TEN PAGES—ONE CENT

TO PREVENT CORNERS IN FOODSTUFFS

Chicago Board of Trade Directors Adopt Rule That Will Work—Great Reform—Members of Same Mind

Chicago, Nov. 13.—The directors of the Chicago Board of Trade have voted unanimously in favor of a change in the rules of that body that will end all corners in grain and food stuffs. The members of the board are to vote on the change in a week. They are expected to sustain the directors by a large vote.

J. Ogden Armour is regarded as one of the leading manipulators of the board, which controls the greatest grain market of the world.

The proposed change in the rules follows: "If a corner is run and there is a default in the contract, the president of the board of trade is to appoint a committee of three members of the board, this committee to be approved by the board of directors, and this committee shall say what the true commercial value of the commodity in question is on the day of the maturity of the contract. The price established by this committee will be the one upon which settlements are to be made."

Another proposed change in the rules provides for the expulsion of members or firms found guilty of manipulating the market.

"If there is a corner in wheat on the day he deal must be closed out there is a frantic rush of the shorts to cover and prices go sky high. Shorts are pinched and the runner of the corner takes down his huge profits. Under the new rule there will be no such thing as a corner. The price should be what it should be. The corner would be broken then and there; in fact, there would be no incentive for running any corner."

EVERTON COULD WALK OUT FREE

Hypnotist in Jail Puts Turnkey Under Influence and Makes Will Bend to His—Gives Demonstration Before Medical Men—Is Trusted

New York, Nov. 13.—To prove his contention that hypnotic power cannot interfere with heart action sufficiently to cause a rupture of the aorta, "Professor" Arthur Everton, who is held, charged with having caused the death of Robert Simpson, on of his "subjects," a few nights ago, gave a number of demonstrations for the benefit of visiting members of the medical fraternity, in his cell in the Somerville, N. J., jail, yesterday afternoon.

One of the acts was to hypnotize his keeper, James P. Major. Keer Major had just led the doctors into the witness room in which Everton is imprisoned, and stood near the door with a bunch of keys in his hands. Everton stood before him, looked him squarely in the eyes for a few seconds, and then said:

"Major, you are falling forward."

Major's body stiffened and he leaned gradually forward. He would have fallen face down on the floor had not Everton caught him. The hypnotist held the keeper upright, restored him to his normal condition, then got behind him, made a quick pass down the keeper's spine with his hand and said gently:

"Major, you are falling backwards."

Major's eyes closed as if in slumber and he leaned backward until he lost his balance. He was caught again by Everton. Everton stroked the top of his head and restored him to his normal condition with a pass of the hand across the forehead. Keeper Major had never been hypnotized before, and Everton's influence, revealed to the authorities the possibilities of a hypnotist in jail. Major is the only person who stands between Everton and liberty. He was caught again by Everton. Everton stroked the top of his head and restored him to his normal condition with a pass of the hand across the forehead. Keeper Major had never been hypnotized before, and Everton's influence, revealed to the authorities the possibilities of a hypnotist in jail. Major is the only person who stands between Everton and liberty.

LAST STAGE IN TRIAL OF RED WIDOW

Believe Mme. Steinhil Will Be Acquitted—Illness of Juror Delays Closing of the Celebrated Case

Paris, Nov. 13.—The public today awaits with confidence the verdict of the court in the trial of the Red Widow. The impression is general that the state has not made out a case against her. Originally charging that she murdered her painter husband, Adolphe Steinhil, and her stepmother, Madame Jany, the prosecution modified its allegations as the trial progressed, finally eliminating the charge of parricide and admitting that the accused woman might have been an accomplice rather than the principal in the death of her husband.

The confidence of the public is shared by the accused, her counsel and immediate friends. This was advanced when Madame Steinhil entered the court-room today. Her large expressive eyes flashed from a careworn face, and there was the faintest suspicion of a smile. It was also apparent that she had recovered somewhat from the physical collapse of yesterday. Her countenance was bright and cheerful, her friends have arranged to spirit the widow away to some quiet place in the country, where she may recuperate from the effects of her long trial.

The final act of the drama, which has been delayed by the illness of a juror, is expected to be completed today. The jury is expected to return its verdict in the afternoon.

BREACH IN TORY RANKS WIDENS

Toronto News in Not Very Kindly Terms, Tells Monk He Must Follow Borden or Plough Lone Furrow—Ottawa Citizen's Advice as to Navy

Ottawa, Ont., Nov. 13.—(Special)—The breach in the Conservative party is daily growing wider, because of differences upon the naval question, and the dissatisfaction with their present leader. The adjourned caucus sat until a late hour last evening, but there was no lengthy discussion of the conservative policy upon the government naval program.

The Ottawa Citizen, in what would appear to be an inspired editorial this morning, advises the party to leave the naval programme to Great Britain to decide, and to accept what she wants.

The Toronto News last night assailed F. D. Monk, French Conservative leader bitterly. As the News is now the acknowledged mouthpiece of the Conservative leader, the language used is remarkable. After referring to Monk's arguments, the News says they are hoary with age and riddled to pieces already. Ridiculing Monk's loyalty to the Conservative party, the News says "Mr. Monk has a right to his opinions, but he has no right to say they are conservative opinions if his leader does not endorse them. If Mr. Monk is a conservative, he must conform to the views of his leader or else plow a lonely furrow."

THEFT OF FORMULAS IS CHARGED

Confidential Employes, It is Claimed, Intended to Organize Rival Company—Sunday Cars—Tie Up at Canal

Toronto, Nov. 13.—(Special)—A sensation was sprung at an investigation held yesterday into a charge made against G. E. Morrison and Allan Gibson, formerly confidential employes of the E. W. Gillett Manufacturing Company, of having stolen from the firm two formulas valued at \$60,000 and also several machinery plans.

The object of the men, it is stated, was to start a new company and the names of Ald. Bredin and Adams and T. C. Robinson, K. C., were mentioned as among those of persons backing the men in their projected enterprise. Morrison and Gibson were committed for trial, bail being allowed them.

A deputation from London representing citizens opposed to the proposed running of Sunday cars in that city, waited on Premier Whitney and his cabinet yesterday and made a formal protest against the granting of the request of the London city council for permission to take a vote in the matter.

At present Sunday cars are permitted only in cities of more than 50,000 population. The premier would not promise a census, but said it would not be a municipal census.

Sault Ste. Marie, Ont., Nov. 13.—(Special)—By the time the lock of the Michigan canal, damaged by a vessel a few days ago, can be put in commission again, within about a week's time, the congestion at the Canadian lock, through which all boats now have to pass, will be unprecedented. Already fifty-five vessels are lined up waiting their turn.

SEE LITTLE CHANGE TO CONVICT CAIRO

MOB RULERS Trouble Believed to End—Alexander in Kanakee Prison

Cairo, Ill., Nov. 13.—Orders for the demobilization of the fourth regiment of the Illinois National Guard, which has been mobilized since early yesterday, were expected by the commanders of the organization this morning. The news of a disposition to renew mob rule last night, and the safe arrival of Arthur Alexander at Kanakee, led both the local and state authorities to believe that there was no chance of further disturbance in this city.

Alexander, who is suspected of complicity in the murder of Annie Peley, is the only person in whom members of the mob have any interest. The announced intention of Sheriff Davis and General Wells was to land the negro at some point far removed from Cairo, but no attempt would be made to take him from the property constituted peace authorities, and it is the general opinion here that the object was accomplished by the journey to Kanakee.

Whether a special grand jury is to be summoned to consider possible charges against members of the mob, may also be determined today. It is likely, however, that the matter will be left for the next regular grand jury in December. Under present conditions of public opinion, it is conceded by the local authorities that the chances of obtaining indictments against members of the Thursday night mob are remote.

RELATIVES SEEK TO BREAK THE WILL

Woman Left Big Estate But Most of it to Institutions

Taunton, Mass., Nov. 12.—Requests amounting to \$800,000 given to five benevolent institutions of New York and Massachusetts are at stake in a legal contest here in the Bristol county probate court over the will of Mrs. Elizabeth Noble of Mansfield, formerly of New York city.

Mrs. Noble died last April at the age of 94 years, leaving only \$300,000 of an estate of more than \$1,000,000 to relatives, and it is the contention of the twenty lawyers who represent the various relations in the attempt to break the will that she was of unsound mind when she drew the instrument in 1901, and its codicils in 1904 and 1906.

HAS BIG SUCCESS IN HORSE SHOW

One Man Makes Sweep of Firsts—British Officers Victorious

New York, Nov. 13.—Children's morning opened the last day of the horse show. Successful far beyond the shows of recent years and up to the mark of the best of previous exhibitions, the Madison Square Garden show of 1909 will close tonight with the awards of the various championships. The British officers won a prominent part in the afternoon programme. The last of the international contests was decided by the British officers who won it with the majority of these events three ways, two for the American army officers.

Judge William H. Moore has established a record never before equaled in the history of the national association. His eleven entries have thus far taken thirteen firsts, six second and one third, a showing all the more remarkable in that C. W. Watson, of Baltimore, who swept everything before him last summer at the International Horse Show in London and the open air meets on this side, has only one first, six seconds and six thirds, and three champion-ship entries, while Alfred and Reginald Vanderbilts, with thirty-seven horses between them, have captured but two blues, seven seconds and seven thirds.

SAVE \$1,074 FOR CITY AT MEETING THIS MORNING

Mayor and Aldermen Purchase Supplies For Departments Below Tender Prices

A subcommittee of the common council, consisting of the mayor, Ald. Frink, chairman of the water and sewerage board, Ald. Vanwart, chairman of the board of safety, and Ald. McGoldrick, chairman of the board of public works, met this morning to decide upon the purchase of feed supplies for the various departments. The tenders submitted to the departments were considered too high and the aldermen determined to see if better prices could be obtained.

By arranging to take delivery of all the oats at the present time, they effected a saving of 11.18 cents a bushel. It was stated that the city has plenty of storage room and this saving might as well be made.

On pressed hay, straw and bran a saving of \$1 a ton was effected. The total saving to the city as a result of today's meeting amounts to \$1,074.25, as this additional sum would have had to be paid if the tenders sent to the board's had been accepted.

The committee decided to purchase the supplies as follows:

Eight thousand two hundred bushels of oats from W. A. Quinton, for present delivery at \$1.40 a bushel, former price \$1.38 (price unchanged).

Thirty-five tons loose hay from W. A. Quinton, at \$14.90 a ton, (price unchanged).

One hundred and twenty-seven tons pressed hay from W. A. Quinton, at \$13.20 a ton, (price unchanged).

Thirty-three tons straw, from W. A. Quinton, at \$9.50 a ton, (former price \$9.20).

Eleven tons bran, from W. A. Quinton, at \$25 a ton, (former price \$26).

Thirty-five tons loose hay, from William Douvan, at \$14.90 a ton, (price unchanged).

Ten tons loose hay, from John Carney at \$14 a ton, (price unchanged).

Hay, straw and bran are to be delivered to the departments from time to time as required.

MINISTER OF LABOR'S REPORT FOR 1908

Industrial Disputes Act Has Worked Well—Fatalities on Railways 326

Ottawa, Nov. 12.—(Special)—The annual report of the minister of labor shows that in the two years in which the industrial disputes act was in operation fifty-five disputes had been dealt with. All but two of them had been settled without a strike or lockout, and in these two cases the findings of the conciliation boards had been fully accepted. The calendar year 1908 was remarkable for the few strikes and lockouts in Canada, the number being less than in any of the last seven years. There were sixty-nine strikes and lockouts. The only disputes of serious consequence were those affecting the cotton mill hands in various companies in the province of Quebec and the strike of machinists employed along the lines of the C. P. R. The total number of employes involved in the trade disputes was approximately 26,520. The loss of time of employes was 706,558 working days. Out of 69 disputes twelve were in building trades, ten in the mining and quarrying industry and nine in the metal working and shipbuilding trades. Twenty-six of the strikes and lockouts occurred in the province of Ontario, nineteen in the province of Quebec, and one in each of the provinces of Manitoba and Saskatchewan. There were no disputes in Prince Edward Island.

There was a considerable decrease in the number of industrial accidents. In all 1,772 fatal and 227,707 fatal accidents were reported. The branch of industry involving the largest number of fatalities was the railway service, in which no fewer than 326 lives were lost. Agriculture again ranked second, with 1,047 deaths, and 227,707 fatal accidents were reported. The branch of industry involving the largest number of fatalities was the railway service, in which no fewer than 326 lives were lost. Agriculture again ranked second, with 1,047 deaths, and 227,707 fatal accidents were reported.

SPLIT IN RANKS OF PYTHIAN KNIGHTS

Colonel Spellhouse and Six Companies of Uniform Rank Are Expelled From Order

Indianapolis, Nov. 13.—Six companies of the First Regiment of Indiana uniform rank, Knights of Pythias, and the colonel of the regiment, Frank Shellhouse, of this city, have been expelled from the order by Brigadier General Wilson on the charge of insubordination.

General Wilson assigned three "loyal" companies of the Seventh Regiment, Colonel Spellhouse and six expelled companies would form an independent organization like the Damon Guards, of Ohio. The difference between General Wilson and Colonel Spellhouse had been growing for two years, and six of the companies of the First Regiment supported the colonel rather than the brigadier-general.

F. D. CORBETT, WEALTHY SHIPPING MAN OF HALIFAX, DEAD

Halifax, N. S., Nov. 10.—(Special)—F. D. Corbett, a retired shipping merchant, died suddenly this morning, aged sixty-seven years. He was one of the wealthiest citizens of Halifax, worth probably \$400,000.

PRINCETON AND YALE IN STRUGGLE TODAY

New Haven, Conn., Nov. 13.—With the members of each team confident that the final call of time would see victory in their hands, the Yale and Princeton eleven met this afternoon at Yale field in what for the New Jersey men was the final game of the season, and for the blue team, the first of the big games of the college football year.

A great throng of visitors, with their pennants of blue and of orange and black, poured into the city during the morning and early afternoon, eager for the great struggle. The day broke bright and while, from the spectators' point of view the weather was all that could be desired, the coaches and players were hoping that it would be cooler.

NOVA SCOTIA WOMAN DEAD, AGE 102

Miss Phoebe Ann Wade, the oldest woman in Massachusetts, died at the home of her niece, Mrs. Kenneth D. Wentzel, at Lynn on Tuesday.

Miss Wade was born in Wadesville, Annapolis county, Nova Scotia, March 10, 1807, and resided in her native town until 1880. She was a nurse for several years after going to Lynn.

Miss Wade came of a long-lived family, her father having lived to the age of 97, her grandfather to the age of 100 and one of her uncles dying in his 103rd year.

On her 122nd birthday, last March, Miss Wade declared she did not regret having remained single, and that if she had to live her life over again would do just as she was afflicted with blindness, but otherwise retained her faculties perfectly until her death.

