GET BUSY

On your House Plans—if you intend Building a Home. Don't sit back waiting for lower costs next spring. We anticipate building costs will increase if anything for 1922. Quit grousing about hard times and the cold hard winter and help keep the ball rolling.

FOR GOOD TIMES

Take the middle course between the chronic pessimist and the fatuous optimist. Size present conditions up in a sane business manner and we think you will see our advice is good.

AND BUILD NOW

The long cool days are dandy for building and there is lots of time to complete your home before fall.

PUBLIC MEETING WELL ATTENDED

Opera House Well Filled Sunday Evening to Hear Rev. Mr. Wilson.

A large and enthusiastic gathering greeted the Rev. W. D. Wilson on Sunday evening in the Opera House. The General Secretary spoke with his usual energy, despite the fact that it was his fourth address of the day.

The chair was occupied by His Worship Mayor McKay, who briefly expressed himself as pleased to have been requested to fill that position. He stated his conviction that the various prohibition laws which we had lived under had all been beneficial. None of course were perfect. They were merely steps in advance. New Brunswick now realized that another step was necessary namely absolute prohibition. He felt that the greatest foe of the temperance forces would be indiscreetness, and announced an organization meeting for Tuesday evening Sept. 13th at 8 o'clock. He then called upon Mr. Wilson who, he said, needed no introduction to a Campbellton audience.

Mr. Wilson said that he appreciated an invitation to speak in the Opera House in Campbellton, and was glad to know that so many were so interested in the subject to be willing to come and listen.

In Dec. 1919, the temperance leaders of N. B. went to the government and asked for the referendum now pending. The answer was the referendum of July 11th 1920. The temperance leaders thought this was unnecessary, since before this law was enacted, five-eighths of the province was taking one form or another of prohibition. However they accepted the challenge, and the answer was a majority of over 50,000 in favor of the present law. But the law leaves one loophole, and says that any person may obtain a license for private use, and this has been the cause of endless rum-running.

The only province in Canada today which can so import liquor are Quebec and Dr. Columbia. From our geographical position we are becoming the dumping-ground for the illegal supplies of the other provinces. Changes in the law which will prevent this are necessary, and the referendum will make these changes possible.

He admitted that enforcement of the law was a hard proposition, and what was necessary was not less enforcement, but more and then more, and then some more. Nearly all the tragic murders in the province during the past year were preceded by a long train of lawlessness, and back of that again was the booze business. More law was needed, not less, and a propaganda for law enforcement was necessary. When we say we cannot enforce this or any other law, we are virtually saying that the criminal forces are stronger than the government. What we need is to show that law and order are still paramount.

He spoke of the charge that drug addiction had greatly increased since prohibition had become law, and stated that statistics proved the direct contrary, that alcoholism and drug addiction increased and decreased in direct ratio. But he went on to say that he was making a plea for the splendid youth of our land against the most lawless business ever known.

This was a vital question. If we fail now we get no second chance till 1925. Already the passing of the Quebec non-export law had brought back to our province the men driven out in 1915. It is easy to blame others, but it is only the indifference of the people that allows this. This referendum will give us a right to ask the Dominion Government to put a stop to this.

He referred to the circular which was distributed at the close of the meeting. Mr. Wilson was asked if the law would do away with the vendors, and answered that in 1919 a commission was formed to dispense liquor, and so do away with the wholesale houses. The intention was to go on and eliminate the retail vendors.

Another question put was "Who appoints the local inspectors?" and Mr. Wilson replied that the Chief Inspector (at present Mr. John B. Hawthorne) did. The next question was "Who appoints the Chief Inspector?" and he replied that the government appointed him.

NEW INSPECTORS ARE APPOINTED

Messrs. Doyle and Smith Are Now Holding Down The Job.

On September 1st, Restigouche was favored with the appointment of two brand new Prohibition Inspectors. These are H. P. Doyle and Wm. Smith.

The former incumbents; of the office either resigned or were allowed their liberty.

It is hoped that the new men will show some results. To all observers of temperance matters they need not stir out of town for the next week or two to be kept busy every day of the week. Get busy Mr. Inspectors and let the law abiding citizens understand that an honest effort will be made to clean up the town. Not only the poor bootlegger but the fellows highest up.

HON. ROBERT ROGERS ASKED TO BE CANDIDATE IN ARGENTVILLE, QUE.

Montreal, Sept. 7.—Hon. Robert Rogers, formerly minister of public works, has been invited by friends to contest Argenteuil County, Quebec, as an independent Conservative in the coming federal elections.

Mr. Rogers has not accepted his decision yet.

BALLOONIST KILLED AT NORTH ADAMS, MASS.

North Adams, Mass., Sept. 6.—More than 10,000 persons saw Eugene M. Stafford, of Boston, a balloonist fall 6,000 feet to his death at a fair here, yesterday. The web belt, attaching him to his parachute, broke as he changed parachutes. He was giving an exhibition of the double parachute drop. At the height of 1,000 feet he jumped in the first parachute, and at 6000 feet cast off that for the second. Just as he changed, the spectators saw him break loose and drop rapidly to the ground.

