LITTLE EVIDENCE AT THE POLICE INVESTIGATION

Sergt. Caples on Stand Tells of Workings of Force — Believes It Would Compare Favorably with Any — Officer Sullivan Gives Another Version of Cronin affair.

The enquiry into the police force last evening broke little new ground except a hint that somebody had stolen city cash. Police Officer Sullivan's testimony in regard to the Cronin's saloon affair differed materially from Wm. Pyne's version. Ex-Patrolman McConnell gave testimony in regard to the \$5 bill. Sergt. Caples declared the St. John policemen worked longer hours than in any other city, and that he did not expect them to be on their feet all the time.

Witness saw chief at the fountain at the head of King street, and told him he could not arrest the men. "Then I noticed the chief was under the influence himself," added the witness. "How did you notice that?" "He was staggered," was the answer. "Why didn't you notice it before?" "Well, I thought there was something strange about him."

Continuing the investigation, the commissioner asked if witness had any reason to think the chief showed unfriendly feeling towards him. Witness said yes. Ever since he refused to arrest the Weatherheads. When Sergt. Ross died witness applied for promotion as sergeant on the West Side and the chief laughed at him. He had served as patrolman on the West Side. Some time after refusing to arrest the Weatherheads witness had to walk around the bridge. Sergt. Finley succeeded Sergt. Ross, though he was witness junior by a few years. Witness had been suspended for not telling the truth about having gone to sleep and not waking up in time to telephone the central station. Although he told the truth the chief wanted to dismiss him if it occurred again.

Witness had heard talk that Mabel Smith had paid \$5 to Sergt. Campbell for protection, and rumors about \$5 bills, slate shingles, planks, etc., but knew nothing about them. He saw Campbell taking a small step ladder from Reed's saloon, and went to the station at 1 a. m., after his lunch hour, patrolled several streets and arrived at Brest's Corner a few minutes before 2 o'clock. He was talking there with a young man whom he did not know when Perry, doing his hour from 1 to 2 in the station, came along. He asked Perry how many doors he had tried and Perry said all but a few on Market and Germain streets. They went down North Market street, trying the doors, and turned down Germain. At Cronin's Corner witness said "Have you been in here?" and told Perry to wait while he tried door on the south side of South Market street. When he returned in a minute or two, Perry was standing at Cronin's Corner and he said: "Have you tried this door?"

Perry stepped into the recess, tried the Cronin door and it opened. Witness was satisfied Perry did not use a key. Perry stepped in and witness followed at his heels striking a match to find the lights. A man stepped out and a frightened voice said: "Do you know me?"

I held the match to his face and said, "Yes, you're Wm. Pyne." Pyne said: "Did you find that door open tonight?"

I said: "I did not," meaning to say that Perry had found it open, but he flew up in the air and ran out the door and up South Market street where some men were unloading beef and came back with a man named Pie. Witness and Perry came out and were on the sidewalk when Pyne came back. Pyne said: "You'd better lock that door." Witness saw Pyne was much excited and did not bother answering him. He talked for a while with Pie.

Witness while with Perry had discovered the Cronin door open before and had said to Perry "there is something funny about this door." Before that witness while with Officer Ward had found both doors to the Cronin wholesale department open.

Q.—Were you suspicious of Perry that night?

A.—No. except that I heard rumors. Personally I knew nothing wrong that Perry had done. Q.—Did you know any officer that had a dog following him around?

A.—Not at that time. Sergt. Campbell had a dog that used to follow

hallway of the Jerline building with Campbell more than once? A.—Yes, there was a heater there. We used to go in to get warm. James McNamee, patrolman, had been told to read the criminal code, but did not do it. He had heard rumors that Campbell, Perry and McConnell had been suspected of theft, but had no personal knowledge of such thefts.

Q.—Did you hear about the city's sand being taken? A.—No. In reply to other questions witness said he had a dog which used to follow him round the Brussels beat. At the time of the Cronin affair he was on the York Point beat; the dog did not follow him on the York Point beat. Once the officers used to patrol the beats in pairs; now there was only one man to a beat.

Sergt. Thomas Caples, appointed 1890, remembered Chief Clark had a manual which he wanted the council to print, and had seen Clark reading from the criminal code to the men in line. Q.—Do you think the officers obey the rules about gossiping, chewing tobacco and spitting all over the sidewalk? A.—Not strictly. Witness thought officers had a fair idea of their duties in the way of arresting people. Witness had no personal knowledge of wrongdoing on the part of Perry. Q.—Did you ever hear Martin say he had let Perry down easy? A.—I think I did. Witness said previous to the Cronin affair he came out about 12.30 one night, and as he walked along Perry called to him that he had first found the door of a dairy open. He went into the dairy with Perry, and witness told him he had found Perry to take a drink of buttermilk, but witness declined, saying it would be wrong. Perry opened once before, and had gone in with another officer and taken lots of buttermilk. Q.—Did you report him? A.—No. I did not consider it serious enough. Q.—Do you believe the members pay any respect to the rules and regulations governing the force? A.—I think they do. Q.—Where then did they get the knowledge? A.—They have been repeatedly talked to and threatened. We're always driving something into them. Q.—We have heard it said that the police force of St. John would compare favorably with that of any city. In what respect? A.—The men on St. John force are longer hours than in any city in North America and it is almost impossible to expect them to be on their feet all the time. Outside of a little carelessness in talking, I think we have good men on the force. Q.—How many officers observe the rule about not being intoxicated on or off duty? A.—With the exception of maybe a few there all observe it. Q.—Do you believe the men of the force are all of sound mind? A.—Principally. The enquiry was adjourned till Monday evening at 7.30 o'clock.

LIFE'S SUNSHINE

Gladdens Those who Regain New Health and Strength.

When the glow of health comes back to sallow cheeks; when languid weakness gives place to vigor; when you notice some pale, exhausted invalid restored to active health—enquire. More than likely you will find the cure to have been got another of the thousands already wrought by Dr. Williams' Pink Pills. Headaches and neuralgia, St. Vitus dance and twitching of the limbs, indigestion and rheumatism, eczema and disfiguring eruptions, and the ailments of growing girls and women all disappear when the veins are filled with the new, rich red blood Dr. Williams' Pink Pills actually make. Here is one instance among thousands: Mr. F. Ashford, Halleybury, Ont., says: "Some years ago I completed a lengthy term of service in India, the last three years being spent in the beautiful but treacherous Peshawar Valley. Ague and dengue fever were rife, and although I was fortunate enough to escape a severe attack of either, on my return home it soon became apparent that the enervating climatic conditions had left their ravages on my constitution. In short the reaction had set in, and inexorable stairs was exacting a severe toll from years of strenuous labor. My first warning of the impending breakdown were severe pains in the joints, which gradually increased to irritability, a general anaemic condition and an indefinite nervousness. Life had lost its zest, work became impossible and companionship intolerable. It really seemed that I was swiftly passing to that stage where nervousness ends and insanity begins, when by chance I read an advertisement of Dr. Williams' Pink Pills. I confess I was skeptical of them doing what doctors had failed to do, but concluded that the cost was small, and perhaps, the chance in their favor, and so decided to try them. To my joy there was soon an improvement, and a continuance of the treatment effected a complete cure. I was now as fit and as healthy as any man and am ever grateful that the lucky perusal of an advertisement brought to my notice the wonderful curative properties of Dr. Williams' Pink Pills." Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

FUNERALS.

Mrs. John Devlin, The funeral of Mrs. John Devlin, held yesterday morning from her late home, 152 St. John street, West End, was attended by many friends, and on the casket lay beautiful floral tributes of sympathy for the bereaved family. In the church of the Assumption Rev. J. J. O'Donovan celebrated requiem mass and the body then was escorted, relatives acting as pall-bearers, to the Fredericton train. Burial was in the Catholic cemetery.

John Bradley, Many friends attended the funeral of John Bradley, held yesterday afternoon from his mother's residence, Riverside. Interment was in the Catholic burying ground at Rosetown. Magnificent floral pieces marked the deep feeling of sorrow caused by his death.

THE STANDARD Complimented By Everybody

WE

are daily receiving congratulations from all classes of readers for our generous offer in distributing, practically free, the wonderful IMPERIAL EMBROIDERY OUTFIT, containing in all 160 of the very latest Embroidery Patterns, including the New All-Metal Hoop and Booklet of Instructions.

All Classes Need It

The woman of means needs it because she enjoys the experience of creating something beautiful or useful with her own hands, and because nothing can take the place of dainty hand embroidered fabrics.

The woman of lesser means prizes it because it is the means of supplying better things for herself and children to wear at a trifling expense. The woman of moderate income can, by the use of this Outfit, wear just as pretty things as her more fortunate sister.

6 Coupons and 70c Secures **It** **DON'T DELAY**

The Imperial Embroidery Outfit Contains **160 Patterns---Hoop and Directions**

Here's a Knife-Sharpener and Towel Dryer combined in one—both are necessary in the kitchen. Not necessary to a range, but they indicate the consideration and thought that has been given to the details of the Pandora. Important features have been given proportionately great care and study. Have the Pandora's many features explained to you before you buy your range.

The accuracy of the McClary thermometer makes good baking a certainty—also adds a lot of satisfaction to the work.

McClary's Pandora Range

Pandora Ranges are sold everywhere by good dealers who back up our guarantee on this splendid range—McClary's

WEEKLY LETTER ON MONREAL MARKET

(F. B. McCURDY & CO.) Montreal, Oct. 24.—The past has been almost exclusively a Dominion Steel Corporation week. The stocks both of the Steel Corporation and its subsidiary, the Dominion Iron and Steel Company began showing a disposition to decline over a week ago and have subsequently been at times in a more or less panic condition.

There are not wanting signs that London is re-entering the market for Canadian municipals. The higher investment returns now available are developing a new and ever-broadening market in the United States.

