Secular Department.

EUROPEAN NEWS.

From the London Record, Jan. 25.

Yesterday the new session of Parliament was opened by the Queen with a Speech which was more interesting than such State Documents are usually accounted to be. Her Majesty was pleased to refer to the proposed Congress and to its objects without any allusion to the political horizon of New Brunswick...

British and For. American News.

New Brunswick.

The Courier presents a glowing picture of the present condition and future prospects of our sister province. The Government will be able to render a faithful and pleasing account of their stewardship to the country. We do not remember a period when the political horizon of New Brunswick reflected so clear and calm...

The Legislature of the Province was opened at Fredericton, on Thursday last, with the usual formalities. His Excellency, in his speech, congratulated the members on the progress of the Province...

Nova Scotia.

On Monday, 30th ult., Charles Potter, aged 17 years, son of the late Frank Potter, Junr., went out from the Light House for the purpose of shooting ducks, and it is supposed went on a ledge, only a step from the water shore. He being very heavy at the time, it is supposed he was washed off and drowned, as the gun was found there...

The Protestant.

SATURDAY, FEBRUARY 25, 1860.

HOUSE OF ASSEMBLY.

February 25, 1860. Mr. Howard presented a petition from W. L. Laird, Teacher, Upper Tryn, praying for compensation, and thereupon moved that a Committee be appointed to whom should be referred every petition relating to Teachers Schools.

Two Days Later. ST JOHN'S, N. F., Feb. 15, 1860. The steaming Prince Albert, Capt. Pross, from Galway on the 4th inst., arrived at this port this morning. She has experienced heavy weather. She has 20 cabins and 390 other passengers for New-York, for which port she leaves this evening.

GREAT BRITAIN. Lord John Russell had announced in Parliament that the Government could not produce the correspondence relative to the rumored annexation of Navro to France. He said that Count Walewski had assured Lord Cowley that the Emperor had no intention of proposing the annexation.

ITALY. The London Post prominently announces that England and France are allied on the Italian question, and has determined that no intervention shall be permitted. It was rumored that the two Governments were determined to recognize annexation to Sardina as the only true solution of the Central Italy question.

BY TELEGRAPH TO OAKWAY—LATER. The London Times (City Article) says the funds opened on Friday with great steadiness, and an improvement of an eighth, which was well maintained throughout the day.

The London Post says the treaty of Villafraanca and Zurich are virtually annulled. The Western Powers have commanded that no armed intervention shall take place in Italy unless it is previously sanctioned by the unanimous approval of all the great European powers.

The Courier presents a glowing picture of the present condition and future prospects of our sister province. The Government will be able to render a faithful and pleasing account of their stewardship to the country.

The Legislature of the Province was opened at Fredericton, on Thursday last, with the usual formalities. His Excellency, in his speech, congratulated the members on the progress of the Province.

The Legislature of the Province was opened at Fredericton, on Thursday last, with the usual formalities. His Excellency, in his speech, congratulated the members on the progress of the Province.

On Monday, 30th ult., Charles Potter, aged 17 years, son of the late Frank Potter, Junr., went out from the Light House for the purpose of shooting ducks, and it is supposed went on a ledge, only a step from the water shore.

The following petitions were presented to the House of Assembly on Friday, Feb. 24, 1860. By Hon. Mr. Cole, from the Trustees of Manuabe School, praying for payment of Teacher's Salary.

Mr. Howat presented a petition from W. L. Laird, Teacher, Upper Tryn, praying for compensation, and thereupon moved that a Committee be appointed to whom should be referred every petition relating to Teachers Schools.

Mr. McNeill presented a petition from inhabitants of Lots 50 and 51, praying for the opening of a new line of road, which was read and laid on the table. Also, from inhabitants of Lots 12 and 14, with a similar prayer.

Mr. Howat presented a petition from Emily Harrington, Teacher, Hill Vale, praying for remuneration. Mr. McNeill presented a petition from inhabitants of Lots 50 and 51, praying for the opening of a new line of road.

We, the Representatives of the People of Prince Edward Island in Colonial Parliament convened, respectfully thank your Excellency for the Speech with which your Excellency was pleased to open the present Session.

We are gratified to learn that the Address to the Crown which the House of Assembly agreed to in its last session, upon the subject of the Land Tenures, has been graciously received by Her Majesty, and that the preliminary arrangements are being made in relation to it.

Mr. Davies from the Committee appointed to wait upon His Excellency to know his pleasure when he would be attended with the Address, reported that he would be prepared to receive it to-morrow at 12 o'clock.

On motion of Mr. McNeill, the following committee were appointed, to whom all matters relating to Post Offices should be referred, viz.—Messrs. McNeill, J. Yeo, Sinclair, Montgomery, and Hon. Mr. Howat.

Exchange Rooms, Charlottetown.

Steamship Margaret, from Liverpool, on the 9th, for Portland, was totally lost on Sunday evening, 19th, on Cape Sable Id., supposed passengers all perished. Part of mails and goods saved in damaged vessel.

