Through Capsizing of a Launch-Men Perish in Burning Mine-The Plague.

Victoria, B. C., Feb. 6.-News was brought by the Empress of China, which arrived Wednesday night, of a disaster in Kobe harbor on Jan. 19, as a result of which between 40 and 50 lives were lost. The steamers Yokohama Maru and Genkai Maru were being repaired, and the steam launch Hayabusa was sent to take their workmen from one steamer to the other. When the launch was near the stern of the Genkai Maru, a strong northwest squall swept over the harbor *pupil Hemenway Gymnasium, Harvard University—Classes for recreative, remedial physical exercises, fencing, voice culture, vocal expression. Dr. George A. McCallum has been superintendent of the asylum scarcely a year, but during that time has brought about numerous changes in the organization, besides having improvements to the building completed or pushed rapidly forward. The asylum, as a result of his earnest and well-directed efforts, has taken a first place among modern hospitals for the insane. It is properly a hospital, for a large percentage of those who are brought into the institution leave it cured. The old prejudice against asylums is dying out. When the work was proposed and started it was mentioned in The Advertiser. The addition has now almost reached completion, ing first-class talent, and will be a valuable aid to the now overcrowded laundry. The two rooms at present employed for laundry purposes, accommodate some workers. The needs of the institution have grown so much that it was decided to increase the capacity, which will be doubled by the present addition. It consists of two stories, each of one room about 33 feet by 50 feet. money is being expended upon, as it washing done better and with greater facility. The majority of the workers are patients, many being imbeciles, who, Dr. McCallum says, make the best workers. The comforts of the ininmates who will work here have not been lost sight of, for the building shows that provision has been made for every worker's convenience.

INFIRMARY FINELY EQUIPPED

New Hospital for Treatment of Bodily Illness Is Very Complete.

The infirmary, also mentioned before in these columns, is nearing completion, and is a very important addition to the asylum. It is a new building separate altogether from the asylum many as the present infirmary. The latter consists of two rooms on the third floor, and is an out-of-the-way place. Its capacity is 31 beds, which has frequently been taxed to its utmost extent, as among so many in-mates it is natural that a number are on the list of those suffering from other than mental diseases. In spite of the inadequate facilities that have hitherto been contended with, the health of the community has been good. Still, the matter of a new building was impressed upon the Government with success. Dr. McCallum has had much to do in overseeing its contruction. There is a main portion, on each side of which is a wing, one with 30 beds for men and the other containing 30 beds ed. These things all tend to the general for women. In the spring the management will likely put in the reservoir a cement floor, and it is the doctor's intention to have the surrounding place attractively fixed up. The water from this reservoir is run to the building with very little trouble. The reservoir is about three feet higher than the building, so that the water is brought in a pipe by means of gravitation. Among the ways of consuming the large amount of water used from this reservoir are nine large marine boilers in the main building; these furnish steam for the heating of the asylum building. The water supply problem being solved is a great thing for the asylum, as there is a population of about 1,500 to draw from that supply, and it is necessary that the purest water be obtained. Montreal, Feb. 6.-The general opinion among the largest shareholders of the Canadian Pacific Railway is that there will not be any increase in the dividend that will be declared by the lirectors at the semi-annual meeting n Monday next. The statement was ide today by a shareholder, who in close touch with the executive, it it had been decided that it would better for the company to preserve conservative policy in regard to dividend and keep it at a five per This conservative policy as rendered necessary by the ancouncement made by the Grand Trunk that they would build through to the Pacific, because it would force the Canadian Pacific to expend a larger amount of capital in extensions than had been intended. On this account, while the earnings had increased, it will be found that the directors will use the surplus in making extensions rather than in paying dividends.

DON'T LIKE PRAIRIES

Ex-Ontario Farmers Coming Back to the Bush.

Toronto, Feb. 6.-The Ontario Government's crown lands agent in the Rainy River district has written that a party of 60 Manitoba settlers are anxious to come back to Ontario, and would like to locate in his district. It seems strange that settlers should wish to leave territory requiring no clearing, and where cultivation is so easy, for the wild, heavily wooded land of New Ontario, but the explanation is that these men are largely from On-tario originally, and the lonely life of the prairie does not appeal They long for the bush land, and prefer mixed farming to continually raising grain. The report on the number of settlers going into New Ontario is not yet completed, but Mr. Southworth states that there has been more land settled the past year than ever before. The Temiscaming is the storm center of the rush. The old Ontario men go to Temiscaming, while Rainy River district is being filled up largely by men from the Western

IT GETS AT THE CANCER ROOTS

The New Treatment Thoroughly Eradi-

cates Cancer From the System. The failure of the old methods of treating cancer by operation or plaster was because they only removed the surface indications of the disease and did not reach the roots.

The net constitutional treatment for cancers and tumors, thoroughly and completely eradicates the disease from the system so that not a trace remains to again cause trouble. The treatment is simple, comparatively inexpensive, can be taken at home and causes no pain or inconvenience whatever. For full particulars send 2 stamps to STOTT & JURY, BOWMAN-VILLE ONT.

