The Chronicle Insurance & Minance.

	R. WILSON S	MITH, Proprietor,	ESTABLISHED JANUARY, 1881 PUBLISHED EVERY FRIDAY	JOHN T. P. KNIGHT, Editor.
VOL. XIX.	No. 46.	MONTREAL,	FRIDAY, NOVEMBER 17, 1899.	SINGLE COPY 10. ANNUAL SUBSCRIPTION - \$2.00

In this issue we publish extracts for 1898. In this issue we publish extracts from the full report of the Superintendent of Insurance for 1898. The tables will prove, as usual, most interesting and instructive to underwriters.

Non-Combatants. The singular narrative of Father Matthews', purporting as it does to give particulars of what occurred at

Nicholson's Nek, is calculated to strengthen the growing dislike of military commanders to the presence of non-combatants at a battle. Any person connected with an army, or within the lines of an army, who does not make it his business to fight should stay out of action with the camp followers. Chaplains, musicians, or even special correspondents, cannot have been necessary to the success of an expedition involving a night march and the prospect of very severe fighting. Whatever may have led to the surrender at Nicholson's Nek, the story told by this indiscreat chaplain will probably be classed by himself and his critics among the things one would rather have left unsaid.

Fire Underwriting Expenses.

The question of expenses in connection with the business of fire

underwriting is receiving SO much attention that it seems strange all the efforts to effect a sensible reduction therein appear to be fruitless. Among the journals discussing this perplexing problem, there is complete unanimity upon the subject. They admit that the expense accounts of companies exhibit a tendency to increase, to the serious detriment of profits; but no one is able to suggest a plan whereby any material reduction in expenditure can be effected. The main reason for this state of things is not difficult to find. It is traceable to the heavy burdens imposed upon the companies by the countries in which their business is conducted. With ever-increasing rates and taxes, there can be no sensible diminution in expenses. Unless the percentage of losses can be lowered, the profits derivable from fire underwriting will soon reach a vanishing point.

A Nice Republic. now being circulated at least possesses the merit of showing that a glimmering of the real situation is beginning to enter the minds of the sturdy Transvaal burghers who have been calied from the pursuits of peaceful industry to do battle

One of the many stories of South Africa

with the British soldiers. One of the Boers, in talking to a Bechuanaland settler, thus summed up the position of affairs. He said there were three classes in the Transvaal Republic—the Uitlanders, who find all the money; Mr. Kruger and his officials, who draw it all; and himself and his fellow burghers, who get no money, but have to do all the dirty work, and the fighting, when there is any.

To what extent the losses sustained by The Areon fire underwriters are increased through the malicious and voluntary burning of insured buildings is very difficult of computation. But if Hiram Rhodes is worthy of belief, the insurance companies doing business in Duluth, Minnesota, have good reason to be thankful that his confession will probably result in his being deprived of liberty and denied the use of matches for some years to come. A few days ago, Hiram Rhodes created a sensation during the trial of a civil suit in the District Court of Duluth. He was a witness in the case, in which one Rosenboom sued Howard & Haynie and John G. Howard for money due. The firm was in the dry goods business, and failed five years ago. Rhodes was a clerk in the store. He swore he set fire to the store at the instigation of the Howards, who agreed to pay him \$300 and double it in case of total loss. He said he had previously set fire to six dwellings owned by the Howards, being assisted by Edward Howard. John G. Howard denied the story, but declared that Rhodes fired the store, being hired to do so by Haynie.

Whatever may be the motive of Rhodes in revealing his rascality, the story serves to show the comparative helplessness of fire companies against incendiarism. The Boers in Recent visitors to Paris who have been questioned concerning the progress of arrangements for the great exhibition to be opened next May, state that everything points to a brilliant success. The buildings are said to excel in size and beauty anything of the kind ever erected in any of the capitals of Europe, and the celebrated Chicago structures are said to be useless for purposes of comparison, being literally dwarfed by the number and dimensions of the French buildings.

Strange to say, of all the foreign exhibits at the Paris Exposition of 1000, the most advanced is said to be that of the Boers of the South African Republic. Of course, it is not easy to judge just what effect the war will have upon this exhibit of Oom Paul's people; but the Transvaal exhibit, if carried out, will be one of the most interesting of the Exposition.

"The French authorities have alloted the Boers about 40,000 square feet, and this limited space President Kruger proposed to fill with novel displays from the Transvaal. Among the rest will be shown how gold is taken from the earth; how it is refined by mercury, and how the ingot worked, chiselled or struck, is transformed into jewels or coins-

"The mill building for the treatment of gold ore will be composed of two parts, between which will be installed the 'cynuration,' as practiced in the open air. In one of these parts will be the apparatus for crushing the ore. A battery of five pestles will be placed in operation before the eyes of the public. In the other building will be established a foundry for gold, and a laboratory where the public can see for themselves that the gold industry applies in a remarkable way to the indications which science has brought and the progress which has followed its movements step by step."

It is to be hoped that, whatever may be the result of the war, this unique mining display will not be interfered with. Even if the exhibit of work in the greatest gold producing country in the world has to be entered at the last moment in the name of the Dominion of South Africa, instead of the Transvaal Republic, it will not lose its interest for the people of all nations.