Power was also weak and along with most of the other issues recovered some of its loss and was showing a better tone on Friday. Some of the mining stocks attracted interest.

LEADING ACTOR HAS HAD AN INTERESTING CAREER

Sam A. Meharry was Intended for a Life in Journalism.

FOUGHT FOR COUNTRY IN THE PHILIPPINES

Has had Experience as Printer and is also a Dental Graduate - Talks to Standard of the Stage.

An interesting gentleman with a career in many lines of activity is Sam A. Meharry, leading man with the Thompson-Woods Stock Company, now playing in the Opera House. Mr. Meharry, in the first place, is an Englishman, born in the tight little island and educated in the public schools there. A graduate of Queen's, he was intended for a course in Queen's college, Belfast, but about that time the desire to see something of the world came between him and the pursuit of book knowledge in Queen's, and instead he came to the United States where he learned from men.

"I had a narrow escape from this," he said with an eloquent wave of the hand as he entered The Standard office this week. "You were lucky," was the response but how did it happen? Most of us who get in it can't escape. And then Mr. Meharry told his tale.

Intended for Newspaper Man.

"After I came to the United States I started as a printer and was headed for an eventual graduation to the news end of a paper, but it didn't happen."

"Well, I had a friend on the stage and he had a chance for me, so I took it. The first six months I got the princely salary of \$4 a week and expenses. I don't know whether I made good or not, but, at any rate, after working a half year, I managed to get a raise to \$6 per week and I never missed a pay day. It was hard work, but I stuck to it. Gradually I managed to get better parts and better chances.

"I suppose there was disappointment among my folks that I did not go into some other line. Possibly, if I had remained in England, I might have been a clergyman. There was a tendency in that direction. My uncle, Rev. Dr. J. B. Meharry, was moderator of the Presbyterian church in England and the church at home in Scotland. I remember the Sundays, when it was regarded as a sin to look out of the window, let alone to indulge in any amusements."

Has Seen Active Service.

Mr. Meharry has also seen active service in the American army, and to the Philippines with a Dakotah regiment. "I was a year and a half on the fighting line," he said, "and won my promotion from sergeant to a Lieutenant."

Another line of effort in which the talented young actor has had some experience is in the practice of dentistry for he is a graduate dentist.

In consequence he is, in a way, independent, for the time should come when his art falls to him, at the strings of his audiences he can take an awful revenge on their morals. To date, however, he has not had to resort to this expedient for, since the \$6 a week days, fortune has smiled upon him.

Twenty Years on Stage.

Coming to the details of his stage career, Mr. Meharry admitted that he had been twenty years on the stage, counting the \$4 and \$6 per week days. He has been a member of some of the best stock companies in the United States and Canada, playing stock engagements in Chicago, Toronto and Vancouver.

In 1901 he was cast for important roles with the Vancouver stock and spent an entire season in that city. "I liked Vancouver very much, but am also well pleased with St. John. It is honestly a fact that the audiences of St. John are most responsive and it is a pleasure to work with them. In this respect they have no superiors in any of the cities where I have played. In the three plays in which we have appeared I have been much impressed with the close attention paid to the quiet scenes in which these plays abound. That is the true test of an audience, it is not difficult to hold the attention of audiences in scenes where there is much action, but in quiet scenes, which while they may be 'talky,' have an important bearing on the development of the play, the attention paid by the audience is a good standard from which to judge the amount of interest the audience feels in the play. I have played in one of the best stock houses in the country, in Chicago, and even there I did not find the audience so pleasant to work with."

His Favorite Part.

Asked as to his favorite part, Mr. Meharry expressed his preference for the role played by Charles Hawtree in "A Messenger from Mars." He prefers a strong character part to one of character comedy, such as he has played this week, but nevertheless appreciates the strong features of all. The chief requisite for success in an historic career, he interestingly said, was the ability to work and work hard. "Hard work and careful study can win out, provided, of course, that one has some ability to start with. One thing about the profession is that

SAM A. MEHARRY.

BIG INTEREST IN KIEV TRIAL

Mass of Irrelevant Material Introduced Wearing Judges and Jurymen - Criminal Gives Evidence

Kiev, Oct. 24.—While public interest in the trial of Mendel Beffis on a charge of murdering Andrew Yushinsky has not abated, it is significant that it is now chiefly centered in Vera Teberiak's connection with the case. Much of the time of the court today was occupied with the reading of depositions of Karavayoff, a notorious criminal who is now undergoing a sentence of exile, who assisted formerly Chief of Police Krassovsky in his investigations of the case. They added nothing of importance to the evidence already adduced.

A long discussion took place concerning the incorporation in the record of the copy of a letter addressed to Karavayoff by Theophilakoff when he was in prison in January, 1912, and which was seized by the prison authorities. It consisted in the main of an incomprehensible jumble of words, the tendency of which was to discredit Karavayoff. The mass of irrelevant material that is being introduced at the trial is visibly wearing the judges and boring the jurymen.

GAGETOWN YOUTH WAS SENT UP FOR TRIAL

Preliminary Hearing of James Gibson, at Residence of Mrs. Penery, Yesterday - Many Witnesses.

Special to The Standard. Gagetown, N. B., Oct. 24.—At the conclusion of the preliminary hearing in the case of criminal assault against James Gibson here today the prisoner was sent up for trial at the next session of the court in Gagetown, probably next Tuesday. The hearing was opened at Upper Hampstead, at the home of Mrs. Penery, the victim of the alleged assault. Mrs. Penery is still in a critical condition as the result of her injuries. This morning the examination was continued at Gagetown. Dr. W. M. Jenkins, who was called to attend the condition of the woman at that time, Leslie A. Slipp, told of the capture of Gibson at the home of Elijah Straight on the Washademoak. He also said that the prisoner had stolen a revolver from him.

KILLED BY TRAIN.

Fredericton, N. B., Oct. 24.—A Russian victim, known as No. 24, employed by A. E. Triton at the Fredericton and Grand Lake Railway, was run over by a train and instantly killed at Lower St. Marys last night. He was in the city during the afternoon and started for his camp after dark. It is thought he went to sleep on the track.

One never learns it all. Years of experience may convince an actor that he is well qualified in his art, and he may be but all the same, there is always something more for him to learn. Which truth applies to any other line of endeavor as well as the stage.

HOW MARITIME PROVINCES ARE GIVEN STANDARD TIME BY ST. JOHN OBSERVATORY

Director D. L. Hutchinson, in Interviews Supplies Interesting Description

TIME OBTAINED BY OBSERVING STARS

Instruments Used Explained--Standard's Representative Sees "61 Cygni" in Meridian Telescope--The New Observatory.

The scene was the office of D. L. Hutchinson, Director of the St. John Observatory of the Meteorological Service, and the questioner a representative of The Standard. "When will the new observatory on Douglas Avenue be completed? The Standard would publish any information you can give us with regard to it."

"Well," replied Mr. Hutchinson, generally, "under the contract the new building will be completed next March and we shall certainly occupy it during the Spring."

"St. John will then possess a building devoted exclusively to the work of the observatory?"

"Yes. All the instruments and apparatus connected with the Meteorological and Time Service will be transferred to the new building, where a proper exposure for the outside meteorological instruments will be obtained, as well as a much needed suitable housing for the excellent equipment of the observatory which has outgrown the

THE MERIDIAN TELESCOPE.

present location in this building. The only apparatus that will remain here will be the Time Ball at the top of the tower and the storm signals. The ball will be dropped by wire from the observatory on Douglas Avenue. This change," suggested the Standard's representative, "should certainly make the work of the observatory more widely known."

"I believe that it will," was the reply, "for under present conditions the work of the observatory is, perhaps, somewhat overlooked by people generally, being in the Customs Building. After our removal the observatory will assume its own identity."

THE OPPORTUNITY.

The tenor of Mr. Hutchinson's comment was not lost on the Standard's representative, who, standing in the office of the observatory he noted the numerous instruments and apparatus and taking advantage of the opportunity asked the director he would consent to supply the necessary information for an article relating to the Time and Meteorological Service, and if illustrations of the principal instruments and an explanation of their use could be given. The article, he thought, would prove of interest to many readers of The Standard.

SIDERAL TIME.

In regard to the source from which Standard Time, as recognized by the St. John Observatory, is derived Mr. Hutchinson's clear and detailed explanation will come as something of a revelation to many people. "The notion is prevalent," he stated, "that our Standard Time is obtained from the sun. The truth is that while in the Maritime Provinces our timepieces are adjusted to keep mean solar time of the 69th meridian, the astronomer takes his time from the stars."

Reproduction of the view through the eye piece of the Meridian Telescope as seen by The Standard's representative, showing "61 Cygni," a star of the third magnitude, and another of lesser magnitude crossing the field and approaching the centre line which represents the meridian.

The time obtained by the meridian observation of stars, he went on to explain, is called Sideral. Hence the problem reduces itself to observing the meridian passage of Standard Stars, comparing them with a clock regulated to keep Sideral Time, the uniform rotation of the earth on its axis being taken as the basis of measurement. "Comparisons," he added, "are then made between Sideral and Mean Time clocks and after a proper allowance for the observed error in the Sideral clock, Standard Mean Time is computed."

The mistake in supposing that the sun is responsible for the time, it would appear, is, in part at least, due to a fact mentioned by Mr. Hutchinson that our civil standard, the mean solar day, is an artificial standard, equal in duration to the average solar day, or to the solar day as it would be if the days were all equal.

The Sun Unreliable.

"The sun," he explained, "is usually thought of in connection with the length of a day, but solar days are unequal; the time between successive passages of the sun across the meridian varies from day to day, due to the fact that as the earth turns round it also travels along the orbital path in the same direction as it rotates. If the path were a true circle and the speed along that path constant, solar days would be as regular as sidereal and become the natural as well as the scientific standard of time. Our Mean Time is, therefore, a compromise, and convenient made up measure of time, it agreeing with the real sun only four times a year."

