

The Mildmay Gazette

SUBSCRIPTION: \$2.00 In Advance.

In U. S. \$2.50

MILDMAY, ONTARIO, THURSDAY, JUNE 11, 1925

J. A. JOHNSTON Publisher

JUNE WEDDINGS

EXPRESS YOUR GOOD WISHES BY A GIFT OF BEAUTIFUL CUT GLASS. CUT IN CHARMING DESIGNS. — FRUIT BOWLS — SHERBET SETS — WATER SETS — VASES — SUGAR — CREAMS — TRAYS — MARMALADES — BUTTER DISHES AND GOBLET.

THE PRICE RANGES FROM \$1.00 to \$10.00.

MAY WE HAVE AN OPPORTUNITY OF SHOWING THEM TO YOU.

C. E. WENDT
JEWELLER

NALCO

Granular Effervescent

Liver Salts

A pleasant effective and effervescent Hepatic Salt. It forms a sparkling and cooling drink when mixed with water, which gives relief in Constipation, Biliousness, Torpidity of the Liver, Indigestion and Headache.

Try a Bottle this Hot Weather.

Price 75 cts. a bottle

J.P. PHELAN PhmB

Phone 28 Mildmay

Chealey vs. Mildmay in the local park this (Thursday) evening.

Mrs. George Holland is visiting relatives at Hanover this week.

Home cured Hams, Shoulders and Bacon on hand now. Weiler Bros.

George Haines of Carrick is serving on the jury at Walkerton this week.

Mrs. F. Pender of Guelph was a guest at Dr. W. H. Huck's this week.

Mr. and Mrs. S. F. Herringer are spending this week with Toronto relatives.

Use a King Separator, 600 lbs. \$65.50. 10 day's free trial. Sovereign & Son.

Miss Lavina Schefter, nurse, of Detroit, is spending her vacation at her home here.

L. Pletsch & Son disposed of a used Chevrolet Special this week to John Wand of Karlsruhe.

Mr. and Mrs. Alph. R. Weiler and family of Holland Centre spent over Sunday with relatives here.

Foster Homes required for boys, girls and infants, male and female. Apply Rev. R. Perdue, Walkerton.

Biggest selection of flowering plants—Dahlias, Gladiolus, Begonias—north of Toronto. J. P. Myles, Harriston.

Miss Gladys Duffy and Loretta Baehler of Kitchener were visitors to relatives and friends here over the week-end.

Miss Catherine Ernewein, of Guelph, is spending a couple of weeks with her parents, Mr. and Mrs. John Ernewein.

The local Ford agency sold a Fordor Sedan this week to Mr. F. A. Heisz of Formosa, and a Tudor Sedan to Mr. Garnet Wright of Howick.

Miss Olive Illerbrunn of Deemer-ton spent a few days last week in Guelph and Kitchener and other places. Mrs. George Fox and three children, accompanied her home.

Mr. Campbell Grant, a recent graduate from Osgoode Hall, Toronto, has commenced the practise of law in the town of Walkerton in the office formerly occupied by the late Mr. Collins.

Misses Mary, Catherine May and Messrs. Anthony and Raymond Zinger of New Germany and Miss Johanna Ernewein of Guelph spent the week-end with Mr. and Mrs. John Ernewein of Carrick.

Mr. John Henry Traynor of Los Angeles, Cal., was the guest of his cousin, Mrs. C. Schmidt, this week. Mr. Traynor is a former Bruce boy, but has not visited his old home for the past thirty-five years.

Mr. and Mrs. John Hamel made an eight day motor trip last week to Hamilton, Niagara Falls, Fort Erie, Welland, the Niagara fruit district, and had a most enjoyable time. Mrs. Henry Eidt of Carrick accompanied them.

Mr. Bernard Walter and his two daughters, and Mrs. and Mrs. Stephen Diemert of Carrick leave on Saturday on a ten day's motor trip to Detroit, West Branch and other Michigan centres. Next Tuesday they will attend the marriage of Mr. Walter's brother, Joseph, at West Branch.

Eat Whole Wheat bread for health. Read advt. for real offer. Sovereign's.

Light delivery, one-horse wagon, for sale. Sovereign & Son.

Miss Marie Schneider of Stratford is home for a short visit to her parents.

Mrs. Roy Wingefelder of Waterloo is visiting her parents, Mr. and Mrs. Jos. Kunkel.

The roof is being put on the new Evangelical church sheds at Mildmay this week.

John R. Field of the Elora Road raised a new barn on his premises on Tuesday afternoon.

Cream Prices 22c Cash, 34c Trade. Eggs, Extras 28c, Firsts 24c, Seconds 19c, at Weiler Bros.

Mrs. A. Everet of Stratford is spending a few days with her daughter, Mrs. C. E. Wendt.

Mr. and Mrs. C. Reinhart and family of Stratford were guests at Postmaster Kramer's this week.

Found—A sum of money. Owner can have same by applying at this office and paying for this advt.

The oppressively hot weather of the past week was broken by the advent of a decidedly cool spell yesterday.

Mrs. Veronica Illig, accompanied by her sons, Menno and Alphonse, of Kitchener visited friends here on Sunday.

When you need Cut Flowers, Plants, Bouquets, Bulbs or anything in flowers, phone 24, J. P. Myles, Harriston.

Come and cheer the boys to victory when they meet the Chesleyites in a league game in the local park this (Thursday) evening.

Mr. and Mrs. Wm. A. Darling of Carrick and Mr. and Mrs. John Darling of Belmore visited at London and Ford this week.

Mr. Christian Tegler of Carrick is at London this week with his sister, Miss Lena Tegler, who is undergoing medical treatment.

Don't miss the Minstrel Concert in the Town Hall on Wednesday evening of this week. Program will be given by high-class talent.

Mildmay is scheduled to play a W. F. A. league game at Owen Sound on June 18th. Owen Sound defeated Walkerton 5 to 1 last week.

Solemn Communion services were held in the Sacred Heart church on Sunday. The sacrament of communion was administered to a class of thirty-eight boys and forty-one girls.

Grey County Council awarded the contract of Hudson's bridge on the townline Bentinck and Normandy to Joseph Schickler of Mildmay for the concrete work. Stratford Bridge Co. has the steel contract.

Mr. and Mrs. Simon Flach and son, Seraphine, and Mr. Alex. Green of Redford, Mich., are visiting relatives and friends here. They were former residents of this locality but have not been here for 31 years.

The Municipal Act, which formerly made it necessary for a municipal candidate to resign as school trustee ten clear days before the nomination meeting, has been amended to allow the candidate to qualify if he resigned three clear days before the nomination.

Mrs. Andrew Weishar, Mrs. John Weishar, Mrs. Leander Weishar and Mrs. Jos. Cronin attended the graduation exercises at St. Joseph's hospital at Hamilton last Thursday evening. One of the graduating nurses was Miss Clara Weishar. Miss Margaret Brick of Formosa also graduated this year.

Mr. Chas. Fraeck, of Normandy, passed away on Tuesday evening at the Hanover hospital, after an illness of six weeks with a complication of ailments. He was 72 years of age, and had lived in Normandy for forty-two years. He is survived by his widow, and four daughters, one of whom is Mrs. John Hohnstein of Carrick. The funeral takes place on Friday afternoon at Malinsky's Lutheran church cemetery.

Continuation School Inspector Hoag of Toronto was here last Thursday conferring with the local school boards, with a view of establishing a continuation school here. The improvement of our educational facilities would be a tremendous boost to the village and surrounding country and the cost of same is not difficult to finance. A public meeting of all concerned will probably be called at any early date to discuss the matter.

BORN

WENDT—In Mildmay, on June 7th, to Mr. and Mrs. C. E. Wendt, a son—Jack Charles.

We carry a full line of fancy baking for the week ends. Keelan's Bakery.

Just received a fresh stock of Chocolates, Confectionery, etc., at Schuett's Restaurant.

Asters, Petunia, Stocks, Snap Dragon, Verbena, Marigold, Pansies, Plants. J. P. Myles, Harriston.

Social Dance.
A dance will be held in the Mildmay Town Hall on Friday, June 12. Fryfogle's Six-piece Orchestra.

Notice to Subscribers.
Our mailing list was corrected up to Tuesday, June 9th, and we would ask all those who paid their subscriptions previous to that date to look up their label and see that it is correct. We also ask all those who are in arrears to remit at once.

South Bruce Conservatives Meet.
The annual meeting of the South Bruce Liberal Conservative Association was held at Walkerton on Monday afternoon, when the political situation in the riding came up for consideration. It was decided to call a nominating convention in the near future, to name a candidate for the approaching federal election.

O. S. Game to be Replayed.
We understand that the football match between Owen Sound and Mildmay, which was called off on account of rain, after thirty minutes play, when the score stood a tie at one all, has been ordered to be replayed at Mildmay. It is probable that a date may be arranged immediately after the completion of the district finals, as set out in the present schedule.

Dirty Piece of Vandalism.
There are some pretty small men in this county, but the meanest we have heard of some time was the scamp who entered the school premises at Union Public School No. 3 and 15 on the Howick and Carrick townline on Monday night and destroyed the flower beds and some of the trees and shrubs. An individual who would be guilty of an action like this should be locked up.

John J. Keelan M. P. P.
The many friends here of Barrister John J. Keelan of Praelate, Sask., extend their hearty congratulations upon his election as a member of the Saskatchewan Legislative for the constituency of Happyland. He was opposed by Mr. R. Baldwin, a very strong and popular progressive candidate, and defeated him by a majority of 282 votes. John is a son of Mr. Henry Keelan of Mildmay and was born and raised here.

Gravelling Contracts Awarded.
Carrick Council awarded five gravelling contracts last week as follows:—50 yds. on Elora road, opposite lots 1 and 2, awarded to Jerome Illig for 70c per yard; 25 rods on road between Lots 30 and 31, Con. A, northeast of Formosa, to Walter Tiede for 70c per yard; 40 rods on Con. B, to Isidore Seifried at 44c per yard; 65 yds. on 5th side road and Con. 2, to Nich. Hohnstein at 44c per yard; 50 yds. on Con. 6, opposite lot 5, to Wilfred Schweitzer at 60c per yard.

Lost Their Infant Son.
Harvey, the fourteen month old infant son of Mr. and Mrs. George Erch of the 13th concession, passed away quite unexpectedly on Saturday last, after a brief illness with influenza and throat trouble. The little fellow appeared to be recovering, when a relapse set in suddenly, causing his death. The funeral took place on Monday afternoon to the Mildmay Lutheran cemetery. Sincere sympathy is extended to Mr. and Mrs. Erch in their loss of their baby, which was a particularly bright and lovable child.

Matrimonial.
A very pretty June wedding was solemnized in St. Mary's Church, Formosa, on Tuesday morning of this week, when Miss Clara Matilde, daughter of Mr. and Mrs. Anthony Hihn, was united in marriage to Mr. Edwin Waechter of Carrick. Rev. Father Brohman officiating.

The bride was beautifully attired in white silk Canton, trimmed with silver beads, white shoes and stockings, wore a veil caught with orange blossoms, and carried a bouquet of butterfly roses and maiden hair fern. She wore the groom's gift, a diamond set bar pin. She was attended by her sister, Miss Antoinette Hihn, nurse-in-training at St. Joseph hospital, Toronto, who was dressed in coral satin crepe brocade, with hat to match, and carried a bouquet of pink carnations and maiden hair ferns, and wore the groom's gift, a pearl set bar pin. Mr. Stephen Waechter, supported the groom. Relatives of the contracting parties were present from Toronto, Kitchener, Neustadt and Cargill, and the presents and cheques. The ceremony was appropriately spent in games, music and dancing. The Waechter orchestra of which the groom is a member, furnished the music. The happy young couple will reside on their farm south of Mildmay. Their many friends extend congratulations and best wishes.

Let us handle your Ice Cream needs for that picnic you are planning. Prices in gallon lots only. Clover Cream \$2.00 per gal.; High quality pure cream Ice Cream (beats factory) \$2.00 per gal.; Home-made \$1.20 per gal. Kindly give us a few days' notice. Sovereign & Son.

Dance at Clifford.
A Dance will be held in the Clifford Hall on Friday evening of this week, June 12th. Waechter's orchestra will furnish the music.

Chesley Here Thursday Night.
The Chesley W. F. A. team will be here on Thursday evening of this week for a league game in the senior-intermediate series. The visitors have a number of exceedingly fast players in their line-up, and promise the Stars a real stiff argument here. Let's all go. Game will commence at 6.30 sharp.

