As will he tren, the Act only conveya In out Hee to the Government of India the authorty needed for introlucing the latended reforme leaving ull constructive detalls to be filled out by the latter In regalations and rules. Six months were occupied la that task hy the Indian Gove eroment, und the resulting prescriptions were publinhed ou Novernber 15th, in a document fill ing tial pages of pritat. The following ls a sum. mary of them, commalicated to The Times by les Chilcutta correspondeut:
" Tbey comprise', firut, a short notice bringing the new (onucils Act iuto force: stomilly, the rules and regulations for gilding the constltutime of the enlarged impierial and I'roviociai Comells, with elcetlon riles; thirdly, rules for the dlweusslon of tbe ammal financial statement and yeneral resolutions and fur the asklag of questions: and, fourthly, a Government resulu. tion explaining the reasons for the changes made and their maln detalis.

The resolutinn show: thnt the Imperial Comell will consist of 88 members, while the mamber of members la emeh of the I'rovinclai Comnctis will be ns follows:-Bengul, it: Malras and Bombay, rach in: the Enited Provlaces, 49: Eastern Beugal and Assum, 43 . the limjab, 27, and l3urma, 18.

The Viceray's ('ouncil lass an official majority of three, while all the Prorinelal Conscils have non-oflitial maforitios, ranging froms 14 in Beneni to three in Burma. In the V'ierray's Council the Mahometans will have in the tirst Comncil six members alectod hy purely Ma. homelan ilectorates, and will also presumably get seats In Sind and the Punjab, as the resohithon sitys that $\pi$. representntive of the Ronibay landlaciliers on the Imprertal (onncil will he elected at the first. third. and sabsequent alternate clectlons by the Sind landholders, the great majority of whom are Malomedan, and at the other electons by the Sirdars of Ginjarat nad the Deccan, the majority of whom are Hinulus.
"Agnin. the Pinjab landholders conalst equally of Maliomednis and non. Mahomednas, and presamably a Malomedan wlll be alter nately chosen. Accordlngly, It bas been de.
ellided that at the serond, fourth, and allernste election, when these two ceate shall not be helit by Mahomedans, there shall to two opecial elec torates conalating of Mabomedan laadtuolden who afre entitled to vote for the member repre. w-atigg them In the Imperial Council, and the landownem of the Unalted Provinces and of Eiast. ern Bengal and Amam reapectively. The Bhom. bay Mahomedan member of the lingerial Coun cll will te elected by the non-officlai Yuhomedus members of the Irovincinl Council.
"The tha and juk induntrles get Are mem bern on the l'rovlinclal Conncils of the Bengals and Madrue.

- All members are requirenl tis take the outh of alleginner to the Crown brfore sitting in any of the ('ounclls, and no person is elf.iblic for clection If the Imperlal or a Provincia! (ior ernment is of oplulos that hle election wowit in. contrary to pulilic intereat. This providion take's the place of the shid power to refret niem. bern selected by the electorate.
"T1. examination of the annual Enanctal pro ponals is ilviled Into three parts. The first allows a chance for diw usslug any alteration in taxation and any new lonn or grant to a lical Government. Inder the necond any head of revenue or expenilture will be explalincid hy the member la chafge of the Department concerned ani any resolation may be moved, nril at the third stage the Flanice Minlster prevents his buiget and explatias why any resolutions will not be accepted, a general discusslon fillow lng.

The resolutlon conctuden an follaws:

- The new Provinelal Councils will assemilm early In Jamary and the Inperral Connell In the conrs. of that month.
". The marimum strength of the Councils Wan 126: it is now 370. Thure are now 195 clected members agatast 39. Whille an elected meniler will sit as of rlght. needing nom effitial confirmation. The functions of the Conneile are ATeatly enlarged. Mor le res candemand furilur information in reply, formal answers mil disenssion will lie nill,wed on all matters of public Interest. They will aiso In future ln in hled to take a real and active part in slapimit Gnancial proposals Ther will have liberal ip. portunlty to criticire..nal to linitlate and suggest deflnite resolntlon:..
As operalise at the center of discontent. in Bengal, an unfurtunate defect in the regulations was sonn discovired, whitb nade tronthe at once. It was reported to The Times us folluws: "The r"gulatlons for the clection of tbe new Comneris have prodnced a political situation hire which will be scarcely latelligithe to thone who are not acquainted with the pendiarlites of the liengall sharacter. The cducated dasses in (iol enta were in despnir when they dheous red that the rales virtualiy excluded their leaders and the mare cxtreme men actzed the opportunits of nd vorating a boycott of the reforms. Sir E. wand Baker, however, promptly recognisell that the regulations refuirell madification. The rule which restricted the candidates for the rupre. sentation of district hoards and mundepatilites En prearnt members of these bodics was ai wice altered so as to include those who had at any time served for thrue years on a local anthority. The effect of thls concession was to rerder il gible many previously excluded. Further, whea

INSURANCE, Life: The Legislative Investigation of Companies dolng business in the State of New York, in 1905 . - Startiag Disclosures of Vicious Management in the greater organizations, and of Perfunctory State Superintendence. - Report and Recommendations of the Committee. - Remedial Legislation. - A conflict the the Board of Directors of the Equitahie Life Assurance Society of New York, which came to public kuowledge in Fehruary, 1005, afforded the beginning of exciting revelations, as to practices and conditions lu tbe management of the stupendous organizations of life insurance that are centered iu New York City.
The Equitable Society was founded in 1859 hy Ienry B. Hyde as a stock company, with a capital of $\$ 100,000$, in 1000 shares, and netther its iegai constitution nor its capital had been changed; hut its assets at the end of the year 1904, according to its statement, had grown to the enormous total of $\$ 412,434,380$, and it heid a surplus over liahilitics of $\$ 00,384,861$. This prodigious fund had come under the control of the hoiders of the smali capitai stock of the company - $\$ 100,000$; and practicaiiy it was controlled by one stockhoider, James Hazen IIycie, son of tbe deceased founder, who har inherited a majority of the shares. By the Charter of the Society, fts stockholders were entitied tosemi-annuai dividends at a rate not exceeding 31.2 per cent., and its husiness was to be conducted on the mutual plan: that is, earningaand rectipts above divideuds, iosses and expenses were to be nccumulated and poiicy holders were to be credited with equitahie shares of the net surplus, after sufficient deduction to cover outstanding risks and other obiigations. Nevertheless, the opportunities for personal earichment, afforded by the controliing of the great floods of money poured into lts coffers had been found to be immense.
James Ilazen Hycie. inheritor of the majority of stock, was Vice President of the company. Under the terms of his father's will he had not yet come into personai possession of his luherItaace, but would do so in a short time. T'e President of tie company, James Alexander, appears to have become anxious as to the use the young man would make of the power of that possessiot when it came to bim, and he entered on a movement toward changing the organiza. tion of the Equitabic Society, to make it a multuai institution in reality, by securing to the poiicy hoiders a voice in the eiectlon of direc. tors, ieaving their hoard no longer a boily to be closea by a single man. Tiis movement hecame neeessarily public, and the situation tu the company was exposed to puhiic knowledge in a sunddun and startling way. Fiood-gates of discuasion were opened and questions started which ran from the Equitahie to other mammoths of life insurance organizatlon tilat had grown up. Fucts came to light wbici showed the magnitudie of financiai power they had drawn into small circies of men and families, and the ex. travagance of compenation appropriated to themselves hy some nf these self.appointed and self-perpet uated adninistrators of fife insurance funds. Such disciosures hecame the sensation, not mereiy of a day, but of months.

At the outset of the undertaking of President Aiexander to reform the conatitution of the Equitabie, Vice.President Hyde was able easily to defeat his movement and malre good his own
mastery of the board of directors; but as mastery of the board of directors; but as the puhlic became a party to the controversy, more and more, it buse down Mr. IIyde. In A prli the directors were constrnined to appoint a com.
mittee co investigate and report on "the present
management of management of tiic societs." The committer, composed of H. C. Frick, E. II. IIarrillan, Brayton Ives, Corneifus N. Bilss, and M. E: Ingais, made a report ou tbe $2 d$ of June which was a deadly indictment of tbe soclety, oa manv counts, - for "excessive salarics, exerss. ive commissions, excessi ve expenses, supertluous officce." and a "general looseness in the administration of its affairs." Mr. Myde and his boarl made a show of disputing the findings of the committee and rejecting its recommendations, hut the atmospheric pressure from outside proved Irresistible, and tiney gave way to it. Mr. Hyde sold his i02 shares of stock to Thomas F. Ryan for $\$ 2,500.000$ cash, Mr. Ryan making It $n$ condition of the purcbase that the IIon. Paul Morton, formeriy prominent in railway ad. ministration and lateiy Secretary of the Navy
in I'resident Rooscrelt's cahinet, should be In I'resident Rooscrelt's cahinet, should be and siouid have a free hand in reorganizing its managerent. Mr. Ryan then. on the 15 th of Junc, placed tbe sbares in a voting trust, composed of ex-President Grover Cicveiand, Justice Morgan J. O'Brien, andi George Westinghouse. The deed of transfer to these trustces empow. ered thein to carry out a pian of mutuaiization. to the end that the society's policy hold rs should elect a majority of the directors in its board.
The Equitahle Life Assurance Soctcty was now in a fair way to be placed on a footing that wouid justify its name; but the events which accomplisineri this land created an Impera. tive demand for thorougb procecdings of iaw, to reform and reguiate tie whoie system nuifer which titc profoundiy serious obligations and responsibilities of lifc insurance are fultillid. The ifrst step to that end was taken by the Legisiature of the State of New York on the 20 th of July, 1905 , when it appointed a joint committee of the Senate and Assembly and directed tine committee " to investigate and examine inw the business and affairs of life insurance companies doing husiness in tile state of New York, with reference to the investments of said companles, the relation of the offieers thereof to such in restneuts, the relation of such companies to subsidiary corporations, the gov. ernment and control of said companies, the contractual relations of saidi companies to their poilicy hoiders, the cost of iife insurance, the expenses of sald compunies, and any other phase of the life insurance husiness deemed br the committec to be proper, for the purposi of drafting and reporting to the uext session of the Legislaturc such a rerision of the iaws regulatlng and reisting to Hfe insurance in this State as sald committee may deem proper."
Tbis most notabie investlgating committee was composed of Senators Wiliia: W. Armstrong, Wiliam J. Tuliy. D. J. Riorian, and As. semblymen James T. Rogers, W. W. Wemple, Ezra P. Prentice, John McKeown. It was or.

## INSURANCE

gaized on the ist of August, with Senator Irmstrong as its chairman, and opened puhlic hearings on the 5th of September foliowlng, having engaged for lts counsel Mesare. Charies E. Hughes and Jarnes McKeen. Mr. Hughes was little known to the puhllc at large when he accepted the duty of conducting this investigation. It revealed hlm to the State and the Fatlon, and was the fortunate introduction to pubilc life of a man of rare nohility in character and of remarkahle powers.

Eighteen Insurance companies doing buslness in New York were subjected to investlgation; hut interest in the proceeding was centered wlth Intensity on the prohing of the affairs of a few of the greater instltutions, such as the Equitahle, the Mutusl Llfe, the New York Llfe, the Prudentlal, and the Metropoiltan. The dlsclosures were rich in sensation; a few only can he noted here. As to salaries, for example in the Equitahle, the late Henry B. Hyde and hls successor. Mr. Alexander, as presidenta, had recelved $\$ 75,000$ per annum in the eariy years and $\$ 1010,000$ lu the later ycars of their terms. James II. IIrde, graduated from college in 1898 and made vicc-president 'he next year, on hls father's cicath, received In the first year $\$ 25.000$, in the ncxt $t$ wo years $\$ 30,000$, in his fourth year $\$ 75$. 000 , and thereafter $\$ 100,000$. Second vlce-presjdents were paid as high as $\$ 50,000$ pcr annum: third vice-presldents as high as $\$ 40,000$; fourth vice-presidents as high as $\$ 30.000$. Salarles of secretarics and comptrollers had run up to $\$ 25$. 000 and $\$ 30,000$. Thirtcen executive olficers In the society whose salaries aggregated $\$ 297,000$ In 1900 , were drawing $\$ 448,500$ in 1905.

Executive officers ln the Mutual Life surpassed even this experience of lounty. The president's salary hadi been $\$ 30,000$ from 1877 to $1 \times 85,850,000$ from 1886 to 1892 , then raised to 875.000 in 1898 , to $\$ 90,000 \ln 1895$, to $\$ 100,000$ in 1896, and to $\$ 150,000$ in 1901. Richard $\mathbf{A}$. IcCurdy had been president for twenty yenre and vice-president for the preceding twenty. The vice-president's salary had grown from $\$ 20,000$ in 1877 to $\$ 00,000$ in 1002: the treasurer's had been $\$ 40,000$ since 1896 .
Iu the Ncw York Life the salary of the presi. dent. John A. McCall, hal stopped its increment at 8100,000 , whlch it reached in 1901 . The second vice-president's salary went to 875,000 the same year. The total anlarles of cxecutive officers were raised from $\$ 149,000 \ln 1898$ to $\$ 322,000$ in 1905.
Agency conmisslons were sometimes richer sources of lncome than the fixed saiaries of these geuerous companles. In the Mutual Life Company, the preslilent's son, Robert H. HcCurdy, had an interest In the general agency of the company for New York Clty from which he drew $\$ 530,788$ between 1889 and 1904 : hesides which. ns superintendent of the foreign department of the compnny, he was paid commisslons on its foreign busincss which yieldeal him 81,268,390 betwcen 1886 and 1905 ; some part of which commissions, bowever (to an amonnt not ascertaine(l), were shared by bim wlti his partner in the Niew York City agency. The total net profits of that metropolitan agency,- In which the president's son-In-la w was like wlse a partner, were found hy the investlgating commlttee to have been $92,889,128$ In the twelve geara 18981804.

These, however, were not the worst, in their
moral implications, of the disclosures that resuited from the search light brought to bear on the administration of certaln ilfe insurance companies hy the Legisintive Committee and Mr. Hughes. A startling siture of the prodigal expendItures of some hoaris, front the excesslve profits of thelr husiuess, went secretiy, with no acounting, to undiscoverahie purposes, which were purposes, of course, that would not bear questioning. The following, from the report of the investigating Committee on the Mutual Life Company, is indicative of the giimpses given of foul uses to whlch the funds of that company were applied. "For a considcrable period," says the report, "it has been tise practicc for the Committee on Expenditures to authorize the payment to its chairman of 825,000 every few months, or from 875,000 to $\$ 100,000$ a year, upon the request of one of the executive offlcers. The persons to whom the moncys were to be pald by the com. pany, or the services, if any, for which the pay. ment was to be made, were not known to the committee, and the only voucher was the recelpt of the chalrman of the conmittee who recelved and pald over the money in cash. There was no reason for this practlce save to conceal the purposes for which the moneys were used, and it ohviously facilltated improper payments.
"There were a lso a iarge number of payments charged to legal expenses which were made upon the recommemintion of one Andrew C. Flelds, who for mnny years was the hend of the sapply Department. He was in actual charge of and gave a large part of his time to matters of leglslatlon. For many yeurs the company malntained under his care a house at Albuny, and through him and hls agents a close wntch was kept upon the proceediugs of the Legislature. The rent of thls house, the supplies there consumed, nnd the wages of the cook nnd other servants, were charged to 'legni expenses.' Fields ieft for parts unknown soon after the Conmittee hegan its henrings and it has not been able to procure his testimony. It nppears, however, that lie acted aiso for the Equitable, nui from their records have been profuced a series of memoranda of Instructlons sent Fields by Thomas D. Jordan, its comptrolier, whosc whereabouts the Committee has heen unable to nsccrtain, although it has male diligent effort to do so."

The Comuittec quotes extensively from these memorands of "T. D.J.," who instructs hls AIhany lolibylst what bills the latter is to "kill" aud what he is to support. Tinere are depths of corruptlon suggested by this story of the hospitable Andrew Ficids, the vigilant Thomas D. Jordan, thelr "lcgai expenses" for hospitahie house-keeping at Albany, and the sudden vanishment of both when Mr. Hughes began to do his questioning; hut the depthe are left unfathoned, becausc the Commlttee found no sounding line.
"The testimony taken by the committee," says their report, "makes it ahundantly clear that the large Insurance companies systematlcally attempted to control legislation in this and other States whlch could affect their Interests, directly or indirectiy, and that ln thls effort Fields, who concerned himseif mainly with this Statc, played a most important rôle. The three companies [Mutual, New Yorls Life, and Equitable] divided the country, outside of New lork and a few other States, so as to avoid a waste

## INSURANCE

## INSURANCE

of effort, each looking after legislation In Its chosen district and bearing its appropriate par of the total expence." The so-called "iegal ex. penses" of the Mutual in seven' years, 1898 1004, exceeded two millions of dollars. "In 1904 they amounted to $\$ 364,254.95$, while thowe of the New York Life and Equitabie for the same Jear were $\$ 172,698.42$ and $8204,019.25$ re. spectively."

The New York Life employed one Andrew Hamition to give attentlon to matters of legislar thon throughout the country, and the company was found to have pald him no less than $\$ 1,167$. 697 for "legal expenses," between 1895 snd 1005 , no vouchers being fled beyond Hamilton's receipt. And these "legal expenses were in addition to all the ordinary outlays in connection wlth suits or legal proceedings or the worls of the legal department of the company."

In tiie accounts of the Equitable, "' among the disbursements charged to legal expenses ap. pear annual retainers of $\$ 20.000$ pakl Chauncey M. Depew [United States Senator from New York and $\$ 5000$ (for one year - 1000 - 87500 ) to David B. Iiili. Mr. Depew testiffes . . that his servlces consisted of advlsing the late Mr. Iyde in regard to matters of investment, settlement of controversies and troublesome questions of various sorts.

During this time Mr. Depew was a director and member of the Executive Committee. The testlmony as to the services is very general, and it loes not appear," says the comnittee. "that ousside of those which the society was falrly entitled to receive from him as a director, the services were such as to warrant the payments male The Equitable contributed to the Republican Nationnl Commlttee \$in. 000 in 1904 ; indoubtaliy contributions were made in prior nntional campaigns, but their amount he. "ot been stated. For many years the society has made an nnmal contribution of $\$ 10.000$ to the ilepublican State Committee through Sctator Piatt." Senator Piatt wns a collector. nlso, ot sinillar contributions from the Mutual lise, and thut compnny gave $\$ 40.000$ to the Republican National Comnittee in 1904, as well as smaller rums in previous years.
Of the management in these great companles of the enormous surplus of profit. which even their inordinate self approprintions ieft in thelr kecping, no clear account eould be given here. It is set forth in the Committee's report by ex. amples of investments, in stocks, bonds, and real property, so conductel, throurh subsidiary orgnnizations. cte., ns to gield a persona! proft to the skilful financlers within the life losurance cirele. The detalls which make the matter plain cannot be abridgell and retulre more space than can be afforded in thla plnce.
From the investigation of the life insurance companies the Comnittee and its counsei passed to the Sinte Department which was instituted to scrintinize and supervise these organlzntions, for the detection and prevention of such abuses in thetr manngement ns had now eome to light. Their findings in this dlrection were stated partly
as follows:

It would seem that the Superintendent [of Insurance] has hnd ample power, and has heen cbarged with the correlatlve duty, to inquire into and to nscertain the transactions of insurance companirs, to the ond that abuses may be exposed and correct administration assured. The
echeme by which the superintendent may $r$ e quire detailed written statements duly verifled a: to any matter of corporate husinese and may supplement thene atatements by an examinatlon of the company's books snd of the officers and agents under oath, would appear well calculated to prevent the secret growth of improper prac. tices. Not only through the visitorial powers of the superintendent were a whelesale publi. ctty and the consequent enforcement of the isw to be ausured, hut the superintendent was aiso charged with the dity of recommending to the Leglalature annually such amendments to the law as in hls judgment were needed to corrert evils found to he without the purview of extst. ing statutes.

But the supervision by the department has not proved a sufflelent protectlon against extravagance and maladministration. Annuai state ments from the corporations bave been received fled and published, but in many particulars Wlthont sufficient detail to exhibit the real if. ficiency of honeaty of the management. Nor has there heen suitable effort upon the facts actually reported to detect and expose evasions of departmental requirements and the resort to artlfice and double dealing in order to avold a true disclosure of the companles' affalrs. For the most part a critical cxamination of the reports so made seems to have been neglected. and the verification of the annual statements has been ieft to examlnatlons conducted at ip. regular intervals. No rule seems to have hern adoptei with reference to the frequeney of examinations. Thus the Security Mutnai Insur ance Company has been examined four times since its relncorporation in 1898, at its request and apparently with no other object tian to en able it to use the department's certlicate in support of its annunl stntement. wille the Pror. dent Suvings Life Assurance Soclety has been examlued only once in the past ten years (1 $\times 9$ : and lt would seem that thals was the only exnmInation in its inistors. The Metropolitan Life Insurance Company has also becn exnminet only once during ten years, that is, in 1000 . The advisability of frequent examinatlons is sull ciently Hustrated by the case of the Washing ton Iffe Insurance Company, whrre it appessed on the examination in 1914 that during the in terval of four years since the prior examination it hal, in at least two nnnual statements. de. ceived the department by glaringly false returns of its exlsting liabilities, and that instead of having a.a alleged surplus of considerable amount its capital wns serionsly impaired. In connec. tion with thls company it may be noted thint a more careful scruting of the reports to the le. partment of lapsed and restorel poiicics would have led at an earlier date to the fuvestigatlon which appears finaily to have been induced by outslde criticiem."

As to remedlal legislation, the maln recommendatlons of the Committee were in substance these: (1) Investments in stocks of lmanks and trust companies. In the common stock of ny corporatlon, in syndleate partlcipatlons. and fin speculative bonds, to be forbidden. (2) No polltical contributlons or fohby expendlthres to be permitted. (3) Full publiclty regnrding salnries and expenees. (4) New husiness of the otho three" companies restrleted to $8150,000,000$ a year each, and the business of other companies

## INSURANCE

limited. (5) Agents' commissions to be based on the amount of the policy and not on the amount of the premium. (6) Only four klnds of standard policies to be permitted - term, stralght life, limited payment and endowment. (7) Investment policies to be dlscouraged and deferred dividends forbidden. (8) All divldends on participating policies to be apportioned annually. (9) No company to be permitted to sell both participating and non-participating policlen. (10) The present trustees of mutnal companies to be removed. New ones to be elected under a system whereby the policy-hoiders really elect.
The Committee presented the elaborate report of lts lavestigation to the J.egislature on the $22 d$ of February, 1906, and lis recommendations were embodied for the most part in an enactment, the drafting of which, to a large ex. tent, was the carefui work of Mr. IIughes, the master mind of the whole proceeding of investigation.

The statements made above are drawn entireis from the Committee's Report, as published in volume 10 of the printed testimony and report. - Assembly Document Fo. 11, State of Neuc York, 1006.

## 1RELAND.

A. D. 1870-1903. - The Working of the successive Land Laws.- The Act of 1903. - Text of lis main provisions. - The French writer, L. Paui-Dubuls, whose work, L'Irlande Contemporaire, pubilshed in 1907, has appeared since in an Englas transiation, seems to have made a very earef iII and Intelligent study of the worklng of the succesalve iand.laws for Ireland. iuteruded to be beneficial to the temants, which began with that of Gladstone in 1870 (bee, under Inelasid, in Vols. III. and VI, of thla work). Mr. Glaulstone, himself, In the Act of 1881, endear. ored to remedy the defects of the Act of 1870 : but M. Paul-I)ubois tinds that, whlle the later Aet " brought and continues to hring immense good to the country," yet "the system estab lished by it is, us a watter of fact, no lon ger bearable for any one," - for the reason that "the first grent characterlstle of tic Giadstonlan legisIation is duality of ownershlp." It is, ns he ex plains, an unhealthy system. unsound both economically and soclally, - thls dual ownership. which turns the landiord and tenant lnto eo proprietors of the soil. It panaly ses agricuiture by preventing the investinent of capital on either side, and by destroying all Interest of elther land lord or tennint in the good farming of the land. The landlord feels himself no longer cailed upon to do anything for hls property, and has no care left but that of colicctling his rents. Thetenant, on the other band, refrains from making any 1 m provement or ad vances that might cnuse his rent to be raised at the next quindecennlal revision: the land is thus star ved of both la bor and cupital. We may add, also, that the new régime gives rise to mn intlalty of ruinous lawsuita between the co-owiners. . . . For a quarter of a century there has been ouly one class of men whose affultr have prospered. nanuly, the solicitors. Thelr number has incrensed by 30 per cent." In hils vlew of the results, 11. P'anl Inubois is sympathetic with both iandlords and tenmes. But in hls judgment the tenants were not fuirly dealt with under the Gladstonian laws by the Land Commission or be the conrts. The courts, especialiy, in inter. preting the Act of 1881 , which left "falr rent" undefined, establishled rulings which praetically nullitied the intentions of the law, untll, us this
 Irish judges to reason."

Eleven years hefore that time, however, a ifttle experiment was begun on the line of a true solution of the Irlsh land question, namelv, towani the buying of the soll of the islanil from lts landlords and maklng its eult|vaiors the owners of it. Thls wns in the Ashb. -ne land Purehnse Act of 188.5 . Which provided a fund of $£ 5,000,000$ for adrances to be made to tenant purehasers, with provlsion for the repayment of the lnan in forty-uinc ammultes. Iu 1889 this fund was increased to $£ 10,000,000$. By 1891 the fund had been exhausted, and " 25,867 tenants had been turned into owners of their farms. Its success even nlarmed somic of the landloris, who began to fear thint the farmers would comblne and force them to sell their land. However thls may be," says the French writer, "In 1891 the Con servative Government paseel a nnw Act whieh. under the protence of regulathg the progress of the operation, complicated it to such an ex
tent that the machine almost stopped working. In 1896, by another Act, the exlsting evila were slightty remedled, but oniy to an Insufficlent extent. . . . Flnally, in 1008, It was found that under the new system estabilahed in 1891 mad 1890, only 88,251 tenants had been turned Into proprietors: aud at that same date the total number of peasant owners erented from first to iast had reached no hlgher figure than 73,91\%. As Land Purchase was progressing more and more slowly, It was feit that some new inipulse must be given to the machine. Thls was the alm of the great Land Act of $1003 .^{.1}-$ L. I'aul. Dubols, Contemporary Ireland, pt. 2, ch. 1-2 (Maursel de Co., Inublin. 1008).
'The Irish Land I'urchnse Act of 1003 was in every respect epoch-making. It was preceded by, and founded upou, the report of a conference heid between the representatives of landlorland tenant iu Dublin. The Landlords' Conventhn, the offlclai representative of the iandlord party, held aloof and refused to joiu in the conference. Typleai inndlords, such as the Duke of Aber. eorn, Lord Barrymore, and Colonei Suunderson, refused to serve, ridleuilng the project as ab. surd and quixotic. Lord Dunraven ledi a saner seetion of inndiords, whith the result that, after a session of five dnys, the conference agreed to a report, upon which the government acted. The offleial landlords, seelng the reasonableness of the findlugs and recognizing their own folly succumbed at onee, and fell in with the general tendency for settlement. Substantiaily, the Act of 1903 aceepted the principle of unlversal sale of the landlord's interest to the occupler. It if. nored legal compulsion. IBut it accepted what was tinely called the principie of compulsion by inducerment. It piaced the sum of $£ 100,0(0)$, hhit ( $\$ \mathbf{5}, 00,000,000$ ) nt the disposal of landlori naid tenant for the purposes of the act. It went further, - for it enacted that out of a fund called the Land Purchase Ald Fund each landlord who soid should receive a bonus (Latiu for gift) of 12 per cent. on the purchase money. It nppointed a new tribunnl to administer the Art. And to thls tribunnl were given powers of re.settling congested districts by the purchase of grass lands, the enlargement of meconomle hollings. and the restoration of certain evicted temmets where possible." - Thomas W. Russell, M. P., The Working* of the Irish Iand Lave (American he. viete of Rerieras, Now., 1005).
The following are among the important provisions of the Iand Act of 1903 :
"1. - (4) Notwithstanding any provisions to the contrary eontrined lis the Purchase of Land (Ireland) Ainendment Act, 1888, nu all vance minsy be sanctloned under the provislons of the Lan! Purchase Acts not exceedlng the sum of seven thousand pounds to one puri haser wherc, ha the oplnion of the Land Commission, It Is "xpelient to make any such advance for the purposi of earrying out the sale of a holding to which the Land Law Acts apply.
" 2. - (1) In the case of the sale of an estate ad vances nnder the Iand Purchnse Acts may be made for the purchase of parcels thereof by the following perenns-- (te) A person bcing the tenant of a holding on the estnte; (b) A person being the son of a tenant of a lioiding on the
eatate; (c) A person being the tenant or proprletor of hoiding not excueding five pounds in rateahie vaiue, citucte in the neighhourhood of the estate; and (C) A person who within twentyfive years lefolo the passiug of thir Act was the tenant of a holding to which the Land Law Acte appiy, and who is not at the date of the purchase the tenant or proprietor of that holding. Provided that In the case of the death of a person to whom aa advance under this paragraph might otherwise have heell made, the advance muy be made, to a person nomlated hy the Land Commlsaion as the personal representative of the deceased person
"(2) Advances under this section shall not, together with the amount (if sny) of any previ. ous advance under the Land Purchase Aets then unrepaid hy the purchaser, exceed one thousand pounds:
"Provided that the ifmitation in this subsec. thon may, suhject to the other ilmaltations in the Land I'urchase Acts, be exceeded where the Laad Conmiasion consider that a iarger advance may be sanctioned to any purchaser wlthout prejudlce to the wants and circumstances of other persons residlng in the neighbourhood.
" (8) The Land Purchase Acts shali, suhject to the provislons of this sectlon, appiy to the saie of a parcei of iand ln pursuance of this sectlon, in iike manner as if the aame was a holdiag, and the plirchaser was the tenant thercof at the time of inls making the purchase, and the expression "holding" in those Acts shali include a parcel of land in respect of the purchase of whleh an advance has been made in pursuance of thls section. .
" 6 . - (4) In the case of a congested estate as defined hy this section, if the Land Commission, with the consent of the owner, certlfy to the Lori Lleutenant that the purchase and resale of the estate are desirahie in view of the wants and clrcumstaaces of the tenants thereon, then the Land Commisslon may purchase the eatate for a price to he agreed upon, and in such case the condition in this section as to resaie without prospect of loss may be relazed to such extent as the Lord Lleutenaut may determine.
"(5) The expression "congested estate" means an estate not less than haif of the ares of whleh conslsts of hoidings not exceeding tive pounds in rateable value, or of mountain or bog land, or not less than a quarter of the area of which is leid In rundiale or intermized plots. . .
"8. The La ai Commission may purchase any untenanted iand which they consider necessary for the purchase of faclitating the resaie, or redistribution, of estates purchased, or proposed to be purchased, by them, and the foregoing provlsions of this Act, with respect to advances for the purchase of parceis of innd comprised in estates, slaall apply in the case of the sale by the Commission of any parcei of such untennated land.
"9. - (1) There sinaii not be nt any time vestel in the Land Commission lands exceeding in the aggregate, according to the estimate of the Commission, as approved hy the Treasury, the capital value of five miliion pounds in respect of which undertakings to purchase have not been recelved hy the Commission.
"12. - (1) The Land Commidolou may take such steps and execute, or cause to be crecuted, such works as may appear expedient for the
benefit or improvement of cstates, or untenanted iand, purchased or proposed to be purchased under this Act, or for the use or cnjoyment thereof or generaily for the purposes of this Act.
"19. Where an estate is purchased hy the Land Commission and tenants on the estate to the extent of three-fourths in number and rateahle value have ngreed to purchase their hoidings, the Estates Commlssloncrs nay, if, having regard to the circumstarces of the case. they think it expedient, order that the remninleg tenants, or any of thens. slail be deemed to have accepted the offers made to them. and the Land Purchase Acts shaii apply accorlingly, where the tenant couid have ohtalned an advance of the entire purchase money, and the Land Commission have oflered ln the prescrihed manner to make the ndvance."
A. D. 1893-1907. - The Gaelic League. "At the eve of the great famine, the nuss of the peopie, outside the iarge towas, still spoke Irish; to-day purtly owing to emigration, I rish is oniy spoker by 600,000 persons, ont of four and a haif miilions, and that concurrently with Engilsh. Twenty thousand persons speak Irish oniy ; these are malniy of the Weat. . . . An. gilcisation had hegnn its work, when the old ianguage had been iost. Therefore, must not the Irish renalssauce begin with the readoption of thant ianguage \& So thought a small and èlite group of Irish patriots, men of talent and enthuslasm, imbued with the natlonal gospel preached by Thomas larls forty years carlier - a gospei which Ireland had to some extent forgotten smidst the sufferings of the Grest Fumine, Fcninnlsm and the Land Wars. Prominent in thls group was the descendant of an ohd i'roteatant fnmily of IRoseommon, a Ceitic scholar and folk. iorist, a poet of merit in English, n poet in Irish siso, so say the connoisscurs, Ir i)ouglas IIrde. lic had the genius for propiganula, and when the country was ripe for it, gave hody to his ideas hy founding the Gaeilc Lengne, with the aid of his early friends, in 1803 . The Gaelic lengme though to iinit the irish renaissance ly placing it under this title would he to limit its notual scope - may be said to be a faithfnl representative of the generai ldeas underlying the new Irish movemeut. It has cieclared its objects to be. the preservation of Irish as the national lan. guage, the study of nncielic Irish literature, and the cultlvation of $a$ molern literuture in the irish innghage. But we must be carefin not to judge it by its nnme. The Gaelic Lergut is not a society of schoiars, and leaves to others all that concerns literature and phiiology, pure and slmple. It is occupied with propaigancla, the application of its doctrine of a national renaissance on the basis of n nationai innguage. It intends to confer anew upon the conntry a psychological eduestion, and, hy means of the nathonal langunge, by the revival of national art and ilterature, and the reconstitution of a na. tionai social system, to regenerate its soul from withln and teach Ircland how she may again he a nation.

Thongh stlil growing, it has aiready in Ireiand 964 hranches, local nad popuiar centres of activity, whose work it is to spread the nationai ideannd tife national language by every leans, and to make them active faetors In the 'ery ciay life of the family and sociai circle. Thelr primary duty is to organise Irish langusge ciasses for the benefit of their members.

## IRELAND, 1801

IRELAND, 1902

These classes are practical above all in their crope, and are conducted sometimes by pald teachers and sometimes by generous voluntecr: whose work is almost always good. . . Such a teacher in the country manages, on his rounds, to hold a dozen classes or so regulariy every week. There are apecial classes for workmen, for students, for ladies; special classes for beginners, for veterans, Irish history classes, singing and even dancing classes, where the old na. tlonal alrs are tanglit and the national reel and jig. . . . In the summer, during holiday thme, the enthuslasts of Irish speceh conie together in the western villages for the Sooil Saoire (Summer school). There thelr teachicre are the old peasants, from whom they learn not only the correct accent, the music of the language, but the splrit and tradtion of anclent Irish cul. ture, of which tbese peasants. who, from generatlou to gencratlon, have gathered up the songs and legends of former times, are the most falthful guardians. In the summer also the Seilge are organlsed, that is to say, excursions to places of historical interest, with natlonal sports and recrentions. A sily in Galway In 1001 was attended by no less than 2,000 pllgrims. In the winter evenlags each hranch holds rcunions from time to time, lectures (seanchus), followed by discussions on Irish subjects, concerts (w/or. uidheacht). with choirs, Irish dances and songs and ceilithe, lnfornal meetings on the lines of ancient village gatherlugs, where serlous conversation - In Irish - alternates with music or a 'recital,' that ls to say, a story or a piecc of news, told, according to popular custom, by the author or a raconteur. Every year the Gaelic and Natlonal Festival, tbat of St. Patrick, is celelhrated througloout Ireland, but notably la Duhbin. A start - the first and greatest difliculty- has been madr. and now the Lcaguc is a power in Irelaud. It sells annually 20.000 Gaelic hooks asel pamphects, in which are included editiones principes of the pocts of the eighteenth century, and new Irish publications, tales, and novels Its financial resonrecs are molerate. They re present, however, the spontaneous obol of the poor : and a large part of the annual subscription to the Language Fund, during St. Patrlek's week, is made up of pence and of hulf pence. From the start the Leagne has had the grod sense ofticlally to declare that it was hoth necessary and desirahle that it shonld stand apart from all politleal and religious struggles: such has been its llne of conduct. and now within lt are found represcntatives of every party, from the strongest Orangemen to the flerecst sepa-ratists."- L. Paul.Dubois, Contemporury Ire land. pt. 3, ch. 2(Maunei \& Co. Dublin. 1908).
Public mectings have been held in Ircland durIng the past year (1009) to support the lemand of the Gaclic League "that the Irish languagc, both oral and written, and Irish history be made essfontial sulyjects for matriculation in tbe new national C'uiversity, and that proper provislon be made for the teaching of Irish in all its colleqes."
A. D. 1901 (March). - Census - " 4.456 . 546 Persous (2.197, 239 Males and $2,258,807 \mathrm{Fe}$ males) werc returned in the Enumerators' Summarles as constituting the popelation of Irelan:a on the night of Sunday, the 81at of last March -thus showlog a deercase slnce 1891 of 248 . 204 persons, or 5.3 per cent. - the decrease in
the number of males was equal to 5.8 per cent, and in the number of females to 3.8 per cent.
"There was during the decade a decrease of 41,297 pertons, or 8.5 per cent. in the Province of Leluster: 98,568, or 8.4 per cent. in the Provloce of Munster; 88,463, or 2.4 per cent. in the Province of Ulster; and 69,876, or 9.7 per cent in the Province of Connaught."
In 1841 the population enumerated in Irelanal as a whole had been $8,106,507$; In 1851 lt had been 6,574,278; in 1861, 5, 798,987; in 18i1. 5.412,977; in 1881, 5.174,896; in 1891, 4,704.750. Excepting in 1861 the showing is a steady decrease, and this latest census finds the isiand almost half depopulated.
" According to the Summaries furnished by the Enumerators, 8,810,028 persons returacil themselves as Roman Catholics, this number being 237,279 or 6.7 per cent under the number so returned in 1891: 579,88:5 were returncl under the head of 'Protestant Eplscopalians," being a decrease of 20,718 , or 8.5 per cent., compared With the number tabulated under that heud in 1891; 448.494 were rcturned as Preshyteriuns. belng a decrease of 1,480 or 0.8 per cent com pared with 1891 ; the number of Methodlsts ri. turned on the present occasion amounts to 61,255, being an lncrease of 5,745 or 10.4 per cent. on the number returaed on the Ceusus Forms in 1801."
In Dublin City, as extended under the Dublin Corporation Act of 1800 , the population euumerated in 1901 was 289,108 , being a gain of 20,521 since 1891. With the Urban Districts of Kathmines aud Rathcar, Pembroke, Blackroch and Kingstown added, the total population of Dublln and suburbs was 873,179, -an increase in the decade of 27,220 .

The following table shows the population of the 14 towas $\ln$ which more than 10,000 Inhabit an: 3 were found: compared with the enumera tion of 1891.

## A. D. 1902 (Feb.). - Lord Rosehery and Sir

 Henry Campbell-Bannerman at issue on the Home Rule question. - In a specch dellvered at Llverpool ln Fcbruary Lord Roscbery pronounced a most posititc funcral oration on what he assumed to be the death and harina of the Irish Ilome Rule questlon in British poli: tles. A few days later Sir Henry CampledlBannerman, speaking at the annual mectiar of the General committee of the Fatlonal litheral Federation, took occasion to resurrect thic supposedly buried issue and take it under his protection, as one of the responslhilitics of theLiheral Party. Home Rule, he eatd, was often spoken of as if it were " strange, fantantic, almost whimscal and mad-cap poilicy, rashly adopted in a random way, to secure the Irish sote. It is to be easily and lightiy dropped at vote. moment when an equal mount of support can be ohtained from any other quarterl Not a very nobie view of the casei Not, in truth, very creditahle or even a decent view of the case, hut lnteiiigihle enough if there were in tbe way no principles and no facts." One such fact he found in the "fixed constitutionai demand of the Irish people "; and Sir Henry concluded that the "oid policy" remains "the sole remedy for the condition of Ireland, which is the most serious weakness in the whole British Emplre and the most grave hlot upon its fame."

By these two sharply opposed utterances the Liberals of the United Kingdom were calied to declde which leading they wouid foilow - that of Lord IRosebery or that of Sir Ilenry, Not being in power, however, nor measurahly within reuch of it, decision of the party did not need to be made in haste.
A. D. 1902-1908. - Conditions in the matter of Disorder and Crime. - In the course of a debate la the British Parlisment on condltions ia Ireland. which took piace on the 24th of Fehruary, 1000, Lord Perey, charging the Liheral Government with responsibliity for an increase of cisorder and crime since it came into power, brought statistics in evidence as foliows: "Take the indictahle offences against property and firing into houses. In 1906 the total number of these offences was 20 ; in $190 \%, 29$; in 1908, 80. Outrages on the person hy the use of fircarms, agrarian and non-agrarian, were: - In the first 11 "onths of 1906, 20 agrarlan and 86 non-agra. I 15 , In 1907.56 agrarian and 53 non-agrarian; $\mathrm{i}_{1} 908,128$ agrarian and 65 non-agrarian. In addition to these open outrages there was the system of boycotting and Intimidation. In cattle driving - a new offence unheard of hefore the thays of the Chief Secretary - there were 300 cases in 1907 and 681 in 1908 . The number of persons under police protection on Jannnry 31, 1907, was 196 ; in 1908,270 ; and in 1909,835 . The cases of hoycotting had risen from 162 on Novent. her 30, 1905, to 874 on January 31, 1908. An int. pression prevailed that the cases of hoycotting were 'minor cases,' nad of no great importance; but the Lord Chief Justice, at the Clore Spring Assizes on one occasion, referring to these socalled minor cases, pointed out that no one dealt with or spoke to the hoyeotted person, and that be had to go 20 miles to Limerick for the neeessiries of life. People also had to yo to mass and to wedcings protected hy police; and he asserted that the Government could not point to a civilized country in Europe in which the fovernment would tolerate a large section of its population living daily and hourly under the shadow of a terror iike this."

The Chief Seer-lary for Irelani, Mr. Birrell, retorted with the fcllowing: "For the purpose of making a comparison between the condition of Ireland to-day und as it was when the Governinent was led hy the right hon. gentleman the leader of the Oppositiou. when they introduced and made permnnent their Crimes Act, We numst consider what was the state of things in 1886 ns compared with what it is now. I will give the Honse the figures. Murders in 1886, seven; in

1908, one ; manslaughter in 1886, three; now, none : Arlag at the person, 16 ; now, 15 ; firing into dwellinge-and here is a most formidahle add. tion, I admit - 48 ; now, 66 ; Incendiary flres and armon, 103 ; now, 54 ; tilitng, cutting, and maiming cattle-a horrihie and hrutal crime-78; now, 22 - far too many; riots and afrays, nine; now, 18 ; threstening ietters or nollces, 484 ; now, 288 ; intimidation, 82 ; now, 57 ; injury to property, 150 ; now, 89 ; other oflences, 136 ; now, 26 ; ahowing in 1886 a total of 1,056 , and now a total of 576 . On January 1, 1886, there were 175 persons whoily boycotted, and 716 partiaily boycotted - a totai of 891 . In those days, I admit, the police made no diatinction between partial and minor boycotting. In 1887 there were 145 persons wholly hoycotted, and 763 partiaily boy. cotted, making a total of 908 . On January 1 , 1009, there were 15 wholly boycotted, 10 par. tialiy boycotted, and 172 cases of minor boycotting, making in ali 197. Pcrsons under constant poilee protection on December 31, 1887, numbered 252 , nad those under protection hy patrol, 704 - a total of 956 . On Decemher 81, 1908, there were 74 persons under constant protection, 270 under protection hy patroi, a total of 844 against the total of 956 . I ieave the Ilouse to draw their own inference from those figures."
An official return to Pnriament, from the Rogni Irish Constahulary Office, Duhlin Custie, of the number of cases of buycotting nud of persons boycotted throughout Ireiand on the 31st day of January, 1903, and on various days In several preceiing yenrs, showed 5 cases of cntire boycotting, affecting 26 persons, and 9 cases of partial hoycotting. affecting 39 people, on the date mentioned in 1008 ; 4 cases of entire boycotting, affecting 20, with seven cases of the partial boycott. affecting 35 , on the 31 st of July, 1007. Ou the 31st of July, 1903 , there hid heen 4 cases of entlre and 21 cases of partial hoyeotilng affecting 25 and 131 persons respectively : while the enses on the 31st of March, 1902, of entire boycotting had numbered $\mathbf{5}$. the partial cases 46, and they were directed in the tirst instunce against 26 peopic, and against 275 in the second.
A. D. 1905.- Defective working of the Land Purchase Act of 1903. - Inadequacy of its financiai provisions. - Baffled in the Western Counties hy cupidity of landlords. - The tirst two genrs of the working of the Irish Land Purehase Act of 1903 sufficed to show that the splendid promise of that measure eould not he reniized satisfactorily without fundamentai changes iu its pian. IBy that time the agrecments effected between landlords and tenants for transfers of land from the former to the intter culled for purchase puyments far in excess of the sums winich the Act , had provided for sitpplying it so early a stage of the operation. The process of transfer was chrcked und the fuelings that heiped it on were chilled by increasing delays in the completion of transactions When brgin.

But this was not the worst disappointment in the working of the Act. Another more serious is charged to the eupidity of landiords in the poorer countics of the west. In the article hy Mr. Thomas W. Russell from which a quotation is given abure lie explaina it as follows :
"It was quite impossible to apply the same rule to Connaught and to other similar areas as to Uister, Leinster, and Munster. In the west the

## IRELAND, 1905

## meLand. 1907

holdings are manall and hopelealy uneconomic in thelr character. Parliament felt, and rightly so, that to make the occupler of a tive acre bog bolding an owner wat to do him no good. Such - feat in statesmanabip merely freed the western landlord from a rinky security and transferred the risk to the atate. It was, therefore, enacted that the large gruss holdings which abound in that region, - and wbich are held by grazters on a tenure of eleren months, the object of the term heing to avold the creation of a tenancy. -should he bought and wherever possible should be distrihuted among the small boliers, thus rendering a decent living porsible. And in severul cases this has heen successfully done by the congested districts board, with the very best resuits. $\qquad$ The landlords as a whole protessed at the land conference and in Parhament their entire willingness to sell, provided they received a prtce equivalent when securely invested to their second term net income. To enable this to be done the bonus of $\{12,000,000$ was sanctioned hy Parliament. The whole thing was a bargain - a clear case of contract. And what the westerc landlords have heen guilty of is a simple breach of faith. They are quite ready to sell the bog holdings, the harren mountain tracts out of which a decent living cannot be had, demanding for this wretched land in many cases more than is heing asked in Antrim and Duwn for the hest land in these counties. But the grass runches they refuse to part with. And so the whole plan of the act, - the whole scheme for the reserttling of the land, and raiging the station of the small holter, - has been hrought to naught.

- In thls coanection another difficulty has arisun. When the western sections of the act were heing passed, Mr. Wyndliam, - who was in prim carnest about these poor people, - provifed for the sale of congested estates to the estates comnissioners or to the congested dis. tricts board. Speclal inducements wea given to saln's under these sections. The eo-
was borne almost entirely hy the state, una : e eommissioners were authortied la such cases to spend money upon the improvement of the hoklings. The policy was excellent. But the landlords have ruinidit. They quickly dis. covered that if they sold to the estates commis. sioners the laund would he inspertel by an expert raluer, and its price would depentupon its value. This was not their idea of how things should be done. They priferred to sell to the tenant lirect, against whom they could use the screw of arrears of rent. and from whom they could exaet a higher price. Hardly a case of salc to the estates commissioners has taken place under these well-meant scetions. And for the reasons stated.

The fact is, compulsory powers of purchase in all such cases ought to hare been frankly given. But to mention the word compulsion to the then chicf secretary was to send him iato a fury. Ife would not hear of It." - T. W. Russell. Workings of the Irixh Land Purchare Aet (American Reviev of Reriers, Nor., 1005).
A. D. 1905. - Formation of the Sinn Fein Party. - "While the nutside world was look. litg to the irish Partiancotary larty as the guardian of the natlonal conseience of Ireland, a Youag Ireland Party, determined, virile, thoughtful, ldealistic and, strauge though it
may seem, practical, was gradually forming, be coming a power sweeping away outworn deas, prowching ner and putting them lnto practice, and working wonderis in the revival of a genuine national spirit throughout the country.
Naturally, and very gradually, the various units gravltated toward one another; and, leas than two years ago, under the guidance of a Duhlla boy named Arthur Grifith, they elicted a Na. tional Council, and formed themselves into a party known as the 'Sinn Fein Party,' whinh included prohbhly three-fourths of the national tbinkers in Ireland. Since its inception, the sinn Fein Party has heen rapidly gaining power, raising itself upou the ruins of a fast crumbling Parliamentary agitation, and eventually frap. Ing into greater popular prestige when, recently, the ludicrous Irish Councils Bili was sulmittet] to the nation as the frults of a generation of Parliamentary agitation.
" 'Sinn Fein is Gaclic for 'Ourselves.' The doctrine of the Sinn Fein I'arty is that the salvation of a nation is to he wrouglit out hy the people and upon the soil of that nation, aad it holds that God helps those who help them. selves.' It asks Ireland to cultivate, what for a long time it neglected, self-reliance, and aims al regenerating the Irish nation, not merely po Itically, hut also linguistically, industrially, educationally, morally and socially. Almost ali preceding national movements male thr grave mistake oi considering politics coincident with patriotism ; the Sinn Fein policy provides for all round uphuilding of the nation, and is succcasfully workling aiong many lines on which no polltieal movement touched before." - Seumas MacManus, Sinn Fein (North American Revier, A! 7. 1907).
A. D. 1905 (Dec.).- Change of Goverament. - On the clange of goverament which touk place in the Conited Kingdom in Deceniber. Mr. Balfour readgning the Premierslip and sir IIenry Canplerll. Bannerman forming a liberal Minstry, the Earl of Aherdeen was appointed Lord Lleutenant and Mr. James Bryce Chic? Secretary for Ireland.
A. D. 1907.-Effects of the Land Purchase Act an seen by a revisiting Irishman. - Notwithstanding the defects in the working of the land Iurchase Act, as clescribed ahove. Mr T. P. O'Connor, the well-known Irish jouraal. ist In Indon, on returning from a visit to lreland in the spring of 1907 after a somewhat pro. tracted ahsence, wrote enthusiastically to the New York Tribune of the bappy wakening he had found in the eountry to a new Mif. "You are seeing in Ireland," said a lady to him, "not merely a revolution hut a renaissance," and le found her characterization to be true. Ile con cludes, too, that there was no exaggeration in her further remark, that " so much is going on in Ireland now tbat you dare n't leave it cren for a month." "Everybody," writes Mr. O'on. nor, "scemed to be doing something aad some thlng new for Ireland "; with Catholles aaid Protestants working together, as they have never worked before. And the main eanse of this "renaissance" is traceable to the working of the Iand Purcbase Act of 1 gos. Alrea!ly. says Mr. O'Connor, under the working of this splendid measure, nearly half the soll of Ireiand has changed hands, and " the second half will be transferred at a much accelerated speed."
" For neven cepturles there has been continual, bluody, a desperate war in Irelagd between twn races, and the prize for whici they fought - was the land. And now, at iast, before our own eyes, in this generation of men to which wo belong, this sechlar struggie is at an end ; the battle lias been fought and has been won; the iand belongs agaln to tite, ancient Ceitic race from which it w in stoien centuries sqo. . . If you want to reallze further what ali this means, do not forget that these people who are now hrought into full liberty are able to apprectate it the 1 re from the fact that the greater purt of them were born into slavery, and know all that slavery means. I myself, thougit no septuagenarian, can remember the tlme when the Irlsh farmers were driven th the polls to vote for their landiords like so many cattle. I remember the poor, wretclied, cringing slaves which they had to be in those not very far ofl daya; how they bowed and cried, - Yer llonor,' at every second word: and how, In fact, they reveaied hy their outward bearling the knowiedge that when tiley stood in the presence of the landlord they were confronted by the master of thelr llfe nr deatil.
"The despair of the impossible sltuation In the Irciand of 40 or 50 years ago was worse alnoost than the servltude. Tirere was no room left for hope lin a syatem which permiltted the landlord to rob the teannt of every addition the latter made to the we l of the goil; and there could be no lope or prospect ln a system which kept the tennnt llable to evietion from his hoidIng wirenever tise iandlord wished to do so. And now realize that on half the soli of Ireland the people never see a landlord or a iandlord's ropresentative; that every year hrings them mrarer to the time when they wlif be the ahsolute owners of their holdings; but they know that their childiren will sccure full possession ani compiete ownerninlp if they do not, and you can understand what a new strong tide of hope and exultation therc must be ln the breasts of these people."
A. D. 1907. - The Evicted Tenants Act. The healing of an Irish Sore of Twenty Years. - "The passlng of the Erleted Tenants Act in the recent session, defcesive though it may be in one respeet, is an admission on the part of ail partles in Parlinment that a long pending Irish eontroversy must be closed, and that the demand persistentiy ani pertinaciously nade by the great majority of the Irlsh menibers and people for over twenty years for the reinstatement of a iarge boily of evicted tenants must be conceded.
-The wholesale crictions of tenants, whom it is now decider to reinstate, were primarily due to the agrleultural crisis of 188.5 , wheu the gr (ent fall of price of Irish farm proiluce commenced. This areraged not less than 20 to 30 per cent. In respect of cattle and clairy proluee, tbe main sources of income to Irish farmors. Tenants for the most part paid their rents In that fear. hoping for better tlmes, but many who lived from hand to mouth, with little or no margin, fell into arrears. The position was far worse in the following year, when it became clear that the fail of prices was a permanent one. The Laud Court reeognised this by fixing jndicial rents at 18 to 20 per cent. less than those fixed hetween 1881 and 1885 . An universal demnad
consequently arose on the part nf ail other tenants for a reduction of rent In propor:ion to the new range of prices. They claimed thls not nnly in the case of yearly tenancles, hut of hoid. ings where judicial rents had been adjudicated before 188\%, anti of hoidings under leases. The majority of Irish land.owners in 1888 recognised the justice of the eiaim, and allowel rebatements of rent, averaging between 20 and 80 per cent. In respect of ali classes nf hoidings. The claim of the tenants was not for the forbcarance of the land owners, but was founded on right, on the traulitional claim to a property in their hoidinga -a cinlmi to which the ismi Act of 1881 had glven Parllanentary and legai sanctlon. That great agrarian Aet hai in fact estahlished Dual Uwnershlps of iand ln Irelant. It secured to the occt:piers a property ln their holdings hy ennbiling them to appeal to a Land Court for the settlement of rent, and hy giving them fixlty of tenure and theright of beepurathing or assigning their intercats. Beneficent and gencrous as the Act was, it had serious clefects.

- As a resuit of these defects the Land Act of 1881. great as it was in prluclple, did not aford a sufficlent remedy in the crisls cansed by the grent fall of prices in 1885-6. A minority of Irish landowners refused to follow the exampie of the iarger and hetter class of owners, and to make rebatements of rent in 1846. Tiey justifled their refusal on the ground tiat since tife Act of 1881 the tenants had no longer u ciain for forbearance in respect of rent. They insisted, therefore, on fuli payment, and began to evict on a iarge seale those in default.
"Numerous combinations of tenmits were formed to refuse full payment of rint and to resist evictions to the utmost. With the object of asslsting and strengthening resistance of the tenants, a new form of comhination was levled by Mr. T. Iarrington, M. P., known as the - Pian of Campaign' The essential feature of it was the payment by the tenants of an estate adopting it of 50 per cent. of the rent dhe lnto a common fund. to be administered by a committee of temants fo: the purpose of resisting eviction, and supporting the evicteri fanilies. The fund thas created was beyond the reach of the lnadowners nad of the individual members of the combination. It affordeci, therefore, ireat security for the nalntenance of the combination.
" The tenants, before alopting the pian, were adived to offer arbltation of their rents to titelr lanilorls. If evictions took place the tennnts were to stani by one nnotiter, and not to cone to nereement with tiseir landlorls, except upon terms that the evicted men were to lee relnstated in their holdings. Those taking larms from which tenants were evleted were to be rigldly boycotted.
- The plan thus devised mas conmended to the tenants of Irelanl, where handowners refused reasonable abatements of rents, by many of the Irish members, such as Mr. Dillon, Mr. W. O'Brlen, and others. . . . Mr. Parnell held nloof from lt, not so much from disapproval of Its method, as from fear that it mlght injure the Home Rule cause with Engllsh constltuencies. Many of the Catholic $\mathbf{i 3 i s h o p s}$ expressed their disapproval. It was denounced by the Government as a frauduent and dlshonest at tempt to break contracts. They proseeuted Mr. Dillon and other leaders for conspiracy under

## IRPLAND, 1808

## LRELAND, 1007

the ordinary lew. The Iried judgen pronounced the scheme of comblimaton to be a criminal conaplracy on the ground that it subjected landlonds co unlawful pressure.
$\because \mathrm{By}$ the commencement of the semslon of
1887 the Royal Conimiasion appolited by the Government to report on agricultural prices and the clalm for a revision of judr 'il rente, preslded over by Lond Cuwper, an ex-Lord Lleutenant, reported In favour of all that had been contended for by Mr. P'arnell in his BIll of the prevlous year. They emplatically aftirmed that a great and pernianent fall of prices had taken place. They advised that judiclal rents, fixed before the year Is85, should be revised and reduced, aud that leaselolders should be admitted to the privileges of judielad rents. The Gorernment, at the lastance, as it ls belleved, of Mr. Chamberlaln and the Liberal Unloaists, were compelled to legislate in accordance wlith this report.

Thls measure, whleh so greatly extended the Aet of 1881, was nccompauled by a new Coerclon Aet dispensing with trlal hy jury ln agrarlan caves, and cuabllog resldeut magha. trates - mere nomlneces of the Government to try and convlet ln such cases.
$\because$ The Act of 1887 , by providing a legal alter. aative, put an end to further combinations of tenants. The Ilan of Campulgn was not adopited In any fresh enses, It had beell put In force on 111 estates where the owners refused geueral abatements of rent. In of of these it liad the effect of indueling the owaers to eome to terms with thelr tenants for reductions of rent of a reasmable clunacter and sufficlent to avold further trouble. In sercnteen estates only the owners were obinnate, nid declared war agalinst thele tenants.
"After the pisslug of the Coerclon Act wholesale evietions were resumed on the Campaign eatates, und were supported by all the fores at the dlsposal of the Goverument.
In 1 s91, a grent step was taken by the late Government in the direction of a more concliatory attlute to the ericted tenants. In the Land I'urchase Art of that year a clause was liserted cnabling the Land Commissloners to admbthe cvlcted tenants as purchasers of holdings, where thelr former handords agreed to thelr relnstate. ment. Tbe clanse was to hive effeet for one year only, and very few transactlons took place under 1 t.
"Nothligg more was done tlll 1803. MeunWhite thls Irislt more remalned unhealed. The wieted men contlnued to live In temporary dwellugs near to thelr former homers, pathently raperthig relnstatement at sone future tine Nir fanve they been alstaken in this respeet, though many of them had to wult ulne more yeirs, und the remalnder still longer.
'In 11903 it beranie melsable for the Tory Govirnment to hid for the support of the Irish Nutionalisis for Mr. W yndramis meusure aiming ut ant unlversal seheme of hand purchase in Irelmit - 11 seheme offering very great lnduceIIP , to landlorils to sell to thelr tenants. It we. $\quad$ rain provided In this Act that the evietet temmentmight ber relnstated. not as tenants, but as owness by parchase of thrif former holdiggs. provlsion was mule for the advance of money from and Irlsh fund for buying out the I'lanters, for rebuilding the homses of the evlehed uren, for
reatocking tbeir farms, and for buying unten. anted land on which to replace the evleted men. Where It was not pomalble to relastate them la their former farms.

As a result, however. all the remalning Cumpalis estateat except thin were dealt with under thli. Act, and newrly all the men evleted from then were relnatated on the most favourable terma.
'The Act of 1003 , however' generons and suc. ceasful to far as it weat, fallen to deal with the whole casc. It is wantling in backbone - in coerclve power an against a realduum of latiel. ownera. Two Campalgn estates - the Clanri carde and the Lewls eatatcs - remal ned narle:ill wlth, and about 2000 temants evleted from nther. not Campalga, estates were left out In the cold It was to supply coerclice power for dealing whe these remalning cases that the receut Act was pamed." - Everaley, The Erieted Tenanta (Ireland) Aet (Fortnighty Reviev, Lue. 1007).
A. D. ${ }^{190 y}$ (May). - Proposed Bili for the creatlon of a Representative Conacll. - Rejected by the Natlogal Party. - Abandoned by the Government. - A Bll proposing half Way progress toward Ilome Itule for Preland was litroduced In the British Parlament by the Chlef Neeretary for Ireland, Mr. Augurtine Blrrell, In May, 1007. Its maln feature w ss the creatlon of a lepresentatlve Councll, not to be leglslatlve In fuistlon, but having large alluin lstratlve powers. This Councll was to conwht of 107 members, clghty two elected by the lriwh householders (lncluding peers and women), nuil tweuty fve uonalated by the crown. Eight of the exlstlag Irlah departments, Including agri. culture, publle works, congested distriets, alad the reglstrar's oftlee were placed under Its con trol and a new one, the edneation department created. Is addltion to the $\$ 10,010,000$ of annual expenditure controlledl hy these ilepartments. the blll 1 rovided for an lucrease of $\$ 3,2: 0,1400$ ti be spent onf puhlle works and "gcueral improwe ment." The provislons of the Bill dill not ex tend to the emstahulary, the eou:t4, the primps. or the Land Commlsslon. The Lard Letetenat was to have general supervlsory control.
Apparently the Likeral Ministry had been led to exper" hat Mr, John ledmond and other leaders 1 b Irlsh Natiomil l'arty wouble mect this me. - . , na an instullment of the self gos ernme aey clatmet for Irelamd. If so, then the 1 rs wha entenraged that expleethtint were erbarne by their followers, for the bill Was denonnced and rijertul, on mothon of Mr IRedmond, at a converntinn of the National I'aris In Dullin, on the 21st of May, and was theref, ere wheltrawn.

In offering thls plan of governament the Ene 11sh liberals had turned Buck to what was the original chlalstone project of Irish home rule. contemplated and d. usued, without result, by the Lheral calinet in 1880 . As Mr. Morley re lites In his Life of Gladstone, there were: wo maln oplnlons lnthe cabinet at that tlme: "Une fav vored the erectlon of asystem of represintative eounty gorcrament In lreland. The other view was, that hesides the county bonrds, there should be In alditlon a central bural for all Ireland, essentlally municlpal and not molitieal; in the main cxecutive and mimiuistrative, hut mlso with a power to muke bye lawn, raise funds, and plelge public credit la such modes as parllament shonli proplde. The ceutral hoard would take ofer
educatlon, primary, in part intermediate, and perhape even bigher; poor law und sanltery ad. nilulstratlon; and public works. The whale clarge of juatke, pollee, and prlsons would reunlo wlth the exeeutlve."
This deftnew, practically, a meusure of home rule withln the matue llinits that Mr. Birrell propumed. Itappears to have becu suggested to Mr. Gialstone by Mr. Chamberlalu and to have beet accepted hy the premker. with the undrerstanding that it would eatisfy Mr. l'arcell, for the time bolng, at least. It was not ncceptable, however, to a majorlty of the Cuhbet, and, when rojected. Glalstone remarked hitterly to wne of bla col. leqginas: "Withln al:* years. If it plense (iox to ware thelr llvers, they will be repenting fin sackrloth and ashers." The wewring of the sachcheth was not pestponed an long.
A. D. 1909. - Amended Land Purchase Act. - The defects which have been nutel aluve in the very promising Land Purehuge Act
 thon of It, untll the pressing neal of amendatory feydation was acknowledged by all parties, Whiledlrerenees of view, however, hetween diffrrent intrresta lurolved made the at tainment of
 pose. hronkht forwaril lu the nutubn of 1408. by the Cille Seceritary for Irelatil. Mr. Blrecti. wis mishal uver into the next sexdon, athl re Introxuced in Mareh, 1009. Mr. BIrrell then revlewisl the circinostancos which hai realered smpmbinfuts of the Ant necossary, stating that -.gs milliona hnd now been mbluesed for land purchase, and that there were peoding ugrecmuntsinvolsing the alvance of 50 millious. The total ucrevire of the land sollf and agreed to be sold ixcected 7,0 ' 00 oncres. The country was now ha the very lide of thle great agrarian revolution. Mr. yulbun, the anthor of the Act of 1023 , thougit that $\pm 100,000,000$ wimhlat sullice to carry this revolution through, but already tost, 1000,000 had beren ureomated for vind ther: was every reason for supposing that Mr. Wyndham's esthate shoull have betell $\{1 \times 3,-$ (Whi). wo. Whar regarl to the loss on the tlotation of lind stock, he expresmed the opluion that for a decule, nt any rate, it wonld be unsafe to masume that a blgher issue prlce wonlil be obtained than $\mathrm{E}^{*} \mathrm{~s} 5$, and he calcnhated that if nonhligg
 evonthally have to be male gimal by the ratepityers. It was imposslble to expeet them to heirr this conormous burien. and If the law were not umediol the schente of land purclasse mond bro:ak rlowin. Ilis jropensil in resard to the bonas was that, Instemal of fixlug it at 3 per rent. it shoulal be paid accorifug to a scale maler which the lower tise price given for the land the higher would be the honus. For thls at !eust $E: 3,000.000$ wonld he required over nnd ahowe the original $\$ 12,000,000$. By this Bill the Fiwhrquer was assuming, everythlng comsid-
 (H4). (ailing nitention to the princlpal provi. slons of the Bill, be reminded the flonse that lamidirds ware cmpowered to tike payament part!y lu cash and partly In stock at 92. Ile then mentionerl the steps that were being taken B., nccelerate the work of the Fistates Commlssloners and stated thnt ndrances to the amount uf $£ 10,000,000$ were never likely to be exreeded in one year; they now had reached $18,000,000$."

On a questlon arising as to one part, called a "bonus." provided for la the transaction of pur. chase, Bir. Wyndham, who had been Chlef Sec. retary ln 1003, and anthor of the original Act, mald. "Sume hon. rembers alttlyg for Englinh constluencles migut thlnk that the bonus was nut necesary. Thes might thlok that If the State lent lts eredit, landiond sad tenant cuuld come uterisa, and that the lonus was bomethlng thrown in as a nop to the lanillardy if the trausfer of land in Ireland were sporadle, he ugreed that lundlords might sell withnut the asslatane of a dilrett honus from the State. The yuestlon wo be sulved In Ircinnd, however, was that cif the geucral tranefer of ownershlp of tand throughont the country, and that, broudly apeak. lng. coull not be effectel unles the present owners recelved an equivalent to the income which they now enjoyed. In the past neariy all the eases of the sponidle transfer of nwaer. shlp of land had been got rid of, and there were now left those cases which coald nut be dealt with unless a bonus were glveu. It had been generalis rucognizel by all partles that a bonus shonlif be glven rither than that the land diticultles In Irelaml should continue, and six years ugo the decislon artived at was supported by the unablmous opinion of nil parties lu the House. Now it was proposed that the uneti. ad of giving a sulsannthil bonus at a unlform rate shouht he set ashite lu such it way us to increase the discrepnacy between pending and future agreements. Altendy by alterlug the rate of fustalments in future agreements, and by givln: stocis inatead of cash, they hul ereated a wide differcnee letween the two clamsers. On the top of that they wore now goling to do anay wlth the bonisse and apply a methol which be thought he rould he nble to show would prove most lujurle anilif It ilil prove injurivis, It would toueb the cardinal print in the whinle matter."

Mr. Wyndinm opposed the new BIll on this polnt, apparently withont succens Strong opproitlon to a praut of the powire of compulsory purchase whieh the Bill emhodled was raisen. In the llouse of C'ommons, as well as nitimately in the llouse of Loris. Its contrinplated elonges In cleallug with what aric culled "congested eas titu's" med "congeried ilisiricts," tring those in whleh the holdings of trunits ure foo small to yhell undeent living. Wrore also a sulhject of crit. Coism nal opposition.

The $13 i l l$ rerelved some amendment in the House of Comuens, hefore having lts thlrd readIng and pasage on the $18 t h$ of September. In the Fibuse of Lurds it met with harder trentment, nud was returned to the Commons with amendments whieb the latter rejeeted in toto. Infor. mal conferences brought bbont an accominodatlon of the difference: betweet the twn Hnuses and platcet the Act on the statute book. The peers ylehted on the questlon of compulsory purchase, as well as with regard to the tribuual whlch shnuld have a declding authority in the matter, these bring the two polints most in dis. pute.

A. D. 1909 (March). - Parliamentary Election - - Socialist, Republican, Radical, and Catholic Gains. - Conservative Losses. Large, but Reduced Majority for the Government. - Extensive changes in the represent. uthon of the mumerous parties in Italian polltics resilted from thr Iurliumentary electlons held in Murch, 1909 . As tinally reported, after sev. enty four second ballots had been taken, the outcome was as follows:
From seven Deputies the Cntholies rose to 24. The siveinlists went up from 26 to 42 . the ex. trenue Ihalicals from 82 to 42 , nnd the Ilepuhlienns from 10 to 24 . The partles of the Fxtreme Iaft hrei thus risen from 7 i to 10 s . The Modemte Liberals, or Constitntional Opposition, as thry eall thems lurs. elerlined the most, numbering between 60 and 70 . Ilut the galns made by the purtles of the extreme left had only recovered for them the ground they had lost in the eleetion of $1!04$
"Aulnteresting feature of the elcctions is that the I'ope's supporters are sald to have taken a mor: netive part than they have done slace the Inrinning of unital Italy. The I'upal ininbi. thin agninst golng to the joils wus removed in Reventy-two coustituencies, or one-seventh of
the whole number voting. The result has been no gain in Rome, where the Anti-Clerclal Uoc repeated its victories of the preceding year, and a fairly alight gain in the rural diatriet. la gencral, it may be questioned whether the Pupal non expedit has really kept Catholics out of politics to a very consderable extent. If we thie the enrolled electors in Germany, we find that they constitute 20 per cent. of the entire populn. tion ; in Frunce the ratlo is nearly 24 per cent. ; in Italy it in less than 8 per cent. At first sligh that would indicate thint an cnormons number of Itallins loycott the polis. We find. how. ever, that the Itallan franchise demanils not only the ahility to read and write, but a certain degree of additional elementary education. At the same time we find that in 1001 nearly $44 \mathrm{p}+\mathrm{r}$ cent. of all males over twenty years of age were illiterate. This at once nearly donhles the cloce toral ratio. Add the fact that there nre very considerable property qualitications for the franchise, and we get for Italy a mutio wot fur removed from Germany's 20 per cent. It would follow that the number of Italians who re. frain from availing themselves of their electoral riphts is not very large." - $\boldsymbol{N}$. Y. Evening Post, March 8, 1909.
A. D. 1909 (May). - Proposed Payment of Memhers of Parliament. - A Press desputch from IRome. May 9, 1900, reported: " Leave was asked yesteriay to introluce in the C'mminer of Deputies tro Bills for the payment of members of Parliancont. Aceording to the first Bill. proposed hy Signor Galli, all Deputies and sina. tors would recive $£ 240$ n year; the second $13 i l l$. proposed ly Nignor Chimienti, woudd miaho it payment of 24 s . for every sitting uttended. Signor Giolittl said that the idea of the pay. ment of members of Purliument was evidoutly paining ground, and that the Government woulit nut oppose the introduetion of the IBills. In the other hand, he cleprecated the contention which had heen ndvnneed, that the mom-paymeut of Deputies was in any way responsilhe for $u$ senaty attendance, and corucstly reomm. mended the Chamber to glve the question its very eareful consideration before committing it self elther vay."

## JAPAN.

A. D. rgor (July). - Unveiling of a Monument to commemorate the Adrent of Commodore Perry. - A monument to conmemorate the arrival of Commodore Perry in Jnpan. in 1858, was unveiled with imposing ccremonies, at Kurihama, on the 14th of July, 1901, that beling the forty.elghth anniversary of the event. Commolore liodgers, with three vessels of the Asiatic Squalron of the United States, sttended w represent the United States officiaily in the ceremonles of the day. The monument was erected hy the Japanese "America Association of Japnn."
A. D. 1901-1904.- Persistent occupation of Manchuria by the Russians. - Japanese negotiations and demands, without atiafaction. - "In splte of repcatcd promises to evacuate the polnts seized and heli by flusslan forces when, ufter the relicf of the L.egatons, these forces were withdrawn from Peking and Chill, to tre concentrated in Manchurla [see Man cucuia, in Pol. VI.], nad in dlsragard of the in. terests of the cither allies, the poliey of keeplng ull that she lad guinet, and of galing more as far as possible, was steadlly pursued hy luassia. . . . It was the prohable effect of a contluuell orcupation of Manchuria by Rissia upon their business interests which led Ureat Britain and America to widh that the repcatel Russlun assuramers of good faith townrd Chlmand toward ail forcign natious should manifest themselves In works. The case could not be whilly the same with Japan. II er interests of trule were, hadeed. If not at the the so large, mure close and vital than those of any other nation outsidie of China B1: her other Interests were lncomparable. So that when linssia fulied to enrry out her cagngements. even under a conreation whlch wiss so mith hin her faver (see, In this vol., Cunsa. A. I). 1901-1002], there was a reviral of sispichon and apprehension on the part of the Jupunese Government auld the Japanese perple. Sianchurln and Korea both pointed an index thuger of warn$\operatorname{lng}$ directed towarl Russia.
"It wny to further a peacefui adjustment of all the disturhed conditions of the interests of Russia and Japan in the Far Fast that Marquis for went. on hils way home from his visit to the Colted States, at the end of 1901, on an unofficis: mission to St. Petersburg. The fallure of the overtures which he bore difsouraged those of the leallng Japanese statesmen who were hoping for ame reconclliation whleh mlght take the shape of allowing Russian ascendency in Manchuria and Japanese ascendency ln Korea. It also strengtheneal the ennvletion which prevailed among the younger stateamen that the St. Peter-
burg Government regarded Manchuria as not only its fortress in the Far East, hut aiso as its path to the peninsula lying within sight of Japan's shores. The Japanese Government,' says Mr. D. W. Stevens, 'at last felt that the vital interests of Japan might be irrevocably jeopardlzed ln Korea as well as in Manchuria, if It eontlnued to remain a mere passive spectator of tiussian encroachments; and in August, 1903. It resolved to take a decisive step. In the most courteous formand through the usuai dlplomatle channels Japan Intimated at st. Petershurg that her volec must he heard, and hister ion in connection with Far Eastern questions In which her interests were vitully concerncd.' The answer of Rusgia was the appolntment of Admiral Alexelefl as Viceroy over the Czar's possessions in the Far East, with executive and admhinstrative powers of a semi-autocratic character.
Negotlations having ln view the peaceful adjustunent of the conflicting interests of Russla and Japan in the Far East, which were begun ly the latter country in the summer of 1003, were firther contlnuel. Mr. Kurlno, the Jap. anese Minister at St. Petcrsburg, was informed by Buron Komura, who was then Japanese Minister of Forcign Affals, that the recent conduct of Russiant l'eking, lu Manchurla, and in Korea, was the canse of grave concern to the Government at Tokyo. 'The unconditional and permancut occipntion of Manchuria ly Reussia would,' said Baron Komura, ' creatc a state of things prejudiciai to the security mad interests of Japan. The principle of eqial opportunlty would therehy be annulled, and the territorial integrity of cilina be impaired. There ls, however, a still more serions conslideration for the Japanese Government; that Is to say, If Russla was established on the thme of Korea it would be a constant monace to the separate existence of that emplre, or at least would make IRussla the domhant power in Korca. Jut Korea is an lmportant outpost ln Japan's llac of defence, and Japan consequently cossidcrs lts indcpendence ahsolutely essentlal to her own repose and safety. Morcover, the political as well as the commercial and Industrial interests and inliuence which Japan prossesses in Korea are puramount over those of other Powers. These interests and thls lnflucnce Japan, having regart to her own security, rannot consent to surrender to, or share with another Power.'
" In vicw of these reazons, Mr, Kurlno was instructed to present the following note to Connt Lamsdorf, the Russian Minister of Forcign Affairs: 'The Japanese Government desircs to remove from the relations of the two empirea
every cause of future misunderstanding, and beifeves that the Russian Government share the Bame desire. The Jopanese Government would therefore be giad to enter with the Russian Im. perial Government upon an examination of the condition of affairs in the regious of the extreme East, where their interests meet, witls a view of deflning their respective especiai interents in those regions. If this suggestion fortunately meets with the approval, in principie, of the Ruasian Government, the Japanese Goverament wili be prepared to present to the Russian Gov. ernment their views as to the nature and acope of the proposed understanding."
"The consent of Count Lamsdorf and the Czar having been obtained, on August 12 th articles were prepared and suhmitted by the Japanese Government which it wished to have serve as a hasis of undcrstanding between the two countries. The essential agreemants to be secured by these articles were : (1) A mutual engagement to respect the independenec and territorial integ. rity of the Chinesc and Korean empires, and to maintain the 'open door' in these countries; and (2) a reciprocal reeognition of Japan's preponder. ating interests in Korea and míRassia's speciai interests in Mancharia. These demands were uot altered in any very important way by Japan dar. ing ali the suhseqaent negotintlons. It was their persistent rejection by I assia, together with her long delays in ruplying while site was meantime making ohvions preparations of a warilke character, which precipitated tise tremendous conflict that foliowed some months iater." - George T. Ladd, In Korea with Marquis Ito, eh. 10 (copy. right, 1008, C. Seribner's Sions).
A. D. 1902, - Defensive Agreement hetween Great Britain and Japan.-An ngrecment of great importance, in the natisre of a defensive alliance, between Great Britain and Japan, was coneluded at London on the 80 th of January, 1802. On the publication of the Treaty, a few days later, it was accompanied ly a eommanication from the British Secretary Cor Foreign Affairs, the Margais of Lansiowne, to Sir C. MncDonnid, the 13ritlsh Minister at Tokjo, in which the artuating motives of the Agreement were set forth, as foliows:
'Sir : I lave signed torlay; witis the Jap. anese minister, an agreetnent between Gruat Britain and Jipan, of which a copy is inciosed in this dispatch.

- This agrcement may be regaried as the outcome of the events whicis have taken place dur. ing the last two years in the Far Fast, and of the part taken hy Great Britain and Inpan in dealing with thcm. Tíronghont the trribles and complieations which arose in China conequent upon the IBoxer outhreak and attack, on the Pekin legations, the two powers liave bern in cioseand uninterruptel communi ation, and have heen artunted by similar views. We liave each of us desirml that the fintegrity and indepenclence of the Chimse Empire should be preserved, that there shonfl be no disturbance of the territorinl status pus eithser in Ching or in the adjoining regions. that ali nations shotrid. within thosere gions, as well us within the ifmits of the Chinese Empire, he affomied equai opportanities for the development of their commerce and industry, and that peace shoukl not inly be restored, bint should, for the future, be maintained.
" From the frequent exchanges of views which
have taken place between the two Governments, and from the discovery that their Far Eastern policy was identical, it has resuited that each side has expressed the desire thet their common policy shouid find expression in an internationai contract of binding validity.
"His Majesty's Government have been largely inflnenced in their decision to enter into this im. portant contract hy the convietion that it contains no provisions which can be regarded as an indication of aggresaive or welf-seeking tendencies in the regions to which it applies. It has been conciuded pureiy as a measure of precua. tion, to be in :.jked, should occasfon arise, in the defense of \{mportant British intereats. It in 110 way threatens the present position or the legitimate interests of other powers. On the contrary, that part of it which renders either of the high contracting parties iiabie to be called upon hy the other for assistance can operate oniy whea one of the aliies has found himself ohifged to go to war in defense of interests whieh are common to both, when the circamstances in which he has taken this step are sueh as to establish that the quarrel has not been of his own sceking, and when, being engaged in his owin defense, he finds ilmseif threatened, not by a single power, but by a hostile coalition."
Agreement between Great Britain and Japan, signed at London, Januar 30, 1902.
- The Govermments of Grent Britain and Japan, actuated solely by a desire to maintain the atatu* guo and genersl peace in the extreme Last, being moreover specially interistevi ia maintaining the independence and territorial integrity of the Empire of China and the Empire of Corea, and in securing eqaal opportunities in those countrics for the commerce and indastry of ail nations, herelyy agree as follows
"Article I. The IIfgh Contracting Partieg having mutaaily recognized the independence of China and of Coren, deciare themselves to lie entirely uninfluenced by any aggressive tembercles in eiticr country. Ilaving in view, however, their speciai interests, of which thosi of Great Britain relate principally to Chinn. while Japan, in addition to the interests which sle possesses in China, is interested in a pecuilar degree politicaily, us weil as commercially and indistrialiy, in Corea. the IIigh Contructing Partics recognize that it will be admissibin fur either of them to take such merasures as may le indispensable in order to safeguard those fitereats if threatened either by tie aggressive action of my other Power, or by disturbances arising in C'iins or Coren, and necessitating the jnter. Fention of eftier of ilse Iligis Contracting l'urtles for the protection of the fires and property of its subjects.
"Anttele II. If either Great Britain np Japan, in the defence of their respective intur. ests as ahove dicacribed, shouid become in whemi In war with another Power, the other IIfoh Chis. tructing Partr will maintain a strict nentmlity, and use its efforis to prevent other Powers from joining in hostilitien against its ally.
"Article III. If in the above evcn: any other Power or Powers should join in hostilitie's against that aliy, the other high contracting party will come to its assiataner ansl will rrincluct thr war in common, and make peace in
motual agreement with it mutuil agreement with it.
"Anゥicty. IV. The IIigh Contracting Parties

## JAPAN, 1902

agree that nelther of them will, without con sulting the other, enter into separnte srangements with another Power to the prejudice of the intereste sbove described.
"Abticle V. Whenever, in the opinion of elther Great Britain or Japan, the above-men. tioned intereste are in jeopardy, the two Goveraments wili communicate with one snother fully and frankly.
"Artices VI. The present agreement shall come lnto effect immediately after the date of its signature, and remain in force for five yeara from that date. In case neither of the High Contracting Parties shouid have notifled tweive months before the expiration of the said five years the intention of terminating it, it shall remain hinding until the expiratlon of one sear from the day on which either of the High Contracting Parties shall have denounced it. But 1f, when the date ixed forlts expiration arrives, pither ally is actually engaged in war, the alllance shall, ipso facto, continue untli peace is concluded. In faith whereof the underslgned, duly authorized hy their reapeetlve Governments, have algned this agreement, and have affixed thereto their scals."

In August, 1905, the above Treaty was replaced hr a fresh Agreement of similar tenor, -se, below, Japan: A. D. 1905 (Aco.).
A. D. 1902 (Aug.). - Success of Prince Ito's Party in the Parliamentary Election. -"Thus far partles, so called, have been magnetized around nien. They have not erystallized along the sxes of principles. Marquils ito. ultra-eonserrstive in politica but radical and reformer in things soclal, is at one pole. Count Okuma, radleal in poilties, sternly conservative of social life and the traditionary ethics. is at the other.

The August eleetions of 1902 show apparently at least that the day of party goverament has dswned, for now and for the first tlme Msrquis ito leads in the Lower House a host of the friends of the Conatitution (Rikiken Seiyu Kui) that has an overwhelming majority of sests and in time of a 'division' neariy lf not wholly a plurality of votes. The returns are jus ${ }^{\circ}$ and the tahle stands about thus :
Seirt Kal (Constitution Friends) . . . 193 Irogressists. 108 Independents 108 Imperiallsta and others 21
"it was a smart stroke of poilicy for ito, two sears ago, to unlte ln one organization [see in Vol. Vi. of this work, Jaran: A. D. 1900 (Ac. otnt-()ctonen)] the Radicals under Iloshi Toru and his own following of elansmen, capacities and young statesmen.' It was the union of the strong and the suhtle, taking, the name not of a party hut of an 'Assoclation,' with a purpose of uphollling the eonstltution (in the Prussian sense), in order to control both the educational and the economie poliey of the countrr, to com. plete the radical transformation of the Japanege into a modern man, and 'to screen Japan's Western evolution against all possihility of reaction." - W. E. Griffa, in The Independent.
A. D. 1903 (Jane). - The Marquis Itc accepts Presidency of the Council to strengthen the Government, - To strengthen the Minlstry of count Katsura in the Dlet, the Marquís Ito, powerful heal of the Rikken selyu kai (Association of the Friende of the Constitution, - see

JApAN: A. D. 1900, Auacri-Octorint, in Tolume V1. of this work), foreseeling trouhle to come from the proceedings of Rusals in Minchuris, consented in June to accept the post of President of the Councli, and was joined in the Councli hy Marquis Yamagata and Count Matsukata. The Government was thus greatly reinforced for dealling wlth the diffeulties that now approsched very fast. A section of the Selyu-kal seceded from lt, however, and formed the Doshishukal (Assemhly of Fellow-thinkers), under Count Itagaki.
A. D. 1904 (Feh.-July). - Wer with Rassia. - Sudden opening of Hostiitites. - Occupe. tion of Korea. . - Battles at the Yalu. - The Armies in Manchuria. - Movement of Gen. Nogi on Manchuria. - Simultaneousif wlth the rupture of diplomstie relations with Rusda, on the 6th of Fehruary, 1904, the Japaneae Government diapatched from Sasebo a fleet of 7 battle-shipa, 18 eruisers, and flotillas of corpedo boats and destrogers, under Viee-Admiral Togo, whith transports conveying troops, to open operations of war. The transports were convoyed to Chemulpho, the port of Seoul, Korea, hy 4 cruisers und a number of torpedo boats, under RearAdmiral L'ryu; while Admiral Togo proceeded with the remainder of his fleet to Port Arthur. The troops sent to Chemulpho were landed on the 8th, and Admiral U'ryu, the next day, attacked a Rnssian crulser and gunboat ln Chemulpho harhor with auch effect that they were destroyed by their commanders. On the nlght of the 8th Togo's torpedo boats were sent against the Pussian tleet at Port Arthur and erippled it to a serious extent. A second body of 14,000 troops was landed at Chemulpho on the 15 th.

The Japanese had nuw a strong footing in Korea, with Seoul securely In hand, and the First Japanese Army, under Gcneral Kurokl, was ready to bugin its northward advance. Phyangyang was occupled on the 20th, after whieh further troops conld he lunded at Chinampho. saving a long marei. 13y the end of March there were about $45,000 \mathrm{men}$ la the force moving toward the lalu. The first eneounter with the Russians was near Chengjn. wherc 600 of the latter's carairy were driven haek. On the 4 th of Aprll the Japanese udvance guard reached the Yalu, which forms the boundary between Korea and Manchuria, and occupied Wijn, near Its nouth, the uppocing eavairy having been withdrawn to the opposite bank of the rifer on the preceding day. The main body arrived at Wlju April 20. The Russians, on the other side of the Iain, were then eoncentrating a foree of aboitt 25.00 men , whth Llaorang and Fraghuangehemg for its first and secondary has.s.

For ten ensuing dars both armies were busy in preparations and manceuvres. tic one for attempting to force a erossing of the lalu, the other to resist lt. How their preparations compirred In efiectivencss is described hy an experienced corresponlent. David Fraser, who accompauied the Japanese and wrote the story of the campalgn, pulhlishing it sulisequentiy in a hook entitled "A Modern Campaign." The difference that Mr. Fraser sow hetween the painataking. the thoughtfuness and the carefuliy acquired knowledge whieli went lnto the Japanese prepsration for their attack, - the cuncealment of their forces, the masking of their batterfes, the obscuring of all that they did, - and the con-

## JAPAN, 1004

## JAPAN, 1804

tranting carelessness of the Rustians in the same particulars, was the difference that gave silccess to the one and hrought defeat on the other. Be. fore the Japanese moved they knew everythlng they needed to know, - the fordahie places on. the streams they hai to cross, the polats of advantage on every mile of the ground to be traversed, the positions of the enemy, - and the Itustians did not. And the Japanese were ahle to repeat mueh of the same felntlig and maneu. verlug by means of which they had forced the pasage of the Yaiu at the same piacs, against the Chinese, in 1804.

On the 25th of April the Japancse were ruady to bring their preparatlons into use, and on that and the next two days they drove the Russian outposts from the islanda they n: eded to oc. cupy, and began buiidlng hridges at nlght. In the end, ten hridges were hullt, some of them invlsible to the enemy Many slgns of Japanese moventent down the river wore then exhlhited to the Ituaslans. A Japanese hattery became busy at a point some distance below Wijn; gun. boats and other vesseis were coliected in that direction; troops were ln motlou in the same direction: but quiet relgned st and around Wlju, the batteries behind whlch had not yet beto. kened thelr cxistence. That qulet In thls part of the Japanese line was broken sudieniy ut miuday on the $29 t h$, when a pontonu train, with accompanying troops, was liusied to the river. the pontoon. launehed, mannei and paidled to the opposli: bank. A liusslan outpost whlch fired on these Invaders drew the first revelation of a hitherto hidden and silent Japanese battery, and fled from its shelis. Possession of the fur: ther shore was thus secured for sofficient tlme to enable the construetion of the pontonu hridge, which the strong eurrent ln the river made a difficuit task. It was ready, however, for the erossing of the river that nlahit by the infantry of the entire 12th division of the Japanese Army.
The thrilling episorle of the battle of the next two days was the openling of fre from the hitherto hidden and unsuspecteci batteries of Japancse heavy guns. Mr. Friser wils us that the Kussinns hal belicred it impowsihle to bring heavy artilery over the liorean roads, and were In consternation when the howltzers belched forth their shells in a fairly orerpowering way. "The trees," he says, "screened the flasling of the Japanesc guns from the Russian eyes. There was no smoke to indieate thelr whereabouts. The lndirect flre of the howltzers was as destly as if lt liad bern aimed point-blank. The ilasslans, on the other hand, fred at ran dom into the belt of trees; they had been ahle to lorate only two of the Japanesc guns. Their firn had little or no effeet upon the weli proturted Japanese ginners. In ten minutes the IRusaian shanoting grew widd. ... After twenty tlve mintutes botit batteries werc silencel."

It is the tostimony of ali witnesses of the fighting on both days of the baitle, espeelaily on the lst of May, thint the Russians showed desperate courage; hut every adrantage, of posithon, of equipment, of numbers, and, ahove all, of generalship, was in favor of the Japanese. They irove the enemy from all hls entrenelimenta, and entered Manchurin, to pursue there an equally successful campaign, for the same reasons, of superior ahility and more thorough preparation.

The reported loas of the Japanese in the conAlcts on the Iaiu was ofticers and 218 men klled, 83 ofticers and 780 men wounded. They ceptured 22 tieid guns, 8 msehine guns, a quan. tlty of riftes and ammunltion, and took 628 pris. oners, inciuding 18 officers. General Zasulich, the IRusslen commander, reported 70 offieers ann! 2324 men kllled, wounded and taken prisoners. Another Russian report of losses gave 28 ofll. eers and 564 men kiiled, 88 ofticers and 1081 men wounded, and 6 ofticers and 878 men missing.
The Kussians retreated on Fengluangeheng, hut made no stand chere, and the Japanese, who followed, occupied the place on the 6th of Mar The advance of the iatter was haited at that polnt until late $\ln$ June, waiting for operathons In other parta of the field.
Meantime, between the 4 th and the 221] of May, the Secoud Japunese Army, Gencrai Okin eonmanding, had been landed near Pitsewo. on the wemtern coust of the Liso-tung peniusila, andi this hegan a generai advance on the 2ith It fongit a severe battle on the following day, at Nanshan, or Klnehou, from which the IBus sians feii back. The vletory of the Japanese cost them heavlly, thelr reported loss being ?:30 killed and 54ins wommed; while Gencral Stousel, the IRussian commander, reportci a loss of 30 oflicers and 800 men k tiled and wounded
On June 6th this Second Army was dividetl Into two, one of whieh, passing to the command of General Nogi, beeame the Third Japanesp Army, and was marehed presently toward Iort Arthirs, to opeu the famous slege of that stronghoid. General Oku, retalning ahout :0. 000 unen in the Seeond Army, and starthig notid. wa-d on the 15 th, was opposed by IRussim forcre under (remeral stackelberg. The first lmurer tant conflict was on June is at or neur Telisul station, which gave the battle lis name. Again the lussinns were forcel baek, with a loss of 108 offcers and about 2000 nien, hilled yin wounded, besides a mlssing list of 664 . The Japancse loss was 50 oflicers and 1113 men killed and wounded. Ilard thglitling excorred ngain between the 6th and 0th of Jinly, on tin approuch of the Japanese to kiniping and the Kaiplng River, begond which their opponems were drlven. "The occupatlon of Kalping ami the cominty Inmediately to the north placel General Oku's army on the edge of the lian Valles, opened the way to the Vingkon and Newehwang, and facilitated his further allance to the nortli hy allowing suppiles to be revived from the sea, thus shorteuing his line of communicatlons."

A Fourth Japmese Army, under Gimeral Nolzu, had now heen landed at Takushan, un the eastern coast of the Llau tung peninsula, and was reconnoltering toward oku's forms, us well as toward the First Japanese Army, which had remalned in the viefinity of Fenghuangeheng untli tie 24th of Jume, waiting for thest co operatlve mnsess of tronps to be got Into place. It was now belug moved lit three colnmns, one of which was son in touch with the Fourtl Army (Nodzu's), and the two began working to the west and northwest. The IKusslans gave up Fenshallling, and hy the Eth of Juiy, when Oki, with the Eecoud Army, accupled Kapha, the three Japanese armles in the northern part of the Liao-tung peninsuia - the Flrst, Seconl, and Fourth - "were united on a front from

Kaiping east to Fenshulling, thence northeast throingh Motlenlling. with covering detachments of Kobi troops eastward at Saimachl, Hsienchang and Ifualjen. The Itussians were concentrated In the Liso Valley at Tashihcbico, Haicheng, Anping and Laoyang." On the 6th of July Field Marshal Oyama had left Tokyo to take active command of this united arniy, and the great operatious of the Manchurian campnign were about to begin. - Ejpitome of the Rusw-Japanese War. L. S. War Dep't. Scond [3ilitary Information] Dieision, General Staff, No. 11 .

At thls time Genet. Nogl, with the Third Japancse Army, was fighting his way slowiy toward Port Arthur, against obstlnute resistance, not arriving at the front of the laud defenees proper until the 14 th of August.

The knssinne had evacurted Dalny (formerly called Talienwan), with its fine harlar, on Ta. lienwan Bay, thirty miles distant from lort Arthar, and the Japanese had occupied it on the 30th of May. This was an acqulsltion of great importance to them.
A. D. 1904 (Feb.-Aug.). - The War with Rustia: Siege of Port Arthur. - The Naval Surprise. - Unreadiness of the Defence. Naval operations of the aix months. - Fate of the Russian fleets in the East. - Mr. F.. K. Xinjlue, "accredited Linsslan War Corresponitent." who went through the whole experlenere at Port Arthirr, front first to last of the war, and who wrote whint he entlites "The Truth about Port Arthur," opens his severely critical narrative with the following statement: " When, one hour before midnight on February 8. 1904, our warships began to belrli fire from their many steel months, and the seaward batteriss sidifleuly thandered forth their ungry douth-denling tldings, no one dreamed that the nuive was War, for no one had tiken the constant rumors of the rupturc of dipionmine rela. tions and of approaching hostilities at ull warl. ously.

Alihough the sky in the Fast hul for weeks been hlool red with the menace of immenliatn war, yet when it came the surprise Whs absolute, its horror intensifled by our consplete unreadinesa."
What this writer tells of the unreadiness. and ${ }^{\text {F }}$ 'the slowness with which the serions neerl of inor. roadiness was couprohended liv the controlling anthority at Port Arthur. during the werks that passed before the stronghonid was fully invested, goes ilunost herond bilief. Ile wrltes bltterly and eontemptionsly of (ieneral Stossel, who held command of the disurict, amd almiringly of General simunot. Commandant of the fortress, whom Stiossel conll overrule. lle seems to have been sustainel in his judg. ment by the court-murtial which subsequently contemned Stössel to death.

The sound of midnight battle on its sea-front (February 8-0) which unnonnced a beginning of war to the surprisfll garrionn of Port Arthur came from the uttack of Admiral Togo's torpedo buats on the linssian Heet In the harbor. Three of the IKussinn ships wire crippled, but not serfonsly. The next day Togo made a general attack with his whole fleet of fifern ves. bels, inchudi.g five battie-ships, and did some damage to four more of his enemles' vessels; but a fortalght is sald to have repalred them all. The general result of the two operations
was "to lasure the at isust temporary lmmoblllty of the Port Arthur Heet, "so that " the transport of the army from Japan to Korea milght go on without fear of molestation." $\mathbf{A}$ spuadron vas then detached to look ufter four cruisers at Vladivostock, and that harbor was cannonaded for the same purpose on the 8 th of March. Meantime, on the 9th of February, a Russian cruiser and a gunboat, attempting to lenve Chemulpho harbor, were driven back, and were then deatroyed by thelr linssian commander.

The main Japanese fleet hovered constantly near Port Arthur, wot only unaintuluing a strict hlockade, hut making frequint close approaches, to sink vessela and plaut tuines in the entrance channels of the harbor: to harmas the Kussian flect with torperlo attacks, or to come boldly within range of lts shore defenses and glve battle to them, as well as to hombard the fortress and town. There were heary bombardments on the 10 th and the 22d of May. The Russian fieet, commanded hy Vlce-idmiral Makaroff, made retaliatory sorties, In returning from one of which, on the 13th of Aprii, the ad. miral's flag ship, the l'etropalovsk, struck aud exploded a line of thatiug mines. The liuge battle shlp was so shattered by the explosion that she sank in two minutes, currying diown the almilrul, the famous painter, Verestchagin, who was his guest, and sin) other oflleers and mun. Of all on lomard only were waved.

In the course of the next month the Japanese suffered severnl of the sume disanters, two of their battle shijas, the llatsise anil the Yashima, and two other vessels of less importance, being blown up by the exploslon of mines. Of the crew of the llatans? nemrly 500 perinhed, while all on loard the Iashima were salld to lave been saved. By collision in a fog one of the shapanese crulsers was sunk, witli ali but 90 of her crew. And the three tnost cialamitous of these happeniugs. to the two bathe-bhips and the erniscr, ow urred on the same day - the linth of May. Almirnl Togos ilcet was wakened vory seriously hy these losses. Somewhat later the same fitie bifell a nimber of kinssian ships, but the loss in them was less.

Though watchend by a Japanese semalron under Vice-Idmintl kianimura, the lenssian war shipa at Vlablionstock were able to slip oit for occasional ernises. in which they captured or destroyod Japanese trinsportsund neerchant ships. In more than one instance - notably that of the Kinsha Sharn-the suhliary on captured transports refused a. arreubler ind committal "hara-kiri" in $\quad v$ or were engulfed by the sen. "1t is 'f" ruc that the work dinar by the Vlalivos squadrou was unt great in amount. but the $y$ mint have cansed some imconvenience to the military forces of Japan engageif in the campuign."
On the 281 of June Rear Almiral Vithoft. Who had succerded the lute Admiral Makaroff In the naral command nt Port Arthur, sailed ont of the barbor with six batile-ships, flve craisers and teu torpedo boats, mparently inteading to offer buttle to the Japnnese. The Riassians hat repaired their damaged vessels and now seemed to have a fleet that was equal to Togos in strencth. siluce he opposed only four batthe.shipw to thelr six. Nevertheless when the Jupanase npproached them they Fithdrew, returning to Port Aithur, pursued by torpedo-boats, anil
mearly loalng the battle-ehip Sevastopol, which strucs a mine and was disahied for six weeks.

Little occurred during that period on the neral side of the Port Arthur campaign. Then, on the 10 hh of August. It was reopened startlligis. to be ended with practica! mupieteness wlthin the next few days. On that morning the Port Arthur fleet and the Vladivostock squadron put to aea from thelr respective harbors, evidently atteupting a junction. The Port Arthur fleet was the first to encounter its enemy, which it did the same day, when no more than 95 or 80 miles out from the port. Admirai Vlthoft now had with him only tive hattle-ships, having left one, probnhiy disahled, behlad. Wlih these were the four crulsers, two gunlooats and a number of torpedo craft. Admirai Togo hruught against thls force four battle-shlps and four ar. mored erulsers In the battle that ensued. It
" took the form of a loug. range engagement be. tween the fleets, steering nearly the same course tuwards the east.

At a tlme which is vari. ousiy reported, hut prohahiy about 6.15 P . M., m 12 inch sheil. . hurst near the connlag tower of the Cesarevitch the flagshlp], kllling Admi. ral Vlthoft and wounding the captain of the shlp. At the same time the Cesarevltch's ateer. Ing gear wa damaged, the helin jammed, and she made a suddea sheer to port. Thls threw the IUsalan line Into confuslon. . . . The liusslan formation was now hroken up, and the slips feli lnto a confused group at which the Jupanese dlrected a hot fire at the eompara. tively short range of 3500 yards. At times the Russiun ships were hldden hy the smoke of exploding slicils, aud about 7 P. M. their fire slackened perceptihly. One report states that a second-class hattle thip and two coast-defence vessels hal joinel the Jupanese, besldes another ship of a class uot certainly known. Tle whole twelre Japanese shlps concentrated their firc on the six Russian liattle ships and four unarmored cruisers till \& P. M. Prince C'khtonsk, who had sulecceded to the liussian commund on Admlral Ilthoft's death, then signalled to the flect to follow him, and turned toward Port Arthur. All could not follow, and some male for shelter la otleer ports, harrassed by turpedo attacks, hut not otherwlse pursied.

The result of the Russian sally from Vladirostock was nuch the sume. Tlie three armored cruisers from that port were not intercepted hy the Japanese until the morning of the 14th, threc days after the defeat of the l'ort Arthur fleet which they hatl hoped to join. They were then attacked by four armured and two nnarmored crulsers. They fought olostlnately und suffered frlightul losses in officers and men. -415 wounded and 951 killed. One of the ships, re. ducel to helplessucss, was sunk hy lis own sur. Siving crew, most of whom were plekci up by the Japanesc. The other two escaped to Vladl. vostock in a wrecked state.

These engagements "rcally ended the naval campaign of 1904 . Of the ships [from Port Arthur) that got through the Japanese fleet, one hattle'ship, the Cesarcvitch, snd three destroy. ers wert disarmed and interned at Klachow (Tsingtau): ne cruiser, the Askold, and onc destroyer haul the same fate at Shanghai, agd anotlier cruiser, the Novlk, was destroyed at Korsakovsk. A third cruiser, the Diana, was disarmed and interned at the neutral Freach
port of Salgon. One destroyer had been eeized at Chefoo hy the Japanese for diaregard of Chi neae teutrality. and one was wrecked on the const of Shantung. The rest of the tleet whleh got beck to Port Arthur remained there oniy to be destroyed in nearly every case hy their own crews, to mave them from the fate of being surrendered to their enemy on the fall of the fort. ress. - The grand total of the liusalan loss [of officers and men] in the sla battie-ships and four crulsers amounted to 81 klled and 420 wounded. $\qquad$ The total Japanese loss, as reported at the time, was 61 kliled and 124 wounded." Later statements brought the total ioss up to 225. - Admlral Bir Cyprian Bridge, in The Nacal Annual, 1905, ch. 7.
A. D. 1904 (July-Sept.). - The War with Rusaia: Csmpalgu in Manchuria. - Japanese advances; Russian retrents.-The great battle and Japanese vlctory at Liao-Yang. On the th of July the lkunsians, who had given up Motlenling to the Jupanese five days before, made an attempt to recoverit, hut fatied. They repeated the attempt on the 17 th, and aguln without success. On the 10th a force from the Fourth Japanese Army (Nodzu's), advanclug from Feashulling toward Tomucheng, met whit a repulse. The right column of Kuroki's aruy (the First) fought a conslderahle engagement with the Russlans at Iisltoyen on the $19 t 1$. Oku's army (the Second), advancing from Kal plng, funght them at Tashlnchlau on the 24th. Nodzu wus engaged with them agaln on the 81st at Tomucheng, and Kuroki's right column at I ushmingtzu on the mame day; whlle the feft columin, sinultaneously, expelled theiu from Fangtzulling. On the ad of August the lius. slans retired from Halcheng and the Jupanese occupied lt the following day. The Kussians had been steadlly furced back to the vicinity of Llao. Yang. where they had prepared thenselves for a determined stand.
"The front of the liusslan forces at and In the vicinity of Liao- Yang cxtended from Auslun. tien through Lautzushan and the mountain ragge east of Anping to the Taitzu Biver. Thic Jap ancse front extended from llalcheng throngh Tomucheng and Yuntzuling to Yuslinllingtzu." - Epitome of the Ruseo-dapancee War, U. S. Ilar Dep't, Secund I Military Information] Dic., General siafi, No. 11.
Both sides were now making ready for the first of the two most terrific battles of the war ; Jut the month of Anginst was near lis cluse before the Japanese began thelr assault on the formidable works hehind whleh the luassians awniterl their attuck. In the "Epltonic" citorl above the effectlve Russlan force taking jurt lin this struggle ls cstimated at about $140,0 \mathrm{NH}$. communiled hy General Kuroput kin.

Lord Bronkc, Renter's speciul correspondent In Manchuria, in hls hook eatlited "An Fyewitness In Mauchuria," describes the battle of Lan- Iang as '' the Hggest artillery battle of which history has record." The Russians occupled a llne of rocky bllls south and cast uf L'ao Yang. Oku opposed their right and center; Nodziu the center and left; Kuroki was farther east, intending to force the passage of the Tai tze-ho and reach the rear of thelr main hady Artlliery on hoth sides opeaed the battle at dawn, August 80, and a terrihle duel was fought for five hours. Then, at half-past cieven, Gen-
eni Oku dellvered the firnt lafentry amault, which cont a fearful low of life, and falied. Late in the afternoon a resc!ute turnling movemeat on the Rumian right was attempted by the Japanese and pressed until darkness came, with muecess only to the extent of driving the eaemy from one vlllage. Then a nlght attack on the Rusolan center was made, and that, too, was repelied.
The morning of the 81st hrought a renewal of the artiliery duel, followed by exeault after as sault from Oku's indomliahle troops on the Russian right flank, with the result of driving It back to the cover of the rallway embankment. Mesntime Generai Kurokl, whose army was on the extreme right of the Japtonewe line, had forced the passage of the Tal-tze-ho Blver, at a ford 28 miles east of Liao-Yang. This compelied Kuropatkin to withdraw some of his tmops from the outer foutlifeatlons south and east of LlaoYang and send them against Kuroki. The crisis of the struggle was now ln the battles fought on the next two days with Kuroki, in valn attempts to eut him of from the river ford and erush hls not iarge army. At the same tlme the Japanese were making a direct attack on LiaoYing and endeavoring to cut Kuropatkin's commualcations with Mukden. Neither lisusslaus nor Jspanese had suecess in these attempts, but the former were hrought to a situation which eompelled retreat. On the fourth of September they evacuated Llao-Yang and withdrew ir in the surrounding works. "As soon as the evac. uation hegan," wrote Lord Brooke, "the Japanese gins opened tire on the liussians, who hall for finc of retreat only the railway hridge and the two pontoons across the Tai-tze-ho. Nesertheless the retlrement was carried on with great coolness, and the loss sustained In crossing tine river whs comparatlvely smail ln view of the difflcult positlon from which the Rusuians had to extricate themseives. Ail the artiliery was got away. But if the evacuatlon of Llao-Yang was cleveriy effected, the army of Kuropatkin was still in great danger, and the Commanderin chici seemed really afrald that a large part of his force wonid be cut off. It was a reasonable apprehenslon, for General Kurokl's army hegan the day with renewed vigor. . . . In a melanchoiy frame of mind the whole ariny marched northward, with Kuroki continnally pressing lis flank and the fear that Oku woulil ere long be on hls heels."

Pursuit by the Japanese was given up on the morning of September 6th.

In the "Epitome" of the war, prepared and publighet by tie American Army Staff, the total Russian loss in the Llao- Yang batties is given as reported to have been of nffleers and 1810 men killed: :252 Gfteers and 10,811 men wounded; 5 officers and 1211 men missing. The Japanese reporteif a total lose of 17,539 officers and men, without details.
A. D. 1904 (Oct.). - War with Russia: Quiet Aspeet of Life during the War. Spartan Diseipiine of Japanese Feeling and Conduet. - "For ail industriai civilization the evinest is one of vast moment : - for Japan it is prohahiy the supreme erisis In ber natlonai iife. is to what her theets and her armles have bein doing, the worid is fully informed: hut as to what her people are dolng at home, little hes leeen written.
"To inexperienced obmervation they would appear to be doling nothling unusual : and thil atrange calm is worthy of record. At the beginnligg of houliities an Imperial mandate was lssued, hlddligg all non-combatants to puraue thelr arocatlons usual, and to trouhle themselves as little as posalble about exterior events ; - and this command has been obeyed to the letter. It would he natural to suppose that all the sacrificem, tragedles, and uncertalntles of the contest had thrown thelr gloom over the life of the capital In espeeial ; but there ls reaily nothlng whatever to indicate a conditlon of anxicty or deprension. On the contrary, oue la astonlshed by the joyous tone of puhlic conflideuce, and the admirably restralned pride of the nation in lis vietories. Western tides have strewn the coast wlth Japmese corpses; regiments have been blown out of existence ln the storming of poss. tions defended hy wire-entangiements : battieshlps have heen fost: yet at uo moment has there been the feast publie exeltement. The people are foilowlag their dally occupatlons justas they dld before the war : the cheery aspect of thlnga is just the same: the theatres and fower dia. plays are not leas well patronized. The life of Tokyo has been, to outward seeming, hardly more affected hy the events of the war than the IIfe of nature heyond it. where the tlowers are blooming and the huttertlies hovering as in other summirs. Except after the news of some great victory, - celehrated with freworks aud lantern processlons, - there are no slgns of pullic emotion : and but for the frequent distribution of newspaperextras, by runners ringlug beils, you could almost persuade yoursilf that the whole story of the war ls an evil dream.
"Yet there has heren, of necessity, a rast amount of suffering - vlewless and voiceriess suf. foring - repressed by that sense of sucial and patriotlc duty which Is Japanese religion.
The great quilet and the smiling t'arleasness tes. tify to the more than Spartan disclpline of the race. Auclently the people were trilned, not only to conceal thelr emotions, hut to speak ln a cheerful voice and to show a pleasant face under any stress of moral suffering: and they are olvedient to that teaching to-lay. It would still he thought a shame to letray persona! sorrow for the loss of those who die for Emperor and fatherland." - Lafendlo Hearn, il letter jrom Japan (.Atlantic Monthly, Vor., 1004).
A. D. 1004-1905 (May-Jan.). -War with Russia: Operations against Port Arthur. - Preliminary hatties. - Investment and Siege. - The Defences. - Desperate assault: in August. - Story of Lieut. Sakurai. - The assauit on 203 Metre Hiil and lis eapture. - Surrender of the Fortress. - Trial and condemnation of General Stössel. - As statell lieretofore, the Japanese begau landing their Serond Army, under General Okn, at Petslwo, for operations agninst Port Arthur, on the 4th of May. Very quickly thereafter the railway was cut and Port Arthur was blockadied by land as well as hy sea. On the sth the last truin from the north was brought in. i3y the 25th Okn was ready to advance, and on the foilowlag dar he attacked the Russians at Kin. chou the baitle bearlug sometlines the name of Nan-shan), and expelied them from that position, the loss of which, according to the correspondent Nojlne, sealed the fate of Port Arthur.

## JAPAN. 1004-1005

He accuses General stomel of haring boast fuliy ansumed that the Japanese could never take Kinchou, denounclng an truitury ail who questioned the sufficlency of ite fortitication and urged the strengtheuing of the works. The expulsion from Kinchou neceasaltaterl the abaudionment of the inportaut port of Daluy, whech was done with great haste on the nigbt of the 26th. "in Dnlny." anys Nojlue. "there were numarous hulldings, docks, and the most aplendiri breakwatera running out into the sea for a distance of one and a halt niles. . Owing to want of time nuthing except a few of the raioway hridges was blown up. ... Bealde the numerous town, barbor and raliway buihi. ings, there was an inmense amonnt of private lomse property, as weli as large wareionses. stocked with fixil and stores of ail sorts, both puhic anai private. The enerny got possesslon of thein all undamagei, just as they were. After the capture of Artinur the Japanese con. fessed that ly not destroying Dalny we had assisted them enormonsiy in their difticuit task of disemharking their siege-train, and that the railway had enahled them easily to get it juto positiun in the investing lines.
"The enemy having now taken compiete possesslon of Dafily, at once used it as therir lase. There, quictiy aud comfortaliy, without uny interference fromi nis. they carried out the land. ing of troups for the investment. Ten trans. ports wouid arrive daijy, hringing everything necessary for the concentrating army. The railway from Dalny nod all the rolling stoek wus in perfect order: . . . our tivet did not himler them in any way; they had command of hoth hand and sen."

Un the fith of June Oku's army was dirided, that general ieading part of it (stili calicd the Scrond Army) northwuri, leaving the remainder, as a Thirid Jupunese Army, under General Nogi, to conduct the investnient and siege of Port Arthar.

At abont this time, according to Nojine, Sthssel was persuaded by Smirnoff to permit the lat. ter to fortify some of tine outer hills of the peninsula, which had bern neglectesi hitherto: these were Kum san Hiil, the Green Hilis, Angle IIill, Wolf's ilill, Ta kio shan ami Sla-gu-shant hilis. "Thi fatter, "says Nojine, ${ }^{\circ}$ ware of immensc importaure, as they were quite inaccessibie, and protectad the whinle of the western front of tie Fortress, but only so long as Woif's Itills were in onr possession." On the 2fith and 2ith of "June tine Japmese attackel and captured Kuen san and Green Imils. The latter were recovereib by the Russians on the 4 rh of July, but they faiied to retake Kums san. The firss if the iatter was very serious: for the Jnpanese from its summit could lonk into the works on the Green Hifis and, ly telcjibione, direct the fire o: their bat. teries on them.
Toutil the gifth of Inly not much oncurred, as the ussailauts wrre buay st rengthening the positions they had acipulred. Then they began a determined attack on Green Hilii, and continucd it through twodars Ou the morning of the $2 \times t$, the Ruswians gave up the position and drow back townris jort Arthur, to what is called the II "'s Hillsfine. They were driven from thin on the 3uth, and the ciose Investment of Port Arthur began then. - E. K. Nojine, The Truth about Port Arthur, ch. 11-22.

As deacribed in the "Epltome of the RussoJapanese War" prepared for the U. B. A. Gen. eral \&taft, the immeiliate "defences of Port Ar. thur, divided into eastern and weatern sectors ly the valiey through which the railway enters the town, consisted of permanent masonry forts Whose gorges were connected hy the oid Cinurse Wali, cemporary works conatructed just prior to and ciuring the siege, and connecting and ai. vance trenches. The west sector foliowed an ir reguiar crest. with an eievation of alsout 500 fert. around the new town, and terminated on Lan. tiehsina, the highest polnt ln the viefinity, wlit an elevation of about 1000 fect. The east sector encircied the ohd town at a distance of from two to two and a half miles, running along an irreg. uiar crest, abont 350 feet in eievation, within which was an eie vation (Wangtal or Signaj hill) of about 800 feet. Thie permanent forts wre polygonal in trace and had ditches with capo. nieres and galleries. The gap betwcen the two sectore was covcred by the fort on Palyushan (Quail Hiii).
"Of the works most Intiauately connccted With the siege the Sungshushan, Eirrlungshnn, North nnd East Tungchisuanshan, Itzuslian, and Antzushun forts were strong permanens fortifications. Tise two Pnngiungahan forts. East and West, were senil permanent redouht sbaped fortifications; 203 Meter lifl and Aksakavama were semi-permanent works with two ijnes of alvance trenches. Kuropath in Fort was a strong feid-work with deep (iftel) : the Shuishi hyung junettes were niso provided with ditches, but not so deep. I'. H., Kohu and Huciimakiyama were nore in the nature of semi perma. nent trenches with bomb-proofs." - Fintome of the Rusoo Japanese War, II. N War llept. Necond [.Militury Iuformation] Division, Gencral Staff; No. 11, pp. 2ष-20.

In tbis fortress, for the first time, werc utijised ail those tcrrihie agcncles of war which the rajid wivance of science in the past quaricr of n century has rendered aviliahic. Anong tiese we may muntion riphd.tire guns, machine guns, suokeless powder, urtiificry of high velocity and great range, high exjunsive shells, the magarlue rifle, the udescopic sight, elving narveiloms accuracy of fire, the ruage linder, givfur instantanconsiy the cxact distance of thic enemy, the search ligit, the tejegraph and the telepinne, stariglit bombs, harbei-wire catumglements, anis a dozen other inventions, all of whilil were diel.:ed sufficient, when appicici tor such stuperndons fortificatlons as tiose of po: Arthur, to render tinem alasointely impreguable:
"The Russians believed themito be so-rer. tainie the indomitahie Storsci ditl. And well he might. for there was no recori in instory of any race of Oghters, at ferat in moficta tilices, that coud face such dentid-dealing weapous and not melt away so swiftly before their fary as to le. swept away in deficat. But a new type of fighter has arisen, as ther surquei was to icll."Richard Burry Tr, Mr Port Arthur Hill (turt nightly Rer.,: . 1903).
"The frst ing. mriment from the iand sille begau suidenly ... August 7 .

The boinhardment contínue ali day, though doing little materlai damage Fext morning, from : : 5 A. M., we hearl heary musketry fire from the direction of Ta-ku-shan : the enemy leaving the: town and the main defences in peace, were curn-

Iag their attentlon to it. Tinishlil correnponded is the cast to 208 Metre Hisi in the' west. snd was equaily important and equaliy unfortitied. It smi Dla.gu-shan, the naturai forts of Arthur on tiss castern front. isell a hud time. In the first piace they had not been muic the most of, for in the origiual pian of defence of l'ort Arthur they hail heen thought to he important juinta aul so hai been neither fortifieni mor armmi us their iwsi. tlon with reguri to the Furtrens warranted, and Salrnof hai only receutiy succeesied in arming them to a smali extent. In ties seroni piuce they became, after the shandoament of Woif's IIlilis, open to thanklog flre, and tiarefore untenable. The companias of the 13th Finat siberiall Iafle Kogiaent seat there went it eraily to their death, but, together with the gumers, they heib on as loay as posaibie."

Ibith of the hills rere taken by the Japanese that nipht. The liu slaus inumediat cly concen. trated a heary artiliery fire on the wew occll. pants, and tive next duy thcy atteniptedi to retake Ts-kusinun by aswanit, hut fulfod. On tive 11 tit they roperated the sttempt, whith no leetter suc. cess. On the 16th Geacral Nogi sent in a flag of truce, beuring the proposuli of "a discusaiog of negotlathos fur tie surrenior of the Fortress," sayiag: "' Tho liusalans have givell slgnai proofs of their galiantry, hit Artiur wili be taken ail the same." Tise invilution was de. clincul. Oa tire $20 t h$ the Tapanese galned Angie Iill and I'an-inn-shan redoubt ; but the lhasslans reraptared the iatter on the foliowing nigit.

The: Japmese now hoperi to te abie to take the Furtress by a gencral assault, and made the ntempt with extrannliaary veternination on tie 21st. 23) and 23d. "0n the night of the 23k," writes Jojine, "tive Jrpanese inate the muat desperute of ull their atticks so far. Tiney made thre): separate und most determinei assuuits on Zaredonit Buttery, on the line between it
 tiry. Though temporarily succissfui at one or two poiats. they were finaliy olriech lack out of ail with siocking siaughter." It is of this nssault thnt Lientraant Tmlayoshi Kakurai tella the terrble story in one of the chapters of inis book, entitled "Iluman Bullets: A Sohlier's ktory of l'ort Arthur," from which the foilow. ling is quoted.
"i gatliered my men around me and said: - I now bibi you nii farewell. Fight with ail your might. ithis battie wili deride whether i'ort Aitbur is to fail or uot. This water ymbl dirluk, pionse drink as if at your denth manment.
" 1 thlel a cup whis watcr that was fetchent by one or two soliliers at the risk of their lives, anid we ail cirank farewedi from the same cup. simon we roetiveli orders to advanee to a point half-way up the sible of Pauluag. . . . This fortress of $i$ 'aniung had been captured witi the thenh and blomi of the Jiath Division of the surenth and Figith Regiments of the Second is.uerve, nul whs how un important hase from whici a general nscunt on the urthern forts ut East Klkuan nui Winntai was to be made. This critical spot was fabily taken uftor a terribie struggle unti a viliant actiou by tive men of Generai Ositima's commani. The sail story whs eioquently toli by the horrible sights of the ravine. White running through the opening ia the wire. "utunglement heyond, I noticed many engineers anilinfantry men dead, piled onc upon another
caught in the wire, or taking hold with both arms of a post, or grasping the iron sheara.
"When we reached the mididte of the side of Panlung, I saw tho regimentai fag that I used to curry, tying sbove our hemis in the dark. My heart leaperiat the sigit of the dear thig.
As soun as we were gatiored tugether the Coionel rose and gavo us a fluai word of exhortation, naying: • This inattle is our great chunce of suving onir country. To night we minst ar rike at tin vituis of 1'ort Arthur. Our brave usualting column must be not sinuply a forlurn hope (" re-solverl-to-dls "), but a " sure death " drtuchtment. 1 as your father am more grateful than I cun express for your galiunt tightlog. Do your best. ail of $y 011$
." Y's. we were ali ready for death when leav. ing Japin, Den golng to linttle of course cannot expect to come liack ailve. But in this particuiar battie to he rendy for denth was not enough: what was required of us was a deterinination not to faii to die. Indeed we were - sure death' men, and this new appeliation gave us a great stlmuius. Aiso a triegram that had come from tive Minister of Winr in Tokyo was read hy the alite de comp, whleh suifi, 1 jray for your success.' Tinis increased the cxaitation of our spirits.
" let me now recount the sublinity ami horror of this genrral usuault. I wins a mere ibuten. aat anil everythitig passed tisougio my nilul us fun dream, so my stury must be something like pleking out things from the dark. I man't give ynu any systemutic account, but must limit myscif th fragmentary recoliections. If this story sounds like a vain-gioribus account of ny own achlevements, it is not because 1 un conscious of my merit when I have s) ilttle to iroust of. int becansp the things concoming me and near me are what I can teil you with autharity. If this partial neconnt prover chae from which the whole stury of this terribie nssulit may be in. ferrei, my work wili not have ixen in vilu.
"The nien of the 'sure-sleath' detachment rose to thelr purt. Fearlegsly they stepied forth to the piace of death. Tliey weat over Paniungsitan and made their way throntigh the pileni-up boties of tiw dead. groups of ftre or six soidiors reaching the barriondel siope ons aftur another. I suibi to the robonei, (Grodiby, then!' With thls fire well 1 started, andimy first step was on the furni of a corpse. Our ubjuctive puints were the Northern Fortruss ami Whag-tai Hili.

- There was a flght whithombs at tice en. cms's skirinish-trcuches. Tho' bumis sent from our sibie expioied ftncty, and the place became at once a conflagrition, buarts were flung about. sand bags burst, heuds tiew around, legs were torn off. The tiames mingivd with the smolie. lighted up our faces weirdiy, with a red giare, and all at one the battic-line becante confosed. Then the cnemy, thinking it ioperiess, irft the place and begain to the:. 'Forwari! forward! mow is the time to go forward! Forward! i'ursuei Capture it with oae bonnd!' and, prond of our vietory, we went forward couragenisiy. Cuptain Kawnkami, raisiag his sword, cried, - Forward!' ami then I, standing close hy itim, cried. 'Sakurai's company, forward!' Thus shouting I left the captain's side, and. in order to see the road we werc to follow, went hehind the rampart. What is that hiack olipoct which ohstructs our rlew? It is the ramparts of the

Vorthers Fortreme. Lookly back, I did aot see a moldier. Aleck, had the line been cut 9 In tre pliation, heeplng my body to che loft for metety, I called the Twelfth Company.
"' Lleutenant Sakureif $A$ volce callod out re. peatedly $\ln$ answer. Meturaligg to the direction of the sound, I fouad Corporal Ito weeplng loudly. 'What are you crying fort What has
 yoit lave become an Iniportant perion.' 'What Is there to weep shout ?' I say, 'What Is the matter f' He whlepered in my ear, 'Our captain to dead.' Ilearing thls, I too wept. Wis it not only a moment ago thist be had given the order 'Forwanl'? Wan lt not even now thnt I had separated from him? And yet our captaln was one of the lead. In a moment our teader, plying Captain Kawakaml and I hal become beings of two separate world. Was it a dream or a reallty, I wondered?
"Corporal Ito pointed nut the enptain's body, Which had fallen laslde the rampart only a few rods away. Thastened hither anil raised blm in my armes. 'Captaln!' I conld not may a word more. But as natters could not remaln thus, I tonk the secret map which the captalo had, and, rising up buldly, called nut. 'From bencefor: wand 1 commnnil the Twelfth Company.' And 1 ordered ihat someone of the wounded should carry hack the captain's corpse. A wounderl ooluler was just about to ralse it up when he was struck on a vital spot and died leanlng on the captain. Onie after another of the soldiers who took hls place wens struck and fell.

I called Ninb-Lieut nant Ninomiya and asked him If the sections wrere together. He answered in ther aflimative. I orlered Corporal Itc not 10 tet the line be cut, and tollt him that I would be in the center of the skirmishers. In the darkness of the night we could not distlngulsh the fea. tures of the country, nor in which direction w. Fere to march. Standlng. up aliruptly againat the dark aky were the Viorthern Fortress and Wung tai Iflli. In front of us lay a naturai strongholl, and we were ln a coldron shaped hollow. But still we marched on slde by side. 'The Twelfih Company forward!' I turned to the right and went forwarins in a dream. I rementier nothing clearly of the time. 'Keep the line together!' This was my one command. Prespntly 1 censed to hear the roice of Corporal Ito, who had lieen at mis rigitt band. The bay. onets glaming in the darknces breume fewer. The hlack masses of soldiers who hnel pusherf tielr way on now hecame a handful. All at once, as if struck hy n club. I fell lown sprawllng on the ground. I was woundell, struck in my richt hand. The aplendld magnealum light of the "numy flashed out, slowing the piled ur berlipes of the dead, ani I raisel my wonnded hand ani looked at It. It was broken at the wrist: the hnad bung down and was bledding profusely. I took out the already loosened hundle of bandiages, tied up my wound with the triangular piefer, nod then wrapping a handker chief over it. I slung it from my neek with the sunrise tlag. Which I had sworn to plant on the enemy's fortress.

Looking sp, I saqu that oniy a ralley lay between me and Wanclai IIIll, wbleh almost touched the sky. I whahcil to drink and songht at my waist, but the canteen was gone; Its
leather strap aloee was entangled in my feet. The volees of the moldiers were lemealigg one hy ose. In contruat, the glare of the rockets of the hated enemy and the Irightful nolse of tha cannonadling focreased. I slowly rubbed my lega, and, meolng that they were unhurt, I again rose. Throwlag soldde the abenth of my swom, 1 carried the bare blede In my left hand ss: atari. Went down the alope as in a dream, and climbed Wang-taI IIIIL.
"The long and enormously heavy grins were towering before me, and how few of my men were left alive now I shouted and told the survivors to follow me, int few answered my call. When I thought thut the other detacli ments must atso have been rudured to a shoillar condliton, my beart began 4 fail me. No ruin. forcement wias to be huped for, so i orderell a aldiier to cllmh the ranpart and plant the ann flag overbend, but alas! he wais shot and hlltevi, wlthout even a melnd ar ery.
"All of a suditicn a stupendons mund as from asother world rose around about me. 'Counter. asauit $i^{\prime \prime}$ A detnchment of the enemy apprared on the rampart, looking llke a darls w' (xediva bar. ricade. They surrounded us In the tw-lukling of an eye and ralsed a cry of triumph. Wur diseslvantagcous poaltinn would sut allow us ta offer any realstance, and our party was tro sminll on Hght them. We hal to fall back downtlie aterp hiliI. Looking back, I sam the IRussiany sherithg at us us they pursued. When we reachel the cartioorka before mentloned, we made in atand and facerl the enemy. Great confuslon and Inferanl butchery followed. Bayouris clashed agalnst bayonets; the enemy brought nut machine-guns and poured shot upmu us pell mell: the men on both sldes fell llke grass. But I cannot give you a detalled acconnt of thi. scene, because I was then in a dazed condithon, I ouly remeniber that I was brandlshing tay. sword In fury. I also felt myself occosiomally entting down the enemy. I remember a cinl fused fyght of white blade against white blatle, the raln qud hall of shell, a desperate tight here and a confused aruftle there. At last I grow s, hoarse that I eould not sbnit any more. Sild cienly my aword broki- with a rlash, my left arm was plerced. I fell, and before I could Hise a shell came and slattered my right leg. I gathered all my strength mud tried to atanil up. ground perfectly powerless. A soldice who tha me fall cried, 'Lientenant Nakural. lit as die together. '" - Tadayonlll Sakural. IU, man Bul. lela, eh. 28 (Houghton Jifilin Co., Mhaton).
The soldler who offerel to die with himstayed Wlth the Lieutrnant till moruing. bladhe lifs vounle, and tinally erceping away to flud and bring help if he conld. Tle. too, hati lien wounded, ani Sakural found him later iu n liow pital. At the end of many hours of constantly framinent death, the belpless and suffering Lentenant was maved by two soldiers whin bore him, stealthlly and witis Infinlte diflicultry nut of the range of the Russian rifles and to a filld hompitai. Where he found bimself among intimate frieads.
Of the scene on the moming following the tre. rific assamits of August 231, the correspondient Nojlne writes: "The rising sun showed up slicaves of corpase on the ground that was still ours. Death had indeed triumphed, and had

## JAPAN, 1904-1003

clalmed 98,000 liven. From thl time forwand the eucmy remalaed content with the clower ad. vance of remisp alege operntiona, The en. cay had g. cioee up to our posltiona and the allent ansle of the north-eat wa almost In thelr hands. I may 'almout,' becanse the ruins of thase Forts romilned the greater part of the time untemanted, neutralized by the gun-ifre of both aides." A month paesed befo. a mother crinus smanit wa undertakea by the Japanese. Thim, on the 2lst of September. they attacked whet was called "g08 Metre Hill." "Column after column rushed forward on to 808 Metre 11llf, corriog sil its fore hllis and alopen with henpe of dead; but at 8.4 A. $M$. they were re. puised. Thls aseault was ditetaguished by particular ohatlnacy. ... Ilavlag got three-quar. ure of [the hili] they meast to get poaseman of the rest at ail costa: they alowly crawled up. wants, fell dead, rolled back, and othern dushed forward ; they lay concesled and walted for reinforcements; noihlng would drive tiem hack. . 11 their thoughts, all thelr encavors were in get posersion of this hill. Our men began poll. ing down great boukiers from the top. Thess bounded down, fathenorl out the dead and ampht out the ilving, who, in trylng to doalge, expowil thenselven and were shot by our men on the luokout. . . During the alght of the 2lat abont 900 corpses were coilected under 203 Metre Hill." Vevertheless the asault was repeatel on the followling day. "From the moment thls sasault was beaten back, the trenche in front of 218 Sotre 11111 were gradualiy evacuated and the enemy went to earth only on Angle Hili. Ali their kappling was confined to the north-cast. On the western front of the Fortress therc now remained in our pomseasion oniy 203 Metre, Flat and Divisional Hills. $\qquad$ Ortober 1 was an epoch In the history of the defence of Port Arthur, for It was on thls day that the first of the 11 -Inch shells fell lutu the Fortreas, and so changed the aspuct of affalrs. . . . Nowhere could we fiad reai safety from them. . . . The ennerete of the forts, the armor on the hattle ships, were penetrated eiean through." Mining and connter mlolng, hy the braingers sall the besteged, were now in progress, and the explosion of buch nilues was hegun noar the pmi of Oetober. On the buth of that monilh the Japanese mine suother general ansauit. after a "ernel bomhariment" of four days. "The Octoher at. tacks were short, but most determined and bionly. As regards thcir succees, it was hut slight. The enemy hal palned some dozens of yards - no more. .. The Japanese had fired over 150,000 shilis." The " November assauit season" began on the 20th. Its climax was on the 26th. "When time after time, the enemy threw themsesfes with extrionlinary gallantry and persistence on forts Ehr-lung shan. Chi-kuan-shan and B Battery. Thousands were mown down, but the living surged onwards. But it could not po on forever, anil st 8.30 the Infantry attacks slarkened and ceased. next day and night an Incessant stream All wounded poured into Arthir, our losesem of more than $1500 \mathrm{me} \cdot \mathrm{n}$. The slopes below ang huyon! Tumnlus III! were thlckly spread with deal Japanese. A thlck, unbroken mass of corpses covered the cold earth like a coverlet. On the day of the assault the following order had been issued by Major-General Nakamura,

Who conmaoded the Japaperc force cold of for bhas forlorn hope:... Uur objective is to saver tho fortrem on two parts. Not a man mutit hope to return alive. If I foll, Colonel Watenabe whi take over the command; If he also falls, Colonel Okuno will kake hls place. Every ofilicer, whatever his rank, must conchler hlmelf his cenlor's anccessor. The attuck will be delivered malnly with the bsyonet. No matter how ferce the Kusilan fire, our men will not reply by angle chot untll we have entablished ourvelveno Oticern will mhoot any ten who fall out of re tire without orders.
foe we had to figlit.
"We now cume to the culminatlon of the trigedy, and perlape the bloodlent scene of car. nage of the whole war - the fight for and capture of 208 Metre 11 ill." The attuck began liovernber 27 and was cont Inuous for elpht inys, excepitng that an hour's truce was obtained by the Japanese, Decpmber 2, for the burial of tirefr dead. The next day " the fight on the hlil was, If posslbic, nore exsperated. In the Furtreas the feeling of ala'm was Intensifled, and all uncmployed men bud becn got under arms.
and the other prints denuded, in onler to feed the maw of 20 Netre Hill. Even the bospitals guve tielr contrlintion. Derember $\$$ - bright and frusty - nshered in a freah heli. It was now iarily is fight butween men that was taking place on this accursed spot: It whe a striggle of human tocsh agulnst iruu und steel, agalnst hlaz. ing petrolenm, iyridite, pyroxliline and néiluite, and the stench of rutthg corpses. It was the last day but one of the long drawn agony." At noon on the 5 th the Jupancse galned the top of the hill, and heid it agninst in attempt that evcning to drive them uh. " 203 . Metre llili whs lont, and with It more tian 5000 llusslans."

The end was now near. On the 15th tour rencrils. nnd other offlcers, Incitulling General Gondratenko, tise must valued nsslatant of Gen--rai smirnoff, were bolding a consnltation In onn of the ensemates, and were klled by a 11 inch aheli, whlch penetrated tren that shelter. On tine 1sth ('in kuan-shan Fort wns capturci : on the D8th Ehr-lung-shan was lost ; on the 31st the Japanese took fortificntion vo. 3. nhi on New VCar's liny they won the Finglion Nest. That day Gencral Stiosel ment a flag of trme to open tigigotlatlons for surrenilor. The eapituintion was signed the next day. "Of 14.000 slek and wounded r-ported on the dar the garrison marched ont, 6000 only were wounded ; the tal. nnce werc chses of acirfy."- E. K. Nofinc, The Truth nbout Port Arthur (I)utton if Co., N. Y.).

Givneral StDssel was whberpuently oricred for trial before a mlitiary connisslon, un a bumber wi charges, ineluding disobedicnee of onlers from the Cienernl Comminnliug in Manchuria, false reports to hewiquarters, Improper Interfarence with the comuaniant of the Fortress, and personal abseuce frum most of the engegements that hal taken plare in and aronnd i'ort Arthur. lle was eondemned to death, but the Tzar com. muted the sentence to imprisonment for ten years. Ile began serving tie sentence Ir. Mareh 100N, and was pardoaed end released on the 19th of May, 1909.

 Mr. Grisem in "asentry the Previdicnt that the attitude faken ly the Japanise Governument ro

degree fusplred by a denire to raleo difincultes or dillay negotiations. Experience has taught the necemity of cautlon, and the Japanese Government thought that by securing at the outset a common underatanding upon thls subject they would preclude posilinilty of any dificulty arts. Ing in the Ialtial stage of negothitions and would smooth the way for the real work of the nogotl. stors; hut having entire confidence $\ln$ the whsdom of the Prealdent, the Japanese Government scoepta his Interpretation of the intention of Rusala and wllt without turther question appolnt plentpoteutlaries wlth full powers to negotlate and conclude terms of peace."
In consultations as to the place of meeting. Ruspie suggested Paris and Japan propowil Chefu, but objectlons were masell to both, as well c , to The flague and Geneva, recommended hy Prealdent Roosevelt. Japan wantel it nowhere In Europe and Russia would have it nowhere in the East: so Washington became the chosen poist. But, when one of the tirst ten days of August became the appolnted time of assembly for the negothation, the probable heat of Wahhington was forbldulng, and I'ortsmouth, New Hampshire, where the Government of the United States possesses an filand domain of its own, for navy-yard uses, was finally fixed on for the most important prace parley that has tsken place in the world whthin a evntury, at the lenst.
The plenipotentiarles commissioned by Japan were liaron Komura lutaro and Mr. Takahlra Kigoro, then Jupanese Minlater at Washington. Mr. Nelldoff, Russian Ambassudor at I'aris, was namel ia the first lustance for chlef plealpotentiary by the Tzar, but illness prevented his serping. Mr. Nicholas Mhuravieff, Ambassador at laine, was then appomet, but became equaliy disilifed in heath, and M Serglis Witte took his place, with Baron Ioman Rosen, Hussinn Amhassador at Washington. assoctatel lin the nilsstom. On suturday, the 5th of Alggnst, ou boartl the Guvemment vaclit Maydorer, at lyater bay, the summer remldenee of Presillent Rossevell, the fomir plenipotentaries, attended hy members of thidr respectlve siltes, were recelved by the Pre. sident, introluced to each other, ant entertained nt a haich. Thence they were conveyed, by spor arate vessels, first to New port, where sunday was apent, and ufterwards to Portsmanth. Thoir cunfermer was openet on Weluesday, the 9th, ans the resulting Treaty of I'eace was signed by the nerpithors, Septenther ith.
At the outset of their commumicatons with ench ether the differencen of minul seemed insurmambahle. How they were brmatht to agree. thent has heen told hy two writers who hat betber "lpmortunities, perhaps, fur knuwing the inner cirmmstances of the negothation than any other perwise ontshle of the plenipetentiaries thensshers. Out of these was Dr. F'remerlek de Mnrtent, the cminemt liassima Drotesser of Inturnatinal Law. who cume aq a spreinl consuntiong dwtezat- "lih, M. Witte. In an articlo in "The Purtsnumblh Peace Confercure." publivherl in Thi Narth Amerian Rerien of November, 100.: he wrote:
"During three fong weeks the pourparlera litiween the representatives of the two Powers sermerl to slow the alisolite imposibility of at. tahling the desiredi ohject, that in, peace. There wire espectally two obstacles in the way - the

Japanese demasds that Runala should code Sag. hafin and that Rumsia ahould pay Japan a war indemnity. These two conditions flusisia categorically rejected, and the fallure of the Conference seemed inevitahie. Then it was that the Prealdent of the United States, again hasing his action on the princlplem of the Ilague Conventhon, considered bimself once more justitied ln lntervening between the two diaputing natlons. At itrst, Mr. Roonevelt proposed that a Commisston composed of neutries, whowe declation however, would not be blnding on the contending partles, ahoulel tix the amount of the sum that Rusala abould pay to Japan. But this proposal *as immedlately ahandoned because of lisevidently Impractlcable nature. The second interventlon of the I'realdent was more effective and happy. Japan was now to be asked to withtraw her demand for an lademnity; and the Twar, who deslred sincerely to see the infortunate war ended, was to consent to the cesslon of the wouthern portion of the Island of Saghalin. It was at the sitting of August 20th that an accord, based on these mutual concesslons, wat brought about, and, turing the six days that tollowed, the stipulations of the definitive treaty of peace were drawn up lya commilsion named for that purpose. At inst, on September 5th, the treaty was concludeti, and a linttery of artlilery. in front of the building where the sittings had leen held, frrel a sulute of ninetern guns in honor of the great event." - F. de Martens. The Portomuth Pcure Confirence (Jorth A Werican Revietr. IVr., 180.).
To the smine effet Ir. E. I. Dillon, the well known pubiledst, who bad lee in an intermediary in some of the prelininary unoftchal diplomaey, wrote in The Contenporiry lictins of Uctolier as follows:

- The l'eace of Portsmontio is the ontrome of mre moral courage meet lage, nssailing and worsting a remblination of furces. the classitientlon and tabelling of which had hest be lift to the future histurian aml binempla. Whon cin apro preclate, whthent hias and hame. without opHrelenaion. The tirst man to dioplay that un-
 whose maturnce for genal on the living and working of mathons is a monctleent foree to which the world is herinning to look ns in some permanent institution. Aution. Vl The Imperial (invernment Resava nhlisater itself to yidel tu the luproia' Governtaent of Japan, without compell sut lon anif
with the consent of the Chiness Government, the Chanechun (Kwas.Chen-Tsi) and Port Arthur Haliroad and all fia branches, withali the rights, privileges, and property thereunto beionging within this region, as weil se ali the coal mines ia said region beionging to this railroed or be. ing operaced for its benefit.

The two high contracting parties mutually pledge themselves to ohtain from the Chinete Government the consent mentioned in the foregoing eiause.
Ahtict.: VII. Rusola and Japan agree to operate their respectire railroads in Manchurfa for commervial and industriai purposes excluaively, lut by no means for strategie purposes. It is sgreei that this restriction doet not apply to the raliroads within the territory covered by the fease of the Liao lung peninsula.

Antucte VIII. The Imperial Governments of ilussia and Japan. with a view to favoring and facilitating relations and trafic, shali concintule, as soon as possibie, a separate convention to govern their nperations of repair on the rail. ruals in Manchuria.
Anticis IX. The Imperfai Government of Russia cedes to the Imperiai Government of Japan, in perpetuity and full sovereignty, the snatliern part of the isjabil of Saghalin, and ali the islamis aljacent thereto, as well as ail the puhilie works ami property there situated. The fifticth paraliel of north latituite is ariopted as the llmit of the edied territury The exaet Lumblary liue of this territory shail be deter. mlued lin accorlance with the provisions of ad. ditionnl Artleie $i f$ annezed $w$ this treaty.
Japan and llassia mutuaily agree not to construct within their respective possessions on the islami of Saghalin, and the Isiands adjacent thereto, any fortitication or similar military work. They likewlse mutually agree uot to alopt any millitary measures which might hinder the free narggatiou of the sitrate of lial l'erouse and Tartary.

Artiches. The right is reserved in ilussian sulijerts Inhabitlog the territory ceded to dapan ti) sill their real property nod return to their country: however, If they prefer to remain in the ceded territury, they shatl be guaried and protected in the full enjosment of their property rights and the exeridise of thelr indusiries. provilied they submit to the laws and jurfolio. thon of Japan. Japan shall dave perfect liberty to withulesw the rlight of resilence in this turri. tory from all inhalitants laboring umler fuifti. cal or aduiniatrative incapacity. or to diepurt thom from this torritory. it pledses itself. however, to fully respet the profrerty rights of these Inhabitants.

Authetw XI ilussia nbligates itseif to reach at umberstanding with Japan in urtier 10 grant (1) lapanese subjeets tishing rights along the (onat of the ilusslan possessions in the seas of Jupan. Okhotsk, and Mering. It is ayrcent that the above menthoned obligation slall not fimpalr the rights already bulougiug to linsifan or foreitn sulyjects in these regions.

Intule Xil. The treaty of cmmmerce and navigation betweeu izussis and Japan haviag tarionnmulted by the war, the inuprial Govern bunts of ilussla and Jopan apree to adupt as a bavis for their commerciai relations, until the conclusion of a uew ireaty of commerce and navigation on the basla of the treaty in force
before the present war, the syatem of reciprocity on the principie of the moat farored nation, in. eluding import and export tartits, custom-house formalities, tranalt and connage dues, and the admission ani treatment of the agents, suhjects, and vessels of one country in the territory of the other.

Ahticle XIII. As soon as possihie, after the present treaty takes effect, all prisoners of war shall be mutually returned. The lmperial Guv. ernments of flussis and Japan slall each appoint a special commissioner to take charge of the prisoners. Ail prisoners in the eustoly of one of the governments shali be delivered to the commissioner of the other government or to his duly authorized representative, who shali receive them in such number and in such suitabie ports of the surreaderiug natiou as the iatter shail notify in advance to the commisaiouer of the receiriog nation.

The Governmeuts of ITusaia and Japan shali present to ench other, as soun as possihie after the delivery of the prisoners has leen completed, a verifieni account of the direct expenditures male by them respectively for the care and mafintenance of the prisonirs from the date of capture or surrenfer nntil the date of their death or return. Hussia agrees to refund to Ispan, as sou as possible aftor the exchange of these accoints, as above stipuiated. the aliffernce be. tween the actual amount thus spent hy Jupan and the aetuai gmount ijkewise expended by Russia.

Anricte XIV. The present treaty shall be ratitheri by Their Majestles the Himperor of aif the leussias and the Eimperor of Japua. 'Thls ratifcation shail, within the shortest jossibie thue and at ali evonts mot later than flfty days from the date of the sigunture of the trinty, ine botition to the: Impriai Goveruments of IVinssia amd Japan, respertlvely. throught the umbasis dor of the ' 'intedi States of Amerlea at St. I'efers. burg nad the minister of France at Tokyo, wni from and after the date of the lant of therse notl. firatlous this traty slail ruter into fuli fore lu all its parts. The formal exchange of the ratithcatlons shatl take phace at Wiahington as soon as puosible.

Anricif. XV. Tine present treaty shall be sifued in duplicate, in the Fromely und Euglish i.tnguages The twa tusts are abonituly alike; howerer, in cave of differentee of interpritation tho Froush text shall provail.

In wituens wherrof the respertive pleaipoten. tharlos fave sloned the proment treaty of peace and atimed thereto thoir sada.

A. D. 1905 (Aug.). New befensive Agreement between Great Britain and Japan, On the 12th of August, 1903, three days after the picaipotentiaries of Japan and lRussia hatl heid thelr frat mieeting at Portsmouth and opend the negotiations which resulted in a Treaty of Peace, a new Agreement of defenslve alliance hetween Japan and Great i3ritaln, rrpinclog that of three years before (see, nbore, Jaras. A. I). 1002), was slgned at London, hut not made public untll the 6th of September, the day foflowlag the conclusion of the ifusson, Jnp anvese Treaty of I'eace. It was then comunum cated to the Governments of flussla nnil Frumee. throngh the medium of the British Ambasss. tors at St. Petersburg and Paris, with an ac rompanying explnuatory despatch from Larl i, anstowne, as follows:
" Sir. I Incluse, Por your Excelleacy's Infor. mation, a copy of $n$ new Agreement coucluffed between IIIS Majesty's Governnent and that of Jnpan lu subatitutloin for that of the 30 thi lunu ary, lishe? Yon will take an early opportumly of connminicnting the new Agrecment to the Rinsshan Government. It was slgued on the 12th Allgust, anel yout will explain that it would linve lee $n$ immedintely monde piblic but for the fart that negotintions had at that time alrealy rommencerl the wern liassin and dapnn. nuil that ther puhlemtion of such a document whilst those negotinthons were still in progress woilid ohviously hase been improper and hurppartune.
"The Innsinn Government will. I trust, re rugnife that the new Agreement is an loternal thomal lixerument to wilich no exceptlon cma he thken he nny of the luwers interestel in the atfatrs of the Fint fast. Yous stomld call spere. cial attention to the objects mentioned In the preamble as thuse ly which the police of the Contrnctlos Parties is Inspired. Ilis Sinjoser"s Governume bellere that ther may count mimin the gomal-will nul support of all the l'owers in andentoring to namintaln peare In Fiavern Avia. and lus aerking to uphasil the integrity nad in deplulenee of the ('hluce- Emplre ant the prin riple of equal "pportmitles for the comulere" anll industry of all nutioms in that comotry.
"Oh the nther linnel. the spercinl interests of the. Compactug Dartieg are of a kind upun which thay are fully entitherl to inslut, nod tho manomernient that those interests mast ho saf. gliariled is our a bich cmo erente liu surprion and need give rise tos no misgivings.
"I call yomr equerina nttention to the worline of Artlete 11 . which hys down distinc 1ly that it is only In the chace of ma unprowekel attick mande on one of the contrmeting Partles by a other lower ar I'owera, null whon that P'orte in
 pats from negremoive setiom: that the other I'are:

Alitirle 111, dealinge with the question.

Cores, is deserving of eapecial attention. It recornizea in the clenrest terms the paramount poillon which Japan at thia moment occuplea and must hencoforth occupy in Cores, and her right to take any measures which she may And neceseary for the protection of her political. milliary, and economic interests in that country. It in, however, expressly provided that ouch mensures must not be contrary to the principle of equal opportunities for the commerce and induatry of other nations. The new Treaty no doubt differs at this point conspicuovisly from that of 1002 . It has, however, become evident that Cores, owing to tis close proxim. ity to the Japanese Empire and its inability to anni alone, muat fall uader the control and tuteiage of Japan.
"IIls Majeaty's Government obeerve with satisfaction chat thls point was readlly concerled by Russin in the Treaty of Peace recently concludell with Ja pan, and they have every reason to believe that similar views are held by otiver Powers witio regard to the reiatlons which chontld subsist bet ween Japan and Corea.
"Ilis Mnjesty's Goverament venture to anticipate that the alliance tious conciuded, dc. signed as it is with objecta which are purely peaceful and for the prutection of righta and fiterests the validity of which eunnot ive contested, wili be regarded with approval by the Government to which yon are accredited. Tlicy are juatifed in belliving that its conciitsion may not have here witiout effect is faciiitating the settlement hy which the war has been so lapplly brought to an end, andi they earnestly trust that it mony, for many yeurs to comer, be inatrumental in securing the peace of the world in those regions which come within its s cope.
Agreement hetween the United Kingdom and Japan.
"lueanble. The Governments of Great Ibrit. ain and Japan, leing desirous of replawing lie asterement conchuled ix.tweren tietn on thic $30 t h$ of dannury, 100), hy frosh stipulations, have agrual upon the following articles, which have fur their object-
(a) The consolidation anif maint-nance of the peneral peace in the regions of Eastern Awhani of india.
(b) The presereation of the common interests of all powers in chinn. hy insuring the indie. pudence ani integrity of the (hluese Eimpire anif the primeipie of equan opportuntitea for the commeres and inciustry of all nations in (hima.
(1) The maintenumes of the territorial righes of the ligh eontracting partics in the regions of "astera Asia and of India, and the defense of the er apectal interests in the said rechints.

Ahticte: 1. It is agreed that wheneser in the opinion of either Gremt Britain ur dapan any of the rights antif intur"ots referrmi to in thie pramble of this ngreement are in jevpariy. the two zuvernments eill commanieate with

－＂Autient：II．The Imperiai Government of Japan sluall，in a spirt of tirm frimulibly，lin sirf－thesifety and repase of the lmperial flomso of Kore：

"Article III. The Imperial Government of Japan definitively guarantee tbe independence and territorial litegrity of tbe Korean Emplre.

Artiele IV. In case the welfare of the lm perial hlouse of Koren or the territorial integrity of Korea ls endangered hy the aggressiou of a thirl power or lnternal disturlances, the Imperial Goverament of Japan shall immediately takc such necessury measures as circumstances require, nnd In such ease the Imperial Government of Korea slabll give full facilltics to promote the action of the Imperial Japanese Goverament. Tbe Imperial Government of Japan may, for the attainment of the above-mentioned object, occupy, when circumstances require lt , such places as may be necessary from strategic points of view.

Abticied. The Government of the two countries shall not in future, withont mutual consent, conclude with a thirl power such an arrangement as may be contrary to the principles of the present protocol
"Abicles VI. Details in connection with the pressent protocol shall be arranged as the circumstauces may require hetween the representative of Japan and the mlnister of state for foreign affairs of Korea."
On the 3ith of August, 1904, an additional Agreensent between the Governments of Japnn aud Korea, sjirnel $\ln$ part on the $19 t h$ and in part on the eide of that montb. whe communicated by the Japanese Amhassadior to the U'nited States to the State I Cepurtment at Wushington, with $n$ note saying: " $\ln$ communicating this agreemeat to the Government of the United States 1 am insiructed to say that it is nothing more than the natural cousequence or development of the protocol coneluded leet ween the Jupauese and Korean Governments on the 2:3sd of hast February, which 1 had the honor to eommunicate at that time for the information of the ciovernment of the linited states. I nm further directed to $\$$ sig thint the cogreement does not in anywise inter ere with the full operation or vnlidity of Korea's exlstiag trenties; nnd that Article II thereof is not litended to pluee any impediment in the way of legitimate enterprise in Korea, but merely to cheek, as far as possible, the filture conclusion of unwise and have herdent engugements, which in the past have been fruitful sources of trouble and eom. plicatlon."
The Agreement this announced was in the following terms

Article 1. The Korcan Government shall engage a Japanesc subject recommended ly tbe Japanese Government as timaneinl adviser to the Korean fowernment. and nil maters concerning finanee shinll he dealt with after bis counsel shall have been taken.
"Article 11 . The Korean Covernment shall engage a forcigner recommended by the Japanese Gowernment as diplonatic adviver to the forcipn oftice and all important numters conceruing forciurn relutions slall le dicalt with after bis counsel shall have heen taken.
"Histive 11I. The Korean Government shall consult the lapanese Government before concluding trinties and conventions with for eign powers, and also in dealing with other important diplomatie affairs, sach as grants of concessions to or contracts with forel gners."
Writing of tbis A strement a few days la
to the State Department at Washington, the American Minlster to Japan, Mr. Lloyd Griscom, remarked: "It is intcresting to note that $M \mathrm{Mr}$. Megata, selected to be financlal adviser to the Korean Government, was educuted in Amerien and is a graluate of Harvard L'nlversity, muif Mr. Stevens, who has been chosen as adi iser to the forelgn oftice, is an American gentleman about whon it would be superfluous to infirm yon."

Cnder a third Agreement, slgned April 1. 1005, Japan took over the control and operatin! of the post, telegraph, and telephone servires of korea, in order to "rearrange the systen if communieations in that conntry, and, hy umal. gramating it witb that of Japan, to unite the two systems lnto one."
Finally, on the 1 ith of November, 1905, a fourth Agreement was signed, which definitels surrendered to Japan the "control and direction of the external relations and affairs of Korra." in the following stipulatlons:
"Article 1. The Government of Japan, through the department of foretgn affairs in Tokyo, wlll hereafter have control aud direction of the extornul relations and affairs of Kures and the diplomatic and consular representatives of Jnymn will have the charge of the silajeets and hiterests of Korea ln foreign countrics.
"Article II. The Government of Jiphin undertake to see to the execution of the tratitis actually existing between Korem and other powers, and the Government of Korem engage not to ronelude icreafter any act or engage-
ment hnving an international ment hnving an international character, exeppt through the medium of the Government of Japan.
"Anticle III. The Govermment of Japan sball he representel at the court of $\mathbf{H}$ is $\mathrm{Maj}_{\text {ajesty }}$ the Emperor of Korea by a resident gevieral. who shall reside nt seoul primurily for thr purpose of taking charge of and direetiug the min: ters relating to diplomutic affalrs. Ile shinll have the right of privite and personal andience of 11 is Majesty the Emperor of Koreat. The Japanese Government slull have the right to statlon residents at the several open ports and such other places in Korea as they may decin
nceessary.
"Surli, residents shall, under the direetion of the resident general, exercise the powers and functions hitherto appertainlng to Jupmuese consuls in Korea, and shall perform such dutics as may be neccssary In order to earry into full effect the provisions of this agreement.
"Artici.E. IV. The stipulations of all trouties and agreements existlng between Japmen and Korea not lnconslatent with thr provisions of this agree mentit shall contlnue in foree.
"Articies V. The Government of Jupminndertake to nulntaln the wrlfure and dignity of the lmperhn Ilmise of Korea."
With the comminicathon of this Agrement in forelgn I'owers there watat a declarition br the Japanese Government. in part as follows : The relatlons of propinculty have made it necessary for Japan to take mid excreise, for reasoms elosely conneeted with her rwn safety and repose, a paramount intereat and Influence in the politieal and mllitary affairs of Korea The measures hiltherto taken have been purely ndrlsory, but the experience of recent years has demonstrated the insufticlency of measures of
guidance aione. The unwise and improvident action of Korea, more especially ln the domain of her international concerns, has in the past been the most frultful source of complicatlons. To pernit the present unsatisfactory coudition of things to contlnue unrestrained and unregulated would be to lnvite fresh difticuitics, and Jupan believes that she owes it to licrself and to ber desire for the general paeification of the extreme East to take the steps necessary to put an end once for all to thls dingerous situation.'
A. D. 1904-1905. - Status of the Korean Empire under Japanese Contrcl. - The Japanese View. - "After lier quick entry into seoul at the outbreak of the war. Japmu found herself preelsely lu the position whith she had long desired to establlsh. The plan of joint nor interventlon ln Korenn affairs as agreed upon between Japan and Russia $\ln 1896$ and 1898 [see. in Vol. VI. of thls work, Kurea], which had again and again resulted in cempetitive intervention, had proved disastrous to the interest of Japan and of general reform: but now Russia had abruptly withdrawn from simil, and Japan found herscif free to move alone. Therenpon she liastened to impose upon the Korean Foreigu Minister a treaty of alllance [us aboref, on February 23, 1904, which lind the foundation for all Japun's subsequent conduet in the perninsula.

An andlysis und interpretation of the forces which the war has set loose and which are bringing their inevitabie consequinces would be highly instructive. Let ins, howe eer, content omrselves here by pointing to the Korean chanses in the three importint documents coneluded within the last two vears, in which the rapid development of the korean problem is caily traceable, -namely. the Korcan Jin anesic treaty of alliance of February 23, 1904, the Russo Japinese treaty of peace signed on September 5. 1:0.5 [see, in this vol., Japas: : A. D. 1945:' (JeNE-OCT.)] and the Anglo Jap:nese agreement of altiance concluded on Angist 12 [sere Japan: A. D. 190.5 (Aco.)]. and publisherd with Lord Lanslowne's dispatelh to the 13ritish Ambassador at St. Peterstury on Soptember 26, 19N 5 . It will be remembered that the first lnstrument at once placed Korea under Japan's military protection and administrative guidance, and bound Japan to uphold Korea's indl' pendenee and territorial interrity, incluting the siffey of her Imperial house. One will readily observe that two distinct points are here involved. These two points the further progress of events, some of which hive already bren described, secmes to have put in far apirit. that in the treaty of Portsmouth Japan's pres padermee over Korea was recognized by liussta, whlle littie was saill of the independ. ence of the peninsular empire. It was eren said that M. Witte insisted durine the diseussion of the elause that Baron Kommra stould dechare in his proposed terms that Japan intended to make of Korma a provinee of the Jupunese Empire. This the lburon is reporterl to have emphutically deelined. presumably becaluse he would not ennsider the promection by Japun and the territorial integrity of Kores iucompatible with ewh other. Thu difference he. tween the theorstical and prictical siturtlon is, however, reflectet intmistatithy fo the AngloJapanege agreement, the third irtlde of which
reads: 'Japan possessing parumount political, military, and economic interests in Koren, Great Britain recognizes Japan's rlght to take such measures for the guidunce, control und protection of Korea us she may deem proper and necessary to suft ard and advanee those Interests, providing the measures so taken are uot eoutrary to the prineir, l e of cqual opportunities for the commeree and industry of ali natlons.' In other words, Japan is left free to controf Korea and then presail upon the latter to open her dowr equally wide to all nations. lucluding dapan herself After specially dwelling on the substance of this article, Lord Lansdowne says in his dispateln: "The treaty at thls point difters conspienously from that of 1902 . It has, bowever, become erideut that Korea. owing to its close proxinlty to the Japanese Empire, and to its inubility to stand alone, must fall under the control and tutelige of Japan. Ilis Majesty's Government olserves with satinfartion that this point has been realily conceted by Russia in the treaty of prace, and there is every reason to believe that similar views are beld by the other fowers with regard to the relations whieh shonld sulsist bet ween Japan and kiven. ' This are Korea's alleged incapucity of self gor. crns.ent and Japin's need of eontrol over the perminsular aftuirs openly reeognized by a third lower, and it is taken for granted that no other Power will deny these peints. such a dechirration eould not be made, it is admittel, in 19R2, when the first treaty of alliance was concluded. nor perhaps eve" at the time when the KoreanJapinese protocol was signed in Fehruary, 1904. Yet the loctrine of Korea's independener in still not theoretically cuntradietory with this siluathon now recorvizal hy the lussian and l3ritish governments, nor has it become leas effective than in the hast rear, for. while the control by Japan has since been tightened, Korea remains a separate erupire with all the sovereign rights of an indevendent sitate. Japan, speaking terhnically, exereises a supervisory control and discharges administratlve functions entrusted 10 her cure. The future trend of affairs - whether the Korean lndependenee will vanish into a mere firtion as the Japmese control advonces. or whether under the latter the peninsular people will be trained to an effective self government - must hargely be determincd hy the mutual interiction of the complex firtors, both Korean and Jupanse, public mad private, conscious and uncomscious. which are stendity working ont the destiny of the peninsula."- K . Asukawa, hirrie und Mancherrig muller the Neve Treaty (.1t'antic Monthly. Firr., 1915).
A. D. 1905 (Aug.). - New Agreement concerning Korea between Great Britain and Japan. See (in this vol.) Jaran: A. D. 190.7 (Arce).
A. D. 1905-1909. - Japanese Control of Korean Affairs. - Under Prince Ito. - Attempted appeal of Korea to the Hague Conference of 1907.- Enforced abdication of the Emperor. - Elevation of his Son to the Throne. - Extensive and fierce Revolt rigorously fought down.-Retirement of Prince Ito. - Recent Measures. - As to the use mamle by the Japanese of the entireness of their donination in Korea, as conceded to them In the treaties referred to above. by the Government of Korea, primarily, and by Great Britain
and Russia, secondarily, in their recognition and endorsement of the status thus estahished, there has been much controversy ince. The Ko. reans themselves have been ioud complainants of harsh and oppressive exercises of Japanese power in their country, and have found many sympathizers among the western peoples to denounce thelr alleged wrongs. On the otlier hind. many forelgn visitors to Korea, after careful ohservation of condltious in the country, have horne strong testimouy in favor of the Japanese conduct of Korean affirs. I'rofessor Gcorge T. Ladd, for exampie, of Yaie Universlty, is one of these wltnesses whose judgment hus great weight. Having goue to Japan to give a course of lectures there, I'rofessor Ladd was usked hy i'riuce Ito, the Japanese ResidentGeneral In Korea, to visit the latter country ns an observer, and lead counsel to the Prince rela. tive specially to some matters that tonched Anierican missions. Ills suhsequent book, en titled "In Korea with Prince Ito," represents. beyond question, a careful und candicl study of conditions which he had the hest of opportuni tles for becouning rightly acqualnted with. It does not approve or justify everything tl it the Japanese dictators of Korean adminietration were doing, hut it represents the general motive and intent of their undertakings to have beeu for the improvement of the people and country whose affuirs they liad taken into their liands. The same may be said of what has heen written of Korea sinece the IRusso-Japanese war hy Mr. George Kenmun. the experienced traveller in the Eust and tudeut of its peoples and their life.
The truth appears to be that the Japanese are nsing their power lu lioren as justly, is honestly, as riglitly as the English are using similar power in Eyrypt, as the Americans are nsing It in the iPhilipjine Islands. or os any people has ever used the power to dictate govermment to another people. The question of right and wrong in all sueh cases grees birck of the node of using thr overlordship, and is a questlon of the right to hold it for any mole of use. That there was eompulsion in the proeurement of the convention by which the Emperor of Korea and his decalent Government surrendered themselves to the dietatorial rrotection of Jajangers "ithout suring. That there is not a strong untion in the world to-lay thet would not., ln the sume circumstances, liare exercisell the sume compulsion and wrung the same surrender, is just as indisputable: Inat the polition moral. ity of the worhl is still too umbeveloped for thint fact to be exonerating. I only "sights" the folitical ethics of Japun along the level of our firistendom, and finds her to he, at least, not below it.
Sonn after the Conrention of Novenuler 17, 190.) had been signed, Narguis Ito, the dapanese Resideut General in Koren. invited the newepapor editors ln seoul to a lunelieon, it whidh he dhle-send them, as reported at the time, partly in these worms:
"If the state of affairs in Korea be examined, it is found that the relations hetween soverelgn and suliject, gowernment and governed, are of a very distant nature, and are by no means so close as those in Japan. Henee it becomes inevitable to adopt toward the Government measures of a more or lass compuknry mature. The people.

toward them, therefore, the poilcy pursued must be one of geutle persuasion. Those are polnts Whieh have to he kept in vlew not merely by our officials, hut also by all Japanese subject.s reslding in Korea. Such Japancse subjects niust carefuily refrain from nall nets of violence to whleh their country's victories may pronujt them, and must he guided hy a spirit of kinduess in thelr dealligs with the Koreans. Already the Cnlted Stntes representative in Seoul has reccived instructions from his Government for the removal of the legatlon, and it may he assumed that the other powers will similariy recognide Japan's eonvention. It wlli then he for Japan not to forget the dutles that heaven has dele. gated to her, hat to lead Korea gently and lielp. filly nlong the path of progress, for assuredly anythlng like arbitrary or coercive conduet will earu for Korea the sympathy of the natlons, and will defeat the true and ahiding polley of Japas."
I iscontent, complaint, resistance in Korea were inevitable, whatever treatment the country in so helpless and humhled a situatlon might receive.
$\mathbf{B y}$ a dexterous movemeut in 13y a dexterous movemeut in 1907 it compelled the world to take notiee of its pllght. The Em. peror, or his immo diate entourage, succeeded hy some means in fairly smuggling out of the coun-
try a d.l.gation commlssioned to claim a hearing berure the Peace Conference at The Ilague. Their elaim was effectually extinguished by the arreement of 1804, which turned orer to Jupan the whole monngement of the foreign affairs of Korea: but the Korean situation was discusied widely for a thme. Nothing of henefit to the maltive Korcau Government, however, came from the event. The iron hand of Japancse eontrol wis iuid in leavier pressure of the ferble court at once. The nominal Korean Ministry was made to demand and compel the ahdiesi: tho $u^{+}$ the Emperor, on the ground that he rad nonon gerel the national welfare hy violation it he treaty of Angust, 1904. Ilis young son was crowned la his stead, and Korea was requirel to submit to a new A grement, signed on the 2th of July, 190\%. by which the IR'sillent General " atequired initiative as well as consultatory competence to elaset aud enforce laws and ordinmeres, to appoint and womove liorewn ofllelals, and to plare eapable Jumatese subjects in the ramks of Korcan otlleinhtom." sperial provinion was matle for the separation of the Juliciary nud the li: ccutive, so as to put aur cud, wrote an English corresjondent, " to the grievous eorruption practisel under a system whieh invested provineial governors and ilistrict maglstrntes with judicind fanctions, reducing the administration of jutice to a mere matter of favour or lnterest." limer this me agreement the Resident General ac quircol anthority snflicient to overcome ohstruc. tion, for it pledged the Government of kora to act inder his guidanee in matters of udniluiatra tive reform; not to enact nny laws or tiakl amy important mensures without his previoun :s, anf: and not to appoint or dismiss high othcials with. out his concurrence.

The attempt to carry nn appeal to the llague Confercnee was not fortunnte for Korea in the result. As a monf it was skllfully executcil, but can harilly be regarded as shrend in the planning. 10 was attributed, In both plan and exceutlon, to an American, Mr. Homer B. Hur! hurt, who went to Kerea as an edneator somue years hefore, under an appointment by the Gov.
ernment of the Cnited States, on an official reifuest from Korea; Who had acquired much influence there and was strenuously a partisan of the Koreans, as against the Japancse. Puhlish ing a small periodical, the Kurran Reciev, ME. llurlhurt became au effective champlon of their cinise, pubiicly as weil as privately in the vative counsels of the overlordei empire. In the latter capacity be was pitted against another Amerl. can, Mr. Durlam Whlte Stevens, whose ap. pointurat hy Japanese selection, in 1014, to he imlviser to the Korcan Foreigi Oftiee, is men. bulviser to the ahove. Originally lin the service of his own coult ry , Mr. Stevens hat then become ofticial adviace to the Japaneso Legation at WashIniton, and passed from that to the service ln Korm. Ilis fidelity to Japanese interests cenWrad on him the anlmosity of the rebellions element in Korea, and he fell a victim to their hate.
The forcing of the old Emperor from the throne nad the exaction of a more direct and complete submission of Korea to Japinnese rule hal provoked an extenslve revolt. This was mate more serions by an acknowledged mistake committed ly I'rince Ito. in dlsbandlag the Korean army. A correspondent of the New York Eirening lost, who wrote from Tokyo on the 14 th of December. 1908, gave this account of the effect, and of the dreadful suffering of the country from the conflict that followed, in 190i-8: "Tle dischurged soldiers, stung by the disurace of dismissal and the dishonor of forced submission to liated intruders, fuickly spread nll over the country, stirring up their compatriots to a fearless and often a fatal zeni agniust the alien administration. The Japanese nuthorities forthwith set about a vigoroas suppresslon of the malconteats, even to the extent of $\varepsilon_{0}$ mercilens annibilation of life aad a wholesale destruction of property. ... The rebel forces only wased nore formidable, until by the appruach of spring the insurgent bands were so widely distributed and meunciag that uo Japan. ese coull safely veature beyond the confines of well- ruarded towns und eities.
$\because$.lccordingly the imperial athorities were drivea to rephate their new policy of remaining on the defensive by the former one of extermimation, and no quarter. Last summer, therefore, is well-organized campaign for completely wip, ing out the insurrectionary forces was resolved upun and put into execution. . A procla. mation liad previonsly been lasued to the effect hat all Koreans affording fosel or shelter to the insurgents, or in aay way reudering assistance liable to involve a charge of complicity, would le - mmarily denit with; while those who surrenderal to the proper authorities would be pardoned. The anessage placed the prople betwere the devil and the deep sea. If the natives rifused nssist:unce to the iasurgents, obedience wondl be recinired of them at the point of the batyonet by their insulted fellow patriots; while if they were suspected of thas acyuicseing. they perished at the hands of the Japanese sal. diary. Under the circumstances the Koreass naturally chose rather to die serving their own people than to suffer the sarue fate by resisting them."

A tragical Incident of thls fierce struggle was the assassination of Mr. Durlam White Stevens, while visiting the United States. Ile lial heen marked for death by the Korean iusurgents, and
was diain by thelr emiskaries, ln March, 1808, soon after lifs landing ín Callfornla.
The correspondent above quoted regarded the insurrection as having spent its force at the time of his writiug, December, 1008. Against thenormous destruction of life and property which the suppresslou of It had cost, he proceeded to set a lirief summary of the simultaneous constructive and reformative work which the Jap. ancse luad been carrying on. Tlis was described more hroadly, however. a littie later, by a writer In the London Times, from whom we quote : $\therefore$ The consts inve been lighted and huoyed; posts, telegraphs, and telephones have becn provided; ronds and railways have been hullt: public huildings have been erected: various in dus + riai enterprises have beea started, us printling. brick making, forestry, ard coal-ulining : model farms have been laid ont ; the culilvation of cotton has been commenced and pro_ises to lecome a great industry; an industrinl training schooi las been built and equipped; an exposition has been beid in Seoul ; sanitary works have been inaugurated; tine lospitals and medical schoois liave been opened; an excellent edacational system modelled on tbat of Japan has been orgatized: waterworks have hieen constructed in sererai towns : and, last though not least, "omplete frecdom of conscience has re. piaced :he old anti-Christiau higotry."

In lune, 1909, the veteran sthtesman. Prince 1to, was relieved of the trying offiee of IesldentGineral in Koren, and sincereded hy Viscount Gone, who lind previousiy served with him as Vice IResident-General. A Tokyo correspondent wrote of the clangre: " it was frst phaned to appoint Viscount Terauchi, minister of war in the Jupanese Cubinct, to the residency in Korea, but Prince Ito objectel, pointing out to the miuisters that the selection of Viscount Terauchl, a lientel ant-genernl, would be considered us a triumph sor the nilitary regime and nn aimmdonment and disavownl of Prince Ito's poliey for the peareful development of Koren. As nsuan. Irince Ito's molvere was aceepted by his fellow statesmen, and Viseront Some, who received his training in Koren under the administration of Irince Ito. was named to the post.

- A high aflecer sain to-duy that when the Korea resilency was ereated it was incunbent cepoa Japan to seud her most nble statesman, Prince ito, to till the important post. Ile formulated his polley of udministrathon withoat interforence, and while some of the leuling men of Jitpan were inclined to donht the wisdom of that policy they ure now rirtually converted to his incas, and it k genernily believell that the feeling of confulence and friembship for Jupan can be createl among the Koreans and make the comntry doobly vabulble."

Further clunges in the administration of Ko. rean affairs attended this official change. They were reported to the London Times by its Tokyo correspondent, July 18, as follows: "Japan lins just tiken some importmit steps in Korea, the occusion chosen being the simultaneous presence of the outgoing and the incoming Resideats-General ia Seonl. She has made arrangements for the establishment of a central bank under off. cial anspices. and slic has uegotiated for the abolltion of the two Departments of War and Justice.

The capltal will be one million sterling in $£ 10$ shares, 30,000 of which shares

## LabOR ORGANLZATION

will be allotted to the Korean Government, the remainiler belng oftered for submeriptlon $\ln \mathbf{K o}$. ren anul Japua. . . . An lmportant feature is that all the bank's oftiecrs will be nominated by the Japunese Government, though they may luelude Korean subjects.

Thls belng a purely financlal mcasure which falls nnturally into its place in the se. quence of Japan's protectorate programme las not attracted any speclal attention. Not so, however, the abolltion of the Korean Depart ment of Justlce, and lis replacement by a hisreal in the Resldency-General. The inimediate effect of that change is to convert the Korean Courts of law into branches of the Japancse trl bunals of justice. Korean laws will, of course be administered - and their revision and coulif: cation cannot be accon lished ln a moment but all the occupants of the bench will be se. lected and appointed hy Japan, amelif competent Kureans cannot he found, or untll they are edue:ttell, Japanesc alone will be nomlnated. Jnpan is to bear the charges of this arrangement namely, $i 50,000$ annually. The lnnoration is not so radlcal as it appears at first sight. Already the assistant Judges in the principal Courts were Japanese subjects, so that what is now done ls to extend the system rather than to alter it.
"These things mary be regarder' as a definlte step towarly the reality of Japan's control in ea. There lave heen threc distinet stages wher attitude towarls her neighibour: first, the alvisory stage: then the stage of suborlinute miministration; and finally the stage of well. nlgh effertive directlon. The first stnge was anteculent to the Conventlon of November, 1906. During that perlonl Japan limited her, self to te: riug counsels which Korea adopted or rejectul at will. The sceond stage was marked by assumption of entlre authority in
the realm of forcign affairs ; entise authority In the domain of communlcatlons; practleally entire authority ln milltary and police affins and vlcarlous authority in the Departmenta of state by means of Vice. Minlstcrs, in the tielil of justlce by the agency of assistant judges, amil in provincinl adminlstratlon ly means of secre. taries w J ranked ns assistant governors. The third stage has just been linaugurnted; nillitary control has hecn made completc: judlelal control has been made complete, and tinanclal contrul has bern made well-plgh conplete. Very little remalns to be done."

## LABOR ORGANIZATION.

## (Trade Unions - Labor Parties - Strikes - Lockouts - Mediations - Arbi-

Australia: A. D. 188i-1906. - The Rise of the Lahor Party. - its rigorous organization. - Some aceount of the part played in Australlan politics br the Labor Party is given rlsenheree (see in this vol., Acestrahia: A. D. 1903-1904, and after). The cirenmstances of thr rise and growth of the party are related briefly and the rlgorousncss of Its organizatlon is thesribeal ln the following
"To trace the origin of the morement we must go back to the fall of priees which legan about 1886, to the sueceeding lean years 1886-92. and the miscries of the conscquent period of unsuecessful strikes. The strikers and thelr working-class sympathlzers were tnunted with appealing to hrite force, and recommended to depend rather upon eonstitutional political methods for the redress of grievances. The work.
ingmen took the adrice and bettered it The trades unlons devoted a portion of their funds and much of their energy to political prupa ganda. First in New South Wales, later in all the eolonles and in many widely separateld dis. tricts. labor leagucs were organized which sketched out a policy and Indd down a pledte which all canddates supported by the leaguemust sign. Thesc formed the nucleus of n new and indenendent political party which gare the - Fotes to either Liheral or Conservative in difft rently, regardless of which was in officc. in return for legislatlve conecssions frcm ofther The new rirty springing thus almost slmultil. neonsly to infe all ortr the eoallinert whs at first regardid as a pathetic jokc. They were few in numbers, uneducated, inexperier.ced In affaira of state, nod tuad opposed to them all the wraith

## LABOR ORGANIZATION

## Labor organization

and the legai astutencss in every chamber where they heid seate. But they were determined, united, and, with mre exceptions. selfsacrificlag. They were mutualiy bound not to take offlee except with the consent of thelr fel-low-laborites, so that they were lahelerl from the firat as ' Not for male.' And from their polnt of vlew the plan has succeeded.

- Friend and foe allke pay trihute to the mag. nificen. organlzation and disclpilne of the move. ment, and to the personal dislnterestedness of the leaders. A great economy of effort ls as. sured by havlng a platform and organization practically ldentical for the Federal, state ar-1 municipal electlons, and for generai propagand.. work, and eonsequentiy leing able to utllize the same budies-the local poltiteal labor leagues- and the same workers for wbat sepus to them soclal righteousness, whe ther in natlonal. state, or munle pui enncerns. The Labor party was born of trailes unlonism, and $i=3$ whole ard. mlalstration has heen hased on trades union methouls. The polltical labor uagues were at first composed of trades-uuloulsts, and are stlli clasciy in touch with traies unlons. These are the boxlles who vote for thie selection of candldases for all eleetlons and for dilegates to the annual and trieanlal state and Ferlerai confer. ences of the purty. The Labor party In Parlia. nemt may be the controlling force, but no other party in Austrulia has to rarry out the behests of lit constlueuts us docs thls.
- We now come to tbe pledge and the caucus. The pledge, which was first drafted by the New South Wales Labor Conference In 1893, reais as follows: - I hereby pledge myself not to opr the candlate selected by the recosintern no cill labour organlsation, and, if elceted, to do miv utmost to carry out the princlples - ein. Indled In the Federal Labour Platform, and on all questions affecting ihe Platform 10 vote as a najority of the d'arlamentary party may deeide at a duly constituted cnucus meetlig.'
"Is the piedge b'nds all members to carry out the gencral principuss of a platform derlded for lim by the unlted labor vote of Austraila, so cach man has hls vote In tbe leglslat .re decilledi for him beforeband on all det is of that poliey by the caucus vote of hls party in he leglspiture, before or during tbe course of debate. Ti, a ${ }^{\prime}$ vocates of the system say that this is the onl; way in whlch any conslstent policy can be curried out to a -uccessful end. Opponenis assert that in it we have the germs of machlne politics, anil that labor may by and by pay dearly frr lts present vietory. Tbe large amount of direct representation in Australin. and the increasing probablifities of the initlative and refrendum lwlag inore largely used, may check this tenIvary." - Allee lleary, The Auntrolian Liture M, rement (The Outhok, Non. 3, 1906).
A. D. 1905-1909. - Failures of the Compulsory Arbitration Law. - In this volume, under the heading - Australia: A. D. 190.5 1:96. - an Instance of fallure In the operatlon of the compulsory A fhitratlor Law to arrest a strike of coal mlners in New south wales is recorded. The failure was repeated in the same field in the fall of 1009, when 12,000 miners of the Newrastle asd Maitland collieries of New SoutL Wales stil, ped work. "The nuen," it was reported. - druiand an open confcreare to deal with thee principal grievances, with resort, in tbe event of
failure, to the Federai Arbitration Court or a sf ilal comminslon. The owners, on the other hand, insist on a conference whith ciosed doors and the settlement of undecided questlons urider the State Industriai Act. They further want work to be resumed slmultaneously with tbe opening of the conference. Tbe men, however, refuse to hew coal until their grievances inave bern settled, but offer to carry on durlng the eonference all work necessary to keep the mines in worklag order."
The correspondent who reported thls went on to say : "The pubile seems to be wlthout a remedy agalnst the strikers, since it is lmpossible to luprison the whole mass, and the lmprisonment. of the leaders would mean a general arike. In addltion tho only available labour for colliery, purposes is controlled by the trade unlons." Evidently, however, the law was vlaclicated in the end, since a report from Syincy on the 2 gith of December, made known that 13 officlals of the miners' unlon hal heen fiued $f 100$ each, with two months hard labor in defauit.

Austria: A. D. 1902.-During a strike of ahout 6500 men in varlons employments at Tr este, In February, 1002, there were contlicts with the mlltary in whlch about 40 were kllledi aud wonndel. The demand was for an cirht hours day, and it was conceded in the cad, after au arbitration which decided in thelr favor. In the following August serious lahor disturhances occurred in Galicin, wbere the peasants claimed better wages, and tricops had to be seut to the region tu restore orrier.
Belgium: A. D. 1902 - General Strike of Workmen as Protest against the Plural Suffrage. See (in this vol.) Bricicm : A. D. 1902.
A. D. 1903 - Compensation for Injuries to Workmen. - After months of debate an Act prescribing compensatiou for aceldents injurious in workmen was passed, attempts to attich to it the princlple of compulsory lnsurance having failed.
Canada: A. D. 1907-1908. - The Aet known as "The Industrial Disputes Investigation Act." - Its main provisions. - Its object, not :- apulsory Arbitration, but the Compulsory sttempting of Arbitration. Generai suecess of the Act. - Failure to prevent Canadian Paeific Railway Strike. - In the judgment of many nh:) give thought and study to inhor questlons, t.se mosi promising experiment yet made in legisathon for denling welth disputes hetween employers and workmen is the Canadlan Aet of March, 1907, entltled " An Aet to all in the Preventlon and iettlement of Striks s and Luckou $\sin$ Mines and Industrics connected with Public C'tilt les." The essence of the Act is in its 56 th to 61 st sections, which read as follows :
"56. It shail be unlawful for any emplorer to declare or causo a lockout or for any empioyec to go on strike. on account of any dispute prior to or during a reference of such dlspute to a Board of C'inciliathon snd investigation under the provislons of this Act. or prior to or during $f$ reference under the provislons concerning ruilway dlsputes in the Conclliation and Labour Act: Provided that noting in thls Act sha:l prohllit the suspenslon or discontinuance of any Indus. try or of the worklng if any persons thereln for Miy eause not emstituting a miknoth or strike: Provided also that, except where the partles have

newspaper puhtishet in Canads who applics therefir，and the Minister muy distribute coples of the report，and of any minorlty report，in such manner an to him me ins most desirahle as a nienns of securing co＇spilance with the Bourd＇s rectmmendation．
The fundsmental object of the law，as will be wen，is not to compel arhitration，but to cons－ pel un attempt at arhltratlon，before any strike or lockont is permitted，and to give authentic and full publelty to all the circumastances which cari justify or condemn a strike or luxikont．If one occurs．So far in the experlence of cianada with thas wlse enuctment it has generally been surcessful in bringlug about a peacefil settle－ minnt of lahor disputes．It failent in the case of a Alsirferment between the Canadinn Pacifle thitwiy Company and its meehunleal cmployés， which arose in April，1001s，when the Company servect notce of a reduction of wages to one diasa if boller－makers，and of un tuerease in the proporton of apprentices to be employed In Its Nhups，together with some changes of rules con－ uruing machine tools，ete．The men appled for the appointment of a Conclintlon Buard，in accornmee with the law，but were not satistied with the concluslons ruported hy n majority of the loard and struck，as the law then pormitterd them to do．The strike was weukened by the nufisorable public opluion which the hivestiga－ tim produced．

England：A．D．1892－1901．－A Statistical Study of Ten Years of Trade Disputes．－ The fullowing is the concludiuk sumumary of an elahorate statistical staly of Sirikes und Lork－ outs in England during the ten years from 1 wite to 1901 ，made by an emhent statistlcion，Mr． J． 11 scheolling：
＂Ton sum up the chlef practical points that semm to have come out of thls exmmination of trall dlspintes during 189？－1901，these are：
＂（a）An laprovement during 189i－1401 ns eompured with 1892－1心゙
＂（ $n$ ）An altogether undue predominance of the Mintng and（Quarrying Tralles in trale dis－ purio．net only nctumy，fut alsos relatively to thu inlustrial population of cmela group of trades compirect．Thislsa movt unsathsactory feature， for the reison that so many other trates depend npuat mati－nterruption of irnal ruining for the ir surcewful worklug．Therefore，efforts to pre－ sent lisputes shoull he specially directed to the Minine and Cuarrying Trades．
－（e）Nemrly two－thirds of all trade disputes are cansel hy disputes nbout wages，und nararly one half of all trade disputes are cansed by a demind by workpeople for an mereme of wayes．＇Only 6 per cent．of all disputes ar＂ealused hy resistance＇against decrease of Wuges．
＂，il）Triule Culoulsm ls not so proluctive of strikis as it is commonly supposed to be．
－（e）Conelliation Boards，cte．，do not canse the suthement of many disputes after the dis－ pute has commerced．Their work is in the direction of preventing strikes and lock－onts． That thls work is effectire and that it should be reithusly promoted isevidenced by the fact that in 1901， 75 ner cent．of all changes in wages and in hours of labour were arranged by shlding scales，wayes boards，or hy other puaceful meth． ols，while only 2 per crut．of these changes ful－ lowed upon strikes or luck outs．
＂$(f)$ The respective chancer of nuccess by worspeopie or by employers when a trade da－ pute is enterel upon hre，in rouml numbers：

150 chances for the emplayers；and
100 chances for the workpenple．
＂In addition to this relatively small chance of nucress by work people whan they strike，the cost to them and to their trade organisatlons is relutively egreater than the cost to employcre． －J．II．Nibooting，Striks and loch－outs，1sy） 1001 （Furt nightty lieriere，May，1904）．
A．D． $1900-1906$ ．－The Taff Vale De－ cision．－Trades Unions made llable for Damages，－－Resulting amendment of the English Law．－In the summer of 1 invo a strlke of enployes of the Taff Vale llallwuy Company orcurred．which lasted only a fortulght or there－ ulnuts，but had large nad important conse－ gurnees．During the strike the Company applted for un lijunction to restruin two offecers of the Amulgamatel Society of lallway Servants from Interfering as such with the affalrs of the roud． The soclety opposed the npplicatlon，on the ground that it was not a corpuration or an lndi－ vilual and could not he sued．Justice Farwell， before whom the case came，held that a trade unlon was a corporate holy，responstble for the－ tail acts commilted by lta oftcers．This declsion Was in serlous menace to the unions generally． and they curperated extenslvely with the Aman－ gimated socicty in earrying an nppenal to the higher eonrts．The case whenryurd la the court． of Apperals in November．1900，and the justleres of that court reversed the dechion if dustlece Furwell．The plaintiff in the sult，the Railway Company，then earrled it to the tribunal of hast rewort，the flomse of horls，antil there，ith Juty， 1：m）2，the judgment of the Comrt of Appeals was sit adhe and that of Justice Parwed was sus－ funued，miking it the bin of Cirmit Britain，that a trade mulon is a tegal entity，capsithe of sh－ ing and being sued．On this ilecision the Taff Vile Raitway Company brought suit aritust． the Amalgamis octety for dimatres．and ohtained an vert－ot the goth of December which awarled the－mipany $\left.\mathrm{E}^{2} 34,(0) \mathrm{O}\right)$ ．
I stremmus endar or th inderome the offect of the decision renderal by the llouse of Lords． throngh murmatary tiglithton，was hegun by the Lillow larty，with stroner sympathy umong the Litwerils，and it had sureerse．Ain ．lit（which becanue have on the 214t of Deember，196iti＂th provide for the regulntion of Trales Cuions and Trmic Disputer，＂added the following＂as a new paragropht nfter the tirst paragraph of scection three of the Conspiracy and D＇rotection of Pro－ perty Act． $15 \%$＂：
＂Anact done in pursuance of an agreement or combination ly two or more persons shall，if dune in contemplation or furtherance of n trude dispute，not be actionable muless the is 8 ．If done without any such agrement or eombination． would be aethnathe．＂

Further provislons of the new Act were as follows：
＂2．－It shall be lawful for one or more per－ sons，acting on thelr own behalf or on leehalf of a trade union or of an individual employer ur firm in contemplation or furtherance of a trade dispute，to attend at or near o honse or place－ where a person risides or works or carries on business or happens to be，if they so atternd merely for the purpose of pcacefully obtaining

"Mydicaliame is the distInctive mark of the present labour moremont in France. . . Per. haps the essentinl character of syndicalisme is best expressed by saylng that it is a purely trade union version of suclaism detinitely and even violently opposed tu Collectivism and more nearly aliled to auarchism, Fet listinct from it. .. The olject of syndicalisme is revolution. sudden and complete, in which the State, with all tho apparatus of government, is to dis appear, and the possession and control of ma terial incans - which alnne count - is to pass from the hands of lts present owners, whether private or public, iato those of or ganized labour. This origlnal idea is Socialiatic or Collectivist. In so far as it is directed agalnst capitalism : it is anarchlstic in so far as lt contemplates the disappearamee of the State: but alnve $n!1$, it !a

## LABOR ORGANIZATION

trade unionist. for the syndicat is posited as the unlt or cell of the future social organism. To complete this brlef outine of the idea of Synaicalime it is only necessary to add that the means wherehy the revolution ta to be accomplished is the general strike, and that, pending that consummation, ordinary strikes are systematically encouraged as good practice, in which, as hy skirnishes or manceuvres, the labour forces are , trained and prepared for the great encounter."
The lden of a general strike was put forward in 1888 hy nu anarchlst l'arlsian carpenter named Torteller. and the mllitant forces of or ganized labor rallied to it. It bronght together the two sets Into wheh finbor organization had split - the Guesdist party, controlling the signdicats, and thelr opponents in possession of the
bour tos dut tracui? bourtos din tracail. It "cansed the romt and withirawnl of the Soccial Demoerats, and so led to the birth of siyndicalisme. The tarning point was reached in 1804 at a joint congress held at Nantes, whell nfter a set debnte the gincral strike was adopted by 6.5 votes against 35 , whith nine nustinents. In the following year the Confederation Ginerale du Travail was formed ns a new and unlted federation of trade unions, purgerl of polities, or, nt leavt, of Par. liannentary polities: and theneeforward the two sets of orgaizatlons-trade unions and trades comeils-drew the tabour car together; hat at first and for some yeurs they by no menns pulled together." In 1902 they were harmonl/rid. "mainly by the eflorts of M. Niel," who has bern enlleid the real crentor of the cuaficlir.
ation cienimale to the head of when "tion lienipule to the head of which, as general sc"retiry: "which me:ans president," be was elected in Fcbrnary. 1409 , ${ }^{\text {dent }}$ is The word 'prasidrat' is escherwed. as savoring of the baurgeois state.". M. Ntel is in eompostor. "He is of the hest type of trale unlonist: a calm, cupable, lיvel-hiaded man, devotell to trade nionism, but no crazy throrist or riolent fanatie."