Taking Observations.

"In reply to a request The Standard's representative was given an opportunity one evening recently of seeing observations taken. On the floor above the office of the observatory, in a room designed for the purpose, is the Meridian Telescope, known to astronomers as the "transit instrument," by means of which stars are observed and the time recorded. In preparing

A brief digression is worth while at this point to note that the eye piece of the telescope manifests a perpendicular line which represents the meridian. It will be observed that there are five equidistant perpendicular lines on the left of the meridian line and a similar number on the right. Had the interested viewer been an expert astronomer, desire of taking the time from "61 Cygni," he would have pressed a key held in the hand as the star passed under each of the perpendicular lines on the left and repeated this action as he approached the meridian line on the right. When this key is pressed the exact time is recorded by electrical means on the Chronograph. (English) the "time-writer," which is situated down stairs in the office of the observatory.

THE SIDERAL CLOCKS.

RELIEVE BIG DEPOT IS PLANNED FOR THIS CITY

JAPAN WILL BENEFIT BY "BIG DITCH"

Expects to Make Long Strides in Foreign Commerce when the Panama Canal Opens for Traffic.

Tokio, October 22.—Japan expects to make long strides in her foreign commerce as a result of the opening of the Panama Canal. The ports on the eastern coast of both South and North America are at once opened up to her export trade, and everything possible will be done to find markets there for Japanese goods.

The present trade routes from Japan to European ports by way of the Suez Canal will not be affected by the operation of the Panama route. Japanese steamers will continue running by way of Suez, for they are thereby enabled to pick up freight at many ports on the way in China, India and in the Mediterranean. Hence it has been decided here that it will be unprofitable to divert steamships to Europe by way of Panama, as no freight can be delivered or obtained in the long stretch across the Pacific. But new lines of steamers eventually will be sent to New York and to the eastern coast of South America, where Japan hopes to find big markets for her china and lacquered ware, her straw mats and straw braids, as well as her teas, and at the same time increase her markets for raw silk.

Another important result of the opening of the canal will be the diversion of much of the freight which now is transported to points on the Pacific slope of the United States, and either despatching this merchandise direct to New York from Japan by steamers, or sending it round from the east coast of the United States in freight charges will be affected by San Francisco, after Japanese steamers have called at the Pacific metropol.

An exhaustive study of the effects of the Panama Canal on Japanese maritime commerce, both for the present and the future, has just been completed by the Ministry of Commerce. The department's experts figure that a 50 per cent. economy will be made by shipping direct to New York by steamer, instead of sending it across the continent by rail from the Pacific coast. It is unlikely, however, that any change will be made in the manner of shipping raw silk, of which the exports to the United States amounted to \$7,000,000 last year, as on account of increased charges merchants will desire their payments as quickly as possible. At the same time the lower cost of freight will enable Japan to import from the United States more raw cotton, machinery and locomotives.

Another important benefit to Japan will be that of permitting her to send direct to Brazil, and later possibly to other countries, Japanese emigrants who are expected to go to South America in increasingly large numbers. Five thousand laborers were sent to Brazil last year; three thousand were transported this spring, and an additional three or four thousand departed during the month of September—all to labor in the coffee fields of Brazil. The steamers carrying these emigrants now pass by way of the Panama Canal. They will go by Panama as soon as the new waterway is opened.

The Japanese Government is now considering the question of increased subsidies for Japanese steamship lines, which would permit the building of additional steamers for the Panama route. The three great Japanese companies are the Toyo Kisen Kaisha, the Nippon Yusen Kaisha and the Osaka Shosen Kaisha. All of these concerns are now building additional vessels, most of which are destined for the increased commerce to European ports. If, as seems likely, the Government will increase the subsidies, it is probable that steps will be taken to lay down ships which will sail to new markets in the western hemisphere.

To sum up the situation, Japan expects to benefit greatly in a commercial sense from the opening of the Panama Canal. As years go on, she expects to occupy an increasingly important place in the western markets, and hence a greater position in the world's commerce. Manufacturing is steadily developing in the industrial centers of Japan, and the empire easily can supply additional world markets. Increased exports means increased gold supplies, and gold is possible to Japan needs to build up and strengthen herself at home, and to care for the growing wants of an increasing population of already sixty millions.

The population is augmenting regularly at the rate of six hundred thousand a year. Many of these people will find homes in Korea, some will go to Manchuria, and some to Formosa, and still many others will find employment in the growing factories of the empire. The Panama Canal looms up as a welcome solution of Japan's economic problem. It promises increased markets, and it will carry to South America great numbers of Japanese, who are unable to find the means of livelihood at home.

Understood that Mr. Gutelius has Looked Over Site.

CONSTRUCTION MAY BE SOON COMMENCED

Believed that Proposed Station will be Erected in Vicinity of Gilbert's Lane - Property Secured?

That a new Intercolonial Station was to be started immediately in St. John, and that the hill at present known as Gilbert's Lane, would be removed to make more yard room, was the statement made yesterday by a citizen in close touch with railroad affairs. The gentleman said that Mr. Gutelius and his associates while in St. John this week had looked over the site for the proposed station in the vicinity of Gilbert's Lane, and that the general scheme had been approved. It was further said that the contractors had been notified to prepare at once for starting work on the Gilbert's Island land, and have the hill thereof removed at once. More sideling room is necessary and the work will be rushed.

It could not be learned what was the exact location of the proposed station, but it was said that the structure would be modern in every detail and have ample capacity for handling all the business of the Intercolonial as well as the Canadian Pacific, the Valley Road and the Grand Trunk Pacific when it would enter St. John. The building, it was understood, would contain offices and accommodate the railway officials, who would be stationed here.

There has been a slight activity in real estate in the vicinity of the Gilbert property, and it is generally believed that the transfer of property there will be in connection with the securing of a site for the new station.

SCHOONER IN COLLISION

William H. Clifford, from Norfolk to Boston, in Two Crashes in Twenty-four Hours.

Vineyard Haven, Mass., Oct. 24.—After steering in two collisions within twenty-four hours, the schooner William H. Clifford, from Norfolk for Boston will finish her voyage in tow minus a large part of her sails and rigging.

The schooner was at anchor in Vineyard Sound, near Gay Head, last night, when she was run into by the schooner Lizzie H. Barbour from St. John, N. B., for New York with a cargo of lumber. The Barbour's bow sprit and all her headgear were carried away and she was towed to New Bedford by the revenue cutter Gresham. With her mizzen rigging and rail damaged, the Clifford proceeded for this port under partial sail, but this morning she collided with the five-masted schooner Margaret Haskell, losing her boom, sailing and rigging, and sustaining other damage.

SCHOONER BOUND HERE BATTERED BY TWO HURRICANES

Annie M. Parker Lost Sails and Deckload of Lumber while on a Voyage from Florida.

Saunderstown, R. I., Oct. 24.—The British schooner Annie M. Parker departed from this port today with part of the cargo of lumber, and will arrive here after a tempestuous voyage of thirty-five days from Clarabell, Florida. The vessel is bound for St. John, N. B., where she is owned.

The Parker bore the brunt of two hurricanes, the worst weather, Captain Rafuse declared, he had ever experienced during his thirty-five years of seafaring life.

Happenings of the Week

HEALTH OF EMPRESS WORRIES THE KAISER

The hunting season this year has attracted perhaps more than ever before many of our prominent citizens to the wilds.

EMPERESS AUGUSTA VICTORIA.

There are disquieting reports in regard to the health of the German Empress. Her Majesty has not been well for the last twelve months and the Kaiser is worried.

Mr. G. S. Mayes, president of St. George's Society, and Mrs. Mayes, entertained at a delightful luncheon on Wednesday in honor of Mrs. Charles McPherson of Winnipeg.

Mr. Frederick Taylor was host at a delightful dinner at the Union Club on Wednesday. The guests were Mr. and Mrs. Ronald McAvity, Miss Frances Hazen, Miss Constance McGovern, Miss Mary MacLaren, Miss Catherine McAvity, Mr. Malcolm Fraser, Mr. C. F. Inches, Mr. Malcolm McAvity, Mr. Colin Mackay and Mr. Fraser Campbell.

Miss Louise Knight entertained at the tea hour on Tuesday in honor of Miss Edna Godfrey, and during the afternoon Miss Godfrey was the recipient of a variety shower.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Many friends will be glad to hear that Mrs. Willard Campbell is fully recovered from her serious illness of the last few weeks.

Miss Margaret Anglin will appear next summer with the Stratford players at the annual Shakespearean festival in honor of Mrs. Benson directors at the high school of the post, Stratford, Avon, England.

Miss Harrison entertained at a delightful luncheon on Thursday at the Green Lantern tea room in honor of Miss Dowdell. Covers were laid for eight.

Mr. John K. Schofield and Miss Clara Schofield entertained on Saturday afternoon at a drawing room tea in honor of Mrs. Schofield's first visit to St. John since her marriage and by her charming personality made many friends during her visit.

Mr. Henry C. Rankine was host on Wednesday at a most enjoyable tea in honor of Miss Dowdell of Halifax. The guests were Mrs. E. Byler, Mrs. Robert Hanington (Vancouver), Mrs. Horace Porter, Mrs. Frank Fairweather, Mrs. L. P. D. Tilley, Mrs. W. Thomson, Mrs. J. Roydon Thomson, Mrs. Frederick Schofield, Mrs. Shirley Peters, Mrs. H. Fielding Rankine, Mrs. James Hardin, Miss Pungington, Miss Edith Skinner and others.

Dr. W. W. White and Mrs. White and Dr. G. A. B. Addy have returned home from their trip abroad. Dr. White and Dr. Addy visited many leading hospitals while on the other side.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

Mr. J. A. Lively gave a cheque on Thursday to Mr. H. C. Rankine, treasurer of the Protestant Orphan Home, for \$100.00, the money being for the opening concert of the new Imperial Theatre.