The board of health reports the following:

ASKS \$4,000 FOR TEETH

New York, Nov. 13.—Two thousand dollars a tooth is the price Dr. Joseph Harvitt, a Broadway dentist, and former dean of the New York Dental College, was asked to pay in the city court. He is being sued by Rebecca Rubenstein, wife of Joseph Rubenstein, who wants damages for suffering she endured after Dr. Harvitt had extracted two of her teeth, about 18 years ago.

She says that she was compelled to spend more than a year in hospital, receiving treatment to her nose and jaws as the result of an abscess. The dentist charged her \$1, and her husband says he spent \$2,000 for her hospital treatment. She asks \$2,000 more for damages.

KILLED BABE AND SELF

Burlington, Vt., Nov. 13.—Carrying with her into eternity her four-month-old baby, Mrs. Francis Broderick, closing doors and windows of her kitchen, turned on a gas cock and awaited death. With the result in her arms, Mrs. Broderick's body was found when her husband, a motorist, returned home tonight. Family troubles are believed to have been responsible for the act.

SUGAR REFINERY IS SUDDENLY SHUT DOWN

Yonkers, N. Y., Nov. 13.—More than 700 men have been thrown out of work without explanation by the sudden closing of the National Sugar Company's refinery here. The company has other plants at Long Island City and Brooklyn.

SERIOUS SITUATION DEVELOPING IN NEW SOUTH WALES

Big Coal Strike Extending and May Be General Next Week—Food Prices Bounding

Melbourne, Nov. 13.—The extension of the coal strike in New South Wales is causing a serious outlook. It is reported that the Riverside workers throughout Australia will strike on Tuesday. Many of the over-sea shipping companies are increasing their freight rates and coal sales at Brisbane probably will be postponed as a result.

Food prices are rapidly rising, and coal is selling at sixty shillings a ton. Mr. Bowling, the president of the miners' federation, has advised the strikers they are hungry to take what they want.

"TARIFF OR NO TARIFF" ISSUE SAYS NORTHCUFFE

Tells New York Newspapers to Watch This Rather Than Socialists and Suffragettes

New York, Nov. 13.—Behind the fights of suffragism, socialism, land taxation and other issues which loom so conspicuously in the eyes of the outside world, England is now at death grips with the tariff problem, says Lord Northcliffe, proprietor of the London Times, the London Daily Mail and other big London newspapers, who is now in New York.

"The Tribune this morning gave some statistics of the number of mechanics and others out of work in England today," he said. "Some of these men are the victims of our so-called free trade, on which, under Cobden, we embarked in the full belief that all the world would be free trading within five years. On the whole, Great Britain has done very well out of free trade, but as the tariff walls erected not only by competitors but by our own colonies have grown higher and higher, she has been unable to compete."

"So far, practically every election that has taken place in the last four years has shown a majority of votes for a tariff and the party to which I belong is known as the tariff reform party, rather than to Americans; in view of their political non-alignment."

"Some of you would do well to begin to watch this fight and not pay so much attention to the socialists and suffragettes. A British tariff would have an immense effect on the trade relations of Great Britain and the United States. Incidentally the question of a Canadian tariff comes in and also the trade agreement between Canada and France."

"The main issue is a simple one, tariff or no tariff."

DOCTOR DIES WHILE WRITING PRESCRIPTION FOR PATIENT

Boston, Nov. 13.—Dr. Charles K. Cutter, a well known Somerville and Charlestown physician, died while writing a prescription for a patient at his home office, 175 School street, Somerville. Five minutes before death, which was caused by valvular heart trouble, he was apparently well.

Dr. Cutter was born in Somerville nearly 20 years ago. He graduated from Somerville high school in 1888, Tufts College in 1872, and Harvard medical school in 1876. He practiced in Charlestown 15 years and since 1891 in Somerville.

SEE LITTLE CHANGE TO CONVICT CAIRO

MOB RULERS Trouble Believed to End—Alexander in Kanakee Prison

Cairo, Ill., Nov. 13.—Orders for the demobilization of the fourth regiment of the Illinois National Guard, which has been mobilized since early yesterday, were expected by the commanders of the organization this morning. The news of a disposition to renew mob rule last night, and the safe arrival of Arthur Alexander at Kanakee, led both the local and state authorities to believe that there was no chance of further disturbance in this city.

Alexander, who is suspected of complicity in the murder of Annie Peley, is the only person in whom members of the mob have any interest. The announced intention of Sheriff Davis and General Wells was to land the negro at some point far removed from Cairo, but no attempt would be made to take him from the property constituted peace authorities, and it is the general opinion here that the object was accomplished by the journey to Kanakee.

Whether a special grand jury is to be summoned to consider possible charges against members of the mob, may also be determined today. It is likely, however, that the matter will be left for the next regular grand jury in December. Under present conditions of public opinion, it is conceded by the local authorities that the chances of obtaining indictments against members of the Thursday night mob are remote.

FISHERMAN LEAVES ESTATE OF \$50,000

New York, Nov. 13.—The fish took kindly to the bait that Lash Raynor cast for fifty years of freemasonry, in the Sound. Also his fisherman's luck must have been good for when they probated his will at Mincola, L. I., they found he had left \$50,000 to his heirs.

Raynor was one of the old-time fishermen—born and bred to oars and sail and disdaining the "smoking motors" that might have lifted his estate to twice its present value if he had deigned to take the rich friends of former days to the banks in something quicker than the ancient leg-umotion craft in which he and they had fished a quarter of a century before.

Raynor's \$50,000 goes first to his widow and then to a dozen nephews, nieces and other kindred. It is said that he was the richest fisherman on Long Island.

GOVERNMENT IN NORWAY BEATEN

Christiania, Nov. 13.—The general election which took place last week, the totals of which have just been revised, resulted in the Right and the Liberal, who coaligned, winning 63 seats in parliament; the members of the left, or governmental party, 47, and the Socialists, 11. Premier Knudsen announces that at the coming session in January his cabinet will resign.

MANUEL LEAVES FOR ENGLAND

Madrid, Nov. 13.—King Manuel of Portugal left here yesterday for Cherbourg, where he will embark for England.

ROSEVELT HEARD FROM; IS O. K.

Mombasa, British East Africa, Nov. 13.—News of the Roosevelt hunting expedition was received today direct from Colonel Theodore Roosevelt. The message states that there is nothing whatever wrong with the party.

ALL TIE FOR FIRST PLACE

Buffalo, N. Y., Nov. 13.—At 8:20 o'clock this morning, the end of the tenth hour, all of the contestants in the 24-hour bicycle race were tied for first place, and had covered 207 miles.

CARRIAGE PLANT BURNED

Lancaster, Mass., Nov. 13.—Summer residents lost most of their carriages yesterday in a fire which destroyed the carriage plant of Chas. F. W. Turner and a cement house at South Lancaster. The total loss probably exceeds \$50,000. Children playing with matches near exhibition believed to have caused the fire.

MISTAKEN FOR DEER, IS SHOT AND KILLED

Renfrew, Nov. 12.—A sad fatality has to be numbered to the list of many cases of due precaution in shooting during hunting season. James Price, a young man of Pakenham, a shantyman and employee of Alex. Barnett & Company, lumbermen, Renfrew, was shot near the firm's shanty at Brule Lake by a chore boy named Robert Huggitt, just recently engaged.

TWENTY-FIVE MILES OF MACKEREL

Boston, Nov. 13.—Large schools of mackerel are reported on Western Bank by Captain Somers of the fishing schooner Francis J. O'Hara, Jr. The vessel sailed through the fish for 25 miles.

RUSSELL SAGE FOUNDATION WILL ASK FOR ONLY 24 PER. CENT

New York, Nov. 13.—The Russell Sage Foundation announces that it is almost prepared to enter a national campaign to loan sharks out of business by taking over their business-providing Congress will pass a law permitting poor men to pay back loans at 2 per cent a month interest.

This would be 24 per cent a year, which is several times the legal rate of interest in New York State and nearly four times that in the majority of other states. The benevolently-founded organization says, however, that if Congress will permit charitable institutions to collect the 12 per

Don't eat Milk Chocolate

There's a big difference between Milk Chocolate and "Tobler's" Milk Chocolate. That is why "Toblers" print their name on every single cake that they send out from their world-famous factories at Berne in Switzerland. This helps the consumer to be sure of real "Tobler's." Eat "Tobler's" Swiss Milk Chocolate only. Shun all so-called Milk Chocolate. Sold in 5, 10, 20, 40c. packages, and at 50c. per lb.

Imported by MacLure & Langley, Limited, Toronto

THE THREE KEYS
BY FREDERICK ORMOND.

(Continued)

"Well, to tell you the truth," Lathrop said thoughtfully, "I think that I can accomplish it for you. I shall undertake to do it while you are away. Now, how can I get hold of the million which you promised him, if he should wish to take it? According to my memorandum, there is not that much in your own particular strong-box at the Westmorland."

"My dear fellow," Millington cried, joyfully, "you haven't the keys to all my strong-boxes, as you call them. There are others. If the thing comes to a head, wire me the one word, 'Correct.' Within a couple of hours you will have the money delivered to you."

"Jack," he said softly, "that is a promise which, sometime, I may remind you of."

In the billiard room of the club, they encountered Chapman, who nodded to Millington, but passed Lathrop without a glance.

"What is the matter between you two?" Millington asked, curiously.

"Nothing," only I discovered that Chapman is a cad—and I told him of it."

"Humph!" was his friend's comment. "Well, in my opinion, he is a dangerous one. He's shy, that fellow. He'd knife you in the back in a minute, if nobody was looking."

The two were soon busily engaged in a game, neither paying the slightest attention to those at the adjoining table, until the loud tones of Chapman, who was evidently telling an interesting story, became insupportably distinct.

"Prettiest girl in New York," he was saying. "I didn't suppose Lathrop had such good taste. And, by the same token, one would suppose that she would have a better. A regular little Spanish beauty, with big, black eyes and luscious lips."

Morris Lathrop had placed his cup on the table, and he now stood transfixed, his face as white as the ball he had knocked about. Those who were listening to the story eyed him uneasily, but Chapman stood with back toward him, talking on in the same loud voice, as though unaware of the presence of the man whose affairs he was discussing.

"You'd have been anxious to witness his charmer was," he continued. "He gave me the story glare like a tragedian, and walked away in a huff. However, I stole a march on him, for I followed her, and found out who she was, where she lived, and all about her. Then, I waited a while, and sent up my card to her."

"Did she receive you?" somebody who had not noticed Lathrop inquired.

"Indeed, she did! I wrote on the back of the card, 'A friend of Morris's, and she had me up at once. I tell you it's a smart establishment. Nothing is too good for that Severn street apartment, and, if the senorita was beautiful on the street, she was adorable at home."

"Did Morris send you?" she asked. "I was a bit puzzled at that; but, finally I made a clean breast of the matter, and said, 'No, I confessed that I had seen her with him, and that I could not resist the temptation to follow her home. You ought to have seen her eyes blaze then. She stood before him, his face white and set, his eyes glittering dangerously."

"Go on," Lathrop said quietly. "What did she do then? Relate your scoundrelism to the end. What did she do then?"

Chapman laughed hysterically, but the laughter was forced, for Morris Lathrop stood by, his eyes fixed on the teller of the tale.

"I didn't know that you were here," he sneered, "or I might have kept the story till later."

"Finish it now," the other commanded.

"Well, if you will have it, she kissed me."

He got no further. Lathrop took one step forward, his fist shot out; Chapman smitten on the point of his chin, went down upon the floor, several feet away, and lay there quivering.

Lathrop turned away, wiping his hands and without a glance at the still senseless Chapman, who nobody had approached, faced the members of the club who were in the billiard room.

"Gentlemen," he said, "my resignation from this club dates from tonight. I regret that I was compelled to break an inviolate rule. Come, Jack, let's go."

CHAPTER VIII.

"Jack," Lathrop said, "you have an hour and a half, or a little more before your train goes. I want you to go to Seventy-ninth street with me. Will you do it?"

"Certainly; but why do you want me?"

"I want to show you the woman whom Chapman insulted. If ever there was a soul without guile, here is one. I want you to know it. It is necessary, now, that somebody besides myself should know about her."

He had hailed a cab while they were talking, and they got in and were driven away.

"Isn't it rather late to make a call, Morris?" asked Millington, presently.

"No; I often go as late as this. Jack, if that scoundrel ever refers to her again, I'll kill him. I felt like it tonight."

"You looked like it, certainly," Millington declared. "Love! I didn't know you could be such a demon, old man."

"I know it only too well," was Lathrop's moody rejoinder. "I am more afraid of myself than of any man living. I inherit strength and a horrible temper, which, until tonight, I thought I had learned to subdue. When I lose it, a devil possesses me."

Nothing more was said until they stood together in front of the house, where Lathrop opened the vestibule door with a

face of a woodland spring. Now, if I lived a thousand years, I should never regain what I have lost—my self-respect. I may live to square myself with others; I can never square myself with myself. The world may not know what I have done, but I know it, and that is infinitely worse!"

(To be continued)

key, and gave the electric button inside a series of regulated tones. The inner door swung open instantly, and they passed inside to the stairway, mounted one flight, and found Clarita awaiting them at the head of the stairs.

If she felt surprised when she discovered that Morris was not alone, she said nothing of it, but quietly led the way into the parlor, which was brilliantly lighted.

"Rita," said Lathrop, "this gentleman is one of my most trusted friends, Mr. Millington. Jack, let me present you to Miss Ortega."

Then, for an instant he stared at his friend in astonishment, inasmuch as Millington became suddenly as awkward as an uncaught boy. For some moments after the introduction was uttered, he did not move. Finally, however, he bowed and extended his hand. His face was as red as a peony.

"I beg your pardon," he said, confusedly. "I—I think I was—er—surprised!"

Then, he became silent again, still staring, now did he regain his composure until after they had left the house.

"Has a man named Chapman been here tonight, Rita?" Lathrop asked at once, thus relieving the strain and permitting Millington to drop into a chair, where he continued to stare, though evidently making a heroic effort not to do so.

"Yes, oh yes," was the impetuous answer, "and another man, too. What does it mean? Are you in trouble, Morris?"

"I'm in trouble," Morris said. "Another man, you say? Who—ah!" He recalled, the what Edna had said to him. "Tell me about both of them, if you can."

The girl tapped one of her little feet impatiently on the carpet while she replied to him, and it was plain that she was still angry.

"The first one—the one whom you call Chapman—came soon after I arrived home. He sent up a card by the hall-boy, and he had written upon it that he came from you. I thought it strange, but, of course, I admitted him. Then, I cannot tell you!—he was insulting. Marie was out—I was alone. I ordered him to leave the house, but he wouldn't budge. He tried to seize me—he meant to—oh, he said so! I fled into the other room and locked the door. He rapped upon it, but I did not answer, and then, after a few moments, he went away, laughing."