The unimerical strength of the Confecleration or its want of strength is a poht on which its enemirs are nerertired of insisting. In Oetober last the onlieinl figures pres-nted to the consress nt Marselles were First section, 2.586 ayndicuts. With an aggregate membership of $204,390^{2}$
 ing 3. 014 syndirnt. The fignres mast not be added together, because the fwo sections represent the same or almost the snme forees, differently organized. Ther returns of the tirst section show thr elfoctive membership, and we may call it 3(h),000. Now the otlc ini statistles of the Mithintire olu Tramail give the total membershin of syndicuts murriers at the beginning of 1908 ns 457, 1112. The Confedleration, therefore, ens. braese less thim oue third of the organizerl labonr in Fraure. But that calculation is oprn to some "riticisms: the Goverument returns are silid to lie two liigh, thase of the conferieration ton low. Thare is probably some truth in both state. ments.

## LABOR ORGANIZATION

## LABOR OHGANLZATION

Importnnt of all was the right to strike. In coasequence of that manifestation, whlch was regarded as llegal, a certaln nuniher of funetionaries were dlsmissed, notably, as readers of The Times wlil recall, a school teacher hy the name of Nigre, an official of the Ministry of the Interlor, M. Janvion, a postman named Simonnet, ad an electrlcian, M. Pataud."
These dlsmissed officlais, M. Pataud especially, were the leaders of the strike that was undertaken on the 13th of March, when twelve hundred men employed in the central ollices of the Parls Telegraph Department steppel work at sbont 20 clock in the afternoon, " In order toexpress 'sympathy' with three hmudred men of the postal servlec who had lnvaded the oftices on the 12th, and had made a demonstration aguinst 11. Simyan, the Under-Secretary of Stute for l'osts anil Tclegraphs." "The precise grievances of che strikers," suld The Times, "ure probubly known to their superiors; but, so far as we hare seen, they have not been placed before the ontside world la nny form whleh renders it possible even clearly to understand them."

On the other hand, a specinl correspondent of the New York Evening Post wrote from Paris on the 2Jth of March: "The strike of these governnient employees may have been a slde development of the general movement which threntons to transform the l'arliamentary Frencli republic into a ripullique syndicule; hit, in itself, it was soncthiag far diffcrent. And, for another reason, it is a direct object-lesson for the Lnited States, where the trade unions are not yet revolutionary, The eutire strike has becn a spontancous uprisIny of civil service ln possession against the in vasion of a spoils system. The strike wonld not have becu possible if thege clvil survice appuintees - 'government functionaries' - had ant formed themselves into strongly orgalized mions. just as private service employees lave lous: been dolng: and in this they hire been en. conrugel by successive republican govermments, unforeseeting perhaps such strlkes as the inevitable coasequance. The spulls system in the present case means the Intervention of political lutluence in clvil service appolntinents and promotions." The strikers, said this writer. want essentlally two things, "First, that politicians - and partlenlarly l'ostmaster General Sinyan, who was taken over from M. Combes into the present government - should case interfering with civil service appointments and promotions and no longer ase their power in ludhalf of the favorite of some deputy with inthurne." "

The situation produced In Paris liv the strlke was then descrihel by this correspondent of The $P_{\text {Best }}$ : "We of l'aris were for eight days in the same condition as Frenchmen were befre lRichelien invented a trate postal service for the nse of private persons. For example, my last letters were sent - one to Invere by a special messing. ger who was carrylng by limul cuble messiges fir s.seral correspondents to be forwarded from that port: one to London by another surecial messenger, who posted it whith many others ln a ci manel boat ; and a third to Cherbours by the kindness of the Amurican Chamber of Comtur rce of l'aris, whlch organized a servlce of its own for its memberg. . . If there lind heen a sudden outbronk lietween Sorvin and Austria last werk, the French government would have
known llttle about it, nud, in case of need, army mobilizatloa would have bee a impossihle."
A system of publie service ln wheh snch situatlons as this are male possible could not exlst long without destruction of government and of all social order. No argumeut was neeled to demonstrate that it must not be paltered with; hut the Government of France was forced momeatarlly to yield so much show of deference or respect to its rebellions servants, whose demnads were made with arrogance of splrit and insolence of tone, that the arrogance und Insolence appeared to have trimmphed in the enconnter with national sovercignty and law. The tenor of an inturview given on the $92 d$ by the l'remler, M. Clemencent, and the Nluister of 1'ublic Works, Posts, und 'l'clegraphs, M1. Barthon, to a committe from the striking eniployes of the State, was thens stated in a Press despatch ut the tlme: "The two coulitlons which had been snbmitted to the Blinisters were. irst, immunty from disciplinary penaliies for all the strikers; seconelly, the resignation of $\mathbf{~ M}$. Slumyan, the obnoxious Luder-secretary of State. The Ministers had arreed to the tirst of these condithons for all strikers who slould hatve re. tarned to work by Tuesday morning. The seeond condition wis refusid by the Ministers on the gromed that \$. Simyan is respunsible to the Climber of I leputies, but not to the postal emphofis. II. Barthon hat, however, matle it phan that. in accoreance with the terms of his sperch in the chamber last fridity, the Covernthent contemplated appointing in place of M. Simyan an oticial with the yuatitication of tech nical knowledre. - When, ou Friday, he said. 'I discussed before the Chimber the ransfornantion of the Cuder-icoretaryship of l'osts and Tele. graples into a trehinal iliretorship. I was not emploring an empsy pliras. I consider that the reform is of prictical interest and that it ought to be cffecterl at ancearly dite:" This wins as ne:ar a promise to fultil the strikers' demands. as constitntional considerations would permit,

This bronstht about areturn to duty of postal clerks and operators of the telegraph nud the telephane: but they roturned as victorions reso. Intionivts, and the mens from Pario in the folfowing werks was tilled with arrounts of thetr manfestations of eomempt ind detinne for the Gowermment, and the extensive insubardination moner then that prevailed. l3nt the (iovernment, ou its side, supported strongly br a grayt majority of rotes in the Chamber of leputies, and by resolute expressions of publie opinion from every part of France. was now taking neasures to propare itself for defating any fut ture attempt to paralyze the service of the posts nud wires. The engluer trowps and other technical branches of the servlee were warned to be remly for emerrencies, carrier pigrons were col. lected, und preliminary arrangements made for ath elaborate servlee of motor-cars. Chambers of commerce thronghont the country ware called on to be prepared to caipurate whit the Govern. ment in organizing anauxllary mail service. By such meashres it was soon remdered safe to beqin applalng diseipllae to the insubordination that had become rife. Seven tlagrant offenders were tried by a ('ouncil of Discipllae and dismissed. on the 8 th of Mny, and thls preclpitated ant attempt to remen the strike. nud to make it introdnctory to the long threatened revoluthonary

## LABOR ORGANIZATION

strike of all lat orln France. A few anxious daye followed, white the menace kept a sirious show and then It vanished, like an emptied cloud. The firmattltude of the Government and the hostillty of natlonal oplnion had daunted the revolutiou ary dyndicats which Inclined to joln fortunes with the revolutlonists of the publie service, and the latter were left to confront otficlal authority alone. Thelr second strike came to nothing. A despatch from Parls on the 16 th of May stated that 548 postmen who were promlnent in the reheltlon of the strlke had heen expelled from the service, and that others were recciving less screre punishments from the Disclplinary ('ourt.

U'ltimately, slxteen officlals of the Post Offiee wcre prosecuted hy the Government for illegally forming a trade unlon. They were hrought to trial in July, with the rcsult announced on the 29th as follows: "The 16 ofticlals who were prosecuted hy the Government have been condemned to a purely nominal tine of 12s. 6d., ant thelr union has been declared wo he contrary to the law. The Court argued that in the present state of the law there was no douht whatever tbat the Waldeck-Rousseau Bill of 1884, permlttlng the organizatlon of trade unlons, solely had application to the lnterests of private lu. divlduals, and that the Chamber of Deputies had not meant to extend the provislons of that law to Civll servants. The consideratlons of this important legal judgment furthermorc declare It to be utterly preposterous that State employis should arrogate to themselves the right to strike, since they are the employis of the uation, and eujoy morcover such special privlleges us servants of the State that no comparison can be drawn between them and the worklng classes, whose right to strike is not contested."

The judgment of the Paris Correctional ('ourt, in the fase of the slateen ofticials who were lurt, seruted for lllegally forming a trade union was followed, on the Tith of Aupist, by a kindred decision from the Conseil d'Etat, to whleb two disinlssed postmen had appealed. Their appli. cation to he restored to the service was denied. The decree of the conseil exprescly declared that a strike of civil servants is an "illegal act." and adeled that a State ollicial "has accrptenl all the obligations arising from the necessities of the public service and has renounced all privileges incompatille with the essential continuity of the national life, "that clvil serrants who Ifclare a strike place themselves collectively ontside the pale of the laws and regulations whith guarantee the exercise for them of the rights which they normally possess as servants of the State.

Ilaving thins vindicated lts authority over the servants of the Nitate, the Government exerclsed a wise clemency at once. Two days after the lecision of the Consell detat, the new Mlingster of I'uhlic Works anthorized the puhlication of the following note: "In consequence of the slecision of the Consell $l^{\text {Etat, M. Millerund }}$ has dicided, whlle approving the sispensions pronounced by their respoctive chiefs, that 30 rhlicials of both sexcs, five subaltern otllcials, and ien Post Office workmen who have been lismissed should resume work the day after tomorrow." surther reinstatements were announced in the course of the following month.
Germany: A. D. 8905 .-Strikes,-Epwards of 100,000 miners in the coal fields of the Ruhr

## LABOR ORGANIZATION

dlatrict began a strike In January whleh dld not end uutil the nilddle of Fehruary, and which cnused mist of tbe Iron works and machine shops of Theuish Irussia and Westphalta to be closed. Low wages (of 4 marlis or a little lins thau a dollar per day) and inhuman and dishous. est triatment were the chlet romplalnts in the miners. A hlll to reform condlions ln the mines was passed soon afterwards. The cost of the strlke to all concerned was eatimated to bave been more than $\$ 30,000,000$. A very serions strike of ahout 40,000 men in electrical lndns. trics occurred at Berlin In septeniber and Ucto. her, resulting in a coneession of slx per cent increase of wages to tbe men. Statistles puhlishen in the nart Year showed a startling lncrease of labor contlicts In 1904 and 100. From 1899 to 1903 the ycarly avirage of strikes had been 1242. In 1004 the number rose to 1870 , and $\ln$ 1905 to 205\%. Lockouts had averaged 42 in tach of the prevlous flve fears, but increased to 120 in 1904 Apparently the labor conditlons were no tivie penceahle in 1906.
A. D. 1905-1906. - The Operation of Industrial Courts. - Desire for Voluntary Boards of Conciliation. - "In the event of actual dispute the official machinery of the In dustrinl courts is always at eall, should the dis. putants be willing to use it. The law requires the firmation of these Courts $\ln$ all towns with over 20,000 inhahitunts, hut they may be formed elsewhere at the option of the Government of the State or on the joint requisition of a given number of cmployers and workpeople, and they consist of equal numbers of theth. That the 406 Conrts now ln existence do not mediate oftener woull appear to be less the fault of the workpeople than of the employers. During 1905 they acted as hoards of couciliatlon on 350 oceasions: on 16.5 In response to $\ln$ vita. tions from hoth sldes, on 175 on the Invitation of the workpeople alone, and on ten only on the sole Invitation of the employers. Only in 124 cases was it possible to hring the disputing
purties together. . .
" At the annual meeting of the Germau Societ $y$ for Kocind Rcform, hchl ha Berlln In December, 1006. resolutions were alopted 'affirming the mecting's convlction that Industrial peace would best he promoted by the devflopment of colife tivearrangements betreenemployers and work prople In the form of (1) wages ngrecments. (2) volnitary boards of conctliation and arbitratlon, and (3) worknen's committees for individnal works'; and it was urged that, 'after the example of Great Britain, conciliatlon hoards snitud to the various industries should he generally formed, these to coopperate with highor tribuinals and to call $\ln$ on occasion the help of prominent public men as alvlsers and arbitm. tors.'"- Wllliam II. Ihineland - Westphalia is lts chosen hatile ground. Here all the conditlons of economic warfare exlst ln a rare degree. It is a striking fact tbat a large part of the natural resonrces, Industry, and wealth-productlon of that unrest-

## LABOR ORGANIZATION

## LABOR ORGANIZATION

iag workahop of Germany is under the control of a dozen men of conmanding business genins -men of strong and masterful character, born rulers of the sternest moukl, withont sentiment, not Insusceptlble to justice, yet never going beyond it, intlexlhle in declsion, of lnexhaustible will-power, and Inipervlous to all modern aotloas of political liberallsin. These men, who hare so consplcuously helper to create modern industrial Prussia, and who are a greater real power in the land than Minlsters and legislators put together, typliy in molern iadustry the feudailsm whleh is slowly dying upon the great estates of the East. Their attitude towards the unions in which thelr workmen are organised to the number of hundreds of thousands is frequently expressed in the maxim. We intend to be masters in our own honse, and nothing is wanting in the rlgour with which this maxim is applied. On the occasion of the Mannhelm conferrace of the Association for Social Policy in September, 1905, Herr Kilrdorf, prohably the best kaown Indnstriallst of Westphalia, and the head of the Coal and Steel Syndientes, was invited to give an employer's reply to an indletment of the syndicates made by Professor Gistav Schmoller. In the course of his statement occurred the following observations on the question of labour organisatlon:-
". It is regrettable that our workpeople are able to change thelr positions at any time. An unlertaking ean only prosper if it has a stationary baad of workers. I do not ask that legisla. tion sliould come to our help, but we must re. sorve to ourselves the right to take measures to check this frequent ehange of employment. The proposal has been made that all workpeoplc should be compelled to join orgnnisatlons and that employers should be required to negotiate with these organlsations. For myself I would remark that I refuse to Degotlate with any or. ganisatlon whaterer.
" Publlc opinion naturally finds ltself of ten is conflict with the West phalian intustrinlists' uttitude, which more than anythlng else was responslble for the sollil galn won by the men In the great colliery strlke of 1005 . It was the same llerr Klrdorf who deelared during that strike. 'The movement can only cnd hy the men recognisine that they can get nothing be a strike and returnlng to the miaes. We will necotinte whth every man singly, hut we will not eonverle workmen's eommittees, ' It was thls inth-xlhle attlude, perslsted In too long. which turnal first the publie and then the Gorernment aseninst the eolliery owners. By refusing to mert the colliers' 'Committee of Seven' they criated the impression that the men were wlsh. ful for peace but were unable to gain an ear for their overtnres. In the end not only were work. menns eonmitters grinted hy fored of luw, but the hours of labmar mere eurtalled, tines were abulisurel, nol other coneessions were male which eost the culliery cowners dearly, until the extra burlen conld be tmasferred to the pub-lir."-Whllam 11. Dawson, Erolution of Mod. "rif Germany, pp. 122-125 (Invin, London; scribners, N. Y., 1900).

A. D. 1909. - A Church Movement of Agricultural Lahor Organization. - "An agitat lon auong agricultural lahourers in North Umbria seems to lave tuken a new unt rery unusial form, sinee, from all recounts. it is directly promoted and supported by the clergy. The parish priests in the nelghbourhoor of Perugia are sail not only to hise put themselves at the head of the movement. but to have actually lnitiated it with a masifesto denouncing the gricrances of the lalourers, and calling upon them to organize themselves in order to extort more favourable eondlitions from the landowners who cmploy them. The Clinreh seems to hare satistied itself that the nutual relathons of eapital and lalour were unfair to the labourer, and to lave determlued to be beforehand with the sucialist agitator, ereatiag an organizatlon whieh will call ltself democristiana, or christim demoerat, in antielpation of what might have been a more revohtionary Sordilist learue. 'The manifesto mas issued last May, and containd much the sane de. mands ins have hato suceessfully made by la. bour in other parts of ltaly. . . . So far the landowners have proved absolutely recaleitrant. A leagne of resistanee has been formed on thels side, antl an attempt was mule at reprisals by boyeotting parish prirsts, stopping any pay. ment of tithes to the (hureh, disnis-ing niny private elaphains who belonged to the secular elergy, and emploving the regnlar elergy insteat of the parocitial in any cases where thelr services were remuirml.
"The parish clergy were not to be intimldated by financial loss, and the proprictors then appealeil to the Archbishop of Prertyia to put his veto on their agitation. The Arehbishop, Ilonsirtur Mattei-fentile, could only inform them that he had alreatiy given his sanction to the movenuent. The proprictors, by the friemilly medtatim of $n$ (xardinal, then appealed the the P'ope. Ifter some consilleratlon, lius $X$. sunt a rertain signor Giovańni l'assamonti. a lawyer who hats had atrowl deal of esperience in [̌mhrian affairs, to make an inquiry, and attempt sume hiul of compromise. Xeitler side, however, would listen to shgestions of eoneiliatinn. . . . So the matter now stands. The position is certainly an Interesting one, as it is the first time that the Chureh has aetually taken the lead in a labour novement." - Rome (irrespmade ut. Inndon Times, July 21, 1909.

Netherlands: A. D. 1903. - Laws against Railway Strikes. - Failure of Labor Strike to prevent their Passage - Easiy ia 19M3 lt was made known that the Gowernment of the Netherlands intended to bring forwad in the States-General a hill prohibiting strikes among railway employecs, on the ground that they were engaged in a publie servlce which must not sufter intertiption At usere thee raitway men gave nutice that they would, if this nea

## Labor organization

## Labor organization

sure were undertaken, appeal to all workmen ln the country for a general strike. The Government then prepared liself for a struggle by summonlng a certaln quota of the infantry and engineers of the lReserves to urms, and, on the 20 th of Fehruary, lts proposed legislation was lutroduced. It amended the frenal code, in order to punish strikes by persons in the puhlic serviee as nilulemeauors and to attach penalties of more severity to all attacks on the freedom of labor. It provided, further, for the organlzation of a military rallway brigade, to hisure service on the lines in case of a strike; and tinally, it crented a commission to investlgate the condithom of the ruifway service and of its employeres. Pending the ulscission of tbese measures the threatened strike was indertaken, and was suen very soon to have falled. Without any serious contlict with the authoritles it was given up, and. on the 11tb of A pril. the hills became Law,
New Zealand: A. D. 1896-1908. - The Compuisory Arbitration Law. - Its working. - At the mecting of the Natlonal Civic Fideration of the United States, In December, 1908. Mr. Hugh II. Lusk, of New Zealanil, spoke of the compulsory arbitration law of that country (see, in Volume VI, of thla work, New Zea. lanis). "In form," he suld, "the law is not compulsory upon all men, but only upon those who hecone amenahle to lt hy registering thelr associatlons under the law. Slace associations, both of workers and of employers, are genenill: registered, It is and haa heen for twelve yars now past ahsolutely eompulsory arhitration. Abont six years ago the law was extended to the Commonwealth of Austrnlia, where it is now in force. In New Z'aland compulsory arbitratlon has hiltherto heen a preat success, It has had the effect of preventing all strikes and all lock outs for twelve yeurs in that country until the other tay. The history of its extension to Aus. tralia his been the greatest tribute that could be mate to its success in New Zealand. It has not bern in all resprects as great a success in Aus. tralia as $\ln$ New Zealant. New Zealand has a million white inhabitants, Australia nearly five million; therefure, hy the extension of the law from New Zealand to Australla yon have got, as It were, a stepplng stone from whi $/ 1$ you can easlly s'e how far it would be likely to be a suc. cess in a country as much greater and as much more populous than Anstralia is is thls conntry.
"The law of New Zaraland, and now of Australia, compels all associated workers who are rugistered noder the act to suhmit to the law if they lave causes of difference with thelr employers. In the first place, they have to go to a nirinber of the Boaril of C'oncillation, one of whleh exists ln uny conslderable dlstrict, and the Conciliation Board falling in lts ohject thes can rumove the cause into the Court of Arbltration, which passes flual judgment.

- For twelve years the liaw operated without serions hreakdown in New Zealand. It has heen carritil on for five years whthout a serious break. down In Anstralia. Now, what is wrong with the Act and its operatlons? At flrst the workers were purfectly sutistied whth the conrt because, as a general rule, it was with them. Later on, the court as a rule has heen against them. They have been inclined to the belief that the consti. tution of the court ls uufavorable, the court being coustituted of two representatives of lahor
with two representatives of capltal, together with one Judge of the Bupreme Court, sltting as president or chalrman. They have come to the concluslon that it is the fifth man who really gives the decislon. The difficulty in such a cas as thls is that If the representative man who glves his decision has not the confldence of hoth partles the court fails ln its ohject. It ls be. lleved that the declslons are, In general, those of a man belonging to the capltalist class - since laborers do not often find thelr way to the sif. preme Court bench in any country. This seens. to be the bottom of the difficulty both In New Zealand and in Australla. I do not think you could enact a law elther as a Federal law or as a State law, to day, such as the law In New Zas hand and enforce it. The pcople are not realy for lt. The ('anadlan plan scems to me to be a step, although perhmps rather a tlmid step ln the right directlon.
Tbe exceptional strlke to whlch Mr. Iusk re. ferred, as occurring "the other day," was ln Fehruary, 1907 . The strike was of men in the freezlng whils of the frozen meat trade. Thry stopped work as individuals, not as a union, each clalming his right to take a rest from work. hat the law was applied to then, nevertheless, and they were fined $£ 5$ each. Mr Gompers, who spoke after Mr. Lusk, declared himss If emphatleally against the New Zealand system, Ray Ing: "I would not have employers do as they please; I would not want workinen to do as they please; lut I hellere that by the organization of lndustry and hy the organlzatlon of labor we are guthering forces consclous of their power, whlch, intelligently and wisely wielded, bring forth a spirit of conciliation that no court of arhitratlon ever yet was ahle to impose. There is $\ln$ the United States inore genulne conciliation between organlzed employers and organized workmen than exlsts lu any other part of the world.'
Russia: A. D. 1904-1905. - Revolutionary Strikes. dee (in thls vol.) Ressia: A. D. 1904 1905 .

Scotland: A. D. 1904-1909 - Five Years of Peace in Coal Mining. - A threatened conflict averted. - In 1804 the coalmasters of Scotland made an agreentent with thelr men for regnlating ... as according to a fixed scale, to be neither below 3it per cent, nor over 100 per cent, above what is callenl the hasis of 1 pws. Which was 4 s , per day, in effect the rauge was from 5s. 6d, to 8s. per day, and within these limits the Coal Concillation Bourd was empow. ered to adjust questions of wages as they aroer. Inder thls agreement the Conclliation Bond operated satlsfinctorily till the summer of 1900 . and under the constitution of the board there was power to refer any questlon on whlel the representatives of the masters and men enuld not agree to a nelitral chalrman, whose decisloc was to le absolinte.

During the first threc years of the agreeminc trade was prosperons and wages roee nearly to tir maximum unter wheh tbe Conciliation Boari could adjudlcate. Then came the period of getseral depression, and wages went down, along with prices of coal, untll, finally, the coal nasters applled for a further reduetion to the minmmm of the agrement. 5s, 6d, per day. The ment = representatives on the Board refused to entertain the proposal. The disagreement became acute

"atrike." This came happily to naughi ; and, the second, undertaken in Sweden, bad the asme result.

A dispute in the paper, woolen, and cotton industrles of Sweden led, first, to a lockout of about 13,000 workmen ln those factories, the employers actiag in a eompact assoclation, which serms to have emhraced ail lmportant fieids of prowactlon. On the 26th of July the lockout was extended to certaln other allimi trades, affecl ing about 40,000 employees in all : and lt was then announcel that on the ad of August, If the men dld not come to terms, the cloging of works would he carrlei Into the iron trades, and further atili. Thls challenged the Ailled Trade Unlons to summon a "general strike" of ali their membershlp, and the call went out for an unlversal dropping of work on August 4th. Exception, however, was made in the cali, of emplnyees in the water-works, lighting and sanltation departments of the puhlic service, and of those on whom hospitals, funerals and living animais rere tiependent for care. Raiway, postal, telegraph and teiephone emplogees were not ineluled In the Lahor Fed eratlon, and dld not strike. Between lockout and strike, horever, the suspensiod of industry was so extensive as to redice Stockholm, espectally, to a rery grave situation; but tuc emergeincy was faced with remarkahle ene gy and courage hy hoth Government and peopl
Neither employers nor employees would isten to any medlation bet, en them by King or Minlsters, and tise measures of Govirament were dlreeted solely to the repression of disordir aud the cheeking of ali that savored of revolution. ary aims. ifow the inhlic of stockholm saredt ltself from paralysis is told by a eorrespondent who wrote from that city on the 2sth of August. When che strike was in its fourth week. "ilow is it," he asked. "that the trams are running. eahs are plying for hire in the struets, the stean ferries are working as usual, streets and louses are lighted, and there seems :., lack of provisions or transport? The explanation is that these and many other of the zoost lmportant social serviees are being purformed by "brlgate of volunteers, who have come forma. in the puhlie interest abled whe devote their thene ard energies gratuitously to supplylng the most pressing needs of society at larire.
"On July 81 plans $w$ re first formed for meeting the sltuatlon by the organization of a band of colintary helpers and on August 2 a meeting was beld at which definite a^tlon was detprained upon. A 'Puhlle Securlty Brigade ' (Fricilliga skyddskuren) was to be enrolled, and the following serviees, amongst others. were to he undertaken: The protection of banks. insuranec ofticers, and similar institutions llahle to attack or plunier by the strikers; the working of trams and stenmboats, and of ges. water, and electric lig machinery: the driving of motor aui oth ; the conveyance of the sick to the linspit ad the rendering to the hospitai staff of any cessary belp: the unlof ling and transport of the necessitles of life, jueh as fooml, coal, wood, \&c. The ohjeet of the organizatlon was not to heip indlvidual sufferers or to safeguard indlvidual Interesta. but in every way possible? to maintain such services as should be consldered necessary for the securlty and welfare of the communlty.

## LABOR ORGANIZ.ATION

"Th. ${ }^{\text {a }}$ appeal for voinnteers met witb a get.m. ons and enthosiastic respronse, hnl withln a weck of the first mectlug on August 2 tbe whole or:palizatlon whs in fuil working order. A!I clavers supplled thelr quota. Counts and baron a, militury and naval ofticers, professlonal a d Lusiness men, englacers, clerks, studente from the Ciniversities and technical scbools, allke volunterend their services. The importance of such a movement can linally be overestimated. The fact hat the recistlve body has no con. nexion with the Govirnmeu* or municlpality and vet is working ineonste nt touch and in pur. fect harmony with hoth sperak volumes for the spirlt in which the work bas been undertaken turl the efllciency with whieh It ls being carried ont. It is an object-fesson in the capaeity of the uppur and inlddie classes to meet such nn emergency. And lant:r, if, as is thougbt proballe by ame, the in:titntion should become a perinanumt olle, Sweden will have one of thr best guminutecs for ludustrial peace in the Puture.
When this was written, the striggie, so far us It involved an attempted geucrnl strike, was near lts end. O1] the $3 d$ of Suptember the labor Federntion announced lis willingness tbat those organlzations which were not connected with the origlnai dlaphte. but wbielt had joined the strike to help makr it were': I, should return in work, if the Goverument wonld renew its prifer of medianion in the primary dispute. This the Government did willingly ; but at tbe - 1 if of Scptember it was announced that the ne. : $\because$ intions nuticraken had broken down aud that fit, Hot men were still withont work.

The most surious ferture of the conflict was the appurent realiness with whicb many labor orkanzations broke ugreements and contracts, in orider to take part in it. even when not called on to dos so by the general Federation. Aecording to the claim ol the Employers' Federation, moreorer, It was fuithlessness tusuch contraets whicb hael most to do with hringlig of the dockout on. On the other hand, the workmen malntain tbat it is the uim of the employers to break down their unions, and that self-preservation justifies them in lreaking contracts when tbent course is nueessary to defath such arionipts. Where the very irnth lies is questlomble, bere as in most sucil contii. ts.

United States: The Organization of Labor, - "Mast of the national trale unlons are aftiliated to one great federal organization, known as the Amerienn Feleration of Labor, Thw railway brotherhoods, so called, kcep their separate orga.ikations, whlout aflliating to any other boxly. There are some independent unions; while the Knights of Labor are a body entirely distinet from ull other organlantions, and liare a differcnt oryanie law. It is difficult to aseertain the nemberslip of unions. In Great Britain the law requiting registration enalles the Gorernment to state whith fair aecuracy the st rugth of unions in that country. Acrording it the latest reports availahle, the Finglish trade nuions liad a nuembership of $1,802,518$, while in Hh Inited States, - with donble England's population, - the estimated membership of :lhor orgnnizations on July 1 last was $1,400,000$. 11 iswtimeted at the preanit fime that tbere are beariy $18,000,000$ prowns (men, women, and children) in the (niterl States working as wage

## LABOR ORGANIZATION

carners. Tie pereentage embraced in the labop anlons is not large, therefore, being not more than 8 prer cent. of the whole body. It must be remembered, inowever, that in meuy trades the menibers are organlzed up to a large proportion. - sumbetmes 90 per cent. - of the totai number enguged. The Amerlean Federation of Labor probahy represents 850,000 members, and the Kuichts of I.nbor perhaps 200,000. The Urilep of Lailway Coniduetors of America, - whose luend, Mr. E. E. Ci.ark, lias been appolnted on the Cos ontmisslon, - has searly 25,000 mem - ars : the l3rotherhond of Locomntive Enginerrs over 84,000; the Brotherboond if Locomotis Firemen, neurly 88,000 ; the i3rotberbood of Kallwny Tralnmen, about 44,000 ; and there are nt least four other influentlal rallroud orgiala tlons. "- Carroll i). Wright, Iabor Organization in the United Statew (Contemporary Revieur, Oct. 1902).

The Trade Usion as a factor ln the Assimilation of th. Foreign-born Population, and in its Political Education. - " Whatever our judgment as to the legality or expedlency of the ludustrial poliey of our Ameriean unious, no student of conteuporary conditions can ding that thes are n mighty factor in effectlng the assimilation of our forcign-lurn populatlon. Selowoling ls primurily of inmortance, of course, but suany of our imnigrants come here as adnlts. Educntion can ntieet only the scread generatiou. The clurehes, partlculirly the Catholie hlemareby, may alo mucb. Protestints seem to have litile influence iu tbe industrial antres. On the other hand, the newspapers, at loust such as the masses sre and read, and the ballot uneler present conditions in American citles, have no uplifting or educatlve power ut all. The grent sonrce of intellectunl inspiration to a large percentige of our inchoutc Americans, in the industrlal clisses, remains for the tradi: union. It is a rast power for good or evil, nccorilng as its affuirs are alminilstercd. It cmmot fail to teach the English language. That in itself is nuch. Its lenefit system, as ammag the eigarmakers and printers, may inculsate thrift. Its journals, the best of them, give a genernl knowledge of trade conditlons, impors. sible to the Isolated worknian. Its democratic constitutions nud its assemblies and conventions partake of the primitive character of the AngioSaxon folknoot, so mueh lauded ly Frecman the historian, as a factor in Eliglish political clucation and constltutioual developmeut. Nis the bext cuberuaturial or presidential candidate: not the expansion of the currency, nor ther re form of the genemal staff of the arny; not free tritle or proteetion, or antl-imperialisn, is the real living thing of interest to the trade-unjon workman. llis thoughts, interests, and hupes are centred in the pulitics of his organization It is the fornm and urena of his social and in dustrial world." - W. Z. Ripley, Race Fartore in Litbor L'nions (Atlantic Monthly, Mureh, 1004)

## LABOR ORGANIZA'AON

of the nrganization was and is mainly the metal mlning fields west nf the Misslalppi River: while that of the arganization called the United Mine Workers was and ls the coal fields cast of the Misuissippi. The strongly marked dlfforence in character between these twn comprehensive unions of mining labor is lndicated In an siticle hy Willam Ilard, contributed to The Outlook of May 10, 1906. "The United Mllne Workers," wrote Mr. Hsrd, "accepts the present lardustrial system and regards the employer as its partner. The Western Federation of lliners delominces the present Industrinl systenn and regards the very existence of the employer as an evll. The Unlted Mine Workers is pinter ated mainly In the division of the proceeds -f the present industrial system "tween itse 'f and its Tartner, the employer. It wants in in. erease its own shnre of the proceeds and it wants to reduce its partner's shar':. The Western Fedcration of Mlners, on $\mathrm{th}_{4}$. other hand, 2 s inurested mainly in the ellmination of the employer. It wants more wag :s, of course, but lf ft should succeed in establisiting $n$ srale of even a hundred dollars a day it would stlll be bound by its prinelples to spurn 'he relaxing comforts of prosperlty and to nerve itself to a contlnus. tion of the stringgle.

- Edwned Boyac, as President of the Federathn, Mdressed its annmal Convcntion ln 1902 as folluws: "There nre only two classes of people in the world. One ls composed of the men and women who proxluce all. The other is composed of men and women who produce nothlag, but live In luxury upon the ea.h proluced by others.' " The Convention, at the same session, adopted the following declaration: "Wc, the tenth annual Convention of the Western Feder: $:$ ion of Miners, do declare for a policy of independent political aetlon, and do advise and recommend the . option of the platform of the sochalist "urty of America."

Faye Mr. Hard, in comment on thls Soci...ist pronouncement by the Western Federation: :There is usually one of two reasons for the proseure of a large number of Sorinllsts In any trate union, One is the lutluence of Enropcans: the other is a particularly spectacular trimmph of the machine over the man, and a particularis cruel displncement of lumen belngs by superhuman tools. . . . The Western Federation of lliners, howe ver, has not been tlevoured by tbe mathine, and it does not contain more than a small pereentage of Enropenns. Whaterer of lax lessness there bas been in the history of the $W$-stern Federation las been A merican lawlessbuss. Whatever of radienlism there lins heen in that hatory ?as been radiealism cherished and propagated by Americans. Thant favorite National scapegoat, 'the foreiguer,' mnnuot be loaded with the sins of the Western Feleration.

The Western mines are full uf longlimbed, fraikel- eyed men who have ndventured them. selves far nud whe upon the fnec of the earth. There are Eiastern miners who were blacklisted ifter leading insuecessinl strikes. There are cowboys who tired of the trall. There nre farm(1rs who preferred prospectlag to plowing. There nre elty men who burst the bars of their cages to brenthe theopen air of the West. Theseanventurus characters, going cut into a new country and plunging into the virgin, everlustlng hills, where it would seent thet nt last all men would

## LABOR ORGANIZATION

tand on the same footing, have suddenly discovered that amid these primitive surrounding the modern industrial system is not only found, but is found at its worst No one would try to ind a parallel anywhere ilee on earth for the rcckiess unscrupulous and maddenlag insolence of the corporstlons of the Rocky Mountaln Statea. And practical anarchism among corporations is always a strong promoter of theoretical Soclallsm among trade unlons.

The Internal pollcy of the Western Federation of Miners is conslstent with lis pubilshed principles. The most important part of thls policy is an avcrsion to the slgning of contracts with employers is contract is regarded as a manacle. It binds one union when another union inlght need its help. . . . In consequence of not derianding a contract, the Federation naturally does not demand a closed shep. As it does not ask the employer to bind hlniself by a contrest to anything, it does not ask bln to bin.. hlmself to the excinsive employment of unlon men. In three other respects besides its failure to demand a elosed shop the Western Federation of Miners follows n policy which has often been admired by enemles of trade unions. The Western Federation has no apprentlce system. It does not restrict outpit. And it discountenances jurisulletional quarrels letween rival trade organlzations.
"So mueh for the plinlosophy of the Western Federation of Miners. Suw for the lawlessness with which it has heen charged. There can be no doubt that members of the Western Federatlon of Miners have frequently cocrced nonunion men. . . A programue of Intimidation has at times, In certain miuing comps, become the equivalent of a closed shojl contract. The cmployer was not asked to exclude non-union men. The nnion excluded them spontanfously, withont bothering the employer abont it.
In addition to the coercion of individual nonunionists, there have been $n$ few occasions on which armed bodles of mulon men have stormed mining property and enptured it."

On the other side of the case this writer recounts the acts of violence and the barbarous "deportations" which the miners of the Wrestetu Federation liave suffered at the hands of the Dinc-Owners' Assuciatlon nnd the Citlzens' Alliance in coiperatlon with them; and he emphasises this fart: - "' that the mombers of the Citlzens' Alliance and tbe members of the Western Federation of Miners nre brothers under thelr skins. They rame in the mnin from evactly the same hred. Two nien go out prospecting. They come from the same town in Ohio. Their chims nre linlf a mile apart. One ninn strike's gold. The other does n't. One man becomes a millionaire and $n$ ineaber of the Mine.Owners' Association, The other becomes a workingman and a mpriter of the Western Fedcration. . . . They were nll of them American adventurers lefore they became emplowne and emplores. Iractically identical in lreed, the mine-oivners and the miners are practicnlty identlenl in temperament. They transact the affairs on both sides with an $\mathrm{i}_{\mathrm{nt}}$ nammeled reek lessuess which is appalling, but which. If the distinction be indmitted, savors of anarchy rather than of illegality. The sltuation is like that In the rongh early medieval States beforc the central anthority had estnblished its power

## LABOR ORGANIZATION

by means of pollce.
That these frontlers. men, as workingmen and as mambers of the Weatern Federation, hnve used thelr gums In trade union controversies is indubitabie. That the Western Fedcration, fowcver, is an or. ganized criminai clique, and timt it acceatua, and stimulates the gun-piaying procilvities $0_{4}$ its nembers, is, so far, nosupported by evi dence." - Willism Ilard, The V'ratern federation of Minere (The Outhok, M/ay 19, 1906)
The question on which Mr. Lard threw doubt, as to whether the ienders of the Western Fider. ation of Mincrs, or nny of its responsibie mem. bers, had luen implicated in the drealfui crimes of murder and destruction of property which attended the confllct letween the Federation and the mine-owners of the Far West, cane to trial fin connection witi the horrihte murder of ex-Gorcrnor Frank Steunenberg, of Idabo. The victim had been Governor of tiat State in 1890, when, during a strike In the C'our d'Alene district, a mill at Wariner was blown up by a mob. Governor Steuncobberg obtained tite aidi of Federal troops and vigoronsly crushed the disorder. Six ycars nfterwards, on the 31th of December. 1905, at the gate of his residenee In Cnlijweli, he was biown to pleces by a bomb, so plaeel that it was exploded by the opening of the gate. A man named Ilarry Orchard was arrested on suspicion and held untii, finaly, fie not only confessed the crime in puestlon, but owned, or claimed to hnve participuter in, or bad knowledfee of, an appailing nuniber of oticr murders, dendiy ixplosions, and other barbari. thes, all of which he allegedi to have been com. mitted at the instigntion and under the drection of ofllcials In the Western Federation. Its Pre sident, Charles II. Moyer, Its Nucretary, W. I. IIaymood, and George A. Pettibone of its ex. ecutive were especially imjliented by Orchard's confension in the murder of Governor steunconberg. These accused men were in Colorudo nt the time, and threre, on a requisltion from the Governor of Idnho, they were nrrested on the 15th of February, 1906, and tnken lurriediy to Boisé, having uo opport unity to resist what was claimed to be the illegal extmolition. Subsequently, howerer, when the question was car ried from the Supreme Court of Whho up to the Supreme Court of the Lnited States, tise legaiity of the procreding was aftirmed by all of the tribunals whirh revicwed it.
Intense feeling in libor circles was enlisted in behalf of the accused chiefs of the Western Fedicration of Miners. Very generally tieir innocence of the imputed crimes was belicved, nad they were looked on as victiuns of an implaenble conspiracy, in which capitalists and politletans were leagued, to hunt them to their deatis. More than a ycar intervened betwren theirarrest nnd the trial of Haywoot, Who whs the first to le arraigned. This greatly exciting trlal was opened, nt Buse City, the capital of Idaho, in May, 1907, nud was concluded on the 28 th of July, rosulting in the acquittal of the accused. Orchard's testimony does not seem to bave beca seriously shaken, otherwise than by the incredible horrors of bis story, but eorroboratlve evidence was lacking, and nobody could trust a Wit ness whose moral irresponsibility was so plnin a fact. The annminrement of the verdict of ac. quittal was gladiy received. It was followed at once by the releasc of President Moycr on bail.

A. D. $1,{ }^{\text {nI }}$. - The unfortunate Strike of the Amairamated Association of Iron, Steei, and Tin Plate Workers. - Its confict with the United States Steel Corporation. - Breaches of Contract involved. - Failure. - A strike wificis Involved brcaches of contract betweea cmployis and employirs, and which resulted most unfortmately to those engaged in it, was oriereif In July, io01, by the iicads of thi $\mathrm{N}_{\text {a }}$ tional Amalgn:nated Assoctation of Iron, Sterel. and Tin Pinte Workers of the United States. As in the ease of the Anthracte Coai Strike of I $\mathrm{m} \cdot \mathrm{e}$. which is told of below, the circumstances of this strike received a very thorough study and a viry clear exposition to the pulbic, in an artlcie froin the pen of Dr. Taicott Williams, puhlisievi ia the Anerican firriev of Rericirs for scmtember. 190I. and wbat is stated hete is drawn from that artlele :

The industries conccrned In whnt occurred has been carried on for a considcrable perlod under conditions too complicated to be described in this llmited place. It must suffice to say that there were undon milis and non-union milijs. and aiso a thir. class, of "open" mills, in which union nul won-thion men worked together. it truce had sprung up during $n$ period of pros. perity in which, says Dr. Williams, "there henf come to be a quasi, only $n$ quasi, general under stmer'ing that ecrtain mills were to be consldered as union, certailn ns non-malon, and certain as "open." While "the trade was still divid"d anong humbreds of millowners," the Amalga mated Association of workers in them "equal ized conditions for ail of them. It lifterl weree disputes out of the narrow mili atmosphere. It forced all concerncl to look at the trade is a whole. It gave continuity and uniformity to contracts for whges. It catiblished standaris of wages" - for minion and non unlon. both. liut when. in June. 1901. "the Analgumated came to its annual coliective bnrgnining." it had to dcal, not with numerous indeprondent mili-own ers, but with the great consolidation of them that bad just oceurrel. in the formation of the mammoth C'nited States Steel (corporation.
"Two courses," sars Dr. Williams, "Wre up"n to the president and officers and Advisory Conucil of the Amalgannted. They might, after the usiual confercnce, for which its constituthon jro vides, through a speclal committee, have signed its 'scale' for the union mills fu which its murmhership worked and wait for the social and pulitioni pressure of pajie opinion, as in 1900 , th force thls netw represpitative of capital- the - Trust ' - In its rarious forms to acecpt a cul icctive hargain for part of its mills, trusting to events, the stcady gravitation of skilicd labor to its ranks, and the greater economic efflelency of the union - for unlegs it is that it cannot survive - Whio a slow battle. Much depended for organized labor all over the eountry in formally committing the United States Steel Corporation,

## LABOR ORGANIZATION

the greateat employcr of labor on the pianet, to the recognition of a union scaje as the beat regu. lator of wagen, union and non union. It looked as If this waiting pian were adopted when the acale was signed for one year to come, carrying new non-interruption elause, with the Americen Tin Plate Company. . . . On the fast day on which the scaic could be signed - June 29 sed it generaliy is not signed before, the demand was made that the scaie ahould be signed for all [of certaln] non-unlon milim. The advance in wsgem asked was conceded. Mr. Peraifor F. Sniti, for the company, offered to algn for twentr-one milis aecepted in the past as union. i'resldent Shaffer refused to slgn for any, uniess all were aecepted as union. Sir. Smith refused to algn for milis non-unlon in the past, and clalmed that two, Salzburg and Old Meadow. hitherto union, had abandoned the organization, position later conceded. The issue raisell wan whether the change from individual to eoliective hargaining could be required under penalty of a strike, not only in the milis in question, but in all the mills of the coupany. The men lnvoircd hal a right to require a coilective bargain for as many as they ehose to incinde. The company had its right, equaily, to decide where it would have individual and where soilective bargainiag.

The Amaigamated was . . . strong, untii it struck. Its demand for wages and hours were all wecpteg.. It hall been allowed to organize lodgea in rarfous non-union milis, after the corporation lud bought them, where before it wasexcluded. When it attempted, on its own demand and $\ln$ staace, to change the status of these millis and act for their labor, it proved right in its elaim that the men wished to be union In four out of five of the steel hoop mills and wrong in five out of the seven millis claimed in the Sheet Steei fompany. Each contestant ehaimed more than it coull control. A compromise was in order. A compromise was offered. Tweive mllls in ali were in lispute. The eorporation offered four. The Amalgrmated lemanied ail or none.
I strike was ordered July 15, and the Ameriean Tin Plate Company men broke thelr gear's contract of a fortnight before."
The atrike was "eireumscribed at first by nembers of the Amalgamated in the Federal fitel (impany plents at (hicago, Joliet, and Milwanke refusing to break their contracts amil strike. Here, the membership of the Amal. gamatell was less than a tenth of the whoie mumber insolved. It is not over this proportim in the generai body of men on the pay roll of the Cnited States Steel Corporation. The proportion in union mills rarics. In nonc does it inchude all. In some, those without its membership are a small fraction, in others, more than half. By tite men of the National Stecl (ompany and the Nutional Tube Company, annial eontracts were broken, saeriticing the anuual colleetive bargain."
" Nothing ean be aecompished for labor, eren that tenth share of it organlzed In the Amalgamated, until this sharc has irarned that enatracts must be kicpt and the line drawn between wages and business control. The suceess. ful efferts of the Amalgamated to inducc lts members to hreak thelr eontracts, first in the tin works and later at various works in the Federal Steel Conıpany, has deepened the con-

A. D. 1903-1903. - The Great Strike of Anthracite Coal Miners. - Distress and Alarm in the Country. - Intermediation of President Rooseveit. - Arrogant Attitude of Mlne-owning laterests. - Final submission to Arbitration Commission appointed by the President. - Award of the Commission, - A prolonged geaeral strike of miners in the anthrs. ctite conl flelis of Pennsylvania, beginning in May, 1902, was one of the most serfous in its pubiic effects and the most alarming that has ever occurred in the Clinted Statss. It may he said to have had its origin in a prevlous atrike that came about in the fall of 1800, resulting from whlel the miners had obtained an advance in wages of ten per cent. That increase was guaranteed until the 1 st of April, 1901. In the interval Mr. John Miltcheil, the able nad much ie. speeted I'resldent of the L'nited Jline Workers of America. strove to secure from the rallwny magnates who are the masters of the anthracite coal property and trade some recognized right on the part of the miners as a body to discuss and arrange the terms and conditions of their work. The rchuffs that he met with were nemr to eans. ing another strike in the spring; but some pow. erful intluences were hrought to benr, it wnssadd, by New lork financiers, whleh jatuhed up a truce for the ensuing year. The ten per cent inerease of wages was continued for that further perion, and the ninurrs, in some way, rightly or wrongly, aequired an lidea that the next year was to hring ahout an urrangement of free and fair representative conferences between their unlon and the union of mlue-owners and operatives. iike that which had been established in the bituminous rohi regions. In thls expectation they were wholly disappointed when the year came to its end, as it did on the 1st of April, 1002.

The National Ciric Federation, in whichevery great social interrst, of caplat, lahor, politles, education, religion, philanthropy, is splendidiy represented, intorepied in the disputes whleh followed, and brought about some meetings on the suhjeet; but the capitalist side of the controversy was entrenchari in its determination to give no recognition to any union of miners, and to refnse an arbitration of the dispute, while the miners were provoked to the making of iarger demands than they might have inslated upon. prohably, If they hail heen difterrntly met. Isy a small majority of the delegates to a convention helhi in May the minprs voted to trike -ngainst the judgment of President Mitchell it is said - and work in the mines was stopped alont the middle of the month.

On both sides of the contict there were real
difficultles in the way of approach to a common
ground of negotlation. These were fairly met forth by Dr. Talcott Williams, of the Philadel phia Prese, in The Rerieno of Reoiese for July 1002. On the side of the anthracite ra!lroed managers and mine operators he pointed to the fact that they were "under a grinding compet. tlon wlth bituminous coal. To secept a union of Unlted Mine Workert of Amerte, in whict the bltuminous workers were two to one. wis, they beijeved, to reader it certain that on mot issies the managentent of the union would $k, p$ bituminous mlnes busy rather than anthraelte. Further to the fact that "snthracle nilning varlen greatly fron mine wo nitie, aud a uniform 'scale, as in hituminous mines, ls difficuit." But, sald lie, "It cannot be impracticahie, for veins as narrow, torthous and varying are mined under "'scaie' in England." As for dilieui ties of concension on the part of the mine-work ers, thla just annlyzer of the conflict deacribed their divialon into three classes having differeat and unequal fontinge in the indiustry. There were the miners who break out or detarh the coal in the mines; the laborers whom the niners employ to load and remove what the latter sletach; and, finally, the men employed ns mine insses and to operate engines nod pumps. The minnera nre paid for the quantity taken out ; the laborers (who aspire to beronie mlners) receive wr.ges for a ten bours day ; the bosses and eng. neers are employed hy the yenr and have enntinuons work, berause the pumps cannot be stopped, whether mining goes on or not. These thrie lnterests muas be consolidated in a waing of the mine-workers if it is to have any effect. ise strength; and this raises knotty problems among them. The attitnic of the railroad monagers and operators had prevented much s consolidation, with bad resuits, in Dr. Williams's opinion. As he summed up the situation, it was thls: "Had tive niners' unlon in the past eichtecn months exerted the rigid discipline of hig well-managed unions, prevented sinali strikes. and worked for a cheapout put, it might have dlrided capitai. But it had not been 'reo eognized.' Therefore, lts control was aftea loose. Local unions irritaicil iocal operators. In the Realing mines, the proportion of cuat mined jer miner feli one eiglith. It is part of s bad system of over manned mines under which miners try to distribute work. Output was re duced and wages increased. The risitit was that the miners were withont the responsible control of a big uinion, and the ralirond managers and operators irritated hy smail strikes und ready for a flyht.
In hia conciuslons thit vellinforme critic of the situation justified the pubile feen. * of the thme whieh hedid the capitalists of the eontroversy more accountable than the laborers fir the loss and suffering inflieted on the country. lle elosed his article with these words:
" L'nder compretion, the anthrachte plant is one half iarger in mines and one-half greater in inhor than the utniost demand of the public. Two-thirds of the mines and two-thirds of the men, run more reguinaly and systemationily could in spite of the laek of demand in smmmer, produce the coai cheaper and more profitabir,
 eren If at a lower per diem or per ton than the present syatem. What the anthracite coill in dustry really needs is a reorganization like that

after the London dock strike of 1889, reducivg the numbre of men but incrasilng work for each. As its men who prefer wortling sil the year to working two-thinde of the year, and oftea half a day it that, bave, by natural ilmination, been wreded out ste⿻u一illy, aad hava left a large shars of men, bred to $s$ hablt of Irsegular wort and short hours. This one fact irregular ath bottom of much ntful Irregularity In the miaes.
"The rallroed manageta, holding puhlic fran. chlees weighted by pullic recponsihflities, have clearly ao ight, an they have all united In dolag. to refuse all compromise, coaclitation, or adjustmeat, and simply stop work, lettlog the pishlic pay the cost in higher coal. They are bound elther to reach an adjuatment themel ves, to let some oas elae rach one for them, or to renrgan. tue the whole Induatry on a basia which will reduce the material and moral waste of the prement srstem, where poor mines are wo ed and men are one-third of the year Idle even an a prosperons year."

The puwers whith controlled the mines dill not, howevar, see thels duty to the puhlie In this ilght, and the strike wrat on. Before the ummer ended the pinch of scarclty in the sup. ply of fued to the country was heing felt whidely. In most Industrics and in domestic llfe. The pinch iacreused, and the price of coal went higher as culd weather canie on. Coatroi of the rougher vemats among the miacrs and mine iaborers was lost hy their leaders, aad riotiag broke out, with dark outrages of crime, calling for a strinuous entployment of militia and police. There were threatenlngs, too, of a sympathetie strike of bitumbuous mluers, which might essily proluce a fuel famine of frlghtful ufict: but I'roshient Mitcheil and other Intelligent Laters surcereded in persuading the miacts of tiue bitumanous distrfet that their hest belp to the anthrarlte unlons was by whinering to their yeurly contract and continulug the work willeh anabind tisem to contrlbute funds to the support of the existing strike. In August they were reported to be senting to the ifle nuthrncte men on fiaq than $\$ i 30,0$ in a week. With this and other help these seemed likely to malntain thelr stand for montha. By the first of October the supply of anthrarite coal was so meragre that "factory ninnagers were put to their wits' $\cdot$ od to get furi rnough at $\$ 15$ or $\$ 20$ a ton bis kerp thelr marlinory running: wherras, in normal times, their supplles hai cost perhaps 8 a ton. The great majority of the retali coall dablers wre entirily sold out, and for the poor who were obliseil to buty in small gunntlies the price had reached a cent a ponlud, or even mote, with prospect of a ental cessathon of the antiracite supply. Soft coai was heing largely suinstluted for hirit roai: but it also, in the East, had ad. vaneel 300 or 400 per cent. in price, and it was not well allapted for chimueys. furnaces, stoves and grates that hal been eonstructed formathracite. Furthermore, the cessation of anthracite mining during that hnif of the year in which the bulk of the winter's supply is produced harl created a situation of scarcity tilat cond not have been wholiy overtaken fiy the ntmust effort to visstitute the bitumituas articlo."

The situation was now so grave that the whole conniry was demanding an interventios of government by some means to end the ohstinate dis.
pute. The Federal Erecutive could ond no legel authortiy to act ; hut Irenident IRoosevelt determined to briag the prestige and weight of his high office and of his Flgorous persomuilty Into an exerclas of persumaive influence in the case. If invited the reprementatives of both parties la the conflict to meet him, and the meting took place (sctober Bd. In opealag a die. cumsion of the suhfect he discladnied any right or duty to latervese letween them on leral gronads, hut cald that "the urgency and the terrible aature of the catnatroplic impencliug over a large portlon of our people" had impelled him to think it incumberat on him to nse much iafluence an he condid to "bring to an end a aituatlon which has become literaily Intoler "le." "With all the earnestness that is in me." he plemied, "I ask that there he an immedinte reatmption of operatous in the coal mines in sone such way as will, without a diny's unnecemary delay, meet the crying needa of the people. I do not invite a discunsion of your respeetlve chams and positions. I append to your patrint. Ism, to the spirit that minks fersonal consitieratons and makes Indivldual ancrittces for the generai gooi." Mr. Mitchell thea spoke brletly: saying that he and hia associates Ildi not feel thit they were responsible for "thls terrible state of nffulrs": and he made tive following iroponition: "We are willing to mect the genthemen representing the coni oiverators to try to aljust our differetices among ourselves. If we canad medfist them that why. Mr. I'resilfont, we are willhg tiat you shall name a tribumal who shalldintermine the issues that have resulted In the sirke: and if the genthomon representhg the operators will necept the awnid or deeigiou of such a trihumal, the miners will willingly acrept it, even if it is against their clacis.
To say that the I'resichent's appeal ami Mr. Mitcheif's propusal of arditration had ant arrogant response from the chiefs of the coal mobopoly ls to speak milhity of the spirit mad language of thoir repifes. "1 nuw rask yon." selif use of them, "to perform th" lithes versted in you as Jresident of these linited mates and (i) at once sfueleh the anarehsitic contition of aftairs In the conl region by the seronk urm of the nilitary ut your comanai." "Ohe duty of the hour." cred another dietatorialis." "is not to waste time no cotiatink with the fornenters of this anarily and insolent definnce of inw but to doas was done in the wis of the lehellion -rostore the minjoter of the law." Wlith one consent they refocted the propusil of arbltration with sernfuid detiance, und the axecting broke up withont resuit.

Hut, behind the men in innmodiate command of the railway and tife mining companies there was a higrir-bralned inancial power that combl comprebiond, as they could not. the recklesaness of so arrogant a cibullenge. Which went straight past the miners and the Prosilent of the Cnlted states to a suffering public. As the captain of that force. Mr. J. l'ierpont Morgan took the mashess in hand, and, after a conference with Secretary Root and sonme taik with railway presidents, brought the intter to a different state of mind. On the 13th of October lie went to Washington with the propocal of a Commission, to he appoiated by the President. to witich tioe companirs were willing that "ali questions between the respective compaales aud

their own emplayes" whould to ruforred. "The Cimmanhon tis be conithutid as follown: (1) As ofller of the Fingineer ('orpa of either the mlll. tary ur nurul mervice of the Cinltel Btates; (9) au expert mining englneer, experlencell lo the minlog of cems nul other minerals, and not la nily way eomocted with eonl-mining proper. ties, vilhur anthraclte or bituminous; (3) one of the f(unipes of the Unleml states courts of the fiamifn fiatrlet of I'ennaylvanla; (4) a minu of problueuce, er font as a morlologht: (5) a mun What by atlve partlelpatlon la minlog and mell. lug eomel is fumiliar whith the phyaleal and commeretal fratires of the bustnesh." There were uehler the stlpulatlons that upon the constltu. than of wish C'ummonson the mhers should retirn to wark andl "ceane all luterference with nul jersecittlon of any non thlon men who are working or shall huriafter work." and that the Conumbaion's findlage whillalgovern the condl. tlens of ernployurut betwren the rempectlve eonnpanles and thelr own employees for a term of ut lenat three years. On this bands. wlith anme molifleathons, an agreement with Br. Stitchell, acthng for the mhers, was arrived at, aut the appointment of the Conimlasion, named us follows, vas anuounced on the 10th:
lirlg. (Yeu, John M. W'lison, L'. S. A., retired (hite (hlef of Englners), Washington, D. C.. "as an officer of the Engincer ('orpa."
Filwarl Wheeler J'arker, Wamington, D. C. chinf ntathatiehn of the roal divinlon of the Geolundoal Survey, and editur of the Eingineering "hit Mining vournal; "as an expert milning ellsincer."
Ilm, George Gray, Whrilngton, Del., "as a Jnitue of a Cuned Sitater Court.
lidpar E. Chark, Celar Raphls, Iown, Grand Contef of the Order of IRullway ('onductors, "as a ariologist, the J'resklent assumalng thit for the purpuse of such a ('ammisslon the term semblogist motans nenn who has thought and stmited ileeply on social guestions and has practleally upplien his kno wledge."

Thomas II. W'ntkIns, Sicranton, I'a., "as a man practicully açuulnted wilh the mlning aad sell. ng of coal.
Ilishop John I. Apalding. I'eoria, Ill. (The I'ruslichat added the Ißls!opis name to the Come mlashon.)
('urroll D. W'right. Commissloner of Labor: appointed fecorrer of the Conmission.
Mr. Nitchell's acceptance of the pina of sertie. ment, us mually worked out by the I'resldent, Was ratified hy in minere convinilon at Wilkes. barre. and the strike wiss declared at an ent Octuber 2lst. The Arbitration (ommisslon was organized at the Whlte Ilouse on the :3th, muler the presidency of Imige Ciray. Carroil D. Wright, appolnted oricinaliy as recorder of the ('inmmisslon. wns adiled ns in seventh member to thir buarl, all parties consenting. I'ublic hearlites ly the c'ommlssion were opened at Scrantun olt the 141 h of November. I'rcsident Mitebrll be. illit the first witness, under cross-eraminatlot hy raiway nttorncys for five days. The Investhra. tion was lahorlons and long, and it was not untii the 21st of March, 1903, that the award of the (ionnmission was malle. The foliowlng summary of its $I m p r i a n t$ dectsions la derived from an er. position of it by Walter E. Weyl. Plı. D., In The Rerier of liprienen for April, 1903: " There were four demands of the miners, - uamefy, for an

Inereace of pay, a decreamo In hours, the welgh. Inin of coal where practlcable, and the rivogni. thon of the unlon. The tirnt two demanim of the miners lave been compromised, the mineri recelving over balf of the fincrasac temadind the third demand was refuwd, hut the comali. thons reformed: while for the fourth demand. the ment arch . - practlcully whit they desired, afthough formal recogaliton was detuled them.

At the beginning of the hearinge, the com mission dechfed that any focrease ln the rate of piy. or any decrease in the hours, should le re tremetlve, and be effective from the fint day of November. There wull have been dificulty in carrylng ont thin plan, however, espoctalli in the cave of a redictlon in hours, and in snibal tition therefor the commasion proviled for: 10 per eent. licrence in all wages of all cm. playees during the tive monthe of livestlyution frem November 1, 1008, to Aprll I, 1908.
Whth regari to future wages and future homrs of habrer, the comminsion has ndopted the flay of awardlug lnereanes for the varous elansem of emplayecs and muking this inerensed wage the milnimuns of a wllifing acale. In other worlh, durhig the three yeare from Aprll 1, 1g0:3, to A pril 1. 1806, wagem may nut full lelow the ln. ereased scale now awarded, no minter what the pryere of cual may be, but must rise ahare that rute Ift case the price of conl alfances. The contract mincres ankel fur an Increase of 20 per cent., and have rewolved a molumum of 10 pur cent." The englucers holating water and the Aremen were awardiod the riduction in liours $\therefore$ 'at they asked for, from twelve tuelght, with. rit . cduced pay. Other ingineers and pmop 'sll who askent the sane recelved a five juer cent
wrewne of $\qquad$ wllh a reduction of working sys ner week from seven to slx The work diay … nien pald by the dny was eut down feom tin hours to nine. "Thise wages, bowever, are not ncecsarily the wages which will prevnil, lut merely the Irrednefble mintmum of wagen div. Ing the next three years. It was auggented liy Dr. Baver thut a sliding meafe should be adophet. and that the wages of all mace workers mimali not fall below what they were in April. 190. lut should be increaserl by one per cent. for cuery five cents inerease in the price of the lurge slzes of coal in New lints City." This scems to have made part of the ward.

The eommisslon says that it does not convider the question of recognition within the seopre of the jurlsilletlon eonferral upon it, aithough it states that the suggestion of a working hgre ment betwecn empioyces and emuloyers em bulying the doctrine of collective liargaining is one whleh the commassion brlicve's contains many hopeful clements for the aljusimenif of $r e$ lations in : be mfining region.' Thls concession, however, Is qualified by the statement that the present constit-alion of the Cinlted Mine Worhors of Amiprica does not present the most Inviting inducements to the operators to enter 'ato (cas tractual relations whth It.' Notwithstanding its dilselaliner of juriadiction, however, the Anthra clte Coal Strike ('ommasion has In practical ef fect compelled the ojprators to grant to the unloa finl, pienary, and distinct recognitlon. The reiondaltiun of the Lnited Mine Worters is cieary lidicated by the language of the award. Section 4 provides that 'Any difficulty or diasgreempnt arising under thls award, efther as to lts inter-

pretation or appllestlon, of In any wey growing ont of the relations of the caployers and ems. phoyers, which casnot be mattled or mijusted by concillation between the superintendents of managers of the wine or miace amil the miner or miners directly interested, or is of a mope too large tu be methed or aljusted, shall be re. ferred to a buard of conciliation, to consiat of als persons, appointed as hereinafier provicial. Tlat is to may, If there shatl be a diviston of the whole reglon lito three disuricts, in each of which there shali exiat an organization reprewent. ing a majority of the inine wurkers of ench diftrict, one member of matd boarif of conclitation shall lic appolnterd hy each of mald organizations, anil three other permone whali he appolnted ly the uperators, the operatore of salf distriet appolintfige one grammi.' The awarl of thls limird of comelliaton stail be dual, and in rase of dispute the mateer shall le referecd to an umplre ap. pointerl ly one of the ('Ircult juc, "h of the Thiri Julidal Clrealt of the l'ulted stakes. There conld ln , no elearer, no more definte, recognitlon of the union than is licrein providedi."
A. D. 1902-1909. - The National Farmera' Union and the American Societs of Equity. - A history of the Furmern' Natlonal Lilon bas leen written hy its Preadent, Charles slmun lfurrett, from whoe nurrative the fol. Iowlag account is drawu. It is quited bere Prom the Ditional Círic Frileration laricu.

- In the fittie town of Emory, Tesas In the yeas $19 W_{2}$, ten med met together at varlous times and discusaed the methods of formulating ruies and plans by which the faluring massea milyit the aflowed a volce in the pricing of thelt farm products. From this meeting of a few plain men the Texas Unlon sas formed. Crelit as the founder of the Farmers' Union is giver to Newt. Oresham, of Texas, an Indefati. gahle worker for the gox! of farmers. who was fous litentited with the Farme Alliance as one of the organizers of that associatlon.

From locai and state unlons the organiza. ton bas grown to be a nationai unlon, lolding snnual conventions and gathering lato i:s fold an aggregation of tetween two and tr:ee millIlon members.

The most striking featire of thals grent organization is the fact that its members a is made the of employers and employes. : . iuc is drawn stparating the furm o. ner, operator or luhorer, but all are recelved in the Farmers L'nion on one hroad platform of mutual aims and Intercsts. lecognizing that the gool of all If the goond of the inilivisual, the Furmors Lulon, in cicmocratic fashlon. labors for the greatest gochl for the greatest nuaiber.
"Tlic Er.. "ers' L'nion wurks slong the most practicui Hars. There bave inenn four great nationai meetings, the first belog held In Texarkana in 1905, and the convenllon of 1906 at the same place: in 1007 the nathonal meeting was at Little Ferk, Arkansus, and in 1008 at Fort Wortb, Texas, where President Gompers ap. pearcd. Besldes the annual mectings of the Natioual CZnion several important conventlons have been beld: one in Jauuary. 1007, in Atlanta. Georgic, was cailed as a grand national saily. At Hlemyhls, Tentesese, fhr same year. a conventlon of the Farmers' C'nion was held for the purpose of devising ways and means by which the cotton then heid by the membership
of the Union micht be sold edrantageously; At New Urimans, 190e, another coten groweni unceting wan lieto, and at Trpoka, Kanms, and Atlanka. Georgia, very Important meeting were arranged bet ween the cot ton apinners and growers of the Nouth and representatives from many Eigglsh and continentai cotton milla of Eurupe.
-' The purpose and prindples of the Farmern' Unlon, as enusilated in fis constitution, aflord material fur an Interesthig atuiy. It ifociares the followlag purposen: 'To catahilsh Juatice. To secure equitiy. To nup'v the ciulden ilule. To dlacourage the eredit a ilmortgage nystem. To anslat members in bu' in and meding. To encourage the agricultural dans in scleutific farming. To teach farmern the classidiration of crops, domestle econobily and the process of markethig. Tosyntematise methomis of proniucthon and distrimilon. To eliminate gambiling In farm proflucta 1 y toaris of trade, cotton ex. changer and other aprerulatorm. T'G brigg farm. ers up to the ntanturi of other luduatries and business roterprises. To mevere and unalituin protitable anel uniform prices for gralu, cottur, Ifve stock and other product of the farm. To atrive for lmomony and good will among ali mankImi and brotheriy love among ourselves."

Another extemsive orgunlathon of farmera bears the name of the Imerlean Society of Epuity, which wist reported in 1006, whenl it went hito allance with the Anvercan Fidera.
 This membership was sautered principaliy throughont Kentucky, Inillana, fllfuols, Wisconsli, Minnewta, aid Neliraska, with mome members In Kansus, (oklahima, unil Mlhigan.

A. D. 1904.- President Roosevelt on Combinations among Employees of the Government. - "There is no mbjection to employere of the fovernment formimg or leionithg to tublons ; hut the (Buserment can meither discifntrate for nor diserimintre against nomunion men whoure fu its employinelit, ur who seck to be employed unier it. Horrover, it is a very grave Impropricty tor (iovernment emplofecs to hand themselves together for the purpose of extorting improfurrly high salaries from the Governuicat. Espucitally is this truc of those withla the classithed service. The better carriers, both munlehal and rurai, arc as a whole an exccllent borly of publle scruants. They should be umply paid. But their parment must lie olitalncd hy arguing their claims fairiy and honorable before tioe Congress, and not by banding together for the defeat of those Congressmen who refuse to give promlses which they can not in conselence give. The Adminis. tradion has alrcady takien steps to prevent and punish abuses of this nature ; but it wili be wisc for the Congress th supplement this actlon by legislation." - President's Mesage to Congress, Dec. 16. 1904
A. D. 1904-1905. - Long unsuccessful Strike of Operators in the Fall River Cotton Mills. - From July 25. 1904, until January 18, 190\%, about $\mathbf{2 5} .00$ workers in the Cothou D1ilis of Fail River. Massachusetts. Were idie, and seventy two milla were substantialiy out of busi-

## LABOR ORGANIZATION

## LABOR ORGANIZATION

ness, as the consequence of a reduction of wages which the operatives would not consent to. Great suffering among the men and women con. cerned was sald to have heen endured. It was through the medlation of Governor Douglas that a settlement wis fanlly hrought about, the work people submitting to the reduced wages, but having the promise of some lncrease later on, if an independent examlnatlin of the books of the mill companles should show a certain stlpulated percentage of profi.
A. D. 1905 (April-July),-Strike: of the Teamsters' Union at Chicago.- One of the most volently condueted strikes that has ever occurred in the Cnited States was brought on at Chicago, in the spring of 1905 , by an attempt of the Teamsters' Cnlon In that eity to glve sympathetic support to a strike of the Garment Workers Union. The latter selected for special attack the firm of Montgomery Ward \& Co., whlch carries on an enornous mall-orler business, selling goods of all descriptions through no ageneies, hut deaiing directly with customers In small towns and rural districts throughout the country. This conipany employed few garment workers relatively; hint, probahly becanse the magnltule and diversity of lts shipments made it particularly vulnerahle to sue'; an attack, the teamsters hegan their undertaking by refnslog to move its wagons or goods. From this the movenent spread, as teamsters refusing to deliver goods to Montgomery Ward \& Co. were diseharged, and the concerns discharglog there were beycotted in turn. Presently husiness In Chicugn) 'o a hrge extent, was brought to a stand-stin. The membershlip of the Teansters ${ }^{\circ}$ Union in the city was said to excced 35.000 , and 4000 were cstimat dito he on strike at the end of the first week in Mar. From this time the heat of passion in the coatiet rose fast An Employers' Tcaming Association was organized, and the msinuss interests of Chicago showed realiaess to fight the striking union to a fibish. Fierce attacks were made on the mon-mnion tamsters bronght into the work, but they seem to have beell well defended hy the poicice. In a humlred ways the whoie eity was dlvided into factlons and dyplorahly distirbed. Clifldren refused to attend schools which received eoal from boyented companles or wagons; and arrests of both children and parents were necessary to enforce the compmesory celncatun laws.
While the strike was in its earlier weeks, President lenosevelt risited Chicage, and was called on he the Iresident of the Teamsters' C'ninn, Mr Nhea. who protested against a supposed design to call Fepleral tropps to the clyy. In reply ti) him tirw President suid: "1 have not been eallad upou to interfere in any way, but yom mu, not misunderstand my attitude. In every effort of Mayor bunue to provent vintence by mobs or indivilhals. to sece that the lawes are oleved and that noder is preservel. he has the heirts support of the l'resident of the Lnited Static-anal in my jullament he should have that of every pomil ritizen of the Cnited States.

I ama believer in unious. I am an hom. orary member of one union. But the union must oley the law. just as the corporation must ober the law : just as every man, rich or poor. must ohey thr haw. As yet no action whateler has heco called for by nic, and most certalloly if action is calloll for by nue 1 slall try to do exact
justice under the law to every man, so far an I have power. But the first essential is the pre. servation of law and order, the suppresalon of Vlolence by mo'ss or indlviduals.'
At a banquet the same evening the Presideat recurred to the subject and added, with flae emphasis: "Thls Government is not and never shall be the government of a plutocracy. Tuls Goverament is not and never shall be the gov ernment of a mob." Those lmmediately respon. slhle for dealing with a local situatlen, the l'resi dent sald, must first exhaust every effort hifore a call ls made upon any outslde hody. "But." he added. "If ever the need arises, hack of the city stands the Stite, and baek of the state stands the Natlon."
Chieago kept the confliet within ltself, flght. ing it out through 105 days. It ended in the unconditional defeat of the Teamsters' C'nion, Which cailed off the strike on tue 20th of July: It was followed by a grand jury investigation of charges which each slde had huried frecty agalust the other, of blacknaii attempts by one, of brihery and attempted thribery by the other. The evldenee obtained left little doirte that la. bor-leaders had extorted money for the prevern. tion of strikes, aud that huslness men had paid for exenuption from tronble.
A. D. 1906.- Suspension of Coal Mining, both Anthracite and Bituminous, throughout the Cnuntry. - Final Agreement for Three Coming Years. - On the 31st of March, 1906, the agreements between mine owners and mlur r , under which the latter had heen working. in the hituminous mines for two years and in the anthracite for three. expired, and agreements for the future working had not been arrived at In either ease. Miacrs in the bitumlnous fieht had accepted a wage reduction of five and a half per ecut. iu 1904, and now wantell it restor al. Part of the mine owners, in Western Pennsrl. rania, were williag to conectle lt; others, in the more western States, stool out against them In the authracite field there was also a question of wages hetween miners and operators, and both sides offered arbitration, hut differenl as to the point to be summitted. The minirs claimed arbitrution of the general question of wages and conditions in the mines; the operaturs malatained that those had been adjondicited ty the arbitration of 1913, and that the only proper question now was whither any charge in conditions had occurred which called for a realjnist. ment. That question thry would submit to at least a nujority of the members of the former Anthracite Coal Sirlke Commission, or they would agree that the awards male in 1903 li that Commission "and the priuelples nywit which they were estahlishel by the Commlssion. and the methoxs estahished for carrying nut their awards, shall be continued for and dhring the further term of three jears from the firat day of April. 1906."
The 1st of April found these disagreements still existing, and eonl mining, hoth anthracite and bituminous, was gencrally suspended thronghout the United States. Nore than 310 . 000 miners, on the whole, stopped work. In the authracite firlu the suspension of work lasterl until the 10th of May when it wes rean?!e! under anagrement which coutinued foranother three 5 ears (nntii. Marcll 81.1009 ) the award of 1003. During the forty clays of idieness there

## LABOR ORGANIZATION

## LABOR ORGANIZATION

were few disorders nf any kind in this region. In the soft coal flelds the suspension was more prorracted. It was ended in different iocalitles at different times. Some mine owners, in several States, made terms with their men at an eariy day. Some kept their mines Idle until the mlddle of July. Serious disturhances and confliets of rioters with police and militin occurred in a number of States. At the end the miners had won a restoration of the wages of 1004, but had made concessions on other points of dispute which differed in different States.
A. D. 1907. - President Roosevelt's Foundation for the Promotion of Industrial Peace. -Presideat Ronsevelt, having been awarded the Nohel Prize of the yenr 1006 for his services In the interest of Internntional peace, devoted the sum reccived, heing some what more than $\$ 40,000$, to the creation of a fund " the income of which shall he expended for bringiag together in conference at the city of Washington, especially during the sessloas of congress, representatlves of labor anI capital for the purpose of discussing industrial problems, with the view of arriving at a better understanding hetween employers and employes, and thus promoting industrial peace." To curry out this purpose. an organization was incorporated by Act of Congress, March 2,1905 , unter the name of the "Froundatiou for the Promution of Industrial Peace," with trustees nomed as follows: Chief Justiee Siclville W. Fuller, president : Seth Low of lew York, representing the gencral public, trenstirer; John Nitchell of the United Mine Workers of America, representing labor, seeretary : Thomas G. Bush of Biraningbam, Ala., representing general public: Marvin $\Lambda$. IIughItt, representing capital, aad Secretaries James Wilson and Oscar Solomon Stratus. Vieancies in the hoard to be filled by the Presillent of the United States. The Trustecs to pay over the income of the Fonndation, or sucli parr as they may npportion, to an Industrial l'eace Conmittee, of nine members, sclected and 1 口• pointed by the Trustees, "three mambers of this cotamittee to he representatires of thlmr, three to be representatives of capital, ench chosen for distingulshed sorvices in the industrind world in promoting righteous indistrial pence, and three members to represent tbe gencral puhlic." As orisimally appointed, this Comuittic was male up of the following persons: "A rchhisbop lohn Irelame, Marcus M. Marks of New York, ilaph M. Easley of New York. Elbert it. Gary, chairmaa finance committce Únited states sied Corporation: Lucius Tuttle, president of Boston © Maine railroad ; J. Gumby Jorian of Colmubus, Ga: Samuel Compers, presitent of the Anerican Feteration of Labor; Daniel Keefe. president of the Longshoremen's association. and Wirrea S. Stone, president International Bro. therhowd of Locomotive Engineers."
A. D. 1907. - Abortive Strike of Telegraphers. - A widely organized and considerably prolonged strike of Amerienn telerraph operators. in the fall of 1907 . was mate abortive by the fact that the supply of men and women who have some training for the orilinary work of telegraphy is too large for a trade union to coatrat tha employment of it. The telegraphic ser. vice wss made very imporfect for some wecks, and the public was subjected to mueh Inconvenience ; but the emploglag companies were
brought to no such straits as could be coercive. The struggle of the operators was mainly for the recogaition of their union, to secure negotiation with them as a body, for the adjusting nf some conditions of which they complained. They suffered ahsolute defcat, and had to make terms individually at the end.
A. D. 1907 (April). - Threatened Railway Sitrike averted hy Federal Intermediation. A strike of trainmen and conductors on railways west of Chicago which threatened to be very serious was averted, in April, 1907, hy the intermediation of the Chairman of the Interstate Commerce Commisslon and the Commissioner of Lahor, acting in obedience to the Erdman Law, so culled, of 1808 . Both parties to tbe dispute made concessions. The cmployis withdrew their demand for a nine-lour work-day, and the railway companles made an advance ia wages which was estimnted to add over $85,000,000$ to the enralngs of 50,000 men during the ensuing ycur.
A. D. 1908. - The Work of the National Civic Federation in Promotion of Trades Agreements. - The following is from the nnnual adrlress of President seth Low to the National Civic Feleration, at its annuml meeting hn New York on the 14tb of Decemher. 140s. The special suthject of discussion at the neering was "The Trale Agreement," on which Mr. Low spoke la part as follows:

It lus been our gool fortune during the ycar to nssoclate Mr. John Ditchell with the active work of the Feeleration, as the Chairmaa of its Trades Agreement lepartment. Mr. Mitchrll entered upon his dittics on August 1, and we have alrealy had many "pportunities to perceive the adrantage to our worl likely to result from his permanent conneetion with it. Through correspondence with habor unions and with the employers who have trade agrements with labor unions, he is building up an exceedingly strong department, the induence of whieh ought to be very lelpfally felt in furthering the u-i? of the trade agreentent its a mons for promoting industrial peace and progress.

- There are still some, though they are fewer in number than they used to be, who maintain thit the rebation of the employer to the employe is an individual one, and who therefore will not deal with men as tumbers of an ortanizathon in matters relating to their emplownemat. I real in
 storkbohlers in the Penneylyania Ratilond Company. Sis one contends that these ponple or ganiza into a company in order to tight labor. Thi'y or ganize hemise they lure to in order to work torether, amb, as a result of ormaizing, they are represented in evers use made of their capital by their oflicers. ('an any one serionsly contend that these $8:, 1000$ stockholders, spenking through their oblierrs. are justified in saying in their $160,0(4)$ employes. We insist upon deating with yon, man by man; we will not recogni\%" your organization. Is it not rather clear, that the 160,000 cmplofís, so far as their interesta are common. must mite if they are to have anything it all to say as to the conditions upon which they will work, and, if they lluite, they must have an orqanization and they must he rapresentel by their otticers:
"Take another illuatration: Tbe United States Sted Corporntion employs, in round

## LABOR ORGANIZATION

numbers, 200,000 men. Of this vast army of workmen aiout 44,000, neuriy all of then representatives of organlzed inbor, own stock in the corporatlon. In thelr capacity as stockhoiders, these 44,000 workmen are represelledi by the ollieers of the corporation. Can it be eontenderi thint they are any the less free, or have any less right, to be represented, in iheir capacity as worknen, by the ehnsen representatives of thelr trime orginization? And wheu the two attributes of holding stock and taking employment are thus united in tive same persons, will any one any iongre contend that these nicu, as work. mun, organize for the purpose of antagonizing themselves as capitalists?
" Now it is ollt of conditions that hnve produed a sithation ilke this that tha so ralied 'trade agrecment' has sprung. ln lts simplest statement, a trade ngremment is nn agreement bet weell orgunizeti stockhollers and organized workmen, both aetling through their ehosen reiresentatives, to determine, for the period of the agreenent, the generni terms of employment of the various ciasses of workingmen concerned. "Hat earh sile tries to make thi' best bargain it ean, oees without saying. That conditious favor sometimes one side and sometimes the other is equally true. That ench side tends, when it has in its turn the upper hand, to push the otin: too hard is not iniprohable. But just ns certuiniy ns a peudulunt, after swinging from one side to the other, tenis to rest in a position of equilibrium, so sueh truic ngreements tend to relieve the trade to which they appiy of the extrente swing from conditions favoring capitnd to romlitions fnvoring labor, and rice rersa. whieit so often spells disnster to capitai and labor alike, in other words, trade ngreements that are revisable from tine to time cortainly snake for Industrial peace, and they ought ns cerininly to inake for indinsirial progress. In the mean whe they are eonstantly edacating cveryboly concerned into a realization of the fundn. mentai importance of keeping fuith."
A. D. 1908-1909. - The Question of Injunctions in Lahor Disputes. Sec (in this voi.) Law anilits Colerts : UNitfod Stathes.
A. D. 1908-1909. - Union Boycotting a Violation of the Sherman Anti-Frust Law. The American Federation of Lahor and the Bucks Stove Company.- Alieged Contempt of Court hy President Gompers and others. Early in 1918 the Supreme Court of the United States gave final declsion to $n$ ense in whleh the 1 Intters' Cuion and the American Feleratiou of Iahor were procerded agninst, for boycotting the goorls of in hat manufacturing firm whleh re. fised to unionize its factory. As the plaintifis in the suit sold their hats in many states, the boyeott was alleged to be a combination in resi raint of interatate commoree, and a violation. therefore, of the antl trust iaw. The Inited States Circult Court had dismissed the complaint. and the Court of Appeals had affirmed its deerer: but the Suprene Court. by a unanimous dereinion, overruled both. it lefle that the law in questlon is violated by a combination to prevent the sale of non-union artiches in different Staters.
[Cncier thls decision, in a suit by the inat manufacturing compuny agalnst the llatturs V nim for damages, a jury at llartfori, Comn, on the 3 d of February, 1910, awarded 874.000 to the

## Labor organization

## former <br> The Caion has appealed from the verullet.]

The nttitude of law toward trade union boy. cotting wns exhihited a year later in another more notabie case, winich arose from actlon takea hy the Americau Federation of Labor against the Bucks Stove Company. In March 1907 , the Federation had proclalmed a boycott against thit company, adrertising it in the olllelai organ of the Fedcration as one whieh " we don't ps tronize," and taking neeasures to prevent trades men from huylng the company's stoves. A suit to enjoin thls boycott was hrought, and the injunction was granted, in December, 1907, by Jidge Gouid, of the Supreme Court of the Dig. trlct of Coiumbia. The lssuance of the lnjume. tion was mnde dependient, however, on the filing of a bond by the plaintlf, to make good all dnmages if the lnjunction shouid not tinally lie sustained, nad an intervni of slx days occurred hefore the flling of the bond made the lnjunction effective. In that intervai, many copies of a publieation which the injunction woutid forbid wrre sont out by mail from the headquarters of the Fedicrntlon, aud niore or iess of these copies reached their destination after the injunction became of force. This proceciing, together with varlous deviees by whieh the offiecrs of the Federntion had sought to evade the in inmetion, through eovert ailisions to the boyen . became the ground of neharge that the principal olijeers of the Federation, Samuei Gompers, John Mitcheli, mud Frank Morrison, had violated the injunction and heen guilty of contempt of court. On tinis charge, in July, 1906 , these oft. ciais were oricred to show cnuse, on the 8th of September foilowing, why they shouid not br punished for contemipt. The case cante thea before another judge, Danlei T. Wrigint, wlose julgmeut, rendered nenr the end of the rear. held then! guilty of eontempt and sentenced them toimprisonment. se reraily, for one year, for niue months aud for six months.
Appeal from the injunction, meantime, had been tnken to the Court of Appeals of the District of Columbin, nnd there, on the 11th of Inreh, 1009 , it reecived in modifiention which seems. practically. to inare extinguished the contcmpt. The Court held that the decree shouid be nodibied to the extent that it sliall only restrain the defendiants from conspiring or combining to boycott the business of the luarks Stove \& linnge Company or tirrentening or leclaring any boyeott or asslsting therein, and from printing the nnme of the complainyn, is husiness or product in the " we don't patr
or "unfair" iist of defendants in furtherauce of nny burcott. The court heid that the defend. ants cannot he restrnined from ail publieations referring to the lueks company, hut only such as are made in furtherance of an allegai boy. cott.
On the appeai from the decree of the Court whleh adjudged Gompers, Morrison, and Nlitehell to he guilty of contempt of eourt, the Dis trict Court of A ppeals, on the 2d of November, 1909 , affirined that decree, and the sentence of Judge Wright wns thus in force. A stay was given to it forn time, during which n writ of certiorari was obtained fromu the supreme Court of the United Sutcs, which will review the whole rase. but not untii Octoher, 1910.
A. D. 1909. - Expiration and Renewal of

## LABOR ORGANIZATION

the Three Year Agreement in the Antbracite Coal Distrlcts. - Report of the Conciliation Board for the past Three Years. - Agaln, in the spring of 1909, at the end of a three year term of agreement (see above, A. D. 1908), tbe anthracte conl miners and their employers were in cuntroversy over a renewal of the agrecment. The latter profferel a renewal, whlthout change, for another three years. The miners, in convention, at Scranton, on March 231 and 24th, refused the offer unless the agreement should be signed hy them as members of the tinited Mine Workers of America, recogrialng their organization. In thls they were upheld hy the new Presldent of the Cnited Miue Workers, Thomas L. Lewis, successor to Mr. John Mitchell, whuse state of health had competled him to resign. The old agrecment expired on the 31st of March, and nothing was formulated at the time in its place, except a verhal understandling that, pending further conferences, the miners would continue work on the former terms. Later, however, it was stated that the Buard of Conciliation, created by the strike commission of 1902, bad heen continued for a further period of three rears.
At the end of August, 1909, the Conciliatlon Board puhtished a report of the last thrce years of its work, in the setuling of dififerences betrecull mine workers and operators. Only twenty-three grievances were presented to the mediators between April 1, 1906, and ApriI 1, 1919, as compared with 150 grievances in the preceding three years. The volume issued three rears ago contained 330 pages. This year ouly 69 pages are required to tell of the grier. ances and settlement. A number of the grier. ances covered in the new report were settled out of court. Of the others, some were decidul in favor of the employecs, some for the employers. In three years only three griev. anes had to he referred to an umpire. As the purposes of the hoard hare hecome more clearly understwod, a greater number of differences have been settled without reacblng the stage of formal complaints. The members use their in. fluence with the contestants to effect a compromise, avoiding the delay occasioned by a formal investigation.
A. D. 1909 (May-June). - The Georgia

Rallroad Strike. See (in thls vol.) Race Phohlens: United States: A. D. 1909. A. D. 1909-1910. - Strike of Girls in the Shirtwaist Trade at New York. - Its Social Significance. - Ine of the most Important of recent lahor strikes, in its social aspect, was undertaken in Novemher, 1 !009, by the shlrt. waist makers of New York City, mostly girls. At the outset, the strikers numberel hetween 25,000 and 30,000 ; hut half of them, hy the midille of December, hal mule terms with their employers and resumed work 'Ten or tiftecn tholssind were still in heroic contention with ohstinate masters of the trade. and laving public opinion and sympathy wry strongly on their sitie. "The strike began," sity the New York Firening Post, "in a miltiplicity of causes. Wages, sanltary comlitious in the shops, liunane treatment by formen and forewomen, and recognition of the Whistmakers' Cnion all played a part. The contest has now [1)ec. 15] setiled down to the single question of the union shop The employers profess themselves ready to arbitrate evers other point in tispute. The strik. ers matintalis that recognition of their union is their only gisarantee ngaiust the recurrence of condltions such ns precipitated the contict. . . It would be easy to exaggerate the significance of the eager why in which the Suffragist leakers bave throw in themenves into the coullict, It is even eas to exagrerate the signiticance of the way in which women of wealth and social prominence hare come ont in support of the strike. More signiticant to us is the veal with which women of nos very ereat suclal prominence, but still not of the wirking clasw, have from the be. ginning fiven thrir services in organizing and managing the strike, and particularly in doing picket dints on the streets and defending the rights of the trirl emploris before the pulice magistrates and in the courts. Here evinently is a sex-sentiment which cuts across the bound. arles of class and hids fair to give a new aspect to labor coutlicts of the fiture in whieh womm are furolved. The present strike has a arial siqnificance quite bevond thr purstions imme. diutely at issue. It is our first great woman's strike, and is surh it signalizes in a dramatic fashion wontan's invasion into the field of in"lustry."

## LABOR PROTECTION.

## (Employers' Liability - Industrial Insurance - Hours of Labor, etc.)

## Safety Guards, - Emplogers' Liahility. -

 Insurance, etc. - The Needed Law. .."In orler to proteet workingraen against injury by disease or neglgent nrangemeuts of machinery and ways, we need a state corle of recuitions which will prescrihe protertive devices, provide faithful inspectors rud punish those guilty of viblating the law. The roundabout method of maklur employers liahie for damages in case of negligence has little effect, hecanse cmploy. ers can buy legal protection and wayr-earners have no nioney for law sults. Eniployers' liahility laws may be made more severe and dras. tie: ly statutes the obnoxious 'fellow servant' factor may be eliminnted; vnrious other pro$\checkmark$ isions may be enacted hy Congress and hy statelegislatures to estemi somewhat the definition of ...shgence; but no law of this kind iver was made or ever can be made which will protect workmen froin the loss of wages not clearty due to negligence of cmplovers. An emplover cannot be male 'hinble' for defects for which he o: his arent is not responsible. It is sheer waste of time to labor for improvement of a law whose fundamental principle covers only cases of empluyers' fault, because a vast numher of injuries are due to causes wbicb the utmost care cannot prerent.
"In oriler to secure income in periods of insapachy in labur sereral legal ways are open. The British method has much to commend it and tinds favor whth many Americans, the

## LABOR PROTECTION

method based on the principle of compensatlon.' In Great Britaln the old llabllity law is ieft to stand, llke a rottling trimk, by the side of the new and llving trec of the "compensation" law. By the terms of this new law, enacted in 1897 and extended 1907 to certain trade dlseases, the employer is requilred to pay indemnlty to any emplogo who is lajured in health or limb by arcident or any enuse due to the trade, and In case of death his dependent family is pald a certala sum for support. The employer rest. ing under this obllgation Is pernilted to meet it any way he ean tind. U'sually he will hargaln with an Insurance company to carry hls legai risk for a premlum. It is sald the lasnrance companles are puttlig up the rates, but Britlsh. ers will diseover a way to cover the risk In the elieapest form. Already our federal government has embodied thls 'compensation' prineiple In a law whleh gives a meagre sum to its own em. ployés of certain classes when lnjured ln its ser vlce: and the example of the central government will probahly soon he imitated In several states. Bllls are now belng drawn for thls purpose.
" The 'soclal insuraace ' prineiple is entlrely different front that of either 'liability' or 'com. pensation.' The word 'eompeasation' carries a little of the flavor of the ancleat damage sult, white 'insurance' is stmply un amicable hins!. ness arringement to provide in marance for the inevi...ble arerage risk of the trade, which may be exteaded beyond the perils of the shop and mlll to all places and conditions of the work nan's life.
"Historieally the unquestioned temdeney is from the liahility principle to the direet losur. ance principle, with a wayside inn, perhaps, in some law like that of Great liritaia, the law of France heing almost squarely on the social in. suraace grombel so far ins it gors.

The illinois Indnstria] Insurance Commls. sion proposed a law lused on the insurance principle, though its friculs were eompclled to stop it $n$ compromlse with existing laws and eonstitutions. The bill offered by that commis. sion was hased on permission ain! presuasion: it off:red to the employers who wonll provid. an adequate system of insuranee against tmde necidents. freedom from the sword of the exist. lng liability law and it offered to the workmen, If they wire willing to aceept these terms, an assurid income in case of hijury and to their depmoleats relief in case of duith due to oceupa. tion. A law puased by the Legislature of Massoldinselts, in Jlay, 19,is. has aeturlly cmbodicd thls intea and set it to work in the fielel of esperiment. It remains to be seen whether the motives mentionrel will indmee employers and employis to agrie on the plan. Withint ngrep. ment the law will be n dead letter, for it is merely permissire, anl nerecments will ant lic mate unless the economic motive is allequate. (p to this writiag (beremher i) not a single ruphoser has orginized a scheme under this law
"Thי Wisennsin Board of Labor has made Whith semen a wise proposlilon to the elfeet that employers he compelled to insure theiremployés mi whe orliuary amount alrcady known to be spent for litigation, casualty insurance preminms amd other espenses; and they nlso pro. perly siggest slate organization for the eollee. tlos and almingtrathon of the premlums.

## LABOR PROTECTION

" The recent International Congress on Work ingmen's Insurance, after many years of debate, reached concluslons of vast import, happily wlthout dlssent. One conclusion was thet al attempts to insure the workmen who most need It, whose pay ls small and uncertaln, and who are not organized, must prove failures. Detegates from France and England who have always stood for 'llberty' have come to admit thls truth. Not cven subshlles to voluntary lssurance assoclations have been effectlve. Oaly when lnsuranee ls made compulsory on all does It reach the multitude of the wage-earners. But compuislon to Insure may lnclude llherty of method, If the plan adopted is approved by fegal anthority and by aetuaries. Elther pri. vate companies, mutual associations, or state tlepartments of lnsurance may be trusted to co. 'uet the nlans once they are obllgatory on all.
" Another Interestlng conchusion at the Rome congress was that compulsory lasurance cira eover only a minmmim guarantee of lacome to the slek, wounded or invalid workman; while above thls minimum, with advanelag wagis, workmen and thelr eniployers can well unite in providing more generously for loss of in. eome hy voluntary payments of higher premi ums, Trade unions, fratirnal societies and other organizations, as well as casunlty compa nles, hive before them an Indefinite fleld for expandiag their activitio in thls directlon," Charitirs at, \}e Commons. March 13, 1909.

Accident and Sickness Insurance: Pro posed Amendments to the German Compul sory Insurasce Laws. - A 13 ill to annend the compulsory lasurmice laws of Germany (sea, in Volime iV. of this work, Soctal. Jlovenestw A. D. 1883-1889, aud Germany: A. I), 140' 1900 in Volume Vi.), which was lnid by the 1 m perial Govermment before the Federal Council is A pril, 1900, to be acted on in the eolirse of thic ensulng year, is descrihed in purt elsewhore(sece.
 Of the contemplated nmendments that reliote to aecideat and siekness Insurance it was an nombed, that " the proposed mundinents if the law of accident lasurance are mininly formal, but the scheme of iasuroncer syminst illiess is ti be largely extended, ut will include jracticetly all classes of workers fur whom insuraner againat
 On the fine hand, the sytem will in future in chate agriembitral labourars. workers cagagut for less than one weck, imel assistmots and ap. prentices, whose insurance is not nt present compulsory: On the other haul, it will lacloule such citegorles of workira as stage and orcheretra employfa, as! tearhers who arc not ln the servier of the State, If their salaries do not exceed $\leq 1 / a 1$ a year. The crews of searoing shlps, as well! as of vessels plying on inland waterways, aro now bronght iato the gencral slek insurance spotem

try during a year. Statistias have been secured from ofthicial sources and from Inburance experi. eace which show that the acildent llabllity to which American workmen are subject is indeed high. Census reports covering the yeurs 1900 to 1908 show that ont of over $1,000,000$ deaths of males more than nlne per cent. Were due to celdent. The ilability of workmen to acel. dental lnjury or death is hronght under five goueral classifications, incinding factories and workshops, electricai lndusirles, mines and quarrics, transportation hy rall and transportation by water. Of those employed ln factorles and workshopa, prohahiy the most exposed class Is the workers in lron and steel. Of $8,4 \% \mathrm{i}$ accldubts during the years 1901 to $1003,4.1$ per cont. of the accidents to men employed in rolllng mills resulted fataily. According to industrin! lusurance experience, the fatal-accident rate of elcetriclans and of clectric llnemen is excessive. Of 645 deaths of electriclans, 14.7 per cent., and of 840 deaths of inemen, 467 per cent., were due to accidents. In the anthrac te miues of Pennsyivania state lnspectors have found that during ten ycars there have averaged anutally 3.18 fatal accidents for every 1,000 meu empioyed, and the rate ls even higher than this for certain specifle occupations in the nilnes. Thit this rate is exeesslve ls slown hy eompar. isoa with the death rate from accident of 1.29 per 1.000 lu the British coal mines. Leports of the Interstate Commerce Commission show that during ten years 16,363 railway tralnmen lust their liret In accidents. Thia is equivalent to 7.46 deaths per 1.000 employés." - Eluctrical Rerien, Jan. 2, 1909.

Employers' Liahility in Great Britain. - The Workmen's Compensation Act of 1906. - The Workinen's Compensation Act which passed the Iritish Parliament in Decensber, 1006, has the core of its purpose in the first of two appended schedules, which fixcs the "Scale nut Conditions of Compensation," in the following terms :
"(1) The amount of eompensatlon under thls Act shall be -
' (a) where death results from the injury -
" (i) if the workman leaves any dependants wholly dependent upon his carnir s. a sum fyual to his curnings in the employt. int of the same employer during the three yours noxt pre. ceding the injury, or lie sum of one hundred aul tifty ponals, whi ver of those sums is the larger, but not exer. in any case three hundred pounds, pros workly puynents I lemp sum paid in 1 t the anornt of any fer this Act, and any herducted from "tion thereof, shall be the workman's employment by the suidemplover has been less than the said three yeara, then the amonnt of his earnings during the said three vars shall be decmed to be one hendred and fitysix times his nverage weckly earnings during the period of his actual employment under the saill employer:
" (ii) if the workman does not lenre any such depemdants, but feuves my dependants in part
 crablur in iny casc the amomet puyable under the toregolag jrovisions, as may be agreed upon, or, in default of ngreement, may he determined,
on subltration under this Act, to be reasonabio and proportionate in the lajury to the sald dependants; and
" (iii) If he ieaves no dcpendants, the reasonable expenses of his medlcal attendance and burial, not exceedlng ten pounds:
" (b) where totai or partlai incapaclty for work results from the injury, a weckly paynient durlag the lncapaclty not exccedll.g tifty per cent. of his average weekly carnlugs during the prevlous tweive montt 4 , $1:$ he has been so long employed, but if zot then for any less perlod during which be, has been ln the employment of the soare erployer, such weekly fayment not to exceed nne ponnd:
"Pro rluerí that -
"(a) li the lncapacity lasts less than two weeks tio compensation shall be payable in respect of the first week; and
" (b) as respects the weekly payments during total lncapacley of a worknian who is under twenty one sears of age at the date of the Injury, and whosc average weekly carniags are less than twenty shlltings, one bundred per cent. shall be suhstituted for fifty per cent. of his average weekly earnlngs, but the weekly payment shall In no ease exceed ten shillings.
(2) For the pirposcs of the provisions of this scbedule relating to 'earnlngs' and 'avorage weekiy eanhings' of a work man, the folnow. ing rules sliali be ohserred: -
(a) a cerage weekly carnings slatil he computed in such manner as is best calculated to give the rate per week at which the workman was being renimnerated. Provided that where hy reason of the shortness of the tlme during which the workman has heen ia the employment of his employrar, or the casual nature of the employinent, of the terms of the employment, it is imprnctieable at the late of the aceident to compinte the ratc of remuncration, regarl may be had to the average weekly amo.at whieh, dnring the twelve montlis previoun to the accident, was being earned hy a person in the same grai 2, emplused nt the same worl hy the same cmphorer, or, if there is no person so cmployed, by a person in the same grade employed in the same class of employmeat and in the sume district:
" (b) where the workman had entered into concurrent contracts of service with two or more emplogers muder which he worked at me time for one such employer and at another time fr.ranother such employer, his average weekly enrmings slall be computed as if his earnings under all such eontracts were earnings in the emplurment of the employer for whom he was working at the ime of the aceident
"(c) cmployment liy the samf emploser shall De taken to mean cmployment by the same employer in the grate lin which the workman was (-nployed at the time of the accident. unlnterrupted by absener troas work due to illaess or a.. at her unavoidable masse:

- (d) Where the employer has been acens taned to pey to the workman a sum to cover ans special expenses entailed on hiun by the nitture of his cmployment, the sum so paid shall not be reckoned as part of the carnings.
"(A) In Aking the amount of the weckly pay mont. regard shall be had to any payment, at lowance, or benefit which the workman nuy ruceive from the cmployer diring the period of

## LABOR PROTECTION

his incapacity, and in the case of partial inca. pacity the weekly payment shali in no ceexceed the difference between the amount the average weekly carnlngs nf the workms. before the accident and the average weckly amount which he is earning or is alle to earn in some suitabie cmployment or husiness after the accident, but shall bear such relatlon to the amonnt of that differencc as under the clrcumstances of the case may appear proper.
" (4) Where a workman has given notice of an accident, he shall, if so required by the employer, suhmlt himself for examination by a duly qualified medical practitioner "rovided and paid ly the employer, und, if lie 1 , it to suh. mit himself to such examlnation, or in any way nbstruets the same, his ripht to compensation, and to take or prosecute any proceeding under this Act in relatinn to compensatlon, shall be suspended until such examination has taken place."

Further clauses of this schedule, and of the scond sclicdule, which relates to the arhitration of disputed matters, are prescriptloe in detail of procedure for carrying out the orders stated above. The llahility of the employer and lts limitations are set forth in the body of the Act, as follows
" I. - (1) If In any employment personai injury hy accldent arising out nf and in the coursc of the comployment is caused to a workman, hls employer shall. suhject as hercinafter mentloncd, be liable to pay compensation in accordanee with the First Schcdule to this Act.
( ${ }^{(2)}$ Provided that -
(11) The employer shall not be liahle under this Act in respert of any injury which does not disable ne workman for a period of at least one week from earning full wages at the work at which he was employed:
"(b) When tbe injurr was caused by the personal nerligence nr wiffil act of the employer or of some person for wbose aet or defanlt the employer is responsihle, nothing in this Aet shall nffect any civil liability of the employer. but in that rase the workman may, at his option, either claim compensation unier this Aet or take proceerlings independently of this Act, hut the employer shall not be liahie to pry compensation for injury to a workman by accident arising out of and in the coursc of the employ. mont both ludependently of and also under this Act, and shall not he liable to any procecdings independently of this Act, execpt lit case of such personal negligence or wilful act as aforesaid:
(c) If it is rroved that the injury to a workminn is attributable to the serious and whlful mismuduri of that workman, any compensation claimed in respect of that injury shall, unless the injury results in death or serious and perma. nent disablement, be disallowal.
(3) If any question arises in nny proceedings uniler this Act as to the liahility to pay compensation under this Act (including nny question as to whether the person injured is a workman to whom this Act apjliles). or as to the amount or duration of compensation under this Act, the question, if not scttied hy agrecment, shall. suhjort to the provisions of the First ichednle to this Act, be settled hy arbitration, in accordance with the Second Schedule to this Act."

## LABOR PROTECTION

In New Zeaiand: Compensation for "Minera' Disease." - In the fater part of 1908 a minguiar labor strike was caused in New Zealand by legislation making " milners' disease " a ground of compensation frow cmployers. The men refustel to be examined for the disease, and the masters refused to engage them without examination; while the Government, which apparentiy ex pected masters to take the risk of engaging mon alrealy dlseased, itself refused to admit the miners to the benefits of State insurance without craminatlon.
A clespatch from Wellington, January 9, 100s, anmounced: "The Walhil miners have uaninrously refused to sulnnit to medical examination, and 1,700 men will cease work on Moaday unless the owners concede the point. The out. look is serious and the townshlp is depressed. The Auckland coal miners remain idle, and cunscquintiy part of the coust fleet is lald up mul a number of hands huve lueeu discharged." But a later despatch of the same date added: "'The Goverament have now resolved to accept the risk of fasurlig the miners without exumination, pending an amendment of the Act next session.
In the United States: On Interstate Railways. - In his messige to Cougress, December, 1908, the I'resident referred to thls enactnient, which he had approved in the previous Aprit:
" Among the cxcelient laws which the Coagress pussed at the hast session was an employers Ihahity law. It was a murked step in adviare to get the recoguition of employers liablity on the statute books; hut the law did not go far cnough. In spite of all precnutions exereised hy cmplevers there are unavoidable accidents and eventieaths luvolved in uearly every linc of business connected with the mechanic arts. This inevitable sacrifice of life may be reduced in a minimum, hut it can not be completely elinitnated. It is a great social injustice to compel the employee, or ather the fanily of the killed or fisubled vietlm, to hear the entire hurden of such an Inevitalle sacritice. In other words. socicty shlrks its duty by laying the whole cost on the vletim, whereas the injury comes from what may be called the legitinnate risks nf the trade. Coinpensation for arcildents or deaths duc inany line of indlastry to the actual conditions under which that industry is carricol on should be paind hy that portion of the commanity for the bene. fit of which the iudustry is carricd on-that is, liy those who protit by the industry. If the en tire trade risk is phaced upon the cmployer he will promptly and properly add it to the leritimate cost of production and ussess it proportiunntely upon the consumers of his commodity. It is therefore elenr to my mind that the law should plnce this entire 'risk of a tralle apon tha' cm ployer. Neither the Federal law, nor, as fur as I am informed, the State laws deallng with the question of eniployers' liahility ure suflleiently thorogolng. The Fcileral haw should of course include employecs in nnvy yards, arsenals, and the like.'

The following ls the text of the Act
" Sec. 1. That every common carrler by rail road while engaging in commerce hetwecn any of the several States or Territorles, or betwion any of the States and Territorles, or bet weth the Dlatrict of Columbia and any of the States or 'Tcr. ritorics, or hctween the District of Columbia or uny of the States or Territories and any forciga

## LABOR PIROTECTION

aation or nations, shall be Hable in damages to any person suftering injury whlie he is employrd by such carrier in such commerce, or, its case of the death of such employee, to his or her personal representative, for the benetit of the surviving widow or husband and chlldren of such empioyee ; and, if none, then of such employere's parents ; and, if noce, then of the next of kin dependent upon such employee, for such injury or denth resulting in whole or in part from the negigence of any of the ollleers, agents or employees of such carrier, or by reason of any de. fect or insufficiency, due to its negligence, in its cars, engines, appliances, machluery, track, madhed, works, boats, wharves, or other cquipment.
"sec. 2. That every common carrier by railroal in the Territories, the Diatrict of Columbia, the Panama Canal Zone, or other possesslons of the United States shall be llabie in dumages to any perton suffering injury while he is emploged by such carrier in any of said jurishlic. tlons, or, In case of the dcath of such employee, to his or her perconal representative, for the benetit of the surviving wldow or husband and children of such employec; and, If none, then of such employee's parents ; and, if none, then of the next of kin dependent upon such empioyee, for such injury or dcath resuiting in whole or in part from the negilgence of any of the officers, agents, or employees of such carrier, or hy reason of ary defect or Insulificiency, due to its negifgence, in its cars, engines, appli. ances, machinery, track, roadbed, works, boats, wharres, or other equlpment.
"Sec. 3. That in all actions herrinafter bronght against any such common carrier by railroad under or by virtue of any of the provisions of this Act to recover danages for personal injuries to an employee, or where such injuries liave reaulted in his death, the fact that the employee may have been guilty of contributory negligence shall not bar a rccovery, but the damages shall be diminished by the jury in propertion to the amount of negligence attribu. tahle to such employec : Prorided. That no such employec who may be injured or killed shall be held to have been guilty of contrilutory negligonce in any case where the volation by such common carrier of any statute enacted for the safety of employees contributed to the injury or death of such cmployce.
'Sec. 4. That in any action brought arainst sny common carrice under or by virtac of any of the provisions of this Act to recover dam. ages for injuries to, or death of, any of its employees, such employee shall not be held to hare assumed the riskis of inls employment in any case where the violation by such common carricr of any statute enacted for the safety of employees contributed to the lnjury or death of such cmployee.

Sec. 5. That any contract, rule, regulation, or devlce whatsoever, the purpose or intent of Which shali be to enable any common carrier to exempt itself from any liability created by this Act, shail to that extent be void: Promided, That in any action brought against nuy such common carrier under or by virtue of any of the provisions of this Art, such commen carrier may set off tberein any sum it las contributed or paid to any lnsurance, relief benefit, or indemnity that may have been pald to the injured

## LAHOR PROTECTION

## employce or the person entitied thereto on

 acce.unt of the injury or death for which sald actlon wss brought."Sec. 6. Tirat no actlon shall be maintained under this Act uniess commenced within two years frow the Jay the cause of action accrued.

- Bec. 7. 'Aut the term 'common carrier' as used in this sct shall include tite receiver or recuivers or other persons or corporations charged with the duty of the management and operation of the business of a common carrier.
"Sec. 8. That nothlug in this Act shall be held to limit the duty or liahillty of common carrlers or to impulr the rights of thelr enbloyees under any other Act or Acts of Congress, or to affect the prosecintion of any pendfing proceeding or right of action under the Act of Congress entitled 'An Act relating to linbllity of common carriers in the inistrict of Columlia and Territories, and to conimon carriers engaged la commerce between the States and between the states and forcign nutions to their employecs, approved June eleventh, nineteen hundred and six." - S'istutes of the C'uitel States of America pased at lat Nanion of the 60th Congreas, $1907-8$, ,pt. 1. clutp. 140.

Hours of Labor: Judicial Limitation of Police Power to regulate them in the United States. - By a decision from the Supreme Court of the Cnited States. in April. 190., an Act of the Legislature of New lork, limiting the hours of labor to he exacted from workneen in bakeries. was pronounced unconstitutlonal, The law in question provided ilat "no employee shall be rejuired or permitted to work in a biscuit, breal or cake bakery or confectionery establishment more than sixty hours in any ope week, or more than ten hours in my on: day. uniess for the purpose of making a sliort:r work diay on the last day of the weck: nor more hours in any one week than will make an weruge of ten hours per day for the number of days dur ing such week in which sucb cmployee slanll work." The New lork Court of Appeals lad passed on this enactment and declared it constitutional, as a measure for the protection of public liealtin. A majority of the supreme Court five to four - rejected this view, saying, in the opinion written hy fustice ferhham: " We think the fimit of the pollec power hus been reaclied and passed in this case. Tbere is. in our judg. mett, no reasonable foundation for hobiling this to be necessary or approprinte as a homalth law to safeguard the public health or the health of the individuals who ure following the trate of a baker." In the dissenting opinion of Justice Ilarlan, Justices White and lay concurring. it was said: "The rule is universal that a lecrislutive enactinent. Federal or State, is never to ho disregaried or fichl invalid unless it be, beyond question, plainly and palpably in excess of legislative power. If there be doubt as to the validity of the statute, that douht nust there fore be resolved in favor of its validity, and the courts must keep their hands off, havimg the Legislature to meet the rexponsihility for unwise legislation.

Limitation of Working Hours for Trainmen. Sec (in this vol.) Rabluays: Uniteld Stater: A. D 1907.

The "English Coal Mines (Eight Hour) Act." - The Act so called, passedi in 1908, cume into force on the 1st of July, 1909, exeept as

## LABOR PROTECTION

respects mines in the countien of Northumberland and Durham, where lts operatlon was deserred until the 1st of January, 1910. The Aet pruvides that "a workman shall not be below ground in a mine for the purpose of his work, or of golng to and from hls work, for more than eight hours during any conseeutlve twenty.four hours"; but this is guallited by the condition that "no contravention of the foregoing provi. slons shall be deemed to take place in the case of a workman worklug $\ln$ a slift if the perlod bet ween the tlmes at whilch the last workman in the shlft leaves the surfuce and the ferst workman In the shift returns to the surface dows not execed elght hours." This rule, it is sald, makes the nominal working day of elght hours "oue that will vary, according to local condltous, from eight and a half to nlne honrs." On the other hand, the Coal Owners' Assoclation of South Wales and Montrouthshire, in a manlfesto lasmexl shurtly before the Aet became operative, declsred: "The Aet does not permit eight hours" work underground, but a couslderable portion of thls time is taken up in traveling to and from the actual place of work, and in many of the older collieries not more than of hours' effective work wlll be performed. The owners nre strongly of opinlon that to will be found lmpos sible to work such eollecles and mantain then in repalr with all the pumping of wnter, bollers. engines, borses, oftheials, and attendants necessary for 24 hours per day on $6 t$ hours' product. Ire work, especlally in vlew of the fuct that in south Winles a much lisrger proportion of the collier's thme is occupied in other work than in producing eoal than is the ease in most other conaltields."
The conditionsure described ns being different in the Welsh nilnes from those in ether British eonl fields, and it serms to have been there only that trouble arose wheu the Aet came lato ef fect.

Germany's Latest Code. - "The coal miners of l'russia have secured a legal elght. hours day for underground work, but in indus try generally the number of hours worked is ten dally, or sixty weekly, and these hours generally f:ll hetween six and slx or seven and seven. In some industries, and especially the textile ledustries, from sixty-three to sixty-six lours per week are comumonly worked by both sexes. . . . Just as there was once a time when the textile Industry of the Rhineland worked to a large extent seventeen hours a day in order to facilitate competition with Englnnd's more himbly developed factories and more skilled workers, so now a day of ten and eleven hours is muintainel in the same industry purely out of fear of the forcigner. $\qquad$ The only limitatlon of hours introduced by the amendment to the ludustrial Code which was passed in 1908 np plind to femals workers, and it mercly fixed the rule of sixty hours, subject to many exceptions, An investiration made in 1902 by the (iovernment into the hours worked by females cmindoyed in factories and werkshops showed that if 13,5650 such workpeople, employed in $3 \times$, Biff works, *(i, 1:91 (in 6, 668 works), or 10.6 ler cent. Worked mine homrs or less, while $34 \%$.
 from nine to ten hours (inchasive), so that over half already enjoy the protection which the new law is to afford. The Sucialists at present de.

## LABOR PROTECTION

mand a ten-houra day for both sezes, for the whole country and for ali ladustrles, but they regard thle no longer as their final objectlve, but as a stage on the way townrds the gosl of an elght-hours day, rin a halfway house of nhe hours." - Willam H. Dawnon, The Eirolution of Modern Gormany, pp. 129-131 (Unvin, Londun; Scribuers, N. Y., 1900)
"On Ilecember 28 last [1808] an industrial amendment Aet was passed by the fierman Refchstag and became law. It introluere a mumber of new and more stringent regulations for the protectlon of women and chlldren, which will liave tite effect of securing a large reduction of the fours of fabour ln many manufacturiug Industries. In its appllentlon It goes beyond the existing factory law, which applles to Fib. riken, nad it Includes all Ietriche (industriul ess. tabllshments) In whleh ten or more personin are employed. It reduces the marimum number of hours for women from 11 to 10 on ordinary week days and from 10 to 8 on Saturday. 'lhat is to say, It reduces the statutory marimum week from 65 to 58 hours. It extends the periond during whiteh ulght-work is prohlbited by no hour, and tixes it from $8 \mathrm{P} . \mathrm{M}$. to 6 A . M., insteml of fron 8.30 IP . M. to $5.30 \mathrm{~A} . \mathrm{M}$. as heretofore. It further provides that after each day's work an unbroken Interval of 11 hours' rest must elapce and this also applies to workers of both sexes under 16. The latter, who already eujor the dally and weekly maximum now granted to women, will also have the statutory times of he. glnning and learlug off work altered from 5.80 A. M. to $6 \mathrm{~A} . \mathrm{N}$. for beglnalng and from 8.30 A s. to 8 P. M. for leaviog of." - London Timex Mareh 15, 1909.

Japanese Legisiation in Prospect. - The following report from , Tapan eame to the Antericnn Press in a telegram dated December 15.1904 at Victoria, British Columbin: Factory owners of Japan, who employ 642,000 hands, of whom 392,000 are women and a blg percutage chlldrem. are exefted over factory laws to be advorated at this suaslon of the Diet, aecordiug to urws bronght here yesterday. The law will prowide against employment of children less than twolve yents old, but those ahove ten now employed will be permitted to continue. Workers midet sixteen and females may not be worked more than twelve hours a day, and must be given two dhys rest each month. In da; 9 of ten hours, an honr's rest must be given.

Report of the United States Industrial Commission in 1902. - Recommendations for State Legislation. - Child Labor and Woman's Labor. - The Utah Law on Labor in Mines. - " P'eriapss the snbject of greatest gmb. lle lnterest todiny ls that of the regnlation uf the hours of labor permitted in lndustrlal erempations, anal especially ln factories. Most of the Northern and Eastern states prohibit the em ployment of persons muler the full nge in fac tories or other medamial establishmens for more than s preseribed time per diem, usuthly ten hours, and not exceediug sixty hour, per week. Obrlously, Congress has no power with. ont a constitntionnl amendment to legislate dl. rectly on this subjeet. The Commisslon are of the opinion that a uniform law upon this suliject may wisely be recommended for adoptina by all the States. We believe that such legislation csa uot, under the Federal and State constltutions be

## LABOR PROTFCTION

## LABOR PROTECTION

recommended sa to permons, maie or femaie, above the age of 21, except, of course, In some apecial industries where employment for too many houra becomes positively a menaco to the lualth, safety or weil-lueing of the communlty; hut minors not yet ciothed with aii the rights of citizens are pecuilarly the subject of Nitate protrition, und stili more so young cbildren. The momission are of oplaion, therefore, that a simple statute ought to he enacted by nll the States (i) regulate tbe iength of the working day for young persons in factorles (mcaning by' young prisions' those betwcen the age of majority und 14) ; und in view of the entire ahsence of protec. tion now accorded hy the laws of mnny States to chikiren of tender years we think that the cm ployment of chidren in factories in any capacity. or for any time, under the age of 14 , should be prohibited. The question ci siops and mereantile witablishments generally apperars even more subjert to loenl conditions than that of factories: therefore the Commission see no need for even ricommending to the Sinter any uniform legtslation npon this subject. But ehildi inhor should be univeranilif protected by educationai restrie. tions, providing in suhstance that no child inay be empioyed in cither factories, shops, or in stores in large cities, wion cannot real and write, and, except during vacation, unless he has attended school for at least twelve weeks in ench year. Frurtber reguiation, especially in the ine of bringing States which now hsve no factory acts up to a higher standard, is enrnestiy recom. numied.

- The Supreme Court of the United States has affirned the constitutionailty of the Ltah law liniting the length of the day's inbor in mines or unicr-gromind workings, even in the case of mile citizens of full age. The Comuission would therefore recommend that the provisions of the C'tah constitution and statutes be followrit in all tive sitates, by which the period inf emplorment of workmen in afl under-ground mines or work. liges shall be eight hours n day, except in cases of emergeney, when life or property is in im . minut danger, and aiso that the empioyment of clilifren under the age of 14 and of ail women and erirls in mines or under-ground quarrins anl wurkings shnll be forbidicn." - Final Jeport (114:) of Industrial Commission, pp. 048-8.
Hours of Labor for Women. - Right of the State to put other Limitations than on Men. - U.S. Supreme Court Decision, - The: cunsitutional right of a State to put other limintions on the hours of ishor for women than it puts on the hours of fabor for men whs questimed by the proprictor of a liundiry in Oregon, and the question was carried to the Supreme Court of the Conited States. The decision of the: tribunal was rendered eariy in 1908, nffirming life right of a State to make such distinction in iabor limitations between the two sexes, and the ground of the decision introduccs a priu. ciple of enormons importance into law, 4 legal iimitation of the hours of iabor touches
the contractual rights of the individuai, and the Court concerieri that in thuse rights women stand on the same plane as men but the state, It deciares, has the constitutional right, for the public good, to limit the cuntractual right of the individual, and its reasoning on the inatter before it turas therefore on the questlon whether the protectlon of women by this special limitation of eontructuai rights is or in not for the pubile gooi? On this guestion the counsel for the istate of Orcgon, Mr. Louis I). i3randeis, hai submitted a remarkable mass of testimony, mocinl and physiologicai, which the Court necepted as concluslve, and founded its decision thereon. This testimony the Court declared to be "aigniticant of a widespread belief that women's pbssical structure, and the functions she performs in consequence thereof, justify spectai legisiation restricting or qualifying the conditions under which she should to permitted to toil." Though "constitutionai questions . . . are not settled by even a consensus of present puhlic ovinion." yet the Court held that " when a question of fact is debated and debatabie, and the extent to which a special constltutional limitation goes is affected by the truth in respect to that fnet, a widespreai and iongeontinued belief soneerning it is worthy of cousideration." Appiying that princlple in this came, the Court affirmed that "as fucalthy mothers are essentinl to vigorons offspring. the plisical weil-being of woman becomes an ohject of public interest and care in order to preserve the strength and vigor of the raec." On account of her physical constitution, "she is not an equal competitor with her brother." In spite of the removil of iegai and other disabiities, "she will still be where some legislation to protect her seenis necessary to secure a real cquality of right." Such legislation to defend wommn, to use the Court's phruse. "from the greed as weil as "pussion of man." is not merely for her ben ., hut for the well-being of the race.
"The two sex.s." suid Justice IBrower, who delivered the decision of the Court, "differ in structure of body, in the functions to be performed by cach, in the amount of physical atrengti, in the eapacity for long coutinned inbor, particuiarly when done standing, the influence of rigorous health upon the future weiibeing of the raec, the self-reliance which enabies ond to assert full rights, and in the capacity to maintain the strigerie for subsistence. This difference justitios a difference in iegislation and upholds that which is designed to compensntc for some of the burdens which rest upon iser."

## LABOR REMUNERATIIN.

## (Coöperative Osganization - Pensions - Profit-sharing - Wages Regulation, etc.)

The Bonu: Syatem, - Its Working in the Shops of thi Bethishem Stesi Company. -"A warding extra compenation for extra woik has long deen the practice of anccessful matiu. facturing; hut the particular method of awnrd. ing a honua above referred to is of recent origin. and tils an important need In moxiem syateman of management. It may be hrfefly described as follows: Alteruative ways of dioing a plece of work are carcfuliy lnvestigated by the mont conipeunt expert avalisble and the results re. corded. The best method 13 determined and taught to an ordinary workmnn, wim is awarded extra compensation in addition to his any's pay for foing the work in the time and manner spe. cifieri. This method of compensation was the outcome of an atternpt to Introlinee in complis. eatel work equitahle plece rates determined as neariy as passibie dy sclentife methorls,"
The originai working out of thls method into a sestent is ascribed by the writer of the nowe to Xr. Fred W. Tarlor, in the carly cightien, he belug then ia the employ of the Nidvale Nted Corapany. After setting forth the prineiples invoived In the system, this writur concindes his articie by stating: "The prlnciples abore outlined were appled during the spring and summer of 1601 to the ordnnnee and armor-plate machine shops of the Bethlehem Sted Company, and resuited in a sinort thme in more thinn don. bling the out pit of those slops. The systenc is stiil in use suhstantialiy ns lntroluerd, and the superinteudent, Mir. Arcisibali, Johnston, in lis testimony before the House Committere on $1 . n$ bor, Fubruary 13, 1902, makes the foliuwhig statement regariling it : "This mranuement las worked very satlsfartorily, hoth to the men and the company, for it has enabled us to get work out more ejulekiy, aad to wid to the pros. ducing capnclty of our luvested eapital; while for the min it has leen a great benetit, as we have many instances of emplosecs whis have holight iomus for themselves principally from their extra earnings 11 , the bonns system, and from orirtlme work. The system has been a stronger incentive to indust ry than nay other we have heen nble to pet into effect in our plant." -II. I. Gantt. The Ronus Syatem of Rewarding Lathor (Am. Reriem of lectiers).

Cooperative Organization: France, Italy, ste, - Cooperative Production. - A book pub. llsheal in 190., eutitleif " labor Prohlems," hy T. S. Nlams and Hoiea L. Sumber, gives an Interesting necomint of coisperatle associations for emintract inbor in Frances, of which thore Were 290 on the 1st of January, 1901, seemingiy having eonsidembif suecess, jof of the number being in the buliding tralles. Similar organlzations were reported in lialy and New Realand. In France, the law provides for dividing public eontriets, nud for making payments on tisem in such ways as to bring them wuthin the means of thise assochations of workmen. In Germany and llolland there !a anid to have bron a fres de. grec of surcess in organizlng this mode of productive corknemtion.

Great Britain: The Coopsrative Union
and Coobperative Congress. - Recent Statistlcs of Membership, Organisatlons, and Operations. - Rapidiy incraseing Cobparation in Agriculture. - As reported at the ennual Cooperative Congrea of 1805, the Cooperative Unlon of Great Hrtsin hed then a namherehip of $2,200,000$, conducting cosperative under" Inge with a total capltal of $\& 86,500,000$ trale of $£ 82,000,000$. At that meeting a pri... as tion torart wlth the Labor Kepresentation fontmitter, for Inereaning tha reprearntation of ialur interests in larliame was defested by but votes ngilnst 185.

Four y'rars later, at .he Congress held In Mar, 1009, the reponed membernlifp of the Conpers. tlve Union had increased to $3,516,104$, in 1560 alliliateri societles. Among other statistien re. portel for the previous year were the follow. ing: " The two large whoieale socleties - me in Engiand and the other in Neotiand - hui a membership of 1414 in 1908, or a decrease of three as conipared with the total $: ~ r 1007$; the slinres heid nmounted to $£ 1,084,676$, a rise of
 of esma,090; the maies for the year amountel to $\mathbf{L} 82,433,088$, all inerrase of $\$ 43,940$, and the Interest on enpltai was 596,850 , an Increase of t5, 498. The year's traling, however, resulud In a de erease of profits amonnting to $£ 187,12^{\circ}$, the total profits being $£ 331,124$. There wre: 1424 distrihutive socleties, a clecrense of 16 , hut the uembership rose to $2,404,595$, ur $81.21 \%$ more; the shnres field went up to e'su, 037, \&is. an lacrease of $£ 998,703$; the lonns nmounteri to L4, nisy, (121, a rise of £212,377; the saics i11eresaet hy $\{1,635,549$. the total being $560,-73$, 278 ; hut the protts tropped to $£ 10,773,000$, or it deercase of $5126,827$.
"Coiperative pruduction forms a inrge iond important oran in of the movement. Some fants relating to it are given from tive iast anneal re. purt of the cldef Reglatrar of Friemily Nocietin's in orier to suppiement the fgures of the crutral hourl. According to the Chief IRegistrar's ripurt, 1251 societies, inciuding distrifutive, whoienle, mid proluctlve socleties, mame re: turns showing that they enrriad on prodiletinu to the extent of $+16,880, \% 64$ In the yonr, edian. lated on wholesalc prices. The workpeopie ritployedi In profuetlon numbered 44, isy-mu. 2.5.800: women, 12.212 ; boys, $616 \%$-and the wages prid to these (exelisivi of bones) amonnted to $£ 2,3 \pm 4,674$. The bonnl's anmial slmmary of the operations eal in don by the probluetire societies and the prometive dipart ments of the two wholessale' sucleties slowns is totai production $\ln 1$ mis of $\mathbf{x} 11,112,220$. Tis this is adidel an estimated prodnction of $2 \div . \pi 50$. 000 hy the distrihutlve sncieties, mnk ng the tota productlon of the coipmrative movement for the year about $\$ 18,862,000$. The number of prouluetive societies to which the Board's returns relate is 122, a decrease of five as compared $w$ ith the tetal fur the previons gcar. The ubuiner of people employed by these societirs diuring the year was 28,575, an Increase of 1637: the caplial Invested was $£ 4,610,072$, an increase of

## LABOR REMUNELATION

## LABOH REMUNEHATION

C259, 137 ; the trade, as atatell above, wes C11. 112,22J, an increace of $\mathrm{C450,HON} \mathrm{:} \mathrm{the} \mathrm{prodis}$ mounted to C852,808, a decreave of C15,817: and the lowes amounted to $C 60,650$, as againat cs396.
"Among the luduatries engaged In coopera. tive production, corn milling had a trade last year smounting to $84,584,703$, which was condidersbly bigher than the total for the previous yeus. Increases were aiso recorded in the cotton, Hana, alik, and wooi Industries, and by wcletien engaged in wooiwork, buliding, and quarrying, printing and bookhinding. baxing, and laundry.work. But the mocleties proxluc. $\log$ boots, shoee, and ieather, metal nad hard. ware, and varfous other goods had a reducei trade."
in an article on "The Coming of Coopera. tion," in Agriculture, the London Times of May 8, 1909, made tire following statements: "The cuip prative movement, on which more thnn anything eise the success of ail amall farmers and many big farmers depencis, is advancing with a rapidity very iittie realized even by farmers themselves.
"The position at present is this. In Ireiand, in Sentland, and in E.ngiani exist three organization acletien which decided in July of hat yent to amalyamate for certaln purposes. Cindis the lend of Sir Horace Plunkett the three sucleties decided that joint action wonld be wifetive in ail the tiree branches of cooperative trale - ' (1) The acquisition of farners' supplies of the best quailty at the iowest price; (2) the marketing of produce in the most ecenomicni manner; and (3) the interehange of certaiu products.'
" into this third attribute of cooperation it is worth while inquiring ciosely. The iden. which riay mean an lmmense airvance in the proluctlon of the farm, smail or great, has not beeme familiar even to some of the best loral coinerative socicties we have. A few exampies will illustrate the possibliities. No one will doubt the ralue of geogrnphical knowiedge to the furmer. One of the biggest suecesses made out the Pen farms in recent years resultei from the accident that a Feu farmer went to shont snipe in ir lund. and there came upor a potato which proverl to be exceptionaliy suited to the Fen wifi. Many smali fortmenes have been made In futato farming by the use of seotel semi. Today, of coursi", every one is aware of its ex. cellence, due partiy to the red soii. partly to the wle enstom of the Scotch farmer in digging his potatoes bufore they are inature. But this know ledige penetrated very slowly.

An adnifable instance. illustrating the same point, may he found in the unpubilshed history of the French wheats recently introduced into Finylani. The whoie trile is fuli of sugkestions fur Fuglish farmers nnd for the organization swifllis. French farmers, as we ail know, nre very dostif fellerated: and every sort of work - in luying. in marketing, and in advaneing money - is carried on by the locai and federated syndicates. Some years ago the leaders of these syndicates came to the eouclusion that hat wheats greatly improred by as year or two in English soll. They preferred their own varietles, bit found them more prolitle when the sperl was imported from Enginnd. Neveral dif. firmhics met them. Thiy hal first to persuade

Eagilsh growers to grow these varieties, and secondly they had to compel them to keep the stock pure, The weond diffleuity might have been insuperable without joint action, but it was soon overcome by the sylidicatea.
"At present Ireland is a iong way ahend of England, and England of Fcotland, in co operntive organization; but certainly in Engiand, as weil as Ireiand, co-cperation has mivanced noore rapidiy in the lant year or two that needied at ail likely at the begluning of the century. The Agricultural Organiation Society, whicin was formedi for propaganda work, is already ahle to glve proof of valumble results from foint nction towards what may be calied the sell-sufficiency of izritain. The ndvance has been made ponsible by the new federntiens of fnrmers, as well as hy the multiplication of focal co-operative soctictles."

Exhibition of Cosperative Productions. An exhibition of eoiperative productions whs opened in August, 1004, at the Crystul Phace, London, in comnection with a Nitionai Coop. erative Festivai. On the one shide goods wre sinown from the varions co partuerwiif prodinctive soclettes, including beots and shors. base kets, cloth, velvets, eutlery, watchers, und printing: and on the other side were afecimens of the Cu-operative Whoiesale Soclety's gools, such its workIng exhilhts of sweet bolling, suapmilling, and cigar and cigarette making. In addition to tho exblblts from workshaps, the Tenunt's diousing socletles showed plans of their houses ewned on $\mathrm{t}^{\prime}$. coxiperative principic by groups of worknen and others. it was pointed ont hy the promoters of the extilhition thant muci houses may lie completely equipped for habitation with artictes produced under cor operitive comiltions.
Indin: Rapidity of the Movement. - "The co-oprative mosement in india, which was started five years ago by the passing of the Cooperative Credit shejeties Aet, has mule steady and satisfactory progress in all the i'rovinees, and there are now 2.000 societies with 145,000 members nud a worklag enpital of cuer half a miliifonsterlinge. Eaci Trovince fans its oflciai registrar and staff of inspuetors, whose husinuss it is to preach the beartity nf (o) operntlon, to anconrage the formathon of new surdetles, to help each soclety to draw up its be laws, to cherk ani audit its arecomst free of charge, to point ont mistakes, and to put thines right. The ordinary trpe of co operative sociefy is the willage bank of from in to low members, all residents of the same nelghibourhow, whon know intimately each ot bur's needis und resoures, und, above nil, each other's character." - Cior. Landon Times, Dee. 1\%, 1909
New Zeaiand: The Labor Group Method. - "What distingulsics New Zealand as a State is the way in which gorernmentai powers have bern used, not to stop competition in the socialistle sense, but to furce a higher and fairer level, on which it acis for the many rnther than for the few. Every stnrting step has been of thls nature. New Zenliand is democratizine competition. If the public is there threatened with
 State nets completitively for the whole penpie. Our great interest in this method is that it may in:ve immeasurable deveinpment without land. ing us in Socialism. It has the soul of der r-

## LABOR REMUNERATIOA

LABOR REMUNERATION

"In tbis tbe tbree objects to be gained are not always casily reconclled, and the detaii work, besides, of drafting ruies and regulations to result iu a $^{2}$ moderately practicable working Act wlli be enormous. These oljects are: 1. To conserve tbe mariet for the Australian manufacturer. 2. To insure fair remuneration to the employee. 3. To protect the consumer by piacing a limit upos the price wblch may be charged.
$\because$ Tbe rougb outline of the proposais is as follows: All duthable goods bearing the Commonwealth Truic. Ilark (a sort of universal label) as a guarantee tbat they have been namufactured under fair and reasonable conditlons as to remuneration of labor will be exempt from exclse. A board of excise, to consist of three members, to be appointed to give effect to these proposals. All goods maunfactured uuder conditions which are in accorlance with the State or Commonwealth indistrial award or agreement, or wbich are declared to be fair and reasonable by tbe newly created bourd of exeise, will be entitled to bave the Common. wcalth Trade Mark affixed." - Alicc llenry, Auktralia's " Heve Protection" (The Outlook, Feh. 8, 1908).

The coustltutionaiity of tbe Tariff Excise Act was soon brougbt to a test, and the Fed. eral High Court declded in June, 1808, that wages could not be regulated in the metbot proposed. In the following October proceed. ings were onened in Parliament to secure such an amendment of the Constitutiou as would empower the desired legislation.
Pensions: The German State-aided System. See (in this vol.) Poverty, I'romlens of: Pensions.
System adopted hy American Railroad Companies. - On the 10th of November, 19019, aunouncement was made by the New York Central Railroal Company that it had adopted an employees' pension system, by whicb 100,000 men wonld be affected. C'nder the plan, employeres reaching the age of seventy scars ar" retired. If they bave been continnously in the service of the company for at lenst tin yeurs preceding their retirement. they will be cntitled 10) a pension. An employee who has bern at least twenty years in continual service and has berome unfit for daty may be retired with a pension, althonglt he has not reached the are of seventy. The umonnt of the peusions is 1 per cent. for earh year of entijuuous service, based upon the average rate of pay reccived for the ten years next preceding retirement. The pension system berane difective ou Jannary 9. 1910.
The latest guvernment report on the number of railroad ceaployees puts the totnl for the comtry at 1.072,0i4. "Of these," silys the New York Fircing Post, "approsimately 665,000, or ahont 40 per cent. serve the roads which have pupsion systems. These companies are the dew fork Central, the liork lsland, the P(inisel. Mania, the Buffilo. Rochester and Pittsbury, the Chicasuand Nortbwestern, the llhnois Central, the Atchisom, Topekn and Santa $F$ í, the Inion Pacific, sonthern lacitc; and their afliliated Ines, the lelaware, Inckawanna and Westorn, the Bultimorr and Oltin, the Atluntic Coast Line, the leumbing and the Central of Now Jerser.
Profit-sharing: Plan of Furness, Withy \& Company. - (one of the greatest of tbe British
ship hullding and shipplng concerns, tbat of the incorporated firm of Furness, Withy \& Co. of wbich Sir Caristopber Furneas is the mauying director, announced in the fail of 1908 that it could not continue its busincess uniess the constant troubles between itself and its employees - ver wages questions could be brought to an end. With that view it was proposed to the workmen that they should become partners in the business by taking shares of the company's capltal sturk and paying therefor by a five per cent reduction of their wages untll the price of thelr harcs sbould be covered. Additional shares of slark would be issued for the purpose, on which four per ceut of dividend woild be paid, whether the company divided any surpins on the general stick or not. A certain percentage of the carslugs of the business would be allotted to capistal, and to cover depreclation and development, over and above which the employee-partners would particlpate in all prolits. With reference to thrse allotments, to capital, cte., Sir Christopher Firrness, speaking tu a Labor Union meeting on the subject of his proposal, sald: "I am aware that a section of working-men criticise the amomitw laid aside by some companles for these varions parposes as if tbey were devices for stealing the real caruings of tbe company from their eniphar. ces, hut, take my word for it, these allotment, canuot be dlspensed with, that is to say, if the directors have any regard for the continumer of the company with a reasonable hope of proumr lty. Possibly an arrangement might be reached that nothing beyond a detinite percentage ou an average of years should be put aside.

Importautly in connection with the arrimpe. ment of protit sharing co partnery, Sir (hrivo. pher planned to organize what be called a Worrhs Council, to be composed of an equal number of representatives of the workmen and representatives of the company. it wonld be, he said a kind of Comrt of Reference and Committen of Comsel rolled into one. The proposals of the firm "ere arcepted by its employces nod the co- parthery arrangement was carried out.
A year and a half later, on May 22, Nir Chrintopher Furness and two others purchnsed an extensive eolliery, the Wingate Colliery, whll made a similar propesition to the workmen there. offering them one quarter of the shares of the company to be formed, on the same terms of payment as in the case of the ship-building com ping. Thly gave evidence that the plan had worked satisfinctorils thus far in lis earlicr trial.
On the 15thof Dec., 1909, the secrictary of the Compuny addressed a letter to its Fimpleyé Shareholders, saying: "I huve to uequmint :ons that my bourd have hal under consideration tho working of the company since the aloptinn of the co partnery scheme, and 1 am dirceted on siy that they condider the results, from every mint of view, to be very satisfictory." The silntathtial results to the employees were thins statend
"On the finmarial sile you will nlso he phased to hear that the workmg results nre erquatly sit: isfactory. The audited incounts ap to sepitom ber 30 last, and the cstimated resmits from that dite to the present times show such a hatane as enables the directors to de liare ndividend. They propose therefore. to malie n disstribution on the
 teed 4 per cont, to the employs shareholdirs, the fixed 5 per cent. to the Ordinary sbareholider,

with a bonus of 5 per cent. to both classes of ghareholders. This will gleld to the employe shareholders a return at the rate of 9 per cent. per annum, and to the Ordlnary shareholders at the rale of 10 per cent, per annum, for the nlne months endino December 31, 1809.
"For bette. zonvenlence it has been decided by my board to make the financlal year end on I) ecember 81.

The smount due to each employé sharebulter Fill be paid at the offices of the cnmpany it the respective ship-yards on the pay-day, "Hillic. December 24."
'rimistren this plan of prott-sharing appearei it wis a it prove satisfactory to the em. plovi\%, zad, cin ioe 1st of April, 1910, they vnted aguinst lis eostinuance, complainlig that thelr expr-hation full employment had nut been Ferelj, mi, and hat the system tended to break up triul sions, which are labor's surest support and defence.

The Plan of the United States Steel Corporation, and other Great Corporations. An occurrence of tremendons and far-reaching Importanee is the success of the Enited States Stuel Corpnration's wage-earners' Investment and proilt-sharing plan. When this plan was amolnecel, January 1, [1903], every thoughtful man in the country gave it close at tention.
Withall, the question of questlons was, Will it succertl? We have not been compelled to wait long for the answer. The directors of the Steel Corporation offered 25,000 sliares of stock to their 168,000 enployecs. The books were to be kept open thirty days. No one dared belleve thit within this inonth, while the plan was so new, while all sorts of prejndices or fears might deter subscribers, and while the great mass of employees would still be studying and thluking about the offer which to them must have seemed somewhat novel and complicated, all or even one-half of the proffered stock wonld be tnken up. Yet, when the books closed Saturday eveniner, January 31, it was folmid that the 25.000 shar's offered hat been subscribed for more than twice over. Twentereven thonsand six huntrod and thirty-thrce employees had subscribed for $51,12.5$ shares.
"The company's proposal was to sliare profits with all emplovees who would demonstrate their luterest and thrift by buying the company's stock. Consequently, the great bulk of the stock set aside for purchase by employers was offred to the men who earn the smallest sularies. This was done by dividing the $168,000 \mathrm{em}-$ ployees into six elisses. areorling to their salaries - Class A, over $\$ 20,000$ n vear: Class B , $\$ 10,000$ to $S 80,000$, down to Class F, $\$ 800$ to
 and then by limiting the amonnt of stock enspilnves conld tiake to the following proportions of iheir annnnl salarless: Class $A$, $\overline{0}$ per ecnt.: (lass 13, 8 per cent.: Class C, 10 per cont. ; Class 1). 12 per eent.; Class E, 10 per cent. : and ('lass $\mathbf{F}, 20$ per cent. It will this be sern why oft per cent. of all the stock suliscriberl for in dantary goes to the two classes of mechanies and workmen whose salaries are under se, 500 a year.

The method is really a very simple one. Finplorers subsribe for strek, one or two shares apiece. The shares cost $\$ 82.50$, or less than the market value. Ench employec pays
in monthly lnstallments, taken from his wages, and he may have the payments made small or large, as he llkes, save that not more than 25 per cent. of his wages may be so used in any month, and he may not be more than tbree years in completlng payment. Dlvidends at the rate of 7 per eent. a year go to the subscriber from the date of his tirst payment. Interest at 5 per cent. is charged on the deferred payments. In other words, the corporation sells stock below the market price, on credit, and pays the holder 2 per cent. a year in dlvidends more than he has to pay $\ln$ laterest. IIcre is a direct $\ln$ ducement to the lnvestment of savings. But this is not all. Inducements are offered the employee to complete payment for hls stock and to hold it. As soon as he has fully pald for it, the certificute is lssued in his name, and he is free to dispnse of it. But to make it worth hls while to hold lt and at the same time keep bls place as a working partner in the company's servlee, the corporation says to him: 'If you hold your stock, and beginning with January next year you show it to the treasurer of yonr company, and present a letter from the proper official that during the preceding yenr you have been In the employ of the company, and have shown a proper interest in lts welfare and progress, and you do this each Jannary for five years, we will give ynn, in additon to the dividends paid yon, a bunas of five dollars per share for each year. I Huring the second perion of tive years, we will par you a further yearly bonus, ns a reward for your contlnuous faithful servle.' The amonnt of the second bonns cannot now be fixed, but it will douhtless be larger than the first one. Ample provision is made for the protection of subscribers who frotn one canse or another arr unable to complete payment. Subscribers who discontinme payments get their money back and keep the difirence between the 7 per cent. divitents. and the 5 per ecent. interest. In the case of snbserihers who die or are alsabled while faithfully serving the corporation, after having paid for their stock, the five dollars per slare yearly honits is not lost, but is puisl over to tbem or to their estates." - Walter Wellman, The Steel Conjeration Points the Wity (American Iiceicuo of herters, (ferch, 1903).
"On Decenber 31,1004 , it was reported that 22,060 employees had purchased shares under thisplan and at that date either hellit the certlticates or were naking mombly payments for them on account. This is about 10 per cent. of the total number of cmployees, so that the selueme lus not failed to enlist support. Indeed, it appears that in certain vars, in 1907, for instance, the allotments of stoek to employees were over-subserihed by 100 per eent. In Nay of this present yenr it was announced that since the selieme went into effect 193,493 shares of preferred stock and 15,318 of common stoek hail been sold to the enployees at a total price of $\$ 1 \mathrm{~S}, 491,6 \mathrm{O}$. For 1909 , the preferred was allotted at $\$ 110$ per slure, and the common on the basis of $\mathbf{5 5 0}$ per slare. Indeet, one might opine that of late the attention of the lueky employee holders might liave been concentrated more on the ticker than on the steel hanmer. Their maper profita have bern tigured at over 5 , 000,000, and it is anserted that uneh of the stock has been sold by the fortu.

## LABOR REMUNERATION

## LABOR REMUNERATION

nate lnvestors." - N. F. Eirening Post, July 20, 1809.

A plan of proft-sharing with its emplogees similar to that of the U.S. Steel Corporation wias Introdueed hy the Internatlonal Ilurvester Company, 1909, and by the Youngstown Sheet and Tube Company at about the same tince. The plan of the former company was described very fuliy to the National Civic Federation, at its tenth annual meeting in New York, November, 1000 , by Mr. Gcorge W. Perklus, chairman of the finance committee of the company. The result of the plan is "that a man hegins to buy a share of the company's stock at a price below the market value; he is allowed to pay for it iu instalments, paying 5 per eent. interest on deferred payments; le is credlted with 7 per cent. divklends on the preferred stoek and whatevir dividends are declared on common stoek. In addition to this, he is credited with, respectlvely, $\$ 4$ und $\$ 3$ per share, each year, on the preferred and common stock, and at the end of five years receives a further benefit by way of a share in a fund made up of such 84 or $\$ 3$ deposits as are made by the eompany on aecount of those who do not continue under the plan. It will he seen that tbis offers the men un exceedingly satis. factory form of investmeut ln the business iu whieh they are employed, and gives to the eompany the great advaitage of anchoring its or ganization to the business.
"The stock offered last summer was largely orer subscribel, and the company to dary hats more than 4.300 employees as stockholders."
Wages Regulation by Law. - The English Trade Boards Bili. - To Suppress "Sweating" in certain Industries. - A Bill known as the Trade Boards Bill, whiel had passell the Ifouse of Commons alriady, had its secoml reading in the Ilouse of lords, almost without opposition or surfons criticism. ou the © Oth of August. 1909. The second reading was muved by Lord Ilamilton of Dalzell, who said in loing se that "its ohjeet was the establishment of a minimum rate of wages in evertain sweated industries. The estahlishment hy stat. nte of a minimum mite of wages was, he sup. posed, a new departure, but the regulation of the eombitions of labour ln ecreain trades was by no means new, and ever since the passing of the first Factory Aet Parliament lud from time to time agred to leglatation having that object. Every one knew what sweating was, and every one acknowledged it to be ngreat evil. It was not a uew thing, but the Government were of opinion thit the time had now come when the only pratticul remedy should be applied. If: understoml that in Germany legislation dealing whth this subject was imminent. Ile eommended that fact to any one who might be afrald thit by legislation of this sort the trade of thls eonntry would be driven abroad.
" is a matter of fact there was no reason to believe that any trad, would be killed hy the Bill. He did not know of any better proof of that than was found in the fact that almost all connected witb the trades mentioned in the schedule, both masters and men, warmly sup. ported tbe bill. He inagined that there would be a levelling up proerss. Emplogers who had paid fialr wages would continue to do so, employers who would like to pay falr wages but were afraid of having thelr prices cut by the
class below would now be able to do so, whlle the genuine sweater would have to pas fair wages whether he llked it or not. Girls living at home with their famllies and married wromen who had no chlldren were often willing to work at conslderably less than the market rate for e purpose of earnlng a little pocket money. it might he sald that lf hoth parties were arrin. able to this arrangement there was no reasorl tio interfere. Sceing, however, that these jerple dragged down the level of wages and intictici a serions injury on those who had to eirry on trude for their living, they were included in the Biil. li thelr work was worth having, it must be worth paying for. The trades selected for the purpose of the Bill were eertaln parts of the tailoring trade, the paper box maklng trale, certuin parts of the common lace finishing trade, and certain parts of tbe chain making trale. These were all trades in which sweating was aeknowledged to exlst. The Bill coull be extendel to other trades hy a Provisional Orider 1311], and in this way the control of Parliament would be malntained. The minimum rate of wages in the specified trades would be regulated hy a Coutral Trade Board assisted by lueal com. nittees. Notice would he given when it was interuled to fix a minimum rate of wages and threre would be an interval of three monthe to glve those who lesired to ralse ohjections an opportunity of being heard. During the intermedlary period, wheh would last six months. the rate of wages fixed hy the IBoard would not te eompulsory. He almitted that the estalbi-h: nurut of a minimum rate of wages was a new principle. In cortain quarters it bad been obs jeeted to as an undue interference with frection of contraet, thit the prineiple would ouly be applied where the workpeople had slown them. selves inespahle of any action for themselvers The conditions ln those extreme cases clearly called for legislative aetion, in the interists of the eommunity as well as of the workpeiple themselves."

Almost every speaker who diseussed the lill. Liberal and Conservative alike, gare it cordia] support.
Wages and Cost of Living: Germany and England compared, 1908-1909. - Results of a statistienl study of labor conditions in vier. many, compared with those in Great Britain. were published by the Britlsh Govermm, the summer of 1908 , and the showing firnm the British workingmen. As neariy as the differnt housing of their elass in the two eountrian cin le compared, the average of -German rents is to ronts a England as 123 to 100 ; while the comet fuod to the Germans is to that of the Fnglivas 115 to 100 . On the side of neeessary $\cdot$. 1 genalitlire, thercfore. the wages of the German worlman are drawn upon more heavily than the ling lishman's hy fifteen or twenty per enat., it the least. In other worls. he would nead to hare higher wages than the Englishman, by as miwh as tifteen or twenty percent., to put him wa footlig of equality with the latter in the circumstances of his llving. Insteal of whith his wages are lower by a number of points, the statlstical matio helng 83 to 100 in the average of weekly wages, and 75 to 100 in the arerage of hourly rates. Hat this does not end his dikad. rantages, for he renders more hours of work, in the measure of 111 to 100 . Notwithstanding ali

## LABOR REMUNERATION

## L.ABOR REMLNER.ATION

Which handicaps, it is quite commonly coneeded that the Germall workIngman is plysieally more vlgorons than the Linglish, as a rile, and contrives, by more thrlftiness in his living, to keep It on a higher level. Which is an extraordinarily creditahle fact.
That the German workman lives and lahors under the conditions produeed by a ligh protee. tive tariff, which is clainicd to be protectlve of high wages as well as hlgh prlces, while the British workman's conditlons of life and labor are the proluct of free trude in everything but a few tarif-taxed artleles of luxury, such ns wines, tobaeco, silks, jeweds nud the like, are facts to be borne $\ln$ mind when these compari. sons are ennsidered.
The following is from a report by the British Consul General on the trade and comnurce of the consular distrlet of Frankfort-on-the- Mnin for the year ending April 30, 1009.

- In last year's report it was stated that the belief was galning ground that wages In Germane were not only approaching those paid in the Unlted Kingdom for the same class of work, hut in some cases eren exceeded them. That the ferman workman to day lives better than he useal to there can be little doubt. The standard of llfe has been raisel all round: the low est aspect and stundard of years gone by no lonere exists. Fond has improved, clothes have improved. Germany lias become a rich cominty without the lowest grades of poverty which exist elsewhere. Wages hare been Increased in kepping with the higber level. Yet I do net think that, generally speaking, the German workman llies as well as the British workman."

After giveng a table relating to savings bank deposlts the report says that while during L!Mk-5 the number of deposit books increased by $2, \%$ per cent and the total deposits by $4+$ pircent., during 1905 - 7 they incrensed by only 79.5 and 10 per cent. respectively This is conisidered to be attributable to the increasal eost of living, and also to the fact that "with in crearing wealth people are npt to become less thrifty."

France, Germany, and England: Workmen's Living Expenses compared, 1909.A British lburd of Trade report unthe conli tions of industrial life In France, publinhed in May, 180:1. sommarizes ns follows, in a prefatory note, the conclusions drawn from the mass of fircts ollected, as to the comparative cost of living to workmen in France. Gormamy, and Fugland: " is recrards rents, it appeirs thit the French worknian pays somew hat lese then the English workman for a correcimuting amomet of housing neeommotation, and thre fore much less than the German workman : but neranst this must be set the fact that his lomse inte accommolation ls, as a rule, decidedty in. ferior in qualles. The difference betweetr the rout levels of the capital and of the rest of the conntry is quite as marked lin Franer as in Fing liand of Germany.

The range of town prlce-levels is not very wile in any onc of the threc countries investigatel, and in France, as In the other two, the ditferences hetween one town and another in the cost of living (so far as it rehites to expent. liture on foml) are, as a rule, by no means groat. When the relatlve levels of fool-prices

In the three countries are compared, so far as the data permit, it appenrs thm the seneral ratio of French prices to English priees for correspontling eommoditles is the same as that of German prices.
"On the assimption which has been mopted for the purposes of these lnternational comparisons it follows that an English workman, with un average fumily, who shonk go to France and endeavour to maintuin there his accustonicd mole of living. would find his expenditure on rent, fool, and fuel substanially increased thongh not to so large an went as if he liad gome to Germany. On the other hame, he would find his wages to he lower than in the lutter country num muel below the Einglish level, in spite of longer hours.

The results of the comparison are somewhat moditied if we take as its bnsis the forrign rather than the English mote of living. A French workman living in Engiand accordlng to his Freuch standard would find " certain reduction in the cost of food, but a rise in the: cost of housing aceommotation. On the whole his expenses of liviug would be somewhat decreasett. but in a proportion by mo means so grint as that hy which the Enerlish w rtiman would find his expenses increased ou migration to France."

United Siates: 1905-6 compared with 1890. - Gains to Labor. - I3nllutin Sio. il of the [uited intates Burean of I.abor, published in July, 190\%, is devotedmandy to an "liborate repurt on Wares and llours of Labor in Mamufacturing ladust ries, 1890 to 1904 . "xhibiting " the averace wages per lour. the average hours of labor per week, and the mumber of emphtores in both 190.7 and 1909. in the learliner witer-working occuputions of 4.034 establishments in the prin. cipal minnfacturing :mad méhnaical intust ${ }^{\circ}$ of the ["nited states." Theremert du- nut cover salarial emploser in any imlustris. $W$ ith it. in a separate artiche, the rotinil prises of fome in diff
 laterl. A summary of dexluction, from the thgures detailed is sulmitted by way of prefuce to the tables und from this the foblowins is taken

In the sear linto the aro rige wase per home in the principal mantuftariner and wermineal indostries of the conntry wore 45 por cint bigler than in 1 bita, the rigular hmors of labor per week were $0 . i$ per cont bow er than in 190.5, num the mumber of "mployme in the establishments insestlgated was oner ent greater than in 19月.. The awerage fnll-time weekls earnings per employer in 1,906 were 3.9 per cent greater tham in 1sion.

- The variaton in the purchasing power of wages may be measured ly using the retail prices ot foml, the expenditures for which constitute mearly half of the expenditures for all purposes in $n$ workingman's fimilly. Accorling to that article [on pricesp the retail prices of form, weimbed according to consumption in re. presentatior workingmen's fatuilles, were 2.9 per cent higher in 1906 thin in 1905. As the ad. vance in where per hour from 1905 to 1906 was grenter than the advance in the retail prices of food, the purchasing power of an hour's wages, ns measured by fome, was greater in 1906 than In 1ive. In lime the purdinsinir power of air hour's wages as expended for fockl was 1.4 per eent greater than in 190 T , and the pareliasing

## LABOR IEMUNERATION

power of a full week's wages was 1 per ceat greater la 1006 than in 180 5 , or, expressed ln other words, aa hours wages in 1006 la the maaufacturing and mechankeal industries in the United States would purchase 1.4 per cent more food than an hour's wages in 1005 , and a full week's wages in 1906 would purchase 1 perceat more forl than a full week's wiges in 190.7.

- As compared in ench case with the average for the years fr' n 1880 to 1890, the average wuges per hou. in 1906 were 24.2 per cent higher, the number of emplojecs in the estah. llshments investigated was 42.0 pur cent greater, and the a: r. :ge hours of hhor per week were 4.6 per ent lower. The avernge earalngs per employec per full week in 1006 were 18.1 percent higher than the average enrnlngs per fill week during the ten years from 1890 to 180f.

The rescil price of the prlncipal articles of food, weighted according to family consumptloa of the varions urticles, was 1.5 . i per cent higher In 1906 than the average price for the ten years from 1800 to 1899 . Compared with the arerage for the same teu-year period, the purche power of an hour's wages in 1006 was 7.3 , f cent greater, and of a full week's wages 2.4 per ceat greater, the increase in the purchasing power of the full week's wages beiag less thu the increase in the purelusiag power of hourly wages, hecause of the reduction in the hours of labor."

In 40 of the 41 industries covered hy thls re. port the greatest incrcase of wages "was lin the manufacture of cotton goorls, where the average wages per hour in 11006 ware 11.2 per cent higher than the avernge wages per hour in 100 . In the manufacture of electricul apparatus and supplies there was an increase in wages puer hour of 10.1 per cent. In street and sewer work done by contrict the incrase ju wages per hour was

Taxation proposed in the British Budget of

8.7 per ceat; in lroa and steel, Bessemer convertiag, 8.5 per cent, and la the 1 uamifacture of clgars, 8.4 per ceat. In the tionufactire of bar lroa the increase ln wages per hour was 6.9 per cent, and in the bulldiag trades 6.1 per cent Brlctly stated, two ladustries show an lacrease In hourly wages of more than 10 per cent. Iin districs an lacrease of 5 per cent hut less than 10 per ecnt, and 81 hidustries an lacrease of low thans per cent. Iu oae Industry, paper aad womd pulp, there was a decrease of wages of 1.1 per cent. In the iadustries as a whole, weigited according to lumportaace, the Increase in wages was 4.5 per ceut.
"The per cont of chaage in hours of labor In 1906, ns compured whth 1905, was not sogreat as the per cent of change in wages per hour. In if ludustries there was a decrease of hours of 1 per ceat or more, whlle in 25 Industries there was a decrease of less than 1 per cent. In 5 ia dustrles there was an increase ia hours of labir per weck; in no listance, however, was the in crease nore than 0.3 per cent. Five ludhstries show no change in hours of labor. The hours of lahor were unt reported for slnughterlng and meat packing, for the reason set forth in frot notc on puge 58 . The teerease hin hours of halwor in the ladustries tahen as a whole was 0.5 1up cent.

Ia 1906 there was an increase in the retail price of food, weighted necording to fnmily con sumptlon of 2.9 per cent as compared with 1 , w 1.5 an incrense of 3.6 per cent as compared with 1904, an increase of 49 per cent as compard with 1903 . an increase of 4.3 per cent as com. pared with 1902 , anlal an incrense of 10 per crnt as compared with 1901. The retisil price of fout was 21.2 per rent higher in 1906 than in 1 s. 4 . the year of lowest prices, and $15.7 \mathrm{p}+\mathrm{t}$ erat higher thno the average price for the teby yars, 1N:

LAW AND ITS COURTS: England: Institution of a Court of Criminal Appesl. An impertant huovation in the adminiviration of eriminal law was introlnced in fire ot liritain bran Act of I'urtiument "to Establish a Court of Criminal Appral," approved August 28,1307 . In part, the maetment was as follows
I. - (1) There shall be as comert of ('rimalaal Aplowal, and the Lord Chicf Justice of Cughand anil cleht judges of the Klag's beach Division of the lligh colurt, appointed for the normose hy the loril Chief Justice with the consent of the Loril Chaneellor for sneh period as he thiuks dwirible in each case, shall be judges of that court.
(2) For the purpose of heceray and determining apments unler this Act, und for the purpose of any other procerellings mater this Act, the Corrt of Crimital Apmal shall be summonnol in acmoliance with dirextous glven by the Lord Chirf Jutioce of Enghand with the consent of
 constituted if it consists of ant lese than three juderesam of an uneven mumber of jutges.

If the: Lored Chiof Justice so directs, the fourt naly sit in two or more divisions. The court shall sit in lomulon cacept in cases where the Lord Cliorf Justice gives sperial direretions that it shall sit at some other place.
3. A prirson comvirted on indictment may apprab under this Aet whe court of (riminal Appeat - (it) aynaist his eonviction on any arombl of appeal which involves a qu'stion of haw atone: and (b) with the leave of the ('ourt of Criminal Appeal or upon the certitiante of the Junce who tried him that it is a tit casi for appeal agalast his conviction on any groume of appeal which involves a question of fate alone or a thustion of mivell haw and fact, or any other ground which appeara to the court to bea sullicint gromel of appoal: and (c) with the have of the ('onrt of Criminal Appeal acuinst the sentener pussell on his zunviction, unless the sentence is one fixed by law.
'4. - (1) The' Court of Criminal Appeal on any such appeal ngainst conviction shall allow the appeal if they think that the verdict of the jury should ine get aside on tbe ground that it is imfensonable or cannot be supported baving
regard to the evidence, or that the judgment of the court hefore whom the appollant was convieted should be set aside on the ground of a wrong deciaion of any question of law or that on any ground tbere was a mlscarriage of Justice, and in any other case shall dlismlss the appeal: Provided that tbe court may, notwithstandlag that they are of opinlon that the polnt ralsed in the appeal might be decided in favour of the appellant, dismlsg the appeal If they consider that no substantial miscarriage of justlce has aetually oecurrei.
(2) subject to the special provisions of this Act, the Court of Criminal Appeal shull, If they allow nn appeal agalust ennvietion, ¢uash tho convictlon and direct a judgment nud verdlet of aciuluttal to be entered.
"(3) On an appeal against sentence the Court of Criminal Appeal shall, if they thituk that a ditferent sentence should have been passed, quasin the sentence passed at the trial, and pass such other sentence warranted in law by the verdict (whether more or less severe) in substi-tutlo.- therefor as they thiuk ourht to have been passed, and In any other ease shall dismiss the appeal.
5. - (1) If it appears to the Court of Crim. laul Appeal that an appellant, though not properly convicted on some count or purt of the indictnent, has been properly ennvieted on some other conut or part of the indietment, the court may pither allirm the sentence passed on the apmulinat at the trial, or pass such sentenee in s.anstitution therefor fas they thlak proper, and as may ln warrantell in law by the verlict on the count or part of the Indictmeat on whieh the court consilder that the uppellant has been properly convicted.
(2) Where an appellant has been convleted of an offence and the jury coubl on the indert ment have found him grilty of some other of fence, and on the fimling of the jury it appers to the (iort of Criminal Appeal that the jury must have been sitistied of farts which prosed hitm gulter of that , ther offener, the eourt may, insteal of allowing or dismissing the appeal, suhntitute for the veriliet fonmol by the jury a verilist of guiky of that other offence, and pass such sentence in substitution for the sentence paswed at the tial as may be warranted in law for that other offence, not being a sentence of greater speprity.
"(3) Where on the conviction of the appellant the jure hare found a special veribict, and the Conith if Criminal Appeal consider that at wrong conclusion has bedn arrived at hy the court before which the appellant has heen convicted on the effect of itat verilict, the Court of C'riminal Ap. pral may, insteal of allowing the appeal, order such conchasion to be recorled as appears to the comrt to be in law requirel by the verdict, and pass such sentence ia substitution for the sentence passed at the trial as may be warranted in law.

- (4) If on any appeal it appears to the Court of Criminal Appeal that, although the appellant was guilty of the act or omission charged against him, he was insane at the time the act was lome or omission numbe so as not to be responsille arconling to hw for his actions. the court may. quash the sentence passed nt the trial and order the appellaut to be kept in custody as a criminal lunatic."

## LAW AND ITS COURTs

## LAW AND ITS COLRTS

France: Reform of Judicial Procedure in Crlminal Trials. - Crltielsm of French judl). elal procidure in criminal trials, under the bystein which puts the duthes of a prosecuting attorney on the judge, was much sharpened in the autnm of 1909 by the attention drawn to a sensutional murder trial nt louris - the steinhell case. The renilt was to Impel the Governmeut to undertnke measures of reform, leginning with the appointment, November 20. of an extra-Parliamentary commission to study the whole question of reforn. Withln a inonth after the appolntment of the conmlsalim one of itw leadhge members, In an article ln the Whtin, ludle:tted the maln points of the recommendn. thons which the commission was nirealy prepared to make. It would recommend that the anthority of the Iresident of the Assize Court should remain Intact, and that the Judge shouhd as heretofore continue to direct tho jury and preslide over the whole process of the lnstruction or preliminary lnoniry. In the view of the Commission the Judge's moral authority cannot but be nurmented hy the proposil to relieve him of the duty of cross-examining a prisoner at the bar. It would be recommenided that in futire a summary statement of the case hy the $1^{2}$ ubtic. I'rosecutor, or la a civil suit by the plaintiff, should be followed by a presentation of the defendant's ease on the part of eounsel for the defrace. The jury woild thas be made neguainted with the issne, sud the witnesses would then be called. Erach witness would be liable to crussexamination on sehalf both of the chefence and of the prosecntiom, and the Jutgre, reme:in ing uloof from the discussion in his new rife as arbitrator, could not but gain moral anthority in in dregree whith wonld materially promote the chls of even-handed justice.

A bill on these lines was introdned by the Minister of Justice in the following month.
International: Naval Prize Court, and proposed Judicial Arhitration Court. See (in thic vol.) War, Tnr: 1tevolet against: A. I). 1/א)9 (1) (\%.)
United States: The Question of Injunctions in Lahor Disputes. - The gutestion of the issuane of writs of injnaction hy the courts in counectlon with lahmr disputes came nuch into disenssion during the canvass preliminary to the American presidential clection of 1908, find was a promincut subjert of leduration is the platforms of the pulitical parties (see, in this vol.,
 Subsequently, I'resident Tnft. In his first anmual messare to congress, cited the prononncement of the lepuhlicm party on this question, and sad: " 1 recommend that in compliance with the promise thus made approprinte legislation lee adopted. The ends of justice will heot be met and the chief canse of complaint against ill comtidred injunctions withont notice witl be re. unowed be the enactment of $n$ statute forhidding hereafter the issuing of uny injunction or re. straining order. whether temporary or permainent. by nny Fedrral conrt, withoint prevons motice and a reasomahle opportmonty to be heard on behalf of the parties to be enjoined; unless it shatl nppear to the satlafisction of the court that the delay necessary to give such notlec and heating would result in irreparable injury to the enniphimant amb mess also the conrt shall from the evidence make a written finding, which shall
be spread upon the court minutes, that iminedf. ate and lrreparable Injury ls likely to ensine to the complainant, and shall detine the hijury, state why 11 is irreparahle, and shall also ehinrse on the order issued the date and the hour of the issunnee of the order. Morcover, every surh injunction or restralning onler lasued witholt previous notice and opportunity hy the def(anl ant to be heard should hy force of the stathe expire ind be nf no effect after seven days from the ls ranee thereof. or within any time heqa than that period which the eomrt may fix. unleis Whithin meh seven days or such less porlonl, the Injunction or arder ls extended or reuewed ufter previons notler and opportunity to he heard.'

National and State Legislation, - Need of Uniformity. - Movements to secure it. Speaking in 1906 at a dhner of the Peumsl. vanla Soctety, the Iton. Elihu lioot, then I's. Seeretnry of State, addressed, in a few worls, a very pregnant suggestion and admonition to the lawnukers of the States In the Amerlenn tion. Ile spuoke first of the strongly uationullzed sen. timent of patrotism thnt has had Its rapid growth of late in the country, snying: "our tountry as a whole, the nohle and beloved land of every clizen of every State, has hecone the object of pride and derotion smong all cor people. North and south. within the limits if the prond old colonial eommnuwealths, thronghout that vast region where Burr once Jreanmel of a separnte empire dominnting the valley of the Mississippl, and upon the far distant shores of the dacitic: and hy the side of this string and glowing loyalty to the nation, sentimont for the separate states lims become dim and faint in comparison." Thern he added. warn ingly: "There is but oue may in which the states of the Cuion cun mainian their jow or and anthority mader the conditlons which are now hefore us, mal that way is by an awaken inf on the part of the states to a realization uf their own duties to the country at large. l'n. der the conditions which now exist, no stato can live unto itself nlone and regulate its affairs with sole reference to its own treasury, its owa coavenience, its own special intorests. Evary State is lound to frame lis legislation and its mhministration with referelice not only to its own surinl affaira bnt with reference to the effect "poon all its sister States."
Quoting and allirming these remarks of the thoughtfal stitesmun, the Jidional Ciric Fider. ation Reriere. of July. 1900. savs: "The flain truth is that the movenent of people and of tnerchandise goes on in our dry without any ri. gard to State lines: and it is becoming incriasincly clear that unless the States will legrislate with substantial uniformity on a number of anbjecte the trondeney townaj centralization and a corresponding increase of Fioderal power canat permmently he rasisted."

In its precoling issne. of March, the Reriru had made the following amonncement: "The Natiomal rivic Fedmution, through its experience in holding national conferenceron such subjerts as the trusts, taxation. inumigration and election reform - confercnees to which the Gowernors of States sent offleial representativeshas become improssed whth the necessity for a systematic nationnl eftort toward securine. within reasonable limits, more uniform legislatlon In the States of the Unlon.
＂There are usciul national organizations of farmers，manufacturers，wage－earners，bankers， merchants，lawyers，economists and other organ－ faitious which hold national mectings for the decussion of alfalra peculiar to their own pur－ suits and callings．The Civic Fulcration，how ever，provides $n$ forum in its ambinal conference for representatives of ali these eicments to dis－ cuss national problems in which they inve a common interest．licretofort here has been no effort to crysiallize into sitate orgamizations this rupresentative membership for the accompilsh－ ment of conerete aims．
＂I committee has been appointed to organize Council of one hundired representative men in ea＇I State．Mr．John Ilays IInmond has ac－ （e）．，it the chairmanship of this committee，of th the following are also members：Messers． Alton B．Parker，New York；Myron T．Ilerrick Ohio；David il Francis，Missmuri：Curtis Guidi， Jr．，Massachnsetts；Nahum J．Bachelder，New Gamplite ；Elwin Warficld，Maryiand ；I Ierman Ridder．New Vork：C．F．Bronker．Connectient： Hruce Ilaldeman，Kentucky；Victor IRosewater， Vebrastia；Ciark IIowell，Georgia：P．I．Bone－ bralic，Kansas：James Iynch，Indiana；Ilarry Pratt Juison，Iliinois：A．II．IReveli，Ilinois； John 13．Lennon，Illinols：Jolin II．Hoiliday， Iutiana，and Benjamin Ide Wheeler，California．

The continuel existence for elghteen years of the Annual Conference of Commissioners on linform State Laws，created by the dificrent States at the instance of the American Bar As－ sociation，shows that the State Executives and Lerislatures are fully alive to the importance of this subject．The last－named organization has been instrunental in securing the pascage in thirty－five States of a uniform negotiable instru． ments law．and is promoting other commercial mestiners．includlag a uniform food law to cou－ form to the national law．
$\cdots$ This necessity for uniform Iegislation is fur－ ther illinstrated by the proceetiugs at the anmial mectings of the National Aswochation of the Siato Attorneys General and of the sitate Labor Commissloners，Insurance Commissioners，ctc．， etc．＂

Discussing the subject in the Jnly iasue of the Rerief．Preshlent Amasa M．Eaton of the Com－ missinners on L＇niform State Laws，sad：＂The subject of uniform Iegislation is in the air all nure the Cnited States．At the instance of the Presilent，a National Confercuce to secure the conservation of our nationai resources has been helil in Washington，and to carry into effect the conclusions of this Conference there must follow unifurm sitate legrslation．At the instance of Cow－rnor Gulld a conference of the Governors of the New England States，with other dele－ gatis，inct in Boston last fali on the subject of forestry，shell tisheries and automobiles，ail suh－ jurti e eailing for uniform legislation．A similar Mufurence of the Governors of New York and the aljoining States has met in New Vork，at the instance of Governor IIughes of New lork． to consider a uniform automobile law．A Na． tional Divoree Congress，called ly Governor Pennypacker by virtue of an act of the legis－ lature uf Pennsylvania，has framed $n$ nniform d：urie isw which has been Indorged by the Conference of Commissioners on Uniform State Lims．in March a Conference on Uniform Child Labor Lav in the Southern States was
held in New Orleans at the cali of the Governor of Louislaua，at which the Governors and Deie－ gates of thuse states were present．The result wis the formation of a permanent organization， with the Gevernor of Loulsiam as Cbalrman， and the executive commitee of that organization is to draft a Čifurm Chili Lahor Law and to submit it to the iegislatures of the several South－ ernstates．

Ali these are but expressions of the deep． seated necessity for muform legislation that bas exinted ever since we acguired our independence of Great Britain，intersiticd by the requirements of a progressive civilization knitthg us ever more and more closely into union as a nation．＂

Th．Whole movement was planned to recelve effective organtation at a Nationai Confereuce in Washington which the Nationai Civic Fed－ eration，after consultation with other bollies， announced，in the summer of 1609 ，its intention to call，for Jamnary $\overline{\mathrm{j}}-\mathrm{T}, 1910$ ．The Conference was beld aceordinery，in conjunction with a meet－ ing of the Governors of States，which gave at－ tention to the same subject
President Taft＇s Recommendations for Expediting Procedure．－The following is from I＇resident Tuft＇s first thanal Dlessage to Congresw．December．1909：＂The deplornble delays in the mhanistration of civil and crim－ Inal law have rerejerd the attention of commit． tees of the dmurican lar $A$ sisochation ond of many State Bar Associations，as well as the eont－ sidered thousht of judges and jurists．in my judgment，a change in judieinl procedure，with a riew tor ralacing its expense to private liti－ gants in civil cases and facilitating the dis－ patch of businces and final decision itt both civil and criminal cases，constitutes the greatest need in onr American institutions．I lo not donbl for one moment that mutheh of the lawless vindonce and cructy exhibited in lynehings is directly due to the uncertainties and injumibr．Irawing ont of the drelays in trials，julements．tual the （execntions therof by our conirts．of conrse， these remurk apply prite as wrll to the mhmin－ istration of justiere in state court a ac to that in Federal couris．and without making inviljous
 that speathing eremerally．the loferet－are loas in the Federal courts than in the State comerts．But they are vory ereat in the Federal fourts．The evpration with which business is di－posed of bosh on the ciril and the criminal sille of Ving． lish courts，under modern rules of procedure． tuakes the telays in our courts seem nrchaic and barlarous．
．The procedure in the Fedicral courts slould furnish an example for the state courts．I pre－ sume it is impos－ible，without an amendiment to the Constitution，to unite ander one form of ac－ tion the procrolings at common law and pro－ cecdings in chuity in the Fecleral courts，but it is certainly not impossible by a statute to sim． plify and inake short and direct the procedure both at law and in equity in those courts．It Is not impossible to cut down still more than it is cut down the jurisdiction of the Supreme Conrt so as to contine it almost wholly to statutory and constitutiunal questions．Ender the presint statutes，the equitr and ndmalralty procedure in the Federal cuurts is under the condrul of the Supreme Court but in the pressure of business to which that court is subjected，it is impossible

## LAW AND ITS ( JURTS

to hope that a radical and proper reform of the
Federal equity procedure can be brought about. I therefore recommend legistathon providing for the appointment hy the I'resident of a conimis. slon with mithority to "xanine the law and equilty procedure of the Federal conrts of tirst Instuice, the haw of appeals from those courts to the courts of uppents and to the supreme 'court, and the costs imposed in such procedure upon the private litigants and upon the puhble treasurg, and make recommendution with a view to slmplifyligg and expediliog the procedure as far as posslble, and maklug it us in"xprusive as nay be to the Iltigant of bittle means."

LIBERIA: A. D. 1004-1905.-Good ReIations between Colonists and Natives. Improved Prospects. - ". When it was de. cided in the luited states to found a hame for
repatriated Africans, the prif experiment of Slerra leone turned attention toward the same coust, and in 1821 and at sulbsequent dates settiementa were effected, firaty at Monrovis. and later on at Roberts Port, Grund Baan, sino and LIarper (Capo Palmas). lisually those who conducted the enterprise went through the form of huying small plats of land from local head. num or clitefs ; bit, as a rule, the promoters of this movement did nut tronble overmuch athut the rights , the 'bush niggers,' as the inlige. nons native were tramed. Couscquentls the first fifty ycars of the history of hhert were narked by constant struggles between the American. Liberian lnvuders and the native blacks. Diring the last ten years, howreve, there has be, a marked ailvanee fo goavd rela. tions betweeld tae Americun setters and thilr nutive subjects. as many of then may fultry lie called. The wlse polify of 1 'resldent izarilay has greatly promoted this good feellng sluce 1904. Ile has heen able to ussmble at different thes at the capital chilefs or thelr representio. thes Prom aimost all parts of Lilheria. even from the Mandlago districts just beyond the limits of the const helt. Therefore they haveno subjert of disngreencmit. Curlously ennigh one eximple of thls wild sule of black by black is that the whlte mau in Lillerin is everywhere received with great friendllness, hecnuse he is not asso. chited in the minds of the natives with unything Hke conquast or oppression.

- Ilor far the original experiment will sule. ceed the next twenty years will, perhapss ludit cate: Ther acgroes of Anerie:un orlgin who have settled in liberia have not, as a general rule. heen able to stand the cllante very much leetir than Earopeans, and, as a rule, they have ntit beelable to rear harge families of chifldreu. Yi. It secus to me as though Laberians of the new generation born in the comery are berginame to take hohl. but this is partly die to the ind remsing mad I think very sensible practice of hatermar riage with women of the fine, vigorons. indi genous races. I'robably the future of i.theria will be a negro state very like sierra Leone in its de velopment. with English as its government lamgage, mad sueh Engish or Amrrican instith tions ns may burve to be sulted to on Africal conntry, a con t belt inhabited hy negroes pros fessing (hristimity and wearing clothes of biarm penn cut, and a hinterland of Mohammethas Iressed in the pieturesique and wholly sutitable costume wornat the present day by the Mandin. gos and by mow Mohammedan negroes betwa Senegal and the White Nile." - Sir Harry dolatston, liberia ( 1 nnmal lipmort. Smithsomint ln. stitution, $19(4-5$, pp. $254-255)$.
A. D. 1907-1909. - English, French, and American attention to Conditions in the Republic. - "The policy of the Iilherian he. public has eaused anxicty for some time past both to Englaud and to France, the Powers Whose territory adjoins the liberian boundary. Some two yrars ago President Barelar canie to Earope it discuss the situatlon with the British and Frenel Governments. As a reanle of this exchange of vlews, Liberia appointed Europeans to lier Customs Department. ee. cirrm a gunboat to patrol ber cuast-line. wild arranged for a frontier force. These mensires were approved the IBritish and Frencl Gowcroments and also by the American Govern-
ment, and their execution was faciaitated by a iomn negotiated on hehall of Liherla liy the Liberian Deveiopment Company. The growth of British interenta in the ilepubile ied the Forelgn Once to appolnt a C'onsui. General st Monrovle, the capltal, In the person of Captain Bralthwatte Wallis, formerly acting diatriet commissloner in Alerra Leone. So lar as the first part of the reform programme was con. ceraed the consequences have been eminenti; eatlafsctory. Laberla has becil able to pay ofl some of her debts, and her revenue has in. creased." - Cor. London Times, April $22,190 \pm$.

While these movements were in progress, in Juae, 1008, three commasioncis from Llberla came to Wauhlogton asking for all in main. taining and aiminlstering lis goverament. Probabiy in course of this application the Anierican Ambassador in Lundoln, Mr. Reid. alliressed a note to the Iritlsh Secretary of State for Foreign Affalrs, on the 29th of Junc, in witich he wrote: "We should he glad to have your rlews as to how the two Governments could best coopernte at the present time to warils promotlog the weifarc of Liberis." In his reply to this Sir Edwarl Grey saill:
" As I hand the honour to explnin in Masch last to the Cinlted situtes Churge diAffaires. hls Majesty's Governmunt have in nny measure they may be called upon to take in liberla no designs wiaterer upou the independence or integrity of the country, and they do not intend to under. take any responsihility with regard to tt. The services of liritish othelals have been lent to the Liberians soicly wha view to the betier pre. servation of order, more particuiariv in that part of Liherin which marches with sierru Leone, and improfal administration.

The Frencin Government also, as your Ex cellancy is donbtiess nowre, tuk's a speciul interest in the atiairs of tife ibpubite, and his Majesty's (iovernment have nircudy assured them that they would have no ohjection to the ser. viers of some French offlciais being leot for the same objects as the British othicials. It is doubt. fui, therefore, whether there is at the present time any scope for the eo operation of the linited States Government in the c'ustoms or police, und if they dealre to renter actlve assistance to the liberian Government they will periapu prefer 10 direct their attention to ohber urinches of the aiministratlon which nre as urgently in need of reform.

That reforms are required in one other branch at least his Majesty's Goverument have reason to know, for nmong the chlef ditheulties which his Mijesty's Goverument experience in regard to Llberia are the frequent complaints receical from Britisil subjects as to the treat ment they receive in the liherian Conrts. If therefore the United States could sce their way to intrembeing reforms into the judiciary, either by lumting the services of an ofticial to not as fuliciai ndrisor or in some other munner, much ginal would in the opinion of his Majesty's Gors. ermment be derived not oniy by the various subjects of foreign nationalities resident in the conatry but also by the liberians t iemselves.
"While calling attention more specially to this onf hranch of the administration, which has been a frequent sonirce of trouble, I need harily mid that his Majeaty's Government would wel. come the co operation of the Government of the

Unlted States with them in Liberia in any other manner whteh may appear more sultable or more dealrahle on a consideration of ali the circumtancen.

Thls and other information obtained by the State Department ied President Rooseveit, on the 'dth o: January, 1009, to ask Congress for an appropriatlon of $\$ 20,000$ to $\mathrm{p}^{\prime}{ }^{\prime}$, the expenses of a commission to go to i.lberia "to examine Into the situation, confer whth the officers of the Llberian government, and with the representatlves of other governments actuaily present in Monrovia, and report recommendutlons as to the srectite action on the part of the Cnited States most apt to render edective rellef to the IRepublic of Liberia under the present critleal circumstances." The conclusion reached ly the State Department was that it "is quite clear that Liberia is very much in need of as. sistance, thint the Cinlted States can help her substantiaily, and that it is onr dity to help her."

The seriousness of the situntion was set forth by secretary Ifunt lin a rocmorandum to the I'resident. Betwcen forty and fifty thousand civilized negrofes, for the most purt descendnits of the orgginal colonists from the Cnited States, oecupy a terrltory comprising 43,000 squure miles, in which there are ulso over n milion und a haif members of uneivhized native tribes. The civilized part of the population have berin to n great degrec cut off from any intimate relation with the rest of the civllizel world for two-thleds of a eentury. They isegan with little educution, with no acquired skill in the art of government, and they inve had littie op. portunity to hmprove througis interrourse with other and more alrancel commmities. They flat it especinify dilltcult to eontrol the tative tribes, or to conduct their own government in accordance whtin molern requiremints.

The Britisi colony of Sierra leone to the north and the French posiessions ciosing in thelr hinterland to the enst ure almost contian. onsiy companoing of the failure of liberia to maintnin order bipon the burder. "Notwithstauling the very kindyy disposition on the part of Great Britain, anil the similar disposition on the part of France, there is inminent dinner that the republic, uniess it receives out side assistance, will not be able to muintain itwif very fong." said secretnry Ront.

The C'ommiskinn to visit Litberin was uppolinted in the following April, and whs con. wyel soon afterwarl to Monrovia by a squad. ron of tirce cruiser scouts. It ans composed of three members, Mr. Wi. Jorgan Simster, whon had becn for a number of years in the [hiifppine servlce of the United States, I)r. George Sulc, und Mr. Fanmett J. Scott, privnte Secretary of I)r. IBooker Wushlogton. These (ommissioners were accompanied by Captaln Sifiney A. Cloman, as Milltary Attache, and by Major Percy W. Ashburn, of the U. S. A. Dedical Department, who wouid study it:e sinitary conditions In Tibcria.

Eariy in Octoher the Conmmission rethanel, but its report to the State Department was not transmitted to Congress until the 25th of March. 1910. It recommended an cxtension of promit und effective alid so the Libertan Gofernment, in the refunding of its debt, the reform of its finanees, tio nottlement of its boundary disputes.

A．D．1903．－Agreement for Settlement of Claims arainot Venezuela．Bee（in this vol．） VENEZUELA：A．D．1902－1904．
A. D. 1904-3905. - Arbitration Treaty with the United States. - Reélection of President Diaz for a Seventh Term. - Extension of the Term. - Currency Reform. End of the Free Zone. - "Mexico was one of the countries with which the United States government negotiated an arbitration treaty cariy in the ycar [1905], a treaty which was dropped. iike its fellows, by the Washington administration, because of the Senate amendments.
Though the tentalive arbitration treaty between the Uuited States and Mczico.
fell through, another very practical and usefui arbitration convention was concluded between the two nations during the ycar. This was the culven. tion agreed to in principle during the PanAmerican Conference in the city of Mexico in the winter of 1901-02, which provides for the settlement by arbitration of all internationai questions growing out of pecunlary claims. The representatives of severai of the nations taking part in that conference affixed their sig. natures to this preliminary compact, and It has slace become operative among a number of them. It was ratiffed by the Mexican Scnate during its spring sessions. As peenniary claims have in point of fact been onc of the most frultful sources of difficulty between the Unted Statcs and the other nations of the westcrn hemisphere, the conclusion of an agreement. In a binding form, to dispose by arbitra:' 0 . of any such cases as may arise in the future, is a distinct gain for the cause of the rationai adjustment of international controversies, and is a guarantec, not indeed absoiute, bit most substantial, of lasting peace among the nations of this contincnt.
"There were no striking dereiopments in the political situation in Mexico. On December 1 of the previons ycar (1904) President i)iaz had entered on his sixth conseentive term and his seventh term in all. Br a constitutional amendment, a regular vice-president of the republic, for the first thme since the carly dars of Mesico's history, took the oath of office at the same time as the presidcnt. on Dceember 1, 1904. The gentleman previonsly clected. and now occupying the position of "lec.president, is the llonorable Ramon Corrai, formerly gov. ernor of the state of Sonori. By virtue of another constitutional amendment. the present and future presidential terms will be six years, Instead of four as formerly.
"A measure of vital importance to the economie well-being of the nation was pronnlgated on March 25, 1905 . This was the decrec for the reform of the currency, issucd by the Fxpcutise under an enabling Aet of Congress, approved on December 9, 1904. The new monctary system, due to the initiative of the very able finanec minater S.ñor José Yves Limantour, went into effect on the first of May, but the free coinage of silrcr ceased on April 16. Broadly speaking, the new system gives Mex. ico a fifty cent ciollar. It declares that the the onctieal imit of the monctary system of the [Dited Mexiesn States is represented by serentyfive centigrams of pure gold, and is denominated a peso.
"On July 1 that time-honored institution known as the Free Zoue ceased to exist." F. R. Guernsey, The Year in Merico (Atlantic Monthly, Feb., 1906).
A. D. 1906.-Celebration of the Centenary of Benito Juarez. - His reiation to the Secr. larizing Movement a generation ayo. - Present Pacific Relations between Church and State. - "Though Juarez is generally cred. ited with the paternity of the laws genericully known as the Reform Laws, and although be undombtedly was the iife and soul of the sec. ularizing movement of his day, It is worthy of noce that he had no formal participation in the chief measurea framed against the Church.
Ile was not a signatory of the Constitution of 1857, which first attacked the existence of the religious orders; the law for the confscation of church property was framed by Mignel Lerdo de Tejada, the Finance Minister of PresidentComonfort (1856); and the constitutional amendments which definitely estabiished the separation of Clurch and state, institnted civil marriage, placed monantic communitics outside the palc of the law, and forbade open-nir reli. glons services, were not enacted until 18.3 and 1874, after the death of Juarez, and during the presidency of Sebastian Lerdo de Tejada.
"March 21, 1806, was, by a decree of Con. gress, observed as a general holiday in Mexico. Pilgrimages to the tomb of Juarez took place in the morning; commemorative tabiets were unvelied in the afternoon, and at night General Diaz, surroundei by his cabinct, presided in the Arbeu Theatre at an a pothcosis of Juarez, durIng which the career and character of the reforming president were extolled in an eloquent oration by IIon. Justo Sierm, Minister of fiblic Instruction. On the stage with the Presidert during these exercises were the son and other surviring descendants of Juarez, who are numerous.
"Curionsiy enongh. a question invoiving the interpretation of the ikeform Laws arose simen after the celebration of the Juarez centeliars. The ministers of alt denomiuations in Mexico had been aceustonied to condnet a serviee at the graveside in conneetion with the burial o! the dcad. It was gencrally leid that this practice did not conflict with Article 5 of the Law in Deceniber 14. 1874, forbidding all forms of religions service other than those held insille the churches. But in May, 1906, the Interior 1hepart meut issucd a circular deelaring open air burisl serviees conducted in the cencteries to ber ilickal. This rule lias led to the erection of nortuars chapels in the cenceteries which previoully were unprovided with them. and the burial sirvices are held insile these chapels.
"While this episude shows that there is mio. tention on the part of the governmental anthor Ities of Mexico to reiax one fota of the laws which curtalled the power of the Church, it is worthy of note that there is no serions riligious conflict in Mexico at the present time; and, under laws which are probably as restrictive as those recently enaeted in Frunec, which hare so agitated that comerrs, Chureh and State in the Mexiean Republic nore smoothly in their seps rate orbits, with conciliatory if uot cordial sen timents toward each other." - F. R. Gucrust The Year in Mexico (Atlantic Monthly, Marit. 1907).

