PREFACE.

In submitting the Annual and Encyclopædia for 1897 to the people of Canada we do so, feeling convinced that the favorable reception which our book of 1896 met with will be greatly increased by our issue of this year.

The Annual and Encyclopædia will be a regular yearly institution, and its compilers will in the future as they have in the past, use their best endeavor to make its contents comprehensive, interesting and abreast of the times.

Several new and important features have been added this year, notably the Canada Militia Lists, Barristers and Solicitors Lists, Private Banks and Loan Societies, and the records for the year in all lines of sports.

In the compilation of these items of information as well as in the rest of the statistics contained in the work, we have endeavored to make it as nearly accurate as possible, and our data has been to a great extent taken from official sources.

In a work of this nature some errors and omissions are bound to occur, and the Editor would be under an obligation to any readers who would acquaint him of needed corrections, so that in subsequent editions they could be given effect to.

Our thanks are due to Mr. E. W. Bullinger for the use of "Bullinger's Postal and Shipper's Guide for Canada and the United States," and to those through whose courtesy we have been enabled to present such a variety of topics.

Trusts

The Toronto General Trusts Co'y

VERSUS

The Individual.

Whom shall I appoint as my Executor and Trustee?

This is a question of the utmost importance to every man who has property to leave at his death, and there can be no doubt that a Trust Company, and not an individual, is in all respects best qualified for the purpose.

THE TORONTO GENERAL TRUSTS CO.

Through its organization in 1882, first inaugurated in Canada, the system of a company performing such duties in place of individuals. Under its charter and letters patent the Company is authorized to assume the functions of Executor, Trustee, Administrator, Guardian, Committee, Receiver, etc., and to act as Agent for any individual who has been appointed to these offices.

Among the many special advantages which The Toronto General Trusts Company possesses, and which no individual can offer to the same extent, are (1) Continuity of Service, (2) Security, (3) Effective Management, and (4) Constant Supervision.

CONTINUITY OF SERVICE

A company never dies. In its hands, therefore, a trust, no matter how long its duration, is not liable to be interrupted by death, or to have the personnel of the trusteeship changed from other causes, events which are not only a very frequent cause of disastrous delay, but of loss and expense in the appointment of new trustees.

SECURITY

The large uncalled capital stock of the Company, its accumulated reserve funds and invested capital, amounting together to over $1,250,000, furnish the fullest guarantee to the public of the safety of all interests that may be entrusted to the Company.

EFFECTIVE MANAGEMENT

A company properly organized, as the Toronto General Trusts Company is, with a Board of Directors of the highest standing and a staff of trained officers, carrying on business on carefully considered principles, and with a special knowledge, acquired by large experience, of the best means of winding up estates and investing money, is admittedly in a better position to efficiently discharge the duties of an executor and trustee, as well as all other positions of a kindred character, than individuals.

In the transaction of the Company's business every species of speculation is avoided, and all securities which the Company hold for each trust under its management, are kept entirely distinct and separate from all others, are registered in the books of the Company for the trust or estate to which they respectively belong, and may at once be distinguished from any other security.

CONSTANT SUPERVISION AND INSPECTION

The affairs of the Toronto General Trusts Company are under the constant supervision of a Board of Directors, and Executive and Inspection Committees, whose duties are not only to supervise and direct, but to carefully check and inspect the securities of the Company; and, in addition, there is a quarterly inspection made of the books and securities of the Company by skilled auditors. The acts of the Company are participated in by these Directors and Inspectors, and are, therefore, open and not secret, in consequence of which any irregularity is next to impossible.

The Directorate of the Company not only embodies the combined wisdom of many experienced men, but its methods of management are more systematic than those of individuals; moreover the Company has an established reputation, which its managers are bound to uphold and increase. No better evidence could be furnished of the public appreciation of the usefulness of the Toronto General Trusts Company, than the magnitude of the interests entrusted to its care since the organization of the Company in 1882. These interests aggregate over $15,000,000, of which there still remains under the care and management of the Company, $10,000,000, the balance, $,5000,000, having been distributed to the parties interested.

EXECTORS UNDER WILL

Of all the offices which the Company is authorized to fill, none is more important than that of Executor, more particularly if the Will creates a trust extending over a long period of time. How thankless, onerous, and how disastrous often the office of Executor and Trustee is, not only to the individual charged with the trust, but to the trust itself and all interested, it is needless to say. There are cases in everyone's mind where a trusted adviser, Executor or Trustee has gone wrong, and those entitled to the funds of the estate have been ruined. No such experience has ever followed the appointment of a Trusts Company.

If a person is appointed Executor under a Will, and does not wish to act, he may renounce in favor of the Company, to whom Letters of Administration with Will annexed can then be issued.

ADMINISTRATIONS

When a person dies without having left a Will it becomes necessary to take out Letters of Administration; but before such can be granted to individuals, bonds have to be furnished to double the value of the assets of the estate, and this bond remains in full force until the estate is closed and distributed. When infants are interested, as is frequently the case, this liability may extend over as long a period as twenty-one years. The appointment of the Toronto General Trusts Company entirely obviates the necessity for incurring such a serious responsibility on the part of individuals.

CARE AND MANAGEMENT OF SECURITIES

The Company undertakes the care and custody of bonds, debentures, scrip, etc., and every description of security, and guarantees or insures them against loss by fire, theft, and accident, while in the possession of the Company. The Company also, for a very moderate charge, collects the coupons, dividends, and revenue from securities thus deposited, act as agent of the depositors generally, and pays all sums collected, direct to the depositors themselves, or into their banking accounts at the various banks. The employment of the Company for these purposes obviates the necessity of entrusting the management of bonds and other securities to irresponsible persons.

COMPENSATION

Persons contemplating the appointment of the Company as Executor and Trustee, need have no fear of excessive charges for the performance of these duties, as its compensation is always subject to be fixed by the Court, and in no case is it greater than what is allowed to individuals. It will be quite evident, however, that the compensation can only be determined on full knowledge of the extent of the estate and the character of its assets, as well as the period it is expected to be under the care of the Company. If this information is furnished, the Company will be prepared to fix the rate of compensation before the Will is executed or the estate assumed by the Company.

SOLICITORS

The Company has, of course, its own General Solicitors, but it should be stated, for the information of the legal profession, that in all cases where a trust, estate or other business is brought to the Company by a solicitor, he is continued as the solicitor in the management of the legal work connected therewith.

DEPARTMENT OF THE SECRETARY OF STATE.

This department was organized in 1867. It has charge of all State correspondence, and all State records and papers are in its charge. The Secretary of State is also the Registrar-General of Canada, and as such registers all commissions, letters patent,

proclamations, writs and other instruments, issued under the Great Seal; and all bonds, warrants leases and other instruments requiring registration.

The Secretary of State administers the "Electoral Franchise Act," "The Civil Service Act," "The Companies Act," "The Trades Union Act" and "The Canada Temperance Act."

Secretary of State, Hon. Richard William Scott, Q.C., LL.D.....	$7,000
Under Secretary of State and Deputy Registrar-General, Joseph Pope	3,200
Minister's Secretary, W. F. Kehoe	
Chief Clerk, P. Pelletier	2,150

DEPARTMENT OF PUBLIC PRINTING AND STATIONERY.

Minister, the Secretary of State....	
Queen's Printer and Comptroller of Stationery, S. E. Dawson, Lit.D..	$3,200
Accountant, W. Gliddon	2,150
Superintendent of Printing, W. MacMahon	1,900

NORTHWEST MOUNTED POLICE DEPARTMENT.

Minister in charge, the President of the Privy Council	
Controller and Deputy Head, Fred. White	$3,200
Commissioner in Command of Force, L. W. Herchmer	2,600

The North-West Mounted Police Force is under the control and management of the President of the Privy Council, the Hon. Wilfr'd Laurier. The territorial organization of the force is at present as follows:

Head-Quarters, Regina.

Commissioner, L. W. Herchmer; Assistant Commissioner, J. H. McIlree.

Regina District — Superintendent, A. B. Perry; Inspectors, J. A. McGibbon, C. Starnes, M. Baker, R. Belcher, W. H. Irwin, E. Gilpin Brown, A. C. Macdonell, W. H. Scarth; Surgeon, G. P. Bell; Vet. Surgeon, J. Burnett.

"A" Division Maple Creek District (Head-Quarters, Maple Creek)—Superintendent, S. Gagnon; Inspectors, M. H. White-Fraser, W. Routledge; Surgeon, S. M. Fraser.

"C" Division, Battleford District (Head Quarters, Battleford) — Superintendent, J. Cotton; Inspectors, J. D. Moodie, J. V. Begin; Surgeon, L. A. Pare.

"D" Division Macleod District (Head-Quarters, Macleod) — Superintendent, S. B. Steele; Inspectors, G. E. Sanders, A. E. R. Cuthbert, W. S. Casey, H. J. A. Davidson, A. M. Jarvis, P. C. H. Primrose; Surgeon, C. S. Haultain; Assistant Vet. Surgeon, T. A. Wroughton.

"E" Division, Calgary District (Head-Quarters, Calgary)—Superintendent, J. Howe; Inspectors, Z. T. Wood, F. Harper, D. H. Macpherson.

"F" Division, Prince Albert District (Head-Quarters, Prince Albert)—Superintendent, G. B. Moffatt; Inspectors, J. B. Allan, J. O. Wilson.

"G" Division, Edmonton District (Head-Quarters, Fort Saskatchewan) — Superintendent, A. H. Griesbach; Inspectors, A. E. Snyder; D. M. Howard.

"K" Division, Lethbridge District (Head-Quarters, Lethbridge)—Superintendent, R. B. Deane; Inspectors, W. S. Morris, W. M. deRay Williams.

Detachment from Head-Quarters, Yukon-District—Inspectors, C. Constantine, D'A. E. Strickland; Surgeon, A. E. Wills.

The force consists of: One Commissioner, one Assistant Commissioner, ten Superintendents, thirty-one Inspectors, six Surgeons, two Veterinary Surgeons, 184 Non-Commissioned Officers, 658 Constables and fifty-four Scouts, making a total of 947. The horses of the force are all raised on western ranches and purchased in the Northwest Territories.

Pay.—Constables' pay, 50 cents to 75 cents per diem; Corporals, 85 cents per diem; Sergeants, $1 to $1.50 per diem, with free clothing, quarters and rations. Clerks, artizans and teamsters receive extra working pay.

Constables engaged for five years, and men on good behavior allowed to re-engage.

All ranks are drilled, both mounted and dismounted.

Rank and file injured on duty, or after fifteen years' service, if unfit for further duty, eligible for pensions. Commissioned ranks receive no pension, but are under the Superannuation Act.

The mounted police do all their own teaming, carpentering, painting, smithy and wheelwright work, tinsmithing, etc.

The principal duties performed are patrolling the country, the vicinity of Indian reserves, and the whole boundary line between Ridgeville, east of Emerson, Manitoba, and the Rocky Mountains in particular.

The boundary patrol extends for 850 miles, police outposts being about forty miles apart. Along this boundary they collect customs dues, grant "let passes," etc., and enforce cattle quarantine over the whole distance.

The police have also charge of the quarantine at Gretna, Estevan, Wood Mountain and Macleod, looking after all cattle received and delivering them safely to their owners, after expiration of the ninety days' detention required by the quarantine regulations.

The Mounted Police look after Dominion timber, issue permits and collect dues therefor in Southern Manitoba; collect all statistics of settlement, cattle crops, etc., and generally perform all police duties in the Territories, such as serving summonses, arresting criminals, taking charge of jails and prisoners, arresting and escorting lunatics to asylums, and act as fire guardians for the prevention of prairie fires.

In addition to the foregoing, they patrol the Athabasca River and country north of the Territories in order to keep liquor out of the unceded territory, and perform duty in British Columbia and Keewatin when required.

The deposits by members of the force in the Government Savings Bank amounted to about $15,000 during the year, and in addition to this a considerable amount is annually placed in other banks. Some of the men have had from $600 to $900 to their credit when they left the service.

There were 849 criminal and other cases tried during 1892, principally for offences against the liquor laws and the prairie fire ordinance.

EXTRACT FROM THE CANADA LAW JOURNAL Re DOMINION LEGISLATION, 1896.

The sixth session of the seventh Parliament has produced but little legislation of either general or special interest, if we exclude some 26 Acts concerning various railways and half as many more relating to private companies and associations.

The public Acts may easily be compressed into 30 pages. For this dearth of a great deal of necessary legislation and freedom from a considerable amount of necessary statute law, we can thank our friend the Remedial Bill.

An Act respecting the Behring Sea Claims Convention gives to the Commissioners who may be appointed to investigate the claims which will become due under the Paris award, the same powers as a Judge in Court in regard to subpœning and examining witnesses, and any of the parties interested may be represented by counsel or solicitor.

The next Act provides separate subsidies for steamship services between Canada and the United Kingdom, and between Canada and France and Belgium. Formerly there was but one subsidy and one service, the arrangement being that the contracting line should call at a French port on its way to the English terminus.

A somewhat loosely drawn Act relates to the liability of the Crown and public companies in regard to labor used in the construction of public works. Money paid in by a contractor as security may be used to pay workmen to whom the contractor makes default. The Act also specifies the manner in which the workman may enforce his lien.

Chapter 6 dispenses with the revision of the voters' lists this year, and Chapter 7 is the usual bonus of 12 days pay to Senators and Members who have been absent for that number of days during the Session just concluded. Another chapter makes an alteration of the customs' tariff in regard to the date of importation of mining and smelting machinery.

A few amendments are made to the Railway Act in regard to by-laws by the directors, and the expropriation of lands. Other chapters deal with the Montreal Harbor Commissioners and the Turnpike Trust, the debentures of loan companies, the adulteration of honey by feeding sugar, etc., to bees, and the Animal Contagious Diseases Act.

The last of the public Acts gives the title of Chief Justice of Canada to the Chief Justice of the Supreme Court. The want of a quorum in this Court, which has been of frequent occurrence of late by reason of the illness of judges, is now partly obviated by constituting any four judges a quorum where the parties consent.

The first session of the eighth Parliament met for the purpose of voting the necessary supplies for the necessities of the public service, and no legislation was enacted of any importance or interest.

ONTARIO LEGISLATION IN 1896.

Chapter 2 deals with Voters' Lists in Cities of over 100,000, while Chapter 3 is concerned with the Voters' Lists in unorganized territories.

Chapter 4 enacts that Sheriffs' offices shall, except during vacation and holidays, be open from 10 a.m. to 4 p.m., and during vacation from 10 a.m. to 1 p.m., but in the City of Toronto and the County of York, from 10 a.m. to 1 p.m. every Saturday in the year, not being a holiday. In the case of necessary and urgent business, they must be kept open after 1 p.m. on Saturdays and during vacation.

Chapter 5 amends the Succession Duties Act. Property transferred in contemplation of death to any person in trust, or otherwise, is made liable to duty, also annuities so purchased, or otherwise whereby payment of duty is sought to be evaded. Property brought into Ontario is liable to duty. Actions arising out of any succession must be commenced within 6 years from the date of the succession.

Chapter 7—An Act to amend the Public Lands Act (Rev. Stat. c. 24, s. 45), by which copies of licenses or other documents, signed by the Commissioner of Crown Lands or his deputy, are now receivable in any Court as prima facie evidence.

Chapter 9 concerns the Algonquin National Park, and empowers the Superintendent to be a health officer, and the park rangers to be sanitary inspectors.

Chapter 12 — An Act relating to Crown Timber.

Chapter 13—An Act to make further Provision respecting Mines and Mining.

Chapter 14—An Act to further improve the Agriculture and Arts Act, 1895.

Chapter 15—An Act to amend the Act respecting Veterinary Surgeons.

Chapter 16—An Act *re* the Canadian Historical Exhibition, June, 1897.

Chapter 17 revises and consolidates the Act respecting the registration of Births, Marriages and Deaths.

Chapter 18, known as the Law Courts Act, 1896, amends the Judicature Act, 1895, and the Law relating to the Superior Courts. By this Act it is provided among other things that actions against municipal corporations shall be tried without a jury, and the trial shall take place in the county where the locus in quo is.

The right to security for costs is extended in regard to all persons against whom actions are brought in respect of cases in which the Act to protect Justices in vexatious actions applies (Rev. Stat. c. 73 and 53 Vict., c, 23).

Chapter 19 amends the County Courts Act, and greatly increases the jurisdiction. Title to land may be tried where the value is under $200, also where the validity of a devise or bequest up to $200 is disputed, provided the value of the estate does not exceed $1,000. The jurisdiction is increased from $400 to $600 in the case of liquidated damages or where the amount is ascertained, or to any amount if the parties agree before the issue of the writ, provided the amount is liquidated.

Also in actions for the recovery of, or for trespass or injury to land, where the value of the land does not exceed $200. In partner-

ship accounts where the capital was not above $1000. In actions to recover a legacy not exceeding $200, where the value of the estate does not exceed $1,000. In actions to enforce a lien upon land to the amount of $200. In redemption actions where the sum due does not exceed $200. In creditors' actions to rank upon an insolvent estate for claims up to $400.

It also provides for the removal of actions to the High Court in certain cases.

Chapter 20 enables an executor or administrator to be removed by the Surrogate Court, where the estate does not exceed $1000. The Senior Judge of the County Court is no longer to be ex-officio Judge of the Surrogate Court, but this does not affect any Judge now a Judge of the Surrogate Court.

Chapter 21—An Act respecting Disputes concerning Boundary Lines. This Act shall not apply to lands situated in any city, town or incorporated village.

Chapter 22—An Act respecting the Estates of Insolvent Deceased Persons.

Chapter 23—An Act respecting Fraud by Debt Collectors, providing a penalty for issuing imitations of Division Court notices.

Chapter 24—An Act respecting Justices of the Peace in the District of Thunder Bay and Rainy River.

Chapter 25—An Act respecting fees of jurors' on Coroners' Inquests.

Chapter 26 — An Act respecting High and County Constables.

Chapter 27—An Act to authorize Police Constables to take Bail.

Chapter 28—An Act respecting the Quieting of Titles, by which publication by advertisement may be dispensed with where the value of the property is not more than $3,000.

Chapter 29—An Act to amend the Registry Act, 1993.

Chapter 30—An Act to amend the Act *re* Mills and Mill-dams.

Chapter 31—An Act as to certain Proceedings under the Act respecting Assignments and Preferences by Insolvent Persons (Rev. Stat. c. 124.)

Chapter 32—An Act *re* Bills of Sale and Chattel Mortgages in Unorganized Districts.

Chapter 33—An Act respecting the Cost of Seizure of Goods under Chattel Mortgages.

Chapter 34—An Act respecting Antecedent Unregistered Agreements for Bills of Sale and Chattel Mortgages. A contract to give a mortgage or bill of sale, is deemed to be a mortgage or bill of sale, and as such is void against creditors, unless the Act is complied with.

Chapter 35— An Act respecting Liens of Mechanics, Wage-Earners and Others.

Chapter 36—An Act to extend The Woodman's Lien for Wages Act.

Chapter 37 secures payment of wages for labor performed in the construction of Public Works.

Chapter 38, cited as The Master and Servant Act, 1896, is an Act for the better protection of certain classes of workmen.

Chapter 39—An Act to consolidate the Acts respecting the Solemnization of Marriage, cited as the Marriage Act, 1896.

Chapter 40, cited as The Dower Act, 1896, provides where the wife of a vendor or mortgagor has been living separate for five years, the purchaser or mortgagee may, in certain cases, obtain the same relief as in the case of a lunatic wife. Where a wife under age purports to bar her dower, and the purchaser was at the time without notice of her being under age, the conveyance will bar her dower, unless within four years she brings an action or gives notice of her claim.

Chapter 41—An Act to facilitate the Conveyance of Real Estate by Married Women.

Chapter 42—An Act respecting the Law of Landlord and Tenant.

Chapter 45—An Act relating to the Law of Insurance, amending the law in respect to the declaration by the insured as to the beneficiaries under his policy, and also protects the company paying insurance money before receiving notice of the declaration.

Chapter 46 — An Act respecting Building Societies.

Chapter 50—An Act respecting Street Railways.

Chapter 51—The Municipal Amendment Act, 1896. This Act provides among other things as follows: Notice of action against cities, towns or incorporated villages in actions for damages must be given within 7 days of the accident. In cases of Townships the limitation of thirty days still remains. Actions for negligence in non-repair of highways must be brought only against the municipality. The Canadian Wheelmen's Association may maintain sign posts to guide travellers and show distances and give danger signals.

The number of County Councillors is reduced.

Chapter 58 — The Assessment Amendment Act, 1896, provides that in the case of distress for non-payment of taxes, where the owner or person assessed is not in possession, the goods and chattels on the premises not belonging to the person liable for the taxes may not be seized; but this does not apply when the property is claimed by relatives. Goods and chattels of the owner may be seized, whether or not such owner is assessed in respect of the premises. When the tenant has not agreed with his landlord to pay taxes, he may pay the same to the collector and deduct the same from his rent.

Chapter 62—An Act to amend the Act to Prevent the Profanation of the Lord's Day, adds farmers to the class of persons prohibited from exercising their calling on the Lord's Day.

Chapter 63—An Act to provide for the Inspection of Meat and Milk Supplies in Cities and Towns.

Chapter 64—An Act respecting Bake-Shops.

Chapter 68—An Act to make further provisions for the Protection of Game.

Chapter 69—An Act consolidating and revising the Laws respecting the Education Department.

Chapter 70—An Act Consolidating and Revising the Public Schools Act.

Chapter 71—An Act Consolidating and Revising the Laws respecting High Schools and Collegiate Institutes.

Chapter 72—An Act revising certain Matters in the Separate Schools Act.

CANADA'S MINERALS.

The mineral wealth of Canada is so great that an American authority has said: "To particularize the undeveloped wealth of this northern land would require volumes."

According to the report of the Geological Survey, her minerals may be classified as follows:—

(1) Metals, which include native iron, magnetic iron ore, iron sand, hematite, ilmenite, lenionite (including bog iron ore), spathic iron ore, clay ironstone, native copper, sulphide of zinc, sulphide of lead or galena, native silver, and ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, sulphide of bismuth, nickeliferous pyrrholite.

(2) Minerals used in certain chemical manufactures; iron pyrites, pyrrhotine or magnetic iron pyrites, aparite or phosphate of lime, magnesite or carbonate of magnesia; calcite or carbonate of lime, chromic oxide, oxides of manganese.