ST. ANDREWS

St. Andrews, Oct. 24.—Mr. and Mrs. C. S. Everett have gone to Northfield, Mass., to spend a few weeks.

Mr. A. Allerton has gone to England to spend some time with relatives.

Mrs. G. Babbitt and Master Gerald are visiting friends in Fredericton.

Miss Alice Grimmer was hostess at a very enjoyable Gimble party on Saturday last in honor of Miss Helen Gunn, of Westville, N. S.

Mr. Percy Odell is spending his vacation in Sackville.

Mrs. A. Allerton gave a very pleasant informal dance on Thursday last in honor of Mrs. Paul Revere, of Leominster, Mass.

Miss Maude Greenlaw was called home last week from the U. N. B. Fredericton, by the serious illness of her mother.

The Misses Morris left last week for Boston, where they intend spending the winter.

Principal Carpenter spent the Thanksgiving holiday in Fredericton.

Mr. and Mrs. T. A. Harris returned from their western trip on Wednesday. They were accompanied by Mr. Harold Greenlaw, who was called home by the illness of his mother, Mrs. King Greenlaw.

Mrs. J. Cunningham, Miss Norinne Cunningham and Miss Amelia Kennedy, who have spent the summer in town, returned to Boston on Thursday last.

"OCEAN MOTHERS" LIVES MADE HAPPY BY LITTLE TRAVELLERS

Mrs. Margaret Hull, Mrs. Kate Mackell.

In the above illustration are shown the two "ocean mothers" of the big floating palace the Mauretania...

MONCTON

Moncton, Oct. 24.—Among the students from Mount Allison Ladies' College, to spend Thanksgiving in the city were: Misses Marjorie McCarthy, Nan Chapman, Kit Humphrey, Ethyl Ryan, Emma Saugster and friend Miss Doris Walker, Ada McLean and friend Miss Bona Mills, Marjorie Robinson, and friends, Miss Clare Woods, of St. John, and Miss Genevieve Mews, of Newfoundland, both of whom are students of Mount Allison, also the Misses Audrey and Helen Parlee.

FREDERICTON

Fredericton, Oct. 23.—Mrs. Frank Harrison and Miss Jean Wilson were hostesses on Friday afternoon at a largely attended and most enjoyable tea for the younger ladies. The rooms looked very cheery, partly due to the decorations of the hall without.

OTTAWA

Ottawa, Oct. 24.—Mrs. Frank Anglin entertained a luncheon on Wednesday of last week in honor of her guest Mrs. Clarence McCaus, of Montreal. Captain and Mrs. Ernest Harris, who returned from England will in future reside in Quebec.

Among those who were present at the luncheon were: Mrs. T. P. Owens, Mr. and Mrs. E. B. Devlin, Dr. and Mrs. A. T. Shillington, Mr. C. M. Edwards, Miss Watson, Mr. and Mrs. Joseph Irvin, Mr. and Mrs. Charles Irvin.

The initial social event of the season was held Monday night when Colonel and Mrs. A. P. Sherwood entertained at a perfectly arranged and most enjoyable ball at the Chateau Laurier in honor of their youngest daughter, Miss Nora Sherwood.

Bank of Canada at Newcastle, spent Sunday with his parents, Mr. and Mrs. John McInerney. Miss Evelyn McInerney, who is teaching at Main River, was in town over Sunday with friends.

Had a Stroke of Paralysis. And Found a Cure in Dr. Chase's Nerve Food. It is always better to prevent serious diseases of the nerves. There are many warnings, such as sleeplessness, irritability, headaches and nervous indigestion.

TWELVE YEARS HORRIBLE TORTURE

Ontario Lady Suffered Tortures for 12 Years with Burning Eczema—"Fruit-a-lives" and "Sootha Salva" Completely Cured Her.

"I was a dreadful sufferer from that awful complaint Eczema, or Salt Rheum, and this trouble bothered me for about 12 years. My hands and arms were chiefly attacked, and the pain and irritation were terrible. I consulted several doctors and tried every remedy I heard of, but nothing did me any good.

"Fruit-a-lives" and "Sootha-Salva" will cure any case of Eczema, no matter how severe or how long you suffered. Eczema is caused by impure blood, chronic indigestion, constipation and nervousness, but there is usually a tiny parasite or germ which attacks the skin and causes the burning and itching.

SHEDIAC

Shediac, N. B., Oct. 24.—A number of visitors were in town for the Thanksgiving holidays. A house party including the Misses Pickup, Granville Ferry, Miss Taylor and Miss De Bois, of Mt. Allison, and Miss Borden, Sackville, spent the holidays at the home of Mrs. A. R. C. Tait.

CLEANSER YOUR HAIR MAKES IT BEAUTIFUL

It becomes thick, wavy, lustrous and all dandruff disappears. Surely try a "Danderine Hair Cleanser" if you wish to immediately double the beauty of your hair. Just moisten a cloth with Danderine and draw it carefully through your hair.

Advertisement for 'Baby's Own Tablets' featuring an illustration of a baby and text describing the medicine's benefits for children's ailments like colic, constipation, and stomach issues.

Advertisement for 'Danderine Hair Cleanser' with a portrait of a woman and text explaining how it cleanses the scalp, removes dandruff, and promotes healthy hair growth.

HOW MARITIME PROVINCES ARE GIVEN STANDARD TIME BY ST. JOHN OBSERVATORY

Continued From Page Nine.

It is known for this purpose. When the director requires a new line or two he invokes the help of a friendly spider, gets him on a card with a hole in the centre and as the spider drops from the card and spins his web the card is turned until the necessary amount of web has been secured to renew the lines in the instrument.

Vibrations of the Earth.

Explaining the extreme sensitiveness of the transit instrument under notice Mr. Hutchison stated that it was affected by changes of temperature and by vibrations of the earth's surface which were not sensibly felt by an individual. "Of course," he added, "the amount of disturbance is not large but still it is enough to vitiate

The observations. Thus in timing the transit of a star, the ideal condition would be a telescope exactly in the meridian, that is, pointing due North and South. Should it deviate to the East and West, or to the North or South, the error would not be registered. The axis also has to be perfectly level and the centre wire exactly in the optical centre of the telescope. These conditions, no matter how solidly the instrument is mounted and how perfectly it has been adjusted, can never be maintained for any length of time owing to the above mentioned cause of disturbance.

To overcome these little disturbing elements we went on to explain that it was necessary to observe the transit not only of one star, but of a number, from ten to twenty, suitably chosen from their position in the sky, and that from mathematical calculations and combinations of different results the proper altitude to be made for each star was obtained. The work which this involves may be estimated from the further statement that a good determination of the various instrumental corrections required necessitated two or three hours continuous observations.

The Skill Required

"A skilled observer," he continued, "with the modern instruments can determine the time of a star's transit within a small fraction of a second, but it requires a clear head and years of constant practice to become expert and able to judge to the hundredth part of a second when the bisection of the wires are made, and to that degree of nicety is the time observed. Our transit telescope in the observatory here is specially designed for this purpose and has many devices to insure accuracy of results."

Taking the Record.

"During a star's passage across the field, the transit micrometer, which is fitted to the eye end of the telescope, fifteen records are made on the chronograph along with the seconds from the sidereal clock. The chronograph shows being afterwards read, the precise error of the clock is computed from the recorded observations and the errors and rates of the sidereal clocks determined."

The two sidereal clocks, illustrations of which are given, are installed in a small room in the basement of the Custom House, where constant temperature is maintained. One of these clocks was made by Dr. S. Riefler and is run under constant barometric pressure, which is obtained by sealing the glass case and exhausting a portion of the air by electrical pump. This clock is electrically wound.

The Time Service

Less technical in description and of equal interest is a method by which time is distributed from the Observatory at St. John throughout the Maritime Provinces. The outward and return signals of the time service are the Time Balls.

The time ball became an institution at St. John forty five years ago in 1868 a time ball was erected on the building which still crowns the top of Fort Howe. This site was selected as the most conspicuous point in view from the harbor, the ball being principally designed for the use of navigators to time their chronometers.

At the time that the time ball was devastated by the fire of 1877 the ball had been removed to the old Custom House building. When the present Custom House was erected the ball

was placed on the North tower and that has been its official place ever since, with the exception of the period, extending over more than a year, while the Custom House was being rebuilt after the fire of 1892. During that interval a temporary time ball, placed on the top of the Post Office building, was used.

Every week day in the year, this city's time ball is raised to half mast at 12:45 p.m., and to the top at 12:59 p.m. At one o'clock Atlantic Standard Time, the ball is dropped electrically direct from the Standard Mean Time clock in the Observatory.

Where the Clocks Are.

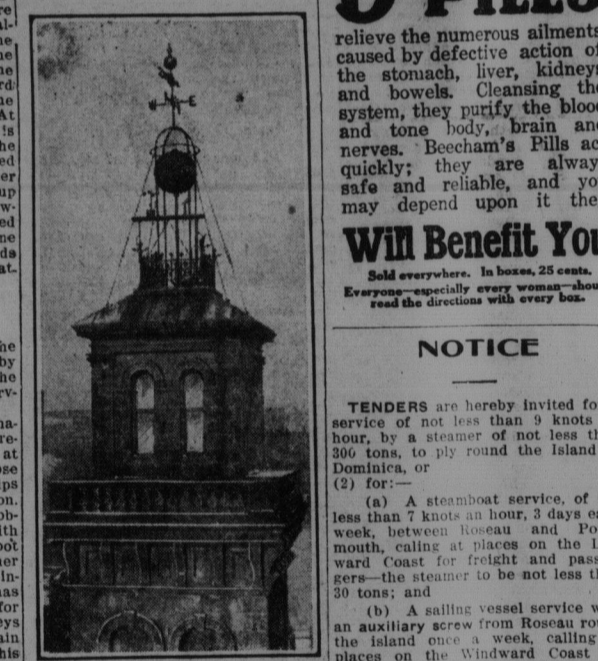

So far clocks have been installed in the Post Office lobby, many of the banks, the Public Library, the Western Union, Telegraph office, the new Brunswick Telephone Company's office, Ferguson & Page, the Royal Hotel, and the lower clock of the St. John Post Office. Clocks are also installed in some of the manufacturing establishments in and around the city.