MOTOR CAR PRICES LARGELY REDUCED

Ford Set Example to Manufacturers.

New York, Sept. 3.—Six automobile manufacturers have again reduced prices, following the example of Henry Ford, whose cars are now below 1917 prices. The cuts run from \$100 to about \$200, according to the style and engine. The Chevrolet Motor Company announced a change in prices yesterday, effective to-day. Reductions by the Oldsmobile Company and the Franklin Motor Company, were effective Sept. 1, and others by the Hudson Motor Car Company and the Essex Motor Car Company were made several days ago. The third cut in Overland prices within a month was announced yesterday.

DISSOLUTION.

Electors of every shade of political opinion are one in agreeing that Premier Melgren has taken the proper course in recommending the dissolution of Parliament. Many electors think that he and his friends have held the reins of power too long, that dissolution should have taken place two years ago.

It is the confidently expressed opinion of many former supporters of the so-called Union Government that its days are numbered, that the electors are tired of the present administration and are anxious for a change.

The opportunity will be given shortly. It is thought the date of the election will be late November or early December.

A Safe Regretted.

The musical instrument seller had

talk, in working off a cheap, weedy, screeching fiddle on a customer at four times its value. "Where shall I send it?" he inquired. "To No. 914 Slagg street. My flat is on the third floor." The fiddle dealer's jaw fell. He had moved with his family the day before to the flat on the second floor of No. 914 Slagg street on a three year's engagement.

LABOR DAY RACES GOOD

Fine Weather and Large Crowd Witness Best Races in Years.

The weather Labor day was beautiful and the Labor Day races at the Campbellton speedway drew a very large crowd. The track was in fine condition. Bathurst speed showed on top in two of the classes, although it was easy to see that Fenwick did not drive his "Lacopia the Great" to win. In the Free-for-All Shirley had an easy time with Emotionless, although hard pressed at times by Little Tom from Amqui. Lady Carr was drawn on account of a sprained tendon.

SUMMARY.

Free-for-All. 1 1 1
Emotionless (Shirley) 2 2 2
Little Tom (Levesque) 3 3 3
Bathurst (Cormier) 3 3 3
Time—2:19, 2:21, 2:22.

STEEVES—DENNISON.

The home of Mr. and Mrs. Malcolm L. Dennison, Bridge Street, Marysville, was the scene of a happy event Thursday afternoon at four o'clock, when their youngest daughter, Edith Grace, became the bride of Herbert R. Steeves, formerly of Campbellton but now of Matapedia, P. Q. The ceremony was performed by Rev. Norman A. MacNeill, pastor of Main Street Baptist church, assisted by Rev. J. B. Dargrett, in the presence of relatives and a few intimate friends. The bride leaning on the arm of her father, to the strains of Mendelssohn's Wedding March, played by Mrs. John F. Goss, of Campbellton, sister of the bride. The bride was unattended and was given in marriage by her father. She was becomingly gowned in a suit of navy blue broad cloth with seal trimmings, and hat to match, and carried a bouquet of Opheelia roses and sweet peas. After the ceremony had been concluded, and congratulations tendered, a dainty buffet luncheon was served. The color scheme in the parlor was pink and green, and in the dining room yellow and white.

The groom's present to the bride was a Hudson seal coat trimmed with sable and to the pianist an aqua marine brooch. The bride was the recipient of many beautiful presents, including cheques, silverware, china, cut glass, linen, furniture, etc. Mr. and Mrs. Steeves left by the C. N. R. express on a honeymoon trip to upper Canadian cities and points in New York state. On their return from their honeymoon they will reside at Matapedia, where Mr. Steeves is a train despatcher in the service of the C. N. R.

A Safe Regretted.

The musical instrument seller had

talk, in working off a cheap, weedy, screeching fiddle on a customer at four times its value. "Where shall I send it?" he inquired. "To No. 914 Slagg street. My flat is on the third floor." The fiddle dealer's jaw fell. He had moved with his family the day before to the flat on the second floor of No. 914 Slagg street on a three year's engagement.

ELECTION OF CO. COUNCILORS

Lively Contests in Durham, Colborne, Eldon and Grintmer.

The electors for County Councillors this year evoked more than the usual interest, but there is really not much change in the Council as a whole.

In Durham and Colborne the two former councillors were elected by good majorities. The figures were as follows:—

DURHAM.

Murchie 367
Doyle 362
Landry 224
Barclay 191

COLBORNE.

Arseneau 185
Miller 140
McPherson 107

In Dalhousie the two former Councillors were defeated. This was due no doubt to the stand taken by Coun. John Dickie, who although he had faithfully served his parish for many years, had turned from his friends to embrace another party, and now neither would have him so Silas and Archibald were elected by substantial majorities. The figures were as follows:—
Silas 158
Archibald 140
Dickie 117
Dugga 111

BALMORAL.

In Balmoral Maroon and Savoie were elected.

ST. QUENTIN.

