DECISIONS IN COMMERCIAL LAW

SCOTTISH ONTARIO AND LAND COM-PANY V. CITY OF TORONTO.—DEFOE V. CITY OF TORONTO.—These were actions brought against the City of Toronto to recover damages for not providing a supply of pure water for the plaintiff's elevators, and for negligently and knowingly allowing water supplied by the city to become impregnated with sand, which greatly damaged the elevators. The Court held that there was no evidence of any contract between the city and the plaintiffs, by which the city was bound to supply water free from sand, or indeed any contract to supply water in any quantity or quality. The relation between the parties was that of licensor and licensee, rather than one founded on contract.

GLANVILLE V. STRACHAN, ET AL.—The provision of section 20 of the Assignments Act, R.S.O., ch. 147, that "every creditor in his proof of claim shall state whether he holds any security for his claim or any part thereof, and if such security is on the estate of the debtor, or on the estate of the third party, for whom such debtor is only secondarily liable, he shall put a specified value thereon." means that if, as between the debtor and the third party, the latter is primarily liable, and the debtor only secondarily liable, the creditor must put a specified value on his security. The substance, not the form of the transaction, is to be looked at, to ascertain whether the third party is primarily liable; and if it be found that he is, the debtor is then only secondarily liable.

Moorhouse v. Kidd.-Where the principal debtor gives to his sureties counter-security, by mortgage of real estate, any of the sureties is entitled, after the principal debtor's default, to enforce the security without the consent or concurrence of the others, and it is not an answer to a claim for contribution by one surety, who has paid the whole debt, that the security has depreciated in value, and that the paying surety has refused to take any steps to enforce it.

RAINVILLE V. GRAND TRUNK RAILWAY Company.—A railway company is responsible for damages caused by fire which is started by sparks from one of their engines, in dead grass and shrubs allowed by them to accumulate in the usual course of nature from year to year, on their land adjoining the railway track. It is the company's duty in such a case to remove the dangerous accumulation.

THE Pullman Palace Car Company finds itself with surplus assets of \$18,000,-000, which it proposes to turn into additional capital. Such a surplus as this implies that enormous profits are being made out of the traveling public. No wonder that various railways, both American and Canadian, speak of trying to effect a reduction of rates on Pullman cars. We believe that both on the Intercolonial and the Western division of the C.P.R., rates for parlor cars and sleepers are lower than Pullmans.

ille

Beecher, the great preacher, said, "Fashion is an effervescence of taste, of sympathy, of the love of pleasing and the hunger for admiration. It is not a sympach reculiarity. One may love of pleasing and the hunger for admiration. It is not a surface peculiarity. One may destroy this particular fashion but not fashion itself. Without fashion, no matter how elaborately and elegantly a garment may be made and trimmed, however perfectly it may fit, it cannot please those of a fine and cultivated taste." It is well, then, in considering the matter of the new Fall suit, overcoat or the evening dress garments, that you consult one who is high in authority on fashions and current styles, one who notes the little differences that vary the style of to-day from the style of to-morrow.

HENRY A. TAYLOR, Draper,

the Rossin Block, has a Dominion wide reputation in the field of sartorial art, and just now when still a still a sartorial art, and summer garwhen styles are changing and summer gar-ments being put aside for autumn garb, it would be well to consult him as to the style that would be received becoming to you, that would be well to consult him as to the style that would be particularly becoming to you, and the most appropriate weaves and color effects for making the stylish suit that you have. He welcomes you to a consultation and inspection tion and inspection.

8. J. LAW & CO. 60 Yonge St., Toronto.

Mercantile Summary.

THE citizens of Woodstock, N.B., talk of establishing a sulphite pulp mill.

THE Waterloo Manufacturing Co. has started the erection of a large warehouse to be completed this fall.

H. M. Shaw, chairman of the Finance Committee of the town of Perth, is advertising for \$5,000 worth of that corporation's school debentures.

Compromise at 25 cents in the dollar is asked for by Paschal Gagnon, a Montreal dry goods retailer. He separated from the firm of Gagnon freres, in 1895. starting alone on limited capital. In February, 1897, he failed, offering 40 per cent., but estate was wound up, and he resumed under cover of his wife's name, with no better results, however.

THE new government steamer now being built at Dundee, Scotland, for service between Prince Edward Island and the Mainland, to replace the "Stanley," will cost \$185.000. Its tonnage is about 1,200 with 2,900 horse power. It will be provide with a strong protected stern for breaking ice, and its rudder will also be protected by a steel ice cutter.

A WRITER in the Grocery World tells of the system used by a grocer, who made a practice of taking advantage of manufacturers' advertising. His scheme was to keep track of what articles were advertised in magazines, newspapers, or on bill boards, and lay in a little of each article. He would then advertise them for sale, and as people often see things advertised, but don't know where to get them, he made the scheme pay well.

A LENGTHY and very interesting letter to the World, written by Mr. Manly, formerly of Toronto, contains some references to conditions in Dawson City, from which we take the following: The Bank of Commerce, under the management of Mr. Wills, is doing a tremendous business, and they have one of the best buildings in Dawson. Thoroughly equipped with the necessary assaying apparatus, it is a picture to see Mr. Wills and our old friend, Nourse, of Argonaut Rowing Club fame, bending over the furnace, looking after the interests of their institutions.

SUTTON, Que., on the Missisquoi river, in the province of Quebec, suffered not long since severely from fire, but is being steadily rebuilt. Two new hotels are up; Olmsted & Co., M. Hawley, H. Boright, Egbert Shepard, and Levi Smith have all got their stores finished and stock, or nearly so. Dr. Cutter's drug store and dwelling are rebuilt, and A. Robinson has his flour and feed store nearly ready. The new C.P.R. station and freight-house are being pushed on. What is rightly regarded as of much consequence, is the vigorous pushing on of the water-works, which will cost some \$13,000. The new reservoir, which is now being walled up and cemented, is 53 x 100 feet, and will hold about nine feet of water when filled. Experience of fire makes municipalities more careful.

Wool Exchange Building

Mercantile Summary.

A DECLARATION of insolvency has been applied for in the matter of E. F. Fleming, dealer in general supplies, at Holyrood, St. Mary's Bay, Newfoundland.

THE Town Council of Waterloo has decided to submit a by-law to be voted on November 21st to raise \$50,000 for the purchase of the waterworks, and to complete the system.

A surveyor, named Green, in Sherbrooke, has an iron mine in Bolton, Que., whence he has been taking samples for assay. He now purposes forming a company to develop the mine.

A QUEBECKER, named C. Sherrien, formerly a journeyman in a tannery, undertook to start in a grocery business in that city, two or three years ago. voluntary assignment is now reported.

SHAREHOLDERS in the Commercial Bank of Manitoba have not come off so badly as was predicted. We hear that cheques were issued for a further dividend of \$5 per share to the shareholders, making \$11 per share repaid to date.

THE assessment commissioner Ottawa reports that the present year shows an increase of \$825.700 in the assessed value of property in that city, and of 1,659 in the population. The population has grown to 55,385, and the assessment is swelled to \$23,713,725.

THE stockholders of the National Subway Company, St. Louis, will meet on November 5th, to vote on a proposition to increase the capital stock of the company from \$250,000 to \$2,000,000. The law compelling electric companies to place their wires under ground in that city has greatly increased the value of the company's property and franchise, and necessitated an increase in its capital.

For some years, J. P. Breau has been doing quite a good-sized business, in the boot and shoe line, at Moncton, N.B. He now approaches creditors with the view of getting a settlement at 50 cents on the dollar, four-fifths payable in cash, and one-fifth in a year. His liabilities are placed at \$10,355, and assets at \$5,095. A year and a half ago he claimed a surplus of \$8,000, odd.—C. V. De Bury, a warehouseman of St. John, N.B., has assigned, after a very brief business record, and is said to owe about \$2,500.

Mercantile Summary.

THE preliminary surveys of the extension of Edmonton District railway to join the C. & E. R. began last week.

THE Sherbrooke Gas and Water Co. are erecting an electric system direct to the new works of the Quebec Central railway at Newington. The new shops are to be operated by electricity

THE deep water terminus at North Sydney, C. B., is assuming definite shape, as we learn from the Record; the short piece of railway between the station and the shore has been completed some time and the wharf is expected to be ready soon.

A western contemporary has given the rates of municipal taxes paid by different towns in western Canada. Birtle rate of taxation is 20 mills on the dollar, Portage La Prairie 22 mills. Gladstone 25 mills, Minnedosa 20 mills, Dauphin 20 mills, Fort William 26 mills and Carberry 23 mills.

An American firm, the H. S. Nutting Com pany' makers of hand grenades and fire extinguishers, have decided that conditions are favorable for them here, and will build a branch factory in Toronto. The company to operate in Canada will be composed of Messrs. H. S. Nutting, C. A. Brown and A. H. Garfield.

We hear from Quebec that certain New York capitalists have bought the rights of the water at the falls on the Jacques Cartier River at the outlet of Lake St. Joseph, twenty miles from Quebec. There are about 100 men already at work constructing dams and canals. Barry, Ross & McRae are the contractors. Power is to be rented for manufacturing.

Among companies incorporated in Ontario by letters patent is the Ozone Company, of Toronto, limited, to make and sell patent medicines and table waters, capital, \$20,000. The Renfrew Farmer's Hedge and Wire Fence Company is another limited concern, composed of Canadians and Western Americans, formed to construct hedge fences and hedge-and-wire fences; capital \$22,000.

"THE Winnipeg District" is the title of a very neat illustrated pamphlet issued by a committee of the Winnipeg city council, the Winnipeg Board of Trade and the Winnipeg Retailers' Association. It sets forth the advantages of Manitoba as a field for immigrants and investors. Effective views are given of some of the principal buildings and streets of Winnipeg and the whole is supplemented by a map of part of Manitoba.

THE latest event in the history of the fuel question in Winnipeg, says the Free Press, has been the arrival of a carload of coal shipped by the Crow's Nest Pass Coal company from Fernie, B. C. Its quality has already been tested and the record of the results is to the effect that it is undoubtedly the best of bituminous coals known. The average ashes is 2.50, and of fixed carbon 80. There is no sulphur and consequently no clinker. The shippers claim that it will revolutionize the bituminous coal trade in the west.

It is declared by a Chicago paper that an amalgamation of 24 planing mill plants, involving \$15,000,000 in capital is being planned in the North-west. The mills the promoters of the combine propose to take into the deal are in Illinois, Wisconsin, Michigan, Minnesota, and Iowa. The stock company, when formed, will be capitalized at \$10,000,000, according to present intentions. The mills are to be purchased outright, and stock, bonds and cash given for them. Here is another big trust to make it harder for the small mills.

THE total exemptions from taxes in the city of Brantford exceed \$1,750,000.

MR. WM. HOOK, collector of customs of Ingersoll, is to be superannuated after having been connected with that department of the civil service for about twenty-five years. Mr. J. F. Williams is to be promoted to the position formerly held by Mr. Hook.

THE Minneapolis Lumberman says: "There is but little change in the red cedar shingle market. What change there has been is in the nature of a weakening of prices, and where a few weeks

ago local wholesalers and jobbers were asking \$1.97 and \$2 per thousand for *A*s, they are now quoting \$1.95 and even lower. The demand has been a good deal of a disappointment this fall."

A GREAT development in shipbuilding is shown in the United States. In the first quarter, July 1st to September 30th nearly half as much was built as was built in the whole of the previous year—the total being 83,191 tons in three months, as against 180.458 tons in the previous twelve.

AFTER being engaged in milling and farming at Winthrop, near Seaforth, for more than thirty years, Andrew Goven-lock has assigned. About three years ago his statement showed a surplus of \$30,000, but that was largely composed of machinery and lands, which are now mortgaged for \$18,000. Recently, his banker obtained a judgment against Mr. Govenlock for \$1,600.—G. H. Munro & Co., dealers in fancy goods, at Oil Springs, have assign ed, after being in business three years. -The landlord is in possession of the tailoring business of Ball & Co., at Peterboro, on a claim for past due rent, amounting to \$400. Besides this, the firm owe general creditors \$1,000. Their as sets have always been mortgaged.

An assignment has been made by J. 1. Rowe, manufacturer of organs, etc., and Aylmer, Ont. Mr. Rowe has always been cramped for capital.—Last April, Monro & Co. began. the business of tailoring in Hamilton. Finding that the were not likely to make any money, the firm decided to liquidate, and John Fer guson was appointed liquidator. owe \$1,650, and have nominal assets \$1,350.—Thomas Washburn, who baker, at Chesley, is in difficulty; he of the \$450, and has less than half this sum pay with.—In February last, a meeting of the creditors of S. F. Taylor & Son, manufacturers of felt shoes, at Walkerton was held. At that time they obtained of extension of one year, on liabilities \$10,000. Being unable to carry out this arrangement arrangement, they again consulted their creditors, who decided that the should assign to Henry Zinkan.

general merchant, L'Islet, Que., are offered so CREDITORS of J. T. Pouliot, cents on the dollar.—A demand of signment is reported as being made wilson & M.C. mission business in textiles. To-day he considers that he made a huge mistake, for he is compelled to assign.

GALT merchants, it is said, are very much exercised over the falling off of trade in that town. The Town Council is considering a resolution to appoint a committee to confer with representatives of the Board of Trade, these two committees to consult with Galt merchants and store owners, the object being to ascertain why trade is being diverted to outside places, particularly the larger cities, to the detriment of Galt merchants and property owners on Main street.