Fire Engine Nearly Ready.
The Bickle Fire Engines, Limited, of Woodstock, has advised the Mildmay Council that the pumping engine this village has purchased is nearing completion, and will be ready for shipment in two weeks or perhaps earlier. The new engine is now in the paint shop, having been fully tested out, and found to be O. K. in every particular.

Engineers Favor Calcium Chloride.
Provincial Engineers Alder and Hanning called here last Friday to confer with the local council as to application of a dust layer on our streets. Calcium chloride is said to be ideal for this purpose if it is properly applied, and it is quite possible that this chemical will be used on all our streets this summer. It is possible that the first treatment of the streets will be given within two weeks.

Barn Raising and Quilting.
Frank Lobsinger, raised a fine new barn on Mrs. Stewart's farm north of this village last Thursday afternoon. The framing was done by N. V. Schaus, and every piece of timber fitted in with perfect precision. While the men were raising the new barn, the ladies, thirty-four in number, were busy quilting and preparing supper in the house. Several fine quilts were completed and the day was an exceedingly busy, but perfectly jolly one for all concerned. One lady provoked a lot of amusement by coming attired in a dress which was fashionable forty years ago. Mr. and Mrs. Lobsinger wish to thank all who came and rendered such generous and hearty assistance.

Stars Win at Walkerton.
The Mildmay Stars were rather fortunate to win the league game at Walkerton on Monday evening, when they defeated the fast county town outfit by 1 to 0. The Walkerton players have been practising faithfully this spring, and are all in good condition, and while our fellows had considerable of the advantage in the first period, they were forced to extend themselves to the limit to keep the home team from scoring in the second half. Mildmay's goal was secured after eighteen minutes play, MacGowan scoring on a penalty kick, a Walkerton defence man had put up his hand and prevented the ball from going in, so it was in no sense a gift goal. In the second period the home team made desperate attempts to even the count, and they played a mighty aggressive game. Wendt in goal for Mildmay, however, outguessed them, and kept them scoreless. The game was a fairly good one, although there was more roughness than was absolutely necessary. H. Haeeing of Mildmay was the referee.

Potatoes Wanted.
150 bags of good potatoes wanted. Will pay highest market prices. Darling & Kaufman.

House Had Close Call.
One day last week when Mr. B. Walter, Mr. and Mrs. B. Goetz and Mr. and Mrs. J. Goetz were motoring up the Elora Road to the Mud River to fish, they noticed that John Dittner's house was on fire. Giving the alarm, they joined in the battle against the flames, and succeeded in extinguishing the fire before any considerable amount of damage was done.

Ayton Presbyterians Voted Out.
The Ayton Presbyterian congregation, which for years has been in a circuit with Mildmay, took a vote on church union last week, the result of which was announced on Sunday, and which was strongly in favor of remaining out of the union. As Mildmay is now a union church, it is certain that the Ayton vote will mean the breaking up of the circuit, as it is unlikely that two distinct denominations would be served by one pastor.

U. F. O. Picnic.
The Culross U. F. O. clubs will hold a basket picnic at Teeswater park on Friday, June 12th, when addresses will be delivered by Mr. Robert Forke M.P., progressive leader; J. Walter Findlay M. P., Mr. Speaker M. P., of Red Deer, Alta., and M. A. McCallum M.P.P. There will also be a baseball match between the Chesley and Teeswater junior farmer clubs. No disappointments. Gates open at 1 o'clock. Admission 10 cents.

Death of Mrs. Fred Biehl.
The death of Mrs. Anna Martha Biehl, relict of the late Frederick Biehl, took place on Sunday night, after a very brief illness with broncho-pneumonia. Deceased who was in her eighty-sixth year, was born in Germany, and came to Canada about sixty years ago. After her marriage, she and her husband lived for ten or twelve years on the 10th concession of Carrick, later moving to Mildmay where she has resided ever since. Mrs. Biehl was a very sociable, kind-hearted woman and although she has been an invalid for some years she still retained a wide circle of friends. She is survived by a family three sons, Conrad Biehl of Los Angeles, J. H. Biehl of Gore Bay and Chas. Biehl of Galt, and five daughters, Mrs. O'Connor of Mildmay, Mrs. H. Goritz of Galt, Mrs. (Rev.) Wagner, Mrs. J. A. McAllister and Mrs. J. B. Miller of Buffalo. She is also survived by one brother, Mr. John Diebel of Mildmay. The funeral will take place this (Thursday) afternoon to the Mildmay Evangelical Cemetery.

DEBENTURES FOR SALE
The village of Mildmay offers for sale \$3500 of five per cent. installment bonds, particulars of repayment of principal of which are as follows:—

\$278.26 payable on July 1st, 1926;
\$292.17 payable on July 1st, 1927;
\$306.78 payable July 1, 1928; \$322.13 payable July 1, 1929; \$338.23 payable July 1, 1930; \$355.14 payable July 1, 1931; \$372.90 payable July 1, 1932; \$392.04 payable July 1, 1933; \$411.64 payable July 1, 1934; \$430.71 payable July 1, 1935.

The lowest or any tender not necessarily accepted. Tenders should be in the hands of the undersigned not later than Saturday, June 20th.

J. A. Johnston
Clerk-Treasurer
Village of Mildmay,
June 8, 1925

A REAL OFFER

An extra pair of trousers FREE is offered by the Cornell Clothing Co. with every suit ordered at regular prices, for ONE WEEK ONLY — June 18, 19, 20, 22, 23, 24 and 25.

Come in and see us at once as this offer is not good after these dates.

We also handle Tip Top Tailored to Measure Clothes—one price only—\$24.00

O.L. Sovereign & Son

CANADA PAINT
300
The Paint for Appearance and Protection
CANADA PAINT
(Canada's Favorite)

Whatever motive influences your paint buying—whether you paint for appearance or to "save the surface"—you will find CANADA PAINT to be really "the paint of merit," and the most satisfactory from every point of view. With "Elephant Brand" White Lead as the pigment basis, the quality of Canada Paint is absolutely assured. Easy spreading under the brush, it is far more durable and will cover more space than the so-called cheap paints.

The Quantity Required
To estimate the amount of CANADA PAINT required, add the number of feet in width of front and rear to number of feet in length of building (both sides), multiply by the average height and divide by 425 for two coats.

We carry a complete stock of Canada Paint and other C.P. Products, including the famous ZIN VARNISHES. It will be a pleasure to advise you with color cards and detailed information concerning the particular job you have in view.

J. F. SCHUETT
Made in Canada by the manufacturers of the famous "Elephant Brand" White Lead

The Automobile

BALLOON TIRES PROVE COMFORT IN HARD TESTS.

That balloon tires have come to stay as representing advance in comfort for motorists is generally conceded. However, there are some new tendencies pertaining to the use of balloon tires which obtain as a result of experience in their use during the last few months. Consideration of these tendencies should enable the automobilist using balloon tires to prolong the life of this important factor in motoring, and to secure more general satisfaction from the standpoint of riding comfort.

While the natural tendency has been for owners to do nothing but sit back and enjoy the ve-vet-like, shockless ease that came with balloon tires, other owners have been making a study of how to get the best possible results from using them, and manufacturing concerns have had their experts at work figuring out the best methods that would give the greatest satisfaction to automobile owners.

PROPER INFLATION FOUND.

One of the most important things which has been discovered is that at first there is a tendency to under-inflate balloon tires. It was found that with a very low air pressure the amount of shock was greatly reduced. The fact that under such circumstances the balloon tires were still able to give satisfaction from the standpoint of continued service indicates the strength which manufacturers put into these first designs of larger tires. After some investigation, however, it has been demonstrated that under-inflation does not give the best results in the long run and that in using the balloon tires the car should not sag when driving along the highway. In fact, there is a definite tendency nowadays to put more air in these tires, so that the shoe stands up in much the same way as a cord tire.

Of course, even under these circumstances, there is a larger contact with the road when using balloon tires. This is due to the larger dimensions of the new tire. But the results are more satisfactory. It is now the usual thing for motorists to carry from five to fifteen pounds more air pressure in their tires than was the case twelve months ago.

As a matter of fact, in many cases the air pressure has been doubled. Where a year ago some automobile owners were carrying only fifteen pounds in their tires, they are now carrying thirty pounds, and several manufacturers are recommending twenty-five pounds for the rear tires and thirty pounds for the front ones. While this does not give quite the feather-bed effect of the low inflation, it does give a riding comfort which is very satisfactory and much in advance of the cord tires. This makes for better mileage and enables the driver to get more power from the engine.

The First "Black Maria."

Now that London's last real "Black Maria"—the horse-drawn prison van—has been relegated to the scrap-heap, it is interesting to trace the manner by which it came by its name. The common theory is that it was named after a muscular negress of Boston named Maria Lee, and there seems to be no other candidate. It was said that "Black Maria" was so powerful it was always necessary to obtain a conveyance in which to take her to prison. The first prison vans were, therefore, named after her. The name, "Black Maria," is one of the few respectable terms in the language which the Oxford Dictionary omits to recognize. Will the phrase disappear now that the "Black Maria" becomes a motor instead of a horse vehicle? Quite possibly it may, though the slang dictionary is a very conservative institution.

Artificial Silk Popular.

Leek, England, the first silk centre to take up seriously the production of artificial silk garments, has been so successful in the change that its percentage of unemployment is the lowest of any district of the silk industry.

There is nothing new in trial marriages. According to some people, every marriage is a trial.

There also is the advantage of such a car being less liable to skid on a slippery highway than with the cord tires, and there is much less danger of the balloon tires picking up nails and getting punctures when they are more highly inflated than in the former low-inflation method. Of course, the greatest benefit which comes from the increased inflation is found in the fact that tires which have been inflated will last much longer, and therefore the tire expense to the motorist is considerably reduced.

It is now considered that about thirty pounds is the best pressure to use in tires on an automobile weighing around 3,000 pounds. Cars which are heavier will need some extra air in the tires to secure the same general effect in riding. A full balloon tire carrying a load of about 1,000 pounds is considered over-inflated at anything over thirty pounds. And for a 6.20 tire, one of the manufacturers recommends twenty-four pounds as the minimum inflation for such a car around 1,000 pounds.

Another important consideration is that inasmuch as the manufacturers have carefully tested the tires they make from the standpoint of giving the greatest service possible, the owners should carefully follow manufacturers' recommendations as to pressure. He should be careful above all things not to over-inflate, and it is almost as important to be sure that the tires are not under-inflated. This means that the motorist should take the trouble to test the air in his tires frequently to see that they are kept at about the proper pressure.

Car manufacturers have been improving the designs of steering gears, springs and other units which are affected by low pressure tires, so that there is now a perfect adjustment between these factors and the new type of tires. This adjustment, however, needs the proper pressure in the tires in order to be completely satisfactory and it is found that even one or two pounds one way or the other makes considerable difference in the satisfaction derived from balloon tires.

Ordinarily a tire should not lose more than four pounds of air pressure in a month, provided the valves are kept tight and the caps are given a tight twist. In some instances, under these conditions, the pressure will remain practically constant for several weeks. The owner of the car usually can ascertain in a short time how rapidly deflation takes place and can adjust his schedule of renewing air pressure in his tires accordingly.

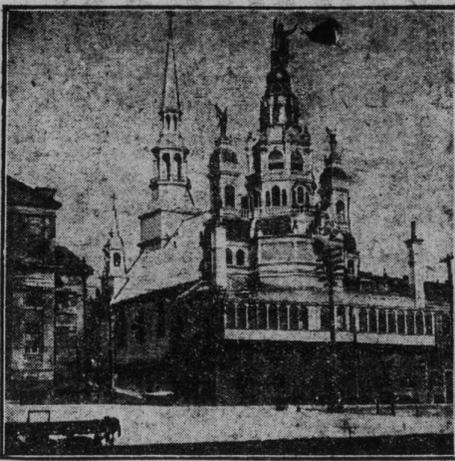

It is estimated that balloon tires have greatly reduced the number of punctures, so that it is not uncommon now for a driver to go 5,000 miles without having any tire trouble. These tires are not so soft as to drag up foreign matter nor so hard as to force nails and other sharp articles into the tread.

Listening to Music.

Listening to music with intelligence demands from the listener more than is demanded from the votary of the other arts. The lover of painting or of sculpture may stand before the picture or the statue for as long as he likes. The lover of literature has available to him the books of his authors. Those arts not only provide for their lovers permanent records of their beauties, but some of them enable those who study them to bring into play the healthful activity of comparison. Thus, the person looking at a picture or a piece of sculpture instinctively measures what they represent with the reality in so far as he has seen it. Music, on the other hand, has no such aids to its effect upon its hearers. Being merely sound, and sound that is as fleeting as it is intangible, its effect must chiefly be instantaneous effect. For that reason, listening to it, if it is to be intelligent listening, must be far more concentrated than intelligent looking at a picture or intelligent reading of a book need be.

