## Moral and

Immoral Dancing

It is not only what Henry James calls an "acuter spasm of the moral sense" that has stirrred a Wesleyan minister of Montreal to preach a crusade against modern dances. What Lloyd George has taken formal sade against modern dances. What possession, during the week end, of the minister rather aptly calls "sex-Checuers Court, at Aylesbury, Bucks, which is to be the official country residence of the Prime Minister. The itis" is a malady that may well find a congenial atmosphere in the places where the less comely of these dances vail. The least Puritan of us will confess that some modern dances are all silly, some as ugly, some as degrading, as the crudity of their names would imply. But however naughty bad dance may be, dancing in itself s perhaps the most natural and earliest of all ways of expressing that desirable thing, "the rhythm of life," and to condemn what Corney Grain used to call "the encircling of the waist"-his had "not been encircled for many years"-is to condemn a natural art, a beneficent social . influence, and a most proper amusement. It would be as wise to condemn music, once almost insepar

able from the sister, art of dancing.-

Lung fish, as these creatures are callal stock from which snakes and fish- lett. es both sprang, and in the fossil perind these ancestors of theirs were scattered over the entire world. One reason these strange fish have been preserved thousands and thousands of years after their pre-historic ancestors were extinct is because they can live easily through long droughts. Alligators and their African cousins, the crocodiles, are almost the only enemies they have to fear except man. Their rich salmon flesh is highly

prized by the Indians, who go after them with spears. In the natural state, the African lung fish is about 18 inches long, but year round, instead of lying dormant Mrs. Dr. Keegan. for lack of water, they grow to be two

### An Investment Better than Ponzi's

Even if Ponzi's get-rich-quick scheme had proved a wonderful access, it would not have been such a blessing to humanity as is Buckley's Bronchitis' Mixture, the one sure remedy for colds, coughs, bronchitis, chronic asthma and other throat and chest troubles. Ponzi's scheme only meant wealth. Buckley's means health and perhaps life. If you have a cold or hacking cough, beware the saying: "Cold—cough—coffin." Don't run risks. Get a bottle of Buckley's Mixture—and get it to-day. One dose will bring relief. It has helped thousands, and it can do the same for you. Buckley's Mixture is not a soothing syrup. It is a scientific preparation, twenty times more effective than other cough mixtures. Ask your druggist for it, and look for the name on the carton. Take no substitute. Price 75c. Saves Coal and Money

COALOX is a reddish powder containing chemicals which, when dissolved in water and sprinkled over coal, effects a great saving.

One ingredient retards the escape of burnable gases and gives time for the other chemicals to create more oxygen and so aid in a more even and total combustion. When COALOX is not used 75 per cent. of the efficiency goes up the flue unburnt. When COALOX is

used nearly 60 per cent, is saved. The fact that customers come back for more is its

## Notice to the Public!

Since Re-starting business in 1919 I have been warned that there would be a scarcity of

## First-Class Material.

With a view to ensuring a supply to meet my customers' requirements I have during that period made heavy purchases of costly goods to an extent, owing to the general depression, in excess of my needs.

In order to capitalize this stock and incidentally to provide employment for my staff of workmen, I have decided to make a large sacrifice by reducing the price of my Suits and Overcoats until this stock is sold out.

With the exception of a few superquality Cashmeres and Overcoatings I propose to offer the whole of my stock

### A Discount of from Fifteen to Twenty-Five per cent.

for Cash.

At these new figures profit is practically eliminated and in some instances an actual loss will be incurred. This, however, cannot be obviated if I am to achieve my threefold aim—to dispose of my stock, find employment for my staff, and to induce my customers to renew their normal patronage, which may have felt it imperative to curtail owing to the necessarily high costs.

Trusting to be favored by an early call where your commands will receive my prompt and careful attention.

The Stock Markets now are literally flooded with seasoned gilt-edge securities that are priced to net the investor 10 to 15 per cent. on outright purchases or up to 30 per cent. when trading on margin.

The cycle of low values, however, is passing and we are entering on an era of better prices. Don't make the mistake of thinking that really-good stocks can forever sell at reduced figures, but get into the market now while current values make it well worth while. We are fully equipped to execute all orders on margin.
