GUELPH, SATURDAY, MARCH 3rd, 1900

FAT STOCK SHOW

Wellington's County Council was not strong enough to withstand the blandishments of the Guelph gentlemen who are interested in the location of the Live Stock buildings at Guelph...

As an object lesson the Mercury objects to the burning in effigy of Oom Paul. Too bad. Poor Oom. Poor Mercury. Is it wrong to teach the young of our city that the old man who is at the head of the war in South Africa is an enemy?

THE DOMINION HOUSE

Mr. Mulock introduces his Government Bill of Last Session Again - The Senate Seated.

Ottawa, March 3.—Mr. Douglas introduced a bill to control grain inspection in the west. Mr. Davin indignantly repelled the imputation that he had used undue influence in getting business for the Regina Leader.

ANOTHER ACCOUNT

Revolvers Were Used and Mere Serious Trouble is Feared.

Montreal, March 3.—There was another riot in Montreal last night, and at one time it looked as if there would be serious trouble. The students of Laval University, the leading French-Canadian institution, and the French population generally, were greatly incensed at the mobbing of the Laval building Thursday night by the McGill students because a British flag was not hoisted in honor of the relief of Ladysmith.

THE WEST ELGIN ENQUIRY

Aldborough Township Charges Were Gone Into - No Irregularities.

St. Thomas, Ont., March 3.—The West Elgin commissioners met at the Court House at 10.15 yesterday morning. In opening, Judge Barron stated they had received a lengthy document last night, signed by Mr. S. Price, which they had not had time to examine, but the purport of which was that he, on behalf of the Conservatives, desired to abstain from taking any part in the proceedings.

GOSSIP OF THE CORRIDORS

Mr. Tarte will leave for the Paris Exposition on March 15, to represent the Canadian Government as its High Commissioner. He expects to be absent until May 24.

TO CURE A COLD IN ONE DAY

Take Laxative Broom Quinine Tablets A drugstore refund the money if it fails to cure Dr. J. Grove's signature on each box

TALK OF CIVIL WAR IN QUEBEC

French Mob Rises in Opposition to McGill Students.

British Flag Torn Down Amid Cries of "Down With the English" - General Meles in Which Revolver Shots Were Fired - Several Persons Hurt - Victoria Rifles Ordered - La Patrie on the Incident.

Montreal, March 3.—There is no use denying the fact that the impudent action of the McGill students in attacking Laval University has created a great deal of bad blood in the community. Yesterday afternoon about 2,000 French-speaking men and boys paraded along St. James street, and as they turned up Beaver Hall Hill, it was supposed that the mob was making for McGill grounds, and that a free fight was imminent.

Without any other acts of violence except cries of "En Bas les Anglais" ("Down With the English") the noisy crowd returned to the East End. A large crowd also gathered in front of Laval University.

EXPRESSED REGRETS

Yesterday forenoon Dean Walton of the McGill faculty, went down to the Court House and expressed McGill's regrets to Judge Mathieu of the Laval Law School for what had taken place.

NEAR CIVIL WAR

"Is it not a painful spectacle to realize that we are two steps from civil war? We are not the aggressors, but we are strong enough to protect ourselves. We do not hold the majority of the English-speaking population of Montreal and the country responsible for the shameful scenes which disgraced our streets. This is a decisive hour. The Confederation can only be maintained by the two races living harmoniously side by side. There is very little to add to what has taken place to rend the Federal compact, and that without much delay."

SEVERAL PEOPLE BADLY HURT

Several people were badly hurt in the melee. The report spread that the students were on their way to attack McGill University and a big force of police were despatched to the scene. The French students, however, kept in the centre and eastern districts of the city. The police have been called out and are endeavoring to quell the mob.

SERIOUS TROUBLE FEARED

The trouble has caused a great deal of bad feeling between the French and English sections of the population, and serious trouble is feared unless the authorities quell the disturbance promptly.

THE FURNITURE FACTORY OF GEORGE McLAZAN

The furniture factory of George McLazan, together with the carpet shop of David Easson, at Stratford, Ont., were destroyed by fire on Thursday night. The estimated loss is about \$18,000.