A. D. 2go6. - Nationalizing the Railway System. Pee Railways: Mexico.
A. D. 1909. - Extended Governmental Control of Raifvays. See Railways: Mexico. Control of Rainays. Lee Kailways: Year of the Sixth Consecutive Term of Porfirio Diaz in the Presidency. - His Iong practical Autocracy, and ite effects on the Nation. - A Mexican Vnd it ens. Slace Napoieon remodeled a French repuhilc lnto an emplre there has been nothlng of lis kind in polltical workmanship to equal the masterplece of practlcai autocracy which Poririo Dlaz has erected in Mexlco, on a basis of nomlasal democracy, wlthin the last 30 years. He has not throned or crowned hlmself, as Napoieon dld, which saves lifs work from the vulgarity that the Corslcan could not reslat; hut he las exercised more thin the sovereignty that imperial seats and trappings could lnvest him with.

On the 1st of December, 1909, Dlaz entered the iast year of his sixth consecutlve term In the presldency - his seventh term In all-tire previous to m of four years having now been lengthened to six. Since 1884 be has held the reius of Government hy what seems to have hecome sheer mastery, whatever of free popular election there may fiave been at the outset of his ofticial career. If Internai and external peace, generai good order, rapld progress on all lines of material adrancement, great guins In publlc education and a general uplift of the country in its standing before the worid were sufficlent frults of his government to test its quality hy, then Mexico might well be satisfied with lt and with hlm; for the beneficence of his autocracy on thls slde of its working appears to he beyond dispute. But Mexico appears to have begun to feel the cost in puhiic claracter and splrit which paternalized government must always exact for the superficial benefits it hestows, and the country is said to he fllled with more than discontent.

A notable Mlexican writer, Rafael de Zayes Finlquez, who is described as a lifelong friend and supporter of Diaz, has heen hold enough to give voice to the existing feciing in a recent book. The long adminlstration of the niasterful presilent is recounted and stullied with honest frientliness, for the open purpose of aditressing plain truths to the man whose life and work are plain truths to the inan whose inel the judiciary
discussed. "You hare disirmel the and the Eegislature," be is told, "mintil they are impotent, and lis reality nothing more than branches of the executive." "Initating the high exampie, almost everyone In Mexico who has any power ahusea It. and the cowed pubiic submits." "Fveryone is permitted to ilespla, the public amd to treat li tyranulcally." And the honest friend who thus commands the at. tention of Itlaz to the evil workings of his dic. fatorwhlp, appeals for the ending of It - for the restoraifon of a nulifified constitution, for free dections. for ladependent legislatires and courts; for the averting of otherwlse inevitable s?orms of revolition, and for the saving of himswif from a verdlet of history, that "lbe created an nation, but drstroycd a pruple."

On the other hand there are forelgn ohservers In Mexico who belleve thst Dinz hoils the peace and prosperity of the country ln his hand. A

Press correspondent wrote not iong since: " He, Dlaz, alone saved us from a disastrous panic last fall, the effects of whlch wouid have reached heyond our houndaries. The Government compelled the Banco Naclonai to advance ready money to every lnstitution that was in need and Intrlaslcaliy sound. The bank was likewise compeiled to sell exchange at a ioss, so that the fallure to keep silver at a parity was less apparent. The Goverament stood this loss. About January first one of the largest mercantile houses in Mexico, with many hranches, was in serious difticulty. Its chief went straight to President Dia\%, and aaid that he must have a milllon dollars or fail. Recognizing that the fallure of this honse would precipitate a panlc, the Goverament let him have the money.
In my oplnion. the most scrions menuce to the prosperity of Mexico is the fear that President Dlaz is not as strong plysically as is popuiarly believed.

The ieast of the evils which might come froni his death, should it occur soon, would be Increase in husiness stagnation and in popuiar morest. Muay politicians seem ready to avail themselves of the present widespreud disllke of foreigners. The ferment of antl-forcign leaven is working among the masses."

Whatever may be the kind and quality of the domination he has exercised for twenty-five years, Mexico must incritably be pit to a crucial test when he drops the irilir of state.

MISSIONS, Christian: At Large : Notahie Movements of 1910. - "The year 1010 will he notahie in the annais of foreign missions. The Layuen's Missionary Movement, now hoiding mectings in this city, plans an educatlve cam. paign covering over seventy centres and cul. minating next May in a mational congress in Chicago. The itudent Voluntecr Movencut. which enrois in its mission study classes over 25,000 colicgians, and which hns sent over 4,000 workers to the foreign fleld, has just closed a conference at llochester, where were assembied nearly 3.000 college men and women. In this month also is the gathering of medical missionaries at Battle Creek, Mich. Next June the inportant World Missionary Confercuce take-8 place iu Edinhurgh. In October the country's sidest fureign missionary organizatiou, the American Board, celchrates Its centernial lin connection with the National Congregntlonal Council at Bostou." - N. F. Erening Post, Jun. 10, 1910.

China: A. D. 1906-1907. - "In vlew of the recent remarkable awakening in China. and the strong desire on the part of the Chinese for a knowledge of Western civilisation and science, an influentiai Cominittce, 'The China Missions Emergency Committee, was appointed last year, inciuding in its membershlp an cqual num. ber of prominent representatives of the Angilcan Church as well as of the Free Churches of Gruat Britain, to consider iu what ways it might assist the missionary socicties and their representatives in China in adjusting aidd extending their existlug operations, so that the momentous dcmands now made upon them by the surprising changes of thoughit and policy thint have so suddeniy emerged, may he adequately met.

It nppointel as its representatives the Rev. Lonl William and Iady Florevee Gascoyne Coccil of Ilatield; Sir Aiexander R Simpson, of Edinhurith : Professor Alezander Macalister, of Cambridge; and Mr. Francis Wililam Fox, of London, to attend the Missionary Conference held at Shanghai from April 26th to May 7th last, and also to pny a siries of visits to mlaalonarics and mission stations, for the purpose of learning from the most experienced mission-
aries what measures should be adopted to meet the new demands that had arisen."
" We found every where throughout the Chl nese Emplre that greater religious llherty is en joyed than is the case in many other parts of the world, and that, so long as the laws of the country are observed, there is, theoretlcaily, no interfereace with the conscientious opinions of individuals. With, however, the exceptions thst Chinese offlicials are required occasionally to per form certain ceremonies of an idolatrous charactcr.
" In the year 1906. as hefore atated, there were approxlmately 8,750 Foreign Protestant Missionarles residing in China. of these, $1,0,50$ were British, 1,457 American, and some 343 Coutinental and Independent Workers. The number of Bible Women: - In 1876, 90 ; in 1880, 180; in 1906, 894. Numher of Boys' and Giris' Day Schools:- In 1878, 289 ; Iu 1006, 385. Number of Scholars in Day Schools:-In 1876, 4,809; in 1889. 16,836; in 1906, 42.546. Number of Intar. mediate, Higb Schools and Colleges:-In 1900, 880. Number of Students in Colleges, etc. (male and femaie):-In 1906, 15,13\%. Total number of Scholars and Students :- In 1006, 57,683.
" By the commencement of 1808 it is estimated that the total numher of Foreign Protenant Missionaries in China will he at least 4,040 . The number of Mission Stations (inciuding the sub or smalicr ones) is abc ut 5,750. The ordaiued Chiuese Pastors and other Chinese Preachers sre now about 6,000 . The number of recognized Protestant Church (full) Memhers and Cafechumens is estimated as 250,000 , which, with the addition of children and others not regardell ss in fuli connection, represents a total of nhout $1,000,000$ persons who are more or iess closely connected with the Protestant C Cristian Churches of China." - F.W. Fox, A. Maculister, and A 12. Simpson, Christian Missions in China : 'untem. porary lieriev, Feb., 1908)

Japan. - "Viscount Aoki, a former Miuliter for Foreign A finirs, is a Christian, and oo is $V$ is. connt Olahé, Ninister of Justice in the present Cahinet. There are 10 Christian members of the Imperial Dict, all men of high character and enjoying the respect of the ir fellow countrymen, for there is no ronstituency in Japan which would elcct a christian qua Christian. It is perhaps among the commercial ciass that Christlanity is gaining most gronnd, and at Osaks. the great Industrial city of Japan, there sre churches with Japanese ninisters, supportel eatirely hy Japanesc congregations, who have st heart to remove the popular reproach that Chris tianity is a foreign creed which camnot lise without foreign subsidies. Misslonary nctiviry Las always had a frec field In Japan, anlits phi. lanthropic aspects have never received willer recognition than of recent years. The Emperor hisnseif has frequently marked by handome contrihutions his personal interest in orphanages and hospitais conducted under misslonary auspices. But if Christianity shouid ever bie come the national faith of Japan it will prih ably he in some new national form impressect upon it hy Japanese teachers rather than in an! sectarian form horrowed from the West. What

## MIS8IONS

## MONROE DOCTRINE

is meanwhile unqueationabiy increasing very steadily is the influence of Christian ethics.... To quote a missionary: 'If there are less than 200,000 professing Christians in Japan, there are more than a mililion educated Japanese who think in terms of Christian ethles, and who try to iive up to them more truiy than many milllons of professing Christians in the Weat.' " Cur. of The Times, London.
In Aprii, 1907, a great international mission conference was assembied at Tokyo, Japan, of which The Outlook gave the following account the next month: "Over six hundred delegates, representing organizations in twenty five countries. assembied last month in Tolyo. They constitutel the seventh Conference of the Worid's Student Chriatian Federation. The body represented is a federation of various national associ ations of Christisn students. Some of them are Young Men's Christlan Associatlons, organized in the colieges; some of them are student organizstions, not atbliated with the Young Men's Christian Association. The deiegates re ceived many messages of grecting from offlciais of high station; among these were messages from Viscount Hayashi, the Japanese Minister of Foreigu Affairs; Marquis Ito, who sent a ietter from Kores arcompanled with a gift of fire thousand doliars; Count Okuma, Eider Statesman : the President of the United States, the King of England, and the King of Norway.

The meetinga were thronged by ten thousand students, malniy Japanese and Chinese. The Conference was of course distlnctively Ciristian in character; it had a definite pur pose of prociaiming a Chrisi 1 message: it ailrocaterl ethical and intellectual progress by means of the Christian religion; it assembled in a non-Christian land: yet its existence, so far from arousing rescntment or opposition, evoked rather the warmest expression of appreciation and even gratitude. That it stimnlated emuiation is not surprising. A Buddhist Conference. for example, was summoned in the same city at the same time : but at that Conference resolutions expressing its 'profound respect'to the gathering of Ciristians were passed, and a deputation to convey these resolutions was chosen. Similarly, a Conference of Silinto priests sent a letter to the Christian Conference expressing their sense of the honor which the Federathon had shomn to Japan by convening in Tokyo, and. in lien of a reception which couid not be arranged for lack of time. presented materiai 'niementoes and tokens of esteen,' in cader, to use their own words, 'to express our deep appreciation of your coming, and to comnemorite this bright erent in Japan's history. The press of Japan was emphatic lu its expres. sion of good will."

MOROCCO (Maghreh el-Aksa): The Name, - Maroc or Moroceo, the name given by Europeans to the emplre of tite Moorish Suitan as a whole, is not so applied by thic natives of the country. According to them, the Maroc or eountry of Marrakiech, the Marruecos of the Spaniards, is oniy one of three States suhmissive to the authority of the Sultan. Shereef. At the nortis the kingdom of $\mathrm{Fr} z$, at the sonthwest the oasis of Tufict. make up his real emplre. Beyond these, vact territories necupied hy numerons independint trihes, streteh over thic space that is marked on our maps whth the name "rocen. Its inilabitants have no common name for li as a whole. Their country, indicated ln a generai manner, with no precise delimitation, is the Maghreh el-Aksa. - that is to say. "The Extrente West." - Elisie Ruchus, Nourelle Giographie I'nirerselle. wl. 11, p. 653.
A. D. 1896-1906. - The Creeping of the French Algerian Boundary into Moroccan Territory. - A Justification of the Encroachment. - $\because$ Somethlng has happened ciuring the two weeks preceding the Conference at Ai. geelras [see Frrmpe- 1 I 1004 120R]. Fhich may or may not be brought to the attention of the internatlonai dipiomats. Francc from the atart has refused to submit iier dolngs aiong the

Algerian frontier to the discussion of the con. ference. That concerns herseif and Morocco aione. What has been happening wouid $\ln$ any case put the conference in face of an accom. pilshed fact. Some time ago M. Jonnart, Gor. ernor-General of Alglers, was informed that eminnaries from Fez were notifying the frontier tribes, whose bubmisaion to France diates oniy from the last few years, that Germany would heip the Suitan very shortiy to force the French to evacuate their trihai territoming. M. Jonnart at once set out on a long aud ceremonious visit to the tribes along the extreme southern frontier. He was acrompanied ly Gen. Lyautey, the 'paciffating' generai, who has heen M. Jaurès hugiear in this Moroccan affair. The Governor Generai returned to Aiglers Fridny last, just in time to have hls newrs ready for the conference. He has reason to be satlsfied. Except for a vaguc lica that the Moroccan territory aiong the Aigerian frontier is a 'Died.es siha' - a country where the Suitan lias difflculty in coilccting his taxes - the foreign press has not kept pace with what has been golng on for the last ten ycars. In one wori. diuring that tlme France lias brougit under her dom. ination a stretch ne territory of some thousands of square mlies. It is true that this territory is sparsely settied hy wiifuliy Independent tribes, who so far aiternatcily aided in the Algerian harvests and raided the French of 'posts. This sltuation quite justifies the actic. $n$ of the Frerich trons, which has consistef in tirrowing forward the unbroken iine of outposts that enclose and kcep $\ln$ order tive Frencl dominion, and not In any mullitary conquest of rolatile trihes. M. Jaures aiways feli foui of the latter poilice. which he aserlled to the military: hut it wonld be as useless as it is absurd. What Gen. I.yautey has heen dioing ail thesc sears. withoit Germany or any other friend of the Sultan giving sign of life, is uot only reasonable: it is better-it has proved effective. And M. Jonnart's tour has seeured the formai submis slon of these tribes wiose territory geograplares itave ail aiong made a part of Tafialt - the sontitensternmost of the four ancient kingdoms wiich, together, make up the empire of Morosco. The houndiry hitween Morocco and French territory In Algiers hias never heen s.tthed slnce the orlginal treaty of 1845. That drew a line from the coast sontivard about a hundred miles to Teniet es Sissi, four degrees of longitude west from Paris, and then stoppel. Whatever was to the south - thena No Nums Land, so far as Frauce was concerned -was to be dilvidied antieahly along as naturai a fiue as possihie, ieaving thie east to France as a sphere of luffucnce (tire word had not yet been lavented). During these sixty years the frontier iine has remaincd about tie same on the maps. 13ut Franec has steadiiy prolonged her settled donination southwird, gainlng over a Molsammelan population ly serving their material interests without offence to tilcir reilgion. The raliway now reaches Benl Ounif, only a short distance from Fighig, whose Amei is annug those notified that Morncro with Gcrman lieln wiii soon wend the Frencli over the desert and far stray. At Beni Ounif, besictes the Grand Hotei for tourists, there are extensive conuting honses for the tradc of all the Hinteriand, with an appropriate hanking system, and everything
to draw the Moroccan tribel. There is no doubt thst thls territory hes always been nominally a pert of Morocco. $\qquad$ And Jow MI. Jonnart has Fis'ted officlally the great Zaouia, or rellglous ivatre of Kenadsa, etill farther to the west." Paris Special Corn:pondence N. Y. Eve. Post, Ficb. 8, 1906
A. D. 1903. - State of Affairs in the Moorith Sultanate. - Abd el Aziz, the young Sultan. - His expensive tastes. - His enjoyment of the Piaythings of Civilization and Science. - "Regarded as a Moorish ruler and Seader, the late Sultan, Mulai IIassan, was a strong man, almost, perhaps, a great man. The loss of Morocco is that apparently she cannot produce his llke in the present generation. She was richer a few years ago; and that ls part of her decadence. Mulal Hassan had a companlon of his right hand: Ba Hamed, the Grand Wazeer. In them Morocco could boast the possession of two strong men; crude, narrow of vlslon, even brutal and merclless, if judged by European standards, fet genulnely strong men. The greater of them dled, and hls subordinate suc. cessfully hid the fact (though the Court was journeylng at the tlme) from all Moroceo, masquerading as one ln close attendance upon a Sultan whose corpse, as a fact, was tled In lts litter, untll city walls were reached, preparatlons male, and the succession of the youth Abd cl Azlz assured. Be it reinembered that Ba llamel, the surviror, was a strong man ln his own right. Young Abd el Azlz [who succeeded his father $\ln 1894$ ] was docile perforce, and $13 a$ liamed ruled, without plty, with greed, and quite unhampered by what Europe calls houour or justice.
"Ruther more than two years ago [1001]. when already the country was perturbed by news of the French advance upon and occilpation of lgll, the Moorish town which was regravted as the depot and junctlon ria whleh the curavan trafile of the desert filtered through Horoceo to the coast ; at this eritleal juneture, In the thlek of conflictlag intrigues, poisonings, and oflcial treachory, Ba llamed, the greatly fared. greatly hated, and rigidly obeyed Wa zeur. died at Marraklsh, leaving many scheming lelrs presumptive to his office, but no single successor to the mantle of his authority, the in herent inasterfulness of his personality.
"Sitll youthfui Abd el Azlz IV. stretched forth both hauds and personally took up the falken rehs of goverament with in great Hourish of trumpets and display of cnergy. . . . Opiimistic Europeans. nuturally pratitied by the acthe good sense with whlch thel el Azliz eheeked his Fllall tribesmen's turbulent resentment of contact with the Freneh iu [gll and lis onsis. frecty predicted a new lease of life for the Noorish Empire. They eredited the new broom with powers which, ln vier of its origin and environment. lad been little short of miraculous. And they omitted reflection regarding the hand which moved the new hroom. This was a power behind the Parasol. a latent lntellegence, not wholly Moorish, capriclons, feminlue, suble, unstable, and somewhat vitiatel from long represslon in an unwholesome atmosphere. The late Mulai llassau's Clrousslan wife, roung Abd el Aziz's mother, Lalla R'kia, hau! also found a dangerous cmancipation in the dea.in of Ba, Hamed.
"Casually observant Nazarenes sav rich, cruel officials swept from thelr hlgh estate by Wholesale, and predlcted the blrth of problty at Court. Notorious galners by oppresslon were loaded with chalns in Kasbah dungeons; the young Buitan's brother, the One-Eycd, whom cautlous Ba Hamed had kept secure ln Tetuan prison. was establlshed on parole st Mequinez; and 'Here 's positive purity of admlnlstration!' cried the surface-reading hopeful In Chrlstlan. ridden Tangler.
"Of a sudden, all movement ceased. The young Sultan was lost slght of - behlnd the curtain. . . . It is not glren to us to know anythlng of pale Lalla K'kia's attltude during this breathlng space. . . (Lalla R'kla died last year.)
"Speaklng metaphorically, hls Shareefian Majesty Abd el Azlz. reappeared on the arm of a commerclal agent, a Freuch Isracllte, wlth a genlus for the 'placing' of Imported commoditles. Allah's Chosen had been Inltlated Into the select manlas of Europe, and become addlcted to golfing, the use of the camera, the blcycie, and other less pretty pastlmes from the West.

Commerclai ageuts continued to press upon the young Sultan the latest and most expensive of electrical and other toss, and those firr seeing gentlemen, the newspaper correspondents, bade Enrope take note of the remarkable enlightenment and progressive wistom of the rulter of Moroceo, as evidenced liy his iuterest in motor cars and Broadwood planos. And the friends of these optimistic gentry eriticised the present writer as a croaker und a birl of ill-omen when he published ln The Fortnightly Rerieve for July, 1001, the following extract from a letter sent him by a Moorish friend:
"To sum ali up, iny friend, I grieve because I find the atfairs of my nalive land in parlous order, demanding as never before in the history of Morocco the guidanee of a strong. rlear mind, a veritable Sultan. That my country's affairs most urgently need. They have a governling power composed of half a dozen corrupt creatures. of a corrupt, short-sighted, crucl, and desperatcly greedy Wazeer, whose rightful Lord is occupied exclusively in - Bali! We have spoken of those whose graves wlll he defled, and of the trumpery gands from Paris bazaars. and this, while the turbulent Sus is aflane, the far gouth enst a mine charged hy French aggresslon, walting only the match of knowledge of our Lord's indifference; the country between Taflalt and Fis is openly glven over to brlgandage and amarchy, and even Al Kisar, Araila, and the Gharl, Tangiers outskirts, ure full of unrest and disorder, crimes and ludiffercnce to crinics.' "-A. J. Dawson, Morocon, the Monrs, and the Pouers (Fortnightly Reriew, Feb., 1903).
"I have not secen the Sultan face to face, lant I hare eonversed whth nearly all the leading Europenus who have been with hini either int Marrakesh or Fez, and from what they have told ine I have bern forced to conclude that Ilulal Abd-el-Aziz is a charming, kindly, hcadstrong man, suffering budly from youth, who dellghits in refnrma for the sake of their novelty and lacks the braln power that distingulshed hls father, Mulal el Hassan, and his grandfather, Mulai Mohnmmed. While he
stayed in his southern caplial he was compara. tlively free from the attacks of commercial attaches und other rogues, whose designs upon hls treasury should have been obvlous, though he wris puilty of many extravagances, includling displays of treworks that made hls envoy to Eughand speuk slightingiy of the speciat display urranged in his honour at the Crystal Pishec. In Fez the mgents surrounded him like sumner tlies. IIe has tweive notor cars and no roads to rille them uver; he paid betweell three aad four thonsand pouuds for a racht, sizty feet long, that was to be used on the sebu river, wheh ls no more than thlity fcet wide; ln spite of the Koran's prohibition, the las purehascid $u$ crown at a price 1 am afraid to name. IIe has put some of his soidiers lnto Europenn unlforms and boots, only to thad that ticy run nway from I3u llanam as readly as they did when dressed In uutive garments. He hus developed an enthusiasm for photography - I have seen sume of his work - and in addl. tion to cameras with cases of pure gold, he has one upartnuent of his palace loaded from thoor to ceiling witin dark plates, and he was persuaded to order $1 \cdot \cdot \mathrm{n}$ thousaud francs' worth of printlng paper. Ile has a menagerie in the grounds of the palace at Ferz, and on a diay when lt was reported that the liou scut from England had quarrelled with and killed tite lion sent from Berlin, one of the Europeas visitors to the court suggested to him that a contest between the victorions lion and the Bengal tlger would affori grood sport. 'No, said Abi-el-Azlz, "the hion cost me three thousnad pounds!" All Eurupe knows thut the Kultan is poor." -S . L. Brususin. Britain, Fronce, and the Moorish Eimpire (Contemperary Rerieve, Nor., 1908).
A. D. 1903-1904. - Appearance of the Mahdi, Bu Hamara, as a leader of Insurrection. - In 1903 there appeared in Nororco one of tise prophetic pretenders called Mahdis, of whom so minny have arisen lin the Moslem world, to :ake ulvaitage of occasions of religious excitement, and to lead a rising of wild tribes. This Merrish Mahdi, known as l3u IIamarn. was belped to $n$ leadership of insurrection by an incident which gratly stirred the religious temper of tribes wherever known. An English misisionary wis killed at Fez, and the murderer, Hying to a sunctuary of special sanctity, was puratien thereto by the Sultan's guards, and slath within the sicered lounds. Against this sacrilege, comnitterl to sutlufy hated Christians, Bu IImara roused the country, preaching exter. mination of all c'hristians within lt. The insecure throne of Abl el Aziz was made more insecure, English intlueuce In Moroceo was shaken, the French frontiers cast ind south were endan. gered, and l3o llamara's revolt appears to have himl much to do with the producing of all that followed, - in the Anglo- French Agreement of 19.4. the Algeciras Confercnce, the dethronchunt of Abd et Axiz, etc.
A. D. 1904. - Declarations of England and France concerning Morocco in the Agreements of the Entente of 1904. - Explanatory Despatch. See (la this vol.) Europe: A. D. 1904 (Al'k11).
A. D. 10n4-1009. - Enploits of EI Raisuli. - The Kidnapping and Ransoming of Messrs. Perdicaris and Varley. - The Capture and Ransom of Kaid Sir Harry MacLean. - Pre-
sent Respectablity of Raisull as a Moroccan Governor. - One of the chiefs ln that mountainous atrip of northern Morocco, neariy paral. leI to the Mediterranean, which is called .. The Klif," has played a startllngly troublesome part In recent Moroccan history, His name is Mulal Ahmed ben Mohammed, but he is commonly designated in all nowe-mentions of hls doings by the title he bears. - Ei Ralsuil, chieftain of a clan. The tirst expioit which made this title famlilar to all the world wan In May, 1804, when he kidnapped, from their residence near Tangirr, a naturalized American and an Englishman. Mr. Ion Herdlcaris and hls stepson, Mr. Varley, carrying them into the mountains and holdlng them cuptive uutii he had extorted a ransom of sil). 000 , despite the utmost efforts of France, Great Britaln, and the Cinited States, with the aid of the Sultan, to obtaln their release on leas humil. lutling terms. This success failed, however. to satisfy the sudacious brigand, and in July, lanr, he lajd hands on another lmportant hostage, this tlme a British ofticer, Sir lIarry Maclacan, who had been long ln the service of the sultinn of Morocco, as military adviser, with the title of Kaid. Kaid Maclenn ventured to vlslt the brigand $\ln$ his mountaln retreat for some urgotiatlon, und was detalned in pawn. Ralsuli beld thls notable captlve until the following Folmo. ary, und relersed him then on recelpt of \$25,010, cash down, with a pledge of $\$ 75,000$ more at the end of threc sears, if he gave no fresh tromble within that time. Neanwhile, he and twonty. eight of hls family were to be under British prutection. lefore this transaction was closeris new Sultan had won the Moroccan thron' (as will be explained below) and he thought it wiser to employ the energles of Raisuli ofliclally than to try to malntain a contest of authorlty with so unmanagrabie a subject. Accorilngly, in Fels. ruary, 1909 . Ralsuli was appointed governor of Iwelve trlbes ln Northern Morocco, and is now one of the most respectable rrepresentatires of government ln the last of the Barbary Ntates.
A. D. 1905-1906. - German hostility to the Anglo-French Agreement. - The Kaiser's speech at Tangier. - The International Conference at Algeciras. - The resulting Act. Sec (in this vol.) Erroors: A. I). 190.'-1906.
A. D. 1907-1909. - Mob-murder of Dr. Mauchamp at Morocco City. - Conflict with Tribesmen at Casablanca. - Bombardment by French and Spanish Ships. - Campaiga against the Tribes. - Dethronement of Sul$\tan$ Abd el Aziz by hia brother Mulai Hafid. - Fresh frlction between France and Germany. - Its Pacific Settlement by Arbitrstion at The Hague. - Organization of pollce forces for the service which France and spain were commissioned by the Powers at the 11 geciras Conference to perform In Morocco was ritarded, necessarily, by the prevaillng annrchy In the Emplre, nnd fresh causes of disorder occurred before the means for prompt treatment of them were preparel. In the apring of $1: 0_{0}^{*}$ a French cltlzen. Dr. Mauchamp, at Marrakesh (Morocco City), undertools to lnstall at his house the apparatus for wircless telegrajhy. Ills Noorish nelghbors suspected some dlabolleal Intentlon, when he ralsed the necesagry mast on his house, and proceeded with fanatic enterprise to klll the mnn of too much science and to demolish the house. The French Gor-
ernment demanded punishment of the outrage. with indemnity to the famlly of the victim, and put a force in motion, under Gereral Lisitey, which occupied the city of Ujda, not far from the ligerian frontier, to hoid it until the demade of justlee were complied with. None of the Powers signatory to the Algeclras Conference raised objections to thls proceeding.

A more serious intervention was occasloned ia July, 1907, when the French took control of the collection of customs at the ports, as directed by the Algeciras agreement. At Casablanca, on the Allantic coast, the trlbesmen at tack mi s number of European iaborers, employed there In quarries, and kllled eigit. Ali the forelgn residents of the region were in danger, and French and Spanlsh war-ships were hurried to the scene. The iocai Moorish officlai confessed his inabllity to protect the threatened forcign ers, who had taken refuge in the Frencli, Span. ish and British consulates, with liostlle tribes swarming around the town, and he asked for help. Marines were landed on the 4 th of Au. gust and wereattacked. "A sangulnary hattie followed between the Arabs and the European woldiery, the French crulser openlag fire and shelling the Moorish batterics. Scentes of great disorder and violence followed upon the firing, a ragiag mob of Moors attacking and pillaging the entire clty. The Jews particularly were massacred by hundreds. Another Erencls warship soon appeared upon the scene, accompanied by a Spanish crulser, and tronps were landed o the number of 4000. General Drude, the French commander, was chosen to head the ai. lled troops, Spaulsli and Frencli, and reinforce. ments were hurried from France." A number of encounters followed. "The most serious were the attarks, on Augint 28, and September 2, upon Casahlanca and its outskirts, both resulting from a reconnalsance in force hy the Frencil Algerian irregular cavairy and the fa. mous Foreign Legion. Seven or elght thousand Moors attacked the Europeans, sweeping down from the hills with ali the fcrocity and courage traditional In thelr race. By the ald of machine guns and the batteries from their warships the Freuch succeeded in repelling the tribesmen with considerable ioss of 11 fe."

Justification of the bombardment of Casablanca was somewhat questloned at the tlme, and with good zeason if the foilowing account of the circumstances, by an cyc-witness, a Scotch misslonary are to be believed. His statement was published in the Giasgow Herald, and is given here as summarized in The Outlook, of september 21, 1007.

This mlstionary, Dr. Kerr, has iived many years in thic conntry, and he asserts that in many wo-s the Freach residents and officials havecontinually irritated the Moors and provoked them to angcr. Dr. Kerr states that no further outbrcalis occurred after the massacre of Frcach anil Spanish workmen on July 30, and that when the bombsrdment began on August 1 there was absolutc' ' no immediate provocatlon for It. He denounces It as contrary to the usages of clvilized war and as 'wleked and unjustifable,' adiling that the British merchants In Casablanca will probably sue the French Govcrament for lamaics caused to their property hy what they iunslider an unnecessary bombardment. The punlshment of the Moors concerned in the mur-
der of the eight workmen, says Dr. Kerr, no one couid object to, but lastead of thls the punish. ment took the form of as unprovoked massucre of persons many of whom were entlrely Inno. cent. The detalls of the affair as he gives them are certainiy depiorabie, and if his assertion that the landing force of the French fired the firat shot is true, the succeeding eplsodes described are unpardonable. One of these eplsodes may be quoted hicre:
"I saw two young women walking as quickly as they could. ... Sudicnly a volley was fired into them by the Spanish marines. They fell, but plcked themselves up, and took refuge ln a ledge of a wall. After walting a few minutes they made to return, when another volley was fired at them, and they fell again. One of these brave daughters of ishmael refnsed to tlee without taking with her tise "khaik," or outer garment, which fell from her [thus ieav. lng her face uncovered, contrary to Moslem iaw]. She turned back, picked up her garment, and fied as fast as slic could, bleeding all over.'"

In the fall of 1907 General Drude was suc. cecded in the command at Casablanca by Gen. eral d'Amadic, who prosecuted a more vl gorous campaign against the obstinately host ile tribe of the region. and made hut slow progress in reducling them to suhmission.

Meuntlme a rislng agalnst Silitan Abi cl Aziz, in favor of one of lis brothers, Mulal Hatid, had been started aml was making rapld healway. Mulai Hafd was proclaimed Suitan at Marrakesh ou the 25tin of Angust, 190\%, and on the 4th of the following January his support. ers had gainel possession of Fez and prociained him there. Abd ei Aziz kept the field ngainst his rival until August, 1908, when he had practically no following left, aud tie directlon of Govsrnment was assumed formally by Mulal Hatid. Ilis authority had soun become establisined so fully that the German Government addressed a note to the Powers proposing an immerliate recognltlon of it. France and Sjain objectell, insisting that Mulal Hatid must confirm existing treatles, accept responsibiity for the debts of the previous régime, give pledges of indemnity for the Casablauca ontireak. disavow the "Ifoly War" which he had countenanerd and which had given him his success. and take effective measures for securing the safety of foreigners in the Emplrc. Thelr objection was approved gencrally; Germany asscnted to the requirements proposed, and It was not until Mulai IIatid had satistied them that he obtalned recognition as the legitimate sovercign of Morocco. This was given in the following note, handed to his representa. tive on the 5 tii of January, 1909, by the doyen of the Diplomatic 3 oody at Tangier
" The slgnatory Governments of the Act of Algeciras have recelved the letter whlch Mulai Hafid sent to them through the agency of the Dlplomatic Body at Tangler in reply to thel communigue of Normber 18 . The Govera. ments represented in Morocco received with sat. isfaction this reply. in which they saw a proof that the explanations which they formulated in their Note of Norember 18, In the interest of the relations of friendship and confidence Which they desire to malntain with the sovereign suthority of the Shereefian Fimplre, are in sccordance with the vlews of Muial ilafid. In consequence the sigastory Powers of the Act of

Aigeciras have decirled to recognize his Majeaty Mulai Hadd as legitimate Sultan of Morocco, and have charged the doyen of the Diplomatic Hody at Tangier to notify their recognition -f him to the representatives of his Majesty in isut town."

Before this settiement was reached an inct. dent had occurrel at Camblanca on the 15 th of September. 1908 , which irritated the chronic aensitivences of frefling bet ween Clermany and France. Flve or six solders of the Foreign Legion in Freuch service at Casablanea, including threc Germans, deserted, and the German Consulate attempted to protect the Germans when their arrcst was undertalen by French gendarmes. There was some struggle, but the arrest was accomplished, and the demand of the Consul for the release of the threc Germans was refused. Gernany demanded satisfaction for the treatment of her Consul. France maintained that satlafaction was due to herself for the interference of the Consul with her military rights; but offered to submit the affalr to the IIague Tribunal for arbitration. Germany was wliling to arbitrate the questions invoived if France would first express regret for the official conduct on her side of the matter. France in reply suggested exprisslons of regret by both parties; and on these ternis, supposediy vindicatlig nationni dignity on cach side, the case went to The Ingue. The Cuirt of Arbitration heli its first meeting on the 1st of May, 1900. and announced its judgment on the sid of the same nionth. Is summarized in nn Eingilsh despatch from The IIague, the opinion of the Court whs as follows:

- The Court eonsidered that in this case there was it contliet of jurisdiction hetween the Consular and the military authority of two forelgn Powers, the onc Power exerelsit.g fuli Consular nuthority over her subjerts, who happened to be soldiers in the Foreign Leglon of the other Power. The latter Power hat effected the military ocenjpation of a rertain tcrritory, and in conseflucure ex. ${ }^{-}-n$ full unthority over that territory. As it ssible to decide this conflict by any absolute ruling, which might intlinte in a gencmi way the procrdence of eithur jurisdiction, the Court considered that the guestion must be letermined by the particular circumstances of nny given case.

In this case the jurishiction of the orcupeing force had precedence because the persons in question did not leare the territory occupict by that force. The Court decilled that the secretary of the German Consuiate at Casablanea wrongly ant tirough n grave and manifest error tried to cmbark in il Girman stenmer deserters of the French Forrign legion, who were not of (ierman mationality. The Gromnn Consul anil the other offeials of the Consulate were not responsible for that fact : the Consui, however, in signing the safe conduct, which wns laid before inins. committed an unintentional error.

- The German Consulate in the circumstances ohtnining at that time was not entitled to grant its protertion even to lleserters of German nationality: the isgnl error, however, which was conimitted in thls connexion by the officials of the Consulate conld not be rectoned elther as an intentional or as an unintentional error.
" The French milltary authorities were wrong in not respeeting. as far as posslble, the de facto
protection exercised over thoee deserters In the name of the German Consuiate. The clrcum atances did not justify either menace hy $n$. volver on the part of the French moldiers, or the how given to the Moroccan eoldler of the Consulate. ${ }^{\text {" }}$

This proved satisfactory to ali concerned, and the Casahlanca incident was bappliy ciosed.

A more important adjustment of matters be. tween Gerimay and Franee, aiming at a general ciearing of causes of iriction in their rela. tlons, so far as concerned Morocco, had preceded the Casablanca arhitration by nearly three months. All Europe had been surprised aad delighted on the 9 th of February, 1009 , by the announcement of a Franco-German Agreement. just concluded, in the following word
" The Government of the French Republie and the German Imperial Government, actuated by an ecpual desire to facilitate the execution of tie Act of Algeclras, have agreed to iefine the sig. nificance whilh they attach to lta clauses with Flew to avolding any cause of misuuderatand lag between thein in the future.
"Consequently, the Government of the French Republie, wholly attached to the maintenance of the integrity and of the independ. ence of the Sherectian Empire, decided to safeguard economic equailty there, and accordingly not to impede German commerviai and Indus. trial interests, nad the German Imperial Gov. ernment, pursuing ouly econonic interest ia Morocco, recognizing nt the same time that the special politleai intereats of Fruuce nre ciosely bound up in that country with the consolldution of order and of internal peace, and resolved mit to impede those interests, declare that they will not prosecute or encourage any measure calculated to create in their farour or in favour of any Power whatsoever an economlc privilege, and that they wifl endeavour to assoclate their ns. tionais in business for which these may be able to obtain contracts (l'entreprise)."

This most important agrcement resuited from negotiations that were said to have heen opened by a suggestion from the Gernan Foreign Ser. retary, Baron von Schön. Its importance to Furope was fiardly exnggerated by the l'aris Matin, when it sald : "It is a great and happy event. the importance of whicil need not be emphasizici. $\qquad$ This close of the Moroccan quar. rel muny. If such he the desire, mark a date of rapital importance in the history of Europe. Ia fact, us Prince Bulow has said und repeated, Jorocco was only $n$ pretext. If therefore it has berome an object of agrecment. it is not mercly breause it has been reengnized that the local prohtem was not Insoluble, but also breanse the generai situntion has chnnued or heeause the "opportunlty ${ }^{\text {' }}$ no longer exists."

## MOROCCO, 1909

and the native Government in Morocco had ac. pulred, seemingly, a strong and capahle man at Its head. Sultan Mulai Halld made that impres. sion very positively on a correspondent of the Lonalon Times, to whom he gave audlence on the 13th of February, and who wrote of him tbat day: "It is quite evident that Mulal ifahd is a man of large and indopendent ideas, with a lean. lig toward democracy. In appearance and mau. ner he is most attrective, and both hle looke and hif conversation betoken a character at once strong and of quick deciston. Everything be says is very much to the point, and his remarks are often touched with humour and even cynllism. In.. openmindedness and cordiality extend alnost to breaches of the rigorous Moorish etiquitte."
Five days later the same correspondent wrote spaln: "The Fez Moors had huped at Mulai spartul's accesoion for materlai though Indefinite drantages, for they felt that the new sultan. who owed bis throne not to inhertance hut to election, would be an instrument in their own hands, and that they would be able to exert their lnfluence for their own purely selfish ends. But they had counted without Mulai Hafld Once on the throne, he consolidatel, at all eventi lically, his power, and the Fe population, who during the preylous relgn had undoubtedly held and used conslderahle influence, found themsetves in the hunds of a firm, masterfil man, who ddd not hesitate to tax them to an extent fornerly unknown, and gave themi clearly to understan' : sat he would brook no interference in matters of polley. The effect was instantaneous. The Fezuis began openly to regret the slack regime of Mulal Abdul Aziz, and Mulai IIufid became unpopular, as any monarch who really governs in Morocco must always be.
$\because$ But if Mulai Hafd was unpopular, he inspired at the same time a wholesome fear. His Indifferenee to public opinion. lils breaches of the alsurd prescriptions of Moorish etiquette, his personal supervislon of every detall, and the publlelty in which he lives show not only remarkahle courage, but also remarkable know. ledge of the people whom he governs.
Jet be hashut a amall army, and he is financially bampercd. He receives Europeans publicly, and grants audlences in the presence of the whole Court, often before the whole army. Ile Invites bis guests to be seated, and chats in a natural and sympathetic manner on all kinds of subjeets. But it is quite apparent that his enture. age is in terror of blm. Never have the viziers bid less frcedum or fewer opportunitles for plunder. The Government is Mulai Iiafd, and Mulai Ilatid alone, and yet Mulai Ilafd is a democrat. He desires to put down - and has alrealy largely done so - the fanatical and al. ways mischievous inturence of the great Shereetian familles. He works from morning till nleht, and keeps every one else working. It is negotiations with the French Minister are progressling in a way that astonishes every one.

Mulai Ilafld obtalned the throne hy preach. iag a holy war agalnst Europeans. He will maintain himself upon the throne by a policy of reform which will win for him the assistance of Frarce against his owu fanatical peopic."

But sulisequent events did not realize the confident expectations of this writer. A month lster he reported: "Shereef Sid Mohammed

Rittani, a denceadeat of a former dynasty and chief of an important reactionary relig glous wect, who was freely spoken of as posilifie sultan before Mulai Halld's proclamation, left Fez secretly jesterday. A pperently he had previously suc. ceeded in dispatching his family and morable property from time to time to some spot in the Berber tribelands without exclting suspicion. His tlight has caused what can only be described an consternation. His influence fo very great, and lie is known to lay clalm to the Throne."

Within another month thls pretender had defeated Mulal Hand's forces in a abarp engagement and had an army encamped about eighteen nilles east of Fez. French omicers were reported to he doing notable work in organizing and equipplug the Sultan's troops. On the 8th of May there was alarming newi that Mulai el Kebir, another brother of Mulal IIafid and of the ex Sultan, Abd ei Azlz, " who was accompanying the Southern Kaids to Fea, had left their camp secretly hy night and liad tied into the Zimmour country," and "many helieve that he will take advantage of the sultan's unpopularity to ralse a rchellion." Two days later "nothing is known of tie whereabouts of Mulai el Keblr," and "the sultan diees not conceal his anziety. Mulal-el-Kebir was on the best terms with lita Majesty, but the Sultan's severe treatment of other members of bls family no douht alled him with fear."
From I'aris, on the 26th of May, It was telegraphed that the Sultan's Minster of Finance, El XIokri. then visiting Paris on a thannclal mis. slon, "observes that Mulai Ilafd's authority is more solidly eatablished at present than might at tirst alght appuar to be the case. At no thme bas any Sultan been recognized over a much nider srea of Moroccan territory. In the Beled of the of the Haonk: and the sonthern Atlas have al. Ways beell hls partisans. El Mokri has no fear of the pretenders."
There were now two pretenilers in the field; for Mulal Keblr lad been hearl frum, "beyond Mekinez," where lie had raised the stanlard of revolt. And Bu IIamara was on the stage of civil war again, east of Fez, with an army wheh "is camperl at less than four hours dis. tance fron the capitat," and which is "actively pillaging the only tribe that remaine logal to Sulai 1lafld in that reglon." Troops sent agniust hlm a few days later were sall to have beern badly beaten. The Sultan was ruported to be in quarrel with his viriers: was ill.-1nvisible futhe palace, - and the altuation did not seem to look well for him.
Then, suddenly, all news reports from Morocco became silent as to Mulai Hatid and his rivals, and gare entire attention to a serious outbreak of warfare iu that northeastern corner of the empire, known as the Riff. where spaln hashad a long ricognized "sphere of influence," and where she had undertaken the working of viluahle iron inlnes near Melilla. IIostilltes were begun in July by an attack of tribesmen on the giners, killing several, and the Spanish troons sent to the scene met clisastor, being in. sufticient in forec. In the end, so extensive a rising of Morish tribegmen havl occurred that Spain was oblised to put a large army into the field against them and organize a coitly campaign. It was not until late in September that
much succes atended the Spanish armn, and not until iste in November that the campaign wan regaried as elowed, the Spaniah forces havIng weured positions which, when fortited, were expected to give them a irm foothg In the reginn, and having brought most of the trituen to terms.
Mcuntime, the war hai been hitterly unpopshar numosif furge classers in Npain, and the feeting lam sen manifonted in destructive roting at itarceiona nod elmewhere (aee, in this vol.,

What Frince hul been dolng meanwhlle, in and arisuld Norocco, las been told by a priter In The Allumtic Monthly:

- Hurlng the yeur [liay, 1908, to Miny, 1000] .he Freneh army under fienerai d'imade, has oontinued nceupying ('ablannes, ami the fertlle Chaoula (Slonwia) region, it has foreed pence, faw, and onder. uud open markets on the inlashitanta, to their great wivantage. Agricultare has revivml ; and (terman inude itsif has run up two million fruncs. Fiven wo the economic Interests' of Girmnny in Morocen are scant Inteed compared with those of Frapce and Enginnd; they are perlaps lews than those of Spain-nad yet they have long threntened the peace of Europe. $\qquad$ Nemimbile the interior of Morixco has been ehfefly occupled in the unuaking and making of Snitans. Toward the German Emperor these Hpliting Moors have now a foeling mueh like that of the Trunsraal Bowrs when the Kruger telegram falled to lead to eventumlities. . . . The renl aucceas of France is alonis the untire lamiffrontier of Moroceo. For its whule length this is now alao the fron. ther of Frundh turritory, - Algiers to the cast, the , Nharn with its line of French posts to the month, and so an to the Athantic Oeran through the' new F'rencli civil territory of 'Mauritanie.' Here forcign gengriplyy will sitill be incompleto for some time; hot it is childiah to dimmise these territurial at retchas ns an many ucres of sand. The empire which France might have lind In Cannla was, in like manner, lenounced hy Voltalre us neres of snow.
"France abonlutely refused to allow any question concerning this iandfrontier to be hrought up at the conference of A igecirus. It is no business of Europe: it cor at is the two neigh"rors. F'rance und Norocco.
(innerai l.gautey has ind?

Piopie who nmuse themseives marking ohseure changes of conquest on the map. may sufely tick their pins one full degrec farther west all .. Inng this part of Algiers, beginning where Ajain at Mclilla hlocks the way along the MertIterranenn coast." - Stoddari Dewey, The Yeu.' in Pranre (Atlontic Monthly. Au\%., 1909).
When newspaper attention reverted to Mulai Itaflif a great improvement was found in his affuirs. Seemingly, the pretenders to his throne lad disappared, and Bu Ilamara, the rebef, now styted El Roghi, was declsively routed hy troops of the Sultan on the 16 th of Aligust, captured a few dars later, and taken to Fez in an Iron cage. On the 13th of September It was announced that he had been executed the day
before. Later, this was contralicted, and them seems to be no certilaty as to his fate.

The Moroccan (lovernment was now bring Alirsify premedi hy France with demands over Which negotlation bad proceedal hitherto very si wiy. M. Hichon, the French Mintster Por Fireign ARuirs, made a statement on the subject to the Chamber of Ikenties on the 2wi uf So. veraber, to the following eftect: "On August 14 the representatives of the Nuitan received a note summing up the conilitions imponel hy the French Government. These condition were the evacuation of the Nhawin reglen on condition of the organization hy the Nughren of a force; the evaruation of Camblamen when the French Governnent feit convinced that the orgnuization of the Slawifa police had become sufteiently effertive : the organization of the police service on the Algero-Norocean frontler: the payment of the Maghzen's debts and the reimbursement of the conts of the Freach mill. tary czpelitions. The Maghzen owid at prierot $88,800,000$, more than $£ 400,000$ of which wat due to private ereditors. The French fovern. ment woold allow the Moroccan Government to raice a foan in Finnce in orde: to facilitate the pryment of its dehes.

The F'rench condl. tlons hai leen acknowiedged to be very moderate hy all wioo lad had cognisabce of them. Germany liad recentiy informed the Mschyen that it was high time to contract a loin. Il fichon dwelt on the loyaliy with whicli the Franco-German Agreement had heen olsserved by the 13 -rlin Government. Nevertheless the adhesion of the Morocran (iovernment hat not yet been obtained. That Government had ad. mitted the principle of the ionn of 8 v . OWM. Why and that of the Indemalty of $\mathbf{7 0 . 0 0 0 . 0 0 \% f}$ for the French militury expedition, but there was disagreement still in regard to the ganrantees required for the realization of that uperation Mhlai Intiol, moreover, demanded the inmurilate evacuation of the Sliawia snd of Casalimues On November 6 M . lichon informen the sul. tan's envoys that it was futile to contionce the frourpait ra if France did not ohtain a satis fuctury reply. It would not be without danger for the Moroccan Government to persevere in its attitude."

A little later it was made known that the Sultan had yieided to the terms preacriled by the French Government And was to ohtain thi" inso which would belp toward the payment of his dehts.

By this time a new Morocco question had spruing out of a sweeping mining concesion which certain German exploiters, the lirothers Mannesmann, had ohtained from Sultan Muiai llafd, in distinct violation of the agreements at Algeciras which the Suitan hed been a party to. The Manneamann minigg rights under this concession, if aliowed, would swaliow up all others. and large interests, Freach, Spanish, Germao. English, Italian, and Dutch, were arrayed against their claims. The becklng of the Mannewmanus in Germany, however, by commerclal and newspaper Influence, appears to have been very powerfui, and it has not been easy for the Gov. ernment to reaist belgg drawn into alliance иith it. But the attltude of the Imperial Goternment appear to have been strictly loyal to the Alge. cira agrements, and it has gone no fanther for the Mennesmanas and their partleas than to

## MUNICIPAL GOVERNMENT.

American Democracy's most Serious Problem. - Present Interest in it. - Hopefui Movements. - Aucrlears have loug been forcid (1) acknowiedge that political denucracy in the C'uitud States makea its worst sjow ing in the: government of munlelpalities : and those who dive any venrching thought to the matter have littie dispute over reamons for the fict. It connerts very plainly wlih mother fact, nameiy. that municipul politics, as a political interest diatinet and apart from the intcrests of govirnnent in Nation and state, has hall no grow 'in the country ns yct. E'p to the time of the uation of the dational uubon, the few citios of Amorica had a quite positive political life of their own, which might buve carried then int" contlitions very different from what threy hewe realiarl slnce, if it had not undergnue the blogorjition that it did in the politles of a natiunal goverument. The natiomal puiftical parties formed then on exciting issurs, mectional, comstitutional, and economic, conght alf political ferling iuto treir embrace, not fustantly but grafuaity, and surely. and approprtated tire whole mechanlsm of politioal orgunization to themselves. Citles are the nuthral ecinters of such mechanisin, and the great partios of Fed. eral politics were able easily to funtose on them a domination which left no frec working of public oplaion on the immediate conterus of the cities themselves. Ail political action was drawn into the mill which turns ont l'residents, (Ongresses, Tariffs, Bank Acts, etc., and the mere by-product of Mayors. Nidermen, and City (trdinances which it drops incidentaliy into the cities, receives almost nostamp of quality or desien from the focai mind.

Lintij the wheels of iocal government arc joosened in some way from the cinteh of the great party machincs, and can work indepcudeutly, uncice musire forces of tizei- otrw, to protuce the satisfaction of locai needs. Interests, and ajras, there will be little success in undertakings of municipal reform. How to accomplish that
polltical ungenrling is one of tha greatest, if not the greatest. of tire prois 'rms now occupying the minis of the Amerlean reopie. Fortumately It is occupying their mindo. Withati, 心t few years they have given tuore thonght subject than it ever recelved from them before: aud it has becn hodid thought, as weli ny profoundly carnest. It has not been afrilh of hospitality to new ideas and new exjerfencers, but is giving them fair henring and falr tests. The present atiftuie of the whole country in this matuer ls of the happlest fopefolness, sud every day brightens the jrospect of a better future for miniclpal roverument in America.

Boston: A. D. 1909. - A Plan of Government chosen by popular vote. - In conuretion whth the electlon of Nusembir 2 . 1919. the ejtizens of bowtou, Massachusets. had iwo plans of City Ciovarnment submitied th their votte, and the charter :anior witich the cily will be ruled and its busluess conducted after the befinning of Fcbrnary, 1010, was determined by the chnice betwren these plany which a majority expressed at the polls. Dne of the plans cinamated from an othcial body, called the Fi nance Comuisslou, whirl had been appolnted to Investigate bul conditions In tire Clty Government, and whose Investigations hat given rise to the demand for a radical reform. This plan hai the approval, morcover, of a clitzens Committee of One lifudred, which had given minch attention to the subject; hut it was ex. cecdingly unsatisfactory to the party pollti. clans, whose personal interests were flagrantly disregarded in its scheme. These drafted a form of charter which titted their own purposes. and the two plans were suhmitted to the Legislature in the winter of 1909 . That body escaped the responalhility of a declsion between them hy referring both to the voters of Boston. The charter wonted by the party managers was designated as "Plan No. i"; that of the Fi . nance Commission and the Committee of One Hundred as "Plan No. 2." A itrenuous cam.

## MUNICLPAL OOVERNMENT

palgn ut eduration wha fought for some weeks before etection day $1, y$ the rupporters of IMan No. 2, who seem to hise facluded practically all single-minded seekers of good goversment. and an equally actlve campalign of wlre pulling wes carried os by the champlons of l'lan Nin. 1 . The ellicution was succeatul in convinctas 80.128 rotefi that llan 2 shoulil be preferred, while 85,806 were pernuaded to the contrary. and about $8 t, 0 \mathrm{w}$ remisined so Indiferent or undeclided that they gave the question no vote. But public considerations prevalled over party motiven and Inliuences by 8400 votes, which fa - highiy lmportant fact.

The charter thus adupted for Boston diliers In urany features from what bas acquired the name of "the Ins Molnes pian," but is fundaurventiy akla to it in priaciple and aim. Its prime purpone is to divorce lical pollties frims national prolitic., freeing munlelpal elecifous fiom the lnneful control of parties which bave nothlug righty to do with the cits affals Its mecondary object is to concentrute oflicial re 'onkithity in a modernted wav. I. aubjects
in. + of Bomton, at the nildule of his term,
nolderatlan of the vote which electend
1:a (in the mature of the Swlss "reciall"), but it does mot introluce the initiative and referendum. The operation of the new charter under Ita provislons was outilned as follow by the Boston llerald on the day following fts adoption:

13y the accemance of plan 2. party und all ather deniguationa will be elimluated from the ballota for she munleipal efoetions, which will the held on the first Tuesiny after the serond Monday la Jumary of each year. The coming city lectinn will lir held on Jan. 11

- Cnndidates far mayor inust in nomimated by petition of nit less than soow registered Bontan votirs. The eandilate who recelves the dighest rote at the city clectlon will hold office for four years, undess recalled at the end of two years. The sulary will be $\$ 10.000$ a y year.

It the ntate clection ln tha second y ear of the mayor's corm the buhots will contuin the fltoution: 'shall there le at clection for mayor at the sext munlefpal - fection:' Ind thls will be :ansuertal by 'léa, or - No. If a majority of the regisured voters vote 'Ves' an election for mayor will be leeld at the following eity clection.

Whether recalled or not. the mayor holding office will hase hils nume ont the bitlot we the ctty election unless in writug he requests the - lection commiswionera not to place his name on the ballot. The misyor then elected will hold office fir four years, subject to recall at the curd of his secondi year.
-The city courcil will consist of nac mensbers, all clicted at large. The salary will le $\$ 1.400$ each. In the election an Jan. 11 the voters may vote for nine candidistes, and tho nine receiving the hieliest vores will he the chared elected. The three highest will has threveyor terms, the threr bext hement wils serve for two rears and the nest three far one yar wolh. Fineh jear there.flur three candidutes at harge will be elicted and the voters may vote for three. All members of the elty council will be elocted at larce. und there will be b.1 wari mem!sers of the torly. by the abolithon of party desipnationia no primary elections or caucuses for muacipal ollices will be lied.

 sweeping orer the country, in the great eities particulariy. with regard to school boards, and

## MUNICIPAL GOVERNMENT

every bit of that experience goes the way I am descrining it. It is all in the direction of sew men not paid, originaily determining the general policy of the schoois of the city and trusting entireig to experts for executive action. Our whole experience in Massachusetts with the commissions we have had, tends the same way. If we ask wh.ut have been the hest performances of the governmental functions in Massachusetts for the last twenty-five jears, we have but one answer to make, nnmely, the work of our commissions, water, sewage, railroads, gas and eiectric ilghting, puhic ilbraries where owned by the city, hospitais where owned by the city. Hon can think of numerous instances in Massachusetts where admirahie work has heen done hy commissions acting on the principles which 1 have descrihed. I say the day is dawning. What it needs, that the ifght may grow and get to full noon, is that the peopie, the great body of the people, shouid be convinced that munich. pai government means nothing but good. inteiligent conduct of husiness.'

Meantime, in the West, action was aiready folIowiug study of the Gaiveaton pian of city government, and the four states of Iown, Kansas, North Dakota, and Gouth Dakota passed acts in 1907 to enabie the adoption of it by any city so desiring. One of the first to exercise the priviIege was the city of Des Moines, Iowa, certain of whose progressive young business men bad been studying the municipai prohiem of fatc, and wito had determined to hring some system of incni government into operation that wonlid make tincir city what it ougit to he. On the basis of the Gaiveston pian they worked out the dictails of a charter which has become the moidel of its species most widely accepted, so that more has bern heard latteriy of "tive iles Moines Char. ter" than of "the Gaiveston Plan." What is calied the Des Moines charter, howerer, was no apeciai ennctment for thnt city, but $n$ legislative frame of municipai government win hany city in Iowa having not less than 25,000 inhabitants mny fit itself into.

It contides the wlowe management of strictly locai affnirs in the city to four councilmen and a mayor, all elected hy the voters of the clty at iarge. It divifics their administration finto five departments, nameiy: The department of PuhIic Affairs: The department of Accounts and a' 1 . nances: The department of IPuhic Safety: The department of Sireets and Public Iniprove. ments : Tise depnrtment of I'arks and Publir. Property. The mayor, by virtue of his offire, is chairman of the council. Ile is aiso superintendent of the department of public affairs, and cxercises a grnerai supervision over the whoie of tile city administrntion.

The council thus composed, with the mayor at its head, is invested with ali executive. iegis. intive and judicial authority, formeriy excrcibed hy perhaps twelve different officers, and tweive different boards. It appoints the city attorney, the city treasurer, the city auditor, the city engincer: nad. in fact, curry other sppolntive oflicini. It makes every approprintion, ant conducts the entire affairs of tise city. "At the first meeting of this council, immediately foilowing the eiection of its members, the work of the city is assigned to ite most appropriate department; to one of these five departments. Each of the members of the counchit is aiso named as super.

Intendent of a particuiar department ; the thenry of the law beling that the man who is best quali. fied, hy reason of his experience and trainiug. wiil he placed as the head of that department where his training and experience wiii be of most vaiue. As superintencient of this departmont, he is heid atrictly accountabie for ali mat. ters which come within his jurisdiction: he is siso charged with responsihlity for all that is done or not done in his particular department."

In the nomination and election of this impur. tant council, no party names are permitted to be connected with the candidates, in any maniner whatsorver. Each candidate for the office becomes so by the filing of a petition with the eity cieris, bearing the signatures of not icss than twenty-five citizens, who make sffidavit to the effect that the man is of good morai charapter. of age, and quaitited to fill the office. "Tendsys before tive election is heid, the city clerk tskes the petitions which have been flied and prepares the bailot. IIe does this hy arranging the names of candidates in alphaleticai order. The candi dates for mayor are arranged under the beaing 'Mayor'; the candidates for councimen are siso arranged in aiphaheticai order under the headiug 'Councilmen.' There is no party designation. and because of this alphabetical arrangement there can he no favorite position on tite hallot. The resuit is, that the candidate comes before the whole propie of the city on his own merit. and on his own record."

Is a citizen of Des Moines has described the proceeding. "after the primary has been iseld the generai eicction is cniled, and In oxier to se. cure namps for the bailnt in the gernrai eiection. we take the two candidates who have receiveri the highest number of votes for mayor at the primary, and piace their names on the halkot. In order to secure tive connciimen, we take the eight candidates for counclimen who have rpcelved the higinest number of votes nt the primary and piace their names on the regular elfection baliot. This gives us two opportunitios to werd out undesirable men. In tive first piace. we lave the choice among ali candidates at the primary. At the efection, we have the rloice of one of two men for mayor, and the choire of four out of eight candidates for councimen."

A most important provision of this inws charter for cities has to do with the elvil set. vice. "At the first meeting of the city comneil, after the eiection of these five commissioners or five councimen-they are not commissioners - they appoint a civil service fond compmed of three members, and this clvll service honil. in whose charge is placed the worls of prepar ing a civil service examination, is appointed for a period of six years. Thus they are remorei from any influence that might be exerted by the connciimen, who are only ciected for two Fears. This civil service commission prepares once a year nn examination for ail employe of the city, with the exception of unskilied inbur and the heads of the departments, auch as pity attorney, city treasurer, city assessor, etc. (all of whom are appointed by a majority vote of the councii). fiaving passed the examination succesafnily, the applicant is placed in a position. and so inng as his uiork is satisfactory sud he remains competent, ife cannct he remused. IIe msy be suspended, hut he cannot be re. moved, and he is entitied to hearing before
the civll service board. This provision at once the civll service board. This provision at once up through patronage."
Thls is a sufficient description of the offielal frame of government that has bcen instituted at Des Molnew and other citles of fowa under a general law of that State. The law gues farther, and connects with thly frume or system a suppiementary provision of methouls for giving the whole body of the people an immedlate ageney in municipal legislation and a power to reeall their election of any electel official dirr. ing his term. By the use of the Swlas process of "lnitlative," a sufficient number of votera (25 per cent. of the whole) can propose measures whleh the C'onncli must elther adopt or else submit to the general vote, and can suspend measires adopted by the councll uutil the general boly of eltizens las voted for or against them. These features, of the initlative, the referendim and the recall, are no more essentlal stachments to the Des Molnes or Iowa form of munlcipal organization than to any other. To what extent the Statea and cltics making trial of the seneral featires of the Galveston scheme of minlcipal organlzathon have followed Iowa In making the Swlss addltlons to it, Informs. tion at prosent is wanting. Apparently the Des Mohes pattern is having wide acceptance.
In the fall of 1800 the towns in the Cnited States which had aiopted the so-called Des Moines plan of government were reported to number 12 in Texas, 7 in Kansas. 6 In Iowa, 3 In Mussachusetts, 8 in Callfornia, 2 In Colorado, 2 in Missouri, 2 in Tennessee, 1 in West Vir. ginis, 1 In Mississlppi, 1 in North Dakota, 1 In South i)aknta, being 42 in all. Novements lonking to the introbliction of the same system were on $f(x) t$ in other chtles. At the November election a draft of charter on the llnes of the less lloines plan wan suhmitted to popular vote ia the efty of Buffalo, N. Y., and approved by 844 c clectors, out of a total of 11,846 who ex. pressell themselves on the subject. The total vote, however. was onlf about one-sixth of that cast for candliatee ai the clection. On the atrength of the opinlon expressed, the Luglshatare is now beling asked to enact the charter. Should it do so, the form of government whi have trial in the largest elty that has yet Introducerlit.

Londen, Eng. : Defeat of the Progressives in the Countyand Borough Elections. See (in thls sol.) Loninn : A. i). 1907-1909.

Los Angeles, Cal,: Experiments and Ex-periences.-SInce 1900, los Angeles, Califorala, has been going through some intercsting experiences, due to a series of charter anmendments. The former charter of the city had been of the common pattern, organlaing the municipal government under a mayor and a board of alifermen electel by wards. The amendments of recent years hive ereated a Boarl of Publle Works, with large powers In the management of minklpal work: have changed the Boarl of Filucation from a boly of nine members clectel by wards to a memberst ? of seven chosell from the chty at large; bave proviled an elahorate system of municlpal civil servlce regu. latlon : and finaliy have provided for a complete bystem of popilar Intiative and referendum in municipal legislation, and for recall of elective onficen. Popuiar Initiative in legisiation is made
posalble upon the demand by petlion of 15 per cent *he voters, estlmated upon the total vote for 1.ayor int the precelling munlelpal election; referendum in ordinary legialation is requlred upon a petition of 7 per cent of the voters; a recall election must be onlered upon the demnnd of 25 per cent of the voters concerned in the filiing of the office. The offleinl whom the petition seeks to remove is maie a enndldate for rectertion without other nominathon, unless in writing be notifics the clty clerk that be is not a canddate.

The recall methods, provided for in eharter amendments of 1903 , have been put lnto actuai service ; first, in 1906, when a councilman was replaced by vote of the Ward, und again in Febriary, 1009, when a recall electlon was orderal for the office of mayor. The proceedings in this ense attracted widespread attention and interest throughout the country. They falled, however, on afford a perfect test of recall methods for the renson that after the election had been ordcrid but before the date hall arrived the mayor in ofllee resignell, thus surrendering without a struggle to the opponents who bal sought his removal.

Michigan: Home Rule for Cities. - The lately revised Constitntion of Milchlgan anthor. hes eitles and villages to frane. Whopt and amend their cbarters, and to pass laws mul ondinanees in regaril to their municlpal concerns. Undir this improved Comstatlon, the Michigan legisinture of 1009 alopted the neressary Icgisiation for the formulatlon of action and for the limitation of taxes and debts. The following, from the New York Erening Pont, Is a summary of the more Inportant prorislons of the Aet: "Charters of new clties will be framed hy a commisslon of nine electors chosen hy popu. lar vote. Hevisod eharters of existing cities whil be framed, after a vote of the clectors in favor of revision (sibmitted by o two thirils vote of the local leglslatire boly or on an hitiatory petition of twenty per cent. of the total vote cast for Mayor), by un elected commission of one member from cach ward and three electors at large. Canlidates for charter cominlssioners are to he placel on the ballot without party affillatlous ilesiguatem. Charter ameminients may be propuseml hy a troothirls vote of the local legislathe hory, or ly an initintory petition of twenty per cent. of the vote for Mayor.

- Every charter and charter amendment, before submission to the elcetors. must be submitted to the Governor of the state, but if disapproved by him, and passed on reconsideration by a two-thirls rote of the Charter Commission or loral legislative boly, shall be summitted to the elcetors. Copies of charters and charter amendments approved by the electors of the city shall be certified to the secretary of state, and shil thereupon become a law.
"The law names certain thlngs whleh each clty charter shall provkle, and imposes certaln restrletlons on the powers of cltles. There must be an elected Mayor and a booly vested with leg. isiative power; the cicrk, treasurer, and asses. sors, and other officers myy be elected or appointed. Thls permits the establishment of a commission nystem, or of a Mayor and council -Ith distlnct powers. Provision must be made for the levy, collection, and retum of State, county, and school taxes, for annual appropris.

## MLIICLPAL GOVERNMENT

## MUNICIPAL GOVERNMENT

tions for municipal purposem, and for a system of accounts.
" Provlaion may be made for municlpai taxes and for borrowing money up to prescribed timits, for the reguiation of trades, occupations, and amusements, for the purchase of franchlses, for a plan of atreets within tbrec mlies beyond the city limits, " for a system of civli service," for the referendum, and the fodlowing omnlhus cianse: for tie cxerciae of nil munlcipai powers in the twayagement and control of municipni property and in the aiminlstration of the municipal government, whetier such powers be expressly enumernted or not: for nny nct to advance the interests of the city, the good govern. ment nui prosperity of the munleipality and lts. inhabltants, and througb its regularly cons: i . tuterl authority, to pass ali has nud ordinances relating to its municipal concerns, subject to the Constitution and general lats of the sitite.

- Limitations Include the foliowing : Exlating Ilmits to the tax rate and borrowing powers to remain untii $n$ chnnge is authorized by vote of the electors, witb a maximum limit of 2 per cent. of the nssessed valuation for the tax rate and 8 per cent. for loans; luit, as alltiorized by the Constitution, bonds may in issued beyond thls limit tor pubne utllities, when secured only upon the property and revenues of the utility. A sinking fund must be provided for bonds. A cbarter or charter ancadment may not be submitted oftener thau once in two yeurs. Thesalary of puhic officials may not be cbangei sfter election or appointment. Certaln numicipni property may only be sold or vacated when approved hy three-ffths of the electors roting thereon.

A siojurate act was passed for villages. This follows tire main fcatures of the law for citles, hut is hriefur.'

New York City: A. D. 1901-1909. - The Municipal Eiections of 1901, 1903, 1905, and 1909. Nee (in thls vol.) NEw Ionk City.
A. D. 1905-1909. - The Working of the Bureau of Municipal Research. - The Bureau of Nimicipal Rescarch, instltuted In New Jork Clty by an organization of citlzens lin 1905, has proved to he as effective an agency as bas ever becn "mployed for the straightenling of crook. eduess nud the correcting of negligence in the conduct of municipul affnirs. Its working is described fully in an artlele whleb appeared in the Allantic Vonthly of October, 190s, by the head of the Bureatu, J)r. Willium H. Ailen, unter tise title, "A Nntional Fund for Efficient 1)(mocrucy." What the writur alms to do. and does most effectively, ls, first. to show how lnefllcient our democrucy is in lts pructical worklng. how demoraiizing that Intiticiency is, how forbly ciucati in and religion are struggilng agalinst its det. .diizations, so long as they do not work to niake government effeient; and then the unfolds the remeriy indlcated in results obtained already from the puhlic enllghtenment - the citizell eduration - which the isureau of Nlunicipal lesearch is developing in New Fork. llis final purjose is to piead for the ervat ne. tional fund that would establish a central found. ation for the extending nnd organizing of sim. liar educatlonal work throughout the country at larse.

Tive aimple object of the New Sork Bureau of Minlcipal IResearch has been to make and to

Keep the pubiic acquainted with the working of thinga in its government ; to make and keep it nttentive to the facts of efficlency or inefficiency In that worklng, which proves to be the kind of political educatlon that bears the most practical frults. The aim of the bureau, says Dr. Allen. hes been "educative, not detectlve. Infinitely more interested In pointing out what is needed tban what ls wrong, it renlizes that the great probicm of democracy ls not the control of the officer, hut the education of the citizen. It be gan, not by laying down prlnclpies of govern ment or discussing men, but by studying the netds of the community and lis oftliciul acts. it would educate denocrucy $\ln$ facts ahout democracy's acts and metbods, democracy's need, and democracy's opportunlty." Sometaing of the results achieved is set fortb in the following passage:
"Three years, $\$ 150,000$, and sclentific methad, have nccomplished results surpnssing ali dreams of those who outlined lis programme. So couvinchig bre these results that oniwokers whon said thrce ycars ago, 'The tiger will never change its strlpes, are now suying, - Iou couid hardiy do this ln cities wiere the tiger marks nre lees ohvions.' Aithougb many phases of municipal adminlstration hare not yet been studied, there is hardly an olstitcle to efficlency nad honesty that has not been encoun. tered nud orcrcome by ligbt. The renl estate bureau that cluied ail graft charges is being reorganlzed to prevent either graft or one hundred per cent. profits for land soid the city at primpte sale. While fis own staff, consisting of threc investigators in $190 \%$ and 40 in the summer of 1008 , can of ltself do no inconsid erable cducational work, the bureau gauges Its effectiveness, not by what its own staff arcompiisics, but by what the clty's staff of 70,000 , and through tbem the city's population of $4,000,000$, are enabled to accomplish hecruse of its educntional etert.
" Nethods that mannfacture corruption and fnetheiency, and thnt for 30 years defied political reformi, nre giving way to ir hods liy which 70,000 emplorees must tell the iruth almut what they do winen they to lt. about what they speud when they spend it, in cicar, leghber form.

Tummany oflicinls, when hterested. make exceilent collaborators. The conimissioners of nccounts, for 80 rears, througin reform ant Tamminy ndminlstrations alike, a whitu-uashing boily that condoned and glossed over wnatuful and corrupt acts, base become, as a direct revult of the burenu's work, a great ellucathonal agency."
A. D. 1909. - Proposed New Charter, not acted on in the Legislature. - A Commisvion Appointed for tire purpose by Governor llughes. after long bund carefuls study of the suliject of a new charter for Grenter New York, reportul in Slarch, 1009, suhmittlog a recommendedi drift. which was submitted to the lagisinture then in session, but ohtalned no action from that himly hefore its adjournment. The ruing principle in the work of the Commlssion had been that of re. ducing the number of elected administrative oth. cers, of putting lnto separate hands the power to approprinle and the power to spend monev. and of concentratlng power and responsibility In a few. As originalir organized, the "Grenter New York" City is divided lnto five boroushs.

## MUNICIPAL GOVERNMENT

At the head of each bc- ugh lsa Borough Presldeat, who has charge of the streets and the pub. deat, who has charge or hildinge withln the borough. There is also a Board of Estlmate and Apportionment, consisting of the Mayor, Comptroller, the President af the Board of Aldermen, and the Borough Pretidents. There ls also a Board of Aldermen. The Commissloners proposed that the Borough Presidents shall cease to have administratlve functions and shall devote their attention excluslvely to the great financial worls of the Board of Estimate and Apportlonment; that the almialstrative work be glven to licads of departments rusponslhle to the Mayor, and to hureaus, some of them under the Board of Estlniate and Apportionment and some under the various departments ; and that the Board of Aldermen he mpplanted hy a Council of thirty-nine memhers to serve without pay; to have enlarged legislathe nowers, hut none connected with the grant franchises. whlch the Board of Estimate and Apportiontuent should control. A new Depart. ment of Street Control was proposed, to take over all street work, abolishing the Street.Cleanling lepartment.

Phildadelphia: A. D. 1905.- A Temporary House Cleaning of the Municipality. Mayor Weaver's Conversion. - "Philadelphia has reformed. It is the swiftest and most thorongh munlcipal revolution known in American civic annals. Without an electlon and without primaries, withont warning und whihout preparation, the great deep of small householdiers, - whieh ls lhiladel phla, - movei from below. When the work was over, Mayor Weaver, who led the revolition, had not only changed the henuls of the two exceutive departments, with ten thousand employees, hut he was in full cuntrol of City Councils; le was recognizal as the heal of the efly R(cpublican party organiza. thon; he had force the clty Repulinean comaittee tu withiraw the local ticket already nominated and awnit the choice of another tleket by the riform leaders: he hal hegiti eriminnt prosecution, stopped work on contracts for flltri thon plamts, bonlevarils, athl highways anmountlaz to sume twelve million clallars, bralmalag n e:rrching investigation ly a boarl of expert engineers. and had defented two grals. one a contract for seventeflec years in gas and the other a strect car gronb of one hmmired amb tun miles of streets, sought by the two locai publieservice corporitlons, the L'nited Gas Improvemont Company nod the lhilasichphata Ravhl Transit company. 1 both lind heren sticcessfully passal bufore this revolition broke, aml botis wire recalleal, on the demnn'l of the mayor, ly the same councils that had passed them.
"The colerent homosenomat rote of the myr. lads of small homes which minke up lhilailelphia has minfe this sweephig victory pussible against great oulds. The party majority in Iennstivana and Phlladelplian is the stroncest In the country. Thf clty machine is as well orpanked as "「aninany llall. It hohls citr, state. and felleral patronage. For ten yors it has without challenge chosen the exechitive officers at Ilarrisbure and Whiladelphin and heh the Idosivature and Counclls. The clty ring in a
 of city bonds: let on the fltration plant alone $\$ 13,8$ in , 000 of eontracts : as much more on rarfous public lmprovements, and had pending
work euthorized, hut not let, costing about 830, 000,000 . The criminal investlgation already made ladicates that on the filtration-plant contracts alone the margin of loose profit is from 28 to 30 per cent. In this period the cliy gas works have been leased for a term ending ln 1927, on provislons which yleld $82,000,000$ a year, twlee the cxpected profit to the lessee, the United Gas Improvement Company. The other puhlic-servlce corporation, the Philaulelphla Itaplel Transit Company, has had a free gift of a subway and over two hundred miles of street without payment aud without limltation. The combluation, under an antiquated law whlch threw no safeguards abont the ballot of a veral vote controlled hy uachine othee-liolders of the great eurporatlons, railroad and puhlic-serviee, nud of a corrupt comblnation of contractors and politicinns, secmed omnlpotent. By the adroit use of State and elty appropriations for private charitles and educatlonal institutlons, the respectable werc placated. The leaders of thls organization were also wise enough to meet reforms non-politlcal halfway. The last State logislature passed excellent sanltary legislation. reorganized on soume lines the city schools of Itiladelphia, passed efficient chidd-labor laws, and at many points lmproved state legislation. ('urefnlly separating politionl management and elected uftleers, the leaders of the machine chose fudicial candidates umally unexeeptionalale, anul elicted as governor of the state and may or of I'hiladelphia men honest, duli, highly respectid, without siain hut plant.
" In April, so fnr as Philadelphia was concerned, welf-government secmed to have disnppeared. Its tharter wns ancmileth. In the teeth of unlversal protest, so as to roh future mayors of all puwers. Senator 13 oies l'enrose and Insurance ('ommissioner lsra.l W. Durhan minde all nominations, state and eity. The former awaits investigation. Durham has heen shown to hee a silent aml serret partuer in $n$ contracting tirm holiling $\$ 13,660.000$ of pontracts. under city ordinaners he passed. led liy oftieres he chose and yielaling some 30 per ecnt. protit. In Pennsylvania and Philatelphia. the corporatlon pays the madhlne and the machine aids the corporation. It is like this in other sitatess, but prefminently in that founded by lerun. After a long series of like gifts mul franchises. councils voted the lapid Transit Company one hambrel und ten mulles of strects, pased a eostly houlevaril system, and in retirn for 82., 00) 0 onn intended for more contricts proposed to lase the city gat works for sevolty five years, puit poting retuction in the pilee of gas for three-puarters of a emtury.

This mn the plinnt fage-s of the machlne Into the pockets of every honsenohier who had a gas bill to par, some two humilrial nand elghty thousand in number sudilenty this great mass novell from withln. The pulpit of small ehurches knew it hefore the press. the little division lenders lufore the ward managers, nat they before the ehicfs of the organization. In a weik, the city serthed. Children of counellmen came crying from the puhlie schonls. No me would piny with them. Cnllous, thick skiuned pollticiana found their mail. thelr telephones. and their laily tonrs one hot rain of protest from thelr olld neighbors. Divlslon leaders reported defection hy the avalanche. The smali house-

holder, the narrow burgher, comfortable, contented, owning his house, carciess over ideals, education, corruption, and venal voter, was stlame over a bigger gas hili. It is the oid story of ship money and stamp taxes. No vote was necesary. No primary was nceded. The leaders of a political mnehine are ignorant of mueh, but they know the voice of the voter in the land. John Weaver, the mayor, ehosen by the ma ehine, and its lifelong friend and supporter, had been a fair case lawyer and district attorney. Houest, narrow, elean-lived, of a legal mind. restive nt the way he was treated as a mere fig. urehead, he recognized the eivie revolution because he was himseif of tix ciass that had risen, He hnd, moreover, in his day won hts division and was $n$ wani leader." - American Reciev of Rerieus, July, :005.

The Israel W. Durham referred to above, who was the absoiute "buss" of Ihindeiphia from 1896 to 1905, tled on the 2sth of June, 1009.

See, also, Penssylvania: A. I). 1006.
A. D. 1909. - The old Evil Conditions revived. - Defeat of Revoit against them, - The old mastery of the City Government by nn ali. powerfui und shameless poiltical "machine" Was recovered at the end of the term of Mayor Weaver, and conditions were soon as rotten as before the momentnry and partini cleansing had been performen. In 1909 a hopeful revolt against thein was undertaken, under the lead of $\mathbf{V}$. Cinrence Gibboney a young inw rer who ns seeretary of an active "Law and Orler Society," hnl shown inspiring powers of leadership and high qualities of sincerity nnd resolution. Gib. boner hnd lieen put forward for District Attorney in 1960 on Democratie nad Independent tickets. and hand suffered defen!. Now he wns brought agnin to the front, for that eflice, from which the plunderers of the city could be most ai vnntageously attacked. A William Pcon I'nrty had been organizri in the interest of reform, and his nominntion by this was endorsed by the Democratic orgmilation. A great cfort was made to rouse the conscience and the self-respert of the eity, to throw off the tiralilom of blind partisanship under which it sulnnits to be corrupted and robbed. IBit the effort failed. Gibboney wns rejectol hy a majority of about 40,(HM) viturs.

Pittsburg: Achievements of a Reforming Mayor.-Grorge W. Githrie became Mayor of Pittshurg in 1006 . "When Mayor Gutiric went into oflice there was no merit system in I'ittshurg: but he sion established an effective one of his own, and nt the 1907 session of the Pennarivania Legislature effectively co-nperated With the Pennsyivania Civil Servlce Reform Association and similar bodies, with Nayor Dim. mick, of Seranton, and the business foriies of second class elties, to secure a inw whieh would permanentiy estahiish the merit system In them. He and his colicagues sueredid. A short time ago some one asked the Mayor how :nany Iem. ocrats hee had appointed to offiee. I Iis immediatc relly was, 'I hnve a't the least idea. The fucstion of party has never entered into the runtier."
"The tax ievied in February, 1006, before Siayor Gutlirie assumed offiee, was 1 is mitls. Thit levied in Fehruary, 190\%, the irst under his adminhstration, was 121 mills. This year, had it uot heen for the annezation of Aliegheny.
the city would have required only 10 or 10 . mills. The Mayor's trat eatimate was 11 mills; but the final fgures, as made up by the Finance Committee, howed that the lower figure would have been sufficient. When the Mayor eatcred offle, there was a cash defleit o? $\$ 4(0), 0(0)$, caused hy the payment of hilis left uver from the previous administration. He closed his tirst year with a smail surplus, and the second (100:) with a large one. The total tax valuathon of the oid city of Pltshurg is $8599,852,903$. its total bouded indebtedness is $8 \mathbf{2}, 956,001$, and its net indehtedness (arrived a* by dedneting bonds in the saving fund) is $810,582,425$, or .021 per eent of the raiustion. This highiy uivsirable flaneiai resuit, however, has not been reached by any faise economy. Inadequate salaries have been raised. Ali the street repalring for $190 \%$ was paid for out of the tax levy, and the work on the fitration piant has heen purhed unceas. ingiy. Enough of the fiter heds are finished to provide for present needs, and as soon ns they ure 'ripened' and the punping machiu'ry re. arranged the eity will have filtered watur.
". For many year, under the old réglate, Pitts. burg had been free from many of the evils of an open elty; hut $n$ syndicnte of Counciimen and joliticians had made immense sums out of the business. They controilod the leases if the houses, whief they sublet at exorhitant sums They also controlled the supplies whilch were furnished to them. The Mayor issued but one order for the reguiation of this district. Iie made no attempt to soive the entire problem. As the law was pinin alout the sale of liguor. he deeiared that that must stop nbsolutely ; and that no house could be run on streets on which there were surfnce cars. This order proved to be the death blow of the eombinntion that hal previously existed. The politicians, when ther heard the order, laughed. They had torket every other Mnyer, and they thought they could fool Guthris. Ile would need (oumeis and must necessarily 'ileal' with them. \$3the nected no one, and he 'denit' with no one lie walted six wecks for his warning to he taken. and then he neted. One Saturiay night the pollee drew a net around the district, and over one thousnuti nrrests were made. Then came the final blow that stopped pelitical interfer ence. Coder the old system police magistrates had becn in the linbit of holding tines or delar. ing sentences, which, under the pressure if political influence, were romitted or suspended Such money as was paid in was hold for a month before being turned over to the city trea sury. .. . Mr. Gutinie cstablished the rule that nli Ines and jail sentences, once impused. would hare to stand unless revoked liy the comity courts. Not only have the rivenues of the dity ingely Incrensed by this polin y, as We have nireally scen, but one of the greatest sourees of political evil hus been remored Since this policy was inangurated there has been no politiog or machine interference th the administration of the faw. Inchlentuily, 1 may mention that one Comediman went to jail for his complicity with the protectlon of the surlal evil

The siturion in Fitsturg is so ciliangit ais improved tilat the Sccretery of the Civic Voters Lrague was able to may recentiy; Whlle we have forced Councils to le good, eiected the best

## MUNICIPAL GOVERNMENT

Mayor In the country, put in county offices men of alillity and honesty, forced the politicians to give us a good clvil wervice meagure, I m convinced that our most importaut victory bas beeu to convince the politicnl leaders and busses that there is a new era in politics, and that for the futire none but the best men can be electel to publlc officc." "- C'lnton Rogers Woodrufi, A Mayor with an Ideal (The Outlook. A pril 25, 190)8).
Defeat of the Reforming Mayor in 1909, hut no Discouragement of the Reforming Activity of the Voters' League. - Unparalleled Success in convicting Bribed Officials and their Bribers.- Mayor Guthrie, nominuted for realectl in 1909, was defeatud by the uom. hace of a currupt party "machlue ": but this put no chick on the efforts of the Voters' Leaguc behind him to hint down the corrupting influ. eners and agencles which hod mastered the clty once more. A fortunate acchlent gave the Lengue a single clue to the hidien lnhyrinth of rascality, and it sutfieed for astoundiug reve. lations. it tracked and canght, tirst, a single ex - Councllumn, who had handled large sums of bribe-money, recalving and dividing it nmong his fetlow members of a gang known as the "Hus Six." This mun. John I'. Klein, when he found himself trelplessly in the twils, nad likely (1) be the scape-goat for all his confenerates and thetr corrnpters, made confegslons which untovered runch, if not all, of the brihe-giving and bribe taking of several past years. Down w the 23d of Mareh, 1910, when the followtng aummary was published, the rasults coming from this confession had been as follows:

Iup-nitentiary - W. W. Kamser ex.joreshlent of the Grיrman Sational Bank: Willam Bramt, ex president of the Common Conneil; Joseph C. Wasson, ex-Conncllmme, and II. N. Botder.
l'mer sentrnee to the peniteuthary - John F. Kleln, ex-Coumeilman.

A waiting disposition of their cases - F. II. Jennings, presillent of thc Cohumbia National hank, inil F.A. Grilln, conshier, who pleaded welve ronifcule re.

Inder initctment - Forty one Councilmen.
Confesgors of bribe-sharing - Twenty Conncilhen, former nud present, select and Common.
 ant present Conucilmen.
As this goes to the printers, the bribe glvers. thrluding some of the multi-millionalres of l'ithshurg, are being dragged luto court.
St. Louis: A. D. 1900-1940, - The Unearthing of Thievery amd Corruption by Circuit Attorney Folk. - Prosecutions, Confessions, and Convictions. - Une of the most notable and ef ective cleansints of a ecrrupted munleipnlity that has orcurred in the linited States was accomphinhed in St. Louls ly luseph Whgate Folk, using the powers of the ofllece of ('irenit Attorney of the City, to which he was firtunately elected in the spring of 1910 . That bribery was active ninong the Aldermen nad ( ommilmen of the two chmmers of the municipait legistature, and that unscrupulous men of binimess were lathltually employing it to secure inipuitous frinchises and jolis, appears to have her: $n$ mates of eommon helief: but the belief hall not rousad feelligg enouth to bring about any change, until the opportunity to act was Liven to Jr. Folk.

## MLNICIPAL GOVERNMENT

One notorfously suspicious transaction, which consolldated the street railways of the city, was outlawed for all but a single actor in it by the Missourl statute of limitations, which hars crimlnal proceedings after three gears; but the one man bind been ahsent from the State during so large a part of those thret years that he could be reached by the law, and the Circult Attorney turned the search ligit of a grand jury investi. gution on his case. This man, R. M1. Snyder, of Kansas City. was Indicted, arrested, and held for trial under bonds of $\$ 50,000$. From that beginning Sir. Folk went on to the probiug of a more recent franchise grant, and unearthed the fact thint $t$ wo deposits of cush, for sums of $\$ 80,000$ and 875,000 were boxed in safety deposit vaults, euch guarded by duplicute keys held on one side hy a corporation agent, and on the other side hy igeuts of the Council and the Aldermanic horly respectively, waiting for di: tribution among the officials who had sold the public frunchise for those sums. A rival corporation hal, meantime, attacked the legality of the grant, held it up by an injunctlon, and so kept these corruption funds in suspension between the bribers and the hribed.

By whint resolute persistence, what shrewd. ness, what bold ventures of surmise, Sir. Folk umovered the eunntugly secreted facts, torritied the "boollers" aud the hribers into betraying one another, and fastened their criues upon them, ennnot be tohl here. Two of the wealthy buyers in the ruscully trale, a Jr. Turner and a Mr. Stock, became winnesses for the Sitate against the men whose crime they had bought. The two arents for Aletermen and Councilnen, who heil the kegs of the deposited hribe, J. K. Nurroll and Charles Kratz, fled to Mexico, forfeiting thelr hait. Three others of the necused. Emil Neysenberg. Julius lehnann and ilarry Faulk. ner, were tried, convlited aut sentenced to im prismment for thre and two ycars. The escape of Jiurreit mad Krat\% beyond reach of extratition embarassed the prosecution of the remaining confederates, who scemed likely to go free for lack of suthlitent evilence : bui unexpretedly, in september, 190, Hurrell reappeared in St. Louis, sitying that he could not cudure cxile any longer anil was ready to beur the penalty of his wrongloing. On his confessions eleven alder. menl were arrested, charged with bribery in two cases and with perjury before the gratul jury. Scsen others mate successful tiphts.
In the course of the next yenr another of the refurees frou justice returned, surpusing hts time of danger to have passed. Thl was Charles F. Kelly, who had been Speaker of the st. Louis Ifouse of Delterates nui a rendy tool of Edward Butter, th" louis politieal "13oss" and legislative brol. Buller hasl been involved in the prosecutios :ad Kelly liad fled to avoil giv. ing testinuth. against him, belng paid. as he conferscl timally, sooton0 for his retirement into obscure foreinn parts. What happened to inim later, and what ronfessinns he made were the subject of a brief story in The Outlook of No. vember 5. 1004, In part as follows:
" Ileturning when It was believed that his patron was secure through the operstion of the statute of limitatlons, Kelly was arrested and sentencel w two rears in the penltentisry for perjury la his testimony ln one of the boodle cases. He appealed to the Supreme Court. and

## MUNICIPAL GOVERNMENT

mean while was rearrested on the charge of ac. ceptligg a bribe in another deal. At this junc ture he complained that Butler had deserted hlm and had advised him to plead guilty. 'It did n't look right,' be said in an Interview, 'that we shouid take our medicine and that he shouid go free. Therefore he determined to reiate hla deallne- $\boldsymbol{q}^{-1}$ ith Butier in the bribery cases. In hls tatement he alays that he lias reason to believe that boodiing jad been in progrcss in the St. Loui SIndicipal Assembly for the last twenty. tive years. The boodilers did not fear exposure, because they 'knew that most of the poilticians and inany of the large financiers of St. Louls ${ }^{\circ}$ wouid be with them. Ono prosecutor who attemptel to lring them to justlee was bluffed off.' When Jr. Folk began hls woit, there were thrents of asassalnation, and fnaily a delih. erate plot was arringed to ruin the prosecutor's influcuce iny faisehoods. 'Prominent fipanciers' as weil as the boodlere were engaged in this attempt, accoriing to the confession.
"The geueral scbeme of the boodie 'comhine' is already fairiy well known, hut Mr. Kelly ands some interestlog detalls. There were nineteen mombers, and the combine was not along party ines.' 'My expericnce.' he rcmarks, 'has been that boodiers line up accordiug to thelr interests, and not under party standards.' The memhers of the combine held reguiar meetings, and decided hy a majority vote on the prices to be charged for varions measures. There was a fixed sched. ule of prlees' for bills in aecordnnee with the value of the privileges to be given. The comhine rarely sold out for less thmn a thousand dollars, thongh once 'some of the bors took five dollars each, but werc so ashamed of it they would not speak of it afterwards, heeanse the price was so smali.' The combiae was In the hahit of selecting one of its members to act as agcnt in the deals, and oniy in onc or two instanees did the represedtative prove untristworthy. 'Among ourselves,' says this frank homlier, 'we had a ingli coulc of morais, and It was considered ex. tremely disitoncat for a member of the comhine toacccpt bribe money withont dividingit among his fellows.' A particulariy interesting feature of the confession is the warning wbicin It gives to Sit. Lonls of the cianger of a relapse to the old coniltions when Mr. Foik's term as C'reuit Attorney slaall have cxpircul. $K$ clly asserts that Butler aivised his indileted frlends to get contiumanees until a new Clrcult Attorney sionod he elected, and that he promised them that the prosceutor shoukl be 'hls man.' 'What, asks Kelly, 'has been done in St. Louis? Nothlng at all. The prosecutor lans, after three years' figlitlug, whipped iss. But it seems to me, surh is the eondition of publie sentiment in St. Louis, that When the new prosecutor, who of eonrse willi be Fif IButier's man, takes clidrge, boodicers will he In elorer agala.' In his oplnion the great troubie is that 'so many of the iarge corporations of the city are mixed up lin boolle one way or another' that the town is willling to tolerate corruptlon."

Hire, as in all "xposeri cases, the power in orgauize "boblle" or "graft" in municipal government is found to have been derived from the "machines" of the nationai politienl par. tles.

The exinihlt of cbaracter and ahiifty made by Mr. Foik in lils extraordlpary enforcement of law in St. Louis, to the overtbrow of the strong.
hold of municipal thleves and corruptionies, so commended him to the people of Miseour that they nominnted and eiected him Governor of the State in 1004, deapite the mont desperate endeavor of the party organizations to defeat him. In his higher office he continued his work of reform.

San Franciaco: A. D. rgoz-z909. - The Struggie with Political Corruption, - "Before the enactment of the charter of 1800 the major. alty in San Francisco had littic power, and suc. cesal ve polltical bouses had ignorei it. Instead of this, they aimed to control the municipal loard of Supervisora, which had the awarding of contracts and franchises. The charter of $1 \times 00$ changed ail thls, hy concentrating vast pow (rs of appointment and removal in the mayoralty, the oftice being filied hy hlempial electlon. The office was ably and honestly adminlatered for the first two years hy IIon. Jas. D. Phelan.
" During the latter portion of Phelan's term there occurred a fong and hitter industrial strue. gle, known as the 'Teamsters' Strike,' ia which the sympathy of other iabor organizations was deepiy stirred. At the request of the cmployers Muyor Plielan consented to placing the city pollce upon drays and wagons as guarls for non-union drivers. Thle petion aroused vlolent denunciation on the part of the union labor leadcrs. It also served as a political objeet les2on. It was seen that to gain possession of the mayoraity in the interest of union fabor would be a great poiftical advantage, especially In a recirrence of induatrial strife.

In the foliowing election (1801) Eugene E. Schmitz, orchestra lealer at the Coiumila theatre and head of the musicians' union, the can. didate of the union labor party, was clected mayor hy 21.776 votes as against 30.365 votes somewhat evenly divlded bet ween the ikepubil. ean and the Democratic condiontes. Two yesrs later (1903) Sehmitz was retlected in the sine way, and in 1905 he was agaln successful, thls time securing a large majority over the fusion eandldate nominated by the Democratlc aal Repubilcan parties eombined. Throughout the whole period Sclimitz's ehlef politicai manarer was Abrahum Rucf, bative of San Francisco. well educater, gifted and ambitions, an adr It politiclan, previonsig affifiated with the ikepub. liean party. In 1904 lic was a dejegate nt large for California in the Republican national cunventlon at Chlcago.

Almost from the beglaning of ticc Schmitz diministration it became recoguized throughout the city that the most eertain way of obtaining favors from the maror's office wis throngh the law otice of Ahraham Rnef, who nctel as the legal and politlcal adviscr of Mayor kichaits. lhef steered a different conrse from pulitical bosses genemily. He kept his oftice oper fur all comers, higit ani low. He was thoronghly accesslhe. Ife weicomed all appileants anil dealt out encoumging assurances to every request. It soon heeame a matter of general belief that under the gnlse of legai scrrices fiuef was seiling licenses, sceuring apcelai privileges for farored clients and protectlng filcogal concerns. Ruef's income increased enormonsly during the Hrhmitz reglme, but to the et:d tie maintained thls pretense of 'attorney's fecs,' and only few months before he was indictel for extortlon he toutly maintained before

## MLNICIPAL GOVERNMENT

public meeting that he 'had never made a dolpar out of politica.
"In 190 the grand jury made a thorough in. veatigation of the munielpal administration and became convinced of the exiatence of a widespread system of bribery and corruption. In ite report to the Superior Court, fled Angust 19, 1005, it stated : 'that wholesaie and widespread violation of law is open, notorious and flagrant; that It meete with the acquiesence of the msyor; that it receives the approval of the police commission; that it is aided, abetted and protected by police officials. . . . We fud that rice and crime have been organized so systematicaliy, and fostered with such vigilant attention to detall, that nothing which buslness acumen or polltical expediency could suggest has been neglected or omitted.' For lack of legal evldente, however, or the funds with which to carry on an Investlgation for securing it, no ln. dietments in these matters were returned.
$\because$ The muriclpai flection of 1905 gave to Ruef the control of the Board of Supervisors as weli as the admlinistrative departments of the city. The great uphearal in business conditions produced by the earthquake and fire of A pril, 1906. brougit new and weolthier cients to his office. Evidence made public ln the later prosecutions goes to show that Ruef was paid to secure from the Board of Supervlsors for the United Runlruals pernission to use an overbead trolley systern for operating its strect cars instcad of the cable system in use before the fire : that the gas company had bribed the supervlsors to mise the price of gas from 55 to 8.5 cents per thousand feet ; and that the tclephone compa. nits had used the same means to promote their interests.
"The work of securing the evidence upon which criminal indletments collid be bised was performed by a few determined men. liudolph Spreckels, a young man of iarge fortune, came formard with a pledge of $\$ 100,000$ for the axpeases of a searching lnvestigation. I istrict Attorney William H. Iangdon, who had been eler:ed on the same tieket wlth Scbmitz, annourcel that he wonld conduct the inquiry without regard to party aflitiatlons, and ap. pointed Francis J. Ifeney, assistant district nttornty. A man of courage and devotion to jublie honesty. Heney had gained distinction ly the succossfil prosecutlon of land frautis the fore Ibe Federai courts ln Oregon. IIency reqfuested atif obtained the assistance of Willian J. 13urns, a detective ln the Cinited States secret Survice.

- lhuef and Schmitz were soon Indicted by the grabi jury, charged witl extorting money from restaiurant proprietors. During the progrew of his trial IRuef cianged his plea from 'Sut guilty' to 'Guilty.' Iulgment against hia was delayed, however, by the prosecution for the purpose of gaining evlflence against otioers. firhmitz was tried on a similar charge and with the aid of testimony given by Ruef was couvirudi and [July, 190\%] sentenced to impris. nomeat for tive ycars ln the state leniteutiary.
- Meanwhile, some of the weaker supervisors having been caught in a trap set for them hy Burns. confeasions of bribery worr oltilned by the grand jury from fifteen out of elghteen members of the Board. In retirn for these confessions the district attorney entered into imniu-
nity contracts with the supervisors, and becamo temporarily the directlng power in the munieipal government. The offlee of mayor was declared vacant, and IIon. Elwand IR. Tayior, a learud and consclentious man, a professor in the Histinga College of Law in San Francisco, was mpprinted to tie position. Graduaily the whoie lionrd of supervisors was replaced by honest and experienced men.
"On the confessions of the dincredited super. Fisors there followed a iarge number of indict. ments against Rnef, Srimit\% and the various officers and emplogees of the public service corporations concerned ln carrupting the city government. 13y May 25, 1907, the number of so-cailed 'graft' indictments was 137, agalnst 10 persons. From coliateral issues the number of indletments later rose to 160 . The ludict. ments against a few of the accuserd were subsequently dismissed. Five of the original 10 accused persons had beca pitt on trial one or more times previous to January, 1010, -the explration of the term of oflice of District Attorney Langdon. These trinis were carried on with ihe utnost rancor on the part of opposing counsel. The grestest difflculties were encountered in securling juries anil in severnal cases juries failed to agree. Throughout the communty and in the publie prints there developed faetional division and bitterness. This factional hatred culminated in aets of riolence nuit terrorlsm. Two houses in Oaklandi. Alameda Co., one sechpici, the other ownedi ho Jamex L. Gat. lagher former superrlso" and lientenant of Ruef. later a most importint wltuess for the prosecution, ware dynmmited and nearly destroyed. For these crimes is culprit was discovered and sent to the state prison for iife by the courts of Alameda County. On November 1:3. 1908, during the triai of liuef on bribery charges, Mr. Ilency was shot from hehind white at his post ln the court-room by a halls. demented spnomathizer with the accusol. I day later the rissassin took his own iffe winlle in fail. 13y the merest chance Vir. Henfer's wound proved int to be fatal. and after a few montis lic returned to his duties.
- Even in the frw caves in whieh conrictions were ohtained judgemert was arrested by appeals to the higlier courts. Whith wniformly resolred all techuicil questions in $\mathrm{f} i \mathrm{i}$. of the accused. To the end of 1909 , the record of these casis is as follows:
"Number of iudictments 160.
- Contracts of immunity 19.
.-Trled and neguitted twice: Tirey L. Ford, attorney for the lidted kailrouis.
"Trials in which the jury disengread: Louis Giass. manager for the I acitic States Telephone Cu: Tirey l. Forl: Aliraham lunef: Patrlck Calioun, president of the Cuited ianifoads.
" Jublgnents reversed by higher court, Eugene E. Nollmitz antl Lomis Glass.
" illea of guilty nuliitied by higher court: Abraham liuef.
" ('onvicted. but appeals to higher comrt in progress: Abraham linef and M . W. Coffer, a superrisor who broke his lmununity contract.
..Tina it is evident that the prosecution has so far failed to punish extortion and bribery by criminal procethire. The real results of the fresecution are to be found ln the prompt reform of the municipal government of San Franclsco

## MUNICIPAL GOVERNMENT

## MYTILENE

In 1007, and, In a lerger way, In an awakened publlc consclence and a strengthemed mense of clvic duty. These results are not llmited to Shan Franclaco, but are part of the great work of polltleal regeneration in wheb the whole coun. ry ls concerned.
"The question of firther efforts to secure convictlons in these 'graft' caves was mule a polltical lsaue In Nan Franelsco by the canillacy of Mr. IIeney for the ofliee of district attoruey In 1909. That a large uumber of voters conald. ered such continued efforts useless or hopelens was shown by hls defeat by a derlslve majorlty of 10.600 votes against hin.'

The new Mayor placed at the head of the C'lty Government by thls electon was the noml. nee of the same L'ilon labor l'arty whleh had seaterl Selomitz and hle manager, Thef, and it was mide plaln that he represented the onposi. tlon to all that had lxeu done and attempted toward munlelpul reform.

In the United States: The Question of Treatinent of Expatrlated Citizens Who visit their Native Country. - The Principle asserted to Germany. - New Law of American Citizenship, - Comsequent on an inereas. fing disposition in Germany to curtaif the revisiting of their nntive comitry by Germans who had beeome naturaizerl eitizens of the L'uited states. the American Ambassador to iberlin discussed the subject with the Geriman Foreign Minister, on the 1:2th of August. 1902, nod reported the substance of the conversation to Fashlughin: '. statements were made on the part of the embassy as folluws: No sympathy whatever is felt with the prrsun whi defiber. ntely emigrates ant avails himself of the Ameri. can natulalization laws for the mere purpuse of escaping military service in Germany, and there is no whith un thie part of the American anthorfitis to enabie surlh persons to maken eunser. ience of their American naturalization. The embacsy has aiso consistenty deelineif to interrene fil behalf of persons whose wish was to make their permanent residence in Germany. It i. thought, bowever, that where German emigrants bave fulfilled the vonlitions urcussary to catitle them to be truated as Ameriean citizens' they should actualiy le so treateri. and when they have emicrntei in goom fnith they should be permitteri to sojourn in Germnny, for their business or jilen-nure, to visit at their former homes, or to enjoy the benetits afforimi by German watering places, ete., in aecordance with the terms of the treaty with I'ruscia of $1 \times 28$. The wivereigu right of I'russia to expel permons whose presenee is not considieredi ilesirabie is not contested, but it is thought that the $I$ meri. can Government has the right to know wiy the prosenee of any Incrican eitizen is so evnsid. eremi.
"Dr. Von Mahlherg's nttention was cailed to a number of cases now pending. where naturaiizeti Anurrican eitizens hare received orders to feave the country nfter a stay of a few weeks. IIe salid that he wondi take the matter up per. sonaliy and would communieate with the Prusslan minister of the interior in regard to it at once."
In repiy from the Department of State at W'ashington, the action of Ambassador Winite
was approved, and It wen ash further: "You should lowe no sulenhle opporturity to press and to emphasize the coumilerut fons which you wil. tanced In your Intervirw with IIr. Von Muhl. berg. The esence of the right of expuision Which the German States clalm la tifat it ahould be reasonabiy and justly applide in cases ohvi. onsiy calling for soeztremo a mpanire. Expulslon should not be Invoked indiscrlminately, to as to operate as a deterrent to the exerclise of the rights of expatrlation nnd acquisition of new alleghance granted under the naturallaation treatlen, or an an to neutruifec, by indirectlon, trentument mipulated therenfter regarillag the reengultion of the new national plinmactur." Pispret rrlating to the Fureign Nelatione of the $E_{.}$. ., 1902, $p .4+1$.
The doctrine of citizenship atated hy Ambas. sador Wirte on thls occasion was embuiled suh. equrentiy in a new citzenship iaw, which came into force on the 2d of March, 1007. The new law was based on a report made hy an offlciai commissitit, ont of the members of which has written of it as follows:
"When a future historlan shail write an ac. count of the achlevement of this the most remarkable aiministrathon of our government sluce the Civll War, he will give prominent place to the natnraization law of a year ago amd tic citzenship law whiclr was upproved iast Marcha and is now beconilig effectire: for these two mensures are the emimiuation of a humdred gears of effort for reformi, aml anfect the very foninda. thut of our pulitieni structire.
"is fne nis the naturallzation inw is concerned, the uijucetlons is it come chielly from prity conrts throughant the eountry whilit ure mos not permitited to nuturalize, and whleli formory derived part of thelr preatige nond thelr foes frour naturalizution husueas. Dissatisfaction with the new eitizenshif liw fows from those people who lmve been Ilring abroud in fuacted securlty of their American eitizenshilp, and who now find themsilver oliHgal to tike poslive sicps to proserve $n$ statis whilel they have heritofore supposed uttached to them indief. nitcly, wilhout the jurformance of any oblign tionsion their part. Iboth of these lisws originutei In the Ilonse of itepresentatires, hut each resulted from a report madie by exicotive officers, and the Semnte ean chaim fitile agence in them. The citizenship faw was hated upon n report mirle to Secretary liont hy a board of officers of his lhepartmert, the members being dimes lirown trott, the solieitor for the Department of State, i)avill Juybe flli, arr Minister at The llagte, and the writer of this urtiche, with Sammel 13. (randall. 1'lı. I)., of the lepartment as tiecretary.

From this report sprang a hill, interxherel in tife flouse by the flon. dames Briek Pirtins of New Vork, whitit became a Inw on Marih ?nif.

- The lnw does not change or even moxllfy the Anuritna fuct rime of eltikeusilp. Tlunt wis alrealy suttled by the Constitution and the depisions of the Sipreme Court. Anyborly born in the l'nltixl states, no matter what his race, unies he is an Indian lising witit a trihe, or however ineligible to orr cithenshin he may be for any other rrason, is n citizen of the linited States.
" Bromally spenkine, an individual becomes a citizen of the Unlted sitates hy blrth or naturai-
lzation, and thear factin have been well sethiof: but how dow lio lowe Amerlean cidzenshlp: This was the question to which the citizeruhip boarif chleffy addressed ltecif, an:l which (ion. gress mettied a fow months ago hy dechriug that mil Amerlcan thall be beid to have expmetrint. 1 bimself when he becomes naturallzen in a citi. zen of another country, or when he takes na oath of alicglance to another atate, or when he If ves permanently outalde of the Unlted Ntates wltlosut intent to return.
- We have had a conntantly increasing number of co-cailed Amertean clitizens ll ring abrowal - men who have Ilval In the L'nited Rintey for only tive sears and in many cuse lave frumbir. letily secired naturailzaton papert after less than flre year of remldence; who nevrer wire really clomiciled there; who never liave pro. formed any of the duties of American citizen. Nhlp and who never inteldicí to do so.
Untll tire new naturalizatlon faw went Inin cffect, it wns not actually gegninst the fetier uf the law for $n$ man to eominit the Prand; firs. when he nipilid for citizenchif, he was repuirid merely to slow that he had realdeal in the Cnltel States for five yeurs, and no intuity was natic eoncernlng lile fature intenthas." - (iail. larel flnat. The excuse of the Government wols that the warriors used the women and cithliren as theids.
A. D. 1905-1909. - Defeat and Fail of the Calviniutic Party of the Rev. Dr. Kuy-
per. - The Euffrage ane Education Quenper. - The - The aiz principal Parties. - Succeas of the groups of "the Right" in the inteat Elections. - Elections to, the lower chamber of the States Generai, held in June. overthrew the Conservative majority in that body and gave the Likerals a small majority of 4. An important lasue between parties iul been on the question of univermal silliage, but the support given to ite advocules was nut strong enoagh to Juntify immedilate attemptis on thele part to carry any measure of law. A roysi Commisaion was appointed, however. to investlgate andi report geucrully on the nied or expeltericy of a revision of the Constitution The defeated Ministry of Dr. Abraiani Kuyper represented an ultra Calvinistle Chureli element in pulites, and its defeat appears to have beell due in the maln to edacaionai iaws which it hat carried through. According to the intech review, It Gids, from which the following has heen tranalated, the aim of the new iaws andi the objection to them were much the same as in the Engliwh controveruy over the Educatlon Act of 1002, when church and clericai tnfluences carried the day against tive supporters of secular whols. "These educational laws." salif De Giif. " were unanimously supported by, if they did aot wholly originate with, the ciericais, or the Aati-ltevolutionary party, as they call themallves, of which Dr. Kuyper is the astute and able feader and lifead. They had the undivided support also of the Catholics, but were strenuousiy opposed by the Lilx'rais and ali the antlclericals, Inciuding the Social Democrata. The Antillevolutionists and Catholics on the one bant, and the Liberals and their aliles on the uther, form, respectively, the litigit and Left in the Chambers."
Since 1005 there seems to have been ittie if any change in the butch parties. On the approach of the quadrenniai generai electlous of Junc, 1000 , a correspoudent of the Imudon Times wrote of "the complex grouping" of the political partics contending in them: " There are six witeh may fairiy ciaim to be important. The larget is probabiy the Cotinilc. It is esti. mated that a third of the jopulation is Catholic by riliclon, and of the Cuthoilces a very large proportion belong to the Cationlic political party. aucl vote consistently in accordance with the commands of its teaders. Next to the ('atholics cone the etrict Culvinists, who bave been urgauized by Dr. Kuyper into a emmpart aud must formiduble party, generally calinit the Auti-Rérolutionnaire party. It tinds itw chief supproters aumen the rurai population and the petite bourgeolsie, and owes its name to the dowtrine, sellalonsiy prenched by Dr. Knyper. that the Remical and Liberpl parties are foment. ing ar antl-riligions revolition, and that it is therefore necessary to chonse in tween Christianlty und IIeathenism. This doctrine is generaliy kinwa as 'the antlthesla,' uni, though its in. therace has woned somewiat In the towns. it atill las conaiderabic intiuence In the country. Ithemly alliced to the Anti- Révolutionnaire party 1. the Christifk IIstorisch party, which is nore aristucratic, bist less energetic, with maus principles but no very definite programme. It not infrequentiy speaks agalnst the Caivinist party. but as a rule joins it when it comes to voting.
"These three parties. Catholic, Anti-Réroiu
tonnaire, nud Christijk Ilistorisch, form the iligit. Tise laft is comproed of the ohd and Cinlted lideruls, the Remitcaln or Vrljzinnige Democratea, and the sochallate, representing an shaden of opinlon from what lu Fughad might be called Whigeiam to extrome socialism. The quantions witch roully divide these parties. as distingulshed from the purty cries on which the elcetion in lieling fought, are Clierlculians and socialiam, und a viry barge piruportion of the electors are mut ynite sure which encuy they most fear. There is no douht that the Aist kivolntionmaire party und the Catholies represent two forman of Chricailsm, whle the suchalists are uponly Coilectivests. The other parties, with the exception of the Vrijzinulge Ismocraten, can the better deacribed an opposed to the two extremes than an prearnilig any clearly marked characteristica of their own."
The firet latlothig of this electlon tork phace on the 111 h of Jane and the second on the eat. The Anflilivalutionmires came out of it with 23. the Cahbolles with 25 , the Chrlstij) liiatorichels whit 12 , making 00 for the gronis. of "the illght": agninst a totai of to in the groupa of "the leff." "f this minority oniy 7 were in the ranks of the thrial Ir-bux.rats. Dr. Kuyper was among the defrated catultiates.

A. D. 1902-1905. - Negotiation and Senatorial Deatruction of the Hay-Bond Reciprocity Treaty with the United States. In Noremix.r. 100n, a Treatr of bectproctey which would have sottied the ingespanding Hlaputes over Aurerim rights of tishing on the jewfoumilhud coast. "n terme of most equitable alvanage to both comeries, and especlalle faverable to the fateresta of the generai public in the Cuited states, was concluded and signed at Washington lir secretary Ilay and the British Ambaswdor, Sir Milland Herhert. The Prenier of New fommilani. Sir Itohert Bond. had taken a princlpal part in the negotiation. and the resuiting dicument was known consequentiy ns the Ihar. Bond Treaty. It secured to the New Englind fishermen the coveted pris. ilege of luying that and other suppiles and bitiaz cfers in Ferfananland mots: and it admittei the greater part of Amerlian manufac. tures into the isiand duty free. On the other hand, it opened the markets of the C'nited States
to the foh and wh prolisets, the coal, oll, and orea of Newfoumelind. for the benefit of the consumers of the country. The treaty was halled with matisfection ly the general pullic of the C'inlted Dtater, but oppowily few inter. ests whome galn might be lectened if any bremeh in thelr nionopuly of the ain of calted fish and conl snil oll showild be permite ed. The majority which hat whlom falked of late to be retainalle In the United Btates Nenate for the wrico of such prirate interents, agafost the pulile final, was prompily orgenlzeil by Sen. ator Lomlge, frat for porketing the Trenty throughoue more than two yearm, and Hinally for amemilig it to death, In Febrnary, 1903. The provlalons the mude it eivantagevius oo New. foundiand were cut out, and it wan reduced to a state which male it insultiag an on offer of reciprocity. It suffised the fate which, in late yearn, is quite rertain to befall any priject of real stntesmanshlp tine bas to throigh the bancls of the L'nited staten Nent

Constitutle: of the Tribnanal. - The endlces frictlon that has atiended the excrcise of treaty. rights by American fibhermen in the Newfound. Iand filieries was freahly ruighened ta the fall of 1905, by a new enactment of the provincial leglsinture, to prevent the ale of balt or outfis and supplies of any nature to forelgn fishermen. and by orders from the Minlater of Marine and Flsheries forbidiling vesuds of Americsn regietry to tish on the Treaty Cosast. Thls reopened de. bate between the state Inepartment it Wahling. ton and the Foreign Office at London, over the Intentlons and meanlagy of that firse erilicle in the Treaty of 1816 which bas been a smirce of Incesanit dispute for alpety one years. The following is the language of the article:

Artict.e I. Whereat difierences have arimen reapecting the liberty claimed hy the United Statea, for the Inhabitants thereot, to take, dry. and cure fish, on certain coasts, bays, har boirs, and creeks of Ills Britannicl Majesty's Inominions in Americn. It is agreed between the lligh Contracting Dartles that the Inhabitants of the alil [inlted States shall have, for ever. In common with the subjects of Ilis Britannilis Mnjesty, the llherty in take fish of every kind. on that part of the southern crast of Newfound. land, whleh extemls from Cape Inay to the Ra. meai Islands, on the western and northern coast of Sirw foundiand. from the sald Cape Ray to the Quirpon Istands, on the shores of the Magialen laianis, and aisn on the coasts, bars, bartmurs, anil creeks. froin Mount Joly. on the sonthern curat of Labrador. to and through the Sirelghts of Bellcisle, and thence northwardly Indefinitely along the const, without prejudice, however, to any of the exclualve rights of the IIudron'm May Company. And that the American fishermen shall aleo have liberty, for ever, in dry and cure moh in any of the uniettled bays, barbourn, and creels of the southern part of the coast of New. foundland, here above described, and of the conat of Labrador; but so soon as the mane, or
any portion thereof, shall be settici, It shall not be lawfit for the cald Aahermen to dry of rute
 agreetisent for much purpoes, with the Inhablt anta, proprictore, or puasemore of the grouns! And the L'alted traten hepely renouncell ros ever. any liberty heretofore enjoyed of ciomed by the libabltanta thereof, to take, iry, of cure till on or within three marine milew of sny of the coantw, bays. creeks, of harloours of 11 io Britanalek Majesty' Dominions in Ameplia. not included withlo the shove nisentioned limits provided, hotever, that the Amerlionn fisbrr men shall the admaltzed to enter anch bnys if Jarbours. for the purpoee of shelter, anil if re. salring damages thereln, of purchasing wool. apd of chcaining water, and for no other purjoue whatevar. But they thall be under such retiric. tloes as may be pecespary to prevent their tak ing, drylng, or curing fith therein, or in ant othef manner whatever mbaing the priviltgis beruby peserved to them."

With refereace to the present ohatrucifin to Amertran filing In Niew foundland waters, the contentlon of Secretary Ifoot was a- forth lis the following proproeltiona:
"I Any Ansericen veral is entilicil in co Into slie watera of the Trenty Coant and ist tiah of aty kind.
"She derives thle right from the Truaty "ip from the conilitions exlating prior to the Trraty and recognized by it) and not from any pernif. slon or sithority procedling from the Givern ment of Newforindland.
2. An American vessel secking in exircise the Treaty right is not bound to ohtain a liwence from the Ciovernmens of Newfounuland, shil, if she does not purpuse to zrade as weil as tish. she is not boued to enter at any Newfoundland cutom houne.
"3. The only concern of the Oovernmen! ! Newfoundland with meth a vessel is to call : proper evilence that she is an Anicrican risell. and, therefore, entitixa to etoraise the Treaty right, and to have her refrain froth vplating any laws of Newfoundiand bot inconsistent with the Treaty
4. The proper evilumpe that a vesull is an American reamel and enthiem to exercise the Treaty right is the product on of the shijis papers of the klnil generslly merognisenl in the mntitime worli as evidence of a vescel's national character.
" 5 . When a reasel has produced papers sho" ing that she is an American vessel, the ofliciais of Sewfoundlam have no concern whth the ehar aeter orcxtent of the privilegea accorderl to sucb $n$ veracl by the Ginverment of the Unlted sister No question an between a reglstry and licence ts a proper anbject for thelf conaliferation. Thes are not charged with enforelng any law or revi. lations of the L'nited states. Aa to them, if the Tessel is American she has the Treaty right, and they are not at liberty to deny it.
"6. If any such matter were a proper subject for the consideration of the oflcials of lew foundland. the statement of this Department that veswels bearing an Americar. - $\rho$ gis ry are potltied to pxercion the Trestr wi? ? sh? uld be taken by suci, millals as conclubire."

On the Brittsh side, Slr Filwere Brey ralsed two princlpal ohjections to thear proyositions of Mr. Root: First - that "the privilege of fishing

A. D. 1904 (June), - The Burning of the Steamer Slacum. - A catastroplue uf such bur. r- : as :n lue hatorical attented the buraing of i.e encurninn steanter Geheril Nioctom, at New I-ri, ou the listh of Juuc. 1204 . The boat
left a New York dock in the morning with a Sunday-school plenle party sboard numbering about eleven huadred, - nearly all women and children. While passing through that part of the East Hiver kaown as Hell Gate, withln the Sinw York Clty llmits, fire was discoverexl In the forwand purt of the vessel. It was then floud tide, and the eddles and currenis in those waters are very strong. The captaln lecided that it would be folly to attempt to land on elther shore, or to beach his boat. He therefore headed the Norum for an lsland two milles up stream. As the bost weat forward at fult ateam, the fore-and aft dranght this created fanned the flanies and hastraed her destruction. On the diecovery of the tire hy the pasengers, the wililest panic ensued. It was found that the life preservers with which the Nocum was equipped were worthless. No attempt was male to lower boats or $11 f e-r a f t a$. The crem wire cogaged In trying to cope will the fire, but thelf efforts were futlle. Whlhln twenty minutes, the boat went wher toons, and of the women and helpless children who hat embarked sogaily an hour trefore, mort thas nine hundred wrore drownel or burned to detith Itundreds were saved by the herfile efforts of pollermen. rlver men, and the nursw onl Nurth lirother is. lani, the srat of SHW loork's hospital for contagious diseases, where the siomern wat finully bervilud. Most of thowe who met this awful death hand rome from a single densely lopulated dliserict of New lork's great "East Mile." In some cases, whole tamllies were wijed out.

A D. 1905. - The Municipal Election.Eaprelal excitements were givea to the municl. pal election of this year in New lork br the ap. pearunce in it of William 12. Ilearsi, proprictor of several newepapers in the country which aro foremost representathes of the rechle taly sensa. tional jourtalisin calleal "y ellow "The incthonts by which these parp-re won a great circulation include murh that can hardly be deserihud otherwise thas as of Itatogntam. and many groups anil clasess of juople whe are nextlesaly dlanen. Lonte. l lin Iffe, whether reasmably or wherwise. had loarned in liwh un Mr. Il morst as a champioa of homan rights. This preparel material from
 He (ehararter. for atime. of a formidable pulitical orgameation, imorporited under the name of the Indepentorre laiagr, and the great wealh which Mr llurst bad iuherited. and which his prosperous bexspapers replenisluml was spent lavishly ln explatting, supportincr. and control. ling the organiation. Ifie polltical amblions airued high, am! the naynmaty of New York City, for which his Independerice Lague nominated him in 1905. was by no means the con-u-mplated end

Ther Tammany [emew racy gave its nomlantlon to Genter 13 Mé'lellan, on of the famous Gea. eral. White the la pubitean parts named William M Irins. a prombeat lawyer of the elty. The canras was a heated one, wad as it progressid tie leagile uf Mr. Ilcarst was seen io lee dan. geromsif largu. As a consequence. Irputilirans who fearml its control of the city povernment even more than they fearel that of Tamamar. threw their votes for Jlc'lellas, glving him a
plurality of about 3 in0 orer Ilearst, and lesp Ing Mr. Ivins far beblnd. Frauds were claimed and the electlon contented by IIearat and hit supporters, who securen, hy order of s Justice of the Aupreme Court of the State, a recounting of the bellots in four ciection distriets, with the re suit of a galn of seventeen votes for Mr. Hearst Appral was then taken to the Aplellate Divislon of tise Snpreme Court for an order directling not only a recount but a recanvase of votes. Such an under was granted, hut set aslde hy the Court of Alprals. tu which tie queatiou went then the court of last resort reverslag, also, the orter under whlch the four boxes had been recounted. The assertion of frutd whs still malntained with Veliemence, und the legltinucy of Nayor NeCiel. lan's titie to the otllee lie thlied was denied for nore than a verr. The Leglainture then puased an Act directing a recanvass and recount of the eatire lathots of the election, which hat been prew.rvetl under seal. Tinls was a luinor of monthe, performed under the direction of Judge Lembert, of the supreme Court. It gave a gain of 1094 votes io llearst and a gaill of 281 to Mce ledinn. lewving a wet guin of $\mathbf{m 3}$ to Ilrurst. and diminishing Mc(ledian's piurullty luthe total rote to PTul The valhilty of his election was thereupan cidelaret

A more surersfui and far morr notable lade pendent condifiay than that of Mr. Wearst, in the New lork City election of 190.s. was condincted fur the purpinse of retalnhy Mr. William Travers Jerome in the afllee of District Attorney for the county of New lork. He hat been carriend futo the ofther on a fusion tioket, four years before, and had performed fis important duties with a coumse, a furce, an inlependence and a rectitude that wert beyomi praise. The machines of the parties woulif mot nominate him for reftiction: bint an extraonimary raily of the friemds of ginxigorernment in ull parties put him into the timd, with an remergency organs lzuthon that suthen to carry him trimuphants thromglt. lle was electeal by a plurality of
 cal jwpularity which a high quality of publle service can win bus nut often been given.
A. D. 1905-1909. - The Undertaking of Works for Water Supply from the Catskill Mountans. - In 1005 tite Citr of New lork proveral anthority fom the Leglsiature to construct thre work a necessary for anamequate suphly of water, mhitional to that which had been ilrawn for miny years from the (rotoon IRlver for ohl Niew lork aml from the IRldsewinal syatem for Ifrmiklon. The aurce deler. minell on was in the Catakil Monntains inciul ing sevenal streams. called crecke. - namely Esupus. liombout, E'hoharie, and Cambili. haviug a cotal water shed of ex. square milos. sud corimated in fumish about Foumilhons of galdus duity. eren in tiry rears. The pian of the project in its entirety contemplates the construction of eight great reservoirs for aturing and controlling the waters derivid from these strame The first io le bullt and the largest uf wuch reservolte is numed the Ashokan. on Fisopis Crock. alontt it mites west of the llud.
 the T"hatr and De-lawar* Ratway Work on this was becua in iwti li li being con slructed in the frm of two basins. haring s united length of about iwelve and a half mlies

Ifing between bilis whlch are connected by numerous macive dams. The dams necessery to complete the eaclosure of the water have a total leagth of more tian dive milles.

In a atralght line tife distance from the Asho. Itan Reservoir to New lork ls 80 milles; but the wladlngs of the course that will have to be glven to the great aqueduct from the narrole to the clty will add six miles to lts leugth The aqueduet is to pass from the weatern to thr eastern alde of the Iludson at Storm King Momesm, through a tunnel ln wolld rock, far lwucas the river bed. From Breakneck of the wevtero shore it will cross a corner of the Croton water. sincd $u$ a fitersilu, and to two tinal reseroim, the Kensico and the 11111 View. Inconnetin with both Ashokan and Kensico resirvuirs the plan of the system contemplates an arration of the water, ly tilnging it to the alr ln thousads of fountain jets.

In the parts of the great concrete aymiuci that can be bult lu an open cut its dimenanen are seventeen fert of heipht and seventeren ands half feet of whath. Where it traverses tunne:' the width is reducisl th thirteen feet. Its de. livery of water to New lork is calculated toad 500.000 .000 of gaitons daily to the water entrply of the clty. The umertuking as $n$ ohule if claiuetl to la the greatest that any cliy has ret engagerl la. whlie the englueerlag work in woised Is said to be scrond only in magnitute to tha: of the l'anama ('anai. - Aifrel 1). NEW YORK STATE: A. D. 1899-1909. -The Barge Canal under Construction. Os the Sth ef March, 1 N\%, Theoblore Ifocee velt, then fovernor of New lork. appuintel a com. mittee of private cltizens, for service without pay. In atudylng and reporting on the policy to buinted by the state of New lork in deal. iaz with lts canuis. The nppointed chairman of the committee was Cenerai Francis Vinton (ireme, and the followling account of the recommendations male lig the committee is taken frimn a paper on the subject contrihuted by General Greene to Volume Xlll. of the t'uhll(ations of the Lluffalo llistorleal Soclety, puh lishet in 1ecember, 1800 :

- The other meinbers were Major Thomas IV. Stimons of the Corps of Englneers, Enlted Sintes Irur, then stuthoned at Buffalo in charge of river and harbor lmprovements, llon. Frank s. Witherbec of lort lleary In the Champlain districs. Ilon. George E. Green. Sisie Senator from linglamton in the moluthern tier of coun. tirs. llon. John X. Scatcherl of luffaln, and the two state otticiala most intimately connerted with the uimlulatration of canais, viz.. 11on. Elwani A Bund, State Enginecr, and llon. dolin S.. Partridge, Superintenilent of l'uhlic Works.

The reliuest of the Governor was slmply Ihut or. shouid staty the canal prohlem and alrise him. .. We devoted the sreater part of the rear lage to a study of the subjeet, and male our report to the Governor noder date of Janiary 15.1 iwn . . . The Governor promplly trin-utitatil the report to the leglsiature. stipt. ine the couclusions and recommendations which it com:annel. and adrange that legislation be rrateni to carry them into effert. This was done in atcressive years. . . : tnally the pro. fect was ratifind and alopted by an overwhelming rote of the people in the election of 1403 .

- As to our concluslons anil rccommendations. the firt question to be decided was whetier or
not the canals should be entirely sbaadoned. It was clalmed hy many that canal transportation was antlquated and sitogether out of date; that - the railroeds, wlth their iarge eapital and selentlic management, their durahle roadheds, powerful locumotlves, larger carn, greater traln lowis, greater speed, and more certainty of delivery, will be ahle now or ln the early future to reduce the cost of transportation below what Is postihle on the cangis.' If it "bould meem prohahle that the railroals could necompish titis, then It would be manifestly unwise and improper to expend any more puhitic money ugon the canuls.
- From a consideraiton of all [the] facts we resched our first conelusion - whlch, like alt the other portlons of our report, was unanlmously alopted - to wit. "Titut the canals conaecting the llutson river with Lakes Erie. Ontario anil Champlain should not he ahandoned, but shouid be maintained and enlarged.
"The next point to be conshicred was, to what extent shoull they he enlarged, what slze of vessel they should be sulapted to carry, and what would be the estimated cost of construc. Lion.
"As to the proper size of the entarged cunal, widely different views were held hy coglnerers and hy ecomomists. Some contender that the ninc font canai authorized in 1 1434 was suftlclently large; others brought forwart the supposed aulvantages of a ship canal large enough to carry ocean golng steamers without hreaking buik (rom Dulutis to Liverpooi, or any other purt ; others contended that a canal of lntermeliate slze would be found to be the most economicai. would cost the ieast amount of money for the results producet, anti would, in fact. produce a lower freigitt rate than elther the small canal on the one hand, or the ship canal on the other.
-To these questions we gave the most careful study. The siaip canal had many giltering attractuns, and liere was a large spmiment along the lakes whlch had founul evpression in Herp Waterways conventions. which lad been held in recent ypars and had airocated a water poutr of elther 21 or 2 s fect depth from lake Firie tu the Athntic nean. . . But a careful examination of the facts leil us to the concluston that while a ship ranal of 21 or 28 feet depth would cost emornousiy more than a harge canal of s:if. 1: feet deptit, it would not proxluce as low a freight rate.
- Ilaring rejected the ship canal project. We lad then to cousinler what sirc of enlargel canal w. should recommend. In any event, we were astistled that the route of the canal should be changui so as to use the waterways of the senearanil Oneida rivers, Oneidis lake ant the Nohawk river in place of the present route; but the question was whether the depiliof the canal shoulil be feet. capable of carrying a buat wlit eargo capaclit of 4 iv) tons, or a depth of 12 feet. carrylng a hoat with a cargo capacity of about 1.001 tons. Witio such thatas we coutd obtain in the short time at our tlisimanl. and without alequate surreys, we estimatel the cost of the smaller project at a little mare than \$21.(00). Mit), and of the lagger project at a little less than $\$ 9 .(40), 070)$.
- (her conclusion was in these words: "In our judgment, arrired at after long consideration,

## NEW YOLK STATE, 1800-1009

## NEW IOLK BTATE, 1890-1000

and with some reluctance, the Slate shouid undertake the larger project on the ground that the mallier one is at bent temporary makeshlft, and that the larger project will permunently ae cure the commercial supromacy of New Iork. and that this can be masured by no other nieans.
"We male a fourth recommendatlon it the followhig wonle:
". That the moncy for these improvernent shonld be miach by the issue of elghteen.ycar bonds la the manner preseribed by the state Conattutloa, and that the lnterest and prinelpal of theae bonds should be paid out of tares sureiff. caily levied, for bencits recelved, in the countle borilering in whole or in part on the canals, the Il udson river and liake Champlaln: such taxes to be levied ln proportion wo the assessed val. uation of the real and personal estale in such comities. Theme tance will amount to about
 during the perlod of eighteen $y$ tars.'
"olir ohject In making thls recommendation was $u$ illsarm ithe oppestion of the non-(anai countles. . . Wr alws submitid statistles in tabular and graphic form showing that the val. untlou of the river and canal countles wac yori of the entire valamilon of the state. In any event, they would bear gof of the expense, anil it was thought wise tongegat that theg bear the enthere exprase so as to remove every sround of alloged lnjastlece in taxing the countios whled rlaiment to derive no bevent.
"Thla recommendaton was not alopted by the f.aplshate. wor suhnit ted to the people.

- At the clection the Hon cesnal comutles voted agalist the project liy large majoritles, St. Lawrence countr, for lustance, luelig 1 th 1 against it, anel Steubell connty, 10 to 1 against It : hut, on the uther hand. the canal counties Foted lin favor of tit ly almost equally large humforltids. Siew lork being 9 to 1 lin favor of it Khaga. * to $1:$ quecus. 5 to 1, and Erie, nearly 5 to 1. For some nuexplaherel renson Monrox connty. In whith fixeliester is sltunted, and Oa. ohilaga conhty, In wheli syrachor is slthated, voted ayalust it. The ove raliolming wote, lanw ever, In the comitios at the: two torminals, Nuw Fork und linfalo, mate a majorlty of $245,31:$ In the eutler Situte in favor of the projert, and a total vote of $1,100,71 \mathrm{~m}$

Onr fifth and thal recommendatlou was as follows

Tlint the eftholeucy of the canals depencis apon their managemetit itulte as much as upon their physteal wle, abel that wo money shotide
 patiled by measures which will meromplish the following results
(a) The remoral of ali restrictions as to the amomet of capital of companios eheaged ba tramsporation th the canals, sult the riocourage. neent of large trassportation lines for hamelling canal hushness, lin place of hampering thent, as has hithorto trenthe rase

- (h) "he nse of medianleal means of traction. Plther stema or eldctricity, in place of araft anlmals: and the ume of mothanical power lit place of hand powerfor oprothlut the gates mal valves, min mushe lomes lu low ka
(c) The urganlzaiou of the fore entased on the pullice works if the State ofl a more pror manent basis, so as to ailuvi an atiractive career
to gralustes of acientifc ingtitutions, wlth the maname that their entr' into the eervler, their tennre of office, and their promotion wll| depend oviciy on theif fitneas, a determined by pruper and practlcal tests.

## NEW YORK 8TATE, 1900-1010

NEW YORK STATE, 1007

The Legtalature of New York has been hon ored by this highmaded and respectful treat. ment of it. which the highminied among It member have appreclated; but these have been at most time a minority. The inajority. obedlent to receatful party "ixmen'n," have ceted sulieniy with him when the ismli of public opinion bas driven them to hla side, and deflantly agalnst him when they diaril. lifs obstaate antagoalgts luave found a risiection harl to ohtaln.
The most algnal showing of the nititude of the public tuward antagonlats of Gosernor Ilugher In tite Legislature ocenrred In conneec. llon with a hiii, freommeaded by the Goveruor In 100i, for the amendment of a dlsaraceful exlstlif inw relative to race-track gambilnge. The State Constitution, as revised In is94, pro hlbits nil forms of gambllag, and decinres that 'the lecislature shail pans approprlate lawe to prevent offeases agalnst any of the provislous of this sectlon." In 1805 an Act (known an the Percy Gray Law) was got through the Leglaiature, profemsmily in obedleace to thils mandate of tite C'onstitution, which verbaliy prohibiteal iretting on races. but penaitizel ft oniy by provlding tinat the lnser of a race-track bet might nur the winner aud recover twice the amomet of ils bet, while butting and ganibling In other piaces were punished hearily in linprisonment and fine. Thls scandaions fuvor to the race-track Intersits carriefi a bribe at the anne time to the farmera of the Niate, In tire form of a cunniag provision of the Act, wibed appropriated five per cent. of tive grose recrljits of racing ascoclations to the benetit of agrinti. timal sucietieq. Reprated atumpts to correci so matemptuons a violation of the fonstitution had filleti; bit (iovermor lingices renewed the attenpt, with a freling of reverouce for law and for the honor of the Sitate $x$ hich could not tolerate dif(ent. Wisen the amendiost Biij that be recommenteyl was pitt in sumpense by a the
 sperial sexsion of the leglslamine, and tirompht the guestion before the penjule in sperebies which male a mighty stlr. The racing Interesta In the State were so powerfil that tioy almost defied drefent, and all llielr Inthence cane lito play. Meantime a spectal ciection to tiil a racance In the sienate was peodlng in Western Eiew lork, and the jasure on ther race-track gamhling bilt was foucist outt there, wifh the Governor In the fieli, conteming for an bomest eaforcement of tise constitutional law of tive Giate. The result of the oloction gare shpuort to that contention, and when, at the gectivi seasion. the Jsibi in queation was again called up In the senate. as if coull be. It was jussu! by a majority of oae. Tife lifurblican senatora wine rotivi digalisit it were most of thein reniredi io nrivale dife by their eonatituents at the senatorian flectionis of the ensuine falf.

Almos verytining of imporinnce in New Fintk higisinimi slnce Govermor llughes enternl affice has hat itn urigla in his recommendutions, and haq inem carried by the weight of publle backing whicis bellef in himeals nit achinge reaisting intluc-nces that womld ordinarily bave prevaileal. NOBEL PRIZES. - Ify the will of Alfrel Buruard Nobul, the distingulshed ivealish enpincer and themist. pupil of dolin Firlegenn and fuventur of dymalter and other explosives, fire grent prizes. iveraging wearly $\$ 40.000$ ench in value, were inatituted, for annual reward to per. mons whon shall sevemily have made the most Injportant diwovery or fuvention in the domain of phywics. chemisiry and physhologet or ficed Ielne: to the s rlier who bas promured lis iitura. ture the mut distlgguished work oi an lilenlistie
endeney, and to the person who has most or best promoted the fraternlty of natlons, the abolition or reduction of standing armies and the formation and increase of peace congresses. The awarl of the two prizes first named to be made by the Royal Aeademy of Science in Stockholm; the third by the Caroline Medical. Chirurgical Instltute ln Stockholm; the fourth by the Swedish Academy in the same elty; the fifth by the Storthlng or Parllament of Norway.

Tbe presentation of prizes on the flrst award was made with hmprossive ceremonles on the 10th of December, 1801, that belng the fifth anniversary of Mr. Nobel's death. Each year slnce, the awards have been made on that anniverssry day. Tbe reclpients have been as follows:

Pursics. 1901 - William Conrad Roentgen, professor of physles at the University of Mu. nieb.

1902 - Divlded equally between llenrik Anton Lorentz, professor of physies at the University of Leyden, and Peter Zecman, professor of physies at the U'niversity of Amsterdam.

1903 - Half to Antolne Henri Beequerel, professor of physies at the Ecole Polytechnique and at the Nuseum d'llistoire Naturelle, Paris, France, nember Institut Françalse, and half to Pierre Curie, professor of physics at the Unlversity of Parls (Sorhonne) and teacher In physies at the Paris Mnnicipal Sebool of Industrial Physies and Chemlstry, and bis wlfe. Marie Sklodorska Curie, preceptress at the Iligher Normal Sehool for Young Girls at Leeres.

1904 - Lord Rayleigh, professor of natural philosopby, Royal Institution of Great Brltain, London.

1005 - Philippe Lenard, professor 0: physics at the physieal Institute of $\mathbf{K i e l}$

1906 - J. J. Thomson, professor of experimental physles at the Cniversity of Cambridge. 1907 - Albert A. Micbelsen, professor of physles at the Cniversity of Chicago.

1908 - Prof. Gabriel Lippman of the Unlversity of Paris.
1909 - G. Marconi, Itely, and Prof. FerdInand Braun of Strassburg.
Medicine. 1001 - Emil Adolf von Behring, professor of hygiene and medieal history at the Tulversity of Marhurg, Prussia.
1002 - Ronald IRoss, professor of tropieal melleine at the Cinlversity eollege of Liverpool. 1903 - Niels IRyberg Finsen. professor of medicine. Copenhagen, Denmark.
1904 - Ivan Petrovic Pawlow, professor of physiology in the Military Academy of Medicine, St. Setershurg.
100.5 - Robert Korb, member of the Royal Aeademy of Scienee. Berlin.

1906 - I'rofs. Ranon y C'ajal and Camillo Golgl of the I'avia university, ftaly
1:N07-Charles L. A. Laveran of the Pasteur Institute in Paris.

10018 - Dr. Panl Ehrlteh of Berlin and Prot. Elie Metclinlkoff of the I'asteur lnstitute, I'aris. 1009 - I'rof. E. T. Kocher. Switzerland.
('ifemistiny. 1901 - Jakob Ilendrik van't IInti, professor of ehemlstry In the University of Berlin.
1m2-Emil Fischer, professor of chemlstry in the Unlversity of Berlin.

1003-Svante August Arrhenius, professor at the Unlversity of strechbolm.

1004- Elr William Ramazy, professor of cbemlatry In the Universlty college, London

1005 - Adolf von Baejer, professor of chem. Iary at Munleh.

1006-II. Moissan, professor of ebemistry st the Sor bonne, Parls.

1007 - Eduard Buchner, professor of chem. Istry in the agricultural high schoul of Ber. lln.

1008 - Prof. Ernest Rutherford of the Lin. verslty of Munchester, England.

1009 - Prof. W. Ostwald of Lelpsic.
Literatice. 1901 - René François Armand Sully Prudiomme, member of the Freneh Acad. cmy.

1902 - Theodor Mommsen, professor of his. tory at the Cnlversity of Berlin.

1903 - Bjornstjerne Bjornson, author, Xor. way.

1004 - I Ialf to Frederic Mistral of France snd half to José Eebegaray of Spaln.
1905- Henryk Sienklewlez, the author of
"Quo Vadis?"
1906 - Yrof. Glosuo Cardued of Bologna, Italy.

1907 - Rudjard Klpling of England.
1908 - Prof. Rudolf Euekan of the Cuiversity of Java.

1909 - Selna Lagerlof, Sweden.
Peace. 1901 - Hlvlded equally between Ilenri Dunant, founder of the Internathonal Red Cross Society of Geneva, and Frederie I?assay. founder of the first French peace association, the "Soclété Françalse pour l'Arbitrage Entre ia tions."

1902 - Divlded equally between Elie I lucom. mum, secretary of the internatlonal peace burean at Bern, and Albert Gobat, ehief of the interparliamentary peace burcau at llern.

1903-Wllliam Ikandal Cremer, M. I'. secre. tary of the Internationai Arbitration leagne. London.
1004 - The Institute of International light, a scientifc association founded in 18.3 in Ghent, Belgium.

1905 - Baroness Bertbs von Suttner for her literary work written in the lnterest of the world's peace morement.

1900-Theodore lioosevelt, preshdent of the Unlted States, for the part he took In bringing the Russo-Japanese war to an end. Monev set apart by the president for the establishment of a permanent industrial peace eommission.

1907 - Divided equally between Ernusto T. Moneta, president of tbe Lonibardy Peace unim. and louls lienanlt, professor of international law at the L'niversity of Paris.

1008 - K. I'. Arnoldsen of Sweden and II. F. Bajer of Denmark.

1909 - Baron d'Estournelles dc constant, Paris, and M. Beerazert, IIolland, ex-I'riniter. NODZU, General. See (In thils vol.) Japas: A. D. 1904 (Fel. JuLT), and after.

NORWAY: A. D. 1902-1905. - Result of the Consular Question. - Secession from the Uaion of Crowns with Sweden. - Acceptaace by King Oscar of his virtual Deposition - Election of Prince Charles of Denmark to the Throne. - The discontent of Norway ln its union wilth Sweden, especiaily beeanse it cimhl have nodisthet uathonal :epresentation, consular or aliplomatic. in foreign countries, is lescribed In Volunte VI, of this work (see Swebes asil Sonway, in that volume). 1a 190) a Swedish Norwergian Cousular Commission was appointed to investigate the pucticability of s.parate consula for each of the united kingdims, with joiut diplountic represeutation. The Commission proluced a report very favorable to the proposition. Proloaged negotiations followed, between representatives of the two gov. ermments, and the outlines of a system nomler which Norway should acquire a suparate eonsular serviee were definitely settled and accepted formally by the King, on the 2lst of December, 19n3. Whin it came, however, to the detinte framinir of laws for carrylng the plan into etfect, irreeoncilable disagreements arose. Several details of the arraagenuent whith Sweden insisted on implied a preeedeace and superiority of stand. lny fon that klagdom in the union of crowns which olfended Norweglan pride. The Norwe. gian Goverament objected to having its selection of consuls mate aubject to the approval uf the Foreizn Dindster of the dasal monarchy. It obfected to havlag the Klnes, in his commission to them, eatitled "King of Swedern and Norway": und it rejected the Swedish proposits on other pwints. Shen the Govermment of swelen repli, that, while it might be wibing to condiler motue modifications of lts proporals, it mist maintin the important parts of them, the Norweptian Goverameat aunonuced that it had no further statemeats to make, lndicating that negotiation in the nater was at an end. Thereupon, on the Thh of February, 1905, the Khing mate public the following statentent: " Uader the present circnmstances 1 do aot see that 1 fan risolve otherwise than to approve of what ther Forcigu Blinlster has proposed: but I cannot refraia from cxpressing to buth my peoplea my hearty deslre that the two kiagdoms, which have now been unlted for neariv a century, will wever let any differenee of opinion be huriful to
the Union itself. This Unioa is in truth the sa feat guarastee for the lndependeace, the security and the happlaess of both my peoples."

Feeble health nuw compellel King Oscar to yled the functions of roysity to his son, und the Crown Prince visited Christiania, as Regent, to coafer persoaaily with the leaders in Norwegian affairs. The outcone of hls whit was the resirnation of the Dlinistry of M. 11a, rup on the 1st of March, the formatiou of a new Cabinet, under 31. Nicheisen, and the anmonncen: at by the latter that the Govermnent would steadfastly maintain the sovereiguty of Norway, as an indepeadent khydom, according to the words of its constitution, the reablation of whith must depend on the strength and will of the Normerian people. All attempt: in the next three months to overcome or mneh morify the attitude of Sorway were unsnccessful. In \$lay, the Storthing pasmed an indepenleut Consular Bill and lad it before King (1scar, who had reshmet his duties, and the Kingr refased to sunction it, saying: "The Crowa Prince, as leegent, in Joint Connell of state of April 5 , has alrealy shown the oaly way in which this importunt question cas be alvancel and all dithonlties irnat likely removed. viz, throngh negotiation. I entirely arree with this view, and do not for the the beiar tind it experlient to sanction this law, which means an altemtion of the existing joint consula: scrvice which cannot be severed except by untual arrangoblent. . . When 1 now refise to sanction this law 1 do so in arcordance with the right conferrel upon the ling [see suetion 30. Title 3, of the Cosnment thon of Nohway, in Volume 1, of this work]. It is my equally grest love to both nutions which makes it my duty to exereise this rlght."

On the Tth of June, II. Michelsen, the Prime Minister, and his collengueg, gave their resignations to the Storthing, wherempen that boty, by unimimous vote, adopted the following resolition: "As all the nembers of the conncil of Niate have resigned their othees: as his Majesty the King las aleclared himself unable to give the country a new dovermment; and as the constitutional kinsiom has thus crased tu functhon, the Storthing anthorizes the memburs of the Mlnistry, to day resigued, to excrelse in the meantine, as the Government of Norway, the authority vested in the king. in acconlaace with Nurway's constitution imm existing laws, with the alterations mecessitated by the fact that the [nion with fiweten unter, one liag has crased oa acromit of the king having ceased to act as Norweqhan King." This netion was proclanmed to the perple on the same dave On the 9 th the Linion thar was lonered from Vorwegian forts and war-ships and the Norwegiau flag ralaed la lis plare. On the 2sth of Jnlv with King Oscars consent. the Swedivh liksdag alopted a resolution assenting to the severance of the Lillon, on condition that lt be approved by a rote of the people of Norway. Aceordiagly the questios was submitted to the pcople on the 13th of Angust, and all but 144 out of 368.892 votes were given in fa*or of the separatioa. A conference at Karlstadt in September arranged the future relatlons of the tro kingdoms with anccess, and the dissolution was complete. It was formally acknowledged by King Oscar on October ${ }^{2}$ bith, As he made it kinuwn that he did

## NORWAY, 1902-1905

## OPIUM PROBLEM

not wish any member of his family to accept the crown of Norway lf offered, the Storthing authorlzed the Government to open negotiations wlth Prince Charies of Denmark, with a view to its acceptance hy him, if its proffer should be sanctioned hy a popular vote. Again a plebiscite was polled and a large majority given ln favor of the proffer of the crown to Prince Charies. The I'rince accepted, with the permission of his grandfather, the Dauish King, and proponed to take the name of Hakion Vll. The name was well chosen for its slgnificance, II akon VI. having been the last of the old royal line of Norway, which became cestinct at hls desth in 1387. The King-clect and his wife entered Chmstianla on the 2ith of Noveniber and took the outh of fldelity to the Norwegian Constitution ou the 27th. In the following June King llaakon was anolnted and crowued with solemn ceremonies, in the ancient cathedral of Trondhjem, the capital of the first King who reigned over the whole Norse rcalm.

OKLAHOMA: A. D. 1904.-Marvelous Growth of Fifteen Years. - "Oklahuma is the Minerva of the states. With her there was no period of slow settlement. On the day that her borlegs were openell to the settler she sprang full-fledged. a vigorous young comnionwealth, lnto the I'nion. And on the day that Congress ardmits her to Statehood she will take rank with the foremost of the Western States. IIer population of a million and tiree hundred thousand - which ls the combined pepulation of Okls. homa and lndian Territory, according to the annual report of (iovernoz Ferguson for the year ending June 80,1904 , it is probally some what more than that now [1905] - will place her in adrauce of at least twentrone of her sister Fiates, several of them aniong the origlnal thirteen. Not counting Texas, only two States west of the Missouri will be her equal in number of people - Kansas and California. In old New England, three States - New IIampshire. Vernoont, and lihode Island - could be combined aud still not contain as great a population as this now commonwealth in the West will have on the first day of lts Statehood.

No other sitate ever had such a romarkahle growth and prosperity as Oklahoma. Slxteen years afo last March the prairie winds blew over wlde expanses of plalns with no slgns of human habitation on them for miles at a stretch. A month latr, on April 22.1 Rep, upward of one
hundred thousand persons engaged in the most spectacular race in listory - a race for homes [see, In Vol. V. of this work, United Statre: A. D. 1889-1890]. That was the day when the first $0{ }^{\circ}$ : uoms counties were opened for settlement. At alghtfall of that first day of its history Oklahoma had a larger population than the State of Nevads. Towns were surveyed, and sprung up in a night, and in a week a new empire had been created in the Southwist. A year later the Iowa, Pottawatomie, sud Suc and Fox reservations were opened for settlement." -Clarence II. Matson, Ohlahoma (American Reriew of Rerieve, Sept., 1905),

## OPICM PROBLEM

L'nited States Legatinn at Peking, and sent to the State Department at Washington, in September, 1906 :

Previous to 1900 natlve opium passing throagh the maritime customs at lehang had been paging a watal charge of taels, " 60 per pleul* exclusive of taxes at the place of productlon. In July, 1900, the viceroy, Chang Chlh tung, with a view th checkling the eonsumptlon of uplum in the territory uader his jurisdiction, increased thls charge to taels 72 per plcul, and near the close of 1901 increused lt agaln, making $1 t$ taels 80 per picul. Thls, whth the likln charged in Szechuen, made a total on the profuct comlug trom that province of taels 84.76 . Oplum drelgned for local consumption was athll more heavily taxed, belng required to pay taels 90 besides the Ilkin of Szechuen, or a total of $94 . \tilde{7} 0$ taels per picul. The immediate result of thls action was to greatly increase smuggling and to drive legitlmate trafflc to the use of native janks or roundabout land routes controlled by the native euntoms or likin offices, and thus to reduce the receipts of the marltine customs. Another siguificant result was the importation of a smuli annount of foreign opinm to a dlstrict where it hail been unknown for many years. In view of these facts, in 1903 the authorities reduced the tax to a twal of 76.75 taels per picul, includiag the sizeehnen likin.
$\because$ In February. 1904, the same tax was imposed in the province of lluaan, also $\ln$ the jarisdiction of the Viceroy Chang Chil tung, and in the summer of the same yenr an agreement was mate with the provincial anthorities of the provinces of Klangse and Anhul that one consolidated tax. to include both iikhi and customs duties, should be levied at a uniform rate in the four provinces, aud to prevent dlscrimination by the native cuatoms as against the muritime service it was agreed that the collection of this conBelidatcid taz should be intrusted to the imperial marritime customs at Ichang and to hrnnch of fires umler its control. The port of lehang wis flusen because it is at the head of steam naviantion ou the liangtze, for which reason mnst of the opium from Iunnan and skecluell was sent Hhither for distribution. In 1905 this arramgement was extended to four other provinces, KI antse. Fukien. Kuangtung, aud Kuagec, aud the tix increacell to taels 134.70 per picul for opinm leatined to the four inner provinces ami tiela 10 for that going to those on the shaloard. i'ruious to this lattir arraugement. however, aftir the expericure of 1912 , It was secn that unless the tax on furelgu ophum s!iould also he ineremed the effort to stnmp ont the rice by heary tasation wonld fial, and therefore in 1003 representations were nade to the i3ritish Government by the ('hinese minister in London looking theard the increase of the duty upon bulian npinm. The reple of the British Government, ns qu:t"d in the P'eking Gazette, was that the tux on the native drug ought to be inercased by the same amount as any addition male to the duty un the foreign article. Upon this a memorial was suhnitted to the Imperial Clinese Govern aunt asking that the customs duty and likin on furelgen nod untive oplum be lncreased by ant cqual amount, and the matter was referrel to the proper bourds for consideration and report.

- The tapl was sald to he worth 78 ments in gold in fons. The meight of the picul is 133 pmunds.

Nn further report has an yet appeared relatling to the negothatons respecting foreign opium. As to the aative drag, the steps to increase the taxes upon it in eight of the provinces have been reluted ahove. The success of this arrangcneent has heen so pronounced that on the 7th of May this year (1006) au in perfal edict appeared directing that the system adopted in the eight provinces unentoned above should he at once extended to all the provluces of China proper and at a later date, to he liereafter deteraluel, to Turkestan and Mancharia.'
A. D. 1906. - Imperial Edict against the use nf Opium. - Undertaking to auppress it in Ten Years. -- By a formal elict from the throne, published in september, 1806, the 1 m perial Government of China undertook to eradicate the use of opium in that empire, and to do so by heroic measares withln ten years. A reglster was ordered to he mate of every consamer of the drug (estmated at 40 per cent. of the vast populatlon of the empire) and of ' $e$ quautit that he consumes. Those who are ander 60 years of age must thercafter dimiuish their consumption by not less than twenty per cent. each year, till they are free of the lublt and the use is stopped. Meantine there would he a pulilic provision of medicines to assist the eure. To those heyond 60 years in age, and to the princes, nolles, and mugnutes of the cmpire, a certain relasation of these rules would be allowed. But all minor oticials under tio years uust drop upium entirely, at once, and there would be no toleration of an acquirement of the opium halit thereafter. No further cultivation of the poppy wonld be allowet, and, of course, the Importation would be controlled.

Tang shao $\mathbf{1 i}$. the special Chinesp envoy Who visited the Cinited States and Englani early in 1909, had much to do with this meastre on the pirt of his Govermment, nmi, in addressing n deputaton which called ou him in Lowan, had this to say of the rlreumstances ("mnected with h: ' Ife hall always taken a deep interest in the anti opium movenent ever since lue was a stndent in America in the early seventies. He had never realizel. however, that they could attempt to make such a novement in Clina till he was sent hy his Government to Indin lu 190.5 iu connexiou with the Lhasi Convention. While there he hal opportunities of studying the opium question, and he was for tunate enough to make the aryuainance of the timince secretary. Mr. Baker. From liin he learit that the Government of India could dis. pense with the revenue derived from opiam. Nothing was more surprising to him and nothlng gave him greater joy than to hear that. In that year the question was brought up in England, and whell he returned to China in the winter of 190.5 he informed his Government that the British public was very 'antlopium and also that the Indian Governmeut was not at all anxious for the revenue derived front opium. Therefore, he told his Government that it was for the Chinesp themserves to put a stop th the opinm trate, and that they must not rely upun others. He hul alrebly got regulations ia his heal and the Government asked him to draw up certain rules to put a stop to the opiam curse. In order not to he too radicai, he suggestel that three years should be allowed for puting an end to it, but the Cahinet said

## OPIC'M PROHLEM

that was too ramleal, and, aithongh he suggested six years, the final decision of the Gov. ernurnt was winake it ten years. He sald tiat unless they put a strp to it in two or tirree years they might ns weil fot this generation die out. They fully appreclated the co-operation of gentlemen iu England, and he hegged that they would keep up the agitatlan not only for their own sakes but for the sake of the (hinse people. The Chinese people wanted to be reminded that they were opium smokers and that they tutust give up the practice. Some scepticism had heen expressed us to the genuineness of the movement In China. hut be was sure that the people there were in earnest, and he trusted that hls Government and people would not dis. appolnt Great Britaln."
A. D. 1909, - Prcgress in the Opium Reform. - An ofticial report on the progress of the opinm reform in Chita hy s. Max Mniler C'euncillor of the Jritinh Legationat I'eking, was puhlished as a l'arlameutary Paper (Cd. 496i), carly in Innumry, 1910 In eommunicating the report to the Foreign Otilce, Sir N. Jordan wrote:
"This report shows that considerahle progress continues to be made in the task which the Chinese Govermment undertook three years ago. There has undouhtedly hern a very sensihie dim. fnution in the consumption and cuitivation of opiunt, and a public opinion has bren formed which will greatly strengthen the humds of the Government nud the provinclal nuthor us in the ifra ${ }^{\sim}$ musures which they contemplate taking. .. the near future. . . . That the end, bowever, is so wear ms many of the otliefal promonncements wondi serm to Indicate is, I venture to think, very doubtful. We have fall and reliahle informminon nlout oniy two of the proviners - Shansi and Y Gmmn - and the anmeses t.! Mr. Mnx Min' r's report furnish Mloquent testimony of the gent work that has bern donc in loth. At the opposite extrane stand Shensi, Kansu. llupei, and kachuan, in nll of which romparatively ittle has been accomplished to check dther the eonsumption or cultivation of the drug. The last-mamed provinee. which is by far the largesi producing nrea in the Empire wili furnish the suprome test of the success or fallure of the programme of tutnl prohibitiun, and as the ordir has gonc forth that no pop: $v$ is to be sown this antumn the issur on whirh so much drepends is doulttess heing fought out us this report is heing written.
International Opium Commission, in Sesaion at Shanghai, February, 1909. - On the Nuggestion of Bishop Brent. of the Phiippines, the Goverumont of the United States took the Initiative in briuging sbout the appoiutment of nn International Commission to inverstigate matters connerted with the use of and tratice in opinm, T!. Commissi'm, composed of deie. gates from Chlna, Japan, Great Britain, France. Fermany, Hoiland. Turkey, and thr Linted Siatus, met nt Shanchif on the 1st of Fehmary, 100\%. and was in session until the 26th of that month, unier the prisidency of Bishop isrent. its sludy of the subjact aplears to rave been made iliticult and definite conclusions prevented hy thr lack of trust worthy Chinese statistles of the preninction of opium in the Empire itself. and of other important facts. The results of four wrika of investigation and disengsion were embodied in ninc resoiutions, the first of whieh
ricognized the sincerity of the ondeavor of the Chinese Government to eradlcate the great evli from lts dominlon, in these words; "The ('on. miasion recognizes the unswerving slncerity of the Government of China in its efforts to eradi. cate the production and consumption of upium thisoughout the Empire, the luereasing lonly of publie oplnion anong the Chinese lyy whom these eflorts are supportedi, and the real, thoubh unequal, progr s already made in a tash of the grentest magnltude."

Of the further resolutions, one urged upon ali governments the importanes of drastic messures to coutrol the manifarture, sate, and diatrinm tion of morphia and other moxions derivatives of opium: nnother rceommended selentitic in. vestipathon of an-called upinm remedies; a thind suld will countries should adopt reasmalile mes. sures to jrevent the shipment of oplum or its derlvntlves to any country which prohlhits thrir entry. By the terms of the remaining ras. futions the diplegatus were urged th intluruce as far as possih'e their own governmants to take step for the gradiral surprosslon of opium smoklng in their own territuries respectively; to further examine into their systeme for the regulation of the tratice, in the light $n$ ' the ex. perienee of other conntries; to enter into ne. मothations with chinn to insure the muloptinn of effective and prompt measures to prohatit opinm traflic in those concessions and s.tic. ments. Finaliy. the conference recommonind that ench govermment apply its pharmary laws to its sulbjects in consular districts, concerninus. ani settieusents in Chiun.
In some guarers the outcome of the moveng was sharply criticised as being cmity of ant practieal fruit, and England was mexiod if having rendered it so, under tise inthemer of the Indian opium traie. But the State: Deparmant at Washington gave expressinn to a very ditur ent view. There it was pointeri nut that the Commission had been one of incuiry, ouly : hat its instructions had ixeen "to stndy the opinm problem and report as to the best and mosit fa.3. silule menns of soiving it." and that this pres. granme was cxechted $\cdots$ to the entire sitisfice tion of the Goviruments concerved." isishop Brent, who presided over the Si.nnghal merting. declared in his innugural ahire os: "lt derolves upin me to prononnee witio emphasis that this is $n$ commission, and as the ge whan are informed - as nll of you must lee in mallurs that pertain to international affairg of this hind - a commission is wot a conference. The jhlea of a conference was suggested, hat it seened wise to choose this particilar form of a ction rither than a confirence, becmise, for the pres at at any rate, we are not sutileleutiy weil informad and suttlciently unanimutus in our attitul, to have a conforence witil nny great hope of immediate suceress."

As betwren Chinn and Great Britain there is an opinm prohlem which does not affect wher parties. An importunt part of British Iudian rocenue is derived from the oplum tride, and the Govirnment of India can harlly be ex. perted to 'hrow it cnrejessly away, not knowing with certn nty that it will not be picked lip as gain for soneboly else. In 190k, when Clina opened her campalgn against opinm, siue en. tered Into an agreement with Fingland :'at Ler own production of oplum should be reduced to

## OPICM PROBLEM

extinction within ten years，aud that the impor－ tation from India（under former commerciai treuties），then amounting to 51,010 chests anuu－ ally，should be reduceri at the rate of 5100 chests pur year．It seems to hive beeu the lack of dinfinitr evidence ns to the effective fuiflineut of this agreement whlch made the British nttitude at Silinghai a haiting one．

PANAMA CANAL: A. D. 1901-1902. The Second Hay-Pauncefote Treaty between the United States and Great Britain. - Its Ratification. - Afte: the rejection by the British Government of tire Ameadnumts made by the Senate of the Cnited states to the Interoceanic Canal Treaty negotiated in February, 1400, by Mr. John Ifar, Lnited States Sec. retary of State, with the Britisis Ambassador at Washington, Lord Pauneffote (see, in Volume Vi. of this wotk, Canal. Inteloceanic : A. D . 1900-Ir.cemners). negotiations on the suhject were renewed, with results of success in remov. ing objections on both sides. The new Treaty was signed by Mr. Hay and Lord Pauncrfote at Washington on the 18th of November. 1901 , and ratifications were exchanged on the 21st of February, 1002. In the preambie of the Treaty its purpose is declared to be "to facilitate the constrnction of a ship-canal to connect the Atlantic and Pacific Oceans, by whatever route may be considered expedient, and to that end to remove any objection which may arfe out of the Convention of the $19 t \mathrm{~b}$ April, 1850, com. moniy called the Clayton-Bulwer Treaty, to the construction of such canal under the auspiecs of the Government of the United States, whth. out impairing the 'general principle' of neutraization established in Article VIII of that Convention." The agreements and stipulations to this end are as follows:

Artici.e I. The High Contracting Partles agree that the present Treaty shall supersede the afore-mentioned Convention of the 19th April. 1850.
"Article II. It is agreed that the canal
may be constructed under tie auspices of the Government of the United States, either clirectly at its own cost, or by gift or fonn of money to individuale or Corportions, or through subrifip. tion to or purchase of atock or shares, and that subject to the provisions of the presunt Truat the said Government siall have and enjoy all the rights incident to such construction, as uell as the exclusive right of providing for the regy lation and management of the canal.

Abticle 111. The United Ntates sdopts, as the basis of the neutralization of such ship ernal, the following Rules, substantiaily as em hodierl in the Convention of Cunstantlnople. signed the 28th Octoher, 1488 , for the free nasi gation of the Suez Canal, that is tul say:
"1. The cnnai shall be free and open to the vessels of commerce and of war of ail nuthons ohserving these lunes, on terms of entire ayual. ity. so that there shall he no discrimination against any such nation, or it citizens or sub. jects, in respect of the conditions of charpis of traffic, or otherwise. Such conditions and charges of trafic shali be just and ecjuitable.
"2. The canal shail never be hlorkadel, noy sh.all any right of war he exerelsed mor any act of hostility be committed within it. The l"nited Siates, bowever, shall be nt liberty to namiain such military police along the canal as may le nece'ssary to protect it ngninst lawiessness and disorder.
" 3 . Veasels of war of a bellige ent shall not revietual nor take any stores in the canal ex. cept so far as may le strictly necessary : and the translt of such vessels through the canal shall he effected with the least possible delay in accordance with the Regulations in force, and Fith ouly such intermission as may resnlt from the necressities of the service, Irizes shali be in ail respects subject to the same Ruies is res sels of win of the beiligerents.
4. No beliigerent shnil embark or distmbark troops, munitions of war, or warike matrinals in the cannl, except in case of accidental hindrance of the transit, and in such case the trin. sit sball he resumed with ali possille lispatels.
5. The provisions of this Article shall apply to waters adjacent to the canal, within 3 marine miles of eitber end. Vessels of war of a luellf. gerent shali not remain in such waters hon... than twentry four hours at any one time. es in case of distress, and in such case shall de as soon as possible; but a vessel of war " beligerent shall not depart within twent! hours from the departure of a vessel of w: the other helligerent.
6. The plant, estabilshments, huitings. al... all works neeessary to the construetion, nuaintenance, and operation of the canal shatl be deemed to be part tbereof, for the purposen of this Treaty, and in time of war, as in time ot peace, shall enjoy complete immunitr frm attack or injury by belifgerents, and from arts caleulated to impair their usefuiness as part of the canal.

Auticle IV. It is agreed that no cbange of territorlal sovereignty or of the international relations of the country or countrics traversed by the before-mentioned canal shali affect the general princple of neutralization or the obilgation of the Iligh Contrseting Partics under the present Treaty.
"Article V. The present Treaty shali be
ratided hr the Prealdent of the United Statr by and with the advlee and consent of the $A$ ate thereof, and by Hia Britannic Majeaty: wh the rattdcations thall be exchanged at Washlugton or at London at the carileat possible time withln alx months from the dale hereof." Papere relating to the Foreign Ilelisione of the l'nited States, transmitted to Congress, Dec., 1902.
A. D. 1902. - Undertaking of the United States endorsed hy the Second Conference of American Republics. See (ln thls vol.) Amer. ican liepeblics.
A. D. 1903. - Purchase of the Franchises and Property of the Bankrupt Freach Company. - Treaty with Colomhia for the Buildpog of the Canal rejected by the Colombian Sennte. - Secession of Panama, - Recognition of the Independence of Panama.Trenty with the new Repuhlic for the Building and Control of the Canal. - President Roosevelt's narrative of events. - The transactlons that were preliminary to the underuaking of the constructlon of an interoceanic canal through the 1sthmus of Panama, by the Government of the ['nlted States, are narrated down to March. 1901, in Volume VI. of this work (see Canal, Interoceanic). At that time the proposed Nicaragun route was princlpally contemplated, for the reason that the rights in Panania held hy the hankrupt French Company of Lesseps (sce. In Volume IV., Panama Canal.) seemind noltainable, on any terms which the Antrican Government conld aceept. A commission appointed by President Mckinley to inreatigate the sltuation had reported to that effect in November, 1900, and had recommended the building of a canal on the Niparagua route. The effect of this report. and of the manifest dlaposition of the Amerlcan Congress to a uthorize the buiding of a Nlearagua ahip eanal, was to draw from the French conipany an offer of its Panama franchises and entire property for the sum of \$ 0.0 .14 .000 . After long dehate this offer was acceptecil, and negotiations were opened with the Republic of Colombla for the ncesssary treaty rights. Meantime the Hay.Pauncefote treaty witl (Great Britnin, which the American Senate hal amended in a manner objectionahle to the British Government. wis modified to tire satis. faction of the latter, and the enterprige was cleared of qutestlons except those betwcen colombia and the United States. The next ensuing evente call be told in the words of President Romiseverlt's report of them to Congress, in his Hessage at the opening of the session convened ou the ith of Decenher, 1908:
"By the act of June 28,1002 ," wrote the Presilent, " the Congress authorized the Presjdent to enter into treaty with Colonibla for the builling of the canal across the Isthinuts of Panama: it being provided that in the cvent of failure th secure such treaty, after the lapse of a rensonable time, recourse should be had to the building of a canal through Nicaragua. It has not leen necessary to conslder this alternative, as 1 am enahted to lay hefore the Senatea treaty providing for the hullding of the canal across the lathmus of Panama. This was the route which eommended litself to the dellherate judg. meat of the Congress, and we can now acquire be Traty the right to construrt the malal over this route. The question now, therefore, is not

By which route the lsthmian canal shall be ullt, for that question has becn teftittely and irrevocably decided. The question is simily whether or not we shall have an lathmian canal.
"When the Congress directed that we should take the Panama ronte under treaty with Colombla, the essence of the condition, of coitrse. referrel not to the Goverament whleheontrolled that rcute, but to the roite Itself; to the territory across which the route lay, not to the mane which for the moment the territory bore on the map. The purpose of the law was to authorize the l'resident to make a treaty with the power In actund control of the Inthmus of Panama. Thla pirpose has been filifiled.
"In the year I 846 this Government entered Into a treaty with Neu Granada, the prederessor upon the Isthmus of the R('piblic of Colom. bla and of the present leputblic of Panama, by which treaty it was provided that the Government and eltizens of the L'ilted states shonid always have free aud open richt of way or transit across the lathmus of I'anama by any modes of cummuaication that inight be conatricted, while in return our Government guaranteed the perfect nettrality of the gbove.menthoned isthmus with the view that tise free trunsit from the one to the other sea inight not be interripted or emharrassed. The treaty veated in the Cnited States a suhatantinl property right carved out of the rights of sovereignty and property which New Urunada then harl and possessell iver the said territory. The name of New Uranada has passed away and its territory has leen divided. Its successor, the Government of Colombin, has censed to own any property in the isthmits. Inew Repullic. that of Panama, which was at one time a sover elgn atate, and at another tho a nuere departinent of the surerssive conferlemtions known as New Granaila and Colombla, has now succeded to the rights whieh first one and then the other formerly exereised over the Isthmis. But as long as the isthmis endures, the mere geographical fact of its existence, and the peciliar interest therela which is required by our position, perpetuate the solemn con fhlch binds the holders of the territory to is ot utir right to freedom of transit arross it. itinds us in retirn to safoguard for the I annils and the world the exercise of that inestinable: privilege. The true luterpretution of the obligations upon whieh the United siates entered in this treaty of 1846 has been given repeatedly In the utter. ances of Preshlents and seeretaries of Statc.

Attorney General Sperd, under late of November 7. 186.5, advised Secretary Seward as follows: 'From this treaty it can not be supposed that New Granada invited the Cnited States to beconie a party to the inteatine troubles of that Goveriment, nor did the C'nited States become bound to take sides in the domestle hrotls of New Granada. The United States did guarantee New Granada In the soverelgnty and property over the territory. This was as against other and forelgn governments.,

- For four hundred rears, ever since shortly after the discorery of this hemisphere, the canal across the Isthmus has hecn planned. For two score rears it has been worked at. When made it is to last for the ages. It is to alter the geography of a continent and the trade routes of the world. We have shown by every treaty

We bave acgotlated or attempted to negotiate with the propins in cuntrol of the lsthmis and with furelgu uathons in refereriee thereth our conslistent gowi fath in nbwirving our ulliga. tlons: on the ome haul to the peoples of the Isthans, and on the other hand to the civilized world whoe commercial rights we are anfeguarding and guaruutering by our action. We foave done our duty to others in letter and in spirit tand we linve shown the utmost forbearnace 11 exactug our own rights.
"Last springe, under the aet above referred to, a treaty emelnited betwen the representatices nf the fepulite of Colmuband of one Ginvern. ment was ratithed by the Nemate. This traty Was entered hito nt the urgent soliertation of the people of coiumbla anil ufter a boily of experts appelated by our Goverament espechally to go lato the matier of the rontes neross the isthnus had pronomeced unaninously in favor of the Pamama route. in drawinz uif thes treaty every emicesaton was made to the prople and to the Goverument nf colomblo. We were more than just tu deallug with them. Our generusity wan such as to make It a serlous ghestion whether we had not gone too far in their interest at the expease of our own, for to our scrupplous the. sire to pay all possible heed, not merily to the real bitt ev an to the funcied righte of our weaker nelichlor, who niremly nwerl so nurh to our protretlon and forhmanere, we yeded in all possible ways to her $\begin{gathered}\text { lesires } \\ \text { In draw } \\ \text { hig } \\ \text { up the treaty. }\end{gathered}$ Nevertbeless the covernment of Collombis not merely eepudiuted the treaty, but repmelated it in sucn a matmer as on maki it "wilent by the time the Conombint Comgrose aljourned 'hat not the scuntleat hofer remath id of ever getting a satisfactory treaty frum them. The Guvernment of Colombin tumbe the treaty, and yet when the Colomblat Congress nas called to ratify lt the onte ngainst ratification was unant. minus. It denes min nppear that the Gow ornment

"Imaiediately after the midjonrament of the Cougress on revolition broke onit in P'nama. The ponple of Pamama hat loug ben diseontented witit the Republice of coiombla, and they hat been kept quiet only hy the prospect of thic conclusion of the treaty, whele was to them a mat ter of vithl concern. When it became evident that the treaty was hopelessly lost, the peoplof lamam rose literally as ode man. Not u shot was tired by a single nian on the isthmus in the Interest of the Colmublan Government. Not a life was lost in the uecomplishnent of the revolntion. The Columblan trimps stathoned on the Isthmis, who had long been unpaid, made comtunn enuse whe the people of Pannma, and with nstonishing unanimity the new Repulille was started. The dinty of the Cnited siatis in the premises was ciesir. In strict accordance with the princlples lald tlown by tiecretaries ('ass nod Seward. . . Whe U'nited states gave notice that it would permit the landing of no expeditionary force, the arriral of whleft would mean chans and dwaruction along the line of the rallond and of the proposed canal, and an lnterruption of transit as an inevitable consequence. The te facto Government of Panamu was recognizel in the following telegram to Mr. Elirntan
$\cdots$ The peopie of l'anama bave, by npparently unanimont muvement diswolved their politicat connectiou whth the Republie of Colombla and
resumed thelr trdependence. When you har sat latied that a le facto goverument, republican in form and without substantial opprosit on from its own poople, has been estabilished th thu state of 1'mania, you wilt cuter Into relations whin it os the responalble poversment of the territiefy and look to it for all due action to protere the persons and property of citizeta of the 1 aitel States and to keep opreu the lathman trasilt in necurdance with the obitigations of existing trentles gover ing the relathons of th: l'wited states to that territory:

The (tovermment of Colomblas was mintind of our actlon by the following telegrate to $y_{8}$ Beanpré:
... The people of I'anama having, ly an sppar
 Ititenl consecthen with the Rejublle of thoubia and resimad their ludeprendence, and having adnpted a Ciuvermment of thetr own, ripullicau In form. With wheth the Givernment "If the ['nled states of A:sericalins entered inturela tiens, the I'resident of the Underl Ntitus, in aceunlance whth the thes of fribulsilp whith linve an long and so happlly exlisted het ween the respective nathon, nost eurnestly commends tu the Governments of Colombla ind of Panama the paceful nud equitable settlement of ail yu-4 thons at issue hetween them. Iie holdo that le is bound not un rely by trunty obllgations, wit by the interests of clviizatlon, tosee that the peare. fill trattle of the worid acruss the iathnus at IPauama shaif not lougre te disturhed by a constunt surcession of unaecessary nal watetul civil war:
"When these cvents happened, ffireseren years had clapsed since the Enited stain hat entred into ltatreaty with New Grinadia lur ing tiat thae the Governments of New tiramis - nul of ite successur, fobmbia, have been in a conatant siste of thax
[The I'Tesident then gives a llst, ly dite, of 53 more or less serions dis' urbances of hir piob He peace on the lathmus which C'nitom जatconsuls lad reporteyt to the Goverument at Washlington hetwen May, 1550 , and July. 1002. From this he proceils :

The above is only a partial list of the rero intlons, rebellious, insurtcetions, rims, and other outbreaks that have oceurred tharine the periol in question ret they number 33 fors the 57 years. It wi unted that one of them lasted for uearly a rey vears h.fore it was quelled: mother for marly n vear. In wint. the experienee of nur hinlf a ceuthry has huw Colombin to be utterly lumparitle if hewping order on the Isthmus. Oniy the acthe interfer: ence of the Conlted Niates has enailed her topre. serve so much as a semblance of novereigetr. IIad it not becu for the exercise by th. Tuited States of the police power in her hutiret. lut eonnection with the Isthmus would have been sundered long ago. In 18is. in 1N6i), in 14: 8. In 1885, in 1001, and agaln in 1902, sailurs sud marines from tuited states war shipes were forced to land in order io patrid the Ithimis. to protect life and property, and to see that the transtt across the Isthmus was kept opry in 1861. In 1862, In 188i, and in 1900) the (ihnm. bian Government nsked that the ['nitei states Government would land troops to pritert is interests nell maintal: nrdfr on the Isthmins
" The controi, in the iuterest of the eommurce
and traflic of the whole clvillied world, of the mosen of undisturbed ifanme acroma the lathura of l'aunan has lecome of transcealent inipu... ance to the l'alted Btatem. Wi have repeatelly reciferd this control ly Intervening in the course of doniestle dissenion, and hy prutecting the tirritory from fureign invaslun. In Imss Ir. Fivereli asaural the Pertivlan minlster that f. Hould not hesltate to maintaln the nentrally the lathmus lu the case of war between l'erit and (olombta. In IMb4 Colomblin, which has aiways been vixiant to avall itself of its prlvi. legen conferred by the treaty, expreasull Ita ex. pertation that lit the event of war lert ween Pern ani Spnin the Inited Ntates wonlil earry Iuto fllect the gumranty of neutrality. There hare buen fer udminal: acions of the state Inepart mont in whilh the trea: hat not, etther by the one silue or the other, been used as a basis of more or less imporian: demands. It was sul. by Mr. Fish in 1501 thac the Itepartment of state laul reason to helleve that an attack upon Cubmbian soverelputy on the isthmus had on weral occaslons, lecen avertel by warning from this (iovernment. In INEth, when Cotombla was umler the menace of liostilithey from Italy in the Cermil case, Mr. Bayarl expressed the serious concern that the l'nited states cmulil not but ferl, that a Europenn power mould resort to force agalust a sister republle of thas lumb splere, as to the soverelgn and minterripted uxe uf a part of whose serrltory we are gusran. ture umber the solemn faith of a treaty.

The atrove rectal of facty "atithlishers be. youd question : Flrst, that the C nited Stutns lias for over half a century pationtly and in gotal fath carrled out lts ohlimations under the treaty of iafic: second, that when for the first time it berame possible for Colombia to do anything in renpital of the servlees thus repeatedly renciered in it fur thforseven years by the Luited states. the Culomblan Government peremporily and utemsively refused thus to do its part, evan thung tid do so would have been to fte myanthee and lnmeasumbly to the alvantage of the siate of l'anama, nt that thme under its jurishlithas. third, that throughout thls periol revolutions. rint. and factional distarlances of every kind have orcurred oue after the other in almost uainternpted succession, some of thent lastinar for mimis andevin for years, while the centrml government was unable to put them down or to makr peace with the rebels: fourth, that these disturbancres instead of showing any sigu of abating have teuded to grow mure numerons A: id more serious in the lminediate past: fifth. that the control of Colombla over the lsthmus (f) l'anama could not lee maintained without the armel interventon mud assistance of the Cnited stites. In uther words, the Government of ('oInmhia, thourh wholly unable to malntain order un the Isthmus, has neverthelesa derlined to rithey a trats the conclusion of which opened ine only chance to secure lts own stahillty and t. suarantee permanent peace on, aud the construction of a canal across, the Isthmus.

- Lnter such elrcumstances the Goremment of the Cnited States would have bean gullty of folly and … makness, nmounting iu their sum to a (rime ag" the Natlon, had it actel otherwlse thes :t did :w hen the revolution of Noveminer 3 that tente niare ln Pannma. Thla great enterprise of hullding the oteroceanle canal can not
be held up to aratify the whims, or out of respect to the govrrumental impotince, or to the even mure slaister und evil prilitical peculinat. ties, in propie who, though they dwell uffar oft. vet, ngainat the wisit of the netual dwellers on the Isthatis. asert on unrent suppemacy over the territory. The powammon of a territury frumglit with such pecullar eapactites ns the Isthmans ln question charrien whth it ohllgatons un mankind. The course of events has shown that tials cunal can not the built by prlvate enterprise or by any other nation than our own: therefore lt mast be built hy the Unlted siatem.
- Every aflort has been made liv tion (iuvern-
 to follow a sourgn which with assentably not only to our literesta an: to the fisments of the wofld, but to the interiatt of Colombin itself. Thome elforts linve failerl; and Colombin, by har prerxistence lu repulaing the aivimees that have wen made, han forcel ut. fur the suke of our own honor, and of the luterest and well ixelng. not merely of our owa people, lint of the peropie of the lsthmus of Ianama nimi the prople of the elvilized commerles of the world, to take declaive steps to bring to an end a eondition of altals which hat leewote fenolorable. The new lepublie of l'mama immediately olfored to negotiate a trenty with us. This treaty I herewith subnilt. $13 y$ it chir Interests are beiter safeguarlenl than in the treaty with colomida which was ratiffed by the kemate at its list session. It is better in lts terms than the treaties ofleret to us by the lepubiles of Nearigua and Couta lifes. It last the righal to begin this great undertaking is made nvilitble. Paumas has done her part. . Ill that remains is for the Americam (ourress to do its part and forth. with thls lepublle will ehter upon the executlon of a project colossal in Ita she and of well nizh Incalculahio posvibilities for the gent of this commery and the rations of mamklmi.
- 13y the provivions of the tronty the Inited Sitmos guarantere and will maintion the independener of the Ibupublic of lanama. There is $y$ manted to the l"nlted statex in perpetulty the use, occupation, nul rontrol of avipip ten miles whele and extonding thro nantimal mes futo the sen at vither turminal, wish all lands lying outalde of the zone nereswry for the conatructhon of the canal or for its anvilary works, nul wlth the filmis in the liay of l'anama. The eities of l'anama and Colou are not emhraced In the canal zone, but the C'nited sitates assumes thelr simitation and, in cose of need. the malotenance of order therein: the United States enjoys within the granted libits all the rlghts, power, and anthority which it would possess were it the soverifirn in the terrltory to the excluslon of the exercise ot soverelgn rights by the Rerublic. All railway and canal property rights inclonging to l'ninamn and nceded for the canat pars to the C'nited Sitates, Includ. Ing any property of the respectlse companles in the citles of l'anama and Colou: the works, property, ant personnel of the eanal and rallways are ixempted from taxation as well in the citios of Panaminand Colon as in the canal zone and its dependencles. Frce Immigratlon of the personnel and importation of supplies for the con. struction and operation of the canal are gra.ted Provision la male for the uap of military force and the buildiug of fortitications by the Unlted

## PANAMA CANAL, 1008

PANAMA CANAL 1002-100

States for the protection of the tranaft In other detalls, Inartieularly at to the wequisition of the Interestis of the New Ihnams C'anal ('ons. pany and the I'anama liallway by the tinited Alates and the condemnation of private property for the uses of the cans', the stlpulationa of the llay. Ilerran treaty are chomely followed, whlle the compenation to he siven for these eniargel grante reunlas the mame, loing ten millions of dollari payable on exchange of ratl. fications, and, beglnuhg it years from that date, an annual payment of $\mathbf{\beta}_{3}+5,000$ durlag the Ilfe of the conventlon." - P'reaident's Meselge, Ler, F, 14hid.
The text of the Treaty with Panama may be fouml in the voinme of "Papers relating to the Forelyll lejathons of the [nited States" for 104, TJ. 848 - 751

In the vlew of " gool raany critles who are not of a captions diapualion, the cominet of the Governarent of the l'plted siatem in these trans. aetlons was not as unipueationable as lt appeared u. I'resillent Ihoosevelt. Profensor C'ooilhige, of 1larvarl University, In hls candid and bramily atudien] work on "The C'nlted Niates us a World l'uwer" (prepariel originaily in the form of lectures delivered at the sorbonne, In Paris), remarks that "to t -bill the landing of Colomhian troxpst was ho mertch the meaning of the ohl American right to muintain onler nloug the line of the rallway tu an extent harally justitiahle in dealing with a frioblly mation, abll the haste with which the almhistration at Wushincton reconnizer the indepenimere of the new rupuls. lic und condeded a treaty with it appeared to many people iudecent The trith was the Americmus did hot feel that they were dealiug with a fricmlis iatlon."
A. D. 1904-1905.-Beginning and Organization of the Work of Construction. - "The trenty between the linted siutcs and the Re. pubile of l'amma, muler whith the constrite. thon of thr l'unma ('aml was mude poselble, wirnt lnto etfict with its mititicallon by the C'uited situtes scate un Frhenary 23, 1104. The canai properties of the Frencl (anal Company were tmasferred to the lindiel fitates on April 23. lin)4, on payment of $840,6(10,400$ to that company. In Aprij 1, 180.5, the commit sion was reorgauzed, and it now consisis of Theodore P . Nhonts, chairman, Charles l: Magoon, 13enjamin M. Harrokl, Rear Aimiral Noreteeni T. Endieott. Hrig. Gen. I'eter C. Hains, and (ul. Jswuld II. Ernst. John F. Stevens wes appointed chief engineer on July 1 last. Active work in eanal conatruction, mainly preparatory, las been ln progress for less than n yiur anil a half. During that period two points aboot the canal have ecased to be open to dehate. First, the question of route; the canal wlli he huilt on the lsthmus of Panama. Fecond, the question of feasibillty; there are no physical olistucles on this roote that Anerlean englneering skill will uot be alle to overcome without serious dift. culty, ol tis. . prevent the compietion of the eanal witl
asonable time and at a roasonable cost. This in virtually the unanimous testimony of the engineera who have lnrestigated the mather for the Government. The point which remains unsettled is the question of type. whether the canal shail be one of several lucks above sea level. or at sea level with a single tide lock. Un this point I hope to lay before
the Congreas at an eariy day the Aulings of the Advisury Ihard of Amerfean and Firpogran Finglneern, that at uy Invitation have been cta shering the aubject, together wlith the report of the Commamion theroon : and such cotrimenta thereon or recotasuealations in reference biretic as may secm necemary.

## PAN-LCN-HIIAN HEDULIBT

the Interborough Co. of New York, and Caronel Coethals became Chairman of the Commiaion os well as C'iilef Hinginect
Is I i Je, 1008 the original design of a cen-level canm: soughout, with no locks, wat iropperi, a!tre tuuch conalderation and ituder welahty enploerfing advice. As demerilued very termely and clearly by an Finglah writer on the smbject, the uew plan for lorks is workeni uut as follows: - He dinalag at diep water in Limom lsa , na the fariblesan coast, there will be thde- It ser cliau. gel inoft. wide and 6.76 miles lomg to Catun It Gutum there: will lee the vant datiI, the ascent of whlch will be effected by mennsul two th'zhts of locks. In earli llyplit there will twe three locks, each $1,00 \mathrm{Oft}$. loug, 110 ft . wher, and 418 St . dow on the sills. Theo will pive accems to a lation formed by the impromided watirs of the Cbugre river, with a surface level mifi uloze mata tide level. T'lurouth tholake will extemd
 miles to lans oldeng, the entrance the the bricut. Thence throbyl that cut there wil' a chanael suoft. wide for M. Il miles to l'e Mignel, the serface level being the sint that uf the lake. At P'rdry Mhatl there wal be a dan with twin locks, she bey mile, ly whech lescent of $30 f t$. will be umble to a smaller hake sifft abuve the water. Thas lake, muly 10.9: of a inlle long, will he traversed hy is chan ael iwoft. v de to Mirathorey. Where there will Ese muther li. . with twin tighte of licks, two lerks in eas $l_{1}$, fight, bringing the canal down to the level; noll from Miratlures a channel suoft. wide will extemi 8.81 miles to deep water In Het luy of Pannma. The ehanuel will nuwhere, areon the luck sills, be lase than 4ift. Weel. and the lorks at l'alro Mhanel and Miraflorns will be of the samer dimeuslons as those at (iatun."
This altured plan pecelved much perslatent
 after the clecton of Mr. Taft to the I'resideney of the Unted states, but before his asampthon of the oflice, the I'reshlent elect, who, as Sec. retary of War, hat beell the respousible admin. fsirator of the undeitaklig. went to the lath. tuis with a selected connmittee of englucira. " ho werc asked th exituliue wind report ont the phavesul methmes ct the work Fheir reports. mame in February, endorsed be in mat muncatiug them to C'ongress the I'resident chumetriad them as slow wing that "the only rriticisu that can lee monde of the work on the inthans la that there las gumetimes lueta amont an ixcess of caution In proviling apaine pas sible tronble. An to the Gatun dam itseli, tove: show that not ouly is the - 14 safe. bit whole the plan already a seal woull mo nomplesaly high and stre che accontin ay thry recommend that the utan be reduriod by 1 winty feet, whloh change the plaus I lave aroorlingly directed." of the ensineers who male the report lie remarked that they ". are if all the men in thelr prufession, within or withoit the Cnited States, the men who arr on the whote best qualltied in pass on these rery yisestions which they examined." The mem. larohip of the committec or board was as follona: Frederic I'. Stearns, James D. Schuyler, Ariluir l'. Davis, Isham Iandolph, Henry D. Allen, John II. Freeman, and Allen Ilazen.
Tue engiuters peporicd that "as the Gatum
eath dam wan the erntral polnt of discusaion. they geve it ubiler Instructious frum Slr Twit Arat cousiblestion In the light of sil uew evi drnces," and they whiled "that the type of dam under comalderation is unf which gucen with our unaultuntm approval." Danie ani lox'ks, luck gater and all wher coglturering atrictures invoived in the liek-chas projeet, are "feaslble mal cafe," actutiliug buthe paptuera, " and can tw deprided upin tu jorform whith ceptaiuty their respectlve fibuct 1
Conshlering the cost aid time of constructic of a mea level canal an cumpased whth the lock type, they lield that " mont of the factura whech have opratel to Increase the cust of the lock canal wonlif opreft witb sluilar eflect to in. cremen the cont of the sa level camal, and at the prew-ut the there are adilitonal factors of even
 the thae of completion sul cont of a sea level "unal." One of these they fonnill lin thamber dand. If work on thin ware lif be started as (xon as prosilile, they sawred it "eould not be completed until after the time reguirmi for the "ompletion of 'he bork ramal." $\boldsymbol{F}^{-6}$-..: than this, they mald that "a chan" the type would result in sbabloning wis 'ab repre. sints lurge expenditure." by the clange the river Chagh :t lie rivers on the lathmus tributary flow . Iustemi of
 lionais in them would griatly iuterfere with the wrork

1helylng to the crifidom that " the canal re. gion foliable to carthytuke shocks, and that a sea level banal woblel le leas subject tolidury
 tha. " hims and lochs are structure of great stability ami fitle mbject to diamage by carth. gulake whaks," hut that even if the: conld regard carthyunkes as a conreve of serious tam. uge (1) any type of canal on the ivthuns. " their effret upon the dams, loetis and regulatlig worhs proposed for the wille val camal wonld be much the atme as upon similar structures of the lurk "anal."