Millington bounded from his chair, and strode up and down the room.

"The scoundrel! The infernal scoundrel!" he muttered. "I'll settle with him!"

"That is already done, in part," Lathrop said, quietly. "Now, Rita, the other man; tell me about him."

"Oh, the other," the girl exclaimed. "He came soon after the first one had gone. The boy brought up word that the man wanted to speak with me. He sent no name, I said that I would see nobody, and that he was not to admit any one, or to bring any more messages. He more leisurely fashion by his friend.

The ride down-town was a silent affair, and they were nearly at the station before either spoke to the other. Then, Millington, with marked hesitation, said:

"Some day, old man, when you feel like it, will you tell me something about Miss Ortega?"

"Yes," Lathrop answered, simply.

There was silence again until the cab turned into Forty-second street and was nearing the station, when Millington spoke again.

"I thought you were going to marry one of Trevor's daughters," he said.

"I am," was the reply.

Millington made no comment, but, after a little interval, changed the subject:

"By the way," he said, "I hadn't remembered to ask you: Did you attend to those matters for me today?"

"Every one of them," Lathrop declared. Then, as the cab halted, and Millington got out, he extended his hand. "Good luck to you," he added. "And, Jack, I'd like to give you a bit of advice."

"What is it?"

"Don't think too much about Clarita Ortega while you are away. She is not for you unless—"

"Well, unless what?" Millington demanded, eagerly as Lathrop hesitated.

"I'll complete that sentence when you return," was the unsatisfactory answer.

"Good-night."

They clasped hands and parted, one to run for his train, having barely time to get through the door before it was closed, and the other to ride on with bowed head and scowling brow, disgusted with himself for what he had done that day. He was troubled, contentious, but, nevertheless, inflexible in his resolution to play his scoundrel's game to the end.

"I had carried out my resolve to kill myself," he mused. "I should have died with a conscience as troubled as the survivor."

ON THE ROAD.

The Actor—You may ridicule our last tour, but I tell you I had no other choice every day.

The Soubrette—Jim! Didn't the farmers catch you smothering them?

Fashion Hint for Times Readers

FOR THE GIRL WHO RIDES ASTRIDE

Cross-saddle riding is being taken up more and more by women who live out of town, where everything is formal and dignified, side-saddle horsemanship is demanded. The habit for astride riding has a skirt which falls to the ankles, and the skirt is so arranged that it may be worn as pictured, in frankly divided fashion; or the two front layers may be unbuttoned, crossed in front and buttoned over each other to give the effect of a modern skirt. The loose hip coat is comfortable for riding, and is plentifully supplied with pockets.

RED WIDOW RECEIVES OFFERS OF MARRIAGE AND STAGE CAREER

Paris, Nov. 12.—The entire session of the Steinhil murder case today was taken up with an impassioned plea by Advocate General Rouard for the conviction of the woman who is charged with having killed her husband and her stepmother and become an actress.

The prosecutor argued that the woman, a born liar and as one whose whole life, before and after the crime, justified the presumption of her guilt. He developed the theory that after her first and generous lover, Chouanard, abandoned her in 1907, Mme. Steinhil realized that she was almost at the end of her tether and he said that when she got Maurice Borden in her clutches she was determined to hold him even at the price of murder.

Against Mme. Steinhil's story that burglars committed the crime, the prosecutor insisted that they were mythic, and he undertook to reconstruct the scenes which actually happened, contending that while she accused woman and her accomplices were tying Mme. Jany, M. Steinhil was aroused by the noise and jumped out of bed. Thereupon they attacked and killed him and, returning to Mme. Jany's room found her in a bad fright.

M. Trouard Rolle even undertook to account for the stoppage of the clock in the Steinhil home after the murder, advancing the theory that Mme. Steinhil in her anguish, could not endure its ticking. An expert testified during the trial that the clock was stopped by hand as it was wound up.

The argument of M. Trouard Rolle left the impression that the testimony upon which it was based was too conflicting and that his fine-pointed presumptions were too precise, leaving him vulnerable before his antagonist, M. Aubin.

THE TORRY CAUCUS

Ottawa, Nov. 12.—The Conservatives in caucus today sat for two hours and a half in the morning and for most of the evening and finally separated without reconciling their differences on the naval policy. The west is still for Dreadnaughts. Mr. Borden is still with the government and P. D. Monk gave expression to the view by staying away.

The final conclusion was that as they could not agree among themselves the best policy would be to stop talking for a time and wait until the government programme was finally laid before parliament.

Of all the useful inventions CATSPAW Rubber Heels and W.P.A.E. Hot Water Bottles, discovered in the same rubber factory, stand out more prominently as most useful and beneficial to mankind. Just out of caucus and your shoe dealer or your druggist why,

A Skin of Beauty is a Joy Forever.

DR. T. FELIX GOUBAUD'S Oriental Cream or Magical Beautifier

It is stated on excellent authority that the result of these negotiations will be the passing of a portion James Ross' \$5,000,000 holdings in the Dominion Coal Company to the proposed syndicate at a price something less than par. As soon as the transfer of this big block of coal stock is made, arrangements will be entered into for the merging of the two companies, although no basis of price has yet been reported.

DR. T. FELIX GOUBAUD'S Oriental Cream

OR MAGICAL BEAUTIFIER

An Indispensable and Necessary Article for Particular Women who Desire to Retain a Youthful Appearance.

Every woman owes it to herself and loved ones to retain the charm of youth which nature has bestowed upon her. For over half a century this article has been used by actresses, singers and women of fashion. It renders the skin like the softness of velvet leaving it clear and healthy. It is a white and non-oily preparation, preparing for daily or evening attire. It is a highly desirable and pleasant preparation. It remains unaltered. When attending dances, balls or other entertainments, it prevents a greasy appearance of the complexion caused by the skin becoming heated.

Goubaud's Oriental Cream cures skin diseases and relieves Sunburn, Removes Tan, Pimples, Blackheads, Moth Patches, Rash, Freckles and Vulgar Redness, restores a delicate clear and refined complexion.

Goubaud's Oriental Cream is sold by all druggists and Fancy Goods Dealers. No. 10. For sale by Druggists and Fancy Goods Dealers. Ferd. T. Hopkins, Prop., 37 Great Jones Street, New York.

BOTH BOURASSA CANDIDATES LOSE

Montreal, Nov. 12.—The result of today's by-elections in the Province of Quebec with the election of two straight government supporters and one defeat in Quebec city, is regarded as a strong answer to the campaign of Henri Bourassa in criticism of the policy of Premier Gouin.

The fight was mainly centralized on St. James division of Montreal, where a strong campaign was waged mainly on personal issues. Mr. Lafamme, the Nationalist candidate, was supported by Bourassa and J. B. Poirer, ex-minister of mines and forests in the Gouin government, and the fight was largely centred on municipal lines. The Nationalist candidate, Mr. Lafamme, was defeated by 268 by the straight government supporter, Ald. Robitaille.

In Chamblie county, just across the river, Dr. Desjardins, the government candidate, was elected by 460 majority. The only reverse sustained by the government was in St. Sauveur, Quebec city, where the Laborite Langlois, was elected by 388 over George Zary, the government candidate.

The general result of the by-election is taken as a sharp reverse to the Nationalist campaign undertaken by Henri Bourassa.

COLL'S SOAP

Wrappers extra light and short weight on soap is all paid for by you when you pay 5c. for a small bar of soap. About 25% more soap is what you get when you buy a pound bar of Coll's Soap. Insist on getting it.

The Times Daily Puzzle Picture

HER STRONG POINT

She has no dog to fondle,
She has no cat to pet;
She does not own a parrot,
She leads no social set,
She writes no learned papers,
Find her husband.

To read where women meet,
But she can get up dishes
Her husband likes to eat,
And they are saving money,
And find that life is sweet.

MR. BORDEN'S TROUBLES

Mr. Borden did not tender his resignation at the conservative caucus in Ottawa yesterday. This will be sad news for the Toronto Telegram, which, speaking for a wing of the Ontario Tories, said: "If R. L. Borden, M. P., submits his resignation to an Ottawa caucus of his followers, the latter, to employ the chaste and eloquent terms never found in the London Times, should 'grab it quick'."

ST. JOHN AND HALIFAX

The Maritime Merchant has a very temperate and proper article on the relations of Halifax and St. John in regard to the dry docks. While commending the Halifax Board of Trade for agitating a dry dock at that port, the Merchant condemns the Board's resolution aimed at the St. John project. This resolution, it was done in haste, says the Merchant, "and, like most things done in haste, is being repeated at leisure."

A WORD FOR THE EAST

Mr. George Taylor, M. P., who recently spent some months in England, has been telling the English people some facts about Ontario as a field for settlers which apply equally well to the maritime provinces. We quote from the Ottawa Journal: "Mr. Taylor specially recommends Ontario to the Englishman, he says, because the latter is not naturally fitted to hard pioneer work and not happy in the comparative isolation of the great west. Small cleared farms of about one hundred acres, within easy reach of populous towns, are to be had cheap in Ontario now, because the young men of Ontario go west and take up the large tracts still obtainable for little money or entirely free. They know

the conditions, and from childhood have been brought up as rough carpenters and handy men as well as farmers. They can cut their own timber, build their own 'shack,' mend the wagon and the tools, put up the barn and be generally more independent of neighbors than can the British immigrant. Most of them go west with capital saved or provided by their parents, which they can turn to their advantage impossible to the newcomer. Ontario, again, offers greater residential attractions to the well-to-do settler—the 'gentleman' farmer—the man whose chief desire is to supplement his income and to start his children in life with better prospects than they have in the old country. These are Mr. Taylor's words as reported in the illustrated weekly Canada, published in London. They are quite worth republishing and they are fit for sympathetic pondering by the intending emigrant from England. Ontario offers the Englishman, Scotchman and Irishman, with a little money of his own to invest, a home to his own liking. An intelligent effort to convey this idea is made by the immigration agencies of both the province and the Dominion. Ontario would welcome an access of old country population of the substantial class and would be able to assure its members homes and a measure of prosperity which they would apply to the sacrifice of departure from their native environment. Mr. George Taylor has done well in reminding the people of Great Britain that the whole of Canada does not lie west of the Great Lakes."

MORE SILLY TALK

Addressing a banquet in Toronto a few evenings since, one of the speakers said: "Our so-called patriotic government is at the present time contemplating the building of tin-pot cruisers that the gunpowder of British Dreadnoughts, the genius of British admirals and the blood of British sailors will have to protect in time of war. These cruisers would be as useless as are the vocal Dreadnoughts now being constructed at Ottawa. A Toronto paper states that the one wonders at his failure to get out of the country as quickly as possible. But this gentleman was not speaking seriously; he was a little cheap applause from opponents of the government at Ottawa. Had Mr. Borden been there he would have felt called upon to disagree with the speaker."

EARLY GRECIAN COINAGE

(From the Saturday Review) The invention of coinage is due to the Greeks, most probably to the bankers of Halicarnassus and adjacent Asia Minor Greek colonies, who toward the end of the eighth century B. C. began stamping small gold and silver coins which passed through their hands in currency with a mark some sort intended to guarantee the weight and purity of the metal. Such ingots very soon assumed a round and more regular shape, which we find already in old silver coins from Aegina, nearly contemporary with Asia Minor "beans." Europeans to say, none of the surrounding peoples with whom the Asiatic and European Greeks were in constant communication political or commercial, took up the wonderful invention which at present seems to us so obvious necessity that we scarcely realize how the civilized world of old could have gone on without it. As a matter of fact, however, neither the Phoenicians nor their practical competitors who claimed the supremacy over the cities where the new currency was initiated, nor of course the Egyptians ever the coinage, till the conquest of Alexander disseminated the Greek coinage all through the Eastern world. The Romans came to know it through the Greek cities in Sicily and Magna Graecia, and began striking silver coins toward the beginning of the third century B. C. In the meantime, the Greeks do sink, like everything else, had fallen within the domain of art, and their coins remain forever a standard of beauty for the artist and a model of perfection to the die sinker.

OVERCOAT NEWS That You Should Read

THIS CANADA OF MINE

They sing of lands more beautiful, Away across the sea, Where the poets of the olden time Wood at the Muse's knee. When they sang of gods and madmen in Parosian sunny clime. But they never knew the beauty Of this Canada of mine. They never saw the mountains That the clouds of heaven kissed, And the winds are decked with gold While they whisper dreams of beauty To the hills and vales of pride. For we hear the lutes of heaven Softly tinkle about the pine When the autumn leaves are falling In this Canada of mine. Golden red, and yellow laden, Such the autumn's golden sheen, With a tint of heaven's halo, When the winds are blown to greet And the wild sweet dream is painted In the lands beyond the line. For it bears the brand of heaven, In this Canada of mine. "When the smoky, distant sunset, Lifts the forest from the vale, And the rose may bloom in Britain, While the sun is setting in the West, We grow the rose of Sharon In this Canada of mine. Wild and wayward is the beauty In the land we love so well, And the sun is setting in the West, Every hidden nook and dell, Still they tell us of the beauty In the land we love so well. But the tree of life is blooming In this Canada of mine. W. Leonard, in the Toronto Sun.

IN LIGHTER VEIN

LOVE AND MELLANRY. "Do you believe in love at first sight?" "Yes, indeed. That's the way I always choose my hats." SURPRISE. "I never was so surprised in my life." "That's the matter." "I just overtook one of my twenty-dollar a-week clerks telling a friend that I was paying him \$100 a year." WHAT THEY MEAN. A graft. A growl. Some language bad; A brag. An angry dad. A cloud. A yell, a shout. A fur. Nace fire is out. -Detroit Free Press.

TO HIM WHO WAITS

Most of the things that come to him who waits are disappointments. -Chicago Record Herald.

LEVEL

"Try to rise too far in life is treacherous uphill work," said Uncle Eben. "Learn to stand your feet down on the ground, and you'll find a bump. De be' way is to go straight and be level." -Washington Star.

JOYS FOR ALL

Let the boy have what he wants. Give the maiden what she's wishing. Hide the good wither slowest. Let the old man go a-shining. -Globe Star.

IDLE THOUGHTS

The great never plays good long; there's always a bit in the end. Some people register their kicks, but never their thanks. The most austere woman is willing to excuse her husband's downy cheeks for the sake of a husband. The most flatter an artist to ask him to paint something to fill up a certain sized space. Some of our Milwaukee duchesses speak very kindly of America—Philadelphia, Sullist.

WHY THIS MEN?