Banks versus Trust-Companies. The increasing competition between the New York banks and the trust companies that transact banking business is resulting in open war being declared by the former against the latter. The new Clearing House regulations are referred to by American financial journals as "the opening of a campaign the banks have decided upon after most deliberate consideration." The banks have always regarded the Clearing House as their own institution, and are unwill-

ing to allow their rivals, the Trust companies, to use its mechanism to the detriment of the business of the banks. Some idea of the vigorous attempt being made to curtail the ever-increasing competition of the trust companies with the banks is furnished by the following report of the action taken by the Clearing House Association. After mentioning that a resolution has been passed placing trust companies on the same plane as banks, if they wish to continue to clear cheques and other items through the Clearing House, the "Commercial Bulletin" thus explains the object of the movement:—

"This means that the trust companies must furnish weekly statements of their condition to the Manager of the Clearing House and shall be subject to examination by a Clearing House committee. It is furthermore provided that no trust company shall be permitted to clear either through a member or a nonmember of the association unless it shall have been in actual operation for one year, and no trust company shall be cleared until it shall have been examined by a Clearing House committee. The resolutions promulgating the new regulations are merely the formal ratification of the report of a sub-committee consisting of President Henry W. Cannon of the Chase National Bank, President F. D. Tappen of the Gallatin and President E. H. Perkins, Jr., of the Importers and Traders'. The report in full follows:-

(1). No trust company shall be permitted to clear through any member or non-member of this association, unless such trust company shall have been in actual operation for at least one year at the time of making the application.

(2). No trust company shall be cleared by any bank or trust company, member or non-member of this association, until it shall have been examined by the Clearing House Committee or some other committee of the association duly appointed for such purpose.

(3) Every trust company clearing through a member of this association or which may hereafter be permitted to clear through such member shall furnish a weekly statement of its condition to the manager of this association, in the same manner as weekly statements of non-member banks clearing through this association are now rendered. Such statement shall include: Capital, net profits, average amount of legal-tender notes and bank notes, average amount of network of the Work city and Brooklyn banks and trust companies and average amount of net deposits.

The statements to be furnished by the trust companies are not, at present, intended for publication. The recent organization of many new trust companies and the increase in the purely banking character of the business of the old trust companies have been the source of much concern among the banks. The trust companies are on a much more favorable basis in the matter of taxation than the banks, and are, furthermore, not required to maintain a 25 per cent. reserve. Most of them, in fact, keep their reserve in the form of deposits in the banks and receive interest on their daily balances. The statement issued by the Clearing House banks and the trust companies, as of July I, made this showing:

	Deposits.	Cash.	Reserve. p.c
Clearing House banks Trust Companies		\$240,556,500 8,864,245	
Totals	\$1,411,437,304	\$249,420,745	17.7

It is not proposed to make the regulations retroactive, and there will, therefore, be no interference with such of the new trust companies as have already begun business and secured clearing agents. The regulation will, however, apply to all trust companies recently organized that have not completed their Clearing House arrangements. Ownership of Precious Metals. Although it is long, long ago since gold and silver taken from the earth belonged to the Crown, the present

war has exposed such general ignorance on the subject of ownership of the soil and its contents that some journals have actually deemed it necessary to explain the difference between ownership and sover-Although Englishmen, Americans and eignty. Frenchmen own the greater part of the Transvaal mines, a foreign statesman found it easy to spread a report that Great Britain is fighting the Boers for possession of their gold mines. This fabrication of enemies of perfidious Albion found so many believers that Lord Salisbury took the trouble, in a light and humorous allusion to the matter at the Lord Mavor's banquet, to disclaim for himself and his colleagues, having received even a farthing from the gold fields. He added:-

England, as a whole, would have had no advantage from the possession of gold mines, except as her Government conferred the blessings of good administration upon those engaged in the industry.

An American journalist, after pointing to the survival of this curious idea—that the British Crown still owns all precious metals, as evidence of the general ignorance about the rights of sovereignty, incidentally pays the following pretty compliment to the prosperity and progress of countries floating the British flag:

Industry produces commerce and England profits by commerce. But the interest of England as a whole is simply the interest in good administration and prosperity and the advance of civilization. The interests of the United States are the same, and our commerce extends with the limits of the British Empire, for we can sell more to a civilized people under a firm government than we can to savages, to people who overthrow their government every two or three years, and to people whose trade is reserved for the benefit of the nation acquiring sovereignty over them.

Those who ascribe the present war to greed for gold on the part of Great Britain ought to be told that sovereignty over the territory and the ownership of the mineral resources are two separate and distinct things. To quote again from our American friend and admirer:—

If private ownership is not affected by the question of sovereignty, and if taxation is a secondary matter, the protection of life and property and good governmental administration are of vast importance. The Transvaal Government was probably not a good government. There is not much doubt that if it had been liberal and well-administered the Boers might have maintained their peace and independence for a good while.

RAISING FUNDS FOR THE WAR.

The suddenness with which Great Britain was plunged into war with the two Republics in South Africa which border on British colonies necessitated the raising of an enormous fund suddenly to provide for war expenses. A supplementary estimate was promptly laid before the House of Commons for ten

millions sterling, in round figures \$50,000,000, which was promptly and almost unanimously passed. The method adopted for securing such an enormous amount of money became at once a question of the gravest concern, directly to financial interests, and to the country generally, but remotely. The Chancellor of the Exchequer announced that the war funds to be raised would not be in the way of an extension of the national debt, that is, not by an issue of Consols. The alternative was an issue of Exchequer Bills. He also intimated that, the government hoped to retire these bills to some extent from the revenue to be derived from the Transvaal, at the conclusion of the war. The latter announcement distinctly affirms the intention of the British Government to be that the South African Republic, which is the aggressor in this conflict, shall pay a war indemnity to cover the cost Great Britain has been put to, as France had to pay Germany for the expenses of that Empire in the war which closed at Sedan. Here then the two financial questions were answered, the war funds would be raised by temporary loans and redeemed without increasing the taxes, as both principal and interest would ultimately be paid by the power with which the British Empire is at war. This anticipated arrangement avoids the problem on which economists have differed. The question, as stated by Mill, is: "How far is it right, or expedient, to raise money for the purposes of Government, such as defraying the expenses of a war, not by laying on taxes to the amount required, but by taking a portion of the capital of the country in the form of a loan and charging the public revenue only with the interest." To lay on taxes to raise ten millions for equipping an army corps swiftly in a manifest impossibility. A loan was the only resource, and the only practical question was, whether to borrow at long dates by Consols or to issue Exchequer Bills, which are redeemable at the will of the Government. We may say that the American Government is being censured for having borrowed for war expenses on long-dated securities instead of adopting the British system to some extent, and so being enabled to reduce the debt more rapidly. The first Exchequer bills were issued first in 1696 in a time of serious monetary disturbance. They were of various denominations from five pounds to one hundred. The Bank of England at the time was redeeming its notes by instalments, which, when paid, were marked on the note as "received on account." The Exchequer bills provided a currency in which the country had confidence. They were then, as they are today, a form of Government notes like those we are familiar with issued by the Dominion Government-There is, however, this difference, the Exchequer bills carry interest at a fixed rate from date of issue to the day they are called in. The objection of Mills to the absorption of a portion of the capital of the country by a war loan does not apply to Exchequer bills, because they are a negotiable instrument, and, when capital has become locked up by panic, it has been found to relieve the financial distress to issue Exche-