A discouraging blow would have been dealt to Toronto printers who work hard and manage closely and pay one hundred cents in the dollar to their creditors, if it were true, as stated in print, that Shepard Brothers & Co., job printers on Adelaide street west, had been settled with at twenty cents in the dollar. But we are told it is not true. Assignment was made by this firm some days ago; the E. B. Eddy Company had sued them and got judgment; one of several American concerns, who are creditors for ink supplied, says it will accept the twenty cents offered, but the Canada Paper Company refuses, and properly. The circumstances of the case have an unsatisfactory look. Mrs. Perry, wife of one of the principals in the concern, suddenly appears in the character of a capitalist-whence her wealth is derived we cannot ascertainapparently it is she who is offering to buy up claims against the firm's estate at 20 cents in the dollar, her own claim against the estate, of \$9,600 (out of a total liability of \$14,000), being found to be secured. Losses by doing printing for theatrical troupes is alleged as one cause of the firm's failure. Whatever the causes, it is not seemly that one secured creditor, the wife of a partner, shall grasp three-fourths of the assets of the concern, and leave the other fourth to pay twenty cents in the dollar to unsecured creditors. And we submit that people who expect other printing houses to pay them in full have no right to settle with such people as these, at one-fifth what they owe. If it be true, as stated, that this firm has lost \$9,000 in four years by bad debts, it is fair evidence that they are not fitted to carry on a business on credit.

BUSINESS AND EDITORIAL OFFICES, 1892

TORONTO, FRIDAY, OCTOBER 21, 1898.

THE SITUATION.

Mr. Tyrrell, of the Canadian geological staff, on his teturn from an exploration of the Yukon region, was intercepted at Vancouver by an interviewer. He has a firm belief. belief in the richness of the country and of the enduring quality of the placers, presumably derived from their enormous extent; but he, strange as it may seem, does not believe. believe in the existence of a mother lode. If this opinion be correct, only placer mining need be looked for in the klond: klondike country. There can be no doubt that the wide distrik... distribution of placer gold will make this region a gold producer for a long time. The cost of working the placer mines is being reduced without, perhaps, reducing the teal wage of the miners. This year \$15 to \$20 a day has been paid to miners; but before Mr. Tyrrell left there was a plan on foot, which he thinks may have been put into execution. execution, for paying laborers \$100 a month and their board of paying laborers \$100 board reduction for board. This would probably not be a real reduction for them ... them, though there may be some room for doubt as to how it would it would work out, for when employers make a profit at both and work out, for when employers of it. Mr. both ends the workmen generally get the worst of it. Mr. Tyrrell thinks that the change would cause new claims to he Eldorado and to be worked. So far, only two creeks, Eldorado and Bonan worked. Bonanza, have been worked to any great extent, though Hunker, Dominion and others are known to be rich, very tich, Mr. Tyrrell is reported as saying. The permanence of the ni of the placers must be understood in a practical, rather than about next and about the placers must be understood in a practical, rather than about the placers must be understood in a practical, rather than about the placers must be understood in a practical, rather than about the placers must be understood in a practical, rather than about the placers must be understood in a practical, rather than about the placers must be understood in a practical, rather than a placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a practical and the placers must be understood in a placer must b an absolute sense. The deposits are not inexhaustible, but the but they are probably extensive enough to last as long as this generated probably extensive enough to last as long as this generation and still leave work for its successor. And it may be gold-bearing rock was it may prove that the whole of the gold-bearing rock was not eroded or changed as Mr. Tyrrell thinks, but that some temains of temains of a mother lode may yet be found.

In a Public speech at Kingston on Tuesday, Sir Wilfrid Laurier expressed the hope, but he did not, so far it is not a guarded expressions, seem as it is possible to judge by his guarded expressions, seem be considered by his guarded expressions will to be confident that the International Commission will countries concerned. the difference between the two countries concerned.

He professional difference between the two countries concerned. He professed no certainty, for that was impossible. It bould be too much to say that he tried to prepare us for the seen fail foreseen failure; but till something is done, failure is posthat we are that should come he is right in counselling that we ought not to be discouraged. He goes further,

and says that, in such event, we shall not be. "The fate of this nation [he is fond of calling Canada a nation] is not," as he says, "dependent on the result." If the Commission failed in its objects, he points out, "we shall continue to be a nation, as we are at the present time." "We shall," he says, speaking of the British commissioners, "do everything that is possible to settle the differences that have come to pass between us, but we shall not, neither now nor at any time, make the least sacrifice of our national dignity.'

Captain Thayer, surveyor of the American Lloyds, is reported to have gone to British Columbia to appraise the Canadian sealing vessels there with a view to their possible purchase by the United States in connection with the proposed settlement of the question of capturing seals at sea. Captain Herbert Taylor, of Nova Scotia, is said to be the valuator for the Dominion. If we are to surrender our sealing rights at once it would be desirable that the compensation, apart from that due to the actual owners of vessels engaged in the business, should take the form of an equivalent for some concession to be made by the Americans. We do not want to sell any of our sea rights for money, nor at all unless for an acceptable equivalent.

In a public speech made at Sussex, N.B., Mr. Blair touched on the question of Government aid to the Crow's Nest Pass Railway. The late Government, he said, had agreed to give \$5,000 a mile for 330 miles and to loan the C.P.R. Company \$20,000 a mile. Speaking comparatively, Mr. Blair contends that what the present Government did caused a saving of \$5,000,000. But this conclusion is reached by assuming that the loan of \$20,000 a mile would not have been repaid. It is true, as Mr. Blair says, that such loans are not generally repaid, but the C.P.R. has been an exception, for of the \$30,000,000 it borrowed from the Government, \$20,000,000, or two-thirds was repaid in cash and the balance in land. Land is not money, and it is doubtful whether the land, which had been previously given, got back in lieu of money, will ever yield the amount at which it was estimated. But if we drop the comparative view of the question and look at the policy of the actual grant, in its naked form, what are we to think of such a use of the public treasure? Sir Wm. Van Horne, when the late Government had retired and before the present Government had decided upon its policy, had publicly declared that the company would build the road whether they got a subsidy or not. Would it not have been well to have allowed them to carry out their intention in their own way? It is true we got an abatement of fares on another part of the C.P.R.; but even so, was not \$3,250,000 a rather heavy sum to pay for this boon?

Will the lowering cloud that hangs over the Fashoda incident burst in war? This is for England and France the question of the hour. The little regard shown to French susceptibility, in England, has not, at this distance, the most prudent look. It is perhaps to be accounted for by the consciousness that a necessity exists to dispel the notion which some foreign nations may possibly entertain that, no matter what the provocation, England will not fight. But this fatal idea may be negatived without resorting to language that has a slightly hysterical air. To declare, as the Spectator did, that France must be bundled out of Fashoda was to throw oil on the fire. France, on the other hand, is, for once, comparatively calm. Beyond doubt the British nation is united in a firm resolve on this question; the Premier has carte blanche to do what he

deems best, so that he make no surrender of the rights of Egypt and England, which have now become inextricably interwoven in the region of the Nile. There is more than the Egyptian question at stake. France has for a long time been pursuing a policy of petty irritation against England in several quarters, notably in Newfoundland. She has certainly been acting with great unreason there, stretching her rights under treaty and minimizing those of Newfoundland. She has erected permanent lobster canning premises, where she is distinctly debarred from putting up anything beyond temporary sheds. For the sake of peace, England has made temporary concessions which the treaty rights of the two parties did not warrant. But such a policy, though it may be suffered to prevail exceptionally, cannot be endured forever. It has led to new and unreasonable demands on what is absurdly called the "French shore" of Newfoundland, a shore on which that nation has not a foot of land. The royal commission which is looking into this question is an indication that the time approaches when a national settlement must be made.

Until the returns of the plebiscite vote are officially published there will be doubt as to the exact majority on either side. If there were a small majority for prohibition, which now seems to be hardly possible, and the prohibitionists were to press for legislation, the attitude of the Opposition would weigh considerably in the scale. But the Opposition, any more than the party on which the Government leans, is not an unit on the question. While Mr. Foster continues his traditional attitude as a prohibitionist, Sir Charles Tupper is on the other side. To an interviewer the latter is reported to have said that the recent vote puts prohibition out of the question. There is a strong temptation for politicians to play with the question, as some of them have done in the past, from the fact stated by Sir Charles, that "most of the Protestant churches were almost wholly in favor of it." The fact that the leader of the Opposition has no faith in prohibition must, under any circumstances, count for something. He says that the only real attempt at prohibition in a self-governing province was made by New Brunswick, with the result that there was "free trade in drink." Sir Charles admits that he failed to get the Government pledged to action in case the vote should favor prohibition, so that Sir Wilfrid would be free to take his own course, even if there were a small majority in favor of prohibition. But as, on both sides, there are plenty of members who are politicians before anything else, we shall certainly hear in Parliament more about the Government's duty in the premises as seen by the critics.

The great activity in the navy yards of France, both at Toulon and Brest, may be intended to influence negotiations on the Fashoda affair. Opinions differ as to why Russia has sent a diplomatic agent to the French capital at this juncture. One French press view is that Russia desires to encourage France not to give way in the Fashoda business; another view, which is English, is that Russia wishes to warn France not to rush into war over this incident, expecting her support. The latest sign of the continued unanimity of British opinion is the outspoken declaration of Sir Michael Hicks Beach that France has no rights in Fashoda. He declines to believe that France, when she gets Major Marchand's report, will refuse to withdraw.

Two adverse decisions have been given on the intoxicating quality of what is known as temperance beer, one in Montreal and the other in Toronto. The Toronto

decision declares this beer not to be intoxicating, the Montreal decision says that it is intoxicating. Unless there was some difference in the strength of the two liquids the conflict of opinion is direct. The Montreal beer, which was of an alcoholic strength of 2 to 7 per cent. was certainly intoxicating. The remedy there is a license, here free and unrestricted sale is permitted. It is possible that, in view of this decision, the license law may undergo an amendment. The licensed sellers of liquor will object to the interference with their business; the teetotalers will object too. The drinking of small beer, considered by itself, is the least objectionable of all forms of drinking.

In the arbitration to determine the claim of the Canadian Pacific Railway Co. to a differential in their favor between San Francisco and eastern ports, the decision has been in the negative.

THE PEACE CONFERENCE AT PARIS.

That the peace commissioners, at Paris, would have a tussle over the Cuban debt was foreseen. To the proposal that the United States should pay the debt, and American negotiators gave an emphatic negative. United States, they said, would neither pay nor guarante any part of the deut. The Spanish commissioners the put in a plea that Spain was unable to pay and that if were left to deal with the debt alone she would be oblight to scale it down fifty or sixty per cent.; but that rather than do this she would prefer to surrender to the United States the whole of the Philippines. This may possible open the way to a solution of the difficulty which Cuban debt presents. Opinion in the United States been divided on the desirability of the Republic acquiring the whole of the Philippines; but the tendency in favor the acquisition is growing, though it has hardly reached that stage when it could need to that stage when it could produce a coercive effect on public men. As yet a choice is men. As yet a choice is open to the Washington authorized to the washingto ties to accept or decline the responsibility of the whole the Philippines. If the negotiations were prolonged would perhaps not be in their power to refuse what offered to their accentage. offered to their acceptance. The Senate may, on matter, possibly be a matter. matter, possibly be a manageable factor, but who guarantee that it would be guarantee that it would long remain so? The transfer the Philippines to the Transfer half the Philippines to the United States would probably afford the best guarantee for the afford the best guarantee for their good government. any other power were inclined to offer objections, necessities of Spain and the consent of the two countries most interested in the possession most interested in the peace under negotiation would probably prove decisive ably prove decisive. The influence of England might per relied upon to favor a softlement. relied upon to favor a settlement in this form if Spain the United States desire

The Paris correspondent of the London Times reports the American commission that the American commissioners at the Peace Conferent on Monday, refused, on behalf of their Government, accept the sovereignty of C accept the sovereignty of Cuba. If this be a final resolution what way is Cuba to be in what way is Cuba to be governed? The step now taken is in accordance with the is in accordance with the attitude of the United more before the war the Santa before the war; the Senate declaring, in so many worthat the Republic report that the Republic renounced the idea of seeking territorial advantages. But public according to the idea of seeking territorial advantages. advantages. But public opinion has outgrown this support the question and information of the question and informally decided that Cuba and become part of the United St. become part of the United States. If at present the bellum professions of the C bellum professions of the Senate stand in the way is lead realization of this idea have in the way is lead to the stand in the realization of this idea, how is the government of the abeliant to be carried on? It cannot be sent to be carried on? to be carried on? It cannot be abandoned to the retermination the necessity of exercising the necessity of exercis the necessity of exercising the power of a protectorate compel the United States to see compel the United States to see to it that the respectable inhabitants, on whom the inhabitants, on whom the rebels have hitherto

depredations under the misnomer of war, are permitted their fair share in the civil government. But if Spain with 150,000 troops in the island could not do this effectually, it may not be an easy task for the Suzerain. But be it easy or be it onerous, the duty will have to be performed. The statement received from Madrid is published in the Times that Dewey refusing to permit the rebel flag to float On their vessels, led to a naval contest, presumably in the harbor of Manila, in which the offending ships were cap-

BANKRUPTCY LEGISLATION IN THE UNITED STATES.

Our neighbors across the border line have succeeded in accomplishing what has vainly been attempted in this country for some years, viz.: the enactment of a national bankruptcy law. Canadians will watch with interest the Operation of this law, because its success or failure will have a bearing upon the movement to secure for the Dominion similar legislation. The new law is not all that was desired by business men out when the varying political and industrial conditions existing in the forty-five states of the union are taken into account it may be considered an exceedingly good compromise measure. By the act, with the exception of wage earners, those engaged chiefly in farming or tilling the soil, and corporations not engaged Principally in manufacturing, trading, printing, publishing or mercantile pursuits, all insolvent debtors owing debts to the amount of \$1,000 or more, may be adjudged involuntary bankrupts and an equitable division of their property compelled when, 1, the debtor has conveyed, transferred, concealed or removed, or permitted to be concealed or removed, any part of his property with intent to hinder, delay or defraud his creditor or any of them; or, 2, transferred while insolvent any portion of his property to one or thore of his creditors with intent to prefer such creditors Over his other creditors; or, 8, suffered or permitted while insolvent any creditor to obtain a preference through legal proceedings, and not having at least five days before a sale or final disposition of any property affected by such preference, vacated or discharged such preference; or, 4, made a general assignment for the benefit of his creditors; or, 5, admitted in writing, his inability to pay his debts and his willingness to be adjudged a bankrupt on that ground.

