
-
Agent for LOVELL'S, AND THE NEW SERIES of SCHOOL BOOKS

Being the second after Bissextil or Leap Year, and until the 20th June, the Thirty Third Year of the Reign of Her Majesty Queen Victoria.
Calculated for the Meridian of Montreal, in Latitude $45^{\circ} 30$ $26^{\prime \prime}$ North, and Longitude $73^{\circ} 24^{\prime} \cdot 22^{\prime \prime}$ West, from the Royal Observatory, Greenwich, but arranged so as to serve without essential variation for all parts of the Dominion of Canada.

> EDITION OF-THRTY-FIVE THOUSAND, -

Entered according to Act of Parliament of Canada in the year of our
Lord one Thousand Eight Hundred and Sixty-Nine, by Robert Miller, in the Office of the Registrar of the Dominion.

## EXPLANATION OF CALENDAR PAGE.

The Publisher of this Almanac, with a view to increase its circulation and usefulness, has adapted its calculations for the whole country. Ths Moon's changes are given for five different places, viz: Quebec, Montreal, Kingston, Toronto, and London. The rising and setting of the Sun are given for Montreal and Toronto. The rising and setting of the Moon are given with sufficient exactness for all practical purposes. The weather prognostications are again calculated according to the table of the celebrated Dr. Herschel; and for extraordinary accuracy, Miller's Almanao retains its wonderful popularity.

## ECLIPSES DURING THE YEAR 1870.

Although there will be six Eclipses this year, none of them will require special notice here, as only one will be visible, and that at the Eastern extremity of the Dominion of Canada.
I. On the 17 th of January there will be total Eélipse of the Moon visible in Asia, Europe, and the Western part of North America.
II. On the 31st of January there will be a partial Eclipse of the Sun, not visible in this Dominion.
III. On the 28th of June there will be an Eclipse of the Sun, not visible here.
IV. On the 12th of July there will be a total Eclipse of the Moon, visible in the Eastern parts of Nova Scotia, New Brunswick and Newfoundland.
V. On the 28th of July, a partial Eclipse of the Sun will occur in the Aretic Regions.
VI. On the 28th December, a total Eclipse of the Sun will take place, but not visible in any part of North America.

Jandary.-We have often recommended our young farmers to devote some of their long winter evenings to useful reading. An intelligent and thrifty farmer says: "But for the co-operation of my boys I should have failed. I worked hard, so did they. The eldest is near twenty one, and other boys in the neighbourhood, wounger, have left their parents; mine have stuck to me when I most needed theirservices. I attribute this to the fact that I have tried to make home pleasant for them. I have furnished them with attractive and useful reading and when night comes, and the day's labour is ended, instead of running with the other boys to the railway station and adjoining towns, they gather around the great lamp, and become absorbed in their books and papers." Give then to the young people good hooks and magazines,

3rd Month.
MARCH, 31 Days.
Begins on Tuesday.

March.-Give your cattle enough to eat, and no more. Many careless men and boys, will stuff the rack full of hay, half of which may be wasted by being pulled out under the feet of the animal. It is an excellent plan to cut the hay or corn fodder and wet or steam it, putting on a small quantity of meal or shorts, and then it will go down nicely and nothing will be lost. We believe a great amount of excellent fodder is yearly lost from careless feeding. The best farmers lose the least for they are most-careful. All cattle should be so fed and treated that they will come out in good condition in the spring. The owner had better feed the cattle himself, if possible; if not, look carefully after those whom you employ as substitutes, for these are sometimes neither wise por conscientious.

4th Month.
APITH, 30 Days. Begins on Friday.

April.-Currant bushes should be set in rows four to five feet apart, and four feet apart in the row. Set plants one yeur old of very strong, or two years from the cutting. The land should be very well manured; for currants seem to flourish in a very rich soil. The gooseberry may be set and treated in the same way. Blackberries like a rich, moist soif; should be set in rows, from seven to eight feet apart; and the plants four feet apart in the row. They should be set in the spring, and trained or tied up to wire trellises. Grape vines may be set in the field or garden, eight feet apart eaeh way, and trained to wires fastened to posto running through the field. It is enough to plough the land for all the above named fruits. Manure well, except for grape vines, they are better with only litile manuring.