quer bills as a supplement to the note issues of the Bank of England. Happily for the money market, these bills are now being issued not to relieve monetary distress, but to provide funds to meet a grave national emergency without locking up capital by enlarging the national debt for a term of years. Had the Government so decided, they might have drawn upon the Sinking Fund for the entire cost of the war. But their confidence in the war being brief, and in being able to levy tribute on the Transvaal is so decided, the financing for the war was made of a temporary nature, leaving the permanent debt and sinking fund unaffected. What resources has the Transvaal to pay for the war? The revenue of that Republic is about \$23,000,000 yearly. A very large amount of this has been wasted on preparations for the present war. The great bulk of this income indeed which has not been squandered on arms, ammunition, etc., is believed to have found its way into the private coffers of Mr. Kruger and his colleagues, and most of the revenue has been derived from taxes paid by the oppressed Uitlanders.

An authority affirms that it will be an easy task for the Transvaal to find all the money needed to redeem the Exchequer bills' issue of ten million pounds sterling, so there seems little reason to fear any long continuance of whatever advance in rates has been caused by raising funds for the war. When peace is declared, as we believe it will be before winter is over, there will be a lively reaction from the strain and timidity caused by the war. The money withdrawn from mercantile channels will begin to flow back, the Exchequer bills will be gradually called in, and there seems every probability that the money spent over the war will prove, in the long run, to have resulted in the establishment of such conditions in South Africa as will add materially to British trade.

THE EVILS OF COMPETITION IN BANKING.

The very nature of a banker's business places him in such a position to his customers as to render competition between banks more injurious than in other spheres. Between two traders, competition may be kept up with positive benefit to both, and, at the worst, this rivalry will only reduce the profits of each, or lead them to unduly extend credit, the mischief of which is within a limited range. When, however, banks enter into competition, they are apt to give such an expansion of credits as leads up to the demoralization of business over a very wide area. One of the chief safeguards of trade is the care exercised by bankers in discounting mercantile paper. Every merchant and manufacturer who sells on time has constantly to submit the acceptances of his customers to the judgment of his banker, who buys them, or leaves them alone, according to his opinion of their value. This scrutiny of customers' paper by a banker places

at the disposal of every person who discounts trade tills, the matured judgment and wide experience of that banker, who thus renders to the trader an invaluable service as a controlling and advisory element. To maintain this service at its best, to enable it to be given most efficiently, it is necessary that the judgment of the banker should be absolutely independent-He ought to discount or refuse to grant extension of credit, or curtail them, strictly on banking principles. We are pleased to think he usually does so. When, however, fierce competition breaks out between banks there is an element introduced between banker and customer which reduces the independence of the former, and tempts the latter to use that competition as pressure to secure accommodation and discounts that under other circumstances would be refused.

Bankers are themselves traders; they deal in credit as others deal in merchandise ; naturally, therefore, they do not like to see business pass their doors and customers' accounts withdrawn by the attractions of a rival. Thus they are sometimes induced to relax their rules, and to make their judgment as to paper more elastic in order to secure or retain business. Traders soon discover when they are getting the whip-hand of a banker, and use their opportunities without scruple. Bankers too soon find that one concession involves further ones. Bad paper seems to breed rottenness in a bank's bill case. A merchant who can get any paper he offers discounted begins to extend his business and give credit imprudently. The banker's vigilance being weakened by competition, he begins to discount doubtful paper, he loses control over his customer, and his salutory advice is not heeded when that customer is being solicited to transfer his account to a banker offering better terms. Then comes a period when the banker is largely at the mercy of the customer whose worthless paper, again and again renewed, is still held among the current loans of the bank, and the concealment of the true condition of things is the beginning of the end for manager, directors and all concerned.

The mischief one small bank may do in this way is very seriously out of all proportion to its power for good. One trader, for example, in a town may ruin legitimate business by holding a sacrifice sale So one banker who cuts rates, who offers more for deposits than his neighbours, or who sells exchange below its market value, may not get any business worth having by his competitive offers, but he sets the whole body of customers at work to secure the terms he unwisely offers. Traders who assist such a movement may fancy they are having a good time, when they find bankers are subjects to moments of weakness under the pressure of rivalry. But in the long run it will be discovered that there is grave danger in easy terms of credit, and that the independent judgment of the banker, his careful scrutiny of trade paper and his judicial firmness are of incomparably greater value than any concessions that can be secured by competition between banks for the business of a trader.

CANADIAN INSURANCE REPORT.

Insurance Superintendent Fitzgerald's Report upon the various branches of insurance by companies transacting business in Canada during the year 1808 is out, and we present in this issue the more important portion of the explanatory text found in the Introduction. In addition to publishing the tabulated results of the fire and life business by companies, we intend to produce any additional features of interest found in Mr. Fitzgerald's excellent report:--

FIRE AND INLAND MARINE INSURANCE, 1898.

