SELF-PRESERVATION,

BY SAMUEL LA'MERT, M. D.,

Marriage requires the fulfilment of several conditions, in order that it may be really the cause of mutani, happiness. Could the wil, which covers the origin of domestic wretchedness, be reised, and its true source in every instance disclosed, in how many gould it be traced to physical disqualifications and their attendant disappointments. Excesses are al-

iteration and study, for what subject can be of more importance than the preservation of health, and of the physical carabilities of which every man should be possessed. It unfortunately happens, that, the unapply victim of excessive indulgence and victous habits, whether acquired in early life, or from the follies of advanced age white suffering from their invaitable cubsequences, unwisely ento tains a fear of apportunity to a qualified physician for relief. The Indian Troubles—Lord Elgis's Fugle—
man—Annexation—The Weather.

Tononre, December 28, 1849. With the momentous questions which are now before the political world, it is surprising to see the little excitement which exists here. It is the the little excitement which exists here. It is the calm which precedes the storm. Even the Correspondence, of Malcolm "Cameron" and Hincks," on the subject of Malcolm Cameron and Hincks, on the subject of Malcolm Cameron described to the storm of the subject of Malcolm Cameron described to the subject of the subject of Malcolm Cameron described to the subject of the terest taken in it is trifling. But the interest is the truth, and the Hon. James Hervey Price with the truth, and the Hon. James Hervey Price with backing his friend; he also tella them that they are deceiving the people, and falsifying their professions. There is no denial of all this in Mr. Hincks' letters to Mr. Cameron, which are confined to endeavering to prove that all, and more, than is charged against the Administration, Mr. Cameron would have sametioned could be have got the Crown Lands. But this is without proof. Altogether, Malcolm has the best of it—10 to 1. Mr. Hincks, not satisfied with the avalenches of odium he brought on his colleagues at "Price's of the one of the groundlessness of the note copied above, addressed Mr. Cameron as follows:—

"To Hon. Prancis Hincks."

Some comment on this letter is required.—Mr. Cameron asserts that he was called on "to give his assent to positive mis-statements." Prove a reference to the original paragraph, as amended by Mr. Cameron, as well as his letter, in which he declares that for the last twelve months there were causes existing which made him desirous of leaving the Government.

"To Hon. Prancis Hincks." odium he brought on his colleagues at "Price's Dinner," has got up a Dinner for himself at

by Mr. Hincks, and sent to Mr. Cameron for his approval:

"We regret exceedingly to learn that the Hoa. Malcolm Cameron has resigned his office of Assistant Commissioner of Fulfile Works. Mr. Cisnefron, it has been
understood, has for some time been most manicus to retire
from the Department of Fulfic Works, and would have
carried his wishes his effect some months ago, but for the
violent proceedings of the opposition. The immediate
cause of Mr. Cameron's retirement is the change which
has laiely taken place in the Public Works' Department,
by the appointness of Mr. Tache as successor to Mr.
Viger. The vacancy thus created, it became necessary
to fill up, and the China Commissionscrain was of course,
offered to Mr. Cameron, who has declained accepting it,
and has, at the same since, infirmized his distensiminated to
retire altogether from the Department of Public Works."

Mr. Cameron sent by the messenger the following notes.

ote is but lacin ransement of our specification "A is not at all the reason. I retire because I have cen most shamefully treated and deceived.

"Makeelm Cameron."

The Hou. F. Hings," "The Hon. F. Hincas."

It will be observed that Mr. Cameron admits in his letter "there were causes existing for the last twelve months which made me desire to leave the Government." It is also quite notorious that he frequently declared that his private business in dispensably required his undivided attention.

Mr. Cameron's note caused not a little surprise to his colleagues, who had been given to understand by him, only a day or two previous, that he wished to retire on unicable terms. Mr. Hinchs sent by the bearer the following note:

sent by the bearer the following note:

"Please return me my MS. I made several attempts to find out from you what reasons you intended to give, to the public for your retirement. I have heard you meanistly state all thin is in my paragraph, and I certainly indesty out all thin is in my paragraph, and I certainly indesty out the property took place. I shall be gird to have my paper; and if you will not inform us while you intend to state, we miss act on one own responsibility. Dinner," has got up a Dinner for himself at Woodstock on Tuesday next; but all will not do; the Ministry is doorned, and, as the fishwoman said to the cels, "It's no use wriggling."