OTTAWA, MARCH 3 - MR. BOSTOCK

M.P. for Yale and Cariboo, declares that the British Columbia supply bill runs out June 30, 1900, so Joseph Martin has that time to run out. His opinion is that Joseph is a dead end. He is a notable example of a man who went to British Columbia with fair prospects of being a success, but who antagonized everyone and is now out of the race. Mr. McTane, Mr. Bostock thinks, will not unite with Martin, if it would be trying himself to a corpse.

PASSION FLOWER FRUIT

Few people probably are aware that there is a variety of the passion flower which bears a luscious fruit about the size and color of a purple plum. The botanical name of the variety is Passiflora edulis, and as it does well in Wales and Scotland it should do so elsewhere.

THE ONTARIO LEGISLATURE

The Debate on the Address in Reply Continued.

Mr. Lumsden, Liberal, Dilates on the Glories of New Ontario, But Coming to the Topic in All Men's Minds, the West Elgin Frauds, Declared That He Deplored Them - Dr. Payne Caterizes the Government's Feigning Sore.

Toronto, March 3.—Mr. A. Lumsden (Ottawa), resumed the debate on the address in the Legislature yesterday, and, after eulogizing "New" Ontario, characterized the crimes that had been discussed by the House as "abominable practices. He would do anything in his power to sweep such practices from the fair fame of Ontario. But he denied that the Conservatives were simply pure or the Liberals alone corrupt. Mr. Lumsden next turned his attention to the patriotism of the contingent, predicting a future British Dominion of South Africa, with the same liberty as Ontario enjoys. (Applause.)

DR. PAYNE ON THE FLOOR

Dr. Payne said that Premier Ross who had been a thick-and-thin believer in the surprise had now grave doubts of its existence, and had appointed a commission to discover it. (Laughter.) This was a reasonable enough proceeding if the surplus had ever been in hand, and had been kept in the vaults of the buildings. After the way the West Elgin ballots had disappeared, nothing was safe (laughter).

The Government had the hardihood to draw comparisons between Ontario, Belgium, Denmark and other countries. The title country of Belgium alone supports a population of 8,000,000 on the iron industry, while Ontario, with its enormously greater mineral wealth, had but a single blast furnace in 1897. The Liberals, after their 27 years of unbroken rule, were still steeped in their Rip Van Winkle sleep. They were unable to do anything to develop the great natural wealth of Ontario, and had actually brought the people to direct taxation. Dr. Payne spoke at great length upon the opportunities for developing the nickel wealth of the Province. He said there was no reason in the world why there should not be a Pittsburg or a Chicago in the centre of the mining district of this Province. The Canada Copper Company, however, had 28,000 acres in the Sudbury district, and were only working two or three acres. This policy on the part of the Government was simply developing monopoly and tying up the mineral wealth of the Province.

GOVERNMENT COMES DOWN

Mr. Davis—I my hon. friend would allow me to make an announcement—it is the intention of the Government to open an office at Sudbury. Plans and arrangements are now being perfected, and ought to be concluded in time for the inauguration of that office before the House rises. (Applause.)

Dr. Payne—I am glad that two gentlemen are still willing to adopt our policy.

ASSEMBLY NOTES

The Tilbury (Chatham) Gun Club want the game laws on Ontario to permit duck shooting in the spring. A bill will be proposed to the Legislature giving a municipality the right, upon inserting a notice in the Ontario Gazette, to pass regulations with regard to noxious insects that will have all the effect of law.

CONCENTRATION MEANS STRENGTH

It means more, It means success. We concentrate in fine tailoring, hats, caps, fur and furnishings. In these lines we claim to be experts and experts in any specialty are bound to get to the front. Smatterers are numerous but never successful.

You need never be afraid of appearing in unbecoming or freaky dress if your order is left with us. Our suits have an individuality that gentlemen appreciate.

KELEHER & HENDLEY

The Model Merchant Tailors.

YOU DON'T WANT TO BUY?

THAT'S ALL RIGHT

Come in and take a look. We have received a great many new things already this season. They are distributed in various places around the store, so that need to visit every department in order to see them. Among them is a lot of handsome laces and the latest styles in pretty silks.

TO-NIGHT

we make a special display of them and you are invited to come and inspect them, but you are not expected to buy. It is a pleasure to look around at the pretty things and see what is to be worn during the spring and summer season. Every one is welcome remember and no one need stay away because they have nothing to buy. Early in the week we shall be passing in several large shipments of Millinery.