During the year 1898 the business of fire insurance in Canada was carried on by 33 companies; of these 6 were Canadian, 20 British and 7 American. Inland marine insurance was also transacted by 4 of them (2 Canadian, 1 British and 1 American), and ocean marine by 2 of them (both Canadian). One British company (the British and Foreign Marine) carried on in addition to the business of inland marine insurance the business of insuring registered mailmatter in transit from place to place in Canada. Since the close of the year 1898, 3 Fire Insurance Companies have received licenses, 1 American (the American Fire Insurance Company), 1 British (the Law Union & Crown), and one Canadian (the Victoria-Montreal).

FIRE PREMIUMS AND LOSSES IN CANADA IN 1898.

The cash received for premiums during the year in Canada has amounted to \$7.350,131, being greater than that received in 1897 by \$192,470; and the amount paid for losses has been \$4.784,487, which is greater than that paid in 1897 by \$82,654. The ratio of losses paid to premiums received is shown in the following table:—

FIRE INSURANCE IN CANADA IN 1898.

	Paid for Losses.	Received for Premiums.	Rate of Losses Paid per cent. of Premiums Received.	The same for 1897.
Canadian Companies British " American "	\$ 587,705 3,357,122 639,660	\$ 1,121,9 27 5,223,345 1,00 4 ,85 9	$52.38 \\ 68.10 \\ 63.66$	70.40 64.56 66.75
	4,784,487	7,350,131	65.09	65.69

The corresponding results for the thirty years over which our records extend are given below:---

Fire Insurance in Canada-

Fire Insuran	ice in Can	aua	
	Premiums Received.	Losses Paid.	Rate of Losses Paid per cent. of Premiums Received.
1869 1870 1871 1871 1872 1873 1874 1875 1876 1877 1878 1879 1881 1882 1883 1884 1885 1886 1887 1889 1890 1891 1893 1894 1895	\$ 1,785,539 1,916,779 2,321,716 2,628,710 2,968,416 3,522,303 3,594,764 3,708,006 3,764,005 3,368,430 3,227,488 3,479,577 3,×27,116 4,229,706 4,229,706 4,229,706 4,522,460 4,932,335 5,244,502 5,344,502 5,34	$\begin{array}{c} \pmb{\$}\\ 1,027,720\\ 1,624,87\\ 1,649,199\\ 1,909,975\\ 1,682,144\\ 1,926,169\\ 2,867,295\\ 8,490,919\\ 1,822,674,295\\ 8,490,919\\ 1,822,674,986\\ 2,920,228\\ 3,245,198\\ 1,666,578\\ 3,245,324\\ 3,245,324\\ 3,245,324\\ 3,245,324\\ 3,3443,351,388\\ 3,349,3514\\ 3,373,822\\ 2,876,211\\ 3,305,697\\ 4,377,270\\ 5,052,699\\ 4,588,363\\ 4,993,750\\ 4,173,501\\ 4,173,5$	$\begin{array}{c} 71\cdot 31\\ 77\cdot 33\\ 225\cdot 58\\ 54\cdot 11\\ 66\cdot 47\\ 47\cdot 90\\ 82\cdot 83\\ 63\cdot 01\\ 63\cdot 14\\ 65\cdot 16\\ 55\cdot 22\\ 66\cdot 93\\ 64\cdot 90\\ 56\cdot 53\\ 51\cdot 47\\ 55\cdot 97\\ 63\cdot 31\\ 67\cdot 22\\ 9\\ 74\cdot 37\\ 9\\ 68\cdot 38\\ 9\\ 71\cdot 92\\ \end{array}$
1897 1898	7,157.661 7,350,131	4,784,487	
Totals	140,551,102	96,456,010	68.63

Taking the totals for the same thirty years, according to the nationalities of the companies, the following are the results:—

Fire Insurance in Canada for the thirty years-

1869-1898.

	Premiums Received.	Losses Paid.	Rate of Losses Paid per cent. of Premiums Received.
Canadian Comranies	33.742.872	\$ 23,908,009	70.85
British do	92,167,069		
American do	14,641,161	9,855,482	
Totals	140,551,102	96,456,010	68.63

If we had excluded from these tables the year of the disastrous fire in St. John (1877), the average loss rate would have come out 64.31.

Obtaining an approximation to the losses incurred during the year, by excluding the payments for losses outstanding at the beginning of the year, and including the amounts estimated for those of the year still unsettled, the ratio of the losses incurred to premiums received comes out 74.37 per cent., which is 9.96 per cent. greater than the 64.41 of the previous year, and is 10.06 per cent. greater than the average for the last fifteen years (64.31). The following are the rates of incurred losses from 1884:—

Fire Insurance in Canada, 1898.

	1898.	1897.	1896.	1895.	1894.	1893.	1892.	1891.	1890.	1889	1888.	1887.	1886.	1885.	1884.
Canadian Bitish American Totals	79.12 11.05	$\begin{array}{c} 63.50\\ 64.32 \end{array}$	$\begin{array}{c} 59.50\\ 61.72 \end{array}$	69.32 73.11	67.76 68.94	76.57	$ \begin{array}{r} 66.36 \\ 73.86 \end{array} $	$62.00 \\ 61.26$	56.29 62.08	48.35 48.39	$53.08 \\ 52.84$	64.62 72.41	$68.01 \\ 58.44$	$56.62 \\ 57.45$	$\begin{array}{c} 64.29 \\ 50.17 \end{array}$

The gross amount of policies, new and renewed, taken during the year by fire companies was \$681,-160,689, which is greater by \$17,462,380 than the amount taken in 1897. The premiums charged thereon amounted in 1898 to \$8,564,123,76, being \$259,-896,92 greater than the amount charged the previous year. The rate of premiums (1,257) and the rate of loss (65,09) do not differ to any material extent from that of 1897 (1,251 and 65,69 respectively). The loss rate is only 0.75 per cent. greater than the average loss rate (64,31) for the past thirty years, the year 1877 being excluded.