The following are the returns from this new parish:—
Soucier 254
Levesque 188
Arseneault 98

DECLINE IN PRICE OF POTATOES IN ONTARIO

Toronto, Sept. 7.—Ontario's potato crop has undergone a complete reversal of form within the last month according to R. H. Delamer, secretary of the United Farmers Co-operative Society, with the result that instead of the shortage which was reported at the first of August, present indications are for a crop which will equal the demand, if it does not exceed it. As a consequence the farmers' price has dropped from \$3.00 to \$1.75 a bag within the last few weeks and may go to \$1.50. Even at this figure, however, the farmer is receiving a better price than he did the last couple of years, according to Mr. Delamer.

CANADIAN MOTION PICTURES.

The movie public in Canada may eventually be taxed by the United States proposal to impose a customs tax of 30 per cent. on the value of imported films. It is a tax to discourage the production of motion pictures in Canada for sale in the United States. But it should stimulate Canadian enterprise to produce more pictures for the Canadian public.

At the present time, Canadian public opinion is inclined to demand more Canadian and British pictures, to relieve the monotony of so many from the United States. A beginning has, indeed, been made to meet this demand. A number of successful Canadian pictures produced within the last two years, including "Back to God's Country," "The Sky Pilot," "Cameron of the Mounted," and others based on popular Canadian novels, seem to have satisfied patrons on both sides of the border line.

While the pictures have been produced in Canada, they have been released for general circulation from United States headquarters. But the Canadian pictures are taxed \$30,000 or more—it is estimated that Ralph Connor's "The Man from Glenarry," to be produced in the logging camps of the Ottawa Valley this winter, would be subject to a \$30,000 tax.

the supply of Canadian pictures by United States producers is likely to decline. The demand for Canadian pictures by Canadian enterprise is, at the same time bound to increase. Coupled with the natural desire for pictures of Canadian origin—and there is unlimited scope for development in the direct—Canadian pictures could be improved by more British films. The British producers are handicapped somewhat by climatic conditions, but some very fine pictures have been made since the war, and capital is being directed with more confidence into the film business in Great Britain.

American producers seem to be quite well aware of the loss they may experience if the proposed protectionist tariff is imposed. Canada might justifiably respond by imposing a 30 per cent. tax on films from the United States. There is a strong sentiment in Canada in favor of admitting British films in duty free. Reciprocity in motion pictures among the British overseas nations and the Mother Country might very well be established, without reference to United States tariff policies. The motion picture might be made a good medium for members of the British league of nations to get to know each other better.

OBEY THE LAW.

Do you plan a fall hunting trip, or have you thought of taking a rifle, shotgun, air gun, pistol or other weapon with you on your automobile or boating trip? If so, remember it is against the law to carry any one of these weapons without a license. The near approach of the hunting season, makes it advisable to direct attention to the regulations now in force. A permit to purchase a gun or other shooting weapon is the first essential, but that only allows of having the weapon at home. Another permit is necessary if it is to be taken into the woods or carried around on the person. That means no hunter can enter the woods this fall without having first obtained a license to carry the weapon or weapons it is intended to use.

The penalty for disobeying the law is a fine not exceeding the hundred dollar or three months' imprisonment, or both fine and imprisonment if circumstances justify. The license provision applies to all the various forms of shooting weapons, also to sheath knives, bowie knives, daggers, slippers, metal knucklers, skull crackers and other offensive weapons should remember not only that it is an offence to carry them without a permit, but that it is an offence punishable as above to sell or lend any of them to one who has failed to secure the necessary permit. In the case of a sale, a record of the issued license to have the weapon. As one section of the act gives every peace officer the right of search, it is wise for whoever carries a weapon in his hand or his pocket to have within reach the license authority, which alone one can prevent punishment for a violation of a law which, although drastic, is wise and in the interests of safety.—EX.

The Ottawa correspondent of the Montreal Star predicts that the Quebec increase in population will raise

TORTURED BY TERRIBLE ECZEMA

Suffered Three Years Until He Tried "FRUIT-A-LIVES"

DAME PETER LAMARRE

Pointe St. Pierre, P. Q.
"I think it my duty to tell you how much your medicine has done for me. I suffered for three years with terrible Eczema. I consulted several doctors and they did not do me any good. Then, I used one box of 'Fruit-a-lives' and my hands are now clear. The pain is gone and there has been no return. I think it is a marvelous cure because no other medicine did me any good and I tried all the remedies I ever heard of, without benefit until I used 'Fruit-a-lives' and 'Fruit-a-lives' cooled the blood and removed the cause of the disease, and 'Fruit-a-lives' completed the cure."

DAME PETER LAMARRE (dls), 60c. a box, 6 for \$2.50, trial size 25c. As all dealers or sent postpaid by Fruit-a-lives Limited, Ottawa, Ont.

the unit of parliamentary representation from one member for every thirty-two thousand to at least thirty-six thousand, involving a consequence a Maritime Province loss of twelve or fifteen seats at redistribution. The correspondent says "The large extent in the great healthy school of the out-of-doors. It develops the spirit and habit of resourcefulness and of cheerfully facing difficulties. Those were qualities of the Canadian pioneers and, embodied in their descendants, have given us a large number of the great names of Canadian history."

