THE COURIER

MONDAY, MAY 26, 1851.

We published, in our last, a letter addressed to Lord Elgin by Captain Arthur Sleigh, one of the Directors of the Canada, New Brunswick, and Nova Scotia Railroad Company, mentioning, at the same time, that we had received the Prospectus of the Company, through the Secretary, Mr. Josiah Timmis. This document is too long for publication, and, indeed, it is hardly necessary that it should appear in a Canadian paper, inasmuch as the people of the North American Provinces are pretty well ac-American Provinces are pretty well acquainted with the entire features of this question, as it concerns them. To in-tending Stockholders in England, the Prospectus affords valuable information.

We may premise that this Company is intended to have a capital of two millions, in one hundred thousand shares of twenty pounds each; that its Patrons Catheart, Lord Senton, and Sir We need only mention Sir George Simpson, Mr. Adam Ferrie, the Hon. Mr. Dionne, the Hon. Mr. Robinson, Mr. in the world, undertaken at no distant Stayner, Mr. W. Workman, Mr. Egan, day. Mr. B. Holmes, the Hon. James Morris, readers may be assured that this is a bona fide Company, in intention, whatever may be its success in action.

It will be remembered that this Comferent gentlemen present. The Band of the XXth Regiment attended, by the Provincial Parliament in 1847, and that the Act received the Royal assent in 1848, the time since that having been occupied in surveying the line of country through which the road is to pass. the Act received the Royal assent in try through which the road is to pass. It is intended that the road shall run from Halifax to Quebec, with a branch to Fredericton, and another to the most suitable point in Chedabucto Bay, or to Whitehaven, in Nova Scotia, and thence via Drummondville or Melbourne, to Montreal. The distance from Halifax to Montreal is estimated at 740 miles. the line having very favorable gradients. The Provincial Government of Canada has given a free grant of ten miles of the Crown Lands on each side the intended road, and a free right of way OOO per annum interest on the capital to be expended. The Government of New Brunswick has made the same grant, and given the same grant the and given the same grant the sa through all private property requiring to Brunswick has made the same grant, and given the same guarantees, and the Government of Nova Scotia has given a grant of five miles of land on each a grant of five miles of land on each a grant of five miles of land on each la side, with the same guarantee. It is affirmed that the passage from Montreal affirmed that the passage from Montreal highly interesting spectacle may be seen to Halifax will be made in twenty hours this evening at the old St. Andrew's the benefits to result from the line Church, in St. Peter Street. being, to carry through our own territory the whole of the passenger traffic from Europe, both for these Provinces and the Western States; to open a way for the transmission of produce during the Winter months, when the St. Lawrence is locked in by ice; give a much cheaper, because shorter, passage to emigrants, by means of large ste mers to be built for that traffic alone, taking out passengers, and bringing back produce to Europe; enable our fisheries to supply England with fresh Cod and Salmon, instead of sary to visit Europe to recruit his health. We salt; and last, but not least, open up to settlement the whole country through which the road passes, every year adding to the number of the population, and consequently to the profitable returns of

It is not intended that this shall be a costly road; in the words of the Prospectus, the line is to be "simple, homely, and strong;" the timber felled in the interminable forests of New Brunswick and Nova Scotia will form the basis on which the iron rails will rest, superand expensive entrings. The Directors confidently expect that, in a very short time after its construction, this line will pay a dividend of 15 per cent. per annum. The line commences with £60,000 per annum of yearly interest on the capital expended, granted by the Governments of the Provinces, and the value of the conceded lands more than equals the cost of the construction of the line. Those portions of the lands which must rapidly increase in value, as the Provinces increase in wealth and population, will be retained by the Company, and must become a valuable property to the Shareholders, who are thus fully secured by real estate to the amount of bek subscribed for. Mr. Mont-

comery Martin, who is considered a pool authority on Colonial matters, in peaking of this road, says:

"The last belonging to the Company, which as hitherto been of companitively trifing value, till; when the Railway peace through it, most robably be sagerly sought after, and at occumum a considerably enhanced perce, which ill far more than bring tack their whole capital the shareholders." If 4 000,000 acres are yield amongst 100,000 chares, it will give 400 rus per share, "which, taken at the low figure 51 per acre," given 540 per share, or 530