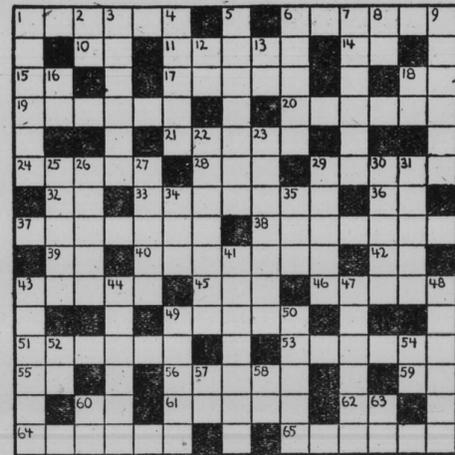

Which Way Are You Living?

There is a tremendous difference between living life indifferently, without purpose or plan, and living it triumphantly with a definite goal in view.—O.S.M.

Visitors to Montreal find the famous old church of Bonsecours one of the interesting landmarks. The church is dedicated to all seafarers.

CROSS-WORD PUZZLE

© THE INTERNATIONAL SYNDICATE.

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES

Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

HORIZONTAL

- 1—A vegetable
- 2—Of more recent date
- 10—In the year of our Lord (abbr.)
- 11—To analyze according to grammar
- 14—Division of the army (abbr.)
- 15—Railway (abbr.)
- 17—To strike out
- 18—Note of the scale
- 19—One who loves extremely
- 20—Perches
- 21—Footless animals
- 24—To take firm hold
- 28—Highest card
- 29—Variety of pork
- 32—Exclamation
- 33—City in N. E. Massachusetts
- 36—Prefix, Toward; to
- 37—Everlasting
- 38—Black and red bird of U. S. (pl.)
- 39—Abbr. for name of a Western State
- 40—Covered with dots
- 42—Bone (Latin)
- 43—A dunce
- 45—Used in billiards
- 46—Made an error
- 49—Slips sideways
- 51—Variety of domestic fowl
- 53—One who paints
- 55—Abbr. for a thoroughfare
- 56—A vegetable
- 59—Civil Engineer (abbr.)
- 60—Toward
- 61—Plural of that
- 62—Prefix meaning "in"
- 64—Oxyrates
- 65—To be indignant at

VERTICAL

- 1—A throng
- 2—Mother (abbr.)
- 3—Loves extremely
- 4—Musical entertainment
- 5—River in Venezuela
- 6—Looks at maliciously
- 7—City in State of Washington
- 8—A large cask (abbr.)
- 9—Dried fruit
- 12—Man's name (familiar)
- 13—N. Central State of U. S. (abbr.)
- 16—Measure of length (abbr.)
- 18—A thoroughfare (abbr.)
- 22—A fastener
- 23—Attentive
- 25—Proportion
- 26—in front
- 27—A spring flower
- 28—Party to a marriage ceremony
- 30—Tint
- 31—Stout
- 34—Short sleep
- 35—Before
- 41—Charge made for instruction
- 42—Bigoted
- 44—Physician
- 47—Ties again
- 48—Abhor
- 49—Dots
- 50—More rational
- 52—Man's name (abbr.)
- 54—Southern State of U. S. (abbr.)
- 57—Abbr. for a New England State
- 58—A bone (Latin)
- 60—Same as si (musical)
- 63—Point of compass (abbr.)

Keep Your Piano in Tune.

If it is important that the piano in the home be kept in tune—and who will deny that it should?—it is a great deal more important that the piano in a public or semi-public place be kept in tune. Such a piano, upon a single hearing,

can disgust a whole roomful of people. Not one family and a few neighbors, as in the case of a piano in the home, but many families.

And yet the majority of pianos in public places are neglected. Is this not worth a thought on someone's part?

Illiteracy in Canada.

Illiteracy in Canada is not confined to its frontiers and newer territories. Defining illiteracy as inability after the age of ten years to read or write in any language, an analysis of the census statistics of 1924 shows that 5.10 per cent. of the population of Canada is illiterate. Of the provinces, Ontario has the lowest illiteracy, 2.90 per cent., and New Brunswick tops the list with 7.61 per cent. illiterate. Manitoba comes second to New Brunswick with an illiteracy of 7.09 per cent. In that province the high percentage is due in great measure to the large immigrant population in which illiteracy is much higher than among Canadian born. Of the foreign born in Manitoba 20.72 per cent. are illiterate. In the three Western Provinces there are 69,638 illiterates and of these 81 per cent. are foreign born and 19 per cent. Canadian and British born—a condition which should make us, as Canadians, think. Compulsory education laws are doing much, but in spite of these, many Canadian born children of foreign parentage as well as many children of Canadian illiterate parents are perpetuating their family names in the ranks of illiteracy. For instance, 39.46 per cent. of foreign born Ukrainians in Canada are illiterate and 7.65 of their Canadian born children can neither read nor write. Illiteracy, however, must not be confused with inability to speak English. This is another problem and a serious one. In Saskatchewan alone over 40,000 citizens cannot speak English.

A much lower urban than rural illiteracy in Canada, even among foreign born, demonstrates the excellent work that is being accomplished by night schools.

Field Marshal French.

Whatever place may be finally assigned the Earl of Ypres in the history of Britain's part in the World War, no subsequent revelations can rob his name of the lustre that attached to his supreme effort on the battlefield from which his title was derived. Lord French was the foremost factor in the creation of the "First Hundred Thousand," as the nucleus of that greater force whose firm stand on the Continental shore saved the day for the Allies and for embattled civilization.

When French's great service was performed, it was undoubtedly well for the further conduct of the British offensive that the supreme command was intrusted to Haig. But in a year and a half of intensive warfare he had justified the faith reposed in him as the brilliant tactician of the South African war. As Lord Lieutenant of Ireland until the Home Rule Partition Act became effective, he served the Imperial cause with courage and firmness in a critical juncture.

Whatever policies of statecraft or manoeuvres in the field may continue to be controversial issues in the appraisal of his career, he set down to his record so much that was for the indisputable advantage of the cause in which his sword was drawn that he is entitled to a place high in the list of soldiers who have ably served the British commonwealth.

Obstinate.

Mother—"Now, children, don't quarrel. What's the matter?"
Willie—"We're playing airplane, and Mamma won't jump out the attic window with your umbrella."

Punish, Owner of the Dog.

When a dog barks at night in Japan the owner is arrested and sentenced to work for a fixed time for the neighbors whose slumbers may have been disturbed.

Solution of last week's puzzle.

MUTT AND JEFF—By Bud Fisher.

Romance Enters the Little Fellow's Life.

A GRATEFUL LETTER

From a Lady Made Well by Dr. Williams' Pink Pills.

"I wish from my heart I could persuade every person who is run down in health to give Dr. Williams' Pink Pills a trial." Thus writes Mrs. Louis Mitchell, Oak Point, Man., who further says:—"About a year ago I was a weak woman, suffering from a run down system and impoverished blood. Any little exertion would cause me to tremble and my heart to throb violently. I could not sweep a room or walk fifty feet without being exhausted. Then I began taking Dr. Williams' Pink Pills and after taking only six boxes I am as well and strong as ever. I can walk and run without stopping every few seconds gasping for breath as previously. Dr. Williams' Pink Pills will be my stand-by in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to anyone needing a tonic.

There are many troubles due to weak, watery blood which can easily be overcome by a fair use of Dr. Williams' Pink Pills. The sole mission of this medicine is to enrich and purify the blood, and when that is done all the varied symptoms of anaemia disappear, and good health returns. You can get these pills through any dealer in medicine or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Curiosities of Hair.

Some curious anomalies regarding the hair and skin have been noted by Professor Joseph Barcroft. He tells us that hair is merely skin which has grown in a particular way, hardened, and instead of being rubbed away, as happens with the ordinary surface of the skin, sticks out in tubular form. The pigment which colors the hair is not the same as that which colors the skin, for the skin of an Anglo-Saxon, however black his beard, is not negro.

Experiments with a piebald cat showed that though at first glance the skin, shaved of hair, remained parti-colored as the hair, when the places were put under a microscope it revealed that the colored parts were merely the hair roots seen under the skin.

Melanin is the name given to the pigment which colors Negroes or the black cat, and this pigment will also be found when an apple or potato is cut in half and exposed to the air. It is not clear, however, what relation exists between the coloring matter of differently hued animals.

In studying white animals some interesting points arise. There are two sorts of white animals, as in the case of white rabbits—pure white with pigmented eyes and albinos (which are devoid of pigment or coloring matter). If one were to cross a pure white rabbit with a pure black, the family in the first generation would all be white, while if a black thoroughbred were crossed with an albino the first generation would all be black.

Were Getting "Nerves."

"My, what a herd of dry agents are being sent out of Washington these days!"

"Yes; their presence was making congressmen so nervous they had to be sent away."

Sagacity of the Fox.

The sagacity of the fox is most wonderful, and those who have studied the animal's habits are never tired of dilating on its cunning. Foxes, like dogs and cats, are troubled with fleas, and when the infestation becomes unbearable they gather a mouthful of moss, and slowly walk backwards into the nearest stream until only the mouth is left above the surface of the water. The fleas naturally take refuge on the moss, and when the fox is satisfied that they have all embarked, he opens his mouth and the moss floats away, while the fox regains the bank, happy in freedom from his tormentors.

Come and Join the Party.

Mrs. Fabb—"Does your husband object to cats?"

Mrs. Stabb—"Yes, indeed. He says that I feed all the cats in the neighborhood. Won't you stay and have tea?"

WE WANT CHURNING CREAM

We supply cans and pay express charges. We pay daily by express money orders, which can be cashed anywhere without any charge.

To obtain the top price, Cream must be free from bad flavors and contain not less than 30 per cent. Butter Fat.

The Little Road to Nowhere.

The little road to nowhere
Is the road for you and me,
The little road to nowhere
That runs beside the sea,
Between the sea and mountains
Where birds the silence break,
The little road to nowhere
Is the road we long to take.

The little road to nowhere
That lies beside a stream,
The little road to nowhere
That leads us to a dream,
To where a dream awaits us,
A dream we've sought in vain,
The little road to nowhere
That runs past mead and plain.

It runs past lake and mountains,
Past farm and town and tree,
It leads to where the sunset
Is soundless in the sea;
To where no envy whispers,
No grief or hate can mar,
The little road to nowhere,
Where peace and silence are.

This world is far too earnest,
Is far too grim and cold,
Too full of petty warfare,
Too bitter and too old.
But we'll be young for ever!
Because so well we know
The little road to nowhere,
The road all wise folks go!

—Mary Carolyn Davies.

Desert Born Butterfly Often Flies to Iceland.

The Painted Lady butterfly is as fond of travel over sea and land as she is of her gorgeous coloring. Her husband, too, likes migratory flights and, according to scientific researches, these butterflies in great numbers have been known to make journeys from Turkey to England.

C. B. Williams, chief entomologist of the Egyptian Ministry of Agriculture, who has been studying the habits of the Painted Lady for several years, gave an account of his work in a recent issue of "Nature." The butterfly of this species, he believes, originates somewhere in the south or southeast of the long line of desert stretching across north Africa and Asia Minor, 2,000 or 3,000 miles from England.

They leave the desert early in the spring and arrive in the vicinity of the southern shores of the Mediterranean usually about April. From Palestine they appear to fly through Syria and Turkey to the Balkan states, and from Egypt, Tripoli and Algiers they cross to southern Europe.

By the more hardy fliers England is reached late in May or early in June, Scotland a week or so later, and here many of them spend the summer. The Painted Lady, those which originate in the desert country, have been seen in Iceland in July, some 4,000 miles from their starting place.

Whether in crossing great stretches of water they continue flying all night or rest on floating masses in the water has not yet been determined. Neither is it known, so far as Mr. Williams was able to ascertain, whether a return journey is made.

Death to Egrets.

In Paraguay and parts of Brazil a great many white egrets, called in Spanish "garza blanca," are killed for their plumes.

It is the long, white wing feathers, which grow out at nesting time, that are valuable.

While there are no laws against killing them, any one who does so is a poor sportsman. It is the females that have the plumes, and killing her makes the whole nest of fledglings starve to death.

Surnames and Their Origin

FRANKLIN.
Variations—Stedman, Franklyn, Hoffmann.
Racial Origin—English and German.
Source—A title.

