THE TREES ARE LIKE MEN - AGE AND YOUTH SIDE BY SIDE. - REFLECTIONS ON CHAR-ACTER SUGGESTED THEREBY.

(By Rey J L M Young) Were you ever in the woods? Did you ever make a study of the trees? Very many are the times I have been in the woods. 1 is my favorite place for recreation, with rod or gun. I have seen something more than big game. The following are a few of things

with its large trees and small ones, green and dry, standing and prostrate, growing and decaying. While there is a broad difference between inanimate trees and sentient huma beings, yet certain comparisons may be made between them that are strikingly suggestive. There stands a huge giant oak, with a long straight trunk, clear of knots, to all appear ance, and sound to the core. Its branches,