May. - Even the question of planting potatoes has been variously answered. How many bushels to the acre? We can remember when eight to twelve buspels were planted. We do in some cases, where the tubers are valuable, make from three to four bushels answer for an acre. We cut our potatoes up very fine, each eye by itself, ąnd then use two of the eyes to each hill. We get larger potatoes and more in a hill, and we have become fully convinced that all the potatoes, over five or six bushels, planted to the acre, are wasted, or, worse than wasted. We ask those farmers who have been in the habit of planting large quantities to the acre, just to try the experiment with a less quantity and mark the result.

Jung.-For many years we have been of opinion that the very best time to cut grass, and secure the greatest amount of nutriment, is just after the grass has bloomed, and the seed begins to form. It is not possible to secure the whole crop, when it is just at this stage of ripeness, and so every farmer who has considerable of a crop to secure should begin as soon as the grass is in bloom, and even then a portion of the crop may suffer to be cut days before it can be reached. We have known some who were called good farmers, leave their grass standing until August or September, unless it fell previously from over ripeness or decay. Now the cattle who have to eat such hay, do not relish it half as-mueh as they do that cut the last of June, or during the first week or two of July, and they cannot receive as much benefit from it.

July.-The flower garden should not be forgotten, even theugh it is a busy season. There are odd hours when the owner can pull out the weeds, or if that cannot be done, set the hired man or boy at the work. If such help is not available, let the young ladies of the household engage in the work. What more honorable employment than this? Did not our kind Father place Eve and Adam in the garden to keep it? We can hardly over estimate the value of flowers and flower gardens, especially where there are children. It seldom happens that those who cultivate flowers turn out to be bad men or women. Flowers have a softening, humanizing influence on our natures. Flowers have been given us to enjoy, and,we should make the best use of God's good gifts.

August.-It is generally better to let trees in the orchard alone after the tpring or early summer pruning, but it often happens that dwarf apple, pear and other trees in small gardens, need looking after just about as much as grape vines. When the space is limited, and the trees are planted near together, the new shoots must be pinched in after they have made a few inches of growth. If a tree is very thrifty, and it oceeupies all the space that can be allowed to it, and it is desirable to bring it into fruit bearing, then it should be subject to the same process of baving the ends of the new shorts, cut or piached off. This will especially apply to dwarf apple and pear trees. There are other methods of inducing fruitfulness, such as bending down the branches and pruning the roots.

 1Sxptember.- Plant fruit trees? Of course, what better can you do ? You have planty of land, and some of it is well adapted to the cultivation of fruit, and how can it be more profitably employed ? It may take a long time to bring an orebard into bearing, but it will last a long time. It is easier to secure a good orchard than a large fortune, and it can generally be done in less time, and yet there are those who are not willing to do the former, because it takes so long, but will work a whole lifetime to compass the latter. It takes ouly a few years comparatively to bring even standard pear trees into bearing, but even if it did some body must do the work, or the next generation would be without fruit. Now is the time to act. Money invested in an orchard will pay better than Dominion Stock.

Octobse.-It is not very likely that the dread of trichina spiralis will prevent many people from continuing to raise hogs, and therefore a few words may not be out of place in reference to this animal. One of the most important requirements in raising swine is to produce a thrifty, docile breed, and such as will fat readily, requiring but little food, and at the same time large in natural size, and early in maturity. The food of a sow when rearing a litter of pigs, should be varied,-dry corn and cold water are not sufficient. Nothing is better than slops from the house, with some milk and corn meal. It is advisable, if the sow does not liave the run of a field, to give charcoal and a little salt and sulphur every few days.

11th Month. NOVEMFBERE, 30 Days. Begins on Tuesday.

Novembrr.-To a very great extent the services of oxen, have been dispensed with in all but the more recently settled parts of Canada. Horses are in abundance, but only few mules. Now, mules for farming purposes are in most respects preferable to horses. Their power of endurence is far greater, and they will perform double the amount of labour in a given time, and live on less than one half the quantity of food required for a horse. They live on, an average, nearly three times as long as the horse, and are serviceable from three years old to thirty, while ten years service from a horse is rarely obtained. Mules are less subject to disease, and their organs of eyesight and hearing are very acute, rendering them less liable to fright.