The latest addition to the list is the handsome illuminated post clock maintained by T. McAvity & Sons on the curb near the foot of King St. Frequent complaints are made at the observatory on the chronograph between the sidereal and mean time transmitting clocks, the latter being corrected for any appreciable error, while the sidereal clocks are permitted to accumulate error, which is allowed for by their rates between observations.

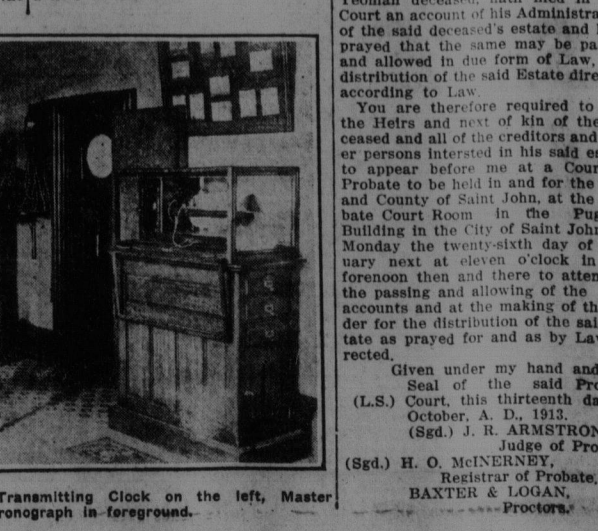

A Question Answered.

Why that great exactness of scientific time keeping? Possibly some of the readers of The Standard, having perused this article, may ask that question. The answer is that the country needs a standard of time as much, or even more, than a standard of weights and measures. The time balls are welcome signals to navigators, for they know by them that they can accurately determine the errors and rates of their chronometers. They are none the less acceptable to the general public. The transmission of the exact time throughout the Maritime Provinces is a convenience which could not well be dispensed with. Telegraph signals from the St. John Observatory also regulate the time of the Intercolonial Railway, the correct time being an element of safety in conducting the operations of the road. The Meteorological Service is one of the branches of the Marine and Fisheries Department. St. John is indebted to Hon. J. D. Hazen, the Minister of the Department, for the fine building now being erected on Douglas Avenue by the British American Construction Company, under the supervision of Garnet W. Wilson, architect.

for the building. It is an ideal site for an observatory for the Maritime Provinces and the transmitting clock will prove a noteworthy addition to the many fine structures in the North End.

As the word "Meteorological" has appeared in this article it may be well to explain that the object of Meteorology is the study of atmospheric phenomena and the investigations of weather and climate. The Standard's representative during his visits to the Observatory saw many other instruments of interest connected with the Meteorological Service, but it was decided not to lengthen this article by giving a description of them and the methods used in the weather department of the Service. This subject will be dealt with in another article to follow.

The office of the observatory, transmitting clock on the left, Master Clock on the right, with Chronograph in foreground.

COLD IN THE CHEST

RUB WELL WITH ZAM-BUK!

For bad colds on the chest, rub the chest and between the shoulders well with Zam-Buk at night.

If you suffer from catarrh or cold in the head, just insert a little Zam-Buk at the base of the nostril, and as the balm becomes warm, inhale the healing essences which vaporize.

Sores in the nostril, which are sometimes set up by catarrh, will yield to Zam-Buk treatment. Says Mrs. N. S. Babcock, of Matawatschuan, Ont.: "For a long time I had a very disagreeable sore on the inside of the nostril, which gave me great pain and caused much annoyance. I feared it would turn to cancer, and all I tried proved unavailing. I was glad to say that the sore that I defamed all other remedies was overcome by the use of Zam-Buk and is now quite healed."

Zam-Buk will also be found a sure cure for cold sores, chapped lips, ulcers, scabies, blood-poison, piles, cuts, and skin injuries generally. All druggists and stores, 50c box. Zam-Buk Co., Toronto. Try Zam-Buk Soap 25c. tablet!

GAGETOWN NOTES.

Gagetown, Oct. 23.—Kingsley Shields, D. Moore, Fred Corey and Fred Dineage, of St. John, spent Thanksgiving at their home in Gagetown, the bank of Nova Scotia staff, spent the holiday with friends in Fredericton.

K. M. Fluke, B. S. A., Commission of Conservation, Ottawa, is investigating agricultural conditions here. He has been carrying out similar investigations in different sections of the Maritime provinces and it is quite probable that more demonstration farms may be established as a result of his work.

E. S. Brodie has been confined to his house on account of illness. Mr. Jacobs, Pittsburg, Pa., spent the weekend at Gray Gables. Kenneth Gillis, of St. John, who has

NOTICE

TENDERS are hereby invited for a service of not less than 9 knots an hour, by a steamer of not less than 200 tons, to ply round the Island of Manincola, or (2) for

(a) A steambark service, of not less than 7 knots an hour, 3 days each week, between Moncton and Portland, calling at places on the Leeward Coast for freight and passengers—the steamer to be not less than 30 tons;

(b) A sailing vessel service with an auxiliary screw from Roseau round the Island once a week, calling at three or four ports on the Leeward Coast for freight and passengers, the vessel employed to be not less than 75 tons.

Particulars of service, itinerary, etc. may be had on application. Replies to be addressed to Administrator Dominica on or before Nov. 30th.

The Administrator does not bind himself to accept the lowest or any tender.

PROBATE COURT, CITY AND COUNTY OF SAINT JOHN.

To the Sheriff of the City and County of Saint John, or any Constable of the said City and County—Greeting:

WHEREAS the Administrator do bonis non of the estate of William McKelvey of the City of Saint John in the City and County of Saint John, Yeoman deceased, hath filed in this Court an account of his Administration of the said deceased's estate and hath prayed that the same may be passed and allowed in due form of Law, and that the said Estate directed according to Law.

You are therefore required to cite the heirs and next of kin of the deceased and all of the creditors and other persons interested in his said estate to appear before me at a Court of Probate to be held in and for the City and County of Saint John, at the Probate Court Room in the Pugsley Building in the City of Saint John, on Monday the twentieth day of January next at eleven o'clock in the forenoon then and there to attend at the passing and allowing of the said accounts and at the making of the order for the distribution of the said estate as prayed for and as by Law directed.

Given under my hand and the Seal of the said Probate Court, this thirteenth day of October, A. D. 1913.

(Sgd.) J. R. ARMSTRONG, Judge of Probate.

(Sgd.) H. O. McNEVERNEY, Deputy Master of the Interior.

(Sgd.) B. A. BAXTER & LOGAN, Proctors.

Who Moses Was

"Now, Albert," said the Sunday school teacher, "Can you tell me who Moses was?"

"Yes, m'am," replied the little fellow, "was the only man who ever broke all the ten commandments at once."

Just Apply This Paste And the Hairs Vanish

(Beauty Notes).

It is no longer necessary for a woman to go through life with a face disfigured by a fuzzy growth, for if she will apply a plain delatone paste to the objectionable hairs for 2 minutes, she will find that every trace of hair will vanish. To make the paste, mix some water with powdered delatone. After the paste is removed, the skin should be washed to free it from the remaining delatone. Better results are obtained if the delatone is purchased in an original package.

DEPARTMENT OF RAILWAYS AND CANALS, CANADA, CANADIAN GOVERNMENT RAILWAYS.

Halifax Ocean Terminal Railway, Halifax, N. S.

Sealed tenders addressed to the undersigned and endorsed "Tender for Docks, First Unit, Contract No. 27" will be received at this office until twelve o'clock noon, Saturday, the twenty-fifth day of October, 1913, for the construction of about 6,500 lineal feet of quay wall, foundations for buildings, sewers, dredging of harbour to a depth of 45 ft., low water and filling reclaimed areas.

Plans and specifications and form of tender may be seen and full information obtained at the office of the General Manager, Moncton, N. B., at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the office of the Superintendent Engineer, Halifax, N. S.

The right is reserved to reject any and all tenders.

By order, L. K. JONES, Assistant Deputy Minister.

Department of Railways and Canals, Ottawa, September 2nd, 1913.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

The sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion lands in Manitoba, Saskatchewan or Alberta. The applicant must apply to the Dominion Lands Agency or Sub-Agent for the Province, or to any Local Agent of Dominion Lands (not sub-agent on certificate conditions).

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within five miles of the land in each of the first three years, on certain conditions. A habitable house or residence is required in the vicinity.

At certain districts a homesteader in good standing may pre-empt a quarter-section of land in one day. Price \$3.00 per acre. Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within five miles of the land in each of the first three years, on certain conditions. A habitable house or residence is required in the vicinity.

A homesteader who has exhausted his homestead claim cannot obtain a pre-empted land in certain districts. He must reside six months in each of three years, cultivate 50 acres and erect a house worth \$200.

FIGHTS FOR THE FLAG

The Siege of San Sebastian

Continued From Last Saturday.

The Frenchmen, however, had many things in his favor. San Sebastian itself was easily a stubborn defence. San Bartolomeo formed a strong outwork to the south, behind this, on the main road which crossed the narrow neck of the isthmus rose a great circular redoubt, formed of casks, and flanked by ruined houses strongly held. These in turn were covered by the strong ramparts which crossed the isthmus, with a powerful hornwork rising high in its centre. Thus, no less than three lines of defence had to be broken through before the town was reached. The town itself must be carried by obtaining a strong foothold while Monte Orzulu, with the stroke of its batteries, covered the whole field of combat, and could be held independently after the town itself had been carried.