Finally, they sald: "We se no renson why the cubal shomill but lie completed, the entimateil hy the elifef ensineer, by fanmary 1, 1015: in far it sperm that a anmew lat carlier date is P' 'sle. fall gres wrll.

PAPACY: A. D. 1902. - Secession of the Independent Filipino Church. Siee (in thls vol.) Pillifpine Islanide: A. I). 1002.
A. D. 1903 (July-Aug.). - Death. of Pope Leo XIIf. - Election of Pius X. - The P'apal sent became vacant by the death of Pope Leo Sill. on the 20th of July, 1903. The Conclave of Cardinnls for the election of hils surcessor assenibled on the 31st of the month, mind lts choice of Cardinal Sarto, Patriareh of Venle, was made known on Angnst 8 d . The new lope assumed the name of Pins $X$.
A. D. 1904. - Papal Prohibition of Civil Interference with the Election of the Roman Pontiff. - The Civil Veto, in all forms, denounced. - In the first year of his ponitit. cate, on the 2a th of January, 1904. Pope l'ins $X$. prononnced the following dennueiation nud prolinition of erery klad of intrusion of civll antthority or intluerice in the electiou of a Roman pontiff: "When tirst, nll nnworthy as we are, we ascended thls chair of Peter, we deenced it n most urgent thaty of our npostolle office to pro. chle that the life of the Charch shoutd manifest itself with ahsolute freedom, hy the remoral of all extraneous interference. us her thvine Founder willed that it should manlfest itself, na!! as her lufty mission Inperatively requires.
" Now if there is one function ahove all others in the life of the church which demands this liberty it is certainly thut which is concerned with ibe election of the Romas pontlif; for uchen it herud is in quastion, the health not of une nuember alume but of the crlule bexty is intrulted (Greg. XV. Constit. Aeterni lutrin in proem).
"To this full liberty in the election of the supreme lastor is opposed tirst of all that elvil Titw which has heren more than oure brought forward liy the ralers of some states, and by which it is songht to cxelude sonelonly froun the supreme pontificate. If this has happeried sometimes, it has never been approved by the apmstulic see. On the contrary the Roman pont'fls, in their enactments min the eonclare, have been in mothing perlaps more emplatie or more carnest than in their efforts to exclude the interfercnee of all extraneons powers frons the sacred senate of the Cardinals summoned to elert the pontiff.

- 13it. and experience has shown lt, the measures hitherto taken for preventing the clvil leto, or Erelusive, have not served their pur. puse, und on accomit of the cluanged eircumstances of the times the intrusion of the eivil puwer in our day is more clearly than ever before destitute of all found:ation in reason or eculty. therefore we, by virtue of the apostolic clarge entrusted to nis, and following in the footer plps of our predeceswars, after having nuturely deliherated, with certain kuowledge and by oir own motion, do nbsolntely condemn the cirll lith, or Eirciusire as it is also called, ereu when expressed muder the form of a mere desire. and all interventlons and intercessions wlatso. cver. lecreeing that it is not lawful for uny body. not even the supreme rulers of states, under any pretext, to interpose or interfere in the grave matter of the election oif the Romsn pontiff.
" Wherefore, in virtue of holy obedlence. under threat of dirine judgment and pain of excomminications latue sententine reserved in a special manme- to lise futhre pontit, we prohilit all and single the Cardinals of holy Roman

Church, and likewise the secretary of the Naered College of Cardlnals and all others who tske part in the conclave to receive, even under the form of a simple desire, the oftlice of proposiag the Veto or EArelusive, or to mnke known this Vitu in whatever manner it may have comie to their knowledge, to the sacred College of (arli. nals either taken as a whole or to the ludivilual fachers Cardlnals, either by writing, hy word of mouth, whether directly and proximately, or ludirectly and through others. And it is our will that this prolihition be extended to all the interventions nhove mentloned, and to all other intercesslons whatsoever, by which the lay powers, of whatsoever grade and order, ea denvor to Intrude themselves in the elections of the pontiff.
"Finally we velientently exhort, In the sime words as those used by cur predeccesmirs, that
 tion chatever to the "inyulx of secular prinese ir other rrorllly consideratious. .. hut solely with the glory of God and the good of the charch before their eges, give their votes to trim whim they judge in the Lord better fitted than the others to rule the Lniversul Church fruiffully and usefully. It is our will niso that thesc vir letters, together with the other constltutions of the same kind, ber rend in the presence of all in the tirst of the congregations wont to be hed after the death of the pontitr; agaln nf uer em trance into the conclave: also when anyborly is raised to the dignity of the purple, with thie addition of an oath linding to the reticinus observance of what is decreed in the present constitution."

A.D. 1906 (Feb.).-Encyclical "Vehementer Nos," to the Prelates, Clergy, and People of France, concerning the Separation Law. The followling are passages from the Furyili. cal known, from its opening words in the leitin text as "Vehementer Nos." which l'ope Dine $\mathrm{X}^{\prime \prime}$ adelesssed to the French nation on the 19 th of Fehruary, 1906. after the adoption of the Law separatligg the church from the State :

To the Archbushops, Blshops, Clergs

## People of France.

Venerable Ifretle
Well Beloved Sons, Itealth aad Apostolic Be ut diction.
"Our soul is full of sorrow ful sollcitud. ami our heart overflows with grief when our thoupht: dwell upon you. llow. Indeed, could it lw otherwise, immedintely after the prommle:tion of that lav which, by sundering viokently the olld ties that linked your nathon whith the A:us tolic see, creates for the (atholic Chareh in France a sltuation uuworthy of her and ever to
be lamented: That is, beyond question, an event of the gravest import, and one that must he deplored by all right-minded men, for it is as disastrous to soelety as it is to religion; hut it is sn event which can have surprised nohody who has paid any attention to the religions pol. icy followel in France of late years. For you, Vencrable Brethren, it wiil certainly have been nothing new or strange, witnessel as you hare been of the many dreadful hlows aimed from tiue to time at religion hy the puhlic authority. You have seen the sanctity and inviolability of Christian marriage outriged by legislative acts in formal contradiction with them; the schoois snd hospitals inicised; cierics toru frogu their studies and from ecciesiastical discipline to he subjected to military service : the religious congrcintions dispersed and despoliemi, und their anmbers for the most purt reduced to the last stager of destitution. Other legal measures which sathll know have followed - the law orduining public proyers at the hegimning of each I'arliamentary session and of the assizas has been ubolishoi : the signs of mourming tralitionaliy observed on boaril the ships on Guod Friday suppresed: the religions charicter effaced fron the judicial onth: all actions and emblems serv. ing in nny wny to recull the inlea of religion banished from the courts, the schewols, the army. the onve, and, in a word. from all publie establish. uents. These measures and others stifl which, one after nother, renlly separated the (hureh from the state, were hit so many stepse designcully mside to arrive at complete and oflicial separaiun, as the authors of them have puhlicly and frequently admitued.

- "In the other handi, the iInoly See has sparet aboulut.ly nomeans to avert this great calmmity. While it was untirine in wirning thuse who were it the heme of affairs in Framee and in conjuring them user and over again to weigh well the imanersity of the evils that would infulibibly result from their separatist poliey. it at the same thue lavisired upon France thi most striking profs of indulgent affection. It hive then ramsun to hune thit grotitule woulid hove stayod those puliticians on their downward path, and bronght flom at hast to relinquish their designs, But all haw bero in win - the attentions. goml otlices ant ettorts of our predecessor and ourself. Tlae enmies of religion have succeded int hast in ef. fecting by violence whet they lawe long desimed. in whance of your rights as a (intlotier nation and of the wishes of all who think richtly.
- That the State mist be separited from the Church is a thesis absolutely filse, a most pernichous error. Basen, as it is, on the prineiple that the siate must not recormize any religiout ratt. it is in the tirst place guilty of a great injus tice to Grus : for the Creator of man is aiso the fumder of limman societies, and preserves their cxistence as lle preserves our own. We owe 1 im , therefore. not only a private eult, but a public and social worshit to lonor llim. Be. sides. it is an obvinus negation of 1 her supernat. aral urder. li linits the action of the Siate to the pursuit of public prosperity durime this life mite, "hich is hut the proximate olyject of politienl smereties: and it oreviluies iterelf in no fashiont (on the plea theit this is foreign to it) with tieetr nitumate ohjef: which Is man's etermal happines after this short life shall have run its course.
"When the Statc broke the honds of the Concordat and separated Itself from the Cluurch it onght, as a natural consequence, to have left her her independence and allowed her to enjoy peacefuliy that liberty granted hy the common faw which it pretended to assign to her. Nothing of the kind has been done. We recognize in the iaw mnny exceptional and odiously restrictire provisions, the effect of which is to place the Clurch under the domination of the civil power.

With the cxistence of the association of worship, the law of separation hinders the pastors from exercising the plenitude of their anthority and of their office over the faithful. when it attrihutes to the Council of State suprene jurisdiction over these associations and submits them to a whole series of prescriptions not contained in common law, rendering their fornation difticult and their continned existence more difticult still; when, after prociaiming the liberty of puhlic worship, it proceeds to restrict its exercise hy munerous exceptions: when it despoils the Chareh of the internal regolation of the churehes in order to invest the State with this function: when it thwarts the preaching of (atbolie faith and morals and sets up a severe and exceptional penal cole for cleries - when it sanctions all these provisions and many others of the same kimi in which wile sstope is left to arbitrary ruling, does it not place the ('hurch in a position of lumiliating subjertion ami, under the pretext of proterting public order, deprive peacealle citizens. who still constitute the vast majority in France, of the sacred right of practising their relision?
it adalition to the wrongs and injuries to which we have so fur referred. the Law of separation also violates and tramples under foot the rights of property of the Church. In defiance of all justice, it lespoils the Clurch of a rreat portion of a patrimong which belonges to her by tilles as numerons as they are sacred; it suppresses and anmila all the pious foumblations eunscruteti, with perfect legality, to divine worship nad to suffriges for the de:nd. The resources furnislacd ly Catholic liberabity for the nmintenance of ('atholic schools, amd the working of variuns charitable anociations connected will religion, lave been transferrel to lay usso. ciations in which it would be idle to scek fur a vestige of riligion. In this it violites not only the rionts of the Church. but the formal and ex. phieit purperse of the donors and testators. It is tho a subject of keen grief to us that the law. in contempt of all right, proclains as property of the State, depurtments or communes, the ercleriastical editices clating from before the concordit. 'True, the law coneedes the gratuitoms ise of them for an indefinite periorl, to the ussociations of worship, but it surrounds the concescion with so many and so serions reserves that in reality it laves to the public powers the full disponition of them. Doreover, we entertain the gravest fears for the sanctity of those temples, the aurust refuges of the Jivine Da jesty and enlenred by a thonsand memories to the piety of the French mople.

Hence, mindful of our Apostolic charge and conscious of the imperious duty incumbent upon 115 of Iffending and preserving agalast ald assaults the full and ahsolute integrity of the sacred and invioiuhie rights of the Church, we
do, by virtue of the supreme authority which God has conided to us, and on the grounds above set forth, reprove and coudemn the law voted in France fer rene separatlon of Churcb and State as decply unjust to God, whom it demes, and as layling down the princlple that the Republic recognizes no cult. We reprove and condenn it as violating the naturai iaw, che law of nations, and indelity to treaties: as contrary $\omega$ the Mrine constitution of the Church, to her essential rights and to her llterty; as destroylag justice und trampling under foot the rights of property whluch the Cluurch has acquired hy many titics, und, in addition, by virtue of the Concordat. We reprove and condentu it as gravely offenslve to the diguity of this AposWhlle see, to our own person, to the Episcopacy and to the clergy and all the Catholles of Frauce. Therefore, we protest soiemuly and with nll our strength against the introduction, the vothing and the promalgntion of this iaw, declaring that it ean never le alleged agalnst the imprescriptible rights of the Church." - Pope Pius X., Encyclical Letter ( $: 1$ merican Cathulic \&uarterly Reriew, April, 19066).

A. D. 1907 (Sept.). - Mandates of the Encyclical on Modernism. - The following passazers contuin the essential nundates of the Ene ycllinal on Moxternism, issuted on the 8th of Sepiember, 19it: "The otice divinely committiel to us of feeding the Lord's flick has especially this dinty assigned to It hy Christ, namely, to guard with the greatest vigilunce the deposit of the faith deiivered to the saints, rejecting the profnue novelties of words and oppositions of browledge falsely so calied. There has never hena time when thls watchfulness of the supreme pastor was not necessary to the Catholic bolls; for, owing to the efforts of the conemy of the human race, there have never been lafking men speaking perverse things ' (Acts xx. 30), rain talkers and seducers' (Tit, i., 10), 'erring and driving fito error' (il. Tim. ili., 13). Still, it must be confessed that the number of the enemies of the cross of Christ has in these last dars increased exccelingly, who are striving, by arts entlrely now and full of subtlety, to destroy the vital energy of the Church, and, If they can, to overthrow utterly Christ's kingdom İtself. Whereforc we may no longer be silent. lest we should seem to fail in our most sacred duty, and lest the kladness that, In the hope of wiser coun-
sels, we have hltherto shown them should be attributed to forgctfuluess of our oltice.
"That we may make no delay in this matter is rendered necessary cespeclally by the fact that the partisuns of error are to be songht not only among the Church's open enemles; they lie hld, a thing to he deeply deplored and feired. in her very bosom and beart. and are the more unachicuous the less conspicumisly they ap. pear. We allude, venerahle brethren, 'o inany who belong to the Catholic latty, uily, and thils Is fur more lamentahie, to the ranks of the presthoox itseif, who, felgalng a love for the (hurch, lacking the Arm protection of philosulhy and theology, uay, nore, thoroughly imhucd with the poisonons doetrines tangit by the enemies of the Church, and iost to all scose of modesty, raunt themselves ns ruformers,
not sparing even the persou of the livine Redcemer, whom, with sacrllegious daring. they reduce to a simple, mere man.

Though they express ustunishonent thim selves, no one can justly he surprised that we numbir such men amoug the encmit's of the Church. If, leavinr gut of consileration the in. ternal disposition of sonl, of which (ind athne is the judge, he is accqualuted with thelr temets. their manner of speech, their conduct. Nir. indeed, will He err in accounthg them the most pernicious of all the ndversaries of the Church. For, as we have sald, ther gut theis desigus for har ruin hetes opreration nut froms without. hut from within; hence the danger i, present almost in the very veins nat heart of the Churelt, whose injury is the more curtiin. the more intimate is their knowledge of hers Moreover, they lay the nse not to the branehe, and shoots, hut to the very root : that in. to tias faith and its deepest fibres. And having etruck st this root of inmortality, they procect wis seminate polson through the whole trec. wo dhat there is no part of Catholic truth from whinh they bold thelr hand, none that they do an: strive to corrupt. Further, none is inure shil ful, none more astute than they in the em. ployment of a thonsand noxious ants; fir ther donble the parts of rationalist und (ablimit: aud this so crnftily that they casily head the unwary into error; and since nudacity is the ir chlef characteristle, there is no conchusi(u) if any kind from which they slirink or which they do not thrust forward with pertinacity and as surance. To his nust be alded the fait, whith ladeed is well calculated to deceive sonio, that they lend a life of the greatest activity of as sillunus and ardent npplication to every brimeb of learning. and that the $\mathbf{y}$ pussess, ns in rule. s reputation for the strict est mornlity. Fiualiy. and this almost destroys all hope of cure. hit ir very doctrines hare given sucht al lent to their minds that they dishaln nli authority and bron' no restraint : and, relylug upon a fale con science. they nttempt to ascribe to al hene n! truth that which is In reality the result of prile and ol inary.
$O_{1}$ «i, indeed, we liad hopes of recallin: them I a better scnse, and to th:ls end we tres of all showed them kindlacss as our chiliten. then we treated them with severlty, and at las: we have hal recourse, though with great reluc tance, to public repronf. But, you knetr. ren. erable brethren, how fruitless has been our actlon. They bowed their bead for a momert,

## PAPACY, 1007

## PAPACX, 1007

but it was soon upilfted more arrogantly than ever. If It were matter which eoncerned them alone, we might perhaps have overlooked it: but the security of the Cathoiic name is at stake. Wherefore, as to maintain It ionger wouid be a crime, we must now break silence, - order to expose before the whole Church in their true colors those men who have assumed this bad disguise.
" But since the modernists (as they are com. monly and rightly called) employ a very clever artifice, namely, to present their doctrines with. out order and systematic arrangement Into one whole, scattered and disjointed one from an. other so as to appear to be in doubt and un. certainty, while they are in reality firm and teaifast, it will be of advantage, renerable bretbren, to bring their teachings together here into one group, and to point out the connection bitween them, and thus to pass to an examina. tion of the sources of the errors and to prescribe remedies for avcrting the evil.
"Against this host of grave errors, and its secret and open advance, our predecessor, Leo Xlli., of happy memory, worked strenunusiy. especially us regards the Bible, both in his worls nad his acts. But, as we have seen, the modernista are not easily deterred by such wrapons; with an affectatlon of suhmission and rrgnect they proceeded to twist the words of the Pontiff to their own sense, and his acts they described as directed against others than theinselves. And the evil has gone on increasing from day to day. We thercfore, venerable brethren, have determined to adopt at once the most efficaeious measure in our power, and we beg snd conjure goll to see to it that in this most grave matter nobody will ever be able to say that you have been iu the slightest degree winting in vigilance, zeal or firmness. Ani what we ask of you und expect of you we ask am expect also of ali other pastors of souls. of atl culucators and professors of cleries, and in a very special way of the supcriors of religious institutions.
"I. In the first place, with regard to studies, we will and ordain that scholastic philosoply be made the hasis of the saered scicnces. It goes without saying that if anything is met with amone the scholastic doctors which may he regarded ss an excess of subtlety, or which is altosether destitute of prohability, we have no desire whatever to propose it for the imitation of present generations (Leo Nill. Ene. - Aeterni l'atrís'). And let it be clearly under. stood above ali things thnt the scholastic philosophy we preserine is that which the Ingelic Ductor has bequeathed to us, and we, therefore, declare that all the ordinances of our predeces. s)r on this suhject continue fully in force, and. as far 89 msy he nccessary, we do decree anew and confirm sud ordain that they be by all strictly obserred. In seminsries where they may have heen neglected let the Bishopsimpose them and require tieir observance, and iet this apply also to the superiors of religlous institutims Further, let professors remember that they cannot set St. Thomas aside, especially in metaphysical questions, without grave detri. mu•nt.

On this phliosophical foundation the theological editice is to be solidiy ralsell. l'romote the study of theoiogy, venersble brethren, by
ali means in your power, so that jour cierica on leaviug the seminaries may admire and love it, and siways tind their delight lu it. For in the vast and varied abundance of studies opening before the mind desirous of truth everybody knows how the old maxim descrihes theology as so far in front of ali others that every science and art should serve it and be to it as handmaldens.

With regard to profane studies, sufflee it to recall here what our predecessor has admirahly said: Apply yourselres cnergetically to the study of naturai sclences: the briliant discov. eries aud the boill and usefin upplications of then male in our times, which have won such applause by our contemporaries, will be au object of perpetual praise fur tiose that come ufter us' (Leo XIII. Alloc., Marcit \%, 1880). But this do without Interference whit sacred studies, as our prejecessor In these most grave words preseribed: ' If you carefully senreh for the cause of these errors. you wifi tind that it lies in the fact that in these days, when the untural sciences absorb so much stuly, the more severe and iofty studies have been frupurtionately neg. lected; some of them have nlinost passed iuto oblivion, sume of them are pursuted in a halfhearted or superficial way, nud, sud to say, now that they are fulien from their old estate, they have been disfigured by perverse doctrines aud monstrous errors (loco cit.). We ordaitt, there. fore, that the stuily of natural science iu the seminaries the carried ou under this law.
" 11 . Ali these preseriptions and those of our pretecessor are to be horne in mind wlenever there is question of ehoosing directors and irofessors for semimuries and Cutholic liniversities. Ansbory who int iny way is found to be int. bued with maternism is to be exeluded without conpunction frotu these oflices, and those who alreals occupy them are to be withlraw a. The: same poliey is to be mopted towards those who favor molernism, either by extalling the modernists, or excusing their eulpable conduct, by eriticizing scholinticism, the IIoly Father, or by refosing obedience to ecciesiastieal autiority in any of its depositorics; and towards those who show a love of novelty in history, archnology, liblical exegesis, mut tinally twwards thuse who neglect the sacred sciences or appear to prefer them to the profane. In all thifs question of studies, renerable brethren, you cannot be too witchful or too consiant, but nost uf all in the cltoice of professors, for as a rule the students are modeled aftur the pattern of their minsters. Strong in the consciousness of your duty, act always prudently. but vigorousis
" Equal diligence and severity are to be used in exnmining nud selecting canifilates for holy orders. Far, far from the clergy be the love of novelty. God hates the proud and the obstinate. For the future the doctorate of theologr and canon iaw must never be conferred on anylody who bas not made tie regular course of scholastic phifosophy, if conferred, it shali be held as null aud roid. The rules lain duwn iu 1896 by the Sacred Congregation of Bishops and llegnlars for the elerics, both secular and rer, ha- of lials, concerning the frequenting of t're unlversitles, we now deeree to be extended to all nations. Clerics and priests inscribed in a Catholie instilute or university must not in the finture foliow in civil universities those courscs for
which there are chalre in the Catholic Inatitutea to which they belong. If this has been per. nitted anywhere in the past, we orduln that it be not allowel for the future. let the Bishops who form the governing board of such cintholle Institute or unlversities wuth with all eare that these our eommands be constantly uhserved.
"11I. It is also the duty of the Blshops to prevent writings lnfected with modernism or favorahle to it from being read when they have been published, and to hinder their publication when they hare not. No book or paper or perlodleal of this kind must ever be permitted to semluarists or university students. The Injury to then would be erpial to thit cansed by lin. moral remling - nny, it would be greater, for such writings poisin Christinn life at its very fomut Thesame decision is to he takeu concern. ing the writings of some Catholics, who, though not hadly disposel themselves, hut ill instructerl In thcologimel studies nnel Imhuct with modern phllosoplyy, strive to make this burnonize with the faith, und, as they s:ly. to turn it to the aceount of the fath. Tbe uame and reputation of these authors cinse then to be rad without suspicion, and they are. therefori; all the more dangerous $\ln$ proparing the way for modernlsm.

- To give you some more gencral dlrections, veneruble brethren, in a matter of such moment. we bll you do everything in your power to drive out of your dioceses. even by solemn Interdict, any pernicious books that may be in eirculation there.

If. But it is not enough to hinder the reading inul the sile of hal books: it is alsonecessary to prevent them from being priatel. llence. let the Bishops nse the ut most sererlty in prant. lag permission to pribu. Vulter the rules of the Cunstitution 'Olliciorum,' many publicathons repure the nuthorization of the ordinary, nom in some dioreses it has been male the custom to have a suita'le number of ofleial equsors for the examination of writings. We lave the high. est praise for this institution. and we not only exhort. but we order thit it he extented to all diocescs." - Pope Pius S., The Doctrines of the Wodernists (American Gatholic Ounrterly Re. tielr, Oet., 1907). Sce, also, Tyrrel, Fatier Gforne.
A. D. 1907-i909. - Revision of St. Jerome's Latin Translation of the Bible, Enown as "the Vulgate."-"In May. 190\%, an announcement was male of the l'opers intention 10 revise the Iatin Bible, and the work has alrealy made such progress that the time has conle to record not onlf the main lines upon which the revision is beine carried out but also the actual completion of lis preliminary pre. parations. . . . Pins X. . . . offered the hon. otiralole thougli costly and arduous task to the lamed Orter of the Benedictines, hy whom it was accepted. A commission of revision was appointed, with Abbot Gispuct. the President of the Finglish lenedictines, us lis head, and the Internatlonal rollege of the Orter at Fin Anstlmo in lante wis chosen as the heatquar. ters of tbeir work. It is here that Ahbot Gasquet and hls fellow workers have already made a gooll start upon the vast lahour whleh thelr Order has undertaken.

The object of the fommission, according to the Pope's definite instructlons, is to determine and ristore as far as possible the original text
of St. Jerome's Latin translation made in the fonrth century. How far it. Jerome's transla. tion represents the Hehrew or Greck is annther question whleli may he the subject some das for future crlticlsm and another commlesion.
lhus X. has made it elear to the Commission that he desire thelr work of revisinn to be conlucterl on the most modern and scin $n$. tlice llnes, and that nelther money nor laboir should be sparel to make it as thorough as possible. An exhaustlve scarch will be male through all the llbrarles of Europe ln the lywe of findlag hitherto unrecognized mannscripts of the Vilgate. Alrealy there are 15 collab... rators at work in different centres, collating the hest-known and nust Important manuscripts with the Clenentlne text, while another commission, with lis asslstants, is making s thorough examination of the llbrnies aud ra. thedral archlves of Spain in search of freah material.
"The methoi of work is as follows. For the purpose of collation coples of the ciementine text have heen printed; each page beiug lift blank for two-thinls of lis sirface, the text belng printed on the , imalning thirl whth no capital ietters, no stops, no word divided, so as to resemble manuscript as far as puscible. When a reviser whshes to collate any manuscript he lias only to correct thls print lihe an orilnary proofsheet and so reprolute erefy difference of the mannscript before him.

The printing of these copics of the Vu!gate, whlch are to form the basis of the culla tions, whe the prepnration of the texts and fur rection of proofs - no llght matter - lais been the work of the first rear. Threc hundied and sixty eoplies lave berin printed la all, one hun dred upon the hest hant-mate paper, two hist Ired upon ordiuary book paper, and sixty upn thin paper for the purpose of postage aliroanl. The l'ope himself lias defrayed the rathit heavy cost of thls production. Resile the priuting of thle Blale considerable progrtss has bern niale during the past year with the preparation of a hand list of all the Latiu Bihlical MSS. In the lihraries of Europe, which. whor completed. will be of great use to the revisces As the collators finish their work ln the various llhraries or archlves where Bibllial manuserip:s are found, they send their annotated copis to San Ansclmo. wher 'y are bonnd up and added to a collectlou whleh, when complete, will form a rast llbrary of all the dlfferent versions of the Bible. Seven linportant collarions hare alrendy heen made, and at the present rie of work the number of these volunies will in. crease very rapidly." - Rome Corresponden' $f$ the London Timct, July 21, 1900.
A. D. 1908. -The new Apostolic Constitution of the Curia. - A change of far., ach. lng and great lmportance in the ecclesisulical constitutlon of the Roman Church was der leed by Pope Pius $X$. this gear, by the promula: tion of a new Apnstolle Constlution of :Le Curia. It reorganlzed the numerons ('ongrega. tlons or departments of the Vatican (furera. ment whleh had exercleed the judiclal functis of the Curia for some generations past. The Pope now restores these functions to an sncin: ecclesiastical eourt, the Rota, which hat :.i.:out of use. The Rota is constltuted as an in:er. national court, before which questions between
pricst and bishop, bishop and dlocese, and the ike, will have their heuring, aud from which there is appesl to a tribunal of last resort, the seqnatura, composed of Cardiuals alone
The reorganization of the Congregatlon of the Propaganda by thls nuw Constitition removes from that body the ecclesiastical jurls. diction It has exercised heretofore over the Church in Great Britaln, Ifoltauf, the Linited States, Canada, and some other countries, thus taking tinem ont of the Roman category of mis. slunary lands.

PATFATS OF INVENTION: Great Britzin: A. D. 1907.-Patents and Designs Arc.-A requirement $\because$ the manufacture of patentell articies : I the $\mathbb{C}$, ifted Kingionn, introducefi. in Act of the British Pariament passed and app:uved in August, 100\%, which came into force August 24.1908 , seriousiy changed the operstion of patents issued to forejgners. It is contained in the following sectlons :
"27. -(1) At any time not iess than four years after the date of a patent and not less than one year after the passing of this Act, any person may appiy to the comptroile: for the revocation of the patent on the ground that the patented article or process is manufactured or carried ou exclusively or mainly cutsiue the Tnited King. dom.
. (2) The comptroller shali consider the appiication. and. if after enquiry be is satisfled that the allegations containa therein are correct, then, subject to the provisions of this section. aud unless the patentee proves that the patented article or process is marufactured or carried on to an adcquate extent in the Cnited Kingdom, or gives satisfactory reasons why the article or process is not so manufactured or carried on, the comptroiler may make an order revoking the pstent cither - ( $a$ ) fortiwlth; or (b) after such reasonsbic interval as may be specifled in the ondre, :nnless in the meantlme it is shown to hls satisfaction that the patented articie or process is manufactured or carried on within the Lnited Klngdom to an adequate crtent: Provided that
no such order shall be made whlch is at variance whith any treaty, convention, arrungenient, or engagennent with any foreign country or Britlsh possesalion.
" ( $(3$ ) If whthin the time limited in the order the pah'nted articie or process is not manufar. tured or carried on within the L'n. ced Kingdom to an adequate extent, hut the patente gives satisfactory reasons why it is not somanufac. tured or carrieti on, the comptroiler may extend the perfod mientioned in the previous ordar for such period not execeding tweive months as may be specited in the subsequent onder.
(4) Any decision of the comptroller under this section shaii be subject to uppeal to the court. and on any such appesi the iaw ofticer ar such ather coninsel pe Lis may appoint shall he entltied to appear r.nd be heari."
Tweive months arcer the Act became effective the Loudon Times gave the foliowing account of lts working: "During the year which has clapsecd f:nce Section 27 came into force, 69 dpplications for revocation of foreign patents have bren arde to the Comptrolier-General. in 10 cases oniy were patents revoked ly that offichai. In four of these cases the patences appeaid to the 1 light Court, and in two cases rejuting to improvenents in clectric are lamps, the decision of the Comptrolier-General was reversed, evidence having been adduced which was not piaced before the Coinptroller General, the effect of winch was to show that the patented process wus lifing adequately carricd on in thls country. The two otht ppeals to the High Court were unsuccessful, so that the nmmber of patents finaliy revoken was eight. Those revokel related to the following articits or processes:-Artificini stonc slabs and tiles (two patents), sewing nacilines, umbrcilas. adinesive stars or fastening straps used in boxmaking, the iabrication of gig milis, a stemm mitor.car, anii locks. In another case, that of at mateat connected with the mannfecture of china ${ }^{1}-1 . y$, the Comptroller (teneral made a condi1: nal oricer of rivecation.

- It is ton early, has yet. to say whother this new power nf revocation conferrai by the Act of 1907 is likely to have nay appreciable effect in reduclny the number of foreling patcuts taken out in thix country. In the first seven montins of this year there were 17.469 such patents applied for-an increase of livik as compared with the corresponding ${ }^{\text {wreriox }}$ of 1908 , though only all incrense of 319 upon the larger flyures for the fist seven montios of 1907. Sixtecn fewer patents were taken out in 1909 hy American subjects than in 1908. and 331 fower than in 1007. The decrease in German patents has been consistent-2000 in 1907. 182\% in 1908. and 173:5 in 1909, and the samc may be said of Austrian patents-253. 234, and 192 rcapcctively. Frucil patents, which were 821 in $120 \%$ ant $6 \div{ }^{\circ}$ in 190x. decreasel to 560 in 1909.

PEONAGE: In the United States. - The following extracts are from thrce reports of an official investlgation of practices of peonage, conducted hy the Assistant Attorncy Gemerall of the Cinited States, Mr. Charies W. Russell, ia 1:106-~:

- Under the crimanal law as now ia force the offense of peonare may be deflaed as causing compulsory service to be rendered by yac ta3n to notier on the pretext of having him wirk out the amount of a delat, real o- elalmed. That is Mexican peonage proper, $n$. detincd by wr highest court in the Clyatt case (19: C. $\mathrm{S}, \mathrm{B}$. 207). But. as fuliy explained in my report of Octuber, 1907, and Jnnuary, 1908, where there Is no indebtedness either real er elaimed, as co spiracy to cause compulsory scrvice of cilise th of the Unlted States is punlsnable; and son, also, accordlog to the only court that has directiy

## peonage

passed upon the question, is the carrylng or endelog any person from one place to snother lu order that he may be beld in compulsory ser vle.
" 1 use the words 'compulvory service' as equicalent to the constltutlonal phrase ' Invol untiry servltule berause the supreme Court m) treats them in the Clyatt ease, minl I may that a mere clalm of clehe is sutticlent because sereral Infirlor courta have mo deelled, and because in the Clyatt ease the hidetment, to which no objertion spems to have been made, alleged a niere clatim of luilebtedncss.

For an Illustration of pernage, Mr. Rasaell deed the fothowing from evlidence prindicet at the: trial of a ease oceurring ln Alabama whinls he trook part Ia:

If was proven that llarlan, the manager. had headquarters at Lockhart, where the nill was: that lin his bnek garitwore kept what were ealled blowalhounds - mantrnlling doses; that the object of kerphis these was to sumi nfter ecaping men: that they werc so med, and men chasid und brought lonck, one of then tial on the lind part of a hugity ; that one of the inch. the Butgurian Jordmans, was unmerilfully dicken and beatern by Gallagher for wanderhe ofit a few gards, hls sore shins being exblbited to the jury as part of the evilenee; that by numa of thlegrtiph, rallional, and telephone, a jutifor of the pear, und a deputy siseriff, the fore of men were hemmed in so thai ewape whs almoz lmponsible; that the foremen consinntly earrind platols and often made threats: thint a rape wis phacel is round the neck of one for. fignor and thrown over it beam ns an object. luwan to others and to frlehten him, and thist all this went om systemntically.

1 have nodoubt, from my Invest gations nul a xpertences. that the ehief suppurt of pronage is the preullar system of stitu laws prevailing in the fouth, intended evident! to compel service in the part of the workingman.

It is hoped that un en'iphtened self-intore of and the demand for lator nuate necressary by the (xpansion of wh Industries and the Introdiction of bew will loal to the nmeblument or reperal of the State laws which are the chief support of คemas" practiees

These state laws take various formsand are
used la varinus ways to upholl penasge aod other kinils of lnvoluntary servltude, some of them are vas rancy laws, mome contract labor or emplayment laws, mone fraudilent pretence or false promice lawn, and there are divera others. Sunte few of thom In question, such as abscond. Ing debtor laws, labor entlelner, aml boarl bill fawn, were net orginally pased to cashive workmen; but In vlew of the une to whieh they are put, neel amendmest In order that they caunot beso abused.
" These laws are used to threnton workmen who, having been lefrandal Into golng to an emploger by falw repurts ns wo the comitions of emplogment and thesurronumingt, wat urally beenine disatlstion as soon as they thil how they have bera lefrumed. They ar: thed before juries and the luenl public: th holl the peons up ns baw breakers and illshoneat persons seeking to uvill thelr ' just wollgations mal to enarluce phifluth: juries that the defendints accused of pronage shand at be convicted for cufarcing. still leas for threatening to enforce, the lawe of their state.

- Cutll we began our work in October, 1906, the ehice supply of peons came from the slums - 1. © forejin quarters of New lork, nmi from Eills lsland, through the oporathas of therned labur agente of Now Jork. These were roaping a rich harseot from the price per heal for laborers suppliad to imployers at $n$ distance. and the tomptathons to till all orders and outhes rival axputs hy a tutal dinco.garil of truth and bonesty in doaling with both lahorer and emploper was ton gre:at for a mumber of thewe brekirs."

## PERSIA.

A. D. :905-1907. - Beginnings nf the Revolutinnary Movement, in the Life of Shah Muzaffer-ed-Din. - The Taking of "Bast," and its effect. - The Extartinn of a Cnnstitution and Electinn nf a Representative Assembly. - Death af the Shah. - The follow to account of conditions and events which notred, attended and followed the late ronstlu ti.nal revolution in l'ersia hare been derived. farly from ofticial correspundence of the pe. ribl. hoween the British Leegation at Teheran is Thhran) and the Foreicn Ottice at London, as whliohed in Blue Book Cul. 4.8: 1909, and partir from letters and despatches to the lend :- Uurnale of Iondon and Xew York.
The Shah. Muzafer cdilin, who enme to the thman in 1896, on the assassinntion of his father. Vise ed-Din (see, In Volume VI. of this work.

Premial, was erpollted with a deslre to reform the government of hls kingdom, and made consilurable effort to that coll in the early years of his raign: but the alverse forees controlling his eourt were ton strong for hlm, not he seems to have gleliled to them completely ut last. He was surrounded by a corrupt ring whith lived on the spolls of goremment, and plled debt upon dobt. Under the last of the Grand Viziers (Atnbegs, or Atalo.ks) mi. ruled Persia in his name before the ontbreat of revolution, " covernments were put up for sale, grain was limarded and sold at extortlonnte priees, the Government iomilns were stolen or sold for the henefit of the conspimtors, rich men were summoned to Teheran (or Tehran) aml fored to disgorge large sums of monty, oppression of every sort was countenanced for a consldera.
tlon : the property, and even the Ilves, of all I'enslan subjects were at thelr mercy. Finally, there was every reacon to belleve that a con. splracy was on foot to tethrone the foolinh and lanpotent Nirah and to oust the Villahd [Lelr to the throne) In thetr place wan to be put the Nhooe "s Suatanch, the Nhatis younger son, who was a hy. worl cien ln l'cria fot extortem, and Injustlce. The pelley of the Atabers and his fricals had thans aronsed the opposition of all chasses in I'ersla: of the lew oure or less ju. trlotic statesmen, whil knew to what a gonl the country was beling led; of the prieats, who felt that thelr ohl power and independence wonth perishl whith that of thelr eountry; and oo the great maxs of the pupulatlon and the meremntle claswes, who were the dally verthes of the teranny of thelr oppresers. In Inecrmber (190.5] the shorni hroke. The Governor of Thiliana, without any Just cuuse, ordered un agod seyed to be cruelly heaten. A large number of the prominent Slujteheds trok 'bast ' (refuge) In the shrine of Simh Aixhul Azhm, near the capltal."
The "taking of 'hast." or refuge, In some sumetuary or other plaee of protection, is un ofld ['ershan incule of pulite'al protest or demonstristlon, to commuma attenton to puhlie diseret tenta. In Ixts the ehlef persons of the timplre haul tuken refuge with the English amil Jussiun Legntlons ha order to ohtaln the exlle of a tyrunairal Minster, Miraa Aphassi, and shoce then it had heell the custom of persons who had griev. ances urainst thelr own Government to tuke refure m.der the shelere of uf forelgn lavithue The "Mint heds " mentloned ba the ulover quo. tathon us having resurted to that expedient in De cember, are the higher and more lollhential of the Molammedan priests la l'ernla. distingnisherl from the Thlatas or cumbun priestes. whese ranks are open to any belinerer who can reall the Koran cend who nswumes to hterpret its lans

The Govermanent used vain endeavors of hatb. ery and intimeldatom to break up the "have" at the shrine of thah Alumh Aklm. The refa. gees hat stirred ap the whole country be a pulsHished statemem of grin vonces, appeating to the patrontatn of the peopide and the shah surren. dered to the effect promberet. He made promises if a grint of popular represcutation, und of adminiatrathere reforms By the end of Jenuars a promising state of aftuire seemed to have beein braught almat. "Ther refuges wer" brought lack to Trhan in llir shah's own carlates, "scorted ly an enthusiastic crowd." But disen sluns betwrontu the popular kraders and the Maj thlapls soum arose. "Xo definite step was takin th sive effert to the silahtis promises, excepta a varue letter promising Courts of Justice and an
 rinshlur the whele quastin of riforms. In this fonaril it soxin became evident that the fovern. . ent cemald comernl the leaters if the reform movem nt, and that the symuathine of the grent
 Im. vement. All vas mitwarily ybiet in Tultran. out in the proe ances the people of shirite and Reaht had tuken violent mensures to prevent the reappoint ment of the Shat's sons as their Gocecrnors, and the movement in thith cases was successful. In the eapital ltself the streets and the hazaars were quit, hut every day scrmons
were preached la the mompres, In which, nu ue of the popular party mall, What we hurdly dared tel think a jear ago wam openly sjuikia The lesat-known preacher of Teliran, a l'rine of the Imperinal house, preached every frither ugaliant the tyrunnles and corruption of the Gink
 The ehlef Mujteheds, lached by the proplin pressed the Government to wlthdraw th" meas sure, and the Governnent had to yleld.

In the mildelle of May the Shah had a parn lytic stroke and was rimosed to the country For some weeks there was a lull In the piplular aglation. Then, early in July, the prinatian 3 Irjtecheds were rouncil hy the conduct of the Grand Vizler to a fresh preachlng of prwhl? On the 1th the Vizler ordered ther arrest of oir of the preachera; a crowd of prephle attempterl to resclle hhm, and wus fired on hy the trenio General rloting th the capltal cusuct, whith vic tory, for a thase. on the side of the proplle. Int In the end the Government appeared to has. won the day
"The tun in was in the hunds if the troops. The populur leaclers had feed. The Shah was in the hunds of thelr ouponents. Fir the popular party the ontlock w. ? n rrase its
Int these circimastunces the lemulers had course agaln to the "bast." and this tlme in: Forclen Legation.

- On the evenligg of the 9th fifty Mallahis a:nd merchants apteured at the Legation and tor $k$ up their quarters for the night. Thels numbers soon lucreased, anal on the end Sephemithr there Were ablint 14,1000 persons tu the lave tion garden. Thelr conduct was minst orderle The cruwd of refugees way organized ly the heuds of the cuilds, who terik neasures to pro vent any unauthorzal person foom enterine the leghtion grounds. Tunts were put up und regular feceling pheres and the of fitling were providell for. The expense was lurnil h the princtpal marrchauts. No chmage of a wil finl character wins done ti) the gurrlell, althen, ch of course, every semal hance of a bell was rimit thl out of exlstenie, und the trees still hear five us luscriptions rut la the hark. (olonel Domighe the Millary Attachi, kept wateh over the 1 catton huildings, hut no wheh was newitet Dlaclpline and order were maintained ly thit refuges themsilves

The Governmeat sent answers to the p" ${ }^{\prime \prime}$ lar demmads which they requested Mr. Cing Iunf to rend to the jeople. The Goverimit communlentions were recelved with derisin It list there appeared to be no other resontre than a persounl uppeal to the shah. Tla pui ple stated tirmly that unless their demanaid were granted they womld remain in the luga tion, as it wus theirir unly phere of safoty, "the they naintune dhat motil the Shah knew - ta whis the real sitation their request- Wenaled never recelve due consideration. Mr (iritan Dant obtainel the comsent of His Dupests Ginvermment, and annemared to the Minitur firs Forelgen Aftairs that he demanded an matio wo
 andiewere, however, never took place. The e - m mander of several of the Telaran reginet:- , wh whom the Minister of the Court and the fis:mes Vizier chelly depended mate the fatal in manaceront that his troops would not werve ner inst the people, and that they were win the point of thenselves taking refuge in the liritish

Lrgation. The Court party ylelded. The Sadr Azam [6irand Vialer] reblgned, and the Azal.ul. Mulk, head of the Kajar tribe (the tribe of the
 to infarm the relugee $\$ 1$ talis that the shath bad pranted their deman for a Satonal As. semily and for Courts of J-intice.
"The chlef difieulty which then confrunted Ir. Grant Inufi was that the prople had entirely loat conthlence in their own Government, and derlined to treat with them except through the British Representativc. When the Goverament buat the ann runcement of the projected reforms, the people answered that they woukl not scrept the promise of the Government unless it ase contirmoll and gimranteed by the Govern ment of the Klng of Englund. This was natu. rally lmponslbie. Aeting under instruptlonis. Mr. Grant buti Informed the refugees that he conld do nomore for them, and entirely decilned to giarantec the excention of the Sinhis lie. crecs. The Govermment then attempted to pome to an arrangement direct. It failod. The popular teaders rujucted the shmin's thecreen as vagile or luadequate, and where postal up in the dity they were torn lown and trampled on. In this extremity the Government ugain appealat to Mr. Grunt llull and legged him for his assistance. It his suggestlon a men thag tomik place at the reshlenee of the new liramd Vifier, the late Minister for Foreign Alfalra, beween the Government and the popular leaders. Iftir a long discusslon, at which Mr. (irant Wift trok no part except when questloned, in aserment was arrived at, and nn amended lesript puhlished whlch dofinltcly promisell a Sational liepresentative assembly [in the l'er. dian langunge a Mejlis or Melljliss] with legislistue powers. The Ierscript was reml oit in the britlah legation to the assembled refugees sul was received with enthuslasm. . . On the ulght of the 1 ith the Mujteheds returned amid pupular plaulits, and on the 18 th a granil neet. ing was held in the l'aluce predncts as a writ of wirnest of the Natlonal Assembly.

The Conrt party, however hat only sulfered an nopearance of ilefeat. It spent the next week "'in gradually paring doven all the Shab's promises, ind lin the produetion of a liesseript in which the originarl project of the Constitu. tion was harily revogilizahle. The late firand Viater, who hail lingered lit the melghbortoorl, sudenily returned to hls comitry seat near the Stah's residence, and the Shah absolutely re. fised to sign the legulations for the Assembly. The popular excitement was lntense. Vottce was served on Mr. (irimt 1)nff that the peopli wouk again take refuge In the Iagaton, if nee"ssary, by forec. About iwenty $\mathbf{G v e}$ of the lealers mitually ilid tuke up their quarter, there. It semed ns if the disturbanees were bbout to brak out unew." But now the Iussian Minister came luto comperation wlth Mr. (irant Dutt. in ruppentations to the Shal thit orercame the evil hatheners ly which he was swnyed. IRegulations for the election of delegates to the Assombly were now signed ; but fresh ditticulttes arose from the refinal of provincial governors ti) (alry them ont. Those in turn were over.
 It had been decliled. In order to avolil delay, that the Tehran Nembers of the Councll shonld meet at once, without walting for the provin.
cial Delegates, ad the firnt mension of the now Aswets.hty wat openel [Orcobur \%, 1900] by the Nhat himelf. In the pronemer of the prients. tue Court, sal the furelign representatives.
The provincial Member arfived one by one as they were elected, and as yet there mre manly vacant placem, the provinces uot showing minels alacrity in clicting thelr Members. The As. membly mon showed lts power. It refused shmohitely to corment to the Anglo-Itnowian al. vanee (of a preferred loanfon the aronnd that the public revenues ought nut to lie pledged to forcipners. It announcel its Intentlon of Instl. tuthig reforma. esperially the the finances of the comitry, and of providiag luself the necesmary funds for carrying on the fovernment hy foindIng and endowhig a Natonal llank. Mut, hw. fore taking any steps of this nutire, It insletid on luving a slaned Constitut lon. $A$ Connaittee was nomlnated to eonshler the terms of the Constlution. and. In consultation with a Conniltte named by the (iovernment, a Constluthon was drawn up und sulmittel to the C'bambe " It ald not satiafy the pipular di. mand ano seenes of confuslosi followid; but in the rnd It was nmembel and approvid, anil, on the ist of Jauary, 160: the important inatri. ment, ratifed by fie Shah mud hy the Vallude the helr to the crown - was deliverent to the AE emblily and recelved with joy. One weck later. on the sth of Junuary, the Nhah diow.

The text of the Coinstituthon. nt tmasiated for emmanichton to the imfish Govermment, is given in this vilume under the howhing - Conbtitition of l'ersia.
A. D. 1907 (Jan.-Sept.). - The new Shah, Mohammed All. - His evil surroundings. Hostility between him and the Asembly. Prime Ministry of Atabeg-i-Azam. - The Government without money.- Inaction of the Assembly. - Discouragement of the Atabeg. - His assas! sation. - The nww Shah, who asammed the crown under the name or title of Mohammed All Nhat, professed mophenceuce in the constitutional clange which the mation had foreed his father to aceept : lint those whoknew him nppear to have rexpected that he wonld met a pertilious part. That lmproved eonditons in the country were fur from suttled became np. marent very sons. As early as the 30th of January, Sl: C. Sprlag laiee, who hat sucereded Mr. Grant llutf as the diplomatio representative of Great liritain, wrote to his Government: "I re. cret to state that the prospects of a gool unier. standing betwere the Nhah ant the popular party are still rimote. The entomerage of the Shati, especinlly his father In law, the Nab-es. sultaneli, is personally interested in the continuanero of the existine abi ses : and there influence has certainly made itself felt to a regrettahle extent, and has led to increasing agitution agalnst the Nhah hlmself. On the ot her hand the action of the popular iveemhly has not heen such an tulead to conciliation."

The precariousiness of the sithation in the country, the paralysis of government and the prevalence of disorier during a number of monthe following, may be indicated sufflelently by $n$ few pasages from the despatches of Sir © Spring- Rife nud Mr. ('harles M. Marling, Charge diAthares to the British Secretary for Forelgn dffairs. Sir Edward Grey:

February 27. 1907, - "It is clear that a na-
tlonal movement of a memb.priftical and comb. peliglous eharacter does exint and is spreailing. The great Aliftehenis of Kerbela are nuw euter. Ing on the werne, and deriegates are lelug sent ont from the capital to the provinces to preach the prfincipiden of liberety. I'alrlotism, of a dintinctive lepaian type, han aiways been the charac. terlatic of the Hhite bedie vere. Tire prowent Shal of Jersia inas no retlgious stutha, unti, in the vees of the relighons iemicre, no puminnentai right th the ailiogiance of the l'ernianm, whome reai cilief la no living king, lint the iwelfti lmam, the coming Mesoiah, "ven now present on the earth, thongh minech. Th. pacrotisan of the shite fins not therefore ceatre in the permon of the Kniigh, lmt ine or can ber, of a highly revoiutiounry churacter."
Muy 83 - An " importnit quemelon bas nurisen In relntion to an aidition to the Constitution, gharanteeing equal thatnent por sil Persian suhjects, irreapeetive of thelr creeni. The nuilahs prokested. Of the three great Mnjtelievis, only one - Meyid Nohamed - deciareni in savinar of it. The others, supported by a inge bexly of the circos, maintuin that Minssulman law must be cuform in a Minsulman cuuntry. The elierieal worid Is divided on the suhjeet. A large number of the pricsts, invaied hy tevid Moharued and the popaiar preacher Sheikit Jumal eil. Din, declare olimenly that the juw of Datommed is a law of llorerty ami equmity, nui that those who say othern fer ure traltora to their country and unworthy of their rellyion. The representative of the Ibrsers informas me that he ims grent hopes that a deeision will he maken favonrable to toleration: hat the matter is atill lu susicicuse."

The Atalnge i Azam [about whon monething will be whid helow) arrived at Tharan the Shif Aprii, and was furmally appointeri Prevident of the Cominell of Ministers mai Minister of the Interins on the 2mi May. He proee eded to the National Assembly on the 41 h Say, accompunledi by his whole Cobinet, and made a stutencent of puilis.
"The tone of the lorai press is getting more and more dernacrale, umi oew papers are conatmity aptenting. There are at jersent heariy thirty $\mathrm{pa}_{\mathrm{i}}$ ed pmblisked in Telirmanone, inelad ing acveral dallies. Papers are also puhitshed in nearly uil the prupinces, and a P'erksun puper of a rery ant diynastic lume is publishey at Baku and widely efrculated in D'ersila. Dumy. mous pamphlets are alsu widely spread in Teh. ran as lefore. A number of them arc printed at Bukis, aud are remarkable for their intlanmatore character. The Tehran pampinets are chiefly directori against the Ataleg $\mathbf{i}$ Azam and the Guvernment.
June 18. - "The financial condition of the Guverument is, if possible, worse than ever. The pollice of the capitai are on strike: it has been foumd aimost imposaihle to scraje tugether money anongh to induce the Teliran troups to ifave for the serme of the rebeilion."

The Government would, if it dared, borrow abroal to meet its present ilabilities. But, In view of the popular sentiment. It does not regert to a furcizn lona. It appienis to the Assembly fur help In the form of auherriptiong to the preposed Natloua liank. The answer it receives is that the people will sulsecribe as soon as the rich nobies, who are bnowu to hare large sums
of money, ahow the way. This the ricit refure to do. As to mining moner liy tanation, the Asmombiy appears to be convinced that an me.D as the Coverament has any muncy in hront it will use it for the dieatriction of the Mirl) jim Any effective conteni of expenifiture is rigarled ab quite out of the quention. The "xann ration againat the Bhath in rapidity lucruasing.

## PERSIA, 1007-1008

## PERSIA, 1007-1003

Docember 15. - "Dlsorders are threatening bere. Vlolent speeches, denounelng the Shah and demaacilag the exlie of the Shah's Chief Advlser and Ageut, suml-ed.Dowleh nad Amir lahhadur Jang, were unde yesterday at a popuiar meetlng nt the principal mosqu: The Ministry his resigned, lunt tine siah refuses to aecept reslguation. This uorning an exeited crowd gathered outslde the Assenibly, hat was dispersed by armed men sent by the sinhb."
December 15i, -"Ala-ed.Dowleh, whic was sent to the Palace by the Assembly' with a mea. sage, and another brother of l'resident of Assemhiy were arrested by tie Shah at 3 ociorl thls afteruom. Shah sint for Prime Minister at if P. M., put chains on inin, and threatened to kili him tive hours after sunset. I have seat to demand assuraaers for Nasr-ml.Mulk's safety from the l'aiace, and an requesting co-operation of Linssian Minlster."
December 16. - "Nasr-ul-Mulk is exiled, and leaves for Reslit to diny. As he fears Sinali vili nttempt his life on tiie way, he hegged me to send a memher of the Legation with him. as was done when the late Atabeg was seut to Kım in 189\%. This. I sill, I was for the moment unabie to do. I ain, however, sendiug two gholams. Oa hils arrest the Assembiy dispersed, and the Anjumans, on which its real power rested, re. maiaed Inactive. The other Ministers inave all resigned. They were summoned to the laiace and were practically under arrest there tiil they also left the Prilace when Nasr-ul-Mulk was rileased ly may demand on his behaif. . . . Arned purtisaus of shailh iave occupied principai square siner mldday yesterday. For the present his coup d'ï: secms to le suleerssful. The Committers are collecting armed round the As. sembly this morning. Ti, cre is no sign of danger to Europeans, aind there has been as yet no firliting.'
December 17.-"More armed rutlinus are leing bronght into the town and are congregating in Cnanous sinare, supported ly troops and gius.

Romni the Aiceljliss buililing the Anjumans [p'puiar ussociations] are again assembling armed."
lleceminer 18. - "No Government has been formed. The impuiar party isacting strictly on the defensive, and the Comnnitteres are still gnarding tine Ass mhiy. The shah last night conceded the Assembly's detaands, which are molerate."
 just come hack from the d'alace. lie laid the situation before the Shah with the ntmost frankin'ss, and the strongest assumanes that he wonid respert and uidhid the coustitntlon were given is ly ilis Majesty. Siteps art now luing taken loy us to ict the Constitutionalists menlerstand "iat it is incmmbent upon the two Lerations $t$ see that the shal observes the pleflges he has piven us."
Dhermber 31. - "Meantime fafter the inter. view, above r"portai, with the Shahp. the Ereprabl situmtion had hecome mure threatening. The Tahirees Anjuman [local aswembly or Com. mitter | hadi sucreeded in eirculating thronghont iersia the threat of deposing the Shab, and the larizer chitios whre the itlea of constlutlonai z:er erument has tike romt, appeared to be greatly excited. Telegrains promlsing armed support against the Sbah had been reeeived from shiraz,

Ispahan, Resht, Kazvin, Kerman, and Meshed, and sigue of aympathy had come $\ln$ from other quarters. In Telran Itself, despite unmistakable signs that the Shah must yieid, as he did late la the afternoon, the exeltement agaiast His Jis. jesty was, if anything, Liore marked."
" It has been difficult to tind a metiond of cos. veylng the Shah's guarantee In a manner a crec. ahle to the susceptlbiiities of the Assmbly However, on Friday Muahir-ed Dowleh furnlshed M. de liartwig with a rough draft of a dectara tlon whleh we might each commuvicate to the I'resident of the Assembly, and Laking, this as the hasis we prepared a ietter in Freneh."
January 2, 1908. - "JAltiougl Tehran is aow relativeiy qulet, and the provlnees have been much iess affected thau mighit reasonably bast heen apprehended by the Enowledge of what was happeniag at the capital, 1 fear that relief Is only teniporary, and that l'ersia is drlfting nearer and uearer to complete anaraby. The struggle between the shah and hia prople bas resulted iu a complete vietory for tie intter, but 1 aull not sanguine that the prospeets of the es tablishment of constitutional goverument on s dirable hasls have heen mueinimproved therel)y. For the monent, indeed, the Shinh ias beeral com. pletely cowed, and is now retired iuto the Auderom. ${ }^{\text {. }}$
Junuary 20. - "In tine early days of the month, though exteraally the town was uniti: enough, it secmed as though another cr.s), might occir. The siain, after a few days' $1 . \mathrm{m}$ paratlve iuactivity, recommeneed hia campaiga against the Assembly."

Fibruary 28. - "The Shah, wioh had not lifen out of the Palace since he paid hils atate visit to the National Assembly on the 12th Nosentio $r$.
 seat at Dochantapela wisen a determinal ai tempt was made on his life. The proce:sium was formed of a motor-car in fromt mal a car riage behiad, with the nsual escort of ha sintil and running footmen. A little way pest the honse of the Manager of the Inplerial lamk. and luefore reachiug that of the 'Zil es Sultim. a fusillade "as operued on the motoremr, in which it was supposed the Nhah rome, by sime persens from the adjoinhng roofs, who evill utly (wnht not see into the vehieles from thir tlevatend position. Two bmals ware then thrown at the motorear completcly slattering it, and killing two persons and woinding abeint sevell others The shah, who whe seatel ;in the carriafer be. iina the motor-ear. inmurliately cmerged and twok roflige $\ln$ a nuighborin:y livise."
Aprit 24. - While
. the general enuditioa
 ali the indications show lom tuo cle:arle that the sirnggle between the than and the Enjumph [Committers or Assuciations] lats lost now of its bitterness. I say nusiserlly the Fanjune lis, fir in the last trial of strengeth, in which the shath was again worsted, the Assembly played a vory small part indeed."
May 21 - - The eondition of the enuntry ls going from bad to worse, and the feelle fins. ernment is absolntely unabi. to do anyithing th restore a deeent degree of ordic. and even if manry were firithenning, it is hathe lisk deq:ee Improbabie that without furclge assistace any serions measure of reform ean lo madertaken,"
June 8. - "On Saturlay morniug, the 6th

June, an apparent reconclilation between the Shab and the popalar party tonk place, bat the next mornlng it was reported to His Majesty that a telegram bad been sent to Zil-es-Sultan [one of the royai princes, and an aspirant to the throne] at Shiraz by the Enjumens asking him to come to Tebran and assume tbe Regency. Tbe sance evening the Zilis eldest son, also Serlar Mansur, Ala-ed-Dowleh, and Azad-uiMulk, tbe Ilead of the Kajar tribe [tbe imperial tribel who took part In tbe agitation last week, were arrested by the Sbah."
June 23. - "Aboat 6 o'elock this morning twenty Cossaeks were sent by the Shah to arrist eight persons who were in the mosque adjoluing the Assembly Honse. The demand for the su, render of tbese persons met witb a refisal, and a shot was fired from tbe mosque. Firhting then started, and is stili contioning. The number of people kilted is said to be large. Guns are being used by the Shah's troops."

Jure 23. - "The Assembly building and the mosine have been eleared by the Shah's forees, anl the meeting-place of tbe Azerbinjan Enju. men has bren destroyed. The shab has arrested tbe Chief Mujtehed, Seyyid Abilullah. tbr sheikh-ul ileds, and some ten other alleged Itriters of popalar party. The Cossrek Isrigade lua lost forty men. The loss on the other sirle is aidid to be very smail, but the exact number is unhown. A state of siege has been proclaimed anl the Enjumens have dispersed. Some slops ant honses, inelading that of the Zil-es-Sultan. und the issembly buthling, have been pil. laciol."

Iune 25. - "The first shot was undoubtediy firel by the people in the mosque and As. somhly, among whom some Deputies wore in. chuled i believe that every preparation had hern made to clear the mosipic by force if this promel necessary. In any cinc, the thath had rumomble gromen for tations strong measures, as the attack was made by the popular jarty on the trionps.
" Eiforts are heing made to catch Deputics, and several. inchading the l'resident of the Ass.mbly, have already been arrested. The Finjumens seem to be cowed; their supporters are flling awny, and the Shah has complete mas fres. lesterdity morning two prisoners were arangled at the Shan's eamp, and there are atwit thirty persons, other than ibputies. lunter arrest. There are now in the Legation fifty refugees.

There has been fighting in Tibreaz hetween the popular party and the Sboh's partizans. There is no sign from the other provinees, and the Yil frum the agitation."

June 20. - $\quad$ A iroclamation stating that the preant Assembly is diswofrd fias been isstrad If the fiblh. Prowlamation announces that new eleetions will be heldi in three montbs, and a semate will be formel."
A. D. 1908-1909. - Final Hostilities between the Shah and the Sapporters of the Constitation. - Tabriz the Center of a Revolationary Movement. - Entrance of the Bakhtiari into the Struggle. - Siege of Tabeizend ite Refief by the Russians. - Captare of Teheran by the Nationalists and Bakhtiarl. - Deposition of the Shah. - A child entbroned. - The oceurrenees of June, nar-
rated sbove, were at the beginning of the finsal outbreak of hostilities between the purtisums of the Sbah and the miporters of the Coastitntion, wbich soon ran into metaal eivil war.

Wben the Shat had established ins aathority at Teheran. Taliriz, became the eanter of popalar opinion on the side of the Constitutionalists, or Nationalists, and tbe main seat of their strength. Fighting began there on the 23d of Jme, slmultaneousiy with the contlet at Teheran. and contiuued intermittently and indecisively throughoat July and Augast, at the end of which time the Nationalists were suld to be 10,000 stroug. On the $2+t$ t: of september the Royatists began a bomburdment of the town. with five guns, to whieh the Nationalists responded vigorously with four. Wetoler 10th the Nationalists ussuaned the olfensive, attacking the camp of the besiegers, routing their envalry, and securing possessim of a desirable bridge.

On the 24 th of siptember, muler pressare from the representatives of Great i3ritain and Russia, the shah decreed that a Diejlin (Nialoand Assembly) " composed of retigious and proper persons, wili, by the help of (riml ind the favor of the 13th Imam, be convokind by us for the 10th Shaveal" - thent is. Nuvember 14-and that a law of elertions should be made known by October 27. The intter date passed without producing the promisal chection law and tun rlections foilowed in Nowember; but on the 8th of the latter month the shah's partisulusorgin-
 Constitution, on the stringth of which the men. daelous sovereign replial to British and Iussimn remonstraners ugilinst his fuithleswhes by saying that "a large section of the population regarded il ennstitutional rexime its contrary to their rellgion." I'resently, on the 22d of No. vimber, he issued a reserint proctininio that the Clema had decharel such an instituion as
 fore he would not convok' it.

Farly in 1909 the rewolt lirst organized at Tathriz hecame rife in mone parts of the numinal Empire of the Shah, buth north and sumth. On the eith of Jammary 7he Times of India published at Bomhay, where commerelat and political interesta in i'er-ian affairs arr" "equally kien. deseribert the situation then existing as follows: The " news from lersia is extrumely grave, beromse it inticuto :he collapar of the Ghalh's anhority from murth to south. The Injumans [Linjumens-: 11 rum which seems to be applied to local assemblies and to all politieal associations diticl of Astrablat and Lahidjan hase repulintert the prestht retime. This numas that the caspian hittorill is being bost to the shah. What is af even greatereonsequanee is that the spriad of the revolt to Lidhidian mas mean the cutting off of the trmbe with Toheran via Resht. which is now the principal ronte open to trathic. Then in the far somith, atmost on the Gulf litoral, the Nitionalists of Laristan have thrown off all semblance of the shah's authority. Recently it was stated that the Bakhtiaris had risen in robolt, and had lonted Isfahan. It was not to be expected that the Lars, of which the Bakhtiaris are an offshont and who enjoy a modified independence, would remain quitesent unter thear conditions. Reet ter is however iu error in stating that these tribal figbts 'are interrupting' communications
between Bushire and Shiraz. These have been Interrupted for many months, and as we stated on Friday, the muletcers who usually ply between Bushlre and Shiraz some time ago re moved their animals to the Reshe. Teheran road. The insecurlty of thls route ls lllustrated by the fact that the Derya Begl, the fount of Perslan dlgnity at Bushire, was held up and robbed on ins way from Teheran to hls charge on the coast. Ail these straws point to tue rapidity with whlch anarchy is spreading."
The Bakhtiarl referred to in this account of affairs, and who now began to bear an important part In the Persian revolutionary confliet, are a seml-independent and nomadic tribe, occupylng the region of the monntalus whieh hear the same name. In western Persia, withln the provinces of Inristan and Khuzlstan. They claim, It ls said, by descent from the Bactrians of remote antiquity, to represent the purest blool of anclent Iran In connection with reccnt disturhanees, they begall to be mentloned in June, 1907. The head of olle fnction among them, Semsam.esSultanch, had then been removed hy the Perslun provinelal governor from the post of Ilkhani (a tltle survivlng from the Mongol conquest of the 13th century, -se Dersia: A. D. 1258-1843, In Volume IV. of this wark), and hls supporters Fore reported to be "out in every direction at. tacking caravans." The only mention of them in the following months was as pestlient bandits ln the wishan quarter, holding the roads and breaking up commerce and travel; but they came at lust into l'ersian history as allies of the Nationalists ln the struggle for Constitutional Government.

Press reports from Tabriz in Fehruary were to the effect that the Slah's forees, cestimatel at 12,000 in number, had elosely $\ln$ rested the town: that the besieged Nationalists were prorisioned for two months, and were making sorties dnily. Also that Iesht was full of armed Cancaslan revolitionaries. At the middle of March a correspondent of the London Times made his way from Teleran to Resit, and found that the revolutionary moventent there was entirely "exntie." "If the Cancasian clement was removed," he wrote, "nothing would remaln. One can estlmate falrly aecurately that there are about 600 men under arms in the town and on the roarl. It is said that $i$ per cent of these are Persians. This morning I watched the departure of a contlngent of men for the frout. Greeks, Kurls. Armenlaus, Tartars, Russinns ail the Caucasian peoples were represented, but not a single man of the race for the adrancement of whose cause these men have taken arms."
This correspondent was lel to suspect, as others have done, that the religious movement in Iersia known as "Bablsm" (sce, in Volume 1. of this work, nuder Ban) had much to (lo, in a secret way, witl the exlstlng revolutionary undertaklng. "Those who are in a position to julge." he said. "estimate the present propor tlon of Bahis in the population of Persla at from 10 to 30 per cent. I have, Indeed, heard the Persian estimate it as high as 50 per ceplit."

Before the end of Mareh the Natlonalists were in control of the ports of Bender Abbas and Buahlre on the Persisn Gulf. On the 30th of March the following went to the Londun fimm from Teheran: " In spite of numerous lefectlons to the Natlonalist slde during the last fortnight, the
situation at Teheran remains practicaily unal tered. The Cossack Brigade ls still the firmmer factor, and there seems no reason to douht rither lis alleglance to the Shah or its ahillty to leal with auy element of disturbance likely to arise in the cnpital. The bazasrs remain partially closed, hut the huslncss of the town proceeds without luterruption.
" From outside there is nothing to apprehent for the present. The Bakhtiari have madr no slgn, though their posltion has been rendered materially more secure hy the reecnt esponsal of Nationnlism by the most notnble famlly at shi. raz. From lessht the revolntionaries eontinue to iaunch remonstrance, warning, and anathema at the Shali, but they are too wise to mareh on the capltal withont a lead from elsewhere

- To-day's news from Tabriz indicates that the sltuation of the town is extremely grave. A sectlon of the Natlonalists advocatc negotiating wlth the bealegers, but Sntar Khan has dreinded to contlune his resistance. The stores of ford are to be appropriated for the flghting men, and When the stock remulning ls exhansted the inhalitants will have no alternative lint to leave the town and run the gauntlet of the shabis lamhs."

The Cossack Brigade referred to in the de. spatch above was a hody of l'ersinn Cossacks which had hecn for some thine past in the service of the Shah. under the command of a linavi officer, Colonel Liakhoff. in the llonse of ('r.i. mons, on the 24th of Mareh, the British seere. tary for Forelgn Atrairs was sharply questioned as to this employuent of a Russlan othicer, and the alleged employment of others, In the Shab's service, and asked whether they were serving the Shah or the Tsar. In reply he sail: "It muy he that in the erents of the summer - what is ealled the eoup deynt - Colonel Liakhoft, the Russian officer ln command of the lersian Cossucks, who Lad been lent to the shah for the purpose. I understand, of disclpllning that hody of l'ersian Cossacks, to provide a holyguard for the Sluah, and in case of necd to prescrse ordir in Teheran - lt may be that he exceeded the limit of those purnoses. If he dill so 1 am con. vinced that it was not by the instructions, on the anthority, or with the approval of the lins. sian Government ; nul since the couf, dFitat there has her.n no guestion, accorling to reports which we have receivel, that the Russiun offcers who remained In the service of the Shah hare kent withln the limits of the purposes for which they were lent to the servlee of the shath, and have not taken part la anything that could be called political eneounters In I'ersia. If (o) nel Liakhoff exereded the limits in Teheran, acted directly under the Government of the Shah. and the question whether the Russlan (Gorem. ment approve or disapprove his actlon is one he. tween hlmseif and them. and is not a natier on Whifh we arc called upon to expross an -ppitulon."

On the Sth of April it was reported that the sufferings of Tabriz "are inereaslng daily, and it is undoubted that a great tragedy is appirouls. ing. If Tabriz hoids ont, thousands must dip of starvation, whlte, if it falis, prohably tens of thousands will he massarred." A fortnight later, on the 20th. the Shah ylelded to the insistence of the British and Rnssian Legations that he should allow an armlstice at Taliriz of six days
and the importation into the town of sufficient fool for that period. Meantime a detachment of Russiaa Cosaacks, under General Snarsky, had Russiad the frontier into Persla, and was marehing to Tabriz with supplies. Thls Russlan re. lief expedition, approvel hy the British Gav. erminent, reaehed the heieaguered eity whithout resistance on the 30 th , and its presenee brought the confict at that point to an end. A correspoalent of The Times, who had been In Tabria throughout the siege, taking some leadership in the defence (In eompany with a teacher nttached to the American Mission's high school, Mr. Baskervlle, who met death ln the fighting) and who gare, two months later, a graphie narratlve of the experience, said in coneluding it: "Tabriz was ultimately saved by the coming of the Izussians. Their entry lnto the town was the direct cause of the opening of the roads, the dispersai of the disappointed armies of the Shah, the promulgation of the constitution, and the appolntment of a Constitutionalist Minlsiry. It saved Tabri\% from a surrender which could not otherwise have heen delayed for three dars longer. and therehy it averted the complete collapse of the Constltutlonal movement."
With vletory at Tabriz snatched from him, the shah ostensibly threw up his hands. On the sth of May it was announced that he liad "signed an inperial rescript acisnowledging that the disorderly conclition of the country inposed the necessity of taking measures to reorganize the administration. The rescript recognizes that this can only be secured through the constitutional principle, and hls Majesty fixes July 19 for the eloction of a representative Asnembly for the formation of which electoral laws will snon be promulgated."

This revlval of promises failed, however, to arrest the revolutionary movement. On the Th of llay the Nationalints expelled a royal force from Kazvin - less than a hundred miles from Teheran-and declared their lintention to march on Teheran. "They are weli-armed and well-mountell," said a correspondent who came from Kazvin, "and possessed of plenty of money. Their commander, a Sipahdar, and his seconil in command, an Afghan, are now at Kazvia, and everything polnts to the possibility of early actlon. The Bakhtiari, who hare assembled at Ispahan and number 8,000 , also declare their intention of marchlng on Tehe. ran."

Of the Sipahdar. who now becomes the figl. Ine leader of the Nationalists, a writer in the New lork Evening Post relates that "when a merchant in Talirlz. he offered the government his services in whing out the brigands who scoured the provlnces, and, selecting a picked bam, went out to fight fire whit fire, by the same methods of terrorizing that the roblers hat enployed. As a result, he made the provinces safe, at least."

Pressed by the Russian Legation to withdraw from Kazrin. pending the fintilment of the Shatis promises, the Stpadar, commandheg there, declared that he eould not control his men. The situatlon was complicated by the presence of the Russlans at Tabriz. As The Times morreapondent wrote: "The perfectly unambignous declaration by lkussin that her trons whll he withdrawn from Tabriz the moment orler is restored and danger to Europeans

Is past is vaiueicss in the eyes of Persians while the troops are there."

The framing of a new electoral law, to the satlsfaction of an elcetoral comnitue of the Natlonalista, was finlshed on the 6th of June, aud the Shah's signature to it was expectetl in a few days. IIlgh hopes were placed on the coming of Nasr-ul-Mulk, the exiled statesman at Yaris, who had been soliclted to accept the Prime Ministry, and who seemed slow to take the proffered honor. But the wrecked strueture of constitutionai government could not so ensily be set in motion. The revolutionnries at Kazvin became threatenlag agaln, and were In motion toward Teheran before the end of June, whlle the Bakhtlari began a shmituneous advance. On the 29 th of June the Rnssian Government issued orders " to assemble a conslderable foree at Bakn, to be held in readiuess in ease of a coup de main agalnst the Perslan capltal." Jleantime the new eleetornl law had been slgned. but not promulgated, "owing to the prevailing excitenuent," It was said.
On the 3i of July the Russian Government addressed a Circular jote on the situation In Persia to the Governments of foreign Powers, saying, In part:
" The Imperial Government, on consideration of the positlon of affairs, has come to tle conelusion that the principle of absolute uon-jaterforence in the internal aftairs of Persia and in the contliet hetween the firhand the Jersian people must remaln, now as formacrly, the basis of its poliey in Persia. In this comexion we could not leave ont of slght the fact that in the event of the Bakhtiari aud revolutionaries entering Teheran the Russian and other European Legatlons and European institutions and subjeets, as well as our road from Enzeli (on the Caspian sea) to Tcheran, might flud themselves in an extremely dangerous position, and the more so because. according to Information which has reached us, the only lemular troops at the Shah's disposal conslst of the Persinn Cossaek Brigate, which is at present so wrakenced that it is scarcely in a conclition to maintaln order in Teheran.
" This circumstance imposes npon the Imperinl Government the moral ohligation to take all measnres in order that, In case of necessity, It may be possible to realer effective all to the abovementionel (European) establishments and subjects and to ensure unrestricted traftic between Teheran and Enzeli in all circumstanees. It has. therefore, been decided to senil a force from Baku to Enzeli consisting of one reciment of Cossacks, one battation of innssian Infantry, and one hattery of artillery. The force will not adrance berond Kazvln ( 86 miles from Teheran), and wilt ensure communication between Kazvln ar "the Caspian Sea.
"The further advance of a portion of the force depends upn the course of cvents. It can only ensue upon the demand of the Imperial Legation in Teheran in the event of the dangerous situatlon aforesaid arising."
The IRussian and British Legations attempted mediation between the Sipahdar and the Shah, to eheck the former's sdvanee, but his demands made their Intervention hopeless. The Shah's furces pushed out to intercapt the oncoming revolutionaries, encounted them on the 11th. 18 miles west of Tehcran, and fighing went on at a

PEIIU, 1800-1008
distance from the chty for two days; but forces which silpped between the defeasive llaes made their way futo the capital on the moralng of July 1 isth, aad there was ightlag ta the streets uatil the 16th. The shah then sought refuge at the Russian Legatlon, and the Rasstan officers of the l'erstaa Cossacks, Desleged in thelr harracks, made terms with the Natlonallst leaders.
Four days hater the l'ersian mit uaton was stated to the Britlsh House of Communs by the Secretary of siate for Foreign Allairs, Sir Edward Grey, as follows: "The shah, sfter tilkhg refuge in the liussinn leration, alxicated, and his soa, Sultan Ahased Mirza [a young child] has beca proclalmed Shah by the Natioaalist Connittee uader the regency of Azad-ul-Mulk, head of the Kajar tribe, peudilas the convocation of Partimacnt. The commanders of the Fedal and llakhtiari, as temporary chlefs of the I'crsiaa Government, have accepted the services of the l'ersian Cossack brigade under their kusshan of fiecers, on condition that the litter are completely under the orders of the Minister of War. This nrrangemeat was rititied at a meetiag between the coramanders aad c'oloael Liakhoff. Teheran is qultt, and the Persian Cossacks are already fraternixing with the Fedal. The sipahdar has beea appuiut d Ainister of $W$ ar, nom the Sirdar Assud Minister of the huterior." Being asked if he would represent to the Russian Governaent the undesirability of adrancing Russian tronns to Tcheran, sir Elward added - In view of the declarations alre atig made by the Russlan Gowcrament as th the ciremstares nuder which alune Rus imin 1 roppswould be sent to Teheran and in viow of the fant lhat wo tronps have leern selit tor Telaran during the recent tronebles, ha spite of the fact that at me time sane apprebea. sion, which happly proved to be unfoundet, was expressed fur tha safety of lhisslaa subjects, such representathons would he most uacalled for."
On the 15th the Provisimal Government gave aotice to the Anglo Russinn legations of the sebetion of the new Shah, and askind that he should be delivered to their keeping: wherenpon, wrote the Times correspondent, "M. Sablin amoneced the request to the shath, who replied that he theught his mother wonld not consent. The Maht then towk M. Sillin to his mother nad aa affectiag moure ensuct. Juth the mother aad father broke down at the chought of parting "ith their faronrite son mad oTered thetr second sonl in his place. Ml sablit replied that the selection had beu made by the people aud that bur hat no wise in the maiter. The boy wept hitterly in sympather with his pareuts and te. clined to leave his anether. Finally the ir Majes. time wren permated to agree. On recerviar the
 hammliat ly prommgated and it was arranged than the Rement and a Nationalist deputation would rective the little Nouh.
"An lnterested crowd whaessed his depsrr. ure this mornlag from the chstory of his natural guardhans. burlog the mornlug sultan Ahned wept blterly at the prospect of hecomlag a King, and It required a stera message to the effect that crying was not allowed in the lluswh Legation before he dried hls eyes. Then the tittle man came out hravely, eatered a large carriage, and drove off alone, escorted by cis sacks, Bowars, aad perslan Cossacks and fil. lowed hy a long striag of carriages. At sill thuatahid he was met by the Regeat and the deputation and ceremonlously notlice uf his high positioa and of the hope catertained by the nation that he would prove to he a good ruler. 'Inshallah, I will,' replied the lad. Arrange. meats for the Coronation will be mude lete after. In the meanwhite the little Shah, who is guarded by a liakhtlari, remalus with his tutors at Sultanatahad, where hls mother is free to vislt him."
At Teherau, sulaiss settled qulckly lato quiet, hut disorders were proloaged ia various parts of the provinces, being especially sertous at Shiraz. The deposed Shah remaiucd for werks at the llussian Legaton, white aegotiations with him for a pensiou or allowance in ritury for his surrender of jewels and monery to the State weat ou, and the unhappy child who oc cupied his palace had more sorrow than he.
Farly In August ('olonel Lhakhoff returnet to Kussia and was uppuinted to a reglancutal commund. On the 1 st of tiptemher a general amwesty, with a few execptioas, was prin lamed by the new government at. 'ieran. On the !th of Soptember the deposs shah teft the sheter of the Russlan L. gation and jourueyed, nith hls quern, four younger children and severai friends, under leussian escort, to a residente in Russin, ut Odessa, which whan his chote. Presiat was still waiting for the able and mach trusted constitutlountist statesman, Nasr ul Mulh, to re turn froan his exile at l'aris and acept the offered preasiership ia the government: but wo the dist of september the report went wut that he had detinitely decliad the post. He returned ti) Persis, however, in October. On the tith of Octobe", he Russian Goverameat math hnown that it i. whecided to withdraw the greater part of the troeps it had been keeping at Talriz. A Le'w Mejliks, for which the Regent hat ertited elections, was assmblet on the 15 , Novem ber. On the ith of Decemher the Me'jliss unanimonsty approved the proposals of the Gover meat with regard to borrowing abroall and the employment of Enropeans in executive capari ties for the reorgankation of the finance be. partment. This, as doubt, will improve the situation very greatly.

PERU: A. D. 1899-1908. - Outline of History. - Thu leadine ewhts of Pernvian his. tory are recorded in Vohme Yi. of this work down to the sle tion of P'resident Fahardo de
 a promine of family of trequipa. ana had twera chluated ia Finglimed, at stonyhurst. He further hal stuticul for, und taken a degree as, an cavinere nt Kines's College, London; and whilst
he had aut acyuired much expericace in poll. ties, he neverthetess sucressfully filled the Presilential Chair throughout his tern. He was alive to the aeccessity for the de velopmors: of the resources of the conatry, and, firthe
 by disturbances other that sonie small polingal litrigues sach as laevitably take place in a country which, as Peru, was evolving a rint mie
of eivll government. Iluring tilis trin there was some lntlux of North Anericau capltalists, who acquired important lau resss, in the coppet nilues of Cerro de Pasco, and who commenicd the construction of a railway llae thereto. The presldency of Sctirr lumaña uneventfuliy espired at its natural time; electIons were heid. and Senor Manuel "andamo, who had aiready provinionaiif been head of the State, was ciosen as president In May, 1903. Candamo had been successful in quieting polltical auimusi. tles after the revolt against Caceres and in consolldating the political situation. Peru now showeld real evidences of adraneement. The old turhulent element was passing away; those leadera who had pineeci purely personal ambi. tion lefore the true interests of their country hal given place to the natural talent and ability of the hest citizens, wiom the tlmes were call. inge to the front. Candamo's rule promised well for the comntry. lle was surrounded by able men, among whom, as chief cahinet mln. ister, wus Dr. Domingo Aimenard, an uprigit Ia : ycr. The fiscal revenuc was increased by t.ivi, agalnst which there were murmurings, but which the country was nhle to bear, an: the tas on tohacco was set apart for the con struction of uew rallways. Unfortunatcly, this able miministratur, Señor Candamo, continust but a short time in office, for he was orertakin by illness, and died at Arequipa in Mas, 1904. This event left the country under he temporars leatership of the second vici presidnt, seiner ('alderon, for the first viee preideat hat died also. An election was at orce catlend aceording to law, the two candl dates which were put forwarl belng Dr. Juse ['arito, sun of the formel president of the same narue, and Señor Nicolas l'iérola, who had aready heen at the head of the Government ob (w.) urensions. Rivalry hetween the partisans of these two candidates hecame arate, and al. thourh it was fared for a moment that swe itsurbance mitht occur, good sense prevailed and the clections proceeded without interrup. tion. Buth contestants were growi monl'icrla representing the party knuwn as the Demmen ratas, whilst l'ardo healled the Cicilistas. There wre not sery radical differenees of principir malerlying these distinctions of name: thoth wern for civil gorerument and for national pro. aros. Pierola had done gerni wurk during his f.rmer term whilst Pardo hat the prestige of the food uame and administration of his father. the turmer president of $18 i^{2}-18 i 6$, and wis also both in esteem wersonally amone the best ele. numt of the cmintry. Tlie result, the clection -hohl, probathy. more fairly tho $\quad \mathrm{r}$ in l'ern bufuri- fell to Ior. Pardo. A. D. 1901. - Second Report of the Second Philippine Commission. - Coliapse of the Insurrection. - Peace in all but five Provinces. - Organization of Provincial Governmenta. - Native Appointments. - Central Civil Government. - Appointment of Governor Taft. - Filipino Members added to Commission. - Down to tite capture of Aguinaido. leader of the Fhipino insurgents, on the 23d of March, 1901, and his submission to "the sovereignty of the Cnited States throughout the Philippine Archipelago," as announced in an address to hile countrymen on the 19 h of April, the history of Anterican rule in those lslands Is recorded in Volume Vi. of this work. The Second Philippine Commission, wlth the IIon. Wiliam 11. Taft at its head, had entcred on the performance of its extenslve icgislative duties on the 1st of the previons september, while the Mifitary Governor continued to exercise admin. istrative powers. The Comnission hiai begin the organization of provincial and munleipai govirninents. ancia the estabishing of a syst"m of publie schools, as related in the rolunie referred to. From its second report. covering ten monthis and a half, ending on the 15 th of October. 1901, the following statements are drawn. to continue the outline of princlpai erents and most important affairs down to that date
"The collapse of the insurrection came in May, after many important murrenders andi captures, including that of Aguinaldo. Cailies, in Lagnaa, surrenderet in Junc, und Beiarmino, in Aibay, on Juiy 4.
" There are four important prosinces in which the insurrection stiil continues, i3atangas, Samar, Cebu, and Bohoi. Parts of Lagina and Tayabas adjoining Batangas in the mountain region are affected hy the disturhances in Ba. tangas. In Mindoro aiso, a thiniy setticd and alnost nnerplored isiand, there are insurrectos

Outside of the five provinces named there is peace in the remainder of the archipelago.

- The rorl: of the commission since it began to legislate in september. 1900, has been constant. . . We have passed since our last report. in aldition to namerous appropriation hills, a municipal cole. a provincial law, a school latr. a haw preseribiag an accounting syatem. acts organizing the rarious bureaus of the central govermment. acte organizing the courts, an act $\omega$ incurpurate the city of Manila. a conle of civil procedure for the laiands, and a new tariff act.

The generai provincial law provides for a provinclai government of five offlcers - the gor.
ernor, the treasirer, the supervisor, thie sirre. ernor, the treasirer. the supervlsor, the sistre.
tary, and the fiscai, or prosecuulaig ato tary, and the fiscai, or prosecuthag attorney. The governing boarl is calied the provincial board, and Inciudes as members the gorernot, the treasurer, and the supervisor. The prosecu: lug attorney is the iegal ailviser of the hoarl and the secretary of the province is its secretary The brst function of the provinciai goveriment is to collect. through the provincial tresturer. all the taxes, with few exceptions, helonging to the towns or the province. Its second aml most important function is the constructlon of hieb. wayn and bridges and public bulidings. Its thifd function is the supervision, throush the governor and the provincial treasurer. of the annnicipal officers in the discharge of their duties. Within certain limitations, the prorin. cial board fixes the rate of levy for provincial tavation.
" The governor has the power to suspend ans munclpal ofticer found faillng in his duty, and is obiiged to visit the towns of the prorince twlee in a rear, and hear complaints aguiast the municipal ofilcers. . Under the act the o:thes are all to he fllled at first hy appointment of the commisslon. The governor holds hils oflice mintil February, 1902. When his successor is to le elected in a mass convention of the municipual councilors of the towns of the province, The secretary, treasurer, and supervisor after Frbruary next are trought mader the cirilsertine act, and ali vacanciea thercafter arising are to be filled in accorlance with the terms of that ar: The tiscal is appointed for an indeterninate perind, and is not subject to the civil-sirsice jaw.
"The commission reacied the conclusinn that It would ald in the pacification of the conin:ry: would make the members of that bohly rert much better acqualnted with the country. with the peopie, and with the local conditimins, and would heip to educate the peopic in Americsa methols, if the commission went to the capitai of cach province and there passed the sperial act neccssary to create the prorlacial government and mard the appointments at that time. . cordingly, the commission vislted thirty three provinces.
"The pilley of the commission in its provia ciai appointnients has been, where positle. to appoint Filiplnos as governors and Americasa as treasurers and supervisors. The prorincial secretary and the provinciai fiseai appointed hare uniformly heen Fillplene It will t- te served that this makes a majority of the provincial board American. The commistion has, in severai instances, appointed to provincisi of.

PHILIPPLNE ISLANDS, 1000-1902

## PHIILIPPINE ISLANDS, 1901-1802

fices former insurgent generais who have been of especial ald in bringing about peace, and in 4) dolng It has generaliy acted on the varnest remmendation of the communding officer of the ilstrict or province. We ixelleve the appuintments unare have had a poorl effect sud the appointees have been anxious to do their duty.

The central government of the islands establshed in September, 1900, under the instruc. tions of the Presldent, wlth a military governor as ehief executive ani the commaslon as the lerislative body whe certain executive func. thins in addition, contlnued until the 4 th of duls, 1901. At that time Maj. (ien. Alna If. Chitet relleved Major-General MaeArthur as comanafing general oi thls divistoa and mill. tary governor. By the order of June 21, prevl. ous, in all organlzed provinces the civil exeeu tive anthority theretofore reposed In the military voverbor and in the commlsion was transferred on July 4 to a eirli governor. The presilent of the commlssion was designated as clvii gov(rn)r
$13 y$ an order taklag effeet Septemher 1, the firport of whlleh wha annonuced the 4th lay of haly, there were adden to the eommissina, as a legistative boig, threc Filipibos, Ir. T. II Pardo de Tavera, Señor Benito Legada, anil aring lose Luhuriaga. These gentlemea, the fir-t two of them residents of Manila and the tant a resident of the island of Negron, had heen mest earnest and ctliciont in bringing about 1"ace in the laads. 1)r. Tavert wis the first persident of the Federal party, had uccompanied the commalssion in lts trips to the sunthern prorincus, aud was moat useful in the effective sperelies which loe hellecred in fayor of peace athl wind order at erery provincial mpetlng. Setur Legaria had been valmalle in the ex. trone tu Generai Otls and to all the American authoritit's by the wisumon of his shggestions, and the courage and earnestnesa with which he upheli the Ameriean cause at the eause most bentinial to his country. Señor Jose Luzhriary wis a member of the first governmen: of the islanif of :Negros, organized while there was insurrection rife thronghout the islamls, as an indrutulent govemment unfer the supersisiou of a military governor. and was most active la prevrnting the insurrection from gaiaing any forthuld in that important island.

The theors upon which the commission is proceting is that the onir posisble methei of intructing the Fiiipino people in methols of free institutions and self.governtaent is to make a gosprnment partly of Americans and partiy of Filipinos. giviag the Americans the nlimate inntol for some time to come. In our iast re. 1.irt we pointed out that the great boif of the people ware lenorant, superstitious. and at pre-- tit incapable of understandiag any governbient lut that of absolutistn. The inteligence asal education of the people may be largely measured by knowledge of the Spanlsh languare. Less than 10 per eent of the people speak Spanish. With Spaniards in eontrol of three islaads for four hundred rears and with Spaich spoken in ali offleiai arennes, uothing waid in more sjgniticant of the tacte of real intellivence among the people than thls statement. The common people are not a warlike prople, but are suhmissive and easily - indeed
much tor easlig-controlled by the edicated among them, anll the jower of an edncuted Filipino politleally ambitious, willing io plot and use ali the arts of to drangogue la mising the people is ruite, fangerons. The ellucatal peo. people, is fulw, though full it phrises coneern pie themselves, though full of phrnses concern. Ing liherty, iave but a faint conceptlon of what real civil liberty is and the mutual self-restraint which is Involved ia its rmatenance, they frad it hasd to undrestand the divislon of powers in a goverume ut, and the limitations thut are operntive: upos ull officers. no matter how higin. In the municipalities, in the ApanIsli lays. what the friar did not control the presidente did, and the iwople knew and ex. peetenl an limit to hls exercige of authority. This the titleulty we now eneounter in the or qanlation of the mmacipality. The presldent. fails to observe the limitatons upoll his power, ani the people are time submissive to press them. In thls condithon of affuirs we have thought that we ought tirst to redure the elortorate to those who mold be considered intollienut, and so the gualitientions for voting fixul in the muairlpal cambe are that the voter shall rlther sqeak roal, and write English or Spani-h. or that he shall have bern furmerly a munt ipal otficer, ur that he shmal pay atax equal in Sis a your or own propurty of the value of s.50"-limurt it the I. S. Ibilimine Conmission, from lec. 1, 19N1, to Uet. 1i, 1:N1, th. 1. 1. . -20.

PHILIPIPNE: INLANDS, 1001--602

PIILIPPINE ISLANDA, 1002

1002, the Commlasion restored elvll government to that province to take effect July 4, 1002. By act No. 424, enacted July 1, 1002, the provlace of Laguna was organized lato a elvil government. Thls completed the organization of all the provinees lu which insurrectlon had leen rlfe during the latter part of 1801 , except Min. doro. There were, in addleton, certaln tracts of territory occupled by Christlan Flllplnos that had not reeelved elvil government, elther hecause of the remoteness of the territory or the acarclty of populatlon." The report then detalls the measures hy whlclt elvil government whs given to these tracts of territory, and proceeds
"The questlon what shall be done with re. speet to Mindunan is one whleh has not been de. Anitely decided, tirst, becanse so much has had to he done with respect to the nurthern and Flliplino provinces, and, second, becanse at present there is an unsettleel conilitlon In the Iake Lanao country. The hostility to the Amerlcuns does not reneh beyond the Lake Lavao Moros. The Morus of the Jolo group, of Zumlranga, and of the Mo Grande de Minulanao Valley are all qulet. and all entirely willug to suhmit to American supervislon. It is very posslble that an arrangement can he hrought ahont hy which the sultan of Jolo can be induced to part with sueh rights as he clalms to have in the Jolo Arehipelago, nnd In thls way guestlons whel now prisent very perplexing dimenties with respect to ownerslip of privileges, rlyhts. and lanuls may he obviated. . . I think it wiscr on the part of the Commisslon to postpone the conslderathin of the Moro question untll we have passed legislation to neet needs that are more pressing throughout the northern part of these prossessions of the C'nited sitntes, For a grent many years to come there will be no ques. tlon of popular government la the Moro country; the Joros do not understand popular goverument, do not desire it. and are entlrely content with the control by their dattos. Pissibly far In the future the control hy datus wifl cease. There is room for mnterial and Industrial development among the Moros, and with thelr materinl Improvement may come a change lin their politlcal vlews. Fur the present, however, it is necessary only to provide a paternal, atrong. but syinpathetic government for these followers of jifohammed.

- The ciril government has assumed responsilllity for the preservation of order and the maintenance of law throughout the Christian Filipino territory of this archipelago nt a tlme when the material conditions are nost discoumar ing noul present ('very concelvahle olstacle to the sticcessful administration of the affalrs of 6,000 . 000 or $7,000,900$ people. The war of sly years since $1 \times 96$ has preatly interfered with the regular pursuit of agriculture, which is almost the only source of wealth in the islands. Many yurs age there was sullicient rice raised in the islamuls not only to feed the people but to export it to other countries. For a number of years hefore the American ocecupancy rice had been imported. The area of cultivatlon of the rice lats been much lessened during the war nad many tivlds which were former!e tilled are grown now with the rogon grass becaise of neglect.

The grentrst blow to agriculture has been the loss of the rarabao or water hnffalo, upon

Which the cultivation of rice, accorillng to the mode pursued in these islands, is wholly depient ent. The war ta some degree, and the riuder pest $\ln$ a much larger degree, have destroyed about 90 per cent of the corrhaos; and the ns tives - never very active in helplng theniselvit - have almply neglected the rlee culture that now the lslands are compelled til spend nbout $\$ 15,000,000$ gold to huy food upon which to live. The carabiao is not 20 necessary in the cultivatlon of the sugar crop or in the cultivation of hemp.

The cholera has swept over these Inhimils Flth fatal effect. so that the total loss will prob ably reach 100,000 deaths. Whole vills $2+3$ have heen depopulated and the necessary san!. tary restrietlons to avold iss spread have inter. fered with arriculture, with Interconmunlea. tlon, and whth all husiness. The ravigea of ans have left many destltute, and a guerrilla lif. has taken away from many all hablits of indintry With no means of earrying on agrle ulture, which Is the only occupatlon of these filhuls, the temp tation to the less responalhle of the former la. surgents after surrender to prey apon their neighbors and llve by rohbery alld nupine has becth very grent. The bne of Phillpplac civlli zatlon ln the past was ladronlsni, and the present condithus are most favorable for lts gruwth and mainteuance.

- Muny who were promerileal for political offences in the spanish timer laul no refuge hut the mountalns, amd letay In the mountalns condueted a free robler life, ant ahout them gathered le epons not unllie the ans of the Rohin Fuoll days of England, so thatt thiy attracted frequently the syinpathy of the cumb mon people. In the Spanlsh days it wits com mon for the large estnte owners, inchuding the Iriars, to pay tribute to nelghborlng lulrunes. Every Thgalog province had Its Innil of la drones. and frequently each town hal its recing nized lalrone whom it protected and thrugt whom It negotinted for mmunity.
"T The insurrection ls over. It is trme that the ladrones, though they llve on nothing but 'aut'and rice stealing, and never uttach Amerion solullers, and prey ouly upon their own payite do masquerade as humrectos: but ther ru.. nize no nuthority and have no chmmateristic other than those of handittl. They have Hirmu up in some of the provinees the organization (f) so-called secret societles for the purpose of se. curing ageacies with which suceessfully thren. duct their rolbery and tosell the fruits if it The picture that I have given of the de, riswil condition of agriculture, and the tendeney to ladronize in the Tagalog provinces and in …lae of the Visayan provluces, does not aly ty to those provinces in which hentp is the clicif product. They are wenlthy and prowperme Report of Gorernor II: II. Tuft (lithurt if the Plilippine Commisaion, 1902. pt. 1)

PILLIPPLNE ISLANDS, 1902
the leadership of the insurrecto forces in llocos lorte and carrled on a very active campaign in the monntains of that pruvince. He was one of the laet of the leaderi to surrender with his forces in North Luzon. Since his surrender ie ban been quite active in spreading propaganda mong the native priests agalnst the so-calied Priar domination of the church In these islands. The definite refusal of the Vatlean to withdraw the Spaniah friars from the islands was made the occislon for the formation of the Independent Fillpino Catholie Church. Actively en. gaged with Agipay in this movement was lasbelo de los leyes, the former enitor of an inaurrecto paper, published in Madrid, ealied Flliplnas ante Europa, and an sgitator of irresponsible and irrepressihle character. . . . Pudre Aglipay has secured the active and open cooperation of a number of native priests, 15 of whom be has appointed hishops, himself having the title of areiblshop. He has heid mass in many diferent places in and about Maila; his arvices have attracted large gatherings of benple.

In order to prevent ennstant recurrence of disturhances of the peace I have had to take a imm stand with the learicrs of the movement by mpresslng upon them that forcible dispossessinn f a priest of the Ifoman (atholie Churein, for bars in praceable possession uf the church and the rector's honse, is contrary to law, and wonld he jreventad by the whole police jower. The lemiers of tie morement assure me that they hise no desirc to violate the latw and wish th ketp within it, but that their foliowers at times re hard to eontrul. I have sald to them that If they chaim title to the churches they miny assert it thrminh the conrts, and if successful will secure not only the confirmation of their title but actisl jusseasion.
"I have takcu oceaslon to ayy, whenever an ipportinity occurted, that the insisher government desired to take no part whatever in the religious eontroversies thus arising; that it would protect Father Aglipay and his followers in worshiping Gol as they ebose jost as it would protect the Roman Catholic Clnurein and its min. isters and followers in the same richts. But that, If the law was rlolated by either party, it would berome the duty of the governnient to -c $p$ in and restraln sueh lawlessnems." - Gov. - rour Win. II. Taft, Rejort, 1002, pp. 30-40.
A. D. 1902-1903. - Governmental Purchase of the Friars' Lands. - "As early irs 1N9\%, "le Peare Commission, wheh nequtiated the treaty of Paris. became convineed that onc of the noot important steps in trinquilizing the islamls and in reconciling the Filipinos to the Americm Government wouki be the gosernmontai purdase of the so-called friars auriruturat tands in the Ihiitpuines, and the sale of theme lands to the tenants upon long, easy payinitits. . . . The Sucletary of War and the 1'rivilent coneurred in the recommendiatlous of $1 / 10$ Cummission. Aceordingly in May, 1902, the writer, as clvil governor of the lhilippine Hinids, wis dirceted by the Seerctary of War to visit izome and to coufor with the Pope or such ugents as he inleht desimnate in respeet to the
 and other ynest jons of a similar character which werm ponding between the Roman Catholic (Thurch and the Government. The negotlations

## PHILIPPINE ISLANDS, 1802-1803

which were had on thls suhject in lome were set forth in the correspondence publisheti by the Secretary of War in his ruport tu Congress fur last year. In a word, tive lope approved the purcbase of the agricultural lands of the three great rellgioun oriery that owned agric. Iturai lands in the flands and appointed in apostolic deiegate with as full powers as he cuuid be invented with to hring about thls resuit.
"In order to determine the value of the eatates, the representatlves of the varlous companies adod other interests ware invited to attomil a hearing, when y srous witnceses were caliod to testify. The apostoile delegate was also present.

- In accordance with the agreement reached In liome, I sent to the apostolic deiegate a recuust for a statement of the exact lutereats retained by the reigions orders in the Pbilipplacs in the lands which were the subject uf negotis. thon. Nu furmai answer to this ictier was evir recelved, ont informally lt was natect to me hy the deleg口te that the autiorlites in the Philip. pines had Informed him that they had so dis. posed uf their interests thint they were unabie to make a statement of what their interests were, if any. The raiue of the inndis, an cathmated accoriling to the statements of the apents of the companies, aggregated a sum betwern thirteen and fonrteth milions of dollars gold. The estimate of Villegas, the survevor embployed by the Commision, showel the valnathon of the lands to be $86,043.0100$ goid, if lils value in Dlexlean should le reduced to gold st the rate of two to one, which was the gold rate about the tlme of his surver and elassificition, thongh the Mrsican dollar fell eonsiderabiy nfter tiat. Considering the had conditions wheh prevailed In ugrlculture, the hoss of catthe, the divpute eoncerning tithe, and the agrarinu question that mast alwiss remain in the minngement of these estates nid cmbarrass the owner, I conshiercl - and I bill.w. thu. ('unmiasion gencrolly agreed whin me - that \$6. 1431. 000 gold was a full price for the lands. The sum. howevir, was scouted by the persons represcating the owncrs, and there appearal to be very little prospect of renching an agreement.

Not discouraged, however, by circumstances that sirmed most discouraging, the apostolic delegate bent his energies to bringing the far. tles to a setthenent. After some negotiation the thelegate first stated that he thonght he coulil arrange u sale for $\$ 10,510,000$ gold. I toid him there was no hope of bringing nbone a purehace at that figure.

Then followed a long anil protraeted discussion between the par. tifs who were to be the venders as to how this sum should be divided, and there was mmeh diffleulty in arriving at a solution - so great a dilliculty, indeed, that I was oinformed that unless $37,770,000$ was pald there was no bope of reachlng an agrement. With the approval of the Secretary of War and tbe Commission, 1 replied that s:5in 3,000 was our ultimatum, and that we would not give more than that, and this was ultimately the hasis apon wbich the price was fixed."-Report of the Ciril Cinr. ernor of the Phiiippine Ialanas, Hilitam II. Taft (jourth Report of the Philippine Commission).
A. D. 2905. - Report of Committee on Methodi of Dealiag with the Sale and Use of Oplum. See (In thes rol.) Upicy Probley. A. ss yent of se, and owing dleglance the the Inited states. The nct of Congrest prescrlbes that the qualldcatlons of electors shill be the ame as thoes preseribed for slectort in munlci. pal eicctlons under laws in furce at the time of the pasage of the Congresslonal pactment. As the municlpal eleetlon lisws in force at the thae of the pasange of the net of Congress have undergone some change la regard to the quillt. cations of electors, the straitge anomaly is pre. sented of baving certain quaitincations ezacted irom munlelpal and provinetal ontels whels are uot required for delegates to the ansembly. One of the resitlts de that felons, victlms of the oplun bablt, and persons convleted In the court of tirt insiance for crimes involving moral turpltude, int whose cases are pending on appeal, are not ellgible for election to any provinchi or munleipal oftice, hut may become delegatis to the assembly.
"As annonneed by provinclal governors the elections for assemblymen held on the 80th of July, 100 i , resulted In the eieetion of 82 Naclon. alivise, 4 Independistas, 7 Inmediatistas, 16 I'rogresistas, 20 Independents. and ICentro Capullico. The totai number of voters registered fur the assembly cicetions was 104,960 . The number of coters registered for the provinelal and duanielpal eieetlous whil he very much larrer than that for the asembly electlons. The difference in reg.stration und votes cast at the (uno efectons seems th show with conslderable certaluty that there was far more interest in the elections for proviuclal and munielpal ofticials than there was in the electlon for assenaly. men

The cielegates to the lullippine assembiy In neterdance with the eali of the governor gen eril as prescribet by the aet of Congress, met at the Grand Opera liouse in the elty of Manila on the tith diay of Oetober at 9 oelock A. M." Repurt of the Philippine Commision, Dec. 31. 1w0: (Alrrilgment, yisage and Dueumenta, 1007. pp. N(1-811).
The Ilon. Wihtinm H. Taft, Ľnlted States Secretury of War, former Governor-General of the Philippine Isimuls, made the long journey to the istanits on this ocplsion for the purpose of upening the merting of the Assembly and persoushly incpurthy the state of nifairs. After returning. In the fuilowing Derember, ine made an extemuled report to the l'resident, In wbleh io dincussed the charater of the Assembly nud of the partics represented to it at considerable lenath. Hecurring to the format: 3 n of the first puitical party that arose in the Islands after they came nonder the controi of the Cnited Statcs, he salid of it
"It is a mistake to suppose that the war by the Filipinos umanst the Americaus inad the srmpathy of all the Fillpinos. On the contraty, there were namy intelligent nad conservative men who favored Ameriean control and who dld not lulic re In the eapacity of their penple inme. diately to organize a government whith would be stable nod satisfactory, but lu the faee of a prissible independence of the 1slands, they were still. Upon Mr. MeKinley's second eleetlon mane of thrser fresins frarhed the couclusion - hat it was time for them to act. Aceordlngiy, :hey formed the Federal Party, the ehief plat. form of which was penee under American sor. ereiguty and the aceeptance of the American
promlen to gnvere the lalands for the irnent of the Fillpline and gradually to extend popular elf goverument to the people. The Federal larty recelved necenalons by thousamls in all parta of the latianis and in every provluce, so that the Conimiston wat emblei charing the year 1401, and under the ausplces, and with the Bid of, the Federal Party, to ofganize elvil gov. ernment in nome 82 or 38 provinees. of in sub. stantlally ail of them. . . . The ninin plirfose and prinelple of the party was peace anter the meverelgnty of the Chind states. In draftur a platform tes leaders had formulatel oplank favorlug the organization of the falibuis litw a Territory of the Enited sitates, with a vlew to lts pusslb! becomag a stule. Frotn thly platk it took lis name. In the firat two ar three year after ite successinl ellort to hring on perere many i inminent flltpines huving polltical smbl thon beeane members, and th the gubernatorial elections the great minjority of governors ciceted were Feelerals. And so substantlatiy nill who thled promilient otilecs in the government by nppolntmeat, lueluding the juiges, were of that purty. Then dissemton arose smbig prominent fendera and wome withdrew frout the pirty. The natural opposition to a government pmrty id to the organkation of other partles, espectally
 (ilables). The Federal liurty hai foundeth no "rhith, the Demorritia, carly ha its cxitutnee. The opponents of the government ionking to
 the Remeimiente. 'The iatter was alitel with 'sperthi ability and whth a partlena spirit agalust the American Guvernment.
"For two years before the elect' n of th". As. anbly the fillphos who symputhiat with the Ronacimiento were perfecting thelr organiation to secure a majority in the nssmbly. Many groups were formed, but they nil were libuwn as the Partdo Narconatistin. Thare was some difinerence as to whether th thls, tithe slumbld be alderl the vurt 'hmerilathita.' but the great majority facored it. The panty is epremily known os the Nachonallata iarty. isuring macil of these sime two bers, the fioteral Party was durmnnt.
tome six noutha before the electhons there sprung fron the ashes of the Fioteril I'arty a barty which. rejeetine the shatehomel i.fea, decharid lis if in favor of making the Philippines an ladependent nation by gralnal and progres. sire acquigition of governmental control untl the peuple shouid beenne fited by ellucution and practiee unier American sovereigny to enfoy nad mnintain their complete intlepinienee. It was palied the I'arthlo Naeiounlinea Progres. lsta. It is generally known as the Progresista l'artr.

The campaign In the last two or three months was carried on with great viror. The Narlomulistas had the adrantage of being under. stod to ine agalnst the government. This, with n people llke the Filipino peopie, who had bern taught to regard the government as an entity separate from the peopie, taxing them and proseenting them, was in itself a stron! reason for ponuinr sympathy nad support. The Progresistas were denounceli as a party of ofice bolders. The government was denounced at extravagnnt aud burlensome to tise peopie. In many districts the Nacionalista candidates pro-

PIILIIPINE ISLANDS, I007
mined that if they were roturned tmmediate in dependerce woild fullow. There were quile a number of candidaten in conutry and remicto diatricts where the coatroverny was not heated who did not deciare themedves on the nalin queation. and malatalned an ladependence of any perty. They were known an Independi. enten. Then, there were other lidependientes Who declamil themselves Independent of party. but In favor of Inmediate ladependence.

The total rote regintered and cast did not ezceed 104,000 , although in prevlous guber. natorial electiona the total vote hat reached nearly 150,000 . The high vote at the latter elections may be partly explaiued by the fact that at the mane elections town officern were eiectell, and the personal laterest of many cana. didates drew ont a larger number of elictors. But tie faling of was also in part dire. doubt. less, to the sinidity of conservative voters. who because of the brat of the eampaigh, jreferred to a void takiug siden. This is not a pernimanat condition, ituwever, and I douht not that the meeting of tise asernbly and the evident Impor. eance if ith functions when actualiy performed wiii dicveiop a much greater popular Intereat In it, and the total vote wili be largely lacreand at the next election.
"I openell the assembly in your natme. The roil of the meubers returned on the face of the recoril whs called. An appropriate oath was adinluistered to nil tite menithers and the aswembiy organizell hy seiecting Netor Serglo Osmena as the spertier or presifitig otticer. Netior Us. metia has been one of the most effelent fiscala, or prosecuting attorueys, In the Islands, lasing conducterl the government prosecutions In the largest provinee of the laiands, the province and Isjand of c'ebu. Ile was subsequeatly eiectel governor, and by his uwn activity In going luto every part of the Isiandi, iue succeeded In enllating tha masistance of ail the peopie in suppreasing ladroulsm, whieh had been rife in the mountains of Cebil for thlrty or forty years, so that to day there is nbsohater $\mathrm{p}_{\mathrm{t}}$..' and tran. qullity throughout the islanis. Ile is a young man, not 30 , bat of gruat ablity. shrewdacss, high idcals. nnd yet very practicai in his rie iha. onis of dealing wilth men and tillags. The asarmbly could have done notining which indieated Its goonl sense so strongly as the selection of Sethor Osmeria as its presiding offeer.

As a whihboieti -as a party cry-jmme. diate indeprentience has much force, because is excites the natural prhie of the peopie ; but few of tieir number have ever worked out lis consequences, and when they have done so tivey have bern willing to jostpone that question untif some of the Immediate needs of the people have heen met. I may be wrong, but my Judpment is that the truasfer of real power, by giving to the people part of the leglslative control of the Chrlstian proviaces, solsers thelr leaders witi the sense of reaponslbulty and teaches them some of the practical difleulties of goverument. . . . I do not for a moment

POLAR EXPLORATION: Arctic: A. D. 1901-1910. - Three Expeditions of Commander Peary. - His Fins.l Triumph. - The astounding Imposture of Di. Cook, Pretender to an attainment of the Poica Yearin Advance of Peary, - Other Arctic Explorations of the Decade, - When the record of Polar Exploration was closed in Volume V1. of thls work, on its going to press in the spring of 1001 , Commander IRobert E. I'eary had been working within the Arctic Circle for three years, with no respite, and the Peary Arctic Chu was senting a ressel, the Eirif, to make inguiries abont him. He was fonnd to have proved that Greenland is surrounded by water at the north, and to have further undertakings in hand. He remsined another year, in the course of which he male the nearest appronch to the Pole that had yet been accomplished, going directly north from Cape IIecha and reaching latitude $84^{\circ} 1^{\prime \prime}$. IRe. turning to the coast, he was met and brought home, after an abscnce of four years. In July, 190.), he sailed northwarl agahn, equipped with a vessel, the Roowcelt, hnilt expressly for his use. After wintering on the north coast of Grant Land, he started once more with sledges and dogs townd the l'ole, and this thme pressed hla way to $88^{\circ} 6^{\prime}$ of hatituld, or within a little more than 200 miles of the Arctic hul). Then he was forced to turn brek, with seant supplies, killing his dogs for form. Once more, in Jniy, 1908, Comminder I'eary set his face Arcticward, on the stannch houserelt, with two scientitic compenions, and equippul himsclf at Etah with Esklmins nad dogs for another jonrner across the Ice-fields, from some point on the Grant Land coust.

Two expeditious were fitted out in 1901 and 1903, by Mr. Ziegler, of New Vork, the former muder Evelya Is. Baldwin, the latter under An. thony Fiala. The latter reached latitude $82^{\circ}$ 13', remalning in the Aretie reglons until the summer of 190.). In June, 1903, ('aptain lioald Anmadsen, of Norway, sailed from Christlania in the suall sloop fijim, beginning a voynge which carrled him entirely throngh the Northwest Pnasnge from l3aflin l3ay to Bering Strait and which occupled three years. Mueh of that tinue. howevor, was devoted to studies nnd searches of great value in determining the locatinn of the Jarnetic l'oie. In 190 it the ranks of the Arrte explorers were johed by the Inke of Orlenns, who sailed from Christhania (n) Mar. in the Belgira, commanded ly Lient. If (iveriarhe. In 1907, Mr. Inhan lk Bradiey, of New Jork. supplied I)r. Fremerick A. C'ook wilh equipmenis for an attempt to reach the North Pole, and accompaniod him in n schooner vachit to Anuatok. a little north of Etah, In Forth Grecaland. where the loctor with one white man. Rudolph Frnneke, were landed, With their supplles, to begln the undertnking. Arertal aitimptis we: mude in successive years hy Mr. Watter Wellnam to make the jomeney to the Pole from Spltzbergen by a dlrigible airship. Esch of them, down to 1909 , was frus

## POLAR EXPLORATION

trated by misfortnnes of circumstance of Weather. A tragicaily ended survey of the northeast coast of Orcenland was accouplished In 1006-7 by Dr. Mylins Erlchsen and licuten. ant llagen- llagen, who perished whtle groping their way southward in the growing darkiness of the approaching winter. These fill out the Iinportant items of the record of Arctic esplora. thon, since April, 1801, down to the 1st of september, 1009.

On that day the whole world was startiel and exclted by a measage, flashed first to Lernich in the Shetland Islauds, from a passing hanibh steamer, the IIans Ejede, and thence to all cor ners of the carth, saying: "We have on lmari the American traveller, Dr. Cook, who roached the North Pole April 21, 1908. Dr. Cook ar rived at UPernivik (the northernmont Hanish settlement in Greenlmid, on an island of the west coast) In May of 1909 from Cape Fork (in the northwest part of Greenland, on Butlim Bay) The Eskimos of Cape lork contirm Dr. (vo) story of his jonrney."

The next day brought a cabled amomement from Dr. Cook himself, to the New Yorh Mer ald, briefly telling of his trimmph, "ufter a pro longed fybt against fumine and frost "" athl de scriblug the emotions with which he hind found hamelf at the goal which so many had striven vainly to attuin. "What a checrless suot," be moralized, " to have armsed the ambition of man for so many ages! An endless fivk of purple snows. Nolifc. No mud. Nospet it relieve the monotony of frost. We were the only puisating creatures in a deal world of ice"
Two days later the hero was landed at (open hagen, and all the excited world devoured graphic deseriptions of his reception by the enthusiastic Danes: by the Crown Prinet, wha hastened to welcome him before he hanl stepped from the ship; by the erowds who checre! him by the Kling. Who dined him; hy the I'niversity of Copenhagen n hich nwarded him an homorary legree, and whose faculty he made hopry and prond by the promise that it shonld he the firs: to examme the record of his observations and the proofs in general that he had reachat the Pole.

Two more days passerl, and then the climas of this world spread excitement ankl antmish. uneut Was marked by another ralio chertrio thash of news out of the Arctic North. - this time from the Americun North, - prociniming 8 s other conguest of the icy fortress of the pole. it spoke "'tu the Assochated I'ress, New York," from "Indian Harbor, via C'npe May, Vors Scotia." saylng: "Stars and Stripes vailel to North Pole. Peary." It reacherl New Jink a little after noon of September fith, mulluefre night, crerywhere, mople in all language were asking each other: "Is it possible that two man have suidenly done what none have beth able to do before $?^{\circ}$
Other messages from Commmider Peary which soon followed the first one fixal the date of lis attalument of the Pole as having been 1 pril 6 . 1919, - being fifteen duys hess tham n year sfter 1)r. Cook claimed to have planted the American figy at the same spot. They hronght ancry dranueiations, too, of Cook's pretension, which Pea.y had learnel of from the Esquimaux in the North. "Cook's story," he sald in one de spatch, "should not be taken too serlonsly. The

wo Esquimaux who accompnnied him aay he went no distance north and uot outside of land. ther meinbers of the tribe confirm thelr story. In another lie declared: "Cook has sold the public a gold brick." Dr. Cook, meautime, gave out expressions as to l'eary's achievement very diferent in temper and tone. He had no doubt that Commander P'eary h' 'reached the Pole; but he, Cook, hnd been fortunately the first to enjoy the favorahle conditions which gave success ho them both. IIs magnanimity, his cooluess, his easy self contidence, in contrast with Peary's words and bentlig, won puulic admiration and srmpathe $\therefore 1 \cdots$ the majority ln most communi.
 mt 1a: buht exiturei nad donc what they sal they did. but that isis in character, was the were astimable inat When he arrived in It Yi:it, on the eist : September, that city ga Hulmos av wild a hero worshlp as Cothen just landing e: ©yducy, Nova Scotia, and it whs some weeks before he would proceed to Vew lork, or put himself at all in the way of receiving any puhlic demonstrations of honor.

But grounts of skepticism as to Dr. ('ook bere accuuiring a raplif multiplication. When he published his story in detall, or told it In lec. ures, it started questions which people hoving ritical knowledge insisted that he must anawer for could; but he nade no attempt. Ile was in no haste to produce the records which he had insisted would prove his claims beyond a dnubt. lle required weeks of time to prepare them for esanimation, and they minst go to the Cni reaity of Copenhagen befure any other tribunal of science conld sec them. Meanwhile be was harvesting large gains from lectures and bewpaper publications, and scemed more intersted in that pursuit than in the vindleation of his questioned honor. Hence. suspicion of him grew, until it made itself heard and felt at las with a force which drove the Doctor to put his profesed proofs in slape and send them by the hand of his secretary, Mr. Lonsdate, to Copen hagen. Before they reached their destination he, himself, disappearcd mysteriously from puh lic view, nervonsly shattered, it was sald, and geeking some hilden place of refuge abroad Reports of him from various plaes in both liu rone amd South Anerica bave unt bern verified and his where:thouts are still (March, 1910) is mystery.

On the 21st of Decumber the report of the schentific conmittee of Copenhagen Iniversity. to which the records forwsided by Dr. Cook were ubmitted, was made public by the "uiversity (roundl. "The report. Which was sent in by the committee on December 12, states that the following papers were subinitted to it for investigation:-
'1. A type-written report by Mr. Ionalale on Dr. Cook's Aretic voyage, consisting of 61 folios.
2. A type written cony of 16 folios, made ly Ir. Lollsdale, comprising the note-books hrourht bsok by Dr. Cook froms his journey ani rovering the period from March 18 to June 13. 100\%, stated to have been written on the way roni swatevang to the Pule ant bark until a place west of Ilelbergsland was reached.

The committee polnts ont as a result of its inrestigstions that the aforementioned report of
he journey is essentially flentical with that published some time ago in the New lork Herald, and tbnt the copy of the note-books did not coutain astronumical recorls, but only results. In fuct, the committec remarks that there are no elucidatory statements which might have rendered it probable that astronnmical observations were really taken. Nelther is the practical shic - namely, the sledge journey - llluminated by details in such a way as to enable the committec to form an oplnion. The committee therefore considers that from the material submitted no proof can he adduced that Dr. Cook reached the North Pole.
"The council of the Unlversity accordingly declures as a result of the committee's report that the documents smbmitted to Copenhngen L'niversity contain no observations or explnna. tions to prove that Dr. Cook on his last Polar journey reached the North Pole."
That Comnander Peary had accomplished at last the object of his iulomitahle striving was never in doubt. His own testimony to the fact hat sutficed from the beginning, and the decision rembered on the 8 l of November hy a committee of the Nitional Grographic Society, which examined the records of his mareh to the Pole, aldel nothing to the public belief. But his laurels had been lamentably blighted by the atmosphere of scandal, wrangle, and disgusa with which Cook's monstrous imposture had vulgarized the whole fecling that attender the exploit.

The incidents of the final Peary expedition from start to tinish, were summarized hy the Commander in a message from Battic liarbor to the London Times, sept. 8, ins follows: "The Roosevelt left New York on July 6, 19k8. She left Sydney ou July 17th; arrived at ('ape York, Greeuland, on August 1st ; left Etah. Greemlant, on Sugnst 8th : arrired at Cape Sherilan. Grant Land, on September 1st, and wintered at ('ape Sherilan The sledterexpertition left the lzuosevelt on February 15th, 1009, and started norih of Cape Columbia on Mareh 1st. It pussed the British reeord on March 2d: was delayed by open water on March 2d and Bd; Was held up hy open witur from Mareh tith to March 11th; crousell the 8th paraliel on Slarch 11th nad enconnteren an open lead on Sareh 15th; crossed the Mith parallel on Narch 18th: crossed the Stith paralled on Narcla 22 d and encomered an (spen lead on March 33d; passed the Norweglan record on Marela 23 bl ; passed the Italinen record on Mareh 2tth and encomentered an opern lead on March 26th; crossed the Kith parallel on March 2:th; passed the American record on March 2sth and encountered a lead on Narch 28th; held up ly open water on March 20 th; crossed the s8th parallel on April 8 : crossed the 99 th parallel in April 4 th, and reached the North Pole on April bth.
returning we left the pole on April 7th reached Camp Cohmbia on April 23d, arriving on looard the Roosevelt on April 2 th. The Roosevelt left Cape Sheridan on July $\mathbf{1 8 t h}$ passed Cape Sahine on August 8th, left Cape Fork on August 26tb and arrived at Indian llarbor.

All the memhers of the expedition are returaing in gool health except Professor Rosa ${ }^{G}$. Martin. Who unfortunately drowned on April 10th, 45 miles north of Cape Columbla, Fhile

returning from 86 degrees north lstitude in command of a supporting party.'

Antarctic: English, German, Swedish, and Scottish Expeditions. - The Successes of Licutenant Shackleton. - When the account of Polar Exploratlon In Volume VI. of this work was closed, In April, 1501, several expeditlons to the Anturctic reglon were reported as belng under preparatlon, lu Englaui, Germany. and Sweden. The English expeditlon, for which the ship Discocery was being fitted out, sailed on the 6th of August, 1901 , under the command of Captain Robert F. Scott, with Lientemant Eruest H. Shackleton of the British Nary as second in columand. Its oljject was a further explorition of the great monutninous region named Victoria Laud, whlch Captaln James lioss hat allscorered half a century before. Thls coast the Piscorery reached in Januury, 190:3, and followed it southwanl, to and heyond the Erebus volcano, skirting the Great ce Barrier which stretches far east ward, seeming to forbid a penctration of the frozen territory it hems in. In thls survey the Brltish explorers reached an unvisled section, which they uaured King Elwarl Land. They win. tered that year near Nount Ercbus, pushlng slevige expeditlons southwnrel over the snow fields, finding a more uphenred nul broken sur. face of laud, Icss lececapped, than is tbe com. inon feature of the Areite polar zone. Iu the longest of these sledge-trlps the lititucle of $82^{\circ}$ 17's. was attalned, - far beyond any jrevious approuch to the southern pole, but still more than 500 miles from that goal. Through a second winter the Discorery was held fast in the ice, with considerable sickness among otthers and men, notwithstanding which important ad. ditions to tbeir survey of the region were made. In January, 1904, they were rached by two relief ships, and escuped from the ice lu the following month, arrivlng at New Zealand not long ufter.

Thee (ierman expelltion commanded by I)r Drygalski, left Kiel Ausust 11. 19M1, borne by the steamer ionsa, built spectally for battliug Withice. 1n, hanuary. 100 , It tuxik on stores at Kerguelen Island, and procecied thence to a polnt In the Antarctic Circle far vintwanl of that chosen hy the British explorers, belug within tbe region of the discoveries niade hy Captaln Wilkes, about sixty tears before, and Indefinitely nanned Wllkes liand. It was the purpose of Dr. Drygalski to extablish a station on the section of thas hatixplored territory known as Terminatlon Land and from thence make thorough survegs. He failed, howerer, to tind the supposed land in lis experted place, and was unfortunately frozen in for a vear. With sledge expeditions bafferl by the vlolence of winter storms. In geographlal exploration the Gauss party seem to have ncenmpllahed little, but they made rich collections of scien. tifle data. As sonn as they were freed from the ice they recelved orders from Berlln to return bome.
The Swellsh expedition, under Dr. Otto Nordenskjold, left Europe In Octoher, 1901, In the ship Antarctic, destinet for Graham Lamel, south of the south American contlnent. There. on the east coast of that land, in Admiralty In let, Dr. Nordenskjold estahllahed winter quar ters In Frbruary, 1002, and the Antaretic was
sent to South America, to return thence some mouths later.
A Scottish expeditlon, under Dr, W. s Bruce, In the steamer Sicotia, was sent out in Uctoher, 1003, for special oceanographic lnves tlgatlons ln Weddell Sea, - south of the Alla tle Uccan.

All previous Antarctlc exploratlons wert eclipsed, In 1008-9, by that of Lleutemant Shuckleton, commanding the barkentine Jimo. rod, a converted whaling vessel, nuch sumble: than the Piscorery, on Which Llentenant : ha! accompanled Captain Scott to the same retio some vears before. The Nimrond swiled from England in July, 100\%, and from New Zatam on New Year Das: 1908, going to the sam sec: tlon of the Arctio Clrcke that the Disione ry had songht. Whater quarters were established as a polnt about iwenty miles north of the ap: where Scott atnl , lackleton hat wintered in 1902-3. One of the Ifrat nelhlevements of the party wns the nserent of Mount Erchins hy sis of the sclentists of the expedition, who thegat their ellfientt elimb out the 5 th of Maret ('aught in a blizanral on the sorend day of he:undertaking, they had to lie iu thair slecpitg bige for thirty hours; lut they male their Mar to the summit and looked down lnten the live

## PORTO RICO, INOL-1005

Will be found in Volume Vil of thla work. - see Ponro Hu*口 A. D. 1900 (Apmil.). The Act has recelved amendnumt since, naking one finportant organle change. The Exeretive Combeil which it criated was numorized to fix the quall. ficuthons of voters for the inst election of a leeg. Ishitive Assembly. The sutfruge in that clec. thon, held io 1600 . was conferred by the Council on e':ery male cltizell of twenty-one years, resi. ter. In the island for nne yeur aind for six mantlis ln his maricipni district. " who is nble ts read and write, or sho. on September 1. 1900. owned real cetate in his uw, right and name, or who on sald date was a ne ather of a tirm or corporntion or partnership, or who on September 1. $1: 209$, owned persomal property in his own right or nume mot less in rahae than twenty-fve dollars." The resilits of the $e \cdot$ ion held under that rule and a hrlef summary of the doings of the legislative Assembly at its frst session, Which opened on the 31 of December, 1900, and Flosed on the Uist of Jannary, 100I, are giren la Volmne VI.
" It its second session. In 1002, the Legisln. tiry Assembly avnilesl itsilf of the power given to it by the urganic uct and passed a law for the goserument of future elertions. This act fol lowed closely the provisions of the orders that hall been issied by the executive council. The system created is similar to that in the Avicricun Sitates which hare adopted the Austratian bullot. As regards the frumelise, the only change made was that the provision whicin gave the right to vote to persons owning persomal property the value of twenty tive dullars was dropined and in its phare whs substitutol the provision conferring the frunchise npon those persuns mecting tlic conditions as regards uge end restelenere who an the dive of registration are able to proluce to the hoard of registry tax receipts arowine the piynuent of any kimp of taxes for the last the monthic of the year in which the clecthon is held. The Inw alsti prosided that ull persons who were weistered during ille year fort wonld not he required 10 register athew or have to mect the new requirements of the law. This was the law under which the second clece tion in 1!0: was beld. In 1904 the law under. went $n$ very important aheration as regards the qualitications for the enjoyment of the choctomi franclise. By this new lit the three conditions - ability to rcad and write, ownership of real estate or payment of taxes-any one of which qualinal a minle citizen of Porto Rice who hat resided in the island one year and In the district in which he offered to register for sis months immentiatcly procoding, to role, were nntil Inly 1. 1900. wiped out. leaving onty the conditions regarding sex, age and residence to be met in orider in qualify a roter. After that date the sulditional qualitication of being able entend a. I write must be met. The result of this anemul. ment to the law is to prowlde for uniremal man-
 now name can he oulded in the registration llot tuless its owner is nhle to read and write. Thrase persons, however, who arc properly re. gistered before that dat are not requirel to of fer theniselves for registration, but continue to enjor the full rights of the franchise." - W. F.
 C. S. p. 95 (Century CC, J. Y. 1005).
A. D. 1905. - Extension of Local Govern-

## I'ORTO RICO. 1006

ment asked for, - A convention of murici. pal delegates, chosen by the elective munlifical counclis of the Island, asembled at San Jioan la July, 1905. formulated a request th the Gor. ernment of the United Statce for a br. If-ning of the fundaniental law of I000, which would largely transfer the control of the Incal gorem. ment to their own people. The Guvernor Fould remain a Prcaidential appolntec, lut the appointments by the Governor would he the juct in muny cases to revidion by a licalis elerted Senate, except the conrts, which would remain as now, for tue most part, miluer onr dilrect control. In other words, the legislative and lurgely the administrative finctions, sub. ject the timitations of the Organic Act would he excrelsed by the I'orto Rlians the conrts of our own choosing, would conctrue llmitations on these powers, and the Guvernor. with hla pollce and nilitia. would he solely re sponslble for order nad the lawful execution of lawfil mandates."
A. D. 1906. - Visited by President Roosevelt. - His account of it. - ${ }^{\text {On }}$ On Novembe: twenty-first I risited the island of I'orto Mion. landing at lonce. crossing by the old Spanisb road ly Cayey to sau Juan, and returning nev: in ing over the new American roud from Ar wito Ponce; the scunery was wonderfn!! heantiful. espreiatly among the nountains if the interlur, which eonstitute a veritable trapic Switzerlund. I couhl not emhark at Sian Juan
 nud cannot recelve on American buttle ship. i In not think this fact creditable to us as a ns. tion, nud I earnestly hope that lmmediate pro.
vision will be made for dred gine Sinn Jusn vision
Harloor.

- I doubt whether our people ns a whole rea: ize the beauty and fertility of Porto laic the progress that has been made under its ad nirable government.

I stopped at a dozen towns nll told, and ofe of the notable fatnres in every town was the githering of the schonl children. The misk that has been done in Porto Rico for iducatise has lecan noteworthy. The main implasis sis is cmincotly wise and proper. las bueen as upon primnry elucation; lmt ln adilition an th: there is a normal school, an agricultural sal... three industrial and three high schools. Fiv.r. effort is belng made to sceure not onir :henetits of chanentry ednention to all the 1 'o Ricans of the next gruerntion, bit also as $f$ as nicans will permit to traln them so that the indust rinl, agricultural and commercial oppo: tunnitles of :he island ca: be utilized t. :be hest possible adrautage. it was evilent. a: s glonce, that the teachers, both Americat:s an? native Porto Rionns, werc devoted to il.e.: work, liok the grratest pride in it, and wetes endearoring to ir"in their pupila not nit is mind. but in what counts for far more iv. 17 mind in cltizenship - that is, in character

I was rery manh struck by the walite: character both of the Insular police and if Porto Rican recriment. Ther are both of the benlies that rethect ceedit upon the Anmetran administratlon of the island. The ins:, 3 : police are under the local I'orto Ricen omat matht. The Porio Jican regiment of trov. must be nlppopriated for by the Conares. carnestly hope that this borly will be kept pet
ussent. There should cortaialy he troops in be island, and it is whe that these troops gowith be themselves antive Portr: 1ticans. If *. uld be from every atand point a mistake act wo perpenate this regiment.

- There is a mater to which I wish to call $5=1 r$ special attention, and that is the deniraEinif of conterring full American clizensiip upon the people of Porto ISico. I mast eargestiv hope that thls will be done I cannot see how any harm can possibly result from it, and $i$ : aems to me a matter of right and justice to the pensle of Porto Rico. They are loyal, they are zlad to be under our flag. they are making rapil grogress along the puth of orlerly liberty. surely we should now ahow our appre. ciation of them, our pride in what they hare Cone sni nur pleasure in extanding recognition for what has thus been done by granting them :uli American citizenahip

The Iorto licans hare complete and aboolute alinamm in all their munlcipal govera. moris, the only power orar them poasessed by the lasular gorernmeat heing thit of remoring crrtipt or incompetent municlpal offials. struetion which mode Parliamentary government Impossiblc. lie then dlssolval the Cortes, aud with the approval of the Klug assumed the posithon of dictator. Ilis work of reform therecforth proceded apace. Drastic decrees. encia almetl at some nhuse, followed one another with nmazing rapldity: strong in the anppurt of the liing aul of the best elentents lit the comity, exerented by the moliticlans whon he had spoildel. nud by the p'ress which he hat done mothing to conirilate. he contlaued on his liciullong courme, und at the end of January, 19nes, he signed a devree practically muounting tu a susprasion of civil libertles. " - Liabon Cor. reapondelics, Landon Timex.

A tragedy followed atickly. On the 1st day of Februmry, linix, the King, Dou Carlos, and the ('rown l'rluee, luiz Fillpe, us they rode through the streets of lisbon, with the ' Queen and $n$ vounger sin in the sumbe carriage, and nt. tended hy un esort. were ittacked by a throng of aseasuins and hilled. The vounger prinew was wounded; the gueen escoped hy a mirncle, one of the assanhes having been sbot at the tustant his pistul whe ainull at her. The two princes fought bravely, umb the Queen threw bernelf in from of her hushand, attempting vinimy to shichd lime.

I'rince Danuel. whose wonm? was not serions, succerded to the throne: but " the shots that killed Hom Carlos nud lom lala on February 1 swept nway the dietaturship of menhor Framen and the whole fabrie whieh lue latel hilt up ut so mmeh cust during is months. Within firw hames of the mamer sumber Frame resignetl. umber pressure, it is side, und lift the eomers, deedrine that le hall dome with pulities for ever. Fiom being the sisiour of his emantry, the and. miratou of all endishtemol men, both at home nod abrad, he bermate a pariath. Hissupportors bedame mute amb his sistem sani-bod. From that dity to this his followers have lime no more than three or fonm sems in the ('hmmber, wbere they lave rennined voiceless and witbout inthuence on the course of eveuts.
"That in semingly vulgar crime should bnve 90) diapryportionate an cifeet why strange, and an less strange wh the attitude of the comatry. Whather owing to the widely entertinined susplcion that the monderers of the king were the firols of more lmportant prishmges whom it would nut lue safe to discover, or to the form of a Rupublien rising fult by the molerate and respectable members of the communty, is atill a mitter of opinion: the fact remmins that suciety lost its nerve. No burst of indignation, mo wiedunte erpression of smmpathy for the Roval Family was heard: uo steps were taken to true the inithors of the crime. . . The dis. appuramer of Finhor Franeo left the two old 'ro'itivlat parties in presence, the Progressis. tas muler swhor limelnno de Castro, and the Hegomermores under Nenhor Vilhena, the re centy elfeted successor of the returan Hintre Ritwiro. Compared to these, beither the Re. puhtionas, whose strength was supposed io be consillerahle in the country, nor the 'dissident Prugressistas, under kicnhor Alpoin, were of any account is parliamentary factors. A coalition Gore:nment was formod min Marh 4 , under Ad. miral Ferrelrat do Amaral. consisting of two Regeneralores, two Progressistas, anel two socalled Ind'pendents, personal adherents of the

Premer, who resembled him in having no marked pollt leal ldealsor convletlons. The elec. tlons, whieh took place in A pril, returned 62 Regenermbores and 59 I'rogressistas, tbu* shart. lus the Governmeut ou its carcer with the fanderome following of 101 lo a llonse of 15 , The maters with which the Govermme:t had to eleal were mabaly three-nantely, the re vasion of the decrees lasued by Sembior Framen as lietator, the questlou of the Clvil lint and of the advaners nade by the antion to the linat Family, not electomi reform. The Civil lit. was suecersfally ataleal, lmt little progres hat bern made with the remander of the pro gramme when the first serfous defectan ax curred. Dirlity the recess the Gowemmat nimmonerd that the mondelpal elcetions, whict hal been suspended by Nenhor Franeo in fa bonr of nomimated coinnells, would the hatid nerain in Sowember, nolerision hiterly attuhad by Sulor Vilhema. who amomed that the Resgeneraloren could no longer suppurt the fior ermment. The eleethons were duly helh, ant owing to the deliberate abstention of the Man nrelist parties, the Repablleans emptural un "ppused cvery seat on the Lisbun shat 'The $\quad$ mpopalarity incurred by the (fovernam: an acrount of this maneces. : y gift totherm mon Aitmiral Amaral referred the matter to the Comncil of situte, whot to his grent surprise at. anmonance, menerl the resigmation of the Gus ernment. The l'remier and his two ind pand ents necordinyly retired, and the (inhint "as
 who together with sinhor Wencesao we linias Ministur of Foreign Affairs, eontmoned to pote seut the Regemembor party. The late I'remicres - Independents' male way for the 1'rogressistio whol thas held tive seats in the ('ublinel th tho helel hy the Regenermores. Senhor Vibeta, who hide bronght nbent the fall of the late (inr "rmment. Was not offered it suat in the new one, and he immediately resmmed his iffer sithon: hut on this oreqisiou he only rarres t wo-thirds of his purty with him, $2 \cdot e^{\circ}$ numluts deeiding to support the Govermment. This defection of the Regencradores under somhen Vilheun. the firnt serious indication of a ret:ra to the old systeu of 'rotntivism,' was shepth followed by that of the late l'remier and bis 'Indepuhtints,' so that when the Cortes met ot March 1, [1000], the imposhg Government :Hs jurily of a year before lad dwindled tu lu o: is

Tbun followed daily scenes of disorder and obstraction in Parliamient until senlaor ('ampes lierrigues surrendered, at the end if Mafh. As The Times correspomlent expressed it, "as soon as the Opposition in the lower lluhe ex pressed iss impntience by a bagging of disks while Its leader in the House of Peers sulenats affirmed the 'incompatibility' of his party wit the Gorornment, Ministers detemined tif aroid all firther unpleasantness by resigning." The resignation was accepted by the hing. acd three party leaders in suecession made attemf:s in the next montl to conduct the Government witbun: siceess. Seuhor Sebastlio Telles bed the reins for iliree meets, and then pasert them to Seuhor Wenceslao de Lima, who framed up a nominally non-party Minlstry on the 1 3th of May. Senhor De Lima conduetec the Govern.

## POVERTY AND UNEMPLOYMENT: THEIR PROBLEMS.

Old Age Homes, in Vienna. - "In must man there is a tenlency, in this nur day. to deal mirre generously with te-titute chilhren than with drotitute men and women. In Berina an 1 Ses lork. for instance. both moner and thonght are larished on the young whom the community supports: while as for the act.d. what is tiven to them is siren only of necessitr. In "ienna it is otherwise; there the arrance. ments for the relief of the old pertinio are better - buth nore carefully convilered and more liberal - :han thuse for the relief of chililren. s fact :has says more, perhaps. for the hearts than for the hearls of the authoritips.

If a man-or a woman-abure 60 is with. out minner wherewith to provide for himself, or the strenzth to earn the money, he applies to the Gusadian of his ward for help. Thern, if he has a home to life in, and someone to take care of himh. or is able to take care of himself. he is minted out relief. a money allowance If he can be trusted to spend it wiaply otherwise relie! in kind. Supposing, howerer, he is homeless, feeble and 'alone-standing,' he is sent to a Virs pauschaus, or old-age home, if there is a rarant place there: and, if not, wa small poor.

Versorgungshauser are the तlstinctire fea ture of the Austrian Poor Rellef system so far as the aged are concerned. Already in the days
of Insurh II. Viunna hasl two if not more of these homes and at the prestrit time it han slx. One of them is resersed exclu-jroly for citizens: another, that at Manertarh. is rewirved for per qus who, owince to their purverted notions as In What is sernily. canaut he arcoriled the full liberty the ofd people in the uthor homes enjos. In all the six together there in space for mure than 6 ung inmates. Is the Vermorgugahanser are lonbed 11 inn by classes and masam alike as the homes of the agtal joor, the hlare where ther hase a rizht to be, no disgrace is attached to goine there.

Nithorgh in Vienna much is llone for the poor, the burden entailed be Pion liwhef is by no neans orerwhelming. In 1:nu: the full cost of Indoor relief. outhoor relief and sick relief. together with the cost of sutministration. Was
 from prisate sulirces. At that time the town was proviling 31.0 m alflte - old men and women for the most part - with allowanest ranging in amount from 311 kronen to 6 krouln a month: it was maintaining 6. it 4 more in oldage homes and other institutions: and was defraying the cost of the $A=r l$ and workhouse. It was sipporting, of contributing to the support ot I 0 , ghil chidren wion were tither with the! own reiatires or were boarded out: and was malntalning 3,246 in orphanages, etc. It de-

cent. of the total. The engineering, shipbuilding, and netal trades accounted for 17,028 , or 12.5 per ceat., as compared with only 8.6 per cent. In the prevlous year.
A Bill known as the "Right to Work" Bill came before the House of Commons in April, 1909, with the endorsement of the trade unions and the Lalor Party. It was opposed by John Burns, the former labor ieader, hut uow speak$\log$ as President of the Local Government Board and member of the Cahlnet, who said: "For three and a haif years he had had intimate ex. perlence of relicf works, and he could not exag. gerate the degradation of the workmen, the demorallzation of the honest labourer, the extent to which money had been wasted and character impaired hy the relice works which he had had in the name of P arliament to administer. Any member had only to take up the report of any one of the distress committees to see that what the mlvority report said had happened would increasingly happen so long as these micans of meeting unemployment were resorted to. The amonnt of work would be disproportionate to the wages pald, the wrong men would get the right work, and the hest men wonld be exeluded, hecause modesty was a characteristic of good workmanship and craftsmanship, and the worst men were always in the front live when relief works were set on foot."
A. D. 1909.- Report of a Royal Commission. - The izoyal Conmission nu the worklng of the English Poor Laws, whose geveral report is referred to above, lssued, in september, 1100 , a supplementary repurt on Unemployment. The main ultimate conclusions of the Commis. slon are the following:
"When we cunsider the remedies proposed for unemploy ment we are consinced that they do not lle on the lines proposed hy the Lnen. ployed Workmen's Aet, whlch has done nothing but systevatize izelier Works. These, whether national or muuicipal. appar to us merely to Intensify the evil as far as the ordinary workmen are concerncd. The great thing necessary, we beheve. is to obtain a general agreement us to the ueced of regularizing labour. In this the Government and mulicipalities ought to set a gони example.

It might be better, if ang rate or State funls are to he spent on the unemployed, that such aid should take the form of supplenenting trade union funds and give thereby a bonus on thrift. Any such supplementation of trade union funds would involve a Local Gorernment Board audit, the control of the expenses of management, and a scparation of the war ani benefli funds. It is very douhtful whether it would be wise for trale unions to accept state aid if it involvel foss of ind pendence and an interference with their eflorts to improve wages. There is llttle doubt, however, that grants of this kind would cuormously incrense their nembershlp.

In order to prevent the spread of the uncm. ployed as a clas it is probable that drastic neasurus ought to be taken, such as those recommorthled to check vagrancy. For the ldle and worthless who uow form the noisy scction of the unemployed it milght be vecessary to establish seml penat rolenies

The solution lies in a better organization of the workers avd more consideration from the
employers. Better organization of Industry might at onee relleve the workers and render traile crises less acute by ateadying the supply of labour.

- Differentiation of the unemployable from the willing workers and better classifleatlon of panpers would enable us to understand the en. went of the problem and how far reorganization of labour must he carried. Ralsing the eondition of the whote working class by better houslng and hetter wages will help to keep decent but unskilied workmen from sinking.
"Every effort muat be made to cut oft the supply of unskilied and unintelligent labour by work." boy: to enter regular and permaveut Work."
England: A. D. 1909. - The Labor Ex--nanges Act. - One of the most important of the recent cuaetments of the i3ritish Parlament Is the Labor Exchanges Aet. Which enconnterd no serfous opposition in either House. On fatro duclag the Bill in the House of Commons, Msy 19, 1909, and in subsequent dehate, Mr. Winston Churchill, President of the Board of Trade. gave explanatlons of which the following is a summary: It would divlde the country into ten districts, whieh would hare among them be tween 80 and 40 first elass labour exchanges, 45 second-class, and about 150 third-class for the smaller centres. The central coutrol waull be exercised by the Boarl of Trade, hut it is intended that, following the German example. there shall be in each principal eentrea lutal al. -it $y$ committee composed of representatives of workmen and of employers In equal numbers with a permancat official as chalrman. It is hoped that, when permancnt bulldings ure se. curell, and the whole scheme is lu working arder the lahour exehanges will beeome centres of industriui life, in which employers and cmployel will learu to know one another hetter, aud to discues in common questions now too muilh regarded from differeut standpoints. These exchanges cannot make work. they csin only distribute what work is to he had. They can hirilly be cxpected to make head against the large lhe: tuations of tradc, whieh must be met hy anie insurance scheme, which Mr. Churchill in nounced as hing under conteniplathon. Dut there are many irregularitics of distribution Which labour exclunges can correct, aml unay seasonal thuctuations producing much diatre:s which they can deal with to the great alvantage alike of employers and employed.

It was not contcuplated that fees should be charged to men applying to the habur haresux which were to be national institutions. They would strive to find men for jolss and johs for men, and attention would be paid to the inter. exts of the men who had heen witing longrst for work. For the present domestic sirrants would not he brought within the operation of the 13ill. No compulsion would be exercisel to induce applicants to give evidence as to character, but of course a man would have a grater chance of ohtaining work if he could give refer ences and testimonials. in matrike the exchanges would be aboolutely neutral as het ween capital and labour, and it would he clearly notitien to all working men that there was a diapute and they would be lett to act as they thought tit.
The Blil became law in Septrs ber. A highly furorahte report of its operat.:a was made six

## POVERTY AND UNEMPLOYMENT

months later hy the Consul-General of the Cnited States at London, who stated that "on the opening day nearly elghty exchanges were in operation and thousands of appllcations for work were recelved. The applleants malnly represented the better class of inhor. On the arst day of the opealing in Nottlingham 557 workers and 120 employlng firms regletererl. These were followed on the second day by 580 workers and 87 firms. One of the employers alorie applled for slxty skllled hands, and hough most of the skilled hands were piacel, he registered firms were not ahle to tlll all thelr vacancles."
Germany: A. D. 1909.- Experiments of Insurance. - liepresentatives from the munlel. pai authoritles of fifteen German clties held a fint conference at Cologne in September, 1909, in discuss the hest methols of combating unemployment. One or two speakers advocated compuisory insurance ngalnst unempioyment but the divergencies of opinion were so wide that no conclision was reached. Annual conferences on the subject nre to be heid. A Press correspondent who reported the meeting remarked that lt confirms "the German official view that the prohiem of lnsurance againgt unemployment ls not ripe for systematic solution. Lpon the strength of the experience, for exsmple, of Strasshurg and of Frankfurt, where the Ghent system of syhsidies is in operation, demands are frequently made for the luanguration of an Imperiai system of Insurance. Apart, bowever, from the fact that other problems especially widows and orphans insurance have precedence, the Government maintains that Imperial legislation is Imposslible because do satisfactory scheme hias been discovered."
Some accoint of the Ghent system, here referted to. will be found ahove, under the suh. hesding isecorrm. Besldes the German citios mentioned us having introduced that measure of insurance against unemployment, Cologne snd Lelpsic have heen operating an organizartion of similar insurauce for some years. As described in a report made in 1904 to the Britisb Roard of Trade by Mr. David F. Schloss, on "Agencies and Methods for Dealing with the Comployed in certain Forelgn Countries," the organization in Coingne is as foliows

## PRITCHETT

logne district. In order to lnsure with the office, a man must be at icast 18 years of age, must have ilved for at least a year in Cologne, and must not suffer from pernunent incapacity to work. In? is regulred to pay a weekly premium, payment of which must commence as from April 1, and must continue for 84 weeks. The anount of the promium was originally 3 d. per week for both skllled and unskilled workmen; in 1901 the rate of premlum was fixed at 31. for unskilled end $4 \frac{1}{2} d$. for skilled men; In 1903 the rate was raised to $3 \frac{1}{2} d$. per week for unsillled and $4 \frac{1}{2} d$. per week for skdiled workmen.
"In return for these payments the Insured workman, if and when out ot work in the period named ahove, recelves, for uot more than eight weeks $\ln$ ail, a dally amount, which is 28. for each of the first 20 days (nothing being paid for Sundays. and then 18, on each subsequent day. These payments hegln on the third weekday after the date on which the man has reported himself as out of work.
"No money is paid in respect of unemployment caused hy llluess or infirmity, or hy the man's own fault, or hy a trade dispute.'

At Lelpsic the institution of incursuce acealnst unempioyment is cul macit the same lines, hut differiog in some cietails of its rules. "The leipsle Insurance Ollice was founded in April, 1903, with a guarantee find of about $£ 5000$, nrovided by benevolent persons, in suidtion to which it proposel to receive nanual sulscriptions from members of the puhlic. The town autinorities granted accommolation for the Office rent free for three years. The system adopted was as foilows: The right to insure with'this 0ffice is confined to men of 16 hut not over 60 years of age, whohave lived at Leipsic for at least two years; the general meeting may, however, nilow residents $\ln$ the suburhs of heipsie to insure."
Employers' Lahor Exchanges. - The Coiiiirries Cnion, of colliery owners, in the thenish Westphalian coal district, was reported, in October, 1909, to have "decided to institute for the bencfit of its memoers a system of centralized labour exchanges modelted upon the system which hiss existed for many years in the Iamburg iron Intinstry. The principal objects in wicw ure to secure a steady supply of permanent iahour, to equalize a possible surplus of lahour in certaln districts and a correspondirg deficit in others, and to prevent the habit on thir part of miners of applying for employment
s.reral collieries simultanconsiy. On the other haud, it is hopel that miners wili he spared the frequently fruitless search for work."

Bubonic Plague: In India. - The bubonic plague, which began to terrorize the eastern World, especialiy India, in the Inte years of the last ecntury (see Phate, in Volume VI.) showed signs of abating in Indis in 1000 . but regained viruience in the following jears, the mortality from it in all India rising to about 560,000 in 1902, exceeding 842,000 in 1003, going heyond a million 's 1804, and rising to $1,125,652$ in the year from October 1, 1904, to September 30, 1905 . Its worst ravages were in the Fresi. dency of Rombay and in the Punjah. In the Bombay Presidency the victims of 1003 num.
bered 348.004; in the Punjnh ther countad 210.483. Nec, also, below, under Ixmis

In the Philippines: How it was stamped out. - Full accounts of the successful ram. paign against bubonic plagne in the inilip. pines, in 1900-1802, are given in the annual reports of the Philippine Colmmission. From that source tile main farts were summarizeit in the May number of the National Geographic M, Mat zine, 1903. as follows:

Bubonic plague was discovered ut Manita on December 28, 1899, and siowly hut steatity increased in its ravages up to December. isul
"The deatis in 1900 numbered 109 , an! in 19 I] reached a total of 432. The disense was at its worst each year during the hot. dry nontis of March, April, and May, neariy or quite disappearing during September, October, November. and Deccmber.
"On sccount of the important part which house rate are known to play in the distribution of bubonlc plague, a systematlc campaign was insugurated against these rodents in Manlla. Policemen, santtary inspectors, and speciall Policemea, rat-catchers were furnished with traps and poison, and woth traps and polson are distributed to private individuala under proper restrietlons. A bounty was paill for ali ats turned over to the heaith authorities, and tations were establlshed at convenient points throinghout the city where they couid be received. Each rat was tagged with the street and number of the building or lot from which It came, was dropped Into a strong antlseptlc solution, and eventually sent to the Biolngical Laboratory, where it was suhjected io a bacteriologlcal examination for plagne. During the first two weeks, 1.8 per cent. of the rats examined were found to be infected. Tinis proportion steadily increased, reaching the alarming maximum of 2.3 per cent. in October. At this tine numerous rats were found dead of plague in the infected districts, and, in view of the fact that epidemics of plague among the rats of a cit 5 in the past have been uniformly foliowed br epidemics among human belngs, the gravest apprehenslon was felt, the rapid spread of the disease among the rats after the weather had hecome comparatively dry being a particulariy unfarorabie symptom.

It was deemel necessary to prepare to deal with a serere epidemic, and a permanent detenthon camp, capable of accommolating fifteen hundred persons, was accordingly established on the $5^{-r o u n d s ~ o f ~ t h e ~ S a n ~ L a z a r o ~ H o s p i t a l . ~ H o p-~}$ iny acainst hope, the board of health reforhled its eflorts to conibat the dlsease. The fo ee of sanitary inspectors was yreatly increased, and unter the able supervision of Dr. Meacham their work was brought to a higid degree of efficiency. Frequent house-to-house inspections were made in all parts of the city where the dlsease was nonn to exist. The sick were removed to the hosplai if practicable: otberwise they were carml for where found and the spread of lnfecton guardef against.
" Plague houses were thoroughly dlsinfected, and their ownere were compelied, uniler the direction of the assistant sanitary engineer. to make necessary alterations. Cement groundflorrs were laid; double walls and douhle ceil. inga, affording a refuge for rats, were remored; deferts in plumbing were remedied: whitewash was ilberally used, and, in generai, nothing was left undone that could render buildings where plague had occurred safe for human occupancy: Buildings incapable of thorough disinfection and renovation were destroyed. Buildings in which plague rats were taken were treated exactly as were those where the disease attacked the human occupants. The hacteriological esamination of rats enshled the board of heaith to follow the nest fato lts most secret haunts and fi.ht it there, and was the most important factor In the winning of the great success which was ultimately achieved.
-With rery few exceptions, there was no recurrence of plague in bulidings which had been Alsinfectet bert remarated. As center after renter of lnfection was found and destroyed, the percentage of diseased rats began to decrease, and in January, 1902, when, judging from the
hlatory of previous years, plague should have again begun $w$ spread amung human belngs, there was not a single case. In February, one case occurred. In March, there were two cases, as against 68 in March of the precedling year, and before Aprii the disease had completely dis. appeared. This reault, brought about at a time when the epidemic would, if unchecked, have reached lts beight for the year, marked the end of a. ight begun by the board of bealth on the day of its organization and prosecnted unremittingly under adverse conditions for seven months, with a degree : isuccess which has not been equaled under similar conditlons in the history of bubonic plague.
$\therefore$ During 1901, plague appeared at aeverai polnts in the provinces near Manila. Agents of the board of health were promptly dispatched to the Infected municipalities, and radical remediai measures were adopted, includlng, in several instances, the burning of infected buildings, the result being the complete disappearance of plague in the provinces as well as in Ma. nila."

Cancer Research: Mr. Barnato's Bequest. - "We are reminded to day that the late Mr. Harry Barnato hequeathed a suza of money amounting to a quarter of a million sterling for the establishment of a charity in memory of his hrother, Mr. Barney Barnato, and of his nephew, Mr. Wooif Joel, both of whom died before him. We are now officially informed that the trustees under Mr. Harry Barnato's will have determined to appiy the bequest to the building and endowment of an institution for the reception of cancer patlents, and to place its management under the control of the anthorities of the Middlesex Hospitai, where special wards for cancer patients hare ing been in operation. and where much las been done in devislnir means for the alleviation of their sufferings." London Times. Aug. 9, 1909.

Mr. George Crocker, of Caifornia, who died In December, 1909, hequeathed a fund amounting to about $\$ 1,500,000$ to Columbia Cniversity for the prosecution of res, arches into the cause. prevention, and cure of cancer. Mr. Crocker, his wife, and his father. Charles Crocker of CalIfornia. all died of the disease. Mr. Crocker had piren $\$ 50,000$ to Columbia for the same purpose hefore his death. Mr. Crocker provided that. ahould a cure for the disease be discovered, the money should he devoted to other meflcal investigations, "with a view to preventing and curing dispases and alleriating iuman suffering." ife stipulated further that no part of the fund should te used for the erection of a bullding.
The Committee of One Hundred. - Movement for a National Department or Bureau of Health. - A conrlacing paper read by IProfessor J. P. Norton, of Yaie, before the economle section of the American Association for the Adrancement of Sc: rnce at its meeting in 1000, on the economlc advisahlity of a national reguiation of pubicic health, lefi to the formation in 1907 of the Cummittee of One ILundred, which has labored slnce that time to bring about the creation of a Department or a Bureau of Public Heaith in the Federai administration of Gov. ernment. Under the presulencr of Mr. Irving Fisher, and witi Mir. Didward T. Derine for its secretary. the Commlttee, which inciudes many of the most eminent men and women in the

## PUBLIC HEALTH

country, has awakencd wlde intereat the propositlou, eullsting a public support waich seems certaln to give it success. When the subject cane under discussion in the American Associa. tlon for the Adrancement of sclenee at its meeting of 1908. Professor Whillam 11. Welch, the rething President of the Assoclation, described the existlog neglect of health as shameful, and polnted out that. If existing hygienlc knowiedge were fully applied, the death rate mlght be cut In two. As exampies of what a Federal Health Bureau might do le cited the work of Pasteur and Kuch, whose best work was dune for the national governments of France and Germany, thongh the benetits have been shared hy ali nations. In America we lack even the statistics of discasc except In a ilmited area.

In hls Message to Congriss, December 6, 1000, President Thft urged the institution of the proposed Natlonal Bureau of llealth very cogently, in these words: "For a very cousiderahle period a movencnt has been gatherlng strength, especlally among the members of the medical profession, in fasor of a concentration of the instruments of the national government, whlch have to do with the promotion of publle heaith. Iu the nature of thlogs. the Nedical Department of the army and the Medical Department of the navy must be kept separate. But there seems to be no ruason why all the othcr bureaus and offices $\ln$ the gencral government which have to do with the pubiic bealth or subjects akin ther to should not be united in a burean to he called the 'Burenu of finllic Ifealth.' This would ne. cescitate the transfer of the Marine IIospital Servlec to such a burinu. I am awure that there is $n$ wide fielel in respect to the public health conmitted to the Ntates in which the Federal government cannot excreisc jurisdiction, but we have seen in the Agricultural Department the expanslon into widest urefulness of a department giving attention to agriculture when that subjert is phainly one over which the States properly exerrise direct jurisdlction. The opportunltles offered for useful researeh and the sprend of useful information in regard to the cultiratlon of the soll and the brecding of stock and the solutlon of many of the intrleate problems In progressive agrlculthre have demon. strated the wistom of estahllishlng that department. Simllar reasons, of equal force, can he given for the cistablishment of a burenn of heslth that shall not only excrelse the police jurisdictlon of the Federal government respecting quaraintinc. but which shill also afford an opportunity for Investigation and resenrch hy competent experts Into questions of health affecting the whole conntry, or important sections thereof, questlons which. In the absence of Federal governmental work, nre not llkeiy to he promptly solved."
The Hookworm Disease in the United States. - "In the lit World, hookworm dls"ase was probahly known to the Egyptians nesrly thrie thonsand five buudred years ago, but lis came was not understood until about the middle of the nincteenth century, when it was shuwn to be dhe to au Intestinal parasite, Agrhy. lostomar duenhmale. L'util 1848 no autheutlc cases of thls disease wre recognized as such in the United States, but between 1898 and 1902 abont g.5 cases were dingnosed. In Igit it was shown that a dlsthet hookworm, C'einaria americana, infests man iu this country, and this Indicated
very strongiy that the disease must be present although not generally recoguized. It present established that in addlton to the few cases of Uld World hookworm disease Imported lite the United States we have in the South an endenle unclnariasis due to a distinct cause, I'ncinarid americana. Thls dlsesse has heen kwown for year in the South and can be traced in medical writings as far back as 1808 , but lis nature was not understood. Some cases have been cun. fused with malaria, others have been attriluted to dirt-eating.
"The hoolworms are about half an lnch long They live in the small Intestline, where thes suck blood, produce mlnute hemorrhagres, and In all probability also produce asubstagnee which acts a a polson. They lay eggs whlrh esnnot develop to maturity in the intestine. These ora escape with the feces and hatch In ahout twenty. four hours; the young worm shedslis skin twice and then is ready to lnfect man. Infectlon tahes place through the nouth, elther hy the hisnd solled whth larye or by infected foonl. hifection through the drinklog water may possibly oecur. Flnally, the larva may euter the body through the skin and eventually reach the smisll intestlne.
" l'atients may be divided into ifght cures, in whleh the symptoms are verv obsenre ; medium cases, In whlch the anemia is nose of loss marked, and severe cases. represented by the dwarfed, edembtous, anemic dirt eater. Infec. tion occurs chletiy in rural sand dlstrict.
Economlcally, uncinarinsis is very impua: It keeps children from school, decreases capuclts for both physlcai and mental labor, and is ove of the most important factors in determiniag the present condltion of the proorer whites of the sand and pine dlstricts of the south.
" The dlsease is carrled from the furnis to the cotton niils by the mili hands, but does nut sprend much In the mlils; nevertheless, it causes a consideruble amount of anemla zmong the operatives." - Ch. Wardell Stlles, lh. 1). Fept upon the Prevalence and Gcorgaphic Diverihuti,n
of Ihwoktcorm Dinease ( Indic Mcalth und M. of Hiwhtrorm Divedse' (Public Ilcalth "Imd M. rine Ihopital Serrice of the L.S. : Ilyidinic Lnto. oratory, Bulle fin Jio. 10).
In the autumn of 1900 Mir. John I). Itockefel. ler placed in fund of $\$ 1,000,0$ (in) under the comtrui of $n$ Commlssion, to be used for the eratis'stion of the hookworm diseaso In the C'nited states. The fund is alloted in annual instalments of
$\$ 200,000$ cach.

India: A. D. 1907-1908. - Mortality Ststistics and Birth Rate. - Accorilng to statistics given lin the "Statement Fxhlbiting the Moral nnd Material Progress and comblition of ludia during the jear $190 \%-8$." In most provinces the birth.rates excecded the deat! nites. but in the Punjab the death-rate excetlet the birth-rate hy 11 less than 21.8 per mille, malnl? ins a resul: of the perslstence of plague aml the innsual preralence of other epldenics. The :o tai number of deaths registered in the Dtpend cncy was $8,809.628$, compared with F...j. 331 )
In 1906 . This constituted a rise of the rate froun In 1906 . This constituted a rlse of the rate from
84.78 per mulle to 37.18 .9 The mean mortalitr 84.78 per mllle to 37.18, , The mean mortalitr $_{\text {per } 1.000 \text { for the quinq }: \text { ennlum ending } 18 \text { in }}$ was 88.98. The rate in the Punjab was nu less than 62.1 .
Thronghout the country as a winde chnlera was reponslbie for 1.81 deaths per nille, smath

## PUBLIC HEALTH

pox for 0.46, fevers for 19.76. dysentery and darrhas for 1.25 , and pleg' $1 e$ for 5.16 . In the previous sear ( 1906 ) there was a most weicome decline in the plague death-rate, which fell from 4.17 in 1905 to 1.88 . But in the year under re. view this mallguant disease (which first appeared in Bonthay in 1896) was responsible for the record namber of $1,315,992$ desths. Happily in 1900 there was again a very rapid decliue of mortallty, and the preliminary tigures for the ear give a total of less than 150,000 deatlis, this being lower than in any year since 1800. The report shows that plague has been curiously purtiai in its dlst-fhution, many parts of the De pendeary having almost entirely cscaped its rav ages. It is shown that the civil hospitais and dispensaries in India ( 2,514 in unmber) treated 412,425 indoor and no fewer than $24,469,548$ out. dour patients.

Japan: A. D. 1904-1905.-Army Sanitation in the War with Russia. Ste (in thls vol.) Jaras: A. D. 1904-1905-at the end.

Maiaria: A Lesson in Practical Hygiene from Italy. - Slowness in using the knowledge gained. - The following is from a ietter by Ir. William Osler to the Loudon Times, dated at IRome, March, 3, 190y: "We owe mueh to the Italians for their contributions to our knowledge of the cause of malaria. Lar. eran's great discovery was promptiy fatiered by Marchlafava and Celli and Golgi, aud it was through thrir writings that we obtained the fullest detnils of the nature and structure of the malariai parasite. As an oid student of tio rlis. rase and deepiy interested in the practical prohfons of its prevention, one of iny first visits in Rome was to the Lnboratories of Pathology and of IIygiene to tind out from the Directors, Marhinfara and Celli, the progress of the battle. f: was not enourh to know the cause; we had to kuuw how it worked hefore effective measures coulel be taken, and the demonstration hy lioss uf the transmission of the discase hy the mos qulte at onee put maiaria on the list of easily preventable infections. Just ten years ngo the fialian society for the Study of Malaria was frunded, and I was alle ;o get a fuli report of the mork.

- In Professor Celli's lecture-room hangs the murtality ehart of Italy for the past 90 years. In lex: malaria ranked with tubercuiosis, pnetu monis, and the intestinal disoricrs of children as une of the great infcetions. killing in that var 21.033 persuns. The chart hows a pradual rebliction in the denth-rate, and in 1906 only 4. $=1$ permons ified of the disense, and in $140^{7}$ 4. lin Tuis remarkable resuit has heen very larsely dur to the sauitary measures introduceri by the soricty. It hus long hern known that maliaria disappears 'spontaneously:' The Fen comutry is now heaithy; parts of C'anuda, about labes Ontario and Erie, which werc formerly hotleyls of the disease, are now free. This canart be attributed altogether to cultivation and frainace. I know places on the shores of the lakes just mentioned in thiel the eonditions today are inientical with those which I remmber as a boy. The Desjardin Canal linrsh at the ex reme western end of Lake Ontario was s well. suohn focus of the discase. Themarch remiains, the mosquitces are there : but a case of maiaria is ilmost as rate as in Encland. The disappear. ance is iargely due to the free use of quinine.

## PCBLIC NEALTH

The settiers early recognized the important fact thst malaria was a disease liabie to recur, and it became a common practice to take Peruvian bark every spring and sutumn for a ycar or two after an attack. Thls is a point in propinglavis which the work of the ltalian Socicty has brought into prominence. From the summary of the deceunial report just issued, tho following paragruphs are of interest:-
'The soclety has improved the prophylaxis of malaria, and has introduced into practlee the new mechanical measures based on the defence of the hahitation and the individual front the hltes of mosquitoes. This leeing a relntlvely expensive procedure, the soclety has occupied itself chiefly with the improvement of the antiplasmoxic prophylaxis - the adminhtration of quinine. For thls purpose it has promoted nad defended hegislation for the gratuitous distribu. tion of quinlue to the poor nud to all workers in malarinl locnlities.

- The results have been that since 1002, when the law on state quinine was promulyated, while the consumption of quinlae has beeu ycariy increasiug, the mortaity from malaria has diminished from nbout 16,000 to about $4,000 y$ carly ; and in the army. Custom! House Otlices, nud in some communes where ti.e new laws have heen better applied. the morhidity from malaria has greatig diminished.'
- By these neasures, and 'hy means of the agricultural nul agrarinu transformation of the iand and eolonization, rather than by the destruetion of mosqultoes (a thing impossible to be done by us on a large scaie),' Italy may be freed from the scourge.:
In a lecture at the Ioyal Institution. London, in May, 1!09. Major Rimali Rows, one of the most notalle workers in this tield of sanitary science, spoke discouragingiy of the progress maie in appiying the knowledge gaiued. Ite said:

The immediate success hoped for ten years ago inad not heen attained. The hatte still raged aiong the whole line, but it was nu longer nhattle against malaria hut against human stupidity. Thuse whoh had taken part in it hai reasoned aud been rilliculed: had given the most stringent exprrimental proofs aml hat leen dishelieved; laul protested and heen callevi charlatans.
The f.w persons who had fouglat the firht and faileni were scarcely uble to contimue it, und If no stronger intluences could lee excited the future of malarin prevertinn in Britikl domlaions wruld certainly be as bnrren us the past had been."

Panama Canal: The Sanitation of the Canal Zone. - Extirpation of Malaria and Yellow Fever, - Report of Secretary Taft. In the fall of 1000 secretiry Taft made a visit of iuspection to the Canal, nal cave, on his return, an iuteresting necount of the conditlons he found iu an adiress before the St. Louis Commercial Club. On the work of Saultation in progress. under the direction of Dr. W. C. Gorgas, L. S. A., he gave the followlug description: - When Judg. Mnyoon [appointei Goveruor of the Cannl Zone] arrived upon the Isthnus, he found Dr. Gorgas hatting manfully against the rellow fever, but the eases setmed to be in creasing. Judge Magon coneeived the ldea that the fumigation which had been confined to $t: \cdot 0$ or three houses might well be extended to

## PUBLC HEALTH

PUBLIC HEALTH

all the houses in Panama, and at conslderable expense, and after procurlag a iarge amount of materiai, every house $\ln$ Panama Fus fumigated once every two weeks. To secure increased vlglance and popular assistance he emploged all the reapectable Panamanian phyalclans of Panames as inspectors of the distriets of that city, at annual salarles of $\$ 1,200$ a year, He also offered 850 reward for the discovery of any case of yeilow fever not reported. By methods of thls kind the native apathy, usuaily so great an obstacle to successful sanitation in Spanish countries, was neutrallzed.
"The plan of fumigation is as foliows: Strips of paper are placed across the wlnclows, whieh orlinarily bave no glass or any nettlng in them, and then by the funes elther of sulphur or py rethrum every nook and cranny of the houve is visited. These gases are fatal or paralyzing to the mosquito. After sufflelent time has passed the bouse ls opened, and then a corps of health employees are set to work eleaning the house and sweeplng out the dead mosquitoes, whleh are found in great numbers upon the floors. The mosquitoesare burned to avoill further nils. chief. By these methods, for which Dr. Gorgas and Governor Magoon are both to be eredited with great praise, yeiow fever has been redueed to a polat where during the iast month ouiy three cases were reported, not one of these among eanal empioyecs, and ail orlglating many mlles from the canal line. The efforts to subdue the fever, insteal of helug relaxed, are being coutinued. Sçuare milles of woven.wire netting with interstiees so smaii as to prevent the entrance of mosyuitoes are spreail about the piazzas of the houses of all Aurerieans and for. elguers who come to iive under the auspices of the Canal Commilssion in the Isthnus. The windows inside areaiso screeuet, and then mos. quito-hars on the beds are used, as a third precautlon. Wheuever a case of yeliow fever is discovered, the patient is at once either removed to the lospltal and put under a woven. wire screen, or, if he prefers to remain at hom. the woren wire sereen is put over him and an orderly placed in charge of him at his own residence. In this way he is prevented from furnishing a suppiy of the poisorevented from mospuitoes, who, in turm, by stlnging, wouid bring it back to man. In other words, the pian Is to kiil all the mosquitoes, well or ill, keep them as much as possible from stingling man, and isolate every man with yeliow fever, not from hls feilows, but from mosquiteves. l.ittle by littic, and facing dlscouragement after
discoura disconragement, the two thousand enipioyees of the sanitary department are wlaning fn this fight agalnst disease, upon winich the winie surecess of the canal work depends. As Mr. Stevens said to me, when I erossed the Isthmus with inlm this month, I take of my hat to the work Whlch the sanitatlon department has done in this
A report to the London Times, In June. 1909. of conditions on the Canai and in the Canal Zone, shows the effectlreness with which thls work of sanitatlon was done. More arluous than the campaign agalnst yeliow fever, says the writer. "was the campaign against mainria. a disease from uhich $\bar{\delta}$ per cent. of the people were suffering to some degree. This campalen consisted In warfare against mosqultoes and in
the edminiatration of quinlne, and the effort: in this respect bave also been highly suecessiful In 1906 the proportion of canal empluyes treaud for malaria was no less tian 821 in the thonsand. In 1808 it had fallen to 282 in the thou sand. The general effect of sanitary measures may best ie judged from the denth-rate among the tens of chousands of cumal empleyix. in 1906 It was 41.78 to the thousand, and in 1908 It wan only 18.01 to the thoumand, making the canal one of the most healthy laduatrial establishments in the world."

Peilagre: Lombroso's Dlacovery of its Source. - Its now recognized Serlousness.In 18 ia Cesare Lombroso, the noted crluinolo. glat, " incurrel a great deal of odlum for a dis. covery which provel to be of muein scientific and economic Importance. He noted the fart that a large number of the inmates of asylums were suffering from pelligra, a curious disisume. whleh first affeeted tire skln and afterwards attackel the braln and nervous system. Lombroso discovered that the disorder was to be traced to a polson coutalned In diseased malze, which the Lombardlan landowners were in the hubit of doling out to the poor peasantry. At a time Wind toxins were unknown, Lombros, suc. eeeded in extractlng the polson from the nisize and liferting anlmals with it - quite in the manner of modern bacteriologists. Hisdiscovery was recelved with much derisiou; but a frimid of Lombroso, M. Alfred Manry, reportini the facts to Berthelot, the l'aristan chemist, who an aiysed the poison and estahlished the fact that the maize contained an injurious substance re. sembiing strychaine hut differing from it in im. portant particulars. The validit: of Lombrosi's diseovery was thus triumphanily estalhisheil He was not satistied wilth this lintial surcers. hut for several years fought on the platform and in the Press for an improvement in the eecnomie conditious of the peasantry wherehy the ravages of the dlsease nilght be combated In iate years bis work of agiution on the sub ject has been contlnued hy many others. The disease is of recognized serlonsncss in taly, France, aud iaterly in the Unlted states in Norember, 1009, the American Government appointed an ofliclal commission to Inventigate it.

Pure Food Laws: International Congresses. - The tirst Interaatlonal Congress fir discussion and actlon on the suhjeet of p bure Food was assemhied at Genera in 1stow, atmil at. tended by about 600 persons. The secomit was held at Paris in Octoher, 1000, and nuchl more largeiy attended.

United States: A. D. 1906. - Legislation at the end of a long struggle. - Bulletin No. 104 of the i3ureau of Chemistry, Department of Agriculture, entitled "Food Legisiation during the year ended June 30, 1906." Introduct: the text of Nationai and State faws enacted that year with the foilowiug remarks: "Fond legislatlon for the year ended July 1 , 1900, is the most important in the history of the Tuited States. A Federal pure-food bill in various furms has been before Congress continuously for mure than twenty years, and such a blll hecame a law on June 30, 1800. On the same day, as part of the appropriation bill of the Einited Nuit: Department of Agriculture, In the sectlons pmviding for the Bureau of Animal Industry, ini-
portant legislation was enacted wlth reficence

to the inspection of mest and meat food products."
The Federal Fond and Drugs Act of June 30. 1906, enacts in ita first sectlon "That it shall be unlawful for any person to manufacture witbin any Territory or the Distrlct of Cuinmbla any article of fooc. or drug wbich is adultcrated or mishranded, within tbe meaning of thls Aet; and any person who shall vlolate any of the provisions of thls section shali be gulity of mlsidemeanor, and for each offense shall, upon convictlon thereof, be fined not to exceed five hundred dollars or shall be sentenced to one year's lmpris. onment, or both such ine and imprisonment, in the diacretion of tbe court, and for each subuequent offense and conviction thereof shall be fned not less than one thousand dollars or sen. teneed to one rear's Imprisonment, or both sucb fine and imprisonment, in the discretion of the court."
The second section declares: "That the ininduction lnto ans State or Territory or the District of Colnmbia from any other siate or Territory or the District of Columbia, or from any foreign country, or shipment to any forpign country of any article of food or drugs which is adulterated or misbranded within the meaning of this Act is hereby prohlbited ": and penalties are prescribed for volations of the law, being a fine 1 ot exceeding $\$ 200$ for the first offense, and for the second offense a fine not to exceed sismo. orimprisonment not exceedlag one year, or both, in the liscretlon of the court.
tection 3 reals as follows: " That the Secrehary of the Treasurs, the Sicretary of Agriculture and the Serretary of Commerce and Labor shall make unlform rules and regnataions for carrying out the provitions of thls Act. inclutint tbe collection and examination of sperimens of fondsanil drugs mannfactured or offered for ale In the Dlstrict of Colimbia, or in any T itory of the United sitates, or which shali be . et for sale in unbrokrn pactages In any -wie other than that ln which they shall have tmen respertively manufactured or producel, or which sball br received from any forcign eonntry, or intenterl for shipment io any foreign country, or which may be subunited for exami. nstion by tbe chief bealth. forml, or drug officer of any state, Territory, or tbe District of Colum. bia, or at any domestic or forelgu port through which sucb product is offered for interstate commerce, or for export or import between the [uited states and any foreign port or country."
Section 4 prescribes the examination of speclmens of foul and drugs in the Bureau of Chem. listr, and section 5 relates to prosecutions for Finlation of the Act. Sections 6, 7, and 8 define allulteration and misbranding, as follows:
"Sec. 6. That tbe term 'drug.' as used ln this Act, shall include all medicines and preparations recognized in the CDited states Pharmaruprela or National Formulary for internal or exturnal use, and any substance or mixture of substances Intended to be uaed for the cure, mirigation, or prevention of disease of either man cr other anim' ls . The term 'frot.' as used berein, shall incluiie all articles used for food, drink. confectionery, or condiment by man or other animals, whether simple, mixedi. or cumpound.

- Sec. 7. That for the purposes of thle Act 30 ariticie sball be deemed to be adultereted
- In case of drugs :
- First. If, when a drug is sold under or by amme recognized in the United States Pharmacoporis or Siational Formulary, it difers from tbe standard of atrengtb, quality, or purlty, as determined log tbe test laid down lo the Linited Statea Pharniacopreia or Natlonal Formuiars official at the time of lnvestigation: Proviled. That no drug defined in the Cnited States Pharmacopreia or National Formulary shall be deemed to be adulterated under thls provision if the standard of strength, quality, or pirity be plainly stated upon the bottle, box, or other contalner thereof slthough the standard may difier from that determined hy the test laid down in the Unlted States Pharmacopcela or National Formulary.
" Srecond. If lts strength or purity fall helow the professed standard or ruality under wbich it is sold
- In the case of confectonery:
- If it contaln terra alha, barytes, talc, chrome yellow, or other mineral substance or poisonons color or flavor, or other illgradient dele cerious or detrimental to health, or any vinous, malt or spirltuous liquor or compound or narcotic drug.
-In the case of forml:
" First. If any substance has been mixed and packed with it so as to rembice or lower or injuriously affer its quaity or streugth.
"scond. If ans sitbstance ban been subst. tuted wholly or $\ln$ part for the article.
"Tbird. If any valnahle constluent of the article las been wholly or in part abstracted.
- Fourth. If it be inired, colorel, powdered, coateml. or stained in a manner wberehy damage or infrriority is concealed.
"Fifth. If It contain ang adrled poisono's or other alded drleterious Ineredicnt which may renter such article: injurious to health: Prurided. That when in the preparation of form proviucta for shipment they are preservet livany exturnal application applitel in such manner that the per. servative is necessarily remored mirhanica!ls, or be maceration in sater, of allerwise, and directions for the remoral of winl preservative shall be printed on the eorering of the package. the provisione of this Act shall be construed as applying ouly when said prolueta are ready for consimapthom
sixth. If it mosista in whole or in part of a filthy, ilecomposml. or putricl animal or regets. ble substance. wr any portion of an animai unfit for food. whether manufarmed or not, or if it is the prodict of a lisensed animal. or one that bas died otherwise than by slangliter.
"Sec. 8. Tlat ibe icm 'misbranded,' as used herein, shall apply to all druga, or articles of food, or artleles which entrr into the compnsltion of food, the package or label of which shall bear any statement, design. or device reçarding such article, or the ingrolienta or substances contained therein which shall be false or mis. lealing ln any particular, ant to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufartured or prolitced.

That for tbe purposes of this Act an article shall also be icemed to be misbranded:

- In case ut aruig
" Flrct. If it be an imitation of or offered for sale under the name of another article.
" Second. If tbe contents of the package as

## PUBLIC HEALTH

originally put up shall have iveen removed, in Whole or in part, and other contents shali have been piacedla such package, or if the pachage fnil to bear a statement on the lakell of the quantity or proportivu of any nleohol, morphine, opinm, cocaine, beroin, aipha or beta encaine, chloroform, cannahis indica, cluloral hydrate, or acetanlifue, or any derivative or preparatlon of any of auch substances contained therein.
" In the case of food:
" First. If it be an imitation of or offered for sale under the distinctive name of another article.
" Second. If it be labeled or hrandied so as to decelve or misicad the purcbaser, or purport to be a foreign produet when not so, or if the contents of the package as originaliy put up shali inuse inen removed in whole or in part and other contents shall have been pinced in such prackage or if it fult to bear a statement on the labei of the quantity or proportion of any morphine, opium, cocmine, heroin, aipha or beta enenine, chluroform. cannebis indica, ehioral hydrate, or acetanilide, or any derirative or preparation of any of such smbstances contained trarein.
'Third. if in package form, and the contents are stated in terms of weight or mensure, they ure not platuly and correctly stated on the out. stuc of the package.

Fourth If the package containing it or its label siaill beat any statenent. design, or device revanding the ingredients or the substances contained thrrein, which atatement, design, or teviee shall he faise or misleading in nay par. ticular: Prorided. That an artiele of fooni which dix's uot contain any nded poisonous or delete. rims ingredients siall not be deemedi to he andulterated or malsbranded in the following
cascs:

First. In the case of mistures or compounds Whith may he now or from time to time hereafter known as :trtieles of food. under their own dis. tinctive names, and not an imitation of or offered for sale undir the distinclive mane of another article: if the name be aecompanled on the same Thel or braml witb a stateuent of the place Where sald article has $\mathbf{b}$, nufactured or produced.
scond. In the casc of articies labeied, branderi, or tagred so as to piainiy indicate that thry are compounds, imitnthas, or biends, and the wonl ' compound.' ' Imitation,' or 'blend.' as the case mar he, is plainiy stated on the pack. are in which it is offered for sale: Prorided, That the term hlend as used herein sbali he construed to mean a mixture of like substances, not excluding harmiess coloring or flavoriag ingredients used for the purpoee of coloring and tiavoring onls : And prorited further. That unthing to this Act shall be construed as requiring or compeillng proprifors or manufacturirs of proprletary foods which contain no unw holesome ndded ingredient to disclose their trale formulas, exeept ia so far as the provi. sions of this Act may require to secure freedom from aciutteration or misbranding."

There was never a harder tight in Congress than that hy which this vietory was won, over kaverics that wore not ashameli io instit on their ripht to swindle and poison the public hy adultcruions and frauds. Nothing but a thor. oughly ronsed public feeling carried the nea-
sure through. The same feeiling impelied iocal legination to the sume end in thirty.two statem during 1406, and 100\%, all of which is sot fimb in the isulietin eited above and In anolher of the same series (No. 112), published in iwo parts in the foliowlog year.
iriting in Jnauary, 1900 , of what the l'ure $\therefore$ oud Law hati aecompisised, the Chairmat of dhe Food Committee of the National Consumatr Ieague, Alice likkey, said: "One of the trent important results of the l'ure Food Law is the awnkenlng of many consumers to thelf respon sihititles as buyers of forid producta. They are Wturiying labeis and huying foods accotdingly With an futcliigent consuming publie to pury chase goods, the l'nre food Law wili in tha, accomplisis lts fuli purpose. Perlapen no he't." phrase will theu be found to ticscribe it than the recent interance of the manager of ons: the most important food tirms in the country 'The I'ure Food Law,' he sald, 'passed by tiGovernnent, is the most important law eter passed by uny governmient.
United States: A. D. 1906. - The Pack. ing-Honse Investigation. - One of thr influ cuces which forced the passuge throuph (ion. gress of the pure food legislation of 1808 came from the revelations in a report laid buffre the Iresident on the 4th of June that year. ly two commissioners whom he had appointe to investigate the conditions cristing at the stock. yaris and packing houses of Chicngo. in ento municating tie report to Congress the I residens characterized its disclosines as revolline, and It is certaln that the winole public was sichened by the pictures it drew of reckless filthiness jrevailing in the establishments wbere meats were prepared for sate in the narkets of the conutry and of the worlid. We shall and at. tempt to reproduce thens here.
The most important part of the repmite con. cerned the existing methots of oticind inspec. tion of meats. The commissioners foum it most rigorous where it is ueeded icast, mamels. nt the time of killing. It was while the meat Was beiug handied, and especially iu its jrepa ratiou for canning, that it underweat the men: poilntion. The cans whieh received it buall were allowed to bear labels stating that "ibe conteluts of thls package have heen inapected acconiling to the Act of Congress of Miarib 3 1891. Qnality Guaranteed." As a matiof of fact. ali that bad heen inspected was the carca:s of the naimal at the time of kifling.
The further legisiation, respecting inspec. tions, which supplemented the lisw quoteif from above, was resisted with ail their power by the enormousiy rich meat-parking conpanles of the country, who found strong supporters in Congress, but they had to subnit to defeat.

The Sieeping Siekness in Afriea. --" The most formifulie enemy of hoth man and heast in trupical Africa is the tsetse, specius Ginastina,

Hes of thickly populated, fertile country near the shores of these lakew, untli the advent of this terribie plague the homen of a happy, con wated people, are now almost depopuiated, and houmands of littie vilisges have been swept way, thelr Johsbitants victlms of this deadly away

In appearance the tactee fy bears a remarkable reveruhiance to the ordlnary house dy, hut is slightly larzer, with ionger wings, which extead beyond its body and lap each other when at rest like the hiades of a pair of scissors. It is somber gray, neariy bisck in color. alnust like the boney-bee, and his a prominent proInsels ensheathed in the paipi witich projert lwizontally in front of its head. The abiomen is marked hy fo - distinct geilowish bands, with a paie spot over the upper segment. It is wonticrfully active, and evades every attempt at capture except in the cool of the morniag or evening, when its movements are siuggish and it can be eaught in the hand.

Sleeping slctness has been known In Sierra l.mpe, in the Congo, and on the west coast in Lfrica since the earilest history of those Lipils. In $180^{\circ} 0$ a fossil tsetse thy (Glomina mor. vitana) was discovered in Colorado, and the thenry has been adranced that the alosence of will horses on the Anterican continent was due to the ravages of the disease carried hy these thes.

The malaly was described as early as 1803 . and later most accurately by Livingstoae, the sreal missinary expiorer. He also advocated tw-nic In lis treatment. This remely, after half a rentury of rasearch and investigation, still retains its pir ce as the best one kaowu for probonging life.

Thi period of the incuhation of the disease after the bite of the infected ty varies from a uninth to serpral gears, depending upon the reiving power of the patient. In lis earlier stages the tirst notlcabie symptoms are Irregular ferer.

This stage may continue a year, or even ionger.
in the foliowing stage the symptoms are (1), the try paaosomes reaching the cerebrospinal filud, giving rise to cerchrai manifestations: drowsiness, stupor, dullness of hearing. slowness in perceptlon and of answering uuestions, whth Incapacity for mental exerifon, and sonnolence, the patient sometimes slerpins the entire day. This condition may contiann several years, during which tinue epileptiform conrulsinas develop, with marked tremulousness of the minseles of the face and tonguc, the pationt becomine mauiacal and the whole symp. tomatulogy resemhliag that of gencral paresis of the inssane.
i'revious to 1901 sieeplng sickncss was unknuw in Uganda. How the preseat epidemic oriziasted is not positiveiy known. The most sumerally accepted theory is that the soldiers of Emin Pasha and their followers introdnced it. ti whe ten thousand of them settled in Busoga after the Sudan campaign.

The duration of the sieeping sickness in man is very sariahle. Occasionaily cases linger six or cren eight jears, and until the expiration oi tibis periul they are eurstast fori of infec. tion.
'Recognizing the fatai nature of the disease, the rarious aations whose territories are most
verousiy aflected, dotahiy Engiand, Germany, ['ortugal, France. ani Helgium, appointed commissioners. with competent assistants, to ascertaln methods for ita controi. The enormous amount of investigation and reatarch accompllshed by these self-ascriticing mea, mong whom may he mentioned Brucp, Korh, IIolgen, Brovien, Tuilock, Kopke. Martin. Ilardy, and Kielse, two of whom forfeicel their ilves in the work, entities their names to be enroiled among the henefactors of manklatl." - Iouis L. Sea. man, The sleeping bichuess (The Outlook, Jan. 15. 1000 ).

