

ARIBOU GIRL WAS MURDERED

Body of Miss Emma Jansen Found in Clump of Bushes On Roadside SHOT THROUGH HEAD

Officials Anxious to Learn Whereabouts of Her Admirer—Victim Had Attended Circus and It is Suspected Jealousy is Motive for the Tragedy.

Carlton, Me., June 28.—The body of a young girl, the daughter of Jacob Jansen, a farmer, was found in a clump of bushes on a road. She was shot through the head, and her body was dragged into the bushes.

Tonight, pending the autopsy, which will officially determine the cause of death, the county authorities are following the only clue to the explanation of the murder. From the road, it was ascertained that the girl had attended a circus on the night of the tragedy. She was shot through the head, and her body was dragged into the bushes.

ACTOR INVADERS PROHIBITED P. E. I. TERRITORY IN AUTO

Considerable Agitation Over Permission Granted by Premier to Physician With an Urgent Case.

Charlottetown, June 28.—There is considerable agitation in the city over the issue of an automobile being driven into the province by a physician from the P. E. I. territory. Permission was given by the premier to Dr. Ross to run the machine on a case of a young girl.

ADMIRALTY COURT ORDERS STEAMER STORSTAD SOLD

Montreal, June 28.—Mr. Justice Duffin, in the admiralty court, ordered the sale by auction of the collier Steorstad, which rammed and sank the Esmeralda on the night of the 21st inst.

NEWCASTLE NEWS

Newcastle, June 28.—At the rectory, Newcastle, last night, Rev. Father Dixon officiated in marriage Miss Bertha McGrath to Mr. John C. Wood.

Some of the Westmorland county council members have complained that a large amount of grass was winter killed, and that as a consequence the prospect for the good crop of hay was not as bright as might be.

TELLS BRITISHERS TO QUIT MEXICO

Sir Lionel Carden Sees Danger

Making Arrangements to Send Them Out of the Country

Mexico City, June 28.—In view of the existing conditions in Mexico Sir Lionel Carden, the British minister, today advised all British subjects temporarily to leave the country. He said that the shortage of fuel used in the operation of trains was becoming more acute daily and that the trains probably soon would stop running, which would make difficult the departure of persons in the interior.

TURN OF THE TIDE FOR LIBERALISM IN ONTARIO

Gains in Provincial Elections Cheer Liberal Party in Ottawa

Federal Contest Likely in October

All Depends Now on Result in Manitoba—Conservative Leaders in the Capital Favor Taking the Plunge Now Before Things Grow Worse in the Country at Large.

Ottawa, June 28.—The results of the Ontario elections have apparently brought cheer to both political camps in the capital. On the Liberal side, it is pointed out that Mr. Howell, who had only seventeen supporters at dissolution, comes back with nearly twice as many, in spite of the combined efforts of the federal and provincial Conservative machines, the opposition of the organized liquor interests and lavish expenditures for a huge campaign fund.

THE WOMAN'S CORNER

EFFICIENT HOUSEKEEPING

BY HENRIETTA D. GRAUHL

(Domestic Science Lecturer)

COOKING IN THE REFRIGERATOR

When we consider how the plan of the refrigerator corresponds almost exactly with that of the fireless cooker it reconciles us to this seemingly impossible feat.

If you read the directions given in this department last week for building a cooker from a box you will see how the top of the refrigerator only needs to have a sheet of steel wool or sandpaper put around the cooking utensils.

Line the well as directed, using aluminum in sheets or cooking tin. You may not need a pad if the lid fits snugly in place.

The lower part of the refrigerator can be utilized for baking in this way. Slide a gasoline oven, or any sheet iron oven into it.

If you have no oven you may use a tin box but the oven is made to hold in the heat, and is better. Lay a sheet of asbestos in the bottom of the oven and over this a sheet of aluminum, sheet iron or block tin, covered with asbestos.

On this you can place a very hot stove lid, or soapstone, or four bricks, to give heat. Then put in the food to be baked and place another hot stone, or tin, or brick, on this.

Close the oven door and the door of the refrigerator and when the stones or bricks are cold the food will be baked and well browned.

The "Aladdin oven" is very good for this purpose and is very low priced. It can be used on the gas or gasoline stove also. Then there are several other separate ovens that sell for about a dollar and a half.

As you have said, the food must be well started toward cooking, that is, it must be thoroughly heated through before it is put into the cooker, then it needs no more attention until it is needed.

The first cookers on the market are guaranteed to bake cakes, biscuits and other things from the beginning, and they do but they are costly and some special experience is needed to make them give perfect satisfaction.

