# ANADA UMBERMAN WEEKLY FDITION

The Lumberman Monthly Edition, 20 pages } SI.00 PER YEAR { The Lumberman Weekly Edition, every Wednesday

## TORONTO, ONT., FEBRUARY 13, 1895

NO. 6.

# Canada Lumberman PUBLISHED BY C. H. MORTIMER

Vol. I.

federation Life Building - TORONTO. Branch Office:

NEW YORK LIPE INSURANCE BUILDING, MONTREAL.

Weekly-Lumberman, published every Wednewlay. Meanins reliable and up-to-date market conditions and methods in the principal manufacturing districts and methods and foreign wholesale markets. A mekly medium of information and communication be-men Canadian timber and lumber manufacturers and morens and the purchasers of tumber products at home a abroad.

and alroad. **Lambershan**, Monthly. A zo-page journal, discuss-ing folly and impartially subjects pertinent to the lamber and wood-working industries. Centains introverse with promunent members of the trade, and character sketches and portraits of leading lumhermen is special articles on technical and mechanical subjects are especially valuable to saw mill and planing mill men and manufactures of lumber products.

ET Subscription price for the two editions for one er, \$1,00.

# WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of gp ter cent, will be allowed. This notice shows the math of the line and is set in Nonparell type, and no suplay is allowed beyond the head line. Advertise-mut must be received not later than 4 o'clock p.m. on Toeday to insure insertion in the current week since.

WANTED-By young man with eleven years' ex-perience in lumber business, both wholesale and netail, polition as office manager, bookkeeper or sales-man A: references. Address "Mac," CANADA LUMARRMAN.

#### WANTED

A QUANTITY OF RED CEDAR SHINGLES, Parties communicating will give full particulars of sock, prices, etc., f.o.b. cars, Chatham. Address, P. O. Box 703, CHATHAN, ONT.

# WANTED.

TEN (10) cars of 2 in, ast and and a Hant Maple, 14 and a for long, 6 in, and up wide. Above stock to be at least 4 most is on sticks. Parties having any of this on sticks should address at once, Bupparto HANIWOOD LUMMER Co., 940 Elk St., Huffalo, N. Y.

# TO LUMBER MEN

WE are in the market for one million feet of 4 x 4 scanting, and three million feet of 2 inch plank, a folions: Plank to be good, common 12 and 16 feet long, 20 per cent. of it 6 inches wide, 50 per cent, 8 inches wide, and 20 per cent, 10 and 12 inches wide. Scanting to be 4 x 4 and 20 to 16 feet long, coarse, com-mon, quare-edged: all to be delivered between June and lecember, 1805. In quaring, state separate price for white and red pine, and quantity of each you with the contract for.--THE REID CO., OF TORONTO, L4. Head office, cor. King and Berkley Streets. No contract will be made for less than 10,000 feet.

#### TIMBER BERTH AND SAW-MILL FOR SALE CHEAP

BERTH NO. 1, PROUDFOOT TOWNSHIP.

BERTH NO. 1, PROUDFOOT TOWNSHIP. Area, 15 square miles, part of which is well tim-bere's sith good quality of Green Fine. Spruce, Tam-arac, Heinlock, Hirch,-well watered. I. mneetin with above, there is a Lum'ser and Sainele Mill, situated in the Village of Kearney, on the Ma, actiewan River. The Ottawa and Parry Sound Railway's being built, which comes close to the mill, and sill make good shipping facilities. Millis furnished with two to u.r. engines. (nearly new) one for u.r. baker, lumber and shingle machinery. Also, 2,000 pine left, apply to her a mill. Ivice, 33,000 can. her, apply 10 LOUIS LAHAY, Keamey, Ont., Can.

On the fourth page of the WEEKLY LUNDERMAN will be found market prices in detail from leading lumber markets of Canada and United States, carefully revised to hour of going to press.