MUSIC AND DRAMA

The Old Curiosity Shop

The Toronto World says of the Old Curiosity Shop, which is billed for Monday evening at the Opera House:

It is a thoroughly new "Little Nell and the Marchioness" at the Grand Opera House. Harry P. Mawson, in his dramatization of the novel, has evolved a most entertaining presentation. Particular attention has been paid to the scenery, and the electric light effects are brought out with great cleverness. The principals in the cast are Mr. Richard Swiveller, Max Figman, Grandfather Trent, John Jack, Fred Trent, his grandson Harold Hartnell, Mr. Garland, Wm Seymour, Daniel Quip, Shipbroker of Tower Hill, P. Aug Anderson, Sampson Brass, solicitor, Chas. Stanley, Kit Nubbles, Aubrey Beattie, Sally Brass, Sampson's sister, Ann Caverly, Mrs. Jarley, "Jarley's" Wazworks, Lillie Eldredge, Landlady of "The Three Jolly Sailors", Molly Revell, Little Nell, and the Marchioness. Mrs. Figman is a good, Dick Swiveller, and provoked much merriment because of his droolery and good nature. Mr. John Jack is ideal in the role allotted to him. Kit Nubbles was cleverly represented, so were Mr. Garland, the Landlady and Mrs. Jarley. Sampson Brass had a good representative in Mr. Chas. Stanley, and the other support was efficient. In the hideous portrayal of Daniel Quip, Mr. Anderson proved himself one of the best actors that have appeared here this season. The character of Sally Brass is another unpleasant one, and it is difficult to believe that the coarseness and roughness imparted to it by Miss Caverly was a correct representation of Dickens's idea. The star of the cast is Mary Sanders, who, in the dual role, presented two kinds of human nature with a perfection truly astonishing. The death scenes were particularly touching, while in the opposite character of the hoydenish scullery maid, sharp as a needle and as true as steel, Miss Sanders was thoroughly at home, both in the humorous and pathetic passages demanded. The third act developed the best work, along with the death of Little Nell, in which the scene was a well high perfection of melodramatic art. Altogether the company is worthy of the largest patronage for the balance of the week.

A Deserving Show

Marks Bros. theatrical company have created such a good impression upon the people that it looks as though they could well afford to remain here much longer than their engagement announces, which is all next week. Night by night, the crowds increase until now the city hall is taxed to its utmost capacity when the curtain rises for the play, and judging from indications, standing room will be a premium all next week. Jerry the Trump was the play last night, and the audience gave every evidence of pleasure. In fact at times, the crowds were so numerous, that the Irish Detective. Next Monday night The Duke's Daughter.

THE WORLD'S CHAMPION

Give a Great Exhibition of Skating in the Petrie Rink

There was a big turn out at the Petrie rink on Friday evening to see the exhibition of skating by John Nilsson, of Norway, who came from St. Louis to fill the engagement here, the only one in Ontario.

The skaters held possession of the ice until nine o'clock when Nilsson, the world's champion skater, appeared, his breast bedecked with many medals. His wonderful performance delighted everybody and each act was greeted with rounds of applause. He did many things that might well be considered impossible to do on skates. In his jumping over chairs and tables, leaping over seven barrels at once and other similar feats he showed a dexterity and strength that was marvellous. His quick stops while going at full speed was also a feat. In his fancy skating he showed a grace that is characteristic of the skaters from his country. Taken all in all he well justified the reputation he has attained and the exhibition pleased immensely.

Curling

The following is the result of the game played on Thursday between the Guelph Unions and Waterloo:

Table with columns for Guelph and Waterloo players and scores.

Rockwood Notes

A parlor social, under the auspices of the Methodist church, was held at Mr. C. Cook's on Tuesday evening. The evening was spent in playing games and a choice programme was given, after which lunch was served.

Mr. John Duff set out for Scotland via New York on Monday. He expects to be absent a few months.

Miss May Stull, Guelph, is visiting Mrs. D. Schultz.

The funeral of Mrs. Wm. Mutrie, mother of Mrs. J. Croft, took place Thursday afternoon.

ENTRE NOUS.

