TWO WHITE HORSES

On Short-Skirted Evening Gowns It's Decidedly Striking

By ANNETTE BRADSHAW

ASHION'S latest whim is to decorate the short-skirted evening gown with a long train. This is in itself a she elects to hang a double train over the full, short skirt, and adds long, pointed sleeves made of a single layer of filmy material the effect is rather startling to say the least.

In this interpretation of the doubletrained gown, silver-embroidered white tulle, turquoise-blue, brocaded, Georgette crepe and white tulle are effectively combined.

The flaring skirt is formed of layer upon layer of billowy white tulle, each edge picoted with silver. The uppermost layer is formed of the tulle with a wide border elaborately embroidered in silver threads.

The bodice is short-waisted, and is a delightful combination of the tulle, brocaded satin and silver-embroidered

gauze. The materials are gracefully swathed about the figure in clinging A single layer of the tulle is used to form the flowing sleeves, which ter-minate in long points weighted with

ilver tassels.
The most distinctive feature of this gown is the double train of the tur-quoise-blue, brocaded satin. Each of quoise-blue, brocaded satin. Each of the two sections is gathered with a narrow heading at the top, and is attached to the frock in, such a manner that it hangs in soft gathers over the hips, spreading its two feet of length behind the skirt as the wearer moves. How does the dancer manage her double train? She simply loops a half-train over each arm, after the manner of a scarf, and goes merrily dancing on her way unhampered by any trailing widths of material.

A Modern Novelette BROWN EYES vs. GRAY BY THE PACER

Chapter One.

T WAS a clear cold day in February, and as the car approached I casually noted the number 2323. Railway car steps resembled the High Park toboggan slides; however, with the assistance of the equally slipperary iron rail, I managed to get aboard without skidding.

"Move on up to the front, please."
I shivered invountarily as the stentorian tones sounded in my left (best) ear. With a careless look of indifhalf way in my travels. I looked into a pair of brown eyes, and stopped dead. Not all the conductors in the world could have altered my purpose or position. Every few those appealing eyes looked up into mine and I was strangely stirred. She had other attractions too-round rosy cheeks, saucy little nose, and rebel ous curly strands of hair that played hide-and-go-seck with her dainty

little pink cars. It was surely love at first sight, was a complete capture, and the little minx knew it; the demure look in her eyes betrayed her now and then.

Chapter Two. Why should one's corner arrive so quickly? I was still spell-bound. What to do? Here at last was my fate, and how was I to let her know? Should speak to her and get promptly crushed? There was a proud tilt to that glorious little head. Who was she? Who was she? One of the world's pampered ones, anyone could se that at a glance, Going downtown to shop! I had heard that girls love to take advantage of early morning bargains. Maybeoh the thought was maddening-she was going down to buy some little article for her trousseau. Was I too

late? Oh the misery of it! Fifteen blocks past my corner, and was still in torture. Should I let everything go and follow my fate? Supposing I did, what then? My position lost, what had I to offer this adorable creature? It was with a sad heart I left her.

All day long a pair of mischievous brown eyes played in front of me, they danced on the calendar, on my books, even on the point of my pen. Many mistakes I made that day, and nine times out of ten lost my position, only to regain it in the tenth.

Chapter Three. One day at noon I was in a desperhardly even time for a bite Happening to pass a small I figured that here I might get served quickly. Entering, I selected a table near the door, and was

"Have yer gave yer order, Sir?" I looked up—into her eyes. Men have been asked their sensations when drowning, but who can describe the frightful sensations that chased up and down my spine? How I ever managed to give an order is still a question with me. "You ain't et anything, Sir, ain't them rolls fresh?

Chapter Four. It took another two weeks to quell the disappointed tumult in my heart, and then came the remembrance of

we admire. Rather we admire what we love. The young lover thinks the mole on his lady's cheek is a criterion of beauty. No woman can be charming without a mole, he holds. And lover dotes so fondly as a parent. True, we can be angered against one we love—and then we are triply angered. It is easy to forgive our enemies, but how shall we forgive our friends? Therefore again a parent cannot do justice to a child, even less in anger than in affection. All this against the restoration of a home. But the argument is too reasonable o hold. If it comes to a question of justice, who wants justice anyway?

of hope stretching from heaven's blue o her house.
Ah! Her house at last. And now for her dear forgiving self!
"Miss Margaret is not in, Sir."
"Not in?" Did you give her my message?
"Yes, Mr. John, but she's gone to the theatre with her flance."

Encouraging New **Breeds**

S HOULD new breeds and new varieties be encouraged by the varieties be encouraged by the poultry press? is a question often In fact, we never heard or read of the development of either a new breed or a new variety without asking ourself the question, what's the use?

At this time our friends in poultrydom are agitating themselves over the question whether or not the breeding of Russian Orloffs should be encourag-We are continuously admitti both new breeds and new varieties of old breeds to our standard, and we have others now knocking at the door for admission. We already have both breeds and varieties in large numi and the question is, should we courage more? We have breeds cauty, breeds for utility, breeds for meat, breeds for eggs and breeds which ombine in a way all the above, nevertheless I think every encouragement should be lent to the development of new breeds and new varieties. In fact, everything should be done that will encourage the raising of poultry and eggs, because this country has passed the period of cheap beef and pork.

At the present price of meats, it is fard to see how the laboring man with large, growing and dependent family, con furnish the necessary meat for a proper diet. The extensive breeding of oultry will tend to solve the question more and cheaper meats for the peoole. Under the great war stress the English Government just now is putting forth every effort to extend poultry breeding. Its agricultural board is tegging the people to raise more fowls and produce more eggs. When they could import from the surrounding nations, they did not feel the sting of high meat prices, but now they do. man of moderate income feels it in this country, and the only remedy is the production of more poultry and

But, you say, all this proves nothing is to new breeds and new varieties.
Let us see. The more people who can be interested in poultry the better the chances for increased production of poultry and eggs. Every boy that is poultry and eggs. Every boy that is made interested in some feathered pet will in the course of time produce some fowls and eggs for the table and for the market. We are not all constituted alike. What one may admire may not be admired by another. There is a constant desire for something new and different. There are those who, like our lady friends and their fashions, want the newest and latest, whether it be the best or not. There are those who want something entirely different from their neighbors. Then there are those who really enjoy the development and

my battalion had tired of the novelty or trench life, we passed many long hours in retailing imaginary audiences but you received the welcome you hours in retailing imaginary audiences picturesque accounts of our glorious and blood-curdling adventures. Then one night the mailbag brought a local newspaper from home, and we found that some over-impulsive youth had committed his descriptions to the press. We read there how we had been shelled by our own artillery and forced to vacate our position, how later we had advanced thirty yards and held the new line against a four hours' attack; and how (while in reality we were calmly doing sentry in a quiet bit of trench) we had brought undying glory on the regiment and our native town.

"I think it wise therefore to state

in the real production of poultry products.

The fancier talks chicken, and while he may not interest everybody in his particular breed, the net result of his talk is more breeders, both in the fancy and out of it.

TIME TO BE PATIENT.

Previous to the war, but there is no reason for thinking they were other than patriotic French peasants, tilling the same land and living the same life year after year, after the issuin or the typical peasant classes of Northern France. But, at whatever period of their history, their patriotism was poisoned, and they followed in the wake of Demos at the promise of Defeation. was poisoned, and they followed in the wake of Demos at the promise of pleasure and reward. Perhaps some cunning German whispered a magic word in the old woman's ear, perhaps

> two miles of the front-line trenches they were occupied in this way for a considerable time without disturbance. Then came a period of systematic snelling, apparently just when all the men were near at hand every time. A number of men were killed, and it benumber of men were killed, and it became evident that some sign must reach the enemy as to when to fire, otherwise such systematic shelling could not take place. The careful observation that followed continued long before it was rewarded. When the theories of the observers were tested they showed a singularly cute and accurate method of signalling. The farmer's son had two horses, one white and one chestnut. The observation showed that sometimes he would plough with one, sometimes with the other; sometimes he left his white horse to graze on a strip of meadow, sometimes he left the brown one, and this proved to be a system of alternate

sian Symphony.