(3) Mineral manures: gypsum, marl.

(4) Mineral pigments and detergents:—Iron ochres, barytes or heavy spar, soap, clay, etc.

(5) Minerals used in the production of heat and light:—Anthracite and bituminous coal, lignite or brown coal, bituminous shale, petroleum, peat, etc.

(6) Refractory minerals:—Plumbago, soapstone, potstone, mica, asbestos, fire clays, sandstone and pottery clays.

(7) Minerals applicable to common and decorative construction:— Limestone, dolomites, sandstones, granites and syenite, gneiss, labradorite rock, marbles, flagstones, common lime, hydraulic lime, and brick clays.

(8) Minerals for grinding and polishing:—Stone for making whetstones, hones, bathbrick, tripoli, grindstones and millstones.

(9) Minerals applicable to fine arts and jewellery:—Lithographic stone, porphyrites, labradorites, jasper conglomerate, amethystine quartz, agates, amber and Canadian precious stones.

(10) Miscellaneous minerals:— Sands for glassmaking, moulding sands, carbonaceous shale, artificial stone, salt, brines and mineral water.

According to the last census, those engaged in mining numbered 13,417; in quarrying, 1,509; and of mining and quarrying officials there were 242.

The returns for the United States show that the value of the total production (mineral and metal), for 1894, was $553,372,902, which is a decrease of $82,473,904, or 13.37 per cent. The returns for Canada show that the total value of the mineral and metal production in 1894 was 1,550,000 more than in 1893, or an increase of 8 per cent.

It will be seen that almost everything goes either to the United States or the United Kingdom, the proportions having, in the years named, been respectively 79 per cent., 77 per cent., 80 per cent., 86 per cent. and 83 per cent.; and 13 per cent., 15 per cent., 14 per cent., 6 per cent., and 5.63 per cent.

COAL.

The coal areas of Canada are estimated at 97,200 square miles, not including areas known, but as yet undeveloped, in the far north.

There are, first, the coal fields of Nova Scotia and New Brunswick: second, those of the Northwest Territories; third, those of the Rocky Mountains, and fourth, those of British Columbia. The coal areas of Nova Scotia cover about 635 square miles. They are divided into the Cape Breton, the Pictou and the Cumberland basins, all in Nova Scotia; New Brunswick containing, so far as known, no seams of sufficient magnitude to be worked successfully in competition with the Cumberland mines.

The workable thickness of the coal is very great; in Cape Breton a depth of 25 to 60 feet, in Pictou at least 70 feet, and in Cumberland at least 30 feet. If the workable area is reduced one-quarter, say, from 406,400 acres, to 300,000 acres, and the average thickness of the workable area put at 25 feet, on the basis of 1,000 tons of coal an acre for every foot of coal, the amount of coal in the measures of Nova Scotia is 7,000,000,000 tons.

There are no coal measures from New Brunswick westward until the Province of Manitoba is reached. The coal areas of Manitoba are roughly estimated at 15,000 square miles. They yield lignites only, often of a very good quality.

The third coal area is that in the Rocky Mountains. Though small, as measured by miles, it contains much coal of the best quality. Several seams of Anthracite of excellent quality have been found.

The fourth area is that of the Pacific Coast. Dr. George M. Dawson gives the following estimate of its extent.:—

	Square miles.
Nanaimo coal basin (coals), approximately correct	200
Comox coal basin (coals), rough approximation	700
Queen Charlotte's Island, very rough approximation	800
Tertiary lignite-bearing rocks in different parts of British Columbia, south of the 54th parallel of latitude; very rough approximation	12,000

Inquality the Vancouver Island bituminous coals are found to be superior, for all practical purposes, to any coals on the Pacific Coast. They rank in San Francisco with the West Hartley coal.

In the Comox district the production measures show 10 seams of coal, with a total of 29 feet 3 inches, the thickest seam being 10 feet.

The following table shows the coal produced by the principal countries of the world, according to latest available figures, in tons of 2,000 pounds:—

Country.	Year.	Tons.
British Empire—		
Great Britain	1894	210,870,828
Australia	1892-93	4,840,286
Canada	1894	3,903,913
Cape and Natal	1893	266,945
India (British)	1893	2,843,339

IRON.

Both geographically and geologically, the iron ores of Canada have a wide range, and they occur at varied intervals from Cape Breton Island in the east to Vancouver Island in the west.

The total production of iron ore in Canada in 1890 was 76,511 tons, valued at the mines at $155,380. In 1891 the quantity produced was 68,979 tons, valued at $152,005; in 1892, 103,248 tons, valued at $254,206; in 1893, 124,702 tons, valued at $298,018, and in 1894, 109,991 tons, valued at $226,611.

In Nova Scotia the quantity produced in 1891 was 57,311 tons; in 1892, 75,000 tons; in 1893, 66,837 tons, and in 1894 83,512 tons.

The quantity of pig iron made in 1890 was 21,772 tons, valued at $331,688; in 1891, 23,891 tons, valued at $368,901; in 1892, 42,443 tons, valued at $637,421; in 1893, 55,947 tons, valued at $790,283, and in 1894, 49,967 tons, valued at $646,447. The quantity of steel produced in Canada during the fiscal year ended June 30, 1894, was 17,032 tons.

During the past 17 years, 11,784 miles of Railway in Canada have been laid with steel rails, which at 100 tons to the mile would give 1,178,400 tons of steel rails imported.

THE WORLD'S PRODUCTION OF IRON AND STEEL.

Countries.	Year.	Pig Iron.	Steel.
Great Britain	1894	8,248,514	3,415,622
United States	1894	7,456,834	4,941,475
Canada	1894	49,967	28,767
Germany	1894	6,126,374	3,990,342

Other countries	1894	88,160	5,510
Total		26,240,756	14,700,589

Great Britain heads the lists in the manufacture of pig iron, and stands second in the manufacture of steel.

The year 1894 was the year of the largest production Germany ever had.

GOLD.

The production of gold is practically limited in Canada to the Provinces of British Columbia and Nova Scotia. In the latter Province in the last fiscal year there were 37 mines, yielding 22,112 ounces of gold from 58,082 tons of quartz crushed. From 1862 to 1895 (both years included) the yield has been 602,768 ounces from 887,491 tons of stone crushed, or equal to an average of 1 oz. 2 dwt. to a ton of 2,000 pounds.

In British Columbia the value of the estimated yield for 1894 is 456,066 ounces.

The production of gold in the Province of Quebec since the year 1877 when first the figures were available up to the present time has amounted to $260,905.

The world's annual production of gold is variously estimated. The Director of the United States Mint gives it for the fiscal year ending September, 1894, as 8,780,518 ounces, of the value of $181,510,100, against $158,836,000 for 1893. Muhleman gives it for 1893 at $155,522,000.

The following table gives the world's production of gold and silver in 1894:—

Countries.	Gold.	Silver
British Empire:—		
Great Britain	$ 65,800	$ 329,700
Australia	41,760,000	23,367,700

Japan	489,800	2,529,700
China	6,014,000	
Corea	476,200	

The British Empire, Russia and the United States supplied between them nearly 157 million dollars worth of gold in 1894.

COPPER

Copper occurs in Canada in the forms of native and metallic copper and sulphuretted ores, the former being principally confined to the rocks of the upper copper-bearing series on Lake Superior, the latter being more widely diffused.

The production of copper in Canada for the fiscal year was 18,789,162 pounds, valued at $949,229, Ontario exporting 1,281,333 pounds, Quebec 416,674, and British Columbia 1,744,45[illegible] pounds.

The indications are the output in copper will soon be materially increased, as cheaper and more effective methods for separating the copper and the nickel from each other have been adopted in the Sudbury District, and the result will doubtless be a large increase in the output.

NICKEL.

The first discovery of nickel in Canada was made in 1883, near Sudbury, in the District of Algoma, and since then about twenty promising deposits have been discovered.

Operations at present are principally carried on by four companies—The Canadian Copper Co., H. H. Vivian & Co., the Dominion Mineral Co. and the Drury Nickel Co.

The ore, which contains on the average about 2.25 per cent. of nickel, is roasted and smelted into a copper-nickel matte, the usual composition of which, from average analysis, is about as follows:—Copper 26.91; Nickel, 14.14; Iron, 31.335; Sulphur, 26.95, and Cobalt, .935. The matte is also said to contain some ounces of platinum to the ton. The amount of fine nickel in the matte produced at and shipped from the Sudbury mines in 1891 was 4,626,627 pounds, in 1892 the quantity was 6,057,482 pounds, and in 1893, 3,992,982 pounds, 1894, 4,907,430, and in 1895, 3,888,525 pounds.

The world's total production of metallic nickel is estimated for last year at 5,000 tons.

PETROLEUM.

Petroleum has been found in all parts of Canada, and particularly in the Northwest Territories, but it is in the County of Lambton, Ontario, whence most of the oil has been, and is, produced. The oil is obtained at a depth of from 370 to 500 feet.

The first flowing well was struck in 1862, on the 19th of February, and in October of the same year there were 35 flowing wells. As there was no accommodation for the storage of this enormous flow, there was a great waste, and it is calculated by one authority that between the dates mentioned no less than 5,000,000 barrels of oil floated off upon the water of a neighboring creek. Means were taken after a

In the museum of the Geological Survey of Canada at Ottawa, of which the Director is Alfred R. C. Selwyn, C.M.G., LL.D., F.R.S., is a collection of the economic minerals and rocks of Canada, systematically arranged by the Assistant Director and Mineralogist to the Survey. This collection affords the most ample evidence of the extent and variety of the mineral wealth of Canada.

time to stop this waste, and, though no exact particulars are available, the annual output for some years has been about 600,000 barrels.

According to the census of Ontario returns of 1890, there were twelve refineries in operation, employing about 250 men, and it is estimated there were 3,500 wells pumped.

NATURAL GAS.

Since July, 1885, when a well was sunk at Port Colborne, Ont., numerous wells have been sunk, but the most productive gas fields, so far discovered, are situated one in Essex County and one in Welland, the daily flow of gas in the latter county being 30,895,000 cubic feet. In Essex County one well has a daily flow of 7,000,000 cubic feet, which gas is utilized in lighting the town of Kingsville.

The estimated available daily flow of Natural Gas in Ontario in January, 1891, was 50,000,000 cubic feet. The gross amount received for sales of Natural Gas in 1893 was nearly $367,000, in 1894, $313,754, and in 1895, $423,023.

SALT.

The Salt produced in Canada is almost all manufactured in Ontario. In 1895, 60,018 tons were produced, valued at $180,417, an increase over former year's output of 2,819 tons.

PHOSPHATE.

Phosphate in its purest form contains 92.26 per cent. of phosphate of lime.

The exports of this mineral almost all go to Great Britain. The exports in 1895 were 4,189 tons, valued at $33,810, being a decrease as compared with 1894 of 758 tons in quantity, and in value $6,590.

The world's production is given below :—

ASBESTOS.

There is probably no mining industry in Canada that has shown such marked progress as that of this peculiar mineral.

It principally occurs in the Eastern Townships of Quebec.

The production of Asbestos in Canada in 1894 amounted to 7,630 tons, having a value of $420,825. The exports of Asbestos in 1892 amounted to 7,316 tons, valued at $514,412; in 1893 to 5,898 tons, valued at $396,718,; in 1894 to 6,229 tons, valued at $339,756, and in 1895 to 8,593 tons, valued at $493,075.

GYPSUM.

This is one of the oldest worked of any of the deposits of the country. Nearly one-half of the production of Gypsum in 1894 is credited to Nova Scotia, and of the exports nearly 80 per cent. goes from Nova Scotia, the market for it being almost altogether in the United States. The production of crude Gypsum for 1895 was 226,178 tons, valued at $202.608, and the amount exported in 1895 was 8,593 tons, valued at $493,075.

IMPORTS AND EXPORTS.

During 1895 there was an estimated amount of $33,096,181 exported from Ontario, and $41,297,141 imported, bearing a duty of $7,128,749.

Quebec exports amounted to $50,601,504; imports, $48,462,282, with duty of $6,698,975.

Nova Scotia exports amounted to $11,723,534 ; imports, $9,270,414, with duty of $1,160,101.

New Brunswick exports amounted to $6,368,657, imports of $4,503,025, with duty of $942,310.

Manitoba exports amounted to $1,611,003; imports of $2,191,710, with duty of $484,252.

British Columbia exports amounted to $9,121,098; imports, $4,379,611, with duty of $1,053,691.

Prince Edward Island exports amounted to $1,039,493; imports $524,133, with duty of $136,137.

North-West Territories exports amounted to $77,333; imports, $153,366, with duty of $13,054.

POPULATION AND VITAL STATISTICS.

The last official census of the population was taken in 1891, the results of which we subjoin.

The urban population of Canada has been divided, in the following tables, into three groups: (1) cities and towns of population of 5,000 and upwards; (2) of 3,000 to 5,000; (3) of 1,500 to 3,000. The object of this division is to show the growth of the cities and towns and villages separately, so that those interested may at once ascertain the development of urban life in each of the

three grades. In order to prevent confusion in making comparisons, it is necessary to point out that, in many cases, additions to population have been caused by the annexation of adjacent territory since 1881—notably in the cases of Montreal, Toronto, Ottawa, London and St. John. In each such instance the population of the annexed region as it was in 1881 has been added, in the tables, to the population of that year as given in the Census volumes of 1881, in order that the comparision of growth may be exact.

The urban population of Canada in 1871 was 686,019 or 18.8 per cent. of the total population; in 1881 it was 912,934 or 21.1 per cent., and in 1891 it was 1,390,910 or 28.77 per cent. The growth of the urban at the expense of the rural population is one of the features of the present age throughout the world, and it is evident, from the foregoing figures that the movement prevails in Canada as well as elsewhere. The large increase between 1881 and 1891 is caused to a considerable extent by the growth of a number of small places, which had not attained a population of 1,500 in 1881.

The population of Canada in 1881 consisted of 2,188,778 males and 2,136,032 females and in 1891 of 2,460,471 males and 2,372,768 females.

The total foreign trade of the Dominion in 1895 was $18,915,499 less than the average of the previous three years, or 7.7 per cent. The volume of trade of 1895, measured by prices has, however, only been excelled in four years during the period since Confederation.

The total imports of 1895 were less than the average of the previous three years by $15,870,077 or 12.6 per cent. The exports were less than the average of the same by $3,045,222, or 2.7 per cent.

The total imports for 1895 have been exceeded in fifteen years since Confederation, while the total exports have been exceeded only in three years.

The following summary shows that while the past fiscal year was marked by a decided increase in the volume of our import trade, it was also marked by a decline in prices.

SUMMARY OF IMPORTS 1895. COMPARED WITH 1894.

Articles.	Value imported in 1895.	More or Less than 1894. Quantity.	Price.	Together.

Miscellaneous articles	10,373,493	+ 416,000	— 1,101,000	— 685,426
Total	105,252,511	+ 3,061,000	— 10,902,000	— 7,841,472

If prices had remained in 1895 exactly as they were in 1894, there would have been an increase in the value of imports of $3,061,000, brought about by a corresponding increase in volume, but this increase was offset by a decline in prices to the extent of $10,902,000, so that the actual decrease amounted to $7,841,472.

In the imports from the various foreign countries into Canada during 1895, there was an increase from eighteen countries and a decrease from twenty-six; the largest increase being $1,484,891 from the Spanish West Indies, and the largest decreases being in imports from the United States, $3,570,192, Great Britain, $7,608,835; Germany, $887,681, and Dutch East Indies, $645,831. The aggregate decreases exceeded the increases by $12,693,258.

THE RELATIVE VALUE OF THE ARTICLES (FREE AND DUTIABLE) IMPORTED FROM GREAT BRITAIN AND THE UNITED STATES INTO CANADA.

	1895	1894
Total dutiable goods, Great Britain	$23,311,911	$27,493,160
Total free goods, Great Britain	31,131,737	11,224,107

Many articles of import, which are really the produce of South America and the West Indies, are credited to the United States, from which country they were bought at second hand, as coffee, sugar, hides, etc.

The figures in the above table must only be taken as indicative of the channels by which goods enter the Dominion, and not as representing the individual consumption of each province. Quebec contains the principal port of entry by the St. Lawrence, and Ontario the principal ports of entry for goods from the United States, therefore a very large portion of the duty collected is really paid by the other Provinces, the same being equally applicable when applied to exports. Many products of Prince Edward Island are taken across to the mainland and thence shipped from Nova Scotia and New Brunswick ports, to which Province they are credited as exports. According to the Trade and Navigation Returns, 81,086 head of cattle were exported from the Province of Quebec in 1894, that is, from the port of Montreal, but over ninety per cent. of this number was actually from Ontario.

Out of ninety-one articles enumerated in the foregoing table there were in 1895, compared with 1894, increases in forty-eight, the principal being in exports of horses, cattle, sheep, fruits, barley, hides, meats of all kinds, and wool

The principal decreases were in exports of butter, cheese, fish, oats, peas, wheat, hay, lumber and timber square.

Exports to the British Empire on the whole show an increasing proportion, and those to other foreign countries show a decreasing proportion of the whole.

The United States, it appears, take almost all the mineral products exported from the country, and for some time they took the largest proportion of the agricultural products, but in consequence of the McKinley tariff, this branch of trade has been largely devoted to Great Britain, which country in 1892 took 76.27 per cent., in 1893 77.64 per cent., in 1894 80.62 per cent., and in 1895 76.78 per cent. of animal and agricultural products, as compared with 17.2 per cent. in 1892, 15.60 per cent. in 1893, 11.50 per cent. in 1894, and 17.20 per cent. in 1895 that went to the United States.

Exports of the fisheries to Great Britain in 1894 and 1895 show an increase of 95 and 77 per cent. respectively as compared with 1892, while there was a decrease to the United States.

The exports to Great Britain in 1895 exceeded the imports by $26,771,827 and were the largest (with the exception of 1893 and 1894) in the history of the Dominion.

The imports from the United States exceeded the exports to that country by $22,330,748.

The total trade with Great Britain in 1895 amounted to $92,995,404, and with the United States to $100,634,915, being less than that of the previous year by $14,290,701 for Great Britain and an increase of $1,917,544 for the United States.

The combined trade with the two countries constituted 86.2 per cent. of the aggregate trade of Canada as compared with 85.5 per cent. in 1894. The trade with Great Britain in 1895 was 41.2 per cent. of Canada's total trade, as against 44.5 per cent. in 1894, that with the United States was 44.9 per cent. compared with 41.0 per cent in 1894.

Of our total exports in 1895 Great Britain and the United States took 90.77 per cent., as compared with 88.79 per cent in 1894, 91.09 per cent. in 1893, 91.16 per cent. in 1892, and 91.98 per cent. in 1891.

The following table shows the value of exports for the year 1895, compared as to quality and value with 1894:

TELEGRAPH AND TELEPHONE LINES IN CANADA.

The principal telegraph lines in Canada are in private hands and the Government only own and operate those lines which have been built by them in furtherance of the public service, especially in connection with the signal and other stations established by the Marine Department along the shores of the Gulf of St. Lawrence, the Marine Provinces and British Columbia, and also for the advancement of settlement in the North-West.

There are 1,259 miles of land lines and 227 miles of cable along the St. Lawrence and Eastern Coast, 698 miles of land lines in the Territories, and 505 miles of land lines in British Columbia.

The principal cable lines on the Eastern coast are in connection with the Magdalen and Anticosti Islands, and in British Columbia, across the Straits of Georgia, and between Vancouver Island and Washington Territory.

Of the telegraph lines in Canada 2,487 miles of land lines are owned by the Government and 238 miles of cable, and in addition the Government has built or subsidized 690 miles of land lines, and 45 miles cable lines, principally located in the Lower Provinces, making in all a total of 3,176 miles built or subsidized by the Government.

The telegraph business of Canada, from Quebec to the west, is in the hands of the great North-West Telegraph Company and the Canadian Pacific Railway Company, while the Western Union Telegraph Company controlls the Maritime Provinces.

In addition to the above the Anglo-American Cable Company operate the lines of the Prince Edward Island system, having 385 miles of poles, 403 miles of wire, and 32 offices.

The ordinary rate for messages to places in the Dominion is twenty-five cents for ten words. To Halifax, Winnipeg and British Columbia rates vary from thirty cents to one dollar for ten words. To the United States the rate is from forty cents per ten words upwards, according to distance. The rate to the United Kingdom is 25 cents per word.

Canada has one telegraph office to every 1,988 persons, and only eight countries in the world possess a greater telegraph mileage.

The total length of telegraph lines in the world is 601,142 miles of land line, and 153,649 miles of cable; the length of telegraph wire is 1,500,000 miles.

The United States possess 210,000 miles open for public service, of which 190,303 miles belongs to the Western Union Telegraph Company.

Since 1875 the oceans have been networked with submarine cables. In 1879 10,550 miles were laid; in 1883, 2,584 miles, in 1885, 4,382 miles, and from 1886 to 1888, 5,893 miles. The latest returns give the following as the actual situation as regards extent of submarine cable. Total, 113,084 nautical miles of cable, of which there are of single wires 110,516 miles and several wires 2,568 miles.

The first submarine cable was laid in 1851 and was 25 miles in length.

In 1852, 10 miles of cable were laid between New Brunswick and Prince Edward Island, being the first laid in North America.

In 1852 two submarine cables were laid, one between Dover and Ostend, the other between Oxford and Scheveningen, in Holland.

In 1858 the first Atlantic cable was laid and in 1865 the Great Eastern commenced on the 21st of July to lay the second, but on the 12th of August the cable broke.

Ot the 13th of July, 1866, the "Great Eastern" started on her second attempt to connect Canada with Great Britain and on the 10th of August the cable was landed on the shores of Newfoundland.

By 1868, 15,830 nautical miles of cable had been laid.

In 1870 more than 12,000 miles were put down, in 1871, 7,777 miles and in 1873, 7,918 miles.

Between these dates the immense line connecting Suez with Bombay was established.

In 1874 Europe and South America were connected by cable.

TELEPHONE.

The telephone system in Ontario and Quebec is largely controlled by the Bell Telephone Co, of Montreal.

There are connected with the several systems 44,000 miles of wire and 33,500 instruments, and that in 1894 about 73,000,000 messages were sent.

The first experimental telephone erected in Canada was from the residence of Prof. Graham, Bell's father, in Brantford, Ont., to the residence of the Rev. T. Henderson, also of Brantford. The first commercial line was established at Hamilton in October, 1877. Canada is, therefore, the birthplace of the telephone, as Edison in the same year, 1877, opened up correspondence with parties in Montreal, but he admitted Bell's claim to priority in the invention and its use.