The rate per cent of premiums charged upon risks taken is shown in the following table:—

The increase in the amounts taken in 1898 as compared with 1897, among Canadian Companies, is \$3.737.963. Among British companies there is an increase of \$10,937,833, and among American companies there is an increase of \$2,786,584. PREMIUMS AND LOSSES COMPARED WITH RISKS.

The average rate of premium charged on each \$1,000 of risks taken in 1898 is \$12,573 as against \$12,512, which was the corresponding rate in 1897. The individual rates for the different companies will be found in the annexed table, and will be seen to vary a good deal, as might naturally be expected, considering the varieties of the business done by the companies.

The losses incurred (approximate) during the year, compared with the amount of risk current (taking for this the mean of the amounts in force at the beginning and end of the year), have been at the average rate of \$6.20 per \$1,000 current risk. The coresponding rates for 1882, 1883, 1884, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896 and 1897 were \$5.68, \$5.56, \$5.37, \$4.54, \$5.48, \$5.70, \$4.70, \$4.19, \$4.84, \$5.33, \$5.61, \$6.17, \$5.50, \$5.75, \$5.15 and \$5.38 respectively.

	Gross Amount of Risks taken during the year.	Premiums charged thereon.	Rate of Premiums charged per cent, of Risks taken.	The same for 1897,	The same for 1896.	The same for 1895,	The same for 1894,

FIRE INSURANCE PROSPECTS.

Some Timely Comments.

----0-----

Many managers of fire companies doing business in Canada will heartily endorse the very sensible and timely comments of the "Commercial Bulletin" (New York), on the prospects of underwriters for the present year. Reverses must be endured by directors of every corporation with some degree of equanimity, and those who are not possessed of patience and common sense should not be allowed to occupy positions where they can disturb the even tenor of a company's operations. The "Bulletin" says:—

It is very apparent to all who watch the course of events in fire underwriting that this winter will be a hard one for the fire insurance companies. Rates have fallen, while both losses and expenses have increased. Few companies fail to show a loss now on their 1800 underwriting operations, so that with the losses of December, January and February to face, and the dividend and tax payments of January and February to be met, company managers may well feel anxious.

One feature which will unnecessarily complicate the situation and fannoy, without any accruing advantage, may be expected in the complaints of boards of directors, home offices, superior officers, etc. No one underwriter can keep rates up and hold the fire loss in reasonable limits, and it is exasperating to managers to be criticised in bad seasons by those who fail to express any approval when profits are made, evidently ascribing them to "good times." It has happened more than once that companies have lost the services of valuable men and have seriously handicapped their chances by bringing about the resignations of able underwriters because they could not perform miracles.

It would appear to company managers at times as though the positiveness and quantity of adverse criticism were in inverse ratio to the critic's knowledge of the actual condition of affairs. About March or April will develop in some offices situations of the kind above described, to the great detriment of the best interests of the stock-holders. Fire insurance is to a material extent a speculative venture, and must not be expected to always yield nothing but profit

CANADIAN INSURANCE REPORT.

FIRE INSURANCE EFFECTED IN CANADA IN 1898.

The above table shows the fire insurance effected in Canada in 1898. The premiums in the second column are those charged on the whole gross amount of risks taken by each company during the year.

British Fire Companies.—The total cash receipts from premiums were \$5,223,344, being an increase of \$58,143 as compared with the previous year ; the payments for losses were \$3,557,122, being \$222,455 greater than for 1897:

Paid for losses		
Total		5.082.735
Received for premiums	•	5,223,345
Balance in favour		140,610

In 1897 there was a balance favourable to the companies of \$356,290.

American Fire Companies.—The receipts for premiums (including the inland marine business of the Aetna Fire) were \$1,006,415; the payments for losses, \$639,660; and the general expenses, \$274,948; total balance in favour of the companies, \$91,807.

The results of the total business of American companies from 1875 to 1898, inclusive, are:---

Paid for losses (1875-98) Paid for general expenses		• •	•••	3,600,989
Total payments			·	12,769,198
Received for premiums	• •	• •	••-	13,629,436
Excess of receipts over payments	s		\$	860,328

NOVEMBER 17, 1899

Canadian Fire Companies.—In the consideration of the Canadian companies, their whole fire business, in Canada and elsewhere, as well as their whole marine business, must be in bided, as a separation of expense between these bian ches has not been made.

(Cents omitted.)

The total cash income received by the Canadian companies during the twenty-four years, from 1875 to 1898, inclusive, is \$88,347,261. The amounts for the several years, and the distribution of same under proper headings, are shown in the subjoined table.

The expenditure of the same companies, during the same period of twenty-four years amounted to

THE BANK OF MONTREAL HALF-YEARLY STATEMENT.

The half-yearly statement of the leading bank in the Dominion, the figures of which are given below, tells a very satisfactory story to shareholders and the pub-The profits for the six months ending October lic-31st amounted to \$658,161, being an increase of \$20,000 over the corresponding period of 1808. In all those items to which a reviewer turns for evidence of progress and strength, the statement is exceedingly satisfactory. The growing wealth of the country is shown by the extraordinary increase in the deposits held by the chartered banks of the Dominion, and it is not surprising to find a remarkable addition to the amount thus entrusted to the Bank of Montreal. The statement shows that since October 31st, 1898, \$13. 000,000 of additional deposits have been received by this institution, and even the resources of one of the largest of banks must have been hard put to it before, employment could be found for such a flood of funds. However, the growth in the trade and commerce and enterprise of the country has evidently created a corresponding demand for money, enabling the big bank to increase its current loans by some \$7,000,000.

Shareholders and others who closely study the most recent statement of the Bank of Montreal will derive the greatest satisfaction from noting its signs of strength and the proofs of thoroughness in making provision for all bad and doubtful debts. Thus we find that, after payment of the usual dividend, the balance of undivided profits carried forward now amounts to \$1,161,000; and the debts overdue in connection with the enormous business transacted are represented by figures clearly testifying to excellent management.