Evelyn Starr and Pauline Donalda Are Prominent in Hippodrome Program.

Evelyn Starr, the brilliant young Canadian violiniste, added to her laurels at a concert given at the New York Hippodrome, on Sunday evening, April 9, when she appeared as soloist. Her program numbers in-cluded Lalo's "Symphony Espagnole," of which she gave a particularly fine interpretation. She did especially brilliant work in the final movement, rondo, altho her playing of the andante was charming. At her the Hambourg Conservatory were evidence of April 8. There were evidence of the training and influence of the training and influence of Professor Hambourg. The second appearance she gave a poem of Fibich, a scherzo-tarantelle of Wieniawski, and the fifth Hungarian dance of Brahms. These were given with the proper amount of dash, Miss Starr entering completely into the Sousa and his Band had only four

numbers, which is disappointing indeed to the admirer of the "March King." However, these numbers, themes from Mendelssohn, the "Slavonic" rhapsody of Friedmann, the Lands" were played in a manner which partially repaid in quality what they lacked in quantity.
Others who appeared were Pauline Donalda, soprano, who sang works by Meyerbeer, Burleigh Bizzet, Lan-don Ronald and Kramer; Robin Ellis-Clendinning the Irish humorist; the Manhattan Ladies' Quartet, and Mile. Lovena and Gadeskoff, the Russian dancers. A noteworthy feature was the singing of choruses by Mendelssoln and Hayden as given by the Hale-

gog chorus under the direction of Leon M. Krammer. mer and Mrs. McCully, violin; Signor Carboni, Miss Hughes, vocal, and Professor Hambourg's pupils assisted. The audiences at these weekly 29th, 2.15 p.m. Admission 50c and \$1.00. grateful for the musical benefit they derive from the performances and remarks which professor occasionally chooses to give in explaining the Grieg:

WOMEN'S MUSICALE CLUB gave a very fine con-cert at Columbus Hall on Wednesday evening, April 12th, in aid of the Secours National. There was a very large and fashionable audience and the program was one of the best UNDER NEW CONTROL

UNDER NEW CONTROL

"In the city during the present season. The Choral Club, of which Peter C. Kennedy is director, sang the Indian Serenade, Beresford's "Like Some Flower," from "Prince Igor," Borodin; "The Maidens of Sandomir," from "Boris Godounow," Moussorgsky: "My Love Is Like a Red. Red Rose," Hastings-Harris; "Robin Adair," "The Lass With the Delicate Air," Arne; "Most Gentle Moon," Harrison, and "The Maiden and the Birds," Neidlinger. Their singing revealed fine interpretative skill on the part of the director; the skill on the part of the director; the voices were uniformly good, the delivery commendably distinct and the variation of tone and expression worthy of praise. Lenor Ivey took place with regard to the Russian Symphony Orchestra which will place it upon a more substantial basis and enable the founders to realize more fully the aims and ambitions which have been theirs since its inception.

The orchestra was founded in 1903 by Jacob Altschuler, a brother of the conductor, Modest Altschuler, His object was to bring tegether a body of musicians of Russian birth, interested in the music of their fatherland, who were at the same time desirous of making it one of the outstanding of musicians of Russian birth, interested in the music of their fatherland, who were at the same time desirous of making it one of the outstanding of musicians of Russian birth, interested in the music of their fatherland, who were at the same time desirous of making it one of the outstanding on the program. The Academy String Quartet contributed the G. Minor, Haydn, and the A. Major, Beethoven, emphasizing their artistry to a superlative degree, the works of their comparison of the skill. Ernest Seitz, as always, was the success which attended the onterprise in New York soon became noised abroad and so frequent were the orthogonal a

tra must be given a large snare of credit for the widespread populority which Russian music has attained in America. Those who have had the guidance of its artistic affairs have constituted themseyes ploneers in that respect and many compositions now familiar had their first hearing in concerts given by this organization. Among the composers who have here ited from these efforts might be mentioned Glinka, Moussorgsky, Rimsky, Cui, Gretschestraline, Strawing, Arenic, Tappolitoff-Ivanoff, Shollus, Arenic, Tappolitoff-Ivano orchestral concert.

"The final musicale of the Women's Art Association, arranged by Dr. Edward Broome, was held on Wednesday, April 19th. The quartet, Winifred Henderson, soprano; Mrs. Mary Hallman Schell, contralto; Jack White, tenor, and Arthur B. Brown, baritone, gave selections from "In a Persian Garden," acquitting themselves with credit, both in regard to tonal quality and shading. Later these artists also sang a group of solos, "The Soldier's Betrothed" (Cheminade', "I Wonder Why" (Edward Broome), by Miss Henderson, "After Sunset" (Campbell-Tipton),
"God Make Thee Mine" (Haydon "God Make Thee Mine" (Haydon Wood), by Mr. Jack White. Three songs from 'Loye' in a Life" (Browning, Gena Branscombe, by Mrs. Schell: "Lorraine Loree" (Capel), by Arthur R. Brown, and a duet. "Laughter Wears a Lilied Gown" (Gena Branscombe), by Miss Henderson and Mr. Brown. These vocalists, with their fine dramatic ability, proved a delight to the enthusiastic audience present. Dr. Broome, accompanied the various numbers, making the program one of the most interesting and artistic of the many given this season. In the absence of Mrs. F. Mercer, president, Mrs. A. W. Austin graciously officiated, Mrs. II. Deeble being tea hostess.

professionals and young children.
Applications may be sent in now.

A most interesting and brilliant recital was given in Hamilton by Margaret B. Hill (a W. O. Forsyth pupil), and with Cameron Taylor, reader, on Wednesday evening, April 12, which has been highly spoken of by the Hamilton papers, both young ladies receiving much praise by reason of their artistic performances. Miss Hill has much temperament and talent. has much temperament and talent, and promises to be one of the hest of the Forsyth planists, as her playing is already said to be distinguished for certain well known qualities which radiate from gifted pupils trained by our local master, viz: a refreshingty lovely tone, pliant and graceful development of the muscles, sane, poetic and imaginative readings, and immense technical resources.

One of the important phases of the work at the Toronto College of Music is the training of students in concerted music the performance of a solo with orchestral accompaniment being one of the requirements for graduation. Last Saturday evening a number of candidates for the Associate Diploma were heard by the musical director. Accompanied by an efficient orchestra, under the direction of Dr. Torrington, the following students Torrington, the following students

The special series of Commencement Recitals at the Toronto Conservatory of Music which are being given during April and May furnish convincing demonstrations of the splendid status of this representative Canadian institution as a music school of the first rank. The Toronto Conservatory of Music is not only the largest school of music in the Empire, but its faculty and equipment, besides placing it in a unique position in Canada, now challenge comparison with the foremost schools of Europe. The three recitals of the series already held have served to present the Conservatory Orchestra under Mr. Blachford's baton, besides bringing forward a surprisingly large numtion as a music school of the first rank. ing forward a surprisingly large number of gifted students in piano, organ, and violin playing, singing, etc., such compositions as Grieg's A Major, Chopin's E Minor, and Mendelssohn's G. Minor Concertos, already having been played with splendid effect. The first four recitals of the series presented the following performers: Piano—Misses Jessie Allen, Constance Martin, L.T.C.M; Alice Bryan, Edith Buckley, Leep Cilinton Films Personse attention. Mr Hinshaw has offered one thousand dollars for this opera, with the promise of first class production, and a royalty to the composer.

