

The Observer

Published on Tuesday, by DONALD A. CAMERON, at his Office, corner of Prince William and Church Streets, over the Store of Messrs. Jardine & Co.—TERMS: 15s. per annum, half in advance.

JOB PRINTING neatly executed.

By Her Majesty's Royal Letters Patent.

DELL'S Hydro-Pneumatic Apparatus, TO ASSURE EVERY PURPOSE OF Warming & Heating.

Manufactured of various sizes and constructions as Hot Water Stoves, Carriage Warmers, Bed Warmers, Spare Bed Warming, &c. &c. &c.

A GREATER comfort or a more decided luxury can scarcely be conceived than results from the use of these Bed Warmers.

Persons returned from hot climates, experiencing all the evils of cold, will find the equable temperature afforded by this invention particularly agreeable.

The invention is already extensively patronised by the medical profession, and is being introduced into Hospitals and other public Institutions for the use of invalids.

At very reduced prices!!!

The subscriber offers for Sale at the VICTORIA BOOK STORE, HIS WHOLE STOCK OF BOOKS AND STATIONERY.

COMPRISING a large collection of Standard and Miscellaneous Works; Superior and Wove Writing Papers; Pocket Books, Card Cases, Albums, Drawing Pencils, Quills, Steel Pens, Wafers, Wax Office Tapes, Parchment, Ink and Ink Powders, Stationery Boxes, Memorandum Books, Blot Books, Picture Frames, Drawing Paper, Artists' Materials; Felt and Knives' Pronouncing Dictionary, the Tutor's Assistant, with Law, with Key; Universal Spelling Book, new edition, 1846; British Prayers, Mother's Catechism, Gray's Arithmetic, Pogo's Geography, &c. &c.

School Books, The latest and best editions, such as are in general use throughout the Provinces—Primer, Spelling Books, Class Books, Readers, Grammars, Dictionaries, Geographies, Catechisms, Arithmetics, Classical Works, &c.

MAPS OF THE BRITISH PROVINCES IN NORTH AMERICA: PLANS OF THE CITY AND HARBOUR; MODERN GEOGRAPHY, designed for use in Schools throughout the British Colonies, by James PATTERSON, LL. D., Principal of the Grammar School, St. John, New-Brunswick.

Books of Universal Utility! Sears' Popular Pictorial Works.

BIBLE HISTORY, (2 vols. in 1), 700 pages. Sunday Book, 392 pages; Bible Biography, 500 pages; Bible of England, Scotland, Ireland, Wales, &c. 600 pages; Information for the People, 550 pages; American Review, 500 pages; Family Library, 550 pages; Wonders of the World, 600 pages; Scenes and Sketches in Continental Europe, 550 pages; Monthly Magazine—illustrated.

These works are all splendidly illustrated; and some of them are magnificently bound in coloured Morocco and Gill, got up in the best English Annual style.

Mail Robbery!

THE undermentioned are the numbers of some of the Notes contained in Money Letters abstracted from the Mails in April and May last—Any person having any of the same in his possession, or who can give any information respecting them, is requested to communicate with the Deputy Postmaster General, Saint John, or with the nearest Postmaster.

Table with 3 columns: Note number, Amount, and Location. Includes entries like '1 Note, Montreal Bank, No. 132 A, 212 10'.

General Post Office, St. John, 24th Sept. 1847. 4i.

JAMES MACFARLANE, MARKET-SQUARE,

25 HIDS. BRIGHT SUGAR, 50 puncheons Prime Cuba Muscovado MOLASSES, 100 Chests T. E. A. S.—comprising Congo, Fine Congo, Company's Souchong, Oolong Souchong, Pekoe, and Hyson, 6 Hids. Refined SUGARS.—Loaf, Crushed, & Crushed Loaf.

NEW FALL GOODS.

Rec'd. at the "LIVERPOOL HOUSE," Prince W. Street, per the "Lion," from Glasgow: WOOLLEN and Worsted Fancy CLOAKING and WIGGERS CLOTHS, Fancy VESTINGS, Plain and Fancy SHAWLS, Ladies' Scarf, Muslin Collars, and Linen Collars & Cuffs, Twined Regatta, Gauze, Venetian Blinds, &c.

Vinegar, Salserratus, &c.

Now landing, per Gannade, from New York: 100 BBL. SALSERRATUS, 100 BBL. HAVANA REGINA—choice brands, 30 boxes Superior Cheung TOBACCO, 40 chests CONGO TEA, will be sold very low, by FLEWELLING & READING, Oct. 12. No. 10, King-street.

ROBB'S OATMEAL.

THE subscriber has appointed Messrs. JAR-DINE & CO. Sole Agents for the disposal of his OATMEAL, at whose establishment a supply of Fresh Grain can always be had. Durdere, June, 1847. JOHN ROBB.

IRON.

Landing This Day ex ship Edinburgh: 200 BUNDLES best Staffordshire SHEET IRON, Nos. 20 to 24, assorted; 750 Bars Double Refined bar IRON, ass'd sizes. And daily expect ex Lion, from the Clyde: 50 Tons No. 1 Gartshore PIG IRON.—For sale low by (Sept. 7.) WM. CALVILL.

Brooms & Blacking.

For Favourite from St. Andrew's: 100 DOZEN Superior BROOMS (Sime's Domestic), 25 Dozen Paste BLACKING. For sale by Oct. 5. (Her 3.) H. G. KINNEAR.

Genoa silk Vests.