"The constancy in the good cause alone, Best justifies the meed thy valiant sons have won."

All honor to our brave Canadian lads whose baptism of cannon, shell, and sword has been crowned with victory, and whose gallant deeds in our Empire's cause will be indelibly written in the future history of Canada—"the brightest jewel in the Imperial crown." To the mourners of our fearless hearted and gallant soldiers who have fallen nobly defending British rights, it must be some consolation to know the sacrifice was not in vain, and that success has attended the heroic efforts of their comrades. The wild patriotic enthusiasm which prevailed in our midst on Thursday when the welcome news of the relief of "Ladysmith" was received is sufficient evidence that the Royal City is heartily and completely loyal to our aged Queen and British interests in the mother land.

Mrs. Crawford, who has been the guest of Mrs. Wells, "Gilnockie," for the past few weeks, left on Monday for Toronto, where she will visit friends.

The gymnasium at Petrie's Rink was completely transformed on Monday evening into a pretty ball-room and in its gala dress, with streamers of bright bunting, flag decorations, and filled with a prettily dressed gathering brilliant with color presented a scene full of warmth, brightness and general hilarity. The occasion was a dance given by the Victoria-O. A. C. Hockey Club, and the committee are to be congratulated on what was certainly a very jolly affair. The music by "Chain's" orchestra was very inspiring, and many of the waltzes and two steps were encored, the gay throng thoroughly enjoying the first and only dancing event of the season. Amidst such a galaxy of fair, sweet maidens, perhaps the most admired were Miss Grace Howitt, Miss Powell, Miss Campbell and Miss Maroon, all becomingly "sworn in" pretty, smart frocks. The refreshments provided by the ladies were, as always, very delicious, and an altogether successful evening was the gratifying result of the energy and efforts of the Victoria Hockey Club.

Much of the credit of the success was due to the lady patroness:—Mesdames C. L. Dunbar, H. Guthrie, McMillan, Mills, Nelles, Torrance, and A. B. Petrie, jr., and to the committee of management:—Messrs. Prof. Doherty, W. Dryden, O. A. C. J. Weir, O. A. C. H. E. Hanwell, C. Morris, G. R. Petrie, W. J. Dobbie, President; R. L. Torrance, Vice-President; and Robert Walker, Secretary. Among those present from out of town were:—Miss Baldwin, Toronto; the Misses Dunn, Berlin; Mrs. Graham, Galt; Miss Graham, Galt; Mr. and Mrs. Moore, Galt; Miss L. McKeown, Galt; Miss McGregor, Galt; Mrs. McGregor, Galt; Miss Gourlay, Galt; the Misses Melrose, Galt; the Misses Dietrich, Galt; Miss Black, Fergus; Miss Wilson, Fergus; Messrs. Lows and McGill, Stratford; R. T. Kelly, Galt; C. Dietrich, Galt; P. Dietrich, Galt; J. Fraser, Galt; Waryock, Galt; P. Bell, Toronto; Mr. Beddington, Toronto; W. Field, C. Meakins, St. Catharines; Hamilton; Dr. Livingstone Rockwood.

A second assembly is contemplated for Easter Monday. Miss Baldwin, who has been visiting Mrs. McConkey, "Ashcote," for some weeks, returned to Toronto on Tuesday.

A bright and very enjoyable affair was the "At Home" on Tuesday afternoon which claimed Mrs. Day of College Heights, as the kind hostess. Miss Buchanan, of Toronto, the guest of the house, in whose honor the tea was given, received with Mrs. Day in the drawing room, which was prettily decorated with palms and flowering plants. The dining room was very effective, the patriotic scheme being artistically carried out. Scarlet geraniums, amilax, and small Union Jacks decked the tea table, which provided an endless variety of dainties in red, white and blue, and were temptingly served by the thoughtful assistants, Mrs. Lockhead, Miss Ryan, Miss Thomas, Miss Cutten, Miss Mills, Miss Georgie Mills, Miss Shuttleworth and Miss McMillan. A striking photograph of "Oom Paul," draped in black and surmounted by the deer old flag, was a unique finishing to the mantle.

On Tuesday evening Mrs. Chas. Nelles entertained the Junior Whist Club at her charming home in Woolwich street. With pretty surroundings, a gracious, thoughtful hostess, and a genial, jolly host, it goes without saying the evening was a very delightful one, and the hours only too fleeting.