A pianoforte recital in the Canadian Academy of Music by Margery Martin, a pupil of Peter C. Kennedy, attracted a capacity audience. Her program included Sonata, op. 57, Beethoven; a Chopin group; March of the Dwarfs, Grieg: Dances Aesthetiques, Hendricks; Romance, Janowski; Rhapso.

tin, L.T.C.M.; Alice Bryan, Edith Buckley, Jean Clinton. Elma Ferguson, L.T.C.M.; Ada Irene Weaver, L.T.C.M.; And Myrtle Wright, A.T.C.M.; Virginia Coyne, L.T.C.M.; Ada Irene Weaver, L.T.C.M.; Virginia Coyne, L.T.C.M.; Alexander Rodgers, and Mr. Josef Shlisky.

Jan and Boris Hambourg were in town this week, playing and teaching. They left on Thursday for the States to fulfil engagements. Mrs. Jan Dever, L.T.C.M.; Vocal—Misses Irene Symons, Bessie Hutchison, E. Marie Undorhill, Dorothy Allen, Mrs. Edward Byrne, Mrs. Carl Ahrens, and Mrs.

W. O. Forsyth announces a piano recital by his gifted pupil, Rosa Goldberg, which is to take place in the new Nordheimer Hall, Yonge street, on Thursday evening, April 27. Miss Douglas W. Anderson, soprano of the Forsyth Academy of Music (Hamilton), will be the assisting artist.

Maud Alian, while convalescing from her recent serious operation for appendicitis, which nearly cost this famous dramatic dancer her life, resolved that she would become a manager as well as dancer. Her wide experience in touring the world with her own company has brought her in Maud Allan, while convalescing appendicitis, which nearly cost this appendicitis, which nearly cost this famous dramatic dancer her life, resolved that she would become a manager as well as dancer. Her wide ager as well as dancer. Her wide recital of more or less unfamiliar cello experience in touring the world with music at Aeolian Hall, New York, last her own company has brought her in Thursday afternoon, March 24. The contact with every vicissitude of the one outstanding feature of the recital managerial field, and her marked was the particularly smooth and oily tone which the cellist had the skill financial success has made it possible to maintain thruout the entire profor her to assume all the liabilities involved in producing and backing her big organization for the coming sea-

Miss Allan will sail for London April 18, remaining there until about will create and produce practically an entire new repertoire of dance plays and divertissements, which she will bring to America. Her tour next season will be an extensive one, embracing all the principal cities of Canada and the United States, extending to the Pacific Coast and as

far south as New Orleans.

Miss Allan's equipment will include
a private car for herself and members of her company and a 70-foot baggage car for the transportation of her scenery and electrical effects. Her tour will open in eastern Canada in October, with New York, Boston, Philadelphia and Washington en-gagements to follow, after which she will start on her transcontinental tour, via Pittsburg, Chicago, Minneapolis, Winnipeg and the Northwest, reaching the Pacific Coast shortly New Orleans and Atlanta. Not satisfied with the management and direction of her own tour. Miss

Torrington, the following students coquitted themselves creditably: Georgina Herold, Gladys Peacock (pupils of T. C. Jeffers, Mus. Bac.); Louise Westman, Rennie Keith, Mary Hooker, Alice Howden (pupils of F. H. Torrington, Mus Doc.); Clare Teetzel, Mary Caughell (pupils of Louise Hillman. Chatham); Mary Quinian (pupil of St. Joseph's Academy, Lindsay); Cecile Pearson (pupil of Olive Lloyd Casey, A. T. Col M.). established themselves so firmly in the western music world that they find it impossible to fill all the en-gagements demanded of them. The Cherniavskys were formerly associated with Miss Allan on

world tour, in which they visited all the principal cities of Australasia, Africa, the Straits, the Philippine Islands, India, China and Japan. Miss Allan's knowledge of and belief in the remarkable talent of the Cherniavskys, and the desire to acquaint Americans with these three musi-cians, has decided her to take up the responsibilities of directing their entire tour next season.
Some prominent actresses have

taken the managerial reins into their own hands successfully, but Miss Allan is the first of the dancing stars to manage and finance such an ex-tensive tour as she has mapped out for herself, and then to assume the additional task of handling the tour of other artists.

YOUTHFUL PLAYERS IN BARITONE - VOCAL MAESTRO DREAMLAND VERSION

An Original and Artistic Production of Alice in Wonderland With Greek Dancing.

An original and artistic production of Alice in Wonderland in combination with Archaic Greek Dancing is to be presented in Foresters' Hall on Friday, April 28, at 8.15, and on Saturday, April 29 at 2.15 in the afternoon, by a company of youthful players. The entertainment is in aid of the Lena Ashwell Concerts at the front, and St. Luke's Organ Fund. The stage settings and costumes are of special interest, being designed by Frederick Coates, an artist whose work is well known in Toronto. The importance to our soldiers of these concerts at the front is being more and more recognized by the military authorities, who are sending urgent appeals for them to be continued on an even more extensive scale than herotofore. The followings quotation from "The Hospital," a medical journal, emphasizes the value of music as a curative agency. "Money for this purpose," it says, "is just as usefully expended as the it were spent on splints and bandages, as diversion and amusement are valuable aids to recovery from bodily ills, whether they be fevers or bullet wounds. It would probably be true to say that these concert parties have actually saved lives. Unquestionably they have brightened those of thousands of our soldiers just when they most needed it."

come a resident of New York, gave a gram, notwithstanding the exigencies of technical complexities and the fleetness of many a florid passage. Many cellists choose a bridge too high and strings too thick in order to gain an intenser the coarser tone. Another ex-cellence of Boris Hambourg's playing April 18, remaining there until about is that it is almost always perfectly september 1, during which time she will create and produce practically strict intonation which so often many deviations. double stopping on the cello that they might justifiably be thought inevitable.

this young Russian artist happily

knows how to avoid.

And Boris Hambourg has an admirable freedom and elasticity in the wrist of his bow arm. Technically, therefore, this cellist is thoroly equipped to take his place on any concert placement. for take his place on any concert planform. As an interpreter he did nothing that was not dictated by good taste and sound judgment. There are, of course, temperamental differences of opinion which add zest to the interpretations of all public artists, Certain purists might have preferred a less expressive and a more rhythmical performance of the Bach sonata, or suite, for unaccompanied cello. Others suite, for unaccompanied cello. Others might have found a classically strict interpretation tame. Boris Hambourg was well within his rights to play all reaching the Pacific Coast shortly the works on his program in the man-after the holidays, and returning via ner that seemed best to his judgment plus his temperament. As a composer, the cellist was an emphatic suc He has a varied melodic flow and his harmonies are rich and varied withou exaggeration and strained effects. In his "Cosaque" Russian dance the enthusiasm of the audience caused a burst of applause to interrupt the music in the middle of the perform-ance. Tschaikowsky's "Variations sur un Theme rococo" were played by Boris Hambourg with the New York Philharmonic Orchestra in Carnegie Hall some four years ago, if memory serves. They were most brill

effectively performed on this occasion with piano accompaniment, necessitating two extra numbers at the end—a rushing allegro by Popper, and an elegy by Massenet. The complete program was as fol-lows: Sonata, Johann Ernest Galliard; Gavotta, Stefano Galeotti; Adagio, from Gamba Sonata, Handel; Allegro vivamente, Salvatore Lanzzetti; Suite in G for cello alone J. S. Bach; Prelude, G minor, Boris Hambourg; Nocturnette, Boris Hambourg; Cosaque, Boris Hambourg; Variations, Tschaikowsky, At the piano, Josef Adler,—Musical Courter Musical Courier.

Night Caps of Velvet.