RETIREMENT OF MR. CROMBIE.

Mr. A. M. Crombie will retire from the service of the Canadian Bank of Commerce at the end of the year. The announcement serves as a reminder to many of our citizens of the flight of time. Twenty years have passed since the gentleman who is now retiring to private life was appointed manager at Montreal of the Merchants Bank of Canada, having previously served the usual term in acquiring that thorough knowledge of the routine work of a bank which is necessary to fit one for positions of trust and responsibility.

Mr. Crombie commenced his career as a clerk in the Commercial Bank of Upper Canada, and when that institution was absorbed by the Merchants Bank of Canada he transferred his services to the latter. His appointment as manager of the metropolitan branch was gazetted in 1879. Eight years later, the Canadian Bank of Commerce offered him the management of their Montreal business. Mr. Crombie accepted the offer, and has given eminent satisfaction to those who sought his services. His friends will be glad to learn the bank is dealing liberally with their retiring manager. Mr. Crombie's career has been marked by strict conformity to the principles of business honour, and a scrupulous regard to probity, rectitude and reputation, and he will be followed into his retirement by the earnest good wishes of the members of the Bankers' section of the Board of Trade and the Clearing House Association, of both of which he was chairman. He also has the respect of every merchant with whom he has had business dealings. His kindly disposition has made him a most popular and esteemed citizen of Montreal.

CANADIAN LIFE MANAGERS' ASSOCIATION.

The regular quarterly meeting of the above Association will be held at Toronto to-day, the 17th inst.

TO DO HONOUR TO MR. A. G. RAMSAY.

We are informed that it is the intention of the Life Managers' Association to give a Dinner at an early date in honour of Mr. A. G. Ramsay, when, doubtless, some token of the esteem in which he is held by the life underwriters of Canada, will be forthcoming.

. ACKNOWLEDGMENTS.

Fidelity and Surety Insurance. We are in receipt of a neatly bound copy of the paper on Fidelity and Surety Insurance read by Mr. Charles A. Dean. President of the National Surety Company of New York, before the 30th National Convention of Insurance Commissioners at Detroit in September last. As Mr. Dean says:—"The custom of giving bonds is as old as civilization," and after reading his interesting paper we find ourselves sharing in his surprise that corporate suretyship was not introduced earlier.

Halifax, Canada. We are indebted to Mr. A. J. Bell, of Halifax, for a copy of this artistic and instructive supplement to the "Industrial Advocate," published by the Maritime Newspaper Company. The intervence of the structure of the structure

The illustrations are excellent, and the read-

ing matter most interesting and well calculated to increase the interest of Canadian and American capitalists in the province of Nova Scotia. An excellent picture of Mr. B. F. Pearson is given, with an account of recent new Nova Scotian enterprises and industries. We also find in the pages of "Halifax," the following tribute to the energy and activity of this captain of industry:—"One such man as Mr. B. F. Pearson, whose picture we present herewith, is sufficient alone to give any city a title to progressiveness, and it does not seem like exaggeration to say that he is one of the builders of Nova Scotia and of Halifax."

Altogether, there appears to be good reason why the editors of this work should predict a bright future for the land of Evangeline. The investment of capital in manufacturing, mining and milling enterprises tends to encourage all kinds of industrial activity in a province which has produced so many strong, talented, and capable men.

The publication in question is a good advertisement for the Canadian winter port-

THE DOMINION BANK.

Mr. T. G. Brough, General Manager.

The appointment of Mr. Brough, Manager of the Toronto branch, as general manager of the Dominion Bank in succession to the late Mr. Gamble, is announced. The directors of this Institution evidently recognize the industry and energy of the gentleman who now receives in the prime of life a substantial reward for faithful performance of important and responsible duties. Mr. Brough will be recipient of many congratulations and good wishes from a large circle of friends in the banking profession.

MR. F. H. MATHEWSON.

The regret with which the citizens of Winnipeg parted with Mr. Mathewson, the newly appointed manager of the Montreal branch of the Canadian Bank of Commerce, fully-warrants his numerous friends in Montreal in predicting for him an equally successful and honorable career as a successor to Mr. Crombie. Mr. Mathewson requires no introduction to Montreal where his energy and ability is already recognized.

Obituary

MR. R. D. GAMBLE

Mr. Gamble, general manager of the Dominion Bank, whose death, as reported in our last issue, occurred at sea on board the White Star liner "Oceanic," on the 5th inst., was buried in St. James cemetery, Toronto, on Saturday last. The sorrow and sympathy of the numerous friends of the deceased gentlemen was manifested by magnificent floral offerings at the funeral which, although announced as private, was very largely attended. The bankers' section of the Toronto Board of Trade, and a large number of prominent citizens were, among the mourning throng. Mr. Gamble, in addition to enjoying the respect and esteem of the business and banking community, was beloved by friends for his amiable and affectionate disposition, and he will be greatly missed by the many to whom he was kind and charitable in his dealings-

RECENT FIRES.

Fire at Messrs. Viau & Freres, Biscuit Factory, and L. J. Trotter & Co., Warehousemen, Montreal.

The insurance on the property destroyed by fire, on Sunday last was difficult to learn, owing to the nature of the contents of the Trotter storeage warchouse. The contents of the warehouse were to a large extent made up of consignments to merchants in other cities, the goods being held in bond, and it is supposed in many instances the insurance was placed in other cities. The following companies are interested:—

	Viau	Trotter
In	surance.	Insurance
British America\$	6,625	
Caledonian	4,250	
		\$ 2,000
		4,500
	3,000	2,700
Lancashire	13,500	
		1,100
Liverpool & Lon. & Globe	5,250	
		11,000
		8,000
North British & Mercantile.	15,500	18,200
Northern	3,000	
Norwich Union	7,500	
North America	6,150	
Phoenix of Hartford		1,300
Phoenix of London		30,000
Royal	25,000	16,300
Sun	5,625	
Western	6,625	
Victoria-Montreal	2,000	
\$	104,025	\$94,800

The Viau Insurance is a total loss, and the Trotter is also very nearly total.