#### CURRENT TRADE CONDITIONS.

ONTARIO. THE severe weather of the past week has been an obstacle to immediate business. Even in the case of orders received for lumber it has been almost impossible to make shipments. Especially were these conditions aggravated during the closing days of the week when the storm assumed heavy proportions and the railroads were blocked in almost all sections. Lumber business, in fact, so far as the week is concerned, has taken on the general quietness that is a marked feature of business in all lines. Enquiries have been fewer than usual. The shape that national finances are taking in the United States is not liked by the leader trade of Canada, who have unpleasant memories of what disturbances in monetary conditions in the neighboring republic meant to the lumber business a year ago. Careful and capable financiers, who are able from this side of the line, to view United States conditions with an impartial judgment, are not at all sure that that country will overcome its difficulties just as easily an people anticipate. The present situation is a culmination of troubles that have been growing for some time. Perhaps our neighbors have rested too much on their ability to turn a sharp corner. They have undoubtedly shown great skill and cleverness in this respect, but the finances of a great country cannot be made safe on measures of this kind. At the same time the present duliness is not causing lumbermen to lose heart-They feel sure, all ther things being equal, that the lumber trade will take on encouraging conditions in 1895. There is none too much lumber, apparently, held either by Canadian or United States lumbermen. And even a fair measure of activity will mean a considerable demand. Prices are steadily holding their own. The work in the woods could hardly be better advanced. In some sections steps are already being taken to send some of the teams home.

#### QUEBEC AND NEW BRUNSWICK.

Outside of considering plans for the opening of spring trade there is no activity in lumber in Ouebec. January was a dull month, and whilst it is thought that February will not close without evidences of spring business opening, just at the present time there is little difference between the conditions of the second month of the year, so far as it has advanced, and the month that preceded it. In the Maritime provinces there is a good deal of activity in the woods, and the number of logs that will be taken out is likely to exceed what was calculated upon earlier in the

season. There, as in Ontario, the weather has been more favorable than was expected and full advantage has been taken of these conditions. The shipments from week to week continue to run on the light side. Though the trade with United States being done from New Brunswick is not large, yet some of it is new business. And encouragement is given that when business does open out, owing to the ad vantage that will come from the new tariff, lumbermen of New Brunswick will find a market for considerable product in the United States that was before unknown to them. No official announce ment has been made that the deal by the American syndicate for the purchase of over Soc.000 acres of Nova Scotia timber limits has been consummated, yet unofficial information received gives good reason to believe that it has actually gone through. This being the case, the advantages that will come from enlarged and more active operations, as suggested in these columns a week ago, will likely soon commence to show themselves.

## BRITISH COLUMBIA.

Some business is being done at nearly all important mills in the province. It cannot be said that any marked revival is showing itself in domestic trade. Both in Butish Columbia, and the Northwest, everything is quiet, and yet some shipments are being made into the interior, an evidence that business is moving. Lumber continues to go forward to Califorma, and during the week ships laden for other foreign points have left the harbors here. Within a few weeks, it is expected that trade will commence to put on a larger measure of real business.

#### UNITED STATES.

With a year as dull as 1894 proved to be, it was natural for the lumber trade of the United States to look forward to the opening of the new year with a strong hope that things would change. This is the way that lumbermen entered January. They had, perhaps, been a little sanguine, and a reaction has come over their spirits since January closed and no real improvement, aside from an increased measure of confidence, has taken place. Still there are indications that trade will grow better. In New York, for example, the permits registered at the building department show a large increase over the past season, and this would seem to mean better tunes for lumber. We sometimes think, however, that lumbernien overlook the fact, with other materials used in the construction of buildings, growing rapidly in demand, that lumber is necessarily a smaller factor in building operations than was the case years ago. What has

been true of New York, in building, has found parallel condutions, in a measure, in other large cities. But after all the lumber situation calls for something better than this to place it on a very much improved plane. There must be a general revival of trade all over the country, so as to stimulate the extension of both public and private works. Will the situation take this shape? The events of the past week do not encourage the hope. Again the national finances have come under a cloud, and it is difficult to say what the issue will be. In legislation there are so many elements, pulling one against the other, that it looks at times as though a serious crisis would overtake this country of great activities and enterprise. And with the experience of a year ago before them, lumbermen may indeed tremble when they find somewhat similar troubles cropping up again just on the inception of the spring trade. No other difficulty of importance stands in the way of improvement in the lumber trade. But this is big enough to discount everything else. The extreme cold weather of the week has, of course, been a barrier to any activity in shipments, whilst it has at the same time, as for a week or two previous, put an end, just now, to all outdoor work, that to some extent was causing, in many parts, a fair demand for lumber. This same weather, nevertheless, has been of great benefit to all those engaged in the woods. Little, if any, shading in prices of lumber are heard of at any important points, and the conviction still holds strong that prices will not be cut this season.