The United States in 1894 had 353,480 miles of telephone wire. Canada had 8,800 miles of wire for each million of her people; the United States 4,700 miles.

MERCANTILE MARINE.

The Marine interests of Canada are large, and to have a thoroughly equipped Marine Department is most essential.

This department was formed after the union of the Provinces in 1867, Hon. Peter Mitchell becoming the first Minister of Marine and Fisheries. Since Confederation 200,000,000 tons of sea-going shipping have entered the seaports of Canada, 172,000,000 tons of shipping have

crossed and re-crossed the great lakes between Canada and the United States, 360,000,000 tons having passed from Canadian ports to Canadian ports, doing the coasting trade of the country.

Last year there were 768 lighthouses, 632 light stations, 22 fog horns and 39 automatic fog horns.

The Ontario division, extending from Montreal to Manitoba, contained 222 lights, located at 180 stations. In the Quebec division are 153 lights, and 116 stations, and 8 light ships. The Nova Scotia division has 178 lighthouses, showing 190 lights; New Brunswick, 94 lighthouses, and Prince Edward Island 35 lighthouses.

The total cost of maintaining the lighthouses, fog whistles, etc., in Canada during 1895 was $457,548.

The total number of vessels on the Registry Book of the Dominion in 1895 was 7,262, with a gross tonnage of 825,837 tons.

The total number of wrecks and casualties to sea-going vessels of all nations during 1894, as reported by the Department, was 247, the tonnage involved was 93,914, and the amount of loss estimated at $767,536. The number of lives lost was ten.

That the efforts of the Government and the people of Canada to reduce the number of casualties and diminish destruction of property and loss of life by means of lighthouses, fog whistles, etc., have been successful, is seen in the following statement:—

Average number of Casualties and Deaths.

The number of vessels built and registered in Canada during 1895 was 250, with a tonnage of 16,270. Thirty-one vessels to other countries, valued at $172,563, with a tonnage of 16,567.

The below table shows the principal countries from which sea-going vessels arrived, and from which they cleared, at Canadian ports in 1895:—

Iron and steel have so completely superseded the use of wood in the construction of ships that there can be little, if any, development in the shipbuilding industry of Canada till the great natural facilities of Canada are properly applied.

The Province of Nova Scotia possesses such large deposits of iron ore, coal and flux in close proximity to each other, and to ship harbors, that capital and skill should find a splendid opening for successful enterprise.

The first iron ship was built in Great Britain in 1843. The first steel ships were built on the Clyde in 1879, when 18,000 tons of shipping were constructed of the metal.

The world's shipping in 1895-96 was 30,368 vessels of 25,107,632 tons; 15,803 vessels with 5,672,920 tons were of wood, and 145,651 vessels with 19,434,662 tons were of iron and steel.

In the last three years the tonnage of wooden vessels has decreased from 30·8 per cent. of the whole to 22·61 per cent., while the tonnage of iron and steel vessels has increased from 69·2 per cent. of the whole to 77·41 per cent.

In 1895 16,866 vessels with a tonnage of 5,196,811 tons in Canada, and 15,547 vessels with a tonnage of 2,927,322, arrived at and departed from Canadian ports on inland waters between Canada and the United States.

The first ocean-going steamer arrived at Montreal in 1853, in which year four arrived of a total tonnage of 1,951 tons, and in the same year 248 ocean-going sailing vessels arrived of a tonnage of 57,752 tons. In the next year, 1854, six steamers of 5,545 tons aggregate, 252 ocean-going sailing vessels of 65,365 tons, and 4,251 inland vessels of 335,578 tons, arrived at the port, making an average tonnage of 394,488 tons, and the average tonnage of sea-going vessels 274 tons. In 1892, thirty-eight years after, the total tonnage that arrived in Montreal was 2,086,307 tons, of which 1,036,707 tons belonged to sea-going vessels, 658 of which were steamers and seventy-seven sailing vessels, the average tonnage of each sea-going vessel having increased to 1,410 tons. In 1880, 354 steamers, forty-two ships and 143 barques, sea-going vessels, arrived at Montreal. In 1892 the numbers respectively were 658, eight and twenty-one. The number of vessels that arrived at Montreal from the Maritime Provinces in 1881 was 212, with a tonnage of 99,378. In 1892 the number of vessels was 331 and the tonnage 280,958, and in 1893 the number of sea-going vessels which arrived was 871, having a tonnage of 1,174,996 tons. In 1881 the number of vessels that arrived from the Maritime Provinces in Montreal was 212, with a tonnage of 99,378 tons, while in the last fiscal year the total arrivals were 291, with a tonnage of 300,060 tons.

The following table is a comparative statement of the total shipping of Canada, inland as well as sea-going, which arrived at and departed from Canadian ports, in the years 1894 and 1895.

GRAVING DOCKS.

There are four graving docks in Canada, three belonging to the Federal Government and one owned by a company. The following statement shows the dimensions of these graving docks:

*At ordinary spring tide. †Height of water varies three and one-half feet.

The Halifax Graving Dock was opened September 20th, 1889, and is the largest on this continent. It can be adapted to vessels 601 feet long. The "Teutonic" and "Majestic" are 582 feet and the "Campania" and "Lucania" are each 620 feet in length.

For twenty years from the completion, the company owning it have subsidies from the Imperial and the Canadian Government, and from the city of Halifax amounting in all to about $30,000.

The Esquimalt Dock, in British Columbia, was the first built on the Pacific coast. It was finished in June, 1886. The Levis Dock was finished in 1887, and was the first on the St. Lawrence River. The Kingston Dock was finished in 1891, and serves the shipping of Lake Ontario and River St. Lawrence. During the year past eleven vessels used the Esquimalt Docks, twenty-four the Kingston Dock, and eight the Levis Dock.

A direct mail service between Canada and the West India Islands was established in January 1890, the steamers being subsidized by the Canadian Government.

The gross public debt of the Dominion of Canada, on June 30th, 1895, amounted to $318,048,755; on the same date in 1894 it was $308,348,024. There was, therefore, an increase during the year in the gross amount of liabilities of $9,700,731.

The items which have increased the debt are railways and canals: Canadian Pacific Railway and other public works $161,932,218; Dominion lands $3,668,904; Consolidated Fund transfers $13,087,101; Railway Subsidies $14,136,737; expenses of and discounts on loans $12,249,524; deficits $22, 219,056; territorial $3,798,656; allowances to provinces $30,743,393.

The items which have decreased the debt are: Sinking Fund $33,962,166; Surplus $33,873,060; Consolidated Fund transfers $5,768,766; receipts from premiums on loans $555,972; Dominion lands $4,275,526; refunds from sales of public works $53,804.

The provincial debts assumed by the Dominion at Confederation amounted to a total of $77,500,000, which with the amount of debt subsequently assumed or allowed makes a total debt assumed of $109,430,148.

INSURANCE.

There were twenty-nine companies transacting a life insurance business in Canada in 1895, viz: 11 Canadian, 8 British and 10 United States.

The business done since 1890 was divided as follows between the several companies:

	1890.	1891.	1892.	1893.	1894.
Canadian companies	$23,541,404	$21,904,302	$25,585,534	$28,089,437	$28,670,364
British	3,390,972	2,947,246	2,625,213	2,967,855	3,214,216
United States	13,591,080	13,014,739	15,409,266	14,145,555	17,640,677
Total	$40,523,456	$37,866,287	$44,620,013	$45,202,847	$49,525,257

By this table it will be observed that the Canadian companies do a larger business than all the other companies combined.

The following table gives the amount of life insurance allowed to lapse by non-payment of premiums each year, and the proportions of such amount lapsed in each $1,000 of risk, and in each $1,000 effected in each year.

The table shows that a close relation exists between the degree of prosperity experienced by the people generally, and the amount of insurance allowed to lapse through the non-payment of premiums.

ASSESSMENT LIFE INSURANCE.

The business of life insurance upon the assessment plan has been transacted by nine companies, of which six are Canadian and three American.

The total amount of policies taken during the year 1895 was $12,862,025, which is less by $583,125 than the amount taken in 1894. The net amount in force at the end of the year was $71,380,365, which shows an increase of $3,666,895 over that of the previous year.

The amount of insurance terminated by death was $647,700, and by surrender and lapse $8,464,080, giving for every $1,000 of current risk $8.74 terminated by death and $114.16 by surrender and lapse.

The total amount paid by members for membership fees, annual dues, assessments, etc., was $945,997, and the amount paid for death claims was $610,654.

On the first of May, 1896, a license was issued to the Supreme Court of the Independent Order of Foresters, a society which previously carried on business as a benevolent society.

ACCIDENT AND GUARANTEE INSURANCE.

The business of accident insurance was transacted by ten companies, viz: 5 Canadian (1 of which is combined with life insurance and 1 with plate glass insurance), 1 American (also combined with life), and 4 British (2 of which are combined with the guarantee business, and 1 with sick insurance).

The total accident premiums received in Canada were $357,809, insuring an amount of $66,631,381, and the sum of $191,129 was paid for claims, with $49,140 claims not settled.

The guarantee business was conducted by four companies: 1 Canadian, 1 American and 2 British. The premiums received were $76,379, guaranteeing an amount of $12,965,270, and the net amount paid for claims was $11,553, with $6,253 claims not settled.

PLATE GLASS INSURANCE.

The business of plate glass insurance was transacted by four incorporated companies, viz: 2 Canadian, 1 British and 1 American, and by 2 firms of individual underwriters.

The premiums received during the year in Canada for plate glass insurance were $51,095, being greater than the amount received the previous year by $7,162, and the total losses incurred were $255.30, being $49.36 in excess of amount of previous year.

BURGLARLY INSURANCE.

This branch of insurance was introduced into Canada three years ago.

The Dominion Burglary Guarantee Company (Ltd.), of Montreal, received their license on the 14th of June, 1893, to transact the business of guaranteeing against loss of jewelry, bullion and other movable property deposited with it for safe keeping.

At the present time there are in Canada ninety-eight companies of all kinds doing business in insurance.

The deposits for the protection of the policy holders, held by the Receiver General, in trust for these Companies, at July 3, 1896, amounted to $24,344,826, and there was also deposited with Canadian trustees, $6,475,697, making a total of $30,820,523 for the protection of policy holders.

FIRE INSURANCE.

During the year 1895 the business of fire insurance was carried on by thirty-five active companies. Of these, 6 were Canadian, 21 British, and 8 United States.

Inland marine insurance was also transacted by six companies; 2 being Canadian, 3 British, and 1 United States.

Accident, guarantee, plate glass, steam boilers and burglary business was done by nine companies.

The following table will show business done in fire insurance in 1895:

Companies.	Paid for Losses.	Received for Premiums.	1895 Percentage of Losses to Premiums.	1894 Percentage of Losses to Premiums.
Canadian companies.....	$809,161	$1,153,903	70·12	72·35
British companies	3,439,223	4,808,971	71·52	67·24

Total	$5,019,516	$6,986,925	71·84	68·38

Taking the whole period since Confederation the total income of the Canadian companies from all sources was $75,603,576, and the expenditure $76,820,735; showing an excess of expenditure over income of $1,217,159; of this excess the sum of $2,866,028 represents dividends to shareholders.

In fire insurance stock companies (Licensees of Province of Ontario) for year ending December 31st, 1895, the total amount at risk was $6,955,705.00; premiums, $86,341.47; losses, $46,965.23, and the percentage of losses of premiums was 54·39, while in the mutual and cash mutual companies the total amount at risk was $178,244,830.51; premiums, $954,576.25; losses, $769,334.65; percentage losses on premiums of 80·59.

CANADA'S FISHING INDUSTRY.

Canada's fisheries are the most extensive in the world, embracing as they do an immense extent of sea coast, great inland seas, innumerable lakes, and a great number of rivers. The coast line of British Columbia alone is 7,181 miles, or more than doubling in extent that of Great Britain and Ireland. The eastern sea coast of New Brunswick, Nova Scotia, Prince Edward Island and Quebec is 5,600 miles, while the salt water area is 15,000, and the fresh water 36,350 miles.

To give an idea of the immense interests that are centred in the industry, in 1894 there were engaged in fishing 70,719 men, using boats, nets, vessels, etc., valued at $9,439,116, while the commercial values of the yield amounted to $21,000,000.

The Government, realizing the value of this industry, has instituted laws and regulations for its protection: (1) By a large staff of officers stationed where fishing is carried on; (2) by armed cruisers on the Atlantic coast and the great lakes; (3) by the establishment of close seasons, when the fish are spawning; (4) by leasing and licensing fishing privileges; (5) by instituting and maintaining fish breeding establishments; (6) by giving fishing bounties amounting to $160,000 per year; (7) by prizes awarded for the best models of fishing vessels; and (8) by establishing intelligence bureaus, by means of which the movements of bait and of fish are ascertained and reported to the principal fishing stations. There are in all fifty-seven of these bureaus established.

In British Columbia in 1876 the value of the catch was $104,697; in 1880, $713,335; in 1885, $1,978,038; in 1890, $3,481,432; in 1893, $4,447,083; and in 1894, $3,950,478.

There were during the period from 1883 to 1894 fish caught in the Great Lakes amounting to 293,707,000 pounds, and representing a value of $17,660,000.

There were distributed to the several fish hatcheries throughout the Dominion during the years 1868 to 1895 as follows: Ontario, 976,132,200; Quebec, 90,665,000; New Brunswick, 52,829,200, Nova Scotia, 55,437,500; Prince Edward Island, 6,145,000; British Columbia, 55,262,800; Manitoba, 33,500,000, or a total of 1,266,971,700.

Sealing—Little was doing in seal catching prior to 1878. Since that date the following statement shows the growth: In 1883, 9,195 seals were killed; in 1889, 35,310; in 1891, 52,365; in 1892, 49,743; in 1893, 70,592; in 1894, 95,048; and in 1895, 73,611.

From 1871 to 1895 the total products of the Canadian Pelagic sealing industry amounted to 551,540 seal skins.

The total Pacific catch during the season of 1895 amounted to 126,841 seal skins.

AGRICULTURE.

Agriculture is to the people of Canada a branch of industry of paramount importance. Whatever affects it prejudicially or beneficially affects directly all other employments.

It is estimated that 45 per cent. of the population find their means of subsistence in agricultural pursuits.

According to the census of 1891, the area of improved lands in Canada was 28,537,242 acres, of which 19,904,826 acres were under crop. There were 464,462 acres in gardens and orchards, and 15,284,788 acres in pasture. Relatively to the whole area of Canada the area under crop and in pasture was about 10 per cent.

Ontario has an area suitable for grape culture at least equal to half the present area of vineyards in France. In 1893 there were in Ontario 2,223,282 vines of bearing age, and 883,430 of non-bearing age.

The following table gives a statement of exports from Canada for the year ended June, 1895, of agricultural produce, showing total exports to Great Britain and the United States:—

† Including shoulders and sides.

Viticulture in Canada has made considerable progress. There are at least 6,000 acres of land planted in vines capable of producing one million and a-half gallons of wine.

Tobacco—The amount of tobacco leaf imported annually into Canada for manufacturing purposes is one million pounds, in addition to which there are imported annually about 290,800 pounds of cut tobacco, cigarettes, cigars and snuff. In 1864 there were 13,929,560 pounds of leaf imported for manufacturing purposes, and in 1894 the import was 14,253,749 pounds.

Considerable attention has been given to the culivation of flax in Manitoba for seed, and in Ontario for both seed and fibre. The price realized during the past year ranged at one dollar and upwards per bushel. Manitoba and the Northwest Territories seem to be specially adapted for growing flax for the seed.

The general increase in Agricultural pursuits will be best shown by comparing the exports and imports of the farm and orchard for the years 1877 and 1895.

FOREST WEALTH OF CANADA.

The forest wealth of the country is very great, and whether the amount of capital invested is considered, the labor employed or the varied uses to which wood is put in increasing comfort or commerce, the forests should be regarded as a precious heirloom, to be properly used, and through careful maintenance to be handed down to posterity preserved and improved.

The ownership of Canadian forests is for the most part vested in the Provincial Governments, including the Provinces of Ontario, Quebec, New Brunswick and British Columbia, which grant licenses to the lumbermen.

In the Province of Manitoba, in the Territories and in the Railway Belt of British Columbia, (40 miles wide by 500 miles long), the Dominion Government, filling the place of the Provincial Governments, owns the Crown Lands and their forests.

In Nova Scotia there is no system of timber licenses, the trees being sold with the land, and not much timbered Crown Lands are remaining. This is also the case in Prince Edward Island.

The value of our forest products, calculated from the census returns of 1891, was $80,071,415, with respect to the quantity used, the census returns show an aggregate of 2,045,073,072 cubic feet as the total cut of the year. About thirty per cent. of this is exported, leaving 1,431,551,150 cubic feet for the annual home consumption.

The carriage of forest products forms a considerable proportion of the business of the railways and ve-sels engaged in inland navigation. It is estimated that the Canadian railways carried the following wood goods in the year 1895: Lumber of all kinds and saw-logs 3,576,415 tons, and firewood, 904,056 tons, a total of 4,480,471 tons, or somewhat over one-fifth of the total weight carried.

A careful estimate has been prepared of the areas of forest and woodland—distinguishing the pine lands—of the various provinces and territories of Canada. This estimate has been founded upon the returns of the provinces as to their licensed lands, and the reports of their surveyors—similar returns by the Department of the Interior and of Indian Affairs for their licensed lands and the reports of their surveyors—the maps and the reports of the Geological Survey—the census returns and any other trustworthy data procurable.

It must be admitted that the data now available are not sufficiently exact or full to make these estimates as precise as is desirable. Much more detailed information might be compiled by the provincial governments from the reports of their surveyors, timber agents and other officials, especially in regard to the state of existing limits and of those that have been worked out, but no such information is published by them so as to be available for estimating the forest wealth of the country.

The area of Forest and Woodland in Canada cannot be definitely stated.

a. The area of woodland thus estimated is far from all being forest fit for lumbering, much being covered with small growth, of some use locally, but of little, if any, merchantable value.

b. Pine lands thus estimated must not be supposed to be dense forests of pine, but in most cases as having a more or less considerable quantity of white and red pine mingled with other timber. In the Maritime Provinces the greatly diminished pine is so scattered through the woods that no estimate of area can be formed. In Manitoba and the Territories there is no white or red pine, nor in British Columbia, where the white pine (*P. strobus*) of Eastern Canada, is absent, being replaced by Douglas fir, cedar, spruce, etc.

c. There are no sufficient data at present for even an approximate estimate of the area or quantity of spruce in the Dominion.

WOOD PULP AND PULP WOOD.

The manufacture of wood pulp, and the export, not only of pulp, but of wood for making it, have attained large proportions, and the industry has become of great importance. First practised in Germany in 1846, it was adopted considerably later in Canada. The census of 1891 gives a product of 201,155 cords of pulpwood, which cannot be compared with the cut in previous decades, as there was no record of pulpwood in the census returns of 1881 or 1871. There is comparatively little pulpwood cut on licensed Crown lands, a large proportion being obtained from private property, and some wood being probably used for this purpose which is not so classified.

There has been a great increase in the number of pulp mills in the Dominion. They are not mentioned in the census of 1871, but the census returns of 1881 and 1891 show a rapid growth:—

——	No.	Capital invested.	Number employees.	Wages.	Raw material.	Products.
1881	5	$ 92,000	68	$ 15,720	$ 9,400	$ 63,000
1891	24	2,900,907	1,052	292,099	469,845	1,057,810

The exports from Canada, both of pulp and pulpwood, have made rapid strides. They are not mentioned in the Trade and Navigation Returns till 1890; but from that year onward they are recorded as follows: 1890, wood pulp, value $80,005; 1891, value $188,198; 1892, value $219,458; 1893, value $386,092; 1894, value $547,217; and in 1895 value $590,874.

DOMINION PARKS AND FOREST RESERVES.

In consequence of the discovery of the hot mineral springs near Banff Station, an Order-in-Council was passed on November 25th, 1885, reserving a tract of land in that region. Subsequently, by Act of Parliament in 1887 (chapter 32), the "Rocky Mountains Park," including this tract, was set apart as a permanent reserve for a public park, comprising 260 square miles, being twenty-six miles long and ten wide. It includes a number of mountains with peaks extending to an elevation of nearly 10,000 feet. The Bow River flows diagonally through it, with an easterly course, nearly fifteen miles long, and is joined within the park by its tributaries—the Spray River, the Cascade River, and several creeks. The Minnewanka or Devil's Lake, more than ten miles long, by an average width of half a mile, empties itself by the Devil's Creek or Minnewanka River into the Cascade River. There are also the Vermillion Lake and other smaller bodies of water connected with the Bow River. Near the north-east end of the park the Ghost River crosses it with an easterly course of about twelve miles, and its south branch is also partly within the reserve, where it takes its rise. Thus the forests which cover a large portion of the area are well situated for preserving the flow of these important head-

waters. The preservation of these forests from fire is a remarkable feature in the history of this reservation. Mr. George Stewart, D.L.S., the superintendent, in his yearly reports, repeatedly mentions the fact that forest fires outside the park have not spread within it, which he attributes to two reasons, the clearing away of dead trees and the existence of fire-breaks formed by the roads that have been opened to the different points of interest. This is an indication of the means by which the danger of the destruction of our forests by fire may be minimized. There has also been considerable planting of forest trees. The hot springs, the beautiful scenery and the many objects of interest attract great numbers of visitors, besides the many invalids seeking it as a sanitarium.

In October, 1886, an Order-in-Council was passed, setting apart four additional mountain parks, or reservations, in the Rocky Mountains, as follows:—

1. A park at Mount Stephen, including the country surrounding the base of the mountain and adjacent picturesque points.

2. A reservation in the vicinity of the mountain known as Mount Sir Donald, taking in the loop of the railway and adjacent territory.

3. A sufficient area in the Eagle Pass to include Griffin and Three Valley Lakes, and adjoining points of interest.

4. The amphitheatre at the summit of the Selkirk Mountains.

These reservations all contain extensive forests protecting the headwaters of important rivers.

INDIANS IN CANADA.

Considering the comparatively short space of time that has elapsed since many of the Indians began to abandon their natural manner of life, the extent to which they have intermarried, the great difficulty in getting them to submit to the treatment and care required to cope with the various diseases which have accompanied the invasion of civilization, the decrease in the Indian population is easily explained.