The Hon. Heath Harland, according to an announcement, lectured before the Association on Thursday evening on "Hampden and his Times." He glanced at the early life of Hampden. He showed how Charles I. tried to raise money, and govern without parliament.

Next Thursday evening the Association is to be favored with another lesson in history. The Rev. Dr. Fitz Gerald will lecture on "William III., his Life and Times."

Summary.

The Rev. Dr. Fitz Gerald thankfully acknowledges to have received from the representatives of the late Rev. E. Haythorn, through Dr. Young, the sum of £20, to be funded for the use of the poor of St. Paul's church.

CHARLOTTETOWN DEBATING CLUB.—At a recent meeting of the Club it was resolved that members of both Houses of the Legislature be admitted during the session. All applications for membership must henceforth be accompanied by the annual subscription of £1 6d.

INFORMATION WANTED.—A widowed mother in Newland makes inquiries about her son, William Paisley, who has not been heard from since 1848, and who she has been informed by her son's father, about three children, were in or about Charlottetown.

Scenes are being drawn under the ice in the Iron-bridge Bay, on Lake Ontario, this winter, and the fish taken out by tons. From thirty to fifty tons of fish have been caught already this winter by seines.

The Government House at St. John's, N. F., came near being destroyed by fire on the 24th inst. A defective stove ignited the wood-work in one of the rooms and set it on a blaze. It was got under without much damage.

MACAULAY'S HISTORY OF ENGLAND.—The London correspondent of Manchester Guardian, in speaking of the unfinished History of England by the late Lord Macaulay says:—

Though when Lord Macaulay began his history he hoped to bring it down to the limits of living memory, he had long ago abandoned this hope. Latterly the utmost range he gave himself was to reach the accession of Victoria in 1837, and this he had hoped to accomplish in five, if not four more volumes.

The Legislature of Newfoundland was opened January 31st, by a long Speech from Sir Alexander Bannerman, Governor of the Colony. His Excellency intimated that the Commissioners for reporting on the Fishery Question between England and France have given their ultimatum, but Sir Alexander is not enabled to give the substance of their decision on this vexed question.—Hc. Paper.

The BIBLE SOCIETY.—We are glad to hear that the Funds of the British and Foreign Bible Society are now in advance of what they were at the corresponding period of any previous year, and that there is an increase of 2,000 copies in its issues for Great Britain and Ireland alone!

MARRIED.

On Monday, the 23rd inst., by the Rev. George Matthews, Mr. ALLEXANDER A. McDONALD of Charlottetown, to Miss CATHERINE A. McDONALD of Charlottetown.

On the 22d instant by the Rev. Thomas Denny, Mr. ALLEXANDER McKESSIE, of Dundee, to Miss FLORA McKESSIE of Victoria River.

On the 23rd inst., by the Rev. James Denny, Mr. JAMES DUNLOP, of St. John's, to Miss CATHERINE Ross, of New London.

On the 23rd inst., by the Rev. James Denny, Mr. JAMES DUNLOP, of St. John's, to Miss CATHERINE Ross, of New London.

On the 23rd inst., by the Rev. James Denny, Mr. JAMES DUNLOP, of St. John's, to Miss CATHERINE Ross, of New London.

On the 23rd inst., by the Rev. James Denny, Mr. JAMES DUNLOP, of St. John's, to Miss CATHERINE Ross, of New London.

WEEKLY CALENDAR—FEBRUARY.

Table with columns: DAY, DAY WEEK, SUN, MON, TUE, WED, THU, FRI, SAT. Rows for February 25 (Sunday) through 29 (Thursday).

Farm and Garden.

How Hemp is Grown and Prepared for Market.

Hemp is one of the minor crops of the country, like hops, confined to a few localities, very important in the limited districts where the cultivation is understood, and generally bringing a fair return for the capital and labor invested.

The Hemp Plant (Cannabis Sativa), belongs to the nettle tribe, and is often seen as a weed about farm houses in the older States, though its cultivation as a crop has long since ceased.

The plant requires a deep, rich, vegetable loam, such as is found in alluvial districts, and river bottoms. It flourishes best in virgin soils, where it frequently yields ten or twelve hundred pounds per acre.

Much more attention is paid to the raising of seed in this country, than in Europe. A piece of land is devoted expressly to this purpose, so that seed perfectly ripe, and selected from well grown plants, may serve as the general crop designed for the whole of the season.

The plants being thinned, the ground is kept under tillage, between the drills, with the plow or cultivator, and the drills are cleaned with the hoe. After the first light frosts, the plants are gathered, and carried to the barn for threshing.

The earliest crop of hemp is usually ready to harvest about the middle of August, and later fields will ripen in the order in which they have been planted. This crop however does not suffer so much as some others from a late delay.

There is a diversity of practice as to the mode of harvesting. The old method was to pull it up by the roots, and this process had this advantage to recommend it, that it saves some four or five inches in the length of the stem, where it is thickest and best.