WHAT SCOUTING IS AND DOES. Scouting is character-forming, educational, carried on in a large extent in the great healthy school of the out-of-doors. It develops the spirit and habit of resourcefulness and of cheerfully facing difficulties. Those were qualities of the Canadian pioneers and, embodied in their descendants, have given us a large number of the great names of Canadian history.

Recalling your own boyhood, do you remember how in your reading, your play, your dreaming, you loved to imagine yourself a great war hero? a discoverer and adventurer? a hunter in the jungles of Africa? a cowboy? a knight, rescuing the weak—the beautiful—and pursuing the evil-doer? The boy of today dreams the same dreams. Especially in Canada, does he love to imagine himself a pioneer backwoodsman; an Indian, a plainsman; log-house or wigwam building, hunting, tracking, riding bucking horses. Scouting satisfies this love of romance.

Every normal boy must find some outlet for his super-abundance of animal energy. Like the healthy puppy, he must race, and chase, and struggle with his fellows. Scouting provides the outlet, and controls it.

He loves to form and play in gangs. Scouting meets this safely. Through a curious but well-known weakness of human nature, the average boy, by preference, is going to take advice and many examples of habit, speech and principle from older boys and men about his own family. Most men can recall how readily as boys they responded to the notice of older lads, or of some men other than their father, and accept them as authorities and examples. Scouting meets this with the safe advice of the Scoutmaster—the sympathetic elder brother.

At a certain stage the average boy, especially the small-town boy, is going to face the attraction of the poolroom, or some other similar always-open club with its free and easy fellowship, and its games of chance or skill—and with its too-frequent atmosphere of disrespect for authority, for womanhood and clean manliness. Scouting heads this off.

The normal boy is keenly, enthusiastically willing to do public service where it is directed, and recognized, and rewarded. All these units. Scouting realizes, not through a code of laws or a code of regulations applied from without, but by working from within—by providing natural, attractive, but directed channels of activity for the boy's own impulses, in the following of which his character is shaped toward its best possibilities in efficient manhood and citizenship.

Good At It.
"We women hear men better than men."
"Who told you that? Your doctor?"
"No, my shoemaker."

BRANCH ROADS TO MUNICIPALITIES

Hon. Mr. Veniot Favors This— Might Be Good Policy.

At the meeting of the Union of N.B. Municipalities held at St. John recently, Hon. Mr. Veniot delivered an important address upon the Road Policy of the present local administration. This in part was as follows:—

Hon. P. J. Veniot thanked the committee in charge for the invitation to speak. He thought this a fitting place to discuss highways. All were interested in roads. There was much to say on the subject. Referring to suggestions made yesterday regarding work for the unemployed he said it had been suggested that road work be done this winter. It was impossible to do road work in this province after November 20. Some bridge work might be done. The government had considered the question. As early as last April it was evident in the northern part of the province that there would be lack of work. A survey had been made and the result was that a large amount of road construction had been undertaken. In the northern part of the province millions out of your were put to work on the roads. In the province \$2,142,000 had been spent this year on roads. He was not saying this for political effect. He did his work conscientiously.

Men of all shades of politics were here. When the federal government was not spending much money here it was to the credit of the local government that they had spent \$2,140,000 in one department. On the C. N. K. men were being cut down and laid off and the buck being passed. We should put forth every effort to induce the dominion government to undertake work here instead of cutting down staffs and throwing men out of work.

In 1917 when he had taken office there was no system in the highways administration. The result was that there was no centralization. Organization had to be undertaken and it was seen that funds were necessary. There was no system of taxation. The automobile fund was thrown into general revenue. The sum of \$38,000 or \$40,000 was spent in some way. It was from the automobile taxes that the road fund was obtained. In 1917 there were 2,700 automobiles in New Brunswick with a revenue of \$48,000. Today there were more than 13,400 cars with a revenue of \$270,000. If some of the delegates wanted the license fees divided with the municipalities, let them be fair. It was impossible to touch this money, and it was asking the government to violate the trust between themselves and the holders of the bonds upon which the money to pay the roads was obtained. It was impossible. The general revenue would not stand the strain. The system of using automobile funds on main trunk roads was abolished because the federal government had offered to bear 40 per cent of the expense of trunk highway construction up to a certain extent. None of the work on the main trunk roads could be undertaken without the approval of a federal engineer, after which the matter went to the governor-in-council. This was necessary in order to receive the 40 per cent.

In 1919 New Brunswick was the only province to undertake this. The New Brunswick road engineer had gone to Ottawa to consult with officials there. New Brunswick was the only province represented from this section.

The work was begun under federal aid. Work to the extent of \$750,000 was done beginning July 1. Because the act did not go into effect until July 8 the government had clipped off the end of the work done between July 1 and July 8. We had done more work under federal aid than any province in Canada. Yearly interest and sinking fund were provided out of the general revenue. Twenty year bonds had been issued to cover it.