BLACK, Brown and Fancy stone colours, Blue Black, and Fancy Floured ditto; Ditto Fancy Plaid Stripes and Checks, far superior to English in appearance and durability, made to measure at the shortest notice. Pantaloons, Sept. 21.

Children's and Infants' SOCKS, &c.

For Fall and Winter. THE Subscriber has just opened—500 Dozen of Children's and Infants' SOCKS, comprising every variety that may be required. Oct. 12. S. K. FOSTER.

Per Brig LION.

THE Subscriber has received by the above vessel from the Clyde—1000 Cases CANVAS, consisting of Brown, Beached, and Tarpaulin, from No. 1 to 6. For sale low by Oct. 12. JOHN WALKER.

Brandy, Gin, and Wine.

Ex the brig Lion, Mackerzie, master, from Glasgow, now landing for the subscriber—40 CASES Old Cognac BRANDY—Hennessy and Martell brands; 40 Hds. Pale Holland GENEVA, 6 Hds. and 6 Qr. Casks superior OLD PORT WINE. For sale low by JOHN V. THURGAR, 5th October. North M. Walford.

MOLASSES.—The Subscriber offers for Sale at the lowest Market rates—30 puncheons superior Retailing MOLASSES. August 31. JOHN WALKER.

HOLLAND GIN.

20 HDS. Pale Holland GENEVA, ex ship Lennox, from London, for Oct. 5. WM. E. MOORE.

FLOUR, FLOUR.

200 BARRELS Superior FLOUR, 100 do. Fine ditto, 50 Ditto Fine Middlings ditto. GEO. THOMAS, South Market Wharf, Sept. 28.

Genesee FLOUR.

Leading ex Gannade, from New York—123 B. FLOUR.—For sale by Oct. 19. JARDINE & CO.

The Garland.

AUTUMN.

Sweet Sabbath of the year! While evening lights decay, Thy parting steps methinks I hear Steal from the world away.

Amid thy silent bowers 'Tis sad, but sweet, to dwell, Where falling leaves and drooping flowers Around me breathe farewell.

Along thy sunset skies Thy glories melt in fade, And like the things we fondly prize, Seen lovelier as they fade.

A deep and crimson streak Thy dying leaves disclose; As on Conquest's western cheek, 'Mid ruin, blooms the rose.

Thy scene each vision brings Of beauty in decay; Of fair and early faded things, Too exquisite to stay!

Of joys that come no more; Of flowers whose bloom is fled; Of farewells, wept upon the shore; Of friends, estranged or dead!

Of all that now may seem, To Memory's tearful eye, The vanished beauty of a dream, Or which we gaze and sigh.

Miscellaneous.

GREAT PROVINCIAL AGRICULTURAL EXHIBITION, At Hamilton, Canada West.

The Hamilton Spectator contains a very copious account of the visit of His Excellency the Governor General, with the Countess of Elgin and suite, to that city, on the occasion of the great Provincial Agricultural Exhibition. The weather was unpropitious, and the concourse of visitors great, but the exhibition was not less successful.

TO THE CITY OF HAMILTON.

GENTLEMEN,—I receive, with much satisfaction, your congratulations on my arrival at Hamilton, and the assurance which you offer that you are disposed to place confidence in my administration of the government of the Province.

I agree with you in thinking that the establishment of an Association for encouragement of agriculture, Manufactures, and the Arts, is likely to be of great service to the Province. It gives me sincere pleasure to extend to it such support and countenance as it is in my power to afford, and I am glad to be able to time my visit to this quarter, so as to be present at this interesting meeting of the Provincial Agricultural Association.

I am well aware of the attachment to British industry, and to the mother country, by which the Men of Gore have been at all times characterized; and I am glad to perceive in the reference to recent changes in the Commercial policy of Great Britain, which your address contains, an indication of that spirit which is so ready to sell out, and which has enabled them within the space of a few years to turn this District from a wilderness into a garden, and Hamilton from a barren shore into a thriving export town.

TO THE MECHANIC'S INSTITUTE.

GENTLEMEN,—It gives me sincere satisfaction to find on my arrival here that the Exhibition of the Provincial Agricultural Association is not confined to the products of Agriculture, but that it comprises also specimens of native talent in the Arts and Manufactures. It is gratifying to see the sister arts walking together in harmony and conspiring to develop the resources of this young and interesting country.

I thank you for the kind sentiments which you express towards the Countess of Elgin and myself, and I accept with pleasure the office of Patron of the Mechanics' Institute of Hamilton.

After this, presentations took place, and the Exhibition was visited. In the evening there was a grand dinner in a temporary pavilion, to which it is stated one thousand persons sat down, not without some confusion in taking their places.

The clear was taken by Mr. G. W. Thompson, supported on his right by His Excellency, Sir Allan McNab and Major Campbell, and on his left by Chief Justice Robinson, Lord Russell and Mr. Selkirk General Cameron. Precisely at six o'clock His Excellency the Governor General made his appearance, and was received by the vast crowd, upstanding, with the most enthusiastic welcome. A few minutes after seven o'clock Lady Elgin arrived, accompanied by Lady Allan, Mrs. W. H. Boulton, Mrs. McNab, of Dundurn, and a number of ladies. On entering the room the company received her Ladyship in their noble count. Cheers upon cheer followed, in quick succession, until the company finally appeared to desist from sheer exhaustion.