Droember.-We think we know from experience how to keep fruit and especially apples. In a few words we say, pack the apples in clean sweet barrels, keep them after they have been picked, in a cool shady place, until there is danger of freezing ; then place them in a cellar where they can be kept as cool as possible without freezing, as dry as possible without shrivelling them, and as nearly air-tight as possible. Under such circumstances apples will keep sound a long time, but there comes a time when some varieties will require examination, and the unsound ones separated from the sound. Handle the sound ones then with care, keeping them as muoh as possible from the air, and don't bruise them in repacking.

ROBERT MILLER, Manufacturer of Bankers, Merchants, (ivt mutarer ofranker, Morchamts,

# The čayal family. 

THE QUEEN.
Viotoria, of the United Kingdom of Great Britain and Ireland, \&ce, Queen, Defender of the Faith. ## A FEW STATISTICAL FACTS AND FIGURES.

A legal stone is fourteen pounds in England, sixteen pounds in Holland. A fathom, six feet, is derived from the height of a full grown man. A hand, in horse measure, is four inches. An Irish mile, is 2,240 yards ; a Scotch mile is 1,984 ; a German, 1,806 ; A Turkish, 1,626 . An acre is 1,840 square yards, 1 foot, and $3 \frac{1}{2}$ inches, each way, A square mile, 1,760 yards each way, contains 640 acres. The human body consists of 240 bones, 9 kinds of articulations or joinings, 100 cartilages, or legamentes 400 muscles or tendons, and 100 nerves, besides blood, arteries, veins, etc. Potatoes below three feet do not vegetate; at one foot they grow quickest, and at two feet they are retarded two or three months. There are no solid rocks in the Arctic regions, owing to the severe frosts. The surface of the sea is estimated at $150,000,000$ square miles. Taking the whole surface of the globe at $190,000,000$ square miles. Its greatest depth is supposed to be equal to the height of the highest mountain, or four miles.

Bodily Exbrcise.-What a blessing it would be if many of the young women of the better classes were obliged to follow some occupation which might develope their muscles, expand their lungs and double their energy and vital force. Uur modern system is a great failure in some points ; in none more so than in considering that healthy manual labour can be neglected for generations without injury. It is not so, and it will never be so ; the race that will nut work, not with the herd only, but with the body, must decline, and will give way to races of more vigorous physique. These are no imaginary fears; they are certain consequencees ; disue leads to decay, and so wonderfully does every part of the body cohere, that disease of one part affects all. Let no one think that the mind remains untouched when the rest of the man dwindles. A few generations sees the mind also enfeebled, and, by a species of natural selection, the worn-out race disappears, and Nature revenges herself by the substitution of a bealthier stock.-Lancet.

## MEMORANDA.

Prices Current and Circulars for Great Britain, to pass as such, may not be placed in envelopes.
Photographs in Cases, within the Dommion, are liable to Parcel Post rates,
Samples or Seeds, including Cuttings, Bulbs, Roots, \&c., pass at one cent per oz within the Dominion, prepaid.
Letters containing Money or Valuable Enclosures shoûld be registered.

## MONEY ORDER DEPARTMENT ON THE UNITED KINGDOM.

The Canadian Money Order Offices draw upon all the Money Order Offices in England, Ireland, and Scotland, and the Channel Islands, for any sum up to $£ 10$ sterling, and grant as many Orders for $£ 10$ sterling each, as may be needed to make up the amount to be remitted. The terms are as under: -

## ON THE LOW ER PROVINCES.

The Canadian Money Order Offices draw upon all Money Order Offices in Prince Edward Island and Newfoundland. The Orders, like those of the United Kingdom, are made payable in sterling money, and for sums up to $£ 10$ sterling. Tne terms are:-

> For Orders up to $£ 5 \ldots . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ~$
> 50
> For Orders over $£ 5$, and up to $£ 10$.......