Ash Wednesday, the first day of our Lenten season, was observed by the Anglican and Roman Catholic churches with appropriate services.

Dr. H. H. Macauley sailed from New York for England on Wednesday by the Teutonic, en route to Shanghai, China, where he represents the Sun Life Insurance Company as medical examiner. His wife and children are visiting relatives here during his absence.

Wednesday evening Mr. and Mrs. Drew, in Woolwich street, gave a most enjoyable "Progressive Euchre" party in honor of their guests, Mr. Drew and Mrs. Kennedy, of Elora.

The informal farewell tea given by Mrs. Tyler for her bright sister, Mrs. Harrison, was a delightful though small event of Thursday afternoon. The gentle hostess

"77" breaks up

GRIP

Colds that hang on

"Seventy-seven" breaks up hard stub born Colds that hang on known as Grip. "77" restores the checked circulation (indicated by a chill or shiver), starts the blood coursing through the veins and breaks up a fresh Cold in one day.

White and Gold

Dr. Humphrey's Manual, Edition de Luxe, sent free. Tells about the care, treatment and cure of the sick. A chapter especially on the Diseases of Children. Humphrey's Homoeopathic Medicine Co., Cor. William & John Sts., N. Y.

gave a gracious welcome to her guests in the spacious flower-decked drawing-rooms, beside her Mrs. Harrison, who received many good wishes for her trip to her western home. The edibles were of the daintiest and were irresistibly served by Miss Campbell, Miss Howitt and Miss Mills.

SNOWDRIFTS.

In Wayne County, N. Y., on Friday the snow was a foot on the level and was still snowing.

At Rochester, N. Y., on Friday morning at 8 o'clock the snow record showed a total of 40 inches during the previous 62 hours.

All the mails from the north and northwest were from four to five hours late in New York on Friday morning on account of the heavy snowstorms in the upper and central part of the State.

A NOTABLE IRISH LADY.

Lived 97 Years, Danced on the Eve of Waterloo and Girded on Wellington's Sword.

Charles L. Davis (Alvin Joslin), the actor, died at Pittsburgh, Pa., on Thursday night. He was 52. Right Rev. Mahton N. Gilbert, Bishop coadjutor of the Diocese of Minnesota (Episcopal), died here on Friday.

William McAndrew, foreman of the Hamilton Herald newsroom, who has been appointed waterworks-foreman of the city, was presented with a gold watch by the large quantity of gold watch he has worn.

There were two big washouts on the Boston & Maine Railroad and a number of firms have had their stock and machinery badly damaged. The water in the main street at Hudson, Mass., is two feet deep.

Lady Louisa MacDonna/Tighe died at Woodstock, County Kilkenny, Ireland, Friday morning. She was a daughter of the Duke of Richmond, and was born in 1803. She danced at the famous ball at Brussels the night before the battle of Waterloo, and girded on the Duke of Wellington's sword when he started for the field of battle.

STORM BEAT ALL RECORDS.

Weather Man Looks for Moderate Temperature for Next Few Days.

Toronto, March 3.—When the weather man was asked what was to become of the large quantity of snow on the streets, he intimated that it was likely to die a natural death. There is no really cold weather in sight, nor is there any particularly mild weather billed for the next few days. The recent fall of 18.2 inches of snow broke all records which have been kept at the Observatory since 1827. The storm was much worse in Quebec Province than it was here. Quebec is catching it.

The Windermere Dry Hot Air Hospital

Shrewsbury Street STRATFORD ONTARIO

Opened Oct. 1st. Beautifully Located. Possesses the Finest Treatment Rooms in America.

THE T. WILLARD READY HOT AIR TREATMENT OF RHEUMATISM.

By DR. BURNS, Chicago.

The treatment of Rheumatism, particularly of the chronic form, is often far from satisfactory, either to the patient or to the physician and up to the present time has left much to be desired. Even in the most favorable cases, when the worst of the disease is past there often remains a tenderness and a stiffness about the articulations which are a nuisance to the patient. If not a source of positive discomfort, the Dry Hot Air Treatment by the T. Willard Ready method, above 300 degrees F., applied to the affected part, in cases of long standing Anchylosis, not only produces speedy relief, but produces absolute cure.