After the ordinary loyal toasts, the health of the Earl of Elgin was given, to which His Excellency responded in the following terms:—His Excellency remarked that he had most sincerely thanked the gentlemen present at this great meeting for the cordial welcome he had received; that his enthusiastic cheering was a warm response from his own heart. From the day that day, he had intimated to him that an Association of this description existed, and that its annual exhibition took place to-day, he was determined that no ordinary circumstances should prevent his being present. He had continued cheering. He expected to be interested and gratified, and he cordially assured the company that he had not in any respect been disappointed. The one matter for regret was that the extremely unfavourable weather, for although Agriculturists liked to see showers when the earth required them, yet he thought he could answer for them on a show day they preferred clear weather. He was truly gratified at the exhibition, the implements, and the specimens of art and manufacture. In truth he expected to see great improvements, but was not at all prepared for the perfection which met his sight. The horses and cattle were remarkably good, and so also were the sheep. He was glad to find that the objects of the Association were not confined to agriculture alone. The arts and manufactures received due attention, and, indeed, went hand in hand together. He must con-

LABOUR AND BEAUTY.

At a meeting of the members of the Sheffield Athlete Club, late Lord Forrester made the following happy application of the marriage of Vulcan and Venus.—Those of you who have the opportunity of consulting the old legends and classical mythology are aware that among the fancied deities with which they peopled the world one more especially was regarded as the god of labour and of handicraft, Vulcan by name, who was always represented as employed in huge anvils and workbenches, hammering at heavy anvils, blowing huge bellows, heating vast furnaces, and begrimed with soot and dirt. Well, ladies and gentlemen, for this hard-working and swarthy-looking divinity they wish to pick out a wife, (Lord laughed.) And they did not select for him a mere drab—a person taken from the scullery or kitchen-dresser—but, they chose for him Venus, the goddess of love and beauty. Now, ladies and gentlemen, pick out for me the moral of this tale, for I believe that nothing ever was invented—certainly nothing by the polished and brilliant imagination of the Grecian intellect—which has not its meaning and its moral. What is the special meaning of the marriage of Vulcan with Venus—the hard-working artisan with his laughter-loving queen—of labour with beauty? What is it, ladies and gentlemen, but this, that even in a busy hive of industry and toil like this—even here, upon a spot which, in many respects, no inapt representation of the fabled workshop of Vulcan—even here, amid the clang of anvils, the noise of furnaces, and the spitting of sparks, and the creation of monstrous and sooty blackness, the mind—the untrammelled mind—may go forth, may pierce the dim atmosphere which is poised around us, may wing its way to the freer air of purer light which are beyond, and may ally itself with all that is most fair, gentle, and lovely in creation. (Applause.) So, gentlemen, I say your labour, your downright, hard, swarthy labour, may make itself the companion, the helpmate, and the husband of a most personal beauty I dare say, and have reason to believe, from the inspection which I am able even now to command—and I have no doubt a more intimate acquaintance with your wives, sisters, and daughters, would enable me to prove that I was not wrong in my illustration. But above this beauty, I say your labour may ally itself with intellectual beauty—the beauty connected with the play of fancy, with the achievements of art, and the creations of genius—beauty such as painting fixes upon the glowing canvases—such as sculpture embodies in the breathing marble—such as architecture develops in her stately and harmonious proportions—such as music forms upon the strings of the scintillating harp, and in the perception and cultivation of the beautiful in these departments that your schools of design, your concerts, and many of the lectures which you hear of art and science, and your own studies, may be made as agreeably subservient; and I strongly advise you, and I advise the members of this Mechanics' Institute, and I strongly advise its well-wishers and promoters, to show a discriminating and generous support of these tasteful and harmonious pursuits. Above all, I advise you to cultivate a love of reading, which makes you, in itself, almost independent of any other aids and appliances, and puts with very moderate aid, the superiority of the arts of language and literature, and the domain of philosophy, history and poetry, within your individual command. (Applause.) Why, gentlemen, a man is almost above the world who possesses two books. I do not mean the manual, which I am about to comment upon upon the same level—far from it; nor am I wishing to intimate to you that two books are sufficient for your study and perusal. (Hear, hear.) I am only mentioning them as representatives of the noble and useful, though different in kind, I say that a man may almost be said to be above the world who possesses his Bible and his Shakespeare—(applause)—his Shakespeare for his leisure, his Bible for all times.

THE FIRST FORGER.

The day on which a forged note was first presented at the Bank of England forms a memorable era in its history.—For sixty-four years the establishment had circulated its notes with freedom, and during that period no attempt had been made to imitate it. He who takes the initiative in a new line of wrong doing has more than the simple act to answer for; and to Richard William Vandeman, a Staffordshire draper, belongs the melancholy celebrity of having led the van in this new phase of crime, in the year 1783. The records of his life do not show want, beggary, or starvation urging him, but a simple desire to see greater than he was. By one of the artists employed, and there were several engaged on different parts of the notes, the discovery was made. The criminal had filled up to the number of twenty, and deposited them in the hands of a young lady to whom he was attached, as a proof of his wealth. There is no calculating how much longer bank notes might have been free from imitation, had this man not shown with what ease they might be counterfeited.—[Francis's History of the Bank of England.]

REMARKABLE SPEECH OF THE EARL OF CARLISLE.