I saw a hen go stately read. She seemed to read where she belonged. "Why goes that hen across the street?" "I know she does if I'm any day. But she's a hen, and she's a hen." "You speak the truth," I made reply. "She crosses every day." "And she goes where she belongs." "Though she has to spare; She must go to the other side To see what's over there." "Alas! My friend, it's just the same With all the human race. The hen who stays where she belongs, Though she's a better place, She'll find her way to the other side. Tell why men cross the street. And I'll explain the hen." -Herald.

PRESENTED TO TOWN

A Y.M.C.A. BUILDING

Wm. M. Smith has formally presented to the Young Men's Christian Association of Poughkeepsie, N. Y., a new and fully equipped building. The structure is four stories with white marble front and is completely furnished. The presentation was made by Mr. Smith and accepted on behalf of the association by President D. C. Matthews. The structure cost over \$200,000 and is supposed to be one of the finest in the state. The woman never lived who didn't think that her husband looked grand in dress suit.

A WINDSOR LADY'S APPEAL

To All Women: I will send free, with full instructions, a book of treatment which positively cures Leucorrhoea, Ulceration, Displacements, Falling of the Womb, Fatigue or Irregular Periods, Uterine and Ovarian Pains or growths, and all other gynecological troubles. My book, "Woman's Own Medical Adviser," also sent free on request. Write to-day. Address Mrs. J. Summers, Box 298, Windsor, Ont.

ATTENDED BY

FIVE DOCTORS

But Got No Relief Until He Used

Dodd's Kidney Pills

Wonderful Cure of A. F. Richard,

Who was Tortured by Rheumatism and Kindred Pains, Sets

Kent County Talking.

St. Ignace, Kent Co., N. B., Nov. 12.—(Special)—After being tortured for four years with Backache, Rheumatism, Stiffness of the Joints and Pains in the Loins, and getting no relief from five doctors whom he called in, Mr. Antoine F. Richard, a well-known farmer living near here, is spreading the good news that he is once more a well man, and that he owes his cure to Dodd's Kidney Pills. Speaking of his wonderful cure, Mr. Richard says: "I was a helpless man in July, 1907. For four years I had endured the greatest torture from Backache, Rheumatism, Stiffness of the Joints and Pains in the Loins. I had dark circles under my eyes, my head ached and I was often dizzy. I was attended by five doctors, but not one of them could help me. "Then I began to use Dodd's Kidney Pills and after the first few doses I began to improve. I used four boxes in all and now I am working every day on the farm a well man. I owe my wonderful cure to Dodd's Kidney Pills and nothing else." There is no case or kind of Kidney Disease that Dodd's Kidney Pills will not cure.

THE PROBLEM OF

THE UNEMPLOYED

(Montreal Witness)

The problem of the unemployed comes up in Canada comparatively little. Just at present, as there should really be no unemployment in Canada now, in the sense there always is in congested centres of Europe. But, for one reason or another there are always some unemployed here as elsewhere, and the problem is "no work" of general interest. The third report of the Central (Unemployed) Body for London, issued, covers the period from July 1, 1907, to June 30, 1909, and is valuable. The total number of applicants registered by district committees during the year ending June 30, 1909, was 48,887, an increase of 18,004 or slightly over 37 percent over the total for the previous year. There were 17,758 women among the applicants. No less than 67.5 per cent of the total number of men registered were described as "unskilled," this representing an increase of 20.7 percent on the previous year's figures. In the report of the Greenwich District Committee attention is directed to the marked increase in the number of youthful applicants registered. The total of these in the borough had advanced by 28 percent between the ages of 16 and 24. In the opinion of the Greenwich Committee, this state of things is due to the evils of boy labor and the neglect of skilled training by means of apprenticeship. The latter evil is more or less prevalent everywhere, and is one result of trade unionism. In nearly every case presented the committee recognizes the improvement in health and physique produced by a period of regular employment and food, which change is the more noticeable in the case of men sent to the Hallsby Bay colony after a prolonged period of unemployment and consequent privation. The Greenwich Committee unanimously attests to the temporary value of the work provided under the Unemployment Act, in enabling men to tide over a period of depression without either breaking up their homes or having recourse to the Poor Law. It is still in doubt, however, whether any permanent benefit is conferred on the men by the limited amount of work provided. The Hackney and Hamersmith Committees are of opinion that a more than passing advantage is obtained while committees of Kensington, Lambeth, and Battersea complain that the provision of relief work causes many men to place too much reliance upon a repetition of assistance from the same source. This was to be expected in some degree, as the temporary value of the work is in general works for food. Apart from that, the chief lesson to be learned seems to be the necessity for the extension of technical education or of institutes where lads can be instructed in craftsmanship and graduate as mechanics.

NINE GREAT MILITARY BUDGETS

There are now nine great military powers in the world—seven in Europe, one in America, and one in the Northern Pacific. They are spending on their armies and navies more than three hundred millions sterling a year. The actual amount in 1908, the latest year for which complete data are available, was \$306,877,000. The totals of each of the nine armed nations were:—

19 KING STREET

Philip J. Woods

Richibucto, Nov. 11.—The death of Philip J. Woods occurred last week in his home in town, after a short illness of cancer of the liver. He was nearly 70 years of age. Mr. Woods had been in hotel business the greater part of his life and was well known throughout the province, having conducted hotels in Cocagne, Macouche, Harcourt and Rexton and Richibucto, where he was proprietor of the Kent Hotel for some years, and at Memramook, where he had charge of a hotel, when he was overcome by his illness, which caused his death. During several terms, he was one of the councillors for Richibucto parish. He was married; first to Miss Catherine Gorman, daughter of the late Bernard Gorman, of St. Louis, by which union there are five living children: Jas. D., of Port Elgin; Joseph B., of Lynn (Mass.); Daniel P., of Cambridge (Mass.); Andrew J., of Fredericton; and William Frederick, of Bathurst. His second wife was Elizabeth McNeill, who survives him of their nine children, seven are living: Francis A., Charles F., H. Rank, E. Barton, Catherine E., Flora May, and Alice T., who are all at home. He also leaves one brother, Joseph D., of Kingport (Maine). The funeral will be held on Saturday morning at 10 o'clock at the R. C. cemetery at Rexton.

CHOOSE THE SETTLERS

(Ottawa Citizen)

The Dominion of Canada is too great a country already to be regarded as a building-up place for undesirable foreigners, or for that matter from the United States. It is a common practice when a new survey of lots is opened up in Canadian towns or cities, for the vendor to stipulate that only buildings of a certain class shall be erected thereon. The object of this is to ensure the development of the area on the best lines, and in the interest not only of the vendor, but of those who purchase property and settle in the area. Canada is in a similar position. We have a monopoly of the greatest surveyed region in the world, and it is up to us to ensure that the land will go into the hands of new settlers and the neglect of skilled training by means of apprenticeship. The latter evil is more or less prevalent everywhere, and is one result of trade unionism. In nearly every case presented the committee recognizes the improvement in health and physique produced by a period of regular employment and food, which change is the more noticeable in the case of men sent to the Hallsby Bay colony after a prolonged period of unemployment and consequent privation. The Greenwich Committee unanimously attests to the temporary value of the work provided under the Unemployment Act, in enabling men to tide over a period of depression without either breaking up their homes or having recourse to the Poor Law. It is still in doubt, however, whether any permanent benefit is conferred on the men by the limited amount of work provided. The Hackney and Hamersmith Committees are of opinion that a more than passing advantage is obtained while committees of Kensington, Lambeth, and Battersea complain that the provision of relief work causes many men to place too much reliance upon a repetition of assistance from the same source. This was to be expected in some degree, as the temporary value of the work is in general works for food. Apart from that, the chief lesson to be learned seems to be the necessity for the extension of technical education or of institutes where lads can be instructed in craftsmanship and graduate as mechanics.

MORE PRIVILEGES FOR THE SERVANT

Some Ottawa Women Believe They Should Have Parlor to Entertain

(Ottawa Free Press)

The Women's Alliance of the Unitarian Church yesterday afternoon listened to a paper by Mrs. M. M. Pyke, on the question: "Should mistresses as well as maids furnish references?" Mrs. Pyke was of the opinion that it would be impracticable for the mistresses to furnish their maids with references, for the reason that most or at least a great many of the maids were unfitted for the positions they occupy.

The speaker said: "If the maid becomes tired of the place where she is employed, it is an easy matter for her to give notice, pick up her belongings, and depart, indifferent to the fact that a whole household is upset, and her mistress has been put to great inconvenience in many ways."

At the close of Mrs. Pyke's speech, the meeting was thrown open for the ladies to express their individual opinions on the question. They were many and varied. Some said that ignorance and the high wages that the servants are demanding have a great deal to do with the present difficulties. Others were of the opinion that the mistress ought to take more interest in her maid and give her a little room of her own where she could entertain her "young men" without having to go out on the street to meet him.

"The ladies are not treating their maids from a human standpoint," was the expression of one lady present. "They are not, as a rule, treating them in the way they themselves would like to be treated. Of course I will grant you," said this lady, who is secretary of the Y. W. C. A., "that they ask everything when, in a great many cases, naturally, they are not given fair treatment by their mistresses."

The plan of having a maid sign an agreement to stay a certain length of time with her mistress was suggested, and met with the approval of most of the ladies present. Another plan was that the ladies do away with a lot of unnecessary trappings and draperies in the fronts of their houses, and have their kitchens equipped with proper cooking utensils for the convenience of the maid.

A very feasible suggestion was made that a domestic science school be established where the servants could receive free training for a month or six weeks in preparation for fulfilling the duties required of them in home life. This might be in connection with the classes of the Y. W. C. A., where there are at present four or five girls training to go to service. This suggestion met with the approval of all the ladies and was looked upon as one of the easiest ways of solving the question. After graduating from this school, the maids would have diplomas presented to show of what value they would be, and what pay they were entitled to ask. In this way the mistress would know better how to deal with her maids.

WAS MA LISTENING? "The history says, pa, that the English fed the poor of Ayr." "Well, what of it?" "Would you run, if a woman was after you?"

NOVEMBER. Mr. Smith—There has been a strike in the last three years. Mr. Johnson—That is the football season.

CHANGES IN THE PARTIES IN BRITISH HOUSE OF COMMONS

(London Standard)

Carlton W. Bellairs, M. P. for King's Lynn, has resigned his membership of the Eighty Club, preparatory to his crossing the floor of the house of commons. It will be remembered that Mr. Bellairs was returned as a Liberal at the last general election, defeating T. Gibson Bowles, who had formerly represented the constituency in the Conservative interests by a majority of 342. Mr. Bowles has since joined the Liberal ranks.

Since his entry into parliament Mr. Bellairs, who formerly saw service in the navy, retiring with the rank of lieutenant in 1892, has been an outspoken critic of the naval administration, especially since the advent of Mr. McKenna. The publication of certain comments upon him sent to the admiralty and his subsequent pungent criticism in the house are fresh in the public mind. An advocate of the highest naval efficiency, he has frequently come into conflict with Mr. McKenna, somewhat to the chagrin of the Liberals of King's Lynn, who invited Mr. Bowles to contest the constituency as a Liberal against the sitting members some time ago.

THE EVANGELISTIC CAMPAIGN HERE

The members of the committee of the Evangelical Alliance having in charge the arrangements for the simultaneous evangelistic campaign next February held a meeting in St. Andrew's church yesterday afternoon. The matter was thoroughly discussed and it was decided to ask the alliance to appoint a large committee composed of two representatives from each of the churches participating. It was further recommended that an executive committee, composed of fifteen members, have charge of the actual work.

ENGLISH DOG THIEVES

Something About Their Ways of Stealing Valuable Animals

(Tit-Bits.)

As the T. B. man stood chatting with a well-known detective a splendid collie raced down the street.

"The dog thief who makes a business of stealing family pets makes money enough as it takes time and get away with the animal in leisurely fashion. That is, of course, you saw bounding past us just now will catch the eye of one of these dog stealers probably. The thief will note that he is a thoroughbred and worth more than the average laboring man can make in two weeks by honest work. The worth of the animal having been satisfactorily estimated, the thief will watch him until he frisks home. Having noted the address and lingered around, if it is safe to do so until the name of the dog has been learned, the thief will then retire from the field to await the hour loved by those whose deeds are evil.

"The ice broken, so to speak, by the affectionate address of this man, who comes with a speaking acquaintance, the dog's spool will be clinched by the gift of an entirely unexpected meal of juicy meat. Few dogs are proof against this sort of introduction. The doom of the dog is sealed the moment he savalours the first morsel of meat. It is a simple matter then to unfasten the chain and release the dog, which will follow more than willingly for the sake of the scraps that are thrown down from time to time.

"Some of the men who pose as peddlers and go around from house to house are merely dog thieves watching for a chance to carry off the family pet. They can't steal big dogs in that way, of course, but the little dog is their game. "The dog thieves take the stolen animals to other towns and there isn't one chance in a hundred of getting them back. If there are strong distinguishing marks on the animal, the thief will change these so as to make identification difficult. An example of this that came to my notice was the disguising of a fine bull terrier that was stolen from a wealthy financier. Big patches of liver color were burned on the back of the animal with caustic and a mark or two on its ears and a few on its paws completed an effectual disguise."

Wm. M. McLean, school inspector; Dr. Bridges and Geo. Day yesterday inspected the new school on Partridge Island. There are eleven pupils on the roll, and six were in attendance.

MONDAY LAST DAY NOVEMBER SALE. DON'T MISS COMING TONIGHT GREAT REMNANT SALE

All through the store tonight and Monday to clean up oddments and ends left from our Annual November Sale. Don't miss this opportunity—You may find just what you are looking for at half what you could pay elsewhere.

HALLEY'S COMET

by Frederic Campbell, Sc.D.
PRESIDENT of the DEPARTMENT of
ASTRONOMY, BROOKLYN INSTITUTE.

Back Through the Centuries—Halley's "Lucky Guess"—When the Comet Came to Stay—Halley's Prediction of Its Return—How a Farmer Became a Dr. Cook to Eighteenth Century Peasants—The Comet 240 Years Before Christ—Unbroken Dates Since 1066 A. D.—The Comet's Part in the Excitement of 1066 and 1456—The Comets Church Bells Still Ringing

(Copyright, 1909, by Frederic Campbell)
Halley's comet spends a very small fraction of its time within human view. If it be one of the triumphs of modern astronomy that it has accurately traced its course throughout its complete round of seventy-five years, it is little less of an achievement to follow it back through the centuries to the times before the Christian era.

It must not be thought, from the name that it bears, that Sir Edmund Halley was the first ever to see this stupendous object, much less that it came into being or first visited this part of the universe in his day. Halley saw the comet in 1682, and he died in 1742, sixty years later, and sixteen years before the comet's next appearance. But the comet was an old affair when he looked upon it; and when he successfully solved the problem of its identity with a number of historical comets, and the periodical character of its returns to our sky it had been making its round of space for ages.