There is a stiffish fight up here, indeed a regular, "set too," about the Judge of Common Pleas that is to be. Lord Elgin comes to the scratch for Henry Sherwood! In spite of Crooks and Chancery, Robert Baldwin still backs H. J. Bouldin; which ferritt of the "Canawls" is bottle-holder for his friend "Burns." The most likely thing is, that neither will get, but that a compromise will put in some outsider.

The Macdonells and the Indians have another cause of complaint. The Ministry, who brought them down here for an offence they had not committed, refuse to advance money to take them back to Mica Bay. The Indians are pennyless, and existing on charity. A very strong feeling was getting up, and it was proposed that a party of gentlemen should act for their benefit—at the Theatre; the Government heard of this, and made signs of repentance, and the arrangements for the Indian spectacle are postponed, pending negociations. ## THE COURIER.

FRIDAY, JANUARY 4, 1850.

SPE PIRST PAGE.

Our contemporary, the Courier, with an ingenuity peculiarly Ansiexationist, actually composed and published un article on Friday last, to prove that the expenditure of three millions of dollars a year by a certain party in Canada is of no benefit to the country. And what is the reason, that it is of no benefit, do you think? Why; because it is the Imperial Government that does it. We believe, as a matter of truth, that he overstates the expenditure, for we do not believe it exceeds the half of the amount stated, but let us reflect on the statement.

statement.

If the expenditure of £400,000 a-year in Canada
for feeding British troops, be no benefit, would the
feeding of Yankees to a like amount, be of any
more? We are told of a great shoul of Americans, who have lots of machinery feady pac nto Canada, as soon as Annexation d the feeding of them be more profitable, t alling of beer and bread to the soldiers?

would the feeding of them be more profitable, than the selling of beer and bread to the soldiers?

The Courier says, that it the troops were not here, we should have so much more flour and beef to export. So we should. But does it not occur to the Courier, that we export the flour and beef consumed by the troops, when we export the bills of exchange drawn by the Commissariat?

If the consumption of produce, by the present non-producers in Canada, be of no benefit to Canada, neither is consumption by non-producers in any other country of any benefit to the country in which they live. Paris has not benefitted by the which they live. Paris has not benefitted by the which they live. Paris has not benefitted by tis mey there, Saratoga is not benefitted by tis my the them. The calcionia Springs by its water drinking the transport of the greater droubint of the produce of the greater droubint of the produce of the sold being spent in another country; and, according to the Charter, she would derive no me from the expenditure of the landlords reute, as nong the peasanty of that ill-used country.

In going so fiercely for Annexation, our contemporary should remember that it is not necessary to undervalue the advantages which Canada has in hand, while extelling those that are still in the bash.

we go not think that the Annexation question is a party question, or ought to be made one. It is meant by its advocates as a measure for the benefit of Canada, not as a measure to be adopted right or wrong. There is no inducement, therefore, to misrepresent facts,—well known and indisputable facts,—Gasette. We do not think that the Annexation question i

adopt our course, and give the language of our opponent, facts would not be misrepresented.

With us the Annexation question is not a party
one—and so truly is this felt to be the case, that its annunciation was attended by men of all parties, creeds, and races. "It is meant by its advocates as a measure for the benefit of Canada;" and, as one of its advocates, we but discharge our duty when we sought to dispel an illusion re-Military Departments. We did not assert that the reason the Military expenditure is of no benefit to reason the Military expenditure is of no benefit to Canada, is because it proceeds from the Imperial Government—but we did say that the export value of our surplus preduce is governed by the price it commands in the foreign market observe it is price it commands in the foreign market observe it is paid—and further, that, while we had, a surplus, add—and further, that, while we had, a surplus, it was quite immaterial to the producer whether the it was quite immaterial to the producer whether the it was quite immaterial to the producer whether the

Paris benefits by the millions of rich foreigners, precisely because they are rich foreigners. Rich toreigners appeal their monies in the purchase, not of the raw produces alone, but of those menufactured articles which are foreigned by Protective laws. They are buyers of sike, actim, furniture, carriages, jewellery, paintings, statuary, and slit the costiler productions of this manufacturing classes.