In a debate about Lord Forrester, Earl of Carlisle, in the House of Commons, you never spoke in the House before, being heated with wine, and excited to display his abilities by the Duke of Buckingham, delivered himself thus.—My Lords, I understand but little of Latin, but I understand English, and not a little of the English History; from which I have learned the machivels of such kind of prosecutions as these, and the ill fate of the prosecutors. I could bring many instances to your notice, but I shall not go further back than the latter end of Queen Elizabeth's reign, at which time the Earl of Essex was run down by Sir Walter Raleigh, and your Lordships know what became of Sir Walter Raleigh. My Lord Bacon, who ran down Buckingham, Sir Thomas Wentworth, afterwards Earl of Strafford, he ran down the Duke of Buckingham, and you all know what became of him. Sir Harry Vane, he ran down the Earl of Shaftesbury, and you all know what became of Sir Harry Vane, and your Lordships know what became of the Chancellor. Sir Thomas Osborne, now Earl of Danby, ran down the Earl of Shaftesbury, and you all know what became of Sir Thomas Osborne, now Earl of Danby, and you all know what became of the Duke of Devonshire, who ran down the Duke of Devonshire, and you all know what became of the Duke of Devonshire. A sweet temper has a soothing influence over the minds of a whole family. Where it is found in the wife and mother, you observe kindness and love predominating over the natural feeling of a bad heart. Smiles, kind words, and looks characterize the children, and peace and love have their dwelling there. Study, then, to acquire and retain a sweet temper. It is more valuable than gold; it captivates more than beauty; and the close of life retains all its freshness and power.

THE ADVANTAGE OF SICKNESS.

One good thing of sickness, that it is the best cure in the world for ambition, and designs upon the world, or fortune; it makes a man pretty indifferent for the future, provided he can but be easy, by intervals, for the present.—Pogander's Literary Extracts.

THE SILENT WORM.

It is scarcely possible to comprehend the nature of silk production without some knowledge of the natural history of the insect by which it is produced. This may, however, be stated in a few words. Silk worms include several varieties of the same genus phalaena, and like all the rest included in this division, are subject to certain metamorphoses or changes, which constitute the wonders of insect life. The animal appears first as an egg, which is hatched, without any process of incubation, by the warmth of spring, when it comes forth as a caterpillar. In the course of its growth it usually casts its skin four times, but there is a variety, chiefly, if not exclusively, confined to Italy, which undergoes this change but three times. Previous to each moulting of the skin, the worm refuses its food, and appears in a very sickly condition, so as to require care and nursing on the part of its attendants. At the end of from twenty-five to thirty days the animal is found to have attained the full maturity of its growth; but we have not been able to procure any definite information as to the circumstances by which such development is accelerated or retarded. Too rapid growth is, however, said to be of less consequence than retarded development, both causing loss of animal produced, but the former gives the more glossy and tenacious silk. When the worm has attained its full growth it ceases to eat for the rest of its life, and enters upon its final moulting, which is a state of torpor its transformation into the shape of a butterfly. At the end of from fifteen to twenty days it gnaws through its cocoon, and comes again into the world as a fly, provided with wings, antennae, and feet, and baptised by the ancients with the name of bombyx mori, or "fly of the mulberry-tree." The male and the female than go together for a couple of months, at the end of which time the female lays her eggs. Provision having thus been made for the perpetuation of the species, the bombyces have fulfilled the purposes of their existence, and die about the middle or end of autumn. Such is the life of the bombyx mori in France and Italy; but we cannot tell how they differ from its conditions of existence in its native China.—Dr. Cooke Taylor in the Art Union.

THE CLYDE.—"The Queen of Rivers!"

The proud title is well bestowed. Comparisons are proverbially odious, or we would assert the relative superiority of a sail up the Clyde over all other similar experiments. In natural beauty alone the winding panorama cannot be surpassed; and the countless ships, wafted by the winds or impelled by steam in their desperate, that through the waters, form one of the noblest pictures that can please the eye or fill the mind. The stately and majestic steamers of the Clyde—all of which, inward or outward bound, touch at the busy wharves of Greenock, the birthplace of the immortal Watt—form the best monument of him who may be called the inventor of the steam-engine. But the fact that most impresses us, as we sail from the great estuary of the Clyde to the quay at Glasgow, is the indomitable superiority of a sail up the Clyde over all other similar experiments. In natural beauty alone the winding panorama cannot be surpassed; and the countless ships, wafted by the winds or impelled by steam in their desperate, that through the waters, form one of the noblest pictures that can please the eye or fill the mind. The Observer.

SAINT JOHN, NOVEMBER 2, 1847.

ANOTHER FRENCH STEAMER PUT INTO HALIFAX... The French Packet Steamer Philadelphia...

WEATHER.—The latter part of October was cold and frosty; but November has made its debut in the most splendid style...

WE learn that the Lecture Series of the Mechanics' Institute commenced, on Monday evening, 15th instant...

ANOTHER ILLNESS OF PAPER EMPLOYEES.—The ship Zulus, Capt. Russell, arrived at this harbour yesterday, having on board 120 men...

WE are informed that there is now in town from Manchester a deputation of six of the principal manufacturers...

MORE FAILURES.—The excitement caused yesterday by the alleged failure of most of the banks increased by two additional failures...

The firm of Cumming and Ferguson, publishers and wholesale booksellers, on Ormond-quay, have failed...

The Liverpool Times states.—We are happy to say that there are no more failures in Liverpool since our last...

Grain and Bread stuffs are slightly advanced. American flour is quoted at 2s. a 28lb. barrel.

The eldest son of Sir Howard Douglas died at Umballa on the 29th of July.

The Emperor of Austria has recently issued a decree evoking the Diet of Hungary for the 7th November next...