An attempt has been made to render the administration of estates under the act inexpensive. Creditors elect the trustees. The fees are moderate and payable after the estate has been wound up. Arbitration is encouraged and Vexatious appeals to the courts discountenanced. But the principal saving to business interests will be that lawyers all over the country will be unable to levy costs on those Whose trade extends beyond the bounds of a single state for the special knowledge such lawyers may possess of local laws.

RAILWAY RATES IN THE FAR WEST.

A conference by merchants with mill men or railway men or politicians, having for its object the removal of merchants' grievances, sometimes has a good effect even if the grievance be not at once removed. It tends to show both both sides of a case and to bring to the minds of merchants teasons why certain conditions complained of exist. An instauce of this appears in an interview between the president of dent of the Canadian Pacific Railway and a deputation of Victoria business men the other day. The deputation compale Complained of the railway's freight rates, and Sir William Van Horne is reported as having told them that transconti-

nental rates had of late years been tending steadily downward and for a time were at a ruinous figure, and that even at the last advance of 381 per cent. they were none too high. In addition to these facts, he said, the Canadian Pacific Company had been saddled with the cost of shipping from the terminus across to Victoria at an average cost per carload of \$80 (\$2 per ton) with a similar one for trans-shipment back to the Mainland. Then they have a permanent differential of \$15 per carload, or five cents a hundred, to Pacific coast points, and this made a difference of about \$45 on a carload from the East. Both water carriers and railway carriers like to get fat freight rates, and aim to earn profits; and they sometimes squeeze the producer or the merchant most arbitrarily and unwarrantably. But it is only fair to remember that carriers themselves sometimes labor under difficulties and disadvantages which, if they were known, would mitigate the apparent harshness of their rates or terms.

BANKING RETURN.

We give below a condensation of the figures of the statement of Canadian banks for the month of September, 1898. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, etc.:-

CANADIAN BANK STATEMENT.

A LARGE BANKING DEAL.

A bank amalgamation of quite unusual magnitude has just taken place in England. On or about October 6th the formal announcement was made in London of an amalgamation of the City Bank with the London and Midland Bank. We gather from the Economist that the name of the new concern is to be the London City and Midland. The paidup capital and the reserve fund of the new institution will together amount to nearly four and a-half millions sterling; its deposits to over thirty-one millions; and its advances to the public to over twenty one millions sterling. favorable points of the transaction are that each brings to the alliance a description of business which the other previously lacked. The City Bank had a large city and metropolitan business with a stock exchange connection and a foreign clientele; the Midland had a profitable connection in the provinces. As to the effect of the deal, the opinion seems to be that as far as can be seen the directors of the City Bank have made a very good bargain. events its shares have risen 20 per cent, since the news of the fusion became known. The financial position of the Lon. don and Midland Bank, says the Economist, "is stronger than that of the City. Its proportion of cash to total lia bilities is larger; a smaller proportion of its resources is lent out, and it has for years been paying a higher and more progressive dividend. . . . Constituting as it does a further step towards the gradual absorption by provincial or London and provincial banks of purely metropolitan institutions, this latest amalgamation is significant."

BUYING AND SELLING FOR CASH.

From time to time the efforts made by business men to place their sales on a cash basis have been noted with approval in our columns. While this form of doing business was exceedingly desirable ten years ago, it has become to-day essential to successful trade. The movement in favor of the cash system is even stronger in the United States than it is in Canada. Recently a rather prominent wholesale house in a large city of the Eastern States sent out catalogues with the following statement in a prominent position: "Our terms are positively thirty days net or 2 off for cash in ten days. We will not do business on any other basis, for we know that the retailer's success depends as much upon his buying as upon his selling, and that long-time buyers are at a disadvantage. We prefer to deal only with those retailers who sell successfully, because they buy successfully."

This statement of the case well represents the advantage of buying and selling for cash. Both seller and buyer have everything to gain by this system. Not a few retailers in Canada, however, have failed to appreciate the inevitable tendency of trade towards this end; it is tolerably evident that they will be brought to a knowledge of it only when the success of more wide-awake competitors announces their own downfall.

We were told this week of a motion brought before the Council of a large Canadian town, to secure the appointment of a commission of investigation as to the reason why trade had left the merchants of that place. It was not the competition of the neighboring towns of which complaint was made, but of the markets of the cities Throughout the country similar conditions exist. While there is a certain attraction to the city stores on account of the immense variety of goods which they are able to offer to the public, the real cause of their encroachment upon trade in the province we believe to be their general

adoption of the cash system. City merchants have always been supposed to have an advantage over their country competitors in the matter of style and variety of goods carried, but it was not until they adopted the plan of buying and selling on a cash basis that they made disastrous inroads upon the country trade. We would suggest that all merchants who complain of loss of trade should consider carefully whether it be not on account of the long credit which they have obtained from the wholesale trade and in their turn have given to the public. We do not pretend that the cash system is a cure for all trade ills and recognize that in some cases it is very difficult, if not impossible, to put it into practice, but we do believe that its adoption will give to the majority of traders an increase in profits.

FIRE INSURANCE EXPENSES.

The conclusion has been reached by fire underwriters in the United States that the expenses of the business should be reduced. In that country, where a loss ratio of 60 per cent. is looked upon as "inevitable," as the Insurance Age puts it, 15 per cent. commission is admitted to be all that the business should stand. Yet we find, upon taking the figures of twenty years for American companies reporting in New York, that where in 1879 the average commission paid was only a little more than 17 per cent. It has grown to more than 20 per cent. last year. And companies operating in Canada pay even more than this.

Collating the results of the business of a group of companies doing businesss in Canada for twenty years, we find that where their premiums grew from \$623,000 in 1875 to \$1,095,000 in 1885 and to \$1,940,000 in 1895, the expenses grew from an average of 24.44 per cent. in the first year of the comparison to 30.54 per cent. in the second and 33.09 in the latest-a growth of 8.65 per cent. in the period considered. Now without waiting to argue whether the smallest ratio here mentioned is sufficient for the necessary expenses of fire underwriting, let us consider how the maintenance of the expense ratio at this figure (24.44) would have affected these companies. Between the years 1875 and 1895 the surplus of \$196,000 which they jointly possessed in the first of these years was reduced to \$6.520 in 1885, while in the next decade this small surplus was converted into an impairment of \$160.000.

Suppose that the expense ratio of 1875 had been maintained instead of being swelled by one-third, this impairment might have been avoided and the surplus of the companies built up by hundreds of thousands of dollars. What share of this 33 per cent. for expenses is given as commission to brokers—a fungus peculiar to fire insurance underwriting—we do not exactly know, for the agency arrangements made by different companies vary greatly and are more or less private. Sometimes these agreements are fixed, sometimes contingent.

One of the interesting subjects which should have been discussed at the meeting of fire insurance company representatives held last month in Kingsville, Ont., is the rate of commission. We say this because the matter of expense is becoming a vital one with fire underwriters in Canada. It would be an unpalatable and perhaps a difficult move to abruptly put down commissions all round to existing representatives. But is it not feasible, instead of maintaining, say, fifty agents in a single county, representing twenty-five insurance companies, that there should be only twenty men—the business of two or three, or five companies being put into the hands of one agent, and his rate of commission reduced one-half or one third.

PROMISES NOT PERFORMED.

The modern building and loan associations which boast of an authorized capital of millions each, and which for several years past have been promising unheard-og profits to their shareholders, have not been favorites of THE MONETARY TIMES. Indeed this journal has often declared that these concerns could not do what they so boastfully promised, but were misleading their customers by agreeing to do impossible things. We have not hitherto had an opportunity of proving that their shares would not mature as promised, because the requisite time had not elapsed. But now, at last, the end of the 92 months required by one of them, the Dominion Building and Loan Association, has come, and our prediction is amply fulfilled. Instead of the \$1,000 which was to accumulate from the Payment of six dollars per month for 92 months, the sum accumulated was only \$650. Here is the story which we find in the Guelph Daily Herald of October 15th:

The daily sheets published by the Mercantile Agencies to-day report the issue of a writ against the Dominion Building and Loan Association of Toronto, now called the Dominion Permanent Loan Company, by Mr. H. Gummer, of this city, for \$950, the amount claimed by him to be due on ten shares of terminating stock issued by the Association on the 1st of August, 1890. The Dominion Building dispute, guaranteed to pay \$1,000 in eight years, viz., on the 1st August, 1898, but in November last, without the consent of Mr. Gummer, they undertook to cancel the shares and offered him \$658 in cate, according to what they called the book value. Mr. Gummer monthly payments thereon until the 1st August last, and now sues for the amount claimed to be due under the certificate, less the monthly payments refused by the Dominion Building and Loan Association.

We have seen the Toronto manager of the company

We have seen the Toronto manager of the company about the matter. His statement is that they have offered Mr. Gummer all that he is entitled to recover under the bylaws of the company.

Analysis of the report of a Michigan association of the same sort shows that its gross profit one year was \$1,654, but the rent, salary, law fees, insurance, taxes and other expenses of the concern amounted to \$910—or more than fifty-five cents for each dollar earned. Here is one reason why these concerns cannot mature their shares as they profess to do, namely, heavy expenses. One of them in Minneapolis, which went into the hands of a receiver, was found to have been paying \$31,000 to seven of its officers and directors. When the shares of this Detroit concern had been in force seven years and \$42 each had been paid on them, they were worth, "book value" we presume, Only \$58.94, instead of \$87.50; so that it would take ten years and a half to mature them if profits could be kept up. Four years ago (Monetary Times, 3rd August, 1894) We referred to the "heavy expense and great risk" at which the Dominion Loan Company was doing business some 2,000 miles away, and said: "it is impossible for the management to fulfil their promises to investors."

Investigation continues to be made into the circumstances of the fall of the pier and spans of the Cornwall railway bridge. A number of experts have been engaged for the purpose. For the Canadian Government, Mr. Douglas and Mr. Weller have made soundings and taken observations in the matter. Furthermore, Prof. Burr, of Columbia College, New York; C. C. Martin, superintendent of the Brooklyn bridge; G. W. McNulty, of New York, and several others are also investigating on behalf of the different companies interested in getting at the truth of lapsed pier being examined, but the character and condition of others. There is some prospect that the truth will become known, and that the blame will be placed on the right shoulders.

A BIG TRIO.

It will be interesting to many to follow the figures of a table, which we find in a contemporary, showing the distribution of the 2,805 millions of dollars of life assurance carried by the three largest life companies of the United States, the Equitable, the Mutual and the New York. Of this enormous total no less than 75.93 per cent. is written in the United States, while 27.07 per cent. is obtained in other quarters of the world. The proportions of home and foreign business vary with the different companies. For example only 15 per cent. of the Mutual's business is taken outside the United States, while in the case of the other two companies the proportions of foreign business are respectively 28 and 30 per cent.

A COMPARISON OF THE FOREIGN WITH THE HOME BUSINESS OF THE THREE LARGEST COMPANIES IN FORCE DEC. 31ST, 1897.

Country.	Equitable.	Mutual.	New York.
Canada	\$ 19,070,136	\$ 18,129,911	\$ 22,918,289
Europe	150,817,024	106,883,687	134,853,854
Asia	4,239,215		6,294,376
Africa	13,307,734	4,271,638	2,407,358
Australasia	20,180,600	6,752,564	8,902,059
South America	45,041,399	5,000	59,753,297
Central America	7,327,727		3,136,982
West Indies	9,231,798	139,073	5,358,919
Mexico	8,105,200	9,750,150	2,086,900
Other countries	3,131,626	1,109,552	1,752,831
Totals	\$280,512,285	\$147,047,581	\$248,064,871
United States	670,053,552	811,942,027	647,919,354

Grand total... \$951,105,837 \$958,990,208 \$895,904,225
Of the one-quarter or more of the total business done outside the States, the proportions written in Canada by the individual companies vary a good deal. For example, the Canadian business of the Equitable amounts to only 6.80 per cent. of the total foreign business of that company, while the New York does 9.24 per cent., and the Mutual 12.36 per cent. of its foreign business in Canada.

We have rearranged figures of this table the better to compare the business of the companies: Europe—

\$150,817,024 done by the Equitable. 106,883,687 done by the Mutual. 134,853,854 done by the New York.

\$392,554,565 equal to 13.9 per cent. of the whole.

United States-

\$670,653,552 done by the Equitable. 811,942,627 done by the Mutual. 647,919,354 done by the New York.

In other countries 4.30 per cent. of the whole.

MINING MATTERS IN NOVA SCOTIA.

The wealth of Nova Scotia in metals and minerals continues to be demonstrated. The Truro News, for instance, relates that the owners of the Jubilee Gold Mine, at Renfrew, a few days ago returned 131 ozs. of gold from ½ ton of ore—\$5,200, from one-half ton of quartz, a result almost unparalleled in

the history of gold mining. Copper ore has been found at Coxheath Mountain, within five miles of Sydney, in a great quantity. It is said that a representative of an English company recently visited the locality and the mine is likely to be opened at an early date. One thousand tons of the copper ore is to be shipped to Wales to be smelted as a test.

Those who recall the extent of the gold-mining activity of Nova Scotia twenty-five or thirty years ago and the results which were achieved by the methods then in vogue will agree with us that it is reasonably certain that more gold will be realized by the more modern methods. We learn from a Halifax paper that work has been resumed upon the old Annand mine at Montague, under the management of A. A. Hayward, the shaft pumped out being no less than 400 feet deep. This is the property that was sold some years ago to an English syndicate for \$125,000, and operated by a Mr. Thomas. They have put in a two-ton automatic skip, a ten drill Rand Air Compressor, a new hoisting engine, and have remodeled the pumping plant and increased the capacity of the mill to 15 stamps, in which they expect to crush from 600 to 700 tons a month. There is also a most complete modern hoisting and pumping plant and at the start employment was given to about 40 men. "In the old days this property was famed for its nuggets, but the present company are basing the paying capacity of the mine on the probable yield of low grade ore, and as the appliances now instituted assure the property's development at a particularly low cost, the prospects of success are most encouraging."