#### FOREIGN.

Lumber business in Great Britain is far from proving of any great size. Transactions are reported to be circumscribed. Orders are being placed, but caution is the watchword, and no one is buying heavily. Cheaper woods are most in demand. The Timber Trades Journal says that whilst there are not any forward sales of pine and spruce to be reported, yet several transactions or. a big scale are in course of negotiation. All this, insignifi-.ant in a measure as it is, is at the same time an improvement over 1894. Then business started off feverishly and fell off suddenly. "This year," to quote again from our English cotemporary "there appears a fixed determination on the part of buyers not to purchase too much ahead and a large quantity of the goods at present placed are destined for orders already ir hand." These are healthy signs, and if the policy is adhered to, will keep the trade in good shape, even though the turn over of business will be smaller than might be desired. Deals are not cutting

۰.

a good figure in business as yet. Shepard, Morse & Co., who do business at Ottawa, and are heavy operators in New England, with a branch at Burlington, Vt., are authority for the statement that South American orders are proving slow indeed, and that the outlook at present is discouraging. Internal wars and the low prices of cereals are large influences creating these conditions.

#### HARDWOODS.

Some small lots of hardwood keep moving, but no one is making shipments of any large size. This is not to be deemed a discouraging feature of the situation. Business is not at a standstill. and later when conditions are more favorable, larger shipments will be heard of. The weather for the past week has proven, perhaps, more awkward for hardwood men than pine men, as in filling orders they have to draw from many different sources, and freight traffic is blocked nearly everywhere. In the sections from which hardwoods are drawn, great quantities of snow have fallen and impeded traffic. "No one seems disposed to cut prices," said a dealer to the writer the other day, "and this is a pleasant feature of the trade." It can hardly be said that any one class of wood is much more largely in demand than another at present.

#### SHINGLES.

The shingle trade is light enough just now. Workmen are not anxious to do shingling with such weather as the country is at present experiencing. And these are not the times when the trade carry heavy stocks, in any class of lumber, unless they see the likelihood of a demand near at hand. Quite a spurt has been made in red cedar shingles in the Washington territory. Ten cents advance has already taken place and another ten cents raise is anticipated before March. Seventy per cent. of the shingle mills in that state are not running a wheel, and stocks on hand are very scant. #A#s have advanced within a month from 80c to \$1. and \$1.10, being very scarce. These conditions give hope to red cedar shingle men that prices will show a decided advance all along the line. With the duty removed on shingles between Canada and the United States, the Washington territory people are not without thought of pushing their product into British Columbia and Manitoba. As an offset, it may be remarked that British Columbia shingles in good quantities are to be found in Massachupetts and throughout the New England States in competition with the Washington product.

#### STOCKS AND PRICES. CANADA.

The lumber cut in St. Martin's, N. B., is likely to be the largest in the history of the parish.

Edmund Hall is putting in 17,000,000 feet of pine in Ontario to be sent to his mill at Bay City, Mich.

Smalley & Woodworth are putting about 8,000,000 feet of logs into Georgian Bay waters, which will be rafted to their Bay City mill.

Turner & Fisher are cutting 30,000,000 feet of logs on the Whanapitae, Georgian Bay. These will be, in a large measure rafted to Bay City, Mich.

200,000 feet of red pine deals are being

United States market at Thackrav's mill, Ottawa, Ont. Some of the lumber is already being loaded on cars for shipment.

Four car loads of lumber to be used in the construction of the new bridge across the Thompson at Ashcroft, have been shipped from the Brunette Saw Mills, New Westminster, B. C.

The American schooner W. F. Witzman has cleared the customs at Vancouver, B. C. for San Pedro, California with another load of lumber from the Hastings Mill, consisting of 493,000 feet.

The Whaley Lumber Co., Huntsville, Ont : "Business is slow, there wing very little movement of stocks. Those in most demand are low grades. Stocks on hand in this locality are light and of good grade. Prices are holding firm."

Shipments from St. John, N. B., to British ports the past week embraced 2,-000,000 feet of deals, etc., and 825 tons of lumber; to the United States 500,000 feet of long lumber, 1,000,000 lath and 1,500,-000 shingles.

The sale of 1464 square miles of timber limits on the Upper Ottawa, noted in these columns a fortnight ago, has been finally closed. The limits were the property of Ald. Lauzon, of Ottawa. Robt. Thompson & Co., of Hamilton, are the purchasers, and the price paid is \$115,000 in cash.