D URING the last three or four seasons velvet has been put to odd uses. We have seen it employed for the summer dress, for the parasol with fur border, and even for the bothing suit. Its mid-summer hat vogue is now accepted as a matter

And now comes word of the velvet night cap! The latter is not to be confounded with the boudoir cap, which is usually made with dainty lace, embroideries and ribbons. The velvet accessory is so shaped that it is slipped over the head and either preserves the elegant confure or conceals disordered tresses.

(The Marvelous Story, Hitherto Unpublished, From Which the Pathe Photoplay of the Same Name Was Made.)

Fourth Episode

Legar, as an upholder of the Hugoesque maxim that audacity should always crown audacity, had reason to feel well pleased with his morning's work. Defeated, for the time being, in one quarter, he promptly swung about and struck at another.

Ris attack in this instance was directed at nothing less than Enoch Golden's own home. There, effecting an entrance thru a neglected coal chute before even the servants were astir, he had crept stealthiliy upward until he found refuge in a trunk room. Thru the door crack of this trunk room, however, he soon had the dublous pleasure of beholding a figure quite as stealthily as his own, a figure that wore a laughing mask and made its way cautiously downward to the door of Enoch Golden's study. On that door the masked figure, before that door the masked figure, before vanishing as quietly as it had first appeared, pinned an oblong of paper. And that mysterious scrap of paper attracted the puzzled Legar as an engleworm attracts a sunfish. Steal-

Enoch Golden: You have proved Enoch Golden: You have proved a disappointment to me. Despite my warnings, you still oppress the poor and abuse your power. Your daughter has been saved from the clutches of Legar, and at the proper time will be produced. But that time will not come until you have changed your ways of life. So, while you still have the chance, do some good deed!

THE LAUGHING MASK. Legar, having thoughtfully perused this strang warning, promptly added

As a slight sign of my disapproval, I am appropriating your fifty thousand dollars from the vaults of the Third National Bank, for which I now take the occasion to thank you. Ten minutes later Legar had made his escape from the house and was speeding southward in his car, not unhappy in the thought that he had confused the issues of his enemy, the Laughing Mask And he was further prepared to conse those issues thru his knowledge that Margery Golden Such being the case, it was ten to one, he concluded, that her hiding place Such being the case, it was ten to one, he concluded, that her hiding place would not be far distant from the scene of their last encounter. And the thought of possibly killing two birds with one stone speeded Legar on his way, for it was not far from that neighborhood, he remembered, that he was to confer with his own men as to the approaching assault on Golden's wealth in the Third National vaults.

The Laughing Mask himself, in the meantime, was busy with his own enterprises. He had rescued Margery Golden from Legar, it was true, but her conveyance to a place of safety, in open daylight, was a much more difficult problem. In his extremity, accordingly, he had to resort to those trues as the content of the problem. In his extremity, accordingly, he had to resort to these conveyance to the property of the problem. In his extremity, accordingly, he had to resort to those trues as the content of the problem. In his extremity, accordingly, he had to resort to the content of the problem. In his extremity, accordingly, he had to resort to the problem and appalling. The thunder of a great detonation shook the earth. The rocky hiliside erupted into a sudden volcano of flying earth the outer steel grille, the would still find the safe walls themselve into a sudden volcano of flying earth the outer steel grille, the would still find the safe walls themselve into a sudden volcano of debris into the each of general steel grille, the would still find the safe walls themselve into a sudden volcano of debris into the each of general steel grille, the wo

cult problem. In his extremity, accordingly, he had to resort to those expedients nearest at hand.

This led him down a secluded by-way, where the powder shack of a construction company still stood half way up a wooded hillside. At the end of a tunnel piercing this hillside was a timbered chamber for high ex-plosives. Guarded as it was with its plosives. Guarded as it was with its double lock, the Laughing Mask seemed an expert in the manipulation of such obstacles, since five minutes' work with his skeleton keys threw open that well-hidden room and gave him a harborage safe enough from observation. Once there, he even ventured to explore his surroundings and tured to explore his surroundings and take from their case certain small cylinders incased in grease-stained paper. He did not explain to the al-ready over-puzzled girl, however, that these grease stains were made by a substance known as nitro-glycerine, nor did he explain to her, at the end of his quiet yet hurried labors, that the looped line hanging at the tunnel mouth was in any way connected with the fulminate caps which he had placed so pregnantly close to his buried mine. But it was well, he remem as Legar and his followers.
"Now," said the masked figure turning to the girl. "I want you to stay here until I get back."

"But how long must I wait?"
"That I can't say. And it's not a very hospitable looking hole, I know, but it's the best I can do until I bring a closed car to carry you away."
Waiting for her deliverier's return, however, proved neither a pleasant nor a tranquilizing pastime. The girl became restles. Then she became wor-Then she even ventured creep out along the rough-shored passage way, to where the tunnel open-ed on a shelf of rock and gravel half way up the hillside. Screened as it was with shrubbery, she could see little of the valley before her. The only point of life that met her gaze was a black touring car crawling along was a black touring car crawling along the valley road. When that car turned off the road and twisted and rocked in between the bushes below her she thought, at first, that it was her unknown guardian returning for her. But when she saw five men cautiously emerge from that half-hidden car and creep still closer through the underbrush, she felt sure that they were not approaching as friends. For a moment her heart leaped into her mouth. Then she breathed again, for she saw that they were not approachher hiding place, but apparently seeking one of their own. And as they foregathered behind a screen of scrub eak not more than 30 feet be-low her she knew both by their guard-

ed tones and their general conspira-torial aspect that they stood intent on their own ends. quite oblivious of her and her hiding place. torial aspect that they stood intent on their own ends, quite oblivious of her and her hiding place.

Her face paled, however, as she heard the clearer and more authoritative tones of one of those speakers. For that voice, she knew, besigned to Legar, and only to Legar.

"So, if Oyster Joe wants to wipe out that score, tell him to have his launch up to Downer's landing at seven tonight. At seven sharp, remember, for if we want to get away with that

clockwrk!"

The girl, pushing her cautious way thru the bushes, leaned even closer over the ledge. Then she held her breath, for she saw that her movements had loosened the gravel at her feet and sent a covey of bowlders careening down the hillside. The voices below at the same time came to a sudden stop. In another moment she could hear the crash of hurrying feet thru the tangle of shrubery. thru the tangle of shrubery.

arm that she screamed, and screamed again.

A masked figure picking his cautious way along the crest of the hill above them heard that cry and seemed to understand its meaning. For, on hearing that repeated scream, he no longer picked his way, but ran frantically, and with all his speed. So precipitately did he scurry down that rocky hill-side, in fact, that he descended in a flying leap in the very midst of Legar's followers clustered about the girl. He landed like a fallen plumb bob, heels down, knocking one of the conspirators sprawling over the cliff edge as he came. Another he sent with a well-atmed blow in the same direction. The third was not disposed of so easily. But an adept jiu-jitsu twist of the body soon sent his opponent diving head foremost into the loose gravel. It was then that Legar, seeing his men going down about him like nine-pins, released his clutch on the girl's arm to draw his revolver.

At the same moment that he did so the man in the motion of the body soon seen the moment that he did so the man in the motion of the did so the motion

and once more hastening cityward that Margery confided to her unknown res-cuer what she had overheard between

Legar and his men.
"And whatever this plot of theirs may be," she explained, "they intend to fasten it on you. I couldn't quite understand, but it had something to do vith a postscript to a letter which you and left somewhere."

the mask, "was left in Enoch Golden's house. So this must mean some new blow at Golden. And the sooner we get to him, accordingly, the better for everybody!"

The Secret Attack.