It is quite sufficient for most of us to know that food cooks without fuel and without attention in the cooker. We are willing to try it over the fire without complaint.

TRIED RECIPES

Frozen Orange Souffle. Cover half a box of gelatine with half a cupful of cold water and soak for 40 minutes; then add half a cupful of boiling water and stir until the gelatine is dissolved.

Callied Strawberry Puree. This is a most delicious manner of serving a summer fruit course. Place in a large bowl three shredded oranges, one diced banana, a pint of large strawberries that have been cut in halves and one cupful of chopped cherries.

Asparagus and Peas, Scalloped. Wash thoroughly one bunch of asparagus. Remove the hard ends and cut in two-inch lengths and cook in sufficient water to cover, for 10 minutes.

Ice cream can be kept hard for twenty-four hours by placing it in a paper cooking bag. Fold the ends of the bag over tightly to keep out the air, and then place in the refrigerator.

Raw wicker should be scrubbed with a stiff brush and white soapuds. Rinse and dry quickly; then brush all over with sweet oil and turpentine, equal parts mixed. When dry, wipe off with thick, soft cloth.

To make delicious tea coffee, use one quart of strong coffee; boil a quart of milk and add this to the coffee, and then pour in a pint of cream. Whip in the refrigerator and serve with whipped cream.

An egg to be perfectly boiled should not be boiled at all. Fill a medium-sized pitcher with boiling water and allow the egg to lie in the water for five to eight minutes. It will be soft but evenly cooked.

A good chicken is known by soft feet, smooth skin and soft cartilage at the end of the breastbone. An abundance of pinfeathers always indicates a young bird, while the presence of long hairs denotes age.

Every inch of old tablecloth should be saved. When the tablecloth is past mending, it can be cut into tray cloths, bread cloths, kitchen tablecloths, and it will make very good kitchen towels for wiping glassware.

If your blue serge suit wears shiny, remove it in the following way. Make a very strong blue water, sponge the material with it, allow to dry slightly, spread on an ironing board, cover with a piece of muslin and press with a hot iron.

When sweeping a room, dust can be prevented from rising by dipping a newspaper in salt water, tearing it up in small pieces and scattering them over the carpet. This not only causes the absorption of the dust, but brightens the color of the carpet.

FEDERAL GRANT OF \$49,407 TO NEW BRUNSWICK

Ottawa, June 26.—New Brunswick's share of the \$500,000 voted by parliament this year to the provincial governments under the Agricultural Instruction Act passed last year will be \$49,407.

The New Brunswick grant is to be spent as follows: Transportation of agricultural students, \$1,000.

Provincial officers to inspect and instruct in agricultural work, \$2,000.

Director of elementary agricultural education, \$2,500.

Courses of training for teachers, \$3,000.

Travelling instructors, \$18,000.

Women's institute, \$3,000.

Drainage and soil cultivation, \$2,000.

Demonstration farms, \$1,000.

School gardens, \$2,400.

Contingencies for the carrying on of any of the above services, \$1,770.

Prize Edward Island grant is to be spent as follows: Agricultural education in connection with Prince of Wales College, \$4,000.

Short courses in agricultural training, \$2,000.

Live stock judging classes, \$800.

Demonstration work in horticulture, sheep and poultry husbandry, \$2,000.

Building for agricultural centre, Summerside, \$4,000.

District representatives work, \$4,500.

Travelling instructors, \$18,000.

Office assistance, \$1,000.

Introducing nature study in public schools, \$7,892.

Total \$49,407.

EFFORT HAS BEEN TO MITIGATE THE CURSE, IN SOME WAY REFORM OR PATCH UP THIS EVIL WORLD THAT IS UNDER GOD'S PATH.

Evolution is his watchword and cure for this method. This is his theory of religion, believing he does, that in every human being there are the possibilities of noble character.

It does not need to be "born from above" but worked up from below.

As to the world at large, it is doubtful if a little "below-grade," but all that needs to be lifted up by the united efforts of philosophers and philanthropists, and a great many of them are endeavoring to do it, by the vigorous sociological jack-screw.

If it could be done in that way then John should have had a vision of the ideal city rising Chicago did, out of a bog, whereas, instead of that he saw it "coming down from God out of Heaven."

When man builds upward it is Babel, and the end is confusion and strife, but a true Jerusalem is from above, and its city that hath foundations and its builder and Maker is God.

Man seeks to patch up the old, but it won't do for good. The new piece of cloth upon the old garment means a worse rent, and a new wine put into the old bottles will cause them to burst.