R. R. Weir, Lindsay, Ont: "The lumber in most demand at the present time is basswood, ash and elm. Recent sales of shingles include 18 inch pine, xxxx at \$3.30; C. B. 18 inch at \$2.30. Have a large quantity of cedar xxxx clear and C. B. There is quite a quantity of shingles held by the lumbermen of the province. Have taken over the business of the Parkin Lumber Co."

The following are the current quotations for lumber at Vancouver, B. C., net in yard : Rough, \$8.00 per M ft.; rough clear, \$14; ship lap, \$10; tongue and groove flooring, 4 in. No. 1, \$16 ; do. 4 in. No. 2, \$12; do. 6 in, No. 1, \$15; do. 6 in. No. 2, \$11; rustic, No. 1, \$15; do. No. 2, \$11; surfaced, \$15; shingles, \$2; lath, \$1.75. Quotations for Douglas Fir Lumber in cargo lots for foreign shipment :

Rough Merchaniable, ordinary suzes, in lengths to 40 feet inclusive, per M feet..\$ 8.00 Deck plank, rough, average length, 35 feet 
 Decker parin, Tong, average rengin, 35 rec

 per M

 Dremed T, and G. flooring, per M

 15,00

 8,00

 Laths, 4 feet 6 in, per M

A government culler has given the following estimate of the lumber cut for this season in the Sudbury district of Ontario:

	rec.
Holland & Emery	40,000,000
Eddy Bros.	25,000,000
Hale & Booth	20,000,000
Fisher & Turner	11,000,000
Georgian Bay Lumber Company	10,000,000
C. K. Eddy & Sun	10,000,000
C. A. McCool.	6,000,000
Alex. Fraser	5,000,000
Booth & Shannon	5,000,000
S. G. M. Gates	5,000,000
Saxe Bros.	4,000,000
Joseph Chew	3,000,000
J. T. Hurst	4,000,000
O'Neal & Simpson	2,000,00%
D. O. Conner.	2,000,000

The property known as Ward's limits, on the Rouge river, some sixty miles north-east of Ottawa, has been sold to E. J. Swan, of New York, the sum of \$100,-000 being involved in the transaction. The area is about 550 square miles, the Rouge river running through them for about 68 miles. Mr. Swan proposes crecting mills on the property near the junckils-dried and made into flooring for the tion of the Rouge and Ottawa rivers, and

using the timber on the limits for the manufacture of matches, tooth picks, clothes pins, pulp, furniture of various kinds, and lumber generally. Several Ottawa capitalists are interested in the project, and the head office will be in that city.

#### INITED STATES.

Box lumber is in good demand at Oswego, N. Y., whilst better grades are slow.

Since the first of the year the enquiry for C and better stock at Tonawanda, N. Y., has improved.

Geo Cassidy, ot Standish, Mich., is ready to purchase 5,000,000 feet of hardwood lumber logs.

\$7 a thousand is being paid for elm logs at St. Louis, Mich., and \$7 to \$10 for black and white ash.

Chas. Zeizer, of Arthur Bay, Mich., will furnish 2,000 logs of basswood stave-bolts for a barrel factory at Green Bay

The Cosmopolis Shingle Mill Co., of Cosmopolis, Wash., has just shipped 6 car loads containing 912,000 shingles.

Buffalo received 24,000,000 feet of lumber last year by lake and 22,240 cars which would make the total 580,000,000 feet.

Red wood shingles from Washington territory are arriving in considerable quantities at Buffalo, N. Y. Hanes & Co. have 10,000,000 in stock.

The Linton Manufacturing Co., of Saginaw, Mich., has received an order for egg cases for shipment to South Africa and also for Germany.

The Michigan Head Lining and Hoop Co., of Coleman, Mich., has 2,000,000 feet of elm logs at the mill, besides a large stock of shingle timber.

The T. B. Scott Lumber Co., of Merrill, Wis., is busily engaged shipping on account of a sale of 1,000,000 feet of lumber made to Indianapolis parties.

Salling, Hanson & Co., of Graling, Mich., are shipping lumber products to Cape Town, Africa. The lumber goes directly to New York, and then by ship to its destination.

S.O. Fisher and J. T. Hurst, of Michigan, who recently purchased 200,000,000 feet of pine timber in Minnesota, from Sibley & Bearinger have further augmented their purchase by 50,000,000 feet.