The journals which are opposed to Annexation assert, that the Canadians would, if incorporate in the Federal Union, be exposed to a terration exceeding that which they are now compelled to

pay. We do not question the propriety of their pur-suing this course, because it is the duty of the American party to prove that the Canadians would be materially benefitted by a change in their political condition; and unless they can establish the fact to the satisfaction of the masses, it is quite evident that they bight to abandon the gitation, and agree with the Ministerialists, that air present system is the best ANA The distribution in to the velocities cost of the Go-

Banks.

In our article of Wednesday last, on the subject of Banks, we adverted to the practicability of creating a Provincial Bank of Issue for the liquidation of the cost, in principal and interest, of our Canals, and stated that the plan would result more to the advantage of the country at large, than the funding of the Provincial Debt similar to the English practice.

According to the plan referred to, the Interest payable for the use of the Paper currency of the lank of Issue may be fairly set off against that due the public creditor, so that the net revenue of the Canale would be wholly convertible into the Sinking Fund for the gradual redemption of prin-

Thus, the public would have the double guarintee of the Canal Revenue, and the general Revenue of the Province, for the Paper currency of the Bank of Issue; and the public creditor the certainty that yearly provision is thereby made for the payment of both interest and principal of at an irrelevant speech, to please even so great a friend to the cost of the public works.

The funding of the Provincial Debt would be simply the creation of public stock, for sale, in order to redeem, with the proceeds thereof, the cost of Canals; in other words, the public creditor would thereafter assume the more euphonious vestigated, and the result of a comparison between the tor would thereafter assume the more euphonious title of stockholder; while in lieu only, of paying that State and Canada is, that our anti-elective cost, we should then have the honor of paying 6 per cent. to the stockholder-a change it seems to us in no way desirable.

To the Editor of THE MONTREAL COURSES:

Sin,—"I crave a small space in your columns," to reply to Mr. Gugy's protest in your issue of Wednesday.

I beg leave to explain to Mr. Gugy, that the reports of public meetings drawn up for the Montreal Gazette, are written for the information of the readers of that journal—not to please the speakers. A verbative report is never made for any mewapaper, that I ever heard of, and what is omitted or inserted, depends upon the judgmentior the reporter. In Mr. Gigg's spoken speech, for instance, he said a great deal about his services as a public main, and his never having requived remuneration from the Government for them, and other debateable matter, of the same kind. In the reported speech, all that is properly left out, because the readers of the Gazette really have no interest in Mr. Gugy's eternal complaints, and it had no bearing upon the subject in discussion—an Elective Council.

Hesides, as the meeting did not break up until after ten o'clock at night, the writing out of the report, correcting the Press, &c., counciled, ma until four e'clock in the morning; and I think that people who can go to bed at a decent hour, will readily excuse me for not laboring away at an irrelevant speech, to please even so great a friend to the Press as Mr. Gugy. It is true that the interest upon the stock may be reducible from 6 per cent, downwards, upon the English system; but the experiment dips too deeply into futurity, and affords too remote a prospect for liquidation, to suit the present economical wants of the country.

This event was announced in an Extraordinary Gasette; published on Sunday, the 2nd ult., in the following terms:—

"Whitshall, Dec. 2: 1828.—This morning, at seven minutes before two o'clock, Her Majesty the Queen Dowager departed this life, at Stammore Priory, to the great grief of Her Majesty and of all the Boyal Family, after a painful and promoted illness, which ahe hore with examplery patience. The loss of this most excellent princess will be deeply mourised by all classes of Her Majes-tyle subjects, to whom her many eminent virgues readered her the object of universal esteem and affection."

The deceased Queen Dowager, Adelaide Louisa Theresa Caroline Amelia, was the eldest daughter of George Fraderick Charles, the late reigning Duke of Saze Meiningen and the Princess Louisa Elsanor, daughter of Christian Albert, Prince of Hohenlohe Langenburg. She was born on the 13th of August, 1792. She was married to the Duke of Clarence on the 13th of July, 1818. Twe children, the issue of that marriage, died in very early infancy.

