MOFFATS

Unlike the heat of peraleusus quackeries which boast of vegetable ingredients, the LIFE MEDI-CINES are purely and solely vegetable; and contain neither forcurry, nor Antimony, nor Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants; the virtues of which, though long known to several indian tribes, and recently to some eminent pharmaceutical chemists, are also gether unknown to the ignorant pretenders to medical science; and were never before against gether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the costs of the stomach and bowels the various impurities and cradities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medical settles with the convolutions of the small intestines. la 2s. St. to

Our London letters, and some extracts, give full details of the Ministerial crisis in England. We have to exercise our patience for some days yet before we shall have intelligence of the result: we are still inclined to adhere to our forme opinion, that it must end in the re-assumption of office by Lord John Russell with a coalition, or Ministry of compromise.

A private letter from England, from a quarter likely to be well informed on such matters, tells us that the Duchess of Kent has been notoriously under Jesuit influence for two years, and that, though she at present conforms to the worship of the Church of England, it is very likely that she did interfere. The question is, however, very far will ultimately make profession of Popery openly; the Queen is said to be highly indignant, so much so that she will never allow the Royal children to be alone with the Duchess, their grandmother.

Some of the London mob, on the day that the Queen opened Parliament, espied a Yeoman of her Guard in his red stockings and other gaudy habiliments, and treated him to a furious huoting through several streets!

The Marriage Affinity Bill, giving authority to marry the sister of a deceased wife, has been d feated in the House of Lords, by to to 18.

The Transcript informs us that the Reverend Hibbert Binney has been appointed to the Bishopric of Nova Scotla. The appointment was made by Earl Grey, just before his resignation, and, it would said the recommendation or knowledge.

How long do the Clergy of these Provinces intend to submit to treated lightly. On that fama we felt it our duty to the system of exporting Bishops, made, like par- notice the charges against one of ourselves; but before ticular articles of hardware, to order, that order, too, not emanating from them? We look on it as a scandalous thing, and not to be patiently herne, that the solitary piece of Church preferment which our hard-working Clergy can expect to Minister of the Crown; the wrong was sufficiently striking, when inflicted by an Archbishop or the Society for the Propagation of the Gospel; it becomes atrocious when endured at the hands of a mere Minister of State.

The Nova Scoulans are about to close the Gut of Canan against United States vessels, claiming it to be a part of their inland navigation. The Gut of Canso divides the Acadian Peninsula from the Island of Cape Breton, and, by passing through it, about three hundred miles of navigation are saved to vessels sailing from New England ports to the Gulf of St. Lawrence. The closure of this passage is another proof of the bungling that has led our negociations with the Americans relative to Reciprocal Trade.

The Despatch from Earl Grey, on the subjet the Clergy Reserves, to which I allused my lest, has been published, along with that of ord Elgin which accompanied the Address of he Canadian Legislature. In 1831, Lord Goderich, then Conial Secretary, invited the Canadian Legislature secularize the whole of these Reserves; but the Assembly and Legislative Council could never agree to any measure till 1839, when, under Lord Sydenham's management, a Bill was passed for dividing them among certain of the more influential Denominations. The Imperial Government, instead of advising Her Majesty to assent to the Bill, introduced a measure of their own, and carried it-the Law under which the Revenues are now distributed. The most singular part of the affair is, that three successive Colonial Secretaries had declared that the question was one over which the Imperial Parliament had no jurisdiction, and that it would be unconstitutional for it to interfere. And yet, after all, unasked, it from being disposed of. The new Imperial

EUROPEAN AFFAIRS.

(FROM OUR OWN CORRESPONDENT.)