Enoch Golden was no longer a con-temptuously indifferent man as he faced his attorney, John Sibley, hurriedly summoned for a conference.
"I tell you, Sibley," said the man of millions, "something has to be done, and done soon. I'm surrounded by enemies I can't run down, enemies I can't even understand. In the first place, there's this man in a mask stalking they my house and interest these thru my house and pinning threats to my doorpanels. Then—"
"Wait," cut in the man of law. "Did anyone actually see this man in the

"Yes, Wilson, my butler, came face to face with him as he stepped out of a passageway. Then, when my secre-tary, Manley, started in pursuit of the intruder, instead of finding a stranger in this fool mask, he found his way hlocked by a girl, a girl in a cloak, who seemed to come there out of thin air. And that girl, sir, turned out to be my own daughter, my own daughter n some miraculous way rescued from

Legar."
"Brought there by a man in the "Yes, brought there by him. So she asserts. Yet this stranger, who brings me back the one thing precious in my life, on the same day assumes to criticize my conduct and threatens to rob me of my money!"

"But that threat, as I've already pointed out, is foolish. Your money has all the protection that steel and civilation can surround it with. It lies in the vaults of the Third National Bank, and the wealth in those banks can't be handled over by any Tom, Dick and Harry as the they were remnants on a bargain counter. The wealth in all those institutions, sir, is locked up as securely as the it was in the subtreasury."

in the subtreasury." "But I tell you I am surrounded by enemies, by unknown enemies of great skill and daring. That has already been proved. And while they can never make me cower, they have at least

made me cautions." "Then what you need, Golden, is not watch

head foremost into the loose gravel.

It was then that Legar, seeing his men going down about him like nine-pins, released his clutch on the girl's arm to draw his revolver.

At the same moment that he did so the man in the mask, swinging the girl sharply about, darted for the tunnel-mouth. He was through it before Legar could level his gun and fire. He was half-leading, half-dragging the panting girl down the narrow passage before any of the band could follow. But before he dodged for the hidden powder house he threw up his free hand and caught at the loop which hung there at the end of his line. And he pulled it vigoriusly as he ran.

"Ten thousand one-armed crooks couldn't batter their way into that bank."

A certain one-armed criminal, nevertheless, was at that precise moment very busily engaged in preparing for his assault on this Gibraitar of gold so proudly regarded as impregnable. Two workmen in the uniform of General Electric employes, exploring a section of abandoned cable gallery, were busily engaged in enlarging a wire conduit which met this gallery at right angles. There, by means of an electric mining drill they burrowed like two moles deep beneath the level of the street along which the traffic of a great city so ceaselessly ebbed and flowed. From a manhole opening into this gallery was quietly passed a huge cylinder of iron capped by a drum of zinc having a hinged cover. The two subterranean workers had been warned to handle the cylinder with the utmost care. And this they did, knowing full well that its weight was due to the fact of its being tightly packed with high explosive, while the zinc drum was merely a screen for an ingenious detonating mechanism consisting of an alarm clock with a few inches of pieture wire attached to the shaft of its minutehand wheel. This wire, in turn, was wound about the cork in a small bottle of sulphuric acid nesting in a bed of fulminate caps, so that as the winding shaft took up the wire, once the clock was adjusted and set in motion, the tightening wire withdrew the cork, liberated the acid and detonated the huge charge, "big enough," as one of the workmen expressed it, "to blow the whole o' Manhattan clean over the Palisades."

Legar himself, in the meantime, having clothed a number of his henchmen in uni-

workmen expressed it, to how the whole o' Manhattan clean over the Palisades."

Legar himself, in the meantime, having clothed a number of his henchmen in uniforms and caps bearing the inscription, "Western National Bank," directed his attention to the much more critical task of tracing a signature on a typewritten sheet bearing the embossed imprint of yet another bank, the Third National. This he did by imposing his sheet of paper on an out-of-date municipal reform petition, on which was inscribed, in a column of others, the signature of "Henry H. Stonington." With both sheets placed over a square of plate-glass, under which stood a strong electric globe, the thoughtful-faced man with the pen was able to trace on the upper sheet an exact facsimile of the writing on the lower. Then, having made sure that his secret emissary had duly executed his plan of bridging the Stonington uptown house wire, he telephoned to one McTigue certain orders as to the future movements of a duly designated motor truck.

His next move, once he had received a report that his two gallery workers had fitted their massive cylinder in the wire conduit and pushed it gently but firmly into the uttermost recesses of that conduit by means of a jointed hamboo pole, was to verify the time at which the detonating clock had been set, advise his colleagues, and take up his position in the window of a building commanding a view of the great granite-bastioned bank itself.

He consulted his watch from time to

He consulted his watch from time to time, with his eyes always soing hungrily back to the heavy-pillared bank entrance get a dose of the medicine they gave us this morning." Again he looked at his

anything but a criminal, and anything but a friend of Legars.

"You many" retorted Golden, "if all this trouble has brought any sense to you."

"If this man Legar is the master criminal you seem to consider him," the young man ventured, "It's more than likely he's an adept at forgety, isn't it? Then why couldn't he have him seems between the sunday planned?"

The old lawyer made no effort to conceal his contempt for the filippantifaced yout beside him.

"I tell you the whole thing's absurded and make sure they're not putting their gold and notes out on the windowsilis for the first crook that comes along to carry off."

A frown of trouble, however, still furrowed Golden's heavy brow as he climbed into the waiting limousine, where Sibley and his daughter Mark girl.

JOHN ELIOT STONINGTON.
President.

At the same time that the police captain, acting on this peremptory order, was clearing a path to the neighborhood of the still smoking vauits. Enoch Golden, with Margery and Manley at his side, was fighting to break thru those jealously-guarded fire lines. And at the sight of the motor truck and the Western National attendants, his antics became even more frenzied than before.

"It tell you, I've got to get in there!" he shouted to the apathetic patrolman holding him back.

"Yes," agreed the patrolman, "of course you'd like to get in there. So would all the rest o' you, with forty millions in gold lyin' round loose!"

"But, I tell you, I'm Bnoch Golden," was the financier's frantic cry.

"But, I tell you, I'm Bnoch Golden," was the financier's frantic cry.

"But, I tell you, I'm Bnoch Golden," was the financier's frantic cry.

"I'd don't care if you're the president o' the United States," was the retort.. "You stay out."

It was young Manley himself, who, watching his chance, suddenly slipped in thru the lines and gained the side of the busy captain before he could be stopped.

The Huminant light sooh weeker, as he stood close beside the police captain in the booth. He could hear that official call for the number, ask for Stonington, and crisply demand of the banker if the booth. Continued Next Week.

You Can't Resist Taking Them!—

Talk about love laughing at locksmiths!—Why, no matter where you hide or lock away "Maple Buds" in the house, the youngsters find a way to get them. This great desire children and grown-ups have for these dainty, solid chocolate pieces, is a very sincere form of flattery to us. However, we believe that we deserve it, for no expense or time is spared to make them the finest chocolate confection in the world.

Made from the finest and most expensive cocoa beans, rich, creamy milk and selected sugar - and blended in a way that imparts a clean, fresh and appetizing flavour.

Eat plenty - there's no need to be afraid of ill effects - they're harmless to the weakest digestion.

stonington's door-ieting, still more was that obese question so fierce-

TORONTO SUNDAY MORNING APRIL 23 1916

MORNING APRIL 23 1916 - PRICE FIVE CENT

THE HARDY ANNUALS, DIBS, TOPS, SKIPPING ROPES, APPEAR AGAIN

The first day of spinning. Waking the neighborhood putting the tops to sleep.

Every school yard in Toronto had a scene such as this when the sun made its first real visit of the season.

This time last year these young misses were too young to think of skipping, so once in a while we see a real beginner's tumble.

There are thousands of juvenile Monte Carlos wherever a concrete sidewalk enables the young Canuck to try his luck in a game of chance.