Here is a group of family names which in their origin are traced to certain peculiarities of the social system as it was organized throughout northern Europe in the days of feudalism. The vast bulk of the common people, of course, were virtually all retainers of the nobility, virtually slaves of the soil. The great "middle class" of today was then but a scattered handful of free men, not of the nobility, but yet who were entitled to hold land in their own right. Their ranks included the merchants in the cities and the owners of homesteads and large farms in the country.

"Franklyn" and "steadman" were the designations of social and political status under which these wealthy middle class farmers of the middle ages were known in England. Chaucer, writing whereof he knew about the people of his own day, so describes the "franklyn" as to leave no doubt that he was a person of importance and wealth, entitled to hold offices as important as sheriff, and yet not a member of the nobility. He was, in fact, the forerunner of the country "squire," though the latter designation was not applied to him until several centuries later, being at that time descriptive of members of the nobility, usually youths in the service of their relatives and overlords, and aspiring to an honor of knighthood.

In Germany, where feudalism changed less rapidly into the modern order, and where surnames did not become general until two or three centuries after they did in England, the "franklyn" or "steadman" was known as a "hoffman."

The Winnipeg Convention.

On June 24, 25 and 26 the Canadian Weekly Newspapers Association will hold its annual convention in the City of Winnipeg. The C.W.N.A. has within its membership over 500 weekly newspaper editors, including weekly newspapers as far apart as the Yukon and Newfoundland, so that every section will be represented at the meeting in Winnipeg.

No one asks the why of conventions. The Press Association, organized in 1859 by weekly newspaper men, has

Lorne E. Eedy
President Canadian Weekly Newspapers Association, 1924-25, proprietor of Walkerton (Ont.) Telescope.

been meeting every year (usually in the Month of June) for 65 years, and the C.W.N.A. is keeping up the splendid traditions which brought so many outstanding newspaper editors together year in and year out. The practice of the Association in holding conventions in different parts of the country has proved of immense value. In the past four years conventions have been held in Vancouver, Halifax, Ottawa and Toronto, while last year a further trip was made through Belgium, France and the United Kingdom. The editors and their ladies who

E. Roy Sayles
Manager and Treasurer of the Canadian Weekly Newspapers Association, with head offices at Toronto.

accompany them are to be especially entertained at Winnipeg by the Manitoba Government, the City of Winnipeg, Board of Trade and other civic bodies. The business sessions of the convention include some excellent speakers on various publishing and printing subjects. Prominent speak-

MAGUIRE.

Variations—MacGwyre.
Racial Origin—Irish.
Source—A given name.

Like virtually every Irish surname, the name of Maguire was at first the name of a clan, for until as late as the sixteenth century there was still in existence in that country a clan system closely similar to that of the Scottish Highlanders. In fact, the Highland clan system is but a development of the Irish system, brought to the Highlands by the invaders and settlers from the north of Ireland.

Among the most powerful of the ancient Irish clans and one which furnished many of the "High-Kings" under whom the Irish kingdoms were united in a sort of empire for a period of nearly 3,000 years were the O'Harts.

As nearly as can be ascertained, it was early in the ninth century A.D. that the chieftain "Odhair," a member of this clan, obtained a sufficient number of followers to establish, under the prevailing laws and customs, a clan of his own. In forming the clan name by prefixing "Mac," indicating "descendants of" or "followers of," the combination had to be made with the possessive case of the name. The possessive case of "Odhair" was "Uidhir" (for the Irish tongue, in its inflection, often modifies the entire word rather than merely the ending. Thus, the clan name became "MacUidhir," the pronunciation of which was approximately "Mac-weer." In Anglicizing the name the "u" became a "g," and it was pronounced "Macgweer." The so-called long "i" is a comparatively modern development of pronunciation within the English language itself, which has occurred since the name has become widespread among those speaking English.

ers at the social functions will be Premier Bracken of Manitoba, Premier Dunning of Saskatchewan and Premier Greenfield of Alberta.

Sewing.

The wind is sewing with needles of rain,
With shining needles of rain
It stitches into the thin
Cloth of earth; in,
In, in, in,
Oh, the wind has often sewed with me
One, two, three.

Spring must have fine things
To wear like other springs:
Of silken green the grass must be
Embroidered. One and two and three.
Then every crocus must be made
So subtly as to seem afraid
Of lifting color from the ground;
And after crocuses the round
Heads of tulips, and all the fair
Intricate garb that Spring will wear;
The wind must sew with needles of rain.

With shining needles of rain,
Stitching into the thin
Cloth of earth, in,
In, in, in,
For all the springs of futurity,
One, two, three.

—Hazel Hall.

GIVE CONFIDENCE TO YOUNG MOTHERS

A simple and safe remedy for the common ills of childhood should be kept in every home where there is a baby or young child. Often it is necessary to give the little one something to break up a cold, allay fever, correct sour stomach and banish the irritability that accompanies the cutting of teeth. Experienced mothers keep Baby's Own Tablets on hand for such purposes and young mothers can feel safe with a box of the Tablets ready for emergencies. The Tablets are a mild but thorough laxative that act without gripping and they are guaranteed to be absolutely free from opiates or other harmful drugs. They are sold by all druggists or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Spider-Web Secret.

The spider's web is remarkable in several ways. It is the only trap, save one, that any animal builds.

The manufacture of this essential accessory to the spider's life is performed by a series of actions in which intelligence takes no share. Such typically instinctive actions depend on the inherited structure of the nervous system and not on the inheritance of intelligently acquired habits.

A spider in the corner of its web is stimulated to rush out and attack an emmeshed insect by the vibrations of the silk threads. It will attack a tuning fork that is used to shake its web in the same way, for a certain time. On each occasion that it runs out in the fork it is performing an instinctive action, but when it refrains from running out it is exhibiting intelligence. In its capacity to learn it shows itself, to that extent, intelligent. In an hour or so, however, it will attack the fork again.

In the act of spinning a web a spider shows no sign of profiting by experience. It never spins more quickly or symmetrically, or in a series of better and better-chosen places. It never improves. Therefore, web-spinning may be an unconscious act, an act that makes no contribution to experience and thus affords no date by which the individual spider may profit.

In Paris,
Clerk—"How do you know he's a rich American?"
Proprietor—"Don't you see how willing he is to pay too much for a thing?"

For Every Ill—Minard's Liniment.

What She Wanted.
The old lady was timidly inspecting the stock of spectacles. "How much are these?" she asked, selecting a pair.
"A dollar and a half, madam."
"And how much without the case?"
"Well, the case makes little difference. Suppose we say \$1.45."
"What? Is the case only worth five cents?"
"Yes, madam," firmly.
"Well, I'm very glad to hear it; it's the case I want!"
And, placing a nickel on the counter, the dear old lady took up the case and walked timidly into the street, while the optician gasped for breath.

CANADA'S TRADE WITH CHILE

By Francisco J. de Lima, B.A., B.S.C., Consul of Chile, Montreal

Chile, situated on the west coast of South America, between the Andes mountains and the Pacific Ocean, on the boundary of Peru on the north to the southern extremity of the continent, is one of the most peaceful and progressive countries of the world. Its area is approximately 300,000 square miles, or something less than the Province of Ontario, and it has roughly four million inhabitants, or about one-half of Dominion population. Its coast line is over 2,600 miles long. The capital, Santiago, with a population of about 600,000 is a modern, well-planned city, universally recognized as a very attractive and salubrious place of residence. Valparaiso, the principal port, has a population of over 200,000.

Chile has a wide topographical and economic range. The southern sections, rainy, heavily forested, are extremely picturesque. The central zone features a very fertile soil and has developed a prosperous agricultural industry. In marked contrast is the desert region of the north, an elevated arid plateau, where the world-famous nitrate of soda deposits are located, and mined on a large scale.

Achieving a rapid progress in farming and other activities, Chile ranks third in volume of trade among the republics of South America. Its chief exports are nitrate of soda, iodine, copper, wool, dried sheep skins, cattle hides, lentils, barley, borax, sulphur, frozen meat, iron ore, etc. Chile is the second largest producer of copper in the world, and the only country of the world producing natural nitrate of soda, an invaluable fertilizer.

In American currency the imports of Chile are annually over \$150,000,000, in which Canada shares to the extent of less than one million dollars. In the fiscal year 1922, Canada purchased from Chile to the extent of \$20,478, while selling to Canada's purchases from Chile were \$230,066 and her sales to that country \$31,715. In the last fiscal year, Canada's imports dropped to \$97,959 whilst her exports rose to \$82,208.

There is a decided opportunity for the development of a greater reciprocal trade between the two countries. The fertile territory of Chile has been largely neglected in the past, and there is an assured opening in the republic for such Canadian exports as British Columbia fir, pine and other lumber, paper of all kinds and newsprint, wall paper, sheet and bar iron, railroad equipment, motor cars, rubber goods, hydraulic and other machinery, binder twine, cement, calcium carbide, agricultural machinery, road machinery, paints, white lead, varnishes, iron wire for farms, asbestos, canned salmon, cheese and other products. By making the necessary investigations from reliable sources, Canadian manufacturers and exporters could develop and maintain a sound and profitable trade of a much larger figure.

Flies Carry Disease.

Some of the essential facts in the disease carrying and transmitting capacities of flies are as follows:

1. Communicable diseases are caused by disease germs.
2. The germs of all intestinal diseases, at least, will be avoided in human or animal waste.
3. Human or animal or other waste is the breeding place of the majority of flies found about habitations.
4. Fly larvae breeding in waste take into their bodies whatever organisms are present and often harbor these organisms until they have become full-grown flies.
5. Adult flies alighting on waste take up on their feet and in their food disease organisms.
6. Disease organisms can live in flies for many days.
7. Flies deposit from the filth on their feet or in a speck of their excrement the disease organisms which they are constantly picking up.
8. Flies can fly for miles.
9. A single case of intestinal disease where open privies prevail may start an epidemic spread by flies.

Indignant.

"Now, my son," said the conscientious father, "tell me why I punished you."
"That's it," blubbered the boy indignantly. "First you pounded the life out of me and now you don't know why you did it!"

About half the total world production of tea is taken by the United Kingdom.

Keep Minard's Liniment in the House.

The Oldest Book.

Not seeking shall you find
The red-bound Book of Elvies;
It is not on dusty shelves,
Whose books are for the blind.
It is found, sweet friend,
At a journey's start, not end,
It is nowhere and everywhere—
East, West, North, South.
Its leaves stir in the air
From the loved one's mouth,
As breath moves loosened hair.
When our breaths blend
How shall we read, O friend?
In the heart's need.
How shall we fail to read?
—George Sterling.

Tenderfoot.

Young lady (on first visit to western ranch)—"For what purpose do you use that coil of rope on your saddle?"
Cowboy—"That rope, as you call it, lady, we use for catching cattle and horses."
"Oh, indeed! Now, may I ask what you use for bait?"

ABLE TO DO HOUSEWORK NOW

Sick a Year. Got Great Benefit from Lydia E. Pinkham's Vegetable Compound

Bloomington, N. S.—"I took Lydia E. Pinkham's Vegetable Compound for pains and backache, also for nervousness, sick headaches and sleeplessness. I was troubled in this way for over a year, and a friend told me about the Vegetable Compound and induced me to take it. I must say I have received great benefit from it and am able to do my housework now. I recommend the Vegetable Compound myself and am willing for you to use this letter as a testimonial."—Mrs. WILLIAM MORSE, Bloomington, Annapolis County, N. S.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes."

This means that 98 out of every 100 women are in better health because they have given this medicine a fair trial.

Mrs. Morse is simply another case of a woman receiving "great benefit." Women suffering from the troubles so common to their sex should listen to what other women say who have experienced the same sufferings and found relief. Give this dependable medicine a chance—and at once. It is sold at all drug stores.

Love causes young men to grow
moustaches and old men to shave
'em off.

As compared with last year the
wheat situation in the United States
is gloomy; the latest reports received
at Washington indicate a short-
age with no wheat for export. More
than half the winter acreage in the
States of Washington, Montana,
Oregon, New Mexico and Texas has
been abandoned and nearly a quar-
ter of the acreage in the whole coun-
try. This will mean an advanced
price for this chief of agricultural
products. Conditions in the Cana-
dian north west are said to present
a pleasing prospect and it is hoped
that Canada may be able to supply
the world's needs.

perfectly. He tells me everything
he knows, and I tell him everything
I know too."
"Really," exclaimed the friend.
"Don't you sometimes find the sil-
ence rather oppressive?"

