A Great Success. It was not a sane celebration, as some have regarded it, but it was a success nevertheless. The noise was immense, fitting the dignity of the young nation. In the evening there was a continuance of the cannonading, and the sun went down with the accompaniment of noises and reports. BRAND NEW TAIL FOR HALLEY'S COMET

[Associated Press.] Chicago, May 24.—Forty degrees of new-born tail for the comet, and a doubling of its luminosity owing to flaming hydro-carbon gas, were recorded by the astronomers at Williams' Bay observatory last night after the spectrographic negatives had been developed, Prof. E. B. Frost, director of the observatory, announced the result of the computations.

"Four of us, after independent calculations, agree that the new tail of the comet is forty degrees long," he said. "The tail was visible long after the head had set. The darkening

of the sky by the eclipse of the moon helped greatly in the observations. Observations by the Hans spectrope showed carbon in the head of the comet. These were confirmed by the

THOUSANDS INVOLVED IN CARLOS' KILLING

On Fellow-Conspirators in Portugal's Royal Family.

[Associated Press Cable.] Lisbon, May 25. — The Government is awaiting the completion of the investigation of the statements made by an anarchist named Ramires, before taking action against those named as the conspirators in the assassiation of King Carlos and Crown Prince Luis in 1908. Ramires escaped to Brazil following the assassinations, but was recently arrested and brought back here. Subsequently he made a confession and gave to the police the names of 1,148 persons, including several prominent in politics, who, he said, shared in the conspiracy.

According to Ramires those selected for the killing were divided into four groups, and placed at as many points along the route of the royal carriages in order that if any one group failed the others would be prepared to execute the death designs.

MANY NEW COURTS **OPENED LAST YEAR**

Courts Very Busy.

Toronto, May 25.—During last year eight new courts were opened in On-tario, according to the annual report of Mr. J. B. Macdonald, inspector division courts for the province, which was issued yesterday. Of these three were in the district of Nipissing, at Elk Lake, Englehart and Cochrane; one in the district of Haliburton, at Dorset; one in the county of Lincoln, at Grimsby; one in the county of Oxford, at Tavistock; two in the county of Peterboro, at Havelock and Keene; and one court, in the county of Renfrew, at Calabogie, was abolished. The new district of Kenora, embracing part of the territory formerly included in the Rainy River District, was also created, and division courts continued at Kenora and Wabigoon. The district of Rainy River, being thus changed,

has now three courts only. That an immense amount of business is transacted in the division courts of the province in a year is proven by the tabulated figures in the report. The returns for the 337 courts in the province show the following totals; Number of suits entered, exclusive of transcripts of judgments and judgment summonses, 61,-397; amount of claims entered, exclusive of transcripts of judgments

and judgment summonses, \$2,255,-437 90; number of transcripts of judgments received from other courts, 3,-507; amount of claims received by transcripts of judgments from other courts, \$190,071 13; number of judgment summonses issued, 7,523; balvious year, \$27,416 45; total amount of suitors' money paid into court \$859,727; total amount of suitors' money paid out of court, \$850,778; balance of cash in court, \$29,112; summoned, \$1,362; amount of fees I take thee, Taminis, daughter of and emoluments paid to the treasurer

Sugar.

London, May 24.-If, as certain social economists allege, the consumption of sugar is an index to a country's object is to refute the malcontent agiing drained to England.

The pamphlet shows that India's sugar consumption, which would be falling off if the people were becoming impoverished, is, on the contrary, increasing and now amounts to 44 pounds a head a year, which is well above the sugar consumption in Germany, 36.50 pounds; France, pounds; Austria, 22 pounds, and Italy,

Sugar is cheap in India, the average price ruling 2 cents a pound, although the country imports about tius and elsewhere. In Italy, on the cents a pound. The countries that show the highest sugar consumption are Australia, 129 pounds; the United States, 84.85 pounds; the United Kingdom, 81.19 pounds; Canada, 75.03 pounds; Switzerland, 65 pounds and Denmark, 55 pounds a head annually.