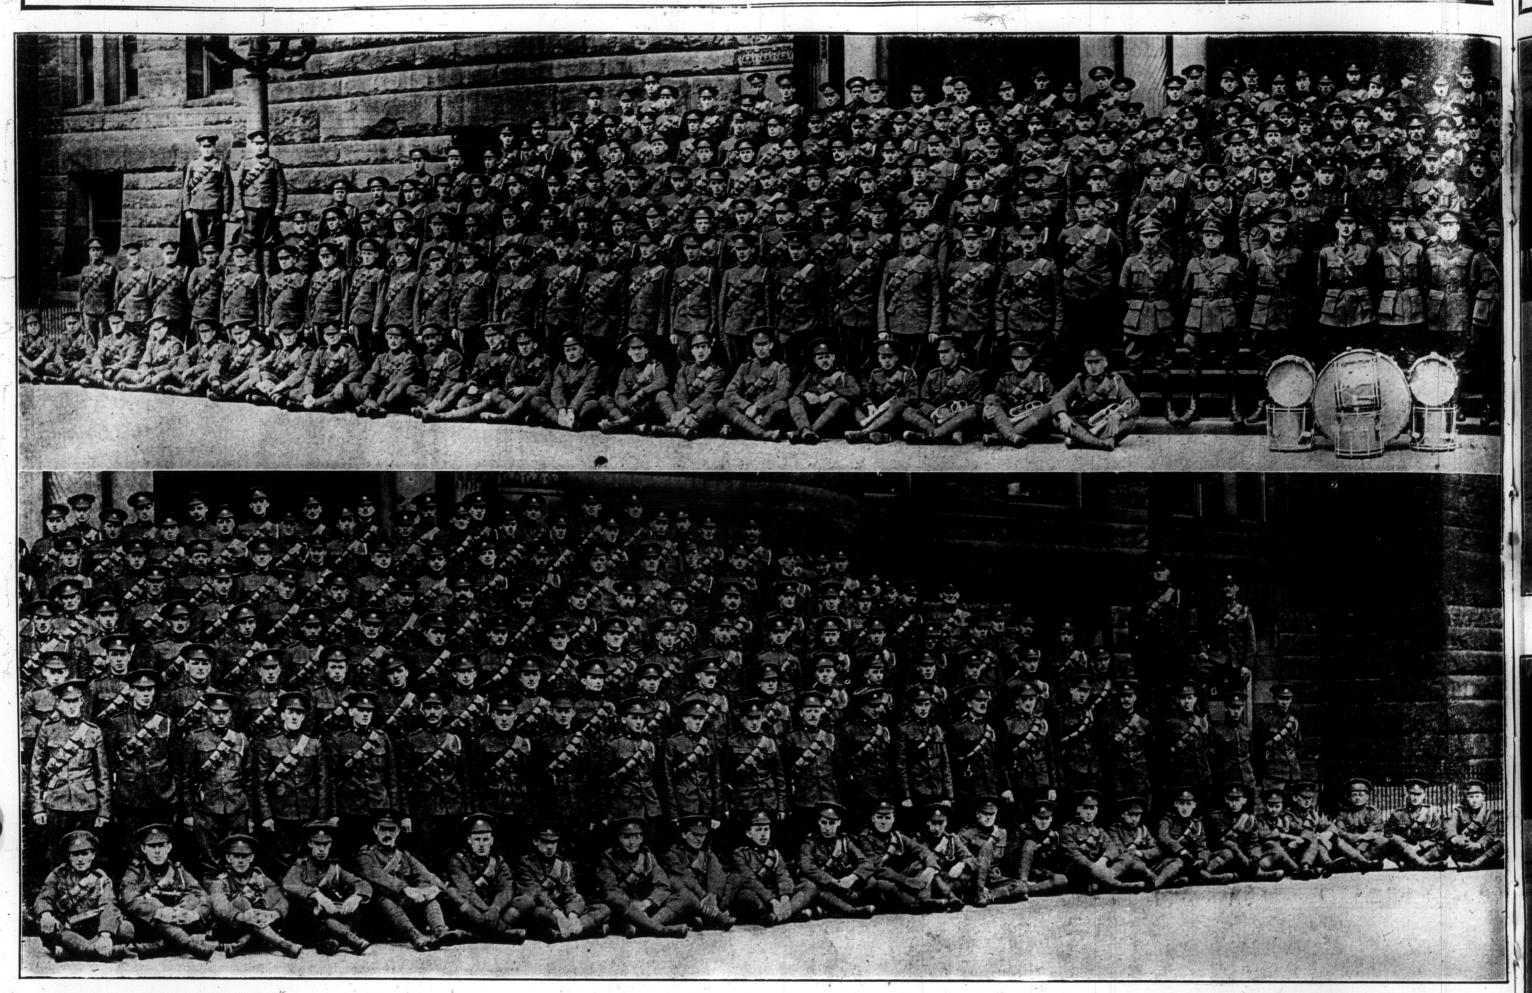

Altogether, now! When the boys chip in to give the weaker sex a bit or real sport.

Many a velocipede carried three times its licensed load until the novelty of the revival wears off.

* THIRD DIVISIONAL AMMUNITION COLUMN AND SOME INDIVIDUALS

This group of the officers, non-commissioned officers and men of the Third Divisional Supply Column, C. E. F., taken on March 28, on the steps of the parliament buildings, is complete. These men will soon leave for England.

Driver J. W. Smith, with the 41st Battery at Bramshott.

Gunner A. M. Wilbur, 34th Battery, in France.

A stunt in signalling. Members of the 169th Signal Corps, spelling "169 Batt., Toronto," with the ir flags.

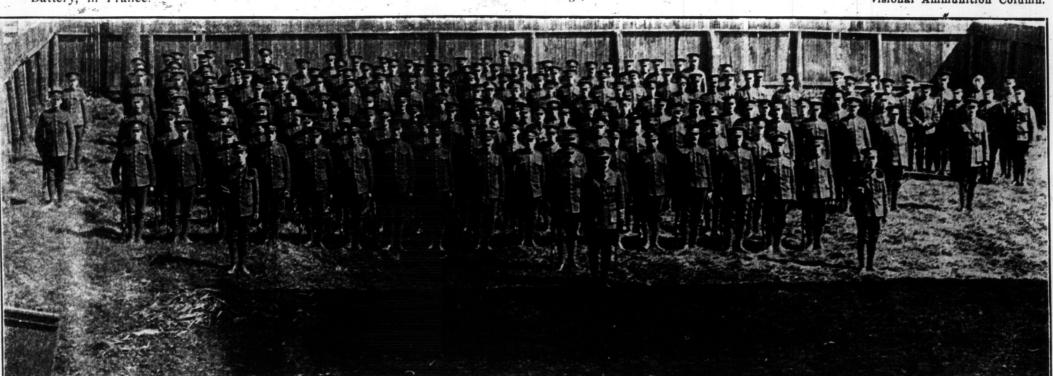

Bombardier Fuerst, Third Divisional Ammunition Column.

Pte. Leonard Sulton, a Toronto man, who has been fighting with the Imperial army.

Signaller W. Wells, Toronto, Can. Cav. Brigade, in France.

Some of the men in the 98th Battalion at St. Kits., in charge of Captain Sandham.

Pte. H. Lewis, Georgetown, with 58th Battalion, in France.

oon leave

nard Sulton, a Torn, who has been fightthe Imperial army.

ewis, Georgetown, Battalion, in France.

"STAND FAST," ORILLIA'S 76th BATTALION WANT THIS BETTERED

A muscle test, pyramid formation, "The Crown."