A proper patrol system was essential. An attempt had been made to perfect a patrol system, and he predicted that within the next two years there would be a perfect patrol system.

Another source of revenue was the municipalities. The municipalities were compelled to keep up their roads. In Ontario the municipalities were taxed to the hilt. There was not a by-road in the province of Ontario that could touch, our by roads and branch roads. There was a road tax of 25 cents on the dollar and a two dollar toll fee. There were not 100 men living in the rural district of the province paying over and above the poll tax. Last year assessment for roads was \$242,000. There was over \$86,000 in default and St. John county was one of the main sinners. The system of collection was bad and 25 per cent of all taxes were not collected. He thought the system of assessment should be revised.

Let the municipalities come to the government and ask them to inaugurate a system. The real property valuation was only about 80 or 40 per cent, instead of from 90 to 100 per cent.

Let the municipalities come to the government and ask them to inaugurate a system. The real property valuation was only about 80 or 40 per cent, instead of from 90 to 100 per cent.

Let the municipalities come to the government and ask them to inaugurate a system. The real property valuation was only about 80 or 40 per cent, instead of from 90 to 100 per cent.

Best Horses in the East on the Parlor Track. 3 - DAYS RACING - 3

The best place to meet your Friends is in CHATHAM.

cent, as it should be. Something must be done and he would give it his hearty support.

He did not think the government with the restricted source of revenue, could ever afford to take more than \$250,000 out of the general revenue. If more roads were wanted more money would have to be borrowed. In four years the increase in the number of automobiles would practically stop. The municipalities were very jealous of their rights.

He was prepared to advocate placing in the hands of the municipalities the duty of keeping the by-roads and having absolute control. The government must attend to the main roads. All calls on the municipalities for road money would be abandoned. So long as he remained minister of public works he would never allow a municipality to touch a bridge. He offered the suggestion because he knew what the roads needed and he saw direct taxation for roads staring him in the face. He thought his suggestion would avert this.

Victoria and Madawaska counties were setting an example to the rest of the province. Rothesay parish was not a rural settlement; there were many wealthy there who lived there in summer and in the city in the winter. The reason the government did not take the initiative in the matter of handing the roads over to the municipalities was that there was a democratic count.

Statute Labor.

It was a rotten system and the bane of the country districts. Up to last year not more than thirty per cent was effective. He favored the abolition of statute labor, and with the backing of the union he felt he could do it. He hoped to have it abolished at the next session. Keep the roads out of politics, he said. A man has until July 15 to do statute labor, and the collectors begin in June to collect taxes, thus making many who have not done their statute labor or paid their road taxes.

Rule of Road.

Referring to the agitation to change the rule of the road, he said he understood the wish of many to have the rule changed to avoid accidents. In 1919 an act was passed proclaiming the rule of "drive to the right," but the law was effective only as proclamation of the governor. There had been opposition in the northern counties. In Kent, Westmorland and Albion there had been opposition because Nova Scotia had not changed. There would be no change here, in all likelihood, until Nova Scotia changed. The road from St. Stephen to St. John would be completed next September, and this would mean a flood of American tourists. If the rule was not changed there would be accidents, and it might be that many would not come.

Doing Him a Favor.

A man who had been running a dubious business failed, and at a meeting of his creditors all but one agreed to accept his four-month note for ten cents on the dollar. The debtor took this man aside and by promising to make him a preferred creditor he won him over.

When the others had departed, the man said: "Well, now, I should like what's coming to me."

"Oh," replied the debtor, "you won't get anything, any more than the others."

"But I thought I was a preferred creditor."

paid when they fall due, but it will take the others four months to do so.

you are preferred."

ELECTIONS TO TAKE PLACE BEFORE THE NEW YEAR

Preparations Made At Ottawa For Despatching Forms As Soon As Writs Are Issued.

Ottawa, Sept. 6.—The necessary machinery for carrying out the general election is all ready. Once dissolution takes place and the writs for a general election are issued, there only remains the need for parcelling up all the necessary forms and documents and expressing them to the returning officers in the various constituencies. At the office of the chief electoral officer preparations have been made for despatching the necessary forms immediately the writ is issued and election officers throughout the dominion will at the same time receive full printed instructions as to their duties. With the exception of Saskatchewan and Prince Edward Island there already exist in the different provinces lists of voters which will be used as the basis of lists to be prepared for the coming general election. In each case the lists will be brought up to date as provided by the dominion election act, revising officers and registrars being appointed as required. Lakeside, Ont., Sept. 6.—Recent utterances by Premier Meighen were keenly resented by speakers at a big Labor Day farmers' picnic attended by 5,000 agriculturists. Ex-Warden John Liliec declared that the premier seemed to be able to think only in pairs, the village streets, and so terrible, building up the dominion, and the farmers, whom he termed wreckers of bolshewists. "If there is any class of people in the world absolutely free from the taint of Bolshevism it is the Canadian farmers," he declared. Hon. Manning W. Doherty declared that there never was a time in the history of the dominion when agriculture had faced such crisis as recently. "If it had been a bakers' picnic instead of a farmers' picnic it would have been well advertised," he said. Captains of industry, he declared, should shoulder their losses quickly and stabilize business. He said the farmers have taken their losses and heavy losses, too, without grumbling, as they had no idea the drop in produce prices would be so precipitated. He urged farmers if they are forced to let go their live stock to do so carefully. London, Ont., Sept. 2.—Premier Meighen at a meeting here last night announced his intention to recommend the dissolution of Canada's Parliament in order that the General Federal elections might take place before the New Year.