Another mode is to cut it with a scythe or sickle, and lay it in stacks. The process in the same as in flax gathering, the laborer gathering a handful and with a quick jerk pulling it out by the roots.

In either case, the plants are laid on the ground with great care, and left for a few days to cure. They are then gathered and put in shocks, and tied in a cap at the top, with a strip of straw.

Several attempts have been made to remove the woody fiber from the flax by machinery, without the loss of time involved in retting, but without success. The thing has been done, but the flax for some reason does not last so long and its market value is diminished.

For some purposes, the water retted hemp is much the best, and commands the highest price. This is because the water retting process through which it passes, notwithstanding the advantages of water retting, renders it more valuable to the spinner, from the fact that it is more troublesome, requires more skilled handling, and sometimes commands a premium on the market.

THE WONDER OF THE WORLD!

valuation adopted above, amounts to \$50,000,000, equaling in value the annual gold yield of the whole world, excepting Australia.

On the contrary, how is it with coal? Suppose one half of the whole amount produced, to be used in the warming of our dwellings, and in cooking, &c., then we have \$25,000,000 worth of fuel for the year, and we are supplied with fuel for the year, and we are supplied with fuel for the year, and we are supplied with fuel for the year.

Miscellaneous.

A Waterfall Six times the Depth of Niagara.

Did any of your readers ever hear of the Gairrops Falls, near Florence? If not, they will probably read a description which has just appeared with some pleasure.

It is curious that a fall six times the depth of Niagara should remain almost unknown. From the village of Gairrops, reached by a river of the same name, the water is carried for twelve miles up the Mallesham Pass, and reaches the Falls Bungalow about three and a half hours after leaving the top of the Pass.

An amphitheatre of woods, and a river, about 200 yards wide, rushing and boiling to a certain point, where it is lost in a perpetual mist and in unceasing eddies, you are directly before you see out of the four principal falls; these two are called "the great falls," and "the Rocket," the one contains a large body of water, the main body of the river, perhaps a yard across, which falls massively and apparently sluggishly into the chasm below; and the other contains a smaller body of water, which shoots out in a jet, and falls in a shower of rocks till it falls into the same chasm.

The fountain irrigating peculiar to the weaker sex, is the fountain of life, and the fountain of life is the fountain of life, and the fountain of life is the fountain of life, and the fountain of life is the fountain of life.

Belious Affections. The quantity and quality of the bile are of vital importance to the health of the human system, and as the bile is the fountain of life, and the fountain of life is the fountain of life, and the fountain of life is the fountain of life.

Throat Intemperance. I have been thinking how horrible it must be to see anybody ever cured for drunk: the honest eye dull and mourning; the wise lips jabbering foolishness;

Coils versus Gold. It seems, at first sight, presumptuous to compare gold with the most precious of all metals, gold; with platinum, however, if the latter were endowed with power to fly, it would certainly be the most valuable of the metals.

Writing Papers, Envelopes, &c. JUST RECEIVED FROM BRITAIN. The highest quality of writing papers, envelopes, and stationery, of the most improved manufacture, and of the most elegant design, and of the most superior quality.

SCROFULA, OR KING'S EVIL.

IS A CONSTITUTIONAL DISEASE, A corruption of the blood, by which the fluid becomes vitiated, and putrid. Being in the circulation, it pervades the whole body, and may burst out in almost any part of it. It is a disease which is variously caused by material disease, low living, disordered or unhealthy food, impure air, and the various causes, the depressing view, and above all, by the cessation of the circulation, descending "from parents to children, and from children to their posterity."

The effects commonly by deposition from the blood of corrupt elements, which, in the lungs, liver and intestines, are turned into tubercles, in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which is in the blood, depresses the energies of life, so that scrofula conditions not only suffer from scrofula complaints, but they have far less power to withstand the attacks of other diseases; consequently, most patients perish by diseases which, although not serious in their nature, are still rendered fatal by this taint in the system.

Many patients are afflicted; their persons are wasted, and their health is undermined by it. To cleanse it from the system we must renovate the blood by a salutary course, and invigorate it by healthy food and exercise. Such a medicine we supply in AYER'S COMPOUND EXTRACT OF SASSAPARILLA.

THE WONDER OF THE WORLD! HOLLOWAY'S PILLS. It ranks among the leading necessities of life, as it is well known to the world that it cures many complaints, either local or general, which would otherwise be incurable.

WEAKNESS AND DEBILITY. If you are afflicted with weakness and debility, or with a constant feeling of languor, and a general sense of the want of energy, should your health have been impaired, or if you are afflicted with a general sense of the want of energy, should your health have been impaired, or if you are afflicted with a general sense of the want of energy, should your health have been impaired.

NERVOUS DISORDERS. Any derangement of these delicate organs affects disastrously the whole of the system, and as the nerves are the fountain of life, and the fountain of life is the fountain of life, and the fountain of life is the fountain of life.

COMPLAINTS OF FEMALES. The fountain irrigating peculiar to the weaker sex, is the fountain of life, and the fountain of life is the fountain of life, and the fountain of life is the fountain of life.