Now, however, as they are learning to accommodate themselves to their surroundings, a slight increase rather than decrease may be expected.

The Indian population for 1894 and 1895 in the various Provinces will show this.

INDIAN POPULATION, 1894-95,

	1894	1895
Ontario	17,626	17,907
Quebec	11,859	11,965
Nova Scotia	2,141	2,164
New Brunswick	1,618	1,668
Prince Edward Island	285	287
Manitoba and the North-West Territories Treaty Limits	23,709	24,047
Peace River District Treaty Limits	1,725	893
Approximate—British Columbia	25,807	25,696
North-West Territories, outside of Treaty Limits	12,457	17,648
	97,227	102,275

The Indians are provided with schools, common, boarding and industrial In all of these there are 291, distributed as follows:—81 in Ontario, 20 in Quebec, 8 in Nova Scotia, 5 in New Brunswick, 1 in Prince Edward Island, 29 in British Columbia, 54 in Manitoba and 80 in the North-West Territories. Besides these there are 13 Indian schools outside of the treaty limits.

The total number of pupils on the rolls, and the average daily attendance, are given at 8,175 and 4,819 respectively. These figures indicate that the average attendance is 58.59 per cent. of the total number on the rolls. This is better than the attendance of the white children in the schools of Ontario, where the daily average attendance is 55.5 per cent. of the number on the rolls.

The quantity of land sold for the benefit of the Indians, during the year 1895, was 32.205 acres, which brought $72,423.

The quantity of surrendered lands now held by the Government for sale is about 461,613 acres.

In 1895, the amount to the credit of the Indian Fund was $3,594,206, and the expenditure of the year from the fund was $246,521.

The expenditure from parliamentary appropriations was $955,404.

CHINESE IN CANADA.

The Chinese Immigration Act went into force, as respects arrivals by vessels sailing from ports in North America, on the 20th August, 1885, and as respects arrivals by other vessels, on the 1st of January, 1886.

Since 1886, the total number of immigrants arrived is 13,919, of whom 13,633 paid fees amounting to $697,153, of this amount $5,000 were refunded; the expenses connected with the Act were $22,567. The share of the capitation fee paid to provinces was $167,375.

During the same period 1886-95, 7,237 Chinese have taken out certificates of leave or registered for leave. As a large number have left the country without registering, having no intention to return, the exact number in Canada is uncertain. The census of 1891 showed that there were in Canada 9,129 persons, whose birth place was China.

The year of the largest arrival was 1892, when 3,278 arrived. In 1895 the arrivals numbered 1,462.

INSANITY IN CANADA.

The number of insane in Canada in 1891, as obtained by the census was 13,355, of which 7,162 were males and 6,193 were females.

In every 10,000 males there were 29.1 insane, and in every 10,000 females were 26.1 insane.

Classified according to civil condition there were, single 9,506, married 2,815, widowed 721, unknown 313.

According to ages there were 762 insane under 15 years old, 701 between 15 and 19; 2,429 between 20 and 29. 2,643 between 30 and 39; 5,369 between 40 and 69; 878, 70 years and over, and 576 whose ages were unknown.

There are 17 asylums for the insane in Canada, all of which are supported entirely by the Government, aided in some cases by municipalities.

The following table gives particulars of the number of patients, etc.:

TEMPERANCE.

By the Canada Temperance Act of 1878 (commonly known as the Scott Act), it is provided that any county or city may petition the Governor-General in Council, praying that the Act shall be put in force in such county or city.

The main provision of the Act was "that no person shall, within such county or city in which the Act has become law, by himself, his clerk, servant or agent, expose or keep for sale, or directly or indirectly on any pretence or upon any device, sell or barter, or in consideration of the purchase of any other property, give to any other person any intoxicating liquor."

A person convicted of violating the above enactment is liable to a fine of $50 for the first offence, $100.00 for the second, and for the third and each succeeding offence, imprisonment not exceeding two months.

Since the passing of the Act it has been submitted to the electors 135 times.

It is now in force in two cities and 27 counties. In Ontario and British Columbia the Act is nowhere in force.

The conviction for drunkenness reached the highest point in 1890, and since that date there has been a gradual reduction.

EXCISE DUTIES.

That any party in whose favor license is granted to have and use a chemical still or stills of over three gallons, shall, upon receiving said license, pay to the Collector of Inland Revenue the sum of twenty-five dollars. THE DOLLAR MARK, $.

Writers are not agreed as to the derivation of this sign to represent Dollars. Some say it comes from the letters U.S., which after the adoption of the Federal Constitution, were prefixed to the Federal Currency, and which in the hurry of writing were afterwards run into one another, the U being made first and the S over it. The more probable explanation is, that it is a modification of the figure 8, and denotes a piece of eight reals or as the dollar was formerly called a "piece of eight." It was thus designated by the figures 8-8.

RAILWAYS.

The first railway in Canada was opened on the 21st July, 1836, between La Prairie and St. John's in Quebec, its length being 16 miles, but until the year 1850, when Lady Elgin turned the first sod of the Northern Railway, there were but 71 miles in operation in the Dominion.

In January, 1854, the main line of the Great Western from Windsor to Niagara was opened for traffic, and in November, 1856, the Grand Trunk Railway was running between Montreal and Stratford.

In 1857 there were 1,428 miles of railway in Canada; in 1867 there were 2,253 miles; in 1877, 5,574 miles; in 1887, 11,691 miles; in 1892, 14,588 miles, and in 1895 the miles of track laid in the different Provinces were as follows: Ontario 6,267, Quebec 3,024, New Brunswick 1,396, Nova Scotia 825, Princ Edward Island 210, Manitoba 1,471, Territories 1,772, and British Columbia 800, or making in all a total of 15,745 miles.

The earnings in the calendar year 1894 were $50,000,000 and the working expenses $35,250,000. The number of passengers carried was 14,462,000.

POST OFFICES AND RAILROAD STATIONS

IN THE DOMINION OF CANADA.

The Offices printed in *Italics* are authorized to grant and pay Money Orders. The Offices marked * are Savings Bank Offices. Capital letters on right of the Electoral District column indicate the several Provinces of the Dominion, thus; O, Ontario; Q, Quebec; N.S., Nova Scotia; N.B., New Brunswick; P.E.I., Prince Edward Island; M, Manitoba; B.C., British Columbia; Alta, Alberta; Assa, Assiniboia; Atha, Athabasca; Sask, Saskatchewan.

The numbers and names placed opposite every place indicate the Railroad or Steamship line on which the nearest Railway or Railway Station is situated. See list of Railroads and Steamboats on pages 91 and 94.

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use "Bullinger's Postal and Shipper's Guide for the United States and Canada," in the preparation of the following list:—

MONEY ORDERS.

In sending money by mail, if possible it is always best to send by Money Order.

On Money Orders drawn by any Money Office in Canada on any other Money Order office in the Dominion, the commission is as follows :—

	If not exceeding	$ 4.....	2c
Over	$ 4 " "	10.....	5c
"	10 " "	20.....	10c
"	20 " "	40.....	20c
"	40 " "	60.....	30c
"	60 " "	80.....	40c
"	30 " "	100.....	50c

$100 is the limit of a single Money Order payable in Canada, but for remitting a larger sum, as many orders of $100 each may be had as the Remitter requires; provided that, for purposes of remitting a smaller amount to the same person, only one Order for a less sum than $100 may be obtained by the same Remitter in the same day. No Money Order may contain a fractional part of a cent.

Money Orders are issued in Canada on the following foreign countries and British possessions, at the rate of commission shown below, $50 being the limit to a single Order :—

16. In cases of Money Orders issued in Canada, postmasters are at liberty to accept the written order of the Payee on the Order itself in favor of a second person if through illness or insuperable difficulty the Payee is prevented from presenting the Order in person

17. In the case of a miscarriage, or loss of a Money Order payable in Canada, the circumstance must be made known to the Superintendent of the Money Order Branch, Ottawa, who, on receipt of a second commission, will, after certain precautions have been taken, cause a duplicate order to be issued, or obtained.

Should the payee produce satisfactory evidence that the Order was duly forwarded by the remitter, and subsequently lost in transmission through the post, the sum exacted, for second commission, will be refunded.

18. Duplicates of Orders issued in Canada and payable in another Country are obtainable only on application to the Postal Administration of the Country of payment. Duplicates of Money Orders issued in any other Country, and payable in the Dominion of Canada, can be had only on application to the Superintendent of the Money Order Branch at Ottawa.

19. Although at the end of twelve months from that in which it was issued, a Money Order, if still unpaid, becomes invalid, nevertheless, when a good reason can be given for the delay in presenting it, an application for payment, subject to a certain deduction, is entertained.

20. No application can be entertained for compensation, for alleged injury, from the non-payment of a Money Order at the expected time.

THE POSTAL UNION COUNTRIES.

The postage on correspondence passing between Canada, Europe (including the United Kingdom), the larger part of Asia, certain portions of Africa, the whole of the American continent and Australiasia is governed by the regulations of the Universal Postage Union.

CORRESPONDENCE WITH NON-UNION COUNTRIES.

1. The countries referred to as Non-Union Countries are those that have not entered the Postal Union. The postage rates on letters addressed to these countries is 5 cents per ½ oz.

2. To certain Non-Union countries or colonies full prepayment of postage is compulsory, and this is indicated in the Postage Table by the letter "c." Correspondence for these places posted unpaid or insufficiently paid will be sent to the Dead Letter Office.

3. In certain cases additional postage is charged on delivery in the country or destination, and this is indicated in the Table by the letter "a."

4. The only Non-Union destination to which post cards may be sent is Bechuanaland.

5. The rate on newspapers and other printed matter is 1 cent per 2 ozs.

6. The limit of weight for printed matter addressed to Non-Union Countries is 4 lbs.

7. The limit of size for packages of printed matter to the above destinations is 18 inches in length by 12 in breadth or depth.

8. Packets of samples for Non-Union countries can only be forwarded *via* England, not (for example) *via* San Francisco. The limit of weight for such matter addressed to Non-Union countries is 12 ozs.

COLLEGIATE INSTITUTES AND HIGH SCHOOLS.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities), is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Council, except where there is only one school in the county. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of $400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises, and attendance. High Schools which have an average attendance of 60 pupils may be made Collegiate Institutes and receive additional grant. Pupils attending these schools are prepared for matriculation in the Universities. There were 37 Collegiate Institutes and 92 High Schools, with 24,662 pupils, in Ontario in 1895.

PUBLIC SCHOOLS.

Each Township is divided into school sections of a suitable extent for one school: and in each of these sections three Trustees are elected to manage its school affairs. In cities, towns and villages, the schools are managed by a Board of School Trustees elected from the municipality. There were 5,991 Public (including Separate) Schools, with 484,551 pupils, in Ontario in 1895.

EDUCATIONAL MUSEUM.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture; a valuable collection of Italian, Dutch and Flemish oil paintings and statutary casts and busts. The Museum is freely open to the public from 9 a.m. to 5 p.m.

TOTAL NUMBER OF EDUCATIONAL INSTITUTIONS.

Of all kinds reported by the Education Department as in operation in the Province of Ontario during 1895 was 6,126, attended by 510,456 pupils and expending $5,267,468 in their support.

Note.—For further information of the educational institutions in Ontario, see under "Educational Institutions of Canada."

From the earliest settlement of Ontario, schools were established as the wants of the inhabitants required. The Legislature soon recognized the needs of the country, and made grants of land and money in aid of elementary, secondary and superior education. Statutes were passed from time to time for the purpose of opening schools to meet the demands of the people. The sparsely settled condition of the Province delayed for a while the organization of the system. It was not until 1844 that the elementary schools were put on a comprehensive basis. In that year the Rev. Egerton Ryerson, LL.D., was appointed Chief Superintendent of Education, and the report which he presented to the House of Assembly sketched in an able manner the main features of the system of which he was the distinguished founder, and of which he continued for 33 years to be the efficient administrator. In 1876 the office of Chief Superintendent was abolished, and the schools of the Province placed under the control of a member of the Government, with the title of Minister of Education.

Since this time the control of education in Ontario is vested in the Minister of Education, and subject to the approval of the Provincial Government; all regulations for the Public and High Schools are made by him. The schools are under the control of local Boards of Trustees, elected by the ratepayers, and are allowed to have none but certified teachers.

Education of children between the ages of seven and thirteen is compulsory, for not less than 100 days in the year.

EDUCATION.

Educational matters in the Province of Quebec are under the control of the Superintendent of Public Instruction, assisted by a Council of 35 members, divided into committees for the management of Protestant and Roman Catholic Schools respectively.

Schools are maintained partly by local taxation and partly by Government grants, and are individually controlled by local boards.

As previously stated, religion is assumed as the basis of education, and the various Roman Catholic religious bodies and institutions are largely interested in such matters. The first attempt to give instruction was made by the Recollets in 1616. In 1632 the Jesuits opened schools for the Indians. In 1637 a college was founded in Quebec. In 1801 the Legislature passed an act to establish free schools.

In 1896 there were a total number of 4,886 Roman Catholic Schools and 1,004 Protestant Schools.

The number of pupils in Roman Catholic Schools was 216,198 Roman Catholics and 1,452 Protestants, and in Protestant Schools there were 2,868 Roman Catholics and 35,521 Protestants.

The number of Roman Catholics in Elementary Schools was 175,272, and of Protestants 26,315, and in Model Schools and Academies Roman Catholics were 83,416 and Protestants 3,581.

There has been an increase of 6,628 pupils in the Province during the scholastic year ending 30th June, 1896.

The proportion of Protestants is steadily decreasing. In 1877 it was 15.1 per cent., in 1888 14.2 per cent. in 1889 13.3 per cent., in 1892 12.5 per cent., in 1893 12.5 per cent. and in 1894 11.8 per cent.

RAILWAY.

There are 3,245.89 miles of track laid in Quebec, or an average of 82 square miles of area to one of track. Six lines of railway centre in Quebec, and seven at Mnotreal.

MINERALS.

Mica, $36,500 ; asbestos, $630,853 ; copper, $142,290 ; slate, $36,800 ; limestone, $309,200 ; ochre, $9,000 ; phosphates, $6,300 ; chrome iron, $31,996 ; gold, $759.

The production of gold in the Province has been regular since 1862, but no figures were available until 1877, since which date the value of the quantity produced has amounted to $250,000.

Quebec during 1894 exported 3,239,000 pounds of copper, and silver, phosphate and asbestos are found in small quantities.

GAME LAWS OF QUEBEC.

Close Seasons—Hunting.

(1) Moose and Caribou, from 1st February to 1st September.

PROVINCE OF NEW BRUNSWICK.

Seat of Government, Fredericton.

Lieutenant-Governor — The Hon. James Fraser, $9,000; Col. Gordon, I.S.C., Capt. Henry Montgomery Campbell, Aides-de-Camp.

Lieutenant-Governor the Hon. John J. Fraser is a son of the late Mr. John Fraser, a native of Inverness-shire, Scotland, who came to Nova Scotia in 1803, and in 1812 to Miramichi. He was born at Miramichi August 1, 1829, and educated at the Newcastle Grammar School; was called to the bar in 1852, created a Q.C. in 1873, and sat for York in the Local Legislature from 1865 until the general elections in 1866, when he was defeated. In 1870 he was given a seat in the Legislative Council, and sat there until 1872. He then resigned to contest York County, was successful, being re-elected in 1874 and 1878. He became President of the Executive Council June 2, 1871, and in July, 1872, was appointed to the offices of Provincial Secretary and Receiver-General, which he held until June, 1878, when he became Attorney-General and Premier. In 1882 he resigned political office, and became a Judge of the Supreme Court of this Province, and upon the lamented death of Lieutenant-Governor Boyd he was appointed to the position. Official residence, Farraline Place; residence, Fredericton.

EDUCATION.

The school annals of New Brunswick date back to the beginning of the century, the first act having been passed in 1802. By this act the sum of £10 was granted to each parish, to be apportioned to the schools. A great step in advance was made in 1847, when the Lieutenant-Governor and the Executive Council were constituted a Board of Education for the Province.

The present school law was passed in 1871, since which date great progress has been made. The total number of pupils enrolled in 1895 was 68,761. The proportion of the population attending the Public Schools was 1 in 4.67. The daily average attendance for the year was 60.49 per cent. The total expenditure for the maintenance of the schools during the year (not including the cost of building and repairing school houses), was $436.617 63, of which sum the Province contributes $157,316 65, and the municipalities $92.140 23, the rest being levied upon the school districts.

EDUCATIONAL DEPARTMENT.

Provincial Board of Education—The Governor, the members of the Executive Council, the Chancellor of the University of New Brunswick, and the Chief Superintendent of Education, J. R. Inch, LL.D.

Clerks or Assistants—Thos. Nisbet, Miss Mary Thompson, Joseph Purdie.

Provincial Normal School—Principal, Eldon Mullin, A.M. Faculty of Instruction—H. C. Creed, M.A., M. Alice Clark, Edward Cadwallader, B.A., John Brittain, G. A. Inch, Alphe Belliveau. Model Department—John F. Rogers, Misses Annie Harvie, Clara E. Bridgis and Grace Porter.

Inspectors—George W. Mersereau, Doaktown; F. B. Meagher, A.M., Bath; George Smith, A.B., Shediac; W. S. Carter, A.M., St. John; H. V. B. Bridges, Fredericton; R. P. Steeves, A.M., Sussex.

The University of New Brunswick was established in 1800. The faculty consists of the following:—

Chairman of the Faculty and Professor of Mathematics, Thomas Harrison, M.A., LL.D; Professor of Chemistry and Natural Science, Loring W. Bailey, M.A., Ph.D., F.R.S.C.; Professor of Classical Literature and History, W. T. Raymond, M.A.; Professor of English and French, William Frederick Stockley M.A.; Professor of Civil Engineering and Surveying, Stephen M. Dixon, B.A., B.A.I. Associate Member Institution of Civil Engineers; Alumni Professor of Mental and Moral Philosophy and Political Economy, John Davidson, M.A.; Professor of Physics and Electrical Engineering, George M. Downing, M.Sc., Electrical Engineer Polytechnic Institute, Brooklyn; Secretary of the Faculty, Prof. Davidson.

RAILWAY.

There are in the Province 1,396 miles of track laid, an average of 20 square miles of area to one of track. Of the older Provinces New Brunswick is better supplied with railways in proportion to area than any other.

MINERALS.

Lime.—Although limestones are found in considerable quantities in many parts of New Brunswick, and have in many instances been used as source of the manufacture of lime, none will at all compare in amount, in purity, or in the ease with which they can be quarried, burned and marketed with those to be found on either bank of the St. John River for a few miles above its mouth. Great interest attaches to these deposits, as they already constitute an important industry, and as affording a basis, under favorable circumstances, for an enormous development.

Plaster.—Localities from which gypsum is removed at present are about Hillsboro' and adjacent districts in Albert County, and the plaster beds of the Tobique river in Victoria County.

Granite.—The quarrying and manufacture of this rock continues to be, as for many years past, an important industry, and one which appears to be upon the increase.

HON. JAMES MITCHELL, PREMIER OF NEW BRUNSWICK.

Gold.—Ever since the discovery of gold in Nova Scotia the possibility of the occurrence of the same metal in New Brunswick has been a matter of speculation, and there have been few years in which more or less search has not been instituted and so-called "finds" reported.

Iron.—The only deposits of this metal which have attracted attention since the closure of the works at Woodstock are certain beds occurring on the Millstream River, in Gloucester County.

MINERALS.

The coal fields of Nova Scotia and Cape Breton are all practically on tide water.

Heretofore the shipment of coal by sea in winter has been practically impossible, resulting in loss from depreciation and in increased cost of handling and shipping.

The Dominion Coal Company, Lt'd, have undertaken a broad scheme of improvement in this matter, an important feature of which is the construction of a railway from Sydney to Louisburg.

This will give the coal of the Sydney fields a harbor all the year round, and make easy the distribution of coal during the winter season.

*2,240 lbs. to ton.

In 1873 the total coal sales amounted to 984,839 tons of 2,000 pounds; in 1883 the total sales were 1,453,126 tons; in 1895 the total sales were 1,881,476. Thus, in 22 years the total sales have increased 120 per cent.; the amount consumed within the Province has increased 212 per cent., and the purchases of the neighboring Provinces have increased 274 per cent.

In Nova Scotia there are now 64 miles of railway owned by coal and iron mines.

FISHERIES.

The development in fisheries in Nova Scotia in 1894, as compared to those of 1883, is as follows :—In 1883, the value was $2,490,965; in 1894, $3,361,972, an increase of $871,007.

RAILWAYS.

In the Province of Nova Scotia there are 825 miles of track laid, or an average of 25 square miles of area to each mile of track.

EDUCATION.

The educational system of the Northwest Territories is under the control of the Council of Public Instruction, composed as above.

No school district shall comprise an area of more than 25 square miles, nor shall it contain less than four resident heads of families, or a smaller school population than 10, i.e., children between the ages of 5 and 20.

No religious instruction is allowed in any Public School before 3 o'clock in the afternooon, at which time such instruction as is permitted by the trustees may be given, parents having the privilege of withdrawing their children at that hour, if desired.

GENERAL DESCRIPTION

of physical features of the Northwest Territories and Manitoba :—

Between the northern boundary of Ontario and the Rocky Mountains lie the Province of Manitoba and the southern part of the Northwest Territories. This great tract of land is remarkable for its division along lines running generally northwest and southeast, into three distinct prairie steppes, or plateaux, as they are generally called. The first of these is known as the Red River Valley and Lake Winnipeg Plateaux. The width at the boundary line is about 52 miles, and the average height about 800 feet above the sea ; at the boundary line the height is about 1,000 feet. The first plateau lies entirely within the Province of Manitoba, and is estimated to contain about 7,000 square miles of the best wheat-growing land on the continent, or in the world. The second plateaux, or steppe, has an average altitude of 1,600 feet, having a width of about 250 miles on the national boundary line, and an area of about 105,000 square miles. The rich, undulating, park-like country lies in this region. This section is especially favorable for settlement, and includes the Assiniboine and Qu'Appelle districts. The third plateau or steppe begins on the boundary line, at the 104th meridian, where it has an elevation of about 2,000 feet, and extends west for 465 miles to the foot of the Rocky Mountains, where it has an altitude of about 4,200 feet, making an average height above the sea of about 3,000 feet.

GAME LAWS.