CHARTERED ACCOUNTANTS OF MONTREAL.

On Tuesday of last week was held in Montreal the annual general meeting of the Chartered Accountants' Association at the office of the secretary, No. 22 St. John street. The chair was occupied by the president, Mr. John Macdonald, and after transaction of routine business, the following officers were elected for the ensuing year:

President, Mr. A. F. Riddell; first vice-president, Mr. A. W. Stevenson; second vice-president, Mr. John Hyde; secretary-treasurer, Mr. John W. Ross; council, Messrs. A. Cinq-Mars, W. J. Common, J. G. Ross and George Hyde. A vote of thanks was tendered the retiring president, and also to the secretary-treasurer, Mr. Common.

THE SEASON'S NUT SUPPLY.

The autumn trade in grocery circles is fast developing into good sized proportions, the cold weather of the past few days reminding merchants that the new season is at hand. Considable attention is being paid to the primary nut markets and crop reports have been attentively discussed. Our Montreal market report has for some weeks past described the market for dried fruits and nuts. We now give an exhaustive review of the situation based on advices from a prominent New York house.

New crop Grenoble walnuts, it seems, remain at prohibitive prices. The market is influenced by the short crop, and even more by the tactics of the French speculators, who try to prevent producers selling except at enormous figures until they have unloaded their balance of old crop. The crop of Brazil nuts finally turns out a total of about 96,000 bags; shipments divided almost equally, half to New York, balance to Europe. Of the quantity received here we estimate that no more than 15,000 bags now remain in first hands. The demand in England has been good and prices having advanced are now decidedly above the figures ruling on this side of the Atlantic. Almonds are unusually interesting this season on account of the damage done to the crop by frosts during the early spring of this year. It appears that the French crop was nearly destroyed and is practically a total failure. The quantity imported from France into the United States in ordinary years is not very large, but the failure of the French crop has a considerable influence on the situation, as France will be obliged to import certain sorts for home consumption. "The crop in Tarragona was partially injured, and the crop there has resulted less than an average; in view of the moderate crop shipments of this growth to New York are larger than expected; we estimate that quantity afloat, to arrive within the next thirty days, is not less than 15,000 bags." Shelled are firmly held both in Sicily and Bari. "The large demand from Germany and the North of

Europe, which would ordinarily be partially supplied from France. must now fall," this house thinks, "entirely on these places. The crop of Valencia shelled is an average one, but out friends in Malaga write that demand is unusually active, as they have a demand from various parts that were formerly supplied by French goods."

WITH THE DRY GOODS TRADE.

Canadian trade in Irish linen circles is reported to be very satisfactory.

The tinge of frosty weather lately experienced has brightened up the demand for heavy fabrics.

Narrow ribbons will be largely employed for ornamental purposes in the shape of embroidered effects on taffetas, edgings for waist purposes and also on chiffon flounces.

Treasury Bureau of Statistics estimates that 85 per cent. of the silk goods now used in the United States is the product of American factories. American silks are likewise competing with the fabrics of the French looms in the world's markets.

From Bradford it is announced that coating costume cloths in mixture shades, which had a good reception last season on account of the unalterable and unspotable finish, have been bought more than ever for the next spring season, and that although the wool from which these goods are made has greatly advanced in price, only a very fractional advance is being, up to the present, demanded by the manufacturers.

Some good tweed orders have been booked, says The Draper's Record, by South of Scotland manufacturers, some of whom are very well employed, but generally speaking trade is not what it ought to be at this season. The outlook is considered promising, but those makers who have looms standing idle would like if the prospects would materialize into orders. It is expected that the further advance in the price of wool will help matters.

Fancy hosiery, which has been hitherto sold principally as a summer specialty, is coming into demand the whole year round. Some cheap lines which are on the market have so far dene well in the fall trade. Plaids, while not as popular as last season, are still selling, but fancy stripe effects, embroidered designs, show a steady increase in demand as the season advances. Lace effects and other open-work styles in high colors are called for, also neat embroidered effects in Richelieu and Rembrandt rib styles. Makers of fancy hosiery have made vast improvements, both in the weaving and finishing of these goods, in that the colors are absolutely fast, which has restored their popularity with consumers.

Canadian dry goods importers have begun their season's pilgrimage to Great Britain. The English mail of the 1st instances the following arrivals from the Dominion: Messrs. S. C. Mathews (Mathews, Towers & Co.), A. L. Savigny (P. Martin & Co.), Jas. Slessor (I. Johnston & Co.), J. Black (R. Linton & Co.), G. Moorehouse (Gault Bros. & Co.). and Messrs. D. Macnaughton and W. P. Seller, agents, all of Montreal; Messrs. R. E. Burns (Caulfield, Henderson & Burns). W. Hyslop (The Hyslop Co.), and J. W. Woods (Gordon, Macray & Co.), of Toronto; M. St. Pierre (Thibedeau Frees, Quebec), J. E. Bizzey (Knox, Morgan & Co., Hamilton), G. Rowat (Rowat, M'Mahon & Co., London, Ont.).

FOR GROCERS AND PROVISION DEALERS.

Waterloo merchants have adopted early closing—7 o'clock—for the autumn and winter, but they except Tuesdays and Saturdays.

The Canadian Government intends to place more whitefish fry in the Detroit River and Lakes St. Clair and Erie next year than ever before. Preparations are being made for a big sear son's work at the Sandwich hatchery.

An increase in the shipments of butter from Montreal is a feature of this week's dairy information. Exports to date this navigable season have reached 206,712 packages, which is some 12,000 packages in excess of those to the corresponding last year. The week's shipments, 19,195 packages, exceeded those of corresponding week, 1897, by some 3,000 packages.

Exports of cheese from Montreal for week ended 15th October were 89,663 boxes.

The French lobster packers on the Treaty Shore, says The St. John's, Nfld., Herald, have done an enormous business during the past season. At St. John's Island one Frenchman has packed and shipped 2,500 cases. Newfoundlanders who are fishing off the Treaty Shore have done very poorly. This is easily accounted for. The Frenchmen recognize no restrictions and can fish at every season, whilst the Newfoundlanders have to close down their factories during the close season. The language of the Treaty of Utrecht does not give the right to Frenchmen to build factories or pack lobsters on the Treaty Shore, but they do it just the same, and having no rules or regulations to fear they work in all seasons.

BOOKS RECEIVED.

Current History.—This convenient and welcome quarterly, edited by A. S. Johnson, Ph.D., and containing maps, portraits, and views, is only \$1.50 a year. Sample copies 25 cents, can be had from the New England Publishing Co., 3 Somerset street, Boston. This work differs from other reviews in adhering steadily to a uniform plan of arrangement convenient for reference purposes, in covering the entire history of the world in each number, and in confining itself to an intelligent historic presentation of facts. As an exhaustive history of the period from 1890 up to date, we know of no other work published that compares with it.

Dominion Conveyancer.—Some time ago we saw a contract for the sale of goods amounting in value to about \$10,000 that had been drawn up on the back of an envelope. As the delivery of the goods was to be extended over a considerable period of time, it may be gathered that the form of the contract was by no means an immaterial matter. Although few merchants would be guilty of an act of this kind of carelessness, Yet there is very often great negligence on the part of merchants in having their business agreements executed in the proper form. The Dominion Conveyancer, edited by W. H. Hunter, B.A., and recently published by the Carswell Company, Toronto, will be found of great assistance in this connection. Not only does it contain the forms required in conveyancing, but all of the contracts and agreements which business men are likely to enter into. There are, for instance, forms in connection with Power of Attorney. Building Contracts, Composition with Creditors. Agreements of Sale on Commission, Assignments of Debt, Sale of Good-Will of Business. Hire Receipts Partnership Agreements, Patents and many other matters of like nature. The book is sold in half calf at \$4.

ANSWERS TO ENQUIRIES.

CITY AGENT, Ottawa.—There is such a book as you appear to require, advertised by the Argus Publishing Co., 161 La Salle street, Chicago. It is entitled "The Electrical Fire Hazard; How to judge it, and What to do." Price, 50 cents.

BANK CLERK asks whether it is correct to say, the bank "is or does so-and-so;" or whether it is not better to say as he has been taught to say, the bank "were not agreed on the matter;" making the word plural instead of singular. In reply we remark, that a very full discussion of the subject is to be found in Gilbart's work on Banking, pages 224 to 227 of the edition of Bell & Sons, 1882. Gilbart says: "When we notice the rules or habitual acts of a bank, the word belongs to the singular—as, 'The Provincial Bank allows interest at the rate of 2 per cent.;' the bank draws bills upon London at 21 days after date.' But when any operation or feeling of the mind is ascribed to a bank, the verbs and pronouns are placed in the plural—as: 'The bank were anxious to meet the wishes of the public;' 'the bank have concurred in the measure proposed.'"

INDUSTRIAL NOTES.

The works of the Robb Engineering Company at Amherst, Nova Scotia, are pretty well full of orders at the present time. For example, in September, the Maritime Sulphite Fibre Co. of Chatham, N. B., ordered a 500 h.p. engine from them to replace one of 250 h.p., and to provide for contemplated en-

largements of the plant. It is expected that the new engine will effect a large saving in fuel over the type formerly used. We learn further that the McLaughlin Carriage Co., of Oshawa, have ordered a 100 h.p. Robb-Armstrong engine from the Robb Engineering Co., and that the same manufacturing concern will furnish to Frug Bros. & Co., furniture makers at Chesley, Ont., an 80 h.p. boiler and engine. There must be an advantage in using these engines, or people would not go so far away to get them.

The manufacturing industries of Stratford appear to be in a generally prosperous condition. Dufton & Sons, woolen manufacturers at that point, have all they can do, and so have most of the others of whom we have heard. A shoe manufacturing industry, called the Stratford Shoe Company, make Misses' and children's shoes and slippers their specialty. They have all the latest machinery and are very full of orders. Alfred Mowat, of the old established banking firm of W. Mowat & Son, is the business manager, and James Gow has charge of the manufacturing department.

INSURANCE MATTERS.

The item of last week under the heading Fire Insurance, respecting the Northern Assurance Company leaving the Western Union Association, had no reference to the Northern Life Assurance Company of Canada, as some have erroneously supposed.

The British-American Insurance Company, of New York, was last week added to the long list of strong companies represented in Philadelphia, says the United States Review. "While the British-American has nominally but a small surplus, it is the protege of the two strong Canadian companies, the British-America and the Western, of Toronto, thus securing an unquestioned financial prestige."

The contract for erection of the Sun Life Assurance Company's block in Sherbrooke, Que., has been awarded to a local firm, who have a gang of men already at work and hope to get the roof on before snow comes. The building will be of green Chicoutimi sandstone, and when completed is expected to be among the finest in the neighborhood. Polished marble is to be used for inside fitting, and the building will be a modern one in every sense.

In the matter of the Bank of Toronto against the Keystone Fire Insurance Company, known as the John Eaton case, judgment has been given in favor of the bank. It will be remembered that the other companies on the risk subject to the jurisdiction of this Ontario Court—except the Aetna and the Commercial Union, which had paid the loss—agreed to regard the suit against the Keystone as a test suit. We have not heard whether they have any intention of appealing.

A Chicago journal states that Messrs. Reilly & Sherman, who made a big record as agents for the Equitable Life Assurance Society, have just closed a contract with the Travelers' Insurance Company, to represent the life department of that sturdy office, as New York managers. This is a ten-pin hit for the Travelers', as both members of the above firm are large producers; Mr. E. A. Reilly for many months leading all the agents of the Equitable in the amount of individual business obtained, and a brother of his is working for the Provident Savings Life Company.

The autumn meeting of the Actuarial Society of America was held at Worcester, Mass., Oct. 6 and 7. New papers were presented by A. A. Welch, "Individual versus Communism in the Conduct of a Life Insurance Company;" by D. P. Fackler, on "An Equitable Method of Determining Paid-up or Cash Surrender Values;" by Emory McClintock, on "General Principles;" G. L. Plumley, "Formula of Contribution to Surplus;" S. S. Hall, "Bond Value Tables." Messrs. Thomas G. Ackland, Arthur F. Burridge, Henry Cockburn, David Deuchar, well-known British actuaries, and half a dozen other qualified gentlemen, were elected to full membership by unanimous consent.

The Ocean Accident Company has offered the members of the Institute of Journalists, says the London Review, to insure the members of certain societies against accident risks upon a certain fixed payment per hundred of its members, the insurance being in force in favor of any member so long as his payments to the society are complete, at a rate averaging ninepence per annum; the assurance being in the sum of £500 against death resulting from accident while traveling by land or sea, in almost every form of vehicle or vessel in common use; with corresponding allowances in case of serious injury involving complete, partial, or temporary disablement.

-The Grand Jury for the county of York visited thirteen institutions in Toronto, of the nature of prisons, asylums, hospitals and reformatories, and their report as to the condition of these is generally favorable. Their presentment makes a protest, however, and very properly, against keeping lunatics in prisons. In Toronto gaol, it appears, out of 150 persons 16 are lunatics. The population of the Central Prison is 385, and of these more than 60 per cent. are under 30 years of age. The jury recommend strongly the adoption of indeterminate sentences, a system which has been attended with good results in other countries. Among the other practical recommendations made in this presentment we observe one of immediate importance with respect to the Mercer Reformatory. Here, it is stated, the fire hose attached to the stand-pipes on the different flats is in bad condition; "it is full of holes, so that in case of emergency it would be worse than useless." More complete appliances for coping with fire are also stated to be needed at Toronto Asylum for Insane. In the Mimico Industrial School it is recommended that an electric lighting plant should be placed, the system of lighting now pursued there being "not only crude but dangerous." And the reference to the need of mere copious use of soap and water is significant.