In Spain a new ministry had been formed, with Narvaez as the head and Caceres as the chief.

A Paris merchant has received a letter from America announcing that a large English firm there has suspended its payments...

The Archbishop of Paris has addressed a pastoral letter to his clergy, calling them to offer up thanksgivings for the abundant harvest of the year.

It is stated that a bill will be introduced into Parliament to enable her Majesty to appoint "Courts of honour" to which questions are to be referred at present by the Admiralty.

Several of the insurance companies have recently introduced a by-law prohibiting parties insuring to have more than a gross of lucifer matches in their houses.

Our Order, the "Old Fellows' Chronicle" states, boasts of possessing nearly three quarters of a million—a sum that many a kingdom cannot command...

The library of the late Right Rev. Dr. Murphy, Roman Catholic Bishop of Cork, has been valued by a competent judge from London, at £25,000.

London, Oct. 8.—The money market may be said to have improved in tone and character to-day, although not to the extent of yesterday's result.

A letter, such as has seldom been seen in Europe, was brought over by the Cambria from Halifax, Nova-Scotia. It weighed no less than 26 pounds.

The line of Telegraph is now complete from Quebec to London, C. W., a distance of 710 miles.

We publish to-day an official notice from the Post Office Department, announcing that on the 16th of November, no Letters or Newspapers from the United States...

We have also learned that at the recent meeting in Montreal of Delegates from Canada, Nova Scotia and New Brunswick, upon Postage affairs...

UNION STEAMER CHURCH.—At a very numerous meeting of the Pewholders and Communicants connected with this Church, on Wednesday evening, October 27, 1847...

Moved by Mr. Perley, seconded by Mr. Barlow, Resolved.—That this meeting, consisting of the Church and Congregation worshipping in Union-street, and duly convened by public notice from the Pastor, having heard more than one statement from the Rev. J. C. Galloway, A. M. of the reasons which lead him to the conclusion that it was his duty to leave St. John as early as possible...

His Excellency the Lieutenant Governor, accompanied by Alfred Rendle, Esq., Private Secretary, arrived in town from Fredericton last evening, and we learn will remain in the city a few days.

The Financial Reporter of Friday last says.—"It is currently reported in Town to-day, that Sir William Colebrooke is promoted to the Government of a Colony in the West Indies, and that a new Governor, the person of Sir James Macdonald, is now on his way to this Colony."

WE learn that the Lecture Series of the Mechanics' Institute commenced, on Monday evening, 15th instant, when Mr. H. Perley, Esq. delivered the introductory address.

ANOTHER ILLNESS OF PAPER EMPLOYEES.—The ship Zulus, Capt. Russell, arrived at this harbour yesterday, having on board 120 men...

WE are informed that there is now in town from Manchester a deputation of six of the principal manufacturers, upon urgent matters which tend to agitate the present crisis.

MORE FAILURES.—The excitement caused yesterday by the alleged failure of most of the banks increased by two additional failures...

The firm of Cumming and Ferguson, publishers and wholesale booksellers, on Ormond-quay, have failed, and this has created a strong feeling of sympathy for both parties.

The Liverpool Times states.—We are happy to say that there are no more failures in Liverpool since our last, nor in London either, but business continues necessarily dull...

Grain and Bread stuffs are slightly advanced. American flour is quoted at 2s. a 28lb. barrel.

The eldest son of Sir Howard Douglas died at Umballa on the 29th of July.

The Emperor of Austria has recently issued a decree evoking the Diet of Hungary for the 7th November next, in order to effect the election of a new Palatine and other important business.

In Spain a new ministry had been formed, with Narvaez as the head and Caceres as the chief.

A Paris merchant has received a letter from America announcing that a large English firm there has suspended its payments, with liabilities to the amount of £50,000.

The Archbishop of Paris has addressed a pastoral letter to his clergy, calling them to offer up thanksgivings for the abundant harvest of the year.

It is stated that a bill will be introduced into Parliament to enable her Majesty to appoint "Courts of honour" to which questions are to be referred at present by the Admiralty.

Several of the insurance companies have recently introduced a by-law prohibiting parties insuring to have more than a gross of lucifer matches in their houses.

Our Order, the "Old Fellows' Chronicle" states, boasts of possessing nearly three quarters of a million—a sum that many a kingdom cannot command...

The library of the late Right Rev. Dr. Murphy, Roman Catholic Bishop of Cork, has been valued by a competent judge from London, at £25,000.

We publish to-day an official notice from the Post Office Department, announcing that on the 16th of November, no Letters or Newspapers from the United States...

We have also learned that at the recent meeting in Montreal of Delegates from Canada, Nova Scotia and New Brunswick, upon Postage affairs...

UNION STEAMER CHURCH.—At a very numerous meeting of the Pewholders and Communicants connected with this Church, on Wednesday evening, October 27, 1847...

Moved by Mr. Perley, seconded by Mr. Barlow, Resolved.—That this meeting, consisting of the Church and Congregation worshipping in Union-street, and duly convened by public notice from the Pastor, having heard more than one statement from the Rev. J. C. Galloway, A. M. of the reasons which lead him to the conclusion that it was his duty to leave St. John as early as possible...