DAME RUMOR BUSY

We had a little story told us this
week about three young girls. It
was said they spent part of a night
in the police station for being loud
with hoots. This is not the first
occasion we have heard such tales,
and on investigation of this one we
find no truth in it. The police cells
were not graced by the presence of
any females on this occasion, or
have they been so far. The reason
we mention this matter is that Dame
Rumor has a bad habit of using
names that should not be used. It
is easy to couple a name with a
yarn, but it is impossible to over-
take that yarn. It travels fast and
far, and many an honest reputation
has been injured. Don't start a
story unless you are positive you
are right. Better not tell it at all,
but if you have to unburden your-
self of the "news" be sure of your
ground. We have heard quite often
of girls being intoxicated, but in-
vestigation of the story has proved
it untrue. Our town is just like any
other town. Our girls are human
just like any other girls, but we
have none that belittle themselves
in the manner Dame Rumor says.
At least if we have we cannot verify
it.—Exchange.

A SPLENDID SPEAKER

The Walkerton Telescope, in re-
porting the recent progressive meet-
ing in the county town, has the
following to say concerning Mr. R. J.
Woods M. P., who formerly lived on
the 6th concession of Carrick:—
Mr. R. J. Woods M. P. who some
people had confused with Henry
Wise Wood, the Alberta U.F.A.
gentleman is a native of Bruce
County. He farmed for a number of
years in Carrick, and sat in the
Carrick Township council until he
left this district thirty years ago to
settle near Orangeville. Mr. Woods
who is a room-mate of South Bruce's
member at Ottawa commended Mr.
Findlay to his constituents as a man
true to principle, a man of good
judgment willing and anxious to do
anything he can for the best interest
of the people. The speaker pointed
out that up to a few years ago the
legislative halls were filled mostly
with professional men. It was the
farmer's own fault that he had dis-
credited himself. But now we find,
said the speaker, that no group can
acquit themselves better on the floor
of the House or in Committee than
the Progressive group. The political
parties knew no independent action.
There had been four weeks talking
on the Budget and no votes chang-
ed. They had been talking tariff for
fifty years and still rehashing the
same old stuff. If he had the same
doctor for fifty years and he hadn't
done him any good, he would try
something else. The same argument
applied to the tariff. The speaker as-
serted that the big interests control
this country at the present time.
During the past few months four
banks had merged into two. Four
men now control sixteen of our big
gest banks. It was time the manu-
facturers got off our backs and
walked.

Interesting Trip

A TRIP TO THE LAURENTIAN
REGION BY TWO OF OUR BOYS

(Written by Arthur Dahms and Cen-
sored by Herbert Sovereign)

Herbert Sovereign and Arthur
Dahms, who recently completed a
two weeks' tour through Grey and
Simcoe Counties and the Districts
of Muskoka and Parry Sound, have
supplied us with the following ac-
count of events.

"The trip northward was made in
a Ford touring car, owned by Rev.
N. E. Dahms, who, with his family
was returning to his appointment at
Arnsstein, in the northern part of
Parry Sound District. Leaving
Hanover at 5.30 a.m. on May 6th,
they travelled all the way to Trout
Creek, 28 miles south of North Bay,
by 7.30 p.m. of the same day.
The first fifty miles or so takes
you through farming land, the soil
varying in fertility as can be seen
also by the size of the barns. Then
you can notice yourself gradually
going upwards and you are in what
is called the Blue Mountains, or in
reality, a section of the Niagara Es-
carpment, which runs all the way
from the Niagara Peninsula to the
Bruce Peninsula. Such points as the
Niagara Falls, the Hamilton Moun-
tain and the Bruce Peninsula are
some of the more prominent evi-
dences of this natural formation.
Travelling along the top of this
ridge as you go around Dunroon
one can see the Georgian Bay to
the north. Another thing of inter-
est is the magnificent gorge which
the Nottawasaga River cuts through
this high section of land, and which
is between four and five hundred
feet in depth, with the sides steep
enough to make climbing rather
risky as we found out on going
down to the river's edge. As you
go to Stayner you can see the road
for a long distance behind you,
winding its way upward. It is
really surprising to think of the
wonderful scenery we have so near
our own home and of which Eugenia
Falls just gives you a little idea.
East of Stayner you find yourself
in an extremely sandy section which
at one time was a fine pine country.
The virgin forest is all gone and all
that remains is an occasional second
growth pine grove, and here and
there the semblance of a farm. In
this region, at Midhurst, is where
our government has a forest sta-
tion where pine trees are grown
from seeds and sent out for refor-
estation purposes. Nearing Barrie
and on to Orillia you again find
yourself in a good farming district.
North of Orillia the highway
takes you along the pretty Lake
Couchiching which you can see for
about 13 miles as you travel. This
is the tourists' "paradise," and the
resorters' buildings, at the time of
the trip still vacant, give you ample
proof that it is only people of
means that come there for the sum-
mer, and largely Americans at that.
Near Washago you see the first
outcrop of granite and you know
that this is the Laurentian Region
arrived at. Within a few miles one
leaves a comparatively good farm-
ing section and enters a land which
is practically all bare rocks and
patches with enough ground for
poplars and scrubby evergreens to
exist on.

From a description of our stop-
ping place for dinner you get an
idea of the kind of country southern
and central Muskoka is, as seen
from the North Bay Highway. To
build the road through this particu-
lar spot it was necessary to blast
the corner off a rock, leaving a
sheer wall at least fifty feet high.
On the other side of the road there
is a steep slope to a stream about
the same distance below the road
bed. Where there is no growth, the
rock at this time of the year is
completely bare with glacier scratch-
es showing very prominently. A
little ground may have lodged in
these grooves, in which later in the
season, will be found the most lux-
uriant growths of ferns, or blue-
berries, as the case may be. It
must also be said that practically
all running water in that part of the
Laurentian region is of a coffee
color, probably due to the mineral
elements existing in the rock.

From here northward the scenery
is largely a repetition, varied by
occasional lakes, high rocks and
ravines cut by rivers. It would
take a poet to express in words the
beauty of some of the scenery.
As for the road, it is excellent,
but by no means straight and trav-
elling by direction is impossible. It
tests a driver's nerves at first to see
a car pop up right in front of you
just coming around a hairpin curve,
or to see a sign ahead of you,
"Sleep grade ahead, Prepare to
Meet Thy God." But two hundred
miles of such driving is a good in-
titation.

Having previously heard of the
waterfalls at Bracebridge we de-
cided that a short stop must be
made there. Mother Nature was
very kind to man at that particular
spot. There was no necessity for
building a huge dam to divert the
water into a floom. The formation
of the rocks is such that they have

a natural dam, apron and floom and
all that was needed was a few hun-
dred cubic yards of concrete work
to direct the water into the tur-
bines. If the upkeep of this source
of power is as cheap as the initial
cost of construction, Bracebridge
must have an extremely low electric
bill.

Farther north in Muskoka, as you
get into Parry Sound District, more
soil is found on the rock. Surround-
ing a village or town there is usual-
ly a cultivated area of land, unless
the village is just a lumbering
centre—where the larger timber is
cleaned out, pulpwood and wood for
chemical plants is cut, as is the
case at Trout Creek.

As we spent the night at Trout
Creek with the manager of the
wood alcohol plant there, we had a
good opportunity to learn how wood
alcohol and acetate of lime are
made. Since it would take too much
space to give an account of the pro-
cess, all we will say is that they
have a furnace there, 58 feet in
length, and fired from two doors at
each end, for the purpose of driving
off the vapours in the wood, which
are then condensed and refined.
The roar of the fire when tar is in-
jected upon it is almost deafening.

The next morning we set out to
complete our journey, now taking
us westward into the heart of Parry
Sound District and directly away
from the railway. The new Trunk
Road which is being built there and
will be completed this year, makes
travelling much better. Owing to
an absence of gravel in that section
a very fine yellow sand is used to
build the road. A recent snowfall
had just helped to bring the frost
out of the ground, and naturally,
some spots were very soft, so much
so, that we had to get a team of
horses to pull us through one of
them. Needless to say, our dinner
was somewhat delayed by the ex-
periences we had making those last
35 miles of our trip.

As it rained and snowed alternat-
ely we did little else than rest up
and explore the lake shore just
back of the house that afternoon.
Arnsstein is a settlement of thirty-
five homes, two stores, a church and
school house. Many of the settlers
are Italian as the names Quillin
and Philippe will show. The people
as a rule are prosperous and of the
35 families, 24 own cars and scarcely
a Ford in the bunch. Yet, in spite
of this, we were told of young
people, fourteen years or so of age,
who had not yet seen a railway train.
Mail is taken in from Trout Creek
by the stage driver who makes the
round trip every two days.

Our plans were to motor to Rye,
28 miles south east of Arnsstein, on
Sunday, but on trying out the car
on Saturday, we found that the
crown gear of the differential had
stripped some cogs. We had been
lucky enough to just barely com-
plete a 300 mile trip without a
 mishap, whereas a few more rods of
going would have meant an involun-
tary stop. Anyway, all there was
to do was to send to Trout Creek
for a new part and postpone our
trip to Rye for a few days. In the
meantime we decided to take a day
off to visit the Schroeder mills at
Lost Channel. To get there it was
necessary to take a steambow plying
between Port Loring and Lost
Channel, a distance of twenty miles.
That is, indeed, a "land of many
waters" and affords us some of the
most beautiful inland navigation in
Ontario. The Schroeder mills at
Lost Channel have a cutting capacity
of 140 thousand feet of soft
wood daily, and this is one of the
largest mills of its kind in the world.
The large saw is a double cutting
band, and the setworks of the car-
riage are operated by electricity.
Logs ranging from 10" to 15" in
thickness are handled by gang saws,
which can cut ten boards at a single
operation. Our return was made on
the same steamer, the Kawigamog,
with whose owner we had an inter-
esting talk.

The following Wednesday we set
out for Rye, and we must give you
a little idea of what travelling on
unimproved roads in the north
country at this time or earlier in the
season means. It took us fully
three hours to cover six miles.
Talking of hills, mudholes and rough
roads, we have nothing to compare
with it here. At least eight-tenths
of that distance was made in low
gear. Where the road didn't jut
through, the road was a greasy
mess of wet clay and water holes.
When the wheels no longer gripped
we had to cut spruce boughs and
use muscular power in connection
with the mechanical, to get us thru.
When you were on solid rock again,
care had to be taken not to get the
rear axle housing caught on a rock.
We got to our destination though,
as a Ford will always take you
through.

Rye is merely a clearing in the
bush, with a post office, two used
residences and the sawmill owned
and operated by the Dahms Bros.
Here we spent a few days, helping
at the mill and getting acquainted
with some of the neighbors. We
were also lucky in getting some fine
specimens of natural mica as mined
in that district.

Ford motor truck, the two of us
taking turns at riding in the back,
which is really the best place to be
to see all there is to see. It was
somewhat tiring all the same and
we both had a nice sleep while
travelling.
At Bracebridge we detoured from
the main Highway to visit the Mus-
koka falls, the beauty of which is
even more wonderful than those at
Bracebridge.
The night was spent in an old
barn near Washago where we made
our beds. Luckily the mosquitoes
and black flies didn't find us there,
as they had at our stopping place
for supper where they came so
thickly that we had to set right in
the smoke of the fire to have com-
fort such as it was.
Another interesting phenomenon
of nature we would like to mention
is the colour of the water in the
Savern River. Even though the
water is only a few feet deep it is
of such a rich green color that
it is hard to see the bottom through
it. They told us of the spot where
it is joined by the Black River and
the effect obtained by the green
and black water mixing is peculiar
indeed.
Arriving at Hanover about four
o'clock the second day of travelling,
we proceeded from there to our dif-
ferent homes. Putting it shortly,
our conclusion on coming home was
that we'll repeat the trip again the
first opportunity afforded us.

CLIFFORD

Saturday night a Gray-Dort tour-
ing car and a motor cycle collided
at the Methodist Parsonage corner.
The cycle with basket and passen-
ger received the worst of the im-
pact. The driver of a cycle, for a
time was stunned, but after a short
rest was able to go home. The
touring car was slightly scratched
and otherwise damaged. The basket
on the cycle is a total wreck.
A number of fruit and maple trees
in town and vicinity fell prey to the
heavy wind storm on Tuesday. A
few report broken window panes in
homes and barns. As far as we can
learn, Mr. Philip Stroh of Carrick,
will be the heaviest loser in the vi-
cinity, he reporting 5 apple trees
uprooted, several bee hives rolled
and tossed around, windows broken
in the barn, the barn slightly dam-
aged, and about 150 rods of rail
fence blown down.
Last Wednesday afternoon, the
home of Mr. Ed. Horton, which he
recently purchased from the Or-
tman Estate, on the Howick townline,
had a narrow escape from being
destroyed by fire. Fire broke out
in an outside woodshed and was
gaining quite a headway when will-
ing helpers gathered and managed
to tear away the shed from the
main part of the house, and with
strenuous efforts saved the home

CARLSRUHE

(Too late for last week)
A quiet but pretty wedding took
place in the R. C. Church here this
morning when Miss Christina Wandt
became the bride of Mr. Alex.
Poechman, only son of Mr. and
Mrs. Benjamin Poechman. Miss E.
Wandt, sister of the bride, was the
bridesmaid, and Mr. Clarence Poech-
man supported the groom. After a
short honeymoon, the young couple
will reside on the groom's farm on
the South Line.
A number from here attended the
Liberal Convention in Walkerton
last Friday.