FAMINE IN CHINA.

Wolves attack a grow-up people in the village streets, and so terrible, was the starvation of the populace that cannibalism became rife, and it is estimated that out of every 100 persons five got to know the taste of human flesh. Older Chinese can recall these horrors of the famine of 1878. Once more North China is in the grip of famine, and the said 40,000,000 people are in danger. Indeed the cannibalism and wolves of forty years ago are almost equalled by the horrible tales of suicide, child murder and suffering that are coming over the wires to-day. Despite immense natural riches, China has frequent famines of more or less extent. Lack of railway transportation and primitive farming methods are mainly responsible. At-tiquated implements and complete ignorance of the rotation of crops keep down production. China is a land of such varieties and contrasts that it is possible for her to have a crop failure in two or three of her eighteen provinces which will kill scores of thousands although adjacent provinces have good harvests. China, of which fish and rice are the staple foods, is climatically divided into three zones. The southern zone lies along the sea and is very warm. The central zone, which enjoys a mild winter, is more temperate and grows even better products than the southern. Central China, whose midst is termed the heart of China, produces splendid crops of rice, wheat, the better kinds of tea, silk, cotton, jute, oranges, sugar cane and tobacco, etc. It is a plentiful supply of water. Since its character makes artificial irrigation almost impossible, seasons of different rainfall, such as the past has been, mean famine. China is not, as many Canadians might suppose, densely packed with people. The greatest congestion—a congestion which forces folk to live in rafts on the water—occurs along the seaboard, the rivers and canals. In Southern China the density of population and the intensity of cultivation is such that a single peasant farmer will frequently make a living off one-sixth of an acre. In the north, however, the farms are larger, running from three to ten acres and more in parts. In marked contrast to the densely populated areas are large tracts of fertile land sparsely populated owing to lack of transportation. Incredibly rich in minerals is China. Her coal deposits are the largest in the world. Vast seams of the finest anthracite and soft coal underlie large areas. It was estimated some years back that the coal deposits of the province of Shansi alone would supply the whole world at the present rate of consumption for thousands of years. Yet the Chinese have scarcely scratched these supplies and coal any distance from most of the few existing mines is quite dear. Greivous and very industries, the Chinese have, through lack of enterprise, failed to develop the abundant natural resources which would free their country from the dire effects of famine and war.

STEALING FROM GOD'S BASKET

Said to Be a Common Practice—How Many See Themselves in This Mirror.

Do you accept the products of the field, the farm, the factory, the forest, the sea, in the mine, year by year without giving one-tenth to the work of God? Then you steal God's basket, and neither you nor your community will prosper as you should. This is the modern version of the law as laid down and observed in the time of Moses, David and Solomon.

The theory is that in sending a bountiful harvest, or a bountiful reward for labour or business of any kind, the Almighty sends us only nine-tenths as the gift for ourselves and one-tenth His own container or 'basket' in which the nine tenths are handed us—that it is our duty to hand back the last tenth or 'basket' to God—that if we do so, then He can fill it up and send it back to us another year.

The harvest season approaches, and with it comes a fruitful supply of grain, loaded fruit trees, and many other features of harvest time to which we are accustomed. At this season of peace, plenty and prosperity, the Army calls us back to fundamentals. They remind us that all down the ages the word of God has sounded the same note—"Bring all the tithes into the storehouse," and see what great blessings God will pour out. They point out that it is not enough to express our thanks. They remind us that we are called upon to give thanks.

Ever since the Salvation Army was established in Canada we have been reminded of our duty to God for the blessing of mankind through harvest thankofferings.

Already in local Salvation Army circles the officers and members are bestirring themselves in Harvest Festival activity. Soon we may expect to be called upon to co-operate in this great annual movement which the Salvation Army believes brings blessing to the individual, to the community, and to the nation when fully observed.

Our natural inclination is to reply, "To busy" or "too many appeals." But the Army reminds us that God has not been too busy to bless us, and this year, more than ever before, we should not be too busy to return thanks through our gifts for the blessings of peace and a bountiful harvest.

The Army exhorts us to continue to cast our bread upon the waters, relying on the promise that after many days it will return unto us, and again, "There is that scattereth, and yet increaseth; there is that withholdeth more than is meet, but it tendeth to poverty."

From Halifax to Vancouver during the next week or two, members of the Salvation Army will be busy decorating their halls, displaying their posters, arranging special meetings, and preparing thanksgiving services for the observance of the Harvest Festival season. This has been one of the features of their work for the thirty years of their operations in Canada, and for a quarter of a century before that when the Army was founded.