SAVINGS BANK DEPARTMENT.
The Postmaster-General will receive at any of the Post Office Savings Banks, deposits paid to the postmasters by persons wishing to place their money in the Government Savings Banks.
2. The direct security of the Dominion is given by the Statute for all deposits made.
8. At each Post Office Savings Bank, the Savings Bank regulations may be read by the public, giving full information with respect to the mode of depositing and withdrawing money, and these regulations are printed on the cover of the pass-book supplied to each depositor.
4. Any person may have a deposit account, and deposits will be received daily, during the ordinary hours of post office business, of any number of dollars, from $\$ 1$ up to $\$ 300$, the total amount which can be received from a depositor in any one year, except in cases to be specially authorized by the Postmaster-General.
5. The postmasters of the offices named will act as agents for the receipt of the money deposited for transmission to the Postmaster-General, and for the payment
6. Each depositor will be supplied with a pass-book, and the sums paid in, or withdrawh, will be entered therein by the postmaster receiving or paying the same. In addition, a direct receipt for each amount paid in, will be sent to the depositor from the Postmaster-Gieneral, and the Postmaster-General will issue a cheque, payable at any Post Office Savings Bank desired, for any sum withdrawn.
7. Every depositor's account will thus be kept with the Postmaster-General, and a depositor may pay into his or her account with the Post Office Savings Bank, at any of the Savings Bank Post Offices which at the time may best suit his convenience, and may exercise the same choice in drawing out morey, subject only to the obligation of producing the pass-book, in proof of identity-whenever paying in or drawing out money.
8. Interest at the rate of 4 per cent. per annum will be allowed on deposits lying in the ordinary deposit accounts, but when a depositor has $\$ 100$ deposited, he or she may request the Postmaster-General to transter this sum to a special account, and will then receive certificate of such special $\$ 100$ deposit, bearing interest at 5
per cent. per annum.
amount of any sum deposited by law to disclose the name of any depositor, or the 10. No charge will be made to withdrawn. nor for postage on communications with on paying in, or drawing out money, thereto.

THE STAMP ACTS.
These Acts impose a duty on every promissory note, draft, or bill of exchange, not than $\$ 100$, if executed sinexceeding $\$ 50,2$ cents; less than $\$ 100,8$ cents; not less duplicate, 2 cents per $\$ 100$ or fructs per $\$ 100$ or fraction thereof; if executed in than two-parts, 1 cent per $\$ 100$ or frat thereof on each part; if executed in more Any interest payable with the note ation thereof on each part.
The duty is to be paid by bill stamp, on which must be counted as part thereof notes, checks, and money orders, are exempt, for violation.

Richmond County, Richmond, 1st to 5th March, July and November.
Richmond County (2nd), Danville, 14th to 18th January, A pril and September.

Arthabaska District.-Arthabasika Circuit, Arthabaskaville, 7th to 12th February, May and October.
Drummond County, Drummondville, 20th to 24th March, June and November.

Megantic County, Invercess, 20th to 24th March, June and November.

## PROVINCE OF ONTARIO.

courts.
Court of Error and Appeal.-Judges, Hon. W. H. Draper, C.B., Chief Justice of Ontario ; Hon. P. M. Vankoughnet, Chancellor of Ontario; combined with the Judges of the Chancery, Queen's Bench, and Common Pleas Courts.

Court of Queen's Bench.-The Jurisdiction of this Court extends to all manner of actions, causes, and suits, criminal and civil, real, personal, and mixed, within Ontario. Chief Justice, Hon. W. H. Draper, O,B. Puisné Judges, Hon. John Hawkins Hagarty, D,C.L., and Hon. J. Morrison.

Court of Chanorry.-This Court has the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, co-partnerships, accounts, mortgages, awards, dower, infants, idiots, lunatics, and their estates, waste, specific performances, discovery, and to prevent multiplicity of suits, staying proceedings at law prosecuted against equity and good conscience, and may decree the issue, repeal, or avoidance of letters patent, and generally the like powers which the Court of Chancery in England possesses, to administer justice in all cases in which there is no adequate remedy at law. Chancellor, Hon. P. M. Vankoughnet, D.C.L. Vice-Chaneellors, Hon. Oliver Mowat, and Hon. John Godfrey Spragge. Master, Andrew Norton Buell.
Court of Common Pleas.-This Court has the same power and jurisdiction as a Court of Record, as the Court of Queen's Bench. Chief Justice, Hon. W. . Richards. Puisné Judges, Hon: A. Wilson, and Hon. J. Wilson.

