Louis Whitman, surveying,
Harry Ruggles, revising,
Edmund Hall, revising,

This distressing and unfortunately very common malady easily takes rank among the very "meanest" of the diseases to which people living in this climate are liable.

La Grippe is no respector of persons; it attacks the young and the old, the rich and the poor with the utmost impartiality.

impartiality. Except in the cases where Pneumonia develops, La

Grippe is seldom directly fatal; the real danger lies in the after effects Even when the patient has fairly well recovered from an attack (and it is very hard to tell just when he that fully recovered, the muscles are relaxed, the nerves unstrung, the heart and lungs weak, the throat and bronchial tubes irritable and tender and the whole system depressed. run-down and in no condition to resist the attack of any other disease to which it may be exposed.

This condition is fraught with danger and demands instant and intelligent attention, the system must be built up and restored to a normal and healthy condition—advice easy to give, often very hard to follow.

The appetite is liable to be poor and the digestion impaired so that it is almost impossible to consume and digest sufficient ordinary food to do the work quickly and effectively. What is required is a concentrated food, palatable, easy to digest and containing the elements necessary to repair the waste which La Grippe has committed. Just such a food is found in

a scientifically prepared emulsion of Cod Liver Oil, Iron and Phosphorus, palatable, digestible and effective.

FERROL contains just what the run down system needs and all it requires. Cod Liver Oil to restore the lost flesh and make what is left firm and healthy. Iron to enrich the impoverished blood and restore elasticity and firmness to the relaxed muscles. Phosphorus to tone the nerve and brain as nothing else will.

Two or three bottles of FERROL, taken after the acute stage of La Grippe has passed, will do more to repair damages than can possibly be accomplished in any other way. Try it and see.

### AUDITORS' REPORT

We hereby certify that we have personally checked the cash on hand at Halifax, St. John, Montreal and Toronto. We have also verified the securities held as investments, personally examining those held by the Canadian branches of the Bank, and procuring certificates by responsible business men, not in the employ of the Bank, certifying to the existence of the remainder of these securities.

We have further to report that having examined the foregoing Balance Sheet, and having compared the same with the books of the Head Office, and the certified returns from the branches, we are of opinion that it is a full and fair Balance Sheet, exhibiting a true and correct view of the Bank's affairs as at 31st December, 1906. This has much surprised and disappointed me as I anticipated that that strong organiza-

> my work. It is a lamentable fact that the chief liquor drinking done in the municipality is so managed that the Canada Temperance Act is powerless t cope with it, and, in truth, has no jurisdiction over it. I refer to the custom of persons purchasing liquors outside our municipality-even in our two incorporated towns-and then defiantly consuming such liquors within the municipality. If such conduct could he absolutely prohibited the real work of your inspector would show to much better advantage than it pos-sibly can do under existing circum stances.

My general account, with itemized accounts attached, is herewith proremain, gentlemen, yours obedient

JOHN I. NIXON, Inspector lanuary 7th, 1907.