Every citizen will consider it a privilege to stand by the Salvationists at this time, and to do the best-hearted, generous thing for them.

Many will not wait until the Army writes or calls, but in gratitude for continued prosperity will send their gifts or goods to encourage the Salvationists in their work. Others will be ready to give generously when they call.

The officer in charge of the local corps, Lieut. H. A. Barrell will be glad to receive donations or goods during the next two weeks. Telephone 251 or 277.

CHEMISTRY STUDY IN THE DOMINION

Ottawa, Aug. 27.—Chemist and professors throughout Canada have been granted letters patent incorporating them as the "Canadian Institute of Chemistry." The association will carry on without share capital.

Its avowed objects, according to notice appearing in this week's official Gazette, include the raising of the profession of chemistry to its proper position among the other learned professions; to form an organization available for consultation by the government; to encourage original research and maintain high standards; to establish scholarships; to hold public lectures and examinations; to look after and promote the well being of chemists.

P. R. & A. PRATT, Matapedia, Que.

IN THE RESTIGOUCHE COURT. Between Eugene Levesque, Plaintiff, and Angus Beaulieu, Defendant.

NOTICE IS HEREBY GIVEN THAT notice by virtue of a Writ of execution issued out of the Restigouche County Court in the above cause under date the third day of May, A. D. 1921, the following described freehold was seized, and the said property to wit:—"All that certain lot piece or parcel of land situate, lying and being in the parish of Grosse Pointe in the County of Restigouche, bounded and described as follows: On the north by a lot owned by Oe-live Beaulieu, on the west by the dividing line between Ranges fourteen and fifteen, on the south by a lot owned by Thurbie Beaulieu and on the east by a reserved road, being Lot No. 19, Range 15, Haven Settlement," will be offered for sale and sold by public auction on the 16th day of September, A. D. 1921, at the hour of one o'clock in the afternoon, in front of the Post Office, St. Quentin, Rest. Co., for the purpose of satisfying the said writ of execution.

Dated this 16th day of June, A. D. 1921.

S. BLANCHARD, Sheriff of the County of Restigouche.

CHATHAM MAN

ROBBED ON TRAIN.

Dan Morrison, of Chatham, seventy-five years of age, while going from Quebec to Montreal was robbed of \$500. He said that he had been moving his family to Vancouver. His ticket and baggage checks were among the money stolen from him. He informed the Montreal police that he had an account in the Bank of Montreal at Chatham and that if they would send word he would be able to get sufficient money to carry him on his journey. This was done.

WILD GESE.

Down river residents report will geese in the Bay. The birds are here a month in advance. It is an indication of a bad season.

regulations in the Migratory law that render them immune from the sportsman's rifle that has caused the birds to come so early?

Value for value the world over, don't expect to get more than you pay for.

LOCAL ITEMS OF INTEREST

Newspaper Notes of Town and Country Happenings
Gathered by Graphic Reporters.

ELECTION ARRANGEMENTS.
James E. Stewart of Dalhousie who is returning officer for the Probationary election, Oct. 10, has posted the official proclamation throughout the county, and is making all arrangements for the election.

TEACHING AT CHATHAM.
Miss S. G. Duffy, who was for many years on the staff of the Regent St. School when it was located in St. Dunstan's Hall and who for the past couple of years has been on the Campbellton School Staff, leaves on Monday for Chatham where she has accepted a position on the staff of St. Michael's academy.—Frederick Gleason.

ORGANIZATION MEETING.
All those interested in temperance matters are invited to attend a meeting for organization purposes to be held in St. Andrew's hall Tuesday evening, Sept. 13th at 8 o'clock. Bro. W. D. Wilson will be present.

SCRIBBLERS.
A new lot of Campbellton School Scribbles are now on sale at the Graphic Office. Price 10 cents. Special prices in one hundred lots.—cf.

MEN!
Don't fail to see these—some of the finest Worsteds Suits. \$30.00 to \$25.00 per suit length.
W. H. MILLER CO., LTD.

CHURCH OF ENGLAND.
There will be no morning service in Christ Church on Sunday next. The evening service will be held as usual at 7 o'clock.

SLOGAN.
Run out the runs—you drove it from the saloon, now is your chance to drive it from the cellar. This is the slogan adopted by the M. B. Temperance Alliance for the plebiscite campaign which will close with voting on Monday, Oct. 10th, on the question of whether importation of liquor for personal use will continue to be legal in this province.

CAMPBELLTON SHOE SHINE PARLOR.
Don't fail to visit the Campbellton Shoe Shine Parlor for ladies and gentlemen. Special work of dyeing boots black, guaranteed. We shine canvas boots also. On week-days the shop will be open until nine o'clock in the evening, on Saturday's until 12 o'clock. Ladies who do not care to call, may leave their shoes. The work will be given our prompt attention.

BEING PUBLISHED.
The St. John Standard has resumed publication.