Mr. and Mrs. Lorenz Hesch of
Walkerton spent Sunday at the
home of Mr. and Mrs. Peter Greib.
Mr. and Mrs. J. Dentinger and Mr.
and Mrs. Alphonse Zettle and
daughter, Miss Henrietta, spent Sun-
day with friends here.

Mr. and Mrs. John Schmaltz of
Kitchener spent Sunday with Mr.
and Mrs. Joseph Hoffarth.
Mr. and Mrs. Jos. Schurr of
Walkerton called on relatives here
on Sunday.
Born on the 31st day of May, to
Mr. and Mrs. John Montag, a
daughter.

SAME HERE!

Times are changing and perhaps
one of the most noticeable of these
changes is the frequency of seeing
young girls idling about the streets
at late hours. Quite often they ac-
cept an invitation to jump into a
motor car with young men whom
they know little about and often
don't know at all. Some of these
motor rides lead to disastrous re-
sults. This kind of thing is quite
prevalent in Southampton and par-
ticularly in the summer season
when so many strange cars visit our
town. We know that most parents
are very much opposed to this kind
of conduct by their daughters but
find it hard to stop it. Our chief
of police is around our streets during
the night hours and sees a lot of
these things, and a word to him
from the parents might lead to good
results.—Beacon.

Probably it's the heat that causes
so many to get married in June.

The Monthly Cheque — That Never Fails

How the Money was Lost

"You see I had only a few thousand dollars left after the estate was settled—"

and my brother borrowed some to help him along; of course that went and then—"

I simply had to help father with his business, he was so worried—"

and I thought it best to make an investment at once. Well that failed—"

and, really, if it were not for the monthly income cheque from the Canada Life I don't know how I should be getting along now."

It is all so simple and effective!
Just a few dollars set aside regularly, and the Canada Life will guarantee to your home a continuous monthly income.

What a relief to know that no matter what may happen, the monthly cheque that never fails, issued regularly by the Canada Life, will come to your home!

Your present Life Insurance will perhaps "clear the mortgage," pay off the obligations of your estate, and leave something for your family, but

Consider This :

Financial problems should not be thrust upon a woman who is not used to business deals.

Therefore in addition to a "lump sum" of money, you should provide a definite income that cannot fail—

Because a weekly or monthly income is the natural thing for most people—

And a woman can keep a family together on even a small income, provided it is regular.

Moreover, the hands of unscrupulous men are always outstretched for money held by the unwary.

The Monthly Income Plan

Will solve the problem.

Only a few dollars saved and set aside from your regular earnings can be multiplied into a substantial income for your Beneficiary. You will be surprised to learn what a reasonable proposition can be made to you.

Ask for Particulars.

A SUDDEN CALL

Citizens were greatly shocked on Tuesday by the sudden death of an active and highly esteemed business man, Mr. Fred McCrum. Mr. McCrum came down to the store in good health and spirits about eight o'clock. Owing to his brother, Richard, being ill at home, he was alone in the shop. About nine o'clock a young chap came in and found him in a faint, sick at the stomach, and asking that assistance be called. He was rushed to the Hospital in Dr. Sinclair's car. His condition became worse and at about 12.45 o'clock noon, he passed away.

The late Mr. McCrum was the youngest of the three brothers. He was born in the town of Galt and spent most of his life there, being for some years in business in that town. He frequently visited his brothers Harry and Richard here and since the death of the former three years ago, he has taken his place in the business. Of a genial cheerful and kind disposition, Mr. McCrum was a general favorite in the town and expressions of keen regret and sympathy for the bereaved family heard on all sides when the news was received of his sudden demise. Even yet, our townspeople can scarcely realize that the active figure of Fred McCrum who was on the street as usual two days ago, has passed on. The memory of his kindly personality will not soon be forgotten.—Telescope.

MEYER—KUNEMAN

The marriage of Mae, daughter of Mr. and Mrs. Jos. Kuneman, to Mr. Bernard Meyer, was solemnized at the Church of Holy Family here on Tuesday last at 9.30 a.m. by the Rev. Father Haller. The bride wore a white georgette gown, beaded in crystal. Her veil of tulle had a coronet of Honiton lace and orange blossoms and she carried a shower of Columbia Roses and lily-of-the-valley. The bridesmaid, Miss Catherine Jagelewski, of Kitchener, was gowned in peach crepe de chene trimmed with black, with hat to match, and her bouquet was of butterfly roses. Mr. Ed. Kuneman, the bride's brother, supported the groom. After the ceremony, the bridal party repaired to the bride's home, where a sumptuous dinner was served. In the evening, a large number of guests assembled to greet the happy pair. Mr. and Mrs. Meyer left yesterday for Hamilton, Niagara Falls and other points, the bride travelling in an ensemble of blue with beige trimming and hat to match. On their return they will take up residence in Hanover.—Hanover Post.

BREEDERS' CLUB FIELD DAY AT PAISLEY

The North and South Bruce Breeders' Club have arranged for a field day which will be of interest to all breeders of live stock in this county. They have enlisted the co-operation of the Live Stock Branch of the Dominion Dept. of Agriculture, as well as that of the Ontario Dept. of Agriculture. It was decided to hold this educational feature on the agricultural fair grounds at Paisley on Tuesday, June 15th.

J. M. MacCallum of Ottawa, chief of the stock yard service of Canada, will be present and demonstrate as well as deliver an address on "Market Requirements in Beef Cattle." Dr. Sinclair, of Cannington, will

deliver an address on the Draft Horse.

L. W. Pearsall, of Toronto, Director of Ontario Hog Graders, will put on a grading demonstration and officially grade all hogs brought in that morning. He was also demonstrate on typical market grades as well as cured Wiltshire sides.

Jas. A. Telfer and W. J. Howard of Paris, will demonstrate on the various grades of wool as well as the marketing of sheep and lambs, showing values. They will also give a sheep shearing demonstration, as well as the slaughtering of a lamb. The Paisley Women's Institute are preparing to serve lunch on the grounds.

All live stock breeders will do well to take advantage of this edu-

cational feature in live stock breeding, feeding and marketing. A field day of this scope has never before been attempted in this county, so let us show our appreciation by attending these lectures and demonstrations, which will be given at Paisley on Tuesday, June 16th.

PICKING UP STRANGERS

(Mt. Forest Confederate)

"We used to think that a man was selfish that would pass a fellow on the road with an empty car and let him keep on walking, but have decided of late that he is a wise man rather than a selfish one. When the crooks have all the guns and the honest folks have none, then he will be still wiser. It seems that our folks want to make the highway safe for the bandit and extremely dangerous for the citizen. Any crook can stop you on the pretense of being a prohibition officer and you can't have a gun and the danger is great. It is time to put a muzzle on the heaviest kind of fanatic, says an exchange. We would say also that those are wise pedestrians who decline to be picked up by unknown autoists. Cases of abduction of children and women are not unknown in this connection."

In Muncie, Ind., they give cook books free with every marriage license.

Two thousand Jews per month are migrating to Palestine, according to Jacob de Haas, Secretary of the Palestine Development League, who recently returned to this country from a tour of the Near East. He reports that these emigrants are principally from Eastern Europe, but he says there are 240 "American" Jewish families in Palestine, and 40 "American Jewish families in Galilee.

ROMANCE OF DEAD CITIES

There is always fascination attached to stories of lost and abandoned cities. The east has many such places, once teeming with life—now the abiding place of lions, monkeys, snakes and jackals. For instance, the holy city of the Buddhists, Barabodoor, in Java, had been forgotten for 600 years when Sir Stamford Raffles rediscovered it and its wonderful temple, the eighth wonder of the world. The jungle of Siam has hidden its ancient capital, Ayuthia, for four centuries. Its inhabitants fled before the conquering Burmese and never returned. It is now said to be the lurking place of thousands of enormous snakes. Mystery surrounds the dead city of Thibet, which Captain Rawling discovered. It is a vast collection of palaces, monasteries and dwelling houses, but the Thibetans professed ignorance of its existence, and also of the reason for its abandonment. Five centuries ago Angkor had a population of three-quarters of a million. To-day it is the Dead City of Cambodia. The carved stone elephants, the immense causeways, the majestic temples still remain, but the jungle has invaded the streets and squares.

EGG PRESERVATIVES

Cheap Eggs In Winter

Many families, even of farmers and other poultry keepers, have very few eggs to use from October to February when prices are high. It would be easy for them to preserve and store as many as are required, if they would but take the trouble to do so, says Gus. Langelier, Superintendent, Experimental Station, Cap Rouge, Que.

Experiment at Cap Rouge

In order to secure information regarding the best methods of preserving eggs, an experiment was started in 1916 at Cap Rouge Experimental Station. Eight methods were tested:—1. Wrapping in paper and leaving undisturbed; 2. Wrapping in paper and turning daily; 3. Packing in oats; 4. Packing in sawdust; 5. Compose Gaulin; 6. Armstrong paste; 7. Lime water; 8. Waterglass.

Results

It was found that the two best methods, by far, were the lime water and the waterglass. These have been continued to date, and very little has been found, though different lots of eggs are tested each year by the Dominion Chemist and the Dominion Poultry Husbandman at Ottawa and by the Superintendent of the Cap Rouge Experimental Station.

Best Methods

Use one pound of good, freshly burnt quicklime to five gallons of water. Slake the lime with a small quantity of water, just about enough to cover it, and then stir the milk thus formed in the water. Keep well stirred for a few hours, allow to settle, and pour saturated water over the eggs. With waterglass, use about four pounds in ten gallons of water.

General Advice

All eggs used should be perfectly

fresh and, if possible, from flocks having no male birds. The eggs should be completely immersed during the whole period of preservation and the vessel should be kept covered. The best temperature, though not absolutely necessary, is from 40 to 45 degrees F.

It used to be that a girl's face was her fortune, now it takes a fortune for upkeep.

Isn't it about time to announce that the annual fruit crop has been ruined by frost?

In several schools in Bruce county it has been found that a number of pupils are suffering from "pink-eyes," an affection which, though extremely contagious yet with care leaves no bad results. The disease is apparently becoming epidemic.

For the past two years labor in the United States was plentiful as manufacturing establishments of every kind were busy turning out goods for the markets of the world which it was anticipated would make large demands. The demand did not come and as a consequence innumerable industrial concerns have shut down with warehouses crammed to the roof with goods, hundreds of thousands of men have been thrown out of employment and our neighbors are now suffering from an industrial depression much more acute than the people of this country ever experienced.

PLANNING THIS SUMMER'S CANNING

BY MARGARET E. LEE.

Sometimes I have looked into the tired faces of farm women gathered for a canning demonstration and wondered if it would not be better to urge them to can less and rest more.

When I knew that many a cellar held a surplus of canned fruit and when I realized that improved methods of storage and shipping are daily bringing fresh fruit and vegetables nearer our market and purse, I felt that wise planning should be used by all of us in the quantity and kinds of fruit, vegetables and meat canned.

So last year I read very carefully the bulletin sent out by our extension service. It told the quantity of fruit and vegetables necessary to feed a family of given size throughout the winter months.

I surely wanted to feed my family to keep them in the best possible health. And with three small boys and a baby girl the time I had to pickle and can would have to be used very carefully.

First, I considered the location of our farm. We are near two large markets, although it is not always profitable to run to town with one surplus crate of cherries or tomatoes. However, I decided to can only a reasonable quantity of each fruit or vegetable and try to market fresh all the surplus. The money obtained from selling these fresh products should be used to buy oranges, grapefruit, grapes, lemons and bananas to supplement my canned fruit and my lettuce, early radishes, sweet potatoes, early tomatoes and cucumbers.

Secondly, I thought of the vegetables and fruit that will keep without the extra labor of drying or canning. We have apples. These I would keep upstairs. Pears we had until Christmas and grapes picked and kept cold lasted long after the vines were frosted. Tomatoes ripened in the south windows when the air was full of frost. Onions, cabbage, turnips, beets, carrots and squash we had to store.