LONDON LETTER.

31st October, 1899.

FINANCE.

With a vigorous prosecution of the war and the war preparations, there has arisen a considerable buoyancy in the Kaffir market on 'Change, and most descriptions of mining stock are on the rise. The arrival of Sir Redvers Buller and the extra armaments at the Cape, will further reduce the chance of Boer successes, and correspondingly elevate the hopes of investors in South African securities. In fact, something like a boom is expected in well-informed financial circles—nothing very sensational, but a boom for all that.

. . .

Some lucrative rises have also taken place in home industrial securities. For instance, the J. and P. Coats' thread and cotton combine was expected to declare a fair dividend, but so much in excess of the anticipation was the declaration that the \$100 shares of stock rose to nearly \$800 each. It was a 30 per cent. dividend, and a bonus of \$5. There was carried to reserve \$1,750,000, making that section now \$7,500,000.

INSURANCE.

The Salvation Army, as is well known, has an insurance annexe, and here as in all the Army's departments, an ethical atmosphere is introduced. All the agents for the life assurance division are supplied with copies of a neatly printed monthly magazine edited expressly for the assurants. But unlike most insurance magazine-circulars sent out by the offices, the direct canvassing portion is only a moiety of this periodical's contents. Reaching an industrial population it reaches many whose knowledge of hygiene is small, especially when they are town dwellers. Hence it contains articles on personal cleanliness, temperance, sanitation, infant mortality, etc., all of which, if studied, would tend to lessen the number of claims to be paid by the Salvation Army insurance department. This is business-like morality.

The discussion of the justice of the life assurance companies' action in putting on an extra premium where the policy-holder is going out to battle with the Boers is still continued. One would have thought that the case was so plain that controversy would be needless, but it is not plain, apparently, to the "absentminded beggar" and his officers. Spencer C. Thompson, of the Standard Life, has written a powerful and well-argued letter to the "Times" which one would think ought to settle the debate. He proves from the statistics of earlier wars that the extra 5 per cent. and 7 per cent. is no way an excessive extra charge for the extra risk.

* * *

Incidentally we learn that the Ashanti War was the most expensive to the officers. When going to that war one General, Sir H. Brackenbury, had to pay \$105 down for every \$500 he had on his policy, and he was a fair instance of the rest. The climate was the risk most taken into account in that campaign, so that things are considerably better nowa-days. The officer who has had the forethought to pay an extra one per cent. all the while his policy has been running is not called upon to pay anything extra at all now.

(Continued on page 1487.)

PERSONAL

MR. F. WOLFERSTAN THOMAS, General Manager of Molsons' Bank, whose illness has caused much anxiety, is, we regret to learn, still unable to leave his house.

STOCK EXCHANGE NOTES.

Wednesday, p.m., November 15th, 1899. The market during the past week has shown a distinctly downward tendency, although some stocks on the list have held their own, and some have even advanced slightly. The softness is due largely to the advance in the call loan rate to 6 per cent. by several of the banks. This movement was not anticipated generally on the "Street," in view of the fact that the period is at hand when the flow of money back to the business centers might be expected to make rates somewhat easier, and also because the average rate obtained in New York during the past five or six days The rate of discount is a shade higher in London at 4 3.4 per cent., but the Bank of France has not yet advanced its rate above 3 per cent. as had been expected, and money is to-day reported to be abundant in Paris.

The improvement in the situation in South Africa and the general feetling of confidence that the war will not be prolonged is likely to induce a better feeling in London, in which event the Bank of England would probably not oppose a moderate withdrawal of gold to New York, and this is generally looked for.

The heavy purchases of securities in New York by London during the past few days, and the actual shipment of the stocks (showing that they are to be held), would seem to indicate that London takes the view that the markets need not be expected to go much lower.

The following are the latest market and bank rates for money in the undermentioned places:---

									Market.	Bank.
Paris									31	3
Berlin				•					51	6
Hamburg					Ξ,	. ,	•		51	6
Frankfort									51	6
Amsterda	m								48	5
Brussels.									4	56
Vienna .									51	6
St. Peters	bu	rg	ŗ.,						6 1	51
London .										5

Canadian Pacific has been very steady all week, having fluctuated only between 94 3.8 and 95. The close to-day was 94 3.4 in Montreal and 97 5.8 in London. The earnings for the week ending 7th instshow the remarkable increase of \$116,000, but this had no effect on the quotation in view of the almost simultaneous announcement of the exceptionally bad Bank Statement in New York.

The number of shares which changed hands during the week was 1,465.

The increase in the carnings of the Grand Trunk Railway for the first week of November shows up comparatively small, amounting to only \$3,341.

The stock quotations as compared with a week ago are as follows:---

	A week ago.	To-day.
Guaranteed 4 per cent		94
First Preference		853
Second Preference		56 š
Third Preference	$23\frac{1}{8}$	223

Montreal Street Railway has been one of the weakest spots on the list, the last sale to-day having been at 307, as against 311 1-2 a week ago. The number of shares traded in during the week was 1.411, and the earnings for the seven days ending 11th inst. show an increase of \$1,779.69 as follows:—

	Inc.
Sunday\$3,613.23	*\$132-19
Monday 4,655.12	368.72
Tuesday 4,618.72	323.51
Wednesday 4,411.44	407.81
Thursday 4,471.29	174.02
Friday 4,449.49	333.11
Saturday 4,923.20	304 71
* Decrease.	