The knife, with its butchery shall no longer reign, Hot water, as first made by God, Man shall know, When heated with flame, as pure as his name, Shall disease dissolve, as the sun dissolves snow.

T. WILLARD READY

MOTTO—Heat, scientifically applied has proven a great benefit to mankind.

Our Opening Offer

We will positively guarantee to cure Rheumatism. If we cannot cure you we return your money and it costs you nothing. It makes no difference how long you have suffered, if not benefited after a fair trial it costs you nothing. Who would not try our treatment under those conditions?

We make this proposition because scientific physicians who have used the T. Willard Ready Apparatus with intense dry heat say it to be the standard method of treatment of these affections. Unlike formulas and drugs, the only merit of which lies in advertising, you deal with a natural remedial agent, the physiological properties of which are as well known as those of air, and as definite in results as the dissecting knife in opening abscesses or removing tumors. Write for terms and literature.

This coupon is good for One Dollar if presented within thirty days from date of opening.

ONE HUNDRED CENTS

\$1.00 COUPON

Cut this out, put it in your purse. It is worth a dollar in gold in payment of treatment at the Windermere Dry Hot Air Hospital. Present it at the office of the institution.

HEAT, as is well known, has for centuries been recommended as a topical agent for the treatment of Rheumatism, particularly in Arthritis, Synovitis, Primary Neuritis, etc., it was administered either moist or dry, and it is now generally accepted that the latter is so comparatively high temperature, hence it is also more beneficial.

The methods used, hot bricks, hot water bottles, bags containing heated salt, sand or heated plates, could be neither regulated nor maintained for any length of time, making renewal of agents necessary, and subjecting the heated parts to exposure to cold.

Lately the T. Willard Ready Hot Air Apparatus has been introduced to the medical profession, and a Sanitarium, in an ideal location in Stratford, to be known as "The Windermere Dry Hot Air Hospital," for the treatment of all diseases where dry hot air is indicated. The T. Willard Ready Apparatus is so constructed as to isolate the air within the cylinder, to remove all moisture and permit its being heated to any temperature up to 350 degrees F. for an hour, or, if needed, an hour and a half, not only without discomfort, but with perfect safety, as with ordinary care not even the skin should be blistered, the high temperature drying any perspiration as soon as it appears on the Turkish towels absorbing it.

The following effects can be noticed: 1.—Pain, if any has existed, is diminished.

2.—The part treated becomes hypodermic, showing dilation of the capillaries—hence:

3.—Effusion and deposits in joints, and in fact everywhere else will be absorbed, adhesion broken up—consequently:

4.—Ankylosis removed, mobility of stiffened joints or limbs restored.

5.—Inflammatory conditions relieved, in fact affected parts brought to as normal a stage as possible.

6.—Certain pathogenic germs necessarily would be annihilated if subjected to such high temperature, therefore the subjction of tubercular joint or pyemic infection gonorrhoeal arthritis must be followed by good results.

The therapeutic properties of intense dry heat are Antiphlogistic (local), and Anesthetic (local), Anesthetic (local), and Antiseptic.

In summing up these therapeutic effects of dry hot air (intense and isolated), the reader should bear in mind that they are not merely theoretical deductions, but have been substantiated in actual chemical experience, and observation in many patients.

The question now is in which cases is the treatment suitable. We could answer this in a general way, but believe it so far as the treatment is a comparatively new addition to therapeutics, to mention each separately, adding such remarks as may be necessary to prove its rationale.

First of all, the Rheumatic effects must be mentioned.

1.—Acute Articular Rheumatism. Whether this disease is due to an infection by germs, to cold or exposure, or to an abnormal condition of the blood or system is not yet definitely decided upon, and makes little difference, as the T. Willard Ready Dry Hot Air Treatment is concerned.

That much is fact that besides general symptoms, such as fever for instance, one or more of the joints become quite red, swollen, painful and sensitive to touch.

Pathology teaches us that the Synovial membranes of the joints become inflamed, and exude a turbid thin fluid. It is evident that as far as the local treatment of painful and inflamed joints is concerned, inments can be of little value. Remembering the Physiological properties of intense heat, we must realize that at a temperature of only 350 F. must necessarily reduce the inflammatory process and relieve pain.