At a meeting of the Directors of the St. Andrews and Quebec Railway on the 26th ult., after reading a report from Mr. Laurie, the Company's engineer, it was decided that the formation of the railroad should be at the East side of the town of St. Andrews, near Light House Point, and it was agreed upon that the work should be commenced in about 160 days, and the grading of the first four miles to be immediately proceeded with.

which his services have hitherto been performed, commencing affectionately his grateful recognition of the Almighty, with the earnest hope that the Divine goodness may so guide his way that he may be enabled to return and resume the oversight of this our dear and happy country...

Moved by Mr. Keas, seconded by Mr. G. V. Nowlin.—Resolved.—That this meeting have heard the verbal proposal of the Colonial Society, and being aware that it is the intention of their Pastor, personally to solicit pecuniary aid in England towards the liquidation of the debt which still remains due to the Society, they do hereby make the most strenuous exertions to effect an early and desirable settlement of the pecuniary affairs of the Church, and, as a first step towards the object, do appoint Messrs. Smith, J. M. Hill, Barlow, Sulley, Esq., G. V. Nowlin, Perley, Crowder, A. M. Hill, and G. V. Nowlin, with power to add to their number, to act as a Finance Committee for the time being, whose powers shall be as follows:—

1.—To ascertain the amount which will be due on the 1st November next for Pew Rents.

2.—To ascertain the amount still due on the Special Subscription entered upon in 1846.

3.—To report the result of their investigations, with all other matters affecting the finances of this Church, at a meeting to be hereafter held.

Moved by Mr. E. Sanction, seconded by Mr. A. M. Hill.—Resolved.—That this meeting having heard that very efficient and seasonable arrangements have been made for the regular supplying of the pulpit and the discharge of other Ministerial duties in connection with this place of worship, begs to tender to the Reverend Charles Mackay, lately of St. Andrews, Canada East, and formerly of Glasgow, every expression of cordial welcome; and hopes in every way in its power to render his temporary sojourn during the absence of the Pastor, agreeable and conducive to the great end of ministerial instruction. And further,—that this meeting cheerfully leaves to the Communicants to tender the usual invitation, and to make other necessary arrangements.

ORDINATION OF THREE WESTERN MINISTERS.—On Wednesday evening last, three of the Junior Western Ministers of the New Brunswick District, the Rev. Messrs. Allison, and Lockhart, were solemnly set apart for the work of the Ministry, in the Wesleyan Church of this City, by the Rev. R. C. Knight, Chairman of the District, assisted by the Rev. Messrs. Busby, Daniel, and Smith. The service, which throughout was deeply impressive, commenced with singing and prayer by the Rev. Mr. Smith, who presented a printed Ordination, and then delivered a sermon, in which he called upon the Rev. Ministers, to ten years' Christian experience and call to the Ministry, which they did in a most satisfactory manner...

Throughout the whole, the Candidates appeared deeply affected; and it may well be presumed, that the solemn services of the occasion, will have been forgotten.—Fredericton Reporter, Oct. 23.

WESTMINSTER ANNUAL CATTLE SHOW AND FAIR.—On Wednesday, the 20th October, the Members of the Westminster Agricultural and Emigrant Society held their annual Cattle Show and Ploughing Match. The day proved fine and pleasant, and the exhibition was very creditable to the County.

The Show of Cattle of every description elicited the approbation of all, and fully compensated the Society for the money it has appropriated to the purchase of several choice specimens of the most approved breeds.

There were numerous samples of prime Westmorland Butcher, in awarding the premiums for the best specimens of the several classes, which were highly creditable to the County.

The Society having offered premiums for the best specimens of the several classes, in which the fair sex had exerted their skill and handwork, in such a manner as to command the admiration of the fair sex, and to excite the interest of the public, the unsuccessful were highly deserving of them, so superior were all the specimens exhibited. It is expected that our Representatives will appear in their places in Provincial Parliament, dressed in the following order:—

Best pair working Oxen, Ralph Siddall, 21 0 0

Best pair young Oxen, John Oulton, 10 0 0

Best pair young Cows, T. C. Keffer, 10 0 0

Best pair young Heifers, Wm. Brownell, 10 0 0

Best pair young Bulls, Wm. Brownell, 10 0 0

Best pair young Steers, Wm. Brownell, 10 0 0

Best pair young Calves, Wm. Brownell, 10 0 0

Best pair young Lambs, Wm. Brownell, 10 0 0

Best pair young Kids, Wm. Brownell, 10 0 0

Best pair young Goats, Wm. Brownell, 10 0 0

Best pair young Pigs, Wm. Brownell, 10 0 0

Best pair young Chickens, Wm. Brownell, 10 0 0

Best pair young Ducks, Wm. Brownell, 10 0 0

Best pair young Geese, Wm. Brownell, 10 0 0

Best pair young Turkeys, Wm. Brownell, 10 0 0

New Vessel.—Towed into this harbour on Saturday last, a beautiful new ship of 820 tons, named the Chancellor, built at the Oronecto, by Mr. Scouler, Esq. for Mr. John Mackay, of this City. She is constructed entirely of larch, well and fully put together, and in the opinion of nautical men is one of the best and most substantial vessels ever built in this Province. The C. will be commanded by Capt. Dudgeon.—New-Bris.

MUTUAL INSURANCE COMPANY.—Mr. Charles Adams has been chosen President of this Association, in place of H. Jarvis, Esq., resigned.