ANNUAL REPORT

WESTERN ONTARIO HEALTHFUL

St. Thomas Has Lowest Death Rate-High Marriage Rate-Figures on Tuberculosis.

The 32nd annual report of the Registrar-General of the Province, Dr. Bryce, which deals with the year 1901, is now in the printers' hands. It places the population of Ontario in that year at 2,184,144, which serves as a basis for comparisons. The total number of births during the year was 46.061, just 66 less than in 1900. The death rate was 13 per 1,000. The total number of deaths was 29,608, a decrease of 114. The greatest death rate was between the ages of 70 and 79. The total number of marriages was 18,035, compared with 17,010 in 1900. A marriage rate, therefore, of 8.2 per 1,000 was considered satisfactory, being amongst the highest of the most favored countries in this respect, and it was looked upon as an indication of general prosperity. The cities and towns showed an abnormal rate, 11.5 per 1,000, owing to the 835 marriages in Windsor in 1901, which was in reality 68.5 per 1,000 of the population of that

St. Thomas showed the lowest death rate of the cities, viz., 13.6 per 1,000, and this city was distinguished also as being the only one in the Province showing an increase in deaths from tuberculosis. The death rate of Ottawa was 22.7.; Kingston, 21.0.; Strat-ford, 13.9; Brantford, 15.5. Owen Sound

led the towns with 26.9.

The birth statistics showed that in fifteen counties there were slight in-creases, and decreases in 28. The counties showing an increase of more than 100 were Carleton, including Otta-wa, 407; Prescott and Russell, 201; Algoma, 138; Grey, 132; Nipissing, 107. The counties that showed a decrease of more than 100 were: Kent, 138; Hastings, 112; Northumberland and Durham, 111; Bruce, 104. It is pointed out that increases in population could in future be expected mostly in New Ontario and in towns where manufac-

turing develops.

Much space is devoted to tuberculoagainst 142; St. Thomas, 19, against 11. The death rate of consumption was 1.47 per 1,000. In the cities it was 2.09, and in the rural districts 1.33. The western plateau still retained its pre-eminence as having a low death rate from tuberculosis. The rate in Bruce was 1.11, in Huron 0.94, in Dufferin 0.80, sanitation and to the "cooped-up" circumstances in which the people live. The rate in Algoma was 3.06, in Muskoka 2.00, in Nipissing 3.25, and in the

Rainy River district 3.33. This report is always a year late, owing to the immense amount of clerical work required in getting the data

. NERVOUS PROSTRATION

The Result of the Pain and Irritation From Hemorrhoids,

Nervous Prostration is often the result of neglecting a case of hemorrhoids or piles; the pain and irritation attendant upon this disagreeable trouble inconveniences and annoys one, but it is possible to go to business and to do the ordinary day's work, so the trouble is neglected until the nerves become exhausted and the patient is a victim of nervous prostration.

Hemorrhoids cause a sensation of aged. heat, tension and itching in a region where is located the most sensitive Charles Lecras' warehouse, south end nerves of the human system, and the continued irritation will eventually cause a collapse of the nerves. This would easily have been avoided if the patient had carefully treated the case of piles from their first appearance. CANADIANS IN **BRITISH ARMY**

Not True That They Are Being Unfairly Treated.

KING EDWARD IS RECOVERING

It Is Said That Earl Carrington May Be the Next Governor-General of Canada.

London, Feb. 6.-Charles Rose, M P., presiding at the Canada Club dinner Thursday night, made the first Canadian speech since his election. He contrasted Canada's attachment to the empire today with her position seemingly preparing for independence in the days of his youth. The other speakers included Gen. Sir Reginald Thyme and Capt. Joly de Lotbinere, who denied the allegations of want of consideration in the British treatment of Canadians in the army. He said Canadians were invariably treated by the authorities with the utmost kindness, and given every chance to gain experience and distinction. In other speeches Canada was warmly congratulated on the success of Admiral Douglas in Venezuela. As one speaker said, Douglas was not made in Ger-many, but in Canada. Canadians are very proud of him.

TO HELP MARCONI. Henneker Heaton takes up the cudrels in behalf of Marconi as against the British permanent officials, and says in the Times yesterday: "We do not ask those frigid dignitaries to be enthusiastic to grant the young inventor the use of a battleship or recommend him for the mark of royal favor, as the Italian Government has done, or to be generous and place \$160,000 a year at his disposal, as Sir Wilfrid Laurier did. We only appeal to them to show the old British spirit of fair play, and license his operations, to accord the facilities which are granted cable companies in connection with the postal telegraph system of the United Kingdom.'