DOESN'T PAY TO CAN MEAT.

Lastly, I slipped paper and pencil

just inside my cupboard door. Every time I made some jelly or canned or pickled something I set down. Now, I thought, I shall use my canned goods freely this winter and supplement with fresh. Then next year I will know better how much of each variety we can be expected to use. The extension service can help by telling me how much of each is required by the average individual.

Much has been said of canned meat for the farm women. No doubt in some cases it may be desirable and economical. Personally I prefer to have a fresh killed chicken than to can them with the extra labor and chance of loss. Beef I have seen purchased by the quarter and canned at one of my neighbors. When the cost of canning was figured carefully the few cents saved would hardly pay.

And nothing was allowed for labor involved.

We brine and smoke pork in the old-fashioned way to help out our fresh-meat supply. Eggs we use freely. We hope to have a small hotbed that will extend our season of fresh vegetables. I believe labor can be used in growing earlier and later vegetables rather than canning a heavy midseason supply.

This year, when I begin to can, I shall inventory my supply. All last year's surplus will be used first. I shall try to can more of some things next year and fewer of others.

There are, no doubt, localities where families are poorly fed in winter because of neglect in canning the summer surplus. But there are many farm women with an already overfull day. I shall can both to save our pocketbook and our health, but I shall try to plan my canning carefully.

And I think that my family will be better fed by using more fresh fruit and vegetables.

I shall feel free to use all I want of my stored supplies, secure in the knowledge that what was used freely last year cannot fail me badly this year.

Joint Ill Will Take its Toll

Try and stop the losses. Colitis is valuable. Joint ill is a robber that can be frustrated by careful methods. Pyogenic streptococci are believed to be responsible for 50 per cent. of all joint ill cases.

Bacillus nephritidis equi are responsible for 20 per cent. of all joint ill cases.

These two types of bacteria gain entrance to the animal body soon after birth by way of the recently ruptured navel cord.

Bacillus coli communis is also responsible for 20 per cent. of all joint ill cases. This one gains entrance to the animal's body either through injection at the time of nursing or by way of the navel cord.

Bacillus abortus equi is responsible for about 10 per cent. of all cases. It gains entrance to the foal's body before birth.

Treatment—Hygienic surroundings for the prospective mother. Have administered the anti-joint-ill serum as soon as the foal is born. Have the navel attended to by applications of astringent dressing powder or tincture of iodine until it is completely dry. Dirty hands usually carry millions of the above named bacteria. Don't touch the raw navel cord with hands. The navel cord should not be ligated unless there is serious hemorrhage or previous urachus. Some forms are heavily infested with the bacteria causing the trouble and the greatest care is required to prevent infection. Extensive use is being made of Polyvalent vaccines and bacterins to prevent the trouble in Great Britain. Pregnant mares are injected for three or four months before the foal is born and the foal treated with polyvalent serum at birth.

Preventative treatment is surely worth while, when it will save a colt that has normally cost you \$50 to produce.

Sweet Clover Meal and Alfalfa Meal for Hogs

To determine the value of alfalfa and sweet clover meal in the meal ration of growing hogs during the finishing period and to compare sweet clover meal, alfalfa meal and a standard meal ration as to economy of gains, a test was made at the Central Experimental Farm in the winter of 1924. According to the report of the Dominion Animal Husbandman, the supplementing of a well-balanced meal ration with alfalfa meal or sweet clover meal in this test gave greater gains at an increased cost. Sweet clover meal was slightly superior to alfalfa meal, and both improved the health, thrift, and general appearance of the hogs. Fed at the rate of one pound to 8.8 pounds of the standard meal ration, neither proved economical for the feeding of hogs finished at 170 to 200 pounds.

Oats, Peas and Vetch Silage Compared With Corn Silage

Experiments to find the comparative value of corn silage, and a silage composed of oats, peas and vetch were continued at the Central Experimental Farm in the winter of 1924. From these experiments it may be concluded that oats, peas and vetch silage is almost the equal of corn silage as a feed. On account of its comparatively low tonnage per acre, however, it is not so economical a crop to grow. The details of the experiments are given in the report of the Dominion Animal Husbandman, distributed by the Publications Branch of the Dominion Department of Agriculture.

A Hard Job.

The Skipper—"This boat makes fifteen knots an hour."
The Girl—"Who unties them?"

A DOMINION DAY JAMBOREE

BY BEATRICE PLUMB.

Why not celebrate the First of July with a neighborhood jamboree? It's a lot of fun if all the families in your community pack a picnic supper and eat together under the trees while you rest up between an afternoon of games and an evening of dancing. The young folks will be sure to want to dance, and Dad and Mother will enjoy it if there are plenty of old-time square dances mixed in.

Your invitations may be written on white note paper with a small Union Jack or picture of Jack Canuck stuck to the outside page. On the left-hand inside page of your invitation write a patriotic verse. On the opposite page write the necessary directions, such as place, time and special events of picnic.

Select some shady spot for your picnic, with a level stretch of grass for races and dancing and a spring or a well not too far away. Coax some dependable man to dress up like Jack Canuck and be master of ceremonies. Now you are ready to plan the program. Let the men help you plan. Some real athletic contests are always fun—a three-legged race, egg-and-spoon race, or a sack race, but sprinkle in enough fakes to make it interesting for the entire party.

The big feature of the afternoon will be an informal ball game, men against women, the men to bat left-handed.

Guessing contests keep things lively. Here is one to try: Line up ten women of various heights and sizes and let the men guess what size shoes each woman takes. Then line up the men and have the women guess what size hat and collar each wears. Hang around the neck of each exhibit a different number instead of name. For some inexplicable reason this "fussiness" them. Give each guesser a slip of paper and a pencil decorated with

red, white and blue ribbon. After they have written against each number the sizes guessed, ask them to sign their name and turn the paper in for judging.

Let the boys have a "bawl" game of their own. The prize—a baby pacifier or an all-day sucker—goes to the boy who can bawl in the most realistic fashion and for the longest time.

The girls can compete in the "running high squeal." They toe the line and run to the tape as in regular races. But here they all stop and squeal. The girl who can squeal highest wins a prize.

"Standing high jump" is for the youngsters. Prepare plenty of doughnuts and tie to each a long length of string. The doughnuts are then tied to the low branches of a tree or tightly stretched wire. Each child chooses a doughnut and the umpire strings it up just out of its owner's reach, so he must jump to take a bite. A picnic plate is given to each child in which to catch not only the crumbs but usually the falling doughnut as well. The prize goes to the one who eats his doughnut first. Every crumb must be licked off the plate and not one must the doughnut be touched with the hands. A skipping rope makes an excellent prize for a girl, a bouncing ball for a boy.

While this is going on, line up the men for the "standing broad grin." On the word "grin" every man does his best while the women judges go around measuring the different widths with tape measures. Present the winner with a flag-decorated little card on which you have pasted the chorus of "There are smiles that make you happy."

To provide music for dancing, there is always the phonograph which can be carried in the car to your open-air dance floor.

CLIPSE FASHIONS

OUR LITTLE TOT'S ENSEMBLE.

While mother and big sister are enjoying their ensembles the little girl will be happy to have this clever ensemble just to her liking. The bloomer dress is developed in washable crepe which also lines the coat. The little frock, No. 1005, is of simple kimono style with tucks on the shoulders. The round collar and bateau neck themselves to the present vogue, but daughter's dress must in some measure resemble mother's. The raglan sleeve in No. 1007 makes the construction of the coat very easy and the fitting assured. The notched collar and turned-back cuffs give our little miss a tailored finish that pleases the mother in these days of "Prince of Wales" marks. Cut in sizes 1, 2, 4 and 6 years. Size 2 years requires 2 1/2 yards of 36-inch material for the bloomer dress and 2 yards for the coat. Price 20c each.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Competition.

"And didn't you even look through the keyhole?" said Teddy's big sister, who had offered him a dime if he would stay away from the parlor while her beau was there.

"Now," replied Teddy. "I didn't have a chance. Man an' pa was in the way."

Easy Beadwork.

Stringing beads for the popular crocheted bead necklaces and purses is a tedious task on account of the many beads with centres too small to go over a needle or knot.

I have seen various ways suggested for doing this part of the task, but here is a method that is easier and quicker than any way I have yet noticed, and I will pass it on for the benefit of those who are interested in such work.

Frays the end of the thread you wish to transfer the beads to so as to make it tapering, then pull one of the short strings of beads out of the bunch in which they came and lap one end of this string about an inch over on the tapering end of the other thread.

Now roll these lapped threads together over a little piece of beeswax until they are united and smooth.

The beads may be easily slipped over this joining—even the small ones. When they are all off the short thread it can be quickly twitched off the other thread and another little string of beads waxed on.

By following this simple method I have found that two or three thousand beads can be strung in a short time.—A. V. B.

Old Order is Upset by New Picnic Plan.

Did you ever go to a picnic where everybody brought hard-boiled eggs, and some vitamin fiend in the crowd was so disturbed that someone had to drive to town to get food to balance the ration?

If picnickers this summer will follow this plan they will find it suited to picnics and meetings of all sizes, whether in or out of doors.

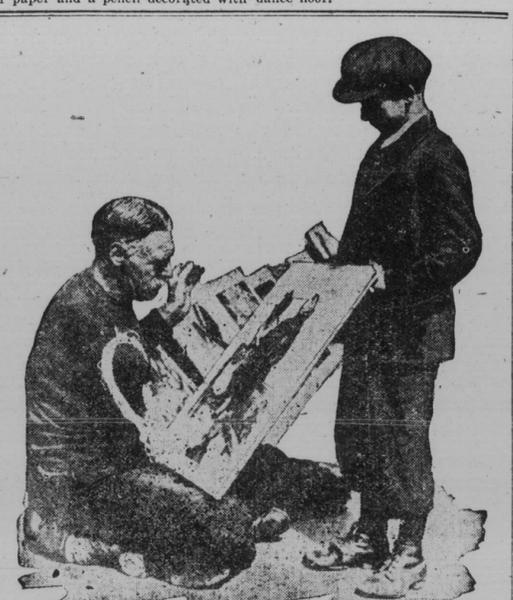

The main idea of this plan is to supply each family with a simple menu or list of food to be taken to the gathering. Each menu is the same and can be sent with the invitation or announcement of the affair. Each family brings its own silverware and at lunch time the food is assembled and each person helps himself in cafeteria style.

This method will eliminate several evils of the old system. For instance, under the old system if Mrs. James, who was to bring all the potato salad, and Mrs. Hodge, who was to furnish the cold tongue, fail to come at the last moment, the party has to get along as best it can with Mrs. Dean's hard-boiled eggs and Miss Sweet's lemonade. Under the new system each family brings enough of all four dishes for its own members, and it doesn't matter if everyone don't come.

Preserving Eggs.

Poultry specialists tell us that the spring and summer eggs are the best for packing. They will keep better than eggs produced later in the year.

To preserve them in water glass, mix thoroughly one and a half quarts of commercial water glass solution, which may be obtained at any drug store, with eighteen quarts of boiled water. Pack clean eggs in an earthenware jar. Two six-gallon, or three four-gallon jars are sufficient to preserve thirty dozen eggs. Cover the eggs with the water glass solution until the solution is at least two inches above the tops of the eggs. Cover the jars to prevent evaporation, and keep in a cool place.

Striking illustration of the triumph of will over physical handicap is this street worker in London. With one hand he weaves designs which have won universal acclaim from critics.

THE LESSON OF THE FLOWERS

BY JENNY WREN.

"What a pretty little girl!"

This remark had so often reached little Nettie Guard's ears that she began to realize that it must be a truth, and to feel rather disappointed when she failed with other children, instead of playing with other children, she would strut up and down before them like a little peacock, as though expecting them to admire her.

She never passed a looking glass without taking a sly peep, and often, when alone, would stand a long time before her mirror, admiring her own reflection. Nettie forgot that it is the expression which gives to a face its greatest beauty, and at last grew more proud and disdainful.

One day, in the middle of summer, she wandered off alone into the woods, and throwing herself down by the side of a clear, running brook, on the cool, green grass, she leaned over to find her own face reflected in the water. Then she took off her hat, and the long, golden curls fell about it.

Her head felt very hot to-day, and her cheeks burned. She would have liked to bathe them both, but she was fearful of disarranging her hair, so she lay still, looking in the brook and idly dreaming. Presently she saw tripping up beside her the tiniest little creature her eyes had ever beheld.

She was dressed all in green, and was scarcely taller than one of the blades of grass.