Of course constitutional and anti-rheumatic treatment should be practiced in addition to prevent a metastatic spread of the disease which has been a well characterized feature of acute articular rheumatism. 2.—Muscular Rheumatism. Similar as in Articular Rheumatism, the so-called voluntary muscles and facial become affected. The causes are the same, the symptoms are pain, as the pain and soreness can be located in one muscle or a group of muscles. A characteristic symptom is that the pain is more intense on pressure upon the affected muscle, and while apparently easier when at rest, gets worse afterwards, while after using the muscles the pain somewhat diminishes.

3.—Lumbago, when the muscles of one of both sides of the region are affected, and 4.—Pleurisy or stitch in the side, When the intercostal muscles of the chest are involved, as these muscles are also innervated somewhat, it is evident that the T. Willard Ready Dry Hot Air Treatment is indicated. The T. Willard Ready Apparatus is so constructed as to be located in one muscle or a group of muscles. A characteristic symptom is that the pain is more intense on pressure upon the affected muscle, and while apparently easier when at rest, gets worse afterwards, while after using the muscles the pain somewhat diminishes.

5.—Chronic Gout. Following several acute attacks and characterized by urate of soda deposits in the joints of the hands and feet practically deforming them, can hardly be cured by any other method than the Dry Hot Air Treatment applied twice daily at intense temperature. 6.—Sciatica is either primary or secondary, that is to say the great nerve itself is inflamed or secondary, that is to say due to some tumor within the pelvic cavity or to hip disease. It is evident that in secondary sciatica the disturbing cause must be first removed before relief could be made permanent. In most cases of primary sciatica, however, the intense heat if applied for an hour and a half daily, would not only penetrate the muscles and tissue covering the sciatic nerve, but reduce the engorgement and inflammation of the nerve substance itself, and thus easily cure radicles. Sciatica has always been one of the terrors of the medical profession. They have used electricity, they have bled, they have injected decoctions into the tissue morphia, ether and chloro-

form, and as the last resort have "carved" the nerve and either produced paralysis, with a following suit for damages for matter for days or weeks only, the trouble trouble returning like Meplisto with a diabolical laughter defying our weak batteries. But at last we are confident we can kill this devil of a disease with the proverbial remedy Satan uses to torture his captives—intense heat.

7.—Gonorrhoeal Rheumatism. This is no rheumatism at all, but in reality an inflammation of one or perhaps several large joints, following gonorrhoea, and due to the metastatic infection by the gonococcus. The symptoms are the same as if we had to deal with a case of intense articular rheumatism, but the joint or joints, if not properly treated, may become so impaired as to be stiffened and useless; that is to say, partially or totally unyielded. Here the Dry Hot Air Treatment will not only relieve at once but prevent this sad result. The pathology is the same as in acute rheumatism, save that the mischief is caused by a different micro-organism, and recent experiments tend to show that 400 F. are sufficient to kill the gonococcus.

8.—Arthritis means simply an inflammation of the joint. Therefore acute articular rheumatism is a "rumatic arthritis, and gonorrhoeal rheumatism, synovitis or arthritis) were treated by intra-articular injection of certain antiseptics, the results, besides the pain, which such treatment necessarily caused, were far from satisfactory, while now the inflammatory process is quickly checked and the bacilli absolutely destroyed; for any tyro in medicines knows that even low temperatures of heat are sufficient to kill the bacillus tuberculosis. The value of dry hot air treatment is perhaps best established in sprains (traumatic synovitis), as it has been frequently reported that patients who could not hot take on account of the pain have gone home after an hours treatment.

11.—Ankylosis, the technical term for stiffness or immobility of the joints, can be successfully treated with dry hot air, if due to rheumatism gonorrhoeal infection, tuberculosis or trauma, unless there is such extensive destruction of tissue as to make reparation impossible or if the bones forming the joints are grown together. In such cases relief can be expected from osteoplastic operation only. In so-called fibrous ankylosis, the dry hot air treatment will be found an excellent adjunct to forcible breaking of the adhesions, prior to and immediately after the operation, when the pain incident to the breaking will be relieved at once and a lighting up of a dormant inflammation prevented.