MELODIOUS ACCIDENT.—An accident of the most melancholy nature occurred about eleven o'clock this morning. Several of the young men of the town being devious, as is the practice here, to give Mr. Duncan, who was a passenger on board the Clerendon, a Salute as she passed the town, had assembled for that purpose, and discharged a gun four times; but as Mr. Henry Smith was running home the charge for another shot, the gun went off. It was carried a considerable distance—his right arm was broken, the right leg so dreadfully shattered, that it was immediately amputated, several fingers on his hand were severely injured, his forehead was much cut, and other parts of his body much injured. Dr. Key was very fortunate in his arrival on the ground at the time of the accident.—Miramichi Gazette, Oct. 30.

QUEBEC, Oct. 22.—At day light this morning the ground was whitened with snow. Thermometer 35°. Wind east. The falling snow at noon is mixed with rain.

MONTEAL, Oct. 18.—It is our sad duty to-day to announce the illness of BRADY PRICE, (R. C.) the venerable pastor, who has been severely injured by the Hotel-Dieu, since which his disorder has presented symptoms of a very unfavorable description. On Wednesday at noon he was in considerable danger, and the last Sacraments were administered to him. At this present moment, when going to press, the danger is not diminished in the slightest degree. Besides typhus fever, there is great fear of an inflammation of the bowels taking place, and even of a palsy.—Montreal Religieuse.

John Jeffrey, Esq., who has recently retired from his situation as Agent of the Bank of British North America in this Province, has been invited by the merchants of this city with a very flattering and expressive of the satisfaction they have felt in their intercourse with him in the business connected with the Bank; and to mark more highly their regard for Mr. Jeffrey, they have retained £150 to Isaac Buchanan, Esq., Glasgow, to be expended in the purchase of a piece of plate, suitably engraved—the time of Mr. Jeffrey's stay here, and the names of the persons who have been invited to the dinner, and the names of the persons who have been invited to the dinner, and the names of the persons who have been invited to the dinner.

A correspondent of the Montreal Pilot, writing from Belfast (Ireland), under date Oct. 2nd, gives the following illustration of over-trading in the linen trade with very limited means. He writes that he had bought land property to the amount of £70,000. The Stowe agricultural meeting, Mr. Brown received £5 for a prize bull, and Joseph Battenby £1 for 32 years' service with Mr. J. Battenby. The bull was not three years old, and the man's age is not stated.

There are now but two survivors of the twenty-six Marshals of the Empire created by Napoleon; Soulé, Duke of Dalmatia, and Marmont, Duke of Ragusa.

Ten Sisters of Charity of Cambay, says "Galvani," are on the point of taking their departure for China. So zealous are the sisters to participate in this good work that the superiors of the order are obliged to make selection from the great number of those who offer themselves.

ROME WITHIN THE WALLS.—Modern Rome occupies but a small portion of the original city; it may be said, with truth, that the city which touches the Tiber; but in some other points it has approached nearer to it than do the intervening space being mostly filled with vineyards and villas of the Roman nobles, which generally have ample grounds and gardens attached.

Death of Mr. Wentworth.—We learn that our neighbour Mr. James Wentworth, of the firm of Dutton & Wentworth, publishers of the Transcript, died at his residence in High street, yesterday, of a fever, which he had contracted in consequence of some weeks with a disease—enlargement of the heart—from which it was feared that he would never recover. He leaves an unblemished reputation, and his family acquiring talents, most of his friends are highly regretted the loss of a friend, and a most worthy and useful citizen.

On the 2nd ult. 56 vessels cleared at the Boston Custom house—the largest number ever cleared out in one day.

The Head of St. Orleans, at latest dates is improving, and the fever has almost ceased to be an epidemic.

EXTENSIVE ROBBERY.—On Saturday evening the watch and jewelry store of Messrs Olmstead & Son, New Haven, was broken into, and about \$3000 worth of goods were stolen.

Rise of a Manufacturing Town.—Sixty years ago Huddersfield, now the centre of the fancy manufacturing trade, was a miserable village, consisting of a few cottages and a few scattered houses, which were poor and scattered, the streets narrow, crooked, and dirty—the people ignorant, and wild in their manners, almost to savagery. Around them stretched the low mountains, unencumbered by the plough or the spade, and the sides of the noble hills were covered with sly moss, brambles, and very creepers, or coloured in the appointed season with the golden gorse and the purple heather. And how slow was to be the intervening period! Already in this wild people were deposited the seeds of a glorious manufacturing and historical unfolding. Sixty years have changed the face of this vast district. For during that time heads and hands have been at work, conquering the wild dominion of nature, and making all her elements serve them. This the river has been converted into artificial levees, and the waters arrested in their course by weirs and compelled to turn the wheels of the hundreds of factories which are built upon the river banks. The savage mountains have been cultivated and parcelled into corn fields fit for pasture. The hills, in many cases, have even to their summits, with rich herbage; and from the wildest glens and ravines rise the chimneys of power factories, sending their black smoke through the green foliage of the trees, every one of them the centre of a little working community. Thus, Huddersfield has grown into an important town; and, what is more, she has fostered other towns and villages in her immediate neighborhood, and made them also important; so that, within six miles of her, there are some hundred and thirty thousand souls engaged in manufactures, and the commerce to which these manufactures give birth.—Bradford Observer.

Jenny Lind's NEPTUNUS.—It is reported that Jenny Lind will bestow her hand on the Rev. Mr. Grotty of Burnham Beches, near Slough.—Kent Herald.

There is no truth that Jenny Lind is to be married to a clergyman at Slough. It is well known that she is to be united to a gentleman in our neighbourhood.—Dover paper.