This Work contains as accurate and complete account of the Anatomy and Physiology of the Reproductive Organs, and of their relatire conditions in health and disease. Nor are these the sole contents of the Work: the means of excepe, as well as the nature of the danger, are pointed out in clear and intelligible language. It deservedly requires the closest attention and study, for what subject can be of more importance than the preservation of health, and of the physical capabilities of which every mun should be possessed. It unfortunately happens that the unhappy victim of excessive indulgence and victors habits, whether acquired as early life, or from the folies of alvanced age, while saffering from their invariable consequences, univisely entermins a fear of analysis of a property of the consequences. the unmaply exequired an early life, or from the follies of advanced age, while suffering from their invariable consequences, unwinely cuttermins a fear of applying to a qualified physician for relief. Shame and the drend so frequently, but errancously, entertained, that those complaints are beyond the reach of art, alike reatted him, and prevent the secking for assistance where stone it can be procured. In acting thus, he forgets that securate discrimination in accritaining the causes of discess, sympathy with the sufferer, and, above all, secrety, invariably characterize the intelligent and practical physician, and to the medical man, who can she'w by his possession of the requisite legal qualification, that he is entitled to enconfidence should be extended, DE La'MERT has obtained the highest medical honors, as his diplomas tea-sify, and the great extent of his practice for many years, is a guarantee for his professional experience, which has reference almost solely to the treatment of these diseases. Mr. Geo. Cumphell. 194 For mie by A. MANN, 4, Place D'Armes.

IN the month of August, 1948, we premised to the world that we would produce a medic and that would instantly stop the most occurs pangs of pain, and appedity remove its comes.

We proposed to Boustink, and all other Institutions for the acception of the sick i to Physicians, Surgeous, and all deficial institutions and Badies, to introduce our Ready Relief for their accessinations, and to illustrate in merits and mineratious pattern over pint upon the patients. We claimed that it would alby, in few minnies, the mast severe Changa and Symma-th would arrest the progress of that dread plague, the Cholera—that is a few minutes it would change the hard, knostly, cold, and life-beas body, to warmth, vitality, and vigor.

That is a few minutes it would relieve the most severe pains into the bowels, that is fiften minutes it would stop all painful and diarrhean discharges, and impart a genial warmth to every organ and secretion of the body; that it would positively relieve the most severe in an effect and in a few minutes, and effectually cure this distressing complaint.

That it would in an instant mitigate the cruel pangs of Neuralgie pains, and jermanently cure this exercitant acceptance in a few accordes.

That it would relieve all Rheumatic pains in fifteen minutes, and cure many Chronic tases of Rheumaniam in a few hours.

That it would relieve all Rheumatic pains in fifteen minutes, and cure many Chronic tases of Rheumaniam in a few hours.

That it would in a mineral minutes, would relieve acothing influence over all pains originating from Rheumanic, Neuralgie, Nervous, and Billous complaints, and that the patient suffering the most exercitants ordered a relieving influence and cure many Chronic tases of Rheumaniam in a few hours.

The world was starried at the guitication of our discovery. The wise amont of Redical Science shoot their heads it doubt. The sick and affected hoped yet, feared that, like other remedies, it would cave quicker on paper than by practical experiments; thousands who were suffering with Thos. Kraino, Esq.

CRURCE STREET,

Folkstone, November 22, 1848.

Sir.—Having been troubled with severy bed cough for the last eight mouths, I applied to Mr. Hammon, Chemist of this town, for some relief; he recommended me your COUGH LOZENGES; which, I am happy to say, cured me in a week. I beg most cordially to recommend them, and beg you will not hesitate to make this letter public; such a valuable remedy cannot be too well recommended. I have the honor to be,

Sir, your obedient humble servant,

To Mr. Kraino. FIVE MILLION BOTTLES WERE SOLD! FIVE MILLION BOTTLES WERE SOLD!
In every town in Maine, New Hampshire, Vermont, Rhode Island, Massachusetts, Connecticut, New York, and Ohio; in Michigan, Wiscousin, Illinois, Indiana, Missouri; the people have tested its merits, and pronunced it a safeguard against discease, and a quick anti-dete for all pains. In New Jersey, Pennsylvana, Virginia, Maryland, Delaware, the Carolinas, Georgia, Alabama, and Louisiana—in every lown in each State it has made friends, and proved its efficacy.

TO THOSEK WHO KNOW NOTHING OF IT. if you are unacquainted with the merits of Radway's Ready Relief, and if you reside in either of the States mentioned above, we refer you to the Druggists, to Physicians, and the People. Take a bottle of it to any skildly Physicians, et him test it, we will risk its reputation on his opinion.

Mercurial Affections. &c., &c., &c.
It is now generally admatted, by the learned and scientific, that the mysterious power called Galconism or Magnetism is in fact the principle of Visality or Life, and that disease in unany of its most painful forms is entirely owing to the absence of this Galvanic or Magnetic power in its healthy proportious. If, then, we can readily supply that wondrous power, when it is thus deficient, we can successfully combast disease; and this has been fully and perfectly attained by this most wonderful scientific discovery, of combining Magnetism or Galvanism with a Fluid which has cost the laventor of this rea. 21 years of study and plator.

There is not an intelligent Physician, who has hept

pace with the progress of science, time days not approve of the use of the Magnetic power in various diseases, and there is scarcely a Medical Journal, either in this country or Europe, which makes its appearance, without the statement of various cases, showing some new effects of those wouderful agents, or corroborating previous experience of their beneficial use. The inventor of the Galvanic Embrocarios has great pleasure in being able to state, that a majority of the most distinguished Physicians of New York constantly recommend this Embrocarios in their practice, and from sumry of them he