Section 2. — That none of the animals or birds hereinafter mentioned shall be shot at, hunted, trapped, taken or killed on any Sunday, nor in any year within the periods hereinafter limited, nor shall any of said animals or birds be carried, in whole or in part, by any common carrier during the said periods.

Section 2 (a).—That all kinds of deer, including cabri or antelope, elk or wapiti, moose, reindeer, or caribou, or the fawns of such animals, shall not be shot at, hunted, trapped, taken or killed for a period of two years from the 15th day of October, 1896.

(b) All varieties of grouse, including prairie chickens, pheasants and partridges, between the first day of December of each year and the 15th day of September of the next following year, and none of the birds mentioned in this sub-section shall be exposed or offered for sale or sold.

(c) Woodcock, plover (except the upland plover and the golden plover, charidrius fulvus), snipe and sandpipers, between the 1st day of January and the 1st day of August.

(d) Upland plover between the first day of January and the 15th day of July.

(e) Any kind of wild duck, sea duck, widgeon, teal, between the 1st day of May and the 1st day of September.

(f) Otter, fisher or pekan, beaver and sable, between the 15th day of May and the 1st day of October. Muskrat between the 15th day of May and the 1st day of November.

(g) Marten, between the 15th day of April and the 1st day of November.

Section 3.—That none of the said animals or birds, except in paragraphs "f" and "g," above mentioned, shall be trapped or taken by means of traps, nets, snares, gins, baited lines or other similar contrivances; nor shall such traps, nets, snares, gins, baited lines or contrivances be set for any of them except the animals mentioned in said paragraphs "f" and "g," at any time, and such traps, nets, snares, gins, baited lines or contrivances may be destroyed by any person without such person incurring any liability therefor.

Section 4.—That none of the contrivances for taking or killing the wild fowl known as swans, geese or ducks, which are described or known as batteries, swivel guns, sunken punts, or night lights, shall be in the possession of any person, nor shall they be used at any time; nor shall any beaver or muskrat house be destroyed at any time, nor shall any spring gun be used to destroy any animal hereinbefore mentioned.

Section 5.—That no person shall kill or take any animals or birds protected by this act by the use of poison or poisonous substances, nor shall any person expose poisoned bait or any other poisoned substances in any place or locality whatever, except for the purposes of agriculture.

Section 6.—That no person shall have in his possession any of the said animals, or birds, no matter where procured, or any part of such animal or bird, with the exception of the skin of animals that have not been killed during the closed season, during the period in which the same is protected by this act.

Section 7.—That no eggs of any of the said birds shall be taken, destroyed or had in possession by any person at any time, nor shall the nests of any such birds be at any time wilfully disturbed.

Section 8.—That no person, either on his own behalf or as an agent for any person, firm or corporation, shall purchase, barter or trade for any skin or pelt of any fur-bearing animal above mentioned which has been killed during the closed season.

Section 10.—That no person shall at any time shoot at, hunt, trap, take, kill, purchase, procure or receive any of said animals or birds for the purpose of exporting the same out of the Province of Manitoba.

TIME.

The 24-hour system is in use on the Western and Pacific divisions of the Canadian Pacific Railway (Port Arthur and west to Pacific Coast). By this system the a.m. and p.m. are abolished, and the hours from noon to midnight are from 12 to 24 o'clock.

Eastern Time—East of Port Arthur and St. Thomas.

Central Time—Port Arthur to Brandon and branches in Manitoba.

Mountain Time—Brandon to Donald; Pacific to Vancouver.

Thus, when it is 12 noon at Montreal, eastern time, it is 11 at Winnipeg, central time; 10 from Brandon to Donald, mountain time, and 9 at Vancouver, Pacific time.

POPULATION.

A census was taken during this year by the Government enumerators for the purpose of increasing the per capita grants, and the population of Manitoba is given as 193,425.

EDUCATION.

The control of educational matters in Manitoba was formerly in the hands of a Board of Education, divided into two sections, one Protestant, with twelve members, and one Roman Catholic, with nine members, all appointed by the Lieutenant-Governor in Council, but by the Act of 1890 this arrangement, together with the Separate School system, was abolished, and a national school system, entirely non-sectarian, was established, with a Department of Education, consisting of the Executive Council and an Advisory Board, composed of seven members, four appointed by the Department of Education, two by the Public and High School teachers of the Province, and one by the Council of the University of Manitoba. There is no Minister of Education, but one of the members of the Executive Council is appointed to sign certificates, documents and vouchers for the Department of Education. The department is the Executive body, controls the finances, administers the laws, appoints all officers, inspectors and Normal School teachers, arranges for teachers' examinations, prescribes number of teaching days and school hours, etc. The function of the Advisory Board is largely advisory to the department, but the School Act gives the Board authority, independent of the Department, to make regulations for building school houses, to authorize text-books, to prescribe forms of religious exercises, to determine qualifications of teachers, to appoint examiners, to prepare examination papers for teachers' certificates, to determine to whom teachers' certificates shall be granted, and to cancel certificates.

The Public Schools Act of 1890 was declared constitutional by the Superior Court of Manitoba, on 24th November, 1890. This judgment was sustained in an appeal to the Imperial Privy Council July 30, 1892.

The Roman Catholic minority of Manitoba appealed to the Governor-General in Council to redress the grievances under which they claim they were placed by being deprived of rights which they claim to have held prior to the passing of the Act of 1890. The Dominion Government submitted a test case to the Supreme Court, and a judgment was given against the claims of the "minority." An appeal was taken to the Imperial Privy Council and on the 29th of January, 1895, their Lordships gave judgment in substance as follows:—(1) That the grounds set forth in the memorial and petitions, and asserted thereby in such an appeal, were admissible, and that the Act of Manitoba relating to education, passed prior to 1890, did confer on a minority a right or privilege to education within the meaning of sub-section 2 of sec. 22 of the Manitoba School Act, which alone applies, and that the two Acts of 1890 complained of did affect a right or privilege of a minority.

Acting upon this decision the Dominion Government on the 21st of March, 1895, issued the celebrated "Remedial Order," calling upon the Manitoba Government to restore to the "minority" the privileges they enjoyed before the Act of 1890 was passed. This order was transmitted to the Provincial Government of Manitoba, to which an answer was returned by the Greenway Government setting forth the reasons why the Manitoba Government could not accede to the wishes of the Dominion Government, as made known in the "Remedial Order."

This was followed by the introduction of a Remedial Bill in the Dominion House, in the early part of 1896. This bill passed its second reading, but was dropped in the Committee of the whole. A satisfactory solution of the difficulty has been reached, and the terms of the arrangement will be found in another part of the Annual.

While this agitation over the school question was in progress a number of the Catholic schools have been closed, but they are now opening up in different parts of the Province, and it is expected that soon they will all be complying with the Public Schools Act.

In 1895 the number of pupils attending school was 35,371, out of a school population of 44,932. The average attendance was 19,516. The number of schools organized was 956, and the number in operation was 786. There were 761 school houses; 433 schools had religious exercises and 674 gave temperance instruction. There were 1,093 teachers employed.

HON. FRED. W. G. HAULTAIN, PREMIER NORTH-WEST TERRITORIES.

The three plateaux, while varying considerably in character, are all most favorably adapted for agriculture of all kinds, including dairying and stock raising. Settlement is proceeding at a very rapid rate, numerous and prosperous homesteads and cattle ranches having been established.

The northern part of the centre of the Dominion, extending from the Rocky Mountains to Hudson Bay, is very extensively wooded, and has generally been considered for the most part unfit for settlement and only useful as a preserve for fur-bearing animals. But during the session of Parliament of 1888 a committee of the Senate held an investigation into the capabilities of these regions, the result being that all previous ideas were upset. The area inquired into was about 1,260,000 square miles, and of these it was estimated that 860,000 square miles were fit for settlement, and about 400,000 square miles useless for cultivation; 656,000 square miles were suitable for potatoes, 407,000 square miles for barley, and 316,000 square miles for wheat. There is a river navigation of about 2,750 miles, 1,390 miles being suitable for stern-wheel steamers and 1,360 miles for light draught seagoing steamers. There are large auriferous deposits, as well as silver, iron, graphite, ochre, brick and pottery clay, mica, gypsum, lime and sand stone, "while the petroleum area is so extensive as to justify the belief that eventually it will supply the larger part of this continent." Furs are at present the chief commercial products of this region, which is the last great fur preserve of the world, and in view of the great danger of the extinction of animals whose furs become fashionable it was suggested by the committee that fur districts should be leased by the Government, and a limitation placed on the catch of certain kinds of furs. The lakes and rivers abound in fish, especially whitefish and lake trout. The committee pointed out that the valuable whale fisheries of the northern coasts of Canada were being rapidly destroyed by foreign whalers, and suggested that the Government should adopt some measures for their protection.

NORTHWEST TERRITORIES.

(16th September, 1893.)

Game regulations:—

(1) No elk, moose, caribou, antelope, deer or their fawn, mountain sheep or goat, shall be hunted, taken or killed between the 1st of February and the 1st of October; provided always that no person shall be allowed to kill or take more than six head of the aforesaid animals in any one season, except for the purpose of food for himself or his family.

(2) No person shall fire at, hunt, take or kill, in any year, any buffalo, any grouse, partridge, pheasant or prairie chicken, between the 15th of December and the 15th of September; any kind of wild duck between the 15th May and 23rd August; any plover, snipe and sandpiper between 1st January and 1st August. No person shall kill more than twenty of any of the birds in above section in one day.

No person shall at any time disturb, injure, gather or take the eggs of any species of wild fowl or birds mentioned in this ordinance.

None of the contrivances for the taking or killing of the wild fowl, known as swans, geese or ducks, which are described as swivel guns, batteries, sunken punts or night lights, shall be used at any time; nor shall any person use grain, seed, or other description of food steeped in opium, alcohol or other narcotics, for the purpose of stupifying and capturing any species of wild fowl, except geese.

(3) No person shall hunt, trap or kill in any year, any mink fisher or marten between the 15th April and the 1st November; any otter or beaver between the 15th May and the 1st October; any muskrat between the 15th May and the 1st November.

No bird named in the foregoing sections, except geese, shall be taken or killed at any time by means of any rope, snare, spring, cage, net or trap, nor shall such be set for. And no engine shall be at any time, for such purpose, placed, constructed, erected or set, either wholly or in part; and any person finding any rope, snare, spring, cage, net or trap, or engine so placed, constructed or set, may take possession of or destroy the same without such person thereby incurring any liabilities therefor.

The possession of any dead animals, or birds, or parts (except skins lawfully taken), is prohibited during close season. But any animal or bird lawfully taken at other times can be bought or sold.

Game guardians can seize birds of animals illegally in possession, and bring offenders before a Justice of the Peace within three months of offence. Fine—Buffalo, $100; other game, $50 or two months.

The export or carrying out of the Northwest Territories of grouse, partridge, pheasant, prairie chicken, elk, moose, caribou, antelope, or their fawn, is prohibited.

Permission can be granted by the Lieutenant-Governor to procure birds and eggs for scientific purposes during close season.

Persons in actual want may kill birds or animals for immediate necessities.

No person shall at any time offer for sale, barter or exchange, any prairie chicken that has been caught or killed by any person other than himself.

Non-residents of the N. W. T. require a license from the Government (fee $5) to hunt or shoot. License expires 15th of May yearly.

License may be granted to a guest of any resident of the Territories free of charge for a term not exceeding five days.

For Northwest Mounted Police list see under Dominion Civil Service, in Department of the Interior.

PROVINCE OF BRITISH COLUMBIA,

The Province of British Columbia occupies the mountainous or hilly region that extends to the Pacific Ocean from the western edge of the great plain or prairie country lying east of the Rocky Mountains. The general surface of the country is mountainous and broken, consisting of short ranges, detached groups of mountains, elevated plateaux and many valleys of varic extent. An apparently inexhaustible supply of fish, timber and minerals of unknown value are the principal natural sources of its wealth, but the climate is delightful and extremely favorable for rapid growth, and agriculture is now making great progress.

The area of British Columbia is 382,300 square miles, and the population 98,173.

The Province of British Columbia entered Confederation 20th July, 1871.

Lieutenant-Governor the Hon. Edgar Dewdney, C.E., P.C., came to British Columbia in 1859, and entered upon his profession of civil engineer, being employed by Col. Moody in the survey of the town site of New Westminster. He subsequently laid out and constructed several of the heavy trails to the different mining centres. In 1868 he first entered political life as member for Kootenay, B.C., in the Legislative Assembly and remained in the Local House until Confederation. In 1872 he was returned member for the Yale and Kootenay district for the Dominion House of Commons. Re-elected in 1873 and 1878. In 1879 he accepted the Indian Commissionship for the North-West Territories and Manitoba. He remained in charge of the Indians until 1888, having held the appointment of Indian Commissioner in conjunction with that of Lieutenant-Governor of the Northwest from December, 1881, to July, 1888. In July, 1888, he became Minister of the Interior, that office having become vacant by the death of the Hon. Thomas White. On accepting this office he was elected for Eastern Assiniboia, and again in 1891. He remained in office after Sir John Macdonald's death, under Sir John Abbott, until November, 1892, when he was appointed Lieutenant-Governor of British Columbia; his old Province, in which he spent many years, assisting in its early development whilst a Crown colony, and subsequently when it became a portion of the Dominion of Canada. Married 28th of March, 1864, Jane Shaw Moir, eldest daughter of Stratton Moir, Esq., of Colombo, Ceylon. Salary, $9,000. Government House, Victoria. B. C.

FISHERIES.

The total salmon pack during 1894 was 494,371 cases, valued at $2,362,714, and for 1895, 525,516.

The Dominion Inspector of Fisheries for British Columbia reports :—"It is gratifying to note that the rivers of the Province, especially the Fraser, show no signs of depletion, or of being over-fished, being in this respect unique amongst the great salmon rivers of the Pacific coast, if not of the world."

Deep sea fisheries have received greater attention during the past year, and halibut fishing is now established on a firm basis. This industry is being conducted in a vigorous and systematic manner, and gives promise of becoming of great value to the Province and profitable to its promoters.

The fur seal industry is yearly becoming of more importance to the Province, and especially to Victoria. During 1894 53 vessels, averaging 66 tons each, sailed from this port, giving employment to crews numbering 867 whites and 518 Indians. The catch was large, amounting to 94,474 skins, and for 1895, 72,414 skins.

The total Pacific catch during the season of 1895 was as follows :—

Seals landed at Victoria	73,614
Seals landed at American ports by U. S. schooners	20,307
Seal catch on Pribyloff Island	15,000
Seal catch on Copper Islands	17,920
Total	126,841

AGRICULTURE.

Reports from the agricultural districts throughout the Province are encouraging.

During the fiscal year ending June 30, 1894, 60,642 bushels of wheat were imported into the Province, on which duty was paid, $19,096 32; and a large quantity was received from the North-West ; it is expected that this year's harvest will cause a reduction in the imports of wheat.

The area under hops has largely increased. The "Kentish" hops grown in British Columbia are favorably known in the London market.

More attention has been given to dairy farming, but, with the view of further stimulating this industry, the Board has urged the Dominion Government to extend to British Columbia aid similar to that granted to other Provinces in the establishment of co-operative dairies, which have proved a success and of great benefit to the agriculturist wherever inaugurated.

FOREST WEALTH OF BRITISH COLUMBIA.

Wooded Area.

Total area, 382,300 square miles ; forest and woodland, 285,554 square miles ; percentage woodland, 74.69.

The wooded area is estimated from the maps and reports of the Geological Survey and the Department of the Interior. In the central plateau of agricultural lands what wood is found is chiefly small poplar, etc., of little value.

The white pine of eastern Canada (P. strobus) is not found on the Pacific coast, the Douglas fir, the yellow cedar and the spruces being the chief trees for timber and lumber.

Timber Regulations.

Leases or surveys, unpre-empted Crown timber lands may be obtained for a period not exceeding twenty-one years by those tendering the highest cash bonus, subject to the payment of an annual rental of 10 cents per acre and a royalty of 50 cents per thousand feet on the scaled measurement of the logs. The leeseee, if not actually engaged in the manufacture of lumber, must, to retain his limits, erect a mill capable of cutting at least 1,000 feet a day for every 400 acres of land included in the lease, within two years, and give a guarantee equivalent to 10 cents an acre that he will do so before obtaining his lease.

A timber license may be granted for 1,000 acres for four years, on payment of $10 annually and 15 cents for each tree (except hemlock), and no person, not licensed, may cut timber on Crown lands except for farming and mining purposes. Only one license at one time is obtainable, and is not transferable. A special license for 1,000 acres for one year may be obtained by application in the Official Gazette and the payment of $50 to the Chief Commissioner of Lands and Works.

GAME LAWS.

It is unlawful to use traps, nets, snares, gins or baited lines to catch birds. (Section 10.)

It is unlawful to use batteries, swivel guns or sunken punts in non-tidal waters to take wild duck or geese. (Section 23.)

It is unlawful to export animals or birds mentioned in raw state. (Section 7.)

It is unlawful for non-residents to shoot without a license. (Sections 19 and 20.)

It is unlawful to enter land enclosed by fence, water or natural boundary for hunting purposes after notification, or if sign is exposed stating: "Hunting or shooting on these lands forbidden under British Columbia Game Laws." (Section 25.)

NEWFOUNDLAND.

Newfoundland has an area of 42,000, and its greatest length and breadth is 316 miles.

It is about twice the size of Nova Scotia, one-third larger than New Brunswick, and one-sixth larger than Ireland.

At the census taken in 1891 the population, including Labrador, was 202,040, of whom 102,775 were males and 99,265 females.

Of these the native-born numbered 193,353, or 98 per cent. of the population.

Of the population 73,150 could read and write, or about 40 per cent. There are 183 clergymen of various denominations, 43 lawyers, 606 teachers, 1,547 farmers, and 54,775 fishermen.

The value of manufactured articles in the census year amounted to $1,450,456.

The number of lobster factories was 340, in which there were 4,807 persons employed.

The improved land amounted to 64,494 acres, and lands in pasture 20,524.

The farm stock consists of 6,138 horses, 10,863 milch cows, 12,959 other horned cattle, 60,840 sheep, 30,011 swine, and 127,420 fowl.

In 1894 the export of copper ore amounted to 28,824 tons, having a value of $235,179. In addition, the export of iron pyrites amounted to 40,582 tons, value $285,474, or a total value in mineral exports of $520,653. The export of asbestos was $1,200, and of lumber M 6,357, value $82,742.

The principal industry is that of fishing, which is the main element of the resources of the island. Cod, seal, herring, lobster and salmon fisheries being the most important.

The export of dried codfish amounted to 1,107,693 quintals, value $3,707,338. The value of the cod and cod liver oil exported was $266,170.

The value of the seal oil exported was $274,924, and the value of the seal skins exported was $227,248.

The value of the herring export was $244,789, the total value of the fisheries in 1894 being $5,466,911.

Of late years there has been a decline in the Bank fishery. In 1894 the number of vessels employed in it was 58, the number of men 785, the catch 54,544 quintals. The seal fishery of 1895 employed 20 large steam vessels, carrying 4,680 men, the number of seals taken being 270,058.

In 1894 the total value of the imports was $7,164,738, of the exports $5,811,169. The revenue in 1894 was $1,641,035, and the public funded debt at the close of the year was $9,116,535.

At the close of 1894 the total amount held on deposit in the savings bank was $2,821,423, the total number of depositors 6,401, the rate of interest 3 per cent.

The defunct banks, when they closed their doors, had about $2,000,000 on deposit. At the close of the year the total funded debt, including the late loan of two and a half millions, was about $13,900,000.

The number of steamers owned in Newfoundland was 35, of 6,178 tons. The number of sailing vessels from 20 to 60 tons, 1,421, and from 60 tons and up 271. Tonnage, 25,740 tons.

Representative government was granted to Newfoundland in 1832, and responsible government in 1855. The Governor is appointed by the Crown, and there are two chambers, a Legislative Council (not to exceed 15 members), nominated for life by the Governor in Council, and a House of Assembly, consisting of 36 members elected under manhood suffrage. Members of the Council receive $120 and those of the Assembly $300 per annum.

Newfoundland has three daily papers, 1 bi-weekly, 4 weekly and 1 bi-monthly. A railway 83½ miles long runs between St. Johns and Placentia; another between Whitbourne and Exploits (200), and a third of 17 miles long. All are on the 3 feet 6 inch gauge.

In regard to religion the population is divided as follows :—

Church of England	68,562
Roman Catholics	72,342
Methodists	52,672
Presbyterians	1,477
Congregationalists	782
Salvation Army	2,092
Baptist and others	37

TIME AND CHRONOLOGY.

Our most refined sensation of what is called time, exists in vibrations of musical strings, of which tones can be discriminated up to 7,500 vibrations in a second, or in the swing of a second's pendulum. The beats of a second's watch are five in a second.

Chronologists distinguish dates and epochs by letters, as A.M., Anni Munradi; A.C., Anti-Christi, or B.C., Before Christ, and A.D., Anni Domini or A.C., after Christ.

Leap Year is the year which divides evenly by four, but the year 1900 will not be a leap year, to make up for the odd minutes gained between the astronomical and computed year, as 365 days. In 400 years ninety-seven are Leap.

The Epact is the moon's age on the first of January. A year is twelve moons and eleven days.

Easter is the first Sunday after the first full moon that occurs after the 21st of March.

Epiphany or 12th day celebrates the arrival of the wise men from the East.

Palm Sunday celebrates Christ's entry into Jerusalem.

Good Friday celebrated the Crucifixion, and Easter Sunday the Resurrection.

Christmas celebrates the birth of Christ.

April is so called from Aperil the Spring.

Dronysius, a Monk, introduced the æra of Christ in 527. It was not general till the 15th Century.

The Astronomical Equinoxes are on the 21st of March and 21st of September, and the Sun is in the Tropics on the 21st of December and June.

Simple Interest Rules.

FOUR PER CENT.—Multiply the principal by the number of days to run; separate the right hand figure from the product, and divide by 9.

FIVE PER CENT.—Multiply by number of days, and divide by 72.

SIX PER CENT.—Multiply by number of days; separate right hand figure, and divide by 6.

SEVEN AND THREE-TENTHS PER CENT.—Multiply by number of days, and double the amount so obtained. On $100 the interest is just 2 cents per day.

EIGHT PER CENT.—Multiply by number of days and divide by 45.

NINE PER CENT.—Multiply by number of days; separate right hand figure, and divide by 4.

Results of Saving Small Amounts of Money.