I heartily agree with Rev. R. J. Haughton in his contention that we should not waste men to do right nor save them to a better environment, "what men need is the gospel that saves and makes character that is inwrought by the Holy Spirit. The natural man is totally depraved and apart from a work of God within is wholly unfit for His presence."

It is not a matter of "if" but "when" and "how" we shall be able to do it. It is not a matter of "if" but "when" and "how" we shall be able to do it.

It is not a matter of "if" but "when" and "how" we shall be able to do it. It is not a matter of "if" but "when" and "how" we shall be able to do it.

It is not a matter of "if" but "when" and "how" we shall be able to do it. It is not a matter of "if" but "when" and "how" we shall be able to do it.

It is not a matter of "if" but "when" and "how" we shall be able to do it. It is not a matter of "if" but "when" and "how" we shall be able to do it.

It is not a matter of "if" but "when" and "how" we shall be able to do it. It is not a matter of "if" but "when" and "how" we shall be able to do it.

THE DWELLING

may not dwell where olives shake their silver over the silver lake, or where the citron sheds its snow at dawn and at sunset glow, and nightingales their music make.

may not dwell where palm trees set against the sky their silhouette, nor where the cinnamons are filled with steam, sunnily distilled, of blended rose and magnomette.

What matters it where'er it be, if dwelling lies, by land or sea, if the days of life slip past toward the great ocean vague and vast.

may not dwell with memory, may not dwell with memory, may not dwell with memory.

may not dwell with memory, may not dwell with memory, may not dwell with memory.

may not dwell with memory, may not dwell with memory, may not dwell with memory.

may not dwell with memory, may not dwell with memory, may not dwell with memory.

may not dwell with memory, may not dwell with memory, may not dwell with memory.

may not dwell with memory, may not dwell with memory, may not dwell with memory.

ABE MARTIN

No less reliable and dignified a medical publication than the London Lancet becomes enthusiastic over merits in the pancake which most of us have hardly suspected.

The origin of this popular pancake, it says, lies in the hands of a remote antiquity; but wherever man has attained to any degree of civilization he has taken to the pancake.

Curiously enough, too, it has always been associated with religious festivals of the more hilarious type. Shrove Tuesday is pancake day, the day upon which the pious person takes one more fine before entering upon a period of sobriety and fasting.

The pancake is entirely worthy of the high place it has achieved in human regard; for, in addition to its palatable and nutritious qualities, it is a complete and well-balanced diet.

It is not quite certain that the great American pancake is identical with the English pancake, but it belongs to the same family. There are very few, more-

When a number of men-of-war dropped anchor in Belfast Lough the Ulster Volunteers fore and aft Union Jack masted high on their signalling station and the Volunteers gathered on the quay sang the first verse of God Save the King.

The sailors and marines on the vessels returned the salute by singing the second verse of the anthem.

SUSSEX ENJOYS BUILDING BOOM

New I. C. R. Station, Armory, Agricultural School and Improved Hotel and Bank, Besides Many Private Residences Mean Big Expenditure of Money in Kings County Town—Station One of Best on the Road.

Sussex, N. B., June 27.—Not for many years have the people of Sussex seen such building activity as has characterized the spring and summer of 1914.

New buildings have been erected, others are now in process of construction, and the ordinary attractiveness of the pretty little town of Sussex, and the handsome new depot is in keeping with the progressive strides made by it in the last several years.

Hotel Improved. Under the proprietorship of R. A. McDonald extensive remodeling is being done to the Depot House so that it seems almost like an entire new building.

The "corner grocery" which for many years stood adjacent to the Sussex branch of the bank one of the most attractive in its lengthy chain. The work will greatly increase the size of the track.

Another construction work of more than ordinary moment is the building of the splendid new armory in accordance with the plan which our minister of war and European wars—Col. Hon. Sam Hughes. The contract for this fine structure has been awarded to George McArthur, of St. John, and he has a crew of workmen engaged in the preliminary task of excavating. It is to be located in Main street and is to be the most recent design and finish arranged after the plans approved by the department at Ottawa.

A splendid new building of brick for use as an agricultural school to cost about \$20,000 is also to be erected this summer by the provincial government.

Many new private dwellings of wood and concrete are rising about the town swelling the number of splendid residential buildings to be seen. Most of the new residential buildings are in fact centres of the town but a few are being erected on the outskirts.