Toronto Railway closed this afternoon at 107 3.8. a fall of 3 1-4 points as compared with a week ago. The number of shares which changed hands was 1,782, and the earnings for the week ending 11th inst. show an increase of \$432.13 as follows:--

Supday \$1,627.91	\$287.40
Monday	282.46
Tuesday	416.32
Wednesday 3,351.42	*214.48
Thursday 3,465.46	*147.20
Friday 3,410.31	*502.20
Saturday 4,687.91	309.83
* Decrease.	

* * *

Twin City is off one point at 62 3-4. The increase in the earnings for the week ending 7th inst. was \$6,207.00.

Montreal Gas is also heavy, showing a decline of 2 3-4 points to 189 1-4. As the stock pays over 5 1-4 per cent. at present figures, it should be a good purchase. It seems somewhat strange that this stock should keep so low, when the stock of the Consumers Gas Company of Toronto, which pays the same rate of dividend, namely, 10 per cent., is selling at 225.

* * *

Royal Electric is easier by I 1-2 per cent. at 160, and Richelieu has fallen 2 points to 108.

* *

The last sale of Dominion Cotton was at IOI, a decline of 2 1-2 points as compared with a week ago.

* * *

Cable has been stronger during the week, having sold as high as 194 1-2, but to-day was lower at 190. The strength developed is due to the announcement that a new issue of \$5,000,000 is to be offered to present holders at par in the proportion of one share of new stock for each three shares of old.

* * *

Dominion Coal common is off three points to 45, and Duluth common also shows a decline from 6 38 to 6.

* * *

MINING MATTERS.

* * *

The closing prices of the listed stocks as compared with last week and sales for the week were as follows:—

	А		To-day.	Sales.
War Eagle	• •	276	270	40,500
Payne			1113	20,825
Montreal-London			46	7,250
Republic	• •	118	115	15.350
Virtue		47	46	4,000

War Eagle had a bad break this week; the stock sold as low as 256 on the announcement made by the Company that the annual meeting would be postponed for three months until the 21st of February next, for the reason that the new manager, Mr. E. B. Kirby, who only assumed charge on August 1st, would be unable to present an intelligent report before the time stated. It was thought there might be some other reason for the postponement than the one named, but the statement made by Mr. Gooderham, the President of the Company, in the press to-day, announcing the likelihood of an increased dividend by about February next, has re-assured holders and given them renewed confidence in the property. There is no mention made as to what the increased rate of dividend will be, but it cannot be less than 2c. per month, with the probabilities in favor of something higher-

Mr. Gooderham states that the output of the mine will soon be "prodigious" in view of the fact that new machinery is to be put in before the end of the year, and he also makes the satisfactory announcement that the net profits for the first half of November from an inferior grade of ore amounted to \$28,000, which is more than sufficient to pay the present rate of dividend twice over.

* * *

Centre Star remains firm at 160 to 162, but it is really a higher priced stock at the present time than War Eagle, in view of the fact that the War Eagle dividend will be increased at about the same time that Centre Star commences to pay dividends. At the present rate Centre Star is selling on the basis of a 7 1-2 per cent. return, while War Eagle, presuming that 2c. a month will be paid in February next, is selling on the basis of about an 8 3-4 per cent. return.

The likelihood is that the War Eagle dividend will in three months' time be 2 1-2c or 3c per month, but if it is no higher than 2c there is room for an advance in the stock of 50 points before it is selling as high as Centre Star.

We, therefore, look for steady appreciation in War Eagle.

* * *

Payne and Republic are somewhat heavier than last week. It was feared that the dividend on Republic stock might be interfered with in the installation of the new machinery, but the announcement is made that dividends will be paid as usual, so that the stock is almost sure to appreciate in price.

. . .

Montreal-London is the only stock on the list which has shown an improvement as compared with the price of a week ago. Its strength is due to the anticipation of the announcement of a satisfactory clean up from the Dufferin Mine within a few days.

. . .

The advance in Canadian Gold Fields Syndicate is due to an amalgamation of the properties in the St. Eugene Group, the Moyie, Queen of the Hills and Lake Shore Group. Mr. Geo. Gooderham has purchased an interest in the Canadian Gold Fields Syndicate of over 1,000,000 shares, and it is stated will be President of the Company. Mr. E. P. Heaton, of Montreal, is to be one of the Directors.

* * *

Virtue is somewhat easier, but is selling at a low price, and should soon have a substantial advance.

* * *

A higher grade of ore than any yet revealed was uncovered in No. 4 tunnel of the Slocan Sovereign a few days ago.

Average assays of this ore gave 145 ounces of silver and 78 per cent of lead.

The ore house on the Argenta property is built, and the ore which has already been taken out will now be carefully sorted and sacked ready for shipment in the future.

(Continued from page 1479.)

Again, referring to the Transvaal difficulty, it is evident that many people are being hit heavily by the opening of hostilities. In London, there are several hundred mercantile houses heavily interested in the Transvaal either by direct shippers or buying agents. And in a smaller degree the Orange Free State is similarly concerned. Besides there are a very large number of manufacturers, etc., whose travellers do a big business with the retail stores of the republics.

In all these cases, trade has been falling off heavily during the past few months, the agents and travellers having been more concerned in getting cash in than in opening further accounts. One big house that could show a surplus of half a million dollars a year ago has been unable to melt its due bills for the last few weeks. Some wise men sold their businesses about nine months ago, just before the slump began to be felt, and propose re-starting after the clouds have rolled by. Textile fabrics and ready-made clothing are the industries suffering most.

BANK OF MONTREAL.

NOTICE is hereby given that a Dividend of Five per cent. upon the Paid-up Capital Stock of this Institution has been declared for the current half-year, and that the same will be payable at its Banking House in the City, and at its Branches, on and after

FRIDAY, THE FIRST DAY OF DECEMBER NEXT.

The Transfer Books will be closed from the 16th to the 30th of November next, both days inclusive.

By order of the Board, E. S. CLOUSTON,

General Manager.