The happiest feature for the French was the fact that they had practically an open sea base, and were in daily communication with France. It is an amazing fact that eight years after Trafalgar, and while Great Britain was absolutely mistress of the sea, Wellington could not secure any adequate naval assistance in the siege of San Sebastian. A single British frigate, the *Surveillante*, represented all the naval help the Admiralty could afford. Wellington's transports were captured almost daily by French privateers. The French garrison was perpetually fed by supplies sent directly from France. Vainly Wellington appealed to the Admiralty for ships. "Since Great Britain had been a naval power," he wrote bitterly, "a British army had never before been left in a situation at a most important moment." Wellington's seal, however, was essentially practical. If the navy of Great Britain, he wrote to Lord Bathurst, "cannot afford more than one frigate and a few brigs and cutters, fit, and used only, to carry despatches, to co-operate with this army in the siege of a maritime place, the possession of which before the bad season commences is important to the army as well as to the navy, I must be satisfied, and do the best I can without such assistance." "We have been obliged," he says in the same despatch, "to use the harbor boats of Passages, navigated by women, in landing the ordnance and stores, because there was no naval force to supply us with the assistance we require in boats." Wellington, in brief, in this siege of a hostile port, had to leave the aid of British ships out of his calculation.

But the aid the French derived from the open sea was simply past calculation. Boats came nightly to the garrison from Bayonne, bringing engineers, artillerymen, supplies of every kind, with news from outside world, promises from Soult of immediate relief, and decorations, badges of honor, and crosses of the Legion of Honor in profusion to the soldiers who, from day to day distinguished themselves in the siege. In this way the imagination of the besieged French was fed, as well as their material wants supplied. And the sense that a way of escape to the rear was open, that France was watching their defence, and that every act of valor brought an immediate reward in the shape of some "decoration," or of promotion, bred such a spirit of daring and enthusiasm in the garrison that, says Maxwell—who was actually a prisoner in San Sebastian—"I believe the garrison, individually or collectively, would not have hesitated attempting any enterprise, however difficult or dangerous."

The principles of war are changes, and Wellington's engineers adopted the very plan of attack employed by the Duke of Berwick, who besieged San Sebastian in 1719. Strong batteries were erected on the *Chofres* sandhills, to smite with their fire the comparatively weak eastern wall across the stream of the Urumea. Approaches were simultaneously to be pushed along the isthmus, so as to take in flank wall which the breach batteries were smiting in front, and to smash the defences by which the breach, when made, would be guarded. The plan was simple, and if it had been carried out this siege would never have attained what Napier calls its "mournful celebrity." Wellington, however, was singularly careless against Soult's plan, and left the conduct of the siege to Graham; and Graham allowed the eager spirits about him to over-ride what their impetuosity regarded as the top formal approaches of the engineers. They inverted in a word, Vauban's well-known maxim. "Never attempt to carry anything at a siege by open force which may be gained by art and labor." The British leaders at San Sebastian scorned to postpone the bayonet to the spade or the pickaxe. So there became visible in the conduct of the siege that "raw haste" which is something more than "half-sister to delay."

Batteries were marked out on the night of July 10, 1813; by the morning of the 14th the guns were thundering across the front of the isthmus on San Bartolomeo; but not till the 20th did the breaching batteries across the Urumea begin to smite with their fire the eastern wall of the town. Even at this early stage in the siege the British began to feel the strength of the defences. Fraser writes in his diary on July 19; "The enemy has some good head in the fort; we must feel for it. He fires and takes his measures with judgment." Nothing could surpass the energy with which the siege was pushed. The great breaching battery had ten guns in action, and in fifteen and a half hours of daylight the fire from these averaged 350 rounds a gun; "such a rate of firing," says Jones in his "Journal," "was probably never equalled at any siege." The sustained fury of the fire on both sides, indeed, quickly affected the guns in use. The guns fired from the fort, for example, gave the appearance of two explosions when discharged; the vent of the gun, in a word, being so enlarged that the flash from it was almost as clear as that from the muzzle; while in the English batteries, Jones records, that "some of the vents of the guns were so much enlarged that a moderate-sized finger might be put into them."

The attacks on the two faces of the defences were of course part of one scheme, and should have been pushed on with a wise balance of energy. But Graham, apparently, found it impossible to keep the too eager spirits of his force in check; and, as a result, on the 17th the isthmus was urged on, with fiery energy, and without any regard to the operations against the eastern front of the town. By the 17th

along the slippery strand left at low water betwixt the Urumea and the destroyed wall of the town, till they reached the breach. For those 300 yards they were under a flank fire of musketry from the wall; while Roy had piled the parapet with live shells and ordered the attack to be made. The attack was directed by Wellington to take place "in fair daylight, so that the batteries across the Urumea might keep down the fire of the defenders. Unfortunately, the signal for the attack was given whilst the night was still black, and the batteries on the *Chofres* hills were unable to open fire on the defenders, except at the risk of smiting their own troops.

The attacked force consisted of 2000 men of the 5th division; Fraser led a battalion of the Royal Scots against the great breach; the 88th, under the command of the more distant breach; the 9th, under Cameron, supported the Royals, while the light company of the 9th, and the light company of the Royals, with a ladder party, under Colin Campbell, were ordered to ascend the rock, and the formation of the troops was broken at the very outset. The 300 yards to be traversed was slippery with weeds and rocks, and broken by deep pools of water, while at every step a fierce fire scoured the flank of the broken soldiers. The assault, in a word, from its very first step became the rush of a mob, instead of a disciplined and orderly advance. The globe of compression in the assault, already described, was indeed fired with a blast that filled the surrounding hills with its echoes, and the surprise of it drove the French for a moment from their defences.

Fraser and the principal engineering officer, Harry Jones, led rapidly on to the great breach, followed by the soldiers immediately ahead them; but the mass of the attacking party halted in the dark, to fire at a gap in the wall which they mistook for the breach. In a few minutes the half-filled narrow interval betwixt the wall and the river with a struggling crowd of soldiers, aflame with the passion of battle, but without order or leaders, began to tinkle to the right, and a few disconnected parties followed to the flank of the broken soldiers, and reached the broken crest of the breach, but the French had meanwhile recovered from their surprise. As they reached the crest of the breach, saw below them a deep black gulf, beyond which, in a curve of fire, was a wall of flaming houses and from every quarter a tempest of shot swept the stormers.

Meanwhile the eastern wall crumbled fast under the fire of the batteries across the river. On July 23, the great breach was declared practicable. A breach was made, however, a second breach a little to the north of the first, and the assault was fixed for the next morning. When the troops, in the grey dawn, however, were waiting in the trenches for the signal to attack, the houses behind the great breach broke into flames, and the attack was postponed to the next day; a very unhappy circumstance.

The proposed attack was in violation of the simplest rules of engineering. A breach was to be stormed, in a word, before the defences which covered it with their fire had been mastered. Roy had made these defences exceedingly powerful. The hornwork, or cavalier, at the centre of the southern front, rose fifteen feet above the other defences, and smote the breach with the fire of its guns. A tower on either side of the breach raked it with a flanking fire; the houses immediately behind the breach were strongly defended. The British too could only attack by leaping from the eastern extremity of the trench which crossed the isthmus, and advancing at the double for 300 yards.

will touch the highest mark in looks, taste and healthfulness, because *Regal* excels in the qualities that produce tasty, nutritious bread and pastry. Better flour than *Regal* is not made hence you cannot do better than use it. Remember too, that you run no risk when you buy *Regal*. It is a known flour, guaranteed by us. Get a barrel to-day. We'll give you your money back if it isn't satisfactory.

The St. Lawrence Flour Mills Co., Ltd. Montreal, Canada

regged edge of broken stone on which they stood. Fraser of the Royal Scots, leaped down the farther side of the breach, reached the flaming houses, and died there. Greville, Cameron, Campbell, and other gallant officers broke through the tumult of the crowd, climbed the breach, and fell on their crest. Twice Campbell ascended, and twice he was wounded. Meanwhile, the mass of British soldiers below, with the black river—now filling again with the returning tide and climbing the rocks fast—on one side, and the hostile wall, with its perpetual traverer bullets on the other side, swayed to and fro with sullen shouts and angry answering fire of musketry. But, with military cohesion destroyed, and scourged on both flank and front by the fire of the French, the mass crumbled into clusters, and surging backwards, slowly regained the trenches. When day broke, Fraser of the Artillery, watching from the batteries beyond the Urumea, thought that nothing more than a false attack had taken place; till, in the clearer daylight he could see the rough slope of the great breach mottled with red spots, the fallen bodies of officers and men.

This bloody and ill-managed assault resulted in a loss to the British, in killed, wounded, or prisoners, of forty-four officers and nearly 500 men. Perhaps the best account of the attack is given by Fraser in a private letter written by Colin Campbell at the time, and published in his life.

It was dark, as you know, when ordered to advance. All before me went willingly enough forward, but in a very straggling order, arising, in the first instance, from the order of formation previous to attack being extended the whole length of the parallel in a front of fours, which it (the parallel) would admit of packing when halted, but was not of sufficient width for troops to maintain that front when in movement. We thus debouched from the mouth of the opening made from the parallel, which was not quite so wide as the latter, in twos and threes. The space we had to travel between this opening and the breach—some 300 yards—was very rough.

"I heard that her relatives were boasting of her marriage in high life." "Yes; she married an aviator."

BREAK WHISKY'S GRIP ON YOUR LOVED ONES

Drunkards will tell you with tears of sincerity that they do not want to drink. The craving coming from the inflamed membranes of the stomach drives them to it.

Alcure will soothe the trembling nerves and remove the craving that is ruining your home and stealing at otherwise kind husband or father from you. It costs only \$1.00 per box and if it does not cure or benefit after a trial, the money will be refunded.

Alcure No. 1, is tasteless and can be given secretly in tea, coffee or food.

Alcure No. 2, is taken voluntarily by those willing to help themselves.