—A company is projected having for its object the opening of establishments in England for disposing of Canadian field, dairy and fishery produce, both at wholesale and retail. To keep such products in cold storage, not only in England, but all the summer voyage through. To handle it to best advantage and dispose of it to army and navy contractors, hotels, cooperative stores and the like. There should be ample room for such a concern, and we should like to see it succeed. The people who are advertised as connected with it in Canada are respectable people, mostly connected with the fruit or provision trade, the general manager of the Canadian Produce Corporation, Limited, Major Clark, upon whom so much of the company's success will depend is, we are told on good authority, a competent person for the place.

—The authorities of the Lindsay Collegiate Institute have, it is plain, taken a broader view of functions of the Institute than generally prevails. This is proved by the generous effort it has made to interest its community in music, literature and economics. Givers of concerts and lecturers on music have been succeeded by university professors, who delivered papers on poetry, travel, agriculture, etc. The course of lectures for this autumn and winter is an attractive one. For example, the Solicitor-General of Canada will lecture on "Our Commercial Treaties," next month. In December, the Hon. George E. Foster will speak on "The Canadian Outlook. Mr. B. E. Walker, the general manager of the Bank of Commerce, is to give the January lecture, subject, "National Finance." Truly Lindsay is favored.

—In our report of the meeting of the Bank of British North America, on page 516 of last week's issue, the chairman was made to state that the bank had entered into an amicable arrangement with the Bank of British Columbia, with the result that the Bank of British North America "had closed its branch in London, the other having closed its office at Kaslo, and left the B.N.A. the business in the last-named place." The word London is a misprint for Sandon, from which town in British Celumbia the Bank of B.N.A. retires, the Bank of B.C. retiring from Kaslo, B.C. in favor of the other.

—The merchants of the thriving little town of Blenheim, Ontario, have organized a Board of Trade. The following officers were elected: Geo. Thompson, president; Mayor Senior, vice-president; A. W. Bell, secretary-treasurer; an advisory board consisting of Messrs. Bounsell, Holland, Rutherford, Samson and Haggart was appointed.

—The lumber trade for the past season has been unsatisfactory in the Maritime Provinces generally. In New Brunswick complaints of disappointing American markets come from St. John, and it is stated that a large quantity of American logs, cut up on the upper St. John, will be carried over, owing to the dullness in the States. Nearly all lumber now loading at St. John in large vessels is for South America, and most of the cut of mills from this out will be for that market. On the Miramichi, on the other hand, less lumber will be held over this year than for some seasons past. It is the opinion of millowners at St. John that the next winter's lumber cut on that river will not exceed seventy-five million feet. Contracts so far let for cutting are a good deal short of last year's.

—Well-wishers of the Intercolonial Railway will hope that satisfaction and increased business will result from the changes and rearrangements among officials of the road which have recently been made. We hear that the position of general superintendent has been created, the office to be filled by Mr. Jas. E. Price, whose headquarters will naturally be at Moncton. The position of district superintendent, vacated by Mr. Price, will be taken, it is understood, by Mr. G. M. Jarvis, with headquarters at Truro, Nova Scotia, Mr. W. H. Olive receives the appointment of traveling freight agent, with headquarters at Montreal, and Mr. W. Robinson comes from the east to take the position of Western traveling freight agent.

—Canadian as well as other manufacturers have learned how strcng and lasting has been the prejudice among the Chinese against the admission of foreigners to that land. But it seems not impossible that it may be broken down. Even the writer of that remarkable book, "The Yellow Danger" (who has seen the author of "The Final War" and gone one better as an alarmist), will be surprised to hear that American electrical machinery is to be introduced in China. The Westinghouse Electric Company has received a contract for the equipment of a newly erected woolen mill at Tien-tsin. The Chinese government has contracted with Pennsylvania manufacturers for all the machinery to be used in the mill.

—The meeting of the Canadian Bankers' Association will take place in the Ontario Legislative buildings, Toronto, on Wednesday next, and will probably last during the two following days. Mr. D. R. Wilkie, general manager of the Imperial Bank, president of the body, will occupy the chair. Much speculation is being indulged in as to whether the president for the ensuing year will be a Montreal man or a man from Ontario. On Thursday evening, 27th instant, the banks having their head-quarters in Toronto will tender a banquet to the members of the the association in the Pavilion. Between three and four hundred persons are expected to be present.

—It is the intention of the Bank of Toronto to establish a branch of the bank in Rossland, B.C. This is probably one result of the recent visit of the general manager, Mr. Coulson, to the Kootenay country. It is understood that premises will be found for the branch on the corner of Columbia avenue and Lincoln street.

—Mr. J. O. Buchanan has resigned the managership of the Toronto branch of the Union Bank of Canada, and Mr. Frank W. Strathy has been appointed acting manager of that branch.

—The Bank of Montreal has declared the usual semi-annual dividend of 5 per cent. This is payable on and after December 1.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, Oct. 20th, 1898, compared with those of the previous week

Fire Insurance Done in Canada in 1897.

From the Report of the Superintendent of Insurance.

The annexed table gives the gross amount of risks taken by the several companies during the year, and the premiums charged thereon, and also the distribution of losses, with the proportionate rate of premiums to risks, and the proportion of the amounts paid for losses to those received for premiums during the year. For convenience of comparison the rates of 1896 are appended. It must be noted that the premiums in the second column are those charged on the whole gross amount of risks taken by each company during the year.

FIRE INSURANCE DONE IN CANADA IN 1897.

	Gross Amount of Risks taken during the year.	Premiums charged thereon.	Rate of Premium charged per cent. of Risks taken.	The same for 1896.	Net cash paid during the Year for Losses.	Net cash received during the Year for Premiums.	Rate of Losses paid per cent. of Pre- miums received.	The same for 1896.

AN INSURED LIFE AND A DANGEROUS OPERATION.

The very latest thing in life insurance has just come to light. A young man, resident here, who has his life insured for a considerable amount, is about to undergo an operation for appendicitis, as soon as he is physically able to stand it. The local agent of the company in which he is insured heard of the fact, and he took some very novel steps. He dropped a note to his insured man to call at his office at a certain time. When the young office at a certain time. When the young man called, he found the agent and the examining surgeon of the company, who proceeded to look him over. The doctor gave it as his opinion that there was no need of an operation for appendicitis, saying that the absorption method would do the work just as well. The agent hinted The agent hinted that if the doctor's advice was not followed, there was danger of the policy being cancelled. The father of the young man informed the agent that his family physician, and an eminent surgeon, who had been consulted, had decided that an operation was necessary. He added that when he had lost confidence in them, he would call in somebody else, perhaps me insurance company's doctor, and perhaps another one. In the meantime he did not want any interference with his and the control of the perhaps and the perhaps and the perhaps are perhaps and perhaps and perhaps and perhaps are perhaps and perhaps are perhaps and perhaps are perhaps and perhaps and perhaps are perhaps are perhaps and perhaps are perhaps his family doctor's prerogatives. The main facts of the above adventure have leaked out quite generally, and are mak-ing a great deal of talk amongst the insurance men and the insured as well. Opinions are divided as to the outcome of Opinions are divided as to the outcome of the matter. Some agents were of the opinion that a permit for the operation from the life company was necessary, others contend that if the operation is performed in good faith, and by reputable surgeons, the company will have to pay if the patient died.—Portland, Me., Argus.

ANTICIPATED ADVICE.

Advice in abundance has been tendered to the Quebec Commissioners since their labors began. A unique, but distinctly happy suggestion was that of the correspondent, who, the other day, commended the following lines, from Cowper's "Charity," to the attention of the delegates: Again, the hand of commerce was

designed

To associate all the branches of mankind:

And if a boundless plenty be the robe rade is the golden girdle of the globe. Wise to promote, whatever he means, God opens fruitful nature's various scenes; Each climate needs what other climes produce,

And offers something to the general use. N) land but listens to the common call, And in return receives supply from all. This genial intercourse and mutual aid Cheers whatever else a universal shade, Calls nature from her ivy-mantled den, And softens human rock-work into men

-Canadian Gazette, London, Eng.

BUYING AND OVERBUYING.

It has been truly said that ours is a nation of great producers and great consumers. We make no mistake when we declare that it is a nation of gigantic enterprise. Manufacturing merchandise of every description, and in great abundance as we do, no one need suffer because of lack of supply. As buyers we can get more than we need, with a little additional thrown in gratuitously. Big houses and little houses, in com-petition with each other for trade, fling out almost innumerable inducements to the retail merchant in matters of price, style, quality and finish, and even tempt him with extra datings and discounts. Occasionally rebates are offered. Able and persistent salesmen are sent out, Occasionally rebates are offered. whose persuasive powers are so great that

the retail merchant must possess unusual strength of mind to avoid falling a victim to their allurements.

Everything is made extremely pleasant for the buyer. Accordingly, it

tremely easy to overbuy.

The successful buyer is one who is conversant with his business, and who is likewise a man of resolute character. He is one who keeps close tab on his stock, and who can tell you in a moment just what amount of stock he has on hand of every grade. He is one who studies his trade and the requirements of his customers. As a result, he knows what novelties he can sell, and to what extent. He is always wide-awake and well-informed on what is being offered in the market. Does he read? Yes. He caremarket. Does he read? Yes. He carefully scans every trade journal that is issued, touching the line of goods that he buys, and thereby he attains new ideas and very frequently secures most valuable

More failures can be attributed to overbuying than to any other one cause, with perhaps the exception of incompetency and lack of capital. Overbuying is to be avoided only by close application, constant vigilance and all-round information. To disregard possible overstocking is to invite embarrassment. The judicious purchasing of goods, in quantity, as well as in kind, is one of the cornerstones of success.—San Francisco Grocer.

LONDON WOOL SALES.

The September-October series of the London wool auction sales closed on the 7th inst., with the usual number of buyers in attendance. During the series, 217,000 bales were offered, of which 17,000 were During the series, 217,000 withdrawn, and 11,000 not offered, and carried over. The home trade purchased 127,000, and the Continental buyers 77,-000 bales. At the opening of the series merinos sold generally 5 per cent. dearer and crossbreds unchanged. Soon after the opening of the series, medium fine the opening of the series, medium nne merinos hardened to 7½d., and occasionally sold at 10 per cent. higher, under spirited home buying. A week ago their demand slackened, and prices became easier, but during the last two days became former and closed to 7½ per cent. came firmer, and closed 5 to 7½ per cent. above July's closing figures. Superior above July's closing figures. Superior parcels, suitable for America, and inferior faulty, showed little change. The supply of crossbreds, which was heavy, together with a slower consumption, owing to the change of fashion, materially affected values, except for fine grades, which were 5 per cent. above the July sale, and closing firm. Medium coarse stock dropped 5 to 10 per cent., while a small supply of Cape of Good Hope and Natal advanced 5 to 10 per cent., the latter super snow whites, excepting heavy greasy, which sold at unchanged rates. The list for the sold at unchanged rates. The list for next series will close November 21st.

A MINING DECISION OF IMPORTANCE.

The decision of Chief Justice McCall, in the case of Free Coinage Co., Limited, against Charles Simpson, and F. P. Sherwood, finds in favor of the defendants with costs. The evidence went to show that the plaintiffs located the Gold Cure [mine] on the creek, B.C., on recorded August 12th, 1895, and recorded August 23rd. The following year an order-in-council was made extending the time in which assessment work should be done, and recorded, 60 days in certain cases. Plaintiffs applied to the Gold Commissioner for such extension, and it was granted. However, they finished the work within the year, but did not record until August 26th, three days after the expiration of one year, relying upon the extension of time. On the 9th of October, Charles Simpson, knowing nothing of the Gold Cure, and seeing no stakes, located the Bismark

lapping the Gold Cure. The following year F. P. Sherwood became an innocent purchaser of the Bismark, which he has since developed into a valuable mine. He made application for a Crown grant, was adversed, and the case came up for trial last June.

There was little or no evidence taken, the case being purely one of law. The defendants set up the claim that the order-in-council, giving a gold commissioner power to extend the time beyond one year, in which assessment work shall be done, under Mineral Act, 1896, was ultra vires. There were other points, but all minor. The Court sustained the defendants, and held that section 161 of the Mineral Act, 1896, does not confer power upon the Lieutenant-Governor-in-council to make an order extending beyond one year the time in which assessment work shall be done as required by the Act. The decision is a most important one, and will have wide effect from the fact that under the order-in-council, 1896, many extensions of time were made, and all such claims are made invalid.—B.C. Mining

THE STATUS OF A MARRIED WOMAN.

The tenacity of legal ideas, says the London Law Journal, rooted, of course, in custom or in force of habit, is a very remarkable phenomenon, and it is nowhere more strikingly illustrated than in the status of the married women. The plausible theory of her subjection in law is, or was, that given by Bacon, viz., that the law allows of but one will between them, and places that in the husband, as the fittest and ablest to provide for and govern the family; the popular and practical counterpart of this theory being that expressed by Petruchio, in "The Taming of the Shrew." The whirliging of time has brought about its revenges—a complete reversal of the old order—independence in exchange of subjection, the status of a femme sole instead of that of a matrimonial chattel; and yet, though all the outworks of the time-honored unity doctrine have been captured, though it is now dismantled and in ruins, a remnant of the fortress still holds out, sufficient to afford protection to the married woman against personal liability, as distinguished from property liability, to shield her in par-ticular from bankruptcy. The lady heroine of a recent case married, and when a bankruptcy petition came on for hearing said: "Now, you can't make me hearing said: "Now, you can't make me a bankrupt." and the Court of Appeals was fain to admit that it could not. The only circumstances in which a married woman can be made a bankrupt are when she is carrying on business separately from her husband, within the Married Woman's Property Act, 1882. Even then feminine artifice is not at a loss, for has not the married woman trader been known to drop her business on the eve of bankruptcy, and defeat her chagrined creditors?

GROUND FLAT.

A young man from a country village when sightseeing in Edinburgh was greatly astonished on seeing "Mr. Smith, Tailor (ground flat)," inscribed on a door, and after a careful study of the plate he exclaimed:

"Great Scott! Sic a death! Shairly he's been run ower wi' a steam roller!"