The total stock of lumber on hand at Albany, N. Y. on Jan. 1st, 1893 was 76,-545,000 feet, of this amount 54,784,000 feet was white pine. On Jan. 1st, 1804 the stock was 86,616,000 feet, and of this 75,773,000 feet was white pine. On Jan, 1st, 1895 the total is 92, 107, 265 feet, there being 75,526,531 feet of white pine. The largest item of any one dimension in white pine is that of to-inch shippers, 4,039,135 feet, with shippers to-inch and wider; second 3,552,921 feet. The total of inch uppers is about 650,000 feet and inch box 1,300,000 feet of all widths.

Statistics of Port Huron Customs House show that during the past season 384,761,000 feet of lumber were shipped by boat from the ports in the Huron district. Bay City leads with shipments of 151,070,000, and is followed by Alpena with 111,505,000. The other ports show the following shipments: Oscoda, 51,-857,000 ; East Tawas, 35,205,000 : Sagnaw, 31,850,000; Sand Beach, 3,034,000; St. Clair, 200,000 and Algonac, 40,000. Alpena also shipped 11,626 telegraph

FEBRUARY 13, 1895

poles, 1,032,000 staves and \$28,234 rail. road ties.

A strong effort is being put forth by the spruce manufacturers of New England to form a combination, the annual output of which is 600,000,000 feet. The intention is to raise the price from \$13,50 to \$15 per thousand. The New England survey men claim that for years they have been doing business for fun only. The present combined output of spruce of Nova Scotia New Brunswick, Ouebec and the Ner England States is estimated at one billion feet, of which about 400,000,000 goes into pulp. A combine therefore computing 600.000.000 feet will prove an important factor in controlling prices.

The Collector of Customs for the pon of Boston gives the following statement of traffic between Boston and the Dominion during the year 1894:

Imports.	M. A.	1.00
Boards, deals, etc.	\$2,056	\$ . Aurug

Minneapolis is one of the points that entered extensively into the manufacture of lumber during the past year, having sawed 491,000,000 feet of lumber as against 409,000,000 feet in 1893 and 488,000,000 feet during the season of 1802. which up to the present was the banner year. A result is that stocks on hand at the close of the year are very large, amounting to 352,000,000 fest, which is 74,000,000 feet more than was on hand a year ago this time. The consumption of lumber in Minneapolis the past year amounted to 176,000,000 feet, as against 120,000,000 feet in 1893. The cut this year will likely be curtailed in order to let the trade out on the large stocks now held.

#### FOREIGN.

A cargo of some 600 loads of Kaun pine is now afloat from Newfoundland for Cape Town, and it is anticipated that this wood will in the future, become a serious rival to American wood. Indian hardwoods are now sent in considerable quantities to South Africa, being used principally in the furniture trade.

A recent sale catalogue of Singleton, Dunn & Co., British lumber merchants. comprised a good variety of Quebec pine and spruce deals and ends of recent imports. The goods were put up at auction in Glasgow, Scotland, and transactions to a considerable amount took place. Spruce deals in Glasgow continue m fair demand.

Chief amongst cargoes of lumber that have recently reached Liverpool are the "City of Lincoln" from St. John, N. B. with about 1,300 logs of birch timber for Messra. Ellison, Murphy & Co., and the balance consisting of spruce deals, etc., consigned to Messrs. Farnworth & Jardine for sale on the market. Another cargo is brough: forward by the Edmonton from Ship Island and consists of hem and sawn pitch pine timber for Messrs. Robt Parker & Co., and part to be soll under instructions from Messrs. Alfred Dobell & Co., The Labrador from Haifax, N. S., is landing a quantity of maple, ash and hickory logs at Liverpool for various consignors.

#### SHIPPING MATTERS.

The burgue Bundelier is londing lumber at Hastings Mill, Vancouver, B. C., for Santa Roalia.

Freights in the United Kingdom have reached a very low level. This fact, however, it is thought, may impart some slight stimulus to lumber business.

The following list of ships are on their way from St. John, N. R., to the United Kingdom loaded with lumber: Aniarenth for Dublin; Hornet for Bidport; Marietta Bradley for Mumbles.

Vesaris seeking lumber charters at Vancouver, B. C., are scarce at present and freights have gone up in consequence. As a result of these conditions, the mill men say that it will probably be a month horizon any more lumber vessels load at this port.

# BUSINESS DIFFICULTIES AND CHANGES.

W. H. Wooden, calunet maker, Burford, Ont., has assigned.

A J. Augur & Co., Jumber, Quebec, Que., have dissolved.