Nettie opened her eyes very wide. All her life-long she had had the greatest desire to see a fairy. This tiny creature could be nothing less.

"Good morning, Nettie!" she said, in clear, distinct tones, though very low and musical.

"Good afternoon!" answered Nettie, not the least frightened, only very much amazed.

"True, it is afternoon!" replied the fairy, laughing—"but with us it is always morning. Will you not come and take a little walk with me?"

Nettie sprang to her feet, delighted. How much taller she was than the fairy! She tossed her head, too, that she might see the golden gleam on her long, floating curls, but the tossing hurt her, for her head ached sadly, and the fairy took no notice.

Soon Nettie, for the moment, forgot herself, as she found herself in a most beautiful garden, filled with exquisite flowers.

Over one large, superb blossom Nettie bent, delightedly, but raised her head in disappointment. The odor it gave forth was positively disagreeable.

"Oh! Why do you have this in your garden?" she cried.

"Is it not handsome?" questioned the fairy, in answer.

"Yes; but that is all!" said Nettie.

This time the fairy only smiled. Next time the little girl stopped before a cluster of roses. How very beautiful they were, and full of fragrance, too! No wonder that they reared up their heads so proudly, as though asserting themselves queens of the garden. Their petals were wet with dew, which shone like diamonds on their soft, velvety surface of crimson and gold.

"May I pluck one?" asked Nettie, and, on receiving permission, eagerly extended her little hand, but as quickly drew it back, torn and bleeding.

The thorns had hurt it cruelly—so cruelly that tears sprang to her blue eyes, and she turned away with quivering lip.

Next, she saw a lovely mass of blis-

som. Delighted, she ran toward it, but the tiny figure at her side drew her back.

"Do not go near it," she said; "it is poison."

Nettie shuddered.

"Why do you let it grow?" she asked again.

"It is beautiful to the eye, is it not?" the fairy said. "Its deadly qualities are hidden."

Nettie walked on in silence. Suddenly the whole air became laden with sweetest fragrance. Where could it come from. She looked about her, but the beauty of the garden lay behind her. She could find no majestic plant, no queen-rose with its thorn-armor. When had she smelt anything so delicious? The atmosphere was almost intoxicating in its sweetness.

She looked at the fairy entreatingly, and in answer she pointed to the ground.

Nettie stopped, and there, under her very feet, with their sweetness crushed out by her tread, all hidden under their green leaves, were myriads of violets.

Overjoyed by her discovery, the little girl filled her hands, but no thorns pricked her, and all the delicate, exquisite fragrance remained.

"They are the loveliest things in all the garden!" she exclaimed. "And you keep them hidden here?"

"Nay! nay!" replied the fairy. "They hide themselves. The rarest thing in flowers, as in humanity, does not find it necessary to grow on tall stems, or flourish their virtues, but to remember that they are but parts of a great creation, and, abashed by their own insignificance, leave it for others to discover their charm."

"The violet, in its nest of green, should be the type of childhood in its modest purity. It needs no thorn to protect it, no poisonous exhalation to make it shunned, no disagreeable odor to teach us that its beauty goes no further than the face. From the moment that it springs into birth, until its little life is ended, it lives a lesson. Keep these you have gathered, my child, and remember that if God has given you beauty, the beauty of the face is like the poison plant, to be shunned and avoided, without there is added the beauty of the soul."

With these words the fairy vanished, and Nettie found herself again on the banks of the stream and rubbing her eyes as though she had been asleep.

Where were her violets? Her fingers were empty, but the subtle fragrance still lingered. Her head was hot and burning, too, and it was with effort that she rose and walked home.

When she reached there, her mother looked very anxiously at her burning cheeks, and Nettie was glad to get into the cool little bed prepared for her.

Poor little girl! It was the beginning of a long illness, and when she recovered, all her beautiful hair had been shaved close to her head; but Nettie did not regret it as she would once have done, and when she grew strong and well again, every one noticed the great change in her. Every one loved her, and soon her little playmates began to think how pretty Nettie had grown; but it was her unselfishness and thoughtfulness for others which lent to her beauty its chiefest charm.

She knew now that she had been only dreaming that day by the brook, but she never forgot the lesson of the flowers.

War on House Flies Urged.

"Now or never" should be the motto of every housewife in these balmy days in regard to killing house flies, one of the most annoying, disagreeable, and unsanitary household insects, and a carrier of typhoid fever and other diseases.

On the farm, most of the flies breed around the barns. This fact can be capitalized in poisoning them. An effective poison can be made and painted or swabbed on the side of the barn. Flies will then be killed in enormous quantities. A good poison can be made for this purpose by mixing one tablespoonful of lead arsenate, white arsenic, or Paris green with one pint of syrup.

Fly traps are also effective if the proper bait is used. The most attractive bait for a fly trap is bread and milk slightly sweetened with sugar.

Of all the poisons for killing flies, formaldehyde is probably the best of all. By diluting a cup of milk with a cup of water, sweetening with a little brown sugar, and adding two table-spoons of ordinary commercial formaldehyde, a very attractive and highly poisonous dope is made for flies, but it should be kept away from children.

An effective self-feeding poisoner can be made by filling a glass tumbler full of this same poison, then placing a piece of blotting paper on a saucer and inverting the saucer over the tumbler, and finally, holding the saucer down tightly, quickly turning the tumbler over. The solution will gradually feed out into the saucer.

To remove paint from plows, cultivator shovels, and all new implements before using, nothing is better than scrubbing with strong hot lye water. An old broom can be used. Don't get the lye water on the hands, or on the paint of the implement—just on the shovels.

Patchwork Designs.

The patchwork designs that are just now so much used for decorating cushions, curtains and table runners, as well as aprons and tub dresses, offer wonderful opportunities for the developing of ingenuity and skill in the children.

Pieces from the scrap bag furnish material. At first it is best to use a paper pattern and carefully follow directions, using a very plain and simple design such as a cat, goose or large flower.

When the child has learned to cut out the design, baste back the edges neatly and sew it smoothly to the garment, it is good practice to begin making designs of her own. These should first be drawn on paper. Then patterns must be cut. Older persons than children find this interesting.

Green and White Salad.

This toothsome salad is available to nearly every family that lives on the farm and will prove to be an appetite coaxer.

Two cups cottage cheese, 2 tsp. minced sweet onions, 1/2 cup minced watercress.

The young onions of the garden may also be used. Blend these ingredients well and form patties and serve on a lettuce leaf. A dash of paprika improves it.

The element of feed that you pay for in buying dairy feeds is protein—used for building muscle and for making the curd of milk. Protein is the most expensive part of the dairy cow's ration. Alfalfa hay contains lots of protein, and if you feed alfalfa, you can cut down your feed dealer's bills.

He who relies upon "luck" in the care of hens has missed his calling. Success does not depend upon luck.

The foundation of success lies in the breeding stock.

THE KODAK WAY

Whether you're dishing the south lot, taking a Sunday trip or stealing time to fish, today's Kodak snapshot is tomorrow's picture-record.

For in addition to the print that keeps the story there's the date and title you wrote on the film at the time—information you want for reference. All the Kodaks have this exclusively Eastman, autographic feature.

Herbalist Here

Are you suffering from any Disease?

Mr. Murfin, the proprietor of the Canadian Herb Gardens, and expert in Herbs, will be at the

Queens Hotel, Walkerton
ONE DAY ONLY

TUESDAY, JUNE 16th

CONSULTATION FREE

Nervousness, Rheumatism, Bladder Troubles, Diabetes, Bright's Disease, Stomach, Liver, Kidney, Neuritis, Blood Pressure, Heart Troubles, Constipation and all Diseases.

THERE IS AN HERB FOR EVERY DISEASE

REMEMBER THE DATE

That Canada since the war has been going through a trying period is demonstrated by the fact that during the period of the last twelve months the fourth bank merger has taken place, the Union Bank having been swallowed up by the Royal last week. While the Canadian public will regret so many bank mergers, knowing that they will finally spell out "financial monopoly," it is undoubtedly better to have them than the distress caused by wrecks

like the Farmers' and Home Banks. Times are beginning to improve, but economy in public and private affairs is essential to stability.

On Saturday evening last William Adams of Palmerston, met with an accident which necessitated his having eleven stitches in his scalp, when he struck the top of the car, when the machine went over an embankment near Kincardine.

Those Pictures in Your Store-room

Would look much better on your walls—and it's an easy matter to have them framed.

Wrap them up now—before it slips your memory—and bring them in to us.

You'll be surprised how much frames will add to their beauty—and you'll never miss the little that they cost.

May we expect you soon?

G. H. RICKMEIER

HERB EXPERT HERE

Why use Poisonous drugs when nature in her wisdom and beneficence has provided, in her great vegetable laboratories—the fields and forests—a cure for the ills of man? Mr. Murfin, the famous English herbalist, will be at the Queen's hotel, Walkerton, for one day only, Tuesday, June 16th, and will give free consultation to all who are suffering from any disease. There is over 10,000 different herbs which are used for the different diseases of the human body. It makes no difference what your trouble is or how long standing, there is a herb for your complaint. Mr. Murfin is an expert in herbs with long experience, and will give you free advice as to what herbs you need for your trouble. Don't forget the date, but call and see him. It will be worth your while. There is a herb for every disease.

MOLTKE.

What a change in temperature we have had! Everyone in the burg is puffing with the heat. Several horses and some cattle have succumbed to the heat in this community. The breezes from the creek don't seem to affect the climate much these days.

Mr. and Mrs. Henry Ortman are now residing in their new home in Kitchener. It feels more sociable to see some one moving around down there. I'm sure all their friends and neighbors wish them every success. By the looks of the apple trees Henry may get prepared for a good run.

Mrs. Jno. Goessel is visiting in Kitchener for a fortnight.

St. Paul's Lutheran Church, Normanby, intend giving a garden party on June 25th. Preparations are being made for a good program, fish pond, etc. The Moltke Band will be in attendance. Everybody is cordially invited.

Mr. Harry Baetz has returned from Waterloo College of Arts for the holidays and is enjoying them on the farm at Wm. Baetz's.

Mr. and Mrs. Chas. Peter and Mrs. Ed. Peter spent the week-end in Kitchener.

Mr. and Mrs. Chas. Holm and Mr. and Mrs. Ed. Holm all Sunday at A. Seigmiller's, Otter Creek.

Mr. Chas. Weber is at present at his son Philip's, suffering with a sore foot.

CARLSRUHE

On Thursday of this week Corpus Christi will be observed in the usual manner, providing the weather is favorable. On Sunday, June 14th, service will be at 9 o'clock instead of 10 as usual.

Mr. and Mrs. Ph. Montag and daughter, Miss Elvira, of Formosa, spent Sunday with relatives here.

Mr. and Mrs. John Oehring and Mr. and Mrs. Albin Kroepelin and Mrs. Ambrose Dentinger, of Hanover, called on friends here on Sunday.

Mr. and Mrs. Ignatz Hinsperger and Mr. Andrew Schneider of Deemerton spent Sunday with Mr. and Mrs. Paul Hinsperger.

Mr. John G. Weber, Mr. and Mrs. A. F. Scheffter and Miss Jennie Schofer of Mildmay spent Sunday at the home of Mr. George Zettler.

Messrs. Chas. Schwan and Clarence Pochman spent Sunday in Kitchener and Waterloo.

Mr. Herb Helwig of Wingham and Mr. Carl Gebhardt of Neustadt made a short call on friends in Karlsruhe on Sunday.

Mr. and Mrs. I. Druar of Rostock visited relatives here on Sunday.

Carlsruhe Beef Ring will start on Saturday, June 13th. All members will kindly call for their meat Saturday morning at Mr. Herb Metzger's, the beef ring butcher.

FORMOSA.

Misses Mary Zettel and Hedwig Beninger left for Detroit on Monday after spending their vacation at their homes here.

Mrs. Alvin Schmeltz and children of Kitchener are visiting the former's parents, Mr. and Mrs. Anthony Schnurr.

Mr. Frank Heisz has purchased a Fordor Sedan.

Mr. Albert Pochman spent a few days at Detroit.

Mrs. Jacob Dentinger visited in Goderich on Monday.

Mr. and Mrs. John Hundt and Mrs. John Zinger and Miss Clara Oberle spent a few days at Kitchener last week.

Mrs. Oswald Beingsner and Messrs. Alois Meyer and Cyril Oberle spent the week-end at Kitchener.

Miss Anna Schurter of Detroit is visiting her parents, Mr. and Mrs. Jos. Schurter.

Mr. Harry Oberle is spending his vacation at his home here.