Tabercuiosis: The Organized Warfare for its Eradication, - After the discovery of the all important fact that the most destroying of the diseases of the human race, tuberculosis (the ifread "consumption" of the oliler fashioned nomenciature of pathology), is in its nature one oo propagated from rictin to vlctim that the propagation is needless. and may ahsoluteiy be ended by right precautlons universally applied, there were ardent workers soon engaged in eager efforts to bring such measures into use. The heginnlig of a hupefuily inspired warfare audinst the disease detes, therufore, from the Wentificatlon of the bacillus of tuberculosis by 1)r. Robert Kioch. In $1 \times 82$; hitt, for nearly two decades after that inspiration it was iittie more than a guerriila undertaking. by sclentitically benevoient lndividuals and groups. here and there in the worli. It was uot until the lates years of the nigeteenth contury and the earllest of the twentleth that nure publie risings ap peared in the movement, and it began to ac yuire the momentum of a crusade.

Germany appears to bare been earllest In the fundimental organization of measires to instruct its peopie in the nature of the disease, anl in the means by which it may be stamped unt : as wedi as in the provision of special sana. toria and hospitals for the new open-air treatment of those attacked. But the Health De. partment of the City of New Jork has the credit of helng the tirst ofthcial body to bring the disease under ctheient miministrative control. On tilis subject IIr. ilermann M. Blges, in an address tielivereni. Fehruary 16, 1004, under the anspices of the Ifenry Phipps Iastitut and published in the tirst annual report of the Institute. ssial:
" Notwithstanding ali that has been salif and written. aotwithetanding the popular education ami agitation, notwithstandiug the formation of antituberculosis societies and antituberculosis leagues, aotwithstanding the organization of many associations for the erection of sanitoria, and the foundation of Institutlons for the study of tubercuiosis. not withvtanding the measures adopted for the preventlon of the disease in animals, stili only a very small perecatage of the governmentai. municipai and state sanltary authorities of this conntry. Great Britain and the Continent have adopted provisions whlch cin be regarded as in anyway comprehensive, or effective in dealing with this disease.
,- If we sect for an adequate expianation for this attitude. It is not, after ali, difficuit to tind. In spcaking of this matter several year aco, Kich said in suhstance to the writer: 'The adoption in Germany of such measures as are aiready in force ln New York City wili not be possible until the generation of medical men

## PUBLIC HEALTII

bow in control have pased away. Not until a ounger generation has appeared, which has bail a different scientific training, and holis view more in harmony with the known farta regarding the etiology of tuberculonis, witi it be powsihle in my opinion to hring about an intelif. gent supervixion of this disease.
, Notitlen. tion is a necegary preliminary to any pian of mupervision, and yet ondy five years ago a apecial conumission of the Acalemy of Medieine of Paris reported against a proposition to place tuber. culosis in the class of otitiabie daranes. Bir Richard Thorne, tue Medical Officer to the Locai Government Bonsd of Great Britain, in the Ilarben lecture in 1898 on 'The Aiministra. tive Control of Tuberculacis, after a carrful consideration of the varlous probicms presented under the Englishl law refating to infections diseases, pronounced definttely agalngt this propraition, on the ground that the hardslilp to the Indilidual, whicia would foliow notincation andi the enforcement of proper regulations, would be so great as to renuicr this measure unjustin. registration of all cases is essential. The funif. mental importance of this measure is so evidient that its consideration seems harily necessary. It must of course, appear at once that uniess there is a system of compuisory notifleation. andi registration, the enforcement of any uniform mensures for prevention is inpossihle. Practical experience with this procedure has minde it perfectiy clear that tbe objections which have theen urged againat it are without force or founda. tion.
"In Sew York City in 1893 a system of par. tially roluntnry nnd partiaify compulsory notiArntion was adopterl. Puhle institutions were requilred to report cases coming under their superrision: private plysicinns were reguested to do this. Luniur this provision the Depirtment of 1 lealth carrical on this work for thrce and a hnlf years, and then adopted in 1897 regulations requiring the notiticntion of all cases. mere fact of notification mere fuet of notification and registration has in iteelf a very potrerful educatlonal influenct. During the yenr 1 mo more tian sixteen thou. and cases were reported to the leparment of Ilealth in New york City, of which forty two hunifed were iuplicates, and in 19013 more than seventeen thousand casss were report od.
-To facilitate the early and definite diagnosis of all cases of pulmomary tuberculosis, the sauitary authorities shouhd afford facilities for then free bacteriological examination of the sputur in all instances of suspected discase. . . TI i)partment of Health of New Yors City pre vilerif facilitics for such examinations in $1 \times 94$, early in the history of its attempt to exercise rontrol orer the disease, and this procedure has proved of verf great value to the medicai profession, to the sick, and to the allthorifies. Frollowing the example of Now York Clty, other salitary authorilies have adopted nimilar measures. "' - i1. M. Biggs. The Administrative ConTrol of Tuherculonio (Firat Annual Report, Menry Phinps Institute. 1005).
In 1N9.i a Central Committee was organized in Germany to establish special honpitals for the disease.
In leigs the tirst Nationai Congrese for discussion and better organization of action relative to tuherculosis was heid at Paris, with some
attendance from outside of Pranco. The mecond
National Congrean was at Berlin in the follow. Ing year, with aimliar attendance fom otber countries, and the thind at Naples In 1900 . At the Naples Cor greas a "Central International Committet for the Prevention of Tubercuionla" was organized, and it held ite Arat Conference in Berlin, und ur the sumplees of the Cratral German Comm.ttee, in 1002. The sucreeding meetings of the Centrai International Conumit. tee were nt Pari, 1903. at Copenfiagen, 1904, at Paris agaln, 19\%4, and there, at that time, the Firat Internatlonal Congress on Tuberculosis was helid.
In 1801 the firat Nattonal Congreas in Great Britain for the discussion of Tulureulosis and for organizing preventive unde rakinge was held at landin. There were suliti to be thin fify sanitoria for its treatment in Germany : in France a dozen private and two puhlic instity. tions for the purpose; in France nad Helmium numiver of puhlie diapenaaries specially pro. vided for the diseaae. In that year the state of
New York male fis Arst New York made its frst appropriation for a Tuberenlosis Ilospliai In the Alimoulacks, sad a National Nanitarium Associntion at Turonto, Canalia, secured che site for a hospital.
In 1002, at the annuai mentin
In 1002, at the annuai meeting of the chnads Assuciation for the Prevention of Tuber ulosic. helli at Ottawa, Dr. A. 8. Knopf, of Netr Yirik, speaking of the progress of the anti tuberculo. sis morement, said of the United Sitates: "We have fut a few small soctetlea striving to do the same work youl are doing. They a re the l'ena. srivania, the Colorado, the Ollo, the Msine, the Minnesota and the Iilinois." Bresides these State Associations the spenker nientinneia few cities, - Baltimore, Buffalo and Erie Counts: C-reland, and St. Louls, - ns having wine or ganization for the work No national orcani. zation had yet heen formed. In this ypar. hom. ever, some advances of importance wifhin the Cuited States were begun. Ilenry Plifena, of New York. pledged the means for stypporting a free Clinic for Tuberculosia at Philadelphia. which expanded within a year into the ilenrs Phipps institute, founderl on the 1 st of $F$ i $b$. ruary and incorporateu September 1st, 1003, the purposes of which, as set forth in its charter. are: "The study of the eanse, treatment, and prevention of tiberculosis, and the dissenina on of knowledge on these subjects: the treat. int nnd the cure of consumptises:" fis henits to be "administered without regari to race, creed or color." In this year, too, an active educational work, by weekly free lectures in the Assemhly llail of the United Charities Buiiding. by distrihuting pamplulets, district norsing. itc., was opened hin the City of New York and conducted by a Committre for the Prevention of Tuberculosis. Mlassachusctts was now appropriating money for its second sanatil. rium. In Grat Britain, Sir Elward Caswil placed $£ 900,000$ at the disposai of the King Tuhercuios. 3 hospitals and Sanatoria.
The year 1903 witnessedi an important mee: ing at Paris of the Central Intermational Tuln: culosis Committee, which was stirred by an appeal from Casimir. Perier. ex. Presidont of France, for "a uobilization of all social forces against the derastating disease. The Government of Sweden instituted a free distribution of pamphlets on the suhject of Tuberculusis

In Great Britain a nathonal committee, representing ail Impurtint friendiy societien and trade unlons, wat formed promote the eatablishing of manstoria for to promotin In leiglum, Madame Itene Gaugo workers. is movernent for Open Ais Schouls. tarted the moverneat fubercuiotis fixhibition which st Baidmo whie Interest was arranged by a Commiasion appolated by the Governor of larviand in the prevlous yenr, in conperation sitli the Maryiami I'ublic Ilealth Asuctation. tiate and City organliations for dealing with the disease and for rilucating the people to a right undervanding of the means by which it mitht the stamperl out werc now aultiplyling raplidy throughout the Lnited Statem.
In 194 the Cnitm! States obtanned their arst compreleusive organlzation for the work. The Xational Associatun for stuly and l'revenilon of Tuberculonls was formed: a large nierting at Itantic C'ity in June, wilh Dr. Edward Tru* dean of Siarunac, founder of the suranac cot taze amutorla and pionecer in Anerica of the opunair tratment of the diseare, for its I'resi. drut, and Drs. Willian Usler. of Haltlmurc, ond Hrfuann N. IBggs fur Vice I'resifents. In 13oston, that year, no less than righty-ode free lectures ou Tubercuiosis were given In schnols, durches, sor'nl settlements, before trmi, unions and chahs, under the nuspices of tho If winn Asmelation, nnd 70,1 W0 instructlve lenf. lets rere distributed. In France a special Sodety for the Protection of Children from Ti. wreulosts was formed. The Garment makers fulon aud the Ty posraphleal Lnton of Sew Curk entered Jointly intis undertakings of edu cational worl amons thelr menivers, and the Cintral Federated Lnlon was smon ellisted with thwn. A Directory of [ustitutions ant surdeles deuling with Tuberculersis in the Unital states. published in January, 19is. de arribed $125 \%$ a existing luopitals and sanaturia in whic, unsumptives may recelve trent. unint, and 3 , pechal dispensaries: recounting, als, special measures for the trentinent of the diseasc in penal Institutions and hespitals fur the insanc.
The most important campaign of 100 i in the risale, within the American tield. was probaby thit ronnected with the great Tuberculosis kxposition in Jew lor. City, prepared and (mblucted by the Intional Assoctution, in co. niw ration with the Committee of the New York (haritr Organization Society. New Vork (ify. in this zear, approprinted $\$ 250,090$ for a Yinivipal Tuberculosis Hospital, located in the ("s vkill Jountains.

In 1908 a duplication of thr Tuberculosis T.rposition of the previous lbecmber la New lirk was carrfed, as a travelling exhibit, to dif. ferment parta of the clty, with lmpressive effict: and similar extulbits were given in cleven citles if the l'nited States. It was reported in thls ruar that abutt fifig local commis-ions and assudations were actively in operation in the (nitel States; and that the American Fetera. tho if Iator, as well as the American Felera. tion of Women's Clubs, were calisted with car nestuess In the work. The Fifth Internationa . nference was held this year at The IIaguc.
From this time the public awakening to recognition of the measureless importance and the inspiring hopefulness of the struggie to ex
unguish the deadiy "Tiulte plague" spread rapilly evrrywhere, and each year made incromalug recorcis of galas in the work and te eflects. Fourten of the Americen states Fere reported in 100 as having fultaded state lus ittals for the difense, mupported from public funds, while mansure were in progrese in that end In a nuabler of riber States.

In 1m0 a most rowirful impulse to the eruunke in Amerion was Ir.iparted by the nuecting at Wahluston, that yeur, of the International Congrets ou Tuberculf wh, with of larige attend. ance of the: mont disthigusherl captuins of the Warfare from nhroan. T'be lowal lntwrest wroused was besond expectation is one writer ile scriberl the nuectines of the seven ancthas of the

## RACE PROBLEMS.

In Australia: Between Europeans and Asiatics. - "Anstralla oceuples a unigue posithon anong the nations. It is an lshaud, lying far from the populated eantres of the old Worid and ln elose proximity tu Java and the teeming millions of Southern and Eastern Asia. who at any time may bear down lu thond noon the scauty forces of the defeuders. These pent up myriads are at present lu a state of morest. and there are evillences of a distinet iaclination on their part to break bonuds mut descent upon the eoasts of the great somthern land. On tlie north eastern shores of the continunt they have alrenty broken through the thln red line of the British, and have timuly established themselves in the country bevond. Thurslay lsland, wheh stands at the northern eutrnuce of the passage between the Great Barrier Reef and the shores of Queenslamal. has been styled the Gibraltar of Austrath, anil large smins of money have beet spent ly the Impurial and Australlan Governments in fortifyhg it. Siner it hreanm open to the Eastern nathons, the Jupanese have dis covered twenty different chanuels throurh the reef, by any one of whleh they coull a voin the forts and guin an entrance to the sea withly the barrier. A few rears nge there were 2000 Europerans on Thursiay Ishand, cugaged in the pert-ghelling industry; but they were gradually elbowed out uatil to-day they number less than 100.

The late Professor C. II. Pearson, ut one tinw Dlinister for Fihunthoin Victoria, and one of the most lntelfectinl statesmen who ever re shled lin Anstralla. in his Sintional life and Charneter, mimirably summarisel the dangers to which his adopted ennutry was exposed by remson of l:s situation, and the motives which actuated the various colonial Govermments in pussing enatiments tesigned to place some re striction on the wholesale floodlug of their terri torlis.

The fear of Chluese immlgration whieh the Australlan demecracy cherishes, and whteh Ene. llshmen at liono ind it hari to molerstand la In faet, the instlnet of self preservatlou, qulek. ened by experience. We know that coloured and white labour caanot exlst slde by side: we are
well aware that China cau swamp us with asin. gle year's surplus of population; and we know that if nathoul existonce is sacritieed to the working of a few mines and sugar plantutions It is not the Euglishmen in Australlit aheme, but the whole elvilised world that will be the liaers. Trausform the northern half of our contibent into a Nistal, with thirteen out of fonria it lelonging to an Inferior race, and the witherm half will speedily approximate to the condition of Cape Colony, where the whites are ind masterful ninority, bit still onls as one ln wher. We are guanllng the last part if the world in which the higher races can live aul inernase freely for the higher eivilisation. It is idle to suy that if all this slound eomer to miss whr pride of place will not be humillated. We are struggllag among ourselves for suprimisy la u world whith we thought is desthed to hilung to the Aryan race and to the Christian faith. to the letters and arts and charm of social manmers which we have inherited from the hest times of the past. Wr shall wake to find onralies -lbowed and hasted, perhaps even thrust oside by peoples whum we looked down upon as st -vile and thonght of as bonnd always to minlater to our needs.

- The Greater Britaln that la to lee hay be the best security for the Blother land in yiars to eouse, and her natural ully and friend. . Isira. lian statesmen elaim that they are nut oult sifeguariing I3ritish interests, but also leginlating for posterity and looking forwarl to thi timeprohaps a cintury hence - when the pmpulation of the Commonwealth may be one huldred mil. lions or even more
"At the prosent the Australian race is in a plastle conditlon, and whether it will briome, as Marcus Clarke predieted, a tierce and turbulent temorracy, swerplag contemporiry aivIllsathou lefore it, or, as seems more prubible, a practicul and enllghtened people, troubles it little. Leaders and followers of every polithcal cast. Conservatives, liberals, and Radicals. have now lut one natlonal Ideal - Purity of Race. They recognlse that hybrids cuinot make a great natlon; that an infusiou of Chi nese, Japanese, or Indo-Chinese hlood must re-

## RACE PROBLEMS

## RACE PROBLEMS

sult in race deterioration; and that, If they are to live happliy and prosperousiy, it must be wih no strangers withln their gates other than thuse of Caucasian descent who are ahie to con form to the condlitions and customs of civillsed conmunities."-O. P. Law, W. T. Glli, A W'hito Australia (Nineteenth Century, Jan., 1904).
"The great Australian Commonwealth has Indeed gone very far la many directlons in lts wiar against workers of other races than the white. Thus, no contract can be madc for the carrying of Australlan malis with any steamahip line which allowa a colored man to work on any of its shlps. This ls a new measure, and lt has been of late the subject of a lively cuntroversy between the Australian goverument and the two Chamberiains in London. uanely, Dr. Joscph Chamberiain, the colonlai secretary, and his son, Mr. Austln Chamberlain, who is now serving as Britlsh postmatergencral.

The fact ls that mail-carrying steamship cmpanies which havc hitherto performed the scrice of carrying mails back and forth be tween Grcat Britaiu nnt the Australian ports have been largely manned by dark-stinncel British suhjects who are uatives of ludia, and the British Goverument is under a special obli "ation not to discriminatc against these Indians in riew of certaln clanses in what is known as the Ilutiny Act in Indin. These same ships, it is to be remembered, wili carry, also, the Imian mails, and it would be manifestly impossible for lord Curzou's government of India to join in mall coutracts contuiuing clauses exciuding dark-skinued men from emplormeut." - 1 m . Reriect of Reviens, Lept, 1903.
ree, aiso (in thls vol.), Acetrabifa: A. D. $190 j-1906$, and 1009 .
In Canada: Hostility to Asiatic Labor. Restriction of Chinese 1 mmig ration. - Riotous attacks on Japanese, Chinese, and Hindu Laborers in British Columhia. - The oppest. tion of orgnuizal lator to Asiatic Immigration, on the Canalian Pacitic (iwnst. tirected first against an influx of Chinese, brought about, in 1404. the imposition of $a$ head-tax of $\$ 500$ on every persen of ('hinese origiu cutering Canada thercafter, with the following exceptions:
"(1) The menibers of the diphomatic corps, ,r other government representatives, their sultes and tiolir servants, and cousuls sud consular arents:
(b) The chikdren born in Capala of pmrents of Chinese origin and who have left Canada for 1. lucational or other purposes, on substautinting their identity to the satisfaction of the coutroiler at the port or place where they seck to euter on their return :
"(c) Dlerchants, their wires nad chllimen, the wives and childreu of elergymen, tourists, men of scieuce and students. Who shall substantiate their staths to the satisfaction of the contrulier, s:bbject to the approvai of the Blinister, or who arre bearers of certificutes of lilentlty, or other sinilar docuinents lasued by the government or by a recognized ottheial or representative of the (h) wernment whose suhjects they are specifying thio ir tirenpatiou and their object in coming into Canada."
lhis was an effective restriction; hut left the duor opeu to other "coolic" iaborers, so-called,
from Japan and India, whence large numbers were soon coming lnto Britlsh Columbia, aud the labor agltat: - was drected against them, on the Canadian as well as the United States side of the linc in the farther Niorthwest. It came to its climax of vlolence lu the fali of 1407, when serious riots broke out at Vancouver, British Columhia, and at Bellingham, in the State of Washlngton. Many Lumdreds of Japanese, Chincse, and Hindus had been employed in the iumber milis and canneries of the Washington and Britlsh Columhla coust towns, displacing white labor. "In rach case a moh of white men ralded the mills wnere the foreighers ware em. ployed, battered down the dunrs of their lodging houses, dragged the llindus from tlielr beds, and drove them with violence from the town. The Hindus of Bellinglam tied northward to the prowetion of the British flag. At Van. couver the rloters also attacked Culnese and Japanese merchants and laborers, hreaking lnto thelr shops and plilaging and lestroylug 8:20,000 worth of property. Two thousand Chincse aud Japanese were driven from their homes. Later, a number of Japanese Immigrants, just lauded from a stcamer, were attacked and in the riot that followed l3aron Ishil, (thief of the Japmese Bureau of Foreign Commerec, wha sceers! y injured. The Orieutais, nuter the lendershlp of the Japanese, immediately organized for defeuse. snd, having secured tircarms and nther weapons, the situatlon took on a very serions aspect."
 ing to the British and Canadinu Gorernments by the relations of alliauce existiug between Great Britaiu and lapan, und hy the fact that the Hindus attacked arc l3ritish subjects, huving their estabilished rlghts as sich lint skllfil and carefui hamiling of the matter was suceessfut in The Jupanese Goveruuent, on its own part. hiss undertaken to restriet the emigration of lis laboring classes to Cauma as well as to the L"uited sintes.
important changes in the regulations governing the lmnigration of Chinese were announced in a despatch from Ottawa, July 11, 1009: "While the poll-tax of $£ 100$ on conites is retuined, the restrictions appliatible to st udents aud the sons of chluese merchants are cousinerably moditied. Situlents who alreidy possess a liberai oducatlon, but desire to pirsue a higher course of study in any Cauadian Culvirsity or college, are exempt from the tax. Stimlents who intend to pursme their sthities In the Dominion but are unable to proximee proof of their stitus on entry wre required to deposit the amonnt of the tax, but the moncy wlli be refunded on producthon of a certiticate that they have passid two scholustle yeurs at mome seat of lenrning. The present law promits all (hinese visiting Chins to return to Canada withln a year wlthnut a second parment. This has lwen a hardship to Chinese who have treen ill. The new regulation, therefore, (xteuts the time of exemption in such cases to 18 months, proviled that satiffactory proof be furnlshed."
In Jamaica: Between White and Biack: The Problem Non-existent. - Solved by Good Sense, Right Feeling, and ust Law. 1906, Professor lloyce reports of several pisita to Jamalca, - where 14,000 or 15,000 white inhshit.

## RACE PROBLEMS

ants are livizg with about 650,000 hlack and mulatto people, - that he had found no race prohiem exiating - no racisl antegonism - no public discussion of race equallty or superiority. He account for this untroubled relation hetween colored and uncolored fellow citizeas and neighlors as follows:
"When once the ad period of emanclpation and of subsequent occasional disorder was passed, the Englishman did In Jamaica what he has $s 0$ often and so well done eisewhere. IIe organlzed his coiony: he estahlished good local courts, which gained hy square treatment the confidence of the hiacks. The judges of such courts were Engilshmen. The Engilsh ruler also provided a good country constahu. lary, in which native hlacks also found service, and In which they could exercise authority over other hiacks. Black men, In other words, were trained, - under Engllsh management, of course, - to pollce hiack men. A sound civil service was also organlzed; and in that educated negroes found in due tlme thelr place, whlle the chlefs of each hranch of the service were and are, in the maln, Englishmen. The exclse and the heaith eervices, both of which are very highiy devcloped, have brought the law near to the life of the humhisat negro, In ways which he sometimes finds, of course, reatralning, hut which he also frequentiy finds beneficent. Hence, he is accustomed to the law; he sees Its ministers often, and often, too, 38 men of hls own race ; and in the maln he is fond of order, and respectful toward the estabished ways of society. Tbe Jamaica negro is descrihed hy those who know him as especiaily fond of bringing his petty quarrels and personal grievances into court. He ls itigious just as he is vivacious. But thls confidence in the iaw ls just what the courts have encouraged. That is one way, in fact, to deai wlth the too forward and strfdent negro. Encourage him to air his grievances In court, llsten to hlm patientiy, and finc him when he deserves fines. That la a truly English type of soclal pedagogy. It works in the direction of making the negro a consclous helper toward good tocial order.

Adminiatration, I say, has done the larger haif of the work of soivlng Jamaica's race proh. lem. Administration has flied the Island with good roads, has reduced to a minlmum the trop. cal diseases hy means of an exceilent healih service, has taught the population ioyaity and order, has led them some steps already on the long road 'up from slavery,' has given them, in many cases, the true self-rcspect of those who themselves offleialiy cooprrate $\ln$ the work of the iaw, and lt has done this without any such resuit as our Southern friends nowadays conceive when they think if what Is calied negro domination.' Admini... ion has ailayed ancient lrritations. It has gone far to offset the serions cconomic and tropiral trouhles from which Jamaica mean while suffers.
"Yes, the work has been done hy administratlon, - and hy retlcence. For the Engiishman, in his officiai and governmental dealliggs with backward peoples, has a great way of being su. perior whihout very often pubilciy saylng thst he Is superine. You rell know that in trailing. as an individuai, with other individuals trouble Is seldom madc hy the fact that you sre actuaily the superlor of another man in any respect.

## RACE PROBLEMS

The trouhle comes when you tell the other man too stridently that you are his superior. Be my superior, quietly, amply showing your auperf. ority in your deeds, and very likely I shall iove you for the very fact of your auperiorlty. For we all love our leadcrs. But tell me that I sm your inferior, and then perhapa I may grow boylah, and may throw tones. Weli, it is so with races. Grant, then, that yours is the superior race. Then you can afford to say ittle about that subject in your pubilc deailngs whith the backward race. Superiority is best shown hy good deeds and by few boasts.'
In South Africa: Between White and Black. - "The native popuiation of Africa soutl wh the Zambesl is ten mlliions. The white pcnulation is under one mlilion. To-isy tae majority of the natives are In a seml-sarsge conditlon. But the day may come when they whall have emerged from that conclition, sud have attained the degree of civilisation "hich prevalis amongat the negroes, their kindred, ln the Unlted States. The process of evolution has begun. When it la completed, the relative poaition of the hlack and white populations in South Africa will be-what? Look to the United States and you shall find some hint of the answer.
"The native populatlon of Cape Colony, in. ciluding the territories, is, in round numbers. $1,200,000$, and the white population 3:\%, (mo, Day by day the power of the native grows. The gate of the political arena stands wide open to him, and he is not slow to enter. With the exceptlon of natives occupying iands under tribal tenure (an important cxcejtion, but one that is constantly dlminishing), every maic person, Irrcspective of colvur, race, and creed, and above the age of twenty-one ycars, aud burn or naturalised a BrItish subject, is entitled to the fuil franchise after one year's residuce in the Colony, provideri he occupies property of the value of $75 \%$. or is $\ln$ receipt of wages of not less than 50 . annually, and is able to sign his name and state in wrltimg his address and occupstion. Such a franchise wouid ho -ify the arerage Americau in the siouth. aud unque'tionably it wiii have to be radiraliy anmerird unless the coionists are prepared to enture political aunihilation. At present neither Bondsman vor Progressive will free the sltuation. Nidher wislice to alicnate the substantial aid whicit big party gets from the natires.

- Mitter as the feud between Engishman and Dutchman is to-day, It will pass when butis reaiIse, as they are bound sooner or iater to realise, that only by presentligg a solitil front to the oncoming bordes of superficialiy civilisud biacks can tbey ecape complete annihidation. for generations. if not for ali tinse, tise uatives in South Africa uust enormously outaumber the whltes. In the oiden days, tribai wars nml wars wlth the white man, to say nothing of famines, anif pestilence, merved to counterhalnace the prollincness of the native. These rbecks are no more" - Roderick Jones, The Black Peril in South Alricn (Nineteenth Century, Jay. 1014).

## RACE PROBLEMS

## RACE PROBLEMS

has many troubiesome proh'sms to deal with as the concequence of its having drawn the reins of it covereignty over the necke of a mot ley muititude of races; but none among them, perhaps, has been more deilicateiy difficuit than one which arome between its native suhjects in India, who pressed with eagerness into South African tleids of trade, and its Boer suhjects in South Africa, who have heen stubborniy opposed to their doing so. Great Britain has had the most pressing reasons for avolding offence to either of these peoplen, and no controversy could have arisen more unfortunateiy in its clrcumstances and time.
Before the Boer. British War, there had been Indian complaints of iil-treatment in the Transvalal, which added something to the controversies of Great Britain with the South African Republic. After the war, when i3ritish author. lty bad become supreme at Pretoria, it found a legacy of existing law which was embarrassing at once. The situation was described in a de. spatch of Say 11. 1903, from Viscount Mliner, the British IIIgh Commlsstoner, to the Coloniai Secretary at London, Mr. Chamberialn, in which he attempted to exhihit, as he sali, "the diff. culty which besets uny kind of action on this thorny question." The Government, he wrote. is " between two fires. On the one hand, it is gecused of not enforcing the present iaw with suthicicnt strictness and is ealled upon to iegis. late ia the direction of a complete exclusion of A-iatics, except as indenturedi labourers. Even in that capacity, their introduction meets with trenious opposition. On the other liand, the Aciatics, of whom Britislı Inclians form by far the most numerous section, not only protest sgilnst any fresh legislation but demand the rupal of the existing law

- The position which the Government of the Transvaal have taken up in the matter is one of which I entlrig approve. They are unwilling, without the previous approval of Hls Siajesty's Government, to emhark on any legislation on this subject, to the difficulties of which they are fully aide, and have nccordingly decideri that, pending iresh legislatlon, they have no opthon but to carry out the existing law. They
anxlous, however, to do so in the manner lust considerate to the Indians aiready settled in the country, and with the greatest regject for vested interests, even where these have heen slowed to spring up contrary to law. This is ia accordance wilth the principle on which they hare proceeded throughout, namely, that the laws of the iate Repuhlic, imprerfect as thet are In many respects, nud contrary, very often, to British ideas, must, nevertheless, be enforced untlit they can be replaced by more satisfactory legislation."

The desired new legislation on this "thorny question" does not seem to have been stLimpted during the perioi in which local seifgovernment in the Transvani was entirely sus. Fended: but in 1906. after the first step toward ien restoration had been taken, the semi-antonomous authority then organlzed thirre adopted an ordinance on the sulhject of Asiatic residence in the Colony which Lord Elgin, who liad suc cemed Dir. Chamberlain in the Colonial Office disapproved. In the next year, however. when the fuli measure of colonial autonomy had been conferred by the Imperiai Government (see, in
thls voi., Soutr Arrica: A. D. 1905-1907), ese sentialiy the same provisions were embodied in an enactment by the new Transvaal Legislature, entitled "The Asiatic Law Amendment Act, 1007," and Lord Elgin could not venture to disapprove them agaln, for the reasons which he stated thus to the Coloniai Governor:
"The Act which is now suhmitted has behind it a very different weight of authority. It has heen introduced hy the first responsible Ministry of the Coiony, and has been passed unanimousiy by both Houses of the new Legisiature. I consider it my duty to place it on record that Ills Majesty's Government do not conslder the position of Asiatics lawiully resident in the Transvaal, as settled by thls Act, to be satisfactery; that they adhere to the opinlons which liave been expressed by successive Secretaries of State as to the desirability of relaxiug the restrictions to which Aslatics are at present suhject ; and that they comment this view to the Transvasl Government in the hope that it may be carefully considered how far prac tical effect can be given to It. But they fecil that they would not he justified in offering resistance to the general will of the Colony cleariy expressed by its first elected representatives; and I have accordingiy to inform you that Ilis Jinjeaty will not he advised to exercise his power of tisailowance with respect to the Act."

This measure was foliowed presently by an "Immigrants' Restriction Act, 1907," which accentuated still further the inhospitality of Transvani iegislation, and made more serions trouble for the British Government, not Guly with its Indlan subjects, hut with the Chinese. ()n the effect of the two acts upon Britishi in. dians Lord Elgin wrote to Mir. Morley, Secretary of State for Inclia (Oct. 10, 190\%):
"The practical effect of Section" (4) will be to prevent the further immigration into the Transvanl of British Indians or other Asiatics. As Mr. Jioriey is aware, thronghont the corzespondence which has passed on this subject, Ilis Majesty's Governnient have practically limited themselves to endearouring to secure nore favournble treatuent for those Asiatiss who have alrendy acquired a right to resitic in the Colony. and the competence of the Colonial Legislature and Governmeat to restrict further immigration by means of legislation similar to that already adopteri in other self-governing Coionles has not been disputed. . . . Moreover, in the interests of Britlsh Indian? themselves, it is probably deslable, in view of the state of Coloniai feellng, that further inmigration should be restricted. Lord Elgin does not, therefore, ןropuse to raise any ohjection to this provision.

- Bection 6 (r) must be considerad in connec. tion with the recent Asiatic Law mmendment Act. Under that ict, Asiatics failing to register may be ordered to leave :he Colony; and failure to comply with such an order is punishabie hy imprisonment. The object of this section, as explnined by the Attorney-General in his report is to enabie the Government to depurt. in lieu of imprisoning. Asiatics who fall no register under the Asiatic Iaw Amendment Act. While Lard Figin fecls thint the free exercise of so dmatic a proxer would be greatly to be deprecated. he doubts whether His Majesty Government can consistently object to a provi. sion the ohject of which is to enahic the Colonial

## race problems

Goverament to enforce the observance of the Aalatic Law Amemiment Act, whleh IIls Majesty's Government have allowed to hecome law, and to which the British Indlan community appears at present to be disposed to offer an organised resistance. Ile therefore proposes, subject to any representathou which DIr. Morley may wlsh to make, to accept thls provision also."

The India Oftiee conld only say in reply :
" Siuce the Asiatle Law Anendment Aet, 1007, has recelved Ills Majesty's sanctlon, Mr. Morley recognlaes that it would be ineonslstent to object wa clanse framed merely in onter to cusure the efllctent alministration of that Act so far as it affects persons already in the Transval.

It is irne that under the Aslatic Law Amendment Aet of $190 \%$, the Colonial Govern. ment may grant tumporar permits. Mr. Mor. Iey presumes that this power will, if the cecrasion arise, be uscd to prevint such a gross scandal as the exchision from the Colony of ruling ehiefs, Indians of distlngulshed position, and high ofllclals of Ashatie descont on the ground that they are 'undesirable tmmigrants.' But he thinks that it would be satlsfactory to ohtain a definlte assurance wat in framing the present Bill the Coloulal Guvernment had no lntention of refiss. Ing access to Aslaties of this trpe, and he trusts that such an assurance will be obtainell and placed on rreord before the Royal Assent is given to the measure.
" It is unnecresary tu point out to Lord Elphir the unfortunate effect upon pubie opinion in In lin which must be proluced by the present Bill, 'The very peculiar elreumstaneer of the Trausvanl hare been lield to justify, during the perlal of alnalnistrative reconstruction, exerp. tional measures fur leuling with the liflux of Immigrants: bit Mi: Norley did not under. stand, wher the provisions of the Asiatle Larw Amendment Act were under disensslon. that the fortheoning Immigration I icstriction Bill would be so framed as to perpetuate the exelusion from the Colony of all future Asiatle immigrants without distinction.

For these reasons I an to sar that Mr. Morley trists that Lorl Elghn whll time it posslbie to lmpress num the Government of the Transval the very strong oinjertions, from an Imperial point of vicw, whichstand hin the way of the acceptance of Sertlon 2 (4) of the I3the."

The most obuoxious features of the two offenslve acts were an elucational quallicathon, which reyulred applicentions for admission to the eol. ony and for tradiug liceuses $\ln \mid t$, and other eonnected documents, to be written by the applican!s in a Eiropean language, Viddlsh heing recognized as Furopean, aud a prescriburl rogistration which requirel finger prints as a me:ans of identification. Both of these prorisions of law were felt to be lnsulting and deerading by the Ilindine of the better class, whurrunlzil a refisal of submisiloc to them, and texted them whithot avall in the courts. Thelr languge was treated eontcniptuously in the educational qualticatlon, whlle, personally, they werc classed whth erlminals by the finger. print Identlficntion. The ngltators of dlenflee. ion in Inflia made minch of thifer Indignltles, Efrut the matter wias extremely embarrasslag to the lhritish alministralon there. For months there seemed no prospect of a solution of the diff.
culty; but patient persuasion and tactinl pres aure brought, at last, what appeared to he auccessful compromite, annonneed to the rejoicing Colonial (Otilee at London hy the following telegrain from the Governor, January 30. 1008: "Gandhl and other Iealers of Indlan and Chi. nese communltles have offered vohutary recls tration in a body whthin three monthe, provided slgnatures only are taken of educated, prop: tied, or well known Aslatles, mil finger prints of the rest, aird that no question agalnst which Aslatien have relighous objection he pressed. Governnient have aceepted thls offer ant under. taken pending registration not to aforce the peualties under Aet against all those who regis tor. Sentences of all Aslatles in prison will be remitted to morrow. Thls course agreed to br both polltical partles."

Fresh discontents arose subsequently, when amendatory legislation was brought out, which did not open the colony to any fresh lmmigration of Asiaties, even if they could pass an educathonal test lna European language ; but this has not appeared to have any of the seriousness of the former ugltation, so far as India ls concerned.

Of the intensitr of feellng In India, a newspaper corrisjondent, writilig from llombay, lee. 29, 1904, sadd: "There is no mistaking the llopth of feeling regariling the protest azaitust the treatment of Indians in the Transval, Frery lndian, no matter what may be his politios, fecls that hls self respect is innatimi. and demands retallation by refusing halelaturel labour to Natal. Extraordinary scenes followed Mr. Sitreudranath Banerjue's ajpeal for funds for the Transvaal sufferers; jeweis and muner were thrown at hls feet and rupees were junteil into hils hat. A thousand ponuds was collecied The question ls creating profound feeling among all classen."
The Labor Question as a Race Question. - At a nectling of the Nintive lalkor Aswilation al lohannesburg. In April, 14ny. the l're si lent of the Assuciation stated that the jresera? habor supply was entlrely mbeguate, atial that the mines were uot likely to be fured with seri ous diflieulty in this respert in the inmmediate firtare. In the course if 1 gios the numiner of Chinese laborers had decrased in the natimal course hy repatriathon by 23.303. On the otipr hand. the mative complencut has haremeal in the sante perlex by 47,766, givhg a wet gain of 24.373, which had been further incremsed dur. ling the first three months of the prewnt y rar. In explanation of the sudilen expmanom of the matle labor supply. Mr. Perry pointed. firm, to the collapse of the dlaniond market; secomdy, to the emigratlou of Kutlirs from the (:ipe owing to fallure of cmployment there The De Ihers Mlnes, as he was ithle to show, were aetially employing 50,000 fewer hants than before, whleh, allowing for the differme in the periouls of contract, probably meant a cain to the Iland of at Ieast 25.000 . Einularly, Lhe natire statlatles publlshed by the Cupi (ior ernment Indicated an chormous llversiom if Inluurers to the Rand.

In January, 1000, the Iouton Times. rimer:
 1100 as havlug heen $820,957,610$, - an lintasce of $£ 2,553,872$ over $1900^{\circ}$, gave the foll wing statement of labor conditions at that time

## RACE PROBLEMS

## RACE PROBLEMS

"The lncrease ha been gradual and quite reg. ular, and may be experted to contlaue. The expansion in the goid production has resulted In the empinyment of nearly 1,400 more whltes :han were at work ln January, but coloured tabourers are some 4,000 less. The Increase in the number of natives employed in gold mines has been 24,000, while the compiement of Chinese coolies has been depleted by 20,000 . At the beginning of the year some 17,500 whites, 183 , 500 coloured, and 38,800 Cbinese were emplosed by gold mines; for October the figures read:Whites 18.300 , coloured 157,500 , and Chinese 14,30n. Native inbour is perhaps the one serious problem which whi place limltations on further expansion. Fow ol the Cbinese will be left by the end of $t$ : year, and they will all bave l-ft before the expiry of 1010. Natives, bowerer, are showing more tendency to work reqularly, and the hahit doubtiess whll grow. it is due to the Chinese to recognize that they hare been usefui workmen. for the improved efticlency of the coloured workman all round is ariply due to the exampie whicb they set the natlire."
in March, 1909, Colonei Seely, Linder Secretary for the Colnnies, In reply to questions in the jeritish IIouse of Commons. gave the follownz 认 igures: January, 190\%, Chinese employed, 33.56 ; whites emplored on gold mines, $17,8: 4$; Dermber, 1008 . Chinese employed, $12,2 \pi$; wh:tes empluyed on gold mines. 19, 84, m For Witwalersrand, taking natlves and Chlnege topether the numbers were:-January. 1907. It. 0 : $-:$ : Drcember, $1904,166,40 \overline{3}$. The corre. amoding tigures for whltes are:-January. 190\%. 17,195: 1hecember, 1904, 18,687.
A Johannesburg letter of July 29 to the Jondon Times reported a cbange in the situation, sarizg: "For the half-year upon which we hare just entered it requires no prophet to foretell s more rapid rate of progress. Which, howerne, mar to some extent be limited by a scarcity native labour, signs of which have begun is inom on the horizon. After 1 N months or incte of steady increase in the number of native labourers available for work in mines, an inctesse which more than counterbalancell the nathow of Chinese labour through repatriation, the peolufum has hegun to swing the other War, and alriady the pinch is beginning to mabe itself felt in certaln mines. During the - $24:$ : wo months the excess of tlme-expired naives and wastage over the number recruited ors bern more than 8000 and repatriated (huarse brings the total up to 10.0 on. Consilering bat thr total coloured labour force employed in the Wit watersrand was over 150.000 in A pril. hi: comparatively smal decline unler normal condidons shonld hardiy mak. itself felt at all. B't the conditions are not normal. An era of rpansion set in some 18 mont lis ago which has been steadily crowing, and which has called for an erer Increasing labour force and in the near $6 \cdot i$. re must require stlll more and more. How ins: demand is to be met is by no means clear."

The "Niagara Movement." - A Nationai Commitee for the Adrancement of the Negro

Race. - In July, 1905, a conference of colored men from North and South, moug whom Professor W. F. Burghardt Du Bois, of Atianta, appeared to be the leading spirit, was held at Buffaio, N. Y. Its cuscome was an organization whlch has taken the name of "The Nlagara Movement," anu which has had some growth. At the latest annual meeting of the organizatlon, In Sea Isle City, New Jersey, in August, $190 \%$, ten States were reported to be represeuted, and the total memberahip of the "Movement" was said to be three buadred, distributed in forty States. Its objects are Indicated in the follow. Ing passages from an Address which this meet$\operatorname{lng}$ aiopred:

For four years the Niagara Movement has struggied to make ten million Americans of negro descent cease from mere apoiogy and weak surrender to aggression, and take a frm, unfaltering stand for justlce, manhoorl, and selfassertion. We are accumulating property at a constantiy accelerating rate; we are rapidiy lowering our rate of illiteracy: but property and intelligence are of ifttie use uniess guided by the great lileals of freedom, justlce, and human brotherhood.

- As a partlal result of our cffort we are giad to note mong us increasing splritual unrest, stcraer impatlence with cowardice, and deeper determination to be men at any cost.
- That biack men ere lulierently lnierior to whites is a wide-spread lic which sclence tlatiy contradicts, and the attempt to submerge the colorell races is one with worll-old efforts of the wily to exploit the weak. We must, therefore, make common cause whth the oppressed and lown-trodden of all races and peoples: with our kindred of South Africa and the West Indies, with our fellows ln Mexico. Indln, and Ifussia, anil with the cause of the working classes every. where.
"On us rests to no littie degree the burden of the cause of Individual freciom, inman brotherhool, and unlversal peace in a day when America is forgetting her promise and destiny. Let us work on and never despair because pigmy volces are lond! praisink ili gotten wealth, blg guns, and humian degrifation. Thes but represent back eddies in the the of time."
l'rogramme of future work adupted lnchuded the publication of a series of small trarts and an almanac, the founding of a monthly pubiication, and the purchase of a permanent place of meeting where an annual Chantanqua will be heid.

A Conference of people of both races who are desiroth of orcanizing more effective endeavors to better the statis of the negro citizens of the Inlted Stitcs was held in New York in May, 1909. It adopteri a $r$ clution provilling for the "lacorporation of $n$ ional committee to be known as a commit: or the advancement of the negro race. to bris. that race from siavery to full citizenalip whit all the righes and privi. ieges appertaining theretn." and another resolution for a Comanittce of Forty charged with the organization of the national committee, with power to call the convention in 1910.

Among other resolutions discussed and adopted were the following:
"As first and immediate steps toward rem. edyinc . . . national wronge, so full of perifis for the whites as well as the blacks of all sections, we demand of Congress and the Erecutive:

## RACE PROBLEMS

## RACE PROBLEMS

"(1.) That the Constitution be atrictly enforced ant the civil rights guaranteed under the Forrteeuth Amendment be secured Impartialiy to all.
(2.) That there be equal educatlonal op. portunlties for all and in all the states, and that puhlle achool expenditure be the same for the negro and $n$...te chlld.
" (8) That in secordance with the Fifteenth Amendment the right of the negro to the bal. lot on the ame terms as other citizens be recog. nized in every part of the country."
Anti-Negro Riot at Atlanta. - "On the
 riots broke out in Athata, resulting in the death of twelve or more negroes and the injury of a grent many. There had been an unusual number of reports of nttacks upon white women aud giris by hrutal and crimlunl negroes in the ricinly of Atlanta during the prevlous days natl weeks. Every report of thets kind lad been flaunted with great lepallines in a sensutional afternoon newspaper of Atlanta, as if to arouse the less onlerly und thonghtful elemeut of the white population not merely to the lyncling of offenders hitt to an attack upon innocent and law ahbllng colored people. For a tlme the riot was furions and negroes were Indiscriminately assailed. It would seen that most of those who were killed were absolutely Innocent of any of. fense whatsocver. Their crime consisted mercly In belonging to the negro race. It would be the beight of sullness for criticism to tiake on a grographical character. White people in the Xurth nre no more considerate of prople nyainst Whom they may hare a grle rance or a prijullce than nre white people in the Bonth. The problem of aljusting the relations of two races so totally diferent as the white race and the negro race where they hase to live together in the same communiti's is dilificult under uny circumstances, and it becomes increasharly so where the inferior race is present in darge numbers and where mane of its members are ill-lisciplined, lile, and of criminal listhets." - American lie ries of la rieme, Sor., 1906.

Wherever a eolored man was seen he was attacket. The mohs closed in upon the trilley. cars aul dragged the colored passengers, mprepared for the onstanght. from their sents. A rinous crowi broke into a shop where there wen two negro harlers, heat them to cleath and mangleal their bontles. One negro was killel in the shadow of a momment: another was stabled to lenth on the post-oftice steps. The Governor mobilizel the militia. lint the mobs, taking it for granted that the nullithmen were In sympaily whit them, showed little fear of the solliers. The Maror of the city remonstrated whth the rioters, but with Iltile resuit. Ile called out the fire department. Wlieh cleared the struets by turning the hose on the mobs. I3ut this only resulted in diverting the riot from one place in the city to another. Only a raln on Sumilay dampenel the arilor of the rloters. Or. ter was out wardly restored by sunday evening. but even therenftir negroes were killed. Eren thongh the riot differrel from the Russian varicty $\ln$ that lt was :"Ot ine:tgntril and ahetied by the Government nul the military, it brings nothing but shame to this Natlon." - The Out. Wer. . S.pt. 29. 18んR.
The Georgia Railroad Strike. - One of the
meaneat of recent exhlhitions of race animos. Ity was pretented in May and June, 1840 , on the occasion of a strike of white men eniploged as Aremen on the Georgla Itailroad agalnst the emplorment of blacks in the same eapacitr. Generally, the southern rallrouls have employed. for gears, both white ami black firemen. in the deorgla IRallroal there were about sistr of the former and forty of the iatter. The whike thremen were eligible to promotion to be engi neers: the blacks were not. By an unwritte law they were excluded from the higher and better puld service; but as fremen ther best among them had gradually won promotion to the better tralus ani better " runs 'on thir road It was this fuet which eaused the strike uf theis white ansorlatus. As a labor strike it would have cansell ilttle trouble: as a race ant culur queation it luthmet the state and the sonth. and disturbed the country at large for wereril weeks. The contlict of the rallroal emmpans wus not whit Its own emplogees but with mubs along its lue, always ready to be maldened by the thought of a uegro In any place which a white man wantect.
A medlation in tive matter underaken, at the iustance of 1'resident Taft. by the [nitul states Conimissloner of Lenlor, Inr. Charles 1'. Niill. and the Claalrman of tice Interstute commere Commission, Mr. Martin A. Knapp. sucientul. with mueb difficulty, in arranglige in refereme of the dispute to arbitration. The chosen arhis. trators were Illary A. Iferliert. namod by the railroad eompany. T. W. Ilarlwick. unmeil hr the emplayees, und Cbuncellor David © Bap row. of the Unlversity of Georgia. selected hy these two. This hoard of arbitration caw li, if. laga to both parties and rentered ito award uis the e7th of June. The main proposition s:b milted to It by the employees was in there worls: "That the Georpia Mailroal Conpats aud lis termbuals at A thanta will not use newte as licomotse firemen on the roat or in the yaris, nor as hostlers nor assistant hostless"
On this its decislon was ns follows. ." The Gentrla Ikailrond, when nsing nurcues as lew motive Hremen on the ronel or in the vanf. it as lustlers, or as hostimers' helpers. shall fay them the same wages as white men in smis liwitlons." Ihut the representntlee of the em phovees tissented from this decision in part. © piaining hals vicw, as followa: " In so far as the ubove findig permits the continuel employ ment of negro tiremen by the de-orgial hailroal I diseent tberefrom, lecintse I believi from th: evidence that such employment is a menace to the safetr of the traveillig publie. In sular as sure findlug requires thit when negrows are so emploved they slaall rective wages equai to thase phill white mell. 1 cowne therein. lleving that suel requircment, by remorbin the prinelpal Incentive for their empleymest, will result in the speedy elimination of thi- "terpr: labor, and a consequent loprovement of the ser:rice."
On most of the minor points in enatrorers the arbitrators were agreed in their conclusices and the settiement of the whole mater Wscempilete.

tpathy to Orlental iuborera there is a Juatitahie feeling. Where there is established a syitem of prouction. it is oniy just that it beneat not oniy the capitaliat hut also the laborer. If the Arner. can laborer must contend as best he can with the laborer whose standard ot life is lower, then the American manifacturer, in fairness, ought to be iet alone in his contest with the loreign manoufacturer who does not pay so much for his labor. The thuthok believes that a condition of such open competition as ina prevalted lut ween the States of the Enion would le whitesome bretween the nations of the worid. But at present the protective system prevails and apparently in frmig established in America. So lents, ther". pree, as American caplal is protecesti, it is a beseffit for the whole country to have Ameri. ican labor protecteri. And certainly if there is any houly of taturers a gainst which the working porile if America need protertion, it is the cos) fie lator of Asia. The fait that the Japane*: ami Chinse iaborers enter induatries in which there is a carcity of whites dows not affect the case. for it is not the direct loss of jobs, but the tow ering - n: at least the clanglige - of the ctand. ardy $n$ lifing that brings lnjury to the mass. - The Outlowif. preamble of the treaty negotiated next, hy Preailumt Angell, of Mchigan Univeraity, and other Commianioners, in 1860 . The reclial in that preambie of the purpose of the now agree. meat was this: "Wheras, in the eighth year of Hisen Frug. Anno Domini 1858, a treaty of peace and friendship was conciuded between the Cinited Statea of America and Cbina, and to Which were added, in tbe seventh year of Tung Chilh, Anno Domini 1868, certain supplement ary articlen to the edvantage of both partiea, which supplementary articles were to be perpetn. ally chorred ani abeyed; and Wbereas the Goverument of the Cilted States, hecause of the ennstantiy inereasing immigration of Cbinesc laborers to the territory of the United States. and the emburrassnients consequent upon ucb immigration, now desires to negotiate a modift. cation of the existing Treutien which shall not be in direet contrucention of their ginitt: Now. tberefore," de. The foilowing are the four articies of the trenty thus expluined:

Ahticle I. Whenever in tbe opinion of the Government of the C'nited states the eonning of C'ininese faborers to the U'nited States, or their residence thereln, affects or threatens to affect tbe interests of tbat country, or to endanger the goul onder of the sald commtry or of any loculity witbin the cerritory thereof, the Goveroment of Cbinu ngraes tbat the Government of the United Stater may reguiate, limit, or suspend sucit coming or residence, but may nut abswituly prohibit it. The limitation or magpelusinn whall be redemmble, and shall apply only to Chinese ucho may go to the l'nitel Situter ua luhurers, other elasses not being included in the limitations. Legisiation taken in regard to Chinese laborers will be of suefi a ciaracter oniy as is necessary to euforce tbe regniation. fimitation, or suspension of immigration, and immigrauts shnil not he subjeet to personai maltreatment or ahmec.
"Article 11. Chinese subjects, whether proceeding to the l'nited States as tenehers. students, merrhants or from curfosity. togetiner with timer bexly and household servimes, and Chinese fatmercy who are now in the lnited States alath be allonred to go and mome of their enen free will and accord, and shall be accorded all the righte, pricikges, illmunities, and esemp. tions which are wermindel to the citizens aul nub. jects of the mest farmed uation.

Aisticles IIt. If C'hinese inborers, or Chinese of any other elass. nuw eitiler permanentiy or temporialily residing in the territory of the Cnited states, meet with ilitreatment at ti.e hands of any otber persons, the Government of the Inited states wiil exert ail its powir to devise measures for their protection and to secure to them the sane rigits, privileges, immunities. and exemptions na maty be chloged by the eitizens or sabjectso of the rems favored nation, and to whicit they are entitl , 'y treaty.
"Anticle: il. The Lagh contracting poners baving agreed upon the foregoing artictes. whenever the Goverament of the Cnited States shali alopt inglsiative mensures in accoriance therewith. such measnres wili be communicated to the Gorerament of China. If the measures as enacted are fund to work hardship upon the subjects of Cblna, the Cbinese minister at Waabington mar bring the matter to tbe notirc of the Secretary of siate of the Caited stites,

Who will conslder the gubject with him; and the Chinenc Foreign Omce may alou hring the matter to the notice of the Unfied states nining ter at Peking and consider the subject with bim, to the ond that mutual and unquailted henedt may reault.
This is the latest of the stifl ohligatory ea. gagemeata by treaty that bear on tbe edmissing of visitorn or immigrants froni Cbina to the United states. A fourth treaty, pressed on the Chinese Government in 1894. permitted the United Statee, during a perioi of ten years, to prohihit entircly the coming of Chinese lator ers within Its territory; hut the concluding ar. ticle of tbat treaty was as foliowa: "This con. vention ahall remain in force for a period of tea years beginning witb the date of the exchange of ratificatons, and. If aix monthis befire the expiration of sadd perfod of ten years, nether Government alail have formnily given notice of fts final rermination to the other, it shnil remain in fuii force for another like perionl of ten years." The Chinese Governmeat did girc the formal notice of termination within the stipu. lated time, and tbe treaty hecame void on the 7tit of December, 100:
lience the Government of the l'nited States is now under tbe engagements whieh it made witb the Government of China in 1830, which Incinded an engagement to be faitifinl to the hospitable spirit of tbe compact of 186 N . Wha one has fooked orct those engagements of 0.1 tional tionor, it seems hard to harmonlze tiem in spirti, or even in letter, with some of the et. actments wbich are regulating, at tbe prese..: day, the treatment of people from China a 1.0 venture to approach tbe entry ports of li.e l'nited States. Sueb, for exaniple, as the fillowing, from othe Act of May 6 , 185 : : amended and added to by the Act of Juiy $\mathrm{j}_{1}$ 1884," which, accoriing to a recent offielai pul lication of "Laws and Resulations governing tbe Admission of Chinesc," was "contiauti in Porce for an additional period of ten years from May 5, 1892, by the act of Miny 5, 1892. and was. witir uli laws on this subjeet in force no 1 pril 29, 1002, rectacted, extendied. ond enntim. ued witbout modification, ifmitation, or enerdition thy the act of A prif 29. 1902, as ameadtd by the aet of Aprii 27, 1904":
" Be it enacter by the senate and 1 olse of Represcutatives of the V'nited states of America in Congress assemhied, Tiat from and after the passage of this act, and watil the expiration of ten gears next after the passage of this act, the coming of Chinese laborers to the l'nited sistes be, and the same is iferebs suspeuded. and itur ing sucb suspension it siall not le iaw ful ': any Cbinese laborer to come from any for, a port or place. or having on come to rec... is within the l'nited Staten.'

## RACE PROBLEMS

Fromelaro suthutiles In Califorala the San Frandero Nchond liuwal recelved at once the credit of beruie ifefone of the priaclple of atate movereignty. lixpersminn of cho mme sentianent is Coagren was fommedite and direct,

Ferly $\ln$ IMn7, I'resident loonevelt Invited the Nan Francluo Raarl of Fiducntion to come o) Wianhingtou. This invitation wus accepted, and the Ikard, accompanied by the Mayor of Nan F'ruacico, Journeyed acrupur the continent. geveral confercuces were helf, and after their return to San Francioro, puilie atatements of resuits were nade buth by the Roant of Fiduca. tion and by the Mayor. On Murch 18, 1007. the offeuding realution of the previous (heteber waw repealed.

The action of the Nan Frandico authorties aroumerl very geweral comment throughout the country. The actilal facts in regarl to the Japnatee in the achools were not Inguirmilintes by the San Franciow prean, un in fact were they accurately known at the time even to chool auth rities of the city. The exart were publimbed by The Outhook on June 1 , from accurate lnveatigation on the gi noos: The Superiateadcut of Hehools had fo 1 is the main reeson for eegrigation, the cent. of the Japanese puplls were you and ' we object to an adult Jopanem' ait alde a twelve ycar oitl girl.' The fa. that va December 8, 1906, in all echoole vi pri taary and granumar graci. there wan on enroli ment of 38,734 puptls. (of thetor there were 13 datuar*e, nearly one-tilirl of whom were burn in rise CIniterl sintes. There were 28 girle and 6i) hoys. Of the 63 boys 84 were unier in ycars of age, and of the remaining 81 only a were 20 yenrs. 93 of the bugs over is yeara were In the grammar grailes. leaving hut 6 to Justify the objcction of aduits 'liting beside chililren of tender yeurs. The conciuston of the Outhook inquiry was that there was nothing In the stimition that could not have bren met by simpler remodies thon the atlempted segre. gition, and that the underiylng mutive in the whale matier nan a desire to win the political support of the labor unlons.

The creat tre in Nan Francleco in 1000 drove the Ispancse from thelr estahished quar. ters. Their attempts to pain new iocations in distrirts previously occupied wholly by white reaidents tenieri to draw attention to them. For a time the policing of the cily was Inade. yuatc, amd cases of boxily plolence towned Jspanese were not infrequent. Anything like organl/ed action took the forin of boycoits directed agninut Japanese restaurants that wrapiat white patronnce and subsequentiy agaiust the Japanese laundiries.

- The hienniai sessions of the legisiature since 1005 havis regularly furnlshed a large -uppiy of anti Japnnese recolutions and bills. intrimuced for effert and widhout sufficlent suppurt for enactment. Ilowerir. in 1903 legisha. thon was uttempted looking towarl prohibiting Japanesc from becoming owaces of real property. It was oniy the strenuous protests of President Ifoosevelt actively aupporked by the governor of the state that prevented for this session the chactucat of sume such measure. The legisiature inaliy contented itseif with making an appropriatiou for a state census of Japanese.
"This eensus wes intrusterl to the niato erm mishluer of labor, and haw (July, luw in progreas. It may be regarded as a itep how ard an authorliative is quiry an to fucta upon whit Lster action may be buset, If dermeal necesary
"The Japanese on the I'meitic Cemast bsio formily exerciso muat enmmandeble self retralat, and their olliciais take mivantaste of * very opportunity to dispiay s spirit of friond linesa, this is lfiustrated by Ilverni coutribu. tions to the city's fund for the entertninniem? of the allors of the Ailantic Firet during ita viatt h Sen Franciaco in Jiay, 100 s , and by mu inei tation ertended ly the Chambers of Conmerce of the large cities of Japan In July, isins. कi almiliar bodies in the Incific Const staten i, visit Jupan as guests of the country. Thie invita tion was screpted by numerous commerital representativen of the citlen from lom Aumples Borthward to Seattle." - Freierlek II. fina Ilead of 1 lintory Dept. . Lowell Illgit schowi, §an Firanclaco.
The treaty right and state. right questions in ve'venl in the controverny were nout perfectly clarithefi hy Sucrutary of Mtate lioot, In an al. dr. - before the tirat annual nueeting of the Siuerican Roclety of Internut ional law. at || sht. iugton, In $\triangle$ prif, 190\%. It had beren as. itomd. ie said, " that In makiace and asserting the raifi. ity of the treaty of letutine Liniteil sitate- was anserting the right tu eompel the state of (a): fornia to almit Japmese children io lia achonls No such queathon involved. That troaty thit not by any pradhie construction asmet thi. authority of the Cnited sistes to compal any sitste to majntain puhilc echoola or to extenit the privileges of lts puhtle whimels to fapance: chidren or to the children of nuy uilen restents. The treaty did assert the righit of thif [nised States, by treaty, to assure to the rlticens of a foreign nation residing in Aumerlint s-rtit.ary equiliey of treatment with the cliter as I othe? fureipn natioum. so that, if any sitatr chows to extend pirileges to allen resiniato av-in an to citizen reshlents the state will be fir. ma by the appllastlon of the treaty to discran $8^{\prime}$ against the reshtent cltizens of the parsicula country witis which the treaty is mond and whit be forbididen to deny when the pro Which it grants to the eltizens of wher $f$ an comutries. The effeet of such a ireaty, it spect to elucation. is not positlve and conplas sory : It is negntive nad prohibitors. It la "en a requirement that the State shall firmisb aliaca tion: It is a probibition agalust discrininati: s When the State fors chonme to fuminh ciluation It lesves every Sinte frec to fare publice schen's or not, as it chooses, but it says to every stat
- If you providea system of eduratiun wh: h Includer alien children you nust not evclude these particuiar aile:n children.'

Inasmuch ns the Constitution and the lawe ! the L'nlted State made in puraunnce thrre. f. nni all treaties made under the nuthority of the United States, are declared to he the sifreme Isw of the land, and that the judges in every State shall be bound thereby, anything in the constltution or Inws of any Siate tin the contrary notwithatanding. this prohilltory power wis shown to he incontestlble.

The common-sense grouth of opioion ne. feeling on the whoie subject In America coult not be set forth more iulisputably than i: w.

## RACE PROBLEMS

well being of the Chinese popuiation; and as, mutatis mutandis, these were the conditione with which Thinese immigration ectualiy brought thle peopie sare to lace, wo had and have a perfect right, which the Chinese Gov. ernment in no way contente, to act an we have acted in the nuatter of restricting cooile immigration. That this right exists for eacio country was expilicitly a'knowledged in the last trenty between the two conatrien. But we must treat the Chinese student, traveifr, and husiness maan in a spirit of the hroadest justice and courtery If we expect similar treatment to be accorded to our own peopie of similiar rank who go to China."-President's Mesmage to Congress, Dec. B, 190\%.

No effective impression on the moral sease or the rationnitity of Congress was ma:ie hy the I'resident's appeai, and the inws which are contemptuons of national treaties and indifferent to the antiona! honor remain on the statute books unchanget. That others than the I'resident in the Federal Administration feit the wrong nad the sitame of the law which it hat to adminis. ter, was shown by an articie from the pell of the secretary of Commence andi Laior, puld. ilshed in the spring of 1008 . The foilowing are sone ressages :rom the articie

It is not tac poliey of the fiovernment with reference to Chincse :mmignation, but the manner in which it is, of neressity, carried out, by reason of the way in whieh the ta ws arc framed. that cenuses constant fidetion and diseatiofuction.

The attitude of the chinese Goverumeut may be inferred frons the fact that in 1904 , after the convention of 1 N0t haid bren iu force tu y yars, china uvailet herseif of her reserved right and formally dino.a. ced the treaty, refus. hig fonger to be a party to ats arrangement whieh, an carried into effect, was offensive to ler national prifie.
"For proof of the feeing of the Chinese peopie it is enty recessary to refer to the inyycott of American goxis. inaugurated by parious trade guids and business and pommercial associntions of the Empire during the summer of 190). At that time Chima hedf frost rank among Oriental countrifs as a consumer of American jiroxiucts. In that year. ther total commerce anmunted to $849 \%, 006,1 \times 10$ of which 8329,000 . 010 wire imports; $857,000,000$, or norere than seventern prer cont., being surpuliou by the Unitui 4 ates. The exports from the Inited States to rhinn had grown to these proporions by rapid stritics. They wete iess than $\times 3,000$.. 000 ir, the seventies. They oniv reachevi $\$ 7.500$. 000 in 1 N*W $\$ 12.000,000$ in $1 \times 97, \$ 15.0000,0(10)$ in
 It whs reasonabie to believe that American trade wonld continue to jrogress in somerthing the the sume ratio, atd a tariser and larger share of thue forcign trade of (hima acrerne to the l'nitel siaters lustead of that, the axports of the 1 nitevi states to Chlua, arpord: in our statine tira. frll tis $\$ 44.000,060$ in 9006 , anta to $\$ 26,000$. ato in 1:317

It is nint necessary to nitrihute the deciline Wholly to the lwevent cif 190t. hime a drop in our exportations to that country of fifty per 'cent. in two yars is sulticientiy startling to challenge attention. But on higher grounde than thase of mere commercial interest should the frame of the iaws be changed.

## RACE PIROBLEMS

" I I would not muggent a change in the entab. lished policy of rigidly exciuding Chinese iabor. ers of every description, both skified and unatiilied. The policy has been and wili continue to be as effectively enforced as circumatances wiil permit. Hut, at a time when this polic y of exciusion has been so thoroughiy applied that there remain in the United Etates only absut 70,000 Chinese - iess than one-tenth of one per cent. of our populatlon-littie danger need be appreheaded from a fuii and fair reconsideration of the subject and a recasting of the iaws upou a 12 ar basia.
"by making admiasion the ruic, and exclu. slon the exccpilion, wee rould easily preserve the prement policy in ali its integrity, and even strengthen the real prohilhitory features thereof? at the snme time entirely removing a materiai cause of friction, dissatialaction and unuereassry - Oscar S. Stranis (Sec'y of cowmerep amd Labor). The Spirit and Leller of Eirelution (Tho North American Reriex. April, 1908).
A much atronger expression was giveu to the shamerl feeling of honorabie Americans on this subject by the veterna dipiomatist anal fornier Secretary of State, Ilon. John W. Foster, in un articie written in 1006 . The foliowing is a pas sage froun the articie:

I do not know how I can better ilhuspate the kiud of protection, or want of protection. extendeni to the Chinese, as guaranterel ly the Constituthon, the treaties, and the soldimis momises of the gorernmeni of the Catiteri states, thun by recaliing a notorions case whinh is: curred, not on 'he annd tots of callfornin, nut nnder the anspices of fubor agitaturs, but in the enightenexi ctty of Boston and uader the con duct of Feviernl oflleiats.
"The following narrative is condensed form the nerwspapers of that aty. At abom haif past severs oclock on the eventing of sumday. Othibe: 11. 1902. n nunlaer of tinted statea ifll ials of Ihosten, New York, and other citice chargeri with the administration of the Chinese "xclusinn tawa. assisted by a force of the heri judice. manle a sudiden and unexpected dessent numen the thi nere querter of Boston. The raid :wns tinurd with a refinentent of criclty which difi grows? crefit to the shrewtiness of the onleials fhom to their humanity. It was on the day anel at the lomar when the Chinese of Bostothand its rhin. ity were accustomef to congregate in the phar ter manied for the purpose of metting friewts and enjoyirg tiemsetres after a weeh of teaiy and honest tui!. The pmice anti inmiprath in officials feli ujon their victimes whout siving a woni of warning The ciubs, restauraurs. other pabille places where Chinese congregatent. and private honoves were surronadeni fivery arcnue of espaje was hiocked. To those wi/ni nu warrant for arrest or oller paper wa ni or
shown. shown.
"Every Chinese whe did not at once prombee hiss certificate of resideture was takern in tharse. anti the minortunate ones were rushaci of t. . he Feicral Building withumi further rerens by Tirere was no respect of persons whin the ati. ciais: they treated merchants and inthro pe alike In many cases no detmand was maif fir ewrtificates, the captiven were dragged off to fimprisonnecti, and in mome instances the demand was met made tili late at night or the bext mornius.

## RACE PROBLEMS

RAIIWAYS

When the certlacates were in the pomeston of the victims at the time of their velzure.

In the rald no mercy was shown hy the government officials. The frightened Chinese who had sought to escape were dragged from thelr hiding.places, and stowed like cattle upon Fgons or other vehicles, to be conveyed to the designated place of detention. On one of these vagons or trucks from seveuty to elghty persons were thrown, and son after it moved it was overturned. A scene of indeacrihalile confusion followel, in which the shrieks of those attempt Ing to escape mingled with the groans of thone who were Injured.
"About two gundred and fifty Chlnese were thus arrested and carried of to the Federal Buliding. Ilere they were crowded Into two mali rootns where unly standing space could be had, from elght oclock in the evening, alt through the night, and many of them till late in the aiternoon of the next day. There was no slepp for any of them that night, thoigh sone of them were so cxhausted that they sank to the flone where the, stood. Thelr captors seemed to think that they hal to do with animals, uot hil. manlwings. Some of them were releasel during the niglit, when relatives hronglit their certiticates or mercliants were Identified. But the greater part were kept till the next day, when the publiclty of the press brought friends, or rellif throughi legal proceedings.
sin strong was the indignation of the respect. able dilizens of Boston, thut a large pubile neeting was liehl in Funenil Ialif to denomme the action of the inmilgration odidals and the poHece... It was annonuced by the immigration aliciais that their raill was organked minder the belide that there were a nuniber of ninese in llowun and tis vicinity unlaw fuliy in the l'nited States, and this method was adopterl for discov. ering them. The oflcial report of the chief oflewr seron after the event sinoped that two hunirel and thirty four Chhose : eno lmprisoned. that one lundret and twenty une were roiensed withont crial or requirement of hail, und that only flve had so far been deported. bat that he hoped that he miglit secinre the conviction and

but erentually sccepted 212,500,000 francs. The Confederation touls over the diht of the company - 117,000,000 france ( $\$ 93,418,000$ ) with st per cent. interent. and peld six million francs for expensen of the lave of the company's lomas.
Turkey: A. D. 1899-1909. - The Bagdad Railway. - In January, Ivo2, tle Turkish Sul. tan algned a conventlon which providen a guar. antee, to the extent of 12,000 franes per kllome. ire for the undertaklng of the llagdad liallway, to bulld which a cuncession liad been ohtalned by a German syndlcate in 1890 (sce, In Volnme V. of thls work, Tureer: A. D. 1800 - Novemnifn). The new raliway was to be an extencion of the existing Anatolian Italiwny, startlag from the terminus of the latter at Konieh and runuing, vla Bagulai. to some point on the Perslan fiulf, the selection of whleli was left for future arrangement. The llne, withlts branches, was to lave a lengtis of 2.500 kllometres or about 1550 mites.

A further convention respecting this profect was sigued In Marclt, 1003, concerning which the followlag statement was made In the liritisi l'orliament on the shl of that montir by the Pro. aiter, Mr. Balfour: "A copy of the conventlon, ronciuded Darch 5,1003 , between the Turkish fiuvernment and the Anatolinn liailwhy Company is In our posaession. It leavis the whole wheme of railway development through Asla Hinor to the Perslan Guif entinely in the itauds of a company umeler German control. To such a convention we have never been asked to asmat, and we could not In any case be a party t. 1 l ."

Mir. Darld Fraser, a young traveller of experience, was commlsslonitl by the Times uf Inelia in $160^{\circ}$ in follow the proposed route of the Bng. diul laliway und repoti on its prompects. Ife startal froni (i)nstantitople, umi imversed the compheted portion of the line to where it breake of sululenly sone ten kilometres enst of Eregll. " with its pair of ralle," le wrote, " gauntly profecting from t!e permanent wry and polnting in dumb amazemient where the Taurus stuares the horizon with the riry skles." "They liave now." said the l.onilun Times not long slnee.
been pointlog thus for neurly flve years, to the bewilidrment of those who, not knowing the contitry, luagineri, in imat, that with lier. muny determlited and Turkey deskrous to push ahemi, the lagdad line woult go forwarl with frov thelie mareh towards its distutut geni."
A. D. 1908. - Damascus to Mecca. - The Pilgrims' Road. - ' The Damascus to Verca lahway has many remarkithe features whith disthugish it from onher llues. Its principul olject is to provhle umeans for fainfui llos. lems to perform their pilgrimage to the lubly places of lierea :nd Mevinu with a greater de. gree of comfort thin formurly is luception Finde to the latinitive of the present sintun, and the enthushasm createl liy lis firat an. ponacem:nt bronght in subscripions from the filthful in ail parts of the Inhmir winhl."

The lengilt of the llac from lhamasias to Mecea is $10 a^{7}$ miles.

The gange of the ilne ls the somew hat curl. ous one of 10.0 neter ( 3 fect it inches). whiclt n ta noresary, when the line was first com. misucel. to corresponil with the gauge of the Leirut-lamascus line, over which the rollog
stock had to be brought." - Col. F. R. Maussell. Vatiomal Geographic Magoaine, Feb. 1900.

The ilne was opened to Medlas early in the sutumn of 1904.

Ualted States of Am. : A. D. 1870-1901.Rallvay Rete Regulation, - Its slow Development. - "Granger" Leglalation in the Middle West. - State Commiasloas. - Defant Rebatlag. - Tardy Federal Leglala. tlon. - The Interstate Commerce Act, 1887 , 1go6. - Presideat Roosevelt on the subject. - The creatlon of largely rafitallzed and therefore powerful corporitlons was irst developed in a rapld and extensive way by the modern eaterprise of rall way hullding, and the raiinays became soon an ewaentlally related to every kind of interest, personal or general. that they natumily gave rise to the carliest of the speclally modern protlems of puhlle polley concerning corporations which reytuired to be eolved. Fur a iotig perival sorlety lad norali to defend ltseif againat mompolistic comhimutlous among lis rallway corporatlons; because it was long hefore meriously competitlve lines of rail could be luilt. Fimels berved its own belt of conntry: liut each compang ownlog and manasing a line held therefore, In Itself. it inonopoly of the transportation agency it land creatiol. and could, In on uncheeked nianagensent of tiat ageney, elther wrong lis wiole cllentele by exeesalve rates of clarge, or wrong one part of lt hy anme favor. lifm of unequal rates. Those were the orlglaal nhuses of opportunlty and power wittel provokel defensire mensutres of low. Naturally the earlier undertakitgs of difence in the United states were hy State leghlatlon, since nearly all charters of limerpmontion for husiness purposes linve bern dierived from the ditates. Wherever the operations of husiness conducted uniler anclt charters cxtend over more than a single stute. the constitutional power of ('onprose to "regulate romnerce . . . anoong the several sinteg' gives it an undoulated right to take part ln the regulathon of them; hut it was slow to exerche that rlult. The following abrldgment of an excellent sketch of the slow development of railway-mitu: regulation gives the essentai foets. It is ifuot.di from exten. sifaly by kini premisalon of its suthors and of The Imatom Eirning Trimacrigh for whlelt It was prepured.
" l'erbaps the most remarknlale fact in the Whote hlstory of Intersinte transportation is that, ileaplte flagrant abusea, Fivieral regulation was heh off until $188 \%$. Within the States themselfos mitroad rates hat been often subjected to serere regulation: yet even the puble "xcitement which acconipunifel the 'granger'
 In Federal lecislution. In suveral States, notably In thu Mhlillo Weal, during that epoch. dutailed stintut's were puscel fixing maximum rates witich tiy no prosent stamlart could be sain to lo surtiong thit ourragerous. In those times the Fideral courts helif thut they would not consheler leglaiation as confiacntory if it beft to the railiomi one cent of net profit above oper. athg exprenes. lut cen with thls rule, now almast Increalible. It was foumi in the next decale that much of the rate fixing under the state statites was unconatitutional. Nor was the situation much amelloraterl hy tbe later estah lishment of Siste commlaslous, for many of
them. acconting to the present ataadaris, fa grantly sbused thelr powers. . . . Atter the Arst outburt more conservative counsels generally prevalied. The movement met mueh opposi. iion in its progress throughout the country. and athough commimions were generally crested la the East, they were given no final pow. era over rakes. Then a reactlon ant $\ln$, due in part to the prontration of the Western roads. Much wine legisiation datet from thits period, and nany Sinte eommbelous acted in a manierate spirit. The history of raliroal legls. fution in these seventeen years lifustrated, how. ever. the siow proceas by which a mopuiar worement cuiminates In Federai leghalintlour: and goond taw or bad, proper actlun or thepro. per actions. the ieghation of the staten suppliend experlence in view of which Congress couth act wisely when, in $188 \%$, Federal iegtslation became fincritable. That this leplsiation had becone lucvitable was duc very largely to the continucd almase of their commercinf power by the ralifoud managers. For meveral years putblic opinlou as to raliford diacrimination limel become so well settled ay to work a real change in the common ins, yet the ralimat offlelais prer. sistentiy defled ft . tielonting, which, as late as 1475, was at common faw nerely a doubefint
 repted as an llirgal business: but this change the railroads refused to recognize ln any other way than to make their practloes more seeret. It was pablic indtrantions ngainat iong continued lligal diserimination nad undice pro. ference whicls brought down upun the rail. ways the Inter State conmeree legislation in 14Ni. Tine womint is, in view of the rutiony practices. that le dide mot onme samemer. Jhat fowever wefl lehaved the railwnya might have lwin. Ferierai regnlathon wonit have come in"witably hug before the emid of the nincteenth cuatury, la necorlanee whthe thenemi current of public opinion that puhile services conld no longer go withont governmentai regulation. Stiii the act fitwif as thatly passeri was renity very conservative, when the matnere of the crisis Is conshlerem.... By the priach pai pron laions of the interatate conmerce act the raliwnys were forbhdian: (1) To charge mareasmabite mates: (2) To discriminate betwren preranin: (3) To glve preferener between fincalities: (4) Tu churge iess for a bing hand than for a shorter hami Incinded whin. it ander substantinlly simblar circumstances. These provesions wore indoultexily intended by the majurity of those who framed the art as rather radical heremathon. which should materlaliy aftert the pructice of the ralifomis: but the cuns-reative forme of
 force of the utt. From the outset the commis. sion efintued that it not merely haif pewer muder the act to forble any unrensomable rate upon complaint matle, bit that also, in giving riflef. It might indicate to the railrond what shontif be the reasumble rate thenceforth lant wihtil ten rears the Supreme Conurt dechlevi that the cenmenstion had no porecr to tix fatere at all. This wiss a fumulas vietory for the rati ruat lar, fur whitotit antinoritaife shatement by the commission of what mite it womh recmai as reasonabic: even a railromi whith viefiesi
 ont appeal to the courts, coulti make a slight
reduction $\operatorname{In}$ the rale, and any diseatioted ahip. per would be obilged to enter again into an er. pensive and dliatory litigation. In this way the raltroeds tlred out objecting shippers; but In the process they otimulated a whespread de. mand for a power in the commisalon to thi reks similar to that given to muny state conimis. sions and to the corresponding trdy in Cireat Britaln. The tong and short hatl vianse pro Fided that exceptions to it mint be by sperial diapensation from the commisslon. . Ilut tucked away $\ln$ the section was the varue plasace, 'uncier substantlally slmilar virema mtances.' wheh proved lis diestruetion. It firat the commiesion hegan to euforec the act nevorl. lug to lta obvinus reading. and to grant ilis. perisathous fromifas operathon ous petitlon of the railicual is proper cases. But the whole ctire of the railway counsel was concentrital $11 \times 10$ the courts, and it was thaliy lidid that who ever there was competition at the dimant points, the condltions were disaluithr with those at the Intervening points of any laghtit frum the clanse. Water comphethion was first held an exrase for a fower rate for the hupur hani. Then rail competitlon was recognisefi Next potential comprtition orer caintlus routh Wha held enongh. Ibut finaliy the comets te. fised to constider the mere pensilitity of ma romese. . .  lifptinru Act] is in form of a serie- of andemp unins to the orlgital act of pai; The malu olject in mest of the legisiation was to
atroagthen atll further the power of the commintion over nates and rebates. In regard to thece, the amendments affected chaoge chlety along thene two linct (1) I'ower la given to the enmmianion to fx maximum rates in cajes Where, upon complalat, the rates azed by the nallroed were found is be excesive. This ineludes the power to 0 x Joint through rates. (2) Rebating fo forlidden under heary penalties, civil and criminal, both to the raliroed and to the ahlpper; and the cases in which a reduced rate can be given are enumerated." - Joweph H. Beale and Bruce Wyman, Two Yeare of the Ruilroad Rute Lavo (Dovton Evening Trameripl, Oet. 10, 1908).

It was through no fault of the Preeldeat that effectlve legialition to supprena secret robates and other practicen of favoritiam to large shlppen hy the rallways came so tardily from Congreas, as appearu above. In his orat Message, of December, 11:01, he began urging the needed meadments to the Interskate Comnerce Act of 1887, saying: "That law was largely an exper. Iment. Experience has slown the wistom of its purpores, but bas also shown. possihy, that tome of lis requircments are wrong. certaluly that the meaps deviad for the enforcement of tis provishons nre defective.
. The act athouk be muruled. The railway is a publle gervant. Its rates should be juat to and open to all shlppert allkc. The Goverument should ser to it that withla lis jurisdiction thls is su) and should provile a speedly, inexpessive, und elle ctive remiedy to that end. At the satuc trae It must not be forgotten that our railways are the art ories through which the cummercial life. blinal of this Nintion flows. Xobling conlld be nure f(x)llshi thun the enactment of legivlation which would unnecessarlly interfere whith the devethpment nal operntion of these commerctal azencles. The subject is one of grat lmpor tance aud calls for the earnest attention of the Congress."

For five years after this reammale and most Juat recommemation was addrensed to Congress, the speclal hiterests opposed tis public fiterests in the matter were reprementel so coninollingly in that boty thint the innpoteaces of the law remained uneured. In the I'restidential Messame of 19 KH a more Imperative lnuguage un the subjeret was used. "It is neeremary." sahil the Chic! Magistrate. "to pit a complitestop to all rebatis. Whether the shipper or the rallroail ty to himme makes no difference: the relate must lie atopped. the abuses of the private car and private terminal traek nol sithe crack sys tems mist be stoppel, und the Iegisiation of the Fifty elghth Congress which divlares it to be unlaw ful for any persion ur rorporation tuolfer, grant, give, sollett, aecept. of reetlve aly re thate. concession, or discrinimation in respurt of the iransporation of aus property in interstite or forofna cummerec wherely auch property shall his any device whatever he transporten at a less rite than that named lit the tarifis publlatied by the carrier must be enfore + i.

The fovern. ment must in inerrastur degree supervise and regulate the workings of the railways rigaged in interstate commerce; and such inirensel supervialon ta she ouly atiernatise to an increase of the premest evils ont the one lund or a still moom nullea: molley on the other In my judf. onfur the nust limportant legislative act now
needed as regards the regulation of corporstions ta thla act to coafer on the Interatato Commerce Commasion the power to revile rates and regufatlons, the revised rate to at once go into effect, and to atay in effect uniam and uatil the court of roview reverses it."
Still Congress did nothlag in response to thls demand. Which was the demand of the American public, uttered by Its chief and truent reprementailive. Another year passed, and when the next annual communlcation of counsel from the national executive to the nathaal legisla. ture came forth, all other toples in $1 t$ were overshadowed by this. The force of argument, admonltion, and piewling in the Message was fairly overpowering. and it went to a newly chow Congress in whlch the people had represented thensel ves with some what better eflect. The reault was the amending act of 1800 .
In the energy of the Preidient's aivocacy of this legishuthon there was nothing of anlmodity to the railvay corporations. Ills tmost inipressive argumente, for cxample, were aneh ns these: "I britere that on the whole our rallion:ls have done weil and not 111 ; hat the railroad men who wiah to do well shonld not beexposed to compethlon with those who have no such desire, and the only way to serure thils end is to glve to some govermment tribumal the power to se that justice is done by the muwillay exactly as It is giadly done by the willing. Noreover, it mone Government boxy is slups Incrasid power the effect will be to furnish amelhurlative answer on behalf of the rallroul whenever ir rathonal conmor against it is rnlact, or whener"r elasges made against it ure illsprovert. I ark thas legialation not only in the interest of the public but in the intereat of the honest raltromal man aud the lunest shipper nitize, for it is they who are chivily jroparden by the fractices if their dlahoucest eompetiturs

## RALLWAYB

aginst comblastions In restralat of trade. The court refuned to conalder other than mere ques. tions of lew. holding that If pooling were ex. cepted it was the province of Congreat 10 take appropriate action.

- It has very frequently been amerted that a primary cause of the notsble tendency toward railrund conmolidat lon since I8OX was the defnl. dire problbltion of all varieties of traflic cuntracta or asreements by the Trans-Misaonsi Fruight or asrecmation decision of I 807. Thls deciaion, ni has already been Indicated, was renklet dit inon the basis of the Hherman antl-trust law, withont contemplathun of the probilitive proviston of the Act to nigulatc conmatie of 185\%. Accurding to the uplalon of nasy jurlats, In iact, the lutter act could not reasonably lave been congirned to prohiblt many of the tratlic agpeenents which have been customary twitween carriers. It has beed urged with grent force that conper. ston among the rallomuls laving been thally adjulgen Hicgal. It became neramary to have recourace to a mote drastic remedy, namely, comsolidation in mome nf ice varfons forms. . . The frat difference to be noted between pooling and consolidation is that the latter is much more comprehensive In Its mope... Agreements for the divislon of traftic ronstlute luit the mere numblury by whleh a certain result Is to he at tainml. . . Fixpertence has abundatity slown that it is possible for milrouds to malntuin a larce part of thelr Wentity, even resurvhing to ilemselves the puwer to nake rates independentif, under a puol, In exceptional cama, whis. out thereby entirely nullifying the steadying Infiunaces of such trafic agrements. Consull dation, however, necemarily involves the naith -ation of all lnherest as lwetween railruala.
Ia brief, pwiling mny stlll permit compettion In roperet to facilitics. It may merely collininate the polnons phases of competlion in rates, lemp. ligg still Ia force the healitifill lalliemern of ran. sumble rivalry. Consolidation prixeenls tu the uttermosi to stitle competithon of all klads. whither la respect of rutcs or of incllities.
I serond polnt us be kept in mind us let ween the effects of consullidation and prolligr lies lu the fart that consolldatlon con never hope to accomplish the stualying futhence upon ratios whichs ls clinumed for rallenad prolls, until sulfo tinn as every railromul within a given comperit. tive tertitory shall have be bunght up and alisurbed. . . A division of ecritory fatu a number of specitic aronps, teach absilitely mus. mophllad by oue interest, serms to ix the muly luginal untconte of the consalidatluns whits have leern already accomplished.
" Pools and pixiling still exist: although onic.

one jurisdiction and completed in another it may be deal with, inqulred of, tried, determined, and punlshed in either jurisdictlon in the same manner as if the offense hud been actually and wholly committed thereln.
"In construlng and enforciug the provisions of this section the act, omlasion, or fallure of any officer, agent, or other persou acting for or employed by any common carrier acting within the scope of his employment shall in every case he also dcemed to be the act, omission, or failure of such carrier as well as that of the permo.i. Whenever any carrier tiles with the bitcrstate Connmeree Commission or publishcs a particuIar rate under the provisions of tac Aet to reg. nlate commerce or Acts amendatory thereto, or participates in nuy rutes so filed or publlshed, that rate as against such carrier, its officers or agents in any proscention begun under this Act shatl be conchnsively deemed to be the legal rate, and any departure frum such mite, or any offer to depart therefrom, shall be deemed to the an offcuse nuder thls scction of this Act."stututes at Marge of the L'nited stutes, Fijty-sed. enth Congress, Seasion II, chupter Tus.

In comment on the above Aet, Professor Rlpley wrote, some time after lts passage:
" Two yenrs ago, at the instance of the railways, which were desirons of stoppling large leakuges of reveunc dinc to rate cntting, Congress enarted the so called Elkins law. This was distinctly a railway measure. Hence the ease and quiet of ins passage. It roused none of the eorporite wateh dogs of the senatc, ostensibly guardians of the public welfare. Nor was it a cumpromise. There was noured of compromise. Both railways and shippers were agreed ln the wis! to climinate rebntes. Section 3 of this haw of 1903 recites' that whenceer the Inter. state commerce (omunlsion shall have reasonable ground for belief that any common earritr is cingaged in the carringe of passenger or freight tratic betweon given points at less than the publisheel rates on tile, or is combmitting any diseriminatious forbidden by lau' (onr italies), it may petition any cirenit judge for the issuance of an lnjunction summarily prohiliting the practice. Such n remedy would secm to be prompt, efticient, and adequate. It is the hasis if the miversil railwny testimuny that no further legislation on the suhject is needed, but that the luterstate Commerce Commission shonld quit talking und en (lown to busiuess.

That the FIlkins law aulds nothing to the oriminal statnte of 188 : is indisputahle. It derals with means, not ends. It provides motice power, hut not inteltigent direction, for the wherls of justice. The law remmins nbsolutely unchangerl in its definition of ights and w rongs." - W. \%. Ripley, I'risident houserelt's Railiery Phiry (.llentic Monthly. spt. 1905).
A. D. 1905. - International Railway Congress. - The International Railwar Congress
 invitation of the Anmerie:th Railrome Associntion. letween thrce and four humired Anicrican railroad men were in attembance during the congress, which lasted from Mar \& tu May 18. The delegates from oversea numbered three humarid and twenty, and included representatives Srom cvery conntry in the world. Germany, for the tirst ime. was adcquately represcuted in the ('ongress; whlle at no previons Congress
were there so many delegates from Great Britaia and from Brltiah colonles.
A. D. 1906. - Reconstruction of the Interstate Commerce Commission. See (In this vol.) Interstate Commfice Commissios
A. D. 2906-1909. - Decision of the Supreme Court of the United States on the Constitutionality of the "Commodities Clause" of the Hepburn Act. - The Railroad Monopoly of the Anthracite Coal Trade. - The Act of 1906 (known commonly as the Ilephnrn Act) which amended the Interstate Commerce Act of $188 \mathrm{i}^{\circ}$ (see above, under date of $1870-1908$, eontains an linportaut provision whleh was specially lntelisled to dissolve the monomblistic comhination hy whel a group of railrouds oper ating ln Pennarlvania have established contral of the mlning and marketing, as well an the transportation of anthracite coal. This was inserted in the Aet on motlon of Senator Filing and is sometimes referred to as the "F.thins Clanse," sometines as the "Commedities Clunse" of the Railway Rebate Act. Thls clause declared it to be nnlawful "for uny ritil. road company to trausport from any State to any other Statc or to any foreign conntry any article or conimodity otiar than timber manufactured, mined, or prodnced by lt, or unler its authority, or which it may own in whole or ia part, or in which it nay have any interesi, (li. rect or indlrect, except such articles or comnaxilties as may be necessary and litended for lis Lise in the conduct of lts husiness as a common carrler"

Since 18.4 the Constitution of Pennsylvania hnd declared that "no incorporated company: doing the husiness of a common earrler shali. directly or indircctly, prosecute or engag, is mulning or manufacturing articles for imasportation over its works; nor shall sueh company di. rectly or indirectly engage in any other business thmn that of common earrier, or hold or acyuire lands, freehold or leasehold, directly or intirectly, except such as shall he necessary to carry on Its business." lint thls constitutional pri. hllbition had not sumiced to restrain the ow hers of the rallways which tap the anthraclte eval district from acquiring practical ownerahip of so lurge a part of lits mlics as to be able, br combinations and understandings umong their managers, to monopolize the market of thit most important commodity. It was thuuelut thut the power vested in the General Gusirnment to regulate the commerce ln coal between I'ennsylvaniu and other states might he brought Into cxcreise agalust thils anthracle monopoly with more effect.
On the 1st of May, 1908, the ' commoditing clause " of the Ilepbnrn Act bceame operative. and soon thereafter a sult was brouglit in the United States Circuit Court for the Eastern Dis trict of Pennsylvanla, to test its constitutionality. In this trial of the question the Ginvern. nient met defeat. Two of the three Judges of the Court, namoly Gray and Dallas, fled opinious ugainst the constitutionality of the enartuent, their colleague, Judge linftington, dissenting. The case went then on appeal to the Suprove Court, and there, hy a judgment so nearly unabimons that Judge Ilarlan alone dissented on a siugle polnt, the deelsion of the Clrcuit Court was reversed and the constitntlonality of the law upheld. The following summary of lts opinion
we given out by the Supreme Court at the time of tae announcement, May 3, 1009:
"(1.) The ciaim of the government that the provision coutained in the Hephura act, approved Juue 29, 1906, commoaly calied tbe Commodities Clause, prohihits as rallway compaay from moving commodities in interatate commerce because the company has manufaccured, mined, or produced them, or owned them in whole or in part, or has had an interest direct or indirect in them, wholly irrespective of the relatlon or coanection of the carrier with tbe commolities at the time of trasportation, is declded to be uatemabie. It is nlso decided that tbe provision of tbe commoditics ciause relathag to interest, dircet or iadirect, does not embrace an iatcrest wbicb a carrier may have in a produciag corporation as the resuit of the ownerslip by the carrier of stock ia sucb corporation Irrespective of the anount of stock which tbe carrier may own in such corporation, provided the corporation has been organized in good faith.
" (2.) Rejectiag the construction placed by the government upon tlie commodities clause, it is decided that that clause, when all its provisions are harmoniously construed, has solely for its object to preveut carriers engaged in interstatc commerce from being associated in iaterest at the time of transportation with the commolities transported, a ad therefore the com. modities clausc only prohibits railroad compaaies engaged in interstate commerce from trans. mrtiar in such conrucrce commodities under the foiowing circumstances and conditioas:
" (a) When the commodity has been manufac tured, miacd. or produced by a raliway com pany, or under its authority, and at the time of transportation the railwny company has not in good faith beforc the act of transportation parted with its interest in such commodity:

- (b) Wben the raliway company owns the conmodity to be transportal in whoie or in part:
(c) When the railway company at the time of transportation has an interest direct or indirect in n iegal sense in the commodity, which last probibition does not appiy to conmmodities manufactured, mbed, proluced. owaed, etc., by a corporation becnuse a rnil way company is $a$ stockholder in such corporation.
"Such ownership of stock in a producing comptay by a raiiway couppany does not cause it as tbe owner of the stock to have a iegal interest in the commelity manufactured, etc., by the: producing corporation.
(3.) As this constried the rommolities clause is a regulation of commerce witbin the power of Congress to enate. The contentions chaborately argued for tbe railroall compnnies that the clanse, if appiied to preexisthug rights. will operate to take property of rairoad compinims and therefore riointe the due process clause of the Fifth Amendment, were nif hased upoa the assumption that the ciause prolabited tand restricterl in accordance with the construction whicb the government gave that clanse and for the purpose of enforcing which prohibitions these suits were brought.

As the construction wbich the governmen placed upon the act and seeks :o cnforce is now lield to be unsound, and as none of the contentions relied upon are applicable to the act as now construcd, because under such construction
the act mereiy enforces a reguiation of commerce by which carriers are compeileil to dissociate themselves from the products whlch they carry and does not prohihit where the carrier in not associated with the commodity carried, it: foliows that the contentions on the subject of the Fifth Amendment are without merit.
. (4.) The exemption as to timber, etc., contained in tbe clause is aot repugnant to the Constituaion.
(.). ) The provisioa as to peadics is separabie from the other provisions of the act. As no recovery of penaities was prayed, no issue concerning tbem is here prescated. It will he time enough to coasider whether the right to recover peaalties exists when an attempt to coliect penalties is unade.
" (8.) As the coastruction now given the i.et differs so widely from the coastruction which the government gave to the act, and whicb It was the purpon of tbese suits to enforce, it is held that it is not necessary, in reversing and remaading. to direct the character of decrees which shall be entered, but simpiy to rererse and remand the case with instructions to ea. force and appiy the statute as it is now construed.
(7.) As the Delaware aad IIudson Company is eagaged as a common carricr by rail in tbe transportation of cual in the channcls of inus. state commerce. it is a railroad company within the purvicw of the commoditics clanse, and is subject to the provisions of tbat ciause as they are now col. 3 trued."
Siz rail way companies, nameiy. the Delaware and liudsoa, the Eri-, the Central of New Jersey, the Lackawanna, the Pennsylvania and the Lehigh Valley, were involved in the test suit on which this decision was given; but the ruing will affect all roals enyageti in coai mining. Justice IIariaa disseated from that part of the decision wbich relates to the owncrihip of stock in a proluciag company; otherwise the opiaion, announcel hy Justice White, was the opinion of the entire Bench
By ruliag that "ownersinip of stock $\ln$ a producing company by a railway company does not cause it as tbe owraer of the stuck to have a legal inter'st is tbe commolity manufactured. etc. by the prolucing company." the court appeart to have made further ieclslation aecussary. if tbe companies arc to he barred from controlling the production and marketing of the coal through subsidiary corporations

Sce, alis, in this vol., under Comminations, Indistienl de.: Lisited States: A. D. 190i1900.
A. D. 1907. - Regnlative Legislation :n the States. - "Never in the listory of railroal ic gisiation have our transportation systems run counter to a campaign so comprehcnsive, widespread, and disturbiag as the general trend of - regulation' ia almost every State i.egisiature in session during 1907. It seems as if a legisiative tempest against the railroails hail beea untoosed simuitaneousiy in more than thirty Statcs 11 mar n given signal. The weicome arcorled it iy nur lawmakers is inexpilcable, miess we are prepared to admit that our Government. as has been charged frequeatiy, is one of impuise. On this hypothesis it is readily understook.
" Tbirtr-five States. in all, attempted to enact jaws reducing freight or passenger rates, esta;
liahing railroad commitalons, increasing the powetr of existing commlsslons, regulating car service, demurrage, safety appliances. biock sig. nais, free passes, capitalizatlon, liablity for accitlents to employees, hours of labor, biacklist. lng, strikes, tic. . Uniformity was zought without discrinination or foresight. Railrods in denseiy populated diatricts and those in sparseiy settlcd rural locaiities were given ailike a two.cent rate. Worse than this: roads of different earning power in the same State were assigned a levei rate. The prosperous and well. estabiiched road and the strugging ploneer were bracketed, - to sink or swim.
"But ail of their work was not wasted. Real constructive legisiation was enacted in hany States in regard to corporate control, safcty appliances, block signals, working hours, rights of employees, raiiroad mergera, valuatlon, capital. ization, publication of rate schedules, etc., while in the States of South Caroifna. South Dakota, Tennessec, and Wisconsin the rate questlou was given fair and temperate consideration.
"An anaigsis of the general results shows that passenger fares were either actualiy reduced or affected in twentry one States: Alabama, Arkansas. Georgla, Indiana, Ihnois, Iowa. Kan' sas, Maryland, Michigan, Minncsota, Mlsslssippi. Missouri, Nebraska, North Carolina, North Dakota, Oklahoma, Pennsyivania. South Dakota, Virginia, West Virginia, and Wisconsin. Two-cent rates now prevaii in Arkansas. Indiana, Illinois. Mlnnesota, Missouri, Nebraska, Peunsvivania, and Wisconsln; and in Ohio, since 190\% ; two-and-one-half-cent rates in Ala. bama and Nortil Dakota. North Curollna lias cstablisiled a two and one-quartercent rate : West Virginin, a twoecnt rate for railroads over fifty miles in length; Iowa. a sliding seale of from two to three cents per mile: Nichigan, a two, ciree. A1: four ent rate; Kansas, Marylaod and Mrsissi, pi, two-ent rates for mileage books, se riathout commissions of Georgia and South Dakiota have been anthorizel to establish a two-cent and a two-and-one half-cent rate, respeetively : and Oklahoma specifies in its new constitution a maximum charge of two cents for passenger farc. Virginia's Corporation Commission has adopted a two-cent rate for trunk lines, a three-eent rate for minor roads and a three and one-half-cent rate on one or two lines.
"Fright charges were lowered in many States. The Comniodity Freiglit Rate iaw of Minnesota is probably the most sclentific and equitable, and is being used by many Western roads as a basis Commissions in other States have adopted it as a modeI.
"Laws prohibiting frec passes were enacted In Alabama, Indiana. Kansas, Maine, Minnesota, Nebraska, Nevada, New Hampshire, New York, Oklahoma. Orcgon, South Dakota, and Texas.
"Eieven States erented railroad commissions Colorado, Indiana. Michigan, Montana. Nevada, New Jersey, New York, Oklahma. Oregon, Pennsylvania, and Vermont. Sixteen others gave increased power to existing commissions, apart from rate regulation : Alabama, Arkansas, Fiorida. Iliinois, lowa, Kansas, Mınnesota, Mis: souri, Nehraska, New Hampshire, North Caroilna, Nouth Carolina, Nouth Dakota, Texas, Washington. and Wisconsin." - Robert Emmett Ireton, The Legislatures and the Railways (Rev. of Resierre, Aug. 1907).
A. D. 1907. - Limitation of Working Hours for Trainmen. - An Act of Congress patsed in January, 1007, prohlbits railwsys engaged in intoratate and fcrelgn commerce from requiring or permitting those of their eniplorit who have to do with the movement of traing to work more than slateen hours consecutively or more than an aggregate of slxteen in esch twenty-fonr hours, and requircs that whea $3 n$ employé shali have worked for sixteen hours there shall follow a period of rest of not less than ten hours before he shail resume his du ties. Certain exccptiond are made to provide for accldcuts, the fallure of trains to make their reguiar schedules, connections, etc. Violation of the act ls declared to be a misdemeinor punishable by a fine of from $\$ 100$ to $\$ 1,000$, and the Interstate Commerce Commission is charged with the duty of enforcing the iaw
A. D. 1907. - Strike on roads west of Chi cago averted by Federal Intirmediation. See (in this voi.) Labor Organization: United States: A. D. 1007 (April).
A. D. 1907-1908. - Limitation of State Authorlty in matters of Interstate Com-merce.-Serious coiiislons between Federai and State authority which ocenrred $\ln 190 \%$ in the States of Aiabama, North Carolina, and Minnesota, on questions reiating to linterstate raiiways and thelr commeree, were ciearel br lmpiortant decislons of the Supreme Court if the United States. rendered in the spring of 190e. The States in question had enaeterl liws which had the effect of Intimidating railwar companics and their agents from appealing ti Federal courts, by the severity of the penaltirs
they imposed. Sults undertaken they imposed. Sults undertaken in eonse. quence against tise State offleials aetling undre these laws raisel the question whith was car ried to the Federal Supreme Court. The bear ing of the judgment rendered by that Court in tile Minnesota case, Justice Ilarlan aloule dis. sentling. Is indicated by two passages from it, as foliows:
"The provislons of the acts relating to the enforcenient of the rates, clther for freight or passengers, by lmposing such enormous finfs and possible imprisonment as a result of an nusuccessful effort to test the valiuitity of the lurs themselves, are unconstitutionai ois their face without regard to the question of the insufit. clency of those rates."
"If the act which the State Attorney.Gencral seeks to cnforce be a vioiation of the Fedirral Constitution, the officer in proceeding under sueh enactment comes finto conflict with the superior authority of that Constitution, and he is in that case stripperi of his official or re. presentative character and is subjected in his person to the consequences of his indicidual conduet. The State has no power to inpart in him any lmmunity from responslbility to the supreme authority of the Cuited States.
A. D. 1908. - Decision in Armour Packlng Company Case. - A decision hy the United States Supreme Court in the case of the United States rs. the Armour Packing (oum pany covered eases in whlch identical procerd. ings were pendlng against three other packing companies and the Chieago, Burlington and Quincy Raiiroad Compars. The paeking com. pany had eontracted wlth the railway compnnv fur a rate from the Missiesippi to New Iork, to

A. D. 1908 (Aprii), - Passage of Act reating to the Liability of Common Carriers by Railroad to their Employés in Certain Cases. Nee (in thls vol.) Labor Protection: Eniloyens Liability.
A. D. 1908 (Nov.), -Supreme Court Decision in Case of Virginia Railroads vs. the State Corporation Commission of VirState Corporation Comestorisy (November 30), ${ }_{19 \%} 193$ announced the decision of the supreme Court of e Cluited States in the case of the Vir. givin rnilroads versus the stnte corporation comtwission of Virginia, caling into question the order of the commission fixing a uniform rate of two cents a molle for carrying passengers in the state. The decision reverseti the decislon of the tnited States circuit court for the eastern divi. sinn of Virglaia on the technicnl ground that the railroals should hnve appealed from the commission's order to the supreme court of Vir. ginin before seeking the intervention of the felerai conrts. In ctfect the court direets that the riilloadi compnies take their cuse to the state cuirt of last resort nad that in order to prevent injustices tirrough the posslhle application of the statute of limitations, the case be retalned on the docket of tie Linited States circuit court, by which it was originally decided favor.ahly to the roads." - Washington Despatch to the Associatcal 1 'ress.
A. D. 1908-1909. - The Missouri River Rate Case. - Permanent Injunction against the Interstate Commerce Commission. - 13 y an orler made on the 24th of June, 1008, the Interstate Commerce Commission forbnde the chargine of a through rate on first clnss matter, by the railronds, from the Atlantic seahuarl to the Missouri River ( 81.47 per hundred pounds), Which equalled the rate elarged from the atlantie to the Mississipli ( 87 cents) plus the rate from the Mississippi to the Missouri ( 60 cents). In other words, the Commlsion sought to int. pisc' a through rate to the Missouri which would be nint. cents per hundred pounds less than the sum of the rates charged on two parts of the same distance. The westeru railway companies affected by the order applied to the l'nited States Circuit Court, at Chieago, for a perna. nent injunction to restrain its enforcement. The injunction was granted on the $24 t h$ of August. 1909, Juiges Grosscup nud Kollsiuat concurriner in the deeisina, Jullye Buker dissenting.
"'lhe question raised," sinit Julige Grosscup. Iu rendering the opinion, $"$ in its lerger aspects is not so much a question between the shippers and the railroads as between the commercial and manufacuring interests of Denver and of the territory east of the Mississippi Miver on the one side, and the commercial and manufacturing interests of the Missourl River clties on the other
"We are not prepared to sny the commission
has not the power to enter upon a plan looking howard a system of ratea whereln the rates for longer and shorter hauls will taper downward according to dlstance, providing such tapering is both comprehicnsively and symmetrically applied - applied with a design of currying out what may be the economic fact, that, on the whole, lt is worth something liss per mile to carry freigit long dlstances than shorter dis. tances.

But it does not follow thnt power of that character fincludes power, by the use of difier. entials, to artiticlully divide the country into trade cones trihutn:" to given trale and nanufacturing centres. $t^{\prime}$ ' ommission in wheh cases having as $n$ resul : pretetcrmine what the trade and monufachorintr centres shall he: for such nower, vaster than any one body of men has heretofore ex.rcisel, though wisely caerted in speclic instances, would be putting into the hands of the commission the general power of life and deatil over erely tride and manufactur. ing centre in the Laitell states.
In the dissentlng opinion of Jurge Baker he said: "The question is not whether $n$ lawful power or authority has bren slown to lisve been wrong'r exercisci, but whether here is uny law at nli for the power or authority clamed and exerched." Ife fonnd the necessary law, and added: "If Congress cannot constitutionally make a general tieclaration that the rates shat be reasonable und not unjustiv discriminatory and then trast an executive londy to licar evidence and decide questions of fact respecting rensonnbleness and just discrimination, the power of Congress orer rates would be worthless."
In September it wns nmounced that the Com. mission would appal from the injunction to the supreme Court.
A. D. 1909. - The Seventh Transcontinentai line. - The scvinth trimeontinentil line of railway in Americ:a, the (hicago, Milwankee and St. Paul sestem, was announcedi as completed on the 1 st of April, 1909 As its name indinates, it is an extension of the Cliicngo, Nilwinkee and $k$. Inml system by a line fourtcen inudred miles long from Wohridge, Somtl Dakota, to Seatlle aml Tacuma, in the State of Washington.
A. D. 1909. - Fines imposed on the New York Central Railroad Company. - Fines nggregating \$134, imm, impowed on the Ni.w Fork Central IRnilway Comping by the Inlted States Circuit Court for the Southern District of New York for rebates granted to the Ameri. oan Sugir IRatining Company in vielation of Inw, were affirmed in February, 1909, by the supreme Court of the linited States, and were paid on the 13th of May

"In the annual report of the Interstnte Commerce Commission for the Fiar 1908 nttention is called to the fuct that betracen July 1, 1908,

## RAILWAYS

and the close of that year sixteen suits had been begun to set askle orders of the commission (besides one commenced before that (late), and that few orders of much consequence had been permitted to go withont protest ; that the ques. tlons presented hy these various suite were fundamental, as the constiutionality of the act teself was in issine. and the right of Congress to delegute to any tribunal anthorlty to establish an Interstat. mite was dented, but that perhaps the most serious practical questlon raised concernel the extent of the right of the courts to review the orders of the conimisslon; anil it was poncited out that lf the contention of the carrlers in this latter respect aloue were sustalned, but little progress had heen made In the Ihephurn act toward the eflectlve regulation of Interstate trans portation eharges. In twelve of the cases re ferred to. it was statel, preliminary injunctions were prayed for, being granted $\ln$ slx and re. fused in six.
"' It has from the frst beca well understood,' says the commission, that the success of thi present act as a regulnting measare depended largely nimon the facility wilh whirh temporary Injunctions could her oltaiued. If a railroad coinpany, by mere allegatlon in its bill of com plaint. supported by ex parte affidavits, ean overturn the results of days of patlent investlga. tion, no very satisfactory result can be expected. The railroad loses notbing by these proceedinga, since if they fail it can only be required to estalillsh the rate and to pay to shippers the differcnce between the higher rate colleeted and the rate which is finally held to he reasonable. In point of fact it usually profits, becanse it can seldom be required to return more than a frac. tion of the excess charges collected.

- In its report for the year 1609 the commls. slon shows that of the seventeen cases referred to in its 1904 report, only one had been decided In the Supreme Conrt of the Lited States, althmigh fire other cases had been argued and sirbinit:ed to that tribunal in Oetober, 1009 .

Of course. every carrier affccted by an order of the commisslon has a constitutlonal right to appeal to a Federal court to protect it from the enforeement of an order which It may show to be prima fucie confiscatory or unjustly discrim. inatory lit its effect: and as this application may bee made to a court in any district of the Unlted States, not only does delay result in the enforce. ment of the order, but great unecrtain. $y$ is cansed be contrariety of declsion. The questions presented by these applicrations are too nifen technical in their naractor and require a know ledge of the business and the mastery of a great volume of confficting cridence which is tedious to examine and tronblesome to comp, eliend. It would not be proper toattempt to ilfprive any rirporation of the right to review bes a rourt of any order or decree which, if madisturbeld, woulil rob it of a rcasonalile return upon lis in. restment or would subject it to burlens which woukd unjustly diwcriminate against it and in faror of other carricrs similarly sltuated. What 19, howirer, of supreme importunce is that the

## rate regulation

deciaion of such questions shall be as specidy as the nature of the clrcumatances will admit, and that a unlformity of decislon be secured so as to bring about an effective, systematic, .ad srienthfic enforcement of the comuleree law. rather than couflicting decinens and uncertainty of
fnal result.

- For this purpose I recommend the catahllsh ment of a court of the Unitcd states conipusid of five juiges designated for auch purpose frum among the efrcuit judges of the Unlted Stitem, to be known as the 'Untted States Court of Confmerce,' whlch court shall be clothed with exclusive origlnal jurlaliction over the follon. ing classes of cases :
"(1.) All cases for the enforcement, otherwise than by adjudlcatlon and willect in of a forteft. ure or penalty, or by intliction of crimlnal nun. Ishment. of any order of the Interstate Conimerce Commisslon other than for the payment of money.
" (2.) All cases brought to enjcia, set asile. annul, or suspend any order or riquircinent of the Interstate Comnisre Commisslon.
"(3) All such C...ses as under sectlin 8 of the act of February 10, 1903, known as the ' Ething Act,' are authorized to be malntained in a cir cult court of the United States.
$"$ (4.) All such mandamus procerdiniss as under the provislons of section ? 0 or section ss of the Interstrate Coinmerce law are anthorized to be maintained ln a elrcult court of the L'nited sume
"Reasons prectsely analogons to those which Induced the Congress to erente the cimrt of Customs Appeals hy the provislons in the tarifi art of Angust 5. 19i9. may be urged ins support of the creation of the Commerce $2,1 \mathrm{rt}$.
Further recommendinitane of , Message sre sunmarized in the followhig:
Pooling nrrangemeuts as to mates to beallowel under drect supervision of the commisslon.
The cominission to be empowerea to pass upon frelght classifications.
The comimission to he empowered to hold up new rate or classifications by railroads until an lnquiry can le made ns to thelr reasonableness. If found to be unreasonable, the conminssion may forbil the lncrease.
shlppers to be $\varepsilon \cdots$ an the choice of established routes on throusch freight.
From and after tbe passage o :he ammul ments, it is provided that no railroud shatl ac quire any stock or interest th a conpeting line. except that where a rond niremdy owns 50 per cent. or more of the stock of another road, it may omplete the purchase of all the stom. Alow in casps where one rond is operating a nother muler a lease of more than twenty-fire ycars' duriticn, it shall hnre a rlght to acquire the demisuld road. Allow lng these aequisitions of stock dexs not esempt any road from prosecution under the Anti-Trust law.
Stocks must be issued at par value for mones paid in or for property or services, rates at firit ralue. under an inguiry by the Federal nullis ity, who shall supervise allutoek and hond iscues

RED CROSS SOCIETY, The American National. - By an Act of ingress passed in 1904 , the American Xational IRed Cross was incorporated under the laws of the 1histrlct o: Columbla - -d brought directly under Goverumeat supervision. Its charter provided tha* fire members of its Board of lncorporators were (1) be eliosen from the Departments of state, War, Nary. Treasury, ind Justice. lis acconnts were to be audited by the disbursing unticer of the War Department. The entire sup. port, however, aslde from the lacome from a small endowment, comes from the dires of hidirlidual members and vohutary contributions. The election of Mr. Taft, then Secretary of War, as the first preclient of the reorganized leed Cros. cmphasized hts new rclationshlp to the Federal Government and les new position as a funty of really Natlonal scope. At the annual mereting of the Soclety in December. 1908. Mir. Taft, then I'resident-elect of the Linited states, consented to be reslected to tbe presidency of the Red Cross organization in the Inited States.
Throughont all the many calamities of the past deeade, from earthquakc. voldanic eruption, fire, flood, war, famine, and pertilence, the led Cross Society has niways been instant in readiness for effective humane service, from almost every cirllized country of the world, and for any call to any quarter of the globe. In the Inited situtes it has iately underiaken a cortinuous and permanent sercice in connecti\%a with the anti-tuberenlosis crusade.

In Japan, before and during the Russo-Japanese War. - "The Iled C'ross societr of Japan Is by no means inerely a copy of the thed (rous societirs of Europe. as its nante would srem to indicatc: for tie ldea of assisting the wounded sondiers and alaying the suffering caused by war rrose spoatinneonsly ln Japan.
"In 1867, two yrars before the Restoration. when Japan was considered a suvage country by the West, and when she possessel neither riltways nor telegraphs, machin ry, etc.. Count Samo, an enthonslast.c funmianimian. was sent by the Shortin to the Exhibitton in Paris, where he hat the "pportunity of sthlying the Red (rons suciectice of various couneries. Acrail, in tuis, when this gentleman was umbassudor in Vicuma, be carefull: observed the leed Cross societ! and esperially its anctivity during the Francil German War of 1 sio When the Civil War of $15 \frac{\sigma}{2}$ broke out in Japan. Count s:mo $\pi_{\text {ats }}$ hinck in hlsinati- comitry, imil he coucelved the idea of forming a socletryafter the moiel of the Europenn iRell Crostsontisties. The nobillty of Japan received his idnas most favourable. a, il a coctetr was forme 1 which was called Hakuaisha (Bencrolent Suciety).
"The Mikado counteranced the objects of the Society and ansisted it in eviry way From 188 onward be gave it a yearly coatribution of 5,000 yen, to which in $1 N 48$ a gift of 100,000 gen was adrled. After the ('hino Jnianese War. tise Mikalo's yeariy sontribiotion as increused to 10,000 yen. In recognition of the progress which the soejety lad made and of the grent assistance which it had given luring thut cam. palgn. Besldes this sura be contrihutes yearly 5.000 gen to the liad Cross fuciety for the pa. thente. and from tin' to ilas mukes generous glfts to the Socloty. The motto of tite Japanese lied Cruss Society is ' Pay your debt to your unery by lielplng fie soldlers ; and this motto - is quickly maie the Society lmmensely popular throughout the country.
"The war with China of 1894-1895 demonstrated the cxcrilence of the Japunese Kell Cross Soclety. and proved at the same time its lest alverisement, for at the end of $1 N 95$ there were more tian 160,000 membera. Since the Soclety had proved lis immense practical utility, the number of its members rose by leaps and bounds, ard at the end of 1898 there were 570 . 000 members, and the yearly recelpts had renched $1,5 \times 2.620$ yen : at present it must count ahout 1.000 .inn memiers, a:- 1 must have an income of at fedst $8,060,010$ yen, or abcut $\$ 300$, Wh per anutm, a trily enormo's simi fur a coun $\because=y$ like Japan, wherca yengoea about as far a. ten shillings $\cdots$ in Great Brititin. The latest nvallabie figures gire the following record: Number of menticrs, 9? (100) : funis in land. ( $\quad 704,0 \mathrm{MN}$ : annual income, ("231,000."-0. Renunciation of Third Tarm Candidacy Bee Liniteu Staten: A.D. 1004 (Nov.). Progress of Clvil Servics Reform under bis Admalalstratlon, Soc Civil Sekvicu: lis. fonv: U'Niten Ntates.
After diavlng the White House, .- Nhortly before the endiog. March 4, 190W, of hla wecond term in tre l'resldency of the U'nited suates, Mr. lionoeveli lecame connected, as "Con trihutling Eilltor," wious The Outhwif, and began the discuselon of curreat toples in sigued artl. cles, published lu that weekly magazlue. For ume time It had been known that Mr. Ifouge. velt Intendel, when releaked from office, to eojoy a long vacotlon In Central Airlea, hinut. $\operatorname{lng}$ wild game. His propurations n ruwle before lio left the White llouse, an ons the 20th of March, to correct misuuderstuodings as to the recreatho he contempluted. he publighed the following unnonncement in The Inilloud:

- I alin ubout to go to dfrica as the lemi of the Nmithsonlan expedltlon. It iv a velentitic expeditlon. We shall collect blrds and maio. mals for the Natlonal Museuns ot W"ashlngtun, and oothlog will lee shot unless fur food, ur for preserrathon as a speclmen, or unless, of course. the nulmal is of a noalous hlud. There wlil be no wauton destructloo whatever.

I viry eamestly hope that no ropres.ot atlve of any newspujer or magazine will try to accompany me or to lntervlew me curlng any portlou of my trip. [util I actually ret to the wilderuess my trip wlll be preclsely llke ans other conventioual trip oo a steaubuat or ruif. why. It wlit attorl muthlog to write abinit. and will ufford to excuse or warrant for uny ooe sindlug to any uewspaper a llue la refer. enee thereto. After 1 reuch the whllerness of course no once outslde of my own party will lee with me, aud if any one pretends to be with me or pretends to write os to what 1 du, bls statcments should be accepted as on thelr face not merely fulse but iudlerons. Any statemeot purportlig to liave bern made by me, or nt tributed to me, which may be senit to nice wopa. pers slonld be acc 'pted as certululy fulse und as calling for oo denial from me. So far us possulhe I siall avold sreing any representative of the press, aml shall not koowingly huve any convirmatlon ou a ubject whatever with any represeorative ${ }^{-1}$ the ordinary clvil press beyond exchanging or courtesies. I ama private cltizen, und -In entitled to enjoy the privacy that alould be the prlvate clilacio's right. My trip will lave no pulilic bearlug of any kind or deserlption. it is undertaken for the Natiooal Musenm at Washington, and is simply a collectling trip sur the Mnseum. It will be cxtremely dlstasteful to me ond of no posslble benefit to any human being to try to report or exploit the trip, or to seod any ooe whitime, ir tol lare any one try to mect the or see me with a vletr to sinch reporting or exploitation. Let me repeat that whille 1 am on steamer or railway there will be nothing what. ever to report : that when I leave the rallway for the wilderness no persors wlll have any knowledge which will cnable them to report anything. and that any report is ke accepited as presumably false." - Theodore sionevelt.

The ex.l'resident took steamer from New Fork on :he 30th of March, and one of 1 e jommals which hed been amoog the sharpert of
his critics and opponente for years, the New
York Times, had thls to say of lilm that day:
-There is no need to tell hlm that he wlll carry wluh hia wherever he gues the nubiling affectlon of nearly $00,000,000$ of people. They Whin dislike Colooel liousovelt, or thlik they
do, ecurcely count In the Census. Whercwirhe do, scarcely count In the census. Whercw.rhe goes he will raake frlend among human be inge, and impress everyboiy wilth a renwinally

A number of inmediate causes of mis a the Emnire were now added to the nuny ca thich a despotic and corrupi goverument it? alwsys in operation. Harrests in large part Fatrom Rustis hat foillel, hringing the har of fnmine on some $24,000,000$ peopie. Siziu
taneousiy with this, an induntrial crisis came, to cluse great numbers of fictories and shop: and to create a vast arniy of the unemployed. M. Witte. as Minister of Finnace, had been estraorr , diy skllfiti nud successful in deveiopling new industries in iknssia. bint had 10 so by measures of unnaturai stimuiation which fiad this unfortunate result. High tarifis for the protection of bome manufactur's from foreign competition. and the offer of attractive imiucements to forifign capital, hai hrought aborst many investi:ents which proved to le unprotit. abic, and the titne hat coure, as linppets always and esorywhere in such cases, when the unsound structure of pro active enterprise must colinpse. Thus the country, having all of its in. dustrial centers filind with suffering unemployed workmea and many of its rural districts tified with starving beinwints, was it theld most per. fectiy prepariol for the seed of insurgent pussion which conntless agents were uow busien in son. inc.

Stuifents and workesen became associated in flagrant revolutionary demonstrations, thannting the red dag of rehellion and singing seditious songs, at Sit. Petersburg, Mostow, Kiefl, Khar. koff, Odessa, nid other citirs. thehing sain hutthes with arvage Cossacks and pollce. Toexcite the peasantry to action, a forged ukase: Was circulated amming them. In the fistrints of Polaiva noi Kharkoff, announcing that the land, heid wrongly by the nobies. had been restored to them by the Twar: that they could take possession of it, and, with it, the present contents of yranaries and harns. Fhey proceeded accord. ingly to strip many estates (Fי口 below iresela:
D. 1902), and suffered piteously from the sohtiery that came in haste tostop their dofuded wirk it was at this thme that $\mathbf{3}$. Whte set on $f$ ont an extensive intuiry into agricuiturai monlitions. the important political outcome of whis will twe spoken of later on.
of the dive of Ipril. 1902 . the Minister of the
erior. V. Nipiagin. was killes by a student atucdi iselnate heft. This murderous exploit of suc revolutionary terrorists brought a rian into - werer who gare bussin un experienco a the fiext two years, of rearthesmese and it css in dewpotism which surpansed ali that it had nown befure.

- Niplagin, when Minister of the Interior, had already brought inatters so far by his reaction. ary pralicy of violence that the news of his asassination at the hands of Beimatcheif was re-

## Hussia

ceivel with unmisal joy in all clneses of Ituesian anciety. Ihut the fuilest proof ${ }^{\prime \prime}$ the irreconcila. bienes of autoxiacy with th + like furprove mant and progrem whe firnishe.: hy the aucensur of Nipiagin, fon I'lelsve, wlusion proved hlni wif to be the complete personilication of all evil, fremertienm, and corruption. . . . The attention of the highest circies was drawn to his permon when. after the umataination of Alexander It. he condreted the promecution at the arraignnuent of the participatorm in the deed. Iater, on being appointed State Necretary, he was abie, by his persiatent acai in the service of the reac. tion, to piare himweif on a good footing with those in pon - purticulurly witis the I'recuratur of the Iloly - not, I'obifidonustmeti, who, when the jolley of Iewirnying the Fimnim constitution was determined upon, found a gool tooi in lon l'iehve. in the anti-Finn coup a'itut he piaged a considerable part, particulariy us tuember of the secret eomnitt ce which drattedi the Dian lor the IRussification of the F'innish Gmui ibuchy, and Irce up the munifeato; while, stili fater, as Areretary for Finhend, together witit the then Governor Geuerai ibohrikoff, he condacted and carried out the weli-knowu policy of suppres. son.
'As Minister of the Interior, Von Plehre lust no time in whow ing what policy he if "ended to follow, as he feclared the generai dia* b. "nction In itussia to the atoly the result of ch:- onspir. ney and mathinations of a handful of evil disfossed jerwoms, who conld easily be rendered Incapisise of harm if omy the pollee were sufficiently stren"ellenci und received extendive powers. . The Minister canse into coutlict shortly nfter his appointment, with a number of his colleagues, especiaily with the Finume Minister, De Witte, who had prevhously hech practicnlly ommipotent, nui with tie ilinigter of Justice, Dlaravieff. The difference with the bitter hingerl on the ruestion of the trentment of 'politicni criminals, 'the trials of whom Von llehve wished to nliocat " to a special rourt. mat el, the procresings belig conducted with elomet doors, whilst the Dinister of Justice required a public trial before the unllany coirts. The Tsar, as usumi, follo ind the nust reactionary counsel., , . of terem signitlutuce and more far-rinching efferes was the contilet with the Flaunc. Minister, who, lmieed wns f r more menacing to lon Plehve's exalted position. Without heing imbumi with really liberni views, but leing possessed of inteligenere and a clear view ns rrgards ali social phenomena, De Witte, dombtless one of the most nble statngmen liussia ias possessed in recent times, recognized that, if mutters in the Empire contimed much fonger in the same way, a catastroplie was unaroldable.
' We Witto obtained the consent of the Tsar to the formation of committees, in the different parts of the country, consisting of represcutatires of agriculture, and juchuding both farge estite owners nat men of the peopie, to whom was allotted the task of declaring their views as to the calsee of ine decline of thussian agriculture, and of indicating steps for the fuprovement of urriculturil conditions. We Witte fimself urged the committers to express themselves freely nnd openly ns to the causes of the prevail. Ing mhary, und ne to the means of remeduing It. But in ail probahility he hardly expected

RUSBIA
that these uttermares would go mo far in the: oprauese an they resily did. Quite a number of committees were permplearious enonght it denl not merely with the rconomidnl, hat like wine with the geuerul poilticul promition, thangh recognising that the former wire very chasely connected with the lateer. In this wuy the ice was hroke: One committe after the ubto criticimel the evintiag syetem of goverimest witit mutonishing ioldnces, and reguliferi all un conditional and radical change therein.
was the reprearntativor of the zemfaro asce biblite who played the chicf purt in the agricullura comniltece, and consequentiy buper lw gan ti be cherished more or fens everywitere that throw ansembiles would nuw receive amplifled rlahis. and that in thle way the haxis woulid he linh fif the future und for the matitution dreatut of by ail. A. D. 1903 (April). - The Massacre of Jews at Kishineff - The Brltish Vice. 'inuul at ohlessa, IIr. Busanquet, visited Klshila if In July, to learn thu facts of the tarbarons attark on the Jewinh population of that town. whilils hud bern mule by a mod In the previous Aprli The followlug partlenlars ar* take: trom his ohicial report. puhllisied soon ufterwunl as a Parliamentary l'aper: "Therlost bogan on Easter Sumlay ( 0 s.). (the 10 th Iprll, n. s). In the afternoma, in the eastiorn extremity of the town
and in tiat day wore conthed to the ordlonry acts of a turinilent epuwd - e. \%. the smavihug of windows anl lime panels In Jerwian bouses. The area of Sunday's disturbince was (יmpuratlrely wmill." Early the next morning they began afresil in the samre plarter, and spresd to other parts of the town. "They were directerl entlre! y agalnst the .IT.w." "Mondag was the day when the worst "rimes were com mittel, and these were perperatial hy bands of rioterg lin liffernt parts of the town. Many perple helleve the riots tohe the work of organizal compankes.

Besides the mur" rs commited. the Interiors of houses were utteris dismantled, fillows ripped up. Jewlh Scríptures torn, Hoors de. stroved aut firnlure thrown Into the street: while at an carly stage wine was broached, that which was not drunk pouring loto the street. Tife local authorities tonk no effoctive step to stop the riots. which continu."1 nalated till 4 1 . $x$., or later besoliliers awhile belng passlre. If not ipathetic. si ctators, and the pollce content ${ }^{\circ}$, themselres with the arreat of minor crlminals; then the fovernor, who bal remalned at home afing orders by telephone. which were disregarded, at length ventured to slga the necessary order for the troops in be finploers! The on! case I beard of in which the latter used their weapons occurred shortiy
after the lssue of the Governor's order, when a Chrlatlan boy, pursuing a Jew with a stone, and refuslag todtalat, was knocked down and layoneted by soldlers. An eye-witness of the scene related the facts to me. This boy (wltb one doubtful exception) was the only Cbristian Lilled In the disturbances. If resolute action hall been taken by the authorities, it is belleved thut the riots could have been checketl at an early stare. The more usina opinion seems to be thut ull the murders occurred on Monday. It is certain that none were perpetrated on Suaday, und very doubtful whether noy took place after the order to emplos the troops lud come into effect. The disorders did not entirely cease, as next day (21st April) houses in the ontskirts were pillaged : hint, roughly speukling, the riots may be suid to have euded on Monduy. Some students are said to have takeu part in the rots"
"Apparently a feellng existed among the lower classes that the Jews onght not to be ln a mujority at Kishineff. Tbe fact is tbat they form abont so per cent. of the population, which amounts to some 115,000 linhablants, the other half consisting twothirels of Molda. vlaus, and nfter them of lhussiaus, Greeks, Ar. menians, Poles, Germans, Xc."
The vletims of these melancholy occurrences are oftuciully estimated at 41 Jews Killed, or who died subsequently of wonnds, 3 severely, and 300 slightly, wounded. Among the killed was one child accidently sufficated hy its mother. The deaths are pliced by unother (Jewish) au. thorlty at 43, iucluding is joming chiddren, nud by some cerell as high as 47 , but this figure feems to inchate persons who died fromshock. and bot directly from violence. The official estimate of deaths is identical with the figure communfated to me at the Jewish hospital.
"Three bundred and right persons lave al. ready been rourictel of thefts and other ininor offenses [in connection with the riots], and hare been sintenced to terins of imprisominent ranglag from one week to three nouths.
The nocused still awaiting trial number 860 .
Of the alore prisoners 260 are accused of participation in the rints withont actnal violence and are ont on bail in sums ranging from 200 to 800 roubles. Those in this category who are found gnilty will be sentenced to imprisonment withont haril labnur in the Muison Correction. nelle, where tbe discipline is more severe than in prison. The romaining 100 are charged with murder in addition to other crimes, ind those foumd guilty will he transporterl to undergo peunl survitude in the Island of Sakhalin."

A short time ago, I had the good fortune to be received by the Emperor, and to sell him, atralghtforwardly and truly, to the best of my efort and know ledge, about the present state of uclety. I eudeuvored to explaln to hlm that what is going on is not a riot, but a revolution; that the Russiun people is thus being drawn into u revolution, which it does not desire, and which can be forestulled by the Emperor. Iet there ls but one way out of lt, just one, and that is by the Emperor placing contidence lin the strength of society and of the masses. In the depths of my soul 1 am tirmaly convinced that lf the Emperor only wnated to conthlently gronj these powers around himself, l Russia would free liself from all the terrors of the impending disturbance, und would support its Czar, his will, and his nbsolute sovercignty. lin vlew of the state of mind of all the people, who are thled with fear und horror over the things referred to ahore, It is reilly bey ond human power to refuse then to speak bbout that which is vesing und wrmenting everyhody so fenrfully."

The opening of the next year (190.) was nurkel by the appearance of a new element in recolution. Certainly, there had been strikes and riots in the great cithes lefore; there hat been parasint risings mud other forms of economic agitation in various parts. But as a whole the revolutionary movement as surh had been inyired, lirceted, and even carried out he the educited clisses - the students, the journialista, the dectors. barristers, anil other professional men. It had becu nhmost llmited to that great livision of society which in liussia is cullend -The intelligence,. . . It was 'thu lutelit gence' who hitherto had fonght for the revolution. . . . At length the tirst fruits of their toibsome propuganda. contimued through forty years, were sean, and the revolntionary work. ruan :ppeared.

- He was usherrd in ly Father George (iabun, at that time a rather simple hearted prias, with a rather chilatike fath in Gobland the Trar, and a cortaingenins for urganization, lliv premolal hohd upon the working chaseng wa probably due to their astonishanent that at pricest shoull take my interest in their alfairs, ontside thin fees. . . Fathor finpon, with hita thin line of cenlus for orgatization. had sathered the workinens groups or trate unions of st. Petcreburg into n fairly compate benly. ealled - The Rusoian Workmen's Cnion, of which he W:as l're-idut an well ins founder. In the third wetk in damary the men at the l'utilogf iron work struck becanse two of their number hat leren lismiosel for belonging to their untan. It once the Seva iron and shiplmibling works, the Petrultsky cotton works. the Ilexander enoline works, the Thornton cloth works, and wher arat factorias on the banks of the river or uporis the industrial hands jolmed lo the strike, and iu two days whte 100, ino work-pronte welt 'out.
" Win his ruther chilllike fath in Gixl and the Tair, Father Gajon oramiznel a dhtiful appoal of the Rassian workmen the tender. haried antocrat whose benevolence was only thwarted ly evil comsellors and his ignoranei. of the truth. The petition ram, in part. as fol. lows: -
H.. wurkmen come to roul for truth and protection. We have reacheid the extreme limits of endirance. We have been exploited, and
shall continue to be exploited under your bureaucracy. The bureaucrucy has brought the country to the verge of ruin and hy a shameful wur ls bringing it to lis downfall. We have no volce in the heavy hurdens imposed on us. We do not even know for whom or why this money is wrung from the imporerished people, and we do not know low it is expended. This is contrary to the Divine laws, and renders life impossible. It is better that we should all perish, we workmen and ull Rissia. Then good luck to the capitalists and exploiters of the poor, the corrupt othicials and rohbers of the izussian people:
- Throw down the wall that separates you from your people. Russia is too great and her needs are too various for ollicials to rule. Anthonal representation is essentinl, for the people none know their own neads. Direct thut eleetlons for a constituent assembly be beld by genernl secret ballot. That is onr chief petition. Everything is containced in that. If you do not reply to our prayer, we will die in this square before your palace. We lave nowhere else to go. Only two pathe are open to us.. to liberty and happiness or to the grave. Should our lives serve as the offering of suffer. ing izusuia. we shall not regret the ssacritice, but endure it willingly.'
"On the mirning of Sunday, January 2s, 1905 , about 15,140 workiug nurn nnd wonen formed into a procession to earry this petition to the Tsar in his Wiater linlace upon the great syuare of guverument buildings. They were all in their sumday clothes: many peasants hal come up from the conntry in their best embroi. deries; they twol their children with them. In front marcined Finther Gapon and two other priests wearing rostments. With them went the ikons, or holy pictures of shining brass ablel sllver, and a portrat of the Tsir. As the processiou moved along, they same, Goll save our people. Gud give our ortholus Tsar the vietory.
$\therefore$ so the Russian workmen made their last ap. peal to the autocrat whom they called their father They would lay their griefs before him. they would sce him fiee to face. they would hear his comfortine words. But the fither of his people bad diappeared into space. As the proeession entered the spluare, the soldiers fired volley after volley upon them from three siles. The estimate of the killed and womaded was about 1500 . Thut sunday Sanumy 9 th in Rusaian strle - is kuown ns Blomly Sumiay or Vhatimir's Day, after the Cirind lluke Vladimir who was supposed to lave given the ordiry. Nest murning Father Giapon wrote to his C nion: There is un Tsat now. Inmerent blowd has flowed between hin and the peopll:."-1lenry W. Nevinson, The Jhirn in Russia, Intren. (Ilorper'к, N. I.).
If the atrority of the 9 th of Juunary was intended to termize and paralyze the opposition to atholutisum it failed. It maddened the more violent revolistionists, aut increasingly desperate cnterpria's of assassinution were provoked. The provacition wus made greater by the appolntment of Trepoff, notorious for brutality of temper, to a newly created otice, of GovernorGeneral of Si. Petershurg. On the 1ith of February the Grand Wake Sergius. uncle to the Tsar, Governor-Gencral of Moscow, and con-
splcuously heartlesa and foul in his exerclec of power, was ascussinated as he drove through the streets. Strikes and riotous ontbreaks were of constant oceurrence in the Industrial elties, especlally violent ln Warsaw, Lodz, and other Polish towns.
The Tsar issued a pltcous manlfesto on the 8d of Mareh, appealing for a "rally round the 1 'rone" by all "who, true to llussia's past, houcstly and couscientlously have a care for all the afuirs of the state sueh as we have ourselves." On the same day he published a rescript in whieh he said: "I ann resolved henceforth, with the heln of God, to convene the worthiest men, possessing the conflence of the people and elected by them, to participate in the elaboratlon and consideration of legislative measures." But, even if this expressed the per. sonal disposition of the weak-willed soverefgn, it promised uothiug to correspond to it in the action of government; as was shown by the promotion of Trep ${ }^{\text {- }}$ to be Aesistant- Minister of the Interior and Chief of Poliee. Prince Mirsky, baftled $\ln$ his undertakings and hopeless of good from his serviee, had resigned the Ministry of the Interior, and hls successor, M. Buliguiue, held the ottice but a short time. 3. Serguei Xulicvitch Witte, former Miuister of Finance, and latterly President of the lusperial Miusters, uow acquired a substautial premiership in the administratiou, whieh does not seem to have belouged to his ottice before. Nothing of satisfaction eame from the December promises of reformed law. Burcaucratie commissions were understood to be working ou measures to minke good the Tasr's word, but munths passed with no result. There were fitful relinations of the ceusorship of the press, so capricious that no editor could know what he might mid might not say.
In April, religious liberty was proclalmell. with special rights and privileges reserved to the Mussian orthodox elureh. M1. Witte had adivocated a scparntion of the church frons the state : but that was beyonal hope. There mast, however, have becn an important wenkening of elmerh inthenee in the government. since the long despotic prucurator genernl of the Holy Synowl. Ml. Pobictonostzeff, resigned befure tlie elose of the year.
Early in the summer the heads of provineinl zemstron held another meeting. and discusseal the popular demnnd for a constitutionn nod representative government withont restraint. Then the Czar rave them a frienlly audience, and declarel to them that "the sdmission of elected representatices to works of state will be regulnrly accomplished"; but this was followed speeciily ly an otlicial explanntion that his mnjestys reminks must nut be understool no coutaining "ans indication of the possibility of monlifying the fundamental law of the empire. This was to check an eager leaping of the publie mind to high liopes.
On the lith of August the long wavering imperial minil seemed bronght to a definite intemtion at last. in n proclnmation which summoneel a national nssembly, or duma, to meet "not later than the midide of January, 1900 ."
"' The Empire of Russia." said the Tsar in hls preamble. "is formed and strengthened by the iudestructible solidarity of the Tsar with the people aud the people with the I'sar. The coueorl
and union of the peopie and the Taar are n grat moral foree, Whlch has created Russia in the
courne of centuries by protecting her from thl courne of eenturies by protecting her from all misfortunes and all attacks, and has constituted up to the present time a pledge of unity, lnde. pendenee, integrity, material weli-belng, and intellectual development. Autocratic Tsars, our ancestors, constantiy had that objeet in view. and the time has come to follow out their good intentions, and to summon elected represcotatives from the whole of Russiu to take a constant and active part in the elaboration of laws, attaching for thla purpose to the higher state Institutions a special consultative body, entrusted with the prellminary elaboration snd dlscussion of measures, aud with the examina. tiou of the state budget. It is for this reasn that, while preserving the fundanental lnw re. gardlng autocratic power, we have deenied it well to form a State Duma, and to approve regulatlons for the elections to this Dnnia.
By the terms of the call it will be scen. "the fundamentnl law regnrding autocratle power" was preserved with eare. Aud, said the proelamation, "we reserve to ourselves entirely ithe care of perfecting the organizatlon of the duma." It was to have no power to initiate legislatlon, but ouly to discuss nnd pass jute. ment upon measures brought before it by the minnsters of the Tsar, who thus held fast to the substanee of his autocratic power.
The Duma was to conslst of 412 memhers, representing 50 governments and the miliary provinee of the Don, and only 28 members representing towns. It was to be eiected for five years, nuless dissolved sooner by the Tsar. lis meetings were to be secret, exeept as the pres: dent, in his diseretiou, night admit the reporters of the l'ress.
The limited functions proposed for the Iuma, and the indefinite prescription of procedure in its eleetion, left not mueh in the Tsar's project of a national assembly to satisfy the aatlon. In September a large meeting of representatives of the zemstros, from all parts of the Einpire, was held privately at Moseow, and it was there agreed that they should exert thems.l wes to secure as many seats in the coming Duma as possible, with a view to making lt instrumental in the movement for something better. The ultimate sim of present endenvor was defined $\ln n^{1} ן^{\prime} \mathrm{m}$ grmme whieh included: a reprisentative nationnl legislature; a systematic budget system frcenlom of conseience, specch, press, nimering and association: inviolnbility of persen anal home ; equal rights of all citizens; equal reamen. sibility of all oftcials and citizens under the law: the nbolition of passports.
In Oetnber, on the 21st, the wombumen orgnnized their first great gencrall strike, on the railways, which paralyzed travel mal tratlic, es eept as the government could operate somu' wilitary traius. The strikers made bold denimis. presented to Witte on the 24th: "The daims of the working elassess." they said, ". mint lin settled by laws constltuted hy the will of the people and sanctioned by all liussia. The nuly solution is to announee political guarmato for frecdom and the convceation of a Constitut ut Assemhly, eleeted by direct, universal ann! ecret s:ff:age Oflyrwise the eountry w:! : ir foreed into rebellion." Witte replicd: "A 1 in stituent Assembly is for the preseut impossible.
treargat ussia in the her from ull constitnted unity，inde． eing，snd in． Tenrs，our ect in view， their good representa－ take $n$ con． don of laws， ligher state body，en． oratlon and 1e examin： this reasum atui law ro． deened it to npprofe Dunia． scen．＂the tlc jower＂ lid the pros． entirely the ion of the －to initlate pass julls． e it by the eld fast to

Cniversal suffrage wouid，in fact，oniy give preeminence to the richest classes，because they could influence ail the voling by their money， Liberty of the press and of public meeting will be granted very shortly．I am myself strongly opposed to ali persecution nnd bloodshed，and I sm wiliing to support the greatest amount of iberty possible．．．But there is not in the entire world a single cultivated man who is in favor of universal suffrage．＂Two days after reeelving this repiy the Council of Labor Dele－ gates，or＂Strike Committee，＂declared a gen－ eral strike of workmen throughout Russia，und about a million workingmen are said to have taken the risk of starvation by dropping work．
No doubt it was that evidence of determina－ tion in the revolutionnry spirit of the country which drew from the Tsar，on the 30th of Octo－ ber，the famous ukase which was characterized hastily at the time as＂the Magna Charta of Russia，＂＂the surrender of autocracy，＂the founding of constitutional goverament．In reality，the document was no more than on in． junction to the ministers of the autocrat to carry out his＂absolute will＂in certain matters， most of which were set forth with characteristlc vagueness of terms．The following is a trans－ lathon of the entire inanifesto，as communicated to the Goverament of the Cnited States from its embassy at St．Petersburg

By the grace of Gorl we，Nicholas Scond， Emperor and Autocrat of all the Russias，Tsar of Poland．Grand Duke of Fiuland，etc．
The rioting and agitation in the capitals and in many localities of our Empire has filled our heart with great aud deep affliction．The werl． farr of the Russinn Emperor is united with the weifare of the people，and its troubles are his troubles．The agitation which has broken ont may bring confusion anong the penple and threaten the entirety and unity of our Empire．
The solemn vow of the imperial service com－ anands us，with all the strength of intelligence and of onr power，to endearor to stop as quickly as possible agitations so dangerous to the F．in pirt．In ordering the competent authorities to take measures to avert the disorders，the tron－ bles，and violence，and to guard peaceful people who are euger to fulfill quictly the duties piaced upon them，we have found it necessary．in orler to insure the proper execution of the gerit－ aral measures marked out by us，to uuify the action of the supreme government．
We lay upon the government the fultillment of our absolute will：

1．Togrant to the population the inviolable bisis of free citizenship，on the gromnd of nethal inviolable personality，freedom of conscience， ipeech，meeting，and unions：
2．Without stopping the intended electons for the state Duma，to inelude now in the par－ ticijation of the Duma as fir as possible in view of the corresponding short term which remains before the convocation of the linma， these classes of the population which up to now were tutirely deprived of the right to Fote and in allow in future the further development of the element of a generai right of election which is to be established by new legisintion；and
3．To establish ns an invinlable rule that no ary sual take cfect fithout ita confirmation by the State Duma and that the persons elected by the population shouid be grarantced the
possiblity of actual control over the legal activity of the persons appointed by us．

We cail on all the true sons of Russin to re－ member their dutles toward their fatherinnd，to assist in combathug these unheard of aglations， and together with us to unlte all their strength in eatabllshing quietness and pence in their country．

Glven in Peterhof on the 17th ciay of October In the $y$ enr of our Lord 1905 and the eleventh year of our relgn．
（Signed in his own hand．）

## Nicholas．

At the same time，the ministers of the suto－ crat were enjoined to＂abstain from any inter－ ference in the elections of the dumu：＂they were to＂maintain the prestige of the dnma nnd confidence in its iabors，and not resist its de． clsions so long as they are not inconsistent with the historic grentness of Russla．＂In the ex－ erclse of excecutive power they should eniborly ＂（1）straightforwardness and sincerity in the confirmation of civil liberty；＂＂（2）， n tendency toward the abolition of exclusive laws：＂＂（3）， the coordination of the activity of all the organs of government ：＂＂（4），the avoidance of repres． sive measures in respect to proceedings which do not openly mennce society or the state．＂

These orders and injunctions from the auto． cracy to the bureaucracy were to be the cousti－ tution of government for which Russia had made demands．They did not satisfy the de－ mand－or satisfied only the small party who were afterwards called＂Octobrists．＂becnuse they asked for no more than was granted in this ukase of October 30，190．）．The general strike was not called off，but demands for a Constitu． ent Assembly were reiternted per－istently．Agi． tation was kept nlive，and with it the murderons warfare waged by revolutionists againt high officials mul the police．At the same sime，re． actionary officials nad army otlicers，entuged by what the Tsar had done，stirred up mobs in various paits of the country to attack the Jews， and add to the state of public disorder，thus fur－ nishing arguments for a fresh resort to repres－ sise meusures by the military arm．Presently there ware serions onthreaks of mutiny in army nud navy，at Olessa．Kronstadt，und Serastopol， and all the foundations of putblic order seemed really，for a tine，to be breaking up．

It is evilent there was serious nlarm in the circies of the autocracy．l＇obiedonostzeff，the bigoted l＇socurntor of the lloly synod，and Tre－－ poff，the savage head of the police，resigurd． On the 4th of November an amnesty to politlend offenders was proclaimed，and the ancient librer． ties of Finiand wrer restored，by a decree which holished that of Fehruary， 1599 （see，in Vol． Vl．．Finiand），and that nlso annulled $n$ iater military law，of 1001 ，by which the Finnisla army had been put on the Russian footing．
These signs of yielding to the claims of the nation suon gave place，however，to symptoms on the reactionary side of revived courage mat ohstinacy among the keepers nnd masters of the Tsar＇s mind and will．A manlfesto on the 12th of November declared that reforms wonld not be possilhe till the country was quieted．An． other on the 13th proclaimed martini law in Poland：whereat the＂strike committec＂called another strike in sympathy with Poland．On the 14th Witte publishod an oppeal to the
workmen, aying: "Brothers 1 Workmen! Go back to your work and cease from disorder. Have pity on your wlves and chlldren, and tirn a deaf ear to mlschlevous counsels. The Tsar commands us to devote special attentloa to the lahor questloa, and to that end has appolnted a Mlnastry of Commerce and Industry, which whll eatabllsh just relatloas between masters and mem. Only give us time, and I will do all thut is posslble for you. Pay attentlon to the advice of a man who loves you and wishes you well." The renewed strlie was not successful. Nut many of the workluginen wonld face the suttering from aonemployment whleh they hal gone throngh already. The attempt was ended on the 20 th: but the Committee which called it, In annmlling the orler, enjolned the workers of the Eniplre to argunlze " for the thal encounter between nll Rnssla uud the bloody monarchy now dragring otit its last days."

Meantime, on the 17 th , the Tear sought to conciliate the peasants by rexlucing for onf your the paymeats on land thut were die muler the laad distribution which went with emanelpation In 1861 (see Slaveity, Medifivaland Modern: Resnas, ia Vol. IV ), and romitting thementirely after Jmuary, 190\%. On the 20th of iovember a Peasants' Congress of 300 delegutes ruct $\ln$ Hoseow ame formulated clemards for the natonalization of lund and for a constiturnt assemblr. The delegntes were arrested. iu alarming nutiny in the Heet und army at sevastopol broke jut on the e6th, but it was sion suppressed. Two lays later the whole body of cmployees ia the postal aal telegraphic service at Hascow began a most troublesome strike, which spread from there aad was continued for some werts. Mr. Ne vinson, who was in Moscow at the time, tescribes it in one of his chinters:
"In those haples wecks when fre dom still was young and living. two thiugs ruled the conmery - spech and thestrike, the word and the blow The strike was everywhere feit. No lettur or telograni wout or rame. Fach town la lasslu was isoluted, and the whole En:pire stown sov. erell from the world. . . . In Moscow the combs strinck. and parated the streets with songs never hearl in the drawing room. The waiters struck. nut heary proprioturs limhered about with their own plates nad dishes. The mursemaids struck for sinuluys ont. The honsemaids struck for roonis with winduwa, instead of cuplmarls umler the stairs, or sectios from the witer closets. Schoolboys struck for more diemiceritic: masters aus pleasauter aessons. Teachers struck for hlgher pay. . But at the back of thio strikes and all the revolutionary anopement hay the motive force of speech. . After these centuries of suppressiou, all litisia was revelling in a spiritual dehanch of werts, "
On the fith of Dearomber Gier eral Sakharnf. furnurry Vinivier of Wiar atul now Gevernor. Coneral if a tistriet on the Volga, was shot by a woman. to wenge the eufferinges be hitd cibsed to the prasisits. On the ath the Striku ('onnmitter cilled on the workperple to wittulraw their mozey from the saringelanks, and, a little later, a joint manifesta, issued by that commate e nod committics of Irasants. Social Democrats. and Social lecrolutionists, appealed geverally tio the people not only to wittilraw mones from the suvings hanks, but "to refuse to pay taxes, or to take bank aotes, or to subscribe to loans,"
as a means of erippling the government financlally. All papers which published this manlfesto were cuppressed and thelr editors arrested

Then, In the last twelve days of December, came the fatal riaing at Sloseow, which the gor ernment, forewarued by Its sples, preclplititerl. whlle the revolutlonlsts' preparatlons were but half made, and which It crushed mercilessir, with ease. From a dlary of the ocentrences of these triglcal days at Noscow, given in thr $n$. pert of the residrint Amerlcan Coasnl to Amtias. saulor Meyer, at St. Petersburg, the follon ag eatries are taken:
$"$ December 24. - Barricalcs were continumly bri: durlug days and nights The revol:ation. lats were in hope that atont 20,000 or 80 , min Workmen from the fucturies In the suturh, would enter the eity and $j$, them, but this was not necomplished, as the millitury forcos were sufticieat to prevent this. The revolutionists spread a rumor anonest the wo himen that the suldiers were in sympathy wlth the strikers und that they would not tire on the mob and would jola their ranks, but this rimor turued out to the natrue, as the troups were loyal to the Governmellt
"December 27. - At 6 o'clock P. M. the linuse Where the chicf of the secret pollee, Mr. Vive. cheasoff, restdes. "'is surrounded by a resil. tionary party 111 hy their lasistent demands the front door n opened. Slx men rusied lato his apatment, anl arrested the chlef, and real the death sentence of the revolutionary pas to him Ilis whe. mul three chihlivis phendel th the revolutionksts for merey. but the re "olutionists wonld not llsten to their ple:uling. and they gave Mr. Voiluchonkoff a short time to prepare for denth and then took him out intu a side street where he was shot to death, and his horly left in the strect. Disurbancesat ll shont. ing were carrled on la the differiat parts of the city, and new larricades erectud

Nerember 31. - The troops bombarled the large I'ruchoroff spinning mills, where :I lirate munber of revolutlonists made their last stand Dany honses in the vleinlty of the nill wrep Clther burnt dowa or wredied by canmon halls. Many of the revolutionlsts and strikers were killet, wombed, or enptured and the weapons contisratcel. The general strike has leen called off

This was practleally the chid of the abrative rising. On the ith of Jimunry, bumi, Ambacia Jor Jlever wrote to the state [bepartmant at Wanliugtom
"In my calle of December asit stated that al. though fightiag harl heen sthtiborn ant eativis guns had been used, I helioved that the esti. mates so far glven but as moss of life wete much cargernteri. On the 20th of January Ambassador Meyer wrote to Vashington: "Tha revolutionary party seems to have spent its force for the time being. Justead of aldiug reforms, they hare greatly hampered them. By the attempted eanture o? Joscuw, by their rots and reliellions 1 other parts of the conntry. followed by destruetion of lfe and property, they bave force the Gothods ment into repression and In order to restore liw and in the cluasification of decessarily eansed a delar infranchisul roters and has given an excuse for n continued waste of prious time excuse burcuurratie formality.

Some of the factions are tinally waking up to the nccessity of giving attention to registra. tion und a better eomprehension of the coming elections. The Constitutionil. Iennocratic party harc decided by a large majority to take jart in the clections and the Do' ra. The social Hemocrats hare nlon dedided ', participate. On the other hand, the ?:יnolan Sorial Revolution. a-ies, at their first mioning ia Finland, lately, roted in firror of a borcott of the ciections.
"At its last meeting, the ConstltutionalDemocrstic party, in view of obstacles to frce eipetion campaiguing whiels the loral anthuritios are using agrinst $a^{\prime}$. opposing parties, voted to protest against the government policy, which in any way impreded free electous to the Imperial binma, anc further urged the most encruetic participation of its inembers in the approne laing clections.

It a mefting of the marshais of the nobility, held at Joscow last weck, the following iesolittions were adopted: 1. That the tinal settlement of the agrarian gucstion shoulf be marle the first task of the Doums. 2. That in deciding the azririan question, $i$. should be hasem on the principla of inviolability of private properts.

A. D. 1905 (April-Aug.). - The Tsar's Deeree of Religious Liberty. - Minister Witte's enlightened Memorial. - The Emptiness of Results. - Farly in Hay, 190., there Was anmmanerment that the T-ar, on the marning of the iansian Easter Disy. land puhbialud a deeree proclaiminar ahsolute religions liberty to all his stibjects. Presious tolerance of ali rellydons in Rusia had been suhject to impor. tant limitutions. No member of the state charch coula lave it to enter another without lowing all his civil rights, ami no churel nther than the Wrthodox could proselyte. Furthe -. more, when members ot ic limsian ('huren and those of any othor church marrien, it was necessary to : ave tho ceremony performerl by an Orthions priest, and the law Insisted that the chididen of such marriages be brought up in the Orthodox faith. These restrietiuns were iarticularly hard on the Ohl Pebicerers. at shey ale called, - a body which suparated from
the Orthodox Church ilo and a half centuries ago and has siffered ail kinds of persecution. The new inkse recognized the various orders of priestiood among the Oid Helievers, and gave them the right to celebrate marriage. To aii the di.senting sects- Roman Cintholics, Luther. ans, Jews, and others - is accorded the right to trect houses of worship without reatriction.

The Tsar's decree of entire retigious freedom was kuown soon to have been the fruit of a remarkably broad mindel memorial auldressed to him by M. Witte, the President of his Councli of Ministers, and a transiation of that memoriai was publisied In the May issue of The Contem. porir" heriele. It pictured a state of paraiy. sis his the Russia:. Church. consequent on its bouclage to the State. "Both the ecciesiaticai and the secuiar press," said the wri".rr, "re mnrk with eal.al emphasis upon twe prevaling lukewarniness of the inner life of the $\mathbf{C}$. arch, - upon the alienation of the flock, partlcuiariy: of the educatefi ciasses of society, from its apiritual guides: the absence in sermons of a ifving word : the lack of pastorai activity on the part of the ciergy. who in the majority of instasces confine themseives to the conduct of divine service and the fuifiiment of ritual ob. servances ; the entire coilapse of titc ecelesiasti. cai parlsh community, with its educntional and benerolent institutions; the red tapism in the conduct of diccesan or consistorlai business, and the narrowly bureaucratic charapter of the institutions grolsped about the Srand. It wns from Dostoyerski that we first heard that word of evil omein. 'The Russian Clourch is suffering frous puralysis.
This condition M. Wit:e attributes to the position in which the Church was placed by Peter the Great. "The ehief ain. of the eeclesiastical reforms of Peter i. wns to 'educe the Church to the level of a mere govern.nent ins ititntion pursuing purely politicul ends. ind as a matter of fuet, the govermment of thr c'murch speedily berame merely one of the numero a wheels of the eomplieuted government rach :- ? On the soil of nu ceclesiasticmi government robbed by huremueratism of nll persmai eiements the dry seholastic life shumniug sehool arose spontauy. ously. This pulicy of corrcing the mind of the Church, though it may lave bees attended for the moment by u cerinin measure of politioni gain, subsequ(ently intlictell $n$ terrible inss. Ifence that decline in ecelesiastieni ife with which we now hute to deal."
The wise Prexident of the Tsnr's Council made so much impression on the mind of his master as to drnw frons him the ukase of generai religions freedom: but three months later, in the Augnst number of The American Rerieic of Rerierer. Dr. E. J. Dillon. whose intimate knowledge of Intssian affairs is weil known, deserihed how effectualiy the decree had been smothered by the hureaucracy, which is atronger than ine Tair. ife wrote: "The most welcome of all the concersions pmanating from the throme wns that whieh Nichoias i1. bestowed upon his subjerts last Easter Sunday. Inspired nod drafted by M. Witte, it was at first spoken of as liburty of conscience, but was soon afterwnrid seeil to amount to nothing more than rellghons toleration. And since then the bus reaucracy has tonelied aud kiiled it."

the Duma was even granted) that choose the delegatcs. The rolosts, workmen, clergy (not landed proprietors), voters of cities (not in apecinl (lat), and class C of landed proprietors, all choose list), and cleg. These delegates, in turn, select eleet. ors, is do alos landed proprietors, and qualifed oters of cities on the special list. The electors vote for l)uma members la their appropriate elictoral college, and thelr cholice is contued to a member of their own body. Therefore in every instance, in order to become a member of the Duma, candidate must be an clector and previous to that a delegate, except in the case of landed proprictors und voters of special clics.
" It is noticeable that the large cities in Eu. ropean liussia are limited to one member of the Dumis, with the exception of Moscow and St. Petersburg, the former having an allotment of four and the latter of six.
"There is an exceptional provision with regard to the procedure of the peasanc electors.

Elections to the Dums, with the exception cited as to the privilege of peasant elcctors, are finally effccted in the governments and territosios by the government clectoral college, and in thu cities by the municipal electoral collegc."
Mr. Meyer reported further that an imperial manifesto had announced that the Conncil of the Empire would in future "conslst of an equal number of elective nembers sud members nominatrd by the Emperor. It whll be conviked snaually by ar imperial nkase at the same time with the Cuma. The two nssemblies will have equal legishative powers, and cach cun exurcise the same initiative in introdueing bills or interrogations. Every bill nust be bissed by both housea before beirg sent to the Tar for his signature and approval. The clected members of the Council will be eiigible for nime years, a third being reelected eviry three wars." Of the 98 elective members of the iound (one half of the body). 18 were to be chown from the nobles, 50 from the zemstvo of rarh government, 6 from the Orthotox Chirch, 6 from the unlversities, 12 from the representa. tive's of the Council of Con merce and Industry, and 8 from representatives of the Polish landed proprictors.
on the 7th of April Amhassador Mcyer wrote to Washiugton concerning the result of the elections: ", The sucecss of the Constitutional bemucrats has made a great impression on the Guvernment mud created considerable nervousnues. Witte is really anxious to resign and go mit of the country for a much-needed rest. But he assured a mutual friend that he wonld s:ay and serve the Emperor as long as Itis Majosty desired. The elections so far have insprosed upon his mind the want of confleletice "lalu exists among the pcople as to his administration. As he is witholit nny supporters among the clected members of the Dumu. it is ditlicult to believe. that the Emperor will be able or evera aeslrous of having him continne to serve as premier after the Dumu is organized."
This anticipe! ion prored correct. M. Witte had withdrawn from the ministerial jremiershil, when the Duma assembled on the 10 th of Hay, and M. Goremykin had taken his place.

There was conflict betweca tbe Dunas and the Government from the moment that the former adopted its reply to the opening speech of the

Tsar. Wita unanimity it demanded general smnesty for past political oflenses, abolition of the death penalty, suspension of martial law, full civil liherty, universal suffrage, abolition of the conncll of the emplre, a revicw of the fundamental law, responsibility of ministers and right of interpellation, a forced expropriation of land, and a guarantee of rights to trade nnions.
M. Stolypin. Minister of the Interior, now coming to the front of ministerial leadershij, made his first speech in the Dumis on the 2lst of June, and was assailed with cries of "Murderer" and "Assussin" when he defended illegal acts of policc oflleluls and provincial governors, in the suppression of dlsorder, and declared his deternination to malntaln order. Among the replies to him was one by Prince Urussof, former Assistant Minlster of the interios, who made a powerful uttack on the sinis. ter methods of the Government - the "policy of mussacre." as he named it - deciaring that massacres were ulways organized by secret forces. "Any investlgation," he said. " of the so-called 'pogroms' (massacrus) wlil bring the investigator face to face with the following certain symptoms: they are identical in ull cases: Firstly, a massacre is always preceded hy reports of its preparatlon, accompanied by the circuiation of appeals cxciting the population and of one constant kind in form and substance. They are accompanied by a certain kind of stormy petrels in the person of little linown ripresentutives of the dregs of the population. Then, two, the canse of the massacre is ufticially announced is afterwards ulways without excepfion found to be false. Furthermore, in these massacres there is always to be founi a certain similarity of plan which gives these actions the character of chance. The murierers act on the assumption of some lind nf edelit, as thorarl conscions that they wif not be f,inisherl, and only continne to act as long as this antillence remains unshatien - after which the nasure stops extraordinarily quickly and cosily."

What Prince U'ussoll hud intimated, ns to the instigation of the massacres from high eircles was declarei most distinetly and positively, three years latcr, by Prime Kropo, tin, In as letter to tha Iondon Tiliss of July 29, 1909. lie wrote: "Something whide never has happened nnywhere in Wistern F.urope happened then in Russia, as M. Obhinsky, a nember of the first Duna, says in a icrrible book of statistics he has published in 1906 at stoscow, under the title, ": Half. Mear of the Rnwsin liovolu tion. in a hundred different cities men of the so called '13lack Ihandreals' came together on some public square, received thare the benediction of the clergy, sent iclerrams to the Palace circles itt St. letersburg, recuived answers from them, and then went on kilting the Jews, the Armeniens, the Poles, the Russian members of the Zcmstros, and Russian 'Intellectnals' altogether, under the protection of the military, the locnl police, and the local governors.

- For some time I could not believe that such pogrons could have beris organized from St. Ietersburg by the anthorlites. Now the cyidence is overwhclming. Wc know that prochmations inciting to pogroms were printed by the cendarmes in the Secret Police offlces, we know from the revelations of these geaiarmes themselves that men and officers werc sent to the
provinces with prociamations and arms to or ganlze the pugrome; and we know how the leaders of the Union of Rusalan Men were petted and given money by the Tear and how they or ganized murders, wholemale and retall, with the ald of members of the secret Polliee; and here is the net renule which I have before me in a long, very: long, llat complled by the Law lle. view Pram
"This lls is simply horrifying. The Constl. thelon munifesto was sigaed on October 30 The same day took place the payrom at Tver: the Zemstro house was burnt, and 24 persons were wounded. At Moseow. November 2, 80 wounded : Odesan. October 31-Norember 8 , more than 1,000 kllled and 8,000 wounded; Kletf, October 31, 150 killed, 100 wounded: Tomsk, November 3.150 killed and burned, 76 hearlly wounded (nill these, by the way, and many others are llusslan towns); Minsk, 100 killed, f(4) woundel; Titls, November 2, more tban 100 kllled ; and so on, and an on. . . . The result of sumlur campalgns in different parts of Russia for twelve monthe only lu $10050-1200$ was - killed, more than 14, (x) executed, nbout 1.000; wounded and partly dled frons wounds, about 20,000: arrestel and Imprisoucd, mostly Wlthout judgneent, 75,000 . This last tigure wns glven in the Dumn liy Profeasor Kovalev. sky on May 2, 1903, In the presence of M. Stolyph, whe dit not eoutcest it."

On the zid of July the Dunia was dlasolved hy Imperina command, aud the followlag nanal. festo to the people was publishal by the Auta. crat on the followlug day :
" J? Persens s.l.ctecl by the peopic were ealled to the leglsiature. Tristligg in the goodness of God, Inclieving In the hapry and grand futare of our people, we were expecting from thelr labors the happiness and interest of the country. Great reforms had hell indleated by us in all that coneerns the life of the perple. and our greatest care, which is to substitute educatlon for the ignuranee of the peopie and to lessen the diff culties of its life hy improving the conditions under whleh it enltivates the ground, was fore most. A palnful ordeal was reserved to our hopes. The elected of the nation, Instead of turning their attention to legislative labors, have entered a filld that wias closid to them, and have begum to investigate the dolngs of authorities estahlished by us, to ludicate to us the imper fectlons of findumental Inws that enn only be nltered by out imperinl will, nnd to eonimit fllegal acts. such as the appeal addrese ad to the people of the Duma.

The peasants, dazcd by these disorders, without waitlng for the legal improvenuent to thelr posltion, gave themseives up, In a great number of governmeuts, to pllage and theft. re. fusing to submit to the law or to legal authorities

By' dissolving the actual Dumn of the Em. pire we test ify to mur unaltermble intention of maintalning. In nli their forere. the laws eoncernIng the cstablishment of that Institution, and, conseguently, we have fized, by our ukase glven to tife ruing Senate on the 8th July Instant. the eonrontion of the new Duma ois the 20th of Fehruary, 1907."

Ahout 1 wn handred members of the dissoived Duma went immedlately from St. Peteraburg to Vlborg, in Finland, and beld a meetlng
there, from which they publiched an address to the "Citizens of all the Ruanlas," algned by ona bundred anil alixty of their number, protestlog agalnat the oppositlon whieh the Dיma had en. countered from the Goverument in all Ite under. takinge, and practicaliy refusing aubmisalon to Its dlasolution. "In the place of the present Duma," they sald, "the dovernment pronises to convoke a new one in eeven months.
For seven montha the Government wlll act ai lt ilkes, will wreatie with the movement of the perple In orler to obtaln a sulminslve aurl de. alrable Duma, and If it succeeds In eatirely erushing the movement of the people It wilh not eonvoke any l)uma at all. Clitzens, stand Armly by the trampled rights of the represent. atives of the reople. Stand for the Inuma of the Eimplre. liuseli must not remain one day without representativen from the people. We have the means of olininlug this. The (ior. ernment has not the right wifthout our consent to collect tnx es from the people, nor to call : $\cdot \mathrm{e}$ people to nilltary serclec, and therefore, now, when the Government bas dissolved the Dumis of the Enpllire. It is your right to refuse to sup. ply it with sildlers or moncy. If the Govern. ment, in orlcr to secure resources, makrwlyms, such loans, made without eonsent of the repre. sentatives of the people, wlll henceforth be Invald, and the ilusslan people will not rirog nize them und w.ll not pny for them. Collise. quently, untll the represcututires of the perille. are convoked, do not pay a kopeck Into the treasury nor send a man to the army. Br birm In your refusal: stnnd for your rights, nll as one man. Agaiust the nuited und absolute wlil of the people no power whaterer can resint Citlzens, In thls compulsory but Incvitatle struggle your representatives will be with you.

This proved to be futile actlon. The Government was prompt in arresting and lmprisoming mos: of the signers of the appeal to the pueple. and tone of them was allowed to he returnet to the Second Duma when the new electlous wire held. Pending that electlon, some very sh., stantlal gifts of imperial favor were male to the peasauts, to win their goxd will. but no thing appears to have been remembered of the Oetober lujunctions of the Taar coneerning the "confirmntion of civil liberty." Ia Jagust, $4.500,000$ acres of erown lauds were trans. firred by an Imperial ukase to the l'easants izulk, for sale to the peasants on easy terms and on the 1sth of Oetober another tikase re. leased them to a large extent from the ri. strainte of the communal gystem, nnd decrecel the equality of all citizens before the Inw. The following is part of the text of this luportant decree, as communleatnd In transiation to the Amerienn government bs Ambasenlor Mcyer. and publlshed in the report of 1906 on Foreign Kelations.
-The Czar orders, on the basis of the fundia. mental law of 1906, that the following refurns
be made: be made :
'1. To accord all Russian subjeets, without distinction of origin, wlith exception of the alo. riglnes, equal rights with regarl to the state service with persona of noble hlood, and at the same time in abolish all special priflleges of dress due either to offlial positlon or to the ori gin of the wearer.

"9. Pemants and members of other clames formerly tasable are freed (u) from tise presenta. tion of discharge papers on entering an educadonal institution ar the civil service; further, from pertonal payment in klad and the performance of communal duties during the whole time the persons in question may be cither in the eiucatinad lnstitution ar cirif arrice; (b) from the necesalty of demandlug for entry fato Loly orders or a monastery the perminalon of the commine.
$\because 8$. The compuisory exciusion of peasant and other clases formally tazable from the foitow ing ranks and careers is abolished: (a) From en. kering the civll service; (b) from receiving rank; (c) from recelving orders and other ulistinctions (d) from attainigg learned gracies and honors (e) from completing culucational courses and particulariy from winaing higber clase rights.
"In ali these casers the persons in question arn allowinl to retain ali the fights arisling from theit comections with their commine, an weli as the nuspinsinilities thereof, until they have freciy withirawn from the commune or entered into other corporations of standing. With regari to the legal standing of the persons in question, there Ghall serve is a basis the rugulations of the rank of profession which these persons have wim." Sece, aino, below, A. D. 1009 (APMiL).
Neantime, extensifo pians of insurrectiou. with uaval and military mutiny, in five cities. haid been formed and I miscarrledi. The outhroak was premature 1 iveaborg, late in July. and the sailore who stam $d$ it were quicky over. come. The same fullure curred at Kronstadt, where the revolutionists and mutinous troops woik Fort Constantine and the arsenal, hut fomd no ammunition in the fitter, and were diffens.lesw when surrounded by loyal forees. It Libnu, Odessa, and Sevastopol the Intenided rising was given up.
On the 25th of Augnst desperate plot of wholesale murder, intenieci to include JI. Stolypin mmong fis rictims, was carried out hy tife explesion of a horribly destructive bomb at the country house of that Dinister, on Aptekarsky inhmi. \$1. Stolypin was holling a receptlon, ani the rooms were crowded with offichais and others, when four conspirators, three of them diresarel as pendarmes, drove up bolily, and wire able, efther to enter the house with a bomb or io throw it through a window. The effert of the explosion was so horribly destructive that the hoise was torn to pleces and thirty people were kilied outright or injured mortally, hesides an equal number that receivel curabie wounds. Two of the Minlster's chlldren wrere among the latter, and he himself receliveli slight irijuries. The Governor of Penza, 11. Kosboff, whis stowi nenr him, was instantly killei. Two of the nssassint were among the killed and the other twe) were wounded and captured. On the following day a young woninu of the terrorist organiantion slew Geaeral Min, nt Peterhof railway station, by shuts from a revolver. He hal been active in suppressing the insurrection at Moscow.

In October Ambassador Neyer, after a trip into Poland and to Odessa. reported as the result of his observations: "On the whole, the retolutionary movement, for the time being, has lost its momentum. A year ago it was on the crest of the wave. Then atrike could be
ordered and put in force without any diffenlig, but anw the $v$ orkmen reture to be used for poiltical purpomes or respond to the whinis of the agitator. The preseat. conditions are liable to continue until the next IMma, March 5 . Yes. lerday, which wat the Arat anniversary of October 17 (Rusainn Style). It had to be given out by some of the revolutionists tiont there wonld be strikes, uprisings, mui agitatlons tiroughout the country. But the lay passed oft quietly. Mr. *oiypin is facing with much courage and resolution the stupendulls task which confronts bim. Ile is endeavoring to deal falrly, white at the same time it is neeessary to reestabish law and orter."

On the 21st of December Count Alezel Ignatheff $u$ is cesassinated at TVer, while attendlog a meeting of the provincini zumstro, the assassin stating that le had ncted under orders of the Socinlist revolutionary connmittee.

A. D. 1907. - The Second Duma and its Early Dissolution. - Increase of Radicalism among its Members. - The New Electoral Law, under which "Workable" Third「uma was elected. - M. Stolypin's Policy. - The promise that a seconi inma wonla be summoned to meet in March. 190\%, was fillfillof. Between the 2lst of Janunry and the end of February elections were held, with re. sults that were excedlugly disappointing and irritating to the imperlal gosionment. it struse finrd. by arbitrary mensures and visurous workIng of its police, to suppre-s the (onstitutional Demorrats, - the party which it fears the most. It pursined their leaters into exile or inmpinonment, broke up thoir meetings. harassed them so in the canvass and the elertion that tberetura of aleputies by the party was reluced from 18.3 in the First luma to 104 : but, on the other latal. the socialist representation in the second Bnin:1 was raised hanve that in the First from 17 to 77 , nad the Uctobrists clected 31 doputies, gaining is more sents than they had tilled before. On the whole, as a ronsecturnce, the Second bumb helit tmare radicalism in tts make-inp, with levs Intelligence, that the First.

Its metings were opened on the 6th of Mareh, and son gare eviliener that the antag. onisus in the boif were tox extreme for any influential pelitical work. lu June M. Stoly: pill aceused nust of the Socinlist members of heing parties th the refolutionary propaganda in the army amd mivy, and demanded tbeir suspension by the Duma. It refused to suspend them without an investigation of the truth of tbe charge, and appointed a combittee to receive such evidence as the government could bring. Therenpon the Tsar, hy a manifesto puhfished on the 16 th of June, dissolved the Secuth Duma az summarily as be had disoolend the First, ordered new elections, to begin on the 14th of September, and summuned the Third

## Duma, then siected, to meet on November

 I4ch.At the mame tlase new electoral law was procialued, In filgrant violation of the so-calied Conatleutlan of October 80, 1805, which had de. clarel, an ant "immutabie rule," oxtablinhed hy the "inflesloie will" of the Taar, that "no haw can ever come into foree without the approval of the state Duma." The new law was planned carefully and akllfuliy to dafranchise great unmbera In the clansea of people which anto roucy fears; to adil welght to the vintes of the ciasses on which lt lean - to diminlsh the representation of Industrial ciliea, an well us of non ISusalan districta, - l'olami, siberin. etc., and, generally, to unake a farce of the pretended concersiun of representative nall constitutlonal goverument whilh the autocratic court hal bren piayling for the nmusement of the eountry during the past two years.
The new electural law accompilahed Its pur. powe of wecurlug a Duma that would kecp workahle relatons whith s. Stolypin a very lutilligent Eugltsh publiciat, IIr. Dillon, who divenseds Foreign Pisfitics every month In the Contempurary Rereicr, whose vlews are hroadiy libemi us a rule, and whose acyumintance with Russlan atfalrs seems to be apectaily Intimate. lucilaes to Justify the measure on this practleal ground, or, rather, to nce.pe it as approved by ithly resuit. When the make-up of the Thirit Duma bai become knuwn he wrote, In the C'on. iemparary Rerien of Ineember, 1007 , as folluns:

M Ntolypin's ehecturnl haw has been crits. cland s.virity. And, to be frank, one must mimit that from the polnt of view of men what
 mere nookery For it suspendet the right of eloction in sume plares, arlitrarlly lessencal the number of repreamatives in certinin provhices, cruated gronps of electurs, and authorlsed Gov. ermment ofticials to decide how they should ine furmed: in a word, it is $n$ incrana of manlpulatIas the elrections for the arowed parpose of inaing a cortnin stamp of moll returned and an. other type of men ellminuted. To say that the ('hamlier whleh ins resulted from these expellt. unts is not the elect of the nation ls, of course. it truism. It is not, and was not, meant to lie this. . Thar data respectlog the Intellectual anii social stanus of the newly plected nre sthif very defective and untrustworthy. But so far ns they go, they show that amonit the men who are about to rescum Russia from ruin there :Ire: :-

"The Third Dume la already a month old, and has ne yef done no work, has not even organked Itself. Phatina lente fis evldently its maxilu,
with the accent on the second wonl. Inthater with the accent on the second wond. Dh hetei there have been not a few, but they were ha the mine of soundilng lirame and tlakiling rymhais. The trat discusalon took place on the mution to thank the Twar for the Octuber Manfento, whith crented the Legialative Chumbier. A grent ma jority of the deputies - Including the cionstitn. tlonal I emocrata, who are ailjusting themselves to thelr enviromment - were in favour of expres alng thrif gratitude, but they coult nat agrir how the cali the Inatitution for winh th therfit grivecful. Some wanted to uame lt a Cinnstiti
tion. others a reunvatel oricr of thinga.' if $1 t$ tion, others ' a reunvated oricer of thanga." If $1 t$ In a Conatitutlon, then there In $r$. Autiocrut, the Oehbrists argued, and conseque..ily that thit ol
the Emupero; must he dropped. If we an bolt on thanking the Tsar,' replied the Conservathus, - let us do it witla a guod arace. Whaterep name we may give to the prevent rigime, the tete of the ruler has undergone no dimage. Ite was an Anturerat whe tec ascended the thron. and he is un Autocrat to day., I'roofs ? Thry are ns plentiful as hathberries.

- i3ut the Constitutlomalists - and tunong them the Oetolirists favoured by M. StolypinInsisted. 'Byithe Manlfe-to,' they arguen, 'tie Tsar limited lils autiorlty and curtailed his pre rogatives. Thus it is no longer In his power io
issue lawa without the approval of the thuna: lssue lawa wilhout the approval of the luna: netther can lie alirogate any of the (trgmaic Statutes.' 'You are mistakicn,' answered the

 clectoral franchlse not heen changed?: the Ochorists stomi their groundi, anil the int
drems was voted whth a flaw in the Twars tith: That was the work of one whole dhy and part of a nlght - an unlueky day - the 18th Xincom. ber llussinn styif. In this way the Inmatiof. fered the sovirelgn a pot of honey mingled
with wormwool. The fremier was uput , withi wormwoond. The Premier was upsit. The Tar offended, and the Monarchists ladignaid. 'This, then,' the Monarehists exchatmed. in M. Nobiypin's Dumn, the areopugus whlch is toprescrily, rmmedies for the Jussiau nntion uun at death's door ?'

Three days later came the Premier in a $y^{\prime \prime}$ ego mood. Aud he was at hls hest. Fiver place
fils first appearnnce as a mulife oratur. No. sulf. fils first appearnnce as a pulbico oratur. M. stole. pin ias kept the high place he then won. His utterance Impressive. Ilis look, hals necents. his gestures, hetoken sincerity, anl fis mamm is warm with the hers of sulviued enthusiarm. On this hlatoric day he stmply ciectrified the
 applause from hits bitter enemies. And yot he was battling with the Dumu. swimming agains! the current. He spoke of the Autocratir pumer and of the Autocratic Soverelga, noul hall the satisfaction of heing interrupted by enthansiastic cheers.

Happily M. solypin is a mnn of stealfaci purpose raitiem than brillant inteliect, for his moral qualitles may stand hlui in better stead,
during the revolutionary crisis than wouli rare mental gifts. At buttom bis whper in Liberat rather then Conservative, and mululy for that prown he would aeem in bave been choven to be sextun of the old epocts and hartulager of the いew.

- No fint minied man can doultit the nincenty of M. Stolypla's Li'eralloun. It las withstovil the test of time and the presoure of unfavourabie
 no tirn that he deelluis th dhagrow any diseases that rail for more drastle remembers. . . . M Stolyphis at present the onty futhentini politi. cian fin finswia who is worklag cilicarlonily for
 lng hilulrancers to Comstrtuthonalives which are move formilable at the rutrent.
"But the greatest servere which any Minater could rember a rause wis porformen by M. stulypin fir lifierulfou at a the wheu it depemildid bal hime elther to liay the grommolwork for a Consticutional fubrte or to estalhlwh tirm Monarch. tal movermmat. Amb for that morsife he de-
 from Democratie' Rhasla. He mithed the "tsat to muman the Thiti Dums sxall atter the Nec. ome and to lowte no laws in the meanwhile. That way renlly the turning polint in the blatory of Itisathe' ('onstitntion, the mem!num opua of Il stotypin's poltical life. And he follow, it it up with a st-p more "xtaordimary and dechlve aill. He himeelf hat recourse to the Aatomerate funer whidh it to the teadeney of hils molley to aminiinte, and he used It for the pmirposs of destroylag Autseray. That surily was a coup de metitre whell ent thed the Mhister to the unAstare gralltule of all lilheral hasisala. Bat not a liberal uttered a warl of thanks. This demily how was atruck at the Autocracy lu the fellow. おu: wiy

Thic Electoral Law opened the protals of the Thum chatly to bemorats nat ofler irrecoucli.
 remanded in force, wo Dumia arepptable to the (iorernment was poosibles. Yet it combly not lie Ahrongated. For, burcther with the "rsanic -atutes, it had been declared part of the un. dhanceable comstitution. The Tar's hatule. therefore, wrote thed, his morl was pledged and the remult wus a deallock. Autorratic power comble not whed anew without erferting a proilomse conp elituf. Well, the Premicer ant.

U'adouhtedly, the range of the permisuible has grown lmmentely since the enrly dage of even Nleholes II. To write of fator wars, of conspuracies, of conatitutionai iliertes, IVumalan newapapers need no ionger conthe themselv en to telegraphie reports of for. ign strikes, conspirackes, and constitutions, Ther need oair print what the raticals in the lumn utter. Not even the full Dumis reporta mar be privileged at present, but, wite: all, the Rusalan censor is a stupld fellow. The censorship, ilke the autocrary in general, is ineflicient. pasmudle, aliowing to-day what it prohlbited caterlay, or even bliowing in one eolumn what t atrikes out from another. St. Hetersbuig and Mow:ow in 1900 hai rloven dally paper, and twenty wucklien. In 1000 the aumiker had rimen to twenty four dillits and thirty three weeklles. Ia all IKussia there were then $2 x 7$ perloxileal publicatlone. In August, 1005, the number had Hw'a to 1, 330 , of whifeh St. I'etershurg alone had 531. There were fifty daif papers at At. Peters. burg and twenty-five at Jowerow in those short lays of fredom, when the pentup speceh of ages hurst out in Ituesh. This, of course, was inflation. Ieriodlcais were born anil tlen with the rlsing and wetting of the sun. The numerleal atrength of the press must be far sinaller unw, But muen that was galned for freedom of speech in thowe stormy days has not heell 1ost." Dere York Erening Poat, Mareh 24, 1040.
A. D. 1909 (Jan.-Juiy). - Dark Secrete of the Russian Police ad Spy System brought to Light, -The first in a serieg of starting disciosures of the diark seerets of the Russian espionage and police syatem was mate In january. 1069, when it cante to pulsic knowledee that the hemi and front of the Revolutionary torciaists of the Emplre, one Arefl bir name, had been discovered by his assoriates in be a secret agent of the piliee: hai buen tried and condemned by a tribunai of their party, at Paris, and had escapeif into some hid. ing piace, with avencing comisanarits In purault. to take his life. A little later it appeared that a firmer i)irector of the Pulice in the Denart. ment of the Kussian Ministry of the Interior, 3. Lopukhin. had been arrested for treasou, on the charge of having leetrayed Azeff t" the Rurolutionists, by rakiug knowr on them the Inulle part that the iatter piaye . is st cucalled
 phis of which be kept the police informed.

The prelhminary triai of lopukhin occurred in April, and it was atated in thr indlctment
theo publined that Azer bad pepetratel into the vory centre of the Boclal Revolutlonary ina. chinations, and thas part of hle great services to the Eecret 1 B " ${ }^{\circ}$ ee were rendered during the period that M. Lusukhin occupiel the poit of Director uf the I'olice Jepmatment In the Minalytry of the Interior-6. C.i, from May, 1002, to March, 1008. It was afirsed that Si. Lopils. bln not only knew of the exintence and activity of Azer. lut met the latter more than once both at his (M. i.opukltris) house and at one of the conspiratorial headquartere in St. Peternhure. The indictment palif a warm trlhute to Azer's ablity in so long maintaining hls cotaexton with the pollce without awakenigg the suspiclons of the Soclai Revolutionarics es to ifs true character. It was eventually remarked, however, that the nlots In which Azers was concerned invariably talled, wherens inany of the others succietled, and sccusations of treachery hegan to be ievoiled againat him. In Octolver, 1909, a commlanlon of lajulry was ap. polnted hy the Suclai ikevolutionaries in Parta to ingulre Into the chargee brought agalast Azeri, I3urtzeff, edtor of a revointlonary organ, stated before this trlimnal that ise had men S. Lnpukhla, who hai informed him of Axretr's relathonm with the Ifusslan prilce.
M. Lopulibin, on his iriai. sulmitted having given this Information to Burtzeff, hut ex. plalued that It was in consequence of what the fatter hai told lifm of the revointloniat itesigus, Including a pending piot against th, ufe of the Tear. Ife then folt ft his duty to unmask Azeff, leat the murders whleh might otherwise have followed shinid the on his consclence, and when the revolut lounries came to inin for confriuation of what he thal tolif Burt. geff he found it huposthine to retraet his words. Ile was ennvicterl, inwever, on the 13th of Bay, and sentenced to five rears of imprisonment at laril ithor, with the loss of clvii righte. The sentenee was mitigated subseryuently, and he was eent to exile at Krasnoyarsk, illieris, hils family beiog ailowed to necomipany lilm.

Prince L'russoff, whise boid speech in the Flrat Duma on the instication of massacres is funted from above (A. i). 1:KM), is a brother.inlave of M. lapukalu, ami dorived from him, no doubt, the information wit which he spoke.

In July, a now disciosure of the character of the lkussinn secret service police was made, at revolting as that in the Azeff rasc. A peranoage known as \$. liarting, chtef of that Ruesian servlee in Paris, and on favombly regarded in the French capitai that he was alnut to be made an officer of the legton of llonor, was discovered to bave bren the li-arder in a piot to assassinate the Tear Aiexander III. in 1800, durIng that monarcia's plalt to Paris; that he then lore the name of Landesen; that ine had eacaped arrest and was romiemued by defanit to Inipris. onment for five years ; that hisulosecuently uneler the new nan.* secured suerct service em pioyment In the Russian polier. All this was guiekiy proved to be fact hy the French Government. and oftheislly announceri.

and subject to uitimate ratification by the Duma. Writing of it In the New York Erening Pont of May 28, 1909, S. N. Harper says: "This Iaw of November $\theta$ aims direetiy at the deatrue. thon of the commune. Before thls law a twothirds vote of the commune was neecssary for the granting of the petition of a member to divicie out. Now a iocal poilee oflclai, whom by the way another project of reform abollshes as irresponsible and a sourec of abnse, ean overrlde the vote of a commune and grant the petitiou. A peasme who divldes out recelves that portion which le is asing if there has been no redistributlon for twenty fonr years. If there has been a redlstribution wititin twenty-fonr years, be reccires what he wonid receive on the Lasis of a new redistribution - what this would be is itgain decided by the oftletai. As we saw, po equitable reetionlig is possible here.

The peasant can seil this land whicin he re. celves from the commuluc, for it is uow his private property. In one provlnce whieh I visited thls summer, in over one-hnif of the cases of dirlding out the peasant had sodi his iand im. mediately - usnaily to the viliage 'fist' - the prosperous villnge usurer aad boss who holds Lis aelghiors in his tist."

The law was operutive for inore than two Years before it received the sanction of the Duma, in April, 1909 . Of the parilanientnry enactment then given to it the above writer sars: "The outcome of the debutes was certain. It had been secured by the change of the ciectoral law for the third luma, whereby the iunded gentry ifall been given the predoniinant vote. . . No more important tban the vote of this assembly is the attitude of the country at large toward this law. Tbe ianded gentry nre moturally for this neasure. The village system is a souree of danger to them. The law will establish ' peasant 'landlords, whose' interests will be much the same as theirs. But the peasants hare shown quite pianiy their hostile attitude toward this law. Onir those peastuts who arc econonically provided for and those who. for one reason or another, inve inecome mere hangers on of the forni polier ofl. elais are in faror of tbe law. it is these that lave taken alvnntage of the inw, with the suijport of the local oftieiai. But they hare done so In splte of the protest of the other peasants, ouly their romnmie position making it possibie, and their friend the officinl has not been able to prevent, tharefore, the other peasants from glving a vholent chiracter to their protest. Those who have insisted on dlviding ont have in many instanees been burned out the next week.'

## RUSSIA, 1909

## ST. LOU1S

" The Duma Committee, after 35 sittlnga, adopted a proposal conslderahiy extendlig the cope of the Goverament Bili besides providing for the re establishment of eiective justices of the peace, introdueed in 1864, hut repealed in 1849 ln favour of the arhltrary jurisclictlon of the Communal Court and the Zemsky Natchal. nik-both long ago discredited institutions. Just as the Agrarian reforms are calculated to pronote the private ownership of land and respect for the rights of property, so the reform of the locai Courts will inculeate respect for the iaw.
"The detalis of the BHil may possibiy give the to differences with the Government and the lpper llouse, but its substantial features will be donbtlens retained in the ultimate form which will receive the imperial sanetion."
The writer of this had eommunlcated to his journal, a fcw days prevlously, the foilowing report of an intervlew with "a leading member of the Government," and apparently gave credit to the sentiment it expressed. Sald the Minister ioterviewell:
"Yoll ask me what are the Govcrament's ln . teotions regarding Poland. I can only repeat what I snid before the Joint Commission on the Polish Muuicipal Keform Bill, which ls to be laid berfore the Duma. We have declded to give Piland the full beuefits of iocal government consistent with the iuterests of the Emplre, but not autonomy. We cannot trist the Poies to that extent. We shali Introluce a Bill creating a separate province of Holm, where the great majority of the popuiatlon is of Lussian stock, mallil cetend to it the system of mlxed Russian anil Polish Zematros to be introluced in the south western provinces.

RYAN, Thomas F.: Investing in a Confession in the Congo State. Sce (in this vol.)