While Duchess of Clarence, this illustrious lady employed and improved her comparative privacy

while Duchess of Clarence, this illustrious lady employed and improved her comparative privacy in works of behevolence. When she became Queen, her more ample means were similarly expended for useful purposes. Since the death of King William, in 1837, a large portion of the income granted her by British liberality (£100,000 a year) has been devoted to charitable objects. The Church at Valetta, in the Island of Malta, where she spent several winters, was founded and endowed by her munificence. She contributed to almost every religious society connected with the Church of England, among which may be mentioned the Society for the Propagation of the Gospel in Foreign Parts, the Colonial Bishopric Fund, the Sons of the Clergy, the Churches in Nova Scotia and Newfoundland, the Emigrants Episcopal Fund, the Churches in Australia and Cape Town, the Cathedral at Adelaide, and that also at Newfoundland, the London Diocesan Board of Education, the Ragged Schools fund, the National Society, the Church Missionary Society, and the Metropolis Churches Fund. It was the practice also of Her Majesty to subscribe largely to all the charities in every place where she happened even for a time to reside.

For several years past the Queen Dowager suffered greatly from ill health, and was obliged to leave England during the winter. Her last illness was lingering and painful. It was endured with much fortitude, and cheezed by the consolations of religion.

The Gazette of the 10th ult., contains the fol-

much fortitude, and cheered by the cumulated of religion.

The Gazette of the 10th ult., contains the following interesting notification:—The Queen has been pleased to command that the following directions, given by Her late Majesty Queen Adelaide for her funeral, should be made public.—Her Majesty desired that these directions, which are worthy of the exalted piety and unfeigned humility of the late Queen, should be, as far as possible, carried into effect, and for this purpose, has been pleased to sanction a departure from the ceremonial usually observed in the funerals of the Kings and Queens of the Realm:—

All those of my friends and relations, to a limited number, who wish to attend, may do so. My nephew, Prince Edward of Saze Weimar, Lords Howe and Denbigh, the Hon. William Ashley, Mr. Wood, Sir Andrew Bariard, and Sir D. Barley, with my dressers, and those of my ladies who may wish to attend, I die in peace, and wish to be carried to the tornic in peace, and free from the vanities and going of this world. I request not to be dissected nor enhalmed; and desire to give as little trouble as possible.

GENUINE COD LIVER OIL OENUINE COD LIVER UIL.

ONE of the most valuable remedies for the Cure of CONSUMPTION, SCROFULA, &c. It has been long employed in England with the greatest success in the above diseases.

A great difficulty has existed in pracuring pure, unadulterated Oil, and that which is free from unpleasant flavor. To obvinte this, S. J. L. & Co. have had Cod Liver Oil manufactured expressly for their trade, and they are now embled to offer an article whose purity and excellence can be depended upon.

an arters pended upon.

It may, be taken without interference with diet or usual habits. The Cod Liver Oil has been found useful in restoring impaired and debilitated constitutions, giving appetite and imparting since to the stounch.

POTASH RETTLES.

THE Scheribere, Agents of the ST. MAURICE IRON WORKS, will receive large
quantities of the above during the Screen of eleighing, and have a few on hand at present, assorted,
34, 5, 74, and 11 ewt. Owing to the increased
demand for this make of the article, arrangements
have been made at the Works which will enable
them to execute orders to the extent of 50 per
week, if required. They beg to remark that the
RESTLES latterly and how Manufactured at
the above Establishment, are quite superior in
quality and much lighter in weight this those
formerly made, it having been the practice heretofore to cast from a Cupalo Furnace, a considerable portion of Scotch Fig Iron was necessarily
used with Coke as fuel; at present they are cast
from the Blast Furnace and solely and directly
from the St. Maurice Ore, smelted exclusively
with Charcoal, thereby producing a durability in
the article that cannot be approached in any other
Kettles that can be offered in this market. The
weights have been made to compare with the
highiest imported ance by heeping the edges and
upper part thin, rotaining the original thickness of
bottom, and great care is taken to produce a perfectly cound casting in every Kettle. Notwithstanding the extra quality of the article and the
circumstance of their being warranted, the Agents
have instructions to sell them at a very small advance upon the price of other makes.

TURKISH BLACK SALVE

UNDER THE PATRONAGE OF THE HONORABLE THE BAST INDIA COMPANY.