All these various works mean a busy summer in Sussex. Already much has been done but what remains is of important dimensions and when all is finished the citizens can well feel proud of what has been accomplished in such a small space of time. Some of the works were huge undertakings and were executed on an elaborate scale. There is much satisfaction amongst the people over the many new and handsome structures which have been added to those already established.

Campbell High School Entrance Exam. Campbellton, June 26.—H. H. Hagerman, of the provincial normal school, and Mr. Cowperthwaite, of Moncton, are in town in co-operation with Principal Carr, of the Campbellton high school, carrying on the work of examination for the high school entrance. There are 24 in all writing the examination, 20 of these are from Campbellton and eight from other parts of the county. The boys are in the majority in this instance, being 18 out of the total.

Dr. Hutchinson of Main street, was the preacher at the opening of the new Calvary Baptist church at Sydney, N. S., last Sunday. Rev. J. B. Brown, the pastor, deserves much praise for his ability in leading his people in the building of this beautiful and up-to-date church.

Charleston, W. Va., June 26.—State-wide prohibition of the liquor business Tuesday midnight. It brings the total number of states in the prohibition column up to nine.

NOT VERY "VICIOUS" LOOKING

The Standard on Saturday published the above picture of F. B. Carvell and E. S. Carter and referred to Mr. Carvell as showing "viciousness." The smiling Carvell in the picture does not look very "vicious." By that word the Standard merely means that he sometimes makes it hot for the enemy. And he does.

Three I. C. R. Men With Combined Service of 115 Years Retired

William B. Dunn Tells of Railroading in Old Days TWO WEEKS LATE Old Timers on Run from Halifax to St. John Thought Nothing of Spending Several Days on Journey—Gathered Wood Along the Track to Fire Engine—Alex Ward and Isaac Campbell also Superannuated.

ALEX. WARD.

Since retiring, Mr. Dunn has been residing at his home, 274 Main street. He has not been at work since several months ago owing to an attack of neuritis, which is a mild form of what is known among men of the road as "railroad paralysis." He was therefore practically forced into retirement and submitted his application for superannuation, which was granted last week.

DO NOT TAKE THE FOR WINTER CROPS IN WEST

Winnipeg, Man., June 27.—George Bury, vice president in charge of the Western lines of the C. P. R., has returned from an extended trip through the west. Asked about the crops, he said:

It must be remembered that this year there are one and three quarter million more acres sown in Manitoba, Saskatchewan and Alberta, than last year, making a total of almost twenty million acres.

From observation, and inquiry from the company's agents and many farmers, he has no hesitation in saying that the crop is making excellent progress, and with average weather, conditions the largest amount of grain ever harvested, is in sight.

The board of governors for the home for delinquent girls, was formed at Toronto Thursday. It is made up of seven Presbyterians, seven Methodists, three Baptists and three Episcopals. In the absence of the chairman, the lieutenant-governor of Nova Scotia, presided, and reported that there was about \$20,000 subscribed towards the fund for a home, and also that repairs were being made on the building at Truro, which will be opened on Sept. 1. Rev. H. E. Thomas and Rev. Gordon Diethe of this city are on the board of control.

C. P. R. COUNSEL ARGUES

STORSTAD CAUSED DISASTER

Quebec, June 26.—Because her wheel was first put to port and then, without the authority of the officer in charge, put to starboard, the Empress, a C. P. R. train, together with the route to Shediac, was wrecked on May 29, in which 1,014 persons lost their lives.

Mr. Aspinall further argued that to find that the Empress starboarded her helm, as assumed by the Storstad legal battery, would be to charge perjury to Captain Kennell, who had claimed no alterations took place in the heading of his ship and that she was stopped like a log in the water, as indicated by the signal heard on the collar.

Quebec, June 26.—Contentions that the commission by the captain and officers of the lost line was false; that the present heading of the Empress was the heading of the Storstad's, and that the Storstad's owners' contentions as to how the collision took place, and that Captain Kennell, supported by the appearance of the collar after his steering gear had broken down, lost his head, formed the main part of the address made this morning by C. S. Hedges. He attempted to show that the collision was caused solely by the Empress being stopped directly in the path of the Storstad.

After thanking counsel for their close application to their several tasks, Lord Mersey adjourned the sittings of the commission.

Lord Mersey said that he would not be surprised if under the circumstances Captain Kennell had lost his head. He said he was, however, how did the boats come to be in a position where a collision took place?

Raisins and currants will sink to the bottom of the cake. It is supposed to prevent it. Put the raisins or currants in a dish and set on the bottom of the stove; stir them and see that they do not burn. When thoroughly heated, add them to the batter.—Dallas News