- I am satiffled with the progrens of agrarian reform. You have seen from the speech of M. Krivosheln in the Duma that one million peas. ant households (about $5,000,000$ souis) have already abandoned the eommunai system.
- The continuance of executions is, I know, a source of critielsm. You know that 'the Emperor has given orders that death sentences shouid he confirmed oniy in the worst cases. Unhappliy, I know of no constitutional method for putting down revointion. Russin is so vast. It has taken a fong tlme to bring all the gulty to trial. I am also eriticized for the arbitrary acts of our local authoritics, but, I ask you, does the Govcrnment derive any interest from these arbitrary aets?
"Political reforms? Yes, they have been delaycd. But what, for lnatance, Is the good of hurrying through a Bili on the liberty of the person until we have first refornied the local Courts ?
"You have heard and read the statements that the Octobrists have quarrelied with the Government ; yon have also becn told that liussta is on the eve of a raction. Beileve neither. The Oetobrlsts are taklig a more advanced position. That is as it sbould be. It is better for the Iuma and by no means dieagrecabie to the Govcrnment."
A. D. 1909 (Dec.). - Assassination of the Chief of the Secret Police. - On the 291 of Decculher Colonel Karpuff, Chief of the Secret Pollce, was kitled by au infcrnal machine at a suburban lodiging occupied by a certain Vosk. resensky, wio is supposed to be a revolutionary and a police spy like Azeff.

A. D. 1904. - The Louisiana Purchase Ex-position,-Except the World's Columhiau Ex-
position at Chicago. in 1 $\times 93$, the most important of the industrial exiibitions that lave been organizel in America was that of 1904, at St. louis, which conmemorated the centennial of the Louisiana I'urchase from France. The Expositlon was opencd ou the 30 th of Aprii and (llosed December 1st. An estimated totai of $\$ 4,500,000$ was expended upon $1 t$ in structurcs and managcurent, of which sum about $\$ 22,010$. 000 was raised by the Exposltion Company. The remainder was the expenditure of governments, Federal. State and Forclgn, and of concessionalres. Thic total attendance, from first to last, was $18,741,073$. The receipts fell far short of the expenditure. and subscribers to the undertaking ean have had no returns; but the mublic gain from it was very grcat. About slaty forelgn countries and colonies and cearly every State and Territory of the Union were r . presented in the exlibits.
I distingulshed feature of the Expositton wis the remarkatle number and character of the gatherings. international and national, that were
brought about in connection with it. The most notable of these was the International Congrena of Arts and Sciences, which opened September 19th. "This Congress," said President Nicholas Murray Butler, of Columbia University, in an article descrihing its plan, "is rot such a series of gatherings as touk place at Chicago and at Paris, but is rather a carefully elaborated plan to educate public opinion, and the world of scholarahip itself, to an appreciation of the underlying unity of knowledge and the necessary inter-dependence of the host of specialties that have sprung up during the past century. For participation in thls congress there wiil as. semble a large boxly of the worid's greatest scholars. They will come from all parts of the world to contrihute surveys of their several departments of knowledge, planning those surveys 80 ns to emphasize the mutual relations of all the separate arts and sciences."

SALTON SEA, The. - At a point not far from where it runs into Mexican territory the Colorally liver. for a long recent period, has bern dit wul by bordering sand deposits from a great depression in the neighboring desert. known as the valton Sink. In $1: 01$ an irrigation company hirgan works for supplying water from the 'olorade to lands in that vichity, and seems to have takeu no proper precautions for erontrolling the thow through its canals. The result was a break through the sand bills, into the Sal. ton sink, which converted it for the time being Iutn the "Salton Sra," - so described in all ac. rounts of the catastrophe. For nearly two years the themi if the Colorado was poured into the Sink, forminy a sera or lake which covered an area of about 400 square milies. It was not until Fobruary 1907 that the comblined exertlons of the Southern Pacific Railway Company, tive Caiifornia Development Co. (whosc works pro.
duced the trouble) and the engineers of the $\mathbf{r}$. 8. Reclamation Service, succeeded in returning the Colorado to the channel it had escaped from. Since that was done evaporation has been stead. ily emptying the Sink, at the rate of five or sis feet annually, according to the Chief of the Weather Bureau, which has maintained a sta. tion there. At the end of a year of observations he was reported as saying: "We will get the data we want within another year probably and then we can cut off the Salton Sea station. The evaporation data we expect to obtain will he valuable for calculations on irrigation works and reservoirs."

SAN DOMINGO: A. D. $1901-1905$. - Financic! Conditions. - Dissipation of Revenues. - Many years ago the governmeut. belng unable to ralse money on ordinary security, adupted the practice of vesting the power
of collectlon in its creditors. Dnties are setlye of collectlon in its creditors. Dnties are settlel in pagares, or promissory notes, duly indorsel, nnd payable usually in a month or two nonths. In order to secure ioans, these pagari's mere handed over to the creditor, who coilected the money directly from the importer or exporter This expedient, which was designed to protect the creditor against the government itsclf as weil ns against its enemies, was in vogue when tie government in 1888 sought fnancial relie! in Europe. Such relief was obtained from Westendorp \& Compnny, bankers. of Amsterdam, who in that yenr underwrote and isstacd, nt 83$\}$ per ccat., 6 per cent. goid bonds uf the Dominican government to the nmount of $s \pi 00$. 000 sterling, the gorernment creating a first
Hen on all its customs revenues nad an hen on all its customs revenues, and authoriz: ing the Weatendorps to collect and recelve at the custom-houses all the customs revenu's of the repubiic. Under this contract, which was ratided by the Dominirnit Congress, the Wras. endorps created in Sani, - minero an estallish. meat, commonly ctile! the 'Regie,' which coliecteci the duties dirertiy from the importer and exporter and disbnrsed them. the Westeudorps seading out from Europe the necessary agents and employees. It was further stipuifinted that the Westendorps slould, in case of necessity, have the right to constitnte : Euru. pean commission, which it was understued was to be international in character. The puwer of coliection and dishursement was exercisid by the Westendorps down to 1893 , when it wis transferred to the Sinn Domingo Improvennint Company, of New York, which continseld to exercise it till January, 1901, when the rompany was, by an arbitrary executire der rer is sued by President Jimenez, excluded from its function of collecting the revenues, though its emplopees were permitted to remain in the cus. tom liounes till the rind of the vear.

ne2 constituted in the mame decree a Commis. sion of Honorabies,' with whom the sums due to forcign creditors, inciuding the Anierican companies, were to be deposited; but their capacity as depositaries was not destined tu be tested. Late in 1901, it became known that out of the reported revenucs of the year, amounting to $82,126,458$, the percentages for the domestle debt had not been set aside, and that no pay. ment had been made on the floating interior deht, but that tbe Jimenez 'revolutionary' claims had been paid without previous warrant of law, and that there existed a defcit. Since that time, witb tbe exception of comparatively small amounts, nothlng whatever has been pald to the foreign creditor. The omission, bow ever, has not been due to lack of revenues. It has heen due to conditions which, if ali the debts of the republic were with one stroke wiped out, would continue to prevent the gov crument from meeting its ordinary expenses. The revenues have been seized and dissipated hr the government and its enemies in 'war ex. peases, and in the payment of 'anignationes' and 'revolutionary clalms.. . . That foreign governments will stand by and permit such ton ditions to continue cannot be cxpected. They have already manifested their desire to lutereue." - John Bassett Moore, Sontu Domingo and the Inited States (Amerian Lhericu of Reviers, March, 1905).
A. D. 1901-1906. - Participation in Second and Third International Conferences of American Republics. See (in this vol.) Mmer. ican ikeptblice.
A. D. 1904-1907. - Years of almost Incessant Disorder and repeated Revoiutions. Jimenez, Vasques, Wos Y Gil, Moraies and Caceres in succession at the Head of Goverument. - Menace from the Creditors of the Republic. - Appeal to the United States. - American Treaty. - President Rooseveit oa the Situation. - The assassination of I'resldent lleureanx and the election of Presideut Jimenez are related in Volume VI. of this work (see Doninican Repreblic). Jimenez's rule was not long, and he gare way to a provisional gor. trument, under Gencral Vasques, which was upsut by a revolt that broke ont ln March, 19nli, and is hich pianted General Wos 5 Gil so nbvionsly in power that his Government was recog. nized by the Cinitel Stites in October. But the rapidy revoiving wheel of political events seems to have soon whirlet Wos y Gil out and hrousht Jiusenez back, to be tossed iuto private life again in 1904 by General Carlos F. Morales. of whom Mr. Sigimund Kransz gave a mont fir vorable account in The Outlook. of Sept. 17. 1904 "The commou idea," said Mr. Kramsz. "that the population of Santo Dumingo consists ex clusively of a horde of sarages, ani that the generals and politicians causing the kuleddo. scopic sequence of revolutions are of the same class, and, without exception, unclucated brites and degencrates. is quitc crroneous. und has been created for the sake of sensationalisiu. largely by journalists and magazine writers without personal knowiedge of Dominican comitions, or by native exlles who, naturally. are alwars enemies of the party iu power. . . While it is true that the vast majority of the Dominican people in the lnterior of the islsnd live in a fearful state of ignorance, superstition.
and even barbarism, caused by nany decades of internal warfare, there is, however, also a class of natives who ccrtainiy ought not to be thrown in the same pot with them. Theseare the better citizens of the capital and the larger coast towns, among whom are many inteiligent and educated men who had the advantage of fairiy good schools and intereourse with foreigners. Among this class are a number who have received all or part of their educatlon abroad, who speak two or thrce languages, and who, in tbeir social in. tercourse and manners, may safely be pronounced gentiemen. They follow the secupations of merchants, planters, lawyers, physicians. etc., and whlie, as a rule, they kecp aloof from politics, it is from their strata of society that spring most of the military and political leaders of Santo Domingo. There are few of these men who, by thelr appearance, betrap the strain of negro biood in them, and the type is hardily dis. tinguishable from that of Latin-Americans iu gencral.
"Carlos M. Moraics belongs to the better class of Dominicans mentioned before, masters French, Engiish, and $\mathrm{S}_{\mathrm{i}}$ analsh thently, and has the adventage of an ecclesiastical education iu a seminary of Santo Domingo City. He was, iu fact, for eight years a priest, before disagreement witi various dogmas of the Church and the desire to take an active purt in the political affairs of his conntry induced him to throw aside the cassock. Ife is a close student of West Indian conditions, aud well acquainted with the affairs of the worid in general. While being an ardent admirer of the Cnited Sitates and its institutions, and sincerely lesiring its political friendship, he is at the sime time the strongest opponent of any policr that would tend to make sianto Domingo a political dependency of Uncle sam, either iu the forms of annexation or a protectorate.'

Morales was soon beset with claims from insistent foreign creditors, on account of debts Which lis predecessors had incerred. and which they had ieft wothing to satisfy. Reveral European fovernments were thrcateniag forcible measures to secure payment for their subjects, aml Morales asked for help from the Lnited siates. The situation aui its ontcome were reparted subsequently to Congress by President Rooserelt, as follows :

- The conditions in Sant, Domingo have for a number of years grown from bai to worse until a year ago all suciety was on the verge of dissolution. Fortunately, just at this time a rulcr sprang up in santo Domingo, who, with his colleacnes, saw the dangers threateaing their country and appealed to the friendship of the only great and powerful neighbor who pussessed the porer. and as ther hoped also the will, to help them. There was imminent danger of foreign intervention. The previous rulers of Santo Doningo had recklessly incurred debts. and owing to her internal disorders she had ceased to be able to provlde means of paying the dicots. The patience of her foreign creditors had become exhausted, and at least two forcien uations were on the point of intervention, and were only prevented from intervening by the unotlicial assurance of tbis Government that it woukl ltaflf strife in hrlp Santo Dominge In her hour of need. In the case of one of these nations, only the actual opening of negotiations

## SAN DOMINGO, 1004-1907

## SAN LOMINGO, $1805-1007$

to thls end hy our Goverament prevented the selzure of territory $\ln$ Nanto Domingo by a European power. Of the debts Incurred some were Just, while some were not of a character whlch really renders it obligatory on, or proper for, Santo Domingo to pay them lu full. But she couid not pay any of them unless some stablility Whassured her (overnment and peopie.

Accordingiy the Executive Depurtnient of our Government negotiated a treaty under Which we are to try to help the Dominican people to stralghten out their finances. This treaty is pending before the Senate. In the meantime a temporsry arrangement has been made which will last untll the Senate has had tlme to take action upon the treaty. Ender this arraugement the Dominlcan Government has appointed Americans to ail the Important positlons in the customs service, and they are seelng to the ionest coilection of the revenues, turuing over 4.5 per cent to the Government for running expenses and putting the otice is per centinto a safe depositary for cquitabie division in case the treaty shali be $r$ titied, among the various creditors, whether Europesu or American.

Tuder the eourse taken, stability and order and ail the benefits of peace are at fast coming to Santo Domingo, danger of forcign intervention has been suspended, and there is at iast a prospect that alf credltors wilii get justice, no more and no iess. If the arrangencut is termi nated by the failure of the treaty chaos wili foliow: and if chaos fullows, sooner or later this Government may he Involved lu serious difficulties with foreign goveruments over the island, or clse mar be forced itseff to intervene in the island in some unpleasaut fasinion. Cnder the proposed treaty the indiependence of the island is scrupulously resprected, the dan ger of riolation of the Monroe Doctrine by the Intersention of foreign powers vanishes, andi the interference of our Government is mini. mized. so that $\pi \cdot$ shail oniy aet in conjunction with the santo Doningo anthorities to secure the proper adminlstration of the customs, and therefore to secure the payment of just iebts and to secure the fominlean Governmeat against demands for unjust deits. The proposed method will give tike peopie of Santo Ilomingo the same chance to nove onward and upward whlch we hare already given to the people of Cuba it will he donbly to our dis. credit as a nation if we fail to take adrantage of this chance : for it wiil be of danage to oure selves, and it will be of lncaiculable damage to Santo Domingo." - President's Mesarge to Congreas. Dereminer 5, 1905.
Twenty days after the above was sent to Congress President Morales was a fugitive from his capitai, exp-lled by a sudden revolutionary morement in whlch Vice. I'resident Caceres and most of the Morales Cabinet appear to have taken a leadlog part. Some tgitting orcurred ; but the Morales force were beaten decisively in the first week of January, 1906, and their General, Rodrlgues, was killed. Moraies, wound d, sought protection at the American Legation and resigned the Presldency, January :2. C'aceres succerded to the office, and a treaty of peace between the contendlug marties was signed in the 17th, on hoarid an Cnited States vessel of war. The new Government $r f$

San Domilngo adhered to the arrangement made by Morales with the United States.

As ratifled ultinateiy, in tho spring of $100 \%$, by the United Stites Senate and the Dominican Congress, the treaty provided for the conserslon of the embarrassed repuhlle's debt and the floating of a zew issue of bouds, tirrough the ageucy of a Hrn of New York bankers whleh had uudertaken the manage:nent of the affair; while the Government of the Unltel Niates, ly Its agents, was to contlaue its supervision of the collection of revenue.
A. D. 1905-1907. - The American Receivership of Dominican Revenues. - The Modus Vivendi of 1905 and the Treaty of 1907 - The working of the A1rangement. - $\because B y$ the modus rirendi of March 31 , 1005, it wai provided that untli the IDminican Congress nud the Senate of the U'alted States sioulifec ulpn the conventlon of February 7,1905 , the Presideut of the Dominlcan Rrepuhtic. in the nomiuatlon of the President of the Conltel States. should appoint a person to receive the revenues of ail the custom-noures of tive he. public. Of the net revenues collected, 4.5 jer cent was to be furned orer to the Dominienn Government, and nsed in administrat:ve ar. nenses. The remainder, less the expenses of rul. fection, was to be deposited ln a bank in Niw York to be designated by the President of the luited States, and to iemain there for the benefit of all creditors of the Repuhlic, Domiut. can as weil as foreign, and not to be• Tithdrawn iefore the IDominican Congress and the semate of the United States should have acted upore the convention then pending. During the rperation of the modus rirend ail payments were to he suspended, without, however, in any way interfering with or chauging the sulhstantiit richts of creditors. This moklus rirendi welt into effert on $\Lambda_{1}$ iril 1, 1005. Under the receivership "reated by this modus rirendi three hac berell collectedi, to August 81, 1907, \$7.183, 397, it Of this amount 45 per cent was inrned over to the Dominican Government, ac. 1 \$3.31s. 9 miv , (ti) hear interest whife on deposit, ins ben ro mitted to Nere York. This is in striking enn trast with the results of the customs operations of former sears, when, inaving control if the entire revenueq of the Repulhic, the Dominitan Government ind not only heen unable to fay its chrrent expenses, but found its apparmit publle debt increaseti at a arerage rate of almost $\$ 1.000 .000$ a year for some thirts onfd ycars. The conrention between the inited States and "Dominicnn Republic, signed at Santo bum: City on February $\&$, 101 and ws transmlt! 19, 190'. he L. S. Senate on Fuliruarr was ratit. the 2 ith of the same nicuth. States. The latter agrees to give this asb:stanee subject to certalin conditions set out in the treatr, the princlpai among which are (a) the President of the Linited States shall appoint the general recelver of the Dominlcan customs nil his assistants; and (h) that the 1mminican Government shall provide by law for the payment to such general receiver of all the customs dnties of the lepublic. The money collected is to be applled as follows: (1) To paying the expenses of the ""relvership; (2) to the pay ment of interest on honds issued by the Do. minican Government in connectlon with the se:thenent of its debts; (3) to the payment of the annual sums provided for amortization of sald honds, including interest upon all boods held in the slnking fund; ( 4 ) to the purchase and cancellation or the retirement and eancella. tion, pursuant to the terms thereof, of any of sail honds as may lie directed by the Doniini. can Government, and (3) the remaluder to be pald to the Doninicin (Government. On the lst day of each culeular month the sum of 8100,000 is to be paid over by the recelver to the fisend agent of the loan, and the remaining colluction of the last pr. ceding month pald over to the Dominiean Gove nment, or applied to the sinking fund for the purehase or redemption of bonds, as the Doninican Government shall direct. Should the revenues thus collected exceed $38,000,000$ for any one year, orebalf of the surplus is to be applied to the sinking fund for the redemption of bouls." - liphirt of the Chity of the Bureau of Inauler Affuirs, ext. 31. 1!Hi (Abrilgment, Yessaye and Dortmentx, 19017, $p, 797$ ).
SAN FRANCISCO: A. D. 1901-1909. Water Supply. - The Hetch Hetchy Project. - " ['nder this name is designated a plan fur , thatining a water supply for the eity of san Francieco from the head wawes of the Tuolumne kiser in the sierra Nevada mountai•s. The Hetch lietchy Vall is one of the most whely hnowa reglons of the hlgh Sierras, second only to losemite in scenic interest. it is form: 1 in a widening of the gorge of the Tuolumne liser, about 01 miles westerly from the crest of the sierras. It is thus described in the United States Geological Survey, 21st Annual Report.
$\cdots$ The ralley proper is about three and onehalf milcs $10 n t^{2}$ ind of a width varylug from oue (puirter to thrie quarters of a mile. The rugged granite whlis, crowned with spires and upin hattlements, seem to rise almost perpendicular upon all sides to a helght of 2300 feet sbove thls beautiful emerald meadow.
" The Tuolumne liver leaves thils valley in s very narrow granite gorge, the sides of whleh rise precipitungly for wot or more feet. thus providing naturally a most farorable site for a masonty dam.' As the result of eshaustive investigations, in 1901, haviug reference to the pracuring of an adequate water supply for the City of San Franelsco, that city, through its proper ofllcers, selected, surveyed, filed upon and made application for the reservoir richits of way in the lletch lletchy Valley and Lakc Ele:nor, which lle within the reservation known as Yosemite National Park. Thesc reservolr site's were reeognized and surveyed as such by the I'.ited States Geological Surrey, in 1891. and the surrey filings and appllcation were made in conformity with the act of Congress of Fcbru-
ary 15, 1001. relating to rights af way throigh certain parks, resernations and other public lands.
"Take Eleanor la altuated 186 miles east of San Firanclsco on the west slope of the Slerra Nevad. Mlountalins. It is about 300 aeres in extent and lles in a broad, dat valley enclosed by precipltous walls of granite, narrowing at thi lower end of the ralley. It is 4,000 feet above sen level and recelves the direct dralnage frona 83 square milles, and by a diverting canal 6 riltes long from 103 square miles additional of uninhabitable mountain slopes which reach an altitude of 11.000 feet, and recelve on meran annuad precipitation of from 40 to 50 luc! es, most $0^{\circ}$ which is snow. Ahout is mile and a quarter telow the lake the valley eloses luto a granle walled gorge ant offers an exedlent site and material for a dam.

- Heteh lletchy reservolr (site) is about 140 railes from san Francisco on the main forts of the Tuolumne intesr and is alout 3,704 iect above sea level. It receires the dra -o. from $45)^{2}$ square milts of the uninhabitabli shpes of the sierra Nevala, reaching to elevations of over 13,010 feet.
"The' Hetel lietchy project proposes to conduet the winter liberatell from these reservoirs by way of the gorge of the Tuolumic kiver 16 miles and thence by canals, tumels und pipes." - Frederlck 11. Clark, Head of 11 istury 1) pept, Lowell 1 ligh Schrol.
The epplication of the (ity to the [nited Sates Goverument for the Lake Eleanor and Hetch lletchy rexervoir sites was denied. In the
 rior, the Hon. A. E. llitiacoets, b.it subsepucutly granted, on a reopening of the case and a rchearinge, by Secretary lames 1h. (iarfidd, in whosie de. cision, rendereat lay 11. 1:0, the consilderations for and against the proposed use of these famons se:its of natural beauty and sulilimity were discussid at length and concluded to have the grater weight in favor of the application.
One stipulation made by siferetary (Gartield was that within two years the City should submit the question of water supply to the vote of its citizuns, as contemplated in its Clbarter. This was lone on Novemher 11, 1908, cand the voters of -i.a Frmelace, notwithstanding the strennous eff orts of the private water comp:my, recorded their approval of the lletch lletehy Project by the overwhelming vote of $34,9: 0)$ for, to $3: 08$ arainst the proposition. At the same election a sald of municipal binds to the amount of \$600. (OH) was authorized in order to enable the City to proced to perfect its titles. These bonds have been soll and at this thate (June. 1909) the acguisition of the repuirel land is under way.
Almust passionate protests and pleadings arainst this use of the beautiful lletch lletchy Falley huve heen uttered by dohn Muir, the word-painter of "The Jountains of California." and many earnest roices from all parts of the country have betn joined to his in the expostulation. 31r. Mulr writes: " it is impossible to overestimate the ralue of wild mountains and mountion temples. They are the greatrst of our natural resources. (rod's best gifts : but none, however high and holy, is beyond reach of the speilet. Thers temple destroyers. Arvotees of ravaging commereinlism, seen to have a perfect contempt for Nature, and instead of 1ffting their

eyen to the :wuntalns, ifft them to dams and town akyacrapers. Dam Hetch Hetchyl As weli dam for water-tanks the people's cathe. drais and ehurches, for no hoifer temple has ever heen connecrated hy the henrt of man.

- Excepting oniy Yonemite. Hetch Hetchy is the most attractive and wonderful valier wlthin the bounds of the great Yoemite National Park and the best of all the campgrounds. Peopie are now thocking to it in ever-increasing numbers for heaith and recreation of body and mind. Though the wails are iess suhlime in height than those of Yosemite, its groves, gardens, and hroud spacious neadows are nore beantiful and picturesque. It is many years since sheep and eattle were pastured in it, and the regetation uow shows scarce a trace of their ravages. Last year In Oetober I visited the valley with Mr. William Keith, the artist. Ile wandered about from riew to view, enchanted, made thirty.eight sketches, and enthusiastieally declared ihat in varied picturesque beauty Hetch lietehy greatiy surpassed losemite. It is one of God's hest gifts, and ought to be faithfully guarded."

When this work went to press, in May, 1910 Secretary Balinger was giving hearings on the question of revoking the permit to Han Francisco.
A. D. 1901-1909. - The Struggie with Pofitieal Corruption. See (in this vol.) Mrenci bal. Government: San Fibaicisco.
A. D. 1902. - The Chinese Highhinder Assoeiations. - Report of the Industrial Commiasion on their Criminal and Dangerous Charaeter. - "Inrestigntions madie under the directions of the Industrial Commission re. veal the dangerous importance to be attached to the existence of the so-ealled associations of 'highbinders' among the Chinese popuiation of san Franciseo. It is rariousiy estimated that of the total number of Chinese in that city ammunting to 25,000 or 30,040 , there are about 1.040 memhers of the highinder associations who represent the worst class of eriminais Many of them have heen compelled to thee from thelr untive country on account of crimes com mitted there. They are organized under the semtlance of benefit societies, but for the purpose of hlackmail and vioiatlon of the inmigration laws. They impose fines arhitrarily upon the hard working and prosperous Chinese, and enforce their decrees through criminal viodence nod even assassination. They nullify the judgment of American courts through their own secret tribunats and their paid assassins; ther make a buriness of hringligg to the United States siare girls nud coolle lahorers, and throngh their systen of intimidation it is difficult, nnd often impossible, to sceure witnesses who will testify to the truth. It is gencrally brifieved by those who have given attention to this matter, that if the country could he ridi of this criminal ciass of Chiuss:- and the hlghbinders societies be permanently suppressed, one of the greatest fac. fors in the commission of fraud tu the administratinn of the Chlncse exclusion laws would he eliminated. An eminent muthority asserts that fully $7 . i$ per cent of all the frands committed at the. present time agalnst the exchusion law can in. tracial directly to the highbinder assoria. tines. So perfere is theneganization of these so. eieties, and so thorough their reipn of terrorism, that the efforts of the authorities to suppress
them have never heen suecessful. The only thing which they fear above all others, holding it in grenter dread than our lawa, our courts. abu jails, is deportation to China. The oniy dect sive remedy $\ln$ that case is legisiation through Congress, which should reader aliens who are members of sueh societies, or any society havlng for its purpose the eommisalon of crime or the vioiation of our jaws, liable to deportathos. What is true of the highhinders of Snu Fran. cisco is probnhiy true also of certain anarchis. tic soncleties which are recruited fron Eurcpe." - Final lieport (1002) of the Industrial Commis. rion, p. 1000
A. D. 1906. - The Earthquake Shock of Aprii 18, 1906. - The Geological Explans. tion. - Stupendous Destruction by Fire following the Earth Tremor.-Conditions produeed by the Fire. - Relief Measures. -
On the morning of Aprii 18, 1900, the constal region of Midulie California wha sliaken hy an earthquake of unusual severity. The time of the shock und its duration raried silghaly in different focaities, depending upon their posi. thon with referenee to the seat of the disturb. ance In the earth's erust; hut in general the $12^{\mathrm{m}}$ A. M. Paccifle standard time stated to be 5 d $12^{\mathrm{m}}$ A. M. Paclitic standard time, or the time of the meridinn of longitude $120^{\circ}$ west of Green. Wich: and the sensihle duration of the shicis
was ahout one minute was ahout one minute.
-The shock was violent in the region alout the Byy of San Franclseo. and with few excep. tions inspired all who felt it with alarm and consternation. In the cities many people were injured or killed, and in some cases jursons inecame mentnily deranged, as a result of the disasters whieh immediately ensued fron the commotion of the carth. The masifestatlous of the carthouake were nnmerous and varted. springs were nlfected either temporarily or per manentily, sone helng diminished, others in ereased in thow. Landslides were caused on steep siopes, and on the bottom lands of the stremes the soft alluvium was in many places cnused to crack and to lurch, producing oftea very eonsiderable deformations of the surface Tinis deformation of the soil was an iampritaut cause of damage and wrecknge of himinurs sit. uated in such tracts. Railway tracks were huckied and hroken. In timbered nreas in the zone of maximum disturhance many large treps "cre thrown to the ground and in sonse casts they were sanpt of above the ground
"The most disastrous of the effects of the earthuluake were the hreaking out of fires and? at the same time, the destruction of the pipe systems which supplied the water necessary to
eonbat them. Such fires caused the destrue. eombat them. Such fires caused the destrue. tion of a large portion oi San Francisco, ats all the world kuows: aud they also intensifin, the calanity due to the carthquake at santa hine and Fort Rragg. The degree of intensity with which the carthquake made itseif felt by thee various manifestations diminished with the dis. tance from the seat of disturbance, nud at the
more remote points near the limits of its sennmore remote polnts near the dimits of its setsibility lt was nercelved only hy a feehie vibra tion of huildings during a hrief period.

The area over which the ahork was perce tilie to the senses extends from Coos Bar, Ore. gon, on the north, to Lus Angeles on the south.
11. The ouly thers, holding ur courts. nad he only deel. ation through lens who sre y soclety hise. of of crime or deportation. of San Fran. ain anarchis. ons Europe." trial Commis.

far as Winnemucca. Nevads, a dintance of about 304 millen from the coast. The territory thus affected has an extent, inland from the coast, of probahiy 175,000 square mlles. If we assume that the sea-bottom to the west of the coast was simillarly affected, which is very probahly true, the total ares whieh was caused to vibrate to such an extent as to be percentihle to the senses wss $9 i 2,700$ square milies. Beyond the timite at whith the vlhrations were suttic entiy sharp to appeal to the senses, earth waves were propagateil entircly around the globe and were recorited instrumentalify at all the more important seismological stations in clvilized countries.

Various manlfestations of the carthquake abovecterl, including the cracking and defo. mation of the soll and incoherent surface forma. thons. Were the results of the earth Jar, or eommution of the earth's erust. The eause of the earth quake. as wifi be niore fully set forch in the body of thls report, was the sudden rupture of the earth's erust along a ine or lines eatendine from the ricinity of Point Delgada to a polnt in San Benlto County near San $\mathrm{J}_{1}$ an; a distance in a neariy straight course, o? nbout 270 miles. For a distance of 190 milies from Point Arena to San Juan, the fissure formed by tills rupture is known to be practically contiaupus. Beyond Point Arena it passes out to sea, so that its contlnuity with the similiar crack near Polnt Delgada is open so doubt; and the latter may possihly be ar Indepencient, the nssoclnted, rupture paraliel to the main one south of Point Arena. It is most prolabie, however, that there is but one continums rupture. The course of the tissure for the 190 rulles thru which it has been followed is neariy stralght, with a bearing of from N. $80^{\circ}$ to $40^{\circ}$ W., but with a slight general curvature, the concavity beling toward the gurtheast, and minor local curvatures. The fissure for the extent indicated foilows the old line of urisnule dilsturhance which extends thru Call. furnia from ILumboldt Countr to San Brulto Countr, and thence snutherly obilipuely across the Const fanges thru the Tejon lass and the Cajon P'nss into the Colorado Desert." - Report of the California State Earthquiske Inrestigation (immmisxi,n, c. 1, pp. 1-2.
The Great Conflagration. - General Frederick Funaton, commanding the $\mathbb{C}$. S. troops at San Francisco, lost no time in midering them out for srrvice in the emerger $y$, and his report glese many interesting partlculars of the strur. gle with outbrcaking and spreading fires, in which they took an heroic part.

By 9 A. m.," he wrote, "the various fires w. re merging into one grent conflagration. and wire appronehing the Palace IIotel, Grumi 111 . iel, rali Buhidin, Emporium, and other farge buillings from the south . . . By thic morntige of the 19 th the tire had destroy at the mand pro tiun of the wholesale and retail section of the citr, und was actively burning on a line from ghout the corner of Montgomery avenue and y.matgonery street southwest in au irregular line to Van Xess a venue at Golden Gate nvenur:

The progress of the fire was very slow. It areramet not more than one block in two hours. By the night of the 19 th ahout 250,1040 penfle or mnre must have heen eneamped or slecping out in the open in the various military resirrations, parks, and open spaces of the city.
"On the night of the 19th, when the fire
rewhed Van Neas avenue, Col. Clarles Morris. Ariflery Corps, in command of the troope in that portion of the city, authorized Capt. Le Vert Coleman to dentroy number of huildings far enough ahead of the tire to make a elearing along Broalway, Franklin and Gough streeta, which apace the fire was unable to bridge, and in this manner was stopped after it had erossed Van Ness avenue and the fire department seemed powerless. It is my opinion that if it had not been for the work done at this piace the entire Weatern Addition of the elty would have been destroyed.
"By the morning of the $20 t \mathrm{th}$ the Western Addition, as that part of the city lying west of Van Xess avenue is callefi, was consldered safe, except from the dnnger arising from a very threatening contlagration working aiong the siopes of fussian liill towned that part of Van Ness avenue lying north of Broadway, Ail day of the 20 th an herule tight was made by the sol. diers, sillors, buemen, and eitizens to stop this fire, which hat a frontage of about half a mile, ard was working lts way slowly agalnst the wind. $A$ number of buildings wire destroyed here hy high explosives, and hack tiring was reser ted to. The fight at thils place wns greatif: aldes by water pumped froni the hay at Fort Mason.

By the most tremen. uns exertlons the flames were prevented from crossing Van Ness avenue between that port (Fort Mason) and the puint wherc they hnd once crossed and been fought out. By the morning of the 21st the Western Addition was considered safe, and the advancing fiames south from the Mission district had been stayed; but a rising wind caused the fire to turn northeastward from hussian Itili and destroy a portion of the city niong the bay shore that had bltherto been spared."
of the work of dynamiting that was done. mainly thy the soldiers, Major General A. W: Greeler, in a special report, says: "The author. ity for demolitous was in every case derived from the Mayor or his representatives. During all of the 1 sth and untll the afternoon of the 10th the city authorities withlield their permis. sion to hlow up any bulldings, except those in immedlate contact with others nlready ahiaze. Consequently, nithongl we were able to check the fire nt certain points, it outianked us time and again, and all cour work had to be hegun over in front of the fire.

By [afternoon of April 19th] the Mayor gave permission to take more drastic measurpes to stop the tirc."
After the Fire. - Of conditions after the fire General Greetry gives a vivid deseription, partly as follows: "On April $1^{4}$ this wns a city of $5(10,000$ inhahitants, the commurcial emporinm of the Pacific coast, a great iudustrial and manufacturing center, ndturned with mngniticent builtinus, eyulpped with cxtensive local transportation, provided with the most sanitary appli. ances, and having an abundant water supply. (In April ?' $1_{1}$ nge triumpis of human effort, this center " zathon, had become nscene of in. des. $\quad$ vesolation, more than 200,000 resilen sing tied from the burnt district alone, leaving sereral hundred dead under its smoldering ashes.

The burne arce covered 3,400 sries as scainst $\$, 100$ in Chicago nnd 50 in Boston. Even buildiags spared by the fire were dam.
aged at to chlmaeys, on that all food of the entire clty was eooked over camp trea in the open utreets.
"Two hundred and twenty- ife thomand peoplo were ant only homeleas, loning homes and ull personal property, but also were deprived of their means of present sustenance and future live. Hhoorl, Fool, wuter, shelter, clothing, medlicines, and surrage were all lacklng. Falling even for Jrinking purposes, water had to be brought long distances. Every large bnkery was de. atroyed or Interrupted. While millk and country proxluce were plentifui lu the unburb, local transportatlon was entirely finterrinpted so that even people of great weralth could obtalu foorl only by charity or pullle rellef."

Loss of Life and Property. - General Greeley "gives the loss of Ilfe In San Fmaclsco, includling some who subsequently died from injurles recelvel, as 804 known and 104 unkaown. In addltion, 415 persons were serionsly lajured. Estimates of the value of propurty destroyed nude up from the reports of settiements by the insurauce companles are given us follows In Best's Speclal Report on San Franelsco Losses and Settlenent, published la New lork. Feb, 25, 10,07: "The total loss to Insununce lustitutlons thromghout the worlel was from $\$ 290,6 \mathrm{MN}$, 000 t1 $\$ 2.5 \%,(40,000$. It is probable that the sound value of the property represented by thla loss was nearly or quite $\$ 100,000,000$ graater than the last maned higure, so that tbls contlagration takes rank as the largest In hlatory in puint of values destroyed. The loss fell on $2+3$ Insurauce Institutlons, phas those forcign companies (tweuty or more lu number) which have made no report to us." "

Maintenance of Order. - "After the arrlval of state troons ordered lito service by the gov. ernor of Californle, five suparate organizatioas were malntalniog oriler In San Francisco - the municlpal police, the nutional guard of Californla, the E'nite ${ }^{\text {l }}$ States $1 m \mathrm{vy}$, eitlzens' comnilt. hes, and the Unlterl States army, Under this multiplied control It was Inevitable that some clashes of anthority should occur, and that eitizons whould ut thies feel humpered by excess of rerulation, "It bears testimony," says General lirecley, ' to the judgment and forboarance of the personucl enforchig order and to the senjihle, law abhding qualities of the people of San Frameiseo, that during such prolonged and des. perate condltlon of affulrs there shomld hase been but mine deaths by vlolence. All klled were men, and four of the cases hare been the subject of Investlgation under the civil law.'

Relief Measures. - "Invnluable service of rellof was renderial hy the raitway companies, the wouthorn Paeific, under the personal drection of I'resident F. T. Ilarriman, nnd the Atchison. Topeka and Santa F'i, giving free transportation over thelr lines from April 18 th to the $2 f$ th, and afforling every pussible facility for the forwarding of relief supples. The ferries and suburban tines dial the same.
"Forl, clothing and tents furnlshed by Paclio coast cittios began to pour ln, followed quickly by similar supplies from inore distant polnts and by the War Department of the Unlted States under special approprintlon promptly male, by congrass. The proper bnndling and distribution of these rast quantlties of material and the control of the refugee camps that filled
the pubilc parks devolved upon the militur authoritlea Rellef aervice was promptly aji temstized hy the army oficers, sbly eislste after the opening week by Ir. Edwari I Devine, special ropresentative of the Nationa lied Crose. After July 8 tho army was whh drawn from the refugee camps and the te llef work passed under the control of the lie Croen and clizzens' organlzatlons, Mr. J. I) Phelan of San Franelico, ehalrman of the $F$ nance Committee of the Reilef and Red Cros Funds, thus commends the services of the spins In its management of the rellef opermtlons; 'ils cltizens we feel that the army in time of peace lias demonstrated Its efficlency and usefulness as it has In our days of tronble slgaallai'd its splemilld qualltles on the field of battle."

Behavior of the People. - "General A W. Greeley $\ln$ hls speclal report thus characterizes the behaviar of the people of Gan Frageifco, It la safe to say that nearly 200,000 permoms were hrought to a state of completedestitution,
beyond the clothing they wore or carried in beyond the elothing they wore or carried in their armis. The niajority of the community was reduced from conditions of comfort to lic pendeace upon publlc cliarlty, yet In all my ux.
periences I have never seen a woman In teurs periences I have never seen a woman In tears, nor heurd a minn whlnlag over his losses. 13 e. sieles this spirit of cheerful courage, they exhib. lted quallthes of resourecfulness and self. respert which must command the admiration of the world. Within two months the bread line, which at first exccedird 300,000 , was retuced to a con. parnilre handful - less than 5 per cent. of the orglnal number.' "-Frederlek II. C'lark, Ilead of Illstory Dept., Lowell Illgh School.
A. D. 1906. - Segregation of Orieatal Children in Publie Schools, - Resentment of Japancse. See (lu tbls vol.) Risce l'hus Lems: United States: A. D. 1004-1909.

A. D. 1906-1809. - The Rebuilding of the Shattered and 8urned City. - Improvements in the Reconstruction. - "The great tirc of April. 1466 , practleally ohliterated the busineos section of San Franclsco. Vast heaps of brik and stone and lron beams, twisted and lent, filled the area where the great hotels, bank and mercantile establishments, wholeanle and retail, had stood. The opport unlty to correct original crrors and to make lmprovements in the ground plan of this portlon of the clty was at once recognized. People said to one another: 'I.on. don, Chlcago, and Baltimore have hltterly re. grettel, since their great fires, that they dil not improve their strects. Are we to fall to take alvantage of thelr mistakes? A ('itherns' Commlttee on Reconstruction was appointed: many valuahle suggestlous were brought iorether: and an expert engincer was direeted to study the plans and make practical estimates of the cost of the more important improvemonts. A set of most commendahle clanges was thus brought to the polnt of authoritative alloption. These changes lnciuded, particularly, whe whening of streets needed for muln thorongh. fares, extension of a few maln strects so as to facilitate the distrlbutinn of traftic, the extenaion of shipping facillties along the water front, and
improving the thoroughfares leadlig thereto. The opportualty of making these improvemeats

BAN FRANCISCO, $1000-1000$
whlle the whole area was destitute of bulldiogs wes, of course, never llkely to recur
this point the whole matter came to a th fathl. It was the misformme of Kan Frau. elecn at thle critical moment to be under a mus. olclpal admlalatration, wholly lueumpetent and corruph Prlvate enterprise was stralued to the utmost In the effort to recover from the great luses, and from the waut of governmental initi. sive, all projects of munleipal lmprovement falled for the time Under a reformed eity guvernment after 1907, $n$ great deal of muntel. pal work wus undertukeu whleh will be indicated helow.
lichullding of privnte structures is a wonderfinl record of conruge, cucrgy and pesource fulness. The first stige was the rushing up of temporary woolen stritenres, - uny wort of a mililing that womld ufford slaciter and permit the resimpthon of huslness. For the must jurt the fimber yurls of San Franciaco were 11a. tomelicel by the flre, and thus the eity hat a cont. siderable stock of materlal for immedhate opratlons. Van Nesw A venuc nad uther former rosidenee strcets were som I Inedi with utue atory wowlen bulldiags over which appeured the well. hnuwn numes of downtown tirms.

- The seeond stage in reennstrictlon was the moral of the ralns left by enrthipuke nud tire. The bughess sectlon of the former city was conatructed malnly of briek. Whether from lgat. rauce or prejudlee the former bullding has of Sin Francheo alld not permle the use of roncrete rxept for floors and forndatlons. Only a f.w of the more reently ennstructed builllige were of sted. Thus the tirst ereat prohlem was pre sented by the standing brick wnlls.

For a few days the nse of dynamitu for the overihrow of atanding walls was permitted. and in this way mach addltional damita was dome (1) buiddiags not wholly ruinel by the carth. quake ant tre. Sibsequontly lt wis found to be far taore systematic and all vantageons as well ns safer to pill down the stauding walls by means of wire ceables and stationary engiaes. l'ulling lown old walls became for a time a trade in itself

- Thousands of men found cmplownint it chaniug the old brleks and stacking them ul fin use in rebuilding. For the renmwin of the vast quantitles of debris, - Twistce pipe and beans, Lroken brlck and erumblal phater, temporary railways were coustructed over the level down-town distrlet, and eluborate phans were aide for a wholesale husiness by steinn 1 ranc portation. There was trouble over lomling fa cilities, however, and the greater quantity wis cartied away by two horse dunip-wagons, the miteral being nsed for flling in low lanels along the water front and elsewhere. All Californin felt the demand for borses and wagens that this great work ervated.
- Immedlately after the tlre the work of revis. lng the bullding laws wag taken up. Fortu. atiely this task reeelved the iutcoligent guidance of a citlzens cominittee composid of local biniders, nrehitects and enginecrs. The build. ing regulatloas were rescucd from their contradictions and confusion, and a elcar, systcuatic Criniance was securcd. The mont hinthle for warl step was the autborization of rinforeed eoacrete buildings.
- Arehiteets and englucers interested In the
prohlems of reconstruction organlacil a'Struc tural Aasochatlon' us a clearlag. hunse for Im. proved bullellig methods. The utaose palne were takeu to at udy the efincts of the carthyuaba and the contlagration in ordir to secure every posslule ad vantage froni the lemons lucnlcated. tave Chanute, the englincer, and Profemor samuel P. Langley, the antrononer and physi. ciat of the Hmithoualan Inatitution: In Kingland there was Sir IIIram Maxim. Thew gentifmen arrivel at no practical succen in their own ex. pertmenting, but tiey furnished gool guidence the worls of thelr more fortunate succesoors. i littie later the aclentitic students of the prob. lim were joined by the Inventur of the tele. phone. Alexander Graham Ilell. And theu farme the two workern who advanced from em. firicimn to science in their undertaking, and who won the tirst great successes hy a bappy combination of the two.

The brothers Orvilte and Wibur Wright have told, in an articie contributed to The Cenpury Vagazine. how they ware atirred to serrious interent in the aviation prohlem in 1906 and be. gan to read what langiey. Chnnute, Moullard and others had written on it. Entering purciy as a pport, on experiments In gildiag ilight, on Lillenthatis lines, they became fascinated hy the pursult. From the first they appenr to bave chonen what is known as the bipiane siructire for thef machines, the invention of which they credit to a previous inventor. Wen. hant, whose deaign of th had been Improvid liy siringfellow ami Chanute. To this monstrue. thin, of two pinnes, nene above the other, for supurting surfaces, they fiave steadfastly anbered.
It the outaut of their experimenting the Wrigits found a diflicuity In the balancing of "Hjers" which previous workers did not seem to hare rreated serionsly enough. and they setIfin themseives to the conquest of it at once. This and other froblems soon carried them from emplricai testing into scientifie stulfies, which wecupied weral years. They found thut the accepted mensurements of wind pres. sure, on given plane surfaces exposed at difire ent anglia, were unrelfable, and they applied themetres to the making ani tahuiating of un'asurements of their own. It was not until this work had given them " accirnte dinta for making calculations, and a symtern of halance effective in winds as well as in caims," ns weil ss the neressary data for designing an effectire sorew propeller. that they feit themseivea prepartel "to huild a surcessfui power-tiyer."
sof far, these thoroughegoing workers at the problems of arlation had been experimenting with a machine deaigned, as they sald. "to be thitn as a kite, with a man on board." wr whlh. out the minn. "operating the levers thronsh intils from the ground." Their active experimathing hegan in October. 1900 , at Kitty liawk, Forth Carolina. In 1901 they made the acquaintance of Mr. Chantio, and he spent some werks with them, observing unfi encouraging their work. In september und Ortober. iher say. " neariy one thomand ghiline thelta were made. sereral of which corered distances of afer t 000 fect. Some, male against $n$ wind of thimy-aix onlice an finur, gnve prow of the elfativiness of the devines for control." Jate in 1903 they had reached the point of testing a puwer-machine, and sailed into the uir whth it for the tirst time on the 17 th of Docemher in the Jwence of five lerkers-on. "The trat titht." they tell us, " insted only twelve seconds: a flight rert monest compared with that of birds: but it was, nevertheless, the first in the history
of the world in which machine carrying man had relued itself by its own power iutu the aif In free ttight, hal salied forward on a fuvel cosuree, :- fthout reduction of apeed, and hal anally lansed without helag wrecked. The sec: ond and thiril tights were a little folluer, and the fourth lasted fifty aine seconds, covering a distanee of 852 fect over the ground againat a twenty-mile wim\}."

In the spring of 1904 the experimenting of the Wright lirothers was tranaferrel from Kitty Iluwk. N. C., to a prairie not far from thelr home, at inayton, (Mho. There they overcanse final diflicultion in the muintaining of ednilibrium when turning their machine fit cirCles of tilght ; and then, at the ead of septem. ber, IWos, they mapenifed caperintente for more than two years, whicis they spent in buaineat uegotiations nud in the construction of new machines. Their experimenting was not resumed until Nay, 140 m (again at Kitty liawk). At this time It was ilirected to the testing of the nibility of their machine to mect tite requir:menta of a contract with the Cuited states Gov. ernment to furnibh a tyer capable of carrying two men and sutflent fucl supplies for a thight of 25 milles, with a apeed of forty milhes an hour.

Meantinne, during the two yearn of ansurnded experimenting by the Wirigits, other workers in Europe and Amerien had been approarbing their surcesses. so far an to le: competitors for tire lusportant prises now offered very plainly for winining It the aviation feld. II. Suntos. Bumont, turning his attention from dirigible ballouns to moroplants, had made, at I'aris, the first pubile filght on that sifi: of the ocean; and though be coveryl no more than 220 yards. It was a fong stride in practicai success. Ilenry Furman, I. onia Blerlot, 11. Jelagrange, In France, Cilenn 11. Curtiss ami I. If. Herring, in the Citited States, were making really to dispute honors with the fayton ariators, of whose actual achievements the puhic knew little, as yet.

On all miles there was readiness for surprising and astonisling the public ln 1008 . Farmann, at Paris. in March, excreded a thent of two miles: Iroingrange, at Nitan, in Jutre, eovered ton solies, and more: Farman, in July. raised his record to cioven milcos, and Delagrange carried his to fiftern and a half in september. The Wrights
of made fighte that ranued from eleven to orentr-lour mif's in the fnll of 1905; and now. In their renewn! irfits of 1908 , these distances were more that donhied. Wilbur Wright went abrond. to cxhiht their machine in France and clacwhere, while Orvilte, in September, submitted it to ollcial tests at Fort Myer, near Washington. Thore, on different days in that month, rombing circults of the parade ground. fir mate thene recorls of continnous fight that ran from 54 to 74 minutes, travelling estimated distances that stretchedi in one instance over fifty-one and a titind miles. These trials at Fort Miver were interrupted sadiy hy an accitent. from the braking of a propellir-biade, which cansel the machine to drop to the ground while in thght. Lifutenant T. F., Selfridge, C. S. A., who role with Mr. Wright at the ifme. was killed, and Mr. Wright suffered a broken leg.

Whtur Wright, mrantime, was entering on great triumphs in France. At Le Mans, on the S1st of September, he traversed 68 miles in a continuous Hight of a littie more than an hour

allet dhatant, returned thence to Stuttgart, and tnally to Hhterdinges, where hurficane torm wrecked hle atrohlp compietuiy, cauning itw thotor to explode. Juble aympathy wlif he vetersa acronaut and pulile fath in his work were so merong that a finm was raised prompty by subectiptlon for the buildigg of saother of his contly balionon.
Whth thle he wan ready for new voyagen in the mpring of 1909 , and started from Frred. richaliafen on the 30th of Jlay, carrying two entiaecrs and a crew of meven, traveiled tiol mili- to Ilttertield, where, whout bandlag, te turned back; but landed later near Gocpuln. pen, recelving allglit injury to tho bailoon In landlig by contact with a tree. The whole distarce travelted was abont 8.50 milles, in $\$ 7$ hura. Late In August the Count accom. plinhed a loug demifrid voyage from hils heul. quarters on Jah: Constance to Iherila; but was firced to land at Nurcmberg for repalra, abl sgiln at lltetertleld, dlanppolnting the grent crowis which walted at Berlin, till late at alypt on the buth, whth the Fimperar, to welcome his arrival. When he camc, the next lay, how evir. the puhlte cothustasm showed no cooting. "lle was recelved." asys a despatch from ller ita, "with all the loonours whleh the Court and caplat could pay hitn, and his trlumphal entry tuto the clty thb afternoon as the honoured fileat of the Fimperor, was not merely a dira matie succes but a natonal demonstration.

Abil now, from thls glancing survey of arhlescment this far lis the navgathon of the air, with and without lielp from the levituthon of pas, what cxpectatons of further achifere. meat cun we reasoasbly indulge? llere ta one anawer, from a notably scientitic mind, - that of the late Slmon Newcomh, the astronomer
'It would w'en, that, at the present time, the public is more hopefin of the fying machine than of the diriglible balloon. The llen that because such a marhtue has at inst becu corsructed which will carry a man through the alr, there lo no timit to progress, is n nutural olic. fiut to juige of possibiltules, wi ust mivert to tir chistinction already politeil ont tretwecn obstarles haterposed by nature, which cabuot be aurmounted $: \%$ any lavention, and those which we may hore to overcomethy hosslblemechanicul appliances. The mathematicat relations between speed, sustainhig power, strength of materlat, eflicience of endiae, und other ciements of suc ciss are fixel and determinate, and camon br clanged except by new scientifie discoverles. quite outmile the power of the liventor to make. That the gravltation of muttor can ia any way be annulled secms ont of the questhn. Shonlt uny comblaatlon of metals or other subs. stances be discovered of inany times the stiff. auss and tensile strenget of the fabrics and hleys with which we are now angunintet, then mirht one element of sucerss be at our command. But, with the metals that we actually hive, there is a limit to the weight of an engine with a given drlwing power, and it may be farly assumed that this limit is nemrip reached ir, the motors now in use. . . ( )wing to the i-fity of the alr, the siphoring stirface must have a whe area. We cannot set any exact limit to the necessary sprend of sall, hecause the higher the speed the less the spread re. quired. But, as we lncrease the specd, we aiso

Increase the realatance, and therefore we munt havo a num jowerful and neceamarlly hearler motir. . . . liearing in milud that no limit is to be set to the prostlile discuvery of now laws uf nature or new comliatlons $:$. the chemical elements, It must he understious that I disclalm any poaltive predictlon that men will never ty from place to place at wit. The elalm I make Is tant they wit not do this until sutae epoch. making discovery is mate of whlch we have now nu conception, sul that meru laventon has nearly reached tis lintt. It is viry natural tit renwon that turt luve done hundireds of thinge which formerly seemed inponsthle, and therefore they may fly. Bith for every one thing merulngiy Imposathe that they have nuecreverl In fosing there are ten which they would like to do bu. which no one belleves that they can do. No one thinks of controiling widd or weather, of maklug the sun shlne when we please, of buthling a rallronl acrosa the Athatlc, of changlag the ocean level to sult the purpowen of commerce, of bulding britgen of grenter ex. tent than engiueers tell us is possthle with the strength of the materlal that we hasc at conn mand or of efcetlog bullinges as high that they would be crushed by thels own wirlght. Why are we hopeless as to all these achlevements. and yot hopeftul that the llylogerneblue may be: the veblete of the future, which shali transport us more rapilly than a rallroal train now cloes? it in slmply because we all have so clear a muntal view of the obstacles In the way of rearhing such enis as those just ennmerated that we do not waste the in uttempting to sur. mount them, and we are liopeful of the tiyling nuschine only because we do not cienrly sec that the dilllenticis are of the same niture us those we shonla encounter lis erecting a structure which would not be subject to the laws of uneblanics.
i have sall nothing of the possithe succerss of the tlying aushlue for the purposes of inltitary reconuaisamice or any other onrations re quiring the observer to command a wide view of all that is on the tandscape. This is a tech. nical subjuet which, how great sever may be its unthousl importance, deres mut ulfect vur duily life."-Sinton Xescomb, The I'ruplect of Arriat Vacigation (Jorth Am. Lerier, March, 1904).

Here is amother, from 'homas A. Elison the Inventor: " In ten years liythg machines wlll be used to carry malls. Ther will carry passen. gers. too, and lliey will ga a speed of 100 milies an hour. Tl Fs limbt of this." These arre the wor's of 11 inn in an leter view publishacel in $1_{4}$ Timex. Angust
 marhine has got to come." We F hot at all sure that it will come along the fines jursued in the prescat cxperiments, "Thu flyiag problem now consists of 0 it per ceat. nawhine and 25 per cent man," he said, "while to th: commerclally successful the tiving machlue must leave littic to the peculiur skill of lic operator and must be able to go out in all weatbers," He continued: " If I were to bulld a Hying machine I would plan in ausiain th by means of a number of rap laly revolving inclined planes, the effect uf which would be to ralse the machlne by com pressing the air hetween the planes and the earth. Such a machine would rise from the

SCIENCE AND INVENTION
ground as a blrd does. Then I would drive the machine ahcad with a propelier.
Mr. Edison belleves it is a question of power. "Is it not thinkable that a methond will he dis. covered of wireiesaly transmitting electrical energy from the earth to the motor of the ma. cbine in mid-alr?" He asked and answered his own question, saying: - "There is no reason to disbelieve that it can and will be done." Ile added, however, that there was great room for improveraent in explosive engines. "Any day we are likely to read that somebod has nade picric ach or something eise wesk - w. .
 cbine from a toy into a col. $\because$ rcial surcess And when it is perfected, 1 , say: the thying machine may end war by be init . a means of attack that cannot be resisted

Agriculture: Dry Farmis i: the Wiest. - For twenty consecutive yeur in aron onf places from lie James liver to the Arkansas, Mr. H. W. Campbeti, of Lincoln, Nebraska, the ploweer "diry farmer" of Arid Ameriea. "has becn uniformily successful in producing without irrifation the same results that are expetted with irrigation, with comparatlvely litele adil. tional expense. but not witbont a great deal more watchfuiness and lahor. What Western people have become accistomed to calling the camp bell system of Jry farmiug consists simply in the exercise of intedigence, care, patience, and tircless industry. it differs ln details from the ' cood farming' methoms practised and tanght at the rarious nericultural experiment stations but the underlying prineipies are the same.

These jriuripies are two in number. Firs to keof the surface of the land under cultiration loose ani finely fulverianl. This forms a soil mulef that permits the rains and melting saows to percolate readily throngh to the compacted soil beneath: and that at the same time prevents the moisture storeti in the gronnd from being brougbt to the surface by cajillary attraction. to he absorted by the hot, dre air "The sembid is to keep the sul-soil finely puirerized and firmly compacted. increasing its water-holding capacity and its capillary attraction and placinir it In the hest positile physical condition for the germination of seed and the developacnt of plant roots. The 'dry farmer' thus stores water not In diams and artifilai reserroirs. but right where it can be reached by the roots of growing crops

Through tbese principles, a rainfall of twe the inches can be conserved so effectively that it will produce better results than are ugialire ex. perted of an anmal precipitation of twentr-fomr neines in hmmid America. The riscoveret and demonstrutor of these prineinies dieserves to rank among the groatest of national benefac. tors." - Joln L. Cowan. IVry F"arming the Ifope of the lisat (Century Jugizine July, 1908).

It is difflenft for one who is used to the com, monplace methords of tililng the soil which whtainedi a quarter of a cuntury ago to beliere that " Inew methmi has bern disenvered which will triple and quairuple the results of the ofi systom in those parts of the conntry in which the rainfall is somewhat restricted. The lmagina. tion cannot immediateir grasp the statement that diry farming mothode would lift the Kancus wbeat crop from $75,000,000$ to $210,000,000$ bush. els. Yet this is a fact.

## SCIENCE AND INVENTION

" If the mind of the eastern farmer can grasp this tremendous fact he will be ready to credll
the statement that there are millions of acres in the statement that there are millions of acres In the western country which were untii a few years ago regarded as utterly worthless. but which are now cheap at $\$ 25$ an acre. To the Theat industry alone of the western country the proved fact of the value of dry farming means more than any other development fact in the agricuitural history of this country. Whist is true of increased fieids in dry farming is equaily true, and in a larger degree, perliaps. with respect to irrigation. For years the gor. erument has been warning the country that the it reased proxiuction of wheat is not kecping ' ${ }^{\text {. ce with the increased consumption. }}$
"Should this continue it would mean that ere long the Cuited States would be compelled to
draw a part of its wheat supply from the Cana draw a jart of its wheat supply from the Cana dian Northwest. It would also mean that the Cuited States would lose the export whent trade with the Grient, which is bound to ithereast
rapldiy. It is not generally known that the rapldiy. It is not generally known that the 400.000 .000 people in China are being cincated to the use of wheat and other cereais than rice. and that, thereforc, the demand for wheat will conthuc to inercase.

One of the facts which Mr. IIarriman resi. lacd far in advance of any one cise and which was an important factor in his transportation plans was the possibilities of dry farming as well as irrigation. Before he began to tith muth about these subjects he sct about to pre pare his system to reap the first and most substantial part of the results of dry farming and of irrigation. Other railroad huilders are now heginning to realize that Mir. iiarriman is pre. pared to transport the problucts of the West, of the Northwest and the Southwest between al. most any parts of this country, as well as through many ports from san Frameisen to the suuth Atlantic ports. including one or two on the western coast of Old Mexlco. Although be and former l'resident İonserelt trere at war in many resjucts. It was Mr. Harriman that gave the former l'resident much of the infurns tion he acpula di regarding the boundlis. re emures of the Wegt. 13 F toing so lie cat:sed the government to work even more eturretically than it had heen working for the conserration of the nation's resources." - Ihicago Remrd-llerith, thly 11, 1909.

Anniversary Ceiebrations. - The eightieth birthtay of llr, Rindolph Virchow, founter of cellular jathology. was celchrated on the lith of October, lin11. by a remarkable assembiate of distinguinhed physicians and surgeons from many conntrles, who made pllgrimages to ber. in to do him honor.

The centenary of the birth of Charies Darwin. and the semi-centennlai year of the pmblicution, in 1859 . of his work on " The Origin of Spe. cles," were commemorated in every purt of the world: luit the great collective demonetration of honor to Darrin'a memory organlied by the Unl wersity of Cambridge, his alma mater. was a tribute of surpassing impresaireness. IA described by the London Times, on the ounuting day of this extraominary celebration, Jum, 22. 1000, "the whole learned worid, from ('lite to
 of those who will be present." said The Times. "were his comrades, most of them have been

rles Darwin. mblication. in of spepart of the mionstratina ganized ly ilma miter. velless. If the onnoing 11. Jun 22. m Clite to d. The Tince have heed
in some meature his working enatemporaries. Two hundred and thirty-ive universities, academies, and learned bodies at home and abroad have nominated delegates to represeut them; and of these 167 sre siturted in foreign countries and Britlsh dominions outside the Cnited King. dom. Thirty of the most famous instleutions in Germany, thirty in the Cnited States, fourleen in France, ten in Austria-Hungary, eight in lady, as many in Sweden, seven In Russla, and lesser numbers in seven other forelgn countries have honoured the occasion by naming some of their most dlstinguished members to tuke part In it. The dlstant seats of learning in the younger Britlsh ceuntries bave responied with not less corllality; seven in Canada, seven In Australla, tive in New Zealand, and the same number in South Africa have appointed dielegates: Indla and Cevion are represented by clrht. Within the L'nited Kingdom 68 nuiversities and socleties are lending thelr support ; amil, in addition to the appointed delegates, there sre some 200 incited guests. wbo include men eminont in every walk of iffe. . . . No such scalemic tribute as the present festival bus ever beeu paid to the memory of an individual within so short a tlme of hla own life."

The commemorative exercises of the occasion were continued through three days.
Astronomy: The Astronomy of the Invisible. - - The discovery of couble and multiple stars from the effeets of the gravitatlonal attrictiou on their luminous components is known as the' Astronomy of the Invisilhle. It was tirst sug. aested by the illustrious Bessci about 1840 .
The sreatest extension of the Astronomy of the lnvisilhe has been made by l'rofessor ('amphell, of the Lick Observatory: In the course of the regtarar work on the mbotion of stars in the line of sight, carried out with a powerful spectroscopic apparatus presented to the ohserratory ty Hon. 1). (). Mills, of New York, he has Inrestigated during the past tive years the notion of sereral landred of the brighter stars of the nurthern heavens. . . . With such muprevedented telencopic power and a derree of procision in the apectrograph which cau he safely depended upom, it is not unnatural that some new and striking phenomena whould be alsolosed. Thiree conslsted of a lirge number of spectra with d mble lines, which undergo a perimlic displace. ment, showing that the stars in question were in reality double, made up of two of nponents, moving in opposite directions. - nue uppriaching. the other receding from the Earth. There were thus diselosel! speretroscople binary stars, systems with components so chene together that they conlel not be separated in any exlsting tele. scope, yet known to be renl binary stars by the periulic lehavlour of the lines of the spectra so faithfully reclstered on different days.
"C'ampbill's work at the L.lek Observatory derives increased importance from its systena. tic character. whlels enables us to draw sinte Eeneral couclusious of the greatest interest. HI. has thus far made known tbe results of his study of the spectra of two hundred and cighty of the lirigliter stars of the northern heavens. Ont of this number he ilnds thirty-one spectroscupio himarles, or one nlath of the whole number of ohjects studied. . . . It sccums eertain tiat a more thorough study will materiadiy increase the number of spectroscopic binarles; and Pro-
fessor Campbell thinks one sixth, or even one tifth, of all the objects atudied may eventualiy prove to be binary or multiple systems. Such an extraordinary generalization opens up to our contemplation an entlrely new vlew of the sidercal universe.

- If we accept the conclusion that with our finest telescopes, iu the best climates, on the ar. erage one star In twenty-five is visually douhie, it will follow from Campbell's Work on some three hundred stars that tive times tbat number are spectroscopically double. Thus, aithough over a million stars have been examined visually, and some five thousand intereating systems disclosed by powerful telescopes, the conchinded ratlo would give us, at last analysis, four milllon visual systems among the hundred million objects assumed to colupose the stellar universe. On the other hand, the large ratio of spectro. scopic binarles to the total number of stars examined by Camplell would lead us to conclude that in the celestial spaces tbere exist In reaity no less than twenty million spectroscopic binary starsi Could anything be inore Impressive than the view thus opened to the human mind?
- It may indecel weli be that the dark and unseen portlon of the universe is even greater than that which is indicated by ont most powerful teleseopes. Halfa contury ago Bessel remarked: - There is no reason to suppose luminosity an essentiai quality of cosmical bolies. The visibility of countless stars is no argnment agninst the invisilility of countless others." --T. J. J. see, Recent Proyrese in .istronomy (Atlantic Monthly. Jan., $1!\mu)_{2}$ ).

Biological : Mendel's Law of Variation in Species. - "Gregor Mentel was Abbot of Brimn in Moravia when Darwin was at work on the Origin. He does not appear to have had any uunsual interest in the probleu of evolution ; indeal, hals main concern was with an essentlally pre-larwinlan question, - the nature of plant hybrids. Whth thls prohlem as an arocation from his serions clerical dutios, the alibot busied himself in the garden of his cloister: a leisurely, clear-headed, milhlle-aged churchman in whom a great scientist was spoiled. For elyht years he experimentel with varicties of the common pen, and in 186,5 commnnicated to the Soclety of Faturallsts in Brinn the substance of the discovery whicli is hereafter to be known as Menkrl's law. 'the greatest discovery in binlogy since Jarwin.' Lnfortunately, at that time. the irann soriety, like the rest of the workl. lasi other things on its mind. fonchow or uther, Mentel's discovery escaped altention untll four vears ago [1900] when De Vries reached it independently. Two years later Mr. Bateson, who had been among the flrst to realize its significunce, made a translailon of the two original papers. . . . Since then, Vemele's Iaw las becu found to hold for a con. shlerable number of rases, both among animals aml plants, but most unaccountably not to work for a fer otbers: so that, as ret, no one knows how nearly universal it may prove to he, nor how it is to le reconciled witb the older Law of Ancestral Ileredity of Falton.
"One illustration will serve to make clear the practical workings of Mendei's princlple. If a single ronela coated guinea-pig of either sex le introduced into s coiony of normal smooth. coated individuals, all its offspring of the first

## 8CIENCE AND INVENTION

generation will be rough-coated llke itself. In the next generatloa, if one of the parents is smooth and the other rough. the young wlil be half of one sort and hnlf of the other, but if both parents are rough, three quarters well take the 'dominaat' ronirh eorat. Ia the next, and all subseqnent gr rations, one half of these rough-coated ladiv duals which had one smoothcoated grandpareat, and one-third of those which had two shothecoated grandpareats, which were not mated, will drop out the ' recessive' smooth contedaess, nad hecome, in all respects, like thelr originnl rongh coated progenltor, even to lanving only rongh-coated young, ao matter what thelr mates may hnve. Thus Mendel's law, thongh by no means slmple, is very precise: The essential part of his great discovery ls that in each gencration of plants or animals of mixed nacestry, a definite proportion lose one half of their mingled heritage, and revert, in equal nimbers, to one or other of the pure types." - F. T. Brewster, Sime Recent Aspets of Darainism (Athentir Monthly, April. 1904).
The Carnegie Institution of Washington. - Promotion of Original Research. The following luformatlon relatlve to the fonnding, the plan and the work of the Carnegie Institutlon of Washington, is derived from the nuthorities of the Insthution

The Institntion was fonuled by Mir. Andrew Carneric. Jammary $2 \mathrm{~N}, 1902$, when he gave to a board of trnstees $\$ 10.000,000 \mathrm{ln}$ registered bonds, yioldag if per cont annual interest. To this endowment fund an addition of $82,000,040$ was inatr by \$1r. (arnegle on Decemher 10 , 1!N\%. The lnstitution was originally orgunized under thu laws of the District of Cohumbin as the Carnegle lusitution. Subsequently, however, it was incorporated by an art of Congruss, approved April $2 \times .1004$. 1ader the title of the Carnemie Institution of Wiashington. The arti. cles of incorporation tleclare, in general. "that the objects of the corpurition shall be to encourage in the brondest nmi most liberal manner investigathon, wearch, and siscovery, ant the application of knowle of manklnt." By the Institution was pilncel. hoarll of twenty-four tr.. be improvement - control of 8 of whom had been members of the orig as board referred to above.

The President of the Instlation Is Dr. Robert S. Wombward. formerly of the faculty of Columbia L゙nversity. Thic Chalrman of its Board of Tunstees is Wr. Whlu Bulings, Director of the New liork Publie Library. Tlie Board includes surh motable memhers as Willian $\mathbf{H}$. Taft, Flilm Runt, Neth Low, Andrew I). White; IVr. S. Weir Mitchell. Ilenry L. Illgginson and President IIenry S. Pritchett.

Nince the oliject of the Institutlon ls the promotlon of inrestiration " ln the brondest and must liberal manner." many projiets in widely different tiohls of ininiry liaze been consldered. or are under consideration, by the Executive Conmlttee. These projects are chicfly of three classes, namely:

First, large projects or departments of work whose cxecution requires contmmous resenrch by a corps of inverstgators during a series of yenrs. Ton such diepartments have been estab. lished by the Instltition.

Secondly, minor projects wlich may be car

## SCIENCE AND INVENTION

ried oui by indlvidunl experts in a llmlted period of tinie. Many grants in ald of thls elass of profects bave been made.

Thirdly, research associates and amsistants. Under this head ald has been given to a consid. erable number of Investlgators possessing ex ceptlonal abilltles and opportunltles for rescarch work.

An annual approprintion is made for the pur. pose of publishing the results of investigations made uader the ausplces of the Iastitutlon, and for eertaln works which would not otherwise be readily printed. Its publicatlons are not dis. tributed gratis, except to a limited list of the greater llbraries of the world. Other copiess sre offered for sale at prices only sufflelent to coret the cost of publication and transportution to purchasers. Lists are furnlshed on application.

Slnce Its organlzatlon lu 1002 , aboust ohe thousand ladiviluals have been engared ia Investlgations under the auspices of the listitu. tion nnd there are at present nearly five luy. dred so engaged. Ten independent departinents of research, each with its staff of investigators and nssistaits, have heen estalished. Ia uddition to these larger departments of work, organized hy the Institntion itsolf, mumerous spricial researches, carried on hy ludivinais, havelefo snlisilized. Seven Inboratories und obserratiries, for as many different fields of investifartio a and in widely separated localitios, have heea constructed aud epuipued. A buildiag $\ln$ Wash. mirton, D. (., fur administrative offices aul for storage of recorils and pablications, is now approuchlng completion. A specially deal antal ship for orem magnetic work has just leta completed and started on lier first voyage.

Mr. George Iles, in his "Inventors at Work," describes and characterizes the aias and whiling principles of the Institution as follows: : $\ln$ its grants for widely raried purpowes the policy of the Institution Is clear: only those inpoiries are alded which give promise of fruit, nod ta every ense the graatee requires to be a man of proved nbility, care beiug taken not to duplicate work alrealy h hand elsewhere, or to way tasks of an iatust rial character. Experiemet has nlready shown it better to contine research to a few Inrge projects rather than to aid many minor in vestigntlons with grants comparatively suadl.
"One branch of work reminds ns of Jir. far. negie's method in establishlug publice Lihraris - the supplementing of loenal public spiri! lys gencrons gift. In many cuses n unlversity or an observitory lamelies an inquiry whleh son hroadens out beyond the range of its ow u small funds: then it is that aid from the Cnrneryie lastitutlon brings to port $n$ ship that otherwise mleht remaiu at sea ludefinitely. I.et a fow typlenl exaniples of this kiud le mentioned:Indley Observatory. Albany, Niw lork, sud Liek Olservatory, Californin, lave receired aid toward their observations and computations; Ierkes Observatory, Wiscunsin, has heea helped in measuring the distance of oxed siars. Among other Investigatlons promoted have been the staly of the rare enrths aud the luattrentment of some high carbon stecls. The ndjacent fielal of engineering has not bert neglected: funds have been granted for experlwellts on shly reilntance ant propulsion, for determining the value of high pressure stean in locomotive service. In geology an investigs.

Consecticut, has had iiberal heip. in the ailied sclence of preventlve medlcine a grant ls advancing the study of snake venoms and defeating Inocuiations.
"At a iater day the Instltution may ponsibly slopt plans recommended by eminent advlsers of the rank of I'rofessor Simon Neweomb, who $f$ is out that analysls and generalization are (1) day much more needed than firther ohserva. tions of a routine kind. Ile has also had a weighty word to say regsrding the desirabiiity of bringligg together for mutual attrition and discussion men is contiguous flells of work, who tske the bearings of a great problem from different points of view."-George Iles, Inrentirs at Work, p. 276 (Doubleday, Page \& Co. A. Y.).

Electrical: A New Electric Phenomenon - Writing recently In the London Times, I'rofessor sllvanus P . Thompson has described a discovery of effects which " appear to point to a true electric momentum." "lo two nuen, l'rofissor Nlpher, of St. Louls, and Dr. Dathias Cantor, of Wurzburg, the racestion seems to have accurred whether, If a flow of electricity is caused abrupaly to turn its path round a sharp corner, anything is ohservahte ln the neighbourhome of the slarp corner, that would suggest a momentum of the clectric corpuscles. Nipher empluyed ns conductor a sharpiy bent splinter of bambou, carrying a high-teusion discharge from a large lnthience machine. Cantor used a thin metallle finn of gold or platinum formed by depusition on the frees of a glass plate hevelled to a sharp edge: the current being provided by a battery. Sipl. i, Investigating by photographle plates, ilscoverd that the current passing the sharp corner enitted radiations akin t". the X rays, and capable of giving shadiow pictures, even tlrough ebonite ${ }^{3}$ of an inch thirk. Ile has also used thin metal whes bent istu a scrices of sharp cornors, aud finds that at every corner some of the electrons leave the wire, tending to persevere in their orighal direction of movement rather than undergo a sudden chauge of direction. Cantor, expioring Hectrically with a wire attached to a charged insulated electrometer, found the electrometer diseharged by the emanatlons (or radiations) fiom the acute angle of his conducting film. Later, lut without knowledge of what Nipher hatl accomplished, Cantor also exposed a plioto. graphic plate to the angle of the film, sud found it marked with strcaks as if charged particles had left the angle In a purticuiar direction. both experimenters had alrealy made numerons observations under different circumstances before publishlng their results. Nipher'silscovery was communicated to the American i'hilosophleal suclety In the cariy summer, and an account of his work appeared in Sience of July $1 \%$ last [1903]. Cantor's observatlons were umounced to the ficman ' Naturforscher' uecting at Cologne on Suptember 23.
if," remarks Professor Thompson. "we acPT. The monlern dofinfo that all inertla in what we call matter is due th the magretic field surrounding a moving charge of electricity, thls
newly-dlysovered effect takes its natural piace beslde the other known effects.'

Tclegraphy: The Printer System. - The Electrical Rerien of January 2, 1009, gsve the following account of the extent to which the "printer system" of telegraphy had then come Into use In the Luited States: "Over fifty priater clrcults are now In regular operation on the Western Unlon lines, between leading buslneas centres of the linited States, aud additionnl wires are belng equipped as fast as the printer apparatus can be installed. This is a system of rapid automatic velegaphy by which telegrans are transmitted at a hlgh rate of speed and received at their destination printed on the regular message forms hy a typewriter automatleally operated by the electrical lmpulses transmitted over the whe. The appearance of the message as recelred is ldentical with a message turaci ont by the most expert typewriter operator on Morse circuits. The messages are ready for dellvery as soon as they come off the wire, and the only attention required hy the typewrier as it ricelves the messages from the wi is that of removing the blank when the message is completed and supplying a fresh sheet to the machine for the next messagc."

Wireless Telegraphy. - A Statement from Marconi. - "Up to the commencement of $190:$ the only receivers that could be practically enployed for the purposcs of wireless telegraphy were based on what may be called the eoherer priuciple - that is, the detector, the principle of which is based on the discoveries and observations marle by. S. A. Varley, Professor Ilughes, Calsecchi Onesti, and Professor Branly. Early in that year the author was fortunate enough to succeed in constructing a prnctical receiver of electrle waves, based oa a principle different from that of the coherer. . . . The action of this receiver is iu the ant:hors opinion bas upor the decrease of magnetic lyyseresis, which takes place in irn when under eertain conditious this metal is exposed to higl: frequeney oscllations of Ilertaian waves.
"This detector is nud has heen suecessfully emplosed for botb long nanl short distance work. It ls used on the shtips of the Royal Nisvy and on all trans-Atlantic liners which arc carrying on a longelistance news service. It has also been used to a lirge extent in the to ts across the Atlantic Ocean. . . . The adoption of this mazuctic receiver was the meat e of bringing about a graat improvement in the practical working conditions of wireless telegraply by making it possible to do away with the troublesome sdjustments necesuary when using coluerers, and also hy conslderably lncransing the speed at which it is posslble to receive, the speed depeading solely on the abll ly of the lndividual operators. Thus a speed of over 30 woris a minute has be on caslly attalned.

In the spring of 1903 the t:ansmission of news niessages from America to the London Times was attempted, and the first messages were correctly received and published in that newspaper. A breakiowu in the insulation of the apparatus at Cape Breton made It necessary, however, to suspend the service, and, unfortunatelr. further accldents made the transmlssion of messagcs unreliable, especially durlng the spring and summer. In consequence of

## SCIEN'CE AND INYENTION

thls, the author' company deelded not to at tempt the transmisslon of any more publlc n fasages untll such time as a rellable and cou. lwhous service could be malntalned and guar anteed under ell urdlary condltlons.

In October, I003, it was found posslble to aupply the Cunard steamshlp Lucunia during her entlre crossing from New York to Llverpool With newa transmitted dlrect to that shlp from Poldhu and Cape Breton." - G. Marconi, Re. cent Adrances in Wirclese Tele,raphy (Annual Report Smithoonian Institution 1005-0, pp. 187142).

The Real Problem, - ' It is whll to remem. ber thnt the ycar 1003 is the earliest date at which radlo-telegraply could be regarded as really workable, and of materinl practleal utility. Previous to theu, 'wirciess' working was very uacertuln, but in thnt year tunlng devices were Introduced, the princlple of whieh was orlgl. ually due to Sir Oliver Lodge; and it ls these that have made $s$ much difference lu the appll. eation of llertzlau waves for the purposes of telegraphy. Practical success In radio telegraphy should uot, ln fact, be juliged from the point of rlew of the distauce at which signals can be sent - or recelved - but rathir froun the standpolnt of non-interference and secrecy. The esseatlal element in wlreless telcgraphy - abovenall others - is, indeed, a discriminating or selective methol For the inain purposes of radio-tele. sraply, immunlty from interference by syntony is cssential. Thus a selectlre system la tinte of war would be Invaluable: a non-selectivesystem almost worse thau useless. Syntonic wifreless telegraphy entails in the first place. a simillar rate of oscillatlon, or tune - i. e., a simliar wave Iengrih - at the sendlig and readviar ends. Indeet. the real problem in wireless telegraphy is ton arrange the recelving npparatus so that it is allve to notes of one detaite frequency, or phech, but deaf to uny other notes. eren though of but slightly dlfferent pitch. This ls effected ly the proper muljustment of inductance and eapitelty, ha tirst shown by Sir Oliver Loulge.

It is, Inwerer, at present. Impossible to secure really complete secrecy from noy methol of ope ware radintion. A radiotelegraphist. With the right apparatus and a knowledge of the tune, could upet any system of IIertzian wave tolecraphy. it shnuld, thercfore, be clenrly understoon that there are, as Fet, definite limits to the practleal results of tuning for securing absolut. selectiv. ity and secrecy." - Charles IBright. The tafint sphere for Radio- Älegraphy (Westminster Retielr, April. 190世).

Singular Unexplained Phenomena. Speakiag nt Stocklnim, Swerlen, on the ocension of his receiring the Nohel I'rize, in I ecember, 1909. Mr. Marconl gnve the fillowing acconnt of some unexplaiaed phenomenn that ure experienced In the working of rndlo telegraphy. IIe sain that "a result of sclenslfic interest which he first noticed during the tests on the stcamship Phildelphim and whlch was a most lmportant factor in long distance radio-telegraphy was the rery markinl und detrimental effect of daylight on the propagation of electric waves at grent distances, the rnuge by night belng usually more than double that attninnhle during daytine. Ife Aid not think that thls efferthat jet been satis factorily hwestlgated or explnined.

IIe
was now inclined to believe that the absorption
of elcctrle waves durlng the daytlme was due the lonlzatlon of the gaseous melecules of th alreffected by ultra-vlolet light, and as the ultra vlolet rays whlch emannted from the sun wer Inrgely aboorbed lu the upper atmosphere of th earth, It was probable that the portlon of the earth's atmosplere whlch was faclag the sut would coutaln more lons or elcetrons than tha portlon whicl was in darkuess, and therefore as Sir J. J. Thomson hal shown, this lliunt nated and loalzed alr wonld absorb some of the euergy of the clectrle wnves. Apparently the length of wave nad amplltude of the clectrica oscillath ons Lad much to do wlth thls lateresting pheaomenon, lontr waves and snmill nmplitudes belng subject to the effect of dayllght toit nume smaller degree thau sha : wares and Iarge atm plltubes.
" For comparatively short waves, such as were used for shlp conmunleation, lear sunlight and hlue shles, though transpareat ${ }^{\circ}$ ) hirht. acted ns a kind of fog to these waves.
often uccurred that a ship falled tw coumunicati whlth a near by station, but could eorrespreme with perfect ensc with a distnnt one. thonglt hlgh 1'ower stutloa: were pow used for conniunliating across th- Atlantle, and illes sages could be sene by day as well ns Iny night, there still existed short perlols of daily ociur. rence durnig which transmission from Englaud to Antericn, or rice reraa, whs dilfieult."

Transatlantic Service. - '. The Traasathan de wireless service wns innugurated In Octoler, 1907. betwern Irelnad nod Canala, the charges Indigg reduced from Is. per worll for husibess and private messages and sd. per word for Press missages to 5 d . and 2dd. reapectlvely. these eharges not laclithag the land line chargis on both sides of the Athantle.

The first wirelese messages seross the Athan. tic were sent irom the C'anadlan stationnt Tadim I Icad. In Cape I3reton, In 1902. Thls stat Whe afturs ards remuved to lts present site. tise nites inland, aad there grency enlarged. Eve: slice 1802 Mr. Farconi has beeti conductine es. perime:its and making new discoveries nuil impro. .nonts unthl, at the prcsent day, wirelews telegraphy acous? the Atiantic, orer a distance of 9000 miles, is an nssured success. I'ress trntio. . Was started on October 1\%, $190 \%$ that February 3, 1908 , the service was extended to private and husiness telcgrams between Jon. treal and London. The number of words irans. mitted during the past year Is In the neighbour houl of 301),000." - ('orrespondence of the Lumilon Timus, June 2す̃, 1909.

Equipments at Sea. - Extent of the Service. - Compulsory Legislation Pending. "Alhongh nn installation was carmied on the St. I'nul for one trip in 1899, the credit of luing the pioneers in the use of wheless telerrindy on the ceran belongs to the North German Llord and Cunard Companies. The tirst venorl fitted wns the Kaiser Wilhelm der Grosse, and the lend of the Germans was immedintely fol.
lowed by the Encllsh compnny. Ioth veisels lowed by the Engllsh conmpny. Ihoth veiecels were fitteel by the Marcoul Company, whith has the dlstlactlon of being the tirst econpany to eruit) ressels on a cominercinl bnsis.
Tlie Iarconi Compnny nlone lans upto the pre sent fitted uetarly 20 merchant ships. while the Cnlted Wirdess Telegraph Compnay Lus fithed nearly 170 slips.

## SCIENCE AND LNVENTION

## SCIENCE AND INVENTION

- A very large number of vessels engaged in he coasting trade of Amerina and on the Great Lakes are fited witu wirelegs telegraply; the Anterlcan list how that ${ }^{1} 8 \%$ vessels are eyulpped, while a statement issued by the Lnlted Wrelass Telegraph Company shows 31 other vessels to have been fited up to April 2, beaides 15 Great Lake steamers either fitted or in course of equipment.
" Nearly 500 warshlps beionging to ulue dif ferent countries have been Ittcu, or are In course of eguipment, with radio-telegraphy. Ac ord. fug 6 ) the Ameriean llst the L'aited States Navy has been foremost among the navies of the world in the use of 'wlreless.' On October 1 last 133 L"nited States warshlps were fitted with varlons systems. The Berne lists, issibed up to May 1 last, show Great Britaln to have $15 \%$ ves sels eiphipped, Germany 80, Netherlands 11 Denmark 9, and Sprain 5.
- In February last the U'nited Stntes llouse of Representatives passed a Bill providing that - every occun pnssenger steamer certitied to carry ;20 passengers or more, befors being granted a clearance for a foreign or domestic port 10 ) miles or more distant from the port of her departure from the Cnited states, shall be "puipled with au effelent radio telegraph installation, nod shall lave in her employ and on board an efficient radio-telcgrapher.' . . The Bill, it is understood, will he condidered by the Setrate in the autumu, and wil! it is thonght be pussed after it has undergone some slight moxil. tication. Following the example of the L゙nited tites Congress a Bill hns been introduced in he Canadian Ilouse of Commons. . An Italian logal inecree dated March 14 last provides that all vessels of whatever uatiounlity clearing from Italian ports with emigrants shail carry $n$ wireless installation. So far as this country [Grent Britaln] is concerned uo levisia tive action is likely to take place, at least for the present." - Correspondence of the Loulun Times, July z, 1909.
The Cry that brought Help to the Steam ship "Republic."-On the 2311 of Jau . ** 1849 , the service of the wireless telegra, to imperilled ships was illustrated lir un incident which thrilhed the world. In a deuse fog, oft the islaud of Fantucket, $2 f$ niles tistnat. the steamship "Ircpublic." of the White Sitar Line, was struck amidships by an lithian liuer, the "Florida." Two passengers on the former were killed and two were seriously $\ln j n r e d$, while four sallors of the other were hilled, Both steamers were shnttered to the sinking print, but the state of the " Republle" wins the worse. Fortunately she was equiplud with the wireless apparatus for telegraply, and its operator. "Jack" Binns, was a men eriml io the (mergency. Ilis appeaing signsis "C. Q D." "(Come Quick! Danger"). Were thashed ont into all shrrounding spnee. and broutht many re. sponses from sen and shore : hut then canic the difticulty of finding the slaking ships lit the black fog. The first rescuing vessel to reach heir vlicinlty was the " Baltic" of the "White Star lifne," and she was helped in her groping to thrm, not only by the ceaseless exeliange of wireless messages, but by the sounding of the "a:atarine bell of the Nant:"rket lightship. ing guldance from these bells, as her Coptain
described afterwards In a published account of Ita search. "On my ship," he said, " there are two apertures on either side of the bow, whlch yon might eull submarine ears. They are conwected by wires with a telephone recelver on the bridge. By llstenlag at this telephone und swltching the instrmment from the starboard 'ear' to the' port 'ear' and back again, you can lear the faint tones of the lifhtship's submarine bell when you get in range of it. If the tone Is louder through the starburrd 'ear' thau throngh the port 'ear,' you hnow the Ilghtship Is on your starinard side. If the tone is exactly the same throneh both 'ears,' yon kinow the lightship is dead aheal. This apparmetus helped met greatly.
Nererthiess, the "Baltie's" soareh for the " Republle" went on through twelve hours, like that of "a hound on the seent," as the Captrin deseribed it. Meanthe, the passengers of ine "Irepublic" had beeu transferred to the "rborda" which scemet well aftuat, and the "Baltie" now wook everybody from both, the totnl exceeding lyon. The "l lepublie" was then towed towarl Martha's Vineyard, but sank a few miles from lund, bet Captain remaining until the lnst mintite on board. The condinet of all connected with the peril ar:l the rescue was tine, and none more so than that of the siteepless nud tireless operator of the wlreless telegraph.
Marconi Coast Stations in Great Britain taken over by the British Government. The following nnnouncencent was nade by the ibritish Postmaster General in the llouse of Commons on the 30th of september. 1914:-"I ant glad to say that arrangements lave been completed with the Mareoui Coniluny for the transfer to the Post Othee of all their const sta. tions for communication with ships, Including all plant, machinery, buidings, land, nad leases, de., and for the surrender of the rights which they enjor under thrir arrement with the $L^{2}$ ost Office of Alygust, 1444, for liceuces or facilities iu resperet of evast stations intended for surd communication.
in aldition, the Post (ntice secures the right of using, fre of rovalty, the existing Sirconi patents aml any future patonts or ins. provements, for a torm of 14 years, fur the follow ing purposes : - Communcation for nll purfuses between stations in the luited Kinziom and shins, and betwern stations on the mainland of Great Britain nad Irdand un the ont hand nud outlyine islands on the other hand. or between any two mutỵiny islands; aud (except for the transmission of public tele (ernms) betwren inv two stations on the muinland; and on bari 1?ost Ollice cable ships. The inclusive considerntion to be prid to the company is this.mo.

The arrangement is in no siuse an exclusive one. All the stations will. under the interna. thonal Ramb.Telegraphie Conventlon. be open for communication equally to all ships, whatever system of wireless iclegraphy they may carry ; and the sust Otllce will be free to use or to experiment with any system of wireless triegraphy at its discretion. All inland communi. catiou of messuges by wireless telegraphy will be entirely under the control of the Post Otfice. The company will retain the licence for their hong-allstance stations ut luidhu and Cifflen, which me primarily intended for shore-to-shore

cotmmunlentlon with Amrica. Arrangements have aleo been made whth Lloyd'a for the trunsfer to the I'ost ofller of thelr wireless statlous for commmalcation whith ships, and for the surremeler of nil clalnas to licences for such commu. nicatlun.
Notes of Recent Progress. - A clesputch from Seattle, Mareh $\delta, 1000$, reported that "the steamshlp Akl Maru of the Nlppon Yusen Kal alia thet accomplished her recent passage from lokohama, Japan, to l'uget sound, a distance of 4.840 milles, whlowt losing commublention with wlreless stutlons on elther the Japanese or Amurlean cousts. The uccompllshmeat was mule iossilule by roluylng inessages throngh other vessels of the compang. whleh were pieked up between the Akl larin nill the roment. The Akl Inaril was ahbe tocommunicate dhy ely wlth the dapanese coust stations, when she ins 1.400 milles nway."

A cordinf to Paris correspondence of the London Daily Trlegratih, fuoted ln the Now Fork Eirening Post of Augnst 21, wlreless nessages from New York are now recelved or Intercepted nlmost daily by the milltary station on the Eiffel Tower. Ociasionally radio tele grams hare also been recelvid from Canada which. it is believed, forms a recoril In wlreless telegraply: The communleations nre at pre. sent ouly if a desultory nature, but the officer, Commundant Feric. whon is in clarge of the sta. ion. hopes to be able some to organize a regular service for governument, untl, perhaps, ulso for commereint, purpues. The new apparntas whel is now heing set up in the underpround ather on the champ le Mars will he more powerful than any proceding ones, and whil be ronly probably by the emi of next month Whedess nuessages will then be cxchanged rogn larly hetwen I'aris aml the casterm const of the [nited States, bul perhups nlun with Cumma."
Electro-Chemistry: The Study of the In finitely Little. - - I vew branch of physical chemistry las lately boen developed from the sturly of the Intinitely linle which pronises to be the most important science of the future; for It deals most intimately with the problems of Ilfe. This subject ls ealled electro-chemlstry. It is havel upon the effect of electricity ia revialing the important renctions and motions of the smallest particles of mattor. The lit. erature of this subject In eurrent perionlicals already exceevls that of any other department of phesics] selmoe. Until a comparatleely latu diw, heat and lipht were considered the jrinej. pal acents which ehemists emplayerl to stuty the renvions of matier. In the uew subject of clectrochemlstry, electricity occupies the first place. as a destroyer aml a rempuster; aml heat and light are niercly suborilinate parts of its manifestations, differing from it oaly in length of wares in the ether. The to and fro mos. tion. Which is our lucontestable firct. is as elec. trical viluration. When we consiller the investi fations in fectrochemistry, we perceive that the most important actions of electriclty are not three we are consclous of In their great practical applications; it is rather In subtle ant silent offirets that li works lts groutest changes on life and matter, " - John Trowlirilge. The Stuily uf the Intinitily Smal! !Atlantic ir:nem, Stuty if 1:02).
Entomological Study: What we Owe to
it ? Practical Afralrs. - "The lnsect frimp and cuemles of the fammer are gettlug atteution. The eneiny of the San Jone scale was found nomar the Great Wall of Chlna, and is now clenning ny all our orchards. The ty fertllizing ins lmportel from Turkey has helpeel to estahlish an lar lustry In Callfornla that amonats to from tlfty to oas hundred tons of drled flgs annitally: and ls extending over the I'acltic coast. A par. anltle tly from sonth Afrlea Is aecplng in subjec. thon the black schic, the worst pest of the orange anul Icmon lnilustry ln Californta." - Meanage of Prexilent Rooserelt to Congress, 1904.
'The buslness man, ulways on the ontlonk for a dlvidend, has sometlmes eomplinhed that some of our Inquirles do not seem to hlm prua cal, hut be must have putlence and faith. I friw yeurs ago an knowletge could acems in listless to the practical min, no researcli more futile than that flich sought to dlstinguleh Ietwern one specles of a pnat or tlck and noother; yet to day We know that thls knowleage hus rend.ral fo posslble to open up Afrlatand to cut the I Puama cunul." - A. F. Shlphy, on Rewearch in \%imamiz, at Merting if Britiah. Inseciation for the Allunice ment of Science, 1009.

Esperanto. - Ir. Zameahof, a İussian plif. sician, Inventor of the proposed Internatimid language called Esperiento, published his tinst pamphlet on the snhject $\ln 1 \times 87$; Int it was tut untll ten gears later that the prospect of its er. tenslve use as such hegan to he renlized. . It wns well received, tirst ln liussla, then ln Norway and Sweden. Then it was tuken $11!$ in France. ly M. de Beanfroat. The latter had hiniself Invented an artithelal language, lint gave it up as sooa as he became aciulithied with the atmlrable work of hls Russian cympe titor. Ile is the man who forced the worhil at large to stop and serlously consliler Esperanto as the solution of the great problem promosed by men like Roger Bacon, I Pesurtus. I'uscal, l.cibnitz, Locke, Coadillac, Voltaire, Dulerot, nud so many others. From France it went to Germany, Instria, swltzerland. Italy, and finully to Eugland, where thirty societios of Es. purantsts were croated withla a little overa year

The general princlple upon whleb Dr. Zatmeahof has worked is this: to eliminate all that is accidental In our national languages, and to keep what: is common to nll. In consequeace und strictly speakinge, lic luvents nothiur : he builus entirely with materinl that has heren in existence for s long time. II're, then, Is thic way in which he proccels regarding the rarimas elements that are necessary to the formalon of a laughage

The sommes. Sonnds that are peculiar sin one language are ellminatcl. The English th und ic are not fouad In Freach or German. there fore they are tropped. On the other hand. the French $u$, the Gerniaa $i 1$, and the French na*als dunot exist in Enplish; they too are Iropped. The Spanish $n$ and $j$, and the (iemman ch, have the saine fute. Thits, only sounds which are fonall evere where are kept, and no one will have any ilficulty about pronuaciation, th matter to what country be belongs. Spelling is of course phonetle : one and the same sound for onc lettir. There are uo mute letters, as Freneh; nolther are there double letters.
"The Accent la always on the peaultinste

measurement of length or motion a miost redned instrument is the iaterferometer, deviued by l'rofestor A. A. Micheison, of the Univeruity of Chi. cago. It eunbles an observer to detect a movemillt through oae tive-militoath of an fach. The priadple favolved is iliustrated in, a simple ex. periment. If ly diropping a pebbie at each of two centres, suy a yuni spurt, in a stiji ponti, we send out two systems of waves, each system wiif ripple out in a series of conceatric circles. If, when the waves mect, the erests from one set of Waves colncide with the depresslons from the ollereset, the water in that particuiar sjot beconnes smooth bec..use one set of where destroys the wther. in this case we moy say that the Whyen interfere. If, on the other hani, the erests of waves from two sonarces shouldi coincide, they would rise totwiee their orighal helght. Light. waves sent out In asiminar made from two polnts noy in like manner ejther laterfere, and promince darkness, or tunte to produce light of donble firinlaney. These aiternate dani and brifht humbare called Interference frioges. When one of the two sources of light is noved through a very small space, the interfercaec fringes at a distance move through n space so nuch hager as to he easily observed and measured, enabing an chserver to compute the short path throngh which a light source has moved. . . . Many diverse upplications of the laterferometer have beea deretoped, as, for exampie, fa themometry. The warmthof a had held neara peucil of light is chough to cause a wavering of the fringis. I ifehted muth shows coutortions. When the air is lecatel its density aad refractive puwer dimluisl: it follows that if this experiment is tried uuter conditions which show a reguiar and measimable displacement uf the fringes, their movement will indieate the temperithre of the air. This method has then applied to ascertain very high temperatnres. such as those of th blast furame. Hoat metafe expand one or two purts in $100,00 \mathrm{~A})$ for a rise in tumperature of me degree centigratic. When a small spechon is aximined the whole change to be neasured may be waly ahout rito incin, a space rumbr. ing a gond nicroscope to pereeive, but readily mpasured hy an laterferometer. It moans a dioplacement amounting to suveral fringes, and this may be measured to within हो of a fringe or less: so that the whole displicement may be measured to within a fraction of one per cent. Tif course. With long bars the arciracy nttain. able is much prabter.
"The interfirometer has murb refined the in dicatinus of the balance. In a notewortiny rx frriment l'rofecser Micheisoa found the amount of attraction which a sphere of fead exertud on a small splare hmor on an arm of a deliente balauce. Tie amoment of this attraction when two such spheres tourh is proportional to the dianueter of the farge splere. which lathis case wata ahomt disht inches. The attraction on tha small hall on the mad of the balance wns chus thu - ame fraction of its weirht as the diameter of the larse balf was of the dinmeter of the marth. - smething lil one twents-millionth. Sut the fure to be measured was one tweuty. millionth of the weisht of this smali bali. In lho interferomber the anproach of the small hail 10 the harer one prodisced a displacement of seren whuln fring's "- George Ifes. In centore at Work, pp. 21t-21s (Doubleday, Pagc dCo., \&i. Y.).

## SCIEXCE AND INVENTION

Iaternationai Congresses of Science, - The mont notable of the gatherliges at St. laulis in 1004, connected with the Louislana l'urehas: Exposithon, was the Congrens of Arts and Science, for ame accoant of which see (in this vol.) At. Locis: A. D. 1104.
Hardly iess importaat from ome polv: of view was the meeting of the F'irst l'an ? merican sclentific Congress, at Santlago. Chice, berint ahig on the Roth of Drecmber, 100.s. It had bera preceded by three scientitic congresses of thi Latlu American states, at Bucaus Aires in 1 Nim. at Monterideo in 1001, aud at kio de Junfiru in 196. The Bur-Ameriem comprehensivenest whe glven to a fenrtl, one by an ofilecial invita tion from the Childan Governneat to tice fins. ermuent of the l'nltel states to send dellemes. to the meeting, and a further invitation from the Chifeara Conmittec of Orpankation to tiftern of the prominent undersitice of the linited states to do the same. The responge to the iavitation was cordiai. und botb of the Ameriten conti numts wore weli represented at the compress. The programtue of topirs for discussion includits i.ualu-r of historically andi poilticuity sclentific questions of spectaly Anericua finterest, such, for exumpic, an the followhe:
" In "xphation of the reasons why the culo. nies of Finglish America were able to unite jutu a siagle stute after they had attaiued their inde. pendeace, white tho of Spanish America neser sucereded in establishing a pernanent nnion.

- The extent to which Anerica has come to possess a civillza'tin, as well as interests and proherms, different from those of Europe.
" ©iver the special circumstances of the states of the New Worlh, would it be feasible to create un Americme fater ruational faw': and If su, upon what buses should it rest, and how should it be composed""

The Moving Picture Show.- The Millions entertained by it in the United States. - in 1 !hes, in the C bited sitates, "the moving pirture show drew an uttendance of 4 , (10) , ont daily, a total nttendance of mure than a blithon; of an average of ohe visit a month to thls form of umumenent for cvery man. Wonan, and ehild in the whole country: Already this lnfant hadus.
 is investenl in it, and 7,0 out moving picture houres ore" seattired owr the comentry Of the lareer cities, Clicago has at present 313 anwing pleture shows. and protably will have sto before the end of the present year. New York has $3(\mathrm{H}$, , St
 Pittshargh M0, and Boston 31. Ifmulred, of smaher citiow and towns have froan ond in s dozen, and the craze has c:xtended to Nesiro, Central and south America, and the l'mana C'mal Zone, Nearly $1,010,000$ feet, or lim miles. of films are shown every day ha the linited States. . . . Making of these filhns is in itself an enormous business. 'The organizotion which controis them not oniy has agents photographing srenes in erery part of the worid, but muintuins theares and out-of door cstabishments, where cumplete plays and all sorts of other artivites are presented befure the cam ra." - N. S. Eeth. iny Post.

Opsonins: A remarkable new Discovery in Biology. - Discuvery of the fanctions of the White corpuseles found in the blood of anims: was tegun, it is sald, by Dr. Augustus Waller,
in 1848, and continued in much inter years by Profesor Metchnikof, who was associated with the work of l'asteur. The iatter determinedi the surprising and extremeiy important fact that the white corpusciel or cells are easentiaily minute living creatures, which serve the larger creature thay inhahit as a sanitary guard, defending it against the Invasion of milcrobe that are hostile to its health. They pursue and dicvour these malignant Invaiers: whence the name that has been given to them, of "phagocytes." or "cating cella."
"When we study the process famillarly known as 'intlammation, we find the most perfect lilus trathon at once of the ditites of the white bloud. culls and of the new plinse and menuing of a com mon occurrence whilela are revealed by revearch - intlammation is a process which follows upin large varlety of injurles, ani whill marks the inset and course of many flseases, from uscratch an the tinger to an inflammathon of the lings. Given a simple scratch and the phagocrtes timulated by the injury to the tissues will come hurrying to the scenc of the aceident like ambu. ance men, eager to asslst in the removai of any fleterous matter, and to give tbeir aid in the waling process and in the formation of the nuw thssue, the production of whiel will cons, lete the cure. But given a scratel that lnoculates the finger with 'dirt,' which is ouly anither name for mierobes, and the nature of inflammation becomes clearer to us. In il few bours the finger will begin to feel painful: its omperature will rise; it whll appar red and 'inflamed, and it will exilhit s'veling. later on. If we puncture the sweling, we shall find a gellow thuid, which we name 'pus,' or 'matter, escaping from the pisncture, Now to what are the symptoms of inflammation due? The phin answer is, that they represent the results of a great migration of phagocytes from the bloodressels. destined to attack, and if possible remove, the infective particles wilch threaton to do us injury. The intiamnation, in this riew, is the erldenee of a battle being fought in our foump, and often with very lung odils against us. If our phagocytes gain a complete vietory, we escape the suppuration which we saw to re sult in the shape of the 'festering' finger. If. on the other hand, they sustain defeat, they will fight on, leavlag their dead behind. It is the doad white blood cells, which have fallen in the fras, which constitute the 'pus' or "matter we find in wounds. These cleat celis, like the corpses of soldiers who fail in battle, later become hurtful to the organism they in thelr iffetime were anxious to protect from harm, for ther are fertile sources of septienmia and py armin (blood-polsoning) - the pestilence ailit stourge so mucit dreaded by operative surgeons

Such is the story whel forms the natura prologue to the blatory of 'Opsonins.' For many a day after the publlcation of Metchnikoft's discoveries regarding the germ-killing power of the phagocy:es, it was held that thes iving celli alone arcomplished the duts of disposing of troublesome invaders. Later on other opinlons were adranced to the effect that while the nbagocytes did undoubtedly accom iol their work in the direnton imilicated, the demanded ald to that end from an outside source. Thls source was indicated and repre sented by the piasma or hood fluid itself. The
fluld part of the biomi had long been known to possess germ-kiling properties, but the extrut of lt powers in thil diriction hal not been dily determined, nor had the lapartant polnt been settied whether the plasina na a whole or only part thereof adeni the white berod-cells in
 prior to the year $140:\}_{\text {ghe }}$ ge eange for the belie? In the immortance of the biood olasmu in whole or In part, but it was in the vear just named tiat very important investlgations were untertaken with the vilw to determinghg the exact status of the homel tluid in work of bacterlelilai kint. Its. Viright and louglas of st. Mary's IIospital, London, undertook a jleere of reserarch conducted on llares somewhat difierent from those on whleli prevlous work of thes nature lian beeu carried on. They procecded first of all by the ald of elellcate processes to separate the bloot-eorpuriles from the hlinal flinit. The white hoxi-cells were thus kept in it medinn or fluid of nentrai hind, while the blemitinid it welf on the other haud was ultalined free from its corpuseles. Next in order an emulsion of certain microbes capable of protileing diseas was mude in a solution of satt. When the phagocytes, alive, of contse, in tieir neutrai that ware allowed ancess to the germs they dial not attack them, it was as if two eonteminm armies land been brought face to face, watitnse to attack, but fostrained ly some negotations proceritig between the commanders. The case Fins at once altered, and the bithle began, when the experimenters brouslit the separatod hoorl. fluld into the fieli. Alded to the germs anit to the juagoertes these elements, which had been spolling for a tight, joinel issue, and the white blood cells performed their mormal work of microbe-baiting. There was but one inference to be drawn from these facts. (learly, thw addition of the bhond-lluid supplied some condition or other, neeessary for the develupurnt of the fightling powers of the cells. investlgators are of the opinion that the real suree of the power possergsed lyy the blomi. tlud or 'plasma' is to be sobight and found In sulistances contained thereln and ealled ' (Opsonins.' We can now npprecinte the nueaning of this term. It is terived from the elissic rerb for eatering. for preparing fome or for provilling food. The view taken of opsomice artion justlies the use of the word. for it is believal that these substances perform their share of the germelestroying work, not by urging on or stimulating the phigocytes to the uthek. lut, on the contrary, by acting on the micrones, by weakening their powers of resistance and by rendering them the easy proy of the white home eells. The ' (ipmonins' are carried by the bloot-stream everywhere, and it is when they come in contact with ans microbe colunies in the body that they exert their specinc action on the gerns, . . The jien that the niore actlve our white blow cells are, and the inore cxtensire and complete thelr work, the greater the amount of 'opsouins' present, is one whiel seems to be founded on a rutional basls. This rew recaris these substunces as the real eanse of piagocytie aetivity. 'That 'Opsonins' fur thermore appear to possess definite degrees of power sermes proved by the obsertation that : person's blood may contafin sutfielent to deal with one discase in the way of stimulatiag the

Physical: The New Conceptions of E. :tricity, Matter and Ether. - Statement by Madame Curie. - Sir Joseph Thomson's Address to the British Association at Winnipeg. - Sir Oliver Lodge on the Ether of Space. -" Onc point whifh nupears to-day to be du. fuitely ettied is a vlew of atouic siructure of
 the fifea that we have long held regarding the ntomic strueture of matter, whieh constitutes the luais of ehemieal thoories. At the mame than that the existence of clectrie atoms, indivisible by our present menum of researej, uppours to he established with eertainty, the important proper ties of these atoms are disu shown. The atums of negative eiectriejty which we cull electrons. are fumb to exist in a frecestate indejemient of aif material atoms and not baving nuy proper ties in common with them. in tinfs state ther possess evrtaln dimensious in space. ami uri conlowed with a eertnin inertia, which has sugg gessed the fifa of attributing to them a enrri sponding mu*s.

Expromints have shown that thele dimen. sions are very small rompared with those of matorlal moleciles, aut that their mass is ontr a small fraction, not exceeding one one thonsanith of the massof an atom of hydroben. They show atso that if these doms ean exist folateil, they nuby aton cxiat in all ordimary mutter, and mad be In certain cases emitted hy a sulistance sued as a metal withont its properifes being changed in a manner apprectable ly 10

- if, then, we eunalder thin ilecirons as a form of matter, we are led to put the dirision of them lex rond atoms and to admit the exibience of a kind of extremoly small particles able to enter into the comprastion of atoms, but not aeressa. rily by their departure involvine atomatie deairuction. lonking at it in this light, we are fod to conslder every atom as a cumpliented structure, and this supposithon is rendered probs. able hy the complextry of the emission speetra which ehameterize the different atoms. We have thus a concreption sufflciently exact of the utoms of negative electricity.

It is not the same for positive electriciny, for a great dissimilarity appears to exist between the two clectricltics. J'ositive electricity appears always in he fomd in connertion with material atoms. and we have no redasm. thus far, to believe that they can be moparated. Our know. letge relative to matter fo also fucreasmb hy an imporiant fact. A new projowe of matcer has been iliscovered which has $r$. of the name of ralisurtivity. Radioactivity is the propi. $y$ whlch the atoms of certain substances nossess of shootink mil partieles, some of which have a mass comparable to that of the atoms tbemselves, white the others are tbe electrons. This
propery, which itrenium and thorinn puseds In alfight degree, hae fed to the dlweovery, if
new chemilal clement, radlum, whose rmili, new chemical clement, radlum, whose raili,aetivity is very great. Among the particien is
pelied hy radlun are some which are ejpetel with great velicelty, and their expulslion is : companicid with a consldierable evolution of het, A radioactive foily constitutes, then, a sonrce of energy.
" According to the theory whicit best accomen for the phorrumena of radionctivity, a rertish proportion of the atoms of a ralionetive lowly ts transformal in given time. With the promer. thon of atoms of less atornie widght, and In some cuses with the expulston of ciectrons. This is a theory of the trunsmutation of ejements, but differe from the dreains of the afchemist in that we declare onrselves, for the fresent at tenst, unahle in indites or inlinence the trausmu tation. ('ertain facts go to show that rablionctir ity appertains in a sifgit degrie to ali hhaforf nutter. It may le, therefore, that matter la fir from being as nuehangeable or inert as it was fureneriy thonght: and is, on the contrary, in continuai trunsformation, althrogh thle trins formation escapres mir notice hy ther ive gint. nese."- Mainme Curie, Muxtria 7 Ha af tile" tricit, $\operatorname{rad}$ Mitter (Anuual lifport, snathoum, Inawution, 19015-6, $n p, 103-104$ ).

A remarkable sumniary of recent adyances in physicai aclence, hy Nir Joseph Thommon. in his presulential address at the opening (Aughsi git. 1904) of the serenty-niuth annual mertiar of the Britisis Associatlon for the Advaucerne: : of Schonce, Lehl at Winnijeg, Canarla, contain: what is, without donht, the most suecessflit of 'udeavors to glve amme und. atanding of the urw conceptions of mate re ether und der trictly with which scient ista are now worklng. to minilthat haver not bern selentifically tralnet. Joscph treats the siliject at more dengeth that

## SCLENCE AND INVENTIUN

for example, pase through the desh of the body and throw a whadow of the bian on a suitahle acreer. . It is not, however, to the puwer of probing dark places, Important though thit is, that the Intuence of Ifont gear reys on the prourem of uclesice has mainly been dise it is ruther brrauso these ray make gases, and, lndecd, mollity and llyulds. through which they pass. condurtors of electricity.... The stndy of gase exposed to thatgen rays has revealed In ginh gases the presence of particten clant ed with electricity: mme of these particles are charged with poultive, othern whlt negative. clectitelty. The propmoties of thesc particles have been inventigateri: we know the charge ther carry, the speed with winh they move underan electric force, the mite at which the opp sitely charged onns recomblne, and these Inv tigations liave thawn a new ligite, not only ou dertricity, but almon the stracture of nutter We know from these investigations thime electrl. elty, ilke matter, is molecular in structure, thet fist is a quantity of lyydrogen is a culiection of an lmnense number of suall particles caileal nubecules. su th charge of electifelty is maic up of a grent number of amail charges, each of a prefertly leflite and known anount. .. . Niny, further, the moineular theory of matter is late Whem to the molecular theory of electricity fior the most accurate determination of fts findia. meratal quantity, the number of molecules in any given quantity of an elementary mubtance.

The great advantage of the elvetrical meth. anis for the atuly of the proprerths of mitter is Whe to the lact that whonvern particie is elec tritiod it Is very ersully ldentiled, whercasan uncharimi molecule is most clusive : and It is onty when liese are prosent in immense numbers that We are abic tonctert them.
" We have already muie conshderahle progress In the task of discuvering what the structure of dietricity is. We have known for somen tha that of ont kind of eiectricity - the negative and a very linteresting one it is. We know that ansative chectricity is maile no of units all of which are of the wime kitul: that these units are +wredingly smail coniparel with evea the -railest atum. The size of there corpusckes is un an altogether diferent scate from that of stums: the volume of acurpuscle bears to that of the atom about the same rilason as that of a speck of dust to the volume of this room, luter sitable conlitions they move ut inormons spededs, whel approach in souse finstances the sifocis of llaht. The discovery of these corpusclu's is an Interesting example of tho way fisture ragpond to the demantels mado upoin her her mathematicians. Some yoars before the discorery of eorpuscles it had been shown hy a math:matical investigation that the mass of a luxdy nast be incrensed by a charge of elce. tricity. This increase, however, is greater for smat buitus than for large ones, and even linties a amall is atoms are hopeiesity too large to show any apprectable effect: titus the result semel entirely academic. Aftur a thrie cor. pustes were llsoovered, and these are so much smailer than the atom that the Inc "use In mass due to the charge becomes not herely appre. cable, but so great that, as the experiments of haufmann and Bucherer have shown, the whoie n) the mass of the corpuscle arises from its cbarge.

## HCIENCE AND INVENTION

- We know a great deal about negative eleo tricley: what do we know slout ponltive clec. tricity: In ponitive electriclty molecular in utructure: Is It made up into units, each unte carrylog a charge equal in magnitude though oppoatic in ajgn to that carried by a corpuacic?

The investigations made on the unit of posi' ve dectricity show that it is of yulte a ditterent kind from the unit of negutive: the mass of he negative unle ts excecilugly mall comprared withany atomi the only positive units that up tu the preant have been detectel are gaito conipantile in mass with the mass of an atont of liydrogen: In fact they weem equal to it. Thla nukes It more dilicult to be certain that the unit of joasitive electriclty lias lrea imolateri, for we have to be on our ghard agalnst lts helog a much mmaller body uttached to the hydrogen atoms which happeu to lee prosent in the vessel.

At present the amaliest prositire electritied partlele of which we have direct . xperimentul (villeuce have masses comparabie ith that of an atom of hydrogen.

A knowletige of the mass and slace of the two units of electrlcley, the positlve and the nega. ther, wonlif glve us the material for eunstritet. fing what rasy be called a molicular theory of electricity, and would be a starthg polnt for a theory of the structure of matter; for the most natut view tolake, as a provislonal hy puthe. sis, is hat matter is just a collection of positlve ami negallou nults of electricity, and that the furces which holid atoms and molccules tugether. the proberthes which difierentlate one kind of matter lrom suother, ali have their origha in the elictrical forces exertori by pusitive and ..egatve unlts of electricity, grontped together in Nifferent ways in the utons of the different elefrents. As it woali werm th the units if positive and negatve dectrlejty arc of viry dif. ferent sizug, we mist regard matur as a mixture containitu aystems uf very different iyjes, une type eorresponilig to the smali corpuscle, the other to the larice positive unlt. Nince the energy fasociated with a glven charge is greater the smalier the body on whim the charge is concent-ated. the energy storel up in the nega. tive eorpuscie- whil bie far grtater than that sturea nip by the postive. The amoant of cnergy which is storef un in ordinare matter in the form inf the electrontatic potenthal energy of its corpuscies is, I think, not generally realized.

Thisumorey is fortnoately kept fast bourd by tan eorpuscles; if at any tine an appredable fraction were tu get free the carth would ex. piode and lecome a gaveons nelula. The matter of whi, il have buen spraking so far is the material which huilits up the earth. the sun, and the stars, the matter studled by the cbem. ist, add which he con represent by a formula: this matter necupies, however, hit an insigniticant fraetion of the universe; it forms but mimite islands in the great ocean of the ether, the sibstance with which the whole universe is filled.
"The etber is not a lantastic creation of the specuiatire philisopher; it is as esseatial to in as the air we hreatie. For we must remember that we on this earth ure not living on our own rembrces: we are derentent Irom minutr to minute upon what we are getting from the sma and the gifts of the sun arc conveyed to us hy the ether. It is to the sun that we owe not

se vexpected direction. He expowed a urs. alum eaft th the light, and then placing it in a dert room on a photographic plate corered with oparine paper he clemonstrated the actlon of theme rays on the plate tirrough the piper, thin nieets of metal, etc. But the supixsed and mught-for relution of the rays to the previon duorescence was not evhient, for Rectuerel uhtained precisely the sume resuit with prepa pation of uranlum which hal nint only not been previounly exponed directly to the light, but fad purposely been kept wome time is dark. pess and could therefore diapiay no aturedorip himincareace, ife lial, howerer, discovered the urantum or luecturesei raya.

At Lecyuerel's suggest lon Malamo Curie undertook a systematic fuvestlgution of all the chemical elemente ant istablisised the fere that whith none of them, excepting umulum und thoriam, conlit an apirectable efrert fullcating ravs be o. salned with ieer npparatus (Ja the wher hand, she foum that asany of the minerals investigated showed wuticeable action in thia difectlun. Tie fact that a few of them. the ura siun pitchblembe, for exanple, from Joardihus. thal, lohemia, emitted rays three or four thaney atronger than thote of pure uranium, aud whkels conld mot therefore be announced as uraniun favs. fed her to suppose that in the pitchbleade fixelf, apart from the uranhum, there mint exint arill mure powerfui milionctive suhstance. It is a uater of reconi how, in this researcl., which untght serve an a molel for auch work, whe and her lusbani, so sonn afterwarif to lase biv life by a deplurible accident. succeented in trusing this suppused substance more auf mure aceorately, and fually in ohtainimg it pure. Malame Cule thus hecame the ifscuprer of radinm. a new element possessed uf wonderful, of fabulous yuntities.

Thesides Vhange ('urie no nther fureatizator but I'rofessor Iraunse hwolly so far na \& know. Lus yet surceeded iu ubtainlag jure radium." - franz lilmatedt. lindinafirity (Atnoull lie. part. Nmithenian Institution, 190.5-6, rp. 117115)

The phemmena of radto-activity revire firperest in the prophetir views of Mifhend Fura.
 Fiars of age, he telivered a ferture at the loyal Inatitutinu in labion on Radiant Matter. In the course of lis remarks there oceurs this passare: - 'If we now concelve n change no far beyond vaporization as tiat is abore fluldity, anid then take into account the proportional in. cronet extent of alterathom as the chauges arise. we shall perhsps. If we car form any conceptiun at all, not fall short of railiant nutter: and as in the last courcrsion many qualith's were lost, so bere also many more would disappear. It was the opinton of Newton, and of nany otiter distingulshed philosophers. that this courersion was possithle. and continually oning on in the processes of niture, and they foumd thent the idea would bear without injury the applicattras of mathematicul reasoring - as reparts heat, for instnnce. If assumed, we unst also assume the slmplicity of matter; for it would follow that all the variety of substances with whicin we are acquaintend could be conrerted into one of three kinds of radiant matter : Which again mas differ from each other unly in the slze of their partlcles or their form The
properties of known tmalles woukd then be sup. pumed tu arise from the varied arrangements of their uitimate atoras, and belong to wubstancea only a fong as their cundonnd nainn existed; and thus variety of matter mad variety of propertien would be found co-equential." - Veorge lies, Inrentors at W'ork, yp. \$u4-2us (Doubladay. F'age d' ('b, N. Y).

An accertalned commercial value of It per milligramme (egulvalent to $£ 114.000$ per ouncer) lua been placed upon rudlum by a contract just entured luto thetween the Ifritsh Metallifuraue Bitnes (Inmited) and Lond frengh and sils I' nest Cessel for the supply uf it gramuet (rather more blan a quarter of an ounce) of pure radium tromble. This viry large order for radium will be supplied from the above named e'mmpuny's mine hear Grampound lfacd In Corawali." - Ienden Time. dune \$1, 1400.

The Mono-Rail Gyroncople System. - A nucchankel luvention not yet dieveloperi, but which sems more than likely to count numg the most inportant of the next few years, is that kunwn as the ibrunan monorail system, which lalances cars an! trains of carm on a vingle rali tiy use of the princlpte of the gy roscope. it was ifst exhibited by fts Furdinh Inveutor. Mr. Lonuf isrinnan, in model form, before the lioynt socinty, in IMAF, and won so mush contliferme in Its possihilitles that the l3ritith War ollye aml the tmin otlice rave fundenl assistmare to neet the cost of the lung experincuts that were neceswary for adapting the arstion to service on a farge practical scule. The resblt of these isperiments was exbiblten in fublic trials at New Broupton, Eughami, not, subsertently, at New lork, in the later part of loos The following account of the exhibithon at New brumpton was glven by The Times
"The car whth which the tant runs werre care rled out is 4 uft. In leugthy inft. In widsh: its
 of IU tolitions. The bitiof if hag giroscopen. of whlef there are $t w o$, is $I f$ lums. eich lisang a diameter of 3 ft . Jin. Fhe vimed inf rotation is 3.14ん r. p. m., or considerahly lusu than it was In the Gft. model exhthited hefore the fingal suclety. It woull he pusslhb: for the car tu ubtain the necosary purecr by collecting current from an overhmul wire whth a cousequont saring of fichelat, but tu the present exaingle the motve puwer is provhind by two Wolseley putrol engines, nue of 80 h .10 and the ather of 20 h . p. driving two directcurrent shant-wount miotors of the Siennens type, it is not nocesary that the cat shonli be propelled elertrically, and steam or other motive power could be empluyed; but in any rase it womlif lo necessary to spin the Eyrnscopes , actrically. this methof leting lifeal for the purpuse. The nir in exhausted from the grroscope cases, the pressure in tben leing eifuivalent to from tin. to tin, of morcury. It is
 scopes for higher speeds, and In that case it wonll be posifble to reduce the size nad weicht of the cinifiunt. In this first car the gyro seopes run in the vertical plane, but that is morely for convenience, the essential foature bedig that the trunnl. us should be at right an. gies to the :rack.

steadiness throughout. It is not iikely thet the Brennan mono-rail will find any wide field of appiication in thls country, hut there would appear to be great advantages in the system for mountain rallways in India and eisewhere, and. indeed, It seems suitable for adoption in any country'where new railwayl are leing pianned. The $\ln$ ventor lays stress on the absolute safety of the syatem at speeds ranging up to shout 100 miles per hour."
Sanitary. See Public Healtif.
Submarine Signal Bells.- In Nay, 1909, It was announced from Wnshington that "the Government, recognizing the suhstantial servlce reniered to shlpping in suhmarine belis, has decided to extend thelr instaiation from tlme to tlue to light vessels and stations on both coasts and upon the great lakes. At present forty-six of the light vesseis are thus equipped, aud the signals which they send out are of undouhted aid to deep-wnter navlgation, Canada, England, Germany, Ifoliand, France, Swedea, and Denmark are following sult. The bells op, erate during fogs and at night and the sound waves emltied hy the bell under water have been known to travel as far as twenty-seven milea. These sound waves are picked up by the receiv. lng mlerophones on board shlps, and hy the coile slgnal of each station the vessel's navigator is ahle to teli where he is," See nbove, Electuical: Wirelefs Teleoraphy: The Cay that lonocoont llehe.

The Turhine Steam Engine. - Its Successfui Development. - First Use on Ocean Steamers. - The "Lusitania" and "Mauretanla." - "For a long time and weli into the ninetcenth century, water was lifted hy pistons morlng In eylindrical pumps. Deautime the turbine grew stentily in favor as a water motor, arrlring at last at higheffieiency. This gave designers a hlnt to reverse the turhlne nnd use it as a water lifter or pump: this machine, duly bullt, with a continuous instend of an Intermit. tent motion, showed nuci better resuits than the old-fashloned pump. Tine turhlne-puns is necordingly adopted for many large waterworks, derp mines and similar instaliations. Thls ad. Fance from to and-fro to rotary aetion extended Irresintilly to steam as a motive power. It was clear that if steam could be emploged in a turbine sonewhat as water 1 s , mueh of the complexity and loss inherent iu reciprocating engines woulif le brusited aside. A pioncer Inventor in this field was Giustave Patricil De Inval, of Stockioim, who constructed his first steam turhine along the familiar lines of the Barker mili. Steam is so lipitt tiat for its utmost utllization as a jet a velocity of about 2.000 feet a seennd is required. a rate which no materiai is strong enough to ailow. De laral by using the most tenacious metal for hls turbincs is ahie to give their swiftest parts a speed of as much as i400 feet a sccond. Lilis apparatus is cheap, simple and effirient: it is iimited to aluut 800 hurne power. Its chief feature is lis divergent
nozzle, which permits the outfowing stesm to expand fully whth all the effect realized in a steam cyinder provided with expausiou valy gear. Ancther device of De Laval which mske his turhine a safe and desirahle prime nover is the Eexihle shaft which has a litule, self righting play under the extreme pace of lts rotation.
"Of direct actlon turblnes the De Lavai is the ehlef; of compound turhines, in whieh the stesm is expanded in successive stages, the first and most widely adopted was invented hy the liva. Charies A. Pnrsons of Newcastie-on-Tyne. In 1894 Mr. Parsons launched his Turbinia, the first steamer to be driven by a turbine. ller record was so gratifying that a successlon of vessels, aimilariy equipped, were year by yesr hulit for excurslon llnes, for transit across the Britlsh Channel, for the British Royni Navy, and for mercantiie marine service. The thirty. fifth of these ships, the Victorian of the Alinn Llne, was the first to cross the Atlantic Ocean, arriving at Hallfax, Nova Scotia, Aprii 18, $14 \mathrm{H}_{5}$ She was followed hy the Virginian of the same iine whlch arrived at Quebec, May 1905. Not long afterward the Cunard Compsny sent from Liverpool to New lork the (ar. * tania equipped with steam turhines, and in every other respect ilke the Caronia of the same owners, which is drlyen hy reciprocating engines of the best model. Thus far the conipsri son between these two ships is in favor of the Cormania. The new monster Cunarlers, the Insitania and the Mauretania, each of 711,000 horse power, are to be propeiled hy steam turbines. The principal reasons for this prefer. ence are thus given hy l'rofessor Cari (: Thomas:-Deereased coat of operntion as re. gards fuel, labor, oil, aud repairs. Vihration due to machinery is avolded. Less wejght of machinery and coal to be carried, resulting in greater speed. Greater simpilicity of machinery in constructlon and operation, causing less liahiity to aceideut and hreakdown. Smaller snd nore deeply immersed propellera, decreasing the teudency of the machinery to race ln rough weather. Lower ceutre of gravity of the nig. cilinery as a whole, and locreased headrom thove the machlnery. According to recent reports, decrensed first cost of macibinery." George Iles, Inrentors at Hoik, pp. 45:-4.5 (Doubledny. Puge \& Co., N. J.).

In August, 1008 , the Iusitania made the ror. age from Queenstown to New York in 4 days and 15 hours: agnin in February, 1900, in 4 dars, 17 hours and 6 minutes. In September, 1809, the Mauretunia crossed from New Vurk to Queenstown in 4 days, 19 hours nini 41 ininutes.

A. D. 1908. - Mr. Carnegie's great Gift to Universities and Students. Sce (iu this rol.) Eble:atios: Scotland: A. D. 1901.
A. D. 1904-1905. - Decision of the House of Lords egainst tire Union, in 1900 of the Free Church with the United Presbyterian. -All Property given to the Opposing Remnant. - $\quad$ In 1000 , the E'nited Free Church Was formed by the union of the majorlty of the Free Chureh with the entirc lody of the United Presbyterians, . . . (see, in Volume VI. of this
wark, Scotland: A. D. 1800) and a new organ. imation placed in the tield of Church politics in Scotland almost equal in respect of numbers and resources to the Established Church. The amall minority opposed to this unlon inside the Free Church seceded, held some of the cburches and manses by force, defying authority to the extent, ln one instance, of a month's imprison. ment, and retained the denomination of 'The Free Church of Scotland.' As their fathers ieft a 'ritlated' Establlshment on purpose to preaerve the freedom and purity of the Natlonal Cburch, so they refused to enter the new union, In order, by atanding out, to save the principles, cloctrines, and purposes identlied with the Dlsruption of 1843 . This miuority of not more than twenty-seven minlsters and as many congregatlons, moatly located in fustnesses beyond thre Grampinns, is now the Free Chureh of scotland, with Presbytery, Assemlily, Moderator - in short, with the oflices and lustitutions, on a condensed scale, which are essentlal in Presbrterian polity. These few determined pcople claim to be the faithful remnnnt of the Jisruptlonists. Llke Milton's Abdiel, 'unshaken, unseducel, unterrified, nor moved to 'swerve from truth' or 'change their constaut mind,' they clain: to bave kept their loyalty, their lore, thelr zeal in the cause of the Diarup. tion through all the temptatlons of an age in thought Pyrrbonist, in momlity lax, and in re. ligion Latitudinarian. On the assumption that they alone were the Free Churcb, they invoked Lise aid of the Civil Courts in their defence. The Conrt of Session - both the Ordinary and the linner Courts - decided iu favour of the Linited Free Church. Home-made lnw could not satisfy the minority, nad, on appeal, the House of Lords reversel the judgment of the Court of Session, declaring the remnant to be the Free Church of Scotland, and tinding that the Cnited Free Church was a modern conaposlie boly whieh, on the evidence of its ainbl(Iestrous and Latitndinarian constitution, had abaudoned the fundamental doctrines and prineiples lield by the Disruptionlsts. In consequence of thls decision, the property of the Free Church, as it exlsted prior to the uniou of 1900, now helongs to the remnant of the Disruptionists.
"From the side of the losing Lnited Free C'hurch a bitter cry has arisen against thls finality in law. The declsion is formally accepted, yit denouncei as unjust and incompetent, as ilenying toleratlon and the right to change its creed tu an autonomous body; and there are murmurs about of the necrssity of an appeal to Purliament. . . . It scems the raukest injustice (t) transfer more than one inillion in invested funls. nearly a thoussnd chureh buildinga, three superior collcges devoted to the trainlng of Dirinity students (one in Edinburgh, anotber in (Alasgow, and a thlril in Aberdeen). the mag. nificent Assembly Iall in Edinburgb, with the ofthces attached, probably also mueh property in foreign misslons, from the E'nited Free Church to thls reunant of Disruptionlsts, the custodians of the dying embers of Obscurantism in Scotland." - J. M1. Sloan, The Swotioh Free Church (Firfnightly Reviele. Sept., 1904).

Tis considfor the altuation created by the deciston of the IIouse of lords, a Roynl Commlaaion was appointed, which investigated all the

questions invoived and reported its Aodings in April, 1005. In the judgnient of the Commission, the Free Church (the "Wee Frees," as that hoiy was now commoniy duhbed) had neither the numbers nor the resources for putting to their proper use the enormous endowment which it ciainied. At the same time there would be no justice in delivering thone endow. ments unconditionaliy to the United Free Church. It was recommended, accordingly, that a Commission be constituted hy Act of Pariinment to take charge of the whole property and funds involved, ned to arrange for the allocation of the same. to the cud of securing "adequate provision for the due performance of the purposes for which the funds were raised and the trusts on wifich they are held." A Bili in nccordinnce with this recommendation was passed during the next segsion of Parilament.
On the request of the General Assemhly of the Church of Scotiand, the same Act enabled the Chureh to change the formula of suhscrip. tion required from its ministers. under the Act of 1603, so that, on being ordainedi. a minister shail only make a "declaration of his faith in the sum and suhstance of the doctrine of the Reformed Cinurehes therein contained, accorl ing to sucin formula as may from time to time he prescribed by the Generii Assembiy."

SEAL FISHERY NEGOTIATIONS. -
"Negotiations for an international conference to consider andi reach an arrangement proviting for the preservation and protietion of tire fur seais in the Nortin Pacitic are in progress with the governments of Great Britain. Japan, and Russia. The attitude of the governments interesteri leads nar to hope for a satisfactory settle. ment of this question as the uitimate outeome of the negotiations." - Vesarge of the Prenident of the I'nited Stutes to Congress, Dec. B. 1009.
SEATTLE: A. D. 1909. - The Alaska-Yukon-Pacific Exposition. - "The fair at Sonttie," said Thie World's Work of August, 1509 " "is beantiful; that goes without saying. for the best of man's art is titted to the best of Yature's workmauship to make a balaneeri and bleaded picture never excelied In the long ist of great exhibitlons. But hetter than that, the fair at Seattie is a definfte commerclai iesson ami lessons in commerce tast forever. Pri. marily, the fair is traching the people of the Linited states to know the Paclfie coast : sece onilarily. it is teaching then a litte of Alaska, a little of Japan, andi a little of the Phitippines. And the distinctive feature of this partieutar fair ts the determined effort to make those lessons trie" This eenms to degceribe the impres. aion which the Alaska- Yukon-Pacific Exposition made generaily on the visitors who went
to it with an inteiligent purpose in going. It gave them what they went to see, with adelity. with fulness, and in most attractive forms of dispiay. Like its Northwestern predecessor, at Portland, four years before, it was an almost startling reveiation of the possihilities of plant. ing and ripening in cities, states, and their sociai institutions, that ife within triviai spaces of time in thia wonderful present age.

The Exposition was on the grounds of Wach. Ington University, and seven of the principai huildings erected for it ware of permanent construction and remain for the use of the l'niver. sity. Again, as at Portlandi, the most intereat. ing of these huiidings architecturaity was that for the forestry exhibit, huiit of iogs and other timher in a atate as nearly natural as it could be kept.
The Exposition was open from June 1st until October 16, and registered about $3,740,000$ vis. itors.

SENUSSIA, or Senoussi: The Pan-lelamic Movement in Africa. - Sidi Mahomed hin Ali es Senussia and his Sect. - His Doctrine and its Aim. - "We have rectntly heard. principally npropos of the disturbances in Egypt. a considerahle amount concerning Pan-Islomism. Taking into consideratinn how much hns been written on this sulject, it is surprising to Hind how little has been said conceruing one of the prinejpal orgauisations for the propagation of Pan-Islamism. I refer to the sect known as Senussin. . . . A: tinis present moment there is throughout Africat sery general dijscontent among the native population, not only in Mohammedau comintries, hat univer. sally over the length and breadth of the entire continent.

It is a conparatively easy mater to so intinence any warilike Mosien peopie to relifious enthusiasm that they are instantly ready in armto) strike a biow for the faith. But the most significant nad sinister symptom of this snti Curistinn crusale is that the message carriot br the Senussia agents is, Whit, for the time is not yet ripe. Rest now, but when the huir arrives, rise, slay, and spare not.' Tuhing into consideration the fact that the Senussia seet was frunted in 188\%, that its rize has bec: enormously rapid, and that its propagania has been activeiy and diligently preached in British

## SENCSBLA

poweadons for many years past, with scarcely one deflaite Item of intelllgence concerning ft being known. It shows clearly that the motive power snd organlsing intelligence must be some. thing conslderably above the average.
"The sect was founded in 1835 by Sidl Mahomed bln All es Senusila, otherwise known as Sheikh Senussl, an Algerian Arab born near Mostaganem towards the end of the Turtish dominlon. A lineal descendant of the prophet Mahomed, he first gained s reputation for sanc. tity st Fez. lle then proceeded to Mecca, where he commenced preaching. IIowever his suecess, which wa remarkably rapil, caused great local jeslousy and he hal perforce to thy to Egypt. Ile started a zawla or monastery at Alexsndria, but being excommunicated by the Sheikh el Islam at Cairo, he was again com. pelled to seek safety In flight. This time he ded across the Lyblan desert to Jebel el Alydar near Benghazi on the north coast, where he gain entabllshed a zawla, and in a short tlme bul obtained a considers ble following. There be lirel and preached, and died in 18.76 or 1860 , haring firmly establisheil the Senussia sect. He was aucceeded by his son Mahomed.

The doctrine preachet by the Sheikh Senussi, adi which still comprisces the doctrines ani aims of his disciples, was as follows: Tofree the Jlshommedan religion from the many ainuses ahich have erept Into it. To restore, under one unirersal leader, the former purity of faith. finally, and most especiaily. to free all Minslem countries, more partienlarly those in Africa, from the dominion of the infidel." - In. A. Wilwas. The Mostem Menace (Dinetienth Century, Se $e_{i}$.

- The growth of the Senoussi has been one of the most striking developments of modern lslam. They have adopted an actlve missionary pulicy oud have spreal southwarts through heathen Africs while their organization has been framed with the idea of including and conrdinating all esisting brotherhoods. The senoussi have escablished in all countries where the Moslem is goremed by an alien race a system of occult government side by side, and coinciding in its bundaries, with the state adminlstration. This wecult government exists in Algeria, Egypt, ani Intis, and its enufsaries are at work in Xigeria. The Senoussi now include wlthin their brother. b-d practically all the Sunnis. that is the zusjority of Joslems in Arabia. Turker. North Africa. Turkestan, Afgitanistan and East Asia. The shites, who predominate in Persia. are 31. ne prerented by their conceptiun of orthoduxy Prabeing Senoussi.

The senoussi hai their headquarters at bjarboub, but some twenty years aco lt was imided to send thelr offieial representative to tcostantinople. and the veaerable Molkalem why ocuples this positiou is even more power: $:$ ! in councils than the Sheik ul Islam. A. D. 8905. - Supprestion of Gamhing and Edict for the Extinction of Sisvery. - An official notiacation of the suppreasion of gam. bling and a royal edict decreeling the aholition of the last remnants of siavery in the Kiagdom of Siam were communicated to the American Government, 1 pugh its Minister at I3ungok, in March aud Aprii, 1005. In purt, the former stated:
'IIIs Majeaty has iong heen impressed by the fact that although the revenue derived from gambling is an important factor in the finances of the Kingdom the evils resuiting therefrom are much greuter than the benetits. Peopie expend Iu gambling not ouiy their own wealth but the Wealth of others. Tbey devote to garulling time during whieh they should be attending to their work. Lnder present conditions large sums of money which come into the liands of the gambling farmers are sent out of the king. dom. Gambliug is also responsihle for much of the erime tiat is committed. The abolition of gambing would, therefore, not only resuit in an improvensent iu the morais of tise people and iu incriased indistry, but money now ex. pended therein would remaiu in eirculation Within thie country, thereliy adding to the wealth of the community. In order, howe ver, to replace the oss of the revenue derived from gamhing, some taxes minst be increased and new taxes dievised. In the increase of certain of these taxes it will be necessary to enter upon negotiatious with foreign powers. Gamhiling caunot, therefore, be suppressed at once. but must he grainaily aholished. His diajesty, therefore bas heen pleased to order the abolition of gamhiling within the period of three years."

The decree concerning slavery opens thus: "Although slavery iu our realin is very differ. ent from siuvery as it has existed in many other councries - most siaves being persons who have becune so voinntarily and nut hy force and the powers of the inaster over the siaves being strictiy limited-yet we have always con. sidered that the institution, even iu this modifled form, is an impediment to the progress of our conntry. We have, therefore, from the commencement of our reign, taken steps, by the enactment of laws and otherwise, for the abolition of siavery. . . . We now deem it time to take more sweeping measures which wili gradualiy reault In the entire disappearance of slavery from Siam." Accordingly, iaw is becreed as foilows: "All children born of parente Who are sisves shail be free withont the execution of the condition stated in the law of Pee Chau. No person now free ean he made a siave. If any person now a slave shail hereafter become free he cannot thereafter agaln become a slave. Wherever any person is now heid a deht siave, the master shali credit upon the prlncipai of tire deht for which he ls held a slave the sum of four (4) ticals for each month after the 1st of April. 124. provlderl that no credit shall be allowed for any time during wiich the slave may desert his master. If a slare changes his master, no increase shail be made in the deht for whlch he is actualiy held."
A. D. 1909. - Treaty with Great Britain, Ceding three States in the Malay Peninsuia. - By a treaty with Nim, sigucal on the ioth of March. 1009, Great Britain added 15,006 square milies to her dominion in the Balay Peninsula Siam renon aced, in favour of Great Britaln, har suzerain rights over the native States of Kelan. tan, Trengganu, aud Kedah, and perhajes other districts, in the Penlnsula. In return the i3ritish Goverument consented to certain moditiativas in the extra-territoriai rights enjoyed by British suhjects in Niam. Tine Government of the Fed. erated Maisy states will advance to Slam tha capltai, abouit $£ \$, 000,000$, required for the con structiou of railways iu Southern Siam, by which it is hoped that direct railway communi. catiou wili sovu be catablisbed between langkoh and Singapore. Kelantan lies 874 nilles tistaut from Siugapore and about 500 fromi Bughok, on the shore of the China Sea. It is a purely Mulay State under the rule of a Rajah, who has mit. like his predecessurs, adopted the higher title of Bultan, but wito ciains to be an independen: Sorereign, tluugh he has been compeiled to acknowledge the King of Siam as bis suzerain This conditlon of affalrs has led to the transfer of his aliegiance, very unch, it is said, against bis wish.

SOCIAL BETTERMENT: Eagland: A. D. 1909. - The Housing and Town-Pianning Act.-A Ilousing and Town Planning Bill, hrought over from the previous eession of Parliament, was introduced anew in Aprii, 1909, hy Mr. John Burns, President of the Local Government Board. It passed the Commons and went in November to the Lords, who gave it ameadinents whlch were thought to bave hrouglit it to wreck. The IIouse of Consmons would not accept them ; hut many in both ilouses were keeniy anxious for iegisiation on the suhject. and private negotiation brought sbout a compromise of their differcaces. securlog the enactment in a fairly satisfactory form.
The first part of the Act aims at improving the dwelling nccommodation of the working classirs. loth hy nuking it olllgatory on ull focal authorities to provide new housing where required, and aliso hy elaborate provisions for sanitary iuspection. Every eomnty councii is required to appoint a puhlic heralth and housing committec and niso a medical otticer of health. who shall devote his whole time to the super. vision of the county area. Aimost all work. ingelass dwellings in the ountry are covered hy provisions ensuring tbat they shali be kept dit for hnman hahitation throughout their tenancy. Enlarged powers of enmulsory purchase, of closing and of demolition are also conferred upon local authorities or their authorizei agents.
The prorisions of the Act relating to townplanning are commendai hy The Times as marking "a new departure in legislation in this country. Ilitherto new centres of population have been allowed to grow up, and existing urban areas have been allowed to expand, without control or prevision. The result has too often been that the haphazard development of lan: it the vicinity of urban centres has pro. duced slums, prevented the orderly growth of woras, and involved enormous expenditure in clearing sites, widening streets. and providing aeressary open spaces. The Biil alms at seeuring in the future sanitary condltions, amenits, and convenience by enahling seliemes to he male under which huilding fand will be developed with due regard to future reguirements. With this end in view the Local Government B-)ard are empowered to authorize focal authorifies to prepare town piannlng schemes in con nesion with land iikely to he used for huilding purpomes. or to adont any such schemes proprised hy owners of land. The schemes are to hars effect, however, only if approved by the Local Government Board. The Bill provides
for the payment of compensation to any persoo whose property is injuriously affected by the makiog of a town planning acheme, and, on the other haod, the iocal authurity is empowered to recover from say person whose land is increased in value hy the making of the scheme a proportion of the amount of that increase."

In anticipation of the pasage of this important Act, a party of eighty representatives of municipalities and othcr hodies in Great Britaln Who would be concerned in its administration pensed the Easter holidays of 1009 in some of the German cities whleh are most famous for the manner in which they have deait with the prohlems of town-growth. The four cities selected were Cologne, Dusseidorf, Frankfurt, and Wiesbiden, each of which has formulated its own way of dealing with the prohiem and offers a different point of view.
Prussia: A. D. 1905. - A Goverament Bureau of Charities. - In 1905 a law passed hy the Prusaina Dict created a nationai Charity Bureau, the dutics of which are stated as foliows: (i) To foliow the development of charity work and keep the government informed of this devciopment ; (2) to advise the state of conditions which justify change in esisting iaws or the passing of new iaw 8 , or which suggest change in government methods: (3) o draw up opinlons and make proposais which wiil help in framing laws for the besefit of the peopie ; (t) to take general control of reilef stations in case of great calamities. It will ais, be the duty of the department (1) to establish relations he. tween difterent eharity organizations suggest improvempats in the methods of these organiza tions, and economize the forces of the various bexdies: (2) to follow the progress of charitable work and make an Index and coliection of all literature relating to the suhject: (3) to give information and advice in reference to plillanthropic endeavor when requested to do so: (4) to make reports to the state at short intervals in reference to the developnent anll prugress of the work in the nation at large; (5) to draw up opinions and make proposals for the improvement or better organization of the eharity propuganda in part or as a whole; (6) to take charge of the development of the work in any section: (\%) to assist in putting in operation any suggestiona or plans which may be made or wirked ,ut for the improvement of socini conditions.

United States: A. D. 1900-1909.-The National Civic Federation. - Its Origin. Its Purposes. - Its Organization.-Its Work. - The Feficration was organized in 1900, in Chicago, nfter a succession of national conferences had been held upon such suhjects as Prinary Election Rcform, Foreign Policy and Trusta and Comhinations. It consisted of an advisory council of tive hundred membera and an Executire Committee. On the Executive Committec were several of the memhers of the present National Executive Committee, including Franklin MaeVeagh, Archhishop Ireland. Samuel Gompers, John Mitehell. LI. J. Keefe. Jobn W. Strhi, and Benjamin Ide Wheeler. The prospectus, puhiished at the time, stated the purpose of the organization to be as fuiluws

To organize the best hrains of the nation in an educational movement toward the

## SOCIAL BETTERMENT

## SOCIAL BETTERMENT

soiution of some of the great probiems related to social and induatrial progress; to provide for study and discuasion of questions of national import : to aid thus in the cryatailization of the most enlightened pubiic opiaion: and, vren desirabie, to promote legislation in accordance therewith."
' Fifteen nationai anbjects were named, and It was expected that from thme to time the for mation of committees would result having as their specini province the consideration of the suijects suggested.
"By vote, it was decided to take up for dis. cussion, through nationnl conferences, the three subjects of inclustrial arbitration, taxatiou and municipai ownersilp. The first conference, that on industrial arbitration, was heid at Chi. cago, in December, 1000 , and resulted in the orgauizntion of the Indnstrial Jepartment, with A. C. Bartiett, of Chicago, chairman. In the foliowing June a nationni conference on taxation was heid in Buffalo, resuiting in the formation of the Departnent on Taxation, with Elwin IR. A. Neligman as chairman. It wes the intention to heid tite Conference on Municipai Ownership in New York the foliowing December, but in the meantime a number of large strikes, especinliy the Steel Strike, the Nationai Machinists' strike and a threatened Anthracite Coal Strike absorbed so much of the energy and attention of tite active members of the Federa. tion nt that time that the I'uhlic Ownership Conference was postponed for the time heing.
"Through the work done by the committee in connection with the coa! and steai strikes, Senator linnua hecame interested in the organ. ization, and in December of that jear was made Presilent of the organization. IIts selection for that office, together with the sppointment of other men of nationai reputation on tite com. mittee, attracted the attention of "'e country to the organization. For two yenr: f. lowing that department was the only oue pic.isinent lefore the public, and its work in the prevention of strikes nnd iockouts was naturaily regarded as the only pirpose of the orcanization. The conferences lieid during this periol were asturally contined to the suhject of conciliation and collateral phases of the work. As nationai iabor disturbances then lecame less frequent nfter two years of this speciai work the organization whs abie to resume its original programme. hoding itself, however, in remilness to coneentrate its energies on the ludustrial work at any tinue the need might arisc.
" It was at this time that the nutional conference on immigration wns calied, and the Depart. ment of Inmigration organized. After that a national commission on Municipai Ownership was formed, nnd hy that time the public hegan to take interest in the brouier aspects of the ur. gnnization. Later enme the establishment of the Industrial Economies Department, Which bas taken up some of the most important prohiems of the day, including Socialiom nnd Trusts and Comhinations. The holding of a national conference on I'oitieal Reform resuited in the organlzation of a ciepartment especially devoted to these suhjects.
" While the suhjects to be taken up by the organization ape detcrmiced by the Executlve Commlttet. the fact is here emphasized that in devoting itseif to other matters than questions
relating to strikes and fockouts, the organization has not deviated from, but has returued to it originai lines." - The National Civic F'deration Heviev, Mureh, 1909.

The foilowing additional particular of the organization and operatons of the Federatlon are drawn from a pamphiet statement of 1000:
"The memberahip of the Federation is drawn from practical men of aflairs. whose acknow. ledged leaderahip in thought and action makes them typicai representativea of the various clements that voiuntarily Fort together for the general good. It National Executive ('ommittee is constituted of three factors: the gen. erai pubilc, represented by the churcli, the har, the press, atateamanship and finance; employers, represented by inrge manufactırers ond the heads of great corporations, and empioyers' organizations: and labor, represented liy the principal officials of natienai and international organizations of wage murners in every impor. tant industry.
"There are useful organizations of farmers, manufacturers, wage-earners, hankers, merchants, lnwfers, economists and other distinct but interacting eiements of society, which hoid meetings for discustion of affairs pecuilar to their own pursuits and caiiings. The Federa. tion, in addltion to its Departments for the accompliament of specific purposes, provides a forum where representatives of all these clements of society may meet to discuss nationsi problems in which they have a common inter. est.
"Tweive nationai conferences have thus been heid upon such subjects as I'rimnry Election and Ballot Keforms, Foreign Policy, Trusts, Conciliation and Arbitration, Taxation, and immigration. These conferences have usually been nttended by delegates appointed hy Guv. ernors of States and hy representatives selected by various commercial, industrial, and educs. tional bodies.
" The present activities of the Federatiou are excrcised through the foilowing ageucies:
" Trade Agreement Department,
"' Industrial Concilintiou Department,
" Industriai Economics Department,

- Industrial Weifare Department,
", Puhlic Empioyés' Weifare Department,
"'The Woman's Department.
" Pr hlic Ownership Commission,
"Immigration i) partment,
" Political R form Department.
"The Trade Agreement I)epmrtment [John Mitcheil, Chairmau] consists of emplorers und rejresentati ves of workingmen. Whommke agree. ments as to dours, wages and conditions of euployment. The membership of the department is cqualiy divided between employers nud labor leaders, the employers being oflicers of steam and street railwny companies, cosl operators. the puhlishers of iarge dnily papers, building contraetors, hrewers, stove mannfneturers, shippers' associations, while labor is represented by oficials in corresponding crafts.
" The Conciliation Departnent [Setin Low. Cuairman] denls entirely with strikes, iock outa and arbitration. Tie services of this deprart. ment have been enilsted in about five humbed cases, involving every conceivable phase of 3 prohlem intervoren with or underiying an industriai controversy. Its membership extends

## SOCLAL BETTERMENT

to every Indnatral centre, and Inciudes representatlves of leading organizations of employers snl of wage-earners. Through this membership information of any threatcned troubie betr. 1 capitai and labor usualiy reaches the headquarters, from one aido or the other, ln advance of any puhilc rupture.
. The Department of Industrial EconomIcs [Nichoias Murray Butier, C'isirman] was formed to promote diecusslon of practical economic prohlems. Its memhership Is composed of leading economists, Including the beads of the dicpartments of poilical economy in uni. versities, lecturers and economic and legai suthors; editors of the daily press, of poilticosocial magazines, of trade papers and of labor journals; representatives of the puiplt; iarge employcrs and representatives of ishor. This department has arranced a programme for the discusalon, hy the aliest experts to he procured, of cach of the vital and frequently irri. tating questions that arise In the Conciliation Department in convection with the prevention or settiement of controversics.
"The Iudustrial Welfare Department [the work of which is conducted hy a number of anb committees, at the iead of one of which is the Prcsident of the Uialted States, Wiliiam II. Taft, as Chairman of the committee which stuiles the welfare of the Puhlic Employés of the country, and the general Chalrman of which Is Wifisam 11. Wilicox] is composed of employers of lahor In stores, factories, mines and on railroads. It is devoted to Interesting em. ployers in Improving the conditions under which employés ln ali Industries work and live. la extending the practice of Welfare Work the department has found of especial value confarcnces of employers, held unle: ite ausplees in different parts of the countrv, for the interchange of cxperlences. Hilustrated litemture is widciy distributed, and steveopyifor lectures arc given. A hureau of cxclisnge is maintaincd at licalquarters, where descriptive matter, plans and photographs relating to bettcrments fa different industries may be ohtained hy employers.
"Some of the suhjects Invoived are:
"Sanltary Work Places: Systems for provldiag pure drinking water; for ventilation, inchad. lag the cooling of sujer-heated places, and devices for exhausting dust awd remenving gases: for lighting work places; and for guarding maclinery: wash rooms with hot and colic water, towels and soap; shower haths for mold. ers and statlonary firemen ; emergency hospit. als: Iocker rooms: scats for wonien: laundrics for men's overalls or women's uaiforms; the use of clevators for women, and funcheon rooms.

- Recreatlon: The soclal hall for dancing parties, concerts, theatricals, blliards, pool or bowling: the gymnasluni, athletic tleld, roof garif.n, vacations and summer excurslons for employés, and rest rooms or trainmen's rest hous's.
"Educational: Ciasses for apprentices: in rooking, dressmaking, millinery; tirst aid to the injured: nlght classes for technlcal training; kiniergartens and libraries.
- Housing: Homes rented or sold to empioyés, and boarding houses,
- Provident Funds: For Insurance. pensions, sarlags or lcnding money In times of stress.

## SOCIAL BETTERMENT

"The Woman's Department (of which Mra. Witiam 11. Taft is Honorary Chairnan, Mrs. Honice Brock, Chairman, sud which Las a strong corpi of other ofticers] " Is composed largely of women who are themseives stockhoidcrs or who are financlaily Interested in industriai organizations (Incinding railiroanls, milis, factories, mines, stores and other work pisces) througi family reiationshlps, and who therefore naturally shouid he interested In the weifare of workers in enterprlacs from which they draw their incomes; there are aiso, among other intuential members, the wives of puhlic officials.

- The objeet of this departmcut is: 'To use lis intluence In eccuring needed improvements In the workIng and living conditions of women and meu wage-earners In the various lndustries and governmental Institutions, and to co-operate, when practicahle, in the general work of the Federation.'
$\cdots$ The Puhlic Ownershlp Commission [Jel. vilie E. Ingalia, Chalrman], appointed by the Executive Council of the Fcderation, is com. posed of one liundred prominent men representfing practically every shale of opinfon on the subject.
- The Department of Immigratlon [Frankiin Macteagh, ChaIrman] Is eomposed of men ee. iccted to represent every locality in the Union affected hy the admission of aliens.
- This Departinent was organized at the request of the National Immlgration Conference, held In New York City, Deceniher 6-8, 1905, this conference heing attended by more than five humired delegates appointed by Governors of States. Ieading comnerclal, agricultural, manufacturing, Iabor and economic organizations, and by prominent eccleslastical and educa. tionai Instlitutions. It undertook an Investiga. tion of all important phases of the Inmigration problein, the I epartment being organized iuto suen distlnet committees.
" Largely though the work of the lmmi. gration Department. Congress was induced to arpoint a Commission on 1 mml gration, which commisstoa has, with unlimited funds at lis dis. posal. undertaken a large part of the work that had been pianned by the Federation's depart. ment. In act, two members of that depart. ment are on the commission and have utilized all the material gathered by the Federation's cxperts, reiating to both white and Orientai lm. unleration
$\cdots$ The organization of a Political Reform Department was the practlcal outcome of a Natioaal Conference on that subject held In New Fork City. Narch 6 and $7,190^{\circ}$, under the auspices of The Nationai Ciric Federation. The Confcrence was attended hy delegates from ali jarts of the country, appointed hy congressmen, governors, mayors, munlcipai and political rcform bodies, and representing all shades of political opinlon.
" lt Is the purpose of the Puitical Reform Nepartment to teach practical politics, and especially to organlze the $v$ - ing men of the country and induce them to $p$ ralcIpate actively, through their respectlve party orcanlzations, in governmental affalrs - Feiteral, State and municipal."
A. D. 1904-1909. - The American Civic Association. - "Organlzed effort for the systematic making of a beautifui America did not

## SOCLAL BETTERMENT

manlfent itself until withlo comparatively recent years. Irlor to 1904 there had been various short-l|ved atate ascoclations, few Interstate tocletien and two national organizations, work. log with the same general objects in view. But at gt . Louin, in 1004 , the Jear of the erent ex. position, a merger of the two national orgaoizations brought forth the American Civic Assorfation whica, siuce that time, has carried oo whith facreaning mucces and popuiar support the greatly needed work for a 'More Beantiful America'; and sioce that tlme it bas beeo recognized as the one great natlonal agency for the furtherance of that work. With its nur. pose as stated in its constitution cleariy before ft. It has constaotly whiened the circle of its unefuluess until recently they were grouped under fifteen general departments, each depart. ment headed hy ao expert in his or her particu. lar speclalty
"In classifying its varied activitien, the Anaciation anouncem that it aims to make Ameriean living coaditions clean, healthful, attractive : to extend the maklog of puhlle pariss: to promote the opening of gardens and play. grounds for children aod recreation centers for dults: to alate public nuisaoces - incluiling objectionable signs, unnecessary poles and wires. unpleasaot and wasteful smoking fac. tory chlmneys: to make the bulidlogs and the surroundings of rallway atathons and factorica attractive ; to extend the practieal Influence of schonls: to protect existing trees and to encourage Intelligent tree planting: to preterve great scenle woi lers (such as Nlagara Falls sod the White Mountains) from commerclal poliation.
'So vigorously las it pursued these activitics that it has suen some of them develop to sueh proportlons tiat they were ready to swing off from the parent circle into sphercs of their own. Such was the case with the playground movement, which for cears was fostered most energetleally by the Amerlean Civic Asmoclation untll it grew into an iniependent orgaolzatioo koown as the National Playground Assoclation. and whleh is now no agency of splendid sehlevements in its onve specialized function.":Rlchard B. Watrous, The American Civic Asoociation (The American City. Oct.. 1909).
A. D. 190\%. - The Sage Foundation for the Improvement of Socisi and Living Conditions. - Onc of the most notabie of gifts from private wealth for the endowment of undertakings to promote the general welfare of mankind was made by Mrs. Rusself Sage, in 1907. When she placed a fund of $\$ 10,000.000$ in the haoils of trustees, to he administered under the name of The Russell Sage Foundatlon. Oo the announcement of this endowment. Mrs. Fage, through her counsel, Mr. IIenry W. de Forest, authorlzed the following statement, which explains clearly and fully the purposes contemplated
"I have set asjide $310,000,000$ for the endow. ment of this foundation. Its object is 'the improvement of social and living cooditions in the Cnited States.' The ineans to that end will inclule researeh. publlcation, education. the establlahment and malntenance of charitable aod bencficlal activities, agencies, and instluthous. and the aid of ant such activities, ageocles and mstitutions already eatabllshed.

## BOCIAL BETTERMENT

" It will be within the scope of such a lound. atioo to investigate and study the causer of adverse social cooditionm, including ignorance,
porerty and vice, to suggest fow these condiporerty and vice, to suggest how these conditions cao be remedied or amelforated, and to put in operation any appropriato memns to that end. It wili also be within the scope of such s foundiation co entablinh any new agency neces. sary to carry out any of its concluslons, and equaily to contribite to the resources of siny exinting agencies which are dolng efficleut and satiffirtory work, just as the present Gr-neral Education Roard, organized to promote higher ciucation, is aiding existing colleges and unl. veraities. While it scope is broud. it shonld preferably not uodertaike to do within that ncope what is now being done or in llkely to le effectively done by other individuals or by
other agencleas with lene resources. it will be other agencles with leas resources. It will be Ita alm to takce up the larger and more difficult problems, and to take them up oo fur as posesble in sucla a manner as to secure cooperation and ald in thelr zolution. In some lantances it uns? wisely initiate movements with the expectation of having them maintain themtelves unailel after once being started. In other instances it nuay start noovements with the expectation of carrying them on itteclf. Income only will be used for its charitable purposes, because the foundation is to he permanent and its actions continuous. It may, however, make inves. ments for social betterment, which themselves produce lacome.
"Whlle having headquarters in New York $r^{\prime} c y$, where I and my husband have llved and where social probleoss are most pressing sad complieated, partly by reason of its extent and partiy hecause It is the port of cotry for about a million immigrants a year, the foundation will be listional in fts scope and in its activities. I have sought to select as my trustees nien and women who are famillar with social problems and who can bring to their solution not only zeal and literest, but experfence and judpment.
"The bill for incorporation of the endow. ment further provides: The corporation liereby formed shall have power to take and holi, both by hequest, clevlse, gift, purchase, or lease, either absolutely or In trust, for any of its purposes, any property. real or personal, without linits. thon as to amount or value, except such timitstlon, If any, as the leglslature shall herchafter Impose, to conver such property and to lurest and rejovest any principal, and deal with, sad expend the income of the corporation in such manner as In the judgmeot of the trustees will best promote Its objects."
A. D. 1907-1908. - The Pittsburg Survey. - A remarka ble Investigation of Living Conditions in a great Indumtrial Center. - " " 1 u . der the name of the Pltshurgh Survey, Cbarities Publication Committee has carrled on a group of soclal investigatlons io this great stecl distrlct. Io a seose we have been blue.printing Pittsburgh. Our findiugs will be published in a series of special numbers . . . covering in order:
"I. - The People;
"II. - The Place:
"III. - The Work.
"Full reports are to be puhlished later in a series of volumes by the Russell Sage Founda. tion, and, throughout, the text will be relnforced with such photographs, pastel, maps, charts, dl-

"The Pittohusgh Burvey hat been smpld, close range Invertigation of Hving conditions in the Penneylvania steel district. It ha been carried on hy a special ttafl organized under the natoasal puhilcation committee which print this magazine. It has been financed chlefly hy three grants, of modernte amount, from the RueselI Fisge Foundstion for the Insprovement of LivIng Conditions. It has been made practicahle hy co-operation from two quarters, - from s re. markable group of leaders and organlzations in cocial and sanltary movements In different parts of the Cnited States, who entered upon the field worls as a plece of natlonal good cltizenship: and from men, women and organizations in Pltthurgh who were large-minded enough to regard thelr iocal situation as not private and pecuilar, but a part of the American probiem of clty huliding.

The outcome has been apirited plece of interstate co-operation in getting at the urban fact $\ln$ a new way. . . .
"The main work wee set under way In Bep. tember, 1007, when company of men and women of estahlished reputation as students of soriai and Industrial prohlems apent the month In Pittshurgh. On the bads of their dlagnosis, a seres of specialized Investigatlons was projected slong a few of the llnes whleh promised signiflcant resuits. The staf aas Included not oniy trained Inventigstors but aiso representatives of the difitent races who make up so large a share of the working popuiatlon dealt with. Iainitations of time and money set detialto hounds to the work, which will become clear as the findlags are presented. The experimental nature of the undertaking, and the unfavorahle trade conditlons which during the past year have reacted upon cennomic life in ail its phases, have set other ilmits. Our inquiries have dealt with the wage-eamers of Pittsburgin (a) a their relatons to the community as a whole, and (b) In their relation to Industry. Under the former we liave studied the genesis and racial make. up of the population; its physical setting and lis social Institutlons; under the latter we have studled the general labor situation; hours, wages, and labor eontrol in the steel industry; chlld labor, Inilustriai education, women In Industry, the cost of living, and indust rial accidents.

- F'rom the first, the work of the incestiga. tions has been directed to the service of local movements for Improvement. For, as stated In a mil. year announcement of the Survey, we have bern studylag the communlty at a time when nascent soclsi forces are asserting themseives. Witness the election of an independent mayor three years ago, snd Mr. Guthrie's present fight to clear councils of graft. Withln the fleld of the Surver ard within one ycar, the Pittsburgh Assoclated Charitie has been organized: the force of tenement inspectors has been douhied and has carried out a first general housing census, and a sclentlac inquiry, under the name of the Pittsburgh Typhoid Commlssion, has been instluted into the discase which has been endemic In the district for over a quarter of a ceni:irg. A dric Improvement commiseion, repre. sentative In membership and perhaps broader in scope than sny slmillar hody in the country, is now in process of formation.
"A display of wall maps, enlarged photo grephs, housin plans, and other gruphlc mate. rial was the chfef feature of a civic exulblt held In Carnegle Institute in Novamber and December, following the folnt conventions In Pitts: burgh of the American Civic Aswociation and the Natlonal Munlcipal Iarague. The local civic bearlags of the Survey were the suhject of the opening session of thene conventious. Itseconomic aspects were brought forward at a joint session of the American Economic Association and the American Socioiogleal Sinclety at Atian tic City In December. ${ }^{\circ}-P$. $L^{*}$. England: A. D. 1909. - The PrincIpal Soclalist Organlzations of the Present Day."There are four princlpal organizations actively
engaged is galaing sdherents to the caume of Collectiviem an a prectleal policy, all over the klagdom. They are:- (1) The soclal Democratle Party, formerly Nocial Democratic Federatlon, and familiary known an N. 1). K.; (2) the Fabian Soclaty, (3) the Independent La. bour I'arty or I. L. P. ; (4) the Ciarton Fellow. ship and Scouts. There are several others of minor Importance, though not to he ignored, for they all represent the spreml of the central idea of socialism. Among them is the Churelisoclalist League, which fo significaut as being a society of convinced Bociallsta within the Church of Fingland holding that the 'community should own the land and capital collectively and use them co-operatively for the good of all." "
The oidest organizstion" Gegan as the Democratle Federntion in 1881, breame the Social Democratic Fetleration In issis, and has recentiy changed lis uame to the socisl Demorratic Party. Its olject, according to the programme as revised in 1006, is:
.. The socialization of the means of produc. tiou, distribution, and exchange, to be coutrolied hy a democratic State in the interests of tive ealire conamunity, and the complete emancipation of labour from the domination of capitalism and landlurdism, with the estabiluliment of social and economic equality hetwern the sexes.'
"It demandis a large number of 'immediate reforms,' Including the follow ing:
"Abolition of the Monarchy. Abolition of the Ilouse of Lords. Payment of members of Iarliament and administrative bolifes. Aduit surfrage. Referenium. Legisiative and niminals. trative ind pendence for all parts of the Empire. Repudiation of the Nutionai Debt. Aboifion of indirect taxation and a commative tax on ull incomes exceeding esion. Eiementary education to be free, secuiar, industrini, and comph. ry for all clasoes. Age for wethon nttendance be raised to 16. State maintenance of ali s wol children. Atrolitlon of school rates. National. izatlon of land, of truats, railways, docks, and cmals. Publle ownership of gas, eifectrle light. water supply, tramways, omnlbuses, de, fiod and coai supply; State nud munlcipal banks. pawnshops, reataurante, pubic ownership of hospitais, cemeteries, and the driuk traffie. A legal eight-hours day ; no employment under 16 years: pubtle provision of work for unempioyed at trade union rates: free state insurance agalnst sickness, accident, old nge, anci disabil. ity: a minimum wage of 80s. It week; equal rates of pay for both sexes. Cumpuls, ry conatruction of henlthy dwellings by public boilles. Free ndministration of justice and iegal advice. Judges to be 'chosen by the peopir.' Almititon of capitul punishment. Dlestnbishment and disendowment of all State Churches. Aboiltion of standing armies and establishment of nutional clizen forces.
"Thie Socinl Democratic Pnrty is the most downright and straigitforwned of the larger socialist organizations. It is nore outspoken and consiatent, iess hazy and opportunist. than the Indiependent Labouir I'nryy or the Fabian sowcicty. It derives it inspirailon from the so. clat Democrats of Germany and bollly upholds tie fidual of revoictionary sari,sism.
The Fubian soclety, which comes next "in point of age, ls at ine orporite end of the scale in regard to policy. it was founded In 1884.
on American inapiration. wa a wort of mutual elevation moclety, but adopted Bocialistlc prinal. ples from Germinay. Ite 'beote' it thus stuted:

- 'T The Fublun bociety conaine of Nocialigu. It therefore alma at the reorgauization of moclety hy the emancipation of land and induatrial cap tal from tndividual and clan ownerwhip and :ue veating of them in the community for the fete eral heneft. In this way oniy can the natural and acyuired advantagen of the country be equitably shared hy the whoie pople.
" ' The mociety secordingiy works for the es. tinction of private property in laud and of the consequent individual appropriation, In the form of rent, of the price puil for permisalon is use the earth, as well as for the advantages of superior soiis and sites.
:- The mociety further woiks for the trazalep to the rommunity of the adminfaratiou of nucb industrial capital as can convenfentiy be masa. aged mociaily.'
"It is not aurprising that thorongh-going A clalists denounce the Fabians as make.hellyt Socialism.and.water 'comirndes,' and hadir worthy to be cailed 'comuradea' at ail, an honour which the Fublans, for their part, show uo de sire to claim. Neverthelems, the Fabians are a very Influential element lu the Socialint more. ment.

The Fuhlan Soclety is numerically smail, but growing rapldyly, and that largely ty the fornation of provinclal branches. Thic hradquarters are in London. where it hai in March latt [1908] 1085 members out of a tota! of 2015. $\qquad$ Eleven Fabians are membera of Parllament, and the aciety supports the Labror party: but its real work ties outdide of politils. and is carried on chlefly by the diatrlhution of Ilterature and by lectures. It contains several weli known writers, and may almona be called a Ilterary society. The output of tacets aud heal lets suid and distributed last yen "qs orez 2.50 .000 . . . Among the best know ${ }^{4}$ bians are Mr. Granvlile liarker, the Kev. If J. ('amp. bell, the llev. Stewart D. Ileadlam, Mr, chat ozza-Meney, M. P... Mr. I3crnaril Shaw, Mir. Sild ney Weblb, and Mr. II. G. Weils. who has however, recently seceded. Many membera lelong also to other Soclallst organizations.

The thirl large organization on the list is the Independent Labour Purty. It is conditer. ably younger than the Social Democratic "arts and the Frabian Soclety, but much laryer and politically far unose powerfui than either ur both together. In character it comes hetween them, beiug more opportunist and supmic than the former, less nebulous and ellisive than the latter. It whs formaily inaugurated at liradforl In 1493, under the leadership of Mr. Kele Ilnrlie. The foliowing are the principal [demands] lu the official prospectus, revisel for 1908-09:
' '1. A maximum of 48 hours working weth with the retention of ali exlethe bofidays and Labour Day, May 1. secured by faw
".2. The provision of work to all rapalde miult applicants at recognized traile union rates with a statutory minimu $m$ of alxpence per hour

- In order to remuneratively cmploy the ap. pllcants. parish, district. borough, anil county ciunciia to bo investein with powers to in in. ganize and undertake such industries as they may consider desirable. A. D. 15039. - Tbe Classes to whith the Secialist Principle appeals. - Strength nf Socislist Puliticai Parties. - Their Leadership. - "The agriculturist loves the land

Which be usually owns, and Fould scout the fides of becomlag a farmer under the State, whlch woull be his ponitlon under Bociallatic réginue; lie is frugal. bard-worklog, and thrifty to the polnt of avarice, lut lutolerahly narrow. susplctous and higoted. Among thle clase Sociallam can burdly make proaclytes, nor can it to mo to any great extent among tradesmen and commercial men, who are elther their own manters or who hope to set up for themaclven when thty fiave amassed a small capltal. Wie there. fore fud ourselven reluced to two classes, the artisans and the professlons, and it is among these that we must seck the Moclallst votera of France.

In France, thanks to the fact that anembers of Parliament are paid, the professional classes are availahle for ths recrulting of habour lesders: indeed the younger section is naturally attracted to the fochallat standard. As.regards th! partlcular clans, we can ind ln Oreat Britaln no parallel.

Young Britons appear to he tus husy with their aports or ercial pleasures to study pulitical questlous, to that we can hardly compare them with the con. tinental 'Intellectusls.' The 'Intellectual' Is csacintlalty a iroduct of modern Europe and is principully to be found In France, Germany ani ilussla. Ife is almost Invariably highly educated, in sympathy with forelgn progreas, a liumanoltarian aid imbued wlth fifeas either Annewhat or very much alued of his thme. The French 'Intellectual' is at his best In the twenthes; he may then he quixotle, but he generally knows hls suhject and la fired witli generous cnthuslasms. $\qquad$ This curious factor must never be lost sight of when the Snclalist movement fin any European country is examilned. In Great Ilrtain members of the educatenl classes alnost invariably helong to one of the two great polltical parties; hut In France they are willing to joln hands whith the masses, not only as leaders, but wlth a rlew to the true enthronement of the people. It is probahly for thls reason that the soclalist party has made so much headway ln France. Such belng the soliliers and officers who march under the led Flag, it is not surprlsing that thelr polltleal organisation should have grown so powerfit. The Sociallst party has linrily suffered from the ups and downs of molttical Iffe; every election has sent It buck to power whth a greater number of seats to Its credit; at the present time t.'e farty has 74 representatives In the Chamher of Deputles, to whon we must ndd. In ccrtaln cases, 135 Rad. lcal Sociallsts. $\qquad$ - The 'Enllied Soclallsts' of the uncompromising type hold 53 seats, and the Indepenclent Soclalists 21: If wc add these two figures to the 185 limilical Sociallsts, we find tbat they form a conslderable portlon of the 591 members. Though they have not an absolute suajorltg, the welght of these 209 adranced votes ls such as to colour very strongly modern leglslation, and th re is no reason to doubt that their progress will contlnue up to a certaln point." - W. L. Aeorge, Franee in the Trentieth Century, ch. 8 (John lane Co., N. Y., 1909).

the aidige alm of aghtiog. Whils one of the Brituh alms was offnally defeated, the other, that of bumanity, wat at art only partally at Whef. The acherne for the concentration campn whil lacking in forempht. Adequate proviaton was not made fur the lionts of refugees regulriag mbelter. The regular medical and aanltary ntal wre already fully occupled with the neenly of the army, ani men were lacklug for the organ bation and mupervilitun of the ramps. Alte: ibsmen on purely military grounde often proved wholiy untultable. Ton much reliance whs pluced on the capacty for self-liclp to be ahown by the foem themeires, and the Boers proved in be belpless, utterly averme to cleanilinens ani hanarant of the mimplent elemente uf medichas and asnitation. The rwillt was that for a car. tailu pericil there was a very high rate of mor. culty among these nufortumate people." - The Times llisuryy of the llar in S. AJrica, sol. $\mathrm{\nabla}$. ih. 8 (liore, Marston if Co, lond.).
With better muccess Kitchener adopted and siesilly perfected a hock-bouse sytem, liy which lines of barfier were drawn acroes the comutry in different dliectlons, and protected sreas were formed. Tiue system and its worl. in.: are thus dencribed in the biatory quoted an it:
()ae of the Arat reforms undertaken by K. chener when he assimel mmmand in Soults Airlca was the strengtbening of the raliways At that time the fences of the llues were of the simplest dey,..ptlon, conninting almost $u$ Loily of open trenches at stathons, hridges and culverts, white the line itwit was patrolled by sinall partics of mouuted men. In laylng out these treach de? ces, the principal object kept in view was wo ler them inconsp unus and thus immune $\ell$ : ind artllery fire. The aystem re quired enormous aumbers of men botb for patrol wurls and for manning the loug lines of erenches.

It was clear that mine from of jurmanent or sembl-permasent defence n be be adoptel, if security was to be galned and the railway guarla reduced. Early $\ln$ January, arordingly. the frst blockhouses were constructed

Planted at first only at statlons, bridges. culverts, importazt cutling and curves - at the polat In fact, whle ext wience had proved in be wost vulnerahle - 1 . ckhouses came to be established at regular tairerala - about a mile and a lualf down the whole ex at of a llae. This lateryal win steadily lessened C'litmately it becanue as smail as 400 yards on the Delupoa line and was reduced eren to 200 yard on some portlona of the Cape rallways A continuous feuring of hurhed wlre ran along the line: clab oratr entanglements surrounted ca hlock house, and the telephone linked up th whole sratem. A somewhat later development was a deep trench bordering the line of barbed wire and runnlig to within 100 yards of each block. house.

Cntll July the system was confined to the railmays: but In July the idea frst took detnite shape of th: $\log$ hlockhouse lines across coum try, and thus creating fenced areas of manage. wile size within whileh the 13 wes could be deale -it plete me: It iz fmonam! !
these lines almost invariably Which thus became to all intent safe as railways. In other wor ber of alditional lines of ecr
opened up and merured, and the atflklog power of tho arny proportionately lacreased.

## SOUTH AFRICA, 1001-1002

8OUTH AFRICA, 1901-1902

frank and undisgulsed expresslon. 'To.day,' sald Botha, 'we are only too glad to know that our women and children are under British protectlon.' The wretehedness of those who remalned on the veld hecame, lndeed, a powerful argument for suhmisslon." - The Times History ${ }^{0}{ }^{\circ}$ the War in South Africa, che 10, 11, 14 (London, Lov, Mareton \&Co.).
It was not until March, 1002, that the men of authority on both sides of the war began to give tokens of a mutual disposition to discuss terms of peace. In the previous January, the government of the Netheriands had offered to act ns iutermediary between Great Britain and the Boers, and the proffer had been decilued, the Britlsh government repeating its determina. thon to accept no forelgn interventlon. At the same time it was suggested that, inasmuch as Mr. Steyn and Mir. schalk Burger, the chlefs of the Orange Free State and of the Tranavaal hurghers, respectlveiy, were understood to be lnvested with full powers of government, including the power of negotlatlon, those gentlemen could open, If they wished, dlreet communleation wilth Lord Kitchener, who had already been Instructed to forward to his government any offers that he might receive. On the 7 th of Mareh this corresprondence was sent hy Loril Kitchener, without comment. to the Transvaal government, then established at Stroomwater. The suggestlon in lt was rightly taken as an in. vitation, and actlng President Sclialk Burger at once asked for a safe-conduet for himself and the other members of his goverament into the British lines. with intlnations of a wlsh for opportunity to meet the members of the Free Sitate government. in order that they might concert proposals for peace. His wishes were radily complied whit th the $22 d$ be entered the britlsh lines. and all possihle aill was given him tu getting together the men whons he wished to consuit. Nome were brought aray from aetive tighting, which went on without then, no purse on the military side being permitted for a slngle day, while the parleying of a month went on.
The Transvaal and Free State governments met on the 9 th of April, at Klerkalorn, under British safe-couduct, and, nfter deluate aning thenselves on that diny and the next, sent a $t=1$. egram to lorrl Kitchener, requesting him to meet then and reccive from them a proposal of peare. ife replicd promptiv, invlting them to his headinuarters at leretoria, and there they were recelveri on April 12th. Their proposal was on the basis of politleal independence for the two Boer atates, under " an enduring treaty of friendshln and peace" with the British gov. crnment, ns well as a customs, pustal and rallway unton with the aljoining irritish colonies, and with concessions of the franchise to ['itlanders in the Transvaal. Kitchener could give no consideration to a proposal of thls nature ; hut conventel, after much discussion to cable it in iondon. At a seeond menting on the 14 th (when lorl ifitchener was joinet by Lorl 1 lil ner, the British litgh Commissioner In South Africa) he haul the answer of the British cor. ernment in prixluce. It derlared wlith emphasis that the government couid not "entertain any proposals based on the continued independ. ence of the former republics. Which have been formaily annexed to the Britith Crown." To
this the Boer offilais replied that they hrt no power to negotiate on any other basis the: of independence, and they anked for an ammis tice, to enahle them to consult their people. Thla was refused, but, after some parleying. It was arranged that they should have free une of the rallway and telegraph, and that military operations should be so conducted as to allow opportunlties for meetings in all parts of the country, at whlch thirty burghers from eaeh re. public should be elected, with authorlty to sct for the people. These representatives were to meet on the 15th of May, at Vercenlging. to determine the answer they would give. Between the 11th and the 15 th of Miay immunity was promlsed to all commandos whose leatiers should he chosen as representatives, and this practically operated as an armistice during those days.
"lilstory records no precedent," says The Times Illstory of the War, " for the state of af. fairs which existed in South Africa between April 18 and May 15, 1002. War went on, but. to borrow a netaphor from foothall, the ball of war was continually rolling lnto 'toueh. Kitchener loyaliy carried out hls undertakiag to the Boer leaders. Commandos were allowet to assemble and confer unmoiested; offieers and messengers scoured the country by rond and railway whth free passes, passing through lirit ish outpost llncs, recelving the unstintel hisg. plenlity of their foes, and occasionaily, to the chagrin of a junior British officer, undergoing accidental capture, followed hy fimmetiate re: lease on the produetlon of the magle pass Steyn, indeed, was too 111 to take part in all this activity and had retlred to a farm near Wolmaranastad. But De Wet, with amazzing energy, travelled over the whole of the Frre State, insplring the hurghers with his leader's fery spirit. At elght successive meetiugs he personally addressed practicaily the whole of the commandos and securel unanlmous resolit. tions against any surrenter of ladependence The Transvaal leaders were scarcely hass active, though the purport of their activliy was hy no means the same." These ehicfs of the Transvaal, Louls Botha and others, were disposerl to end the struggle for independenee; those of the Free State, inspired by their unconquerable I'resident, were not.
On the 15 th of May the officlals of the two Boer governinents met the sixty delegates frum the hurghers at Verecniging, and the question bet ween surrender and a hopeless contifuation of war was threshel out. The Free State inlegates and a few of the Transvaalers had brea hnund hy pledges to vote against any surrender of independence; hat in the end they were per. suadeif by their own legal advisern that such a restriction on the frec action of a llelcgate was contrary to the principles of law ; and gradunlly the questlon of Independence gave place to other matters of conslderation in the disensaion of terms. On the 19th a sub-committere was appointed to consider those detalls, and s.veral days of hargalning with Sitiehener and Milner. at Pretoria, ensued. There was much the of the cablie meantime, to secure assent in Lonion to what might be done. Tic result was a draft treaty which Lond Milner assurel the Boer Com misesonera was abisolutely final, and must se accepted or rejected wlthout any change, on or
before the 8Ist of May. They took it to the convention at Vereeniging on the 29th, and there, In two days of stormy debate, the no-surrender party, ied by steyn and De Wet, made their last stand. When the decinive vote was taken, their ranks were reduced to six, against fifty-four. The Boer commissioners returned at onec to Pretoris, with the accepted draft-treaty, and it was signed on the night of the 3ist, a littie less than aa hour before the expiration of the Axed erm of grace. The foliowing is the text of this tresty, which ended one of the worst of modern Wars:
"General Lord Kltchener of Khartoum, Com-mander-in-Chief, and Ills Excelieney Lord Mitner, IIIgh Commissioner, on behalf of the British Government

Messri. S. W. Burger, F. W. Reitz, Louis Botha, J. H. De la Rey, L. J. Meyer, and J. Krogh on behalf of the Government of the South African llepublle and its burghers:
" لlessrs. M. T. Steyn, W. J. C. Brebner, C. R. de Wet, J. B. M. Hertzog, and C. H. Otl vler, on behalf of the Government of the Orange Free state and its burghers, being anxious to put an end to the existing hostllties, agree on the following points :
"Firstly, the burgher forces now In the Veldt shall at onec lay down tbetr arms, and surrender all the guns, aniail arms, and war stores in thelr ..... 1 possestion, or of whleh they shall havi? egaiannee, and shall abstain from any further op position to the authority of his Majesty Klng Eilward Vll., whom they shall acknowledge as their larful soverelgn.

The manner and details of this surrender shall be arranged by Lord Kitehencr. Com. mundant-Generai Botha, Ass.stant Comanandant. General J. II. De la ikey, and Conmander-inChief de Wet.

- Lecondly, burghers in the Vedd beyond the frontlers of the Transvanl and of the Orange fiser Colony, and all prlsouers of war who are out of Nouth Africa, who are burghers, sball, on their declaration that they aceept the status of sulbjects of His Majesty King Edwnrd Vii.. be brought back to their homes, ns seon as transport and means of existence can be assuredi.

Thinily, the burgliers who thils surrender, or who thus return. shall lose nether their per. suml frevlom nor their property.
"Fourthly, no judicial proceedinga, clvil or eriminal, shall be taken against any of the burghers who thus return for any setion in connexinn with the earrylng on of the war. The benefit of this clansc shall, however, not extend to certain cleeds antagouistle to the tisages of warfare, which lave been communlcated by the Commanter.in. Chicf to the IBer generals, and which shall he heard before a court martiai lm metliately after the cesantlon of hostilithes.

Fifthly, the Dutch langunge shali be taught in the puble schools of the Transraai ami of the Orange iltrer Colony when the par. ents of the chlldirn demand it; nnl shail be nd. mitiml in the courts of justice. Whenerer this is remuind for the better and nure effective aiministration of justice.

Sixthly, the posseanion of riftes shall, on taking out a licence in aecordance with the lasw, he permitted in the Transvaal and tle Orange litur C'olong to pereons who require them for their proteetion.
"Severitily, military administration in the Transvail and in the Orange River Colony shall, as soon as it is posibie, be followed by civll goivernment; and, as soon as circumstances permit lt, a representative system tending towards sutonomy ahall be Introduced.

Elghthly, the questlon of granting a franchise to the natives shall not be decided until a representative constitution has been granted.
"Ninthly, no special taz shail be laid on landed property in the Transvaal and Orange River Colony to meet the expenses of the war.
"Tenthly, as soon as elreumstances permit there shall be appointed in each distriet In the Transval and the Orange IRiver Colony a Commission, in whleh the inhabitants of that dlstrict shail be represented, under the chairman. ship of a magistrate or other offielal, with a view to asslat in the brlaging back of the neople to their farms, and in procuring for those who, on account of losses in the war, are unable to provide for theniseives food, sheiter, and such quantitles of seed, cattle, implements, etc., as are necessary for the resuming of their previous cailings.
" His Majesty's Government shali place at the disposal of these Commissions the sum of £3,000.000 for the above-mentloned purposes, and sball sllow that ali notes lssued in eonformity with Lnw No. 1, 1900, of the Government of the South Afriean Repubilc, and all recelpts given by the officers In the Veldt of the late Republles, or by their order, may be presented to a judielal Commlssion by the Government, and $\ln$ ease such notes ani receipts arc found by thls Commlssion to have been ditly lisued for coasideration in value, then they shill be accepted by the sald Commission as proof of war lusses suffered by the persons to whon they had originaliy been given. In addition to the above-named free gift of $£ 3,000$. 00i). Ills Majesty's Government will be prepared to grant adrances, in the slispe of lonns, for the sanic eads, frie of Interest for two years, and afterwands repayable over a period of years wifh three per eent. interest. No forelguer or rchei shall be entitled to benefit by this elause."

The following milltary statistics of the War. as condncterl on the British site. Were published In a l'arliamentary paper soon after its close: The garrison in South Africa on Angust lst. 1890, consisted of 318 offieers and 9,023 nun: reiuforemments sent between then and the outbreak of loostllttes, Getober 11th, 1890 , totaical 12,546. Theriafter the troops sent up to May $31 \mathrm{st}, 1902$, reached the great totai of $356,0 \mathrm{NL}$, beshles 52,414 men raised in south Africa. The final casinalty figures are: Kilicil, 5.7it: woundel, 23,029: died of wounds or dlscase, $16.16 \%$.

A return made to Parliament in Aprii, 1902, of the estimatr. 1 amount of war charges In South Afriea that hai been and would be incurred up to the 81 st of March, 1903, gave the foliowing figures: For the first year of the war (1N00-10100), $523,217,000$; for the scrond jear. £65, 120,010 : for the third year. $£ \div 1,037,000$ : for the vear in which it ended, $\mathbf{£ 6 3 , 6 0 0 , 0 0 0}$. Total, 2232.074 .000 .
A. D. 1902, - Cape Colony and Natal at the Colonial Conference, London. See (in this vol.) Bratisu Explas.
A. D. 1902-1903. - Repatriation and Resettiement of the Boers in the Transvail and Orange River Colony. - Work of the first Eight Months of Restored Peace, - The following passages from a report dated March 14, 1903, made $\mathrm{h}_{5}$ Governor Viscount Bliner to Mr. Chamberialn, British secretary for the Colonies, wili give some intimation of the task of recon struction and restoration whieh the war had im. posed on the victors, and the vigor with which It was performed:
-The T'erms of Surrender were signed at Pretoria on the 81st May, 1902, but the Clvit Government couid not realiy begia to take over the administration of the new Colonies, and especialiy the comintry districts, for neariy a month after that date. At Lord Kitchener's request no attempt was made to enter into possession of those districts untif after the surrender of the Commandos, and tholigh that surrender was aecomplished with extraordinary ceierity and smoothness, somethiag like three weeks clapsed before any Civii ofticer conld even set out for the house or tent, generally a tent, aliotted to him in the widerness which we were about to take over, devold, as it was, of crops, of stock, of popuiation, and, to a large extent, of hahit. abie dwellings. The period over which this revicw extends is, therefore, one of about eight months - from the end of June, when the work of restoration commenced, tili the end of February.

To begin with the Prisoners of War. The Verceniging Ternis entitied something over 33,000 popie to be restored to liherty, and if they inappened to be hurghers imprisoned out shie South Africa, to be hrought hack to their homes as soon as transports conld be provided and their means of subsistence assured. Of this large number upwards of 24,000 were in pris. oners' eanips in st. lleiena, Bermuda, India and Ceyion; upwands of 1,000 were in a prisoners' camp at Simons Town, and ahout 1.200 were prisoners elsewisere in South Africa. Of the rest the Ereat majority had been allowed to iive in Concentration Canips, while the balance were on parole in different parts of South Afriea and a few in Europe. The principal diffecuity in eonnection with the prisiners $w$, of eourse the bringing back and distribution if the 24,000 odd, who were at prisoners' camps oversea.