THE SALVE, prepared from the original recipe preserved from a selebrated Turkish Hakim, (physician) of Smyrha, in Asia Minor, and which has obtained in unprecedented celebrity in Greet Britain and the East Indies, from the secondaries, has lately been introduced into Montreal As might be expected, its popularity has followed it, and its use is becoming general among all classes. The Proprietura, promited by the very flattening reception it has met within the Metropolis, have established agencies at all the principal Cities. They flatten describes and for that purpose, have established agencies at all the principal Cities. They flatten themselves that when its wonderful properties shall become more generally known, they will meet with their encouragement which the introduction of such a valuable medicament into a country justly entitles them. The contracted limits of an eleverisement necessarily precludes their entering into any adequate detail of its movies, but, for the information of the public, they intend to publish, from time to time, ment statements of cares as have or proposed which it has been used with the a set complete success—Such as Swollen Glands. . MOFFATS

Life Pills and Phenix Bitters. These Medicines have now been before the pub-lic for a period of VIFTERN YEARS, and daning that time have maintained a sight-charact in almost every part of the globe for their artino dinary and immediate power of restoring perio-localite to persons suffering under nearly every kin of disease to which the human frame is liable-ted to the man trame in liable-

of certificated instances, they have even resufferers from the very verge of an untimety gafter all the deceptive nontrum of the day ha after all the deceptive nontruins of the day had utterly failed; and to many thousands they have
permanently eccured that uniform enjoyment of
health, without which life theeft is but a partial
bleming. Be great, indeed, has their efficacy invariably and infallibly proved, that it has appeared
curreely less than miraculous to those who were
acquainted with the heautifully philosophical principles upon which they are compounded, and upon
which they consequently act. It was to their
manifest and sensible action in purifying the springs
and channels of life, and enduing them with renewed tone and vigot, that they were indebted for
their name.

an awed lope and vigor, that they were indebted for their name.

Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDICINES are pusely and colely vegetable; and contain neither Mercury, nor Antimony, nor Arsenie, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though tong known to several Indian tribes, and recently to some eminent pharmacoutical chemists, are altogether unknown to the 'gaorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to losses from the coats of the stemach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such

convolutions of the small intestines. Other medicines only partially cleanes, these, and leave such collected masses behind to produce habitual Costiveness, with all its train of evils, or sudden Diarrheas with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the VECKTABLE LIFE MEDICINES is to elegists the kidneys and the bladder; and, by this VEGETABLE LIFE MEDICINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its not color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and sourished by food coming from a clean stomach, commes freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infallible:

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind; FLATULENCY; Loss of Appetite, Heartburn, Headache, Restlessness, Ill-temper, Anxiety, Languor, and Mclancholy, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.

consequence of its cure.

Contiveness, by cleansing the whole length of the intestince with a solvent process, and without violence: all violent purges leave the bowels conive within two days.

Pilarrhosa and Cholera, by removing the harp acrid fluids by which these complaints are ccasioned, and by promoting the lubricative secretion of the flucous membrane. ecasioned, and by promoting the lubricative secre-ion of the mucous membrane.

Fevers of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of Il intestinal obstruction in others The LIFE MEDICINES have been known to

cure RHEUMATISM permanently in three weeks, and GOUT in half that time, by removing local inflammation from the muscles and ligaments Dropaies of all kinds, by freeing and strength-sning the kidneys and bledder: they operate most delightfully on these important Imposes of all kinds, by freeing and strength-sning the kidneys and binder: they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also Worms, by dislodging from the turnings of the bowels the slimy matter to which these

creatures adhere.

Asthma and Consumption, by relieving the air-vessels of the lungs from the nuccous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful diseasers.

dreadful diseases.

Scurvy, Ulcers, and Inveterate Scree, by the perfect purity which these LIFE MEDI-CHES give to the blood, and all the humers.

Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that teed the skin, and the morbid state of which occaded the skin, and the morbid state of which occaded the skin, and the morbid state of which occaded the skin, and the morbid state of which occaded the skin and the skin a sions all eruptive complaints, sallow, cloudy, and other disagreeable complexions.

The use of these Fills for a very short time will effect an entire ours of SALT RHEUM, and a

striking improvement in the clearness of the skin. COMMON COLDS and INFLUENZA will PILES. As a remedy for this m and obstinate malady, the VEGETABLE LIFE
MEDICINES deserve a distinct and emphasic

It is well known to hundreds in this city, that the former proprieter of these valuable Medicines was himself afflicted with this complaint for upwards of KHERTS-FIVE YEARS; and that he tried in wais, every remedy prescribed within the whole compass of the Materia-Medica.