That the comet originally entered our solar system from distant regions of the universe is practically certain. Once within our confines it was captured, and as supposed, by Neptune, our most distant known planet, and its speed became so reduced that it was compelled to adopt the elliptical form of orbit which it now travels. Now, when this happened no one can know or guess. It may have been within the history of mankind, or ages before. All we know is that the comet, like the moon, is here, and that it has been here for a long time.

SATURN, ONE OF THE PLANETS AFFECTING THE COMET.

Some of the greatest discoveries have grown out of what are called "lucky guesses." Halley had a strong suspicion that the great comet of 1682 was no stranger. He was familiar with the fact that remarkable comets had been seen in 1531 and 1697; and here were two intervals of so nearly seventy-five years each that he wondered whether these three were not one and the same comet returning with a certain regularity. His suspicion was converted to conviction, when he examined the course of these three and found them to fit into each other so nicely that it was impossible any longer to believe that they were three; they were really one and the same.

It is strange that he did not go back still further to 1456, whose comet so shook Europe with terror and dismay, for here was the same interval, and he could not be ignorant of that visitation. He might also easily have included the famous comet of 1066 in his survey; but it seems that he did not. But in the three dates of 1531, 1697 and 1682 he felt that he had sufficient data to warrant a prediction. And this he now ventured upon—namely, that in the year 1758 there would be a fresh visit of the comet already seen at least three times; and so interested was he in the result of his prophecy, and so confident that he could not live to witness it, that he frankly expressed a hope that the world would recognize that it was an Englishman who made the prediction.

HALLEY'S COMET AS IT WILL SOON APPEAR.

Halley had been resting in his grave for sixteen years, and astronomers all over Europe were watching for the return of the comet, when a Saxony farmer, George Palitzsch, by name, having a love of the stars and a small telescope, became the first to see the comet, and he called it Peasants' comet, after the toiling Peasants of his day, and sighted the monster on its return trip. It was on Christmas night of the year 1758, and henceforth this was Halley's comet, for he had made himself and the visitation famous by a first successful prediction of the return of a periodical comet.

FREDERIC CAMPBELL, D. HALLEY,
Whose Discovery of the Periodicity of Comets, at the Early Age of 26, Revolutionized This Branch of Astronomy.

We have mentioned the fact that Halley strangely overlooked other dates that he might have included in his series, and that the comet has been traced back to the times before Christ. The gaps are not all filled in the earlier dates; but, this is the symbol of his all-conquering sword and people stood aghast at the celestial spectacle. The comet repeated its visits in 1145, 1221, 1301, 1378 and 1456. It probably never produced such consternation as in the latter year. No one imagined that this was merely the return of an old visitor, absolutely no more strange than the return of new moon each month or of the planet Mars to opposition every two years. The popular mind was already in a ferment. The Turks had taken Constantinople and were threatening to overrun Europe, and everything seemed ripe for destruction, when the comet put in an appearance, confirming all fears, and seemingly depriving men of what light they had left. It was so dark, that, according to tradition, Pope Callixtus issued his famous bull against the Turk, the devil and the comet. He at least ordered special prayers to be said and the church bells to be rung at noon, which practice continues to this day. Terrified by the nightly apparition which endured for months, the people poured their wealth at the feet of the church, imploring petitions that Heaven might save the world from its doom.

In 1531, the comet, almost forgotten, was again on exhibition. Following that it was seen in the year 1697, 1682, when Halley viewed it; 1682, when it returned according to Halley's prediction, and 1835, when it was seen, and by some few who survive are about straining their old eyes to see it again. Now, in this year 1909, it has just been freshly sighted, and before the year expires we shall be able to see it with the naked eye. But the months of its glory and splendor will be in the year 1910, now close at hand.

Such is the history of this famous comet. We may say that it will next appear about 1935, and some few children who see it now will again see it in that year. So far as we know at intervals of about seventy-five years, Halley's comet will continue to be the wonder of earthly spectators till time shall be no more.

City Council Doings

To put through the license reduction will require some tall talk. Means lots of corns will be tramped on the curb in "Putnam's" the old reliable steam tractor that has been curing corns and warts for years. "Putnam's" never fails.

SHAVE COST \$2,810

In the American Magazine Anne Hard, reporting facts about "the beauty business," tells the following true story. It was given to her by a Chicago expert who is in the business of making folks beautiful.

"The highest charge I ever made to any one man was \$2,810. That was his own fault. It was this way: "There was a punier from Wyoming. This man had read in the paper how a certain barber had gone crazy and had murdered the man he was shaving. So he made up his mind he'd never be shaved again. So he came to this barber and consulted me. He wanted every hair on his face removed by the electric needle, and he was willing to pay for it by the hair—and in no other way. "I needed my office for my regular clients, so I went out and rented a room in the Waterloo Hotel and started a barber's shop. It took me almost three months to finish that job and then it took me three days to count the hairs. I counted twenty-eight hundred of 'em, outside of a bunch I blew off the table by coughing accidentally. We estimated those at five hundred. That made twenty-eight hundred and four hundred dollars."

STORM AND FLOODS CAUSE ENORMOUS DAMAGE IN JAMAICA

Kingston, Ja., Nov. 10.—(via Holland Bay (Pa.), Nov. 12)—From the fragments of reports which are arriving here from the countryside it is certain the damage resulting from the storm and the floods which have raged throughout the island since last Friday is enormous. The greater portion of the railway and the coastline on the north side of the island have been seriously damaged. Landslides are numerous on the main railroad and communication has been completely cut off. Many bridges have been carried away.

Property in an around Kingston has suffered severely, the damage sustained thus far being estimated at \$500,000. The staple and the main culverts of the city's water supply system have been destroyed and owing to the continued downpour in its rains has been impossible to effect repairs.

The recorded rainfall from November 6 to November 10 was forty-eight inches. There has been no sign yet of the weather breaking.

Communication was established today with the north coast by steamers which were in the harbor. The military contingent in the mountains has been cut off from communication since last Saturday.

All telegraphic wires are down and messages are being sent from Kingston to the cable but by boat.

The banana plantations in the north and northeastern portions of the island have been badly hit by the storm. Thousands of acres of trees have been leveled and the fruit trade is at a standstill, for it is impossible to get the bananas to the ports for shipment.

The United Fruit Company's steamer Bradford, which went ashore at Port Antonio, is a total wreck.

St. John's, Nfld., Nov. 12.—Thirty fishing vessels and trading schooners are ashore at various points along the coast of Newfoundland and a half dozen vessels are missing in the bay.

The storm apparently originated in the tropics and after sweeping the seas struck the southern and eastern Newfoundland coasts with cyclonic force. Telegraph poles, trees, fishing houses and signal stations were blown down, and many buildings also demolished wharves, waterside buildings and fishing outfits. Many of the schooners driven ashore were at anchor. Several vessels were blown to sea and were forced to put to sea to escape destruction on the rocks.

The steamer Portia left St. John's today to search for the missing craft.

ASQUITH MAY RESIGN IF LORDS REJECT BUDGET

London, Nov. 12.—A report is current here to the effect that should the House of Lords reject the budget Premier Asquith and his cabinet will immediately resign with the object of throwing upon the Conservative leaders the onus of providing for the country's financial needs.

Whether or not this report is well founded, Lord Lansdowne's delay in presenting the expected rejection of the budget is a sign that the House of Lords is not likely to give its sanction to a budget which would raise the rate of a 6 per cent. tax on the value of land.

"Dunlop's" various kinds of tires, "sanctioned under the new budget by the House of Commons resolutions, have been collected since April in an amount of £2,000,000, and it is assumed that if the budget is now rejected, these duties would be recoverable in the law courts.

Asquith's resignation would be a serious blow to the government, and it is assumed that the House of Commons will have to raise a big loan to carry on the national services and that would entail very seriously a tight money market with the bank rate rising possibly even to ten per cent. The rejection of the budget, according to Lord Lansdowne, would be followed by a large increase in imports in anticipation of the advent of a protectionist government.

Despite these pessimistic forecasts, the general belief is that in the event of rejection, the government will ask the House of Commons to reaffirm its resolutions and condone the collections already made.

An English Author Wrote:

"No shade, no shine, no fruit, no flowers, no leaves—November!" Many Americans would add no freedom from catarrh, which is so aggravated during this month, and which is now constantly troublesome. There is abundant proof that catarrh is a constitutional disease. It is related to the blood, and is followed by a long train of wasting diseases. Hood's Sarsaparilla has shown that what is capable of eradicating scrofula, completely cures catarrh, and taken in time prevents consumption. We cannot see how any sufferer can put off taking this medicine, in view of the already published record of its radical and permanent cures. It is undoubtedly America's Greatest Medicine for America's Greatest Disease—Catarrh.

CONTINUAL FEAST.
Actor—I am hoping for plenty of entrées in the third act.
Actress—But why the third?
Actor—Why, the curtain goes down in the third act on a real turkey dinner. Think of our chance to feast if we get an encore.

Humphreys' Seventy-Seven Famous Remedy for Grip & COLDS
What the English term influenza—a violent cold in the head—with constant running at the nose—watering eyes amounting to a flow of tears, is promptly stopped by the immediate use of "Seventy-seven."
"Seventy-seven" also breaks up hard stubborn Colds, with Cough, Sore Throat and Catarrh that hang on—Grip. Fits the vest pocket. All Druggists, 25 Cents.
Humphreys' Homeo. Medicine Co., One William and Ann Streets, New York.

IT MADE A MAN OF ME!

Read What Nelson Rose, of South Bay, Ontario, Says:

Dear Sir,—One year ago last February I was taken with Nervous Exhaustion (the Doctors pronounced it). I suffered all the tortures of that disease; was all run down, so weak I could hardly do anything at all. Since I began to use your Belt there has been a marked improvement in my condition in the different ways mentioned. I have slept good every night since wearing your Belt, which is one of the greatest blessings of mankind. I have a great deal more ambition; work used to seem such a mountain, now it seems more a pleasure; more strength and vim; memory better; digestion better; constipation about gone, which I was bothered with a great deal; head feels better and I feel far better in every way.

Give me a man broken down from disipation, hard work or worry, from any cause which has sapped his vitality. Let him follow my advice for three months and I will make him as vigorous in every respect as any man of his age.

M. F. McLaughlin:
Dear Sir—My case has certainly been a very serious one, and one of long standing. I had latterly been unable to do any work at all. Your Belt has worked wonders in my case. I am working steady now. It is well known here that it is your Belt that has put me on my feet again, and I do not doubt will be the cause of other cures.

Letters like that tell a story which means a good deal to a sufferer. They are a beacon light to the one who has become discouraged from useless doctoring, and at last is re-energized every day by a great force of energy in a man.

After you have read the above, write to me, explain your case, and I will at once tell you if I can cure you or not.

CALL TO-DAY—Come and see me and let me show you what I have, or if you can't, then cut out this coupon and send it in. It will bring you a description of my Belt and a book that will inspire you to be a man among men, all free. My hours, 9 a.m. to 6 p.m. on Tuesday and Saturday to 9 p.m.

Put your name on this coupon and send it in.
M. C. McLAUGHLIN,
214 St. James Street, Montreal, Canada.

H. H. GUNTER OF FREDERICTON KILLED AT CAMPBELLTON

Campbellton, N. B., Nov. 12.—Herbert H. Gunter, one of the best known lumbermen in the province and a member of the lumber firm of William Richards & Co., Ltd., was killed at Mowat's Crossing just east of the station here about 6:45 this evening.

Mr. Gunter had a few minutes previous to the accident been talking with Douglas Miles at Mowat's Crossing. He left him and walked toward the railway crossing, and attempted to cross in front of the shunting engine which was slowly pulling the train of passenger cars belonging to that day express which had arrived a few minutes previously down the line to put them in the siding, when he slipped and fell directly under the wheels of the tender, which with one of the driving wheels of the engine, passed over the body, killing him instantly.

A little girl was the only one who witnessed the sad fatality, but a young man came along and immediately notified the train crew. The little girl states that the unfortunate man ran to the rear of the tender to cross as the train was moving very slowly when she saw him stumble and fall. She was too frightened to make any outcry and it was not until a young man came along that the train crew was alerted.

Mr. Gunter was about 48 years of age and two sons survive, William, in the employ of the company here, and Ralph, of Fredericton. William this morning left for Fredericton to spend Sunday. The late Mrs. William Richards was a sister of the deceased.

This evening Coroner Doherty held an investigation but as there was no evidence of the negligence of the part of the railway or its employes, he did not deem an inquest necessary and issued a burial permit. The body will be taken to Boiestown this morning when interment will take place.

The shunter engine was in charge of Driver Massey. Deceased was a native of Nashua, being a son of the late Benjamin Gunter. He married a daughter of the late William Richards and was for years associated with his father-in-law in the management of the logging business in the town which he carried on at Boiestown. Three years ago, after the property had been sold to the Miramichi Lumber Company, he removed to this city and has since made his home here. He was a man of off-hand general disposition and was popular with all classes of people. He was a staunch Liberal. He was forty-seven years of age, and leaves an aged mother, a widow, and two sons, William and Ralph, residing here. His only sister, Mrs. W. D. Richards, died two months ago while on a trip to California, leaving a large estate of which he was sole administrator.

SUPREME COURT

Fredericton, N. B., Nov. 12.—The supreme court disposed of the last cases on the docket this afternoon and adjourned until Thursday next when barristers will be sworn in. Judgments will be delivered on Friday.

In Ward vs. Cormier, Carter supported appeal from the Kent county court; Chandler, K. C., contra. Court considers. In Tozer vs. McIntosh, Carter supported appeal from Kent county court; Phinney, K. C., contra. Court considers.

The case of Percy Gerow, charged with assaulting an employe of the shoe factory, was continued in the police court today, and further adjourned until Monday. Percy Simpson was called on behalf of the defence, and swore that accused was in his company at the time the assault is alleged to have been committed. He admitted, however, under cross-examination, that he and some companions had followed Chaput, the complainant, about the streets earlier in the evening, and called him a scab.

LEASES VICTORIA RINK

The future of the Victoria rink, so far as the coming winter is concerned, was settled yesterday afternoon, when F. G. Spencer, proprietor of the Unique Theatre, signed a lease with F. E. Williams for the season. Something of the value placed on the old V. by amusement men as a money maker may be guessed from the interesting fact which has leaked out that twenty-five local men made a bid for the lease.

Have you Tried?

Lydia E. Pinkham's Vegetable Compound? We can furnish positive proof that it has made many remarkable cures after all other means had failed.

Women who are suffering with some form of female illness should consider this. As such evidence read these two unsolicited testimonial letters. We guarantee they are genuine and honest statements of facts.

Gardiner, Maine.—"I was a great sufferer from a female disease and weakness. The doctor said I would have to go to the hospital for an operation but I could not bear to think of it. Lydia E. Pinkham's Vegetable Compound completely cured me in three months."—Mrs. S. A. Williams, R. F. D. No. 14, Box 39, Gardiner, Me.