The prisoners of war, on their return to South Africa, were, in the first place, with few exceptions, sent to the Coneentration Camps of their respective distriets, there to rejoin their families, if they had them, and to return together with them to tieir homes They thus, in the majority of cases, heiped to swelf the caormous numlier of people for whom the Repmtriation Departments of the two colonies had (1) providie the means of transport to their liomes, and, as a general rute, the means of sulu. sistence for months after anch return, as weli as The sieds. Instruments nnd animais necessary to "nable them to raise a crop. in the elght and a haif months that we lave been at work. we have restoreti alout 200,000 of the ond Burgher perpulation in the two Colonies to thedr 1. omes, fucluding alf the inhabiennts in the Concentration Camps in the Transval, the Orange River Colony, the C'ape Colony and Nntal, and the Prisonets of War.
"By hook or by crook we had sueceeded by
the end of 1002, in enabling the peopie to sow a fairiy large mealie crop, beskides a consid erable amount of iorage, potatoes and other vegetabies. The change in the attit ude of the farming population, about that tlme, wils ver noticeabie. The extreme depression witich characterised them two or three months cariier had aimost completely passed away. and they were looking forward to the future with nuluch more hopefuiness. I may ay that ahmosi the whole time, even when the oitiook was blak est, their attitude towards the Government was not otherwise than a friendly one. They ahowed, With few excentions, great patime under hardships, and much energy andi resuluree. fuiness in naking the best of the smafi means nt their disposal.'
A. D. 1902-1904. - Death of Cecil Rhodes. - Survival of his Infuence and his Poficy. Dr. Jameson, as his representative, made Premier of Cape Colong. - On the ifth of March, 1002, two months before the enit of the 1 British-Hoer war, Cecif J. Rhodes dicd at (aipe Town, and ins death remored the mos! puwr. fui of the personai intluences that would hare heen reckoned on for determining the" brouts of the war. He had heen the naster spirit in South A frica for neariy thirty years. leatica.
tions of the part he had taken tions of the part he had taken in the earan sion of the british dominion in that part of the worid, and in the contliet of British with butch amibittons whieh prodnced the war, will be found in Voimme VI, of this work asce, w. pecinily, pages 460-466, 4i0-4i1, and tit-iii, In that volume). Had he lived and Leel in braith there can be no doubt that he would have been a leading actor in the political re construction of Britisit Nouth Africa sinve the war. He had been the Premler of Csun folony from 1890 to the end of 1805 ; then his career Was clouded by the "Jnmeson raid" iato, the Transvaal, and he was forced to resicn. But the clond wouid bave cleared, ns it bas theared fron. Jameson. Indeed, the new carerr of Dr. Jameson, sinee 1004, when a general cidetina in Cape ('oiony bronght the party of the l'rnates sives into power, and put the former chit fleutroant of Cecii Khodes in the pluce of Sir I Gordon Sprigg as Prime Minlster of the crionial Government, is indicative of the new carcer that wonld have opeaed to Hhodes. It is the ithules policy and the Rhodes influence that has pre Failed, as was said hy Mr. Edvard iticry in an articie written at the time:
". When Rhodes' life came to a sudirn and melancholy end, Jameson felt the hest nay he condd show his reapect for his dead friont was to carry on the work of his iffetime. Amungs: the Progressives there were several pullic mea who, in normai circumstances, might have brea selected as ieaders of the party, but there was a weil grounded comviction that the mand who could best carry on Rholes' pulicy, with, the least breach of continulty, was Juneson. Even the few British coionists wio had mot a'oce ther condoned the Raid, fe't that there who no une so quailifed to leai the frogressive Party as the author of the Rali. The result was that lameson was appointed, by acclamation, tite political successor of thindes. It was under the new leader that the battie of the general fleft it in the Cape Colony haw been fought and won The Progressive majority in the Cape Parlia-
ment is small ; but, in spite of all disintegrating infuences, it may be truatcd to hold to. gether tili a Redistribution Biii hat been paceed. When the influence of the Bond "s supreme in the Cape Parliament, the eiechiral divisiona were manipuiated in such a manjer as to give thiniy populated, rural constituencies equal represenation with that enjoyed by the comparatively densely populated urban constituencies. This arose from the fact that in the country the Dutch settiers outnumbered the British, while in the town the British composed the rast majority of the electorate. The simplest way to rectify this ahuse was to remodel the existing eiectoral system, by making populstion the basis of representation. Thia reform, bowever. was open to the objection that it practicaliy disfranchised a large number of rural conatituencies in which the Boers were in a majority. On Jameson being appointed Prime Minister, after Sir Gordon Sprigg's compulsory retire. ment, his first step was to introduce a new Redistribution Biil based on a less invidinus principie than Its predecensor." - Edward Dices, The Netc Cape Premier (Fortnightly Reviev, April. 1904).
A. D. 1903-1904. - The Labor Question. - Investigation and opposing Reports by a Comminaion. - Adoption of Ordinance to admit Unskilled Non-European Laborera. - Beginnine of Importation of Chinese Coolies, - The PoliticsI Side of the Quevtion. - Dehate in the Britiah Parliament. Early in 1903 Lord Mliner appointed a Conmis. slon to investigate and repurt on the iabor question in South Afriea. which Is a question between thie mining people, who maintain that the needfui supply of labor for proftable mineworking is not procurabic, at rates whicil mineowners can afford, from any other than an Asiatie source, and their opponents wio deny the need of bringing either (hinese or East Indian coolies into the mining fields. In November the Labor Commission produceri a majority and s minority report, the former agrecing substantialiy with the mine-owners, the latter in conten. tion with them. The signatures to the majority report were ten in number, the inter were but two. In the discussion of the reports which thok place in the legisiative Couneli of the Transvaal late in the year, one speaker inade the statement that he was authorized by Gen(rai Louis Bothe to eas that he and ail the Dutch he representexi were opposed to the intriduction of Asiatics. A resolution faroring the fatroduction of Cininese was adopted in the Concil by a rote of 22 to 4.
!"'mately, against the protests of a great mat rity of the Boer population. nis ordinance (1) regulate the introduction Into the Trinsvaal if a: kilieed non-European iaborers was aloptei th the legislative Councli. It applied to males of thlier races than those Indicenous to Africa sulin of 12 degrees north of the Equator. The ordinance was to be administered by an offleial superintendent ; the laborers were tis he hrought in br liechsed persons only; they were to be employed only in the Witwaterirand distriet, and only in urskilicd labor ronneeted witis the proluction of minerals, and they were to be sent back to the courtry of their origin, at the ex. pense of their Importer, at onler on tine teruins tion of their contract, which siouid not be for a
longer term than threc years, renewahie for two more. Prorlsions as to their treatment, their passport identification, their restricted residence, etc., ware very preeise and minute. The importation of Chinese coolies, nder the provisions of this ordinance began in June, 1901. At the end of the year over 20,000 had heer hrought in.
That the question has ite political as well is industrial side, and is one which concer. democracy no less than iabor, is shown in tik, following: "The political and industrial position of the Rand, and, In some degree of the Transvaal as a whole, is almof unique. The onig parailel that comes to mind is that of the town and district of Kimberly. A considetuhle European comaunity is diependent - on the Land entirely, throughout the Transvaal very largely - on a single Indnstry for the maiutecance of its prosperity. This dependence necessarily places great power in the hands of the small group of men who are the owners, or represent the owners, f the capital by which the Industry has been created and is 1:ow worked. Their Influence is supreme. No law which threatened their interests could be placed on the Statute Book. Men who offer any effecive opposition to their wishes - like Mr. Wybergh, the Comnissioner of Mines, Mr. Creswell, the manager of the Viliage Main Reef Mine, Mr. Moneypenny, the elitor of the chief Joharnes. burg uewspaper - find it impossible to retain their positions. Two defr.ers. and two onle, threaten the permaneney : this suprenact the Truic Cuino and tb raliot, the eombina. tion of the men employ.d and the possibility of an unsympathetic majority in the iegisiature when a system of self government is restored. Both these dangers wouici he Increaseri in de. gree. and brought nearer in time, by a large and rapid growth of the white populntion.
"If 200 . 400 native workers were to be replaced ify 100,000 whites, saifi Mr. lindd, one of the directors of the Consifilated Goiditelds Company, ' they wouid sinniy hold the Governnent of the country in the finflow of ineir hand. nuid, without any dispuragement to the British iahourer, 1 prefer to see the more inteilectial scetion of the eommunity at the fielm!' 'With reference to your trai of white labour for surface work on the mines,' wrote Mr. Tarhutt another director of the same importunt company nut the ehairman of the Village Main Reef Company, iu an often quoted ietter to Mr. Cresweil. 'I liave cousultei the Comsolifaten Goidfielids people, and one of the members of the bonrd of the Viilaze Man heef has eonsulted Messrs Weruher, leit and ( (), and the feeing seemas to ie one of fear that if : large number of wifite men are enitio, ou the Rand in the position of iabourers," the ame troubies will arise as are now prevalen: in the Australian Colonics, $i$. e., that the combination of the iafouring ciasses wiil become so strong as to be able to more or less dictate, not only on ques. tions of wages, but also on priticul questions, by the power of the rotes when a Representativ: Government is estabiished.' There have been other declarations of the same tenour : and. Idieed, no one wir isac pluinted with the views that previl amoti= ti.e drele, of South African finance wouth seck fo deny that this drear of a second Australian deunocracy influencing the

## BOUTII AFRICA, 1905-1907

political and economic future of the Rand is one of the chief motiven that direct the policy of the more far-sighted men among those groups.
"White labour, coupied with improved me. chanical appliances, stands established as the feasihle remedy for the admitted shortage in the number of Kaflir workers. To reject it in favour of the introduction of Chinese is a policy which has natural attractions for the owners of the mincs. It is a poliey which should not have won the support of the representatives of the British people." - Herbert Samuel, The Chinese Inkour Question (Contemporary Kevieve, April, 1604).

The bringing of Asiatic laborers into the mines was resisted as strenuousiy in Cape Colony as hy the Boer burghers and the non-mining interests in general of the Transvaal. The leading coiony addressed a petition on the suhject personaily to King Edward, saying: "Such an imnigration. hampered and restricter as It is proposed to be by stringent regulations, would, even if it were possihle to enforee such regulations, which is doubtful, introduce a ser. vile element, alien to the country, destitute of rigits, or interests. cither in the present or future of south Africa, and worked for the ben. eft of masters. in many eases non-resident, thus constituting what wonli practically be a slave state. in close contant with the other free communities of South Africa. Your petitioners fecl that the introciuction of such a class of iabour would place an obstacie in the way of the nat. ural growth alike of European and native ele. ments in the population.
"sinch an importation would decide whether South Ifrica is in future to constitute one of those grat free communities under the 13ritish flag, the growth of which sied so much lustre on the reign of your angust pretiecessor, or Whether it is to be rauked as a mere plantation worked In the interest and for the beneflt of foreign holders. Your petitioners therefore most earnestly pray that your Majesty may be pleased io withhold your sanction from any measure harling for its object the importation of Asiatics into south Africa, und hy so doing save them and those who may come after them from conseyuences that wili he fatai to their peace and prosperity." - Parliamentary' Papers, 1004 (Cd. 1895), 1.133.

Mr. Chamberlain, Secretary of State for the Coionies, returned to England in March, 1003. from a visit to South Africa, and made an ex. tenied statement in Parilament soon afterwarle of his observations and his conciusions from what he had seen. On the labor question, then the subject of greatest agitation in South Africa. he stoutly supported the mine-owners in their contention that nutive labor, and supplies from beyond the Zambesi. to supplenent the Kaffir supply, is a necessity of the mining industry: that white labor is impossibly expensive, and that the feeling against the introniuction of Asl. at ie labor sewmed invincibly strong. There was not, he maintained, the sifghtest foundation for the charge that the mine-owner wanted forced labor or slavery in any sinape or form, hut lhat th" y must have cheap labor if the mines were to be worked.
A few days later Lord Lazsdowne, the Forefign Sterctary, reccired a deputation fron: Earious missionary societies to protest agsinst a pro.
posed exportation of native lebor from Central to Bouth Africa. In repiy to them he selid that the Goverument had no more in view at present than an oxperiment with 1000 laborers. Who wouid be taken from British Central Africa wo the Rand District of the Transval and em. ployed there under regulations very carefilly framed. If objectionable results were found the experment wouid be carried no farther. This was foliowed by warm debate on thr sub. Ject in the House of Commons, winere Sir Wil. liam Harcourt and others denounced the gried of the mining companies, insisting that the mines couid not pay fair wages simply because - P e rich mines were over-capitalized and the

N-grade mines had been deveioperi only fir sale. Mr. Chamberlain again chanpioned the mine-owners, and defended the poliey of the Government, which sought, he adid, to promote the generai prosperity of tise country by getting as many of the mines as possibie into worting order. The debate hai no practical result.

A. I). 1901-1902), contained the promise, on the part of the British Government, that " nilitary ad. ministration in the Transvasl and in the 1 range River Colony shali, as soon as possible. lir folluwed by civil government ; and, as soon a c:rchmstauces permit It, a representative s! atem tending tow ards autonomy shall be introduced."

Central cald that - present rs. Who fricy to and em. arefully e found farther. the sub. Sir Wil. e greed lat the because and the mily fir ued the of the ormmote getilng corking

On the 81st of March, 1905, the first step toward the fulallmert of thia pledge was taken, by the insue of letters patent frum the crown (without action of Parliameut. Inammuch as the Boer States, in the eye of the law, had heen under the suzerainty of the British eovereign, had been in revolt, had been suhjugated, and were dlrectly subject to the crown, as conquered terrtory), conferring a Constitution of Civil (Sov. ernment on the Transvaal. It gave popular representation in a legislature of a single chamrep, styled the leglalative Assembly. Not exceedling thirty-Ave of the members of this bolly were to be elected, and from six to nine others were to be appolnted by the High Com. missloner of South Africa, - in which office Lord Jiliner had been succeeded of late hy Lord Selborne. Every hurgher of the former Transvaal Republic not dialiuallitied by conviction for treason since May 81, 1902, was to be entitled to vote in the olectlon of representatlves ; and so were all white males of British hirth occupying premises at au annual rental of not less than (5y), or possessed of crpital to the value of $\$$ \%iNO. The dehates In the Assemhly were to be In Engilsh - not in English or Dutch, like the Engllsh or French of the Parlinment of Canala; but there is a provision that the speaker may permit a meniber to use the hutch language. formitil passell by the Leckilative Assembly whlrh should sulijeet the natives to disabllities or restrictlons could become low untll lt had received the sanction of the Colonial Office in London.

This organization of a partlally representative colonial governinent extended only to the Transvalal. The Orange Rlver Colony remalnel stil under the Crown Colony system, whirh had been the status hitherto of both the Boer states sione the close of the war.
This limited reallzation of the promise of representative government to the Buers was undoubtedly all that coull be expectell from the Conservative Minlstry ln England, which rent ont of power soon after it hal ronferre. the Transeaal Constitutlon. Its surcessors. of the British Litheral partr. smon hroalened the hasis of seif government in the Transvaal, by a new conatitutional lostrument, whlch was outlined to Parllament on the 1st of August, and lssued December 6th, 1008. This male the legislature a hlcameral body, haring, for the time belng, an upper Council of 15 appointed members, whicl, howeser, It was said to be the intention of the Government to extinguish at no dlatant dsy. The elective Assrmhly was to be romposed of sixty-nine inemis-rs, elected be secret ballot for terms of five yenrs. Every adult inale of twentrone years of age who had been a resldrn: for slx months, cxcept niembers of hie British garrisor, was entitled to vote. The general lines of the old Boer magisterinl districts were followed, nad, on the basts of the rensus figures of 1004 the land woull have 32 members. Pretoria 6, Krugersiorp 1, and the rest of the country 80 . The eonstitution prohlhitrd Chinese eontract labor, ard an more cuolies colld be Imported !nto the rountry after Norember 15. Elther the Fonglish or the Dutch language could be used for public lusiness, and nou!!m!!atinn was made eaxy, hut the Boers' request for woman suffrage was denied.

A Constitution framed on aimilar lines was
given to the Orange River Colony within the same year.
In the firat electons for the Trasaval Assembly there were, besldes Socialists and labor organizatlons, three partles engaged ln a somewhat embittered content. "The Progressives are the party of the great mining holises on the Hand; tl Natlonalisi party ls composed of British electors opposed to the enormons political lnfluence which the mining houses have hitherto exercised; while the Bocers nt Johanncsburg and Pretorla and in the rural constituencles are organlzed in Het Volk. There was a coalitlon between tle Nationallsts and IIet Volk. These two parties unlted against the Progressives, and adopted as the chlef plank in their platform a derlaratlon thnt the one questlon on which the election must turn was, Who shall control the Transvaal - the peopie or the mlnlng bouses?' The Progresslves on their part insisted that the question was, 'Shall the Transvaal be governed hy the people of the Transvasi, or fron Downing streat $?^{\circ}$ They were aggrieved by the actlon of the British Goverament in making legis. lation concerning non-European Inhor subjert to review in London, and in the campalgn they made no attempt to coneenl thelr hostility to the Campbell Bannerman Goverument. In this wny the questlon of Chitnese iabor was forced to the front. The Niationalists and ifet Volk coalItion was successful," nod General Lonis Botha. who has been the leadling spirit and gulding ulnd among the Boers since the war ended, heranie the i'rime Minister of the Transzaal Government then organlzed.

It has been fortunnte for the Transvaal, and no less for Sunth Africa at iarge, that so largeminuled ant strong a lealer of the subjugnted race was found for the trylng perloul in whlrh vistors and vanquished were to bave peare and frlendship estabilished between them.
A. D. 1906-1907.-Rerolt of the Zulus in Natal. - Their Grievances. - An extensive and deternlaed revolt of the Zulus living whithin the Colony of Natal broke out late in fanuary, 1006, as the consequence of anattempt to roliect a poll-taz leviel on them by the colonial Parilament. A pollce sezgeant anil two or three natlve pulisemen were killeel in the first melée, and from that time untll near the cul of the following summer there was war. That it was proscreuted with ficrceness. If not artual ferocity. by the whites of the colone, ls nade manifest by the fact that alout 3500 Zillus are sold to have been slain and 2000 taken prisonprs. The prineipal Zulu leader, a chief nomed Bambanta, wns kitled In $n$ battle fought in June, and the revolt derlined from that time. Sigmaniln, another clitef, was condemneri to diesth. and trelve prisoners, eonvictel by court martial of complicity in the orlginal murider of police oflicers, were executed; while thirte-eight others were sentenred to lmprlsomuent for two years.
A surlous queatlon between the colony and the Imperial. Governnent arose in connection with theme mllitary trlals. The sentences to death, confirmet hy the governor and the Natal ministry, viere ahout to be merriet out, when Mr. Winston Churchill. With the approzal of Lord Elgin. Colonial Serretary. cahled to the Natal premier ordering the suspenslou of the execution pending an lnvestication hy the i.iberal government, on the contention that the natives should

## SOUTH AFRICA, 1908-1009

have been tried in a civil court. Premier Bmyth refused to ohey, but the governor postponed the exccutions, whereupon the Natal miniatry resigned. Much indlguation wes evident in England, as well as in the colony, gainat what was regarded as an unarrantable interference in colonial affair hy the Imperial government. The matter was concluded by Lord Elgin ca. bling to the governor of Natal that the home government had no intention of interfcring in colonial mattera, and thet, upon the receipt of full information, it recognized the right and competency of the Natal ministry to decide the question at issue.
A. D. 1go7 (Aprif-May). - Imperial Conference at London. See (ln this vol.) Bhition Empiric: A. D. 1907.
A. D. 1908-1909. - Formation of the Legisiative Union of South Africa. - The Framfing of the Constitution. - Compromise on the Race Question of Franchise.-Britiah Imperial Assent. - The Roysi Proclamation of Union. - Very quickly after the placing of the IBoer colonies on a footing of political equality with their English neighbors a freah desire for South African Union, in which they, who had fought to the death for its prevention only six years before, now shared, began to he earneatly voleed. Its genesis was explained clearly by a correspondent of the London Times of May 24, 1909, who wrote. "Economic causes of a special character assisted the process. A great wave of commercial depression, following bard upon the golicn expectations of the peace, passed over the whole conntry, hut maie itself specially felt in the coast colon? as. Here the altuation was painful in the evitreme. it was $n$ tale of defleit, of retrenchment, of heroic Budg. ets. But far berond the rolling hills of the Karoo and the flat talleland of the Orange River there was a wealthy State, a State with a surplus. The Transvaai, possessing in Johanneshurg the principal centre of opulence and the chief market for produce, was in a position to exert economic pressure upon colonies whose principal source of revenue was derived from the profts upon their rallways and from the sale of their goods to the great city on the high veld. The poorer colonles lived, so to speak, upon the custom of the Tranavaal, and were unable to ignore, however much they might dislike, their position of dependence. A rate war or a tariff war hetween the Transvaal and the coast colonics could liardly end with a vic. tory for Cape Town or Durban, and so hy a process of reasoning whlch was not always pleasantly illustrated the coast colonles came to accommodate themselves to the view that some form of arrangement as to railwaye and Cus. toms was desirahle In their own futerests. Other causes contributed to lllumits and enlurge the horizon. A Zulu trhellion in Natal brought home the common danger to the white community from uative unrest or from mis. tulies made hy a wrak colonial Gorcrnment in its nutive polfey; the grant of responsible government to the two conquered Colonies tended, not only to hring the English aud Dutch leaders fito habitual communion, hut to give to the progressirc section of the communitr a press. ing Interest in the construction of Government whleh should be strong enough to resiat the futuences of the back veli."

The firat action taken to tranaform the desire for Union Into a movement to that end wai eariy in Misy, 1908, by a convention of officials from the several colonies, assemhled at l'retoris to negotiate a new customs agrecment and to arrange intercolonial raliway rates. The rall. way situation was nearly, If not quite, the mins: serious one that brought pressure to bear on some of the coionies, forcing them to scek s union in which conflicts of interest woult be overcome. It was a aituation which the lifigh Commissioner, Lord Seibornc, descrihed hriffly, in a review of the many reasons for luion which he addressed to the Guvernors and lifeu. tenant-Governors of the several colonies, on the 7th of January. 1807; "Of all the questions frultful in divergence of opinion or of inter est to the Colonles of South Airica, there is none so pregaant with danger," he wrote, "as the railway queation. It fo not an exaggera. tion to say that a feld more thickly gown with the ceed of futnre quarrel and strife than the [State-owned] railway syatems of South Africa loes not exist. As long as the Governments of the five British Colonies in South Africa are wholiy semarated from, and independent of, each other, their railway interests are not only elistinet hut ahsolutely incompatihle. There is a competitire struggle between the ports of Cape Colony and of Natal to snatch from each other every tou of goods which can be snateled. The Orange River Colony desires as many tuas of gouds as possihle to he passed to the Trassvaal through its territery, hut it is to the ititer. est of Cape Colony that no such tons of goods should pass into the Transvaal through the Orange liver Colony.

In the samc wiry it is to the interest of Natal to pass the goods cua. signed to the Tranevaal from Durhan into the Trunspaal at Volksrust, and not at Veretnig. ing through the Orange RIver Colony. This the interests of Cape Colony, of Natal, and if the Orange Rifer Colony conflict the one with the other. But when It comes to consitiering the railway futerests of the Transpaal, theo it will be found that the interest of the Trassral is diametricaliy opposed to the interesta of c'upe Colouy, of Natal, and of the Orange River Colony. The Transvaal loses revenuc on every tos of gooda which enters the Trans: aal by any other ronte than that from Delagos Bay fin the Portuguese cusst].

If the [Transvaal Gov. ernment] were as indifferent to the welfare of the thrce sister Colonies as every State in Europe is to the welfare of every other state, the Transvaal would see that all the trale to the Transvaal came exclusively through Dela goa liay. And what then would be the pusi. tion of the railways and the finabers of the lifee sister Coloniea and of the ports of Cape Colony and of Natal? This divergence, this contlict of railway intcrests, this cloud of future strife, Would vanish like a foul mist before the sun of Soutl African Federation, hut no other force can dissipate it."
That a railway and customs conrention shonld start the artion which united the colonics of South Africa happened as logically, therefore, as the happenings which derived the Anmricso Federal Coustitutional Couvention of 178: from a IIver and Harbor Con:rention at Annapolis in 1786.

The South African Rallway convention, hefore
adjourning, adopted a resolution recommending the appointment of delegates from each colony to conventlon for the framing of a Constitution of United Government. Cupe Coiony led of in approving the propossi, followed withln a day or two by the Transvaal and Orange River Colony, and a week iater hy Natal, where the strongest opposition was developed. The apportlonment of delegates to the Convention wan, for Cspe Colony 12, for the Transvaal 8, fo: Orange Hiverand Natal 5 each. On the 12 th of October these delegates assembied at Durhan, In Natal, under the presidency of Sir Iienry de Vhllers and were in session there until the 5th of Norember, when they adjourned to meet again at Cape Town, November 23. Their lahors were not concluded until the 3 d of February, 1900, when ali diferences had heen harmonlzed or compromised and a draft Constitution approved, whlch every delegate signed that day.
The Constitntion was ofticiaily pubilehed on the 9th of Fobruary, whth a recommendation that the several Parliaments should meet on March 30 Lo consider the draft, and that the Con. vention should meet again in May on a day to be faxed by the president of the Convention and the Premlers in consultation. The inai draft to be sulimitted to the Parilaments in June. Then s committee of delegates appointed hy the Govcrnments to proceed to England to facilitate the pisising of the Act.

This programme was successfnlly carrled through. Cape Colong aud Natal contended for certaln amendments to the draft Constltution, but the Transvaai and Orange River colonles spproved the lastrument and inatructed their delegates to support it as a whole. The General (ou rention was reassembled at Bioemfontein. caythal of the Orange River Colony, on the 81 of May, when it dlseussed the proposed amend. nonts and agreed to cight of them. As thus amended the draft was adopted in June hy the parliaments of each of the four colonles, and sent with that endorsement to the Imperial Gov erament for the seal of Soverelga Law. It was followed by nn ofticial mission, composed of vineteen memlers, who representel, as a londoa jounial remarked, "almost the whoie of the driving power ln outh African polltics," including, of course, such former antagonists as General Butha and Dr. Jameson, now shoulder to shoulder in powerfuil learlership of the movement for South African Union.
One feature of the Constitution, as framed hy the four coionies nad presented for the imperial approsal, was profonadly repugcant to Engllah feeling. It was the product of a compromise in the eoloninl convention, whlch ran a curious parallel to that in the American consiftutlonal conrention of 178:, which gave the Southern states a representation in Conrers for thelr slaves. The question of electlve franchises and legislative representation for the cuinred satives hail troubled the South African urion unking. just as the slavery questlon had trabled the American. Cape Colony hal conferred the suffrage on its qualificd colored citizens, and refused to disfranchlm them; the other colonles hul disfranchlsed all races but the white, and refusel to allow a possible electiou from the Cape Culoty to the C'aisu Pathament of any other than nuemhers of Enropean descrnt. The Lecessary comprcinise which secured the Union
left the Cape franchise undisturbed for the present, hut exposer to s future chance of being overruled; and it berred ail hut Euro ewa humanity from hoth houses of the general rive llament.
This compromise was opposed with unyield. lng resolution hy a strong party in Capo Colony, led hy two furmer premiers, Mr. W.? Schrelner and Sir J. Gordon Sprigs. Mr. Schreiner went to Engiand to appeal there to the Imperial I'arllament against the sanctioning of these provisions of the proposed Constitution.

Mr. Schrelner found in Great Britain aimost univertul sympathy with the feeilng that lie represented. In Parliament and out, It was expressed hy ali parties ; but there went wlith it a prevalling opinlon that the matter ln queatlon and the attending circumstances were such that the Imperial Parliament ought not to refuse assent to tho nction of the colonies. The Prime Minister, Mr. Asquith, set forth the reasoning to thls concluston very cleariy and concisely, when, on the 19th of August, he noved, In the House of Commons, the thlid rearing of the South Africa i3lil. $\because$ I wlsh," he said, $\because$ in submitting this motion to the House, to take the opportunity of putting on record the fact that thls BIII, consistlig of over 150 clanses and a very complleated scheduie, lias, ufter the most careful consideration hy thls House, been passed without anendment. It wond, however, be a totally false fimpresslon were it suggested that as regards ail provislous of this Bill there is unaalmity of opinion in the Honsc. In partleular as regitrds some of the clanses which deal with the treatment of natives - the nccess of native members to the Leglslature - as everybody who has followed the dehate can sec, there ls not only no difference of opinion. hut ahsolnte namimity in the way of regret that those particular provi. slons shouid have bren Inserted in the Bill. I whin before the Blii lenves the Imperial Parllament th make it perfectly clear that we here have exerclsed, and I think wlsely and legitlmateiy exercised, not oniy restraint of expresslon, but reserve of judganent in regard to matters of this kind, simply becau. a we desire that this grent cxperiment of establishing free sclfgovernment In South Africa should atart on the lines and tu accordance mith the ideas of our fei-jow-eltlzens there which they have deilberately and ufter long consideration come to.
"It is porfectly true that the Imperial Government cannot divest ltself of responslhility in thls matter. We do not do so. I thlnk that if we have yielderi, as we have, on polnts of detail - on some points on which many of us feel very strongly - to the considered nul deliberate Judgmen: of South Africa, It has been because We thought lt undesirable at this, the last, stage in the completion of an almost rnprecediently difficult task toput forward anything that could be an ohstacle to the successfnil wor ing of tite Biii. Speakling for myself and the Government, I venture to express not only the hope, but the expectation, that in some of these matters that have been discrassad in this IIonse, both on the second reading and in the Committee stage, the views whlch have been so strongly expressed, and pmotically withou: any dissent. will be sympatheticaliy consldered by our fellow-cltizens in South Africa. Formy part I think, as

## sOL'TH AFRICA, 1900-1900

## SPALN, 1800-1906

I have sald throughout, that it would be far beteer that any relazations of what almost ail of ue regard as unnecessary restrictions upon the elecworal rights and ellgiblity of our native feliow. subjects there should be carrred out spontaneousfy and or the Initlative of the South African Parliament rather than that it should appear to be forced on them hy the Imperial Parliament here."

The BIII bad already passed the llouse of Lords. It received the royal approval on the $20 t \mathrm{th}$ of September; and, on the 2 d of December, the Liniou of south Africa was proclaimed, to be of effect on and after the 81st of May, 1910.
Sown after the passage of the Blll. announce. ment was mude that the Prince of Wales would visit Bouth Africa to open the Unlon Parliament, as he had done on the openling of the Parlia. ment of the Australian Commonwealth, in 1901.
In Ileeember it was made known that the ilt. IIon. IIerbert Gladstone would he tbe frat Gov-ernor-General of United South Africa.

For the test of the South African Constitution see (in this vol.) Constitution or the Union of Soctil Africa.
A. D. 1909. - The Native Protectorates. - Their Condition and Circumstances on the Eve of the Inauguration of the Unlon of South Africa. - "it should not be forgotten that the protectorates are in beling to-day not because this particular arrangement of protection was eccilsically necessary or inevituble, nor even hecause the general relatlonshlp of the nutlve tribes of South Africa made It the best that could be devised. The fact is that they came finto existence at diferent thes and as definite and prohabiy expedient results of various fortultous crises in a chaotle native political hlstory, which is at least characteristlc of South Africa.
"To-day the protectorates are to a considerahle degree isolated native communlties, so far at any rate as they are concerned wilth any posalble united feeling among the other native tribes of South Airica. They are carefully guarded by their responsible officials from inter. ference and posslble harm from outaide thelr

D. 1898-1906. - Gains from the Loss of Cuha and the Philippines. - Growth of Close Relations with the Spanish-American States. - "In many a war it has been the yan. aulasied, not the victor, who has carrled off the finest spoils. Cuba and the Phllippinces hare been lise a tumor in the slde of Spain, drigeing her down in tbe rare of elvllization. They have Irained her life-blood and disturbed all her national actlvitles. Only a serious surgical operation conld remove thls exhausting excrescence: and Sipanlards themselyes have been the first to recognize that the operation, though painful, was in the hlghest degree beneficial. Nut even tbe most Quisotic of Spaniards dreams of regainlag these lost possessluns.
own terdtorles - that is from taking any con. sldershie intereat or partnership in the real or fancied trouhles of nelghbouring statem They are in a sense - and more than a political sense - inside a ring fence.
"As regards the relatloneblp hetween the ns. tive inhabitants and the white setters of the severai protectorates, there are uo striklag polnts of difereace. In Basutoland no land is held under white ownershlp. Such white red dents as there are, apart from officials and nuis. sionarles, are there ais traders and storekeencrs. No land rights have been alienated to white men. In the Bechuanaland Protectorate certain areas are held by white men, but at the same thme very large areas are remerved entlrely for native uses. In Swazliand the relationslip was, until a few montha ago, upon a very different hasis - a poeltion surely unique in the history of the British colonial possemens. I have not space to deacribe even hrlefiy the extraordinary intricacy of the concesslons trouhles or the heroic mensures found necessary to effect a set thement at once just to the concensionaire sit the uative. It must be sufficient to say that to. day about half the area of the country is held in white ownershif. Whlle rather more than one-third is reserved for the exeluslve use sind beneft of the natives. In Zululand certain areas of land are beld by whites, hut the lonlk of land is heid in native possession. In earch ease, however, it la not probahle that any more land will be alienated for purposes of saif or settlement hy whites. It may be accepted with. out douht. I think, that tbe natives will retain in perpetuity the fand they bold at present. It will be seen that the material intereats of the natives, at any rate as regards land, have luen well guarded in the three protectoratis. "- R T. Coryndon, The Position of the Vatire Piv tecturates (The State, South Africh, Seple., 1999).

A. D. 2909. - Native Lahor Supplanting the Chinese. See Race I'roblems: Socti Afhica. A. D. 1000.

The war has been heneficial in at least two dif ferent ways. It has had a healthy rconomlc iutluence, because, besldes directini the manhood of Spaln luto suber indnstrial elamats, it has ied to the removal of artlicial restrictions in the patb of commerclal aetivity. it has been advantageous morally, because it has forced even the most nnrrow and ignorant Spanlard to face the actual facts of the modern world.
"The war has lad a further result in lealing to a movement: for a clou'r symputly hetweed Spain and the Spanish states of South America The atiltude of these states towards the mother country has hitherto been somewhat nusymp. tbetle; they have regarded her as hopeless! y opposed to all reform: the bostility of Spain to the aspirations of Cuha and thelr orn earlier strug. gles for frevdom amply acconnted for such an attliude. Now there is nothing to stand in the way of a movement towarls approximation which has alremly begun to manlfest itsilf. ata may ultimately possess a serlons slgnifiennce.' - Havelock Ellis, The Spririt of Predent-Iay Spain (Atlantic Monthly, Lec., 1906).

SI'AIN, 1905-1906

14Thoughtui Bpaniands تill tell you that a change has come over their country with the ciose of lant century, and thet this change has been developing since the secession of their young King, The starting.point of this evoiu. tion in national life was the close of the short atruggle with the Cilted States and the loss of what remained of their coionial empire. That turning point in the modern snaals of Spain caused a deep lmpression in the minds, not oniy of the governing clanses of the country, but of the hard-working middle ciasses and of the manses themseives. . . Aimost immediately afur conciusion of the peace trenty, first a few and then more and more Epaniards dured to speak out what at heart they felt. however core ani resentful - namely, that foreign and coioniai foes had rendered Spain a servicc hy ridding ber of the colonics that hampered fier reviva in Europe and In theids of action and enterprise nearer home. Tinis feeling spread widely among the masses and middle classes when they prreelved the fist-frults of the conceatration of the resources and energles of the nation in Spain between 1800 anil 1005 . Much capital had towed back from the former colonles, es. pecialiy from Cubs and the Philippines, and promoted aspid increase in enterprises of every lind-hanks, flnancial estahishments, mines, Industries, syndicates, trusts, shippinglaterests that, developing, perhaps, 100 rap. ldiy, were led to overproduction, and thas give rise to local crises at Blibao, Barcelona, Santander, Cadiz, Maiags. The rebound of the last year of the ninetecnth century and of the first few years of the twentieth was a consc. quence aiso of the recovery of Spanish credit, effected hy a vigorous reorganization of Spannish tinance and budgets by the iate senor Viiiarerde, and by the gailant resolution With which Governments and Pariaments, backed hy the press and pulitic opinion, undertook to hoant both the domestic engagements of Spain berseif, and the engagements that resuited from addling her treasury and budget with the debts of Cuha and the Philippines, and with the cost of the iast and previolis civil wars in the lust coionies. The restoration of Spain's credit brond and at home, the successfin leveiling of her hudgets with a surplus revenue annualiy of speral mililions of doliars since 1900 . dilspelied the fears of her native capitalists: and they ton, large and smail, came forward to invest in mines. hanks, companies and railways."-ilinrld-Politics (North American Revieu, Jot., 1905).
A. D. 1901-1904. - Four Years of Poiitical Shuting in the Goverament. - End of the Queen Dowager Regency.-Coronation of the Young King, Alfonso XIII. - Death of Sagasta. - A New Ministry, of Liberals, was formed in March, 1001, with the veternn lender, l'raxedes Mateo Sagasta, nt its head; hut the milinny party was represented in the Govermment by Generai Weyier, as Secretary for War. Measures undertaken hy the Government against unauthorized religious orders, to bring them under survelilance, gave rise to anti-cleri. cal disturbances in some parts of the Kingiom, and were defiantiy opposed by the Chirch. Legisiative elretions ineld in June gare the Gef. emment 230 seats, leaving but 00 to the Oppos!. tion; but any party coniroiling the conduct of
elfctions in Spala was sald to be able to accura whatever majorlty it desired.

The general condition of confusion and dis. turbince vas continned in 1002 , and constant recourse was how, in one reglon or anotber, to dectarstions of " "state of siege," invoiving inartiai law. Frenemi Werier fuught battle of a week's dumaios in February at Barcelona, whit rioting e lisey :ent on a geviral strike (see, 1.1 : hi- Vol., J.ator Oroazization: Spain).

So the 17tis of Day, hils sisternth hirthiay, Alfonco XIII whose father, Alfonm XIi., died tufore he was born, and who, consequentiy, had leen, nomhaliy and constitutionaily, King of Sjain siace his hirth, enterml on the actuai cxer. ciec of royal functions. Ile was crowned that dny, and the regency of hls mother enme to an end. The coronation ceremonles were spieudid; the oath tuken hy the young Klug was very simpie: "1 swear by God upun the Hoiy Bihie to maintain the tonstitution ami iaws. If so I do, may lloul reward me; if 1 do not, may he cail me to account." There is reason to believe that he twok this oath with a serious sense of the responsibilities be assumed; but influeares at Court, military, ciericai, and other wise renctionary, were strunger than the infiuence of his cunvtitutional advisers for a few years, and the political disiractions of the time were increased. The attempted action of Govermment against unaththorizel redigious orders cmieni in a com. promise which gave authorization to cvery order demnnding It.
()n the 31 of jecember, 1902, Nagasta and his Cabinet resigael, and a Conservative Ministry, under Sentor Slivela, was furmed. On the 3th of January foilowing Sagasta died. The illeral. ism le representel had no substantial mitr left, nor werc the opposing gronps in a condition to give more consistency or strength to the Gov. erument. A new Ministry under Senor Villa. vercle succecded that of Bifvela in May, and was succeeded in turn by another in December, with Sunor Maura at fis head. I'remier Mlanra, formeriy of Sngasta's party, hut iateriy more Conservative, heid the reins for a fuil year, escap. ing two attempted assassinations in 1904, and giving piace to General Azcarraga on the 14th of December in that rear. The Generai was icss fortumate, for he enjoyed the honors of the prime ministry hat six weeks.
A. D. 1903. - Agreement for Settiement of Ciaims against Venezuela. See (in this vol.) Vfsezreifa: A. 1). 1902-1904.
A. D. 1904 (April). - Declarations of Engiand and France touching Spanish Interesta in Morocco. See (in this voi.) Europe: A. D. 1004 (APRIL).
A. D. 1905-1906. - Unsatisfactory State of the Kingdom. - Rapid Succession of Changes in the Goverament. - Disorders in Cataionia. - The King's Marriage. - Attempted Assassination of the King, - Proposed Anti-Cierical Law, which came to maught. - In the character of its poitical parties, in the condition of its finances and ln the general circumstances of the country, Spain appeared to be $\ln$ an increasingly unsatisfac. tory state. Four changes of Ministry occurred Fithin the year 1905, and no Government was fai:al able to profect nny polict that promised permauency and definiteness of line. Don Rus. mon Viliaverde succeeded General Azcarraga es

Primify io Jonuary, and wis bucceeded in the following Juve by Don E. Montero IVion, who had Don Jood Echegaray, the eminent poet dramatist, novelitt, a!d bencier, or hin Mir' 15 of Finanec. In inta, Sefior Montero Rloy, witpre reconstruction of his Cablact in October with the help of the KIns. gave way at the eud of November to Setior Dloret. The Azcarraga und Villaverde Dinistries had Meen Couservative: tirnee of Montero ikion and Morst were of the Liberal trpe. The I'aritament, whicis aliouid bsee bern convened carly in the ycar, hut was not called together until the middic of June. contalned no majority which any Ministry could truat, and sil the luaders in Spanish pollics Were afrald of it. Fresh eicctions In Neptember gave the Nontcro Klos Ministry a decided maforitr: but it imi quarrels within Itaelf, and threutholing divoriers had arieen in many parts of the country, eqperialiy in half rebellinus (ataionia, which it arems to inve incked courage to face. An arrognat, insuborilinate temper had been developed mmong tive officert of the army, who diaputed the supremacy of clvil over millitery authority; and in many ways the conditlons in the kinglom gave cause for grave ansiety to thoughtful minds.
Not much, if any, quictiug of the diaturbed conditions ln sinalu cume during the next year. The Government stooped to a compromise with the insolent military taction, so far as to aliow press nffenses against oftirers of the army to be dealt with by courts-nartial. On the 31st of May. 1 M06. Klog Alfonso was married to the English I'rincess Ena of Battenberg, who previousir entereti the IRoman Cathoile Church, mueb to the dlsturbince of i'rotestant feching in Eng. land. The weddiug festivities at Madrid were ncariy made tragleai by an anatcinlst attompt to kili the royai malr. As they feturned from the marriace cercmony to the mare a wretch named liattoo Morales threw a bromb futo the midst of the processlon of carriages, kitling a number of attendant panple, but mlssing those for whon it was intemded. The coolness and readiness of mind showin by tbe young kinc. and hr bls bride, exdited generai edmiration, ani indicatei a strongth of character that angured weli for Epain.
In July the Moret Ministry found it expedient to feslgn, and the ainilnistratlon of Governinfnt passed to a new Cahinet, under Captain-Gınerai Loper Dominguez. Tien a strange change of attitule towari the Clureh of liome was given for a bricf time to the Spanish Government, as though it had ranght the temper of France. There had been signs of a disposition toward some independence of secular poilcy a few years before. When the strenuous opposition of the Clurch falled to prerent the passage of a Spanish luw which authorized cleil marrlage betwern prosons legally quailicd, whatever their crent migit be. The (hureh continued lis inowtility to thls law until it succerder, in 1900, in securing an umendment whleh restricted the right of clril marriace to parties one of whom siould not he a (ratholic. Public oplnion does not seem to have approved that concession, and the origlnal provistons of the law were now restored. This drew of the Govemment it serce elerical attack ; in the face of which it brought forward, in Ortober, a project of law whicis secms to have been modelled rery closely on that Freneh

Aswelation Liw, of 1001, by which all rell fious orders, along withother tasociations, wprs brought under aurveillance and regulation by the State (ses, is Volume VI. of this work Phance: A. D. 1001, sad, in this volume, Prance: A. D. 1008). This Spanlsh nemurs proposed to aliow no reilgtous orier to be estab ilahed in the kingdom withont imrliamentary autiorization. It would empower tie liovern. naent to withdraw the authorfation of any orler or aseociation that it found dangeruifs wiblic tranquility or morale; it would permit soj member of an order to renounce bis or her vows it would diseolve any orict whome niembert were foreignen or whoee directors ilved abroud It would command monasturies and eolivente to open their doors to representatives of the proper civil anthority at any tinue; It would limit tie property heid by religinus nrders to the need of the objecte lor whieli they were instituted and put a limit on the gifts ani bequests they could receive.

This seemed an extrandinary meaaure to conte even under discussion in Npaln. Some of the Laberal leader were prompt in deckating opposition to it, and its masage through the Cortes was probshiy impossible; but it (ame to no vote. Debate on it, openedi on the sith of Noveniber, was brongit sonn to all shrifit and not weli-explained ead. The irime Minister realgned suldealy, In consequenee of ailugeni Intrigues; sefior Moret, recalied to office, wus foreed to retire syain almost at onee; a new Ministry was formed by the Marquis Vepr de Armijo, and nothing more appears to have leea heard of the proposed Associatlons Law.

A. D. 1907-1909. - The Meurs Conserva. tive Ministry. - Unpopulerity of the War in Morocco, - Insurgency in Barcelona. - The Ferrer Csse. - The Moret Ministry. - Municipal Reform. - Present Parties. - The Nin istry of Maryuis Armijo de ia Vega held the Government liftie mory than a month. HWing way to Sefor Maura and his garty, who retirncd in power in January, 190\%. Five changes uf administrallon had occurred within a vear and a half. Elections in April yielied the Government a majority, and the birth of an helr to the throne on the 10th of May gave much satisfaction to the country. The Liberals, howerer, wer' so indignant at the manlpuiation of thm elcetionse to the fower chamber that. on the sulvice of thelt iender, Seflor Moret, they took no part in the senatorial clectons which followed, latur in May: and this proved singularly cabarras-lng to the Goverament. Romb exploslons anil othet anarchiat outrages, centering in ibarcelona, but not ennfined th that turbulent city, were twing dreadfulty Increased, and a ministerial $13 i l l$ was hrought before the Cortes in January. 1908, pri riding measures of suppression so drastic, wie cialiy In its dealing with the fress, that a mort formidable npposition was stirred up. The Gov ernment stood stoutis by the Bill for menthz until its control of the Cortes was shaken hy the coalition tiat took form agalnst it. in the cnd it withurew the Anarchist Bill, but raised

## BPITZBERGEN CONFERENCE

another obetinate and threatening storm by the propotal of a Local Admilnintruition Blii, quitue startingly revolutionary in its plana for giving moro independence to municlinilises and provinclal counclis. Content nver 'ilf, sill weat on till early in February, 1000, when I'remier Maura csme to an underatanding with Befior Moret, leader of one of the IIbernl groups, whleh en. mitied a part of the exuenife mensure, relating to municlpalittes, to be pasced. Among other things, thle new enactment made roting in the municipalttes compulany, and ciections held slace are reported to have shown a heavy lacrease of role, proving effectivenesm in the law. The other sectlon of the Bill, dealing with provincial councils, was held over for nubse. ynent action in the Cortes, aml had not been Ilisposed of when Premier Manra and his Cahinet were driven to resign, In ()etaber, 1909.

The canses of the overthrow of the Mara Ilinatry came primarity from the serious war With the tribetmin of the Rif, Morocco, Into which Spala hal heen drawn in the milsummer of IDU9 (see, In thls vol., Morocio: A. D. 1600). The was was excerilligly uapopular from the beginniag, anil male nure so hy early reverses in itw provecutinu. Illotons outbronks and ialor strlken occurred in severai pnrts of the Klngdom, hut most firreciy at the turbuifent city of larcelona, where they were suppressed with a sevir fiy which emhittered firfing agalnst the Guv ernment. This feeling wastexclied to a dlimas in Wetuher hy the mifitary trial and execution, at Barcelona, of Profesont Franclaco Ferrer. l'rofosmt Firrer was a teacher of high standing and whle actunintance in Europe, extremely radical In his politleal opinions, anil accumed of diseminnting seditious doctrines in the scliool whith he comlucted at linecelona. The mllitary nuthorities there put hlm under arrest on the clarge of having been a principal Justigator of the revisiutionary rising ln July. lle was trind iy court martial, withont just opportunity for deícnce, accoriling to common beflef, anil aun. marliy shot, the Government disrigarding many spperis from all parts of Europe for ita inter. venilon in the case. An extraondinary exdemont throughout the worid was proinced by this tragedy, and It was feit in Apain with rererberint effect. After viohnt spreches in the Chumber of Deputies, October 20, Siñor Maurit felt it neressary to reaign, and the Liheral feader. Suhor Moret vr Prenilergnst, wns caljeil by the King to take the Government in hund.

The Moret Nlinistry made a spenty gowi he. giming in domestle policy, hy reviving, in sume ituree, the furtiver undertaking of reform in lorat alminlatration which Setior Mlaum hat attempted two jenrs before. Thls whs now done br a liccree. desfgarel to clear awny thi mase of ondinances and specinl decress by which the existing municipal faw has been gradually choked since it was cuncted $\ln 1877$, anit ta restore to mundelpal bonlios the fiberty unif luitintive that they were originaily supposed to possess. Aefor Moret and his party had supported l'remier Mnu. rais Local Administratlon Bisl in 1907: fut it limi heen opposed nod defeaten hy the cluss of militicians who are tralned to a distaste for any Firt of mallical reform According to alf ar. counts, the Moret Ministry, with a much mixuit and uncerialn support In the Cortes, has thus far ilone wedi.

Munlcipal electlons were heli throughout Bpain Decomber 12, and the lniroduction of compuisory voting brought out on unpreee. denu-d vote, from whleh the liepulificans and Llberule drew mont. Aitogother, there are mid to have been choten 481 If puhilcans, ISiverail, and Democrats, 258 Conmervatives, and over a bundred lenticsis of vartous shmies. sladrhi elected 12 ikpiblican counclllors, 2 liberais. 1 1 Jemocrat, uml 7 Conacrvaifes, this givlag tie Iepublicane an abwolute majority. Valennin chome 15 isepubikmu, against 10 of ali othws partien. In Valimiold, 12 Llierain, 6 Repulillcans, and 3 Conmervative were eiected; In la Coruna, 7 Repuhifcans, 8 Liberals, anil 8 others: In Córdoba, 10 ilepubllcuns, 6 Llberals, and 6 Conservallves.

In pretert polltica the Repubilicans are mald co have gone fato allince with the sociaist of Labor pirty: the aliance having ita iealer la - Sefior Larruif, of liareclor3, who returnel fately from a lumg political exile, and who hat has warm reeptions in a number of the chief cliles, where he made atloring speecies. "Aceñor lerroux," ass a correspondent, writing frum Mairld in lecember, "preaches neither anari'hlum nor atheism norantl.militarlsm. But he nuks for the abolitlon of the Monarchy and of the refigious orders. Ile wonll make the army the Iurmble servant of the State, proincite lay ciluca. tion and liwai nutonomy, and donway with in. lifrert taxation. And he lowiks for the realization of this progrminme in a well-timeli revoiution. Such nre the lileas whth which the huik of the itepubican. Soctalist coalition wlii go to the pulis it the urxt general ciection. Between these two extremes - the Conservatlves, representing the Monnrchy, the nrlstorracy, and the Chareh, and the lepmbllenn-Sicialist allhuce, ripresenting revolution - We see the present Giurernment bulancing fisplf mmeasify, with a foot in encis lainp. nmenable to pressure from both, anl without any independent moans of "upport, ave that whirh it enjoys in virtue of lis temporary control of the politicni mnehine."

## SUNDAY OBSERVANCE

many foreign countries bearing on the observ. ance of Sunday, or otherwlee prescrihing a weekly Day of Rest. The facts presented In these reports were discinsed editorlally by the London Times in an artleie frum which the folJowing ls quoted:

- Withla quite recent years the priselple of the weekly rest-day has heen enfurced, with various practieal moditieations. in most of the chici Continental countries. It forms, Indeed, astrik. ing vindlcatlon of the chalm for tie observance of one day's reat in seven - whieh was recog. nised among Eastern races iong before the days of Moses - that while Suuday work has shown a regrettahle, if in some ways scarceiy aviid. ahie, tudeney to increase lu thls euuntry, steps to restrict it have been wldely tuken elvewhers. While the English Suaday lias ween becoming in somer respects more ' C'antmentai،' tire actual Continental subday has thuwn a dlatinct tenel. eney to approxlmate to our own. ... The revlew provifled by the present report of the legislation alruady in force in France, Germany. Austria. Belgium, Holiand, and other leadling industrinl state's glves plenty of examples of the way in which the gencrai prinelple of makiug Sunday a day of reat has been accommodaten tu the necessitles of a modern communlty. Thi case of France is partlcuiarly lnteresting, since the French methor of observing suminy li:ts traditionally provided the Engllew pubie wlits tire nost familar contrast witit its own. In France the law ebtahllsthlis a statutury weekly day of rest, and maklug that day Sumiay, Was passed so recenty us in limat. lu common with the sinnllar beghataton passed lo other countri's. it aliows partial and curefinily regulated excepthons, to provide for the neressary sale of fuot. and for such uninterrupted uthintinn as is rejulrid, for exaniple, by fonndirios. But the appilication of the law ls both thoronghaniextensive, whille supplementary legishation is to be intrimbiced, with the sibigert of the Gorem ment, to extend its lenefits to ali servants of the State and to all other workers on mallwuys. tramlines, and stembunt surviees who do not airemby enjoy lt. On the other hand. winil" the repurt boars dechiel whin'ss to the effleleney und suc cess with which the law has heen enfurcet, It notis certain polots on which concessiont is belog mallo by the Government In deference to the strong demands of certain interests whlibh claimed that they were belng unjustly saeri fied.

The inw nectus at first to lifve aronsed op. gosition among muny siopkerpers. especiaily those wion were amilicapival by competition with rivals whose bushuss wis varrid on hy numbers of the fanlly, and therefore was nut uffected 1 y lt. . Tlie dillienity is now sain to be settling ltself, as the puhlic is grainuity learning to restrict Its shopping to werk days. when there la a whiler fieid of chnice. Tine ent eouraging evhence prosfited hy the uperation of the law of 1908 in France is suppurted mono or less ixplicitis by the roports forwaded by Ilis Majeaty's representatives fur other jarts if Eurone. utterance, addressed to a multitude at the Pan American Expoiltion, in Buffalo, on the Sth of Seplember, the day before he was atruck down by a murderons anarehlst, contalned this wise admonit lon on the subject:

- We have a vast and Intricate business. bullt up throngh years of toli and struggle, 1 n whlel every part of the eountry has lis atake, whieh wili not permit of elther nugiect or of nudue selfilhness. No narrow, morill polley will sub serve lt. The greatest skill and whiont on the part of mannfacturere and producers will be refuired to hold and lacreuse lt. . . . Our cape chy to produce lias developed so enormously, and our proiucts have so maltiplied, that the probiem of more narkets requires onr urgent sod Immedlate attentlon. Only a browi aud en lightened polley wil keep what we bave. Nio other policy will get nore. . . . We must not repose in fancled securlty that we enn forever sell everythlng and biy ilttle or nothlag. If such a thing were pussible, it would not be Inst for ns or for thene with whom we deai. We shonld take from onr castomers such of their problucte as we can uee without harm to our Indastres and iahor. Reciprocity is the nstarnl outgrowth of our wonderfal lindustrlal development uniler the donestic policy now firmbestablshen. What we prialuce bryond our tomestic evusumption must liave a vent sbromi. . . . If perchance some of our tarifis are no jonger needed for revenue or to enconrage and protect onr indistrles at home, why should they not be employed to extend ant promote our markets abrond:
The Party-Platform Promises of 1908. - But l'resldent Dickinley's words fell en deni ears, umong those to whom he hall iren lomiler anil gaile in this departme tot ofonomie poilicy bilberto. They gave no beed to his new comisels of moderation for seren years. Fivin treaties of commerclai reciproels, whildh he had learnex to appreclate sluce his own turilf muking was dine, were negotlated In Fuln by the execn. tive department of Governnuent, to be scorned and rejected by the senate, $13 y, 1908$, however. the clatm of the many millomed ronsumers of the nation, for gonde rillef from the latolerable eone to wheh alnust every necessary of ilvhig lat leen worked up ly the prolectlve turitf fiver, lad risen to a plich which compelliv some altention from the managers of pulticai parikes nol drew from then promiars in the "plaforms" (see L'Nited.States: A. D. 190s, Aprat--Nin.) brepured for the presidential and enngrosslouml canvasslag of that year. The Sationai Rejubilian Convention at chlemen, which nominated Mr Taft for the presdemey. made this distlnet and emplatle pholse:
"The lepublican party doclares unequirocally for a revision of the tarif hy a specinalsusshan of (ongress, lmathately following the lisaugurathanf the next Preshent. and eommends lhe teps already take.n to this ath. in the work assicuil to the approprlate committees of confres. whlols are how investlgating the ojeraton und etfert of exlethin schedules. In ull tarif legislstion the true princlple of protectlon is lust mainhine ll by the hapositoon of such dutbes as witl rymal the difference letween the fast uf promerthon ut home anil abroad, logether whita n:swnable prollt to American lmluwtres. We faror the estubishment of maxiunam and mini-
mum rates to be adminlstc. ed by the President under llmitations to be tixed In the law, the maximum w le avaliable to meet diacrimina. thons by forelgn conutries agalnst Amertcan couds entering their marisets, and the minimum to reprement the norual mesare of protection at hume.

The Satlonal Convention, at Ihnrer, of the Democratie party, supposerly coutirmed In oppositlon to the whole tifeory of tarlif protection fiy ull its ductrinal bistory, made this declarntion
"We favor lmmedinte revision of the tarif by the reduction of linport ditles. Articies eutering lato competithon with trust-comerolled proxincts should le placed upon the free liat, and materiai reductlons should he male ln the turifi nрии the necessaries "f life, expechally upon articies competing with such Amerlean manufurtures as are sold Hhroul more eheapir than at bome, and rraduitid reductions shoula be malo- in such uther ardedules as may be neces sary to restore the tariff to urevenne binls.'

The Ihemblean l'arty elected lts camdidnte for the presideney, with a majority $\ln$ ( ${ }^{\circ} \mathrm{ougrass}$, and was given the greater opportunity wrederm lis pialige, while the Demacrathe I'urty obtalnem suticient representathon In buth branches of Cangress to anl and induence the promisal revision with inportant eflect. I'resident Tafi, in his lnaugural mideress, spuke lmpresaively of the utgent daty thus faid on Congress, sitying:
$\because$ A matter of most presoing $\ln$ phortauce is the revision of the tarlif. In accorinnce with the fromenses of the jhatform upon which 1 was elertedi. I slaall cull Cungress loto extra seswion, to met on the iftecutl day of March, In orier that consideralom may be at once glven to a bill revislar tlo bingley net."

The Making of the Payne-Aldrich Tariff, -The nuw Congress, as iatled by the l'resiWht, was canrenarl on the lith of Jareh, 10W, aud a provishonal tarit! bili was introdite en la the llouse of 1 epresintatives on the 1 ath by C'labrman l'ayne of its Ways and Dhans Com. mittere. Thls $13 i \mathrm{ii}$ was a product of the work of the Ilouse Commblitere of the preceding C'angress, whleh loal been giving hearliges on suronssive tarifi seladules sime November. Naturally the protected interosis swarmell to Wishilngton, what attorneys and technical experts, and thir side of every argument for amb nazalnst exlsting dintow was hemed lin ita most fremuasive forms. Natumally, too, the nuprotectuli consumers. lese ulik to combine, were representerl at the hear. lags in no such putent way, and thele mhe of mont aryuments, netording to all neonumts, was hut feebly presed. Mr. Charles Framein .dama, who his the labli of phin specel. wrote a let.
 "hile these laemrings were in progress, in whels lin claramberizel a conspienousty greedy part of the dimorers for high oluties lu terms that wre suvage's rough, but not entirely unde. arved "A, "rakins after the fashion of men, " lan sulid, "they are pither thieves or langs. I Hyy - lf lefong to the formur class I mm a turif thlef, and I lave a license to steral. It hears the liroaid seal uf the linted States and is mint is knownad the ' Buctey Tarlit.' I whole day: I prupose to steal under it to-morrow.

## TARIFFS

The Government has forced me into thls positlon, and I both do and shall inke fuli advantage of It. I am therefore n tarif thef with a license to ateal. And - what are you golng to do about it $p$ The other class conte unler the hog catcgory: that is, they rush, mguealing and atrigging, to the great Washington protection trongh, and with all four feet in it they proceed to gohhle the swilt. .

Tothis class I do not belong. Inm simply a tarifis thlef....J3ut. on the other hand. I am also a tarifi reformer. I would like to see every prutertive whedule awept out of cisistence, my own Inchuled. Meanwhile, what inducement have I to go to Waals. ington on a pubille misston of this sort? A there citizen. I represent no onc. . . Nranwinle, have it welf umierstion that iny position is evactiy the position of tous of thongands of others seat. tered thronghout the country ; to usk us to put aside our husines aftalss and at our ownexpeuse to go to Wiashington on a desprate mile. blon is asking a fitile tom murb."

The Bili introduced by Mr. I'ayite was under deime in the lionse for tirec wreiks, and passed on the botin of April. In the sennte it was then nominaily taken into consideraton by the Fi nance Committec of that bexly, lut that committere, In fart, under the domfniting lead of its chalruma, fenator Aldrich, framed a new and protectiocly stillenedi 13ill. changet in 847 purIfculars from that of the llonse. I litle more than twedre weress were required for thls more: arifums labor of Mr. Dlírich, whilh the S.emate apgrovert by the pisatye of the lith on the kith of inty. (in the $\boldsymbol{t}$ h it went to a confereme commitice of the iwo flomses: und there the I're-ilent's futhsence, not musts axertal, appis. ently, urtil bow, wrune n fow lmportunt cout cessions to the erent publle of consumers, which the speritil imerest gitarded liy a mojority in (ongress had been devermined not to vildi. The Auserken people um o it to J'resident Tnft's finsist - fere that thedr shees may le cheaperned hy a free jupertation of hides, and that fimber for their bouses and conl for whrming them may couse from Canada at a slichtly lower crate of duty than hefore: but lise filleit to husen thagrifi of the woulen and rotter, interests am thr proineteyl prices at whild thry are clothed

penls, and an agency $\mathrm{f} r$ the collection of infor. mation. The Board is to cunsiat of nine gen. eral appraicers of merchandise, the mlary of cach to be $\$ 0,000$ per annum, who shali ponseas sif the porens of C'incuit Court of the United states. To these generai appraicers ail cases of dilasatiafaction with the amount and rates of duties ievied by the appraisurs and assistant appraicers at the various ports would be referred; the board to exercise both Juiliciai andinquisiwrial functiona. The Customs Court was to be componed of a presiding Juige and four masociate Judges appointed liy tise Preaident, each to receive a salary of $\$ 10,000$ per annum; to be a C'nurt of Record, with jurisiliction iimiteri to Customs cases, and to inve several judicial cir. cuts, inciuding IJonton, New York. Philadel. phin ani Baitiniore, New Orieans and Gaivestou, Chicago, Seattie, Dortland and san Fraucisco, and such other places as may be found necessary.

Hor important, however, than eitiser of these creations was the thinione, embodied in a lirief danse of the Act, which reads. "To secure in. Cormation to assist the I'restitent in the diso charge of the diuties imponed upon him by this wition, and the nificers of the Government in (be adminiatration of the enstnms faws, the Frisident is liereby antiorized to employ such prersons as may lie required."
The fresident avalied himseif promptiy of his permiasion to have aswistance from a commiasion or bureau of tarifi information. and un the lith of September it was announcel that he bad riosen for the eervice three well-quaified gentlemen, namciy: I'rof. lleury C. Emery, if Fale, chairman: James B. Rcy nolis, of Massachusetts, assistant secretary of the treasury, and Alvin il Nanders, of Chlingo, editor and pio. irletor of the Brectifr' (hazetti. In announcing the veiection of the boarl, the following statenurnt was inade at the Executive Otilers: "The I'reshilent and the socretary of the treasury have apreed ujon the julan that these tifire gentic. wen are to cunstitute the lonard and are to be given anthority to emphoy such spuclal experts as may ine urented in the investigation of the for vion atal dumestic tarlfi."
ithe impurtant diretion that was piren at ence hy fresident Tuft to this Turifi fonmen as he las moned it. whs fexphinefí in his siessabe to C'ongress. Decculuber 6, 1903, as fullows: - In examination of the law and an undep. steminig of the nature of the facts whirh shatuld be consfifered in discharging the finie. ions intposeri upon tho Excrutive sinw that I bave the powir to direct the farifl barif to auhe a comprebensive glossary anil meyo. palio of the terme used and artiches embraced in the tarift iaw, and to gecure informution as
 comatry ami the cost of their promluction in for. dian rountries. I have therefore appoited a tarifl bonti consiating of tiree members and have directed them ta perform ali the linties atore thescribed. This work wili periaps take : wo or three ycars, mind ask from ('onire'sa a
 already name fur fis prosecution. I brlieve that the work of thls board will be of pritue witity aul fuportance whenever Concress whall herin it wise again to remijuat the ensionma futhes. If the fints secured by the tarif boari
are of such a character as to show genersily that the rates of duties Impowed by the present tarifi iaw are exceusive under the princfpien of protection an described in the platfurm of the succesafui party at the late electiou, 1 shali nut hesitate to invite the attention of Congress to this fact, and to the necessity for action predicated thereon. Nothing, huwever. halts busiaess and interferes with the course of promper. lty an nuth as the threatened revision of the tarift, and until the facts are at hand, after carefui and deliberate investigation, upon which such revision can propurly be under. tuken, it erems to me unwlat to attempt it. The amount of inisinformation that creeps into argumenta pro and con in respect to tarif rates is such as to require the kind of inventigation that I have difrecud the tarifil woani to make, an investigation underaken by it wholiy with. out resjurot to the effect which the facts may linvo in califug for a remijustment of the ratea of duty."

The Corporation Tax. - The Corporatlun Tax mentioneal in the thal puragraph of the I'resilent's statement is one imposed by un incongruons section of the Tarifi Act. dealgned for revenue bilifionai to tive expected yield if import dutles. it exacts one per cent. of the nct earainge in excess of 85000 of ali corpora. lions, joint stock cumpanies, and assoclations organicail for prott and laving a capital stock refresented by sharcs, and ail insurumce companles. Forelgn eorporations are liable for the fax to thre extent of their husiness in the Cnited states. The net intome npon which the tax is paid is to te aserertained by deducting from the grow income of the corporition ali onlinary and meressary expuoses of operation and malute. natic ; at uncompensated luses actualiy puid within the year on its bonded or other indelbed. Hess tot cxcerfing the pald up eaplail stock: nli Federal and state taxes alrondy pain and ali amounts reonfed by it as dividemis upon stock of other corpurations subject to the tax hereby imposed.

Ilolifing corpmations were exempled in the orginal isili. That excmption was struck ont, lint the conference Committer minated the wriginal clanse Corporathons exempted froni thi tax are:-- labour organizations, fraternal benetlelary sufethes. orders or asweiations operating noder the foulge system, and provin. ing for the pryiment of life. sick, arrhent. and of her lunellis to their members and depentients; domestic buil.fing mod forin assurfations organ. fad und uperated exchasively for the mathai bebetit of their membera, and any corporation or aswelation organimel and oprerater axclu. sively fur religious. charitihife, or educathonal purpmane, no part of the protis of which inures (1) the benetit of any private atockbotior. or imivifind. but all the protit of which is in goon: falth thevoted in thewe purposes.

## TURKEY.

A. D. 1901. - The Bulgarian Committee which directs Revolutionary Operations in Macedonia. - Its Instructions to the Bands and Control of their Murders. - "The Comand contro which was originally formed at sotia for the purpose of conducting the nationalist cannpaign among the Macedonians has been the dominant factor in the later developments of the Macedonian problem, and is directly responsible for all the primiklcal outhreaks which students of Eastern poitics have been accustomeal to look for at the approach of spring during the last few years. The nature of this Society will be clearly appreciated from the following docil. ment. Which sets forth in unequlvocal terms hoth the Committec's mission and the means resortel to for its fulfilment. This document was scized on the Bulgarian consplrators who in the spring of 1901 ware arrested at Salonleat tried. sentenced to fifteen yars incarceration at Rhodes, and pernitted to escape a ferr months after. I nbtained a literal translation of it frou an officlal source at the time.
." Each armed hand to consist of Bulgarians belonging to earh particular district. Thelr duty is to carry out secretly the orders given ly the president of the conimitte. The bamds are armed with weapons furnished by the Commit. tee. These bands are formed by the revolutiouary committers of cach district or village, ani recelve the military traininu necessury for their purpose. These bands depend on the committees, and in their turn distribute arms among those whom they enrol or gain never to the canse. . The armed bands are placel umder the command of the local committees in accordance with the following rules:
.. To Tobey recpised instructions. By means of persurnsion or intlmidatina to place neiv recruits at the committeces di-posil. To put to death the persons inilleated by the committces. . . Earh band. noder the command of the recolution:ry committece establishecl in the district. to be ready to raise the standard of revolt on bcing so ordered by the local conmnittec, which cannot act exeept by the order of the president of the sotia commlttec. . . Th" bands shall also commit poHical crimes: that is to say, they shall kill and put out of the wily any person who will attempt to hinter them from attaining their cuds, and shall immediately inform the Eitia committec of the crimes committed. The instructlons of the liands must be kept quite secret. as the least $\ln$. diserction may lead to great disaster. . . . "Acts of personal rengeance. attacks on villages. and pencrally all kinds of namathorised attempts turaise a revolution are strictly forbidden, and those who are guilty of such acts will be sentunced to death. No murder shall be commetted hy the bands without a previous decision taken hy the committee, except those whth are inesl. table in an arridental encounter.:
"The ruports of the action of the Committee in Marctonia during the last twelve months alone form a dossier which leaves little doubt to the reader of average candonr that the regulations printed above are not allowed to remsin a dead letter, but that practlce goes hand in hand with. or rather ontstrlps. precept. The explolts of the Committee and its brigands in the country mar he classed under three beads: extortlon, intímidation. provoration.
"Cases of wanton massacre, though not so numerons as the atrocities committed with a ma.
terlal object in view, are not uneommon. The vietlms in theae eases are generally Mohanmedans. . . The motive of these outrages is purely to provoke reprisals - that is, a general massacre - and then pose as the vietlms of Turkish cruelty and fanatielsun, a ery whleh never falls to move tbe natlons of Europe to sympathy and their Governments to Intervention." - G. F. Abbott, The Macedonian Question (Ninetienth Century, March. 1903).
A. D. 1901-1902. - Abduction of Miss Ellen M. Stone, by Brigands. - The Ransom paid for her Release. - In a eommuni. eatlon to the President of the Unlted States, March 24, 1908, the Secretary of state, Mr' lloot, reched the cireumstances whleh attended the abduction by brigands, ln 190I, of Miss Elicn M. Stoue, an Ameriean missiouary to Turkey, as slie travelled the highwny from Raslug to Djumabala in the Turhish Emplre, and the necessary payment of a ransom to her eaptors, to secure her release. In the judgment of Mr. Root the Governmeur should refund the ransum money to tbe citizens from whon it was obtained by subscriptlou st the tlme, and his conmmalcation, as follows was to that ead:
"Our diplomatic and consular representa. tives In Turkey, in correspondence with the Department of State, shortly after the ca,ture, ludieated their helief that the raotly therefor was to obtain a ransom, and stated that they had requested the Turkisb officials to abstaln from ton close pursult of the brigands, lest the thath of the captured might result. From later correspondence with our representatives it appearel that the lirgands had retired to the mountains with the captive. probably over the border into Mulgaria. The exalet location of the party durling the captivity, however, is not established by any evidence in the possesslon of the Department of state, nor does it appear clear! $\bar{y}$ of what governmeut the bandits were subjects.

About Oetober 1, 190I, the handits opened negotiations for a ransom, demanding e2:, 000 , and transmitting a letter from Miss Stune, ask. ing that the sum deninnded be paid and that pursult of the hrigands by the Turkish troops be stopyed. Our diplomatie rupresentatives were of the opinion that Miss Stone's release eould only be obtained by the pavment of the ransom, ind the State Department shared thls view. Miss Stonc's friends, of course, entered into correspondence with the Departincont re. garding the paymeut of the ransom, and were told tbat it must be raised hy private means.
"On O(tohber 8, 1901, the State Department wrote to the IRev. Judcon smitb, of the Ar. arican Bonrd of Commissloners for Foreign Illsslons, Boston, Mass, as follows: 'It seems im perative that the nmount (of the ransom) shonld be raised or pledged, so as to be available hy vour treasurer at Constantilnopic In season to sive Miss stone. Statntory prohlbitions make it impossible for this Govermment to nd rance the money or gharantee its parment. If paid by lliss stone's friends, every effort whll be mitde to obtain reimbursement from whichever government may be found responsible nuder Intornational law and precedent. In the even! of its proviug impossible to hold any forelgn government responsible for the capture and to secure the repayment of the moaey. thls Gov-
crument is wliling in the last resort to urue upon Congress as strongly as posslble to apjro. priate money to repay the misslonnrles.

It is clalmed that thls assurunce given hy the Department in its letter to Mr. Smith, to the effect that, as a last resort, a reconmembitlon would be made to Congress lookligg toward the appropriation of a sum sutielent to pay the donors. was largely lnstrumental in enabling Miss Stone's frlenis to seeure the sum of sifif, 000 , which was ralsed through puhile subscrip. thon In this country by Gelober 23, I901, for the purpose of cffectlig Mlss Stone's release. After negotiations of eonsideruble leaght the brigands thally consented to acerpt the amount ralsed and arrangements were made by l'nited States Minister Lelshman for the payment of the mouey at a jolnt ne:ar IBansko, Nacedonia. the Turkish authorities consenting to withhold their troops from the vleinlty of the place in order that the negotlations might have a suceessful issuc. The release of the captive was not obtained so soon as expeeted, but was finally reported by Minlster Leishman on Febrn. ary 23, 1902.

After careful consideration of all the farts mis predecessor, Mr. Hay, decided on Junuary 19. 1905, that it was not advisable to attemp to hold the Turkish Government responsible for the eapture nnd to secure the repayment of the money. Upon the subsequent applleation for recouslderation of thls decision Mr. IIay arain, on April 11, 190.5, reaffirmed the judgment which he had originally expressed. lion a further revlew of the same subjeet I have conse to the ennelusion that it is not advisible to r . verse or change the conclusiut which Mr. Ilay reached.
"It would seem, therofore, thes: the Fixem tive Department is bourd to a:pke goul its promise to recommenu io rongrew the: monev be approprlated to repay the ransyan :honey, ia promise which $x$ is probably redied upon by many of those who contributed of thelr preswits meaus to save the life of an Anerican eitizn believed to be in the gravest peril. Aceordingly Thave the honor to advise that Congress lie recommended to approphiate an amount suti rient to repay the contributors." - $60 \mathrm{H}_{\mathrm{h}}$ Cong. 1.st Sess., Semite Dor, Niv. 40s.
A. D. 1902-1903. - Conventions for Building the Bagdad Railway. Sere (in this vol.) IRA1.waye: TrRker: A. D. 1899-1000.
A. D. 1902-1903. - Insurgent operations in Macedonia. - Horrible Retaliatory Atrocities. - Misery of the Macedonian Peasants. - Contradictory Reports and Views of the Situation, - Insurgent operations in Mace. douia were opened in the fnll of 1902 and contin urd the following year, and into I004. Ibesiles nu activity of insurgent hands and collisions witb Turkish soldiery, there were uany dynanite rexplosions, wreeking a bank at Silonlca, blow luir up a rallway train, a passenger stearuer, and otber outrages of that bind. Then came confused and revolting accounts of a terrible retali. ution hy the Turks. Aceording to Dr. Dillon, the monthly revlewer of "Foreign Polities" for 7 If Contemporary Reviet, the suhstantial facts of what oceurred were' these:

- The insurrcetion in Macedonia planacd by outsiders and fixed for last autumn [1912] ] proved alortive. The first shot should h:te
ivea by mith, to natemlis. toward pay the caubling of $\$ 465$, . 11 bscrip. 901. fur relense: gih, the amount Craited meat of ccionia. ithluold late ia ca sueut was Fibra. he facts Junuary at tempt tble for of the ion for again. lyment lon a c cone ir. liay

beer fired in August, hut the members of the revolutlonary ageacies which organised the scheme quurreiled among thensilves at the Coagress helal during that month ia Bofla, and then split up into hostile factloas. In the comanitue of oae of these sectioas, Geaeral Tsontshefi occupied the foremost position, and he resulved on h!s owa initiative to stir up the Macedoaians to relecilion. Now it should be burue ia miad that all these committees are composed of so-called outsiciers - that is to say, minly Macedonian refugces in Bulgaria, nad that whether tieir aim be to get the proviaces aamexced to Buigaria or Servin, or to demand simple autoaony, they meet with but little srnipathy aad less netive support in Macclo. aia itself, where there is a very iateiligent aa. tive organisation in favour of self-governmeat. Tsontsheff was therefore jeft iargeiy to his own resources. On the 23rd of september lis adju. tant, Nikoioff, crossed the fronticr, but owing to the Silipka festivities, it was not until the 15th of October that Tsoatsheff himseif, who bud meanwhile escapel from prison, took the field. The scene of action was the vaiiey of the Struma, which a week later was wholiy ocenpird hy the Turks, and the Insurrection, which had hardly even flashed, sudidenly fizzied and weat out. The natives warned by their own committee had generaliy hedd adoof. But there rere peopie among then who, not content with lolding back, resolved to act in the spirit of the almonitioas vouchsafed to then by the Great fowers, and ordered the revolutionary hands t" quit the country, aad when the iatter refused, artually drove them off with arms in their hands.
-When the peopie had goae lome the Tarks came to scarch for arms. The persants denied that they jossessed any, and tholl the work of turture began. Ali who conld, saa away, and. owing to the height of the monntain passes aad the coormons snowdrifts, find to ienve their wives and elididren hehind. Before this cadam. itf overtook the piace, the district of liaziong had twelve hamlets and $\mathbf{3 , 6 0 5}$ Buigarian houn's containing about 25,000 inmates. Of these Madame Bakitmetleff, the American rife of the Russian minister in sofia. counted 961 tugitives, Insidies some hundreds who found a refuge in the P'sitsinersky district. The entire number of able-bodied inen drivea away from lazlog aloue is about 1,500 !

- In that loyai und werifonducted district there were futrteen ehurches with twenty-two jriests; of the latter eight escaped to innigaria. one was killed. one arrested, and the fate of the remainder is unknown. Accordiag to the state. must of the priest who, haring made goor his escajee. found an asylum in the Priucipality, their churches were defiled and destroyel by the Turks. A coasiderable number of the remitiaing pensants are said to dave perished on the why over the mountains. Wver one-third, therefore, of the male population of the best behaverl district of Hncedonia has been thus fored to fiee the conutry.
"We have the authorit ${ }^{\text {W }}$ of Hadame Bakhmetieff - who travelied ahont in the decis snow with the thermometer at az Celsius helow freez. ing point, to bring succour to the fugitives f.r sayiag that two priests of the villages of Uraanif and P'nles'1 were tortured in a manaer
which suggests the story of St. I.9" death. They were aot exuctiy inil eu gri but they were hung over an fire and hurre da red lot irons. In the Djumaisk ristrict ix churches were destroyed, and the Chureh of st. Elias was turbed into ustuhle, while the shrine dedicated to the same saint ia Shelesnitan wus converted into a water closet. The churches of I'adesh, Troskoff uad Strhinoff were razed to the ground; the school buidiags ia the Djamaisk District were used us barracks, aad the tenchers put ia prison or abligeti to thee. The horror of the situntion is lutensitled, Madame Bakhmetieff says, by the fact that large nualleers of fugitives have beea driven back by the Turks into the interior sonthwards towurds Seres, where their horrible sulferingrs nul their miserahle end wiil be hidden from all who might give them heip or pity."- E. . Dillon, The Reign of Terror in ${ }^{\text {a }}$ Celonia (Contempo. rary Reviev., March, 190;3).

Another view of the Maceloaiaa sitmation is presented in the foliowing, from auother of the English reviews:
*Tie Macelonian jroblen is desperate mainiy hecause it lias been overlaid with al. stractions. We talk of trouble in the Baikans, of insurgeut execsses, and Turkish atrocitics. without realisiug that these recnsioas and startliag phenomean ure the jroduct of a ruisery that is as constunt as $1 t$ is uninturesting -and uuhearable. We think of Turkisin inisruie as an isolated and irratioaal fict, without compre hendiug that it is a highly organised and quite inteligent system, designed to promote the profit of a smill minority of oflicinls, tax farmers. aud limilords. It rests on a substantiai hasis of corrupt and anti-social interest. The politleal mismnnugeneut is the least of all the evils it prollices. The reality behiud the whole muddle o. racial confliets, heyond the Chatrinism of the lankan peoples aud the calculations of the greater Powers, is the unregarded tigure of the Giacedouian peasant, harricd, exploited, ensluved, careless of national programmes, and anxious oniy for n thy when he may keep his warm sheepskiu coat ipon his back. murry his daugiter without dishonour, und ent in jeace the hread of his ow u unceating labour. All our efforts might fail to bestow upon him an ideai goverament - there are not the makings of a Garmonious nation in Mucerlouia. But jolities are, after ali, a mere fraction of dife. White Sorvia earns the eontemit of the civilised world. the Servian peasant sows in inope and reajs in peace, keeping for winter crenines the tate of murdered forbenrs and ravishen aumestors. The Hacalouian vilager is ignomat. But his iend. ers have heard of a far-off Englaid which twenty tive year ngo flung them hack under the heels of the Turk, nfter liussi:s had wou their frecdom ut Sau Stefano. The tale rins that this same England then wharunted them, at Berin. the amplest of reforms. And thereupon thear simple men will talk abont therr rights. It is for these they are fightiug." II. N. Brailsford, The Miretonian hevolt (Fortnightly Rericte. Sept.. 1903).

And still a third view in this which follows:
"The Turks are honestly doing their hest to a'minister justice indiffereutly. Again andi again during my travels in Macednuia I have admired the evergy of Falis ant Foimalanms.

TUKKEY, 190'-1003
who bold thankless posts with courage and determination. If the Albanians conlu be kept in order and Bulgarian anarchism could be suppressed, there would be no grlevances in Macc. donia to day. The Alhanians are turbulent spurtsmen, engnging as intividuals. but lutol erable as neirhbours. Thiy must be nuad in to moderstand that no further nonsense wi. be pronlterl. The Porte would be quite capable of redacing them to order lf they had not a powerfil protector at hand. The I'rie could also rednce the Bulgarian conspirators if slic did not fear to arouse prejudice ln Emope. The echis of former IBulgarian 'atrocltles' (as rusurInte government was dubbed, paralyses effect Tre actiun. The Turks eannot punlsh Cbristian crimin:s *long as Exeter IIall is on the qui eire $\omega$ (d fend them. Give the Sultan a free band, and the Macedonian conspiracy may be enteri in a few weeks."- Iterbert Vivian. The Mrarcelonian Connpirrocy (fortnightly Reviere. Mav, 190:3).

The British Government reeelved the follow Ing representation of faets from lts Ninister to Bhlgariu, Br Elliott, in a despatch Jated May 10. 1913 .
"There are some points whleh nppear to me to be too freiuently lost sigbt of in apportimuing responsib :lthes for ocenrrenees in Sacedonm. In the first place, the term 'Bulgarimn' is upplied indiscriminately to subjects of the Principality and to Dacentcalans of Bulgarian rine, and the former are made to bear the blame for the actions of the latter. In the same wny. It appears to be believed thut the I3ulgarian banis' wbidh make incursions lito Maceloula from the territory of the I'rincipality are com. posed of Bulgarian subjects, whereas the latter probably do not contribute more tban 10 per rent. of the number of incursionlsts. the remandier being all 8 , cedonians, of whom there are some $2(10,000$ in the Prisclpality.

The same Ninister wrote from Lophia on the 1st of July: "All the reports received conenr in stating that every Turkish otticial, eivil and military, from Ilimi Pasha downwards, look to waras the only means of escape from a sitantion which is becoming intolerable. It ls olvious that in such a war both sides wouli have muel to lise and little material advantage to gain: hut the Turks argue that if they cond adiminister a crushing defeat to IBulgaria. of which they have undonhs, ther woukd, even if ther were afterwanis ohliged to withlraw, obtain some rears' peaec in Macedonia, by the destruction of what they have been tanght to believe, with some justificatlon in the past, is the centre of disaffection, thongh the real cause of it is to be sought in their own maladministra. tion. The bulrarians althomgh believing that the coneruest of IBngarin wonld not prove the easy matter that the Turks seem to imagine. are, for the most part, under no illusions as to their ability to hold out single-handed against the Ottomin Enpire: they are unpre oared. and they have apparently heen deserted by their protertors, Thes are, therefore, slnceso ia their desire to clo erery thing to avoid a conflim. But it does not rest with them to avoisi it. 'lle Macedonima acitators whll naturally do all they can to provoke a war. It is therefore of the most urgent importanee that an attempt shouhl be mite by tlet Turkisis Goverament to restore

## TUIRKEY, 1908-1904

the conditlons of life in Macedonia to something like their normal state. If the persecitions of the last few weeks contlnue, it will be lmpursible for the Government to restraln the $\mathrm{M}_{\text {acido }}$ nlans establisherl ln thls country." - Parliamut. ary Pujers. Cd. 18.5.
The condition of suffering in the region of conntry tormented by thls inluman strifu is finHented by such despatehes as the following from the Brltish Vice Consul at Monastir, writ lng September 23, 1903: "Accordiag to the betot
 now wandering on the mountains bomeless and destlute cannot be estimated at less than fin, (H) whlle the number of Cliristlans maswactid maj be safely put down at 3,010. Some of my end. leagnes, notably tbe Anstrlan, Freach, and Ital lan Consuls, have sent even higher figures to thelr embassles." - I'arliamentury I'upers (Tur. key. .io. 2. 1004), Cd. 1879.
A. D. 1903-1904. - The Murzsteg Programme of Reforms in the Administration of Macedonia, - During a mecting of the finper. ors of Anstria. IIungary and IRussia. In 14\% , ut Marzat eg. in tho Austrian Aps, a plan of sumer. rised aulmlnistrition in Macedonia (known sitace as the Mlaristeg Programme), to be pressad oth the Turkish Governuent, was agreud uprin lif the two soverelges and their adviners. With the assent aad support of the other lowers in Europe this was subinitted to the l'arie, and was accepted In princlpic on the 25 th of Xiveln ber: hit lt was not nutil the following May that It could be sald to bave been bromght at all into netion. Turkey "agreed (1) to the appuint ment, for two years only, of Anstrina amel lis sian cirll agents, with a limited staff of drato mans and secretnries, to reside in the sume phe as the Inspector-(irnernl, and to make thur in the interior, aceompunled by a Turkish wlicial, to question the inhabitants as to their arias. anees; (2) to the uppolatmont of an latian g'nernl to reorganize the fordarmoric: tion to consider the question of nlerlug the alminiatmtive districts so as to establish n more reighlar grouping of the varions nuthonations: (4) that neither race nor religion shall bea hindranee to oftheial emoloyment; (i) that an amousty slatl be granted oo nll persons implieated in the insurrection, excent those gnilty of dyanaite outrages : and (6) to exampt the imhanitanta of destroyed villages from all taxation for whe

General Do Giorgis of Italy, was appointerl to the comonand of the gendermerie: Ilostility to the arrangements of the Mlirasteg promamme
 warfare, and a momber of serious entaremints hetween Tarkish and Albanian forers onemerad Other collisions between the varions quareling ruces-Greek, Bulgarlan and servinn-were mot sopped by the reorgunized gendarmurie. 'Thrkish action and inaction afforded atout equd orcasion for ISulgarian complaints: but in Ipril the Bulgarian and Turkish governuments came to motual agrcements, that the former womd sicp the work of revolutionary committos within her territory, and that thie latter wombl carry cit the reformaz of the Marasterg piro granime in gomi faith. No effective perturm ance of cither cugagement appeurs to law bed sefinred.
A. D. 1903-1904. - Incursions of Ármenial

Revolutionistefrom Russia and Persia Into Aslatic Turkey. - Exagserated acco its of retallatory Mascacre. - Iany hands of revolu. thonary Armenlans who crossed the fronticrs from Russla and Persla during 1903 and 1604 , maklng lncurslons into Armenlan Turkey, nud hriaging upon the luhabitants there the tender wercles of Turklsh troops, a ppear to have been eting generaily in eoipperatlon with the Bulga rian recolutlonlsts in Mucedonla. The eonse quent harbarities were dreadfui enougin, no doubt, but were found to be greatly exngigerated in the reports current ot the time. This wa the eonclusion of the British Ambassudior to Turkey, derived from Inve.ilgat. ns mude on the cround by a eonsuiar oillcer who traversed twith eare. In a despatch dated August 16 1944, the Ambassador, Sir N. O'Conor, rilatea a conversation on the suhject that he had inal with the Irtneulan Patriarch, Mg Ormunlan as follows:

In the eourse of conversation 1 totd his Beatituie that lha: aearil with deep concern the statements he had male to several newspaper corresponlents, to the effeet that he beileved thit brtween 6,000 and 9,010 persons had been mas sacred in the Sinsun und Talori distriets during the late tronhles, and that 1 deepiy regretten that upon my applying for preeise information which would enable me to make earnest repre sentutions to the Grand Vlaler, hls Beatlutie lais sent me word that he wis unahle to indicate the piaces at wbleh these massacres had taken place or to affirm that his reports were baseri on realiy trustworthy informntion. II is Beatitude replied that he had hai no mer, of eontroing these reports, nad that is $b_{3}$.. eommunleater them to others as he had reecived them. I said that, juiging from the reports of Ilis Majesty's Comal at Von, who hai visited many of the districts in yuestion, the numhers of victims mentioned by his Bealitude was grossiy exnggeratedi. Captair I yrreii was more inclinel to estimute the number at 900 than 9.000 , and he had, more. over. heet unable to contirm the statements in the public press that there had been nny massa. cre of Armeniapes in the orinary sense of these woris, aithough, ng douht, many innocent persones had heen killed hoth by the insurgents and the troojs. . . . 1 dhi not desin. $:$ of followhing to the end the incestigations whieli had been set on foot by the Grand Vizier. If, however, inis Beatitude eonld now furnish me with more de sinite information, 1 would do all $\ln$ my power, In conjunction witb my Frenel and líussian colleagues, to bring ahout n searchlog investiga. tion on the spot. Mgr. Ormanian repiowl that de was not in a position to gire mie this infur mation."
A. D. 1903-1905, - A "Holy War " in Arabia. - The Sheik Hamld Eddin contesting the Caliphate with the Suitan. - " Culer the obscure heading of 'IReheilion in the Iemen,' a series of brie? tclegrams has recently nppeared in the Britlsh and American press, describins in skelon language the exploits of Sheik Inmic Eildin. the sovereign of llairamaut, agalnst the troops of tive Turkish Sultan. Absorbedin the contemplation of the Far-Fastern struggle, neither the writers nor readers of the newspa. pers liave ve: found lelsure to reflect upon the meaning of the movement, which the Lord of the Laud of Franklaceuse Is leading.
the Goverament ln Constantincnie, though it would fain throw dust ln the eyes of Europe, is Itself palufuily conscions of the meuachig charncter of the clumleuge whleh has groe forth from Arphin. It Is, ladeed, impossihle for it uny jonger to douht that Llamh Eddin, the nomesaske of Ahelul liamhi, is contesting not only the possession of lomen, hut also the spiritnul suprenary of Isiam. A Holy War, in fuct, has etirted in Arabla, and upon its issue depend the fate of Mecca and the title of Calijh.
"Fur several yeurs, the propazanda proceeded on comparatively penceful llnes. Caly oceaslonnlly it was marked by coilisions with the Turkish troops. But, towarls the end of 1908. the shelk entered the uorthern distriet of the lemen und latil seige to the Turklsh gar. rlson of Assyr. The engrgenent ended disis. trously for the Turks. . . . F'ur at whole year the Turks refrained from attemptiug uny serious resistanee to the Arabinn movemuint. In Februmry of this year, howevor, they suceceded in Intlieting on Ilamkl Eddin a sllyht reverse which the anthorities In Constantinople, for politieai retsons, at 'once magnitled into a dis anter." - W. F. Bulloek, The Fight for the (it liphate ( Jorth Anericun Reripir. Alig. 19405).
A. D. 1905-1906, - Demand in Crete for Union with Greece. - Resignation of Prince George as High Commissioner, - Appointment of M. Zaimis. Sie (in this roi.) C'uETE: A. U 1905-1906.

A. D. 1905-1908. - Continued Reign of Terror in Macedonia. - Financial Reform forced on Turkey by a Naval Demonstration. - Barbaric Warfare of Greek and Bulgarian Bands. - Efforts of Great Britain to secure further action by the Powers. - On the lith of January, 1005, the Austro-llungarian and Russiua Gorernments propos.d to suppiement the Mlarzsteg l'rogramme hy n measure of timm-- ial reform, whieb wouli einjower the agencies * he Imperiai Ottoman Bank to "act as Trea. rer and Paymaster-Generai ln the tiree viayets of Snlonika, Kossovo nim Monastir," to recelve the net revenues of those vilayets, and to "be intri sied whth the iss'11" of payments of Whaterer naiure and in whatecer form." The Turkish Government submitted a counter proposition, somewhat to the same purpose, on the Ith of March: nnd. after mueil discusson between the six creat Powers. of Austria-Hingare Russia, Germians, Great Britain. Framee, and Italy, th:y joinedi in $s$ note to the Subitme Porte, on tite sth of May, accepting the Turkizh project of finaneiai reform, providell the Porte wonld eonsent to eomplete it ly adding the foilowing:

- To super vise the execution of the finaneial reforms and the appication of the preeeding liegulation, and to insure its observation. the Governmenta will each nominat a tinauelai i)elerate. These Delegntes of the four Powers wiii net in concert with the Inspector G neral and the Anstro-Hangerian and Kussion Civil Agents, wbose functlons were detine in the Viraster programme. The Commiss on thus formed witi inve all the powers nebessary for the accomplishment of lts lask, and particularly

## TUHKEY, 1805-1808

TUHKKEY, 1005-1000
for the supervision of the regular collection - I Iaxes, includling alen the tithe. Bofore leine ally setthed, the fudgets must be submitted to the Conmmission, whleh will have the right to amend, under the heal of recelpis and expendl. ture, any provision which may be ineonslstent Whth the exlstlug laws or unsulted to the economife and finaneial regitirements of the counary. Wilh a view to faclilatling its task, the Comp missjon will have the power of nominating for each vilayet on inspector charged with the supervislon of the agenta employeri in the dif. ferent services of the Treasury."
The I'orbe declined to nequlesce in a proposal which It eleclaresl to be "entitary to the es. suntial priaclples of the maintenance of the rights and Indepenilcnee of the Inperial Gurernment." The dimand was persisted in by the slx I'owors, intlexlbly, and realstenl as determinedly by the Nultan and his Mlnisters. during more than six mionths of parlcy. By that time the I'owers had arranged for a joiat naval demonstratlon, and laziled forees ut Mytitatie on the 26th of Novcnher Tbls hronght the Turklsh ( Government to terms; detuils of the financial reform were sct:led on the 16th of December, 1905 , and the intcrational tleet was withdrnwn.
Menntime condlions in the wretched country for whleh these attempted reformis of govern ment wrre heing so deliferately and latorlously proparer alo not seem to bave bcen mneli im proverl, if at all. On the 4 th of scpicmber, the British Amhasmalor, Sir N. O'Conor, forwarlied in his (iovernment "n statistical risumé of the despatelies reerorling occurtences In Maccdonla* acnt 10 him " hy IIf Majesty's Consuls at sa. lonien. Uskup, hul Jomastir hitween the 1 si of Janury and the sith of Augnst."giving "the number of deaths for which the various untion. allies and orpanizations are responsible ${ }^{\prime \prime}$ in those riyht months of the gear. The statisties were as follows:
Chrlstians killed by Bulgarian Fonitujis [Committees), G!; Moslems kiflecl by Bulgarian Komitajis, 6i: Chrlstinns ki!leal hy Greek Komitajls, 211 : Moslems killed by servlan Komita. jis, 12: Chrictians killed by Eervian Konltajis, 10 : 1otal, 363 .

Trools killed by rarjous bands, 00: Bulgar Komitajis killed hy troops. 145: Greek Komltafis klllell hy troops, 38 : Nerh Komltajis, killed by troopls, 83 : total 326.

Cbristians murtered hy Moslems, 43: Christians kllled during military opcrations. 54 ; total 97 .

Throughoit the next two ycars the monthly seports of lbritish consular oltherers and the despatches of the Ambassindor at Constantinople, as published in the British Blue lbooks, are monotonous in their sickening enumeration of single murders, wholesule masisaeres, destruction of vilhace, flights to the mountaing of st:urving refirgees, - outrages and misiriu's he. yond description. On the 10 th of June. 1906. the ( $n$ noll-General at Salonlkn wrote:
"The reneral state of insucurity in the dis. turbed areas tends to grow worse rather than better. chictly owing to the increase in the numbers ant uctivity of the (ireek bonds and a slight rectultacence of Noblem? erime, the most remarkable caces of which are attributed to a band of fiftern IDbanians, who at the bergiuning of
the month infestrd the forest country north of Nlausta, where they robbed and murderel wlith impunlty. The fact that their victims wete nearly all Greeks bas given rise to the brilef in Greek clecles that they have been acting ill the interests of the Vlach and Bulgarian propagan das, thotigh, so far as I know, ther is no wio dence whatever in support of thls theory. The operations of Turkish troops have herell on the Whole very successful as agsinst the small Bul garlan nad servian banda whlelh still killt the flekl. Four of the former and two of the lattit wero totally destroyed, with eomparatirely smail loss to the solklery. It will be seen that the low of life hy violence agaln amounts to ovor :(M) during the month. Of armel revolutlonatien, about 40 Buigarians, 19 Servians nnd 26 (irenk were aceounted for, at a loss to tilu Turkiah army of 28 killed. The great majority of the unarued vietlns were Bulgarians, of whme if were killed by (ircek bands, 15 by soliliers or in operation by the troops, about fis by the slos lems, and is hy Bulgrarinn Komitnjis of rial faetions: whlle 11 Vlaebs were kllided by (iremk hands. 14 Greeks by Albanian lirlgands, 1 fireck hy IBngarinn Konitajis, and 6 Mussulmans by Greek revolutionarles,

Condltons were still the same at the end if anotber $\mathrm{y}_{\mathrm{m}} \mathrm{m}$, and In Deceniber, 1947, the Brish Government adilressed a memorandum on tie subject to France and similarly to the other l'owers, reciting some of the ficcnt facts ro ported by Its cunsular offlcers, aud saving

These facts and the circomstanecs of the outrages committed afford striking eslikence of the manncr in which the gradual cexteratination of the Chrlstimn inhalitunts is being tolernted in Macedonia, where the Ottoman muthorities have displayed an utter ineapaclty to naiutaln public tranqulity. It therefore devolves inna the Powers to sliggest the ndoption of micimuris whieh will put an end to such a condition of affairs, and IHs Majesty's Governnunt enrursily hope that the French Governuent will give their mosi serlons conslde atlon to the propusala Wbich they arc about to put forward. . . . His Majesty's Govermment are profoumbly convinced that the time has nom arion when firmernl
 be lntrusted with a control, and wher mand should be pl of execoutire action by a substin 'rer his run1 :it ctfatre himmeers and an adequate equijn:
To this enmmunlea...s. ..s.re was, monuraging response from any other Girc imment: and on the 81 of Marcb, 1904, the British Forelgn Minister, Sir Edward Grey. reopeued the nllbjcet, expressing the regret with which llis Majcsty's Government had recejved the replics made to thelr propmesals.

The situation is not beyoad remedy. but it eannot be reluredicd by bnlf-measures. Were a Governor of Macclonia to he appointed who would he given a free hand and be irremoralle for a term of ycars except with the consent of the Powers, and were nu adequste iorce of grotdarmerie and Eiropean officcrs placed nt his disposnl. His Majesty's Govarnment are convined that the country might be elearcl of band-and pacifled in n short tlme.
The measure proposed to ot lier Powirs he the British Government, in this eommanientin of
the 3d of March, 1008, obtained tise assent of pone, but it opened a discussion of the smbject brtwien London und St. I'etersburg which brought Corat Britain ami Inssia togetiner, in foint $\mathfrak{c t i o n}$ that gave promise of effective re. sults. The negothations ensuing, bretwen the two Governments leal to the drafting of two schetued of further reform in Maceilonhi, to be presaed upon the Porte, Grout Brinainaccepted the liusslan seheme, subinfted in the forus of an uide mimerire, diated Juiy 2. 190 N . Some inkling of this wers programne, which the European Con cert of Powers was about to be asketi to sup port. had seen given to the publie by this thue, and it seems to have preedplented arevitution. ary consplmey for the self reformation of Turkish Guvernment, which had been in the process of orgunlzution for many years, and which had now drawn near to the point of open artion.
A. D, 1906.-A Troublesome Punctillo removed. - The United States represented at Constantinople by an Ambassador, - "Ac. curding to usage in ('oustantimple, nn Ambas. sador may obtain nu uudience at any time with the Suitan, and force many items throngheren against the influence uf huth the Pulace and the forte. But every repressintative fowor than an Ambassular can riever uphorar hefore the Suitan except when ealled for by Ilis Cracious Majesty. Thisinvitation ean he secured sometimes by indircet means. but when, lor any reanna. the Sultan dees not wish to see a Minister of uny furcign Power, the Palace oftheials enn batile him, If necesary, for years. Now, the Americen representative is called Buvoy Eutrantinary and Sinister I'leniputentary. and is outratnked by every Ambassador to Turkey. Ifenee, lue lacks the alf important privilere of appronching the Sultan uninvited." - Anericus, s,me Phuses fif the Issures betireth ihe l'uited Stetesand Turkey ( . Werth Americen levier. Moy. 1906)

Tlue (ieneral Assebubly cesutc wed Chamber of Deputies) masy assemble on the
terms prescrlbed by law. I terg you to convey this news to the public.
sccorilng to allaccounts of the thme, the ferl. ing evoked by the annouucemeut of a cunsiltutionailerd government - an com ins the long op. pressed peopie could bo persumbed of ita actuallity -was culto extraordinary, and It swent away temporarily, at least, the enmitios of religlon snil race to a remarkable extent. W'.lat oceurred. for example, at Belrut, in Nyrla, as described by a mlssionary, was probahly uot exceptional Iit that place. "Men gathered," he says. "In large groups. Audlenes and orutors sprang up the intialionma. The torreut of eioquence that purted forth there was such as would pat N1. stara to shame. There were propie mingtlag wrether there who during the past yrars hail beta bitterly antagomistic toeach other, hat who now were showing the ir friendsinip in puhtic, Grock Orthorlox and Mohummedan prlests were embracing ench other ; brunches were cut down from the trees: rugs ware hrnught out from the houses: the streets were tined whth people offer Ing thelr hospitaity to thelr new fonnd brothers; everywhere, even among the crimina! ciasses. there werc these evidences of good feilowship. - llowarl S. Bliss, Atheres to National Gicographic thoc., Der. 18, 1808.
On the night of the 23th of July the Sultun received a driputatou, headed by the Sleikh.ni1 slam, who pictitloued for the removal of certniu obmoxions fivorites of the "Palare camarlia," mut especta!ly for the disnulssal of the nutorlous luet Pasia, one of ble secretarles, who wis lathel and feared ahove all. Ablui llamld refured at tirat; hut three days later he orifered l/iet Pasha Into exile and disgruced lsmall lishm, his Aide de-camp, who was sith to te the chlef fpy of the nilltary schools. lzzet succerdel, a lew days later, in escaping from the country, and so, undouhtelly, savel his llfe.
On the 20tio of Juig the Ilritesio Amhasador it Conatnutinople. Sir G. Lowther, seut tive following telegram to Sir bilwarl Grey : "The Suitaa has sworlu on tle Korall, as Calipi, not to repeni the Constltution, and the Nieikh-ui-1siam hi:s olilchilly notifiet the oath. wheld was regls. tured ut his Department, to the peopis. it rellyiously hinds not oniy Abdal llumd hut niso his successors lu the Caliphate to govern In aerordance witia the Constitution, and hecomes part of the Sherl inw. This step was demanded by the Young Turkey uud Consiltutional party, In order to prepent the Constltution belng pit asilic, as was that of 18:6." On the 81st, unnouncement was made in the morning papers of Constantinople that "a Hatti llumuyun whtch Is hinting on the successors of the Sult. a will be imblicly real at the Porte contirming "e Constitution." Sinbsequentiy, on sending a copy of this Instrument to his Government, Sir G. lowther remarked that "A latti Hunayun is the most biuding form of leglslation in tive Ottomau Empire." in the present case it serms to hase supplemented as weil as contirued the origiasi Constitution. ple Iging equality of freedon unil of rights to all subjects of every race and rulicion; supremncy of law : Invlulitillty of the indivicual domelle ; inslolabillty of the Post : freedoun of the Press; freedom of Education, rte., etc.

The minlsters and sples of the old régime of despotism and corruptlon were now proceeded
gainst with celerlty and vhor. Rome escaped sonte were lmphlanted, wolu: were killed by enraged erowis of perple. The latter was the fate of Fehlm l'aulu, wis hal lieen at the hewl of the secret pullee. At the sane tme exlies of an opposite charucter were riturnigg th thelr country and meetiug with excited welcomes us they came.

Klamill l'mba toxk hls proper phece an Grand Vizler on the 7th of Augist, mini formed a uew Cablice Wlh Tewtik l'usha as I'reallent of the Council of state and Dlluister of forvigu difuirs. In announcily the comprostilon of the Cabinet, Amhasealor L.ow thr remarked : " Kiamll l'asha appeurs very whely to have taken the League of L'alon and Progress into his conuscla in furmIne bin Minastry, ath of whom we:e incurrupthle opponents of the oill reglme, whlle two of them are Chrlatians, it accordance with the priuciples of the Coustlution.

Wialie pructicaliy domanting the Impertal Government on our hutul, the rullng Committee of the leagne was llkewise bringing to terus the inwless Bulgarlan, Greck, and other hamis whleh had tortured nnil terrorizel Macedoniu wo long, and was respectfuliy but plainly lintnut. Ing fis expectathou that foreign mumagemellot of the gendarmerle and the finumers of that reglon wouli som be withirawn. Aiready as énriy as the 25th of July, M. Is coisky inul withirawn, for the time belng, at lenst, hls projeet of firs. ther interventlon, saying that " lhussta will follow with the unst xymparinetc uttention the efforts of Turkey tolname the worklug of the new regime. She will abstaln, for her purt, fromall interference caiculated to complhate this tusk, and whli cererise nil her Inthence in order to ohviate and prevent all distuibing uctlon on the pirt of the Balkan States." Of course tie Brttisil Government was moved by the same feeltng, nul. as the new order In Turkey pave more and more promise of stahlitty, the wilihgness to suspend the forelgn organization: "geniarmerie In the Slacedonimin provinces luecane general unting the Powers. A collectlve note, accondingiy, was nderessed to the Suhtime Porte in Noptember, nsking if tise Imperiat Government ind any objection to a provisional suspension of its contract with foreigu oflicers, whin lave. f ubsence to them sine die. The l'ortu promptes arpitiescel and the Maccionlan erverntion came to an (and.

Ircpurations for the election representa. thes in the new Parlament athe active: ita October the League of C'nlen and I'rogress sendin. agents into the provinces to cive muchureded instruetlons to oftliais and people us to wint they mast do and how. The elections were conducted under a compileated electoral law. Excepting foreign resilentw, matives in forelgn service, soldiers not on furioh_i!. lablak. rupts, criminais, and a few other classu's, zil male tax payers twenty-fir, yrars of age were made "eicctors in the first degrec." By thelr vote they chose, not the parliamentary repre sentatluce, but "electors ln the second degree" who wonld muet subserpently and make that cholee. At the proiminary elections 850 to 750 voters were entitlid to one elector: 7.50 to 1250 to two, and so on. The representation in Par. liament was by one Depuiy for 25,000 in 75,000
 125.000, - and further at that rate. Candidates

Sor Parliament were to be not leme than tiarty $j$ "ars of age.

Accortling to the Conati:ution the choeen Deputles to larliament were lo ansemihic at Constan. Inople on the 8uth of Octuber, clll nyle: but Ineritable delays In the elections postprined the meetlr $\rightarrow$ of l'arliament until the 17th of I lecaun. ber. 1 which day It was openex by the Nultan In person, gowi urder prevaliligg in the city. Is 3 written speech from the Throne, read by his HIrst Anrcretary, be offered as an explanation of thre long suspersion of the Constitution of 18:6, that, in conmennence of the alliticulties eneoun. tered in operating the parliamentary syatem thirty years agn, it wan thonght veat that " the ezecution of the salil Constitution whould be past poned until, by the progress of lastruction fu luy kimpire, the ca pacity of niy propie shoulil be brought up to the desired level." As this was now believed to have been arcomplisherl, he haul "proclainied the ('onatitutlon anew withuit fuesitation, in spita of those who holit views aul ophintons oppcsed thereto." Wilth murked ahruptuess the sultan's sperch was theu turned to some recent occurrences whieh have not get beren touched in this nurmatlve of events. Its refereace to thenr was in these Woris: "Whiline the Ministry formel under the Preshlenev of Kiamil Pasha, to whons the oflice of Granil Vizier was intrustet upon thls change in the system of aimlaistration, was occupled with organlaing the new Constituthanal Admin. istratlon. I'rimee Ferllnane. Prinee of Bulgurla and Vall of the Province of Eastern Roumelis. deparilig, for whatever reason, from the lugaity due to our Empire, procialmed the ladependence of 13ulgaria; and imnuliatedy after this the Government of Instria. Ilungary aiso annomeed to the l'orte and to the Cahinict of the other Great Powers that It hum deviderl to annex to the pphere of its dominion Bosula and Ilerze. govpua, which were suhjeet to the temporary nceupation and ailmiluistration of Austria in acconduce with the Treaty of Berlin. Theae two Important evints, which ure prejullcial to es. istiag legai rights ami selations, are ocurrencen whilh have nintral me to very grat regrot, and our Ministers have leen intrustefi with the task of taking the necessary action conserpueat on these encroaphments hul of sufuguariling the rights of the State. In regaril to this tantter, and under all circumstanees, the help and support of Parliament are slesired."
The conchullag worls of the Sultan's hrief speerlh were these: "I open the Chamber of leputies to day with prayers for the bappiaess and prosperity of our Emplre and country. I am happy to ser in iny presenee the lleputic, of my ation. My iutention to govern our country under the Constitution Is nusolute and unaiter. abie. Please God our Chamber uf Deputhes will apromplish gooll work for our Empire and our nation, and our fitheriand will attain to happiness of every kiml. May Gol make us all the ohjects of llis diviae grnee!"

## TURKEY, 1909

several days, uatil they euiminated, on the 13th, in an outbreak of soldiers and eity mohs whieh reversed for a time the Young Turk revolution of the previous July, That the crafty Abdul Hamid had more than leat his hand to the reactionary outhreak was universally believed; but when it hud acconspilshed the overthrow of Hilmi Pasha and his Mifuistry the sultaa did not venture to cail creatures of bis own to take their place. On the contrary, he gave the office of Grand Vizier to Tewfik Pasha, one of the most respected and independent of the ehler officials of the Emplre, charging hlm, lu an imperial reseript. "to form a Cabinet to conform more direetly to the saered law and to main. tain the Constitution and guard publle order." These words are indicative of the natire of the hostility to the régime of the Young Turks which had bern worked up. Formerly, as appears in one of the quotations ahove from Mr. Hagopian, the Yonug Turks had been aceused of being ""champioas of P'an-Islanism," and their Pariiament of showing "a tendency to he a Moslem iastitutinn." Latteriy, Moslem orthodoxy had heen appealed to against them on the eharge that they were unfaithful to "the saered law" (the sheriat), and that they were making the Constitution a mere cover for designs that boled evil to Islum, A fair inference from the contradictorizess of the eharges hrought ngainst them is deeidedly favorahle to the party of the Young Turks.

At the outset of the revolutionary riot in Constantinople a few murders were committed and some fatal shooting at random was done, the rietims including ile Miaister of Justice, a a Albanian Deputy and a few ofticers of the riotous soldiery; hint the moh-risiag, as a whote, appears to have heren kept under singular restrulnt. No inuportant nembers of the League of Lulon and l'rogress nre reported to have been killed. Those who were in ('onstantinople escaped, and their ruling Conmittee was suon estahbished in activity at Sulonika arain, taking mensures which resulted quickly in the recovery of more than the power that they had seemed for the moment to have lost.

That no reaction of snlistantial influenees at Constantinople araiast constitutional and representative govermment was signified b; what had oceurred there was made plain ly an impur. tant prorlamation. Issued on the 16 th of 1 pril, be the Committere of the Clema, the Mostem [bectors of the sacred Law. It was adiressed to the Deputies and the Sation, in these words:

- We are informed that certain beputies, feming for therir tives, wish to resign, white, on the other hand, the puhlie fenrs the return of despotic rule. The Committee of the Vlema, which has never dombted that the Constitution is in entire conformity with sacred law, and has not forgotten the hurning of Istanic books at finthanch in the days of alisolntism, will de. fernd the (imstitution, which is in conformity with hersheriat, to the last, aifled liy the army aull iarliament lts members consider it to ber a religions duty to surclice thelr lives for this end. They and the mathen preserver the cenindence of Leputies, Monslem and non Moslem alike, save su th as haver resigned, of have fled and ure the by enneidered to liave resignet. Weputies therifore, ari informed that heneeforth those who resign wili be consldered trai-
tors. Let them do their duty justiy and honour abiy, and they may be sure of the support of the nation and the spirtual ald of the Prophet. We beg the glorious army to maintain order und diselpilne, foilowing the counscis of the Llena, for it is thus that the Aimighty wili grant salva. tion to the country and happiness fu this world and the next."

But Asiatic Turkey was casily made distrist. ful and suspieious of a change in governinent which appeared to lower the authority and dig. nity of the Suitan Caliph; and news of the seeming triumph of that saered sovereign in what had happened at Constantinople must have had not $n$ little to do with the sudden ont. burst, on the 15th of Aprit, of Moslem hostility to the Armeniaa Christlans in parts of Asia Minor and Syria. The fighting and niassarre then begun, and whieh contlnued for namy days, was most fiercely carried on within a eircle of towus at the eorner where Syria aud Asia Minor touch, and where the Gulf of lshunderua runs far into the land. On the ancthern and western side, this piece of the Turkish dominion was the aneient province of Cilicin, which Poupey added to the empire of Rome: In which St. Paul was born, and which receitem its modern name of Adana from llaroun al Raschid, the most famous of the Culiphs of laghtat, -thanks to "The Arabian Nights." la a:d around its three princlpal towns, of Alatia, Mersina, and Tarsus, the first and worst of the atrocities oceurred.
The League of Union aad Progress hatl Liven way for miastant, onty, to the outbreak at lim. stantinople, which must have taken its hallers by surprise. Wut the nomentary reverse was a pift of opportunity, in faet, to prove the antent. ishing energy of nhility that was in this remarhahle body of men. They had been betrased by a coasiderable part, at liast, of the division if the army whiel garrisobed Constantinople, and whelh is said to have beeu heavily brikect uith money that must have eome frou the siltanis parse. ihnt the Second und Third Corps of the army in Macelonia were unshaken in tidelity to them and their eause. It was on Tueslay, the 13th of April, that their opponents at the cipinal had their trimmph on Wednestiay, the 1 th, the two tristed corps were under orilers from tas. lonika to march on Constantinople. Nine days later Mahmed Sherket I'isha, who emmandid the movement. was $\ln$ full possession of the city, with the Sultum a prisoner, and the virturinits general wasabout to puhbish the fullowing liricf repert of what had heen done in the interal
"Our Second and Third Arony Corps:" he wrote. "heing the nearest to cimstantimple. madertonk as the exte utive prower of the whinde Ottoman nation to shed the hast drep of their bond in defence of the ('onstinutional righine. Itaving therefore taken consel together and organized a force suffleirat for the purpoar. they marched to constantinople, in order to comenter. act the effects of the despotic blow recenty struck at that regime, to sublue and chanitu thic gullty, and to take the necessary mensures fur the prevention of similnr attempts ln the future. Leaving Satouika on Wedueslay, I arriwed the following day at san Stefano and gave oriders for a qeneral morement preparatory to ratarix: the caplat on Friday: The troops quartiret at the Ministry of War were eompelled to surren.

Only the mutlnous tronps at Tasheishla and other harracks In Pera offered any reslstance to the army of occupation. These barracks were accordlngly bombarded and destroyed, their garrisons heing disshled or forced to surrender. As our herolc army hegan operations at night and entered the town at dawn, and as the inhabltants remalned in thelr houses and the shops were closed, thare were no deatlis in the civll population and no disorder took place. The losses on both sides were heavy, hut the num. bers are not yet mown. I pray $G$ (xd that the hearts of all Ottomans may rejoice at the news of tbls great victory and that lt may prove the dawn of a great future for our country."

Military obscrvers who accompanled Shevket Pasba and his army are sald to hive been profomindly lmpressed by the masterly handlligg of the whole operatlon, from start to finlsb. IIls fellow Constitutlonallsts were equally impressed by the quallties that he had revealed. A Press lespatch to New York, from Constantlnople, April 26, reported: "Schefket I'asha, comHander of the Constitutional army, is the man of the hour. The leading clvilian memhers of the (ommalttee of Union and l'rogress desire hlm to be grand vizler In succession to Tewfik l'asha, and he has bcen assured that a majority of I'arliament would gladly support a minlstry under his leadershlp $\ln$ succession to the Tewfik minlstry, which resigneal to-day. In reply to these proposala Schefket Pashas sald that the premicrslip afforded such a splendid opportunity to assist in the political development of the country that he would have rejoiced to accept the honur had it comc to hlm under any other circum. stauces, but that be could not accept it while still leader of the army. To do so would not ac. cord with his ideas of clvil and politleal liberty of action." Thls seems to have been a true ex. hiblt of the fine spirit and intelligent patriotism of the mau, and it alded much to the hopeful. ness of the regenerative undertaklng of the loung Turks. Nhevket is an Arab, from Baglinl, who had his trainhig as a soldier In Ger. many and hal lived in Europe twelve years.

What to do with Abrlul Ilamid was a ques. tion over wbleh tbe Committce of Union aud l'rogress wasted very little time. If hecame their captive on the 24th. On the 26th it was known that le would be deposed and exiled to Salonlka. Hls falsity in all tbat he bul professed of a willing adoptlon of constitutional government, and his trcacherons cngineering of the consplracy against $1 t$, were belleved to be open to no doubt. It was probably not casy to sive him from the doom of denth which be Pared: but the men of calmly tempercd mind ind will who had ruled the revolution from its heginning were stlll in control. On the moruing of the eith a fitea or formal decision by the Sluik-ul-Islam, authorizing the deposition of Ablul Ilamld from the Ottoman throne, was sent to the Natlonal Assembly and rean. It wis in the form of a question from that hody, answercd tersely by the suprome judge of the luw of Islam, - as follows: "What becomes of an Imam [tbe thtle of the sinltan of Turkey aa head of the Orthodox faith] who has distroyed rirtain holy writlnga, who has sulaed property in contraventlon to the Sheri lars, who has (")mmitted crueltles la orlerling the assasina.
tion snd imprisonment of exiles without any justlication under the Sherl laws, who has squandered the publlc money, who, having wworn to govern according to the Sherlat, hat violated hif oatb, who, hy glfts of money, has provoked Internecine blocdshed and clril war, and who un longer is recognized in the provinces?" To this the Shelk-ul-Islam replled: "He must abdicate or he deposed." At once, hy unanimons vote, the deposition of Abdul Hamld and the succession of hls younger brother, Mohammed Reschad Effendl was pronounced by the Natlonal Assembly. The new Sultan was proclalmed with Impromptu cere. mony in the aftcrioon, at the Serasklerat, to which he went iu the plaln cost ume of a Turklsh gentleman. Ile was received by Mahmud Shevket Pasha and his staff in the centrsl court. The Grand Vizler, the Shelkh-ul-Islam, Sald Pasha, Presldent of the Senate, and Ahmed 1kiza, Presldent of the Chamber, stood at the foot of the stairs. All klssell hauds, and the whote group, headed by his Majeaty, procecdell to a reserved chamber, the gallery above the court being In the meantime crowdel with Senators, Deputies, officers, journalists, and ordinary sightaeers. The Deputles and Senators were then admitted to kiss hands, and a prayer was reclted. Thls endel the simple ceremony of the clay; hut onc of more solemnlty occurred on the loth of Blay, when the Sultan receired the sword of Osman - the equivalent of a cor. onation - In the Mosque Ayub, whlch Cliristians are never permitted to euter, and was conducted in an imposing procession tbrough the streets of the city.

Mohmmed lieschad Effenll, who relgns as Mohammed V., was lu hls slxty-fifth year when he came to the thronc. Until the rerolution of the previous July he had been practically a prisoner iu one of the palaces on the l3osporiss, surrounded by the creatures of his jealons and susplcinus brother, whthout whose permission he could not leave the palace grounds. Latterly he hal enjuyed sone degree of personal freedom, for the first time in his 11 fe . An anony. mous contributor to the Lomidon Times, who had had an opportunity to meet hlm slnce the revolution broke his bonds, wrote thus of the Intervlew: "I hal the privilege of a long conversation with Rescbad when I was In Constan. tlnople In tbe autuinn, on condition that the visit sbould be conducted with some secrecy and should remalu sicret untll the return of IIamudianlsm was heyoud the range of possibility. I beliceve I was the first Europein whon he had scen slnce the ravolution of July mligated the severity of the recluston enforced for 30 ycan by Ablul Hamla. The If.lr dpparent was still Hving In the Palace aljoining Dolma Baghehe, whlly had been his prison throughout the relgn, jealously guarden by the Sultan's Pretorians at the entrances from the maln rond, and by a gunbuat. moored In the Bosporus opposite the water approach.
"Hia IIighness talkel slowly and hesleatingly, often lowering his voice to a whisper and cariIng furtive glances round the room as if he was still haunted by the fear of sples, but he llstened eagerly while I told hlm of my own many jour. neyings in Turkey, whose people I had known slnce the beglnuing of the Hamldian rigime, occasionally lnterrupting me wlth an appositc

TURKEY, 1009
remark or asking for an expianation which showed both interest and intelligenee. There was somethlng strangely pathetle in this deslre for luformation about his own country, over whleh his Highness was soon destined to reigu. A full hour's conversation left the impression that, glven favourable elreumstances and good advisert, the Prince was well qualified to preside over a period of peacefui transltion."
Punishment of the authors of the counterrevolution followed quickly on the relatabilshment of constluthonal authority, and it was sternly meted out. As Mr. Hagoplan expressed the feeling of the Young Turks, in his letter of April 26 to the New York Erening Post, they " eould not nfiord to be lenlent. The consplracy of Aprii 13," he added, "was no longer a secret. In the last two days 15,000 soldlers and 6,000 hudjas and spies had been arresterl. In thelr possesslon over lialf a million dollars had been found. Where had this money come from? Who couid deny any longer that Abdul Hamld drew from hls hank about ten million dollars a month ago? His favored son, Burlaneddin Effendl, went from barrack to barrack and distrlhuted the money among the soldlers. Former spies, disgulsed in Turkish ciergymen's garments, went among the troops and wou them over wlth the Sultan's brlbes. Soldiers, when arrested, were found to have an average of one hundred dollars: some had two hundred, three hundred, and even five hundred. Indeed, Ablul Hamld was the head of the eonspiracy, and the massacre in Adana was lnstigated hy his emissaries sent from Constanthople. The old and the new Yildiz eliques were not less responsible." By the 12th of Slay thirty-elght executions had been reported, most of them by langing in public places. "A member of the court-martial that seuteneed these uen to death explained the renson of the public hangings by saying that Constantinopie was such a elty of rumor and tradltions of eorrmption that, had the announecment been made that these men hat been exceuted in private, it would not have been believed by the suasses. It wis desired to impress the perple with the fact that the gullty hat been prin. ished.'
(April-Dec.). - Outbreale of Massacre in Southeastern Asia Minor. - The first news of the ont break of massacre in southeastern Asla Minor eame to Europe and Anerica in a tele. kram from Constautinople, dnted April 15, saying: "A massacre of Armenlnns is in progre'ss today at Mersina. a serport of Asia Minor on the Siedlterranenn." In tinis report the outbreak was aseriberi to the provocation of a mutuler of two Moslems by an Armenlan; lint nothiug that appeared subscquently gave any eonfirmation to thls. The Sultan has been ac cused of having lnstigated the ? ing, as a means of sarting eomplicatlons 1 ich might eheck the Young Turks; but that remains unproverl.

Mersina, from whiel the first report of mas. sucre came, is thirty-six miles by railwoy from Adana, the canital of the vilayet of that name and un important missionary statlon of several Americun mlsslonary organlzations. Adana was a eity of about 45,000 inhablants, mostly Hohamnedans, but whith Armenlans In consid. erahle numhers and a few Greeks. The Chris. than missions incinded lmportant schoois. In
this eity the murderous mob had begun its work on the 14ih of April, a day prior to the Mersina report, and it is found to have been the center of the deadly outhrcak throughont. The Moslem fury vas dlrected against the Armenians, and, though two missicnaries were among the Ellied, they do not appear to have becn oh. jects of attack, but to havesuffered ineldentally to the efforts they made for the protection of thelr Armenian neighbors and their schuils. There were Turkish troops in the elty from the beginning of the siaugliter, but they did nothlag to stop it for five days. Aceording to some accounts the vali, or governor, kept them shut up in quarters: according to others they towk part in the massaere. The Rev. Stephen 'l'row bridge, who was in Adana during these teribl days, deelared a little later: "One man is r. sponsilic for the disorders here. This is the vali hlmself. He had it in his power. suppress lawlessuess and massaere, but detiberately re. frained from doing so. He sald stmply: We are not responsihle. The better class of Turks In Adana," Mr. Trowhrilge contlnued, "the nembers of the Committce of Union and Progress, are deepiy grieved and sadlened at these dreadful events. Some of them ure rehly 11 join us lu rellef work for the Armeniaus. One Bey already has opened his house to refugees."
This gives color to the belief that the ont. lireak was uot mere mob-maduess, but captaind the some way from a hlyher center of Turkish authorlty. Nuch, indeed, was the firm conviction of many who were wheneses of what ocenrre? Wrting on the 24th of April from Tarsus, whleh bore its share of the widespreal attach' mother milsslonary sald: "The ruas*acres all hegan on the same day, Wedncsday, the 14 th. showing, were there no other proof, that they were inangurated by telegraphie orlers from Adana, probably from Constantinople. Thit only places where the Christians took uly arms for a short time to defend themselves were Adnna, Iladjin, and near the battle.tield of Issus; at the latter place they are still holding out. The statemeut loy Turkish otheials that there was an Armentan insurrection, that Turk: wire massucred. and houses burned by the Christians, etc., ete., are simply abominable lies. This cannot be put too strongly.

1) fifty long hours, while battle and nuturder ant burnings were going on ali around our sebm? and residence in Alman, the rali, though he lad hundreds of solliters at the lionnk, sent not ont to protect us and our property.
Aecording to a report made some months fater, after investigations muler the new Turk. ish régime and gunted from a Tukjsh mews paper, the number killevt ln atl part- of the province whs 20.00k; 620 were Muslems, and the remaining 19,400 were bon Mowloms of the non Mostems kliked. 418 ware (h) ('hat cleans, 168 Chaldexns, 210 Armonian Cathmis. 60.5 Protestants, 09 Greehs, and the romaimit? Grigorian Armenions. The same repurt astimated the destructlon of property as havimg bern equal to tworthirds of the entire wealth of the provlnce: The apperance of Adana and of the surroundling country ufter the massiners werc stopped was described by one who male the journey from Tarstes to diana, and to ! wrote: "licaving behind us the rulns of 'Ta sus, and the hundreds of weeping whdows and ut. The Armeni. among dentall ction of schorils, from the did no. - to some cm shut aey tox) a Trow in is rr 8 is the uppress ately re. y: we Tarks un Pront these chly th s. One

orphans there, we came hy train to Adana. Near the clty the road runs for miles through vineynards and gardens, in former daya a beautifui slght. But now it is a waste of desoiatlon: ail the houses of the Christlans are heaps of rnius; in and around those houses more than five hundred were slain during the three terrible days of Aprli, Tlie houses of Moslems have not been injurea. We noted a like contrast as respects the numerous farms on the plain between Tarsus and Adans. And yet the charge Is made, and believed, that the Armenians were the aggressors!

In the once prosperous Adana, nothing but ruins; it is like the pletures I have seen of Pompell. The wretehed survivors wander by twos and threes around the pinees where once stoxi their happy homes: they iook more like ghosts than human beilugs, these paie, dejected, bereforted whilows and orphans.,

On the 12 th of May, after the Young Turks had recovered power at Constantinople. the Turkish Embassy nt London gave out the fol. fowing announcement: "Order and tranquillity prevail throughont the Sunjak of Djebelilereket. Troops are arriving gradually nud are heing distributed according to the necessi. tlea of each plnce. Tie foral authorities at Alana are about to proceed at once to contiscate stolen property and to disarm Jusuhnans and num- Misulmins alike. This measure wili be allopted generally in the other parts of the vilacet as somn as the eroops whill are coming from the varions places have reacherl the powithons to which they have becu assigued. The anthorities arr wiry busily engagal in findins lomes for people wito are without shelter and in supplying them with foom. A Commission for that purjose has leen appolnted at Alana."
A Court Martial and a Parliamentary Commísion were now sent to Idana to Investigate the massure and punish the guilty. Their work Wrs soon showing results. On the itth of Xiny a report came from (onstantinople that "Feril fisha has informed a representative of the Tinin that several of the soldiers who took part in the reernt massucres in Cilicin have hern arresteri. Xine persons have alremis been rond monel to death by the Court-martial. With ruraral to the responsibility for the outhreak. thi" Minister suid that. whife be could not drfinituls ascribe it to ollidal jromptings, cortain oftic ials had fated to do their dilty, among them the Mutesarrif of Jehel Bereket, who hal beelu imprisoned penting un inquiry into his consdut. The reactionaries hat certainly played a part in fomenting the outbreak, but other elemunts - wheh the Dinister did uot spurify had eontribnted thereto.

In the 13th of July it was reported that "an Imprrial Iraduli has been issued ordering the arrest of the ex-Governors of Adana and Djebel Breket, the commonder of the Alann garrisun, and a number of notahles of Cilicia, ennoug whim is the editor of the Itillal, the notorious Bushdadi.

Two days iater it vas said that " the ex-Gow-- mors of Adnua and Djebei Bereket have been s.nt to Alann under a strong escort. Nome:30 huling Moslem notahies of Adana whe have in :artexta will be fmmadiatals hrought before a court Vartiai. The Grand Vizier las given orders for a manifesto to be preiared by the

Sheikh-ul-IsIam, demonstrating by means of tezts from the Koran and the Traditions that the duty of all good Moslcrus is to treat Christians with justice and to regard them as fcilow-cltizens with equal rights. It is to be distributed hy the lindls, muftls, and hodjus in every town and village of the empire, and the most learned ulema are to take it as their teat in the sermons to be preached durling next Ramazan."

July 18th the court-mart lal was stated to have made a report which conciuded ns foliows: "•Fiftcen persons have beell already hanged. 800 deserve death, 15,000 deserve hard fabour for ilfe, and 80,000 deserve minor sentences. If it is deciled to proceed with the pmishment, we will draw a cordou around the town nud deal expeditousiy with the matter.' In vicw, how. ever, of the generai recunciliation hetween the virious eiements. the Court-marthal recommends a general annesty on the occasion of the Na. cional Fette."

The 11th of August hrought accounts of the pubilication of a Ilcciaration by a Coumbission of chree ministers in the Turkish Cnbinet appointed to prepare it, acipitting the Armenians of all responsibility for the outbreak at Adana. This declaration, drawn np after a carefn] cxamination of the reports of the members of the I'nrliamentary Commission on the massacres and npproved by the Conneil of Ministers, ascribes the massacre to the ignorance of the population. "In the relgn of Aldal IIamid the peoplo liad berome imhned with the ldea that every Armenian was a separatist at heart, and were thereforc arerse from equality with the Armendan communty. They had berome in conseynence the tools of relighlims or politieal agitators. The declaration censures severely the local oflleials for their failure, not only to quell the outbreak, but to warn the Government that the sitnation in Cilicin was critical.'

One of the theputies of the Parliamentary (onnmisuion which inventigated matters at Alana gave, propape a nore distinct iden of the causes that worked to pronhee the massaeres, in min interview pnblished during Aurust, when he said: "The masacre in Adana had two strong eauses: reaction and tyranny. The joy of the Inly demonstrations $\left\{\frac{0}{} 1908\right\}$ hidd scareeiy passed whicn, at the heginning of Angust, tyranniad tendencies begran to appear. The former Muft of Ibakhohel went hither and thither deelaring that liberty and the comstitution were the work of the Christians, that the constitution was contrary to the sheriat. Iu this way he stirrel up Moslems ngainst the Ciristians and the constitution. In plact of the joy which appeared among ali chisses during the first days of the constitution, a spirit of revenge and cumity agriust non. Mosiems began to sprcad.

Fivilently the amnesty recoumended hy tite (imrt-martini in Juir was not granted: for the following telegran was sent from Constantinople on the 12 th of Vere-her to the London Times:

- Twentrsix loslems, who werc sentenced to leath in connexion with the Adana massacres in A pril last. were executed at Adana yesterlay nud to dar. Oriler was maintained, although the popuintlon was mueh moved, the women relatives of the condemmel publiciy masifesting thoir trief. Une Armeuian is awalting execution."

Nevertheless the Armenians have not been
satisfied with the punishments inflicted, and the Armenian Patriach reslgned in September, as a mark of protest, malntaining that the real instigators of the massacres went unpunished.
A. D. 1909 (May-Dec.). -Hilml Pasha, Grand Vizier, - Parliament opened by the new Sultan. - Constitutional Amendments on Religion and Education, - The Committee of Union and Progreas. - Change of Ministry. - From the 1st to the 5th of May Tewfik Pasha was Grand Vizier, hy appointment from the new Sultan. Then, as had been expected, Inimi Pasha was called tio his place and remained at the head of the Government until the last week of the year. On the 20th of the month the sultan in person opened the ses. slon of Parliament, and, after a speech from the throne had been read by the Grund Vialer, prononnced the following werds: "I have sworn to respect the Sheriat and the Constlation in its entirety, and not to transgress for one instant from siffeguarding the national rights and interests of the conntry. You must now in retnon take the necessary oath." The oath was then taken by the senators and Depnties In turn, his Majesty watching the proceedligs from the im perial hoy. On the 24th the Grand Vizier anbounced the programme of measures and general policy to be undertaken by hls Minstry, and receivel, after debate, a vote of confidenct hy 190 to 5 . The reconstituted Govermment was now a fully organized fact.

Questions concerning the attitude of the Nate towards religion and education, as it should be defiued in the constitntion, were among the earliest of high importance to be bronglit before the Parlinenent. On the Nth of June it adopted an amendment to the article in the Constitutlon of $18: 6$ (sce, in this vol., Constitetios of Triker) remint as follows:

- Islam is the Nitate reitgion.
-The State while afeguarding this princt ple, guarantees the free exereise of all colts recognized in the Empire, and maintains the religions pricileges granted to divers communities. provided public orler and nourality be not lafrluted."

On the subject of education the Constitution was amendect to read
"Elucution is free
"All seluols are placed under the control of the Gorm rmume. The necessary measnres shall be taken to assure to every Ottoman snliject a uniform system of elluration. There shall be no interference with the religions education of the diferent communitics."
The Cliristian commmities, especdally the Greck, oljected strennonsly to thls, fearing that governmental control would be fonnd to mean the inposition of the Turkish language in all schools, as an instrument of nationalization.

Another proposed amendnent, making mens. hers of the Chanher of Depaties pligible for the posts of Parliamentary Culer-steretaries of state, failed to secure the rempiste twothirds majority, and this was regarded as a defent of the cevilian leaders of the "Yonug Turk "Conmittec of Linion and Progress, who were sup. posed to be desirous of lolding the posts in question. While sitting also in the Chamber.

The firm control of affairs whll the Commit. tee in question had exercised throughout the revolutionary movement, whlle keeping itself
mysteriously anonymous in the backaround, had been extraordinarily successful, indicative of high wisdom and a very genulne public spirit. But the forces thus handled by the Committee, especially in the millitary clement of the revolution, were growing ristive, it would appear, under the fecling of too much subordination, and gave increasing silgns of dis. content with the invislibility of the wires by which they were puiled. Without doubt, it was evidence of this which led the Conmmitte, at a meeting at Saionlka, in October, to resolve and annonnce that thelr organization shomld no longer be a secret society, but open to public knowledge and directed henceforth by a r"sponsible executive. Whether the Committee dil or did not strengthen Itself by thus coming into the open, it has malntainet its ascendancy anm still exerclses a controlling power.

The second sesslon of Parlliment was opelied by the Sultan, on the 14th of Novenuler, with a speech of roseate contentedness in its coutemplation of Turkish affairs. Late in Devernber a change of Ministry occurred, in somewhat ob. scure connection with a consolldation of stenmur Hines on the Euphrates. A British line of stenm. ers, known as the Lynch Line, which had betn ranning on that river slace 1860 , was laing consolidated with a Turkish line that the Turb. Ish Goverument controlled, and something is the transaction which ralsed an issine between Parliament and the Grand Vizler, Ililmi I'asha, led the intter to reslgn December 28 . Noloty seenis to have doubted, however, that the real cause of hls leaving offle was in the willins: ness of the Committee that he should di, si General Mahmed Sherket, the able miltary leader of the Revolution, was invited to fitin a Cabinet, hut declined, as he is sald to have done hefore. The high oftlee was then conferred un Makki Bey. Turkish Ambassalor at hume, and Mahmad Shevket Pasha accepted office in his Cabinet as Minister of War.
A. D. 1909 (Oct.). - Railway and Irrigation Projects in ihe Tigris-Euphrates Delta. - Sir Willian Willcocks, the Brithll oncilier who has been engaged for some time phas: in aurveys for the Turkish Government. lating reference to Irrigation and railway imptose ments for the reslamation of the great Mesuputa mlan reglon, made a report, to the Ministry of I'ublic Works at Constantinople in C"tuber 1009. of which the following account was siven to the I'ress through Keuter's Arency: "nir William Willcocks advocates the consiruction of a railway from liaglalad to the Meliterr: nean. The proposed railway would stari from Bachudad, cross the Euphrates at Feludia, and follow the Villey to llit. At lit the llne would take the Euphrates Valley and traverse the flit desert In a stralght line to El Kaim, near Aha K.mal. the northern limit of the eataracts From El Kaim to Der Zor, the Enplar:tes has no catarnets, and the river Khabour. which juins the Euplirates at Mayadin, the ancient lichow, 1 , is, like the Euplirates, navlgable during the Whole year. These parts of the Fuphration and Kihaboir could be extensirely developeed aul all their products trausported to J 1 l laim by bat and thence hy rail. From EI Kalm the railway Hould pruceed to Tilmor (P'almyra) and inflhis the old trade route over a flat desert supplied with water. From Paimyra the line would gu

## TU1:KEY, 1900

either to Homs ir Damascus. The total length of the raliway from Baghdad to Damascus ls placed at 880 kllomètres.
"The report next deals with the works of Irrigatlon to be undertaken at once. These consist of barrages of the Hindleh canal, dams on the Habhania and Sakhlawia, and worka for the navigation on the Tlgrls. The total cost of the entire works on the Euphrates ls estimated at ET1,034,060, whlle that of the works on the

## UNITED STATES OF AMERICA.

A. D. 1901 (Sept.).- The Assassination of President McKinley. - "On the sixth of septumber, President Melinley was shot by an anarchist white attending the Pun-American Ex. positio: at Buffalo, and died in that elty on the fourt inth of that month. Of the last seven et eted Presidents, ho is the thi: $d$ who has been wurdered, and the bare recltal of this fiet is sumicient to justify grave alarm antiong all Ioral American citizens. Moreover, the circimstancers of this. the third assmssimatior of an American Presilent. have a pectharly sinister significance. Both ''resident Linculn and Pre. sident Garflehl were hilled by assassins of types unfortunately not uncomuin in hlstory; l'residut linevin falling a whetim to the teribie passions aroused by four gears of civll war, and 1'resillent Garfield to the revengeful vanity of a
disapponted ulicemeker. President McKinley was killed by an utterly depraved crinimal helonging to thiat boly of eriminals who object to all covernmenta, grochl and bad alike, who are arainst any form of popular liberty if it is guaranteet by $n$ "n the most just and theral laws, ani who ${ }^{2}$ hostile to the uprlght exponent of it free 3 soicer will as to the tyrannical and irresp ie despot.

- It is nol wo mueh to sar that at the time of I'resilent Mekinley's death he was the most widely loved man in all the United States: while we have uever had any public man of his position who has been so wholly free from the bitter animosities incldent to piblic life. Ilis phitical ; pronents were the rirst to hear the heartie. inil nost generous tribute to the broad hindliness of uature, the sweetness and gentle.

A. D. 1902 (May-Nov.). - The Restoration of the White House. - Cotll 19H? the residiree and the pxecuttre oftices of the l'resillat of the Cuited states were crowded to F:lle: lu the historic White louse, with lincreasing lnconvenlenec and fimpropriety. Jany projects for their separation had bectu discussedf. lawuring generally the erection of a new manson tor the chlef imagistrate; but the had no result until President Roosevelt. with charactrititie resohntion, took the matter in hand. lils enphatle pronomeement that "under no circumstances should the President live elsewhere than in the blatoric White Inonse" ap-p-aled strongly to a very common puhlie fereling. and smouthed the way for an undertaking which spectily cleard the White House of itsecretarial and clerical offices and mate it a it and worthy reshdence for the chief eitizen of the Republie and his family.
On consultation with the Park Commlssion of Washington, and especially with the arclitect. Mir. Hekim, whe was one of lis members. as to the expenditure of the anmual appropriations nf C'ongress for repairs to the White Ilouse, it
was decided to be thrittless pollicy " to patch a bullaling that needed thorongh reconstruetion. When akk.a for hls fdeas as to such reconstructhon. Mr. M :KIm advised that a temporary onestory building be lozated west of the White Ilouse, nearly on the site onee occuplen by Thomas Jefferson's offiees, and be distlnetly suhordinate to the muln bulldligg; and that the White Ifouse le restoral to lts orighnal uses as a resldence. This solithon commendell liself to the Presiflent, but latriness in the sesslou of Congress seemed to make the projeet impossible of Immeliate executhon.

The disusslon wis sill in the arademic. stage when, ont day [in May, 1Wi:], Mr. Mc. Kim outllued his hens to the hate Sorator Mc. Billan, who stralghtway asked the sost of the proposed ehanges. Pressed for an lmmedinte answer. Xir. Nckim male n ronch estmate. The Sumary Civil Appropriatlon Bill was then pending in the Senaue Commbttee on Appropriatlons. and withinan hour from the that the tig. ures were yren that committceagreed to insert an ltem for the restoration of the Whitc II uluse and for the constructhn of temponary executive offices. To senators Allison and IHale the I're. sident afterwaral submitted the architect's scheme; and when the Item wis renchen durIne the passare of the bill in the seuate, the plan was rereivel with fuvor, null the approprintion is a nerecd to whthont objection."

It passed the lhonse with cyual pronptitude. The Iresident then stipulated that the work should be completed in tlme for the neat social se:ason, and that the excentive oltices and the living portion of the White House should be ready in Xovember, 19n2. Thut meant a cantpalgn. Stones for floors and stairways must he selected pider by plece a: the distant quarrs: steel must be found to replace the over tired woolen thoor heams; velrets and sllks must be woven; hardware nust be fashionel; and a thonsand and one details nust be looked after, because ha less than str months the White Ifouse was to he made over from rellar to garret, and every piece of woxlwork, every lem of furniture, earlo ceillng nud panel amd mould ing, mast be both arehltecturnlly eorrect and also betitiog a house of the latter part of the eighteenth century. Auch was the rask which the architects, Mcesrs. Dickim, Meal di White, took upon themselses.

The total amount which Cougres. placed in Presidunt limger velt's hands for buth the executive ollers aml the White Ihouse was $\mathbf{3} \mathbf{5} 30,641$, and he mislit expend the money either by eontract or wherwise in his diseretlon. This amotut was basel on estimatis furnished by the arehitects, vith tive anderitanling that any porthon saved on rene itrm might be used no others, a rery happy proviso, as it turued ont, bucanse the ilectric whing had to be entirnly r'newed, new hrating apparatere movided, and even a new rouf pit on the douse - all unforesuen requirenients.

- It the watset the archluets s. arovered that simply by carroing out completely the enrly plans as to the extcrior, and hy making eertain re:arranements in the interior, the White ilomse problems could be solved, at least for the immediate fiturn withont tentraylng one single feature of the hisworic buihlheg.
by the restoration of the cast and west ter.

## UNITED STATES. 1002

races the White House now fives from a stylohate 460 feet In length, thus greatiy enhancing the dignity of the structure. The roofs of these terraces (which are level with the gr uad on the north) are surrounded with stone whitrades beraring electric lamps." - C'harles Mvore, The Rewtorition of the White Ifouse (C'entury Magasime, dirril, 100 (1).

Dental, whoe candidates then named declined and were mitmequentiy replnced by duatin Ilol. comb, of Georghis. for l'rimhent, and A. King. of Miemurl, for Viee. President.

With sunce alifilgment, the deciarations of primeiples and pledges of party poliey adopted
 tons at lasur are givan convenioutiy for coms. parian lat the following urrangetuent by mabfecte.

Trusta. - The IRejmbllean Iburty contenterl itseif witha brlef viant of " laxs enacted by the lepubliean party whlch the bemocratic party failed to enforce," but whirh" have heen fenf lensly enforced liy a lrepubilican l'restident," amd of " new laws insuring reasonabie puliicity as to the operatinus of great eorporutions ami provid. ling miditional remedies for the preventon of diserimiantion in freigint ritere."
The ihemocratle l'urty condermned with vigor the fillize of fepulilienas ln (inggres to prohilhit eontrnets with eonvicted trunta: declared that "gigantie trusta and comblinathons" "ure a menace to benerthin eompetitlon and na olinturle to permanent bnsiness poosperity: " denonnead "rebates and discriminason hy transportation eompanies as the most poteat ageney lif promotlug nal strungtheaiag these unawiful consplr. acles agnolost trale," lemunded " an cohbrgeanent of the powers of the luterstute Commepce Com misslon." " a strict enforerment of ealsting civil und criminal statute nguinst all such trusts, combinitions and axampolies," nad "the en actursit of such further fegislation as may le neeessury to effectinliy mppress then.

The licople's l'arty set forth the proposition that. " to prevent majust dlacrimantinn and mo. aopoly the Gorermment shoulid own mide controi the ralifouds nuil those publia utilities which in thelr nature ure monopolies." it shandel "own and oproute the general telegraple und telephone swstetas und praside a pareels joset." ('orporations " shonld be sulijucted to such guternmental regnitionsumi control na will indecpatily protect the public." and detmund was amide foif
"the taxatlon of monopoiy privilegrs, while they remaln In privnte hands. to the extent of the value of the privileges prantedi."

The Contincutal iarty contembed for a guariled chartering by ('ongries of ${ }^{\prime}$ all railronil and other corporations dolag business in two or more Stateq," und for haring the "creating of ' enmers' and the establishing of exorhitant
 ence . . made acriminal oftare."
Thu' Linted ('hristim l'arty dechared that ('hristian guvrmment through direet fegislation will regninte the trusts und labor problem aecording to the goldinn rille."

The Tarif: - The Ihpublican Party dechured - I'rotection " to be it a cardinal pulticy." maill. tenance of the principles of which policy is insistai upen; wherefore "rates of dinty sliould ln. rediljusced only when eonditiona lave so ehanged that the pinblic interest demands their alterition," alld "this work cantot safcly be enmmitiol to any wher hands than those of the Republann party.

The Iemocratic l'arty, on the rontrary, denouncmi " protection as : 1 robbery of the nater to emrich the few." favored " a tarifl limbltid in the needs of the Government, economienlly administered," aud called for a "revision and
aralual rmluctinn of the tarif by the friends of the manses, for the commonwealth. And uot by the friends of lts abuever, its extortions sid lit discriminations.

The People' Party declared for a citange in our laws that " wlil place tarifi schedities In the hande of an omid partiman comulaslon.'

The Continental l'urty ilmited its declupation nn this subject to one pronounefng for an "al herence to the jurineljulen of reeiprucity wilvionted hy that en.luent statesman. Juares (f, Blalne, a nuplled to Curtala nad ail Americun ilepublios.
Capital and Labor, - Pubilc Ownership.Soclalism. - Thu liepubiean I'urty recognizel "comblimitions of englial and labor" as "ludag the results of the economle movements of the age," but " nefthermust be permitied to infringe upin the riglita sad interests of tion perple"
"botin are sinbjeet to the lawes, and nitithrean be mermitted to hreak theni."

The Demmerutic I'arty expressed similar In purtlality, In fivoring "the emartment and ad mhistr. licn of lawa givlog heror aul cupleal fuphartally their just rights."

The l'enipla's I'arty pledged Its effort to " pre. serve involate" "the right of falor in uramize for the irenetit and protection of those whathil It woulif serok "the enuctment of logialation looking to the fimprovernent of eonditions for the wage earares, the abolition of chlld faluep, the suppression of a weat shops and of eonviat hathe

 linhor." and " the shourter work day.

The ('outlecatul Purty moptorl these expres sione of the f'eopice's l'arty, In |dentical wirds.

The Sationai liberty lorty nsked " that the General Governmeat own and control all public carriers in the loulted states."
The frohilhtion I'arty dreiaped liself $"$ in favor of . . . the enfegharding of the perplis: rights by a righ applicatlon of the primejpid of justice to all comblinations and organleation o if capltal und labor."

The L'uited Ciristian Purty pronomencal tim ply for " (ioverument ownership uf coal minu. nif wrils and publie utilties.

The sociailst Party piedged fteelf " on watch and work, in both the eronomle und the politis: strugere, for each successlve immedinte Int mo of the working class": for "shortenudi dat, of lnbur ani hicreases of wages"; fur "lisuramer of the workers agajust aeclicat, sicknes ant fieck of employment "; for pensions: for " public ownership of the means of transportathan, cons. munica:ion and everage": fo. "ruchuted tias. tion of ineomes, cte. for "eon, te education of chidren and their fredom from the work shops "; for " freeadminist mation on lustice "; for "the Inithative, refurendim. proportional representation, equal suffruge for auth and women." ete. ; and for "every kain or advantage for the workers that may be wrented from the eapitaliot system and that may relleve the sufforing atid strengthen the bands of habor": lint in an dinit it prociaims that it is "using the we renmedial measures as means to the one great end of the co-operative commonwealth.'

The Norialist Iabor Party declared that "the cxisting controdirtion brtworn ther thero ni democratic fovernment and the fact of a ilesputic ecounmic system ment to the exclusire bencfit of the cillitalist

The alsonce of their ritios from the rachs cond ton have encelped the wthention of the sergeants Who ha: the kiss, yet all the sererants swear that tho rith \& were in the racks, antoblited. It is imposible that many of the battalion who did not take part as metivi membera of the conspir. ary were not mulo nware by one cheumstance or mother. of the ldentity of the prersons who rommitted the offoras. Instead of glving to their anlleere or the insjecters the benetit of anything wheh they knew tembing to lend to a convirtion of the killty men, there was a conspiracy uf sifnere on the jart of many who must he hod some haowlerige of importance. "The... - Dlisted neen," satil secretary Taft, "took the unth of allewnere to the devirnment, and werr to be urd naler the law to maintain lts suprematy. Can the Government properly, therefote. keep in its employ for the purpose of maintaining
law and onder any longer a borly of men, from fire to teu per cent. of whom can plan und com. mit murder, and rely upon the silenee of unum. ber of their companions to eseape deteetion ?"

Mr. Taft theu eailed attention to the fact that "when a man enlists in the army he knows that, for the very purpose of protecting itself, the Government reserses to itself the absolute right of dischirge, not as a punlshment. but for the puhlic safetp or interest." Ile thas corrceted the supporition that the e': charge was $u$ punlsh. bent either of the innucent or the guilty. IIe suid firther: "The discharge 'without honor' is merely the ending of a contract and sepura. tion frum the service under a right reservel in the statutu for the proteetion of the Government, which may work a hurdship to the private discharged, but which. In the public literest, unst sometimes he arbitrurily exercised."
Of the repented inventigations, Congresslonal and military. that ensiaed, ind of the protracted disputation, lect in Congress hy Senator Foraker, and echoed in the newspupers, it is needless to attempt an aceount ; for no greater ecrainty as to the firets in the case can be recognizel to ding than when Secretary Taft's report was made.

Presiden. ates, and $t$ Taft. arill qui. fatteution more in relection aserelt hind ve uctim, nd reguli ad prontly Ilisex had mado imulations tal netion the comen orked, and to the res. f the eouln less waste,
became assoclated In tbought with the President, and widely talked of as belonging to "the Rooseveit polleles." Popular sutisfuetlon witb these policies and thelr champlon would have Ifen Mr. Roosevelt a renomination by hils party, If he bal not emphatically relterated bis piedge of tour years before, tbat "under no circumstanees " would he " be a eandldate for or aceept anotber nomination" There were some who strove to persuade him to be false to that pledge; but they were not the people who esteumed bim most truly. Naturally the nomlmation that would have gone agilin to Mr. Roosevelt If ho hal been free to accept It sought a eandidate so closely ideutlfed with what he had stood for and labored for that no departure from the favored "policies" need he froscci. Quite as naturally that candidate won a large majority of tbe popular votes.

The tirst nominating convention held ln 1004 was that of the Peopple's or Populist Party, which sat In St. Lenis April ${ }^{2}-3$, and agnin namul its old lencler. Thomas E. Whtson, of Georgia, for President. with Sammel W. Williams, of Ins'inna, for the second plnee.
liev. Danlel Brnxton Turney, of Ilinois. was the next to be named for President, and L. S. Cotho of Iowa, for Vice.President. by the ["nited Christian Party, at IRock Island, Itl., llay 1.

On the 10th of May the Soelalist Party met in conventlou at Chicago and was In sission until whe 1sth, uguin nominating Eugene V. Deba, of Indinun, and Benjamin IImforl, of New lork, for P'residient nad Vles:-President.

The Irepublican conveution was assembied at (liango, June 16-19, and its nominets were William Iloward Taft, of Ohlo, for President, and James Schoolernft Sherman, of New Lork, fur Viee-President.
The Socialist Labor Party, at New York, July 24, nominatedi, for President, August Gillhais, of New York; for Viec-President, Donald L. Munro, of Virginln.

At Denver. July $\mathbf{7}-10$, the Conrentlon of the Winnocratie l'arty named, for the third tinue. William Jennings Bryan, of Nebraskn, for IrrsiWent, and for Vice-President Joha Worth Keru, of hudiann.

The Prohibitionists convened at Columbus, Ohio, duly $150-16$, and the candidates named hy themfor President nnd Viee President were Fingene W. Chatin, of Illinois, and Aaron S. Watkins. of Ohio.

The last of the parties to meet in conrention was that organized hy William IR. Ilearst and named the Ind'pendence Part put forwanlwere Thomas L. IIisgen, of lassochusetts, and John Temple Graves, of Georela.
Of the elgbt politleal parties which offered candidiates to the voters of the nation, four presentell thein on special grounds, aside from Whieb their standing on other questions of pullic policy wis hut slightly and Incidentally made known. The "platforms" of the remininir four were of the seopt of gencral pollties, detining positions takern on all or most of the political discussions of the time. The declarations of these lutter on the questions which enlisted real interest in the country will be given, as In the treatment of the party platforms of 1904, under a disseeted arrangement, by subjects, for convenient comparison ; while the former cannot
caslly be dealt with in that analytic way. In botheases the distinetly declaratory text of the platforms, only, wlll he given, with somo abrklgment, as follows:

Trusts. - "The Republican Party," It as. serted, "passed the Shermanantl-trust law over Democratic oppositlon, and enforeed It after Democratic dereliction. . . . But experlence has shown that Its cofectiveness can he strengthened aud Its real objeets better altalned by such amendments as will gire to the Federal Government greater supervision aud control over, aud seeure greater publicity in, the managoment of that elass of eorporations engaged In Interstate commerce having, power and opportunity to effeet mouopolies.

The Deunocratle Party demnnded " the enaetment of such additionul legistation as may bo neeessary to make it impossible for a private monopoly to exist $\ln$ the United Stutes." Among the additional remedies requirad it speeited three: (1) " A lnw preventing a duplieation of directors among compreting corporations"; (2) requirentent of a foderal license for $n$ manufac. turing or trading corporation, "before It shall be permitted to control as much as 2 i per cent. of the product in which it deals, the lieense to protect the public from watered stock, and to prohibit the control hy such corporation of more than 50 per ecnt. of the total amount of any product consumed in the United States"; and (3) " A law cumpelling sueli iicensed corporation to sell thall purchiners In all parts of the comintry on the same ternis, after miking due allowanee for the cust of transportition."

The I'eople's I'arty deelared that "the Government shoukl own and control the railroads and those public utilities whicb In their nature are monopolies." incturling the telegraph and telephone systems, and should provilie a pareels post. From those trusts and mounpolies which are not publie utilities or natlonal monopolics It demundied a withdriawal of the special privileges they enjoy; taxatinn of all sueh pririleges while they remain in private hauds, and "a gencral law miformly regulating the powers and duties of all incorpomted companies doing iuterstate husiness."

The Independeuee Party denouneed all eombinations whieh "are not combinations for production, hut for extortion," nudi demanded "the enforcement of a prison penalty against the guilty and responsible individuals controllider the management of the offending corporations., " It alvocated, "as a primary necessity for sounder hustness conditions and lmproved public service, the enactment of taws, State and National, to prevent waturing of stock, Mlshonest issules of bonds and other forms of corporation frauds.
Tariff. - The declarntions of the Republienn and D.mocratic national conventions touchlng a revision of the tariff have been (puoted already in this rol, - sec Taniffs: C'sited Statfes.

The Independence I'arty, like the Democratle. demanded a revision of tbe tariff, not by its friends, but hy the friunds of the people, and declared for $n$ graiual reluetion of tnriff dutles.
Capital and Labor. - Injunctions. - The Republicnn l'arty recited the enactments of the rxisting fongress in the intereat of labor, and pledged "its contlnued devotion to erery cause that makes for safety and the betterment of con-

## UNITED STATES, 1908

UNITED STATES, 1008
ditlons among those whose labor contributes to the progress and welfare of the country." On the hurnlng questlon of the lnterference of courts of law, hy writ of injunction, with lubor "strlkes," It declared that, whlle " the IRepubll. can Party wlll uphold at all tlmcs the authorlty and integrlty of the courts," It lelleves "that the rules of procedure ln the writ of injunction shonld be more aecuratcly defined by statute, ant that mo lajunetlon or temporary restraining order should be lssned withont noticc, exeept where irreparable lnjury would result from drlay, is whiels case a speedy hearlng thereafter should be granted."

The Demueratle Party gave cxpresslon to the same desire to unalntaln the diguity of the courts, but had seen that "experience has proven the necessity of a unoliticatlon of the present law relathy to injunctlons," and added: "we relterate the plealges of our national platforms of 1898 and 1904 in favor of the measure which passed the Cnlted Stutes Senate in 1806, but which a Republican Congress has ever since refused to couct, relating to contempts in Feteral eourts and providiug for trial hy jury in cases of indl. rect eontempt. . . . We deem . . . that lnjunc. tions should not be issued in any casc ln whleh Injunctions would not lssne if uo lndustrial dls. pute were Iuvolved " lts further declaratlons were against any "ohridgment of the right of wage-carners and prolucers to organize for thit protection of wagea and the lmprovement of labor conditions": for "the elyht bour law on all govermment work ": for the enactment by Congress of a " reneral employers' liability act." and for the ereasion of "a department of lathor, represeuted separately lu the I'resident's cahlnet."

The Independence P'arty denounted " the socalled labor planks of the Republicamand Democratic platforms ns political buncombe and eontemptible clap trap." and asscrted "that hall actlons growing out of a dispute between curployers and employees eoncerning terns and condltlons of employment no injunction should lssue until after a trial upon the merits: that such trial should be held before a jury. and that In no case of nlleged contenipt should ans per. son be teprived of liberty wlthout a trial by jury." In further declaratlons the party ln. dorsel " those organlzations among farmers and workers which tend to bring about a jus: distri. butlon of wealth," and favored leglslation to "remove shem from the operation of the sherman anti-trust law ": endorsed the elght hour work day, and would have it applied to all work done for the Govermment : called for legislation to prohibit "any combination or consplracy to black list euployees": demauded "protection for workmen through enforced use of standurel safety appliances and provision of ly gienic conditions": advocated State and Federal Inspection of milways to seenre a greater safety for employees anil the travelling public: condemmed the manufacture and sale of prisonmade gools; favored a Federal department of lator. Whth its chief in the Cabinet; and cnllerd for a Ferleral inspection of graln.

The People's Parsy condembed "all unwar. ranted assumption of authority by lnfertor Fed. eral courts iu aunulling ly injunetion the laws of the States, " and demamided loglslatlon to "reotrict to the Suprene Court of the Linted Staten
the exercise of power $\ln$ cascs Involving State leglslatlou": condemned the "attcmpt to destroy the power of trades unlons through the na. just use of the Federal lnjunctlou"; demanded the abolltion of ehild labor in factories and mines, suppresslon of sweat shops, exelusion of forelgn pauper labor, the enactmeut of an cm. ployers' llability aet and measures agrainst cand. lessness In the operution of nilnes; oppored the use of convlet labor: favored the eight lour work-day, and "leglslation protecting the dires and limlis of workmen through the use of safits appllances": declared that when working met are thrown lnto enforced hlleness works of pub. lle Improvement shoula be Inameurated.

Banking and Currency. - The Republican Pnrty approved "the cmergency meanurs adopted hy the government during the recont tinanclal distarbances "and deelared the party to be "comunitted to the development of a jur. manent eurreney systens, respondlng to our grenter needs." It favored the estublishment of n postal savings lank system.

The Demuerat le Party pointed to the panic of 190\%. "coming withont any legitlmate escuse." as furnishing alditional proof that the layuhli. chu party " is cither whwilling or lncompresent to protect the luterests of te general public," haslng " so linked the co.s"t"y to W"all Strect that the slus of the specnlators are visited uprou the whole people." It declared the belief that "ta so far as the needs of eommerce roquire an enuergeney enrrency, such eurrency slowhl be lssued, controlled by the Federal (rovermment and loaned on adequate security to National and State banks." It pledged ltself "to legislation under whicl: the national banks slasulit be required to establlsh a guarantec fund for the prompt payment of the depositors of any insul. vent national bnak under an equitable sratm whel shall be available to all State lunking institutions wishing to use it." It fancorma postal savings bank "if the guaranted lhank enn not be secured, and believed that it should be so constituted as to keep the depusited mintr in the community where the doposltors liwe,"

The I'eople's Party reiteruted its belief that "the issumbe of money is a function of antern ment and should not be elelegated to corpurition "r individual," It therefore demanded "Hhat all money should be issued by the Goverumest allrect to the people, without the lintervention of banks, and shall be a full legal tender far all debts, publie and pri
and ln quantities suffieient to supply the needs of the country," It also demanded postal savings banks.

The Indepondence l'arty made a similar dechration, "that the rlght to issue mone'y is is. herent In the Gove niment," and it farored "the establishusent of a central govermmental bat through which the money so issoned slabll la 1 it into general clrculation. ${ }^{\circ}$ It also called fut at? exteusion of the parcels post systrin and fur postal savings lumks, the deposits in which shoulal "be lomeal to the people in tha ! en!!!! of the sereral hanks."

Railroads. - The Republienn I'arsy sy proved the railrond rate law nul " the vicorms enforcement by the present admlastration of the stntutes agilnst rebates and dlw rimint. tion": lelieving, "Junever, that the hatrisinic commerce law should be further nmemled wis to give railroals the right to nake and pulits
trafic agreements subject to the approval of the commission." It declared for legislation and mupervlion to "prevent the future overisulue of tocks and bonds hy lnterstate carriers.'

The Democratic Party asserted "the right of Congress to exercise complete control over inter. state commerce, and the right of each State to exerclse llke control ove. commerce wlthlu its lorders": and it demanded a nceded eniargement of the powers of the inturstate commerce commission. It recommended a valuation of railronds by the commisslon. It favored legis. iatlon to "prohilbit thic railroads from engaging in business whlch brings them Into competition whth their shlppers"; to prevent the overissue of stocks and bonds, and to "assure such reduction in tranaportation rates as conditions will pernit." It approved the laws prohiblting the pass and the rebate. It favored givlag to the interstate commerce eommission "the iuitlatlve with reference to rates and transportation charges," also permitting it, "on its own lultiative to declare a rate illegai," and otherwise enbancing its elliciency.

The Independence Party adrocated "a bili empowering shippers in time of nerd to compei railroads to provithe sutllelent ears for freight and nassenger trattic and other railroad facllithes through summary apponi to the conrts." It alsil favored " the creation of an interstate Conmeree Court, whose sule function it shall be (u) review speedily and enforce summarly the onlers of the Interstate Commerce Conmmlsslon," and it urged that the Commission "slomid procied at once with a pliysicai valuation of rail. romls engaged in Interstate commurce,
Natural Resources. - Pubiic Lands. Waterways. - The li.pubiicin l'arty indorsad "the movement inalugurated by the almisistration for the conscration of natural resources" eommented " the work now golng on for the reclamation of ariti lantas": reaffirmed "the ikepublican policy of the free distribution of the arailable. . finhlie demain to the landless setther," and dielured it to be "the further duty. eipulaty lmperative, to enter upon a systematic Improvenent. upon a larige and eomprehersive: plan, just to all portions of the comntry, of the water harbors and Great Lakes."

The Democratic 1 ':ur: : ri meated "the demand for internal developone: od for the conservation of our national resurares contained la prerious platforms." covering fincs of poliey the same as abore, and udiling " this dereiopment of water puwer and the proservation of electric power gen rated by this naturai force from the control of monopily." it insisted njon "a puliey of admindstration of our fore reserse which shall . . . enable homesteaders is of right to nccupy and aequire title to nil portions thereof which are especially adapted to agrlculture, and which shall furnish a systom of timber saies availabie as well to the privatie colti. Poll as to the larger nimufacturer and consumer." It called for regulations "In relation in free grazing upon the public fanis outside of furest or other resprvatlons untll the same shall - ventualiy be disposed of " It favored the "Immediate adoption of a iberal and comprehensive plan for improring erery water courso in the futun whieh la justlfed by the needs of commerce," with "the rreation of an ample fund for continuous work."

The People's Party declared that the pubife domaln is a sacred heritage of ali the people, and siould be heid for hometeads for actual settiers only ; silen ownerstilp should be forhidden.

The Independence Party rejoiced "In the adoption in toth the Democratic and Ikepuhllcan platforns of the demand of the Independence party for improved national waterways." It declared for the reciamatiou of arid lauds and generally for the conservation of the couutry's natiral resources. It called for provision to be made for free grazing on pulilic lumbs outslie of forest or other reservatlons. It protested against the sule of water and clectric light power derived fromu pubile works to private corporations.

On other suhjects touched in their platforms the deciarations of these parties varied littie from those of 1904. and cainot be regarded as haring mmeh historicai significance.

Of the remaining partics, which are organlations with special objects, the Socialist set forth the nust chanate programme of demands, under three headings. - General. Industrial, and Politicai. Ther tirst included " im. mediate Government rellef for the uncmployed" by public works of many descriptions: colleetive ownership of railroads, telerraphs, cotc., and all lauls: "collective ownership of all industrics whieh are organized on a national seale and in which conupetition has virtunly ceased to exlit": incluslon of mines, guarries. oil wells, furests and water-power in the public donain. Indinstrial demands ineleded improved iudus. trial conditions: Hhortencol work days: a weekly rest-periol of not less than a day and : h half; ettutive inspection of factorles and slops: mo elilat labor muin wixtecn years of agre: no interatite transportation of products of child labor: substitution of compulsory insurame against unenuloymont, illness, ace, ete, for all ollicial charity. Politionl domants were for coxtended and graduated hanritance tuxes : a graluated income tax : equal suffruge formen and women : the initiatire, referentum, recall, and proportional representation: aholltion of the Srnatr: abolition of power in the supreme ('omrt to pass on the comstitutionality of legislition; amendability of the Constitution by a najority rote. claction of all jultges for short torms; frec ulministration of justice: further neasurea fur generai education and conserva. tion of bralth.

The Goreialist labor Party repeated in sub stantlally the same worves its generai deciaratiuns of 1904 , against a " lespotic economic syatem," as yumetel above, under the heading "(ripital and Labor."

Tho I'ruhibition Party embolicel its funda. mentai oljecet in demandis for the submission of \& comstitutional amentment prohlblting the manufacture, sali', 'tc.. of alcoliolic liquors for beserage purpuses: suppression of the ifichor $^{2}$ traftic in all pibees imder the jurisliction of the National Government, and reprai of the internal revenur tax on alcoholic liquors. To this it added demands fur a popular clection of $\mathbb{L}$. S. senators: graduated income and inheritance taxea; postal sarligs banks: guarantee of de. posits in hanks: regulation of corporations doing an interstate business: a permanent tariff commission; uniform marriage and dlvorec laws;

## UNITED STATES, 1908

## UNITED STATES, 1908-1809

enforcement of law against the social evli; an equitable employers' ifabllity act; court review of post offlce decisions ; prohlblition of child iabor in mines, workshops and fuctorles; suffrage based on abillty to read and write the Engiish language; preservation of the resourcas of the couutry, and improvement of hlghways and waterways.

The Lnited Christinn Party, husing its piat. form, as hefore, on the ten commandments and the golden rule, favored "direet primary ciections, the inltiative, ruferendum, recall, uniform marriage and divorce iaws, equal riglits for men aud women, government ownershlp of coai mines, oil weils and pulhic utilities; the reguiation of trusts and the ciection of the president aud vlee-presldent and senators of the United States by the direct vote of th.. people.

The votes cast at the popuiar election, November 3 , numberid $7,687.676$ for the ilepul). lican nomluees: $6,398,182$ for the Inemocratic; 420,464 for the soclallst; 231,252 for the Prohilitionist : $8: 3,183$ for the Indepeudence; 33,871 for the Populist; 15.421 for the Sucialist Labor. The totai of rotes jolied, including a few thonsands to other titan purty nomiuees, was reported to he $14,863,711$.

The States which gave izepublican majoritics were Cuifornia, Connecticut, Delaware, Idaio, Iilinois, Intiana, luwa, Kansas, Maine, Masa. cinsetts, Nichigan, Minnesotu, Montuna, Ne vudir, New Hampsihre, New Jersey, New York, North Iakotn, Ohio. Oregon, J'musyivania, Rhode Island, South Dukota, C'tah, Vermont, Washington, West Virginia, Wlscousiu, Wyoming. - 29.

The States which gave Democratic majoritles were Alabama, Arkunsas, Colorado, Florida, Georgia. Kentueky, Lonisiana. Mississippl, Missouri. Nebraska, North Carolina, Oklahoma, South Caroina, Tenuessee, Texus, Virgiuia, 16.

Darvland, as the consequeuce of a cumber. some ballot, dirided its voth, givi'g six to the j) mocratic nominecs and two to the iepuldlican.

The totai vote in the Eiectoral Coilege was 32 ; fur Taft med therman aud $15 \%$ for Bryan and Kern.

A. D. 1908-1909 (Aug.-Feb.). - The Coustry Life Commission, and its Report. - in thi' 10th of August, 1908, President IRomsevelt addressed a ietter to five gentiemen whom he asked to serve npon a Conmmlasion on C'untry LIfe. The five thos adircased were Professir ©. Ii. Bailcy, New York State College of Ayrlculture, ithaca (named as Chairman of the Commassion) : Mir. Iicury Wallace, of II"t"aris Firmer, Des Moines, lowa; Predient $k$, wn L. Butterfeld, Nassuehusetts Agrieulturui inl. iege, Amberst: Mr. Glfford Pinchot, of 1 !n United Stntes Forest Service; Nir. Waitur 11 I'age, of The World's llork, New lork. Nulse. quently, Mr. Charles S. Burrett. of Georgia. and Mr. Wiilinm A. Beard, of Cabifornia, were added to the Commisslon.

In his letter to the originai appointees the Presldent wrote: " I doubt if any other uttion cnin bear eonnjarison with our own in the amount
: uttention, given by the Government, both dederui and siate, to agricuiturnl matter:. But practlcaily the whoie of this effort has hiltherto been directed toward increasing the prodnction of crops. Our attention bas been concentratel almost exciusivcly on getting better farming. In the logimulng this was unquestionally the right thing to do. The farmermust first of all grow good crops in order to support himself and his famijy. But when this has been securel the effort for better farming shoudi crease to stand nione, and shonld he accompanied by the eflort for better losiness and hetter fleing on the furm. It is at least as important that the farmer should get the largest posslble return in money, comfort, aud soclai adivatages from the crops he growes us that he should int the iargest 1 wible return in crops from the lano be farms. Agriculture is uot the whole of country life. The great rurai interests are linman interests. and good crops are of little whe to the farmer memess ther open the door to a good kind of tife on the farm.

The farm ers hare hitherto had less thun their full share of pubic attention along the lines of lusiness and social life. There is too much belic famone nll our people that the prizes of life lie away from the farm."

The Commisaion entered promptiy on its tank. of ohtalning whe mul exact luforimation as to the existlig contitlons of farm life and work in the country, as to homes and sehools: meralla if communication and interconrse, by fostal service, telephoue, highway, dectrle railway und other raliways: neighhorhood organizations to promote muinal alvantages in buying and sell. Ing: proftabie salc of jroducts : supply of labor: facilities for husiness ln banking, credit, insurance : sanitury conditions : sociai cntertain ment: meetiogs for mutnai improsement, eft, etc. This was sought, in the first instance, by a circuiar of questlons, about 550,000 copies of

which were sent to names muppijed by the United Statcs llepartmen: of Agriculture, state experiment stations, far:mers' socleties, women's chibs, to rural free deliverymen, cuuntry pliy. slelans and ministcrs, and others. To these inquiries about 115,000 persons have repilied before tile report of the Commission was made. "mostiy with much care and with every evi. dence of good faith."
In addition to the replies given to tbe circular questlons, a great numher of persons sent carefuliy written letters aui statements that were invaluable. At thirty piaees, In ali sectlons of the conntry, the Commiss: in, or part of it, lield appointed hearings in November and December, sul o'vained mucin llght from those. Its report of tbe concluslons to which it had been led was presented to the l'restdent on the 23d of Janu. ary. 1909, and transmittel by hin to Congr:ss ou February vih.
The Commission found an unquestionuble iack in the country of a weli orgnilsedi rurai sockety, and came to cicar conciusions concerning the many canses therefor, which are fuliy discussed in its report. The leaxilig specific canses are summarized with hrevity at the outset. as follows.

- A lack of knowledge on the part of farmers of the exact agricniturai conditions and possihilities of their regions;
"Lack of gord training for country life in the schou's;

The disadvantage or handicap of the farmer as against the established husiness systems and interests, preventing hin from secirias adequate returns for his proiucts, depriving him of the bencfits that wonli resilt from inmonopu. lized rivers and the conservation of forests, and drpriving the eomnuunity, In many cases, of the goonl that woull come from the use of griat tracts of agricuiturui land that are now held for spucnintive purposes:
" Jack of gooul highway rucllities:
The wlacspread continuing depiction of

A general need of new and active leadership.

Other causes contrihuting to the general resilt ure: Laek of uny alequate sysirm of agrieubural eredit, where' the farmer may readily stcure loanson fair te is; the shortagi of labor, a condition that is often conplieated by intem. peranc. emong workmen; lack of insitutions and $i_{1}$ atiees that tie the laboring uian to the soil irlens and the narrow life of firm wr L of adequate supervision of pubic le: summary of main defieirncies the Conn: wn adds the following, of cbief remedies:
"Congress can remove some of the handionps of the furmer, and it can ulso set some kinds of work in motion, sueb as:
"The encouragement of asystcm of thoroughfoing survess of all agrieultural -.ions. in orider to take stock and eollect local faet, witi, the dien of provlling a basts on which to develop a scientificaily and economieally sound country iife :
" The encouragement of a system of extension work in rural eonmmities, throush nil the innt. frant collcges, to the people at their homes and vu their farms;

## UNITED STATES, 1000-1909

" A thorough investigation by experts of the middlemau system of handing furm products, coupled with "genersi iaquiry into the furmer's disad vantages in respect to taxation, transportation rates, cosperative organizations and crecilt, and the general business system;
"An inquiry into the coutroi and use nf the streams of the Un'ied Stutes, with titc object of protecting the people it: lheir ownership and of saving to agricnlturai uses suci) benetits as sonsail be reserved for tbose purposes:

- The establishing of a highway engineering service, or equivalent organization, to be at the cali of the States in working out effective and economical illghway systems;
"The establishing of a system of pareel posts and postai savings banks:
"Providing some mrans or ugency for tite guidance of public opinion towari the development of a real rural society tbat shali rest directly on the iand.
"lematies of a more general nature are: A brond campaigu of publieity, tbat must be undertaken untii ali the people are informed on the whoie subject of rural life, and wat there is au awakened appreciation of the necessity of giving this phase of our national developmeut as much attention as has been given to other phases or interests; a quicket.ed sense of responsibility in all country jeople, to the community and to the State, ia the consurving of soil fertility, and in the necessity for diversiffling farm. ing in order to conserve titis ferliity and to develop a better rural socioty, and also in the better safe-guarding of the strength and happisess of the farm women; is more willespread convirtion of the necessity for organization, not only tor economic but for social purposes, this organization to he more or less curberative, so tinat a!i the people way share equally in the bunefts and have voice in th: essential affairs of the community; a realization on the part of the farmer that he hus a distinct nutural responsibility soward the iaborer in providing him with gool living facilities and in helping him in every way to be a man among nuen; and a ruallzation on the psert of all the people of the obligation to protect and devilop the matural scenery and attractiventea if the open country.
"Certain remedies lit' with voluntary organizations and instituions. All organized furees, both in town and eomitry, shoull undirtand that there are country phases as weil as city phases of our civilizition, ind that one phase nceuls help as muci as the other."

In his Message ennmunteating the reports of the Commission to Comgress the President focussed attention on four " groat general and immelliate neetis of comtry lifu" wbich stand out of the exhiblt before all $o^{+}$hers:

- First, effective coiberation among farmers, to put then ou a level with the organized interests with which thery do business.
"seond, a new kind of sehools in the comntry, which shail teaci the children as mueh outdors as indoors and perhups more, so that they will prepare for eountry life, and not as at present, mainty for life in town.
-Third. better means of communication. in. cluding good roads and a pareels post, which the eountry perale atreverywhere, and right? unanimous in clemanding.
"To thesc may well be added better sanita-

A. D. 1909 (March), - The Inauguration of President Taft. - Intimations of Policy in his Inaugural Address. - His Cahinet. The curemonies of the inauguration of l'resident Taft on the 4 th of March were performed under singularly unfarorable clrcumatances, in conse. quence of one of the most drondfni storms that ever visited the (apital. Trains blorked by it contained thousands of people who reacherl Wialilugtun too late for what they lad trav. elled far to witness or to take part in, whlle those who did arrive on the scene were hardly gladened hy their success. The l'resident, howevor, accepted the untownel conditons with a charicteristic hirh-heartel equanimity. Ilis inaugnral aldreis. delivered in the Senate Chamber, instead of in the open alr at the East front of the Capltol, opened with the following woris:

- Iny one who takes the nath I have fuat tatien nivst feel a heury weight of responsibility. If not, he las no conception of the powers and dutles of the ofliee upon which he is about to
enter, or he is lacking in a proper sente of the obligation which the oati imposes.
"The office of an inaugural adetress is to gire a summary outhine of the maln polleies of the new Administration. so far as they can be natlclpatci. I have had the honor to be one of the advisers of my distinguished predeecssor, and s4 such, to hoid up hit hands in the reforms he has inltiated. I shonid be untrue to myself, to my promises, and to the declarations of the part platform upon which I was elected to oflice, if 1 did not make the maintenance and enforeemet of those reforms a most important fruture of my administration. They were directed to the suppression of the inwlessness and nbuses of power of the great comblnations of capital invested in rallroads and in industrial enturprises carrying on lnterstate commerce. The steps which my predecessor took and the legishatha mossed on hls recommendation hare arcomplished much, have caused a generai halt in the viclous pollcles wheh ereated popmlar alarm, and hare broupht about, in the b.isiness offected, a much higher regard for existing linw. To render the reforms instlag, however. and to secure ut the sinue tine freedom irom alarmon the part of those pursulag proper aud progres. sive business methols, further leghistive and executive action are neeled."

From this general intimatlon of the cours. 1, Which his mind was turned, the incoming Iro. sident went on to a more speeifie uafolating of hls views ou many suhjects of goverumental care. The following ls a summary of the suggestions of inture poliey conveyed in the Iddress:

Reorganizatlon of the Department of Inatice and the liurean of Corporations of the Inplartment of Commerce and Labor and of the literstate C'ommeree ('ommisslon.

Tariff revision in necorl with the promivan made in the national platform adopted at Chi engo.

A continuation of scientlfie experiments in the Department of Agriculture for the improrement of agricultural conditions.

The cmactment and earrying out of laws for the conservation of the resomrees of the country

Naintenance of the army und mave in such a state of preparation as will hosure a contimance of peace with other comutries.
A continmation of that treatment of aliens which will insure fur the people of thel niteld States respect and fair treatnient among the peoples of other countries.
The enartment of legislation which will empower the Fevleral government to enforce treaty promises made to other countries withla every State.
Such changes in the monetasy and lianting iaws as will insure a greater elasticity of the currency.
The enactment of a law providing for puctal savlngs banks.

The enconragement of American shipping throngla the use of mail subsidies.

A continuation of n ork on the Panama raval along the plans which have been adopted for a lock type with such energy as will hasure the earliest poscihle eompletion of the work.

The continuation of a colonial policy which wlll sthi further lorrease tilu business prosperity of our dependencies.

The promotion of legtsiation for the protection of labor aud the betterment of labor condl. tions.

On the day foliowlog his Inaliguration tite Preskent named his chosell Cablnet to the Sen. ate. and the nominatlons were duly contirned, gs follows :
Phllander C. Knoz of Pennsyivania, to be Secretary of State.
Franklin MaeVengh of IIlinols, to be Seerecary of the Treasury.
Jecob M. Ilckinson of Tennessec, to be Secretary of War.
George W. Wickersham of New York, to be Attorney (ieneral.
Frank II. Ilitelicock of Massachusetts, to be Powtinaster-General.
George von L. Mryer of Massachusetts, to he Secretary of the Ninv.
Kielard A. Hallinger of Wishington, to be secretary of the luterior.
James Wilison of Lowa, to be Secretary of Agrlenlture.
Charles Nagel of Missourl. to be Secretary of Commeice and Labor.
A few days after the appointment of the Cabinet, Mr. Dickinson, the new Neeretary of War, in a specela at Chiearo, explained why President Taft had elensen him, a Democrat, for a place in a ilcpublican Cabinet, and why he had necepted it. He sadd tlat Mr. Taft, as Iresident of the whole country, desired to have a representative of the South among his eousgrllors. To liave chosen a sonthern irepublienn would have heen to perpetuate the bitter seethnalism which it was Mr. Taft's desire to obliterate. He hai therefore chosen a Demoerat who had roted against him. Mir. Pickinson coutinued: -
-That his purpose was broad, magnaulmons, and patriotie none eun question. The wislom both of his purpose and his selection must be tried hy time, but I have every assuranec that liis action in appointing me, and my aetion fin accepting, are approved by the souti, and, havlar this approval, I can hear with equanimity any eritleism from individuai lhemocrats elsewhere."

A. D. 1909 (March-Ang.). - Tariff Revision. - The Payne-Aldrich Tariff-Act. See (in this rol.) TAniffs: I'sited States.
A. D. 1909 (May).-Creation of the Senate Committee on Puhic Expenditures. - An important incident of the Sperial Session of Congress whieh was ealled by l'resident Tuft immediately afier his lasuguratlon, was the creation hy the senate of a new standing Committee, on Publie Expenditures, the fanction of which was indicateri in the following resolution of the S.bate, alopted May 29 :

Resolved. That the Conmittce on Publie Expenditures be, and they are herehy, authorized ind directed, by suhcommittee or otherwise. to make investigations as to the amount of the anunal revennes of the Govermment, aml is to the expenditures and husipess nethorls of the sev. eral departments, divisions, and branches of the Government, and to report to the Senate
from time to time the resuit of such Investigations and their recommendiatinns as to the rela. tion between expenditures and revenues ani possible Improvements in Government meth. ods: and for this pirpose they are authorlzed tr, slt, hy subcommittees or otherwise, Juring the recesses or sesslons of the senate, at suc? thmes and places as they may deem adrlsatite, to send for persons and papers, to administer oaths, and to emplos such stenographle, elerical, expert, und other assistance as may be neecssary, and to have sucll printing and bind. Ing done as may be necessary, the expense of sucil Investigations to be palil from the contle. gent fund of the serate."

Seven memhers of the Committee are the cluilmen of the seven commlttres In the Senate to some one of whill every bill provirling for rerinue or carryling an appropriation is submitteri. "Thus," as has been remurked, " is provided a medium for heter eo ordination and co-operation hetwern what may be termed the reveque and 川!propriation commlttees. The powers of existiny conmiltes are not affected. but an avenue is provided for concentration and distribution of information - a committee fo. rum for the diseussion and recommendation of fumbanentale affecting the (iovernmunt."
A. D. 1909 (May). - Estahlishment in the Government of a General Supply Committee. - On the 13th of War the President isilned an Executive Order establishlag an Alministrative General Supply Committee. which is to purehase all supplies for Government tue, paying one price instend of several prices for the same supplies.
A. D. 1909 (May). - Second Nationai Peace Congress. Nee (lil this vol.) Winn. Turilevolir alialinet: A. D. 1909.
A. D. 1909 (July). - Proposed Constitutional Amendment authorizing the Levying of an Income Tax. - Without a dissenting vote, on the ith of Iuly, 1009. the senate adopted a joiut resolution providing for the submission to the several States of a proposed amending to the Constitation of the Luited states, as follows
"Article XVI. The coneress shall have the power to laf ind eollect taxes on ineome from whatreer sompe derived, without an: apporthonment amoug the several states and without regard to any cornals or entmeration."

It reportiug thls action, a newspaper corre. spondent of considerable sigacity renarked that the ease with which the resolition glited through the senate, and would with certainty pass the louse, must be remerted as "an indication of the expectation of the representatives of capital and of high protection that tweive stites can he found among the fortr-six in the union tor refose their assint to the rmendment. in which event it will fail."

The endorsement of the House to the resoin. tion was given on the 12th. by a rote of 317 to 14. the nurative votes heing all from Republicans. An attempt to have the resolition amenied so that the constitutionai aniendment Fould be submitted to state conventions for ratitieation instead of to legislatureswas ruled ath of enter, ant an apreal from Spraker Con non's ruling was voted down, 185 to 143 , ou a striet party division.

The first State to aet on the proposed amend-
ment wes Alshams, where it was ratified by the Leglslature and signed by the Governor, August 17.

In the State of New Iork, on the 5th of January, 1910, Governor Ifughes addressed a special message to the Leglslature, recunimending that the amendment in fts proposed form should not he ratibed. Ile satd: " am in favor of collferring upon the Federal government the power to ay and colleet an lncome tax wlthout apportionment among the Stites according to population. I belleve that thls power chould be beld by the Federsl government to as properly to equip it with the monans of meeting national exlgencles.
" But the power to tax licomes should not be granted In such terms as to silbject to Federnl taxatlon the incomes derived from bonds lasued by the state itself, or those lsaued by municl. pal governments organized under the State's authority. To place the borroving capucity of the State and of its goveruncutal agencles at the mercs of the Fivleral taxling power wonld be an impairment of the esscutial rights of the State, whith, as lts oflicers, we are bound to defind.
"The comprehenslve words, from whatever souree derivel,' if tuken in thelr uatural sense, would include not only Ineones from ordiuary real or personal property, but also bicones de. rived from state and munlcipal securitles. It may be urged that the amendment would be limitel by constructlon. Hut there can be no sutisfactory assurnace of thls. The words In terms are all-lucluslve.

- In order that a market may he provided for State bonds, and for municlpal londs, and that thas meaus may be afforded for state aud local uiministrution, such securitles from the to tlme are exceptel from inxation. In this way fower rates of interest are paid than otherwise would le possilite. To permit such securitles to be the sulbject of Federal taxatlon ls to place such llmitations upon the borrowing power of the State as to make the performance of the fuuctions of local government a matter of Federal grace."

