## SOUTH AFRICAN SCRIP

## An Investment in South African Scrip at the Present Time Will Mean a Good Thing for You Financially

Scrip is practically at its lowest point at present. Why? Simply because the people do not realize the situation. If you will only stop and think what scrip means to the intending settler, then, you will perhaps see the reason.

With only some 2300 available scrips on the market and a weekly consumption of over 70 , and 20 months in which to take them up, you will easily see how long the supply will last.

A pre-emption ( 160 acres) costs the homesteader $\$ 3$ an acre or $\$ 480$. A South African Scrip gives you 320 acres. Figure this at $\$ 3$ an acre and see the result, $\$ 960$, The conditions of settlement are practically identical. Then why should scrip only be at the present figure of $\$ 800$ ? It is worth eveng dollar that a pre-emption is worth. Therefore, it is only reasonable to suppose that an intending settler will take up a scrip in preference to a homestead or pre-emption at present because he still has the privilege of taking up a homestead. After his scrip is "proved up" then would follow his pre-emption, if he so desired.

Thousands of people are taking up land in Manitoba, Saskatchewan and Alberta every month. If these settlers can only be shown the advantage of the scrip to them they would all be taken up within the next two or three months.

Prices will steadily advance from how on. The supply is limited. This alone will force the price up to at least $\$ 960$ or $\$ 3$ an acre, the price of Government land. The average price for farm lands in the three provinces today is say $\$ 10$ an acre. Why should these 320 acre warrants not be worth $\$ 3200$ ? Split this in two, say $\$ 1600$. Is not the investment good?

Think this over and buy before it's too late for your present means.
Remember--There Are Thousands of Acres of Choice Land to Choose From