The following shows how easy it is to accumulate a fortune, provided proper steps are taken. The table shows what would be the result at the end of fifty years by saving a certain amount each day and putting it at interest at the rate of six per cent.:

Daily Savings.	The Result.	Daily Savings.	The Result.
One cent	$95	Sixty cents	$57,024
Ten cents	9504	Seventy cents	66,528
Twenty cents	19,006	Eighty cents	76,032
Thirty cents	28,512	Ninety cents	85,537
Forty cents	38,015	One dollar	95,041
Fifty cents	47,520	Five dollars	475,208

Nearly every person wastes enough in twenty or thirty years, which, if saved and carefully invested, would make a family quite independent; but the principle of small savings has been lost sight of in the general desire to become wealthy.

CURRENCY AND BANKS.

In the early days in British North America all sorts of coins were used.

In 1795, to remedy this evil, an act fixing the standard of value, founded upon the average intrinsic worth of gold and silver coins of Great Britain, France and the United States, was passed.

In 1803 Canada adopted dollars and cents, pounds, shillings and pence, as the only moneys on account.

In 1871 the Federal Parliament passed an act giving to the Provinces of the Dominion a uniform currency; the gold standard being that of the British sovereign, $4 86 2-3. Silver coin was made legal tender to $10, and minor coin to 25 cents.

In addition to the coin used the Canadian Government issued Government notes, first issue being made in 1866. The authority was limited to $5,000,000 on general account and $3,000,000 to replace notes of banks surrendering their power of issue

In 1868 the permitted issue was enlarged to $20,000,000. In 1895 an act provided that the issue may exceed $20,000,000, provided that, in addition to any amount required to be held in gold under previous acts, a further amount in gold equal to the excess of issued notes over $20,000,000 shall be held.

CHARTERED BANKS.

In 1817 the first bank was established, the Bank of Montreal, followed the next year by the Bank of Quebec. These banks were granted charters in 1821.

Between 1821 and 1836 many banks were established, among them being the Bank of British North America, organized by Scotch and English merchants, and incorporated by royal charter.

Since that time the number of banks in Canada has steadily increased, until in 1895 they numbered 38.

Of the 15 banks which have suspended payment since 1867, 11 have redeemed their notes in full, 1 paid 57½ per cent., and three have not yet been reported.

Of the 38 banks making returns to the Government during the past year, ten had headquarters in Ontario, fourteen in Quebec, eight in Nova Scotia, three in New Brunswick, two in Prince Edward Island and one in British Columbia.

The various banks in operation during the past year had a total paid up capital of $62,063,371; notes in circulation, $31,166,003; total of deposit, of Federal and Provincial Governments, $181,743,890; total amount of discounts, $204,124,939; liabilities of $221,066,724, and assets of $307,520,020.

The year 1894 was a year of much anxiety and disturbance in financial circles, so that money was scarce and dear during a portion of it. The average rate of discount was, therefore, much increased, as shown in the following table:—

Average rates of discount on local bills:—

1878	7½	per cent.	1885	7	per cent.	1890	6½	per cent.	1891	6 to 7 per cent.
1892	6 to 7	per cent.	1893	6 to 7½	per cent.	1894	5½ to 7	per cent.		

The chartered and incorporated banks of the Dominion are governed by the Banking Act, 53 Vic., chap. 31, the principal provisions of which are:—

(1) The capital stock of any bank hereafter incorporated shall be not less than $500,000, in shares of $100 each.

(2) Five hundred thousand dollars must be subscribed, and $250,000 paid to the Minister of Finance, who is also Receiver-General, and a certificate of permission obtained from the Treasury Board, before business can be commenced.

The Treasury Board consists of the Minister of Finance and any five Ministers appointed from time to time by the Governor-General in Council, with the Deputy Minister of Finance as Secretary.

(3) Bank directors must hold capital stock as follows:—On paid up capital stock of $1,000,000 or less, stock on which $3,000 has been paid up; on a paid up capital stock of over $1,000,000 and not over $3,000,000, stock on which $4,000 has been paid up; and on a paid up capital of over $3,000,000, stock on which $5,000 has been paid. A majority of the directors must be British subjects.

(4) The capital stock may be increased or reduced by the shareholders, subject to the approval of the Treasury Board.

(5) The capital stock may be increased or cent. per annum shall be paid by any bank, unless after deducting all bad and doubtful debts it has a reserve fund equal to at least 30 per cent. of its paid-up capital.

(6) Every bank shall, subject to a penalty of $500 for each violation, hold not less than 40 per cent. of its cash reserve in Dominion notes.

(7) The amount of notes of any bank in circulation at any time shall not exceed the amount of its unimpaired capital, subject to penalties varying with the amount of such excess.

(8) The payment of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency; any amount due to the Dominion Government shall be the second charge, and any amount due to any Provincial Government shall be the third charge.

(9) Every bank shall pay to the Minister of Finance a sum equal to 5 per cent. on the average amount of its notes in circulation, such sum to be annually adjusted according to the average amount of circulation during the preceding twelve months. Such amounts are to form a fund called "The Bank Circulation Redemption Fund," to be used, when necessary, on the suspension of any bank, for the payment of the notes issued and in circulation, and interest. All notes in circulation shall bear interest at 6 per

cent. per annum from the day of suspension until redeemed. Payments from the fund are to be without regard to the amount contributed.

(10) All notes issued for circulation shall be payable at par throughout Canada.

(11) Any bank, when making payment, is compelled, if requested, to pay the same, or part thereof, not exceeding one hundred dollars, in Dominion notes for $1, $2 or $4 each.

(12 Penalties are provided for placing anything in the shape of an advertisement on a note, and for issuing advertisements in the form of notes.

(13) No bank may lend money on its own shares, or on those of any other bank, or upon mortgage of real estate, or on the security of any goods, wares or merchandise, except as collateral security.

(14) Except as required for its own use, no bank shall hold any real estate for a longer period than seven years.

(15) Any rate of interest may be charged and allowed, but not more than 7 per cent. can be recoverable.

(16) Monthly returns signed by the chief accountant, the acting President and the Manager shall be made to the Minister of Finance within the first fifteen days of each month, subject to a penalty of $50 for each day's delay, such returns to be made in the form provided in the act. Special returns may be required by the Government at any time. All Government checks are payable at par.

(17) No person may use the title "bank," "banking company," "banking house," "banking association," or "banking institution," unless authorized by this or some other act of Parliament.

THE WORLD'S MONEY SUPPLY.

The Acting Director of the United States Mint prepared the following table of the monetary systems and appropriate stocks of money in the aggregate and per capita in the principal countries of the world. This table shows that the aggregate stock of gold in June, 1893, was $3,582,605,000; the aggregate stock of silver was $4,042,700,000, and the aggregate uncovered paper was $2,635,873,000. The stock of gold possessed by the principal countries is given as follows:—Great Britain, $550,000,000; France, $800,000,000; Germany, $600,000,000; Russia, $250,000,000; United States, $604,000,000.

The silver stock of these same countries is given as follows:—Great Britain, $100,000,000; France, $700,000,000; Germany, $211,000,000; Russia, $60,000,000; United States, $615,000,000.

This stock of silver is divided into full tender and limited tender. The United States has $538,000,000 full tender and $77,000,000 limited tender; Great Britain, no silver full tender, $100,000,000 limited tender; France, $650,000,000 full tender, $50,000,000 limited tender; Germany, $103,000,000 full tender and $108,000,000 limited tender; Russia, $22,000,000 full tender and $38,000,000 limited tender. The ratio prevailing in nearly all the principal countries between gold and legal tender silver is 1 to 15½. This is the ratio in France, Belgium, Italy, Spain, Netherlands, Russia, Central and South America. The ratio between gold and limited tender silver is as a rule 1 to 14.38. The respective ratios in the United States are 1 to 15.98 and 1 to 14.95. The various monetary systems, as divided among the several countries, are as follows:—

Gold and Silver—United States, France, Belgium, Italy, Switzerland, Greece, Spain, Netherlands, Turkey and Japan.

Gold—United Kingdom, Germany, Portugal, Austria, Scandinavian Union, Australia, Egypt, Canada and Cuba.

Silver—Russia, Mexico, Central and South America and India.

Of the uncovered money, South America has $600,000,000, Russia, $500,000,000, the United States $412,000,000, Austria $260,000,000, Italy $113,000,000, Germany, $107,000,000, France $81,000,000, and Great Britain $50,000,000.

The per capita circulation of gold is:—United Kingdom $14.47, France $20 52, Germany $12 12, Russia $2 21; United States $9 01.

The per capita of all classes of money is:—France $40 56, Cuba $31, Netherlands $28 88, Australia $26 75, Belgium $25 33, United States $24 34, United Kingdom $13 42, Russia $7 16.

ORIGIN OF BANKS.

Banks existed in China, Babylon, Greece, Rome and other nations, long before the Christian era, but the earliest records of European banks now in existence are those of the Bank of Venice, founded A.D. 1771; the Bank of Barcelona, in 1401; the Bank of Geneva, in 1407; and the Bank of Amsterdam, in 1609. The oldest bank notes of which we have any record were issued in China as far back as 2657 B.C. The popular name of this paper currency was "flying money," or "convenient money," and it was in form similar to that of American bank bills, except in the addition of mottoes, such as "Produce all you can; spend with economy." They bore the name of the bank, number of the note, value, place of issue, date, and signature of the proper bank officers. The value was in some cases expressed in figures, in words, and in pictorial representations, showing coins or ingots equal in amount to the face value of the paper. They bore also a notice of the

penalties of counterfeiting. A specimen of these notes, issued in 1399 B.C., is on exhibition in the Asiatic Museum, St. Petersburg. It is printed in blue ink, on paper made from the fibre of the mulberry tree. In the Metropolitan Museum of Art in New York there are Babylonian tablets of banking transactions dating back to the reign of Nebuchadnezzar. The earliest of these tablets belong to the year 601 B.C. The earliest known Babylonian banking house is said to be that of Egibi & Co., a house that seems to have acted as a sort of Imperial banking institution in Babylon from the time of Sennacherib (700 B.C.) down to the reign of Darius, 516 B.C., having been traced through five generations. Records of this house, on clay tablets, found in an earthen jar in the neighborhood of Hilleh, near Babylon, may be seen in the British Museum.

The annual profit of the Suez canal is $15,000,000.

The largest apple orchard in the world covers 1,537 acres in Fairmount, Kansas.

The eleven cables now in operation across the Atlantic have cost upwards of $70,000,000.

If the earth were equally divided among its inhabitants, each person would get 23½ acres.

The huge guns of modern navies can be fired only seventy-five times, when they become worn out.

The British Isles comprise no fewer than 1,000 separate islands and islets, without counting the jutting rocks or isolated pinnacles.

According to the tenth census, out of a population of 50,000,000 over 17,000,000 are bread winners, being a percentage of 34·8 on the whole.

Canada has over 2,000,000 square miles of public land, an area almost equal to that of Europe, excluding Russia, and nobody who chooses to enter a homestead need be without a farm on which to live.

The total railway capital of the world is $30,000,000,000, of which Great Britain owns one-sixth. The total mileage of the world is 400,000, and of this the British Empire has 70,000, employing 400,000 men, and carrying annually 900,000,000 of passengers.

The tunnel at Schemintz, Hungary, is the longest in the world. It has a length of 10.27 miles, costing over $5,000,000 to construct. Completed in the year 1888, it was commenced in the eighteenth century. The terms were on the original contract $35 a lineal yard, but $120 a yard was paid before it was completed.

The longest bridge in the world is the Lion Bridge, near Sangang, China. It extends five and a quarter miles over an arm of the Yellow sea, and is supported by 300 huge stone arches. The roadway is seventy feet above the water, and is enclosed in an iron network. A marble lion, 21 feet long, rests on the crown of each pillar.

It has been estimated that the electric railways have already displaced in the United States no less than 275,000 horses. This many horses would require about 125,000 bushels of corn or oats a day. a decrease of 125,000 bushels a day in corn or oats is enough to appreciably affect prices of those grains. It amounts to 45,000,000 bushels a year. The loss of this commercial demand for these coarse grains means a loss in tonnage for the railroads of 62,500 car loads.

COMPENDIUM OF POPULAR INFORMATION REGARDING LEGAL MATTERS.

BILLS, NOTES AND CHEQUES.

Definitions of.

A Promissory Note is an unconditional promise in writing made by one person to another signed by the maker, engaging to pay on demand, or at a fixed or determinable future time, a sum certain in money to or to the order of a specified person, or to the bearer.

A Bill of Exchange is an unconditional order in writing, addressed by one person to another, signed by the person giving it, requiring the person to whom it is addressed to pay at a fixed or determinable future time a sum certain in money, or to the order of a specified person, or to bearer.

A Cheque is a Bill of Exchange drawn on a Bank, payable on demand.

Consideration is always presumed to have been given for Bills, Notes and Cheques, and in an action between the original parties thereto, the burden of proving that no value has in fact been given rests on the Defendant—which being satisfactorily established constitutes a good defence, but the want of consideration is never a defence to an action brought thereon by a holder in due course, that is a person who becomes the holder of it before maturity for value, and without notice or knowledge of previous dishonor, or of any defect in the title of the person who negotiated it.

The title of a person who negotiates a Bill or Note is defective, when he obtained it or the acceptance thereof by fraud, duress, or force and fear, or other unlawful means, or for an illegal consideration, or when he negotiates it in breach of faith, or under such circumstance as amount to fraud.

A person who lends his name to some other person, to a Bill or Note is called an accommodation party, and is liable to a holder in due course for value, notwithstanding such holder knew such party to be an accommodation party.

Every person whose signature appears on a Bill or Note is prima facie deemed to have become a party thereto for value, and every holder is prima facie deemed to be a holder in due course, and it devolves upon the defendant to prove the contrary.

It is not necessary that a Bill or Note should be dated, but in order to fix the date of maturity, the real date of issue or acceptance may be inserted by the holder.

It is not necessary that a Bill or Note should be expressed on its fact as having been given for value, although the usual form contains the words "for value received."

Every Bill or Note given in consideration in whole or in part of the purchase money of or in interest in a Patent right, must have written or printed prominently and legibly across the face thereof the words "given for a Patent Right."

Any person negotiating or issuing such a Bill, not having these words on it, and knowing the consideration therefore, is guilty of a misdemeanor and liable to a fine of $200 or imprisonment for one year.

Cheques or Drafts or Notes payable on demand, must be presented for acceptance or payment as the case may be, within a reasonable time, in determining which regard is had to the nature of the instrument, the usage of trade and of banks and the facts of the particular case.

A Bill or Note payable on demand is deemed to be overdue when it appears on the face of it to have been in circulation an unreasonable length of time.

Cheques are sometimes made payable only through a Bank by being crossed, and persons receiving such a cheque must deposit it with, or hand it in for collection by, a Bank—as the Bank upon which such crossed Cheque is drawn will refuse to pay it, except it be presented through a Bank—if crossed generally or if crossed specially through the particular Bank to which it is crossed.

Cheques are crossed by having two parallel transverse lines ruled across their face, and they are crossed specially by having additional words written between these lines, as the name of a Bank.

Notes bear interest only when so stated on their face, but when not paid at maturity, interest may be charged at six per cent from that date.

If no time of payment is expressed on a Note or Bill, it is payable on demand.

Where a Bill is payable at sight or at a fixed period after date or after sight, the time of payment is determined as follows:—Running from the date of acceptance or from date of noting or protest, if the Bill is noted or protested for non-acceptance, excluding the day from which the time is to run and including the day of payment with the addition of three days, called days of grace.

Bills or Notes must be duly presented when and where due and payable, and if not paid or accepted as the case may be, notice of presentment and dishonor must be sent by the holder to the drawer and the endorsers, failure to do which discharges them. Capacity to incur liability as a party to a Bill or Note is co-extensive with capacity to contract, for it is in fact a contract, hence an infant or minor, or a corporation having no capacity of power to incur liability on a Bill or Note, or a married woman not possessed at the time of separate property (in respect of which she may contract), cannot be rendered liable on a Bill or Note, but the holder has a right to enforce payment upon any other party thereto.

A Bill, Note or Cheque becomes outlawed after six years shall have elapsed after maturity, or after the last payment made on account of either principal or interest, or any written acknowledgment or promise made and signed with respect thereto, and the Statute of Limitations may be pleaded in defence to an action brought on such a Bill or Note.

Debts which are represented by Bills or Notes are not garnishable, during the currency thereof, they being negotiable, but after maturity this rule does not apply.

An endorser may prevent his own liability to be sued on a Bill or Note by writing before his name "without recourse." Such is called a qualified endorsement. A Note or Bill endorsed in blank (the name of the endorser only written) is transferable by delivery, as also a Note made payable to bearer, and the holder is entitled to receive and demand payment thereof from the endorsers or the maker, drawer or acceptor, as the case may be.

A creditor is entitled to have his claim paid in full in the absence of an express agreement to accept a lesser amount in satisfaction. Where, therefore, the debtor sent to his creditor a Draft or Cheque for a less amount than the sum claimed, stating that "it was in full of all demands," the creditor kept the cheque, and cashed it, and applied the proceeds on account of the claim, and advised his debtor or the sender of the Cheque or Draft to that effect at the time, and afterwards brought an action for the balance of the debt, claim or demand : Held, that keeping the cheque was not as a matter of law conclusive that there was an "accord and satisfaction" of the claim. but that it was a question of fact upon what terms the Cheque was kept. "Accord and satisfaction" imply an agreement to take the money in satisfaction of the claim in respect of which it is sent.

Cheque of third person—Where the Cheque of a third person is received from a debtor as conditional payment of an antecedent debt, the creditor must without undue delay present the Cheque for payment, and if it is dishonored, notify the debtor of the fact and claim recourse against him on the original indebtedness. Unless this is done, the creditor will be taken to have accepted the Cheque in payment of the debt, and the debtor is discharged.

Discharge of endorser or surety—Where the holder of a Promissory Note had agreed to accept a third party as his debtor in lieu of the maker : Held, that, as according to the evidence there was a complete novation of the maker's debt secured by the Note and a release of the maker in respect thereof, the endorsers on the Note were also discharged.

CONTRACTS GENERALLY.

There are classes of contract distinguished by their mode of formation, 1, Simple contracts ; 2, Contracts under seal; 3, Contracts of records, i.e. judgments.

Simple contracts are again divided into two classes. 1, Those formed by agreement ; 2. Those implied in law.

There is no special form required for simple contracts, except those which are required by the Statute of Frauds to be made or proved with writing and signature.

An agreement in order to create a legal contract must have a consideration to be binding in law.

The consideration may consist of : 1. Something performed or some value given at the time or some loss or detriment sustained, or suffered ; 2. Something promised to be performed or given at a time stated, or upon conditions to be complied with by the other party to the contract, as mutual promises between the parties inter-dependent upon each other.

The principal constituent elements of agreement are an offer of terms on the one side and the unqualified unconditional assent thereto or acceptance thereof on the other, and there is no contract unless and until such assent or acceptance be communicated.

An offer can only be accepted by the particular person, firm or corporation, or class of persons to whom it is made—as "A" offers to sell a horse to "B" for $200. "C's" acceptance of that offer cannot establish any contract between him and "A."

Contracts may be made by correspondence, and the negotiations may be traced through a series of letters—until a final agreement is arrived at—that is at the point where the last offer made, or term, variation or condition added or imposed, is assented to and accepted by the other absolutely.

To a written offer to sell some flour on certain terms the following telegram was sent :—"Letter received ; offer accepted ; writing." No letter was written. Held, that there was a completed contract. See Dalrymple v. Scott, 19 Ontario Appeal Rep to p. 477.

In contracts so formed the postoffice is, as between the sender of the letter and the person to whom it is addressed, as a general rule regarded as the agent of the sender, hence a contract is complete by the due posting of the letter of acceptance, prepaid and correctly addressed—whether or not such letter actually reaches its proper destination or not. And the same rule applies where the offer is made by telegram, and may be accepted by the same mode or means of communication.

A reasonable time is allowed for the acceptance of the offer—but an offer may be revoked at any time before acceptance, even although the offer itself specifies a time within which it may be accepted, but the intention to revoke must be communicated to the other party before it has been accepted by him.

And in contracts made by correspondence or by wire—as above—the letter or advice wire of revocation must have been received before the letter or telegram of acceptance has been posted or sent, as the case may be, or otherwise it is too late.

Contracts are implied in law in the following cases: 1. Where money has been paid by one party for the use of another; 2. Where money has been received by one party for the use of another; 3. Debts for the amount of accounts stated between the parties.

In cases of money paid by one party for the use of the other—the law implies a promise on the part of that other that the amount so paid shall be repaid to him—where the payment has been made under compulsion and not as a purely voluntary payment.

The Statute of Frauds (29 Car. II. 3) requires certain kinds of contract to be made in or to be evidenced by writing and signed by the party sought to be charged or by his agent before an action can be brought to enforce the contract.

These are:—

1. Contracts or agreements for sale of land or an interest or estate therein.

2. (1) Contracts of guaranty or surety—as a promise by an executor to answer damages out of his own estate; (2) A promise by the defendant to answer for the debt, default or miscarriage, of another person; (3) Agreements made in consideration of marriage; (4) Agreements not to be performed within the space of one year.

3. Contracts for the sale of goods, wares and merchandise for the price of $40.00 or upwards—except the buyer shall accept part of the goods so sold and actually receive the same or give something in earnest to bind the bargain or in part payment.

4. Promises made after full age to pay a debt or ratify a contract made during infancy.

Consideration—An illegal or immoral consideration avoids a contract, and a contract founded on such cannot be enforced. Therefore, a contract for transfer of property with intent by the transferor, and for the purpose that it shall be applied by the transferee to the accomplishment of an illegal or immoral purpose, is void and cannot be enforced, but mere knowledge of the transferor of the intention of the transferee so to apply it will not avoid the contract, unless, from the particular nature of the property, and the character and occupation of the transferee, a just inference can be drawn that the transferor must also have so intended.

CONTRACTS UNDER SEAL.

Certain agreements are void of legal effect unless made by deed—such as a voluntary or gratuitous promise—a conveyance of land—a mortgage or bill of sale of goods—a guarantee—a bond or covenant or indemnity.

The Statute of Limitations—limits the right of action on simple contracts to within 6 years after the accruing of the cause of action, but in contracts under seal the limit is in general 20 years.