So, West Harbor, Me.—"I suffered for years with painful periods, backache, headaches, nervousness, irregularities and inflammation." I consulted two physicians and was advised me to have an operation. "I was completely discouraged when I decided to try Lydia E. Pinkham's Vegetable Compound and it has made me a well woman. I advise all suffering women to take Lydia E. Pinkham's Vegetable Compound."—Mrs. Lillian Robbins, South West Harbor, Me.

Evidence like the above is abundant showing that the derangements of the female organism which breed all kinds of miserable feelings and which ordinary practice does not cure, are the very disorders that give way to Lydia E. Pinkham's Vegetable Compound.

Women who are afflicted with similar troubles, after reading two such letters as the above, should be encouraged to try this wonderfully helpful remedy.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does just so well as herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit. Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

Does 6 Hours' Washing in 3 Hours—Without Extra Effort—Without Boiling

6 Hours The Other Way
3 Hours Naphtha Way

Naphtha Soap eliminates over-night soaking of clothes, boiling and old-time rubbing. With cold or lukewarm water Naphtha does a six hours washing in three hours, without extra effort, hustling or injury to yourself. Naphtha is not a cold-water soap exclusively—it's just as good in boiling water.

Naphtha makes the clothes clean, pure, sweet and goes away with Wash Day Slavery.

H. P. SAUCE

The New Sauce

is made in England and enjoyed all over the World.

The delicious flavour of H.P. Sauce is obtained not from one fruit, but many of the choicest oriental fruits and spices perfectly blended—that's the secret—no one flour predominates.

That's why connoisseurs prefer H.P.—in fact, they always use it—DO YOU?

KIDNEY TROUBLE JUST VANISHES

Backache and Distress From Out-of-Order Kidneys or Weak Bladder End.

The most effective and harmless way to cure backache and regulate out-of-order kidneys, or end bladder trouble, is to take several doses of **Pape's Diuretic**.

You will distinctly feel that your kidneys and urinary organs are being cleansed, and vitalized, and all the miserable symptoms such as backache, headache, nervousness, rheumatism and darting pains, inflamed or swollen eyelids, irritability, sleeplessness, or suppressed, painful or frequent urination (especially at night) and other distress, leaving their taking the first few doses.

The moment you suspect and kidney or urinary disorder or rheumatism, begin taking this harmless preparation of direct, with the knowledge that there is no other medicine of an price, made any where else in the world, which will effect so thorough and prompt a cure of a fifty-cent treatment of **Pape's Diuretic**, which any druggist can supply.

Your physician, pharmacist, banker or any mercantile agency will tell you that **Pape, Thompson & Pape, of Cincinnati**, is a large and responsible medicinal concern, thoroughly worthy of your confidence.

Don't be miserable or worried another moment with a lame back or clogged, inactive kidneys or bladder misery. All this goes after you start taking **Pape's Diuretic**, and in a few days you feel and know that your kidneys, liver and urinary system are healthy, clean and normal, and all danger passed.

Accept only **Pape's Diuretic**—fifty-cent treatment—from any drug store—anywhere in the world.

TUBERCULOSIS MUST BE FOUGHT WITHIN THE HOME

Dr. Otis of Boston Tells of Dangers—Campaign Must Have People's Support

Montreal, Wiscon.—The treatment of the mother and child in the tuberculosis problem was dealt with by Dr. E. O. Otis, president of the Tuberculosis Institution in Boston, at the annual meeting of the Brethren Rest, Prentiss, St. Agathe des Ordins, held last evening at the Ladies' Hospital, Windsor Hotel. Other interesting addresses were delivered and an encouraging report of the work accomplished during the year was made.

The problem, said Dr. Otis, is more of a social than a purely medical one, and no plans will be complete for its solution if they have not for their basis the material and moral support of the people. We must educate the people and we will have gone a great way towards wiping out this fatal disease, which affects the whole human race.

Dr. Otis said that a great number of housewives suffer from consumption and pointed out the need of educating mothers in personal hygiene, the value of fresh air and sunshine and in the necessity of avoiding those conditions predisposing to the disease. It was now universally recognized that in almost all instances the disease was contracted in the home, and thus the necessity of removing and segregating the patient was obvious. More particularly was this the case if the young mother was the sufferer. The work in the house was monotonous and with a depression of the mind often came a similar depression of the body.

It was the tubercle bacilli did so much harm.

Dealing with the disease as it affected children, Dr. Otis showed the value of the fresh air school, and school colonies. The periodical inspection of children, and even the teachers also necessary. It was much better that the children should be saved and not allowed to become a burden a few years later.

New York, Nov. 12.—During the year that has passed since the International Congress on Tuberculosis met at Washington, one institution or organization for the treatment or prevention of tuberculosis has been established every day. Sundays and holidays included, according to a bulletin of the National Association for the Study and Prevention of Tuberculosis, fifteen new beds in hospitals or sanitariums have been provided also for every day of the year. A year ago the rate of increase in such organizations was only one-half as fast as now.

YUKON GOVERNOR DENIES STATEMENTS

Declares Conditions There Are Not Immoral—Quartz Mining is Proving Interesting

Ottawa, Nov. 12.—Governor Henderson of the Yukon, and Mrs. Henderson and daughter, registered at the New Russell. Governor Henderson has confidence in the future of Yukon and states that there has been no decrease in the population except for the usual exodus for the winter.

With regard to placer mining, he says that there is just as much gold as ever being sent out of the country, but the work is in the hands of large corporations. Quartz mining, however, is the hope of the district and from present prospects Mr. Henderson says that this branch of gold development will not doubt add greatly to the wealth of the country. One mill is already working with good results and many lodes have been uncovered which experts declare are of the equal of any in the world. More mills will be established next year.

The whole elective council, which had its first session in July, has proven fairly successful and the people are satisfied with its work.

"Should anyone say that the Yukon has more immorality than other places," said the governor, "you can say that such is not true. The Yukon is as clean and the basis of social life is as firm as in any district in the world. Statements that have been published broadcast are without foundation."

BATHS ARE POPULAR

During the first week of the new city baths, near St. Patrick's Market, Toronto, there were 795 persons who used the showers, and 1,422 who used the plunges. The receipts from the 10 cent fee for the plunges, were 142.20.

The commissioner expects that this will in time increase to \$200 a week, which will defray the whole cost of maintenance.

THE NOX TASTELESS LIQUOR, DRUG AND TOBACCO CURE

We have yet to hear of one failure to cure where a fair trial has been given. Can be given without the patient knowing it, is harmless and absolutely without taste. Mother's sister, writes, "I was doing a great work giving this remedy to some members of my family. We will mail a full month's treatment for five dollars, the Scotch King C. St. Catherine, Ont., or at any druggist."

LOOKING TO CANADA

(Bangor Commercial.)

The threatened invasion of Canada by American lumber and paper capitalists, under the retaliatory provisions of the new Payne tariff, has begun. The Nepean Lumber company, composed of some of the wealthiest lumber men in the United States, has taken possession of the extensive properties of the Adams-Burns company, limited, of Bathurst, N. B. The proposed sale of the Canadian government put an export duty on pulp wood has also resulted in the formation of a syndicate at Ogdensburg, N. Y., to start a pulp mill at Prescott, on the Canadian side of the river St. Lawrence. The promoters have bought a vacant building known as the old starch mill, at an outlay of \$30,000. The Chicago Newsprint company has examined it. Americans are prepared to bid on 12,000 acres of crown lands in the Gillies Timber Limit, in New Ontario. During the last week the Chateau Frontenac corridors have been crowded by American and Canadian paper manufacturers and limit holders and the Quebec Crown Lands Department offices are thronged. Among those on the scene are Hugh J. Chisholm, Geo. F. Underwood and F. C. Farmer of the International Paper Co.

HAY'S HAIR HEALTH

NEVER FAILS TO RESTORE GRAY HAIR TO ITS NATURAL COLOR AND BEAUTY

No matter how old and faded your hair looks, or how long you have been grey, it will work wonders for you, keep you looking young, make it soft and silky, promote a luxuriant growth of healthy hair, stop its falling out and POSITIVELY REMOVE DANDRUFF.

Will not injure your hair. Will not soil your linen. NOT A DYE.

REFUSE ALL SUBSTITUTES.

15c and 50c. Bottles, at druggists.

Hay's Hair Soap cures Eczema, itching scalp, dandruff, and all skin diseases. Keeps skin fine and soft. See directions for free books, "The Care of the Skin," "The Care of the Hair."

Write Hay Spec. Co., Newark, N.J.

AN EXPENSIVE BOHRIE

Because he was convinced at a recent meeting that it was wrong to use tobacco, and decided that if it was wrong to use the weed, it would be wrong to sell it, S. N. Brees, Wichita, Kan., merchant, made a bonfire of his cigars and tobacco. A strong odor of burning tobacco in the morning was traced to Brees' store, where he was heaping boxes of cigars on the flames. Occasionally he would cast in a sack of chewing tobacco or a carton of smoking tobacco.

"When nothing remained but ashes, Mr. Brees remarked: 'Well, I've won that battle with the devil.' Then he disappeared in his store. The crowd followed him and a prayer service was held.

Every time a modest girl sees a man look in her direction she imagines he is trying to start a flirtation.

DO YOU SUFFER FROM HEADACHES?

There are few people who have never experienced a headache, and the cause of it is not always the same. It affects all ages and both sexes alike, but the female sex is naturally more effected through the higher nervous development and more delicate organization of the system. Those also of a nervous temperament and studious or sedentary occupation are subject to it. The presence of headache nearly always tells us that there is another disease which, although it may be of a trifling nature, is still exerting a powerful influence, and perhaps waiting an opportunity to assert itself fully.

Burdock's Blood Bitters has, for years, been curing all kinds of headaches, and if you will only give it a trial you are sure to find it doing for you what it has done for thousands of others.

Mr. John Connor, Burlington, N.S., writes: "I have been and troubled with headache, constipation and indigestion for a long time. After trying different doctors' medicines a friend advised me to try Burdock's Blood Bitters. I find I am completely cured after having taken three bottles. I can safely recommend it to all."

For sale by all dealers. Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

NEW ZEALAND'S BUDGET PROPOSALS

Loan of Two Million Pounds for Dreadnought Offer—Defence Inland at Home

Wellington, Nov. 12.—The New Zealand budget proposals include the raising of a loan not exceeding £2,000,000 at a 3 1/2 per cent for the fulfillment of the Dreadnought offer to Great Britain. The naval proposals involve a total expenditure of £200,000 annually, £150,000 towards the cost of a Dreadnought and £100,000 as a contribution to the admiralty, to cover the difference between imperial and local rates of pay. Regarding internal defence it is proposed to reorganize the present system on lines approved by the Defence Conference as applied to local conditions.

All boys between the ages of twelve and eighteen will be required to attend elementary and progressive training in the cadet division; all young men between eighteen and twenty-one, two years of compulsory training on state evenings, half-days and whole days, also fourteen days annually in camp. A volunteer force of 20,000 men will also be maintained. The rifle corps will be encouraged. The cost of the scheme is estimated at £100,000 and a further £150,000 will be expended in a period of three years on additional armament.

In the course of his budget speech, Sir Joseph Ward announced that an arrangement had been reached between the publicans and prohibitionists for legislation permitting national and local option on the basis of "no license, no liquor."

D. D. D. Cured Annie M. Wiggins of Weeping Eczema.

Anyone who has ever suffered from Eczema knows how stubbornly it defies ordinary treatment and how difficult it is to get rid of it.

Miss Annie M. Wiggins, of Flett's Springs, Saskatchewan, is the first to tell the world of the cure of her case by D. D. D. She writes: "I suffered from weeping eczema for about two months under doctor's care and was getting no better when a friend advised me to send for a sample bottle. The first time I used it, it seemed to help me, and I at once sent for a \$1.00 bottle, and before I had used half my face was well as ever. I have recommended it to several and am sending for a \$1.00 bottle for a friend who tried some of mine."

If you or any of your friends have been suffering from torturing eczema or any other skin disease, get D. D. D. just as quick as you can. It relieves instantly and positively cures.

For free sample bottle of D. D. D. Prescription write to the D. D. D. Laboratory, Department 57, 23 Jordan St., Toronto. For sale by all druggists.

CLINTON BROWN, COR. UNION AND WATERLOO STREETS.

OTTAWA CADETS, 4,000 STRONG

REVIEWED BY EARL GREY

Pretty Spectacle Presented—Governor General Gives Advice to the Lads and it Fits in Every Town in Canada

Ottawa, Nov. 12.—Between ten and twelve thousand Ottawans yesterday witnessed a most interesting presentation of flags at Parliament Hill. The day—the birthday of His Gracious Majesty the King—was a fitting occasion for such a function, and it was most successful in every way. Earl Grey, on behalf of the Loyalist Chapter of the Imperial Order of the Knights of the Empire, formally presented thirteen handsome banners to thirteen cadet corps—seven from the public schools of the city and the others from different educational or military institutions.

The entire force was in command of Major C. F. Winter, two military bands supplied the music, and the cadets were inspected by Earl Grey, Sir Wilfrid Laurier, Sir Frederick Borden, Major General Sir Percy Lake and others.

Needless to say, the flags will be highly prized by the regiments honored. They are the King's colors, this is, silk Union Jacks, with golden fringes, and there are brass plates on the standards giving particulars regarding the presentation and the cadet corps receiving them.

Among those who witnessed the presentation were Earl and Countess Grey, Sir Wilfrid Laurier, Sir John Hanbury Williams, Lady Hanbury Williams, Lord Lascelles, Captain Fife, Sir Fredrick Borden, minister of militia, Hon. Mackenzie King, Major General Sir Percy Lake, Mayor Hopewell.

The cadet corps massed at Carleton Place at about 2 o'clock, and headed by the G. G. Band and in command of Major C. F. Winter, marched to Parliament Hill, where they found the big square crowded with interested spectators.

The day was an ideal one for such a turnout, and there were about ten thousand spectators on the grounds during the afternoon. From the windows and roofs of the Langevin block and the Eastern and Western blocks, government employees watched the corps marching.

In line were 3,500 of the Public School pupils and 750 cadets, making a turnout that was quite pleasing to Dr. Gresham Grey, secretary of the various cadet corps.

It was the first appearance of the Capital Cadet Corps recently organized through the efforts of Captain (Rev.) E. H. Capp, and also of the Boy Scouts. Both made a favorable impression.

The cadet corps included one squad from the Collegiate Institute, one from the Model School, one from the Juniors of the Sacred Heart, the Capital Cadet Corps, the Boy Scouts, and one from Ashbury College. All were in uniform except the Boy Scouts, the members of which wore grey sweaters and carried small flags.