-Mr. C. N. Bell, secretary of the Winnipeg grain exchange, has received a sample of wheat from Armstrong B.C., which weighs 65½ pounds per bushel, and presents a yield of 27 bushels to the acre. It has every appearance of being first-class No. 1, red fyfe, and was grown from seed obtained near Indian Head last spring.

HOW THE TRADE JOURNAL HELPS.

Consider the advantage of reaching the man you want when he is particularly disin your favor.

Nothing is so bad as approaching a

man at the wrong time.

When a man is reading his trade journal he is interested in his business. His mind is turned toward you. When he finds your ad, between the pages of the trad trade journal, it fits in with his thoughts about his business. If you sell anything he can use, this is the time to talk to him about about it. He will meet you half way. Everything he has been reading in his trade journal has been leading him up to this point. In no other way will your adbes so sure to strike him at just the right

 Y_{ou} can know what he is thinking about when he is reading his trade journal. You can know that he is thinking about something that will make him more or less predisposed toward what you have to say. If your advertisement were anywhere else than in the pages of the "Trade Journal," he would be than in the pages of the "Trade Journal," This is the best time to strike. he would not see it at this time, and you would lose part of the interest that the journal has prepared for you.

Trade journal space is naturally valuable space. It only needs proper treatment to yield proper returns. It is read only to yield proper returns. only by men who are interested in what you have to sell. These men will see your ad at a time when they are thinking about their business. If there is any use in their business. It there is any use in their business for your business, you have the golden opportunity—it is for you of seize it.—Charles Austin Bates' Criticism.

GOOD FAITH KEPT IN RESTORING WAGES.

Canadians may remember the cut made in salaries of employees a few years ago the Canadian Pacific Railway, when the receipts of the road declined to such degree that something unusual had to be done thought at the time that the reduction of pay was unwarranted, some said heartless; but the situation was unusual, and unusual means had to be taken to meet it. The it. The salaries were restored, however, when times improved. We hear of another case, in which it was deemed of the C.P.R., described above. The United States of two ago reduced United States, a year or two ago reduced salaries and wages of its employees.

It was the understanding with the em-ployees of the company at the time their salaries salaries and wages were reduced, that the same should be restored when the business of the company warranted it. The reductions were to the extent of twenty per cent. on salaries in excess of \$4,000, and wares and ten per cent. on all salaries and wages less than that amount. Partial restoration reductions and the extent of half the reductions, and assurances given that the remainder will be restored on New Year's Day. 1899. No more welcome gift at the beginning of the year can be given than the restoration of pay agreed upon as

a friend the principles of Socialism, reshared equally. "If you had two horses," "aid the friend "would you give me one?" shared equally. "If you had two horses," said the friend, "would you give me one?" "Of course," replied the Socialist. "And same?" "Of course I should." "Well, supposing now," said the friend, slowly, "you had two pigs would you give me you had two pigs would you give me you had two pigs, would you give me one of them?" "Eh! that's gettin' ower knaws I've got two pigs." Which story a parable.

LOSS ON GRAIN ELEVATOR FIRES.

More than four millions of dollars have been lost by the destruction of grain elevators by fires in Chicago alone 1890, says the Insurance Post, and that the loss on elevators and grain stored therein in other cities in the United States since that date foots up the enormous total of nearly \$15,000,000. The larg losses occurred in the following cities:

Chicago \$4,300,000 Louis 1,569,000 Buffalo 1,210,000 Toledo 1,030,000 900,000 Indianapolis 338,000 Portland, Ore. 325,000 Peoria, Ill. 250,000

AN UNPARALLELED GROWTH.

To grow in thirty years from a capital a hundred thousand in 1867 to \$36,-000,000, in 1896, is an enlargement of an industry hardly possible anywhere but in the United States. The examination by Col. Polk into the finances of the Pullman Car Company shows, says a San Francisco despatch of 5th October, that the capital stock of the company is estimated at \$36,000,000. The statement for the fiscal year ending July 31st, 1898, is as follows:

Gross earnings, \$8,974,881.21; operating expenses, \$3.511,868.62; net receipts from operating, \$5,463,019.59. Other expenses figure up \$812,169.15, making the net earnings \$4,650,500.44, or nearly 13 per cent. on its present capital stock.

A dividend of 8 per cent. was paid, which in the aggregate amounted to \$2,880,000, leaving a surplus of \$1,770,-850,44. The income from the surplus account of July 31st amounted to \$25,-247,648.34.

When it is considered, adds the despatch, that the company started with an original capitalization in 1867 of \$100, 000, the enormous and unnatural profits of the company will readily be seen.

MANITOBA FISHERIES.

E. L. Le Clair, of the Baltimore Packing Company, is authority for the following statements: "In Lake Winnipeg this season 2,000,000 round white fish have been caught and frozen for the market. In fishing parlance "round" means fish that have not been drawn. In addition 3,000,000 dressed fish have been caught in Lake Winnipeg, and frozen at Selkirk. That makes a total of 5,000,000 for Lake Winnipeg. The Lake of the Woods fisheries have yielded better for the same number of nets than for four years past. The sturgeon catch was very gratifying. The fish market will be over-supplied, as it never was before. Fish will be about 40 per cent. cheaper this winter than usual. Meat will also decrease in price.

This seems a large number of fish, but it is not too many for the size of the lake, as the catch on Lake Erie has been much larger for many years, and Lake Winnipeg is as large as Lake Erie.—Commercial.

-The New Zealand Assembly has recently passed an Old Age Pension Bill, which applies to all persons over sixty-five years old. The pension amounts to but \$90 per year, or about \$1.75 per week, and no one who has an income over \$5 \$2.700 will be entitled to it. Twenty years' residence in the colony, and ten years' exemplary conduct, are among the other qualifications; the vagrant and the drunkard being thus shut off.

- -One Somerville young man, who was married a year ago, has sold his bicycle now, and can be seen on the streets almost any sunny afternoon pushing around a horseless carriage.—Somerville pushing Iournal.
- -A twelve stall round-house, machine and car repair shops, storehouse, black-smith shop, coal trucks, ash pits and turn-tables, are being built for the Canadian Pacific Railway at Calgary. The work will be finished early in the new year. The cost will be \$75,000.
- —Whatever may be the failings of the members of the Salvation Army, no one can accuse the headquarters staff of being deficient in humor. The penchant of the society for posting quotations from Scripture everywhere, has shown itself in the telephone boxes, where, with great aptitude, the words quoted are: "Ye aptitude, the words quoted have need of patience." (H. 3.)—Yorkshire Post. (Hebrews, x.,
- —Jamaica, it is said, has the largest fruit plantations in the world, of which 28,000 acres are owned by an American company, and the other 16,000 acres are held under lease by the same company, making the total acreage owned and operated by them, 44,000. This company owns and employs in the fruit business twelve steamers, and last year shipped to America and elsewhere.
- -E. S. Cox, of Toronto, was in Winnipeg this week on his way to the coast. He stated that the contracts for the erection of the Manitoba Trusts Co.'s new block in Winnipeg, were nearly all let, and work on the structure would start next April. The site is on the Northeast corner of Notre-Dame street East and Main, and the estimated cost is over \$40,000.
- -An order-in-council has been passed providing that the minister of the interior may grant locations for the mining of copper in the Yukon district; each location to consist of an area not exceeding one hundred and sixty acres in a square block. Not more than one area is to be granted to any one person within a district of ten miles. There is to be paid to the Government on the gross output of copper, a royalty to be fixed by the minister, not exceeding five per cent.
- -Bismarck was not an angel, he was. in fact, a very selfish politician; for he declared that "self interest alone must guide Germany in her arrangements with France," after the latter lay crushed and France," after the latter lay crushed and bleeding from the Franco-German war. No, he was no altruist, far from it; for did he not instruct his biographer, Dr. Moritz Busch, to write for the National Zeitung: "The kindlier affections have as little place in the calculations of politics as they have in those of trade." How do our merchants like the category into which he puts them? Is it really true, as our clergymen sometimes tell us, that a devoted business man is apt to be a poor specimen of a Christian?
- The Lord Mayor's fund for the relief of the sufferers from the hurricane at West Indies grows steadily, if not as rapidly as might have been wished. The ties, political, commercial and social, binding Canada to the West Indies, are such as to ensure in Canada, and among friends of Canada here, a sympathy with the West Indies in their present distress; but the devastation has been so serious that, as it seems to us, the restoration work to be done has been quite inadequately appreciated here, as well as in Canada. Among the friends of Canada in this country who have come forward with help are Lord Mount-Stephen, £100; the Halifax and Bermuda and Dioc; the Halitax and Bermuda and Direct West Indies Cable Companies, £50; and Mr. Thomas Skinner, £10 10s. One very practical method of Canadian help would be to send across some cargoes of lumber for rebuilding purposes. -London Gazette.

A FORTUNATE FARMER.

As a rule the prevailing opinion is that the farmers lose very heavily at the different elevators to which they deliver, by being docked. A case has been brought to our notice, however, which tells a different story. A farmer had his threshing ticket for 621 bushels of wheat, and 35 bushels of oats. He delivered the wheat and oats in ten loads to different elevators in town, and when he totalled up his tickets found he had 661 bushels of wheat and 45 bushels of oats to his credit.—Carberry Express.

TELEGRAPH TO DAWSON.

If Klondyke had been in United States territory, there would have been a tele-graph line from Seattle before now, Canadians and Britishers are less less nervous, than Americans. However, Mr. James Roche, a British M.P., well-known in Vancouver, who is at present in Canada, expresses the opinion that by the 1st of January, a land telegraph line will be built between Dawson and Skagway, and as soon as possible afterwards, the latter place will be connected by cable with Vancouver. Mr. Roche represents whom is Sir John Pender, of cable fame, who have acquired the charter granted by the Dominion Parliament last session to a company to build this line from the coast to Dawson, by way of the Yukon, and its affluents. The plan is to construct a double land line from Skagway Tagish and Fort Selkirk to the Klondyke, following the present Mounted Police route, so that the police posts may be used as telegraph stations. Work is to be commenced immediately, and, as already stated, it is expected that telegraphic communication will be established between Skagway and Dawson by next New Year's Day.—Vancouver News-Ad-

A NEW CHARTER FOR MONTREAL.

committee of the Montreal City Council is considering a draft of a new charter for that city. The draft proposes charter for that city. The draft proposes no very radical changes, though it is pos-sible that the charter will contain such before it becomes law. For instance, there is an agitation on foot for the introduction of the "cabinet system," which would mean that the city would be governed as the Dominion is, by a set of aldermanic ministers, directly responsible to the Council. This would take the or-dinary alderman out of the executive branch of the city's government, making the Council a legislative body only. civic ministers would then administer their departments—roads, finance, light, water, police, fire and the like-and the policy of the city's management would be decided upon in cabinet council. just as it is at Ottawa. If the Montreal Herald is well-informed, there is much need for honest and efficient administration in at least three out of these six departments.

This charter, even as it stands, confers a far greater measure of "home rule" on the city than it enjoys at present. Now, for instance, its borrowing limit is fixed by the Provincial Legislature, and the Council must go to the Legislature to obtain permission to borrow any more money. The new charter empowers the Council to submit a by-law to the real estate owners, proposing a new loan, and a tax to pay it off within a given time. Thus Montreal would then be able to borrow as much money as it wanted without consulting the Legislature of Quebec at all.

It also takes full control of street widening, and expropriation proceedings generally. Several new forms of taxation are provided for, including a tax of a percentage on the rental value of any house not occupied by the proprietor, and a business tax which is expected to bring in considerable money.

This charter, after it leaves the committee, must pass the Council, and then the two houses of the Legislature. It is now being considered by various commercial and religious bodies, which will present their findings to the committee before it reports.

Commercial.

TORONTO MARKETS.

Toronto, Oct. 20th, 1898.

DAIRY PRODUCTS.—There has been little change in the butter situation during the week. For real choice dairy, there continues to be a good demand at quotations, while offerings of inferior dairy are somewhat in excess of the demand. Creamery is steady, and in fair request. In the local cheese market a seasonable jobbing movement is taking place, but nothing more. Country markets are elsewhere reviewed. For eggs there is a good demand, with supplies of strictly fresh rather limited. Quotations range from 14 to 17c. per dozen, according to quality.

GREEN FRUITS.—There is only a limited supply of oranges in the market at present, and values are ruling firm, with fine late Valencia California, 126's, 150's, 176's, 288's, \$3.75 to \$4 per box. Jamaica, \$7 to \$8 per barrel. Supplies of Jamaica and Florida oranges should, in a week or so, be coming forward more freely, when it would be expected prices will decline. Lemons are also in scant supply, with Messina quoted at 360's, \$5.50 to \$5.75. Of domestic pears, peaches and grapes, trade is now drawing to a close for the scason, and prices have advnced. Almeria grapes are now on the market, and are quoted at \$6 to \$6.50 per keg. We note the following prices for sundry vegetables and fruits: Sweet potatoes, per bbl., \$2.50 to \$2.75; bananas, fancy fruit, per bunch, \$1.25 to \$1.50; tomatoes, Canadian, per basket, 25 to 30c.; dates, Hallowee, 4c. per lb.; figs, Tapnets, 3½ to 4c. per lb.; Spanish onions, \$1.25 per box; Canadian onions, 80 lbs., \$1 per bag.

GROCERIES.—Trade is good. In addition to the seasonable movement in general supplies, there has been a demand for groceries from points on the Upper Lakes, and in view of the close of navigation, within the next few weeks, orders are being rushed forward. Values are generally very firm; the sugar agreement fixing prices based on quotations at refineries so that the dealers will have uniform margin in selling, has thus far been very satisfactory. No changes have been made in quotations. The Japanese rice crop is reported to have been almost a total failure and quotations locally are very strong. Syrups are scarce, and it is almost impossible to secure in this market any low-priced syrup. It is said the indica-tions are that the coming cane crop will yield less than the usual supply of syrup. Dried fruits are now beginning to come forward, although Californias have not yet commenced to move. Shipments of figs from Smyrna to date are reported to be less than one quarter of the quantity at the same period a year ago. A great deal of gossip on the street about the condition of the canned goods market. Trade is in an unsettled condition, and we should not like to take the responsibility of predicting as to the future of values.