Consideration is imported and does not require to be proved, but the other party may prove that the consideration was illegal—or that there was none—in either of which cases as between the original parties thereto, the courts will not enforce the contract.

Contracts under seal are superior to simple contracts in several respects, and the latter, where the subject matter is the same, becomes merged in the former—and is thereby extinguished—as where a bond or covenant is given to secure a simple contract debt.

The doctrine of estoppel applies to rentals and statements contained in such a contract, and the party making them is estopped from denying their truth in any action thereon between the same parties suing or sued in the same right—or those claiming through them.

A contract under seal cannot be amended or varied or discharged by a simple agreement which is not under seal.

Corporation, Seal, Performance, Adoption—A corporation is liable on an executed contract for the performance of work within the purposes for which it was created, which work it has adopted and of which it has received the benefit, though the contract was not executed under its corporate seal, and this applies to municipal as well as other corporations.

AUCTION SALES.

Where sale is advertised "without reserve" the vendor cannot bid either directly or indirectly, and the employment by him of any bidder, usually called "A Puffer," at an unreserved auction sale is fraudulent—and entitles the purchaser to avoid the sale.

In sales of land—the particulars or conditions of sale must state whether the sale is without reserve or subject to a reserve bid—or whether a right to bid is reserved.

If without reserve or to that effect, then the seller cannot bid or employ a bidder at such sale, nor can the auctioneer knowingly receive such a bid.

A sale subject to a reserve bid enables the vendor to withdraw the property from sale unless and until such reserve price or bid is reached—but does not entitle him to bid or employ another person to bid for him up to the reserved price.

On the other hand—if a person wrongfully or fraudulently deters others from bidding, and thereby becomes the purchaser the vendor may avoid the sale.

Each bidding at an auction sale is an offer for the property put up for sale—and these biddings may be continued to be made until one is accepted by the fall of the hammer, when the agreement is thereby complete—unless contrary to the stipulations contained in the conditions of sale.

CONTRACTS BY MARRIED WOMEN.

By the common law, a married woman is incapable of binding herself personally by any contract—on the principle that the husband and wife are in law regarded as one person—and formerly the husband was required to join in all contracts made by a wife—in order to give legal effect thereto.

A married woman could hold separate property through a trustee—and such trustee could convey or dispose of it as she might direct—without the intervention of the husband.

Now by force of legislative enactment altering the common law in that regard—a married woman may acquire, hold or dispose of real or personal property—as her separate property—in same mannner as if she were femme-sole, exclusive of her husband and without the intervention of a trustee.

She may also make binding contracts in respect of and to the extent of her separate property—and she is capable of suing or being sued without her husband being joined with her as plaintiff or defendant. And any damages or costs recovered by her in any action or proceeding shall be her separate property and any damages or costs recovered against her in any such action shall be payable out of her separate property.

A married woman must be possessed of separate property at the time the contract is made, and such separate property must be free from any restraint against anticipation, as a contract made by or with a married woman not at the time so possessed of separate property is void and a contract or judgment binds not only her separate property at the time such contract was made or such judgment was recovered, but also all separate property which she may thereafter acquire.

PRINCIPAL AND AGENT.

Caution is required on the part of a person dealing with an agent for another person, whom thereby he seeks to make liable as principal—for he must prove: 1. The existence of agency; 2. The agent's authority to make the contract.

In contracts under seal, the agent's authority must also be a sealed instrument called "A power of attorney."

In simple contracts, i.e. contracts not under seal, no particular form is required except in cases within the Statute of Frauds—relating to interests or estates in land—the agent must be "thereunto lawfully authorized by writing."

Agency may be presumed from the circumstances and conduct of the parties, or from previous dealings and transactions of a similar character, or from the relation of the parties—and in case of necessity, the law implies agency, as, for example, a master of a ship upon an emergency happening—may pledge the credit of the owner for needed repairs—or even to sell the ship or the cargo—and a common carrier may also pledge the owner's credit for the purpose of taking proper care of the goods.

In all cases of agency—it matters not whether as between the agent and third persons—the agent could himself have made the contract, but it is necessary that the professed principal should be in existence—and ascertained at the time of the making of the contract and must also have the power or capacity to make the contract which the agent assumed to make for him and on his behalf.

Where an agent makes a contract on behalf of a supposed principal who had not at the time authorized the making of such contract by the agent, he may afterwards ratify the contract, and though not bound before such ratification he thereby becomes bound to the same extent as if he authorized the contract to be made in the first place—the ratification relates back to the date of the contract.

The ratification must be of the whole contract as made—and is not sufficient if any variation is sought to be made or imposed—and there is then no contract until such variation is assented to and accepted by the other contracting party.

The agent and the other contracting party may before the contract is ratified by the principal, rescind or alter it, by mutual agreement, in which event a ratification made after such recession or alteration is of none effect so far as the original contract is concerned.

In general an agent cannot delegate his authority to other parties, and especially is this so where the nature of the agency involves personal trust or confidence in the integrity, discretion or skill of the agent.

A person who professes to make a contract for a principal, without authority to do so, and when the supposed principal refuses to ratify and repudiates the contract as having been made by him, is himself personally liable in damages to the other contracting party, the measure of damages being assessed on the loss sustained, assuming that the contract would be carried out—and in addition any costs incurred or sustained in an unsuccessful action upon the contract against the supposed principal, which failed on the ground of non or insufficient authority to bind him.

In bills and notes—If the agent signs in such a manner as to indicate that his signature is for or on behalf of another person or a company—as by adding the words "per pro" or "by procuration of" or any words to the same effect, his personal liability is excluded—and the person taking the bill or note so signed is affected with notice of the agency and is bound to inquire as to the extent of the agent's authority. Where an agent has such authority, his abuse of it does not affect a bona fide holder for value.

A principal who has employed an agent to buy or sell goods for him or otherwise to act for him as an agent, on the termination of the agency, in order to protect himself, should give notice thereof to all parties with whom in the ordinary course of business he had previously dealt through such agent.

Executor—When a testamentary executrix employs an agent as attorney she is bound to supervise his management of the matters intrusted to him and to take all due precautions, and cannot escape liability for the misappropriation of funds committed by such agent, although he was a notary public of excellent standing prior to the misappropriation.

PRINCIPAL AND SURETY.

A discharge of the principal, or of any mortgage or other security given as col-

lateral security to the orignal obligation or indebtedness, discharges the surety from his liability for the debt. See Allison v. McDonald, 23 Can. Sup. Court, Rep. to p. 635.

In the case of a Guarantee Bond against loss by or through the misconduct or dishonesty of a servant or employee, disclosure must be made by the employer to the guarantor immediately it is discovered that the employee has been guilty of any criminal offence, or other misconduct entailing or likely to entail loss to the employers and for which a claim was liable to be made under the bond. In the negotiation of such a bond of indemnity all material facts within the knowledge of the parties thereto, likely to affect the position and liability of the other party thereto, should be disclosed, and non-disclosure is a good defence to an action thereunder. A mortgagor upon selling his equity in the mortgaged property, subject to the mortgage made by him, and which is assumed by the purchaser, upon notice to the mortgagee of the transfer, stands in the relation of a surety in respect of his liability under his covenant in such mortgage, and if the mortgagee be guilty of any laches in regard to the mortgage, or enters into any new arrangement with the owner of the equity in the mortgaged property, without reference to or obtaining the consent of the mortgagor (covenantor) whereby the time for payment is extended, or other terms imposed altering or affecting the remedy under the mortgage, such surety (mortgagor, covenantor) is released. It has been held that a creditor may by express reservation preserve his rights against a surety, notwithstanding the release of the principal debtor, the transaction in such a case amounting to an agreement not to sue, but if the effect of the transaction between the creditor and the principal debtor is to satisfy and discharge and actually extinguish the debt, there is nothing in respect of which the creditor can preserve any rights against the surety, as in the case of a novation.

An accommodation party, or an endorser, to or of a bill or note, being sureties, must be duly notified of the dishonor thereof at maturity, as provided by the Bills of Exchange Act, 1890, and failure or neglect to give such notice discharges the surety. Where one of two sureties has satisfied the debt, he has his right to contribution from his co-surety, for a proportionate part of the amount of the debt. In such case the debt, not being discharged as between the co-sureties by the payment thereof by one of them.

PARTNERSHIPS.

Partnership is :—

1. The result of an agreement to share profits and losses.

2. Prima facie the result of an agreement to share profits although nothing may be said about losses, and although there may be no common stock.

3. Prima facie the result of an agreement to share profits although community of loss is specially provided against.

Parties are rendered liable as partners by holding themselves out as such or by allowing themselves to be so held out.

The doctrine of holding out only applies in favor of persons who have dealt with the firm on the faith that the person sought to be made liable is a member.

Partnerships may be proved in an action between the credit suing and the alleged partnership by evidence of :—(1). Admissions of the party sought to be made liable ; (2). Advertisements, prospectuses, letter or invoice headings, containing the names of the alleged partners, or by a name over the door of the firm's place of business ; (3). Former conduct and mode of carrying on the business ; (4). Agreements or drafts of agreements afterwards acted on, containing admissions and recitals of the fact of the existence of a partnership.

Partnerships and dissolutions of partnerships are required to be registered.

The signature of a partner in the name of the firm to documents requiring such signature in the ordinary course and conduct of the firm's business, bind the other members of the firm as well.

Authority of Partner—A partner has implied authority to make or endorse notes or bills in the ordinary business of and for the purposes of the partnership, and so, it has been held that where a partner, "E.," made a note in the name of his firm, "E. C. & Co.," and endorsed it in the name of another firm, "E. & Co.," of which he was a member, and discounted it in order to raise money for the use of E. & Co., that the note was made by "E." in fraud of his partners, and the officers of the bank which discounted the note having had frequent dealings with "E.," and knowing his handwriting, the bank was held to have had sufficent knowledge that he was using his partners' names for his own purposes to put them on inquiry as to authority, and not having made such inquiry, could not recover against "C."

Distribution of Assets—In partnership actions, in the absence of special circumstances, such as misconduct or negligence, the assets will be applied, first, in payment of creditors, next, in payment of the sum found due to the successful party, and lastly, in payment of the costs of all parties.

CRIMINAL LAW NOTES.

No infant under seven years of age can be convicted of any crime.

An infant between 7 and 14 is presumed incapable of committing crime until the contrary is proved—that is, it must be clearly proved that he was competent to know the nature and consequences of his conduct, and to appreciate that it was wrong.

A person of 14 years of age and upwards is presumed to have capacity to commit any crime until the contrary is proved.

Drunkenness is never an excuse for crime—but where the intention of the guilty party is a necessary element of the offence itself, it is taken into consideration as to whether he had the intention necessary to constitute the offence charged.

Insanity, compulsion and self-defence are pleas of justification, but compulsion is not an excuse for treason, murder, rape, piracy, forcible abduction, robbery, causing grievous bodily harm or arson.

The following are capital offences which are or may be punishable by death :—

1. Treason.
2. Levying war
3. Piracy, accompanied by murder, attempt to murder, wounding, or any act endangering life.
4. Practical acts endangering life.
5. Murder.
6. Rape.

A person found guilty of the following offences may be imprisoned for life:—

1. Abortion.
2. Arson.
3. Intentionally endangering the safety of persons on railways.
4. Manslaughter.
5. Counterfeiting coins, or deals in and imports counterfeit coin.
6. Sodomy.
7. Forgery in certain cases—public documents, documents of title to land, exchequer bill, bank note or bill of exchange, promissory note or cheque, receipt, bill of lading, policy of insurance, warehouse receipt, or any document used in the ordinary course of business as proof of the possession or control of goods or as authorizing either endorsement or delivery, the possessor of such document to transfer or receive any goods.
8. Perjury where committed in order to procure the conviction of a person for any crime punishable by death or imprisonment for seven years or more.
9. Burglary.
10. Rape.
11. Riot. (1) Opposes, hinders or hurts any person who begins or is about to read the Riot Act, whereby it is not done ; 20. Continues together to the number of 12 for thirty minutes after the reading of the Riot Act, or if they know that its reading was hindered, within thirty minutes after such hindrance.
12. Robbery.
13. Treasonable offences.
14. Wrecking.

The punishment of whipping cannot be inflicted on any female, and a person guilty of robbery and indecent assaults and of rape may be sentenced to imprisonment and to be whipped.

Limitation of time for commencing prosecution for :—

1. Treason, treasonable offences, and fraudulent marking of merchandise, three years.
2. Frauds on government, municipal corruption, unlawfully solemnizing marriage, two years.
3. For opposing reading of Riot Act, refusing to deliver weapons to justice, seduction, defiling or procuring defilment of females, coming armed or lying in wait near public meeting, one year.
4. Unlawful drilling or being drilled, having possession of arms for dangerous purposes, publication by newspaper proprietor of an advertisement offering a reward for stolen property, six months.
5. Cruelty to animals, violation by railways of provisions as to conveyance of cattle, refusing to admit peace officer to car, three months.

EVIDENCE.

In Civil Matters.

As a general rule contracts in writing cannot be added to or varied by extrinsic evidence as the parties having reduced their agreement to writing, the law considers the writing as expressing the whole contract between them.

Extrinsic evidence is admissable to have the signatures to or execution of the writing, as proving that the writing produced was agreed to and accepted by the party or parties thereto as expressing their agreement.

A deed is proved by sealing and delivery and in simple contracts not requiring signature, a writing may be proved as the agreement of the parties by evidence of acts of acceptance, as where steps are taken to carry out the terms contained in the writing, that is, the parties proceed to execute the contract according to the tenor of the writing.

The actual time of the execution of a contract may be proved although the writing contains some other date.

Agreements and deeds are sometimes signed conditionally—not to operate until the happening of a certain event or the fulfilment of a stated condition precedent to the document going into effect. This is called delivery as an escrow, and evidence is always admissable to show that writing was signed upon such conditions.

A deed of land or a bill of sale of goods is sometimes executed as a security for a money advance, and evidence is admissable to prove this fact, and effect is only given to it as a mortgage.

Two mortgages are sometimes executed between the same parties, for the same amounts and on the same dates, but on different properties, and evidence is admissable to prove that the one was collateral to the other.

The custom of merchants, usage of trade, local usages, are sometimes admissable as evidence to explain the meaning of a written contract.

No person is incompetent as witness by reason of alleged incapacity, from crime or interest. Husbands and wives of parties to an action, as well as the parties themselves, are competent and compellable witnesses, except that no husband and wife shall be compellable to disclose communications made during marriage.

Questions tending to incriminate the witness need not be answered.

In actions for breach of promise of marriage corroborative testimony is required to support the alleged promise.

In actions by or against representatives of a deceased person and in actions by or against lunatics, the evidence of the opposite party must be corroborated.

Evidence of contradictory written statements cannot be given unless, and until, the attention of the witness shall have been first directed to those parts of the writing which are to be used for the purpose of contradicting him, and likewise proof may be given of contradictory oral statements made by the witness, upon circumstances of the supposed statement sufficient to designate the particular occasion being mentioned to the witness, and upon his being asked whether or not he did make such statement. A party producing a witness shall not be allowed to impeach his credit by evidence of bad character, but where in the opinion of the court, the witness proves adverse, such party may contradict him by other evidence, or by leave of the Judge, may prove that at other times the witness had made statements inconsistent with his present testimony; the circumstances being mentioned and he being asked the question whether he did or did not make such statement. Official or public documents prove themselves without further proof of signature being required. As a general rule, an original writing must be produced as evidence of its contents, but where the existence of it is proved and its loss, secondary evidence may be given. The construction of written contracts and documents is for the court alone, and not for the jury. In case of contracts made in a foreign country, they are construed according to the foreign law and rules of construction, and evidence of such is admissable as well as of the meaning translated from a foreign tongue into the English language. (In Province of Quebec the French language may be used.)

Onus of Proof—By preliminary objections to an election petition the respondent claimed the petition should be dismissed because the petitioner had no right to vote at the election. On the hearing of the preliminary objections, the petitioner adduced no proof and the respondent declared that he had no evidence, and the preliminary objections were dismissed: Held, on appeal to the Supreme Court (Stanstead election case, 20 S.C.R., 12), that the onus probandi was upon the petitioner to establish his status, and that the appeal should be allowed and the election petition dismissed.

Followed in re Bellechase election case, 20 S.C.R., 181.

Negligence—In an action to recover damages for negligence, where contributory negligence is set up as a defence, the onus of proof is respectively upon the plaintiff and defendant, and the question of proof is for the jury.

Slander (privilege)—Where the occasion is privileged, the plaintiff's case fails, unless there is evidence of malice in fact, and the burden of proving this is on the plaintiff, who must adduce evidence upon which a jury might say that the defendant abused the occasion either by wilfully stating as true that which he knew to be untrue, or stating it in reckless disregard of whether it was true or false.

In Criminal Matters.

Evidence of a child of tender years may be received without oath in the discretion of the court, but such testimony must be corroborated by some material evidence.

A wife is now a competent but not a compellable witness against a husband.

In prosecutions against alleged offenders under fourteen years of age, evidence of capacity to commit the offence charged must be proved.

No person is excused from answering any question on the ground that his or her answer may tend to incriminate or to establish liability to a civil proceeding, but where the privilege is claimed such evidence cannot afterwards be used against the witness in any proceeding thereafter instituted, except for prosecution for perjury in the giving of such evidence.

The same rules apply in general to criminal as to civil proceedings.

Corroboration is required to convict upon the evidence of one witness in prosecutions for:—

1. Treason.
2. Perjury.
3. Seduction.
4. Defiling women.
5. Parents or guardians procuring defilment of girls.
6. Householders permitting defilment of girls.
7. Conspiracy to defile.
8. Carnally knowing idiots.
9. Prostitution of Indian women.
10. Procuring feigned marriage.
11. Forgery.

GENERAL LAW MAXIMS.

1. Common law is common sense, which is the best guide in all ordinary cases.
2. Never sign a promissory note until after you have received the value for it.
3. Never go to law for the sake of satisfaction. You'll never get it if you do.
4. Imaginary wrongs are better unredressed.
5. A lawyer's highest aim should be to keep his clients out of litigation.
6. Consult your lawyer at the beginning of a trouble, not after you have made bad worse.
7. No man, however skilful, should attempt to draw his own will.
8. Every person having property should always have a will duly executed and deposited in a place of safety. It will not make him die one day the sooner.
9. He who is his own lawyer has a fool for his client.

PROMISSORY NOTES.

A promissory note is an absolute promise in writing to pay a specified sum at a time therein stated or on demand, to a person named or designated, or to his order, or to the bearer.

A note payable to a person without adding bearer or order, is not transferable.

A note payable to bearer may be transferred by delivery, without endorsement, but if the party transferring endorses he makes himself liable on the note.

A note payable to order cannot be transferred without the endorsement of the person to whose order it is made payable.

A person wishing to endorse a note without making himself liable on it should write underneath his signature the words "without recourse."

Presentment of an ordinary note at the place where it is made payable is not necessary to hold the maker, but both presentment and notice of dishonor are necessary to hold an endorser.

Presentment should be made on the last of the three days of grace, or if that is a legal holiday, then on the day following. Notice of dishonor may be posted on the day of presentment or the day following.

The legal holidays in the Province of Ontario are Sundays, New Year's Day, Good Friday, Christmas Day, the birthday of the Sovereign, and special days appointed by proclamation for public holidays, fasting or thanksgiving.

An infant under the age of twenty-one years cannot make himself liable by making or endorsing a promissory note.

A note made payable with interest bears interest at the rate specified in the note from its date until payment.

A note not made payable with interest bears interest from maturity at 6 per cent.

A Bill of Exchange is an unconditional written order from one person to another directing the payment of a certain sum of money therein named.

A Bill of Exchange that has been accepted is called an acceptance, and resembles a promissory note, the acceptor occupying the same position as the maker of a note.

The signature of the acceptor must be written on the Bill of Exchange itself.

A cheque is an order on a bank for the payment of a certain sum.

LEASES.

Leases for periods of more than three years should be in writing, under seal and signed by the parties.

The transfer of all leases should be in writing.

A tenancy from year to year can be terminated only by a six months' notice ending with the current year.

A monthly tenancy can be ended by a month's notice.

In the absence of an agreement to the contrary, taxes fall upon the landlord, and if the tenant is compelled to pay them he may deduct the amount from the next payment of rent.

If a tenant makes an absolute covenant to repair he would be bound to repair even if the premises were burned down, and would have to pay rent for time that premises were untenantable by reason of the fire as well.

Such a covenant should except "reasonable wear and tear, and accidents by fire and tempest," and there should be an express provision that the rent should be charged for time that premises are untenantable by reason of injury from fire or tempest.

Where a lessee continues in possession as a yearly tenant after the expiration of a lease, containing a covenant by him to repair, a similar obligation will be implied.

An express agreement between a landlord and his tenant that the former is to repair the demised premises, does not render him liable for an injury to the tenant arising from want of repair, although the tenant has notified him of the disrepair. In such a case the tenant should himself repair at the expense of the landlord.

Distress for rent can only be made by daylight, not sooner than the day after the rent matures, and only for the amount actually due (which the warrant to the bailiff should specify), together with the charges of the distress. Goods cannot be sold until after the expiration of five days after seizure.

Distress can only be made on the premises in respect of which the rent is due, except in case of goods being fraudulently removed to avoid distress, in which case they may be followed within thirty days.

An inventory of the goods seized should be made out and a copy left with the tenant, or, if absent, for him at the house with some grown person, or if there is no house upon the premises, or if no person is there with whom it can be left, it must be stuck up in some prominent place on the premises.

Before sale goods must be appraised by two sworn appraisers and duly advertised.

A clause in a lease providing that in the event of the insolvency of the tenant a certain amount of future rent shall become due, is void as against the tenants' creditors, in case of insolvency.

In case of the insolvency of the tenant, the landlord is entitled to six months' arrears of rent as a privileged claim, and to rank as an ordinary creditor for any further claims that may be unpaid.

It is believed that a landlord has no right to distrain after an assignee has taken possession, though the decisions of the courts on this point are conflicting.

Acceleration—A condition in a lease that in case any writ of execution shall be issued against the goods of the lessee, the then current year's rent shall immediately become due and payable and the term forfeited, is personal to the original lessor and lessee, and does not run with the land, and cannot be taken advantage of by the grantee of part of the reversion.

A lease made subsequent to a mortgage is subject to such mortgage, and in case of the sale of the demised premises under the power of sale in such mortgage contained, the lease is thereby determined, and where the sale takes place between two gale days, the rent is apportionable, and the tenant is liable to pay rent up to the day of such determination.