In addition to these six corps, there were seven from the seven Public Schools, there were also cadet corps as follows: A company at Kent street, B company at Glasgow, C at Eldon, D at Percy, E at First avenue, F at Osgoode, G at Carleton Place, H at Carleton Place, I at Carleton Place, J at Carleton Place, K at Carleton Place, L at Carleton Place, M at Carleton Place, N at Carleton Place, O at Carleton Place, P at Carleton Place, Q at Carleton Place, R at Carleton Place, S at Carleton Place, T at Carleton Place, U at Carleton Place, V at Carleton Place, W at Carleton Place, X at Carleton Place, Y at Carleton Place, Z at Carleton Place.

At Carleton Square

The cadet corps massed at Carleton Place at about 2 o'clock, and headed by the G. G. Band and in command of Major C. F. Winter, marched to Parliament Hill, where they found the big square crowded with interested spectators.

The day was an ideal one for such a turnout, and there were about ten thousand spectators on the grounds during the afternoon. From the windows and roofs of the Langevin block and the Eastern and Western blocks, government employees watched the corps marching.

In line were 3,500 of the Public School pupils and 750 cadets, making a turnout that was quite pleasing to Dr. Gresham Grey, secretary of the various cadet corps.

Flags Presented

The thirteen handsome silk flags were laid on a pile of drum major's hats in the hall of the House of Commons and after an inspection, the flags were presented. Just after the cadet corps had arrived the thirteen corps were extended.

BORDEN GETS FIRST SETBACK ON FIRST BUSINESS DAY OF HOUSE

Queries About British Columbia Judgeships and Mr. Aylesworth Neatly Turns the Tables—Borden Sought to Help Premer McBride

Ottawa, Nov. 12.—(Special)—The common sense of an hour today and would not have taken even as much time as that if the leader of the opposition had not wished to do a little political work for Premier McBride, who is fighting for his political existence in British Columbia.

The Borden endeavor to delay the appointment of judges in the new appeal court of British Columbia until after the elections so that the places might be held out as rewards to political workers and to men who are running in the Liberal interest.

The reply of Hon. Mr. Aylesworth to the charge was interesting and rather amusing. The British Columbia legislature had passed an act regarding the court of appeal two and a half years ago, but made it effective by proclamation until September last. The reason for this delay obviously was that the Liberal cabinet premier hoped that the British Columbia would lose the last election and the Conservative government would have the filling of the places.

Mr. Aylesworth said that if the provincial government could take two and a half years to make the act effective, he was a matter of which time and care could profitably be given.

The incident closed the house adjourned.

Hon. Mr. Foster has given notice of a resolution declaring that the prevailing section of party patronage constitutes a menace to honest and efficient government. He also is asking for the creation of the National Transcontinental National Railway.

Several of the Conservative members are asking as to the size and amount of the United States warships which have been permitted to pass through the Canadian canals to the Great Lakes. The Conservative members are asking if the government was aware that the gas buoy on the Old Proprietor ledge has been out of service for a long time, and why it was allowed to remain in this condition. He is also asking as to the equipment of the life saving station.

Dr. Daniel is moving for a resolution declaring that it is expedient to confirm the Franco-Canadian trade convention.

Hon. Mr. Fisher has given notice of his bill designed to prevent the introduction

of insects, pests and diseases destructive to vegetation by granting compensation for matter destroyed for this purpose and to appoint inspectors for the enforcement of this act.

Volumes 1 and 2 of the auditor general's reports were laid before parliament today with a number of other blue books. In all there were eighteen departmental reports, which comprised a total of twenty-five blue books. This leaves but seven to come. This is a record for the printing bureau which in the past has been "speaking" for slowness.

Speaking today of legislation promised in speech regarding the lease of British mines by the Intercolonial Hon. Mr. Borden said:

"The promise of legislation concerning the branch lines is entirely accurate to me. You is what I have tried to bring about for years and the present initiative is very gratifying and should please the people of New Brunswick. The acquisition of the branch lines upon this business-like proposition will be fair and equitable."

Dr. McAlister said the matter was one of the greatest importance in his constituency and he was glad that the action of the government promised that the lines would be taken over by the Intercolonial. When this is done the people would be assured of splendid transportation facilities.

The manufacture of fine Rubber Goods has been going on for some years, but the most expert Rubber Manufacturers never turned out a Hot Water Bottle of absolutely one piece of Rubber until Mr. F. J. Glesson, vice-president of this company, invented the WALLPAPER Hot Water Bottle. Now Rubber experts all over the world praise him for the Hot Water Bottle. Scientific papers have published reports regarding this invention—the greatest in the history of Rubber Manufacture.

You as a boy like the idea of your drug store—they are guaranteed two years against boiling hot water or any possible accident. They will last a lifetime with proper care, because they are perfectly steam-cured and perfectly made by the Wallace Rubber Co., Limited, Montreal.

ALBERTA AFTER BIG ROOM

Preliminary arrangements for the flotation of a loan of \$7,000,000 by the province of Alberta are understood to have been made in New York by Sidney R. Woods, Deputy Attorney General of Alberta, and M. J. McLeod, deputy provincial treasurer of Alberta.

It is proposed to build the proposed provincial railway for 300 miles north of Edmonton with this loan.

MAKING \$5,000 A YEAR FROM POETRY

It is a common belief that poetry doesn't pay. Verse-making is nowadays considered by most people as a waste of spare time. Some interesting particulars about a young poet who is making more money annually for the sale of a few poems to yield him an extremely nice income. It was only the other day that a cheque for \$5,000 was mailed to Robert W. Service, the poet of the Yukon, to cover royalties on his two books of verse, "Songs of a Sourdough," and "Ballads of a Cheechako," for the past twelve months. Our other Canadian poets may well look upon this achievement with envy and despair. Some interesting particulars about a young poet who is making more money annually for the sale of a few poems to yield him an extremely nice income. It was only the other day that a cheque for \$5,000 was mailed to Robert W. Service, the poet of the Yukon, to cover royalties on his two books of verse, "Songs of a Sourdough," and "Ballads of a Cheechako," for the past twelve months. Our other Canadian poets may well look upon this achievement with envy and despair.

Dr. Premer Rubber Heels will save you money. Buy full-size full-the canvas non-sliping put here for that purpose. The Rubber Heels are not built the way dealers and repairers.

Put them on your shoes. They will save you money. Buy full-size full-the canvas non-sliping put here for that purpose. The Rubber Heels are not built the way dealers and repairers.

Weak? Tired? Run-down?

These conditions come from overwork, weak stomach, overtaxed nerves or feeble blood. When you feel "run-down," hardly able to drag about, no energy, no ambition, easily fatigued and can't sleep—take

BECHAM'S PILLS

and note what a difference they make in your condition. The stomach is the first to feel the good effects. Food tastes good, the digestion is strengthened, bowels and bile work regularly, the blood is cleansed, and the nerves rested. The whole system responds to the tonic action of Becham's Pills. Soon there is the buoyant feeling of returning health.

Fresh Strength and New Life

More bread and Better bread

—And the Reason for it

A STRONG FLOUR can only be made from strong wheat. Manitoba hard wheat is acknowledged the strongest in the world—and that is the kind used for Purify Flour.

But that's not all. Every grain of this wheat contains both high-grade and low-grade proteins. In separating the high-grade parts from the low-grade parts, the Canada Flour Mills produce the hard wheat through a process so exacting that not a single low-grade part has the remotest chance of getting in with the high-grade.

Of course this special process is more expensive to operate but it means a lot to Purify Flour users—that's why we use it.

It means that Purify Flour is made entirely of the highest-grade flour parts of the strongest wheat in the world.

It means a high-class, strong flour and therefore yields "more bread and better bread."

Purify may cost a little more than some flours, but results prove it is the cheapest and most economical after all.

Rheumatism for Several Years—Now as well as Ever

647 Main St., St. John, N. B., Nov. 27, 1908.

Father Morriscy Medicine Co., Ltd.

I am writing to tell you I have been a victim to Rheumatism for several years, and have been treated by seven doctors without feeling any permanent relief until I got Father Morriscy's "No. 7" Tablets. It has cured me so I am able to do my work and find I am as well as ever in my life.

Yours truly,
JOHN CRAWFORD

Rheumatism cannot exist when the kidneys are in perfect working order for then they cut out of the blood all the Uric Acid, which also causes the Rheumatism.

Father Morriscy's "No. 7" Tablets

act directly on the kidneys, toning them up and helping them to clear the blood of the Uric Acid. If the Rheumatism is of long standing it may take some time to clear out all the poison, but almost from the first "No. 7" Tablets relieve the pain, and if used faithfully they rarely fail to cure.

Even if other remedies have done you no good, do not give up till you have tried Father Morriscy's "No. 7" Tablets.

So, at your dealer's.

Father Morriscy Medicine Co. Ltd., Chatham, N. B.

Let the GOLD DUST TWINS do your work

The Dog and The Shadow

You remember the tale of the dog who dropped a real bone for its shadow which he saw in the water. "Beware in mind that all is not Gold Dust that glitters under the name of 'washing powder.' Don't accept a shadowy substitute; get the real

Gold Dust Washing Powder

with the Gold Dust Twins on the package.

OTHER GENERAL GOLD DUST

Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil stoves and furnaces, polishing brass work, cleaning bath room, sponges, etc., and making the finest soft soap.

Made by THE N. K. FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.

GOLD DUST makes hard water soft.

EVEN MONEY ON JEFFRIES AND JOHNSON IS TO RULE

This is Dictum of Coffroth and Tom Corbett—Hockey, Athletic, Baseball, Ring, Bowling and Skating News

"Jeffries and Johnson will go into the ring with even money and take your pick posted about their chances," said Jim Coffroth, the San Francisco fight promoter.

"Either man may be the post favorite by a shade. Just which one will be selected on the long end is a matter that late training will decide, but even money will rule during the greater portion of the betting."

Coffroth is admittedly the best judge of prices on boxing matches in the country.

The discussion came up in a New York hotel, frequented by sporting men. An offer was made to wager on the big white undefeated champion at 2 to 1. Coffroth jumped at the chance, and offered to cover any reasonable amount at such a figure.

"Not that I have formed any opinion about the match," he explained, "but I am sure the quotation is out of line. I could lay the bets off at a price that would net me a nice sum without risk."

Bearing out Coffroth's opinion that the betting on the Jeffries-Johnson fight would be at even money, Tom Corbett, the best betting commissioner of the coast, has set the betting on the championship fight at even money. Corbett has \$10,000 to wager without odds that Jeffries wins. The sum will remain open to any one to accept it.

At the time the men enter the ring, Corbett said that he would bet \$20,000 on Jeff if the big fellow over fights Kaufman. "I have been waiting twenty years for something soft like that," he said.

There is a strong likelihood that Ralph Calloway and Jimmy Barry will be seen in action at the Armory, Club, Boston, early next month.

Billy Rolfe and Kyle Whitney, who put up such a terrific battle the other night at the National A. C. have been rematched to box 15 rounds at the Queen City A. C. Manchester, Nov. 19.

Hockey

At a largely attended meeting of hockey enthusiasts in the board of trade rooms last night, it was unanimously decided to appoint a committee of six to interview the leading citizens of this city and ascertain whether or not enough money can be obtained to warrant the starting of an All-St. John team this winter. The only rink available for hockey purposes is the Queen's and to secure this rink it will be necessary to raise the sum of \$800. Unless this amount is raised there is little prospect of any hockey here this winter.

The All-St. John team, which will be made up of the best players in the city, intend to practically take control of hockey matters and expect to form a septette that will make some of the provincial teams hustle. The team will be purely amateur and no "tourists" will be allowed in the lineup. It is their intention also to form a senior city league, games to be played on three nights of the week. If St. John is to produce a St. John trophy winning team this winter it is up to the citizens of St. John to furnish funds with which to start such a team.

The members of the committee are G. Patterson, J. Kennedy, H. Clawson, J. Roberts, E. Inches and J. Phillips.

The Ottawa Hockey Club met Wednesday evening and appointed Percy M. Butler and David E. Mulligan delegates to the annual meeting of the Eastern Canada Hockey League to be held in Montreal tonight. The only new club they are in favor of admitting is one from Toronto. They will oppose applications of the Montreal Star. The old Wanderers are pre-ferred, which claims most of last year's Wanderer men.

Matters seem to be pretty much quiet in hockey just at present, says the Montreal Star. The old Wanderers are prepared to put in a new team of which Art Ross, Walter Small, and Riley Herra are to be the nucleus but it is rumored that they have not yet finally decided to whom they will swear allegiance.

They have made strong efforts to get Messrs. Russell Bowie and Dunham to join forces with them, but these gentlemen, although appreciative of the suggestion, have respectfully declined.

Word was received in a letter from Winnipeg to Frederick Lake, in Ottawa, that the Shamrock hockey team of that place will send one of the strongest teams to Ottawa this winter, after the Stanley cup, that ever came east. No less celebrities than Tom Phillips and Lester Patrick may be seen on the line-up of the Winnipeg Paddy Chambers, who is a member of the team, declare both Patrick and "Kenora Tom" will be on the Shamrock seven.

It does not appear that the Intermediate Football League is so finish out the season amicably. Just at present the three teams are in a tussle as to which one shall gain possession of the cup won in the hands of the Currie team, who won it in 1908.

A meeting of the league was held at the university last night at which the Micmacs forfeited the game which they were to have played today with the Currie aggregation. In this case the Carleton and Currie teams would have to play off for the cup as each team have won one game and tied one. This the Carleton management did not agree to. They state that as the Micmacs are out of the winning they wish to aid the Currie team by forfeiting the game.

Manager Baskin, of the Carleton team, last night stated that he would place the matter before the trustees of the cup at the earliest opportunity and the Carleton team would abide wholly by their decision. Should a play off be decided on they are willing to go on the gridiron and let the best team win.

The intermediates did not seem to take the same interest in the league this year as they did last, and as a result they have not been playing the game as well as they should have. The Micmacs had a strong team together last season and made the Currie team hustle to win the championship. So far this year they have been unable to get anything near a winning team together, and as a result have decided to give their last game in the series to the Currie team. This does not seem altogether right as a championship team should always win on their laurels and not have a "hand-out." However, should the Carleton team agree to play-off, the local followers of the game will be given a chance to see "some" football as both teams will, no doubt, be out to win. The Carleton boys have the heaviest team in the league this season and stand a good chance to win.

St. Paul, Minn., Nov. 12.—Director, 21 years old, 2,314, which set a world record for four-year-old trotters in 1893 on the Nashville track, died Thursday at

Terms have been agreed upon, and it is only necessary now to await the consent of the two stars.