## Heir and Diviske Court.-Commissioners, the Judges of the Superior

 Courts, and such other persons as may be appointed by e mmission under the Great Senl. These duties are to determine claims to lands in Ontario, for which no patent has issued from the Crown in favor of the proper claimants, whether as heirs, devisees or assignees. Sittings at Toronto, first Monday in January and July in each year. Clerk of Commissioners, W. B. Heward.County Courts.-Presided over by a resident Judge in éach county. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed $\$ 200$; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant to $\$ 400$; and to all bail bonds and recognizances of bail given in the County Court to any amount ; but not to cases involving the title to lands, validity of wills, or acfions for libel, slander, criminal conduct, or seduction. An appeal lies to either of the Superior Couris of Law. These Courts also possess equity powers to the amount of $\$ 200$, subject to an appeal to Chancery.

Courts of Quarter Sessions.-Chairman, the County.Judge in each county, who, with one or more Justices of the Peace, bolds a Court of Quarter Sessions in his county four times a year for trials by jury in cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction.
Insolvent Debtor's Courts.-By the "Insolvent Acts of 1864 and $1865, " 27$ and 28 Vict., chap. 57 , and 29 Vicc., chap. 18 , provision is made " for the settlement of the estates of insolvent debtors, for giving

In Province of Ontario, to all persons whether traders or non-traders. In these Courts, the County Court Judge in each county pre-sides-the only appointments made in pursuance of this statute being those of "official assignees," who are to be nominated " by the Board of Trade at any place, or the council thereof, within the county or district in which such Board of Trade exists, or in any county or district adjacent thereto in which there is no Board of Trade."

## TERMS OF THE COURTS.

Appeal Terms.-Commence on the second Thursday next after Hilary, Faster, and Michaelmas Terms.

Law Terms.-Hilary begins first Monday in February, and ends Saturday of the ensuing week; Easter begins third Monday in May, and ends Saturday of the second week thereafter; Michaelmas begins third Monday in November, and ends Saturday of the second week thereafter.

Chancrary Terms.-Examination Terms.-From first Tuesday of February to the Saturday after second Tuesday of April; and from first Tuesday of September to the Saturday after first Tuesday of November.

Hearing Terms.-From fourth Monday in April until Saturday of the following week; and from third Monday in November until Saturday of the following week.

County Court Terms.-Commence on the first Monday in January, April, July and October, and end the following Saturday.

To Preserve Wood From Fire.-A process for preserviug wood deserves a short notice, sinee it offers one or two advantages over the processes commonly adopted. These consist in impregnating the wood with either a metallic solution, as sulphate of copper or sulphate of iron, or creosote of coal tar. This last gives a disagreeable odour to the wood, and the two former more or less change the colour. In either case the process is not adapted for floorings or other woodwork that is left exposed. The new material suggested is borax. Wood to be preserved is immersed in a saturated solution of this salt, and heat is gradually applied until the solution reaches 212 deg Fahr., and it is then left for ten or twelve hours, according to the nature of the wood and the size of the planks. The wood is then to be removed from the tank, and stacked for a time, and then it is again immersed in a weaker solution of borax for about half the former time. It is then to be dried and will be ready for use. It is advisable to dry hard woods before immersion, and put them in the solution while the wood is still warm. With this process, it will be seen that no alteration of colour is produced and another recommendation is that the wood will be rendered very much less combustible. The rapidity with which a fire now spreads from floor to floor, shows the great desirability of adopting some means for at least delaying the progress of the flames. We have no donbt the use of borax, as here suggested, would effect this without adding very much to the expense of the structure. If it is desired to make the wood impermeable to water, this can be done by dissolving some shellac in the solution of borax. It would give a brownish colour to the wood, but would not be otherwise objectionable, and flooring would be rendered non-absorbent at all events to cold water.

Earth Closet System. - One of the most important inventions of 1867-68, in a sanitary and social point of view, was that of the earthcloset system, invented by the Rev. H. Moule, and for the use of which in India the Government presented him with a gratuity of $£ 500$. Its merit consists simply in the fact, that dry earth containing alumina (clayey matter) will readily absorb and deodorise human excreta that fall upon it. A most excellent manure is simultaneously produced, equal in value to guano, because all the phosphates, ammonia, \&c., are absorbed. In every respect, indeed, scientifically and socially, the invention is of the utmost value.

Economy of Water, - The intense heat of July and August, 1868, dried up most of the ponds ordinarily employed to water cattle. Were such stores of water protected by trees, a vast quantity of the liquid might be preserved in the hottest summer. In forty days an unprotected pond will lose by evaporation out of 14,000 gallons, about 9000 gallons, which are sufficient to supply a flock of sheep for that period. Willows, which grow rapidly on the edges of streams, might thus be advantageously employed by the farmer to protect his standing stores of water.