LONDON, 2'st February, 1851. The Chancellor of the Exchequer made his inancial statement on Monday evening, and I am not going beyond the bounds of truth, when I say hat his Budget has given general dissatisfactionn the House of Commons, in the Metropolis, and by the Press, it is denounced as "disappointing the reasonable expectations of the people." The odious and oppressive Income Tax is to be continued, and Sir Charles Wood, who strongly op osed its imposition when out of office, is now s mored of it, that he thinks it the best plan which can be resorted to for raising revenue. He roposes that it shall be continued for three years onger; but no one dreams that, even at the end of that period, it will be done away with. The sum is vast, and its collection comparatively easy and the Finance Minister cares but little for the ortunate victims who have to pay their 7d. in the nound. As for the Window Duty-although the surplus is sufficient to admit of the repeal o the entire impost, the Chancellor of the Excheque does not intend that the country shall derive much benefit from it : indeed, according to the plan he proposes, I shall be very much surprised, if, in end, any relief worth mentioning will be afforded. The extent of the reduction is one-third upon the houses which at present pay Window Tax; but, by the new scheme, a considerable ortion of property hitherto exempted will be biect to taxation. The substance of his prosition is as follows:-"All houses now paying Wiodow Tax, but not of the annual value of £20, to be entirely exempt. All not now paying Window Tax, but of the annual value of £20 or upwards, to pay two-thirds of the lowest Window Tax, viz., 12s. All of the annual value of £20 and New bouses to pay is, in the pound on their anvalue, but if they be occupied as shops, houses, or farm-houses, 9d. in the pound public-houses, or farm-houses, 9d. in the pound only." The new House Tax is not to extend to tream. Sir C. Wood refusing to meddle with Checory, the present Differential Duties on Coffee, say 8d. per lb. on Foreign, and 4d. per lb. on Colonial, are to be abolished, and un uniform Napoleon is no friend of mine, and would be none say 8d. see ib. on Foreign, and 4d. see ib. on present, appearances are against this, and as Louis Napoleon is no friend of mine, and would be none teduced duty of 3d. ser ib. on all sorts is to be to England, if he dared "to seduce the imagina-This will absorb £176,000. the net loss £1.280,000. This amount deducted from his estimated income of future years, will leave a surplus of £612,000. A perfect storm of clamours followed up Sir C. Wood, but as his statement involved so many considerations of publie policy and principle, it was agreed to defer the discussion of the Budget till this night. As I have already mentioned, no one appears satisfied with the Chancellor of the Exchequer's statement. The Liberal papers abuse Sir C. Wood without mercy, whilst the Conservative journals seem to think that his official days are numbered. The Londoners are already in arms about the Window Tax, and the position of the Government has become rather precarious. The state of parties is most critical. The majority of 14 only, in a House of 550 members, upon the question of Protection, as it really was, is "a great fact," and under these complicated circumstances, it is very Cabinet may be in no hurry to carry out the difficult to predict the fate of the Whig Budget for 1851.

It does not appear that the votes of the Irish members affecte! Mr. D'Israeli's minority on Thursday week so much as has been represented. The only Irish members who voted for Mr. D'israeli's motion this year, who voted against him last, were Pevereux, Keogh, McCullagh, Sir T. the Irish members did not so very much swell the minority. It is true that James Fagan. Moore. Lawless, and O'Brien, voted this year, and not at all last ; but the chief strength of Mr. D'Israeli's new allies consisted of English members, the most conspicuous of whom were W. J. Chaplin, H. T. Hope, Viscount Jocelyn-all Peelites : Viscount Anson, the Earl of Euston, W. M. Bunbury, and G. Muntz-Liberals : Feargus O'Connor and G. Sandars, M. P. for Wakefield. The members who voted for D'Israeli this year who did not vote at all hast year, were no fewer than 37. ed true to their principles-Cardwell, Masterman, Sir J. W. Hogg, Sidney Herbert, J. Sandars, Sir tection is not quite " so very dead and buried" as Cobden and his crew would have us believe.

The division on the Papal question, last Friday was decisive as to the feeling of the country or the subject. No fewer than 395 members, constituting the political and moral strength of the I understand that, after all, the seven gentlemen | House, appeared ranged against a minority of 63, who were on the "Council" with Dr. Burns of whom about 15 were English members, and all subscribed no second document: only the one you the rest Irish. Roebuck and Hume absented themselves. Bright, Cobden, Milner Gibson, W. I learn, privately, from Haldimand, that the J. Fox, Sir J. Walmsley, A. Henry, and, in fact, whole policy of the Government, and Brown and intellect, were scarcely ever brought together, clauses only convinces me that the measure, as i stands, will prove wholly inadequate to check the future attempts of the Court of Rome in its designs upon this country. Of course the Bill, as it is presented by Ministers, would be carried by mmense majorities in both Houses, so far as i goes; but I believe that Lord John Russell has to vercome a far more dangerous opposition than any yet offered, before he can succeed in passing his Bill into law. It remains to be seen whether the Conservative party will not propose more stringent clauses, in order to aim at Synodica Episcopate action, to render nugatory the Canon Law, which is threatened to be introduced, and efectually prevent the introduction of future Papal Bulls into the United Kingdom. As I have no doubt some such amendment will be proposed, I have yet to learn its precise scope and tendency, before I can predict how far it will command the

upport of the independent Liberal members. Last night Ministers were beaten in the House Commons, by a majority of 2 to 1, on a motion by Mr. Locke King, for the Equalization of the County and Borough Franchise, so as to allow of £10 voters in Counties.