Alcure can now be obtained at our store. Ask for Free Booklet telling all about it, and give Alcure a trial.

Cured Diseases of the Kidneys

And is Depended on to Right Stomach and Liver Disorders.

Once Dr. Chase's Kidney-Liver Pills are introduced into the family and their efficiency becomes known they are usually found too valuable to do without. For everyday ailments arising from liver and bowel disorders they bring relief promptly, and when complicated diseases of the kidneys and liver develop they often prove a successful cure after doctors have failed. As an illustration, you may read the following, which was received a few days ago:

Mrs. John Wright, 53 McGee street, Toronto, Ont., states: "We have used Dr. Chase's Kidney-Liver Pills for ten years, and would not be without them. My husband suffered from kidney trouble, and after taking treatment from several doctors, without receiving any benefit, tried Dr. Chase's Kidney-Liver Pills, which worked a complete cure. Since that time we have used them for all stomach and liver disorders."

One pill a dose, 25 cents a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

Recipes Worth Clipping Now

THIS is nice for luncheon or tea. Use either the skin of beef, the top of the round or the neck. Simmer till it is very tender. When cool chop fine and season with pepper, salt, a few grains of nutmeg and the sweet herbs. A teaspoon of chopped onion may be added, if liked; parsley minced fine and sour sherkins chopped fine are improvement. Bind with the liquor in which the meat was cooked reduced to half or less. A half-teaspoon of gelatine softened and melted causes the loaf to hold together. Press into a mold and put under a weight. It to be used at once a few slices of hard boiled eggs placed here and there in the mold are pretty.

Port Wine Sauce for Game.
One-half cup of currant jelly, one-half cup of port wine, one-half cup of stock, one-half teaspoon of salt, two tablespoons of lemon juice, four cloves, a few grains of paprika. Simmer the cloves and stock and part of the game gravy for an hour, let the stock and the cloves. Add the other ingredients and allow to become hot.

Bread Sauce for Game.
Cook together, for ten or fifteen

minutes, one-fourth of an onion and two cups of milk. Add one tablespoon of butter and salt and pepper as needed. Remove the onion and add one-third cup of fine bread crumbs. Melt one tablespoon of butter and stir into it two-thirds cup of bread crumbs. Cover the breasts of the birds with these, brown nicely and pour the sauce around.

Liver and Ham.
Stew separately half a pound of ham and one pound of calf's liver. Chop fine and mix. Add one-half cup of stock or meat gravy thickened with a little gelatine, one cup of fine bread crumbs and two eggs well beaten. Pour into a mold, cover closely, and steam two hours. Nice cold without sauce or hot with butter sauce.

Stuffing for Fowl.
Two cups of stale bread chopped fine, two tablespoons of butter, two tablespoons of salt pork broiled five minutes, one teaspoon of salt, one-fourth teaspoon of pepper, one tablespoon minced parsley and a pinch of thyme or sweet marjoram. Moisten

very slightly, with water in which the pork was boiled.

Cream Salad Dressing.
Three yolks of hard boiled eggs mashed fine. Add one tablespoon melted butter, the yolk of one raw egg, two tablespoons vinegar, one-half cup thick cream, either sweet or sour, one-half teaspoon salt, one-fourth teaspoon pepper. Beat well. This needs no cooking.

Delicious Bread Pudding
Soak two cups fine bread crumbs in one quart warm milk. Add one and one-half cups granulated sugar, one tablespoon butter, yolks of five eggs and whites of two. Put the pudding mold on folds of brown paper in a deep pan, fill half full of water and cook very slowly till the pudding is set. The water in the pan must never boil and a sharp knife insert in the pudding will come out clean when the custard is done.

Drop one-half cup of tart jelly over the pudding and cover with a meringue made of the whites of eggs beaten stiff and added to one-half cup of sugar. Brown slightly in the oven. Eat cold with cold cream.

Why doesn't she take

NA-DRU-CO Headache Waters

They stop a headache promptly, yet do not contain any of the dangerous drugs common in headache tablets. Ask your Druggist about them. 25c. a box. NATIONAL DRUG AND CHEMICAL Co. of CANADA, LIMITED. 122

This oven test means

bake-day "luck"

If your baking results vary, you may find the reason in the flour. For there is only one way that a miller can assure you constant success. An oven test must be made.

So we take ten pounds of wheat from each shipment delivered at our mills. We grind this sample into flour. Then the flour is baked into bread.

PURITY

If this bread proves to be the "lucky" kind—high in quality, large in quantity—we use the shipment. Otherwise we sell it.

You buy luck in flour bearing this name.

No need to merely try your luck.

"More Bread and Better Bread" and "Better Pastry Too"

When A Man Lies

By E. K. Woolley.

"Oh you never can believe a woman!"

There it was again—the old opinion that women are chronic liars. It seems to be so deep-rooted that even truth cannot dig it up.

Yet when it comes to deliberate lying to gain an end or to hide certain matters, or just for the sake of variety for sissors and open-faced lying, the prize must go to masculinity.

A man can lie without a pricking of conscience. He will justify it in the name of business, or in that "all's fair in love and war." And every man believes it his bounden duty and inalienable right to lie to women.

One can tell when a woman lies. Her conscience troubled her. She is little

afraid of her soul's salvation. But a man has practiced so much and his conscience is so seared, that he can prevaricate without a betraying regret. Don't ever forget that the wise ones made Ananias a man.

A man fondly believes he is always believed, especially when he is prevaricating to a woman. Yet sometimes if he could look into the understanding of the woman he'd find there. Really that sensible woman are often more intelligent than masculinity dreams.

It is safe to say that there are more men peacefully sure that their prevarications are holding good than there are wives and mothers and sweet-hearts who are not "wise," but woman

long ago realized the value of apparent credence, and that's how the half-smile can so being in a woman's soul, carefully hidden while she listens to William's whoppers.

Too many of us pride ourselves upon truth telling in the matter of disagreeables. Wouldn't you rather be married to a man who told you that you were looking younger every day than one who commented up your crown's foot? What do you think of a wife who is frank about your faults, but somehow never think of commenting upon your virtues, either real or fanciful?

One of the happiest women I ever knew had a husband who lied to her continually. Everybody else knew he was faithful in her. But nobody told, and she died believing in him.

Fashion Hints On Late Styles

THE mandarin sleeve is one of the newest. It is as loose as the kimono but shows a distinct armhole which is usually cut to meet the waistline.

Butterflies are the fancy of the hour. Girdles are finished in the back with hush wired bows imitating a butterfly. Low-cut evening gowns look from the back like fluttering tulip butterflies. Hats are trimmed with butterflies.

files and draperies are held with few butterflies.

Compose costume make very beautiful costumes possible. Each fabric is beautiful in color, and when combined with another equally beautiful the costume becomes a real picture.

Green is a favorite color this year and there are several shades. Tokay is the new dark shade and prevenche is a lighter shade blending lavender and gray. Taupe is still a favorite; mahogany, copper and marron are fashionable. Green and browns are also favorites and usually combined with black in just the right amount to accent the main color.

Plain and brocaded cloths of the same kind are combined also plain cloth with brocaded velvet. Plaids and plain fabrics are combined.

Politeness A Valuable Cult

IF regarded from no other point of view than as an asset in courting through life, politeness and the observance of small courtesies will be found a very valuable cult.

True, the blustering, pushing man or woman makes a way of its sort, but if closely observed neither can very readily come back another time with any success. Aggressiveness is

but the well bred man or woman knows often needed, but impoliteness never. When it is necessary to emphasize, even that may be done with dignity and in a polite manner, carrying weight far better than arrogance and rudeness ever can.

Many there are who think and say that it is only a matter of taking advantage of the politeness of others. They know that courtesy does not mean to be afraid of anything or anybody, and no mistake is possible. The courteous woman has always the refuge of silence, or perhaps, the privilege of sarcasm, while the polite man can defend himself with his fists if need be, yet help his adversary up with all the courtesy of a friend thereby making a friend of him indeed.

Business Corner

WEALTHY BROKER ASKS DIVORCE FROM "SAHARET"

I have heard it said that saving money is a luxury of the rich. But isn't true—we self-supporting women, in some way or other, can make that luxury ours, if we really want to. It is only a matter of taking

pains and remembering that pennies count up.

Save in small ways—one careful day if you live near enough to your work to walk one way. Thirty cents a week saved amounts to a snug little sum at the end of the year—\$15.00, a week's pay, perhaps. Besides, the walking helps to do you good.

Save on candy, on soda, on chewing gum (if you have the chewing gum habit). The nickels and dimes which drop into your savings fund from these small economies grow into dollars in a very short while and you will find far better uses for them.

Save by wearing sales and buying the things you must have through the year when they are cheapest. Shoes, stockings, gloves and underwear of precisely the same quality vary in price according to whether or not you buy them at bargain times. It is the same with note-paper, neckwear, ribbons, toilet articles, nearly all the items, in fact, which make up a girl's necessary expenses.

Save by taking care of your health —by avoiding colds, and by cutting out the ensuing doctor's bill. Save by going to the dentist four times a year and letting him look over your teeth, so that expensive work on them will never be needed.

Above all, save by learning the habit of saving. It isn't an easy thing to get the habit, but it is the most valuable habit of all to the woman who works. And there is no more pleasing sensation than that which you get when you find your bank account waxing fatter, when the interest on your savings begins to tell you that it is working for you.

Fashion Hints

Ears are coming into fashion again. The hair, which for some time past women have worn low and bandeaux is now brushed back from the face, leaving ears clearly revealed. Ear-rings are consequently in great favor, the latest thing being large tortoise-shell rings or huge drops adorned with bells of gold.

The white glove is reserved in Paris this season for the all white robes, while champagne color gloves, of suede, it goes without saying, are adapted for all other formal toilettes.