EULOGIZED MR. CHAMBERLAIN. The Times, in an editorial article eulogizing Mr. Chamberlain's brilliant and unique work in South Africa, says: "When the old diplomacy sniffs in its superior manner at the new, the public won't forget to ask: 'When did the representative of the old school get himself bumped, jolted and broiled for days together, in order to reach the

But the machine determined this year that no Liberal should have anything in sight. It passed the word to its henchman, the mayor, who rushed to the board, cast the deciding vote in favor of Mr. Egan and then rushed out again. Mr. O. Labelle showed his independence by supporting Dr. Jeffery on the merits of the case. Mr. Egan had already served two years as chairman (elected by the votes of Liberal members) and four years as chairman of the library committee. It is not conceivable that he personally desired the chairmanship again, knowing that his claims had been generously satisfied, but he was probably under pressure from the Club, to which he owes his appointment on the court of revision. The discredited member is the mayor. His sense of duty to the interests of the library was not strong enough to bring him to a board meeting during the whole of his official life. It was only a sense of duty to his party bosses that could drive him there at all.

TORONTO. [Associated Press Dispatch.]
Toronto, Feb. 5.—Business was dull at the cattle market today, except for butchers' cattle. There was a very good demand for medium butchers, prices running from \$3.50 to \$4.25. The light runs this week have probably helped to steady the market, the feeling being that a heavy run would have sent prices down a few points. The good butcher trade has kent business going, though a little slow. kept business going, though a little slow. The export trade is decidedly dull. Exporters are a little afraid of loading porters are a little afraid of loading themselves at the comparatively high prices which have prevailed for some time past for export cattle. Prices have been lower in some cases in the Chicago markets. There was not much doing in stockers and feeders today, the offerings being light and of poor quality.

at once. It developed that during a call of Count Quadt, the first secretary of the German embassy, upon Mr. Bowen yesterday morning, the latter expressed his willingness to make to Germany and Italy a cash payment of \$27,000 each. This was done because of Mr. Bowen's action in the early part of the negotiations in conceding to Great Britain a similar amount for satisfaction of the alleged indignities which the British Government claimed its citizens had suffered in Venezuela. This amount was named by the British ambassador. It was intimated that France might now come forward and ask for the same cash payment for herself as that given the allies. was practically defunct. The year of 1853 is described by Secretary Beddome as going "on, on and on." A list of debts met the club in 1854, when they resum-ed playing, and the most of that year was spent in an attempt to straighten out the drifting affairs of the organization. The club was kept up, though, and in 1855 according to the minutes: "This year the club started with renewed vigor, the old debts which had hung over the club so long, being all paid and a balance brought forward of 6s 3d." The first meeting, and the only which minutes are on record, was held at Young's saloon, at which officers were elected. The following rinks were chosen to play on New Year's Day: Dr. Wanless, P. McRae, R. Reid, F. D. Paton, vs. J. C. Horn, J. Moffatt, F. B. Beddome, W. Reid. J. Moffatt, F. B. Beddonie, W. The minutes say that at the annual supper of beef and greens was provided by Mr. Young, which was finished with sundry horns of hot Scotch, and after a very pleasant evening the members went home all the better pleased with the grog and themselves." In 1856 each member was called upon for a subscription of £2 to defray the debt. The secretary says that although all "came up," he had to pay £6 himself. Feb. 10, 1857, saw two local rinks play against Paris on the millpond at that place for "the medal." Paris won by a majority of 18 shots.

FACTS FOR BUSINESS MEN.

Success in business is not absolutely death. Business is an adventure venture, if one prefers to so designate it. Its success depends upon zeal and courage properly directed, and upon conditions that are beyond one's control. as of crops, manufactures, etc.or, say, general prosperity, or the opposite of it. But, while business success is not a foregone conclusion, it is as nearly certain as anything human can be said to be certain, if one possesses the requisites to success. The man who is afraid to take chances in business never should go into business for himself. He would do best to serve under someone more capable than he of being master. Men take chances at marrying, in travel, in everything else, and why not in business? It is the part of wisdom to safeguard one's self as much as possible, but there is nothing more true than that trite aphorism "Nothing venture, nothing gain." man must watch for opportunities, and seize such as seem to be least likely to He should be cautious, but he should be brave as well. This is as true in advertising as in everything else connected with business. Not all advertising pays, but all judicious advertising pays. One must advertise in order to succeed; upon the manner of advertising will depend greatly the measure of success.

Move in Matter.

At a meeting held in the Albion Block last night, with the president, Mr. H. B. Elliot, in the chair, the Thames River Angling Association considered the question of net fishing in the river. A large number of enthusiastic anglers were present, and the feeling was strongly against a continuation of the practice, so detrimental to the sport. Representations are to be made to the Government with complete catalogue of general works that end in view. A deputation was appointed to urge the matter, and the association has been assured of the co-operation of many people living on the Thames, between here and Wind-

officers for the year will take place. SERVICES APPRECIATED

MUSIC AND DRAMA

"PECK AND HIS MOTHER-IN-LAW The Toronto World says: "Getting off to a good start, and keeping the pace all the way around, "Peck and

His Mother-in-Law" lands inside the money, and the audience at the Grand Opera House last night made no attempt to disguise its delight. It is a jolly melange of bright music, enjoyable jokes, pretty girls, funny songs, and the necessary amount of calcium mingling in the scenery."