Skating

At the annual meeting of the Amateur Skating Association of Canada, in Montreal on Monday night, the following officers were elected for the new year:—Hon. President—W. G. Ross; president—James A. Taylor; 1st vice-president—Frank Freeman; 2nd vice-president—Frank White (St. John, N. B.); Hon. Sec. Treas. Louis Rubenstein; executive—Sir Montagu Allan; Dr. H. B. Haining; Hon. O. H. Dods; W. C. Finley and P. D. Ross (Ottawa).

It was decided to continue the plan started last year of awarding medals for events decided at the city indoor rinks during the winter months, the events to be special ones held under the auspices of the Skating Association.

Figure skating will be encouraged more than it has been in some years. The International Skating Union, of which Mr. Rubenstein is president, will meet soon in Chicago, and there the question of arranging figure skating programmes on the style adopted in Europe will be taken up and an effort made to standardize the competitions.

Whether a championship meet for Canada will be held in Montreal as last winter will depend upon later developments and the international meeting in Chicago. There is some talk of the meeting going to Toronto, but so far there is nothing definite.

Bowling

The Star team defeated the Times yesterday afternoon on the Victoria Bowling Academy, winning all four points. The Star team this year a comfortable lead. The scores yesterday were:—

Table with 3 columns: Name, Score, Total. Includes names like Belding, Lever, McClelland, Taylor, Star, Robb, Evans, McInnis, McKinnon.

Margin for the Star, 60 pins.

On the Victoria Bowling Academy last night there was an interesting match between teams from Waterbury, a Kildare's employ. The teams were made up of the following:—

Table with 3 columns: Name, Score, Total. Includes names like Sullivan, Lunnay, Payne, McKel, H. Ballie, Law.

On the Victoria Bowling Academy last night there was an interesting match between teams from Waterbury, a Kildare's employ. The teams were made up of the following:—

Table with 3 columns: Name, Score, Total. Includes names like F. M. Rising, Hunter, H. Rising, Mitchell.

Officer Alex. Crawford, champion bowler of the police force, and Officer Harry Liner, succeeded in defeating their rival Nighthawk Detective Lines and Policeman Perry on the Victoria alleys yesterday afternoon by a large margin.

Football

From present indications it does not appear that the Intermediate Football League is so finish out the season amicably. Just at present the three teams are in a tussle as to which one shall gain possession of the cup won in the hands of the Currie team, who won it in 1908.

A meeting of the league was held at the university last night at which the Micmacs forfeited the game which they were to have played today with the Currie aggregation. In this case the Carleton and Currie teams would have to play off for the cup as each team have won one game and tied one. This the Carleton management did not agree to. They state that as the Micmacs are out of the winning they wish to aid the Currie team by forfeiting the game.

Manager Baskin, of the Carleton team, last night stated that he would place the matter before the trustees of the cup at the earliest opportunity and the Carleton team would abide wholly by their decision. Should a play off be decided on they are willing to go on the gridiron and let the best team win.

The intermediates did not seem to take the same interest in the league this year as they did last, and as a result they have not been playing the game as well as they should have. The Micmacs had a strong team together last season and made the Currie team hustle to win the championship. So far this year they have been unable to get anything near a winning team together, and as a result have decided to give their last game in the series to the Currie team. This does not seem altogether right as a championship team should always win on their laurels and not have a "hand-out." However, should the Carleton team agree to play-off, the local followers of the game will be given a chance to see "some" football as both teams will, no doubt, be out to win. The Carleton boys have the heaviest team in the league this season and stand a good chance to win.

Enterprise, Ont., Oct. 1st, 1909. For seven years I suffered with what physicians called a "Water-Tumor." Hypodermics of morphia had to be given me to ease the pain.

THE FORESTRY QUESTION IN DOMINION OF CANADA

Every Province Should Have a Bureau of Forestry Says Dr. Fernow—The Timber License System

Dr. B. E. Fernow, dean of the faculty of forestry of the University of Toronto, recently lectured before the Canadian Club at Berlin, Ont., on the subject of Forestry in Canada. Dr. Fernow dealt with the subject from a patriotic standpoint. He showed that the three factors in the progress of a nation were men, natural resources and accumulating wealth of capital.

The most important of these was the men. The natural resources, great resources had sunk to decay because of lack of character, while others in lands poorly endowed by nature had become great by energy and foresight. Forestry was essentially a patriotic subject, as it meant the leaving of the resources in the best condition for future generations. The forest, because it produced absolutely necessary wood, and because of its power of reproduction and its effect on climatic and water conditions, was the greatest single resource of any country. Later he said that the timber license system of Ontario, under which the crown retained ownership of the land and growing timber, and sold only the mature timber fit for harvest, was the most ingenious device, which in the early pioneering stages could hardly have been improved, except for the abuses, which had grown up around it, but which were not a necessary part of the system. Appraisers had become forest rangers, and were made useful and revenue derived therefrom, and to do so capital was needed to be attracted. Yet the land itself, at least as far as it was available for farming purposes, needed to be reserved for settlement.

As long as mere exploitation of the surplus of virgin timber and the opening up of the country was the object, this system worked well, but a progressive like that of the United States, which has a large and undesirable timber to be retained in the hands of business and their claims to be extended not only to the growth but to the growing timber. Now, however, when it was recognized, first that the virgin timber supply was not only inexhaustible but near exhaustion, when there was no more need to force settlement, when there was no more difficulty to induce capital to embark in timber exploitation, when the revenue question was not any more urgent, and the need of considering the future of the land to be most prominent, the timber license system had become an evil, which should be excised or thoroughly reformed. It was a progressive like that of the United States, which has a large and undesirable timber to be retained in the hands of business and their claims to be extended not only to the growth but to the growing timber. Now, however, when it was recognized, first that the virgin timber supply was not only inexhaustible but near exhaustion, when there was no more need to force settlement, when there was no more difficulty to induce capital to embark in timber exploitation, when the revenue question was not any more urgent, and the need of considering the future of the land to be most prominent, the timber license system had become an evil, which should be excised or thoroughly reformed. LOCAL NEWS

Registrar Jones reports eight marriages during the present week; also seven births, all girls.

English mails brought out by the steamer Corsican via Rimouki are due here on the maritime express this afternoon.

On next Thursday, His Lordship Bishop Casey will administer the sacrament of confirmation to a large class of children in St. Bernard's church, Moncton.

British schooner Annie M. Parker, left Weymouth, (N. S.) yesterday for Barbados with 400,000 feet of lumber. Part of her cargo was taken on board at St. John.

C. P. R. steamship Montrose, Captain Griffiths, sailed from London last Thursday for this port. This is the first winter port steamer of the C. P. R. line from London.

I. C. R. Detective Noble reports that never in the history of the I. C. R. have there been so many tramps along the line. The majority of these men seem to come from Sydney and Glace Bay.

The newly purchased pilot boat, Defender, is receiving a new coat of white paint in the Carrite slip. Captain Murphy, her former owner, has returned home to Clark's Harbor, (N. S.) having completed her transfer.

Carlton Sentinel—Robert Burgess, an American, was arrested at Plaster Rock on the charge that he had brought women into Canada for immoral purposes. Deportation was the punishment meted out to Burgess and the three women.

On next Tuesday evening in Zion Methodist church, Rev. James Crisp will deliver a lecture, and refreshments will be served under the auspices of the Epworth League. The subject of the lecture will be: "What is needed to improve the physical, agricultural, commercial and religious condition of New Brunswick."

H. A. Powell will be the speaker at the Every Day Club tomorrow evening at 8:30 o'clock. Robert Seely will sing a national song called the Canadian Flag Song, by Katherine Hale, music by J. W. Garvin. This piece will be heard for the first time in St. John and Mr. Seely will be accompanied by the orchestra.

At the residence of Rev. David Hutchinson, 41 Douglas avenue, this morning at 8 o'clock, a pretty wedding was solemnized when he united in marriage Amos L. McKim, of the Narrows, Queens county, and Miss Leona M. Thorne of Tennant's Cove, Kings county. The young couple were unattended. They left on the nine o'clock boat for their future home at the Narrows.

SAYS HER FATHER BEAT HER MOTHER

Richard Scott, charged by his daughter with assaulting his wife in their home in Queen street, on Wednesday last, said this morning that he remembered nothing of what occurred as he was very drunk.

His daughter said that he came home drunk last Wednesday and beat her mother quite badly. Scott was remanded.

Patrick Brown, charged with drunkenness, pleaded guilty, to the charge and was fined \$1. Joseph Baxter, charged with a similar offence was remanded.

MR. SEGEE SAYS HE WILL FIGHT TO END

John Segee, painter, of the North End, told a rather spirited tale to a Times man this morning. "I have been in possession of the land which those people are trying to take from me ever since I was a young fellow in my father's time," he said, "say about 1872, and I have never had any trouble until three years ago, when I became mixed up in a dispute with Major Green about his having the right to allow his cows to roam as they pleased about my property. After consulting Mr. Turnbull who claims he owns the land about the matter, the major finally admitted that I was right."

Mr. Segee then said that the Turnbull Company had rented lots to certain people for building purposes, but he continued, "I have engaged Dr. Lemuel Curry to act for me, and I am going to beat them out. They came around in my absence, destroy my excavations, and I have to do my work all over again. They are afraid to meet me in open fight. I put Silas Alward and Mr. Adams off my property this week and I will do so again if I catch them there."

Mr. Segee then went on to explain that he valued the property, which was about a mile in extent, for purposes unknown to him, but which would some day be a revelation to scoffers. He had made money from the land and if he had been allowed his rights, he would have surprised a few of them. Mr. Segee concluded by saying that he would fight to the bitter end and felt assured that he would come out victorious.

BOYS FINED FOR LOITERING AT NICKEL THEATRE

Judge Blames Parents—Lads Not Worried About Going Below—Other Cases in Which Juveniles Figure

This morning in the police court was occupied mostly with cases in which juveniles figured most prominently.

A number of boys reported for loitering and acting disorderly in the Nickel Theatre on Wednesday last admitted having done so, as well as having forced their way into the theatre. They came in for a severe lecture from his honor, accompanied by a fine of \$8 or two months in jail. They are Guy McIntyre, Thomas Petrey, Cambridge Orr, Bert Ryder and Walter Lacey. The latter did not appear but will be dealt with later. Each of the boys said he attended school regularly.

W. H. Golding, manager of the Nickel, said that it was a common occurrence to have boys around the theatre every night in the week and they were a perfect nuisance, both creating disturbances and destroying the lobbies by their actions. They would force their way into the place when the crowd was coming out through the western exit.

The parents of the boys were in court and were the recipients of some good sound talk from Judge Ritchie. He said that in nine cases out of ten the parents were to blame for their children becoming unruly. Young fellows like these had no right to run the streets after dark, and certainly should not be allowed to hang around a theatre until a late hour.

Mr. Golding said that he made a point of not admitting children under fourteen years of age to the theatre at night, unless accompanied by guardians.

His honor said that half the crimes committed by boys were caused by their parents neglecting to keep them away from bad companions who would sooner or later lead them astray. He said he would impose a fine of \$8 or two months jail and the young fellows were taken below, seeming to make light of the whole matter as their faces wore a smile when they went down stairs.

Frank Porter, a druggist, of 303 Union street, charged with selling cigarettes to a minor named Thomas Bonner, denied the charge. Bonner said that it was not Porter who had sold him the cigarettes and he left court with Policeman Marshall to identify the man who did so. As a result Policeman Marshall has reported Frank Porter, a clerk in Mr. Porter's store, for the offence.

Henry Baig appeared to answer a charge of assault preferred against him by Wilfrid Mahoney, a lad aged about 13 years. Baig, who is a Hebrew, said that on Thursday last his boy, Jacob, went to school in Winter street and when school was out, he went to the synagogue. About 5 o'clock he was allowed out to recess and he was then struck by Mahoney. His son, came home and told him of the matter and he went to the synagogue where Mahoney was sitting on the steps and put him off forcibly. He did not think he had hurt the lad.

Max Williams, a Jewish lad, said that when Mr. Baig said was true and that Mahoney had annoyed Jacob Baig and himself repeatedly by threatening to beat them and by striking them.

Jacob Baig told of being struck by Mahoney and of going to his father to complain with the result that the latter came along and forcibly pushed Mahoney off the doorsteps. When this was done Mahoney cried.

Mahoney when called upon, said Baig hurt him when he shoved him off the door and he was then struck by Mahoney. Baig also caught him by the throat and threw him to the ground.

His honor imposed a fine of \$20 on Baig and said he had no right to strike the boy. It was what might be termed a "technical assault." The fine was allowed to stand. Scott E. Morrill appeared for the defendant.

Louis McDonald was reported for washing windows during prohibited hours. G. A. Reicker, who keeps the drug store, the windows of which the lad had been washing, said that McDonald was obeying orders. He thought that the bylaw relating to this matter had been revised according to statements which he had seen in the papers. The window washing had been completed before 8:15 o'clock in the morning which he thought was in accordance with the law. The case was dismissed. K. J. MacRae appeared for McDonald.

GREAMER CHILDREN STORY FROM MAN AT WASHDEMOAK LAKE

Mr. McDonald's Information From Young Man Now on His Farm There—His Story

In connection with the announcement a few days ago that Fred E. E. Creamer was possessed of information to the effect that the Greamer children, who disappeared mysteriously from their home in Westmorland county are now alive and well and are living in the vicinity of Boston, the Times has learned that Mr. McDonald's informant is a young man who is working at Mr. McDonald's home on the Washdemoak Lake, and who says he lived next door to the children at their present home in one of the suburbs of Boston.

According to the statement made by this young man the children were taken away by a brother of Mrs. Creamer, by agreement between them that they were taken on board a schooner at Sackville and went to New York, afterwards going to Boston. The mother it is said, is now with the children and she is not desirous of the father knowing their whereabouts.

F. W. Sumner, of Moncton, who offered a reward of \$200 for information that would lead to the clearing up of the mystery is now investigating out of the story and if he finds that the children are in Boston as alleged, he will pay the reward likely to Mr. McDonald.

The ferry service is somewhat crippled today in consequence of the west side of the river having been removed for repairs. Passengers are being landed and taken on board the ferry at No. 5 wharf, temporary steps have been built there for that purpose.

The steamer Western Extension is performing the service. All teamsters going to or coming from the west side are compelled to go via the Suspension Bridge. It is hoped to have repairs completed by Monday morning.

Boston steamer, Governor Cobb, Captain Allan, is due here at 4:30 o'clock this afternoon.

EAGLE FLOUR

KEEPS MOIST

SIX DAYS

Get Ready For The Cold Wave

Have you got your stoves in working order for the winter. Don't be caught napping for there is a cold wave coming. If you are thinking of getting a Heater call and see our Glenwood Oak. We have it in two sizes, 14 and 16. They are made to look well and give you heat. The nickel is removable. The Glenwood Oak Heater shakes on the side, avoiding dust; it needs no linings as the pot is in the stove. It is made in St. John along with our Glenwood Ranges.