Several elections have lately taken place. Mr. larrow has been returned for South Notts, by a najority of 11 over Viscount Newark-both were ectionists, and nearly 3000 votes were polled The Hon. F. Lawley, a Liberal, has been elected for Pontefract, and Mr. Baird, a Conservative, ha been chosen to represent the Falkirk Burghs, by a large majority over Mr. Lock, Ministeria Mr. Child and Colonel Gilpin, both Protectionists are sure of the vacant seats for Bedfordshire and

Sir Charles Wood's good fortune has occasioned

his official demise. An embarrassment of riches has broken up the Cabinet, and a fiscal surplus yet, seem to shrink instinctively from a dissoluhas proved more detrimental to the Whig Ministry than a deficiency. Other causes, it is certain, have contributed to bring about the event which, in the course of the week, has taken the public by surprise; but the derision with which Sir Charles Wood's financial propositions were received, there can scarcely be a doubt, has largely influenced Lord John Russell to resign the Premiership into the hands of the Sovereign. Diffi-G. Clerk, and the Marquis of Douro, were the culties in the Ministerial path were fast accumumost important of these; the absentees, taking lating. The narrow majority of 14 on Mr. D'Israeli's motion, manifested the deep conviction of the House of Commons on the subject of agricultural distress; while the Ministerial plan for its relief was the relinquishment of the comparatively paltry sum of £30,000 acquired by a duty upon foreign seeds. The Income Tax, it was plainly intimated, was to be continued for three years, with unmitigated rigor; and farmers were o continue to pay a tax upon profits whilst enduring ruinous losses. Professional and trading neames, notwithstanding the proved injustice of the scheme, were to continue mulcted as real property; and from the disregard of public opinion respecting the inequitable assessment of the tax, relief through the Whig Ministry became expected only as a consequence of the most strenuous and persevering opposition. This had been announced, and the temporary fusion of parties fo oppose the details of the tax, became an assured ent. Of their strength, no accurate estimate could be made; but although it might not prove overpowering, its formidable character it was impossible to overlook. Defection, too, amongst of justice and equity, and its gradual reduction the supporters of the Ministry, was also to be ex- and ultimate repeal: As a boon to the agricultur- ship will prove by his statement who ought of an almost equally powerful resistance was to be anticipated. The Papal aggression presented another difficulty, for, notwithstanding the famous Durham letter of the Premier-so full of "sound and fury" as it was-the measure, introduced to thwart the "insolent and insidious" designs of the Pope, gave universal dissatisfaction, dealing rather with Popish titles than with Popery itself, and treating of " signs rather than the thing sigified." Finally, the defeat of Ministers by the large majority that voted in favor of Mr. Lock King's motion for an extension of the franchise. plainly manifested the declining power of the Ministry in the House of Commons. Such are the public, and, so far as yet known, the recognized causes of the Ministerial revolution. Mor emote and private reasons may exist, but of these there is little chance of a public avowal.

On Saturday, Lord John Russell, stung by the esertion of his own triends, on a question of Parliamentary reform, and, fearing to be in a inority upon the Income Tax, which the Oposition, led by Mr. Herries, had sentenced t condemnation, placed his resignation in Her Majesty's hands. Lord Stanley was commissioned to form an Administration, but upon condition which appear to have been unacceptable to the Protectionist leader, for his Lordship intimated t Her Majesty his inability then to form a Cabinet. On Monday, Lord John Russell explained the eition of affairs to the House of Commons.-His Lordship informed the House that, on Saturday vening, he had again been sent for by the Queen who informed him that Lord Stanley was not then prepared to form a Government. Mr. D'Israeli gave the flattest contradiction which words could convey to this statement. > A RACE PROPOSED .- A shipbuilder in Liver, pool has challenged the American shipbuilders to pool has chairenged the American shipbuilders to construct a clipper-built ship of certain dimensions, and on a liberal sc le, both vessels to be of precisely the same tennage. The ships to sail from Europe to the East Indies and back, or to make a circuit of the earth. A few weeks ago it was asserted that a party of gentlemen had already subscribed a large and toward building already subscribed a large sum toward building a vessel to compete with one of English con-struction, but it was subsequently affirmed that they had abandoned the scheme. We see by no they had abandoned the scheme. We are by no means sure that such a challenge ought to be accepted. It would involve a responsibility of indissional expenditure and national reputation greatly disproportionate to the tumost good that would result from the rial. Our shipbuilders are stendily and surely acquiring a renown for the construction of fast saiding vessels, which will eventually set the question of supremacy at rest. In so long a race as that proposed many contingencies might arise. to prevent any useful result from being reached. One vessel might be dischled by storms, either, or both, might be cast away. Nor would a single trip decids the question of supremacy.

PRACTICAL AGRICULTURE."