PREPARING TO REBUILD.
The Richards Manufacturing Co. are making arrangements for the rebuilding of their mill recently destroyed by fire at Richfordville. Large quantities of heavy timber are being hauled to the site. The mill will be larger than the one destroyed and will be modern in every respect.

HAS RETIRED.
Rev. John Carter, son of the late Mr. and Mrs. Henry Carter, of Newcastle, one of the most beloved priests in New Brunswick, who was ordained fifty-three years ago has been parish priest at Petit Rocher for thirty-seven years, and is nearly seventy-seven years of age has retired from active service.

CHATHAM FAIR.
The Chatham Fair as advertised on another page gives every promise of being bigger and better this year. There are a number of new attractions. Among them, aeroplane work and parachute drop which will be specially thrilling.

INJURED.
Mr. A. C. Roy was quite badly injured last week. He stumbled in the dock and fell down the elevator shaft in his factory.

PROVINCIAL APPOINTMENTS.
Andrew Barberie has been appointed a member of the Restigouche Sub-District Board of Health, and F. X. Comeau, a member of the Gloucester Sub-District Board of Health.

NEW COAL OFFICE.
S. W. Dinock has opened a coal office between W. H. Miller store and the Fire Station on Roseberry Street, and is now prepared to supply both Hard and Soft Coal of the best quality at the lowest prices. Now is the time to secure your winter supply. Phone 556 ring 2, or 57 ring 4 or call at office and get prices.

NARROW ESCAPE.
F. T. Mowat and a party of young men had a narrow escape through Mr. Mowat's car skidding and going over the embankment at the sharp turn to the railway crossing at Clark's Station. A slack tire was a contributing cause to the spill. All the occupants were thrown out and escaped injury, while the car was only slightly damaged. It was brought back to town under its own power, after some minor repairs were made.

TOWN COUNCIL.

A meeting of the town council will be held on Friday evening of this week.

LADIES!

Ladies Heavy Wool Costing in great lengths. Only \$3.75 per coat length.
W. H. MILLER CO., LTD.

MILLINERY OPENING.

At Henderson's Millinery parlors, Wednesday and Thursday, Sept. 14th and 15th. All are cordially invited.
MRS. P. A. McDONALD.

IN MEMORIAM.

In loving memory of Willard Fraser Black, killed in action Sept. 11th, 1918. Inserted by the Family.

FASHION PROMENADE.

Living models will promenade at 8 o'clock Wednesday evening, Sept. 14th in F. E. Shephard Co's windows.

CAMPBELLTON WINS.

The Campbellton Cubs, Juniors, in a most interesting game played at Dalhousie with the Shiretown team defeated the latter by a score of 18 to 8 on Labor Day.

NOTICE.

Dr. H. Brennan, Dentist, will be absent from his office from the 17th of September until the 1st of October for a Post Graduate Course.

On Wednesday and Thursday, Sept. 14th and 15th. All the latest creations in Fall Millinery will be shown. All are cordially invited.
MADAME M. L. BARTHE-RIEUT

NOT SUFFICIENT EVIDENCE.

Ernest Duncan and Gordon Payne who were last week arrested and held on suspicion of being guilty of breaking into several stores were allowed their freedom as there was not sufficient evidence to convict.

MORE DRUNKS.

Two drunks were arrested over the week-end.

LABOR DAY.

Monday, Labor Day was a very fine day and many enjoyed the day in the country. The stores and banks were closed for the day.

APPLES! APPLES!

Just received, a large shipment of apples to be sold at cheap prices.
GRAYS WHOLESALE.

MASONIC VISITATION.

About twenty members of Campbellton Lodge F. & A. M. went to New Carlisle Tuesday and visited the lodge there.

REPAIRING SUBWAY WALL.

A crew of men from the C. N. R. are busy repairing the retaining walls at the Subway. These became badly cracked by the action of the frost and had to be taken down. New ones will be built.

NOTICE.

My attention has been called to the fact that the bread that has lately been baked, sold and delivered by George Sansom of the Town of Campbellton is contained in a wrapper bearing the name of Tyler & Co.

As a number of citizens may be led to believe that this bread is baked in my bakery and by me I wish to notify them that I have no connection whatever with the baking of this bread, and that all loaves from my bakery is contained in a wrapper bearing the name "Tyler's Bakery," as has always been the custom.

COW LOST.

From Dr. Martin's property yesterday. Will anyone who knows of her whereabouts please notify Dr. Martin.

To Horse and Cattle Owners

I beg to notify you that after years experimenting on Tonic Treatment of Horses and Cattle I have now put up the greatest Tonic and Invigorating Powder that you can give your animals.

They do not only keep them in good condition, but they are a preventive against influenza which is known to all as the "Horse Disease". They stimulate the nerve supply and purify the circulation, thereby giving the animal a stronger resistance against diseases which are so prevalent at this time of the year.

Call at my office and get a package so you can see for yourself the results you will obtain after using them on your animals.

Dr. J. Fergus Donnelly
Veterinary Surgeon.