Destruotion of Insects.-Petroleum, paraffin, and other similar oils, have been largely and successfully employed as a remedy against many insects, such as bugs, \&c., that infest the household. A simple wash of the oil on the resorts of such vermin is only required.

Disease of Parasitic Origin.-Dr. Richardson, of Caynga Co., U. S., has shewn that meat, if exposed to air and moisture, quickly generates an enormous quantity of parasitio creatures, that, entering the blood of man, produce and propagate disease. According to his investigation, a few drops of human blood so affected contain more than twenty times in number the whole population of man in the world.

Effbets of thim Moon, on the Wrathbr.-From time immemorial it has been considered, popularly, that the changes of the moon affect the weather. Until very recently, however, all philosophers of the present day denied the possibility of such an influence. But in a paper read early in 1868, before the Academy of Sciences, Paris, it was shown that the moon has an influence, due to its effect on the temperature of the earth. At new moon no heat is reflected to the earth by the moon, whereas, at full moon, we receive heat-rays. Consequently, the temperature of the atmosphere, \&c., is affected, and necessarily an effect on the weather must follow.

Carbolio Acid, a Cure for Foot rot in Shebr.-Some very interesting experiments have been carried on at Vietoria, Australia, in the use of carbolic acid for the above-mamed purpose. The acid should be mixed with some greasy substance, to make it adhere to the feet; and may be applied by means of a brush. For large flocks, troughs are filled with the mixture, and the sheep made to pass through it, by means of which the feet are effectually coated. The result is said to have been very successful.

# WHIL Plilis! Wull plpilis! 

 WINDOW SIIDDES! WINDOW SIIDES!! WHOLESALE.

NEW AND ELEGANT DESIGNS, FOR 1870.

I am now making these GOODS a leading feature in my business, and have lately so perfected my arrangements with the Manufacturers in Great Britain, that my customers if they prefer it can have these orders shipped direct from the factories. The wall paper can be had either by the pieces or done up in assorted bales from 400 to 500 pieces at from $4 \frac{1}{2}$ cents to 50 cents per piece. .

## IMPORTER AND WHOLESALE

## 

MONTREAL,

## CANADIAN SCHCN L SLATES.

THE public in general, and all parties interested in

## CANADIAN MANUFAOTURES,

will please take notice, that these beautiful Slates are now being mannfactured by THE DANVILLE SCHOOL SLATE COMPANY, at GANSONVILLE, NEAR DANVILLE, PROV. QUEBEC, and are taken from a vein of Slate discovered in the Quarries now being worked by THE DANVILLE SLATE COMPANY, and which they are now offering to the public in the confident belief that, on one trial, they will be pronounced superior in touch, durability and finish, to any article heretofore produced.

A moment's trial with the pencil will demonstrate the peculiar qualities and superiority of this article over any other now known,
All orders addressed to the undersigned, who has been appointed their General Agent, wilt receive prompl attention.

ROBERT MILLER, Manufacturing Stationer, MONTREAL.

## CARTER'S

## COMBINED WRITING AND COPYING

 INK.THIS Combination Ink has been awarded the Highest Premiums over In all others in New York, Bozton, and Baltimore, and is pronounced by the most celebrated Chemists the best Ink ever offered to the public.

It is used by many of the largest Commercial Houses, Banks, Railroads, and other Corporations, and gives perfect satisfaction.
It possesses the following advantages over other Inks, viz:
First. It flows freely from the pen, and coes not thicken by exposure to the air. Second. It wht give a perfect and instantaneous copy.
Third. It will not mould.
Fourth. Being equally as gopd for Copying as for Book-keeping, it entirely does away with the use of two kinds of lnk.
FIf. It is more permanent than common Inks.
Sixth. The color, when first written, is a beantiful dark, green, but in a remarkably short time it changes to a BRILLLANT JET BLACK-not a brownish black.
Seventh. It is admirably adapted to the most delieate writing, and ALW A YS
"makes its mark."
This Ink is warranted to flow as freely as Stephens, Arnolds, or any other Writing Fluid now in use; to give as perfect a copy as any Copying Ink ; and not to mould.