By Henry Stephens, F. R. S., of Edinburgh, Author of the "Book of the Farm," &c., &c., ac., assisted by John P. Nortos, M. A., New Haven, Professor of Scientific Agriculture in Yais Codlege, &c., &c.,

This highly valuable Work will comprise two large royal octavo volumes, contistining over 1400 pages, with 18 or 20 aptended Steel Engravings, and more than 600 Engravings on Wood, in the highest style of the Art, if-lustrating almost every inoplement of hashandry now in use by the best farmers, the best methods of ploughing, planting, haying, harvesting, &c., &c., the various domestic animals in their highest perfection; in short, the pictorial feature of the book is ausique, and will render it of incalculable value to the student of agriculture. The Work is being published in Semi-Mornthy Numbers, of &f pages each, exclusive of the Steel Engravings, and is soid at 25 cents each, or \$5 for the critice Work in Numbers, of which there will be at least 22.

The British Periodicals Re-Published are as follows, viz.:—
The London Quarterly Review, (Conservative.)
The Edinburgh Review, (Wig.).
The North British Review, (Liberal.)
The Westmissier Review, (Liberal.)
Blackwood's Edinburgh Magazine, (Tory.)
Although these Works are distinguished by the political shades above indicated, yet but a small portion of their contents is devoted to political subjects. It is their liberary character which gives them their chief value, and in that they stand confessedly für above all other journals of their class. Blackwood, still under the materity guidance of Christopher North, maintains its ancient celebrity, and is, at this time, nunsually attractive, from the serial Works of Bulwer and other liberary notables, written for that Magazine, and first appearing in its columns lota in Great Britain and in the United States. Such works as "The Caxtones" and "My New Nowel," (both by Bul-wer.) "My Peninsular Medal." "The Green, Hand," and other serials, of which numerous rival editions are issued by the lending publishers in this country, have to be reprinted by the lending publishers from the pages of Blackwood, effer it has been issued by Misser. South Co., so that Subscribers to the Reprint of that Magazine may always rely on having the conflict scading of those fascinating tales.

BOGLE'S AMOLE, A COMPOUND FOR SHAVING.

This delightful article is totally different and far superior to any hing yet meaned for shaving. The base of it is derived from the Analo, or "sonp plant," of Caltionina, an article used by the natives of that country for washing; and thus the use of strong alkali, so hurrint to the skin, is avoided. Its regetable and detergent properties have the purest and most nonrishing effects on the skin,—it is settings and altays irritation, and have a fine, thick, ere any lather, which does not dry on the fine. It is a decided hazary to be shaved with this incomparable soap. This Work estitation an securate and complete account
of the Amatonsy and Physiology of the Reproductive Organs, and of their reintive conditions in bealth and disease. Nor are these the sole contents of the Work: the
means of except, as well as the nature of the dailyer, are
pointed ont in clear and intelligible language. It deservedly requires the close-4 attention and study, for what
subject can be of more importance than the preservation
of health, and of the physical expabilities of which every
runt should be possessed. It unfortunately happens that
the unbargor section of excessive indiagence and vicious
habits, whether acquired in early life, or from the foilies ing, or these or any other part of the body; these parts or muscles are, consequently, weakened and rehazed, and he other acting, axidentally or otherwise, exposes who has seen this acting, axidentally or otherwise, exposes his self-to the cold art, the persons who has seen this acting, axidentally or otherwise, exposes his self-to the cold art, the persons who has seen this acting, axidentally or otherwise, exposes his self-to the cold art, the persons who has self-to the cold art, the persons who has seen this acting, axidentally or otherwise, exposes his self-to the cold art, the persons who has seen this acting, axidentally or otherwise, exposes his self-to the cold art, the persons who has seen this acting, axidentally or otherwise, exposes his self-to the old art, the persons who has seen the self-to cold and the loldod, which had been but just now creathang rapidly throughout the surface of the body, is repelled in wardly, and is sare to self-the parts with a part of applied feed to the persons of all the pain and stiffness action, when freely applied, it to bluist the acting of the interval and applied Exarrally.

The first action, when freely applied, it to bluist the acting and the parts over which it is applied almost to a give when the parts it is should be a self-to the parts over which it is applied almost to a give when the part is a secondary action is to exact possibilities of the nerves, and induced the parts over which it is applied almost to a give when the part is a secondary action is to exact possibilities of the nerves. In these cases, the READY RELIEF, and the parts over which the applied feely, at the same time rabbout the parts with a piece of flaunce, and it will be found in every case to give intractined and perminent freely.

N.B.—It convenient, a precedent problem from the parts, when the parts of the later than the problem of all the parts of the coldents of attraction at the life of almost and the parts of the coldents of attraction at the life of a many parts. Fig. 1. A BAD COC