A. D. 1909 (Sept.). - Visit of a Commercial Commission from Japan. Sec (iu this vol.)

A. D. 1909 (Sept.-Oct.), Tour of President Taft. - Meeting with President Diaz on Mexicen Soil. - In the fall of 1909 l'resincut Taft made an extenden tonr of the conutry, Prom New Englaml to the Pacifce Const aud southward to Mexico and the Gulf, speaking to great assemblies at many points on hil the ins. prtant questions, political and economleal, that were then before the country. In the course of the tour a meeting between I'resident Dihz of Mexico aud himself was arranged, and tonk place on the 16 th of Octeher, tirst int El Paso, on the Trexas side of the lio Grante, nom then at Ciudal Juare\%, on the Mexicanside. formal visits being thas ixehanged. Fiually, in the evening, President Tift was entertaned at diuncr in the slexican clty by Presldent Dinz. This was a second time ihnt a Presllent of the Uuited States liad left the soil of his own
country whlle in office, Preaflent Roosevelt har lag done the amme at Panama in 1006.
A. D. rgog (Oct.-Nov.). Further Disclosures of Corruption in the Customs Service. - The siamefui disclosure in $1900^{-4}$ of Sugar Trust frauds on the Feleral Treasury (ace Combinationa, Induetrial., fec, : 'niteis DTates: A. D. 1007-1009) affordef glinupaes of a state of corruption in the Cuntoms Airvice of the Government, at the port of New Yirk especially, which were nore than veritled wihh lu the next year and a half. The Collector if Customs, Mr. Willam Loeb, Jr., who took charge of the New liork offlee hi the spring of 1009, exereised a wratchifulness whith soon jint hlm on the traces of frand, and he pursued thin witi an encrgy ani determimulon that camot bave been brought lato action before. 'The lint case brought to ilght was that of it cherese im porting firm, the nembers of whleh, father sul son, were lound to have pald bribes to weigherg of the Custom Ilouse fur false reports of the quantitias on whlch ilutle were pud. Convie. tion was whtained liv means of evlilence from some of the guity offlals, who were given immunity and retalued $\ln$ service, in order to se eure informatlon without which. It wis sill. the well covired corruption In the servlee could not be succersfully prohed. In bls ntunall re. port, made In December, 1909. Secretary NacVeugh, of the Treasury Department, lad thin to say of the vlgorous reformatory ineasures thas unilertaken at the port of New Sork, und of the blguitlcauce of the consequent revelations:
"The revelathons made and proven wore an startling aud impresalve that opposition was silenced; and $\ln$ this sllence the neceswary clearccit measures could be carried out without miveting serious olsstructions.
" It soon developed that the frauds of the American sugar flefining Company, while, per haps, the most hiportant Instances, were as had been apprehented, symptoms of a diseass d con ditlon, not unlversel hy any meaus, but almost gencral. And diffenlt as It always is to suff. elently bring to light the facts of such a condi. tion to afford a basis for rehnbilitathon, this has been already largely accomplished. Mnch has been discovered to afford un understaming of the situation, with the result of 1 . imerous spis. ures, of numercas prosectutions nade or pro. jected, and of Important aud suceessful lieghanings of a complete rohabillation. While the recovery of evided eluties, nul the proseru. tiou of hulividunls have beeu of large sifnit:. cance, the greatest nsset to the government of these disgrareful comdltous ls the knowledic: and the light whieh gnarnatere in thate a wholesome reorganization.
- The study of the canses of the demoraliza tion which has heen revealed is still incumplete, but the maln causes are evident. It is clatr, for iustance, that the intiuence of local politics and politicians upon the customs setrice lits been most deleterions, and has promoted that laxity and jow tone which prepare and furninl an luvitheg solif for dishonesty nad fraud. C"nlew the customs servlce ean be reloased from the puyment of politicnl delots amb cxactions, and from merting the supposet exigencies oi puliti eal orgaulations, big aud little, It will le lmpossible to have an honest service for any lougth of time. Any considerahie share of the prestut

## UNITED STATES, 1009

cost of this denoratization 40 the puhile reve. nues, to the efliciency of the service, and to public and private morality is a tremendons mount to pay la mere llquidation of the manl debts of polltical leaders.
"It is alw, clear that the widespread disposithon of returning American travellers to evale the payment of legal dutles has greatly helped to create the condltions which have become intul. erable. Those Americuns who travel birond belong to the sectluns of the people which most readlly crente public sentiment, aud are most responsible forlt; and the fact tbat la momany Instances these travellers are wlllhig to dcfraud the government out of conshlerable or even small sums crentes an atmosphere on the locks that atrongly tends to affect the morale of the entire customs eivice. And when to this is added the frequent willingness upon the part of theme responslble citlzeus to speclfically corrupt the

UNITED STATES SENATORS: Proposed Election by Direct Popular Vote. --On I Decumber 3,1805 , the State of Ilalio, taking dvantige of that provislon of artlcle 5 , wbich permilts States to apply to Congress fur authority to hold a constltutional couvention, pansed a resolution reguesting Congreas to call such a conventlon. Since then the States of Wyoming, Ohio, Minnesota, Jontana, Litah, Vurth C'urolina, Nortli Dakota, Nevada. Washington, Tpnuessee, Fouth Hakota, Colorado, Origon, Mlchigan, Nehraska. 1owa, Kansas, Missourl, Illinois, Wisconsln, New Jersey; Louislana, Oklahoma, Prunsylvanla, Indiann, Texns, Culifornin, Arkansas. Kentucky, uud Aluhama, bave taken leglslative actlon fin siome form or other expressing either a demand slmilur to that of the state of illuho, or a sympathy with the intent of the Idalo reso.ution. These thirty one fitates form a constitutlonal two-thiris of the forty-six States of the Union.
"One of the complications which have arisen in connection with these resolutions is the fuct that only twenty-four of them nre of record as laring been actually recelved by the Scnate of the Cnlted States. One of them, that of the State of Ohbo, which was the thirl State to act. was only recently discovered to be ln the sicnate files. It is possible therefore, thint slnce the question of submitting the proposed amendment las become $n$ live issue, $n$ further seurch of the filis may Increase the number of State resolithons on this subject which ure actually on hand.
" A legal quibble is bound to ensure over the form of some of these resolutions. Nine of tbe resolutions now on tile in the Senate are alrealy lield to be of doubtfut legality, but the gromid un which they are beld doubtful will appenl to must poople as a mere splitting of legal hairs, Nierortheless, the senate of the Uniterl states, at least, is, as n whole, a notorious legal hair. splitter, and this fact must be taken into ac. count.
"It Is. of course, a matter of recorl, that the linuse of Vepresentatives has four times sent to thr. Senate a proposed foint resolntion calling for the direct election of United States Nenntors,"

VENEZUELA: A. D. soos, - Claims and Complalats of Germany. - Memorandum presented to the Government of the United States, - Its Reply. - Interpretation of the Monroe Doctrine. - On the 11 h of Ihcember, 1901, the (ierman Embasay at Washington pre. sented to the State INepartnent of the (iovern. ment of the C'nited Ntates a memorandum of the clalms and complaints of Germuny aguinst the Government of Venezuela. The prineipal clalm recited was that of the $13 e r l i n$ Company of Diseonnt, "on account of the non-performiance of engngements which the Venexulan Government lias andertaken in eormection with the great Vencamelan Railwy which has bren huilt by the sald Government." In reapect to this It ls fomarked that the "helinshome of the Veneruclan Government eould, perhaps, io a eertaln deprec, he explainelad be excmad by the bend sltuation of the tinances of the State: but our further richamatons agalns: Venezuela. whileh date from the lenequelinn eivil wars of the years $18: 1 \mathrm{w}$ mintll 1000, have taken during thise last monthe a more serfons character. Throngh those wars many Gernan merehantw Ilving In Vencruelia mad many German land. owners have bern werinusly danagel': ond the treatment of elames for thene damages is charactorleed as "a frivolons attempt to avoirl joist whligations." After some reeltal of clrchmetaners in these eases, the memorandum proceeds to amonnce that "the innerial Gorerument helieves that further negothatlons with Veneruela on the present hase are thopeless." and that measures of coercion are eontemplated. - But we emaslder it of importance to let first of all the Goverament of the Cnited States know alout. onr purpuses, so that we ean prove that wr have mothlng eise In virw than to help those of our eltizens who hare suffered damages.
We dochare especially that under no elrenmstances do we eonstier in our proceedings the acquisition or the permanent occupation of Venezuelan territors.:
In reply. the pepartment of State peturned a memoranilum. In part ns follows: "The Prestdent In his Messure of tne 301 of Necember, 1 1:H11, used the following langunge: 'The Monrue Doctrine is a declaration that there must he no territurial argrandizement hy any nomAmerima lower at the expense of any Ameri. can lower on Amerlcan soll. It to in no wise interided as hostlle to any nation in the Ol. 1 World.' The President further sald: 'This doctrine has nothing to do with the commercial relations of any Amerienn Power, save that it

In truth allows each of them to form such as it demiren.

We do not guarantee any sate againat puniahnient if it miscunaluctil itelf. firovilled that punlahment does not take the firm of the neyulstion of territory hy any un to American Power.

The l'resldent of the United states, appreclating the courtesy of the Gernuan Government in makir.  rus lount in ch jevintrid! or thas …en. urt $n$, ain of two : llar of whateser F nitatromse to be due owers already ainst her had
resulted in a state of war, but also to the C'nlted Staten, France, Spaln, Bolginm, the Netherlamis, Sweden and Norway, and Mexico, whos lini not employed force for the cullection of the clatma alliged to be due to certaln of thelr cltizens.

A demand wes then made by the er.called blickading powers that the sums ascertalned to in due to thole cltizeni by sueh mixed commls. sions should be aecorded payment in fill before anything was puld upon the clalms of any uf the socalici peace powers. Veucaucla, on the other hand, Instated that all her credltors sitould be pail upon a basis of exact equallty. During the effurts to adjust thls diaputi. It was sirg; sested by the powers in Intereat that it should be referred to me for deelaton, but I was cluariy of the oplalon that a far wher course vinulif be to subult the ifuestlon to the Iermanent Court of Arbltration at The Hague. It seemed to me to oflire an admirabie oppertunity to alvance the prartice of the peaceful settle nent of disputes between nations and to seeure for the Hague Tribunal a menorable Inermase of lis practleat lmportance. The nations luter. ested ln the controversy were on mamerons amil In many Instances so powerfal as to make it evi. ilvat that berefleent resmlts would follow from their apprarnnce at the mane the before the bar of that alogust trltunal of peace.
"Our hopes in that regard have been real. 1hed. İussis and Austrla are representenl in the persons of ilie Iearnull and distlagulshed jurlsto wito contpose the Tribunal, whille Grrat Britnlu, Germany, France, Spaln, Italy. Ik.l. ghem, the Netherlanis, Sweden and Norway, Mexico, the Cnited States, and Vencoucha are represented by their respective agents and coun. sel. Such an imposing concourse of nations presenting thelr arguments tin and luvoklig the decislon of that high eourt of International jus. the and internatlonal peace ean harily fail to seenre a like subuisston of many futire contri. verstes. The nutlons now appearing there witl find It far easler to appesar there a secumil time. while uo nation ean lmagine lis just prile wili be lessened by following the example now presumed. This triumpli of the privelpie of Interna. thanal arbitation is a subjeet of warm congratu. lation and offers a happy augury for the peace of the world." - Missage of President limsacelt, Der. T. 1003.

The claims of the l'owers aguinst Venezuela, presented in September, minmel up as follown: France, $\$ 18,040,000$ : L'nited States, $\$ 10,900,000$ : Italy, $89,300,000$; Belginm, $83,003.0000$ : Great Brlain, 82.500 .000 : Germany, $81, \$ 1 \% .300$ : IIollitnul. 81,048,4i1; Spaln, 8600,040; Nexico. 8. 100,000 : Sweden, $\$ 200,000$. Tbe claim of Great Britaln, Germany, and Itajy to a riglat of priority in payment, because of their action which compelled the Government of Veneathela to arrange a scttiement, was sibmitted to the Tribunal at The Ilague in November. The decision, rendered la the following dunuary, atirmed the right of the three Powers witheh ham exercised coercion in the case to priorlty In the payment of thelr clalms, and it fmposed on the Enited States the duty of overspelng the fultiment of the agreements whifh Venezmela Lut made. In this lust particnlay the becision of the Tribunal could be regarded as nn internationa! affirmatlon of the Monroe Doctrine, and of signal importance in that vicw.
A. D. s902-8905. - A short Period of Comparative Tranqulity, - "After the block. ade lustituted In Derember, Imra, by (ierinany, Gruat Britaln ami lialy, lial been ralsen, anit protocols hal been migued for the settienurnt of all duly recognifed elastas of forelgn nations agulant Veucousho, Vonezuela enjoyed a short perinal of tranquitity: but, by the beglaning of 18us, every lesathin in farucas had a liat of grfevances foumded on atioged unfolr awards of apbltrators, on tenials of justlee on the jart of the lenczuchon courts anif on the ilmantion by I'teshdent Ciastro of the pereentage he had agreed to pay to the criditor tuathas from the recelpts of his custom homses. Moreover, Germany nad Grest liritatn began to show signs of restlessness, beranse l'realdent Castro had not proviled, as had lecen agreed in tho protocols. for the fayment of finturent to lsritish aml Girp. man bonfhohlers. The situathon tookel even worse than tefore the blowkule, for the birinef. pal uaton aggrieval whs the l'ulted statem, and It hai the moral support of all other mattens representeal in ('aracas by fucat dota.

- The main Issue betweet the United States and Venezucja was the nophate care. In July, 1944. I'rosident Castru hal demandet ten mili fion doltary from the Amerlean Company,
 phalt ('ompany;' 'ull had threatuned. If that anmunt was but padd immellutely, that the whole awhat lake ami the property of the Cona. buny wonlli be selzed. Ite hacel his semand on the no.ergeal support giver by the Auphait ( $\quad$ ompany to the Matos revoluthon of 1 inte: but, as he dif not demand anrthong from the eomat. less other mpportire of ther revobition, It was elear tbat his debuad on the Inphalt (ompuny wias pirathat."-II. swept lt on to the Adriatic nud Iontenegro. At this the the lava which reached Torre Anninzalato was erupted. Tbe decrescent pbase began on Aprli 8, hut the collapse of the cone of the principal crater was accompanled by the ejuction of steam and dust to a lieight of from 22,600 to 26,000 feet. On April 0 and 10 the wind was northeast, and the dust was carried over Torre del Greeo and as far as Spain ; but on Aprif 11 the cloud was again lmpelled northward. The ash in the earlier cruptions was dark in color and made of materials derived dircetly from the usnal iype of lencot phitle magma; but later it hecame grajer nal mixed with weathered elastic material from the cone. The great cone bad an ulmost hori:outal rire on April 18, very little higher thm Monte Somma, and with a crater possibly ex. ceeding 1,300 feet in dlameter; thls cone was ulmost snow white from the deposit of subllnutes. Many dentlis, Professor de Lorenzo states, were the to asphyxla, but the collapse of ronfs weighted witb dust was a sollrce of much danger, as was the cuse at Pompeli in A. 11. 99 . The iava streams surronnded trees, many of which still stool in the hot lava with their leaves and blossoms apparently uninjured. The sea level during April 7 and 8 was lowered six inches near l'ozzuoli, and as much as twrelve inches near lortlci, and had not returned to its former fivel on April 13. The maximuin activity conformed aimost exactly with full moon, and ut the time the voleanoc's of the i'hlegratan Fields and of the islands re matued In their normal condition. Professor $\mathrm{d}+$ Loren\%o believes that this ermption of Vesnvins is greater than any of those recorled in bilstory with two exceptions - thuse of A. D. 79, the hlistorle ernptlon whlel destroyal Pompeit and lierculaneum, and of $16 ; 31$, wben Torre del firceo was overwbeinied and 4,000 persons per-ished."-Srientific Sotes and Veve (Science, M(1,y 25, 1906).
West Indies: A. D. 1902 (May), -Of Mont Pelée and La Souffrière, on the islands of Martinigue and St. Vincent.Destruction of the City of St. Pierre. - Thic most appalling catastrophe in the annais of the Western Ilemisphere is that which burst from the long torpil voleano of Mont l'cíe, overfowhing the clty of St. ['ierre, on the Frencli inlut of Martinique, and from its slimberiner noighbor, La Sonffriere, of the Britisli island of St. Vincent, on the morning of the 8th of May, 1902. The following particulars of the fright ful volcanic explasion are borrowed from a eraphie accomit peparel for The Amerimen Ficrier of Recieres ly W. McGee, of the Smith. gonlin listitution.

The outhreak of Mont Pcle scems to have leerusecond only to that of Krahatos in exploswe violence In the written history of the worlif. Nor was the catastroplic confined to a mimntain and a city, or even to an island: the towns and villages of nortbern Martinigue were levastated or ntterly destroyed as fir sonth warl as Fort de Franee, wbile the scant 400 square miles of the whole lsland wore at once shaken from beiow and sliowered from above "ith nneounted tons of hot rock- foiwder, scorch the what it touched, amb s!exolathy the tropicibl luxuriance of one of the falrest among the gems of the Antilles. It the sume thie the

Vulcanian spasm thrilled afar throngh subterranean nerves and stirred into sympathetic resurrection other long-dead volcanoes; und one of these, - La Sonffriere, on the island of St. Vin. ceut, over a hundred miles away, -sprang into balefnl activlty, ponred out vast shects of vlscid lava, showered land and sea with its own scorching rock powder, devastated another gem In the Antillonn nerklace, and slew its tbonsunds. The vigor of such voleanic ontbursts as those of Martinique and Nit. Vineent, and the vastaess of their problucts, are beyond realiza. tion. The governor of 13arhados, sir Frederlek Hodgson, estimates that 'two million tons of volcanle dust fell on lits island, which ls 110 miles from La Sonffiere, and still farther from Mont l'elée.
'About the midale of Aprll of the present ycar the luhahitants of Martinlgue and passing seafarers hegan to note the appearauce of 'smoke' about the crest of the monutain; and within a few days the report spreal that Mont Pelce was in an noly moxn. The smoky colabmen and clonds lacreased at intervals, and anxiety lecpened both ut St. Plerre and Fort de Frimec: but as the days went by withont obher manifestations, apprehension faded. On May 5. detonations were beard and a iremor shook St. Pierre. while a mass of muld was vio. lently ennpted from the whe erater. The Indi. catlons are that this ermption wis occasioned by the rise of viscons lava, accompaniod by steam and other gaves attending its formution, probably throngh the old vent, in sullecient quantity and with sullicient violence to blow the late out of the ancient crater and vaporize the water. Portions of the liva wem apparently blown intu (hast by the thashing into stenm of water int prisoned in its interstices. after the mammer of voleanic ejecta gemerrlly : and this materi:l (butter ealled 'lapilli' than 'ashes') hastemed condeusation of the aqueons wapor in the alr already overchared hythe adilition of that cast up from the late: The eonserpuence was a shower of mud, apparently of limited extent. Some of the aceonits indiente that the ereater part of this mind was not romited into the air but that it welled up in sucb wise as to fill and overtlow the old erater, and woul scahling streams down the gories seaming the rigeged sides of Mont lehee: one of these thomberl a shrar factory and envelopel a score or more uf the employess; otbers ningleal with the rivers, converting thoin into hot and muldy torrents, carrying destruction down their channels to thi sem. . . . So matters reved, with leelée stlll grambling, until the eveuing and night of May 7. when the hilick vapureclounts and snbterra. nean groanings grew more terrifying : but it was too late to escaje before another thy.

Ahout $: 550$ a M. on May 8 cance the great shock, of which that of May was the precursur: and within ten minutesst. I'ierre and the smaller towns of Martinigue were in mins. Few wit nesses were left to disoribe the event, and the accounts of these viry wo whlely as to repuire interpretation througli the testimony of other witnessers of similar cruptions elsewher" Briefly it seems evilent that the lava mins. "f whicli the mpermost portion exploned ou May 5. had contminel to tisa in the vent after thi temporary shock the to the recoil of the int ant explosion, and that by the morning of liay s it

## VOLCANIC ERUPTIONS

## vULGate

had reached such a helght in the throat as to find rellef from the stupeudous pressure of the lower earti-crust. Coming up with the high teniper. ature of suhterranean depths, the mass was, llke other rocks in a state of nature, saturated with water held in llquid state hy the pressure, and charged with other mineral suhstanecs ready to flash into gas or to oxidize on contact with the sir: and these more volatle minterials, belng of less density than the average, were more abundant in the upper portlons of the mass.
"As the viscil plug of red hot rock forced its way upward, the mighty mountain travalle $l$, the interlor rocks were rent, and the groanlug and tremblling were conveyed through the outer strata to the surface and strange shakings of the shores and qulverings of the sea marked the approach of the culmination. Then the plig passed above the zone of rock-pressire grent euough to compress steam into water whitsoever the hent, - aud with thls relief the liquid flashed into steam and the superheated rock. matter into gases, whlle the unozidized eompounds leaped iuto flame and smoke ss they canglit the oxygen of the outer air. The lavn wis probably acidle, and hence hlghly viscous; and when the linprisoned droplets of water expanded, they formed hubhles, or vesicles, of ten much larger than the volime of rock-mntter: douhtless some of this mitter remaius in the form of vestcular pumice: hut unquestionably immense quantities were hlown completely into fracments represcoting the wnlls of the bibbles and the angular spicules and thickenings ix. tween buhbles. Of these fragnients lapilli, or so-called voleanle ashes, consists; and the Mont Pelée explusion was so violeut that much of the matter was dust-tine, and drifted huodreds of mlles hefore it settled from the upper a. to the sen or land helow. When the imprisoned wner burst into steam, the heavier gases were evolred, also, with explosire violence: and while the steam shot skyward, carrying lupill in vast dust-clouds, these gases rolled down the slopes, hurning (at least in part) ns they wout: and at the same time the henvier lava frngments, together with rock-inasses torn from the throat of the crater hy the viseid flood, were rlropped for miles aronial.

- luth press dispatches and pliysical principles inrlieate that it was the debarle of burning gas that consumed St. l'irrre even hefore the rid het rocks renehed the roofs and balconies. Meantime the aerial disturbance was marked by elhetrical discharges. Witt continumis peal of thunder and slare of lightning. while 1 . itlons of the hot rock-powder were wslied down from the clouds ly sculding rains. The heat of mitllons of tous of red-hot lava nad of the carth. rendlug explosion, ns well ns of the hurning pases, fell on Martinigue: green thlugs crumbled to black powiler, dry wood fell into smoke and ashes, clothing flashed Into flame, and the very bulles of men and heasts hurst witl the forvent herat. Such, in hrief, were the evil erents of Pclée and St. Pierre for May 8."

Sinultaneonsly, on St. Vincent's Isiand, the outbreak of La souffière occurred that day. "The accounts are vague or conflictling as to the hour amd as to the precise nature of the lalthal and later throcs: ret it mould apprar. from the huriden of the testimony, that the outbreak quickly succeeded that. of Pelée. Appareutly,
too, the extravasatlon of rock-matter, both of llquid and lava, ezeeeded that of the horthern neighbor: yet the lodicatlons are that the explo. sion was fechler. and that the formation of gases was proportionately leas ahundnut. Layilifiare reported to cover the entire $i$-and to depths rangling from an lnch or mort tu several feet. several roofs, - like those of Iompeii of oht, being crushed in hy the welght; the estimates of human mortality ranged from a few hundreds In the early reports to over two thousand, and were afterward alightly reduced. while the th. struction of property seems to have been rela tively greater than on Mnrtinlque. So far as the accounts of the two outhursts go, they indicate that the Pelée erupton was primarily an exploslon due to the flashing of water and onber gases on rellef from pressure, with nttembint heat and metcorologie dlsturhances, followell ly a limited nud qulet outflow of lava from the deeper nnd drier fortion of the lafa plaki lmit that the npwelling lara of Soufiriere was in some way nuarer equilihrinm, - perhaps drier. perhaps cooler, perhaps from less depth amt pressure, - aud hence poured out in broad sheets of viscid rock-matter, likened by solue ohscrvers to hurning sealing wax.
" Such, In hrlef, is the recorl of La Sonfricre on May $y_{1}$ - a record that wuuld have appallat the nutlons had it not heen eclipsed by the ghastly tale of Mont l'elée nat St. l'ierre.'

In the case of St. l'lerre almost the entire population had remained ln the town, not sufticicutly warned by the ontbreak of May 5 , and was, in consequence, desiroged. It is estimated that 30.000 perople perished in or near that town alone. Death come to them almost iustantaneoucly, - not from the tlow of lnvu ar the show. ers of hot ashes that fell to the depth of probaigs two feet, but from such a ticecerorrent of burn. ing gascs that men hreathed flautes instend of alr.

On the Eiglish island, there was no hure town cluse to the mountain, and therof.w : ant as great loss of llfe as in Martiniqu two thomsand persons in the rural their lifes. These were hurncl tuw saml or were killed by lightning, thes sulforation, as ln st. l'ierre. A laye fell orer the entire island, and in the northe:materd port the land was lonried in ashes ant stanes to the denth of elgliteen inclies. As a ronsequence, all the crops were destrovel.

Repented outbrenks of loth . Vont Pelée and La houfiriare ncourred at intervals during more than a year foilowing the great explosion. alding mucli to the destruction of the meuns uf liv. ing on large parts of the lslnnels amd to the mis. ery of the inhahitants remalning lu the regions affectel, though not greatly to the loss of hife. Of the rellef $\ln$ money and supplies from s!l somrces that was poured into the two allicurt islands no full reckoning can be ohtained: but the Governor of the Windward Islands repurtest to the Colonlal Office at I.ondon on thre 2thth of , lume, 1003, that total recpipts for the Erupton Fund to that date were 877.000 , and expunditures $£ 42,787$. "I slall have suflleient funds left In the Colony," he mlded, "to meet all present needs, unless sny further unforescen misfurtune takes place."

## WAR, THE PREPARATIONS FOR.

At Large: Contradictory Feeling and Action in the World. - Its Causes. - International Barbarism with Inter-Personal Civilization. - The Two Main Knots of Difficulty in the Situation. - The British and the German Posture. - There was never before in the world so wide-spread and so passionate a hatred of War, among civilized peuples, or so earnest and determined an codenvor to supplant it by rational methods of cominsing Internationnl disputes. At the same time, there was never ay frenzied a rlenlry of preparation among the nationa for Warfare, by monstrous accumulition of its horrible engiacs and tools. How can the glaring ineonsistency be accounted for without lmpeaching the generill sanlty of mankind?
Fhe strangencss of the situation was de suribed nost graphically and feelincly, not hotic sfince, by Lort Roschery, In speaking nt a hanguet given to the dolegates attending the Isritish Imperial I'ress Conference. at London. in June, 1!א19. abd his own feeling that went into the description of it afforls an explamation of the anomaly. "I do not know." said the eloquent Earl." that in sume ways I havc ever sten a coudition of things in Eiurope so remarkable. so peacefirl, and in soure respects so oml. nors as the conditlon which exists at this moment. There ls a lrush in Europe. a hush in which yon may almost hear a leaf fall to the ground. There is an absulute absenee of any flections whith orlinarily lead to rar. One of the great Empires which is sometimes suppoised to mentrc peace is entirely engrossed "ith its own internal affalrs. Another great Eastern empire which furnished a perpethal problem to statesmen has taken a now lease of life and youth in senrching for constlational peace and reform.
' All forebodes pace: and fet at the same tinc. combined with this total alosence of atl questions of frietion, there never was in the hlstory of the world so thereatening and so overpowering a preparation fur war. That is asign which I confess I regartl as most ominous. For 4) years it has been a platitude to say that Enrope is an armed camp, and for 40 yenrs it has heen true that all the nations have been facing earh other nrmed to the teeth. and that has been in some respects a guarantee of peace. Now, what do we see? Without any tangible reason we sce the nations preparing new armaments. They cannot arm any more men on land, so they have to seek new armaments upon the sea. piling up theae enormous preparitions as if for sume great Armageddon-and that ln a time
of profoundest peace. We live in the mildst of what I think was called by Petrarch tacens bellum-a sitent warfare, In which not a drop of hlood is shed in anger, but in whieh, how. ever, the last drop is extraeted from the liviug body by the lancets of the European statesmen. Therc are features in thls gcueral preparation for war whieh must cause special anxiety to the irlcuds of (ireat Britain and the British Em. pirc. but I wlll not dwell upou these. I will only nsk yon who have come to this, country to compare carefully the armmanents of Enrope with our preparitions to meet them, and give your impressions to the Empire in return. (Clrecrs.) I mysself fecl contident in the resthtlon and power of this country to meet any rasonable cominnction of forces. But when I se this bursting out of navies everyshere, when I see one country alone asking for 2.5 millions of "xtrataxation for warlike preparation, wheu I see the absolutcly unprecedented sacrifiees which nre nsked from us on the same ground. I do begin to fecl iיwasy at the outcone of it all and wonder where it will stop, or if it is nearly going to bring lack Europe into a state if burbarism, (hear, hear), or whether it will cimse a catastrophe in which the working men of the world will sar, 'We will lave no more of this madness. this foolery whieh is grinding us to powder.' (Checrs.)
" We can anl we will build Dreadnoughts or whatever the newest type of ship mar he (loud elecers) - as long ns we trave a shilling to yiend on them or a man to pit lnto them. (loud cheers.) All that we can and will do: but 1 am not sure that even that will be caough, and I thlak it may la your duty to take brick to your young domintons across the seas this message and this impression - tbnt smue personal luty and responsibility for national defence rests on crery man anil cltizen. (lonul and prolonged cheers.) Yes, take that message back with you. Tell your people - if they can belicre it - the deplorable way in which Europe is lapsing into nillitarism and the pressure which is put upon this little island to defend its llbertics - and yours. (Cheers.) But taiie this message nlso back with you - that the old conntry is right at heart, that there is no fniling or wcakncss ln heart. and that she rojnices in renewing her youtb in her giant domlulons beyond the seas. (Loud clreers.) For her own st:lvation she must look to herself. nud that failing her she must look to you. (Cheers.)"
llere, in the feeling of one superlatipely cirllizel man, is the feeling of more than half the world epltomized. It sturinks with horror from

## WAR, TIIE PREPARATIONS FOR

the enormity of preparations that are "as if for some great Armageddon," and slindiers over what seems to be "searly going to bring baek Europe into a state of harhmrism" ; int susplclon, distrust, fear impei it nevertheless, to cry with iord llosebery: "We can and we will build Ireadnonghts as fong as we luve a shilling to spend on them or a hima to put into them - br ause others nre building thens who may use lem uguinst us." There is senselessness in thls predicament of mind, but it is the senselessgess of a perslsting internatlonal barbarism, which 1 - - bis nation-ncighbors still standing in attitude coward one another whieh heeame fooiisliness to indivldunl neighbors a thonsand yeurs ago. It means. simply, thent the society of na. tions is as burbarie as it wns when Englishmen and Normans funght at Sulac: and that it is only in little street aeighborkowds that men have urrised at the rational relntionships whel olfer an appearance of civilization in some parts of the world.

Two prineipal kaots of diffenty must be cut in some way, hefore un internptional eivilizatlon ean be developed, by the $n$ al and moral processes whielt haverivilized us interpersonally in some considernhle degree. The hardest of these knots is tighteaed upon England, liy the weight and the strain of her great world-wide empire on the little ishand to whieh it is bonm Nut only the whole exterior fubrie of British Empire, but the hare subsistence of the jeople of the small island at lts eenter, deponds on the uninterrunted use of the surrounding seas for trude nud travel between its parts. To lose freedom in that nae menns the downfull of Great Britain, not merely as so militant power, but in everything that enull carry leer past importnnee ato the fiture of the worlil. It means so much as this, beenuse the resnurces of the islind home of the mation, within themselves, are so small. There can be no wonler, then, that Faglishmen reekon nothing else so importunt to them man indisputable froe use of the sens. Nor ean there be wonder that they learned in the past to look on an inclisputable free nse of the sous us implying a mastery of the sea. Intil within the last generation or twoblis wis the sole fouditlon on which there romlel be sernetity in ocean trude That it remuins so still is the embtienm beliff of alt the Governments whieh put millions on milliuns into bigere and bigerer steelelad hattle. ships, ant of the pulties behind the tovern. ments, whichery with Rusebery, " We emand wo, will buid irradhoughts as long as we have a slilling tosiend ea them or a man to put Into them." Fingland a, Firs from the rest only in the imperativeness te her of whant is simply important to then. If sereurity in the use of the seas is still impossible of attalnment without the supremacy orer them of nu irresistible seapower, then Englami has justifications for the chormity of her mavnl armament which no other nation can remim.

Sn long as a majorlty of Englishmen feel eonstrninet to bedieve that their ovean trade is mate secure from bostile obstruction by nothing bit their mavil strengtit, ob lone they will strive to maintain a nary that shnil be eyual to the combined naving of nuy other two Powers; and so lonk as that "'rwo i'ower Standard" of liritish usenl policy remains inthexilute, it seems forhiclding to the lupe of a common agreement mong

WAR, THE PREPARATIONS FOR
the maritme nations to reduce their building of hattleshlips. Witl: wther Powers than Germaay there migit be possibilltles of sueh an agreement, even suhject to u concession of British naval supremacy, becanse of the excentionality of cir. cumstance in Engiand's case ; lut it is here that we conuc to the second of the two prineipal kaots of difleulty which binder the internsfonn eivilizition of the world, now so tiegrantls overduc, Germany, coming late, by a tardy nnification, into the natlonal career whlel the Geman people are entltled to, hy their energy of spirlt and enpaeity of hrain, is impatient ia the ambitlons that were repressed solong. Iier industrles, her commeree, her maritime under. takings have been pushed In the last generation, ngalnst the older eompctitions of Europe and Ameriea, with nn laprassioned determinatioa thint has won extraordluary triumphs on trery line. Hare, again, ins in the case of Engiand there is an exceptlonal exposure of the ation th those perils from war whielt the state of inser uatlonil barhnrism stili keeps in suspense. fier muny eltows so mnny close nelghbors in Euroue tinat nothing but a perfectly trusting frimulship or a perfectly orgunized reign of liw among them fan make safety for any. In the absence of both friendly trust and nuthoritative law, ther stami on gunrd nguinst each other in the twa tietle ecnenry ns they did in the tentle; but with nrms a hundred fold more liedish and at thon-sand-fold more ruinous la cost. Vnder the pres. sure of her long-pent ambitions and energies. Girmany has beaten ull her neighbors in this "u ia other telds of exertlou. She commiands the lest trined, the best organized, the best equipinal army in the wordl, nad stands ndmitedly the flrst ninong military l'owers. But military power does not give " world power," in the ac copted mesaning of that term, and Germang is impelled by all the strong notlves of our timi to nepuire that. She is eomneting with Finrlam In eommerec, in shipping. in exploitations of in terprise, everywhere, and she manifestly lupes yet to make goon the lateness of her coming into the field of colonial plimetion. By esorything in the prevalling theorl's of statesmanship. This culla for a development of naval power to mate the military ; and Germany has ben acalomaly ohedinnt to the eall, - so denlonsly that linemat
 (ierman nary has bern eiented su fast that the "twn power standard" of (Irent Britain hit- lis gi a of late to be a seriously ditlicult, burater a frightfully costly, navnl siandard to maintain Yet Englnad more than ever bolieves that she most miniutain it at any cost ; hembuse the strent nousness of the German navy builuling in-pires ber witt a new distrust. Ileace these two l'tw ersare settlng a new pnee to the inerease of navnl armament, all other Governments catchlng some infection from the new temper of suspieion and dlstrust whieh works in theirs.

And this, malnly, at least, is why the wopld is busler to-tiay than it was ever lusy before in buildug monstrous ships and guns nut lonrible Inreutions of a thousand sorts for bitule, while it loathes battle and war as they wore neser lonthed by mankind before.

29th of Mareh, 1009, when he said in Parllament: "Slr, thi martial spirit, I should be the iast to deny, has its place, and Its proper place. in the life of a nation. Thit the nutlon should tske pride in its power to resist force hy force is a naturai and wholeqone thing. It is a source of perfectiy healtily pricie to have soununcess of wind and limb andi physical atrength, and it has no unworthy part in the natlonai spirit. That I sympathlze with entirely, but I would ask the people to eonslder to what consequences the growth of armaments has led. The great countries of Europe are raising enormous reveuues aad something like one-half of them is being spent on naval and military preparations. You nuay enll it national in arance, that is perfectly true; but it is equally true that onc-lialf of the natloaal revenue of the great countries in Enrope is helng spent on what are, after all, preparitlons to kili each other. Surely the extent to whlch this expenditure has grown really hecomes a satire and a retlection upon elvilization. (Cheers.) Not in our generation, perhap: hut if it gres on at the rate at which it has recently Increasel, sooner or later? belicve it will submorge that civilizutlon The hurden alrcady shows itseif in nationsi eredit-iess in our nationall credlt than in the national credit of other nations-- but sooner or later, If it goes on at this rate, it must lead to national bankruptry. Is it to be wondered thint the hopes and aspira. tions of the best men in the leadiag countries arc devoteci to trying to find some means of checking it" (Cherers.) Surely that is a state. ment of the case in which, however attached a man may be to what I may call the martial spirit. he may at least see that the whole of Europe is in the presence of a great danger. But. Sir, no connt:"; alone can save thatt."
At Large : Lord Morley on the Responsibility of the Press.--spreiking to the lmpe rial Pross Conference, nt Lernlon, in June, 1909, ar: icfoniug tr the "rebarbarism of Europethe rattling hack into arms and the preparation to "arms." Lorl Morley said he thonght the i'ress was mor' answerahle jor thls than all the ministers, oflecers, and diplomatists taken to gether, and le ploaded for a systematic and persi cering work ou the part of newspapers in hehiali of peace umong the nations.

## Dilitalis

Average Cost of the Armies of the Great Military Powers. - In his report on the French army budget of 1909 M . Gervais made a calculation of the average military expenditure of the sis Powers-nancly, Russla, Germany, Fraace, Austrla-Hungary, Italy, and Ja, inn, which can molilige the iargest armies, and found the total amount spent annually to lie no less than 5.037 million franes (more than $\$ 1,000,000$ ). (0m), and the number of men which they eouli put into the ficld to be $31,700,000$. The army whlch England can mohilize eomes seventh, and is riven as jnto, 000 men, though her avcrage annual expeaditure is the same as that of France - n..mely, $i 00$ million francs $(\$ 140,000.000)$. Comparing next the expenditure and the effectives of France and Germany, the report states that the German arme estimates show an inrrease in 1009 to 60 million frsurs, lwing fixed at $1,067,862,437 \mathrm{f}$, of whieh $838,037,151 \mathrm{f}$., belong to the ordinary budget and $229,825,226 \mathrm{f}$, to the extraordinary budget. The French army
estimates for the year were $742,443,745$ f. ( 8150 , 000,000 ). The totals on elther side were: Germany. 34,118 offleers aul 602,670 men; Fravee, 27,310 ofthcers and 511,030 men. The arerage cost per man in Germany is $1,308 f$. and in France 1, 150f.

Belgian Military Service Stiffened. - Substitution Aboliched. - Personal Service Exacted. - Conscription of a niid type hosexlsted in Belgium for some years, sulppeminted by voluntary enlistments and amcliorated by hired substitution, whlch releasel the well-to do from milltary service if they wished to esenpe lt. The Liherals and sochalists have for a long the been advocating the alolition of the practice of suhstitution in favor of a system of personal and univeral military service; and, iatterly they were joined in the demaud hy $n$ section of the Catholics. The question becance a dominant one in poiltics, and hrought about an cxtraordinary session of the iselgian Chanture in October, 1900, for discission of a comprelienslve neas. ure of milltary reform, for strengthenling the scif defeuse of the kingdom. It resulted in a dieelsion that "general personal scrvice restricted to one son per fantily shonld he introluced, that the annual contingent should he raised to $18.10(0)$ men, that the peace strength should stand at 48,400 , and that the eventual -rar strength should be 250,000 men. It was also ngreed that the ecrlesiastics shonld be excmpt."

Brazilian Military Service, -Service in the Brazilian army was made obligatory by legisla. tion in 1! 10 .

The British Territorial Force. - The Reorganization of 1907-8. - Lord Roberts' Criticism. - His Bill for Compulsory Training. - The voluntrer or militia furces of the CHited Kinglom, for home survier. underwent an important reorganization in $190 \%$, accordiag to the provisions of an Act entltlel the "Territorial and lheserve Forces Act," the gencral scheme of which mity be learned from the folfowing clanses, taken out of the text of the Act:
"For the purposes of the respataisition unter this Act of Mis Majesty's military forces other thau the regulars and their roserves, and of the admhistration of those forres when so reorganisel, and for such other purposes as are menfioned in thl\& Act, an association may be estah. lished for any countr in the Cnited Kingdom, with such powers and duties in connection with the purposes aforesaid as may he couferred on it by ur under this Act. Associations shitll he conslituted, and the memhers thereof slall he appointed and lowle office in accordance with schemes to be made ly the Army Comencil."

- It shall he the duty of an assoclation when coistituted to make itself acpuainted with and conform to the plan of the Army councll for the organisation of the Territorial Force within the county and to ascertain the millary resources and cambillties of the coutaty, and to render advlec andi assistance to the Aruy Council aad to such oflleers as the Army Council may direct, and an association sliall hare, exercisc, and dis. charge such powers and duties connected with the organlsation and administration of His Mafestr's military forecs as may for the tlme being be imansferred or assigned to it by onder of Ilis Majesty signiticd under the Land of a Secretary of state or, subject thercto, by regulatlons under this Act, but an association shail not have

## WAR, THE PREPARATIONS FOR

any powers of command or trainlag over any part of Ills Majesty's milltary forces."

- The Arms Councll shall pay to an assocha. tion, out of money voted by Parliament for army servlces, such sums as, in the oplnion of the Army Councll, are requircd to meet the neces. sary expenditure conuected with the excrelse and discharge hy the associntion of lis powers and dutles.

All men of the Territorial Force shall be nlisted hy such persons and Io such manner nud subject to such regulatlons as may be prescribed: Provided that every man enllsted under thls Part of this Act - (a) Sliall be enllsted for a courty for which an assoclation has heen established under this Act aud shall be appointed to serve ln such corps for that county or for an area comprising the whole or part of that couuty as he may select, and, If that corps comprises more than oae unit withln the county, shall be posted to such one of those unlts as he may select: (b) Shall be enlisted to serve for such a period as may be prescribed, not exceedlag four years, reckoued from the date of his attestation: (c) Slay be re-eugaged withln twelve months before the end of his current term of service for such t perion as may be preseribed not exceeding four years from the end of that term."
"Any part of the Territorial Force shall be liable to serve in any part of the Cnlted King. don, hut no part of the Territorial Foree shail be enrried or ordered to go out of the United Kiagdom. Providel that litsall be lawfulfor Il is Jlajesty, if he thluks fit, to necept the offer of any part or nien of the Territorial Force, slg. nified through thelr commanding otlicer, to subject themselves to the llabillty to serve in any place outslde the C"aited Kingdon."
"Subject to the provisions of this seetlon, every man of the Territorial Furce sball, by way of nnoant traning - (a) Be tralned for not less than eight nor more than fifteen, or ln the case of the mounted brach eightcen, days in every year at such times and at such ploces in any part of the United Kingilom ns may he preserlbed. and may for that purpose be called out once or oftener in every yeall: (b) Attend the number of drills and fulfill the other conditlons relating to tralning prescribed for hls arm or branch of the m.rvice"

- 11 is Majesty la Councll may - Order that the period of ainual training in any year of all or any part of the Territorial Furce be extended, but so that the whole period of annual tralalug be not more than thlrty dare in any ycar."

The King is empowered to mak- orlers with respect to pay and allowances of the Territorlal Force. as well as coucerning its government and disclpline.

Uider this Act the Territorial Force assumed form on the 1 st of A pril, 1908. The former organizations of Yeomanry and Volunteers were given until 30th June to transfer to the new Firce. The strength of the lcomanry and Vol. unteers on 31st March had been $0,1 \% 4$ ofllecrs anul $2+1,085$ men. On ist July the strength of the new Forre, including both transfers and reeruits, was about 8,000 officers and 176,500 men. Of these some 112,000 men had folned for one sear.

The latest publisked statement of the enrollment in the Territorial Force (that can he referred to here) wis made on the 26 th of April, 1909.

WAR, TIlE PREPARATIONS FOR

In the llouse of Lords. by Lord Lucas, speaking for the Governmeut, in reply to questions as to "how many of the 815,000 men requilred to com plete the Territorial Force had been enrollca up to date; how many of these now serving ia the force were under 20 years of age; what wis the lowest age at whlch they had been and were nuw accepted; and how many Territorials now sirv. lag had engaged for one year only." The answre was: "the strength of the Territorial Force un the first of this month was $8,98 \%$ oflcers out of nn establishment of $11,26 \%$, or 99 per cent. : sist. 524 meu out of a strength of 302,047 : or a tolai of 263,462 ont of an establlshment of 818,314 . which came out at 84 per cent. lu answer in the second question he was sorry that thiy hal not got later particulars than Octo ${ }^{1 \text { ner }} 1$. Ithm, but ou that day there were 188,785 men on the strength of the Territorial Foree of whom 02. 288 were under 20. The nuswer to the third question was that the llalt of age for men $\mathrm{f} u$; 17, and for buys 14. In nuswer to the fourth, he could not give the noble carl the actual numbed f men serving at the present time for ate sear. but the igures he could give would make it pretty clear. They had last year $107.85 \%$ ons. ycar men servlug in the force - Volunteers who had transferrill for one year. On April 1 list out of these $107,85 \%$ meu 50,938 had alrealy re. engaged for one year or more. That was to sity, that tbese men had signitled their intention of re engaging before thelr year was nctualiy up."

Lord Roberts has no conflence in thir alliciency of the Territorial Force, as a vohuntary organization. In a letter read to the llomer of Lords on the 17th of May, 190:9, when a motint expresslye of thls opinlun was to be made and he found limself unable to attend nad support lt jersonally, he wrote:

On July $10,1005,1$ sald that I have ao hesitation in stuting that our armed forces as a budy are' as nbsolutely unfitted and unpreparn! for war as they were in 1890-1900. Close upon four years have passed since then, nad 1 have no hesitation in reuffrming my convletion.

Subsequently Lord Roberts lutroduced in the llouse of Lords a "Sational Service (Trai"ing aud Home Defence) lisll", on which he sjwh" with great earuesturss ont the 12 th of July. llis Bill impused on all male subjects the oblization of serving in the Territorial Force betwecul the ages of 18 and 30 . excepting oflleers of the $\mathrm{H} \cdot \mathrm{g}$ ular and Reserve Forces, nnval and military nad some others; hut sabject to this and other moditications every purson who eame unter the Bill would be in the same position as a persou who voluntarily jolns the existing Tirti torial Force. The llability to training woull not extead over the whole term of servlee, lm: be llmited to four years. Tbe Bill prosided for ahsolute equality of treatment of all classis, na purchase of discharge or of exemption from wr vice being allowerl: but la the mater of training various exemptions were provided for.

The Bill encountered more upposition that support in the debate on it, and did uot secure a second real? ng .

Britis: Army Reorganization. - Creation of a General Staff. - Result of the Repert of the Esher Army Commission. - Work of $t^{\prime}$ 'se Defence Committee. - Speaking, In April. at the Impcrial Conference of 190i, Mr. 1lal.

## War, tile pleparations for

dane, the Secretary for War in the Britisi Ministry, gave a brief but ciear account of the reforms in the urganlzation of the Army which had been in progreas slace 1004. "The effect of the war in south Africa," hie said, "made a profound impression on the minds of our al. visers here. We renlized that we had gone into the war withont adepuate preparation for war on a great acale, and that we had never fulty apprehended the importance of the maxim that alf preparstion in tinie of peace must be preparation for war ; it is of no nse nniess it is de. sigued for that; It is the only justification for the maintengnce of araies - the preparation for war. In consequence, when the war whos over, the then Government set to work - aud the jresent Government has contlnuet to work to endenvour to put the modern military organs. zation futo alape, In 1004 a very important committee sat. It whs presided over by a civ. ilian who hall gen great attention to the study of milltary organlation, Lord Esher, and it contalned on it two very distInguished exponents of navni and military views, Sir John Fisher ani Sir George Clarke, as its other mem. bers 'ilhe committee reported, nod its report ( matained a complete scheme for the reorganizathin of the War Ottice and of the Ariny. That shbeme was adopted ly the fate Governmeut futl ias heen carried un by the present (lovernment. One broad featuri is this, that our uavai "reanization has becu the one with winch we luve leen consplenomsly successfai in the historr of this comutry, as distinguished from our mifitary organzation, aad, therefore, as far as was possible, the naval organization wns taken as atype. But the lroad feature whion energed with regard to military prepurations was this (Connt Doitke wns able to organize victory for the P'russian and Geruan armies In 1866, and agiain in $18 \%$, because he and the General Staf worhing under bim were free to apply their ninls wholly to war preparation. That be was abie to do this was dite to the fact that the orfamization nad bushers administration of the Army in peace were hept entlrely distinct from the service which eonsinted in the study of war problems and in the hithor training of the Stati und of the tronps. That was the prinetigh, nit mmended by the Esloer Committece, ind it culminatid in the provision of a brain for the Army ln the shape of a lieneral staft. That diencral Staff we have been at work on fur a fonk the past in entea vouring to gert torether. The task was not as diflleult as it seemed at first, hecause the effect of the war was to bring (1) thu front a number of young oflicers who had slown remarkable cipmeity, nuil who constitutpl the nucleus of a serious and thoughtful nilitary school. They were got topether under the Esher reorginization, and virtnally there has been a Guerai stati in iexistence for some time. But it was not until iast september that it received formal aml complete shape in the Irmy Wrder of that month."

IBesiules this fundamental reform. the Esher ( $u$ momission pointed the war to other honportant changes or effective improveurents lin the nd. ministrative srstem of the Army. In phace of the commander-in-chief. a new poat, that of inspector-general. with a term of five senrs, was pronsed, the principai duty of the office hoing for mppect nad report on the efticiency of the
miltary forces. Eari Hoberts haij just retired from the position of commander in-chlef, and the Dake of Connaught became Inspector gencrai uader the new rigime. The existing Defence Committee. instituted $\ln 1502$, was to be enlarged by the aidition of a permanent secretary, folling othce for tive years; two navai officers, selected by the uifiralty; two milltary ofticers, chosea by the Viccroy of India; and, if posslble, other coloniai representatives, bolding oflice for two years.
Of the importauce of this Defence Committee, and of lts work, l’rime llinister Asyuith twok occasion to sperak ricently in Yarliament (July 29, 1904). "Uuier the present (fovernment," he said, "during the four years we have feen la oflce the full Committee constituted by my predecessor, and which has since readered the same acrvlee to myself, has consisted of six Cabiaet Mlalsters in addltion to the I'rime Minister - namely, the fonr Secretaries of state other than the I Hone secretary, the First Lord of the Admirnlty, and the Chancellor of the Exchequer. It has consisted next, as representfing tike Nary. of the First Sea Lorif and the Iirector of Xavai inteligence, and as represcatlug the Army the c'blef of the General Stati and the Director of Whitary Operatlons: nnd in additiou to these othelal inembers it has had the services and the coobpera!ion of the Inspector(inneral of the Forees (Nir Johu Freneh), who ocrupies an Imdepondent position; of Lord Esher, who is a great expert in ald these mattars; and intterly, at my nomination, Admiral Sir Arthur W'ilson. That has been the eonipo. sition of the full Conimittee, but from time to thate we were able to ald to it, and we ought to adll to it, membirs at hoe.
"The functions of the Defence Conmittee arise ont of the areessity frlt, I think, in almost nll the great couatries of the world, hut which is nowhere an pressing as it is here owing to unr F(n) raphical anf economic conditions - the neenssity of corordinating the work of the Navy aml Army. It is the primary husinese of the Defence (ommitter to stuly and determine what is the best prosision that ana from time to time be made for the military and mavai re. fuirements of the Fimple as a whole, tu keej both naval nod military requirements, and their dne relathon to each other, comstantiy in view." Giving examples of the subjeets which the committee had discussed, he sulif they had had muler condideration the military meds of the Euphre with refereuce 10 receut changes in Army orcanization; ita militarr requirempata is affected by the dofence of India : the straterical aspuets of the Firth of Clyde Canal : werial navigatlon iu vow of the present and prospective developments: onr policy in regard th the Channel tumuel sad to the means of trausit neross the Chnnmel: the standard of fixed defences and garrisons in various jarts of the Empire, and the scale of reinforcements.
-In 190: Mr. Baifour, who was then Prime Minister, wate n stateatent of the highest im. jortance ia regard to the possibitity of an invasion of these isiamis. Since then Lord Rolverts hat nitied for a relnrestigation of the problem in the light of new facts and of the changed situation. mut in 1907 a sureial commillere of the Committer of Imperial Dofence was appointed to go into the whole matter. Iu arriving at

## WAR. THE ADEIPALATIONA FOR

their concluslon the commltee conceded to those whos were apprelenalve of luvasion that It would take place when ont Iegular Forces were absent upan sonte forelgn expedition ad that the uttuck nilght be a surprise attack. The vlew noanlmouly arrlved at was, In the firs place, that as long as the murid supremacy of the country wis mequately assured. Invasion on a large scale, finwolng the tranaport of 150.000 unen, was un alosolutely lmprationale operatlon. 'The committer helh, on the other hund, that if we were prermanently to luse command of the sea, whatever mlght be the streugth mul organlzation of onr anilitary foreces at the noment - even lf we had an army like that of Germany - the subjeetion of the comtry by the enemy would be lnevitable. It foilowed fron this that lt was the busincss of tite Admiralty to matatain our naval supremacy at such u height as wouhi cuable us tu retain comemund of the semuralnst any reasonably posiblucomblnathen. Ther secmul conchasion arrlyed at wus that wo nught to lave an Aray for honie defenee suthe fent in mombers nad organlzation to refer raids and to compllat eneny who cons. templated furasion to (enhath a force so considerable that it could not possibly evade our Flect. 'I'he bellef of the dimiralty was that a force of 70.000 men conlel not get throngh; but ma ample margin must the allowed fur safoty, ant it therefure became the hasiness of the Wal Othle to sere that we lmal a forece capable of dainimg elteetively whll $\mathbf{F}(0,0) 0$ men. For this comatry, then, to be semere agatist invishon we ompht to huve am wassailible supremaey it sea and a hume Army reidy to cope with in force of the dimensions he land named. It was nuon thase conelushans that both the military and nasal pulies of the country during his administration woild be curried on."
suraking in Parliument, in Jume, 1009, of the peculiar charaeter und etlicient ruality of the licgular Army of Great Britain. Mr. Hahhune. the Secretary for Wiar, deserithed It as "an Arns of the klind whleh no other Power in the worlil jussisas to the sime extunt as we do. It is rustomary;" he suld, "to spuak of the smanl liritish Army: lmt whint Powt: in the wurle has -0,06 white buldiers ralsed in thelr own commtry stationed in a country like $\ln$ dia, and 40,0103 la noth pirts of the Empire. and a further large foree at home which is tonding to increase and more and more the wrerseas bominions ure Irmeling to undertake their own defenere? Now that fore is mot primarily for use at lome. though it mas be weed for thit: its real purpose is to work with the Ni:ry usursens and to undertake wars there. Thie grat armies of the Continent can obly lie umhili on' for a limited time, and they cimmot madirtake wars which last for two or five or lout vairs, as ours can hecamse It is a profeswami Irmy and lemes the resources of the nation matfected. That kimi of ocrsems Army is a peculiarity of the militury orgmization of this conntry. u peculinrlty Which is too often overlooked. but which is just as cescential as the command of the sext."

German Emperor's Speech. - Tlie following speech hy the Kmpero: William was made at Kurisruh. Seplemier 11. 1803, after a military review in Baden: "We Germans are a people glad to bear urms and prond of the game of war (kriegsapielfrculig). We carry the burden of our
defence ifghty and willingly, for we know that we munt preserve and mantaln our fencr in whiclinlone our iabour can prosper. At the rerlew from whieh I have just coure I haveren that portion of the warrior mons of our Fither. land which springs from the iand of Balen. Toclay, under the command of thelr Mhstrlous lord, they have given me the most complite satl-fu". thon. So long as there are perpies there will be enemies and covlous folk: and so fong where are enchiles aud envious folk it whil be neressary to be on oue's guard ngainst them. ('onsequentiy there will contlutue tor be prospects of war, and even war itself, and we minst bu realy er everythlag. Hence our army beforc all \& ms the richer de bronze on which the prince of conroue ls based and whth whlelt to oat latemls to pick n quarrel. It is to preserve this penter. to malntaln the positlon in the world whit is our dine, that onr army serves; thls "lso 'i, thalm of the strenums days which are experted of lt. IJut I am firmly eonvlnced that it will atand its test successfully and that our cierman Fatherland may rest in contidence that we are on guard and that with God's help and nuder Goul's proteetloa mothlag will befall us.'

Military and Naval.:
British Imperial Defence Conference of 1909. - Its Agreements for an Imperial System. - Compulsory Military Training coatemplated in Australia. - In conuertlon with the foubts that were awnkened in Great lBrit. nin, and throughout the British Eimpire, in 1! Ms, as to the mequary of their gemeral preparations for defence, the D'remier monomeed in the Home of Commons, on the bi of Bhy, that stepa hand "been taken to asacertain whether the Gosern. ments of the self-governlig Donilnlous ure pre. pured to favour a conference at. an early dato for the disenssion of Inperial co-operation lir drenere. The Goverument had sugrental, he sahl, that the conference shenald be belde thin summer - if possible, in July." The propumat was approved throughout the Empire. and thele. gates to the Conference from cach of the self. governlag loninions came to lomulon amb hat sessions with representatives of the llome (iow rament, beglanag on the $28 t / 1$ of July. The delegates la attondanee were the followint

Commonwealth of $A$ instralia. Colonel $1 r^{\circ}$ Foxton, Dinister wlthout portfolio, twsino! ! Coptain C'reswell and Colond Bridge: and military experts.

Nuw Zealand - Nir Joseph Ward Prime: Minister mal Ninister of Defence.
(anada - Sir Frederick Borlen, Minister ef Militia and Defence, Mr. L. Brodenr, Miniver of Darine and Fisleries, these Dlnisters bing assisted by Adniral limgsmill and (icneral sir Prory Lake, as naval and unilitary advisers.

New fouadland, - Sir E. P' Morris, l'rime Minister.

Capu' Colony. - Mr.J F. X. Merrianan, Prime Minister.

Natal, - Mr. J. R. Moor, Nrime Mhister. assinted by Colonel Greene, Mluister of lail. ways.

The Transraal, - Geaeral J. C. Smuts, Colonlul Secretinry.

Orange litier Colony. - Genemi Firtzug. Colonital scerctary.

## WAR. THE [REDARATIONS FOR

## WAR, TIIE PREIDRATIUNS FOR

fournment, the Premicr. In a statement to the House of Commons, smmmarlzal lta maln concluslons as follows: "First as regards military defence: after the maln Conference at the For dign Ulhee, a milltury Confurence took place at the War Ollice, and resulted In or: agreement on the fundamental principles se. out in papers which had been prepured by tie General Statt fur conslderation by the delegatere. The sinbstance of these papirs, which wlll be Included among the pupers to lie puhilslied, wat the recommendiation that, whont impalring the complete control of "he (iovernment of each Domin. fon over the milltary forces ralsed within it, those forces should be staudardized, the formation of unlts, the urrangemeats for transport. the patterns of weapons, and ac) forth, helng as far as possible assimilated to those which have been reccntly worked out fur the British Army, Thus while the Domiuton trosps wondi In cach ease be rulsed for the defence of the Dombion conccrnct. It woull be mule radlly practicable in case of neel for that bominion to mobllize and use them for the defence of the Empire as a whole. The milltary Conference thell entrusted to a suh.Confereme, conslsthig of mill. tary experts at leadifuirters and from the varons Dominlons, and presided over by fir William Nilcholson, acting for the first tine fin the capacity of Clicic of the Imperlal (itonersl siaff, the duty of working ont the detailal af, plication of these princlpiles. I misy point unt here that tice creatlon carly thls yiair of an limpurial Gencral stat thus brouglat lato artive working is a result of the disrinsious and resolutions of the Conference of 1907 . Complete arreement was reachod loy the members of the sil). Cunference, wid their comblusions were tually approved hy the main Conference and ly the Comulttee of Intperial Defence, which sit for the purpose under thic presidenery of the Prime Ninister. The reault was a plan for so organizing the forces of the Crowis wheriver they arc that while prexerving the complete antonumy of each ibminion, should these Jominjous desire to assist fin the defunce of the Einpire. in a real emerpency, thelr forces conthl be rapidly combined into one homogeneous lmperial limy.
" Viaral defence was discussed at mectings of The 'Confurence hell at the Forelgn (Ithire' (in Ausust 3, 5 , and 6. The Admiralty menurandum which hat been clrculated to the Dnminim representatires formed the hasis of the prolim. inary conference. The altermative muthods Whill might be adopted by Domlnion (bwernments in cooperathg in linpurial nival lefence were discussed. New kentand preforred in adhere to her present policy of contribution: Camala and Austriblia proferred in lay the foundation of thets of their own. It was recognizeri that ln building up a flett a aumber uf emmbitions should be conformed to. The flert musit be of a certain siza in order to offer a permanent carter to the ofticers and men encaced in the service: the permonife slonuld ho iraliberl and disciplimel atuder reeralations similar to those pes. tablished in the forvol Ninvs. in orter on allow of both interilinive and nmon between the
 sime object the sinmbind of vessels aind armaments slimhid be uniform. A remodelling of the spuadrons malntalned in Far Eastern waters

Was consldered on the hasls of eatablishing a l'aclfic Fleet, to cousist of three units in the Fast Indlea, Australlu, and the C'hlna Seas.
The generous offer of Now Zealaud and then of the (ommunwealth Government to contribite to lmperlal nava' tefcuce by the glft earh of a batteralp was acceptel with the substitition of crulers of the new Indomitable type for battioblips, thesc two sibje to be malntalned one on the Chlas and one on the Australian statlon. Neparate meetiogs took place ut the Admiralty with the repreantatlues of Canada, Australlu, and New Zeulsud, and general statebuents were agreed to in each came for furilicr conslduration by their respective Goreransents.

As regnrds Anatralla, the sitgested arringement is thint whith some tempurary assivtance from Imperlal funds the Conmonwenth (iov. ernment shonld provide and midntain the Anstrallan unit of the I'acitic fleet. The contributon of the New Zeniand Government wonld be applied towards the maintenance of the China unit. of whlels some of the smaller vessels would have New Zenland waters ns their headunarters. The Vew Zealand armoured crulser would be stitloned in Chlna waters. As regimels C'inata, It was ronsiderel that her domble seabourd ren. dicred the providion of a theet nalt of the same kind unsulitable for the present. It wis propused accoriliog to the amomut of money that might le as nllable that (amada slomil make a start with crulsert of the 'ibristol' elass and destroyers of the improved 'River' class a part to be stationed on the Atlantic seaboral und a part on the lacilic. In accordunce with an arramgement nlready mate, the Canadian fovernment would milertake thre maintenance of dorkgarils at Ililifar and Espulmant, and it Wis il part of the arrantement proprosed lyy the I Instralian represcutateres that the Commonwealth (buvernment should cuentually muthertake the malntenamee of the dockyani at sydney. I'apurs contuining all the material documents will be laid before I'arliament in due conrse, and it is boped before the conclusion of the Session."

In Australia and New \%ealand there had been earerness for some time to take a mure effective part in tho ilafpuce of the Fimples, their remote position and their contlynty to swarmhg alien ponmbations fiving their people some special and leties which are rensonable enongh. They are lonely commmintles of Europeans, pianteil on the edge of the proliglons populations of the Asiatic rorld. They hare learned suddenly that some, at least, of those populations can do things, in war and otherwise, that were sup. poser to he reserved especially for effectire performance by the white varicty of the liuman mice. Whitt disposition of mind will move the Eastern folk in the excrelse of these powers of netion - which are discoveries as new to them as to us - has ret to be learaml. It is doubtfui if they themselres know what the inclination of their carcer will be, when tiosy have reaily digented the uew enntents of their minds and have filly surveyed their new position in the worhl. Meantime, Australiz has good rcason to think anxionsly of what Japan certainly and China mect probably can do. if they are movel hy imperialistic ambitions to an aggresslve career.

If antwhere in the British Empire there was reason for the lively stir of Increased preparation

## WAR, TIE IREPARATIONS FOR

for defence, it was Far East Austraiabla New Zealand, in Mareh, bad put a heavy straln on its rewurces by offering to bullid a Dreadmaght for the Imperial Savy, and Australla had followed qulekly by the jeroffer of another. When, aubserpuently, these projects were superseded ly the armangenent ande at the london Conference, funde ralsed by private subecription for the Anstrailan Ibrudumbit were applied partiy to the foumbistion of a mival college near Sydury tor the tralning of ollters of the Austrulitun Fiptadron, und partly to the establidiment of at leinat two farus for the training of young liritish immigrants, whe will be speiaily eclected by the comsty colomizallon weletles.
In acting promptiy to realice the plans of mill. tury organdantion that were formed at the Londini Conferetuce, Austraila went far beyond anytiting that la likely to be done by sny nither of the istifish Dominions, unlesm it may be New Zaaland; for the (commonwealif lias nndertaken to ursanlze "t system of compulsory military trainlng. A Ibefence lisill lutroninced in the Fid. eral D'arliament on the 2lat of Neptember upplicy compuisory training to ail males from the age of 12 to that of 50 . $\cdot$ in undor cadits ure to have anmally 120 haurs physicai driit, elementary marching. and practire with mindature rifles, for two years seniur cadets will have wo hours' ammally, meluding four whole day drifs, elementary navai or milltiry cecreists, and musketry practice at mugem nif to 500 ynrls. for fulur years. The citizen forces are to have 16 whole day drills or their citulvaient ant. mandy, fuchoding eight days in camp for two years. Those "ho are to undergo naval, aritlers, and engincer tmining will have 25 Inys fustend of 16 . Maler from the age of 20 to all wial remain enrabled, nttending only one muster parade eacla year. Excmptions wili be mathe mily on the gromul of mintaess or in the case of persons of non Earopean descent. The lattor, however, will be trnined in non combat ant inties. Spursely populated distriets may ln" "st..apted tempurarily. Persous fuiling to attond the training will be thet from sis $^{5}$ to (:30) accordine to the emiprlt's wentth, or may the eonflued und trained till the $v$ have performed the chatere they have shirk evel. Persoms failing to rial efilci-ncy must nudergo nuother vear's training. The cadet trmining begins in 101i, and the eltizen trabniug in 1912. When the scbeme is in finf working orier it is cstimated that it will provide 40,010 junlor cade ts, $\% .000$ senior cadets, and $55 .($ oft citizen soldicrs under 21. The Millitia. 2j, (0)0 strong, will thenceforth be recraited only from the fulis trained, and will become a rorpe d"tite."

When the kisilmates were presented to Par liament a year ago we lad seren battleshlps of the I Pradnought clase and three ceruisers of the Invincible elass, cither afiost or In process of construction. Tice whole of these were due for completion by the and of 1910 . It that thme Germany was bulding four i)rednouehts unit one Invinclibie, of which two Dreminoughts wre expecteri to be completal by the end of this year, and the remuiniur three ships in the abtuman of 1910. Thits, nt tirat time, we had a auperiority in these classes oi ships of ten to tive In course of cunstructlon, with the adiftional ablsantage that the whole of ours wore expected tu he enoplited some montlis in adrance of the last three of the German shilps. The new Gor. mun Fiect Bili lumi nt that time become law, and according to our interpretation of its provisions three Dreadnoughts and one Invincible would be faid down in the eourse of the year

## Walf, tif: phepalutions for

190n-0. The finanetal proviwiona of that Ilif were unch as tu lead us to the opinton that nu word watid be coummenced upen them fout shipe untl the month of Ansust dant year, and that they woulif not be completel hefore Febra. ary, Ithll. Thim ilme lant year, therrfore, we had to contemplate flve cirman mipa minder construction, there of which would be conipheted In the antumat of 1010 and fonir more shipa to be commence! about Sugunt, IGNa, and commis. sloned In F'obritary, 101 . It view of this state of aftitirs this Iloisw of ('ommonos lant y car np. proved of a programine of two farge shifis to be
 country a tutal if 12 uf theme new shifm, as againat a posstble conupleted fierman tutal of nilnc. In the face of finst year's focogramme wo ente could with any falrness charge thls (\%overnment witis laving aturted upon a race of comjet-
 procept we sonyht to check the rapur rate if slatphitiline. Wie falled.

The ifthendty in which the (ioverninort thad themaedves piaced at this mobrent is that we to not know - as we thought we did - the rate ab whilh (irrman construction is tahing flace. We kumw that tho (bermans have a late whoth, When all the shlps uader It have been com. whed. will give them a masy more yowerlud than any at present la extatance. We know that, but we dos not know the rate at which the provislons of this Set are to be cartieni fito exacithon. We now expat that the fontr (ireman ships of the 190s- 9 programbe wif
 the athama of that I am laformed, mareover. that the coincotion of matcriale and the
 mantiluga have alromls begua for form more shlps whlith, ace ording to the Nasy faw, lee. long to the frogramme of 1909-10. Therefore we hase to take stock of the new sithation, itn which we reckon not nime but lis firrmmen ships may be completed in 1911, and in 191: such fur. ther shins if uny, me may be berinn in the course of the wext thamelil year, or latid down In April, 1910. We mas atop hope and pay a tribute to the evtriorilhary growth of the fower of constructing ships of the largest glae In Germany. Two years aso. I belleve, there were In Germany. with the possible execption uf one or two slips in private yards, no slip capable of carrsing a lireatnought. To lay they hase wetually no less than it such slipis nad three more umder construction. Ind what is true of the bull of the shijeststralso of the gums, armour, mal mometings. Two vars aro any one fumiliar with the erparity of Krupp's and wher great Gurmmen frms would have ridl. -ubed the prosibility of their undertaking the supply of all the component parts of cight buttheships in a winele sear. To day this primbuctive power is a realized fact, and it will tax the resources of our own great tirms if we are to retain the supremacy in rapidity nud volume of eonstruction.

- Javing sail so much on foreign naval developanent, I turn to our own programme of construction. As I have said, we shall hive in Narch. Illl, itigh completed lireacinonghts and four Invincibles. We propose to iag down two more Dreadnoughts In July of this year, and the terms of the comtacts will provide that

## WAR, THE PREPARATIONS FOR

they shail be completed in July, 1911. . . . Two more ships will be isid down in November ibis year, to be completed $\ln 1911$, and in that year our totai strength in Dreadnougbts and Invinclhles will be 12 of the former and four of the latter. The date, however, whlch we bave to bear $\ln$ mind is that up to whicb the present programme must provide - April, 1912. I have shown that we shall in the courne of 1911 have 16 of these modern ships, as against 13 ships for whleh Germany is already making provision. The German law provides for four more ships to he lald down in 1910-11. But if the construction of these ships is ar clerated - as I understand was the ease of the four ships of the 1900-10 programme - they wouid be completed by April, 1912. Thercfore on that date Germinny would have 17 Dreadnoughts and Invinclbles. But even if no acceleration takes place before April. 1910, this number would be completed in the autumn of 1912. This is a contin. geucy which his Majesty's Government have to take into account.

- We cannot afford to run risks. If we are to he sure of retaining superiority in this hy far the most powerful types of battleships, the Board of Admiralty must be in a position, if the necessity arises, to give oriers for guns, gunmountings, armour, and other materiais at such a time and to such an amc'יnt as will enable them to obtain delivery of four more iarge armoured sinips hy Murch, 1912 . We shonld be prepired to meet the contingency of (iermany linring 17 of these ships ln the spring of 1912 by ollr having 20, hilt we can only meet thnt contingeney if the Government are empowered by Pariament to give the necessary orders in the course of the present year. I can weil inagine that this method of calculating in Dreadnoughts and Invlncihles aloue may seem unsatisfactory, and even unfair to many persons. They may say: Whint has become of the Lord Neisons. the King Edwards, the I un. enns, and the Formidabies and the eariler battieships on which our narai superiority has been so constantly reckoned? Is no account to he takton of our powerfui fleet of armoured cruis. ers, numberin ${ }^{\text {e }}$ no less than 3.j?' Ies ; the Board of Aduiralty have not forgotten these chips. They still constitute a milyhty fleet. The Ireadnonght his not rendered them obsolete, and many of them wouli give a good ac. connt of themselves in the line of bnttle for many renrs to come. But, thougil they have not been rendered obsolete br the Dreadnoughts and the Invinclbies, yet theirlife bas heen shortened. . . . A hattieship must be regarded as a machine of which the output is fighting capncity. Ali improrements in the designs of shlps which incrense the fighting capacity necessarily shorten the iife of earlier buttleships just as in the ease of any other marhine. The greater the rnlise of the improvenients, the sooner the ear. lier ships hecome obsolete."

Nr. DICKenna's reckoning of the comparatlve numbers of I readnoughts that Great Britain and Germany wouki hare in 1912 was challenged at once hy the leader of the Opposition, Mr. IBal. four. who said: "On the two years" basis of huliding we shall in Iecember, 1910, as I caicuiste. have ten, and oniy ten. Dreadnoughts. But the Germans at that date, as I calculate. wlll hare 13. That assumes, of course, that I

## WAR, THE PREPARATIONS FOR

am rigbt In stating, and I do not think I shall be contradicted, that the Germans antlclpated their programme by four months. If you work tiat out, and assume that the German shlps be. gun last November, in anticipation by fire uonths of the ordinary date, are completed In two years, then you wlll find that I am not wrong in saylog tbrt in December, 1910. We shail have only ten Dreadnougbts and the Germans will bafe 18 . That danger period in Which, according to my calculation, the ratio of British to German Dreadioughts is as ten to 13 cxtends, on the basls of two years' buildiag, from December, 1910, to the end of Marcin, 1911. On Aprll 1, 19i1, the Germans, as I understand it, wili have only 13 and we shall have raised our number to 12 . We sbould stlii, therefore, on Aprii 1, 1911, according to my caiculation, hare one less than tbe Germans. and that period of what I might cail the 12 Britisil to 13 Germans wili lnst untii July, 1911. Then we shnll have 14 ; but In the meanwhile the Ger mans, if they build their four silps this yenr. In addition to the anticipated ships they laid down in November, wlif hare 1\%, as I uader. stand. We shouid stili have 14 in Juiy, 1911, but the Gcrmans wouid, as I make out, have 17."

Mr. Balfour contended that the four ships which, according to the German programme, were to be faid down on tife 1st of A pril coning (1009) had been netually laid down in aliance of that time. IIe had information to that effect; whereas Mr. McKenna was informed that materiais for them had been coilected in alvance, but that the construction was not he. gun. Mr. I3nifour contended stoutly for the correctuess of his own information, and arghel: "If they [the four battlesinips supposediy wat. ing to be laid down April 1. 1900] were laid down in November, as I belleve, tbat means that the Germans iaid down eight Dreadinonghts inst year. They may iny down no Dreadnonghts this yenr, and they may say, 'We anticipated our four ships for 1800-10; we anticipated then by lnylng them down in November; we have no ships for this Enanclui year.' lut tisere are two other things to renember. Il:arlng ind down eight sbips last yenr, they may lay dow fomr ships this year, or they niny lay down eight whips this year. Tiat the cuparity of their yards and their great engiueering shopis renders that process perfectly feasible no nue now doubts.

If the Gernians go on at thit rate, which is more than possibie, the probnbility is that they will have on April 1. 1012, 21 Dreadnoughts to our 20. The hypothesis. then. are these, and I want to make it clear to the Government and to the Ilonse:- Kight Drendnougbts have been iaidi down in 190.s ly Germany. If four are lald down in 1909, there will be 17 on April 1, 1912; If eight are hid down - as eight have been laid down last year - there will be 21 on Aprll 1, 1912, to ont 20 ; and if the Germans lmitate the policy of the present Government and lay down not only their eight in the financiai fenr, lut begin s new group of four when the Governinent propose 'helr group of four, on April 1, 12 months hel $=$, they will then have 25 ."

Over thia difference of Information as in the facts of German Dreadnought-building, and consey'rent differences of conclusion, controveray

## WAR, THE PREPARATIONS FOR

mged throughout the klogdom for weeks. The Prime Minister, Mr. Asquith, tried unavallingly to moderate the impeachment of German good faith in the matter. "It is fair and right to the German Government that I should say," he remarked, "that we have had a most distinct declaration from them that it is not their intention to accelerate their programme (cheers) and we cannot possibly, as a Government, beileving as we do most explicitly in the good falth nf thoee declarations (cheers), we cannot possibly put before the House of Commons and Parifiament a programme lased on the assumpthon that a deciaration of that kind wlli not be carried nut. Be It observed - I want to be very careful In the language I use about thls I am not saying that it is a piedge in the sense of an agreement between the two countrics. Nothing of the kind. I should not accuse the German Government of anything ln the nature of bad falth if they nitered their intention. We have bcen told by them expressly and explicltiy that that is their intention, an intention not to accelerate, nr In other words not to do what the right hon. gentleman contemplates, when he eredits them with the intention possibly of doing nameiy, of laying down as many as eight ships iu one financial year. It is impossible in framing these Estimates to do so while at the same time ignoring that declaration from the German Government, and that is why I say in taking this power to lny down if need be four ships on April 1 next gear we are making such provision as prudence shows to be necessary for nll the contingencies which we can rcasonably anticipate at the present moment."

At the same time, Mr. Asquith mndc a state. ment of Importance in reply to the questlon, Why should there be an increasing competition in naval expenditure between these two countries? "The question," he said, "has heen raised by us, the British Government, more than once, with a view to ascertaining whether sny proposal for a mutual reduction of expenditure for naval purposes wnuld be accepted by the German Government, but we have been assured more than once, and in the most formai mauner, that their naval expenditure is governerl solely by reference to their own needs. and that their programme does not depend upon ours. That is the statement which has hecn made to us. They cell us quite piainly that If we build 100 Drealnoughts we must not assume thnt they would add to their naval programme, and, on the other hand, if we built bu Drealnoughts nt all they wonld go on with thelr programme just as it is. If that is so, it is perfectly clear that there is no pussibility of an arrangement for mutunl reduction. I regret it very much, hut I do not compiain. The Germans, like every other nation, are the best judges of their own nationai requirements and necessitles."

As will have been iearnel from Mr. Mc. Kenna's statement, quoted above, the Government desired nuthoritr to begin construction of two new Dreadnoughts in July and two In No. vcmber, 1909, with contingent anthority in ad. dition to give orders during the year for four more, if rcasons for doing so appeared. This thd not satisfy the Oppositlon. which insisted that not less than elght of the new trpe of battie-ships should be huilt outright; and a ver.

WAR, TIIE PREPARATIONS FOR
itable panic of public excitement on the subject of German dealgna agalnat England was created In the country, by the comblned agency of apeech and press and the meiodramatic atage. The Government was so fittie shaken by the ciamor that a motion of censure on its "declared policy" In the matter waa defcated in the House of Commons by a majority of 218. Nevertheless, on the 26 th of Juig. Mr. McKenna made the foliowing announcenient of a modification in its naval programme:
"After very anxlous and carcful examination of the conditlon of shlpbuilding in foreign countries the Government have come to the conclusion that it is desirable to take all the necessary steps to ensure that the second four shlps referred to in thits year's programme should be completed by March, 1912. They propose to take all the necessary steps in the way of preparation of plans. getting out of specifications, invitations to tender, and, finaliy, the giving of orders which will procure the deiivery of these ships at the time I have named. As was said in the month of March, there will be no need to lay the keels of these shlps in the course of the present financiai year. It will be quite time enough if the keelsare laid in the month of April next.
"The examination of the state of foreign siniphuiiding programmes to whlch I have referred is bound to lead in the minds of most members of the Committec to the conclusion that the Government had no other course open to them. The Committee hial stated to them Inst March very amply what was the condltion of forelgn shipbuiding up t., that date. Since then the development of shiptmileling in foreign countries hias gone on apare. Two countries, Italy and Austria, have now declared a definite programme of four large armoured ships of the intest type. In Italy oue of those ships is 11 ready lald down. a seeond is to be laid down immediatcly, aud the remaining two are loth to be lald down in the course of the present year. With regard to the Ausitrinn programme, scepties miglit say they would never helleve in it until, as in the rase of Italy, they saw the keels actunliy laid down, but the fact is every enrnest has heen given of the determination of the Austrian Government. nnd two large slips have been prepnred for the construction of bnttleships of the largest type."
The English Navai Programme for 1910. -" The unvy estinates for 1910, which were Issued by the British Almiralty Inst nigitt, provide for an expenditure of Subi.018.500, an increase of $\$ 2 \pi, 805,0 \mathrm{OK}$ ) over 1909 . Whe inerease is almost wholly taken up hy shiphuldeng armaments anthorized by Parliament hefore dissolution. The new proprnnme provides for five large arinored ships, five proteeted cruisers, twenty destroycrs, and n considerable number of submarines. By April 1 there will he under ennstruction seven buttleships. three nrmored. uine protected, and two unarmored cruisers. thirty-seven destrofers, and nine sulmarines." - I. I. Ere. Post March 10. 1910.

The French Navai Administration. Aiarming discovery of Bad Conditions. France wns greatly startled and sloneked In March, 1909, by rumored scandals in naval ad. ministration, uncovered by the investigationa of a Parilamentary Commission, but not yes

## WAR, TIE PREPARATIONS FOR

officially mane known. The report of the Commissior was not jublished unti ite in June, and when it appeared it consis od, not the worst of the rtate of things whleh rumor had deerritef. hut cnongh tis show an alarming and unsuspected weakness of the nation on that side of lis armament for was From the conclusion of the elahorate report a few translated passages wlil suftice to indlcate some of the condtions it brought $t, 1$ light. In this finsl suminary, the Commission states thst the tentimony subnitted hy it "stablishes, among other facts, the foliowlng:

- That during the last ten ycars Parliament has been asked to authorize the construction of ships for which in most cases the plans have not been detinitely (serieusrment) fixel; that months, and nost generally gears, elapsed br. tween the different contracts for the essential parts of the shlps, the hulls, tie turrets, the holiers, sc., entalling considerable loss of the and of money $\qquad$ ; that numerous and impor. tant changes were introduced in the course of construction, . . . cbanges the cbief inconvenlence of whic!, apart from the increase of expenditure and the retardation of construction, is to impalr that homogeneity which is the su. preme quality of a squadron, that most of the'se defects are acgrapsted in the case of the six battieships of the Danton type, tbe orighal contract for whlch, signed at the end of Decem. ber, 1906. has undergoue hundreds of moditica. tions which must now be placed on a proper hasis.
- Tinat the arsenals are not at present in a state to carry out with the rapidity whieh is desirable new constructions and repairs; that the mechanical equipment is in general inadeduate and out of date : that the abolition of piece. work, which ias cnincideri with a reduction of working hours and the diminution of the pow. ers and autisority of tive sujerinteudents in charge, hus resulted in a considerahle fessening of production : and that lack of material sometinies entails a stoppage of work.
"That the four divisious of hattleships aud the eruiser divislon of the Mediterranean Squalron linve not the regulation supply of steei shells, that the two dirisions of armoured cruisers of the Northern Syuadron hare oniy one-third of thelr proper supply of steel sheils, and that for both squadrons the stores for renewing their supplies of steel shells are not ready.
- That the various braucies of tie admlnis. tration arc wanting ln maity of rews and purpose, in methox and in cetiued responsibility, and that negleet, ciisorder, and coufusion too frequentiy prevall.
" In view of the fact that only a small part of the stheme of 1901 for modernlaing ports and tiock rards in aceordance with the recpuire ments of the construction programme of 1900 ling been executed, and in rlew of the total fillure to provide docking necommotation for the large battleships of the inanton ciass, the (Ounmission invitus the Cinmber to consure the want of forecleht and the indifference which these hmentable dimeoveries dllsciose."

French Naval Programme revised in 1909. - Radical Charges in the Department of the Marine. - A desputch from Paris, Junc 8 . 19月9, announceri: "According to the Temps

## WAR, THE PREPARATIONS FOR

this evening, the Navy Council lias finally declded to recommend that, in additlon to 4.5 shlps of the llne, the fleet shall consist of 12 'scout crulsers,' 60 large destroyers, and 64 suh. marines. The importance attached to an in. crease in the number nf capltal shlps, whleh is the chlef feature of the new proposals, is iilus. trated ily a comparison with the so-enlled 'pro. grarames ' of 1000 and $190 \%$. In 1900 it was de. eficd on paper that the fleet sheuld consist of 28 battleshlps, 24 armoured crulsers, 52 destroyers, 268 torpedo-hoats, and 88 submarines or submersibles. In 1907 the composition of the flect was changed to 38 hattleships, 20 armoured cruisers, six seouts, 100 destroyers. 170 torpedo-bonts, 82 submarlnes for offensive purposes, and 49 defence submarines.
' A comparison of these three "programmes' shows an lucrease $\ln$ the number of capital ships and destroyers, the abolition of armoured eruisers as a separate class and of torpedo-boats in favour of ciestroyers, and a decrease in the number of submarines. Whth regard to the existing a:moured cruisers, which the Nury Councii no longer regards as efleient fighting units. It may be noted that two out of the four 14,000-ton Gambettas have not yet heen com. pleted. Given the age limit of armoured shipis as fixed at 20 years, only the slx Danton and the six IRepubllque battleships would still tig. nre on the effective list by 1925. In other woris. 83 armoured ships would bave to he completed during the uext 16 years. In addition. 12 solt eruisers would have to be constructed, ani, be. sides a number of suhmarines, over 100 in. stroyers Fould have to be laid down, since the life of this class of vessel is fixed at ${ }^{17}$ yerars."

On the 29th of July the Paris corresponifut of the London Times wrote: "It is semi-ollicially anuouneed this eveni $L_{-}$that the Coumedl if Ninisters at its meeting to day approved a num. her of radical ehangis proposed by tise new: Mliuister of Marine, among the higiner ranks of the personnel of the naval administration. Alt the heads of departments at the Ministry of Slarine appointed unler the old regime have been remored and their plaees have been tilled by Admiral Boué die lapeyrère's own nominess, Socomplete a reconstruction of a publie depart. ment is without precedent in modern French history. These changes, moreover, are supple. mented by a number of new appointmeuts in the commiands afloat."

On the first of April, 1910, It was anmounctal from Paris tiat the Cinmber of Deputies hai roted to lay down two hattle ships in the current year. desigued to equal tire latest type added :" the navles of Great lbritain and Germany.

French Naval Administration, - Parlia. mentary Investigation. See (in this vol.) Fuance: A. I). 1009 (\$larcil-JUNE).

The German Emperor's Statement of his Peace Policy hased on Preparation for War. - In the spring of 1905 , speaking at l3renen, on the unveiling of a monument to his fathar. the Eniperor made an lmpresslve statement of lils motives in strivlng for the creation in Ger. many of a great naval and mllitary power Ile sald that in hoybood he harl been angered at the weakness of the German nery, and that his pol. fy had sprung from that feeling. not difocteal toward aggresslon, hut to the coinmand of respect from the rest of the World. His aim

## WAR, THE PREPARATIONS FOR

was to "do everything possihle to iet bayonets and cannon rest, but to keep the hayonets sharp and the cannon ready, so that envy and greed shali not disturh us in tending our garden or building our heautifui house." "I vowed," lre said, "never to strike for world-mastery. The worid-power that 1 then dreamed of was to create for the German Empire on ail sides the most ahsolute confldence as u quict, bonest. \&int peaceahie neighbor. I have vowed that if ever the time comes that history shail speak of a German world-power, or a Hohenzoilern worldpower, this should not be hased upon conquest, but shouid come through the mutual striving of nations after common purposes."
It is not ditficult to believe in the perfect trutbfuiness of this assertion of high motives, and the perfect sincerity with which they lave been ohered, while seeing at the same time how much, in their working, they lave thrcatened the parce of the world. As the power of Germany has grown under his hund, the Kaiser has been tempted more and more to impose his wlll on neighbors whose caunon were not as realy or their sharpened bayonets as many as hia. The world-power of his desire has become more nud more a dictatorial power. The peace he hats preserved by it lus heen peace on his own terms, more than oncc. The result has heen to escite throughont the world such a feeling of heing inenaced by war as had not heen known since Napolcon's day, and to impei amony antions. bly amel littlc, a more feverish and competitive a ing for war than ever busied them before. As worked ont by the man, the Kaiser's policy of peace- unking hy the tools of war has certainly lost the innotence it had when conceived hy the lor.

The German Side of the Navy-huilding Question. - When, in Murch, 1909, debate on the Navy Estinates in England started excite. nuent orer the rapility with which Germany sermed to have developerl the building of 1) readnoughts, Chancellor Bulow, on the e9th of that montli, said in the Reichstag: ." The Fed. erated Governments eutertain no thoughts of entering into competition with British sea. power by means of the construction of the leerman uavy. According to the provisions of the davy Law, the inmovnble parpose of German mavai policy is fonnded upon the finct that we desire to create our nuval armanients solely for the protection of our coasis and our tranle. It is, moreover, nn indisputable fact that the progrumme of our naval construction lies open in absolute pullicity. We lave nothing to bect secret, notbing to hide, and it is not intended to accelcrate the currying out of our construction programme beyoni the limits of time contmm. plated hy the iaw (ibber die grateliche Frixt hinaus zu beschlennigen). All rimmurs to the contrary nre false. In the antunn of 1912 . at the earllest, we shall have realy for service the 13 large new ships, including three armoured cruisers, provided br law."

This statement was supplemented by one from Admiral Tlrpitz, who shid : "Now, ns previously, we build all ships in about 36 montlis - about 40 months In the smail yaris. To tbat perioul are added trials. Which last for several months. Equalis ivacenrate is tha aseertion that. with a view to more rapid construction. the contracts for the newer ships ure placed

WAR, THE PREPARATIONS FOR
sooner than is ailowed hy the estimates. All that is true is the following: Suhject to approval hy the licichstag, contracts for two ahips of the 1009 tinuncial programme were last auturun promised to two private yards at comparatlvely low prices. This was done hecause there whs a danger that, if orders for four ships were placed ut the same time at the heginning of 1909 there would be a considerahle adrance In price. If orders for two ships were already piaced the lmperial Niavy Ollice was in a much more favourahle position for placing orders for the other two. We can put the lmperial jards lato competition with the privute yards. The lmperial yards cannot undertake more than two ships at once. The private tirms, therefore, will be corupelled to ask lower terms. If the matter has heen kept secret, that is solely because the tirms must not he made aware of the business transactions of the Navy Officc. Contracts for the ships have not been placed; assurances only have been given. The coutract is concluded only after the voting of the cstimate. The period for delivery is 36 iuonths from i pril 1 , 1909. Not a penay is avuilabic for the 'promised' ships hefore I prif 1. That must be cleal to everybody who knows the Parliamentary comlitions ame our accounts system. Not even indirectly bas any money been procured from hanks for the yards in any way whatever hy the agency of the Navy Office.
" in restrai to the placing of the order for the first of the two ships special acconnt was taken of the fact that the fard in question is princi. paily engaged iu the construction of this bind of ship. Areelernted completion of these two ships is neither asked for nor internded. The firms get their moncy ouly in quarteriy instalments. Contracts for the two other ships of this sear's programme are not to be placed until some months after the conditions for temering are drawn up late in the summer. As the privice yards no more than the lmperial gards know whetber they will get the orlers for these -lips, there can he nu possihilit! of special pre. paration of material. If there bas been any sach aceumulation, it is. presumahly, due to husiuess reasons, certainly to no incentive of ours

- In conclusion, 1 repeat once more with emphasis that. as the imperial Chancellor has alrendy said, we shall have renly for use in 1912 ten Dreadnoughts and thre Invineihles - in all 13. and not 17 , large modern slips - and that not in the spring, lont in the antumn. How far it is risht to hase comparisons of uaval strength n|wn thie numher of Drcadnoughts is a question which i shall not here disenss."

As to the suggesteri readiness and desire of Grent Britaiu to join in an internatlonal agreement for the liniting of naval armaments, the Germans hare always had a rather rensonable answer. which was phrased forvibly by one of the Acrarian orguns when it said

When the weaker promises the stronger in abitain from all ueans of increasing his strength, the strong man needs to make no further ellifort to retain his relative preponderance for ever. If the otber naral Powers entered into such an ngreement. England. Without taking apon herself any further burdens, wond re. tain mastery at sea before which all must how. Little need as we have to interfere with regard

## WAR. THE PREPARATIONS FOR

to Engiand's programme, even so fittle need has England to look askance upon our conatruction of shlps, not to attack England, but only in order to have a naval power witb whlch even the strongeat opponent will not ilgbt-heartedly engage ln battle. This good right of ouis wo shall not surrender by any agreement."

But a better vlew was that taken by one of the German Conservative Journals, the Ireuz Zeitung, which sadd last summer: "First of all we must compiete our construction programme. Before that we conld not agree to any llultation of naval armaments. Otherw ise we shouid not be able to crcate the navy of moderate slze whleh corresponds to our position as a seafaring people.

E
Even after the completion of onr
programme our navy will be bnt a cunstruction programme our navy will be but a
dwarf as compared with the Brith Navy. Nevertheless, the moment onght theu to have arrived for entering into an internatlonal agreement abont limitation of armaments, and on the part of Germany there wlll, presumably, be readiness for it.

Elasticity of the German Navy Law. - At the annual meeting of the German Nary Leaguc in June, 1909, Admiral Weher, speaking of the German Navy law, praised its elastlcity. "1n international relatlous." he stid, "It had lately proved to be a politieal lustrument of equal force with the American Monroe toctrine and the Engilsh two-P'ower standard. In 1006 the Relchstag had agreed to increase the slze of capital ships without altering the number. The amendiug iaw of 1908 (which shortened the - life' of battleshlpsi had reudered possible a rational fulfiment of all inmediate possibilities with regard to buttleships, small cruisers, torpedo boats, and submarines."

Italian and Austrian Programmes of Naval Construction. - A despateh frons Rome in May, 1905, anouncel that the minister of marine, Admiral Mrabello, hal obtalned the approval of the cabinct to a naval programme that provides for the constriction whinin three yeurs at a total expense of $\$ 52,800,000$ of fonr "Dreadnoughts" and a number of fast scout cruisers. 1 loeal paper stated that the decision to bulld these vessols was reached after Italy had learned that Anstrin-linngary was golng to spend $\$ 10,006,000$ on increaseci naval power.

Four montlis later, on the 1st of October, a report came to the English 1'ress from Rome as follows:
.- The Minister of Marine announced In June that the shlps would be begun at once, and com pleted before the mildle of 1912 . Only one, the Dante Allghieri, has yet been lald down, and owing to sone blunter whth regard to her stecl plates, no work has heen done on her for more than a month. The second ls still awalting the completton of a bullding slip before it can be iaid duwn. As to the other two, accorliog to the Tribuna, the enntracts, which onght to have hewn concluded with two shipbnilding firms lant June, have not yet been even examined by the Council of State: consequently nelther tirm has get been ahle to begin the work whlch will be nceessary in its gards before the shlps ean be latd down. The Tribuna throws the hlame upon the bureaucratic system."

Italian Fighting Strength at the End of 1909.-The fighting strength of the Itailan Nary was reckoned by the Rome correspondent of
the London Times, in November, 1909, as follows:
"Counting in all four oi the San Giorglo crulsers [only two of which were then finished] as forming part of tbe availahle navy at the end of this year, sad setting aslde some 20 ships of various kinds and 40 or 50 torpedo-boats, which may, however, be of some secondary use, the full fighting force of the Italian navy at the beginning of 1010 should he slx first-ciass battleships, five second class l. Heships, seven firstclass armoured crulsers, three second-elass armoured cruisers, 19 destroyers, and 36 first-class torpedo boats. But it must he borne in mind that elght of the first 21 fighting unlts - the fire battleshlps and three armoured crulsers thescribed here as of the second ciass - are not very modern shlps.
"The shipbuilding programme of Admiral Mirabelio promises, hesidies other less important vessels, four battleships of the Irealnought type. As far as one could learn at first these ships were to be on much the same llaes as the Beilerophon, with a displacement of 18.200 , and an armament of tea 12 ln . guns. The clief ynestlon 'ben was, When wonld tbey be really for sea? Admlra! Mirabelio sald ln 1912. In order to effect this he would have had to revointionize the whole system of shipbuliding in the Italian navy."
Japan's Armanient, Present and Prospective. - The naval statuis of Japan in December, 1909. as ascertalued and describeri by the Tukio eorrespondent of The Times, London, was as follows.
" Ever slnce the Russo.Japanese War it hss breen well nigh impossible for the public to form a clear illea of what steps were $\ln$ proyress with regard to the expansion and maintenance of thr Japanese Navy. in the year before the outhreak of the conflict - namely, 1903. a programme of expansion was approved by the Diet. It involved the bullding of three liattleships, three armoured crnlsers, and two secom. elass cruisers; that is to say, elght flyhting vis. s.ls, displacing 100,000 tons approximately. The cost was set down as teu millions sterling. and the programme was to have been spread over a perlol of 11 years, ending ln 1913. Subscqucntly, however, owing to financlal expedieney, the thme of conipletlon was extended. tirst to 1915, and thercafter to 1916. so that seren years stlll remain. Knowing this and observing carefully what ships were laid down from time to time, there should have beell, it will appear, no dlfficulty In formlng a elear perception of the actual coniltions at any moment.
"- But naturally the war proiuced a ralical clange In the plans of the Jupanese Admiraltr. It became necessary at once to adopt special measures for recouphng the losses suffered in battle, as well as for renewing armanents. of conrse the general public was not tiken into olliehal confilenee in such mutters, and simir thac clapseci before people became vaguely ron. sclous that not one building programme ming: but three, had hern taken in hand. Oceasion:dly announcements were made of the iaunch if such and such a battleshlp or the laying down of such-and-such a erniser, hut as to which ressel beionged to whiel programme, and whai dimenslons the several programmes were ultimately to take, nothing could be clearls ascer.

## WAR, THE PREPARATIONS FOR

## WAR, TIIE PREPARATIONS FOR

tained. Now, at length, this ohscurity has been removed, It is seen that two of the programmes were undertaken with funds inciuded in the war expenditures, and that, therefore, the nati a is not required to make any further provision of money on these accounts. These programmes are, first, an emergency programme, carried out with what is cailed an 'impiementlng fund.' and, secondly, an emergency programme carried out with an 'adjustment fund.' Under the three programmes, respectively, the foilowing vossel have been bought, bulit, or

Russian "Dreadnoughts" Buliding. "The keeis of the four Dreadnoughts which are to represent the nucieus of Ruasia's future nary were initidown in St. Petersburg this morning. The materiais to be emplofed wlil be throughi out Russian; the designs and the supervision wili be British. It is an open secret that the Tsar has taken a dcep personai lnterest in arrange ments that have been made for piacing the contracts for tire new ships."-st. Petersburg Cor. Loudon Times, June 16, 1001

The United States Navy in 1909. - As summsrized in the Annuai Report of the Navr Icpartment for the fiscal year 1909, the United

States Navy was composed, on the 80th of June in that year, of the following venseis:

Hit for Sermice, ineluding those under Repair: First-ciass battie ships, 25 ; second ciass battie ship, 1 ; armored cruisers, 12 ; armored ram, 1 ; aingie. turret harbor defense monitors, 4 ; double. turret monitors, 6 : protected cruisers, 22; un protected cruisers, 3; scout cruisers, 8; gunboats, 9 ; iight.draft gunboats, 8 ; composite gunboats, 8 ; trairing ships, 8 ; training brigantine. 1; special eiass (Doiphin, Vesuvius), 2 ; gunboats under 500 tons, 12 ; torpedo boat destroyers, 16; steei torpedo boats, 38 ; wooden torpedo boat. 1: subnaarinc torpedo boats, 12; iron cruising vesseis. steann, 5 ; wooden ditto, 5 ; wooden saliiing vessels, 5 ; tugs. 44 : auxiiiary cruisers, 5; converted yachts. 21; eoiliers, 8: transport and supply ships, 8 : hospital ships, 2 ; receiving ships, 4 ; prison ships, 8. Totai, 202.

Under Construction: First-class battie ships, 6 ; torpedo boat destroyers, 20 ; submarine torpedo buats. 16 : tug. 1 ; coliiers. 6 . Totai 49.

Authorized: First ciass battie ships, 2; gunboat for Great Lakes. 1 : submarine torpedo boats, 4 ; coliliers, a. Totai 0.
Unfit for Serrice: Of aii descriptions, 12.

## Grand Total, 362.

Since tire above report, the House of Repre. sentatives, by vote on the 8th of April. 1910, authorized the buiding of two ariditional hattie ships of the first ciass, at a cost of $\$ 0,000,000$ each.
The World-round Cruise of the American Battieship Fleet, 1907-1909. - On the 16th of December, 1007. a fleet of battle ships which comprised practieaily the whoie avaiabie fight ing force of the L'uited States Nary steanmeti away fron llampton Roads, on the longest and most notable cruise ever made by formidnbie an assembinge of ships of war. Its primary appointment. was to circuit the Ameriean continents from the Atiantic to the lacitic shores of the Cuited states, and the further direction of the royage was ieft for future decision. Uitimately, invitations from fureign goveraments drew the tleet to Australia. New Zeaiand, China and Japan, and it returned from these visits in the Far Fast by way of the Suez Canal and the Mediterrancan Sea. The duration of the iong voyage wns a rear. two monthe and six days, nud the total miles of ocean traversed were about 45,000. Many forcign ports were visited. South American. Austraiasian, Aviatic and European, nni boundless inospitaities were bestowed every. where on the flert. its stay of some days at San Francisco, inefore leaving American waters, was the grand event of tile viar to Americans of that coast, nnel its cail at Manila gave emphasis to American authorizy in the lhilippines.
'ntil it reachal San Franeisco the fleet was under the command of liear Admiral Robley D. Evans: but physicni disabilities then compeiied the retirement of Adiniral Evans, and be was succeeded in the eummand by Rear-Admiral Charies S. Sperry, under whom the remainder of the vorage was made. The sixteen battleshins of the flect were divided into two squadrons and four divisions, each division consisting of vesselis of the same generai type: the first divl. kion connjrised the Connectieut. Admirai Evnns's Hag slrip, the Kansas, the Vermont, ani the Loulsiana ; the second included the Georgia, the

## WAR, THE PREPARATIONS FOL

## WAR, THE REVOLT AGAINST

New Jersey, the Rhode Island and the Virglniu; the thiril lncluded the Minnesota, the Ohlo, the Missourl, and the Malne; the fourth contalned the Alnbama, the Illnoln, the Kearasge, and the Kentucky. The battle.shlps were accompanled by two supply-ships, a repair-shlp, and a tender, and were preceded from Hampton Roads by a flotilla of six torpedo-boats and a squadron of armored crulsers.

From San Franclsco to New Zealand the voyage of 6000 milles was made with one stop, only, at 1 onolulu, and so perifctly in order, it is sald, that only twlee dld any shlp fall out of the liue of formatlon, In which the shlps steamed steadily together, two hundred und fifty yarls apnrt. This order, with time table regularity of move. ineut, was unlutalned from leginnlug to end, and when, on the z2d of Fehruery, 1909. Presldent hoosevelt welcomed the ret urn of the theet to Ilampton Roads, he was nbie to say with just prlde: "This is the first battle fleet that ever clrcumnarigated the globe. These who perform the feat agair can but follow your footsteps. You hare falsified every predletlon of failure made hy the prophets. lu nll you: long crulse not an accident worthy of mention has hapnened to a slugle battleshlp, nor yet to the cruisers or torpedo boats. You left this coast $\ln$ a high state of battle efficiency, nuil you return whith your efil ciency Increased ns $n$ war machlue, as the lleet returns lu better shape than when lt left. In ad dition, you have shown yourselves the best of all possible ambissailors and herulds of pence. Wherever you have landed yon hnve horne yourselves so ns to make us at home proud of being your conntrynien."

Before the unlertaking of thls notahle cruise of a battle-shin fleet having no militant mission. many politicul reasons for and ngalnst the move ment were urged and dlscussed. From the naval point of rlew, professionally, the true motire of the project was stated undoubtedly bs Captaln A. T. Sahan, luanartlele puhllshed in the Nrientific American, and lt had no poiltical purpose whatever. "A perfectly sufficient reason," said Captain Muhan, "ls the expertenee to he galned by the fleet lo making a long royage, whieh otherwise mlght have to he made for the first time under the pressure of war. and the disalvantage of not hnvlog experienced ut lenst once the huge adminlatrative difficulties of $n$ nected with so distant an expeditlon by a large
body of veseels dependent upon their own re. sources. By 'own rebources must be understood. not that which each vessel carrles in hersedf, but self-dependence as dlatinguished from de. pendence on uear navy-yards - the great snare of peace tlmes. The renewal of stores and cual on the voyage is a hlg problem, whether the supply ressels accompany the feet or are Ul rected to join from polnt to point."

The following statistles are given of the cost of the cruise: "The fleet burned 400,320 tous of coal, costing 81,0i8,904. The trausportation of this coal by naral and hired colliers cust $\$ 1,463,825$. The totul conl bill was $\$ 2.646$, 149 There were used on the engines and other ma. chlnery 125,000 gallons of oll costlng $\$ 13, . \overline{\mathrm{m}}$. No otflelal statement has been made uf the cost of nmmunition used ln target and pattle practlec. The figure is put at alove a million doliars, and $\$ 20,000,000$ is csthnated as the tetal cost of the 14 montis cruise."

The World Naval Armament. - Fleets of the Great Powers in March, 1910. - A Britinh Parliamentary l'aper made public on the 29th of April, 10i0, gave statistles of the naries of the preater Powers as they existed on the 31s: of March. The following summary of the tipures appeared lu the next lssue of The Mail. The letters at the heads of the colunins signif! -E., Englaud: F., France ; R., Lussia: $\mathbf{G}^{\circ}$ Germany ; l., Italy : C., Cnited statca : anl J Japan:-

## WAR, THE REVOLT AGAINST.

A. D. 1899-1909. - General Treaties of Arbitration concluded since the First Peace Conference at The Hague. - "Arbltration in the sense of the present day dates from Jay's Treatr of 1704 , lo whleh Great Britain and the Cuited States bound themselves to arbltrate contested boundary clalms (Article 5): clalms preferrel hy Britlsh creditors (Artlcle 6) : aud. more especially, the claims of American and British creditors hased upon ' Irregular or illegal captures or condemnatlons of their vessels and other property' (Artlele 7).
-The frs: award under it [Jay's Treaty] Was made $\ln 1798$, so that exactly one hundred years elapsed untll the cuil of the First llague Conference. Arbltrations in this period were very
frequent. Writers differ as to the exact num ber; for example Dr. Darby lustances no less than 471 cases, hut in his enthuslasm for the peaceful settlement of internatlonal differences he has lncluded a large number of interstat, arrangements, whleli cannot be regarded as international arbitratlons in the strict seuse of the word. Mr. Fried, In hils Handbook of the leace Movement, enumerates some 200. 31 La Fun talne glves a list of 172 Instnaces to the sear 1900. Which should be reduced to $1: 1$ arbitratlons or agreements to arhitrate before the meet. ing of the First Confereuce in 1890. Profrsans John Bassett More is more conservative and enumerates 136 cases of Internathonal arbitration during the nlnetcenth century, in $5 i$ of which
own re. lerstood. berself, rom de. at suare and cual ther the sre di-

## WAR, TUE REVOLT AGAINST

the United Staces was a party, with a like num. ler of 57 to which Great Britain has been a party.
". But, a happliy sald by M. Descamps, arhiiration is not $s$ question of mathematics, and whether the instances be $4 \% 1$, according to Darby or 186, accorling to Professor Moore, the recourse to arbitration bids fair to become a hahlt with natlons. "- Janes Brown Scott, The Iligue Perce Conferences if 1809 and 1507, c. 1, pp. 210 and $224-5$.
Dr. Scott cites from M. La Fontaine a talle showing tile particlpation of cuch State in arbitrston. Germany has no representation in the table, either as a whole or by any of its parts : whercas every other natlon of the lenst imporrance in the world appears as having arhitrated some of its ulisputes, prior to the preparation of this table.
At the First Peace Conference, of $1 \times 90$, an attempt, strongly snpported, ras made to frame and secure the adoption of a treaty of arbleration by which the nations wonld hind themselves to arbitrate a carcinliy selecteci list of subjects. This failed, says i)r. Scott, in the work quoted abore: "owing to the oppositlon of Germany. Is a compromise, Article 19 of the convention for the peacefill ailjustment of international differences was adiopted:
.. Independently of exlsting general or special treaties inmposing the obligation to haver recourse to arbitration on the part of any of the signatory Powers, these powers reserse to themselves the right to conclude, either before the ratiflestion of the present convention or sulhequent to that date, now agrements, general or apecial, with a vlew of catendinir the obllyation to submit controversies to urbitration to alf caves whleh they enusider suliable for such sulhmissien' (reenacted in 1907 ay Articie 40.
"The article did not seemi at the tme to he of any speelal importance aml it was generaliy twoked upon as uscless beeanse independent and surerelgn Stat's possiess the right without specinl reservation to eonelude arhitrution agreements, general or special, withont heing specitiealiy empowered to do so. The fact 1s, howerer. that this article, insignifienut and useless as it may seem, marks, one nay aimost say, an era in the history of arbitration. The existence of the artiele has called attention to the subject of arbitration and by reference to it many States liave negotiated irbitration treaties. It is true that there is no legai obligation created by the articie and it is diftheult to tind a mural one, for it is not deciarel to be the duty of any State to conelude arbleration treaties. The mural effect of the article has, however, been great and salutary, and the existence of numerous arbltration treities based upon the reservatlon contained in the artlele shows the attention and respect which nations pay to the varions provisions of the ilague Confercnce."
i)r. Scott adds to these remarks a list of :reaties, of the character contempiated, which had been entered iuto since the First liagne Conference, up to the time at which he wrote, with appended notes describing brictiy the nature of the variongly broaiened or narrowed reference elnuses containei in them. A more extended list has heen publisited since by the iuternational Peace Bureau of Berne, Ewliteriand, for a copy of which I am lndehted to Mr.

Frederick P. Keppel, Secretary of Columbla Unlversity. New Yurk. The list beiow is mainly that of the International Peace Bureau, w/th the addition of a few more recent treatles to which the United States has been a party, obtalned from the State Department at Washington. Some, hut not all, of Dr. scott's notea have been borrowed, with his permission.
In the list of treaties as they are given here the date of signature is entered frat, with the prefir S. ; that of ratificution follows, whit the prefix IR. When two dates of ratificatlon are given, the first is that by the government named first in the entry of the parties to the treaty in question.

List of States between which Permanent Treaties of Arbitration have been concluded since the First Peace Conference at The Hague, with the Dates of their Signature and Ratification.

To maters of 1'peredure, either elvil or criminai, and to exiradision. haved on daiuares, when the principle of indematity his been recognized ly the partion.
- Differencen which may arise with regard to the itsturpretation or appilcation of a convention concluded or to be concluded between the bigh contracting yartifs and in which third powera bave participatelf or to which they bave adhered shall be excluded frous sittlement by arbitration.
-. 13. The treaties of this nolle clate are the few thus fir concluded which pledge the parties engaged in them to aubnit all differences that may arise betueen
them to pactic arbilrafion, reserving mo dispate, of any natury, tu feeonim a prathle entunglement in war The formula of refarence in them is subatantially thte:
"The bigh contractiag yarties agree to aubintt to the permanent court of Arbitration eatablished at Tha Hague liy the Convention of July $2 \mathrm{zs}, 18 \mathrm{wh}$, all diffr $r$ ences of avery nature that may arise between them, and which eannot be cettied by diplomacy, and thin even in tha cana of auch difrerencee as have had their origit prior to the concluilon of the preseut Convention.
C. - The referenca ciause in thete trestlen ia auletantlaily alike in all, to the followiug purpowe
dinereucel which may arise dr a liga aatare, or reiating to the interpretation of treatieg oxiating hy tween the two contracting parties, and winch it may not have been juasibe to settie by diplomacy, aball
 Isbedat she hayuety the iprovided. beve the the two contracting
in. - In the treuties of arbitration negotated lay the Liniced States the article of reference is like that last quoted. in Note 4 ; lut the following is added to ft:
quoted, in each individual case thy High coutracting lar. thex, lefore appealing to the l'ermanent (court of Arbltration, ahali coneluile a speclal Agreement, detining cleariy the matter in ditulte, the scope of the power cleariy the matter in displit, the scope of fhed for the formation of the Arbleral Tribunal ami the several gtages of the procedure. It In underationd that on the part of the l'nited states such mpecial agreements will fo inade by the I'resident of the United states, hy and with the aidice and consent of the genate thereof, and on the part of Ceata bicashall le sulpeet to the procodure required by the (onntitution and laws thereof. This was required hy the l'nited Ntates smate, whith rejected a number of eariter arhitration treathem, begos diated by Secretary Hay, because it. $\cdot \mathrm{y}$ whuld have allowed carem of controversy with othicr nations to be riferred to The llague Tribunal hy the Prewtient without sjectfle consent from the denate in each particular came. This brings the general ercaty of arbitration down very chowe to abminity, leaving almont nothing of its intended macific influphere to art.
E. - See below : A. 1). 1901 (Nuv.), and 1902.
A. D. 1901 (Nov.), - Treaty of Unreaerved Arbitration for ail Controversies between Bolivia and Peru. - On the 2ist of Novenber, 1901, the republics of Hoilvia and P'ert set a great example of trust in arhitration $1^{\circ}$ a meaus of settiong controversies hetweel nations, by coneinding a convention which piedged them for ten Jcars to submit every disagruement betwecn themseives to titat peacefnl sointion, reserving no question whatsoever. Their example, as wiii be seen, was remarkably imitated among their Spanish-A merican neighbors in the following year. The subjoined are the important articies of their compaet of peace:
"Auticle. 1. The high contracting parties piedge themselves to submit to arbitration ail the eontroversies whicit hare thas far been pending, and those which, while the present treaty is in force, may arise between them, whatever may be their nalure and causes provided tinat it has bcen fonnd impossibie to settie them hy direct negotiation.

Art. 2. In each case that may arise the contraeting parties shaii concinde a apcciai ayrecment $w i t i n$ a riew to determining the sub-ject-matter of the controversy, to fixing the points that are to be settied, the extent of the powers of the arbitrators, and the procedure to be observed.
"Ant. 8. In case tile bigh contracting par ties do not suecced in agreelng on the points referred to in the forcgoing article, the arbitratur shaii bc anthorized to determine, in view of the ciainis of both parties, the points of fact and of luw that arc to be decided for the settlement of the controversy, and to estabilish the mode of procedure to be foliowed.

## WAR, TIIE REVOLT AOAINST

"ART. 4. The high coneracting partics agree that the ariltrator ahali be the perminne't court of nrbitration that may be eatabilahed in virtue of the declaions adopted by the I'un-Amertian Conference now sitting in the Clity of Mexicc
"ART. B. For these two cames: (a) If the court referred to in the foregoing article sh til : be created, and (b) If there is need of haviig reconme to arbitration before that court shall ter ereateci, the high contracting partics agree to designate as arbitratur the Goverdmeot of the Argentine liepulilice, that nf Apain, and that of the U'nited Mexican statem for the perform. ance of this duty, one to act in case of the disa. hility of the other, and in the order in which they are named.

ARt. B. If. while the present treaty ls in force, and in the two contingencies referreit to in the foregoing articie, dilferent cases of arbitration siall arise, they shali be successively sulh. mitted for decision tu the aforesadid governments in the order alove established.
". lar. 7 . The arhitrator shall further be competent: 1. To pass upon the regularity of his appolntment, the validity of the agreenmat, and the interpretation thereof. 2. To adopt such measures as may be necessary, aod to settle all dititulties that may arise in the course of the de. bate. Concerving questions of a technleal ar scientife character that mar ar.se durlng the debate, the ipinion of the Roynl Geographical society of lundon or that of the lutermathonai Geodetic Institute of Beriin shall be asketi. 3 . To designate the tine in which he shail perform his arbitral functions.

- Aur. א. The arhitrator shall decide in strict obridene to the provisions of International inw. and. on questions relating to boundary, In strict obedience to the American princlple of "utt posseletis' of 1s10, whenever, in the agree. ment mentioned in artide 2, the application of the special rulen shatl unt be established, or to ease the arbitrator shall (not !) be authorized to declide as an arricuble referee.
"Art. 9 . The diecision shail depide, difinitely, every point in dispute, stating the reasuos therefor . It shall be prepared in duplicate, aod notice thereof shali ' viven to each of the parties through its ri 1 - ntative before the arhitrator.
" Aut. 10. The deci legally promomemi, shall diecide. within timits of its scope, the contest ime ween tho p - les.
- Aut. 11. The arbitrator shall tix, in his decision, the tine within withel said decision is to be executed.

Aht. 12. Noappeai from the decision shali be aliowed, and its expention is intrasted to the honor of the nations that sign this treaty.

Nevertheless. an appeai for revision to the arhitrator whon pronounced it shal. be admis. slble, provided that such appral he taken before the expiration of the itme fixed for its execntion. in the following cases: 1. If the decision has heen pronounced on the hasis of a counterfeit docimipnt. or of one that has been tampered with. 2. If the deeisioo has been. either in whinde or in part, the conserquence of a fart re. sulting from the proceedings or documents of the rase."
A. D. 1902. - Noble Treaties between Argentina and Chile for Obligatory Arbitration of all Disputes, and for Restriction of Naval

WAR, THE REVOLT AGAINBT
Armaments. - Notwithatanding the fortunate arrangement, in 1NW, for arbitration of a serious boundary dlapute between the Argentine Kepuliic and Clifie (see, in Volume VI. of this work, Abuentine Hepuhlic), thete continued to be trouhiemme frictlons between the iwn spanishAmerican neightora, while awaiting the declsinn inf the arhitrator, Kiag Bdward Vill., which wat not rendered until Nov. 23, 1012. Theme had led to a ruinous rivalry in naval armameat. Reporting nn this state of affairs in May of that year, Mr. Wiliam P. Lorti, the American Milister to the Argentine (fovernment, wruth: "Hotil conitrien have iacurred heavy expenm. for the equipment and maintenance of inrgely forerawed nrmy and naval forces. Chile has re. cently coneracted fur two formidahie warships involviag a heavy cost with the nhject of put. tiag her navy upin an equality with the Arguntine aave, whereupon Argentaa, not to be out done, contracteid fnr two war ships harier in size nad perhaps more formidahie at alike incary cost in order to contlmue and maintain her naval superiority. The contly expenditure incurral un accomnt of war and navil preparations la paralyalng iaduarrial activity and commerrini enterprise. Buth countries are largely in deht and confonted with a defleit. Both have appropriated their consersiom funds which hati Ween set apart for a specifte purpose, and which, it woulid seem. shouid have heen prevered in violable. Neither is able to make a furcign luan without paying a high rate of literest muld giring guarantees to meat the suditionai a jenses which their war police is incurring. amy inith Governnients know nutl their people kuow that the only remediy to wiscis either call resirt to meet existing finmeia! condlions is to lers frosid taxes of some viescrlptlon, notwithatanding nearly everything liat can be taxed is now taseml to th" utmost linit. The welght of taxation alrealy imposenl bears heavily uphe the eme. gles and activities of the people. The outlow is not promisit.g. husinesa heling duli, waze "mplorinent scarce. and fallures frequent."

Inppily, rood sense prevailed over this folly very sooni after Minister Lord wrute his acerome of li. Wu the of of dunc, 1902, the same writer was enableci to forward to Wasihington the text of four remarkuble "pence agreements" which had heen signemi on the 28th of May, at the Chijean eapital, by the ('hilean Minkter of Forcign Relations and the Argentine Minister Pleniputuntiarylto Chilc, who had been brought to negotiations hy the friendly mediation of Cireat Britain. The tour documents were: a political convention declaring a common interinational puliry no the part of the two republies; a hrond treaty of generai artitration; an agrecment for the reduring of naral forees: an agrecment for the conclusive marking of bonmiary lines by the engineers of the arbitrator, Kiog Ehiward. The general arbitmition treaty is no liess unre. served and comprehensive than that hutween Fern and Bulivia and offers another spanish Ameriean modei for imitation in the interest of pence. Its articies are as folinws:
"Articies 1. The high cootractiag partice bind themselves to submit to arbitration every differtly or queation of whptever nature that may arise between them, provided such ques tions do not affect the precepts of the respect. ive constitutions of the two couplries, and that

## WAR, THE REVOLT AOAINST

they can not be solved through direct negotiathon.
"Ant. 2. Thin treaty does nete embrace thone quentloms that harn given riee in definite agree. ments botween the two partles. In suct. caste the arbltratlon shall be fimited exclusively to questlons of valldity, interpretation, or fuinill. necit of theme agreemients.
"Art. 8. The hlgh contracting partics denig. nste as arbitrator the Government of IIIn Brltannic Majesty or, In the erent of elther of the powers having broken of pelations with the British Governraent, the Swlss Government. Within sixty dny, from the exchnnge of ratif. cations the Britali Government nid tho H wisa Government shall be asked to accept the charge of arblerators.
"Ant. 4. The points of enntroversy, ques. tions or divergencles ahall be sprelfed by the bigh contracting parties, who may determine the powers of the arbitrator or any other cir. cumstance conneeted with the procedure.
"Airt. 5. In the case of divergence of opin. Ion, elther party may sollcit the intervention of the arbitrator, who will cietermine the elrcumstances of procelure, the contractlog partles placing every means of Information it the ser. wice of the arbitrator.

- IRT. G. Elther party is at liberty to name one or more commissioners near the arbltrator.
"Ant. 7. The arbltrator la quallited to deelde upon the valddty of the ohllgation and lits Interpretation, as well as upon questlons as to what diticulties come withln tho sphere of the arbl. tration.
"AIrt. 8. The arbltritor shall deelde $\ln$ ac. emrdnace with liternational latr, unless the obligation involves the application of spectal rules or he lave becn anthorized in act as fromiliy melliator.
"Allt. 9. Tite award shall deflatiely dechle each point of contruversy.
"Alis. 10. The awand shall be drawn up in two coples.
"Ant. 11. The awaril legally dellvercd shail deelde within the limits of its scope the ques. thon between the two parties.
"Ant. 12. The arbitratior shall specify in his award the term within which the award shall be earried out, and be is competent to deal with any queston rerising as to the fulfilinent.
"dilt. 13. Therecan be no uppeal from the award, and its fulifilment is futrusted to the honor of the slgnatory powers. Neverthciess, the recourse of revision is almitted under the following clrcumstances: 1. If the award be gisen on the strength of a false document: 2. If the award be the result, elther partlally or totally, of an error of fact.
"Art. 14. The contractlng pnrties shnll pay thels own expenses and eacli a half of the expenses of the arbitration.
"Abt. 15. The present agrecment shall last for ten years from the date of the exchange of the ratifications, and slatl be renewed for another term of ten years, unlces either party shall give notice to the contrary six months before "xpiry." - Papers relating to the Foreign Rela. tions of the United States, 1902, pp. 13-20.

- stifi another striking feature of thn gress lay in the prominent place given reprenentatives of labor and commerce

WAR, THE REVOLT AGAINST
ture comprised in two meetings, aldressed by prominent ieaders of the various industries. The genersl position was weli taken by Mr. Sainuel Gompers. Preildent of the American Federation of Labbor: ' Not as workers wili we permit ourseives to be shot down in order to conquer the markets of barbarians and savages. 1 know of no gathering of labor in the last twenty-five years which has not deciared itseif uuequivocally for international brotherhood and peace.'
"A final and chief feature of Interest lay in the notably practical character of the vast majority of speakers and listeners. The Congress was no 'collection of cranks and fools,' as a hard-headed man of affadre liubbed it in passing the hail, wlathout fooking in to verify his statement. Neither was it a coliection of whitebiooded, weak-kneed theorists, feebly appreciatlng the actuai conditlons that govern Indivlduai passious and national prejudices. As one gisnced around, there were the faces of great captains of Industry. of practicai leaders of fabor, of men who huik large in commercial enterprises, of trusted poitical leaders. Nor was the Congress any mere anti-war affair: its business was positive, not negative; it was to affirm the necesslty of suhstltuting reason for passion. There was a generai sentlment that it ought to empinsize, not 'malnbows' or ilistant Citopias, but ouly practleai plans certain of reuizallon, and of reailzation, too, not in the far future, but in this very coming summer by action at The Hague." - The Outlook, April 27. 1:007.

Among the prominent speakers were Mr. Carnegle, who presided, Mr. Root. Secretary of Sinte, Governor Hughes, of New York, Ambas. sador Bryee, Mr. Wiillam J. Bryan, Congressman Barthoidt. President of the Amerienn group in the Inter-parilamentary C'nlon, Profes. sor Mansterberg. President Eliot, Baron d'Es. tournelies, the eminent peace advocate of France, and Mr. W. T. Stead. Mr. Ruot pointed out the great olstacle to arhltration-a fear that the tribunais selected would not be impartial, beenuse artidrators are thought often to act ilpiomatically rather thrir judiflaily. "We neell." he sald, "for arhimitors, not listinguished rubile men concerned in ail the interna. tionni questions of the day, but judges interested only in the question appenring on the record be. fore them. Plainiy, this end is to be attulned by the estabiishment of a court of permanent judges."

Mir. 3 ryun maie the exceilent suggestion that in time if wnr money-leuders shnili not be aiioweli to wax fat by loans, taking advantage of a nathon's weaknems and urghg it to continue hustillties. A ioan by the citizens of a neutral natlon, he pointed out, is practicaliy a inan by the nation itself, and shonld be objected to as much as furnishlng shot and shell.
Mr. Stead, writing of the Congress in the imerioan Revieso of Reviews. characterivei it as " in many reapects the most notable Congress of its kind that has ever been held in the Ohl World or the New." and as being "the ploneer or John the Bnptlst of the Second International Conference" smon to meet at The Hague. "It represented," he said, "the first rudimeritary, crude, but nevertheiess definte effort on the part of the New Worid to impress lts wili on

WAR, THE RRVOLT AGANNST
the Oid Worid." But he thought the retolucions of the Congrens, "ss a whole, were harlly worthy of the importance of the occasion or the representative character of the conference," and criticised the commlttee for taking "no steps for presaing thelr adoption upon other govern. menis then their own."
A. D. 1907. - Second Intermatlonal Peace Conference at The Hague: Its Conventions, Declaratlons, and Recommendations. - Text of the Convention for a Peclic Settiement of International Disputes, and of the "Final Act," with lts recommended Dreft Convention for the Creation of a Judicial Arbitration Court. - "Pursuant to a request of the Interparilamentary Union, heid at St. Louls in 1904, that \& further peace conference be helf. and that the President of the Unlted Staters invite all natlons to send representatlives to sueh s conference, the iate Secretary of State, at the directlon of the President, Instructed, on October 21, 1804, the representatives of the United States accredited to each of the slgnatories to the acts of The Hague Conference of 1889 to present overtures for a second conference to the ministers for forelgn affairs of the respective countries.
" The repiles recelved to this cireuiar lustruetlon of October 21, 1804, indicated that the proposition for the caliing of a seconil confurence nuet with genersi favor. At a iater perioul it was intimated by Russla that the initiator of the First Conference was, owing to the restorntlon of peace in the Oriert disposed to uudertake the cailing of a new conference to mnt Inue as well as to supplement the works of the first. The offer uf the Czar to take steps tetulsite to convene a sceond internatlonal p:ace conference was gindiy welenmed by the I'resident, and the Final Act of the Conference oniy recless in its preamble the invitation of the Iresident.
"The Russlan Government thus assumed thp cailing of the Conference, aud on Aprii 12, 190 m. submittid the following programme, which was acceptuble to the Powers generaily ant which served as the basis of the work of the Conference:
"1. Improvements to be made in tive prosi. slons of the convention relative to the peacuful settiement of lnternational dilsputes as repards the Conrt of Arbltration aud the luternational commissions of inquiry.
"2. Adidions to be made to the provisings of the convention of 1890 relative to the laws and customs of wnr on land -among others, those concurning the openlng of hostilities, the rights of neutrais on iand, etc. Declaration of 1490. One of these itaving expired, question of its being revlved.
" 3 . Framing of a convention reintlve to the laws and customs of maritlme warfare, eoncirning -
.T Tie speclai operations of maritime warfare. such as the bombardment of ports, elties. and viliages by a naval foree; the laying of curpe does, ete.
"The transformation of merchant vesecis in:? war ships.
"The private property of beliggerents at sris.
"The iencth of time to be granted to mer chant shlps for their departure from inits wif neutrais or of the enemy after the opeulng of hostlities.

instrue the proretence If it was be First tion of ake the as uelli t. The to con ference and the es ia it
" The rights and dutien of neutruas at sea, among others the questions of contraband, the rules appiicabie to beiligerent vessele in neutral ports; destruction, in cases of rie major, of neutrai morchant vemels captured as prizes.
"In the mild convention to be drafted there would be introduced the provitions reiative to war on land that would be aleo applicahie to martime warfare.
"4. Additlons to be made to the conrsntion ol 1809 for the adaptatlon to martifue warfare of the priaciples of the Geners Couvention ol 1864.
"The United States, however, reserved the right to hring to discussion two matters of great importance not inciuded in the pro gramme, nameiy, the reduction or ilmitation of armaments and reatrictions or iimitations upon the use ol force for the coliection of ordinary puhilc dehts arising out of contracts.
"It was finaily declded that the Conference should meet at The IIague on the 15 th day of June, 1907, and thus the Conference, proposed by the President of the Unlted States, nad convoked by IIer Majesty the Queen of The Neth. erlands upon the invitation of the Emperor of All the fuscias, assumed defnite shape and form.
"In the circulars of Octover 21 and Denember 16,1004 , it was suggested as desirabie to consider and adopt a procelure by which States nonsignatory to the originai acts of The Hague Conlerence may become adhering parties. This suggestion was taken note ol by the Iussian Government and invitations were issued to forty seven countries, in response to which the representatives of forty-four nations assembied nt The Hague and took part in the Confercnce. No opposition was made to the admission of the nonslgnatory States."
The delegation of the United States to the Conlerence was composed of the foliowing members: Commissioners plenipotentiary with the rank of ambassador extraordinary: Joseph 11. Choate, of New York, Horace Porter, ol New York, Uriah M. Rose, of Arkansas: Commissioner pienipotentiary : David Jayne II!H, oI New York, envoy extraordinary and minister pienipotentiary of the United State to the Fictherlands; Commisaioners Pienipotentiary with rank of minister pienipotentiary: Brig. Gen. George i3. Davis, Juige-Advocate-General, U. S. Army, Rear-Admiral Charics S. Sperry, U. S. Navy, William I. Buchanan, of New York: Technical delegate and cxpert in internatlonal law: James Brown Scutt, of Caiiforni:a; Technical deiegate and expert attaché to the Comnilssion : Charies Henry Buticr, of New York: Secretary to the Commission: Cbandier flale, of Malne; Assistant secretaries to the Commis. sion: A. Balily-Bianchard, of Louisiana, Witifam M. Malioy, of lilinois.
" The Dutch Government set aside for the use of the Conference, the Binuenhof, the seat of the Stater-Gen: rai, and on the 15 th day of June, 1007, at 8 ociock in the afternonn, the Conlerence was opened by his exceilency the Dutch minister for forcign affalra in the presence of delegates representing Iorty four mithons. . . . At the conclusion of the address of weicome hls exceliency suggested as president oI the Confereace Ilis Excellency M. Nelldow. tirst deiegate of Russia, and, with the unani-
mous consent of the assembiy, M. Nelidow ac. cepted the presldency and delivered an address."

In accordance with the suggestion of the president, an order of procedure, in tweive articles, was adopted, and the Conference was divided Into four Commissions, between which the suhjects specitied in the programme of the Conference were apportioned. "The actual work of the Conference was, therefore, done in commlesion and committee. The resuits, 80 far as the severai commlasions denlred, were reported to the Conference sitting is picnary aession for approvai, nad after approvi, suhmltted to the small subediting committee for tinal revisiou which, however, affected form, not substnnce. The results thus reached were inciuded in the Finai Act and sigucd hy the pienlpotentiaries on the 18th day of Uctober, 1907, upou which date the Conferenceadjourned." - Report of the Dele. gates of the V'nited States ( 600 h Congress, 1 st Less. Senate Doc. 444).
The results ol the Conference are embodied in fourteen Conventions duly formulated and sigued, and a "Finai Act "In which certaia principles are deciarei as being " unanimously admilted." Of the Courentions enterel into, that most inportant one which provides means for a pacifir nantion of international contlicte is Lut a revislon of tue Convention for the same purpose which the Powers represented at the Firat I'eace Conference, of 1890. gave adhesiou to, and the full text of which is printed in Voiume VI. oI this work (pp. 856-9). To a large extent the articies of the Convention are unchanged, and the changes made are mostiy in the nature of na amplltication of provisions and prescriptions of procedure for carrying out the agreemeuts set forth in the compact of 1899 . This occurs es pecinily in I'nt III., relating to "International Commissions of inquiry," the specitcatlons for which, merely outilned insix articies of the Convention of 1899, were detaiied with precision in twenty eight articles of the Convention of 1007. A similar amplificatlon was given to the chapters on "The System of Arbitration" nni "Arbitrai Procedure." By a verlal change of some significance, the partics to the Convention are designated "('ontructing Powers," Instead of "signatory Powers," as before.

Other iniportant features of the revision are noted lu an artlcle winch the IIon. Darid Jayue Hili, one ol the American Commlssion at the Conference, communlcated to The American Reriens of Rerieres of December, 1907. Dr. Hili wrote:
"With regard to good offleses and mediation, a siight step forward was taken by the acceptance ol the American proposition thit the initlative of powers forcigu to the coutroversy in offering them la not oniy "usefui" hut desimbie.' Greater preclsion has been given to the operntion of commlasions of inquiry, whose great utllity has already been testud, hut it was declidel that the functions of sueh commissions should be confined to a determlation of facts and should not extend to tixing responsiblity. As regaris arbitration, while it was reasserted that in questions of a legal character, and esperlaily in the Interpretation or application oi internatonal conventions, arbitration is recos. nized by the contracting powers as the most effi. cacious and at the same time the most equitahle

WAR, THE REVOLT AGANNST
WAR, THE REVOET AGAINST
means of setting differences that have not been adjusted by diplomacy, and, 'in consequence, It would be desirabie thet, in contentions of this character, the powers should resort to arbitra. tion.' It was not found possible to render this resort an obilgatlon.
' It is necessary to state, howerer, that while unantralty upon thls proposal was not obtaiuable - even for a convention that omitted aij questions affecting 'the vitai interests, independence, or honor' of the contestants and included oniy a meagre lift of mainis unlmportant subJects - 82 powers voted in favor of it, only 9 were opposed, and 8 abotained ir :i 1 voting. At practical unanimity was hcid to be necessary for the Inciusion of a convention in the inal act even this very molerate attempt at obligatory arbltration was unfrultfui. Stili, as thls strong manifeatation of a dispusitlon to make a definite engagement could not conv:niently be nullifed without being in some measure recognized, it was resolved, with four abstcntions, that the first commission was: "Unanimous (1) in recog. nizing the principle of ohifgatory arbltration; and (2) in declaring that certain differences, notabiy those reintlve to the interpretation and appilcution of con ventlonal stipulations, are susceptible of belng submitted to obligatory arbjtration without restriction.'
"Regarding thls resolntion as a retreat from the mure advanced position that had been taken hy 82 powers, the head of the American delegation cleariy expiained its attitude and zefralned from voting.
"It must. In fustiee, be added that some of the powers roting against an ohilgatory arbitration convention probabiy did so chiefly for the purpose of avoiding the isolation of othere, and thut some of the powers most earnest in opposing the project not only have negotiated speriai triaties of obiigatory arbitration, hut deelare their Intention of negotiating many more. The atate of the quesilon, then, is this : Ali accept the principie of ohligatory arbitration in certain clases of cases, 82 powers are prepared to make definite engrgenients with all the rest, 9 prefer to make them only with states on whos responsi bility they can rely, and 8 decline at prusent to commit themseives."

On the part of the United States, when this important Convention was submitted subsequentiy to the Henate, it was ratiled conditionally. by the following resolution, adopted Apri 2. 1008.
"I Remoled (timo-thirds of the Sematore prevent concurring therein), That the Senate advise and consent to the ratification of a convention signed he the delegates of the C'nited states to the weond intermational Peace Confercnee, heid at The liague from June sixtcenth to October cighteenth. nineteen hundred and eeven, for the pacifie settiement of internationni disputes, subject to the deelaration made by the delegates of the Unitcd States before signing said convention, namely:
" Nothing contalned in this convention shail be so construed as to require the United States of Amerim to depart from Its traditional policy of not intruiling upon, interfering with. or cntanglingitseif in the poiftical questions of pollcy or Internai minifisirstion of any forelgn thate: nor shail anything contained in the said conven. tion be construed to impiy a relinquishment by
the United States of Its traditional attitude towand purely American quentions.
"Resolved further, as a part of this act of ratifleation. That the United Stste approves this convention with the understanding that recourse to the permanent court for the settjement of difference can be had only by agreement thercto through general or special treaties of arbitration heretofore or hereafter concluded between the parties in dispute: and the United States now excreises the option contained in article fifty three of sald conventiou, to exclude the formil lation of the 'compromis' by the permanent court, and hereby excludes from the compt. tence of the permaneat court the power to frame the 'compromis' required by general or speciai treaties of arbitration concindel or hereafter to be conciuded by the United States, and further expresaly declares that the 'compromis' required hy any treaty of arbitration to which the United States may be a party shall be settled oniy by agreement between the contracthg parties, unless such treaty shall expressiy provide otherwise."

Of the other Conventions agreed to and slgned at the Conference lt wlif be sufficient to cive here in part a summery statement of their objecte and provisions which was prepared by the Hon. James Brown Scott, one of the Teclinical Dejegates to the Conference from the lnitel States, originaily for pubilcation in The American Journal of International Laio for Janu. ary, 1008. They are described by Mr. Seott as foliows:

- The second is the conrention restricting the use of foree for the recovery of contraet debts. This was lntroduced by the American deiegstion, loynlly and devotedly seconded by Doctorlirago. who has battied for the doctrine to whiel he has given his name. Without the support of Doctor Drago, It is doubtfui If Latin America - for whose benefit it was introduced - woula have voted for this very lmportant doctrine. The propositic. in very short: it consists of but three artjeles, but we inust not measure things by their size. In full it is as foilows: 'In order to avoid between nations armed contlicts * pureiy pecuniary origin arising from contra, "il debts elaimed from the government of one enuntry by the government of another country to he due to its nationais, the contraching powers agree not to have reeourse to armed foree for the collection of such contractual debts.
". However, this stipuiation shail not be sp. pilcable when ticedehtor state refuses or leares unanswered an offer to arbitrate. or, in case of acceptance, makes it impossible to formulate the terms of suhmlssion, or after arbitration, fails to comply with the award rendered.
. ' It is furtier agreed that arbitration bere eontemplated siall be in conformity, as to procedure, with Titic 15. Chapter I!I of the monvention for the pactic settienient of inturnational disputes siopted at The Hagur, and that It shail determine, in so far as there shall he no agreement betweeu the parties, the justice. and the amosint of the debt, the tlme and mode of payment tbereof.'
is The third convention reiates to the opening of hostilitles and proviles, In Artlicle 1, that the coutracting powers recognize that fostifitles between them should not commence without notice, which ahall be either in the form of a
formal declaration of war or of an vitimatim in the nature of a deciaration of couditlonal war. This is to protect belligereuts from surprise and bad faith. Artieic II is menn: to safeguard the rights of neutials. The atate of war should he notifed without delay to neutral powers, and shall oniy affect them after the receipt of a notification, which may be sent even by teie. gram.".
"The fourth convention concerns the laws and customs of iand warfare, (and is] a revision of the convention of 1899 . It is highly technical and codifes in a humanitarian spirit the warfare of the present.
"The fifth convention attempts to reguiate the rights and dutlea of neutral powers and of neutral persons iu case of land warfare. Short, but important, its guldiug spirit is exprewsed in the opening paragraph of the preambie, namely, to render more certain the rights and duties of neutral powers in case of warfare upon iand and to reguiate the situation of belligerent refu. gees in neutral territory.
"The sirth is the convention concerning enemy merchant ships found in enemy ports or upon the high seas nt the outhreak of hostilities. Custom forbicls the capture of eneny vessels within the port of the enemy on the outbreak of hostilities and allows them a ilnited tlme to dis. churge or load their eargo nad depart for thelr port of destination. The attempt was hade to estabilsh this custom or privilege as a right. The proposition, however, met with serious opposition and, instead of the right, the conventhan states that it is desirubie that enemy ships he permitted freeiy to iease the port. The conventlon, therefore, was restrletive rather than derlaratory of existing Internationai practice. The same might be satd of another provision of the convention concerning the treatment of enemy merehant silps upon the high seas. It masy be said that the expression of a desire is tantamount to a positive declarailon, hut, strietiy construed, the eonvention is not progressive. it lessens rights acqulred by eustom and usage, although it does, indeed, render the privllege granted unlversal. The American delegation, therefore, refrained from signing the conven. thou.

The seventh convention deais with the trausformation of merchant shlps Into ships of War, and it must be salit the: the positive re. suits of this convention are of littie or no prac. tical vaiue. The birning question was whether nerchaut shlps mitht be transformed into then-of-war upon the high seas. As the transformintion of merchant vescets into war vessels upon the high seas cumsed an internatonal commotion during the recent llusso-Jnpanesw war. Great Britain and the United States insisted that thi transfer shonifl only be nllowed withln tine terri. crefal jurisiletion of the tmasforming power. some of the contlacntai states, on the contrary. refiseal to renounce the exereise of the ulleged right. The grat maritlme states were thus dl. rillod, and as the question was ton simple and ton pialn to aimilt of compromise, it was agreed to drop it entirely for the present. In ordicr. however, that something might remain of the eareful and elabomte discissions of the subject. a serles of regulatlous was alrawn up recarilins the transformation of merchant ships into ves. seis of war, declaratory of internationni custoni.

Indirectly, the rightfuizess or wrongfui neas of privateering was concerned, ara. Inasmuch as the United States would not $\mathrm{CO}_{1} \mathrm{t}$.nt to aboiish privateeriug uniess the Immunliy of prlvate property be safeguarded, the American delegation abatained from sigalag the convention.
"The elghth convention reiates to the piacing of submarine automatic nines of contact, a subject of present and speclal interest to beliiger. ents; whlle the interest of the neutrai is rery generai. . . . Mines brenk from their mooring's and endanger neutral ii.e and property. The conference, therefore, desires to reguiate the use of mines in sucin a way as not to daprive the belligerents of a recognizeti and jegitimate means of warfare, but to restrict, as far as posalble, the damage to the Immediate belligerents.
"The ninth convention foibade the bombardment by navai forces of undefended harbors, vilages, towns. or buitilings. The presence, however, of military stores would permit bonbardment of such ports fur the sols purpose of destroying the stores. provided they were not destroyed or delliverad up upon request. Notice. however, should be given of the inteation to bombard. In like manner, the conventlon permitted the bombariment of such uniefended places if provisions were not supplied upon requisition to the naval force. Bomberdment, however, was not aliowei for the coilectiou of mere money contributlons.
" The tenth convention adapted to maritime warfare the principies of the Geneva Conven tion of 1 MUs.

- The eleventh convention reiates to certaln restrietions in the exereise of the right of capture in maritime war. It is a molest document. but is sif that was saved from the wreck of the immunity of private property. The American delegation urger the aloolition of the right of capture of imoffending enomy private property upon the high siso, but great iuaritime powers such as Great i3ritain, France, inssia, and Japan were unwiiling to relinquish this means of hringing the enemy to terms.
"The tweifth convention sought to estabish an international court of prize, and there oniy remalns the ratification of this convention by the contractlag powers in order to call into being thils creat and buncflce:it instltution. For years enlightened opinlon has protested agninst the right of bellifcrents to pass thai fudgment upon the lawfintuess of the capture of nentral property, and it is a piranire to be ahie to state that the 'luat sts of the nentrals in the neutra' prize are hencciorward to be piaced in tire hands of neutrai judges with a representation of the belligerenta, in order that the rights of all collcerned may be carefuily welghed and consintired.
"The thirtecnth convention concerns and seeks to reguiate the righta aud duties of neutrai powers in case of maritime war. This is an claborate codification of the rights and duties of neutrais in which the conference essayed to gen. eralize nud deline on tise one hand the rights of neutrals and the correlatlve duties of the helligerents, and In the serend place to set forth in Wetall the futies of neutrals, thas safeguarding the rifhts of builigerents in certaln phases of maritlme warfare. . . . The result, howerer,

## WAR THE REVOLT AGANST

Was unatiafactory to some of the larger mari. time powers, whiell prefer their present regulations on the sobject of neutrallty or which were unwilllug to accept the modifications proposed. The United States was not satisfed wlth certain provislons of the conventlon, and rescrved the right to study the project in detall before ex. presslig a thal oplnion. It therefore abstalned from wotlog and siguing.
"The fourterenth conventlon is a reenactnent of the declaration of 1899 forbldding the lunach. ing of projectiles and exploslves from ballows. The orlifinal declaration was agread to for a privind of tive yeurs, and as this period had expired the powers were withont a rugulation on the subject. The reennctment provided that the present declurntion shall extend, not merely for a period of tive years, but to the end of the Third Conference of P'uce." - lieprinted in S'nute Document Io. 433, 60th Congrest, 1at Nasion.

A ppended to these Conventions are the Resolutions or Declarations of nceepted l'rinciples eubudled In the "Final Act": and these ure far from being the least lniportant of the froits of the Conference. They need pretentation in full.

Final Act of the Second Interantionai Peace Conference. - "At a series of meetings, held from the litb June to the 18th Wetoher, 100\%. in which the above Delegates [unned in a premmble] were throughont unhnited by the thesine to realize, lut the fullest posslble atensure, the gencrous views of the angust initiator of the Conference aml the intentlous of their Gov. eruments. the Conference drew up for submission for signatire by the l'lenipotentiaries, the text of the Conventlous and of the l)eclaration entumerated below [uanied in thelr order, as sumntarized above] nad anuexed to the present Ict:-
-These Conventions and Deeluration shall form so many separite Acts. These Acts shall be dated this day, and nisy be sigued up to the aththene, 1908, at The lligue, hy the l'senifotontiaries of the lowers represented at the secomil leace Conference.
"The Conference, nctunted by the spirlt of mutund agreement and coneession churacterizing its deliherations, has agreed npon the following Declaration, whleh, while reserving to each of the l'owers represented full llberty of netlon as regards voting. cnables them to allirun the princlples whlch they regard as unanimonsly admitted:-
" It is unbuimous -
$\because 1$. In miniting the principle of compnal. sory arbliration.
$\therefore 2$. ln deelaring that certain dlsputes, in partlcular thove relating to the Interpretatlon unil uppllation of the provisions of finternuthonal Agrements, nay be suhmitted to com. pulsory arbltration without uny restriction.

- Finally, it is unanimous in proclaiming thit, although it has not yet been found feastble to conclude a Convention lut thes sanse. nerirtheless the divergences of opinion wbich lime inme to llght have ant exceeded the hounds of judieial controversy, and that, hy workluc together here during the past four moniths. the collected powens not only have leurnt to understand one mother and to draw croser together, but have succeeded in the

## WAR, TIIE REVOLT AGANST

course of thls long collaboratlon in evolving a very lofty conception of the common welfare of huuanlty.
"The Conference has further unanlmonsly adopterl the following lesolition : -
"The Secoud l'eace Confercuce contrms the Realution adojud hy the Conference of 1 stio in regard to the linitutlon of inlltary expenilture; und inammuch as milltary expenditure has cunsiderably increased ln almost every conntry since that tinie, the Conference declares that it is eminentay desirable that the Governments should resume the serious examlnation of this question.
" lt has besides expressed the following opin. lons: -
"1. The Conferuce calls the attention of the Signutory Powers to the advisabllity of udopt. ing the annezed draft Convention for the erea. tion of a Judlelul Arbltration Court, and of bringiug lt inte force as suon as an dgrietment has luen reached respeting the selection of the Judges and the constitution of the Court.
$\cdots 2$. The Conference expressers the opinhon that, in case of war. the responsible authoritios, civil as well as military. should make it their speclal duty to ensure und safegnard the nusintenunce of speclicic relations, more especially of the commerclal und luinstrial relatlons betwern the inhabltaints of the beillgerent states und nentrul conntries.

- 3. The Conferunce expresses the opinion that the l'owers slould regulate, by special Treaties, the prosition, as regarde millitary chaturs, of foreigners reslding whthin their turritories.
"4. The Conference expresses the oplaion thst the preparation of regulatlons relative to the laws and customs of navai war should fits ure in the programme of the next Conference. nnd that in any case the Powers may apply, us far as posaible. to war by sea the princlules of the Conrention relative to the Laws nnil Cutoms of War on land.
-Finally, the Coufcrence recommends to the Powers the assembly of a Thlrd Puace Confir. ence, which might be held within o perion cor. responding to that whlch has elapsey since the preceding Conference, at a dste to be tixed hy common agreement between the Powers, and it calls their attention to the necesslty of prepar. lag the programme of this Third Conference a sufficient time in adrance to ensure lis deliherstlons leing conducted wilh the cecessary suthority and expedition.
"In order to attaln this object the Conference conslalers that it would be very desiruble that. goune two years hefore the probsble date of the meeting, a preparatory (ommittee shouli! he chargerl by the Governments with the tisk of colloctlng the vurions proposuls to le submitted to the Conference, of ascurtalnling what subjeets are ripe for emboliment in an International legulation. and of preparing a programme whilh the Governuents slionld decide uprili in sutficient time to enable lt to be carefully exanined by the conntries interested. This ('om. mittee should further be intrusted wlth the tank of proposintr a system of organization and proeedure for the Conference itself.
- In faith $w$ hereof the Plenipotentiaries lase algned the present Act and have aflixed thels seals thereto."

## WAR. THE REVOLT AGAINST

Draft Conveation recommended for the Creation of a Judicial Arbitration Court. - The following are the more lmportant provisions of the "annezed draft Convention for the creation of a Judicial Arbitration Court" which the signatory Powers are asked, in the first of the "Opinlons" expressed ebove, to consider "the advisablitty of adopting":
"Article 1. With a view to promoting the cause of arbitration, the Contracting Powers agree to constitute, without altering the status of the Permanent Court of Arbitration, a Judicial Arbitratlon Court, of free and eany acceas, composed of Judges representing the various juridical systems of the world, and capable of losuring continuity in jurisprudence of arbltration.
"Anticle II. The Judicial Arbitration Court Is composed of Judges and Deputy Judgea chosen from persons of the hlgbest moral reputation, and all fulfilling conditions qualifylug them, in their renpective countries, to occupy high legal posta, or be jurists of recognized competence in matters of internatonal law. The Judges and Deputy Judges of the Court are sppoiuted, as far as possible, from the members of the Permanent Court of Arbltration. The appointment shall be made within the six months following the ratification of the present Convention.
"Article III. The Judges and Deputy Judges are appointed for a period of tweive years, counting from the date on which the appointment is notified to the Administrative Council created by the Convention for the Pracific Settiement of International Disputes. Their appolntments can be renewed. Should a Judige or Deputy Judge die or retire, the vaeancy is filled in the manner in which his apfointment was made. In this case, the sppointment ia made for a fresh period of twelve years.
"Article IV. The Judges of the Judicial Arbitration Court are equal and rank according to the date on which their appolntment was notlifed. The Judge who is senior in point of agc takes precedence when the date of notification is the same. The Deputy Judges are assimilated, in the exerclse of their functions, with the Judges. They rank, however, below the latter.
"Article $V$. The Juiges enjoy dipiomatle privileges and immunlties in the exercise of their functions, outside thelr own country. Before taking thclr seat, the Judges and Deputy Juiges must swcar, before the Administrative Couscil, or make a soiemn afflrmation to exe cisa their functions impartially and consci tiously.
"Article VI. The Court annually nominatea three Judges to form a special delegatlon and three more to replace them should the necesslty arise. They may be re-elected. They are bal. loted for. The persons who secure the lergest number of votes are considered elected. The dielegation itself elects its Preaddent, who, in lefauit of a majority, is appointed by lot. A member of the delegation cannot exercise hit dutiea when the Power which appointed hlm, or of which he is a natlonal, is one of the parties. The members of the delegation are to conclude sll matters submiltted to them, even if the period for whlch they have been appointed Judges has explred.

## WAR, TIE REVOLT AGAINST

"Amiticle V1I. A Judge may not exercise his judicial functions in any case in which he has, in any way whatever, taken part in the decision of a Natlonal Tribunal, of a Tribunal of Arbitration, or of a Commission of Inquiry, or has igured in the suit as counsel or advocate for one of the parties. A Judge cannot act as agent or advocate before the Judicial Arbltratlon Court or the Permanent Court of Arbitration, before a Special Tribunal of Arbitration or a Commission of Inquiry, nor act for one of the parties in any capacity whutsoever so iong as his appointment lasts.
"Article X. The Judges may not accept from their own Government or from that of any other Power any remuneration for services connected with thelr duties it their capacity of membert of the Court.
"Article XI. The seat of the Judicial Court of Arbitration is at The Hague, and cannot be transfersed, unless absolutely obllged by circumstances, elsewhere.

- Article XII. The Administrative Council fulfills with regard to the Judictal Court of Ar. bitration the same functions as to the Permanent Court of Arbleration.
"Artiche XIV. The Court meets in session once a jear. The session opens tbe third Wednes. day in June and lasts until all the business on the agenda has been transucted.
"Ahticle XVII. The Judicial Court of Arbitration is competent to desl with all cases submitted to lt , in virtue either of a general undertaking to have recourse to arbitration or of a special agreement.
"Article XXXII. The Court itself draws up its own rules of procedure, which must be communicated to tbe Contracting Powers. After the ratifcation of the present Conventlon the Court shall meet as early as possible in order to elaborate these rules, elect the President and Vice-President, and sppoint the members of the delegation.
"Abticle XXXIII. The Court may propose modifications in the provisions of the present Convention concerning procedure. Tbese proposals are communicated through the Netherland Goverament to the Contracting Powers, which will consider together as to the measures to be taken."

The sequent International Naval Conference at London in 1908-09. - The action of the Peace Conference which contemplated the estahlishment of an International Prize Court (embodied in the Twelfth Convention described above) had a sequel in the next year, resulting from the suggestion by the British Government thas: prellminary to the creation of such a court, the prior holding of an International Na ral Conference was desirabie, for the purpose which it explained in the following words: "Having regard to the importance attached by hia Majesty's Government to the setting up of that Court, they decided to take the intiative in in. Flting the co-operation of the Powers whose belligerent rigbts would be most directly af. fected, in formulating in precise terms a set of rules relative to the lat of prize, which should he recognized as cmbodying doctrines held to be grnarally binring as part of the existing law of nations." In connection with this suggeation a list of questions was submitted to the ser. eral Governmenti consulted, "on which his M*-

## WAR, TIIE REVOLT AGAINST

jeaty's Government, after careful examination, considered that an understanding shouid if pos. sible be reached, ani which would therefore appropriately constitute the programme of a special navai conference to meet in London." The questions were as foilows:
"(a.) Contrabsud, inciuding the circum. atances under which particuiar articies can be considered as contrahand ; the penalties for their carriage; the immunity of a ship from search when under convoy; and the rule with regari to compensatiun where veneis have been seized hut have been found in fact oniy to be carrying Innocent cargo;
" (b.) Biockade, inciuding the questions as to the locality where seizure can be effected, and the notice that is necessary before ship can he seized:
"(c.) The doctrine of continuous voyage in respect both of coutraband and of hlockade ;
"(d.) The legality of the destruction of neu. trai venseis prior to thelr condemation hy a Prize Court:
"(c.) The rules as to nentrai ships or persons rendering 'unncutral service' ('asistance hos. tile'):
"(f.) The icgality of the convertion of a mer-chant-vessel into a war-ship on the high seas ;
" (g.) The ruics as to the transfer of mer. chant-vessels from beiligerent to a neutral fiag during or in contemplation of hostilities:
"(h.) The question whether the nationality or the domicile of the owner should be adopted as the dominant factor in deciding whether property is eneny property."
Responses to the British invitation hy the greater navai Powers were farorahic, and the resulting International Naval Conference had sit. tings in London from Decemher 4, 1908, untii Fehruary 28, 1909. The Powers sending representatives to take part in it were Great Britain, France, Germany, Russia, Austria-Hungary, Italy, the Inited States, Japan, Spain, Hoiland. A report of the proceedlinge and conciusions arrived at was made puhile on the 22d of March. On two. oniy, of the questions, proposed by Great Britain, no agreement was reached, and these were left open, - nameiy: " the iegality of the conversion of a merchant-vessei into $\pi$ war ship on the high seas, and the question Whether the nationality or the domicile of the owner should be regarded as the dominant factor in deciding the charscter, neutral or enemy, of property." Originai difierences on other questions werc compromised.
A serious difficuity in the undertakings of the Conference was orcasioned hy the fact that the Constitution of the C'nited States is heid to pre. clude any right of appeai from decislons of its siupreme Court. What was donc to overcome this difficuity is explained in the report of the 13ritlsh Delegates as foilows: "The Conference was asked to express its scceptance of the principle that, as regards countries in which such constitutional dificulty srose, ali proceedings in the International Prize Court shouid he treated as a rehearing of the case de nono, in the form of an action for compensation, Wherchy the vaididity of the judgments of the national courts would remain unafected, whist the duty of carrylng out a decision of the Inter. national Court ordering the payment of compen. sation wouid fall upon the government con

WAR, TIIE REVOLT AGAINST
cerned. The proposal was further coupied with the suggestion that the juriediction of the inter. national Prize Court might be extended, hy agreement between two or more of the signatory Powern, to cover cases at present exciuded frum Ite jurisdictiou by the express terms of the Prize Court Convention, and that in the hearing uf such cases that court ahouid have the functions. and foliow the procedure, iald down in the Draft Convention reiative to the creation of a Judicial Arhitration Court, which was annezed to the FYnai Act of the Becond Peace Conferencc of 1807.
"Great heaitation was feit in approaching these questions. It was uudeniahic that they iay whoily outside the programme which the Conference bad heen invited to diacuss, and to which the Powers accepting the invitation hud expressly assented. It was, however, not dis. puted that so much of the United States propo. sal as related to the difficuities in the way of the ratifeation of the Prize Court Convention was in so far germane to the labours of the Conference, as these aiso were avowediy dirceterl to preparing the way for the more geuerai acrept. ance of the Prize Court Convention. As it must cleariy be desired hy ali countries interested in the estahishment of the Internationai I'rize Court that the United States should be one of the I'owers suhmitting to its jurisdiction and bound hy its declsions, the Conference thonght it right, notwithatanding its lack of formai authority, to go so far as to express the wish ('vau') which stands recoried iu the final l'rotocoi of ite proceedings, and of which th: substance is that the attention of the variou,i Governments represented is calied by their delegste: to the desirahility of aliowing such countries as are precluded hy the terms of their conititution from ratifying the Prize Court Conrention in its present form, to do so with a reservation in the sense of the first part of the United States proposal. On the other hand, the questiou of setting up the Judiciai Arhitration Court, which seemed to have no necessary connexion with the Prize Court Conventlou, was decided hy ali the dele. gations, except that which had hrought it for ward, to be one which the Confcrence could not discuss." - Parliamentary Papers, 1909 : Pam "n by Command, 4554. - Also, London Times, M/irch 22, 1909.

Central American Peace Conference at Washington. - Generai Treaty of Peace and Amity. - Convention estahlishing a Central American Court of Justice. Bee (in this vol. Central America: A. I). 1907.
A. D. 1907-1908. - Waning of the Miiitary Passion in France. - Two very striklng lall. cations of the cooilng in the French peopie of the militant passion which made them in formor tlmes one of the most warike of the Europesn races have been afforded within the past tirre years. The first appeared in the winter of $190 \%$. when a Paris newspaper of great circuiation coliected votes from its readers on the question. "Who was the Greateat Frenciman of the Nine. teenth Century ?" Mucis interest in the quary was excited, and more than $15,000,000$ were sail! to have been cast. From any prior generation the answer of ahig majority would undoubtertly have been, "Napoieon Bonaparte"; hut the French of the Twentieth Century have devel oped so diflerent an estlmate of liminan greatnews

WAR, THE REVOLT AGAINST
that Louls Pasteur, the Man of Sclence, ied the poli, receiving $1,838,103$ votes; while Victor Inigo came next below hlm, hy somewhst more than a hundred thousand votes, and Gambetta was put third ln the ilst. Napnleon recelved only the fourth piace of honor in the estimate of fif. teen millions of the French of these days.

About a year later the same change was betokened in a hardly less signiticant way, hy a speech from the Prime Minister of France. The occasion of the aldiress was the inauguration of a monument to M. Scheurer-Kestner, who had been viee-president of the French Senate when the Dreyfins Inlquitles began to be dragged out of darkness intoilght, and who was one of the few men in publle ilfe then who strove heroicaliy to have the truth ascertained and justlce done. Seheurer.Kiestner was an Alsatian, and thly fact gave Premler Clemenceau an oppor. tuulty to break sllence on the sore suhject of the loss of Alsace, which Frencli statesmen have not ventured to refer to wince the heart-hreaking surrender of $18 i 1$. Ifis breaking of that sllence wae meant to break, and assurediy does brak, the long hroodling of revengefuiness in French heurts which has been a menace to the peace of Eurone for nearly 40 years.
" Ido not fear." le said, " to caili up the memory of that hioody inst. I am mindifil of the re. spouslhility which belongs to my otlice, and I can speak without constraint of events which have entered Into hie*ory. ican proclaizn ferllags which we cannot repudiate - which we cannot cren hide without lowering ourseives." And this is his open proclamation of the feeling to which France has come, in its thought of Alsace:
$\because$ We recelved France issuing from frlghtfui trlai. To rebuid her in her iegitimate power of - xpansion as weli as in lier dignity us a great morai person, we have no need cither to inate or tolle, nor even to recriminate. We look to the future. Sons of a great history, jualously care. fui of the lofty lmpulses natlve to us, iu which the elvilizlug virtue of Frunce was fashloned, we can look in qulet of soul on the descendants of strong races which for ceuturies have meas. urel theinselves whth the meu of our lands in battleficlis beyond numbering. Two such great rival peoples, for the very hourir of thelr rivalry, have a like interest to keep their respect, the one for the other."
A. D. 1907-1909. - German Opposition to the "Navy Fever," in High Circles as well as Low. - Views of Herr Von Holstein and Admirai Galster.- INow far the unval ambitions and costiy navai poilcy of Germany are supported by public opinion is much of a questlon. It is certain thit they are a cause of whie dils. content in the industrini ciasses, and no less cerfaiu that the velghtlest influence behind them is that of the Emperor, who stmulates the exerthus of a powerfil Navy League. That there is an effective disapproval of the poilcy In high pilltcai clrcies hats been shown latuly hy the mulleation of some expressions on the suhject by tive late Herr von Hoistein, who was for many years the chice of the Poiltical Department of the German Foreign Oftice, - the mentur and promptel from behind the scenes of sev. eral successive Chancellors of the Empire. in wime renlniseences of this important officiai, hy an intimate fricnd, Herr von Ratis, who puh Ilshed then In Septemher, 1009 , he is quoted is

## WAR, THE REVOLT AGAINST

having, in 1007, denounced what he cailed "navy fever $\operatorname{In}$ Germinny in these strong words:
"This diangerous cilscaso is fed upon the fear of an attack by England, wheh la not in accord. ance with facts, The effect of the 'navy fever' is perniclous $\ln$ three directions - in domestle poifitics on account of the intrlgues of the Navy League. which also produce the greatest $1^{11}$. feel. Ing in South Germany; in the finances on aeeount of the prolihiltive cxpendlture; In forelgn polities on account of the mistrust which these armaments awake. England sees in them a menace which keepa her bound to the slde of France At the snme time, even with taxation stralned to the utmost hinit, the construction of a fleet ubie to eope with the unlted ficets of Enginui and France is entlrely out of the questom. From the menaee whlch everybody in England sees in German naval constructlon the present Liberal Government In England wili not draw serious concluslons. It will be diferent when the Conservatives come into power. The danger of war between Germany on the one hand and England and France out the other Is even today playing a purt in the political calculations of other countries. Agalnst armaneuts on land nobuly will offer auy ohjection, because they are justlited hy the needs of def.nce. In oir navai armameuts scveral Powers see a perpetuni mennce.
"Even among Parilamentary Deputles there are many who condemn the 'navy fever,' but no one of them wili tuke the responsiblity of refusing to vote silips, a responalblity which would recoil upon hlm in the event of a defeat at sea. Auybriy who to day makes a stand against the prevailing ' navy fever' is attacked Irme all sides as wantling in patriotisin, but a fer years henee the justice of my opinion will be estabilished."

Accorilng to Heur von lath. Hirr von Holstilu deelared in Fubruary, 1900, three months befure his death, that the uavy question transeenderi uli others ifo Importance. He is saidi to have watched whth approval the campalgn which is still more or less vigorousiy earried on by Vlee Admiral Gal*-prand others against the "hlg ship polley." an it have swid. wlth referellee to one of Aidmiral Galster's pamphiets:"The main thing is to expose the rylng and treacierous fallacy expressed la the statement that every fresh ship is au addition in the power of (bermany - when every fresh ship causes England, to say nothing of Fraure, to bulid two siips."

The VIce-Adinlral Gnister here referred to contends that suhmarines are more effertlve for defel:ce than Dreadnougits, nui he labors to persuade hls feilow countrymen to be sntistiet with diefensive armanent. repudiatling what creates suspicion of offensive designs.

zations took pert last erening [Deccmber 15] in the formation of an Internationsl School of Peace. The ldea orlginnted with Bdwin Ginn, the puhliaher, and the 'house warming tonk piace at No. 29 Beacon Street, where a room wиs approprlately aiorned for the occasion with the flags of masuy nations and large portralts of Sumner and Cobden and other grent interua tional leaders.
"Mr. Ginn weicomed the company in a speech wherein the motives and experfence whikh prompted him to found the school were set forth. He exjiained what he boped of the or. ganization, huw he had for years nppeated to vartous mililounires to unite wih him in some larger provislou thm any whileli existed for the systematlceducation of the peopie in pence pria ciples, the response to which had been disuppolnting.
"Mr. Ginn feit that some large leginulug must be maie by somebody; and so be had up. proprinted 8.0,000 a year to the work from now on, and provided iu his will that the bulk of his estate, aftir proper provision for funily mad friends, should go to this cause, whleh fie te it to be the grentest and most necessary canse in the world. Thls actlon had hrought him muititodes of lettera, be said, and cieariy awakened mula interest: and If it jrompted others to do much more than he coold io, that was what he wanted. The frlends of the cause, especialiy its wealthy friends, had been atral gely asleep to the press ing need for thls work of popuiar educntion. it nost be thoroughly organized to reach the schools and eolieges, the churches and news. papers and buslness men. Lie gave diustrations of the av ful cost and waste of the prosent mititary system, whlch he said violated every primiple of good business, poilitical economy, and comnion sense.

- The room is not oniy a burenu for the othee force, but a readlug-roon and llbrary, where the fitest information touching the progress of the movement will nlwnys be fornished to teschers, preachers, and all who are interosted. Itrgulur conferezees upon the different aspects of the movement will also be held there." -The Ihaston Transeript, Dec. 16, 1809.
A. D. 1909. - The Second National Peace Congress in the United States, assembled at Chicngo. - The serond National Pence Cun guess in the Linited states held its session in Chicugo. Slay 8-6, 1909. The attendance whs large, the spenking of high quality and the pre valling epirft earnest in its repodintion of all reagming or feeilag that is tolerant of the hat barism of war. Rispuectfa! attention was givit to an adilress by the diemmin Ambassador ${ }^{\prime \prime}$ the Cuited Nintes, Count Bernstorff, who low fended the attitule of his Goverament on the question of a linitntion of armaments, but the cxpressious of the: Congress on the subject we re not toned to arrcement Fith his plea. Amons Its resolntions was the following:
" Resolvel, That no dilspute between nations. except such as may involve the nathonal life mid independenre, should be reserved from arbitri tion, and that a general treaty of obligutory ar bltration shouidi ie inciuded at the earliest $1^{106}$ sible date. Pending such a geueral trealy. W, urge upon our goveroment, and the other lent lng Powers, sueh broadening of the scruw of their arhitration treaties as shall provide, after

## WAR, THE REVOLT AGALNST

the example of the Danish Netheriands treaty: for the relerence to the Hague Court of all dff. ferences whatever not cettied otherwise by peaceful means."
A. D. 1909. - The Annual Lake Mohonk Peice Conferences in the United Staten. The annual Peare Conferences ai Lake Mohouk, In the Unilud States, have been held with regularity. At the Flfteenth, convened in May, 1000, strong resolution was adopted, asking the Government of the United Staten to consider " whether the peculiar position it occupies among the natlons dors not afford it a spectal opportunity to leal the way towards. . carrying loto effect the strongly expressed desire of the two Peace Conterences at The IIague, that the governments examine the possiblity of an agreement us to the llinitation of armed forces by land and sea, and of war budgets."

Privately during the Conference there wan discusslon of the suggestion that if four or ive of the great Powers - England, Germany, France, Italy, the luited Stater, and Japan, and perhaps Spain and lussia - couid join in establishing a supreme C'ourt of the natlons, to which they would refer their tiftheultes, other natlons would he compelled by the course of events to arcept the tribunnl and its declaions, and to come into partlelpation in it on such terms as might later be agreed upon.
A. D. 1909. - Exchange of Parliamentery Visits between France and Sweden. -Sieventy-als members of the French Yariliament, representlag the international arbitration group, visited stockholm in July, 1909, under the icalershlp of Baron d'Estournelles de Constant. The visit was paill in return for one made by the members of the three Scautlnavian Parlla. ments to Puris some time before.
A. D. 1909. - A World Petition for General Treaty of Obligatory Arbitration. At the annual meeting of the International Peace Bureau at Brussels, Octoher 9, 1909, the following resolitton was adopted, expressing approval of the worlid-petition to the third Hague Cionference in favor of a general treaty of obligntory arbltration: "Wherena, Puhbie opinion, if recirded, will prove an Intivential factor at the thirl Hague Conference; and Whereth. The -worid-petitlon to the third Hague Confercure' has begun to successfully estahliah a statiationl record of the men and women in every country who desire to support the goveruments in their effurts to perfect the new internntionai order hased on the princtple of the sollilarity of all uations; Resolred, That the Commission uud the General Assembly of the International Peace Burem, meeting at Brusseis October 8 nad 9. 1909. urgentiy recommend the signing the -worid-petition to the third Hague Conserence, ${ }^{\prime \prime}$
A. D. 3009. - Evasion of Military Service in France. - Spread of Anti-Militarism. - Accoring to returns of the recrutting for the French Army, published ln the summer of 1900 , there appears to be a steady increase in the evasion of service by young men at the times they are required by law to enter It. "since 1906, when the number of refractory recruits nmounted to $4.56 \overline{\text { a }}$, the g gures have flaily risen, until they have now rearhed 11,782 . The moldit ineoumio may be punished In France by imprisonment of from one month to one ycar.

## WAR, THE REVOLT AGANST

But on about an average of every two yearndurlog the lat 20 years Parllament hae regularly voted an Amnenty Bill in favour of deverters and recalcitrant recrults or reserviata." This is one supposed cause of the Increadag evaslons: but a more important Infuesce working wlth it is the propagandiam of antl-milltary doctrines, preached passonately by Guster Hervé, ac. cepted widely, It is mald, among the primary teachers of the country, as weil as in the ranks of the worklngmen. The General Confederatlon of Labor is reported to be dlatributlig annually some thousands of "soldiern' manuala" in which desertion is urged as a duty to humanlty at large.
A. D. 1900 (Oct.). American Proposal that the Prize Court now eatablished be also a Court of Arbitral Juatice. - By reference to the proceedings of the Second Pence Conference at The Ilague, as set forth above, it will be ueen that the Conference gave favorable conalderation to a draft Convention for the creation of a "Jndicial Arbitration Court " (the text of which draft is given at the end of sall proceed. ings), and that the Conference went so far as to deciare the "advisahility of adoptlng . . . and of bringing it into force as soon as an agriement has been reached respecting the selection of the judges and the constitutlon of the ('ourt." It whil be seen, also, thut the Conference adopted measures for the creation of an International Prize Court, preliminary to whith an Internatlunal Naval Conference was held In London from December 4, 1908, until February 20, 1909. It that Conference a suggestion was made that "the jurisdiction of the International Prize Court might be extendel. by agreement between two or more of the slinuatory lowers, to cover cases at present "xcinded from lts jurlatiction by the express ternns of the Prize Cuurt Consention, and thut la the herring of such cases that Court should bave the fuactious aud follow the procedure lath down in the draft Convention relative to the creation of a Judicial Arbitration Court, whieh Whas amtexed to the Final Act of the Second Peace Coraferencc, of 1907."

In line with this suggestion, it was made known, in the later part of the past gear, that the Government of the Linited States, through its state bepartment. had proposed in a clreular note to the Powery, that the l'rize Court should be Invested with the furistiction and functions of the proposed Judicial Arbitration court. The difileulties in seleeting judees for that contemplated Court, which caused the crention of it to be postponed in 1007, would thus be happils surmounted, and, as remarked by Secretary knox, there would he nt once given - to the world an international judicial bois to adjudge casps arising in peace, as weil as controversies incident to war."
A. D. 1909. - Attitude of the Workingmen. - At the Twentieth Intcrnational Conpress of Miners, held in Beriin. in May, 1809. there were strong declaratlous for disarmament. and one Belgian delegate, M. Marolile, said significantly: If It were better organized the Interaational Federation of Miners could by itsclf render wara tmpossible. They need not do anythlne vioient or iliegnl : they had only to remnin gulet, so very quiet that war could not be carried on.

WEALTH: lta Concentration in Great Britain. - in a surech mide In l'arllament, on a mution to gralnate the income Tax, March 21. 1min. Mr. Chiozat Money, who speaks with considerable authority ous such subjects, made the following statements: "Statistics were avail. ahle in Somerset llomse showing the product of the graduated scale of death duties imposed by sir William IIarcourt in 1894 . Of the 700,049$)$ persons who died annualig, oniy ahout 80.000 left sufflelent property to need an iuquisition by somerset Ilouse. Out of the 80.000 persons nearly the whole of the property was left by $2 \pi .004)$ perenns: and $£ 200,000,010$ worth of pro. perty was left hy about 4.000 persons each year. This reas not only acurious fact, but it was a constant fact in relation to this probicm. Nie aleo sl:n rich persons to devise part of their property be fore death in order to escape the death duties, with the result that a good deal of wealth didi not come under the review of Somerset House

## WEAVER

What he described an hie own conservative ent, mate of the wralth of the Caiten Klugdonis was a total of about $811,500,000,070$. Of that sum tive militions of perions owned $\$ 10,000,000,010$. One-ninth of the population owned 95 per rent. of the entire capital stock of the United King. dom. Thus the whole of the country reganden as a buainest undertaking was in the hands of a handful of people. Taking the income of the country at 1.800 militione a year, thers were about five mililion pernons who took one-half and 89 millions the other lialf. Of the tive mill. Hion pervons who took 900 mililions of incume about $1 t$ million pertons, or 250.000 famillen, took 600 millions out of the $\mathbf{0 0 0}$ mililions. Frum this state of facts the moat rerribie inerualitits, resultedi, evidences of which coull! be sern along the Emlankment and other parts if Westmingter almost withln a atone's throw if that flouse,"
WEALTH PROBLEM The. - The Question of a Progressive Taxatlon. - ". At this moment we are passing through a pref ni of great unrest - social, political and induatriad unrest. It is of the uthoset importance for our future that this should prove to be ant the unrest of mere rebelilousaess against ilfe, of mere disantisfaction with the inevitable inequally of ronditions, but the unrest of a resolute and eager ambition to secure the betterment of the indi. vidual and the nation.

## . . .

 It is a prime ve. censity that if the present unrest ie to result in permanent good the emotion shall be translated futo action, and that the action chall be marked ly honeaty, sanity, and self-restraint. There is mighty ittle good in a merc spasm of reform. The reforn that counts is that which comew through steady, continuous growth; videlent enintionalism leads to exhaustion."It is important to this peopie to grappi. with the problems connected with the amasing of enormous fortunes, and the use of those for tunes, both corporate and Intividual, in busi ness. We should diacriminate in the sharpest way between fortunes well won and fortunes ill won; between those galned as an inchient to performing great servifes to the consumuity as a whoic. and those gainerl in evil fashlun by keeping just within the limits of mere law hora. esty. Of course no amount of charity in spent $\operatorname{lng}$ surh fortures In any way compensates for misconduct in making ihem. As a matter of perenal conviction, and without pretending tis discuss the details or formulate the system. I feel that we shall ultinately have to considier the adoption of some such scheme as that of a progressive tax on ail fortunes, beyond a cprtain amount, either given in Ife or devised or bequeathed upon death to any individual-a tux so framed as to put it out of the power of the owner of one of thesc enormous fortunes to hand on more than a certain amount to any one individual : the tax, of course. to le imposed by the National and not the State Governmeni Such taxation should, of course, be ained mereiy at the inheritance or transmission in their entirety of thowe fortunes swoilen beymid ali healthy limits."-Presldent Roosevelt. II. drese at the Laying of the Corner stone oft tho Office liuilding of the House of Representatiox. April 14. 1800.

WHITE SLAVE TRADE, Movement for the Suppresalon of the. - The movement for the supprcsaion of what is now descriked us the White Siare Trafflc, and which has grown into an lmportant international organizatlon. m"pears to bave hat lte beginnlog in the for mation of a committer at loniton, in 1880, " for the purpose of expowing and suppressing the [theru] exlsting trallie In English, Scotela and Irish giris for forelgn prostitution." Thle cominltee presented a menioritio on the subject to Lord Granville, then Secretary for Foreign .1f. falrs. setting out a statement of facts which " revealed the exlstence of systematic abduction to Brussels. and eisewhere on the Continent if Eurupe, of girls who were English subjects. and who, having been induced to go abroal uniler promise of ohtaining employment or respectahie sltuations, were on arrival taken to the office of the • 'oilice dies Diteurs' for rekistration as prostltutes." Tic memortaists cravel Lord Granville's intluchee '" in favonr of meas. ures whla would render it impossible that British subjects, however humble, showhi in the futuro be suhjected to suchinfamy and le. gradation, including the ioss of thelr perional lliberty"
such measures were taken. Parllament passing an Act whel beame law in 1885, with so much effectiveness that "the traffic was at once chrcked. The miscreants who were engaged in it were dismayed by its provisions, and within

Ave gears after the Act had come lato operation the Burgomusher of Bruselis, whlch bul been the headquarters of the traflic, questioaed an to the olloct produced by that mnasu:c, it A pril 1480 wrute an foliows: 'Comme sulte a rotre lettro du 15 coursat, j'al l'honneur de vous falre connalire gue depuin 1880 aucune alle te na. tiunalité Auglaleo a'a été inscrite aux regiatres tie Brutelles.' Whlle, however, the tratile, so far an the United Kingdom was concerned, was thus almost catinguisheri. it acems to have increased and spread in certain districts of Eant. ern Eumpe to an extent whlch attractel tho serlous and aiarmed attention of the Govern. ments and puhilc authorlties of the conntrices Immediateiy concerned. About the year 1894 the Natlonal Vigilance Soclety, lieaderl hy the late Duke of Weatminster, then its Presflent, resolvei to open definte tucanures for lts mitigaton - if posilble, lis suppressiua.' This organizatlon was fortunate in havlug for its Secretary and chlef administrative officer Mr. Whilfam Aiezantier Coote, a man of rumarkable energy and d-termination." - Parliamentury lufwre, 1018 (cit. 8453).

Mr. Coote went on a mlaslon to the Contineut and aroused the interest of the Governmente moat concerned. laternatlonal conferences un the subject were held, In Londoa. 1899, at J'arls, 1002, and agala at larls in 1900, prodill. clog concerted action. In 1804 an Internatlunal Agreement was signed at l'aris, May 18, by the plenlpotentiaries of Great liritalu, Gernany, Belglum, Denmark, Spain, France, Italy, thu Netherlands, Portugal, izussia. Sweden and Norway, ant Switzeriand, the fiss two artlcles of whlch were as foliows: "Artlele 1. Each of the Coutracting Goveranvnts undertnkes to escalilsh or name some authorlty chargel with the co onilnation of all laformation relative to the prosuring of women or girls for immoral purposes abroad; thls authority shall be emmwered to correspond direct whit the similar department estahllshed in each of the other Contracting States. Article 2 . Each of the Gorernments undertakes to have a watels kept, espectally in rallway statione. ports of enbarka. ton, and en route. for perauns in charge of wonien and kiris detincti for un immoral Hfe. With thls ohject listructions shail be given to the oflchals and all other qualited persons to ohtaln, withln lestal l1mits, all Information likely to leai to the di-tection of criminai traffic. The artival of persons who cleariy appear to the the princlpals, accompilees lo. or victims of. such traftic shail be nutitled, when it ocrurs, either to the authorties of the place of destibation, or to the Ilipiomatic or C'onsular Agents interested, or to any other conipetent authorit les." - Parli,mentiry Pipers, 1005, Treaty Serics A\%. 24 ( $1: 126 \mathrm{ma}$ ).

Meantlme, in the l'nited States, due attention wan hot glven w tise matter, untll it was found tiat the alominable traffic had become organized to all appalling extent la the country, especialiy In connection whth its forelgn immigration, and liad a principal seat In New York, with a suspected connlvince on the part of men having poiltical intluence. If not official power. An investigatlon of the facts became one of the main abjects of the Coneresslonal 1 mmigration Commisslon which pursucd inquirics in Europe and America in 1900, and was the leadling subject of

thon ln forelgn trade will be a hleasing if we ex. crclse foreaight. In the furtherance of the World-purpoee It was necessary that the progrealve nations should for a time worsilp foreign trade as a fetlch, sad as the chlef means of prosperity. Nothing else would have given them the aealed stinmlus, and forced them to auch Herculcan efforts to conquer and keep forelgn markets. But when all forelgn markets have been opencl up, and we have unintentionally educated other races, not raing to supply their own wants, hat to Ewnmp us with thefr manufactires, then we must realjust our ldeas, anil adopt less one-sided aims. In our amhition to be the Chear lohn of the won!d, we have developed some of jur resources ahormally, ani neglected othcrs. To foster foreign troule we converted a large part of our laland home lato hlack country, we have 'reen proillgally waste ful of o18: mineral resources, and have negleeted our agriculture. In atriving for forelgn markets we have neglected the best market in the worli - tise llome murket - and have left ourselves miserably dependent on the forelgner. This is really inclplent heart disence of the Emplre.
" It was providentin! thot we alopied 'free tradr" when we dill, as It glves a moral justif. catlon for our annexations which no protectlve batlun can show ; but as the oiher great l'owers rxteni thelrsway, and their tariff barriers, we shail cease to neel onr free trade justlicution. Then we can reconsider the case." - E. W. Cook, The Orgomimation of Mankind (Contempo rary lievierf. ※pt., 1501).

The Making of a World Constitution and the development of World Leginiation. -- In the relathons of nalions to one another. ns proviel by their :reaticu and c.xe of faterna. tiomal law, cer:ain tmiths are recognizen whid Involve the very unturi of mankind as a creat al whole. That is, there is a world-constlitition, unwritten, not callui by that name, but exiatIng as trily na the animal cronion exlsted befure it was named by man. and as independent of his recognitinn and his natuing as the anlmai creatlon was inilepemient of himan recognition. Though thit world coustitulion has roinained nharure and unrecognized, yet world progrese towaril lis firmal espreselion has leert wonulerfilly milil ln resent reara.
"In the firsa place that constitution is brine fog ulomt the formal existence of an orgin for the sae and for the expresaton of the Intelll gence and the will of the worli. Satoms, ropraleilly, in separate congresson, npon speeln! anbjects, have express d thrle intellgrence uni their will, and have entristed to the nations severally the dinty of corrring out that will, is Is mont. perfority illinstruievl in the vase of the inivoras l'osial infon. "In 1 next place, the establishment of the Hagene t'ourt uf Arhitrat lon is donbticss the leefimbure of the potabisimment of a juilciai department whleh will lachule other intles than the s.thioment of ransea ciangering to the pence of athons. Lastiy, the formal establishment of some worlil execoitire will not long lag lahind the reation of the legislative and juflelal thepartments. The worlil is movine rapilly towari political nrganizution as one borly, and the sinhathil nust mon revenl ltself to present doubters." - R. 1.. Brilgman, llorid-Orgamizs

## tion sceures World-Peace (Allantic Monthly. stept. 1804).

"At the seesion of the Mamenchusetta Legls. lature of 1902 a petition was presented in Iavor of a world-legislature. That petlition was ri. ferred to the Legialature of 1908 in order that the suhject might recelve further puhlic conslderation, and the chalrman of the commlitere whlch heard the petltioners sald, In each hranilh respectlvely, that the proposal was meritorions. According to the report, the petlition la penilng before the Legislature of 1008 , with hundrels of algners, including some of the bent clitirens. The American Peace Soclety, hy vote of its directors, slgned the petltion, while lt almo prosented another petition of lts own, asklng for a movement for a world-conference or cungress. with recommendatory powers, to meet at atatel Intervals, say once in seven years. Thus the proposal of worh-organization is formally be. fore the puhllc.
"Slace the first petlton was presented re perated Instances lisve occurred to support the mnlu argument for it, - thst businegs exigencles of the work were becoming so urgent thint world-organlation, as a neeesslty, would pre cetle the efforts of pure phllanthropy ar states. manshlp for the same end. Early In the yont came the Pan-American Congress. Among lis proposals, sulted for a world-scale, were thes-: a l'an-Amcrican hunk; a custom-house conyress, and an internalloual customs commis. sion; a statlatleal hurean of Internatlonal seve: nu International cojyyrght law ; an lntprna. tional commission to cexllfy international liw: internatlonal regulations to cover Inventions aud trademarks a common treaty of extrinlition and protectlon against ausichy; interna onnl regilations for the world-wide prarlife of the Piberal professions; an Internathmal urehurological commlaslon: an [aternationial otlice as depositary of the archlves of luternational conferences; an Interaatonal regniation grunting etual rights to all forelgaers from any of the sicuntory countrles, and woine minor jlans.
"thther wordi.propmestions whleh develomesi timring the year included (In Jamary) the "ranivation of the Iuternational Banking Cur pomtion, whh power, under a Connecticut i harter, of dolng bualness all over the world: (rarly in the year) clrculation hy the Masches tur (England) Statistical Socicty of a pamphet alvocuthg an international gold colugge: (in duly) sugfociton by sinesin of an latertational innference to protict the natlons agulat trints and other private operatlous of catrital: (in Jhly) another plan for an lumerastlonal huik: (in Ansist) meetlog of the luternational tion(riga on Commerce und Imlustry; and (in l) (ominer) the moetivg of the International sumi unge tomference ln Wishiugton; to whleh mys he nolled (ln annuary, 1 Wib) the meeting in Now York of the International Pistoms Conirems. For one year that is a notuble rueorl of proiresy lowarl world organization in matters of havi ness, not as maters of theory or of pure $\boldsymbol{p}^{\text {min }}$ Ianthmplis. These instances llhatrate the trall. which many persons still fall to raller, tlat the worid is getting torether at a raplil rate: and that, as a natter of seif. Interest, the nations mast man have jurmanent leglslative fruly as a means of cstablishing regulatona for the benefit of all.

## WORLD MOVEMENTS

- Pertinent to the case is the fact that worldlegialation has occurred repeatedly, though no world-leglalature has been orgaulzed.

In world-legianare thaternatlonal l'ostal tulon we have absolute world-legialation. . . . That is the mont consplcuous sud most succesaful lilus tration of world-ieghatation, because it embraces organized mankind, and because it is so emlnently succenful.
"Mentlon mar be made of the International Conference In Washlngton, in 1885, for the establiahment of a common prime meridian, at which tweaty-six natlons were represented. At the Internatlonal Sanitary Conference in Vlenua In 1892 , fifteen natlons were represented. At the Dresden International Benltary Conference in $\{898$, alnetsen natlons were represented." 11. L. Bridgman, A World-Lagislature (Atlantic Monthly, March, 1903).

The Passlag of the Age of Coionial Dominion. - The Coming of the Epoch of the "Open Door." - The oid notlons of colonial duminiou, which had prieked the ambltion of uations aince the sixtecath century, came practlially to the end of their working in the lant years of the nlacteenth. The European parts. tloulng of Africs, in the decade after 1884. the scramile for footings in Chlna between 189 i and the Boxer rising, and the Spanish-American War of 1898, may be looked upon as the explring operations of statesmanahip on llnes of "colonlal policy," in the aequiditive sense. As certainly as anythlng in politics can be certain, the epoch of the foundling and spreadling of colonia. dominl'ons came then to its elose.
The coloulal polley of that epoch meant coionalai dominic n necessarliy, for the reason that the commeresspreading nations of the Weet could not tr.ank of agreelng to open doors of trade witt, the feehfer ur more hack ward folk of the East. Each could make sure of marts in the great orient and oceanic region only hy reizlng and walling them in, hehlnd well-locked doors, to keep the others out. Now, however, they have arrived at a state of things in the world which compels them to think of the "open door" for commerce, as a substitute for the colonial dependency, held under lock and key. Several changes have worked together in hring' o chle new aftuation about.

Arincipaily. of course, it results from the near approach to an ex haustion of the territory a vall. ahle for easy conquest and colony-maklcg. Ifrica and the great archipelagos of the Bouth Heal have all been divided up. Japan, with thina making reaily to stand with her, has undertaken a policing of Eastern Asta, to stop the staking out of lawiless eialms there. Moreover, contidence in the stabllity as weil as beilef in the usefuiness co colonlal dominlon is much shaken of late, hy increasing algns of reiaxing bunds in the great British Empire, withont much slgn of harm to the prosperity or $r$ a power of the imperial nation itself. Keveral of the outlyling dependencies of the British crown have grown to so much of indejendence that they have taken the doorkeeplng of thelr com. merre into their own hands and the corerelgu mother country makea uo oblection or comjlaint.

## WYNNE

For many years past the commerclal ex rif ence of England has been furblshing proof that trade and dominlon, under the coaditions of the presant day, have little of necemary connection with each other ; and now the Germans, within later years, have been adding to that jroof. The few colonien they have laid hands on, in Africa and Oceanlca, have been of lem profit than expence to them; but, more rapldy than any other people, they have pushed thelr trade in reglons where they have uo polltical influence or control, by wheer energy and careful learning of the conditious to be met.

The commerclal mind, whlch has alvays dlctated the policles of government, is belng thus compelled to turn its thought to the "open door," and that, as a commercial aim, will evl. dently extinguish colonial undertaklogs hereafter. It ruled the settlement of the Chinese troubles of 1000 (thsuks to John liay): it hes gone luto the recent treatles of Japan with Eng. land, Ilusaia und France ; it gave a practlcable volutlon to the Morocco prohlem, at the Algeelras conference; It furulsibed the ground in 1007 for an arragement of iongetroubled reiatluns between Enghand and IRussia ln l'ersla, Tibeh and Afghanistan.

Manalfestly, the commercial polley of the future ls to be, not the polley of colonial dependencies, but the policy of open doors. Even the Imperiallsts and the stand-patters of the United States wili have to accept It; and In due time the tarif-walled nations, after practiclng them. sel ves sufflelently in the dietatorial opening of other people's doors, will he ready to unluck their own.

2AN2IBAR: A. D. 1903.-Practical Eading of Slavery. - The following remarks are from reporta made by Brtish consuiar offcers in 1003. By decree of the Sultan of Zanzibar the iegal status of slavery was snnulled in 1897: "As I have anticipated in my former lie. ports, the number of slaves who have thought it to present themselves for freedom to the Zanziliar Government has been very small.
It is as weii known as ever throughout the is. land of Zanzlbar that a alave hat only to appear and ask for freedom and it in lamediately granted. But the slaves have long since din covered that freedom is not wuch a bed of rowes' as was anticlpated. They have learnt that practicaliy they lose far nore than they gain by leaving their owaes to get freedom and then having to find a new home and support themseives.'
"The alavery question may be ald to be at
an end In Pemba. Those siavel who stlil remain in a state of servitude are siaves oniy in name, and they continue to be so of their own free wili, for there is not a man or a woman at this time in the isiand unaware of the fact that any slave can obtaln manumimior for the ask lig. A small number of siaves do apply for and ohtaln their freedom month by month, but the bulk of the servile population In Peniba ap pear to be content with their existing status."
