HOME RULE REJECTED

The House of Lords Throws Out the Famous Measure.

SALISBURY ENDS THE DEBATE.

A Memorial Scene in the Upper House

The presence, arranged and dignified, of the House of Lords in the Upper House, on Monday night, was a scene of unusual interest. The House had been summoned to meet at 10 o'clock, and the members were seen to enter the Chamber in a quiet and unexcited manner. The House was called to order by the Lord Chancellor, and the debate on the Home Rule Bill was resumed. The Lord Chancellor, in his opening speech, stated that the House had rejected the Bill by a majority of 160 to 130. The debate was then closed by the Lord Chancellor, who announced that the House would adjourn on Monday night.

The following experience related by a practical farmer should prove interesting to our rural readers:—Last year when filling the silo something went wrong, and the cutter went with it, so much so, that another machine had to be secured to finish filling the pit. Our machine was geared to cut a half inch, while the substitute could not cut shorter than 1 1/2 inches, and the result was that we will 'hold' the job again a week, before we will cut more than a half-inch. The character of the silage was different and for the better, the moment we let into the short cut, and I have but little doubt that J. D. D., page 320, is yet nearer the point of success with his one-fourth cut. With a long cut there was a picking out of the shortest ones, instead of a rapid cutting of the ration, that one likes to eat. With the short cut, the silage packed closer, and settles more solid, and with a good distributor made little attention when filling, while the 1 1/2 cut wanted directing to its proper place every once and a while.

Of this number Canada sent 162, which were gathered from 110 different factories. When the judging was finished it was found that out of the 135 medals awarded, Canada had no less than 126, and also that 81 exhibits scored higher than the highest cheese from the United States factories. The honors were divided among the provinces as follows: Ontario receives 69; Quebec 52; New Brunswick 1; Nova Scotia 2; Prince Edward Island 2. Of the present year's cheese, twenty lots from Quebec received medals, while only one medal went to cheese manufactured in Ontario in 1898.—Manitoba Farmer's Advocate.

Method of Weighing Cheese. The Huntington Gleaner challenges the method adopted by the Montreal middlemen in weighing cheese. It is the custom there to take, say out of a consignment of 100 cheese five cheese. These are weighed separately. No notice is taken of the ounces, and from this test the amount of "dockage" from each of the hundred cheese is fixed. The dockage is supposed to cover loss in weight by the subsequent drying of the cheese and the loss in crumbling when cut up by the retailer. The Gleaner claims that the hundred cheese should be weighed in bulk when received and the price paid on the net weight. Their seems much reason in this contention. The other plan seems to be merely a survival of a somewhat primitive custom.

Light and Airy. The Mysterious Millionaire. I am so very, very rich it is a nuisance quite. It leaves me almost all day long wide awake at night. My bonds they are so many that it makes me to cut off all the coupons, which I deem a nuisance. I have six villas in the hills and seven by the sea. But they are too far, and aggravations rather, to me. For when the summer season comes I'm always on the road. Because I can't make up my mind to which of them I'll go.

I have a table full of rigs and hordes for each. Yet though they're all of blooded stock they're not all of the same. Because when I'd go driving in my auto or my trap I cannot seem to choose the one I would please me best to take.

Now wealth is very lovely, and there's much to be said for it. But it's a sorry business to follow such a I. For just the thing I need the most gold lies in the pocket of the man who has it. And that, as you may guess, in brief, is a firm and stable mind. -Harper's Bazar.