Some of the journals have selected a husband for Jenny Lind; but we can assure our readers that the foreign gentleman has accepted an offer from a wealthy gentleman, the owner of the ironworks in our neighbourhood.—Birmingham paper.

All our contemporaries are the speculator in matters with respect to the ironworks in our neighbourhood, which they have not early come. Jenny Lind is neither to be married to a clergyman nor to a wealthy Birmingham iron-master. She has accepted an offer from a gentleman in our neighbourhood, which they have not early come. Jenny Lind is neither to be married to a clergyman nor to a wealthy Birmingham iron-master. She has accepted an offer from a gentleman in our neighbourhood, which they have not early come.

DR. WISTAR AT THE SOUTH.—Do not be deceived with vain hopes—do not flatter yourself that you will be cured by any medicine, if you are not cured by the Consumption or Liver Complaint, if you would be restored to health you must use the means which have been discovered by the late Dr. Wistar, and which have been proved to be the most successful remedy for Consumption and all chronic diseases, it now cures in every city and important town in the country, and at a price, too, than any cure could be afforded by any other means, therefore, for neglecting to save your life, and to be cured by this medicine, you are committing an error of the most fatal nature. An individual at Charleston, South Carolina, recently purchased half a dozen bottles of Dr. Wistar's medicine, and he had been afflicted with Consumption for many years, and he had been told by the doctors that he would never be cured, but he had been cured by Dr. Wistar's medicine, and he had been cured by Dr. Wistar's medicine, and he had been cured by Dr. Wistar's medicine.

MARRIED.—On Tuesday the 19th ult. by the Rev. Mr. Gilchrist, Mr. Thomas Gilchrist, Merchant, to Miss Barbara Martin, of this City.

The marriage will take place when Jenny Lind has a little more time on her hands.—Tipperary Chronicle.

On the 25th ult. by the Rev. J. W. D. Gray, D. D., Mr. Andrew Starbuck, of Scotland, to Miss Caroline, daughter of Mr. John Kenney, all of this City.

On Thursday evening last, by the Rev. Dr. I. W. D. Gray, Rector, Captain William Sharp, to Miss Lydia Ann, youngest daughter of Mr. John Kenney, all of this City.

RECIPE FOR ship's Thermo... WITNEY, Bath, BLANKETS, Black, Blue, Rifle, and CLOTHS.

Poetry, &c.

TO YOUNG WOMEN.
Even in the happiest choice, where faving Heaven
His equal love and easy fortune gives...

TO THE OFFICERS OF THE SARDINIAN ARMY.
Accompanied by the official committee of the Com-
mon Council and a few invited guests...

TO THE LOWER RESERVOIR OF THE CROTON WATER-
WORKS.
Works was next visited, and here their admiration
was unbounded at the grandeur and the magni-

TO THE PATRY.
The party next proceeded to Bellevue, where they
were received by Dr. Reese, the resident
physician, who conducted them through all parts...

TO A SERIOUS AFFAIR.
An Irish officer in the army, happening to be a passenger in an armed
vessel during the last war, used frequently to wish
that they might fall in with an enemy's ship...

TO HIS DAUGHTER.
"His is that a dagger I see before me!" said
a young actor who was practicing histrionics in his
attic...

A NATURAL REMEDY

Suited to our Constitutions, and adapted to the
care of every curable disease, will be found in
WRIGHT'S INDIAN VEGETABLE PILLS
OR THE
NORTH AMERICAN COLLEGE OF
HEALTH.

THESE extraordinary Pills are composed of
plants which grow spontaneously on our own
soil; and are therefore better adapted to our con-
stitutions, than medicines imported from foreign
countries, however well they may be compounded;
and as the INDIAN VEGETABLE PILLS are founded upon the
principle that the human body is in truth,
SUBJECT TO BUT ONE DISEASE,
viz: corrupt humors, and that the said medicines
cure this disease on

NATURAL PRINCIPLES,
by cleansing and purifying the body; it will be man-
ifest, that if the constitution be not entirely ex-
hausted—a preference in their use, according to direc-
tions, is absolutely certain to drive disease of every
name from the body.

When we wish to restore a swamp or morass to
fertility, we drain it of the superabundant water;
in like manner, the cause of disease, in an easy and
healthy, we must cleanse it of impure humors.
The Indian Vegetable Pills will be found to be
of the best, if not the very best, medicines in the
world for carrying out this

GRAND PURIFYING PRINCIPLE,
by expelling from the body all morbid and
corrupt humors, the cause of disease, in an easy and
NATURAL MANNER, and while they every day
GIVE EASE AND PLEASURE,
disease of every name is radically driven from the
body.

CAUTION.
The citizens of New England are respectfully in-
formed that in consequence of the great popularity
which the above named Indian Vegetable Pills have
earned by their astonishing goodness, a gang of
counterfeiters, who are industriously engaged in
palming on the unsuspecting, a valuable and pre-
cious dangerous medicine, under the name of Indian
Vegetable Pills.

This is to inform the public that all genuine medi-
cine has on the boxes
WRIGHT'S INDIAN VEGETABLE PILLS
OR THE
NORTH AMERICAN COLLEGE OF HEALTH
And should the holder of the label, will be found
in small type, "Entered according to Act of
Congress in the year 1846, by Wm. Wright, in the
Clerk's office of the District Court, of the Eastern
District of Pennsylvania."

It will further be observed that the printed direc-
tions for using the medicine, which accompany each
box are also entered according to Act of Congress,
and the same form will be found at the bottom of the
first page.

1st April, 1847.