Those starving bank clerks who at \$20 per dozen should have heard Poret denounce the martinet souls who spoil good clothes by pinning on \$15 worth of violets.

Notes On Hats

One Montreal milliner shows a sensible hat for inclement weather. The shape is small with a brim covered with old-gold velvet although one may alter the color if desired. The crown is of black patent leather with an ornament of the same. By the way, the black patent leather rose is a feature of some costumes.

One rarely sees a felt hat. Everything is of velvet, silk fur with the effect of very little trimming.

Crowns and brims are usually of contrasting material and this gives the effect of trimming, in a way. An otherwise severe effect can be softened by using a velvet or fur brim.

The "Tommy Atkins" chin strap hat is not grown common but is exceedingly becoming to a fresh young face. Few women will adopt the nose veil which was originated as a fad and is not becoming.

Girls Who Are Pale, Nervous

May Find Help in Mrs. Elston's Letter About Her Daughter.

Burlington, Iowa.—"Lydia E. Pinkham's Vegetable Compound has cured my daughter of weakness. She was troubled almost a year with it and complained of back-ache, so that I thought she would be an invalid. She was entirely run down, pale, nervous and without appetite. I was very much discouraged but heard of Lydia E. Pinkham's Vegetable Compound through friends and now I praise it because it has cured my daughter."—Mrs. F. M. ELSTON, R. D. No. 3, Burlington, Iowa.

Case of Another Girl.
Scanlon, Minn.—"I used to be bothered with nervous spells, and would cry if anyone was cross to me. I got awful weak spells especially in the morning, and my appetite was poor. I also had a tender place in my right side which pained when I did any hard work. I took Lydia E. Pinkham's Vegetable Compound and my symptoms all changed, and I am certainly feeling fine. I recommend it to every suffering woman or girl. You may use this letter for the good of others."—Miss ELLA OLSON, 171 5th St., Virginia, Minn.

Young Girls, Heed This Advice.
Girls who are troubled with painful or irregular periods, backache, headaches, dragging-down sensations, fainting spells or indigestion, should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound.

LIVE TOPICS OF SPORT AT HOME AND ABROAD

MARQUARD TO BE TRADED TO BOSTON

New York, Oct. 23.—Tyler of Boston for Babe Marquard. This trade is expected to be made before Manager McGraw returns from a tour of the world. Negotiations were under way when the leader of the Giants started West last week, and it is learned on excellent authority that everything is ready for the official announcement. This will probably be made now in a few days. It was hoped that the secret could be kept from the fans until the annual meeting next December. Tyler is a young southpaw who has interested Manager McGraw for more than a year. He is still in his infancy so far as baseball is concerned, but McGraw figures that by next season Tyler will be the kingly pitcher among the left-handers.

INTER-PROVINCE OLD COUNTRY RUGBY LEAGUE

Montreal, Oct. 24.—It is not at all unlikely that an interprovincial Old Country Rugby League will be organized in Canada next year. The visit of the Montreal team to Ottawa on Thanksgiving Day worked wonders. The Rugby enthusiasts who witnessed the game so popular in the Old Country, sed with the style of play—the open, spectacular work, which has made the game so popular in the Old Country.

TO AWAKEN INTEREST IN OLYMPICS

Berlin, Oct. 24.—A campaign to arouse interest in the Olympic games to be held here in 1916 was inaugurated tonight in a lecture by Carl Diem, general secretary of the Olympic games. Herr Diem told of the recent trip to the United States of the athletic commission of which he was a member. He described with unmitigated praise athletic conditions in the United States, and said they were an example for Germany. A large audience listened to the lecture. James W. Gerard, the American ambassador, was the guest of honor.

FERGUSON DEFEATS WHITE.
On Black's alleys last night E. White defeated C. Ferguson by a narrow margin. The scores were:
Ferguson . . . 71 84 93 248 82-2-3
White . . . 78 89 80 247 82-1-3

ST. JOHN AND FTON HIGH SCHOOLS TODAY

What promises to be an exciting as well as an interesting game of football is scheduled to take place on the Marathon grounds this afternoon at 3 o'clock, when the St. John High School team will meet the Fredericton High School boys. The local aggregation have been training hard during the past week and are looked upon to emerge from the encounter victorious. Last Saturday the Fredericton team succeeded in defeating the St. John fifteen by a score of 5 to 3, but the local boys feel confident that they will turn the tables today. Their line-up will be as follows:

Quarterbacks—Mooney, Willis and McIntosh.
Halfbacks—Donnelly, Anglin, Barraclough and Morrison.
Forwards—Day, Allan, Jenkins, Kirk, Campbell, Mason and Gorham.
Several spare players will be on hand to enter the game in case their services will be required. It is the intention of Captain Donnelly to secure, if possible, the services of Dr. Malcolm to officiate as referee.

DECISION OF JUDGE MAY BE DEATH OF GAME

(Montreal Star.)
Los Angeles, Cal., Oct. 24.—A decision which may result in the ultimate abolition of so-called boxing contests in Southern California, was handed down this afternoon by Judge Craig, in the criminal department of the Superior Court, when he denied the motion of Attorney W. H. Dehm to dismiss the charges against 12 defendants, who were arrested at the Jess Willard and John "Bull" Young fight, as the result of which Young died. The trial is set for January 7. Judge Craig's opinion covered six sheets of manuscript in which he reviewed the intention of the Legislature in framing a Boxing Law, and the opinion of Judge Willis made two years ago, on which opinion the motion to dismiss the complaint was made. In denying the motion, he said: "The court believes that whether or not the evidence would show that this affair was a sporting exhibition or a prize fight, is a matter that should, under proper instructions, be submitted to a jury, and that for the foregoing reasons the Court holds that the facts alleged in the information constitute a public offence and, therefore, the motion should be denied."

SPORTOGRAPHY "GRAVY"

The first series for the professional baseball championship was concluded forty-three years ago came tomorrow at Philadelphia, when the Brooklyn Atlantics took the third and deciding game from the Cincinnati Red Stockings. These two clubs were the pioneers in professional baseball, and the rivalry between them has been and bitter. It was not considered safe to play the decisive contest in either Cincinnati or Brooklyn, so the City of Brotherly Love was chosen as a neutral ground. The first game of the series for the championship was played in Brooklyn, and resulted in a victory for the Atlantics by the close score of 3 to 2. This was the first time the Red Stockings had suffered defeat since they had turned professional, and the pill was a bitter one to swallow. The Brooklyn team visited Cincinnati, and on the home diamond the Reds won 14 to 3.

The men are charged with violating Section 412 of the Penal Code. The complaint against Eddie Webster, one of the second, was dismissed, at the request of Prosecuting Attorney Joseph Ford.

WHITE SOX WIN

Blue Rapids, Kans., Oct. 24.—The Chicago White Sox defeated the New Yorks today 8 to 5. Wittse was pounded by the Chicago players for four home runs. Score: Chicago . . . 01311020x—8 10 0
New York . . . 10010023—5 12 2
Batteries—Benz and Daly; Wittse and Winsco.

Brooklyn Won First Professional Championship

Wright, began their career as professionals in 1883, and were the first baseball players to receive a regular salary, although the poorest bush-leaver of today is better paid. In 1889 the Reds made a trip from the Atlantic to the Pacific, going as far west as San Francisco and winning fifty-six games, with one tie and no defeats. That year they defeated the Brooklyn Atlantics 22 to 10. The Troy Haymakers, with the first of eastern professional clubs, were defeated 23 to 31, and the Philadelphia Athletics 27 to 18. The smallest score made in any game that year was when the Reds defeated the New York Mutuals, 4 to 2. Another exciting game was that with the famous Forest City of Rockford, Ill., when the Reds narrowly missed defeat. Until the ninth chapter the score stood 14 to 12 in favor of Rockford, but in the ninth the Reds put over three tallies and won the game. The Reds had only one pitcher, Asa Brainard. Douglas Allison was the backstop on the pioneer "pro" club, and Harry Wright was center fielder and his brother George, shortstop.

The men are charged with violating Section 412 of the Penal Code. The complaint against Eddie Webster, one of the second, was dismissed, at the request of Prosecuting Attorney Joseph Ford.

SAYS HOCKEY DOWN HERE IS GOOD ARTICLE

Montreal, Oct. 24.—Negotiations are under way for a game or a series of games between one of the Maritime hockey teams and the Canadiens, to be played in Montreal.
Manager Kennedy, who is going to tour the lower provinces with his team, as he did in 1911, says he will write the Maritime Province Hockey League to arrange the schedule so that one team—the one he selects—will be able to visit Montreal.
Mr. Kennedy says that if the Maritime Province Hockey League finds it inconvenient to arrange the schedule in this way, he will endeavor to bring one of the teams here at the end of the season.
"Many people," he said, "judge Maritime hockey by Sydney's poor showing in the Stanley Cup series with Quebec last season. Now, those games cannot be taken as an example, for the Sydney team was undoubtedly in poor condition at the time. We found when we invaded the lower provinces two winters ago that the brand of hockey was really good. We shall try to bring the best team in the league up to Montreal, and if we are successful, there will be many people surprised. It will not be very long before that league will have to be reckoned with seriously," said Mr. Kennedy.

THIS DATE IN ANNALS OF PUGILISM

1909—Bill Lang knocked out Bill Squires in 20th round at Melbourne. This bout was for the heavyweight championship of Australia, once the battlefield of so many champions, but now a producer of pugilistic lemons. Squires was hailed as a great champion when he landed in San Francisco in 1907, only to be knocked out in the first round by Tommy Burns. In 1908 the Canadian again knocked out Squires in France, and a little later repeated the trick in Australia. Burns also defeated Lang in two bouts in Australia. Since then Lang has been whipped by Sam Langford, Sam McVey and several others.
1903—Tommy Burns and Billy Moore fought a round draw at Houghton, Mich.
1911—Bat Nelson defeated Monte Dale in 15 rounds at Manchester.