W.L. Hibbard's null at Farnham, Que., was destroyed by fire a week ago.

H. C. R-es' lumber and stave mill at Woodslee. Ont., has been destroyed by fire,

Belanger & Prefontaine, sash and door makers, Valleyfield, Que., have dissolved, T. Prefontaine continues.

The saw and shingle mill of A. T. Mack, on Rife river, Mich., recently destr yell by fire, is being rebuilt. W. J. Davidson, lumber, St. John, N. B., is offering to compromise at 33% per cent. cash on liabilities of \$7,000.

C. H. Foster has retired from the wood-working factory of Strang. Foster & Mills, Strang & Mills continuing the business.

The Hund River Lumber Co., composed of W. R. Rotl, R. Fader, W. Hanes, and R. Wigle, all formerly of Essex county, correct the rumor that had teen given circulation that they had sold out. They sold certain limits, but the new company purchased two limits and the mill property and have put 50 men at work.

#### LUMBER FREIGHT BATES.

LUMBER freight rates for pine on the Grand Trunk Railway have been made a fixture, until, at least, April 30th, 895. Of any intended change after that date due notice will be given the lumbermen at a conference to be held in February.

General instructions in shipping by Grand Trunk are embodied in these words in the tariff schedule: On lumber in carloads, minimum weight, 30,000 lbs. per car, unless the marked canacity of the car he less, in which case the marked capacity (but not less than 24.000 lbs.) will be charged, and must not be exceeded. Should it e impracticable to load certain descriptions of light lumber up to 30,000 lbs, to the car, then the actual weight only will be charged for, but not less than 24, ono lbs. The rates on lumber in the tariff will not be higher from an intermediate point on the straight run than from the first named point heyond, to the same destination. For instance, the rates from Tara or Hep-worth to Guelph, Brampton, Weston or Toronto, would not be higher than the specific rates named from Wiarton to the same points. The rates from Cargill and Southampton to points east of Listowel and south and west of Stratford will be the same as from Kincardine, but in no case are higher rates to be

charged than as per mileage table published on page 9 of tariff.

Rates from leading lumber points on pine and other oftwood lumber, shingles, etc., are as follows : From Glencairn, Creemore, Aurora, Barrie and oth er points in group H to Toronto, 65/c.; Collingwood, Penetang, Coldwater, Wauhaushene, Sturgeon Bay, Victoria Harhor, Midland, Fenelon Falls, Longford, Gravenhurst other points in group C, to Toronto, 6%c.; Brace bridge to Toronto, 7c.; Utterson, Huntsville, Navor, Emsdale, Katrine to Toronto, 7%c.; llurk's Falls, Berriscale and Sundridge, to Toronto, Sc.; South River. Powassen and Callender to Toronto, 9c.; Nipissing Junction and North Hay, 10c. Rate from Goderich, Kincardine and Wiarton to Toronto, 6%c. These rates are per 100 lbs. Rates from Toronto east to Helleville Sc. per 100 list; to Deseronto, 90.; to Brockville and Prescott, 10c.: 10 Montreal and Ottawa, 11c. The rates on hardwoods average about from re. to ze, per too lis, higher than on softwoods. For ra < on railway ties, mahogany, rosewood, walnut, cherry, and other valuable woods, application must be made to the district freight agent.

On the Canadian Pacific the rates on pine and softwoods may be illustrated as follows: Cache Bay, North Hay, Sturgeon Falls and Warren, to Toronto, toc; Algonta, Cook's Mills, Massey, Spanish River and Whitefish to Toronto, 13c.; Ottawa to Toronto, toc. From Ottawa, Hull, Aylmer and Duchesne Mills to station on the Lake Eric and Detroit River, Eric and Huror. Toronto, Hamilton and Buffalo, and Michigan Central Railways, the rate is 143/c. per 100 lbs., Regulations apply as to minimum size of carload of 30,000 lbs., and an advanced rate is charged for hardwoods.