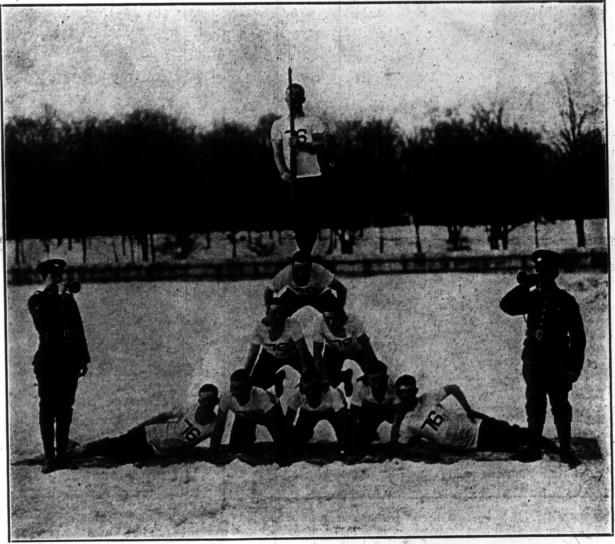

What Sergt. G. Young, of "B" Company, 76th Battalion, stationed at Orillia, has done with his physical culture class.

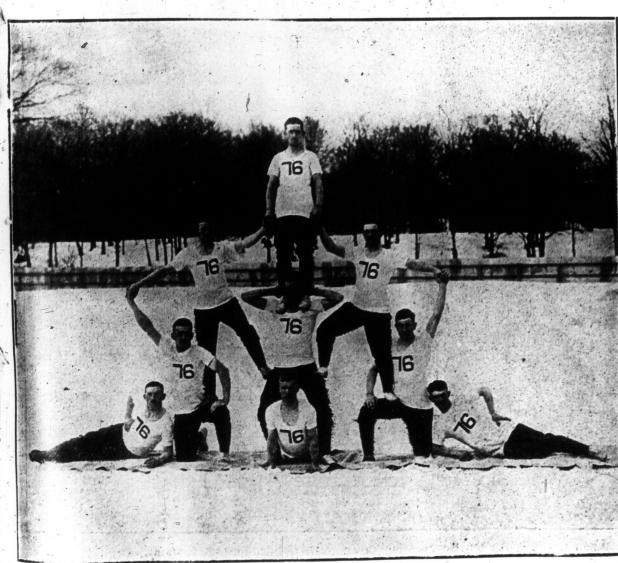

First Exercise.

Close formation bayonet fighting.

The Royal Salute, another pyramid.

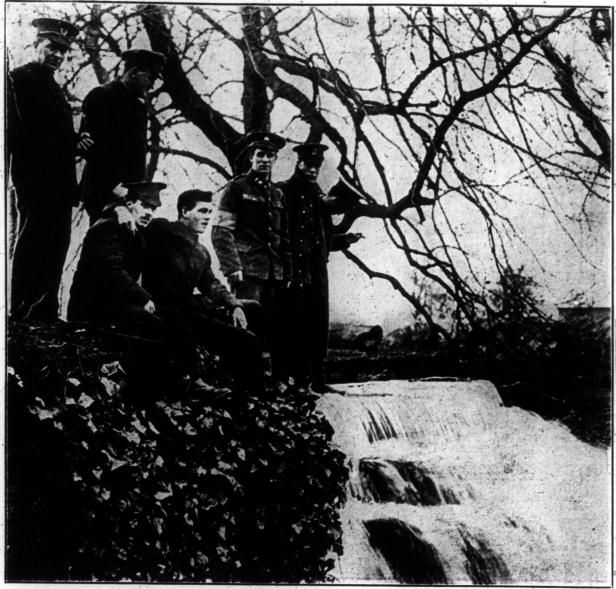

This beautiful pyramid is called "The Maple Leaf."

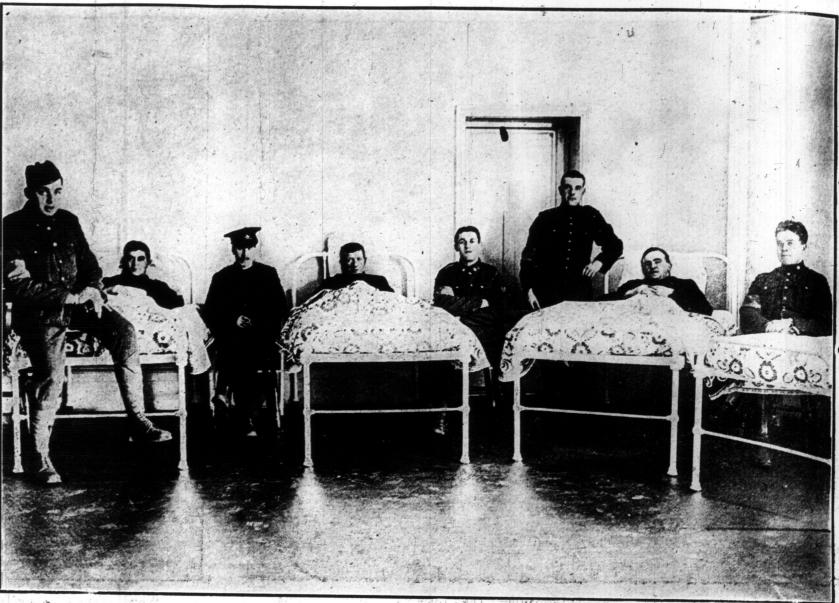

Tableaux. "We'll never let the old flag fall."

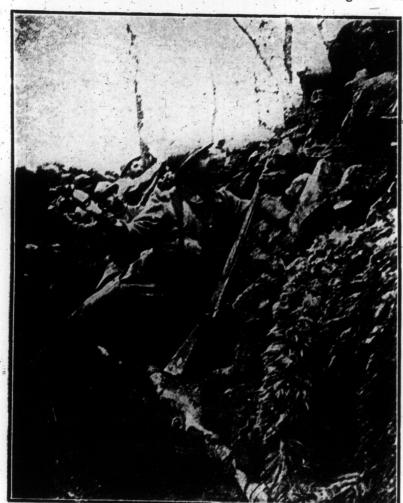

CANADIANS AT BUSHY, KING'S HOSPITAL --- SCENES ON THE FIRING LINE

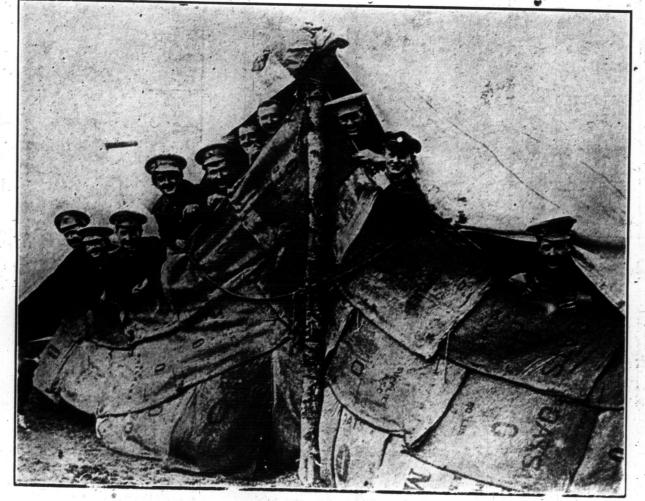

Queen Alexandra told the men at Bushy Park Hospital that she hoped the little waterfall in this picture would remind them of Niagara. They agreed that it would.

Some of the Canadian wounded in the convalescent home at Bushy Park. This hospital was formerly one of the King's private residences, and the 400 inmates are periodically honored by a visit from His Majesty.

This snapshot, taken by a soldier in a trench in front of Verdun, shows a hand-grenade squad in actual action.

Days of pouring rain won't take the heart out of these boys, who have sewed together oat bags to keep themselves dry. They are British.

