Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

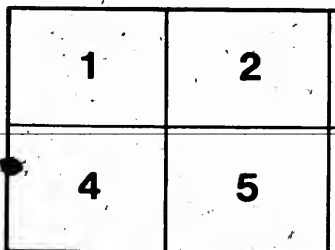

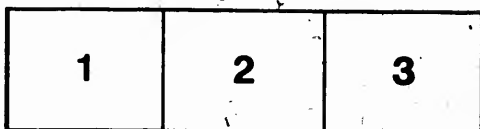

Thomas Fisher Rare Book Library,
University of Toronto Library

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

HOT AIR FURNACES.

Our experience in *selling* and *setting* Furnaces has given us a knowledge of the *wants* of the community in *this* line of goods which few possess.

The success which has attended our efforts in thoroughly satisfying our patrons, is, we believe, unprecedented in the Dominion. We have thus gained a reputation in the business which is valuable to us; and our endeavors shall be, in all the goods we are introducing, to maintain and increase our hold upon the public favor.

Considering the matter of *economy*, *durability* and *saving of labor*, and also as a matter of *health*, the Hot Air Furnace is by far the most desirable means of heating. We invite Trustees, School Boards, Builders, Dealers, and all in need of heating arrangements, to investigate these Furnaces.

We are prepared to make estimates, at short notice, for heating Churches, School-houses, Stores, Halls, Dwellings, and buildings of all kinds.

Plans for Setting Furnaces, Price Lists, Estimates, and all information furnished promptly upon application.

BOYNTON'S WOOD FURNACES.

These Powerful Heaters, which have been subjected to severe tests during the past ten winters, have given universal satisfaction, and it is generally admitted by those who have the largest experience in setting Wood Furnaces that they have more attractive improvements and more power, with a given amount of fuel, requiring less attention and producing a more uniform temperature than any wood furnace now in use.

BOYNTON'S IMPROVED FURNACE.

FOR COAL.

The Improved Boynton Furnace, so universally known and extensively used throughout the country, is made especially for the multitude, who want a furnace simple in construction, durable, with heavy castings, perfectly free from gases, and powerful in heating.

The Boyntons have been sold since 1858, with the various improvements added, yet so durable have they proved that many are in use to-day that were set twenty years ago. This one feature makes them the cheapest Furnace, when price is considered, ever sold. The New Clinker-Cleansing, Anti-Friction, Shaking and Dumping Grate is the most perfect Clinker Grate now made. It moves on balls and requires but little power to shake. Clinkers and ashes can be wholly removed from under the fire without disturbing the body of coal, thereby keeping the pot constantly filled with live coal, free from ashes and clinkers. It is fitted with a Sifting Ash Grate and pan for ashes, by this means clinkers are taken from the ashes without the dust escaping into the apartment—a very desirable convenience—which no other Furnace that we know of is supplied with.

A very important feature of this Furnace is found in the small number of joints, and the form of the castings, which are such that they will not crack, and are made thicker than most Furnaces now in the market. The reputation of the Boyntons being so well established, we recommend them to our customers and the public, confident that they will give entire satisfaction.