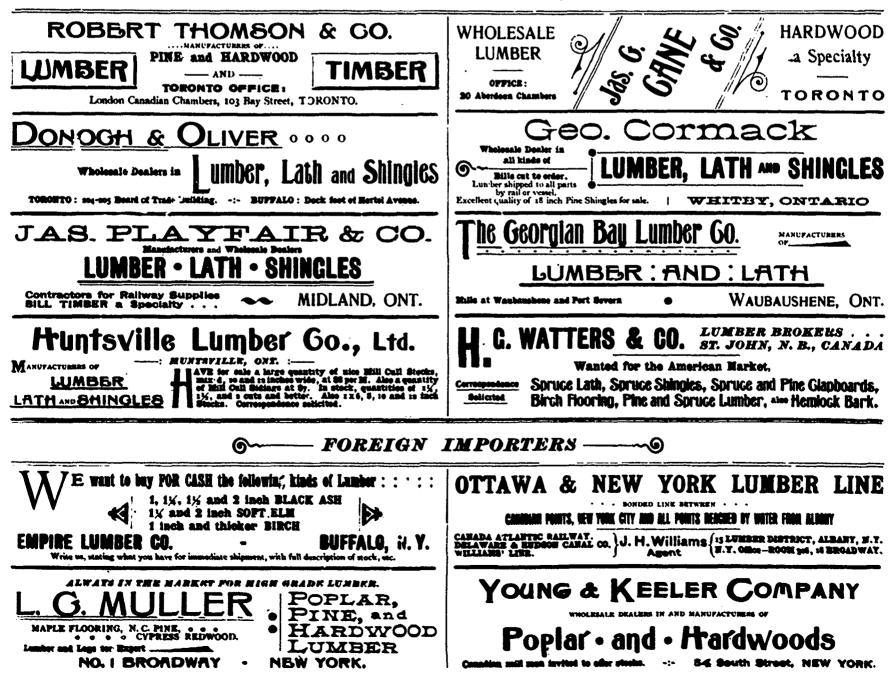

Lumber freight rates on the Canadian Atlantic Railway are as follows: Ottawa to Toronto, to cents per too lik.; Ottaw: to Oswego, \$1.90 per M ft., (3,000 bk. and under per M ft.); Ottawa to Montreal, \$1.25 per M ft., (3,000 bk. and under per M ft.); Arnprior to Montreal, \$1.75 per M ft., (3,000 bk and under per M ft.); Ottawa to Quebec, to cents per too lbs.; Arnprior to Quebec, 12 cents per too lbs.; Ottawa to Buffalo, 12 cents per too lbs.; Ottawa to Port Huron and Detroit, 14 cents per 100 lbs. Ottawa to New York, track delivered 15 cents.; lightered 17 cents.; Amprior to New York, track delivery 17 cents.; lightered 19 cents.; Ottawa to Boston, Portland and common polists, local 15 cents; exports 13c, per 100 lbs.; Amprior to Boston, Portland and common points, local 17 cents; export 15 cents per 100 lbs.; Ottawa to Burlington, 5 cents per 100 lbs.; Ottawa to Albany, 10 cents per 100 lbs.; Amprior to Albany, 12 cents per 100 lbs.; Ottawa to St. John, N. B. and common points, 20 cents per 100 lbs.; Ottawa to Halifax, N. S. and common points, 22% cents per 100 lbs. Minimum carloss, weight for shipment of lumber, lath, shingles, etc., is 30,000 lbs., and rates quoted above are in cents per 100 lbs., except when quoted per M ft. the minimum carload charged is to M ft.

#### MODIFICATION OF L. RDWOOD RATES,

The Grand Trunk Railway and Canadian Pacific nave receded in part from their arrangement of a few weeks since when they combined and made the rates on hardwood from certain points to Toronto and Hamilton 8½c, per 100 lbs. John Earls, W.D.F.A., of the Grand Truck, has written the hardwood men as follows: "After careful Consideration we have come to the onclusion that, on and after Jan. 1st, 1895, a molification will be made in the present arrangements for hardwood lumber, to the effect that the rate will be  $7\frac{1}{2}c$ , per 100 lbs, from our Northern and Northwestern branches to Toronto and Hamilton. This rate, however, will not apply from main line points like Guelph, Galt, London, Woodstock, Ingersoll, etc., from all lumber shipping stations the rate will be the same on hardwood as on pin." On the old principle, we suppose, that half the loaf is better than none, hardwood there have something, possibly, to be thankful for, though there is no good reason why the tates generally on hardwood should not be as low as on pine. It is understood that the C. P. R. rate will be made uniform at 7%c. from same points.

CEDAR --ORDERS PROMPTLY FILLED FOR cedar shingles and cedar light word; also hemlock dimemion lumber--J. E. MURTHY, Hepworth Station.