These sentries have cunningly concealed themselves from the view of birdmen with this foliage roof.

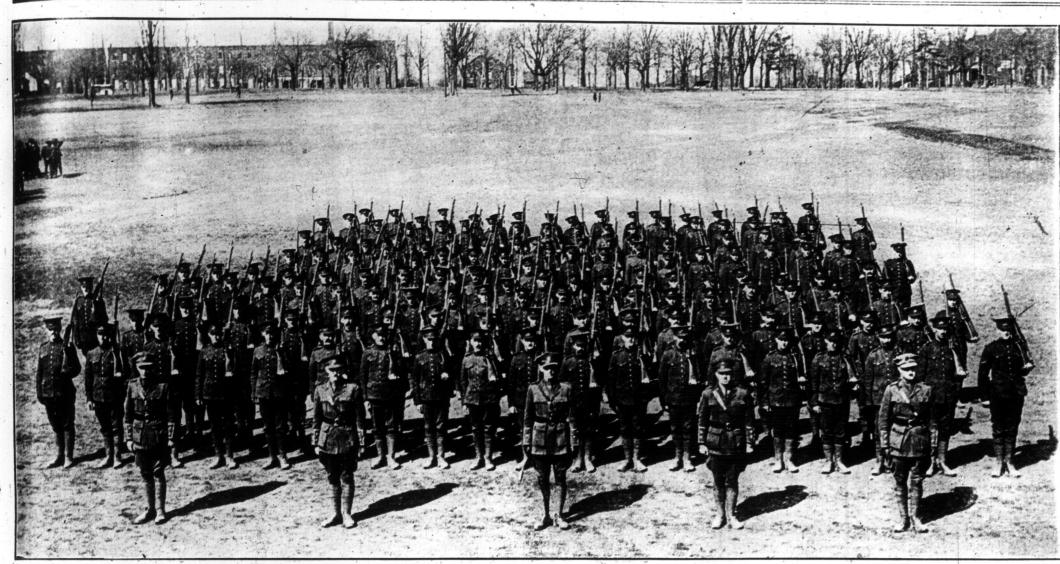

"Billy" enjoys active service in France and gives an extra turn much to the amusement of a squad of fighting men. He won the first two falls.

When spring broke the trenches in France we re flooded in some cases with two feet of water.

Corduroy bridges kept the soldlers dry.

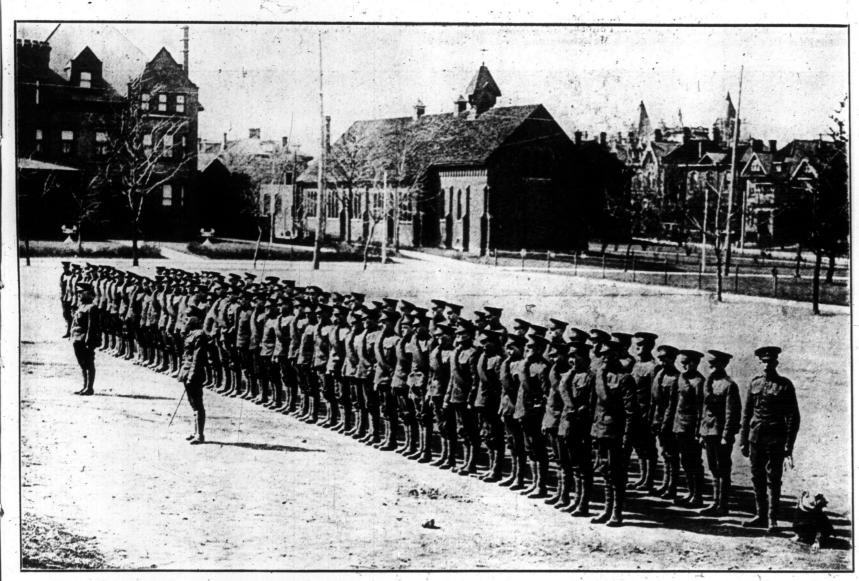

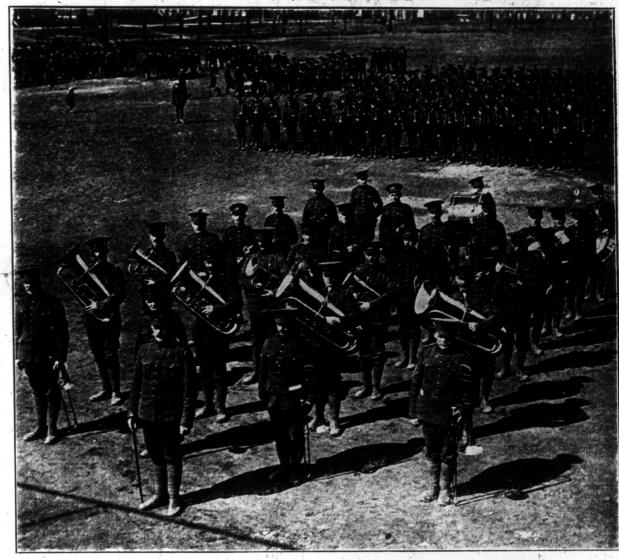

"B" Company, 120th Battalion, recruited in Hamilton, in charge of Major Turner, lined up for parade in Victoria Park.

"Bawling out" prospects from the building tops along the Gore is Hamilton's latest recruiting stunt.

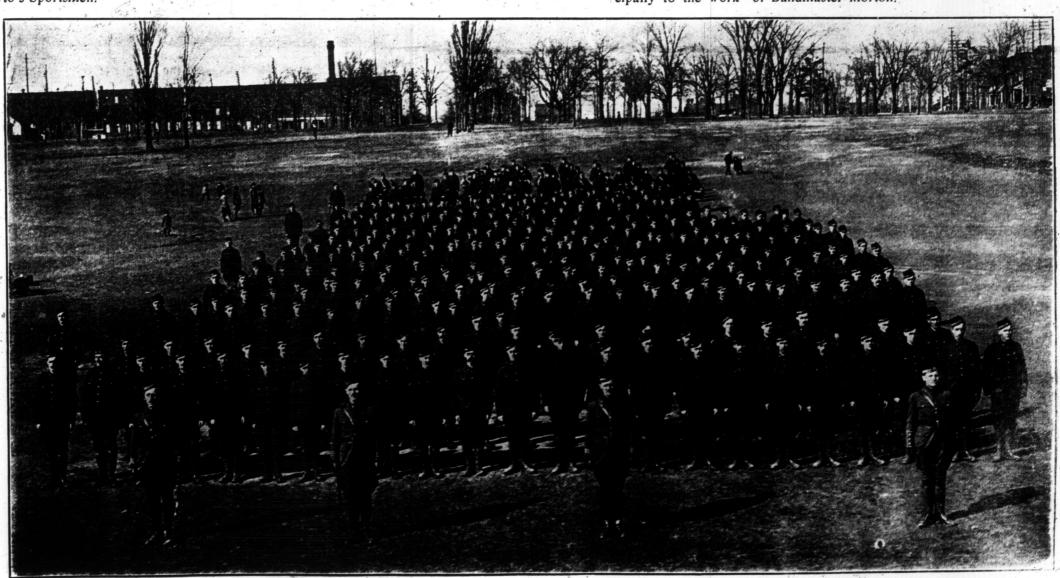

Some of the recruits of the 205th Sportsmen's Tigers, in charge of Lieuts. Meyers and Vallance. They have sworn to outsport Toron to's Sportsmen.

The Brass Band of the 120th Battalion is one of the finest in the Ambitious City, due principally to the work of Bandmaster Morton.

viger," the fighting mascot of Hamilton's Sportsmen.

Seven platoons of the 173rd Hamilton Battalion on parade, under Majors Rutherford, Childs, Manson and Captain Laurie.