HIDES AND SKINS.—The hide market is very steady, and for No. 1 cured, merchants are quoting 91/4c, per lb. Tanners continue to complain of high prices, but take the hides, as they are the best quality

of the year. With the colder weather, larger supplies are coming forward. There is nothing new in skins.

Provisions.—The packing season has not yet reached anything like full activity. Receipts of dressed hogs have, owing no doubt to the unsettled weather, been rather light. Cold, bright weather, however, is only needed to bring out the hogs, and put the packing-houses again into activity. For choice light weights (100 to 140 lbs.), packers are paying \$5.60 to \$5.70, and for heavy weights, \$5.30 to \$5.50 per cwt. Several lots of mixed weights have been sold during the week at \$5.50 per cwt. There is a good, firm tone to the provision market, and products are commanding full rates. In the United States there is a weakness in the market, caused by the constant hammering of packers to secure the new crop at low figures. The export trade, although some large shipments have been made the past two weeks, is not generally strong in demand. Freight rates have advanced recently, and forwardings are made with greater expense than formerly.

SEEDS.—There is a large quantity of seeds coming forward, but the demand from country points is hardly what might be expected for the season of the year. For alsike \$5 to \$7.50 per cwt. is quoted, according to quality, while timothy brings \$2.25 to \$3.75 per cwt. From New York, 19th inst., we are advised "there was a stronger market here and West, on flax and clover, but buyers and sellers are still apart for export, and no trade reported. We quote: Common to fair clover, \$5.25 to \$6.25; good to fancy, \$6.75 to \$7.75; timothy, \$2.50 to \$3, in job lots for common to choice, per 100 lbs.; flax 99c. to \$1, c.i.f., New York."

Wool.—From the Canadian mills there is a good strong demand for wool supplies, and sales on this account are very satisfactory. In fleece wool, trade is slow, at prices formerly quoted. The total deliveries of the last London wool sales show a decrease of 146,000 bales, which is made up as follows: 24,000 bales less to England, and 181,000 bales less to America, but 59,000 bales more to the Continent. Next series will commence on the 20th November, the list of entries being closed on the 21st. It is yet too early to speak definitely about the probable total available, but judging by present advices, we estimate the quantity at about 170,000 bales. The first series of next year is to commence on the 17th of January, the list of entries being closed on the 9th.

MONTREAL MARKETS.

Montreal, 19th Oct., 1898.

Ashes.—There has been a continuance of the improved English demand, and as available stocks are now very limited, there not being more than 20 barrels or so in store at the moment, values continue to stiffen, and \$4.30 is being paid for good tares of first quality pots; seconds are quoted at \$4, and pearls \$5 per cental.

Boots and Shoes.—Rather better reports of the state of trade are made by city manufacturers of footwear. Some houses report improved sorting orders, on the strength of which they have bought a little more freely of black leathers, as well as sole. Payments from the country are fair, but local retailers are not particularly busy or forehanded.

CEMENTS AND FIREBRICKS.—There is nothing to report this week in the way of receipts of either cements or firebricks, but some considerable lots have yet to come forward on four steamers before the close of navigation. Business has been rather light on account of the wet weather, but values are very steady at last quotations, and stocks on spot are in quite moderate compass.

DAIRY PRODUCTS.-A depressed condition of affairs is shown in the cheese market, and sales of the usual Monday boat receipts of Quebec-made cheese showed a decline of a quarter of a cent, 8½c. being the ruling figure, with an eighth more paid for some fancy lots. For fine Western, 9c. would now appear to the outside views of buyers. Last week's exports views of buyers. Last week's exports were pretty liberal, figuring at 89,663 boxes, and there is reported to be a large quantity still to go forward on contract. Butter has also undergone further decline, and 19c. is now quoted as the outside to the still side for fine creamery in boxes; tubs 181/2 to 1834c., Western dairy about 15c. Last Week's shipments amounted to 19,195 Week's shipments amounted to packages, being nearly 3,000 packages ahead of same week last year, and the total shipments to date are 206,712 packages, about 12,000 packages more than at corresponding date in 1897.

DRY Goods.—Sorting business was reported livelier at the beginning of the week, but milder wet weather is again in evident the state of evidence. generally report very fair business passing, and really good collections. With re-gard to values there are no very notable changes. In some lines of domestic cotcolored flannelettes, etc., the mills are duties on English goods. such as apron ginghams,

FURS.—The usual London autumn sales in London, took place on the 11th and 12th inst., and circular advices, with regard thereto, are just to hand. The following are the comparisons, with figures of last March: Mink, 10 per cent. higher; marten, 10 per cent. higher; black bear, 15 per cent. lower; brown ditto, 20 per cent. lower; brown ditto, 20 per cent. lower; brown ditto, 30 per cent. lower; brown ditto, 30 per cent. lower; brown ditto, 30 per cent. cent. lower; skunk, same; coon, same; coon, same; coon, same; also red fox, lynx, otter and wolf; rats same as last January, and beaver 10 per cent, higher than last January.

GROCERIES.—An active movement is reported, with satisfactory collections. California raisins are now in very fair supply. ply, some six or seven carloads having just come to hand, and the quality is turning out very good. Prices are very growers' combination though prices were nrm, but at the recent meeting of the growers' combination, though prices were advanced to all U.S. points, an exception was made as regards Canada, owing to strong representations from Canadian selling agents. A cable was received yesterday that the "Bellona" has completed her lading of Malaga raisins, and this being her last port of call, she is now this being her last port of call, she is now doubtless, fairly on her way to this port.
With regard to these latter goods, the orders for Canada are somewhat larger than usual, especially of the finer kinds; lent, with a case fractionally higher than the quality of the crop is reported excel-lent, with prices fractionally higher than last year. The markets for Valencias, In sympathy with the great strength of Comadre figs have advanced 3s. at Lis-on. These are a cheap Portuguese fig. only introduced within the last few years, for which a growing business is being wear's crop is reported unusually late, and as there is some doubt of new goods and as there is some doubt of new goods reaching here in time for the Christmas trade, more attention is being turned to old goods, for which good prices are be-

ing realized. Tea importers still report jobbers as buying lightly, but they hold quotations firmly in all lines; Ceylons are cabled stronger from Colombo. Sugars are moving out from the factory very fairly, and quotations as revised last week are steady, with a tendency to strength, as the New York market advanced a peg yesterday.

HIDES AND TALLOW.—A better business HIDES AND TALLOW.—A better business is doing in hides. Not only are Quebec tanners buying more freely, but we hear of a Waterloo County tanner, one of the recent delegation to Quebec, who bought quite a fair quantity in this market, and the shipment of several carloads is reported to Toronto, as well as some small lots to the United States. Receipts are increasing as the kill is larger with the increasing, as the kill is larger, with the advent of the colder weather, but the figures are hardly as large as last year. Dealers buy at 9c. per lb. for No. 1, and quote 10c. to tanners. The competition among lambskin buyers is being foolishly continued, and 65 to 70c. each is being paid butchers, though Chicago lambskins guaranteed to pull four pounds of wool, can be laid down cheaper, while local skins will hardly average over 3 lbs. Some skins are being brought in from Tallow Europe at much lower figures. remains dull at 3 to 3½c. per lb., for rendered, butchers realizing 1½ to 2c. for

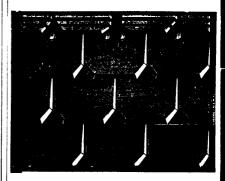

LEATHER.—Moderate lots of sole and black leather are reported sold, but there is no marked briskness in the market locally. Fair English demand is reported for both sole and black leather. Values continue steady, and stocks of black leather comparatively small. We quote: leather comparatively small. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do., No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 26 to 28c.; No. 2, do., 24 to 25c.; company 20 to 21c.; 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; company 20 to 21c.; No. 2, do., 24 to 25c.; No. 2, do., 25c.; No., 25c.; No., 25c.; No., 25c.; No., 25c.; No., 25c 25c.; common, 20 to 21c.; waxed upper, light and medium, 30 to 35c.; do., heavy, 27 to 30c.; grained, 32 to 35c.; Scotch 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; Western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins, (35 to 40 lbs.), 60 to 65c.; imitation French caliskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskins linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 12 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—The feature in the metal trade is the great strength in tin, which is reported advanced £2 the ton in England, and local prices are again notably advanced; copper is firm, lead a little easier. Pig iron is dull and unchanged; values in other lines steady. We quote: Summerlee pig iron, \$17 to 18; Hamilton No. 1, \$15 to 15.50; No. 2, do., \$14 to 14.50; Ferrona, No. 1, \$14.50 to \$15; machinery scrap, \$14 to 15; common ditto, \$12 to 13; bar iron, Canadian, \$1.35 to 1.40; British, \$2 to 2.15; best refined, \$2.40; Low Moor, \$5; Canada plates--Pontypool or equal \$2.10 to 2.15; 52 sheets to box; 60 sheets \$2.20 to 2.25; 75 sheets, \$2.30 to 2.35; all polished Canadas, \$2.40 to 2.45; Terne roofing plate, 20 x 28, \$5.75 to 5.90; Black sheet notably advanced; copper is firm, lead a 2.25; 75 sheets, \$2.30 to 2.35; all polished Canadas, \$2.40 to 2.45; Terne roofing plate, 20 x 28, \$5.75 to 5.90; Black sheet iron, No. 28, \$2.25; No. 26, \$2.15; No. 24, \$2.05; No. 17, \$2; No. 16, and heavier, \$2.15; tin plates—Bradley charcoal, \$5.60 to 5.70; charcoal, I.C., Alloway, \$3.15 to \$3.25; do., I.X., \$3.90 to \$4; P.D. Crown, I.C., \$3.60 to 3.75; do., I.X., \$4.50; coke, I.C., \$2.90 to 2.95; do., standard, \$2.75 to 2.80 for 100 lbs.; coke, wasters, \$2.70; galvanized sheets, No. 28, ordinary brands, \$4; No. 26, \$3.75; No. 24, \$3.50 in case lots; Morewood, \$5 to \$1.00; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., \$1.65 to 1.75; Canadian bands, per 100 lbs., \$1.65 to 1.75; English hoops, \$2 to 2.15. Steel boiler plate ¼-inch and upwards, \$1.85 to 1.90 for Dalzell, and equal; ditto, three-sixteenths

ROOF PROTECTION

That is reliable, durable and economical, is assured by using

Eastlake Steel Shingles

They are the only shingles made with our patent cleat and water gutter—are more quickly laid than others—are fire, rust, lightning and leak proof—and will give you perfect satisfaction. Write for further information.

Metallic Roofing Co.

1178 King Street West, TORONTO

Sale of the House occupied by the Commandant of the Royal Military College, Kingston.

PURSUANT to instructions from the Department of Militia and Defence, there will be offered for sale on Wednesday, the 2nd day of November, 1898, at twelve o'clock noon, at the Auction Rooms of Joseph Salter, Brock Street, Kingston

The valuable residence for some years occupied by the Commandant of the Royal Military College, Kingston.

This residence is situated on the corner of King and Union Streets, near the Parks, in the best part of Kingston. The house is thoroughly modern in all its appointments; is built of white brick; contains 15 rooms; is in first-class repair and is in every way a most desirable home.

The property consists of two town lots and is 132 x 132 feet, containing ample space for tennis courts, flower gardens, etc. There are valuable and commodious stable and other outbuildings upon the premises.

The property will be offered for sale subject to a reserved bid, fixed by the Department.

A portion of the purchase money, not to exeed threefourths, may remain, to be paid by yearly instalments or
otherwise as may be agreed, to be secured by mortgage
bearing interest at five per cent, payable half-yearly.

Prospective bidders who desire to inspect the property may obtain tickets of admission from the understened.

Further particulars will be furnished upon applica-tion to the undersigned, or at the time of sale.

JOSEPH SALTER, Auctioneer, Kingston, Ont.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, Kingston, Ont.," will be received until Friday, October 28th, 1898, for the erection of a Drill Hall at Kingston, Ont. Plans and specifications can be seen and form of tender and all necessary information obtained at this Department and at the office of Mr. Arthur Ellis, Architect, Kingston.

Persons are notified that tenders will not be considered unless made on the printed form supplied and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. of amount of the tender, which will be torfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

tor. If the department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY Secretary.

OILS, PAINTS AND GLASS.—This week shows quite a spirit in business in this department and a spirit in briefly a department, orders coming in briskly, a fact which is probably due to the near approach of the close of navigation. The furth further advance in window-glass anticipated in our last issue, has gone into effect sooner than expected; quotationare and are the control of effect sooner than expected; quotations are now put up another 20c. a hundred feet, with a very strong market reported. Last week's advance in turpentine is firmly held, and steadiness marks all other lines. We quote: Single barrels, raw and boiled linsed oil, respectively, 50 and 53c. per gal.; two to four barrels, 49 and 52c.; 5 to 9 barrels, 48 and 51c., net 30 days or 3 per cent., for 4 months' terms. Turpentine, one to four barrels, 49c.; five oil, machinery, 90c.; Newfoundland cod, 37 to 40c. per gal.; Gaspe oil, 33 to 35c. Ral.; steam refined seal, 42 to 43c. per gal.; steam refined seal, 42 to 43c. per 37 to 40c. per gal.; Gaspe oil. 33 to 35c. per gal.; steam refined seal. 42 to 43c. per gal. in small lots. Castor oil. 8½ to 9c. in quantity, tins, 0½c.; machinery castor oil, 7½ to 8c.; Leads (chemically pure and first-class brands only). \$5.62½; No. 1, \$5.25; No. 2, \$4.02½; No. 3, \$4.50; No. 4, \$4.12½; dry white lead, 5c.; genuine red do., 4¾ to 5c.; No. 1 red lead, 4½ to 4¾c.; Putty in bulk, bbls., \$1.65; kegs, \$1.80; bladder putty, in bbls., \$1.80; \$1.80; smaller quantities, \$1.95; 25-lb. tins, \$2.05; 12½-lb tins, \$2.30. London washed whiting, 35 to 40c.; Paris, white, 85 to 90c.; Venetian red, \$1.50 to \$1.75; yellow ochre, \$1.25 to \$1.50; spruce ochre, \$1.75 to \$2. Window glass, \$1.70 per 50 feet for first break; \$1.80 for second break; third break, \$3.70.

TIMBER IN BRITAIN.

Farnworth & Jardine's Wood Circular, ated Liverpool, 1st October, 1898, says:
America arrivals from British North have The arrivals from British North America, during the past month, have been 38,068 tons register, against 45,225 month last year, and the aggregate ton-the years 1896, 1897, and 1898, has been tively.

"Business during the past month has been quiet and difficult, and although the arrivals show some falling off, and the deliveries have been fairly satisfactory, stocks are large in some articles excesstocks are large, in some articles excessive, and values difficult to maintain.

Wanan the been moderate,

Waney the arrivals have been moderate, but sales are difficult, and a large portion is point at the word. The demand sales are difficult, and a large portion going direct to the yard. The demand continues very quiet, and prices are lower; the stock, although not excessive, is quite and sonly been is quite ample. Square pine has only been imported to a limited extent, and the deabout 5,000 feet has been imported, but there is little enquiry the stock is adeabout 5,000 feet has been imported, but there is little enquiry; the stock is adequate. Oak.—There has been a moderate import, but with little enquiry, the deliveries have been disappointing; values has only been imported to a very limited extent, the consumption has been satisfactory, and stocks are moderate; prices are steady. Ash is in very limited rethough the import shows a considerable falling off from the previous month, the stock of th falling off from the previous month, the stock is still very excessive, and prices

are difficult to maintain. Several signment parcels of oddments have been sold at much under the cost of import. Red pine deals are in fair request, but

prices are lower and stocks too heavy. New Brunswick and Nova Scotia Spruce and Pine Deals.—Of spruce, the spruce and Pine Deals.—Of spruce, the arrivals during the past month amount to 12.970 standards, against 15.820 standards the corresponding month last year. The deliveries have been fairly satisfactory, but prices show no improvement, and stocks are much too heavy. Pine deals are very dull of sale, and the stock is heavy

heavy.
"Birch.—Of logs the import has been light, and there has been a fair consumption, and the stock is reduced to a more moderate compass: prices are steady. Planks, however, have been imported freely, and although the consumption has been fairly satisfactory, the stock is too

heavy: prices are easier.
"United States Oak.—The demand con-The demand continues very quiet, prices rule low, and stocks are sufficient. Oak planks have again been imported largely, but there has been a fair consumption, and prices have slightly recovered. The total stock amounts to 351,000 cubic feet.

"Pitch Pine.-The arrivals during the tons, against 7 vessels, 5.803 tons, during the like period last year. There has been a large consumption during the past month, and with normal stocks the coming season should open with higher prices, more especially for hewn timber. which is lower in stock than for some time past. Of hewn: There has been no import, and, with a good consumption going on, stocks have assumed very moderate proportion, being 148,000 feet, against 398,000 feet at this time last year. Of Sawn: The import has been moderate, and there has been a large consumption; stocks are normal. Of Deals and Boards: There has been a large import, but a good business has been going on and stocks are not excessive.

"Oregon and British Columbian pine has not been imported; the deliveries have been fair, and the stock is gradually being reduced; prices are unchanged.
"Sequoia.—Recent sales have been on

a small scale but at full prices, and the present small stock is firmly held.

"East India Teak and Greenheart.—
Teak: The import of both logs and planks has been very moderate; there has been rather more enquiry, and prices are steady. Stocks are not too heavy. Greenheart.—The import consists of one cargo during the past month. the consumption has been small, and the stock is ample."

LAST WEEK IN THE UNITED STATES.

It has never been possible to make a more satisfactory quarterly report of failures during the five years which are covered by the returns made exclusively by this paper, than can be made for the past quarter. While a very few heavy failures swell the aggregate for the last quarter, those in real estate brokerage or While a very few heavy speculation alone counting for more than II per cent. of the aggregate, with as much more in operations not at all reflecting the general state of business, the aggregate was, nevertheless, smaller than in any other month covered by our returns for many branches of business. In some branches the failures in September or in August were the smallest in any month, and also in many others failures for the quarter were the smallest in any quarter.

With actual payments, through clearing houses, 19.2 per cent. larger than in the same week of 1892, it cannot be said be said that business is in any sense falling off, and yet many are complaining because the amount realized as profit is smaller than was formerly realized in good times.

The man who sold \$10,000 worth of products, had a profit of perhaps \$1,000 in 1892, and yet he sells \$12,000 worth of the same product in 1896, and is not happy because his profits are but \$600. But in almost every branch of business trade is now transacted on a narrower margin of profit than in any other time of fair prosperity There is a great change, and perhaps a permanent one, in the percentage of profits derivable from trade and manufacture, as well as in the profits obtainable by transporters. Progressive civilization calls for a lower range of profits and of prices, as the volume of business transacted increases, in order to make possible improvement in the condition of the working millions.—Dun's Review.

BANKING OPERATIONS IN FRANCE.

An interesting analysis of the operations of the Bank of France for the past twenty years, in the London "Bankers' Magazine," for September, in connection with the returns of the operations of the five great credit societies of Paris, affords a striking idea of the volume of banking business which is now done at the French capital. The issue of checks has not been growing rapidly in France, but checks as there understood, are drafts upon a bank in favor of a non-depositor, and are required to be stamped. Transfers from one account to the other in the same bank (virements), are not classified as checks, and reach an enormous amount where the banking business is largely conducted by a few great institutions. The clearings at the Paris office of the Bank of France, by means largely of these transfer checks, have grown from fifty-five per cent. of the transactions of the bank in 1877, to seventy-six per cent. in 1895, and seventy-three per cent. in 1897. The employment of bank notes has fallen from forty per cent., in 1877, to twenty-two per cent. in 1895, and twentyfive per cent. in 1897, and the employment of specie has fallen from five per cent. in 1877 to two per cent. for each of the last The whole volume of these four years. transactions has grown from about \$7,500,000,000, in 1877, to \$13,500,000,000, in 1895, and \$11,500,000,000 in 1897. The number of bills admitted to discount at Paris has grown from 3,480,629, in 1877, to 5,688,308, in 1897, and the number admitted to discount at the branches has grown during the same period from 352,938 to 8,994,271. The number of small bills has been steadily growing, and it was necessary in 1897 for the agents of the bank to make 2,562,910 separate visits to dwellings to present and collect small

The business of the Bank of France has encountered in recent years severe and effective competition from the great discount houses or private banks. The Credit Lyonnais is the largest of these institutions, and showed on June 30th, 1898, a commercial portfolio of 671,500,ooo francs (\$130,000,000), and deposits of 1,008,300,000 francs (\$200,000,000). The 1,008,300,000 francs (\$200,000,000). The other four societies are the Comptoir d'Escompte, with commercial securities on June 30th, 1898, of 318,300,000 francs, and deposits at sight of 402,500,000 francs, the Societe Generale, with commercial securities of 223,600,000 francs, and deposits at sight of 190,000,000 francs; the Credit Industriel et Commercial, with commercial securities of 66,500,000 francs, and deposits at sight of 00,000,000 francs; and deposits at sight of 99,600,000 francs; and the Societe Marseillaise, with commercial securities of 28,500,000 trancs, and deposits at sight of 34,800,000 francs. "L'Economiste Europeen," of August 12th, which presents these statistics in compact form, shows that these five societies had aggregate liabilities on June 30th of 2,036,900,000 francs (\$400,000,-000), of which 1,736,000,000 francs were payable at sight, and 300,900,000 francs were payable upon the obligations of the banks. The available assets amounted to 2,121,200,000 francs, of which 221,700,000 francs were in the cash reserve, 1,321,-400,000 francs in commercial securities, 206,000,000 francs in loans to brokers, and 372,100,000 francs in advances on securi-The available assets of this character at the close of 1896 were 1,798,100,000 francs. The maximum deposits of the Bank of France, during 1897, were only about 540,000,000 francs, less than a third of the deposits of the five large credit societies, and little more than half of the deposits of the Credit Lyonnais alone. deposits of the Credit Lyonnais alone. The figures given for the credit societies do not include the Credit Foncier, the bank which makes loans upon real estate, because it does not do the same class of because as the other institutions. The

Credit Foncier had outstanding on June 30th, 1898, obligations amounting to 3,164,200,000 francs (\$600,000,000), in addition to current accounts of 80,400,000 francs.—Bankers' Magazine.

AMMONIA AS A F. EXTINGUISHER. FIRE

The editor of the National Druggist gives some interesting instances of the marvellous efficacy of a solution of ammonia (aqua ammoniae of the prescriptions): "In one instance, where the fire had originated (probably from spontaneous combustion) in policy combustion. ous combustion), in a pile containing several tons of cotton-seed, and the in-terior of which was almost a solid body of live coal, a half-gallon of ammonia completely smothered the fire. other, which occurred at Savenay, France, the vapours of a tank containing fifty gallons of gasoline caught fire in the linen-room of a laundry. The room was instantly a mass of living flames, but a gallon and a half of ammonia water thrown into it completely and almost immediately extinguished it." The druggist, at whose suggestion the ammonia was used, in the second instance, says: The effect was instantaneous—torrents of black smoke rolled upwards in place of flames, and in a moment every trace of fire was gone. So completely was the fire extinguished, that workmen were enabled to enter the room almost immediately, where they found the iron tank of gasoline intact."

THE DIFFERENTIAL ARBITRATION.

A movement in what may prove to be the settlement of one of the most difficult problems in connection with railway traffic has been inaugurated this week, in the meeting in Chicago of a Board of Arbitration for the settlement of the differential question between the Canadian Pacific, on the one side, and the remaining trans-continental lines on the other.

Heretofore the question has been as to the amount of the differential to be allowed; now it is whether any differ-ential is allowable. The Canadian Pacific stands alone as supporting the proposi-tion, whereas the American roads are a in denying it.

The strongest argument that can be adduced in favor of the differential principle is precedent.

Precedents in this line [Railroading] are not the result of carefully considered propositions, but are propositions, but are simply practices often adopted as expedients and nearly always ex-parte in character. Such being the case, it is evident that in such a hearing as the one in question, precedents are entitled to no weight whatever, but the question should be considered de novo

and on its merits. It may not be out of place to refer, by way of illustration, to a practice that has for its existence nothing better than the support of a precedent. Quite a numthe support of a precedent. ber of years ago, when the movement of through freights from the West to the seaboard was becoming fairly well established, it was found that in the adjustment of rates from Missouri River points to New York, via St. Louis and via Chicago, it was necessary to make the rate on grain five cents less to the first-named than to the last-named point, the Eastbound rate from those two points to New York differing to that extent. When York differing to that extent. York differing to that extent. When later the adjustment of rates East-bound from all the territory east of the Mississippi River, was established on a percentage basis, the lines running West from St. Louis refused to readjust, claiming that the arbitrary differential of five cents per hundred pounds already established should be maintained; and main-

fluctuations in rates which at times have brought the charges on grain from Kansas City to St. Louis down to three cents per hundred pounds. A more forcible condemnation of the recognition of precedents in connection with railroad operation could not well be imagined.

Coming back to the question of differentials, in the case under discussion, it would seem difficult to allege any good reason for their existence in the beginning, or their continuation in the future. When the Canadian Pacific road was constructed, it was with a full knowledge of the disabilities that would attach to it, and the comparatively limited commercial demand which it could legitimately hope to serve, under then existing conditions. With the development of the country through which it passed and the terminals it reached, a larger trade could be expected, but that afforded no reason why it should be permitted to sandbag other lines into sharing with it their legitimate traffic.-Railway and Engineering Review, Chicago.

COST OF OPENING A MINE.

Discussing the remarks of a British Columbia paper, on gold-mining, the Winnipeg Free Press says:

Some camps are more expensive than others, of course, but it is rare to find even a free milling property which may be put into a shipping condition for less than \$50,000, while refractory ore mines often demand an outlay of \$250,000 before they are on a paying basis."

they are on a paying basis."

In referring to the early history of the Rossland camp, the Rossland Miner says: "A majority of the companies then organized had a capital stock of a million dollars, divided into 1,000,000 shares of \$\epsilon \text{cech}. Usually 300,000 were placed in the treasury, and these sold for from three to five cents per share. Say that 300,000 shares sold for five cents, and this would give \$15,000 for the developing of would give \$15,000 for the developing of a property. With this sum, a plant would be installed, and the work begun, and long before the property was in a position to yield returns, the company would find itself out of funds, and unable to proceed further. This is the reason why one can see almost as far as the eye can reach from this city the properties of million-dollar companies lying idle with the surface relapsing back to its primitive condition, when many of them should to day under process. day, under proper management, and a better system, be shipping and dividend paying mines."

As a remedy the writer suggests that: "When the treasury shares are set aside, they should consist of a larger proportion of the whole than is usually allotted for that purpose. that purpose. Besides, treasury shares should be sold for a much larger sum than has hitherto been the case. They should be disposed of at the case. be disposed of at par, or near par, as in the custom with companies floated of England Under the custom with companies floated of the custom with companies floated of England. Under the present system the 3 and 5 per cent. floations, unless the company is unusually fortunate. ceive a large commission therefor, the only ones who make a profit."

-Forty-six new buildings have been erected in Smith's Falls this season all cost of \$80,000. They are nearly resident There are no vacant dwellings. dences in the town.

— Canadian manufacturers can make no mistake in heeding the advice of E. Sheppard, that they should put a distinctive Canadian brand on all the goods they send to South America. The cargoes reach distinctive Canadian brand on the goods they send to South America. goes reach those countries in British vessels, and are notice. goes reach those countries in British vessels, and are naturally regarded as British products in the absence of any mark indicate the opposite. Canadians should also brand everything they send to are British market, for there our exports confused with those from the United States.