Surrender of Lease—Acts relied on as showing the acceptance by the landlord of the surrender of a lease and as affecting a surrender by operation of law must be such as are not consistent with the continuance of the term, and using the key left by the tenants at the landlord's office.

putting up a notice that the premises are "to let," making some trifling repairs, and cleaning the premises, are ambiguous acts which are not sufficient for this purpose.

WILLS.

All wills must be in writing, signed by the testator in the presence of two witnesses, who must also sign the will in the presence of the testator.

A person to whom a demise or bequest is made may be a witness to the bill, but by so doing forfeits all benefit under it.

A person under the age of twenty-one cannot make a valid will.

A married woman having separate estate may make a will, disposing of it in whatever manner she chooses.

A lunatic is incompetent to make a will.

There is no difference between the formalities necessary in a will passing real property and personal property.

Wills are of no effect until after the death of the testator.

Executors have no right to use funds of their testator's estate for their own purposes, even temporarily, and they should keep a strict account of all their dealings.

A will is revoked by the making of a subsequent one, by marriage, or by the testator tearing up or destroying the will with the intention to revoke.

A codicil is a testamentary disposition, not revoking a former will, but altering or varying some of its provision.

A codicil requires to be executed with the same formalities as a will.

COPYRIGHT.

Copyright may be obtained by any person domiciled in Canada or in any part of the British possessions, or any citizen of any country which has an international copyright treaty with the United Kingdom, who is the author of any book, map, chart or musical composition, or of any original painting, drawing statue, sculpture, or photograph, or who invents, designs, etches, engraves or causes to be made from his own design, any print or engraving, and the legal representatives of such person.

The term of copyright is twenty-eight years, with a right to a further term of fourteen years.

The condition for obtaining copyright is that the work shall be printed and published, or reprinted and republished, in Canada, whether for the first time or contemporaneously with, or subsequently to, publication elsewhere. In no case can the right exist after it has ceased elsewhere.

Copyright shall not be granted to immoral, licentious, irreligious or treasonable, or seditious literary, scientific or artistic work.

Works entitled to British copyright are also entitled to Canadian copyright. Works copyrighted in England may be imported into Canada. Foreign reprints of English works must be disposed of if imported into Canada before the obtaining of Canadian copyright. The proof of establishing the regularity of the proceeding is upon the person selling.

The above are the provisions of Chapter 62 of the Revised Statutes of Canada. In 1889 another act was passed (52 Vic., c 29), which alters the above requirements.

This act has not yet become law, because it has not yet been proclaimed by the Governor-General. Its main alterations are :—

1. That any citizen of any country which has an international copyright treaty with England in which Canada is included, may obtain copyright.

2. The conditions of obtaining copyright are that the work shall, before publication or production elsewhere, or simultaneously with the first publication or production thereof elsewhere, be registered in the office of the Minister of Agriculture by the author or his representatives, and, further, that the work be printed and published or produced in Canada, or reprinted and republished or reproduced in Canada, within one month after publication or production elsewhere.

3. If no copyright is taken out any person domiciled in Canada may obtain a license to print and publish the work. The person obtaining the license must pay ten per cent. on the retail price of each copy of the work, and must give security for such payment to the satisfaction of the Minister.

There is no prohibition in this latter act of importation from the United Kingdom of copies of works of which copyright exists there.

FEES.

The following fees shall be paid to the Minister before any application for any of the purposes herein mentioned is received, that is to say :—

On registering a copyright.....	$1 00
On registering an interim copyright..	0 50
On registering a temporary copyright.	0 50
On registering an assignment.....	1 00
For a certified copy of registration..	0 50
On registering any decision of a court of justice, for every folio	0 50

For office copies of documents not above mentioned, the following charges shall be made :—

For every single or first folio, certified copy	$0 50
For every subsequent hundred words (fractions under or not exceeding fifty not being counted, and over fifty being counted for one hundred)	0 25

Every person who, after the interim registration of the title of any book, according to this act, and within the term herein limited, or after the copyright is secured, and during the term or terms of its duration, prints, publishes, or reprints or republishes, or imports or causes to be so printed, published or imported, any copy or any translation of such book without the consent of the person lawfully entitled to the copyright thereof, first had and obtained by assignment, or who, knowing the same to be so printed or imported, publishes, sells or exposes for sale, or causes to be published, sold or exposed for sale, any copy of such book without such consent shal forfeit every copy of such book to the person then lawfully entitled to the copyright thereof ; and shall forfeit and

pay for every such copy which is found in his possession, either being printed or reprinted, published, imported or exposed for sale, contrary to the provisions of this act, such sum not exceeding one dollar and not less than ten cents, as the court determines —which forfeiture shall be enforceable or recoverable in any court of competent jurisdiction; and moiety of such sum shall belong to her Majesty for the public uses of Canada, and the other moiety shall belong to the lawful owner of such copyright.

CURRENCY AND LEGAL TENDER.

The denominations are dollars, cents and mills. Gold, silver, copper and bronze coins are authorized. Gold coins of the standard of fineness of the coins of the United Kingdom, and bearing the same proportion in weight to the British sovereign which $5 bear to $4 86 2-3, pass current for five dollars. Silver coins are legal tender to the extent of $10. Copper or bronze coins to the extent of twenty-five cents.

Dominion notes may be issued to the amount of $20,000,000. The Receiver-General must always hold in gold or in gold and Canada securities guaranteed by the Government of the United Kingdom, an amount equal to 25 per cent. of these notes. Fifteen per cent. must always be held in gold. For the other 75 per cent. Dominion debentures must be held. These notes are a legal tender throughout Canada, except at the office where they are payable.

INTEREST.

Throughout Canada, when no rate is stipulated for, the rate is 6 per cent. Parties may stipulate for a higher rate. Compound interest is not allowed unless there is a special agreement to that effect.

In Nova Scotia a creditor whose debt does not carry interest, who comes in and establishes the same before the Judge in Chambers, is entitled to interest from the date of the judgment or order out of any assets which may remain after satisfying the costs of the cause or matter, the debts established and the interest of such debts as by law carry interest. Where there is an order for an account of legacies, interest runs at 5 per cent. per annum from the end of one year after the testator's death, unless otherwise ordered, or unless otherwise directed by the will. Where the security is real estate or chattels real, the parties may stipulate in writing for 7 per cent. interest, and when the security consists only of personal security or personal responsibility, 10 per cent. may be stipulated for by parties in like manner, as above.

Accounts bear interest from date of notice that interest will be claimed. When debts are due by virtue of some written instrument payable at a certain time, interest runs from that time.

Mortgage—Under ordinary circumstances a mortgagee can claim interest only from the time the money is advanced. A mortgage of real estate provided for payment of the principal money secured on or before a fixed date "with interest at the rate of 10 per cent. per annum until such principal money and interest shall be fully paid and satisfied."

Held, affirming the judgment of the Court of Appeal for Ontario, 17 A.R. 85, that the mortgage carried interest at the rate of 10 per centum to the time fixed for the payment of the principal only, and after that date the mortgagees could recover no more than the statutory rate of 6 per cent. on the unpaid principal.

JOINT STOCK COMPANIES.

The Dominion has provided legislation for the incorporation and management of joint stock companies formed for Dominion purposes. Railway companies, banks and insurance companies are not within this act. Any number of persons not less than five, may be incorporated as a company. Letters patent are granted through the Secretary of State, declaring the name and objects of the company. The affairs of the company are managed by directors, not more than fifteen or less than three. Shareholders are liable to the amount of their shares. Calls may be paid and shares forfeited for non-payment of calls. No share is transferable until all previous calls are paid.

If a company is incorporated by a special act and not by letters patent, then another act applies, called the Companies Clauses Act. This is a general act applying to all Dominion companies. Under it there may not be more than nine or less than three directors. The act contains clauses covering the duties of directors, the capital stock and calls thereon, company books, the rights and liabilities of shareholders, the liability of directors, etc.

Provision is also made for the winding up of insolvent companies of all kinds. A company is deemed unable to pay its debts when a creditor for an amount over $200 has not been paid his debt for ninety days after demand in case of a bank, or sixty days after demand in other cases.

NATURALIZATION.

Every person who is of the full age of twenty-one years, and not an idiot, lunatic or married woman, can become a British subject as a Canadian. The person must have resided in Canada not less than three years, or been in the service of the Government of Canada or any of the Provinces of Canada for not less than two years. He must take the oath of allegiance, and also an oath that he intends to remain in Canada. If a British subject desires to throw off his allegiance he may do so. He is also entitled to resume it. These proceedings are called "expatriation" and "repatriation." Aliens may hold property in all respects as British subjects, but they are not qualified for the municipal or parliamentary franchise; nor can an alien be an owner of a British ship.

PATENTS.

Any person who has invented any new and useful art, machine, manufacture or composition of matter, which was not known or used by any other person before his invention thereof, and which has not been in public use or on sale with the consent or allowance of the inventor thereof for more than one year previously to his application for patent therefor in Canada, may, on a petition to that effect presented to the Commissioner, and on compliance with the other requirements of this act, obtain a patent granting to such person an exclusive property in such invention.

No patent can issue for an invention which has an illicit object in view, or for any mere scientific principle or abstract theorem.

An inventor may obtain a patent in Canada for an invention for which a patent has been taken out in a foreign country, if he applies within one year from the date of the issue of the first foreign patent.

If within three months after the issue of a foreign patent, the inventor gives notice to the Commissioner of his intention to apply for a patent in Canada, then any person who has commenced to manufacture in Canada within the year mentioned in the last paragraph, can, without the consent of the inventor, continue to manufacture after the Canadian patent is obtained.

If a foreign patent exists the Canada patent expires at the earliest day on which any foreign patent for the same invention expires.

Patents may be granted for improvements, but the right to use the improvement does not give the right to use the original invention, nor does the right to use the original invention give the right to use the improvement.

The patent may be granted to any person to whom the inventor entitled under this act to obtain a patent, has assigned or bequeathed the right or obtaining the same, or in default of such assignment or bequest, to the legal representatives of the deceased inventor.

Any intending applicant for a patent who has not yet perfected his invention, and is in fear of being despoiled of his idea, may file in the Patent Office a description of his invention so far, with or without plans, at his own will, and the Commissioner, on payment of the fee in this act prescribed, shall cause the said document, which shall be called a caveat, to be preserved in secrecy, with the exception of delivering copies of the same whenever required by the said applicant or by any judicial tribunal, but the secrecy of the document shall cease when the applicant obtains a patent for his invention.

The applicant shall, in his petition for a patent, insert the title or name of the invention, and shall, with the petition, send in a specification in duplicate of the invention.

The term limited for the duration of every patent of invention issued by the Patent Office shall be eighteen years, but at the time of the application therefore it shall be at the option of the applicant to pay the full fee required for the term of eighteen years, or the partial fee required for the term of six years, or the partial fee required for the term of twelve years.

The following fees shall be payable before an application for any of the purposes herein mentioned shall be required by the Commissioner :—

Full fee for 18 years	$60 00
Partial fee for 12 years	40 00
Partial fee for 6 years	20 00
Fee for further term of 12 years	40 00
Fee for further term of 6 years	20 00
On lodging a caveat	5 00
On asking to register a judgment pro tanto	4 00
On asking to register an assignment or any other document affecting or relating to a patent	2 00
On asking to attach a disclaimer to a patent	2 00

TRADE MARKS.

Every proprietor of a trade mark who applies for its registration shall state in his application whether said trade mark is intended to be used as a general trade mark or as a specific trade mark.

Before any action is taken in relation to an application for registering a trade mark the following fee shall be paid to the Minister of Agriculture, that is to say :—

On every application to register a general trade mark, including certificate	$30 00
On every application to register a specific trade mark, including certificate	25 00
On every application for the renewal of a specific trade mark, including certificate	20 00
For copy of each certificate of registration, separate from the return of the duplicate	1 00
For the recording of an assignment	2 00
For office copies of documents not above mentioned, for every hundred words or a fraction thereof	0 50

For each copy of any drawing or emblematic trade mark, the reasonable expense of preparing the same.

If the Minister of Agriculture refuses to register the trade mark for which application is made, the fee shall be returned to the applicant or his agent, less the sum of five dollars, which shall be retained as compensation for office expenses.

A general trade mark once registered and destined to be the sign in trade of the proprietor thereof, shall endure without limitation.

Every person, other than the person who has registered the trade mark, who marks any goods or any article of any description whatsoever with any trade mark registered under the provisions of this act, or with any part of such trade mark, whether by applying such trade mark or any part thereof to the article itself, or to any package or thing containing such article, or by using any package or thing so marked which has been used by the proprietor of sunch trade mark, or who knowingly sells or offers for sale any article marked with such trade mark or any part thereof, with intent to deceive and to induce any person to believe that such article was manufactured, produced, compounded, jacked or sold by the proprietor of such trade mark, is guilty of misdemeanor, and liable, for each offence, to a fine not exceeding one hundred dollars and not less than twenty dollars—which fine shall be paid to the proprietor of such trade mark, together with the costs incurred in enforcing and recovering the same.

DIVISION COURTS.

The inspection of Division Courts is a branch of the department of the Hon. Mr. Harcourt, Provincial Treasurer. Officers of courts under the department number 671, viz.:—321 clerks and 350 bailiffs. (See list of clerks and bailiffs).

The Division Courts have jurisdiction in all *personal* actions, where the sum claimed does not exceed $60. All claims of debt account, breach of contract, or covenant, or money demand, where the amount or balance claimed does not exceed $100. In claims where the amount is ascertained by the defendant's signature, and does not exceed $200. In action of replevin, where the action does not exceed $60.

Division Courts have no jurisdiction: In actions for gambling debts; actions for spirituous or malt liquors, drunk in a tavern; on notes, etc., the consideration for which is liquor, or given for a gambling debt. Actions for recovery of land, or actions where title is in question; actions for any toll, custom or franchise; actions in which the validity of devise, or bequest under a will is disputed; actions for malicious libel, slander, criminal conversation, seduction, or breach of promise; actions against a J.P., for anything done by him in the execution of his office—if he objects to the jurisdiction.

There cannot be less than three, nor more than twelve courts in a county. The County Judge, the Sheriff, the Warden and Inspector form a board for each county or union of counties, and may alter the numbers, limits and extent of divisions, and establish or cancel courts.

NEWSPAPERS OF CANADA.

The first newspaper in Canada was printed at Halifax in 1752. The first printing press in North America was brought from Amsterdam with 49 lbs. of type, and set up in 1639 at Cambridge, Mass., where Harvard University now stands. The first newspaper was printed at Boston in 1690, and was at once suppressed by the Governor.

The first printing press introduced into the New World was that established by the Jesuits at Cordova in the province of Tucuman about 1610. Another was established at Misiones in Paraguay, 1630, and some books of this press are in the British Museum.

In Ontario newspapers are published in 48 counties, and of the 575 papers published in the province, 53 are daily, 11 semi-weekly, 414 weekly, 3 fortnightly, 14 semi-monthly, 79 monthly and 1 quarterly.

THE GLOBE.

Among the papers published in Ontario the most prominent is *The Globe*.

For more than 52 years now *The Globe* has been a household word throughout Canada, and has been a powerful factor in the shaping of the destiny of this young nation. A contemporary in writing about it at the time of its 50th aniversary said, "The history of *The Globe* for the last half century is the history of Canada, so closely allied has it been with every advance and improvement made in its political and commercial interests." It was founded on the 5th of March, 1844, and Mr. Brown, in its first issue, gave the key note of its existence in these words, "The cause we plead is not the cause of party, the battle which the Liberals of Canada fight is not the battle of party, but of constitutional rights."

The Globe was published as a weekly only until October 1st, 1853, when it appeared as a daily, and became the leading paper of western Canada, a position which it still holds, but not in the same limited sense, but what was true as regards its peculiar field then can be truthfully applied to it to-day in its relation to the whole Dominion. From a four page weekly it has expanded into a 10 or 12 page daily, with a 24 or 28 page edition on Saturday, and a 16 page weekly.

On the 6th of January, 1895, its splendid home with its complete equipment was destroyed by fire, leaving nothing but the contents of one vault, its mailing sheets, and its reputation to begin the battle afresh with. To-day it is being published from its new home, which is one of the most complete newspaper offices in America.

With its new equipment and improved facilities it is in a position to give the latest, and strive to give only the most reliable information.

As the paper has increased in size, so has its circulation list. The Daily has had an average of 29,000 copies sold during this year of 1896. The Saturday edition, "which is the gem of Canadian newspapers," has had an average sale of 35,000, while the Weekly has been a regular visitor, without missing an issue for 52 years, to thousands of homes in Ontario, and has now over 125,000 regular readers in every part of the Dominion. Since its first issue *The Globe* has held a high position in the respect of all Canadians, but at no time in its history has it stood as well or yielded as great an influence as it does to-day.

In Quebec papers are published in 28 counties. Of the 138 papers published 16 are daily, 1 tri-weekly, 5 semi-weekly, 83 weekly, 2 fortnightly, 4 semi-monthly, 25 monthly, 1 bi-monthly and 1 quarterly.

In New Brunswick papers are published in 11 counties. Of the 46 papers published 9 are daily, 2 semi-weekly, 30 weekly, and 5 monthly.

Nova Scotia has 73 papers, published in 17 counties, of which 8 are daily, 3 tri-weekly, 3 semi-weekly, 53 weekly, 2 fortnightly, 1 every third week, and 3 monthly.

Prince Edward Island has 15 papers published in 2 counties: 3 are daily, 2 semi-weekly, and 10 weekly.

Of the 62 papers in Manitoba 3 are daily, 2 semi-weekly, 48 weekly, 8 monthly, and 1 six times a year.

The North-West Territories publish 22 papers in 16 towns. Of which 1 is daily, 3 semi-weekly, and 18 weekly.

In the eight districts in British Columbia 31 papers are published, 6 are daily, 2 semi-weekly, and 23 weekly.

TERMS OF SETTLEMENT OF THE MANITOBA SCHOOL QUESTION.

AS PUBLISHED NOV. 21st, 1896.

The Manitoba Legislature to amend the school act of 1890 by providing that religious instruction for half an hour may be authorized by board or by petition of parents. Forty Catholic pupils in cities or towns and twenty-five in rural districts may have a certificated Roman Catholic teacher. Where there are ten French-speaking pupils they shall be taught in French and English on the bilingual system. This is, in brief, the settlement of the Manitoba school question which for six years has violently agitated the politics of Canada. It removes all religious or sentimental grievances, and at the same time leaves intact the national character of the schools. The official statement was given out by Mr. Laurier this morning and reads as follows:—Memorandum re settlement of school question :—

(1) Legislation shall be introduced and passed at the next regular session of the Legislature of Manitoba embodying the provisions hereinafter set forth in amendment to the "Public Schools Act," for the purpose of settling the educational questions that have been in dispute in that Province.

(2) Religious teaching to be conducted as herein provided :—(1) If authorized by a resolution passed by a majority of the School Trustees, or (2) if a petition be presented to the Board of School Trustees asking for religious teaching and signed by the parents or guardians of at least ten children attending the school in the

case of a rural district, or by the parents or guardians of at least twenty-five children attending the school in a city, town or village.

(3) Such religious teaching to take place between the hours of 3.30 and 4 o'clock in the afternoon, and to be conducted by any Christian clergyman whose charge includes any portion of the school district, or by any person duly authorized by such clergyman, or by a teacher when so authorized.

(4) Where so specified in such resolution of the Trustees, or where so required by the petition of the parents or guardians, religious teaching during the prescribed period may take place on certain specified days of the week instead of on every teaching day.

(5) In any school in towns and cities where the average attendance of Roman Catholic children is forty or upwards, and in villages and rural districts where the average attendance of such children is twenty-five or upwards, the Trustees shall, if required by the petition of the parents or guardians of such number of Roman Catholic children respectively, employ at least one duly certificated Roman Catholic teacher in such school. In any school in towns and cities where the average attendance of non-Roman Catholic children is forty and upwards, and in villages and rural districts where the average attendance of such children is twenty-five or upwards, the Trustees shall, if required by the petition of the parents or guardians of such children, employ at least one duly certificated non-Roman Catholic teacher.

(6) Where religious teaching is required to be carried on in any school in pursuance of the foregoing provisions and there are Roman Catholic children and non-Roman Catholic children attending such school, and the school-room accommodation does not permit of the pupils being placed in separate rooms for the purpose of religious teaching, provision shall be made by the regulations of the Department of Education (which regulations the Board of School Trustees shall observe) whereby the time allotted for religious teaching shall be divided in such a way that the religious teaching of the Roman Catholic children may be carried on during the prescribed period on one-half of the teaching days in each month, and the religious teaching of the non-Roman Catholic children may be carried on during the prescribed period on one-half of the teaching days in each month.

(7) The Department of Education shall have the power to make regulations, not inconsistent with the principles of this act, for the carrying into effect the provisions of this act.

(8) No separation of the pupils by religious denominations shall take place during the secular school work.

(9) Where the school-room accommodation at the disposal of the Trustees permits, instead of allotting different days of the week to the different denominations for the purpose of religious teaching, the pupils may be separated when the hour for religious teaching arrives and placed in separate rooms.

(10) Where ten of the pupils in any school speak the French language (or any language other than English) as their native language, the teaching of such pupils shall be conducted in French (or such other language) and English upon the bilingual system.

(11) No pupils to be permitted to be present at any religious teaching unless the parents or guardians of such pupils desire it. In case the parents or guardians do not desire the attendance of the pupils at such religious teaching, then the pupils shall be dismissed before the exercises or shall remain in another room.

THE QUEEN'S PLATES.

The Queen's Plates in Canada are purses of fifty guineas each, the gift of Her Majesty Queen Victoria, for horses foaled, raised and trained in the Provinces of Ontario and Quebec, respectively that have not previously won public money. The Ontario Queen's Plate is he oldest fixed turf event in America that has been decided annually since its institution. It was originally run in mile heats until 1868, when it became a two-mile dash. In 1871 the distance was reduced to a mile and three-quarters. The following year it became a mile and a half, and this was the regulation course till 1886, Wild Rose being the last winner at that distance. Since her year the distance has been a mile and a quarter. For the last fourteen years it has been run under the auspices of the Ontario Jockey Club, at Woodbine Park, Toronto. The list of winners to date is:

SKATING.

The racing postures of all the best skaters are practically the same, except for the arms.

The back is kept straight and horizontal, the thighs are flexed, and the knees almost straight. The strokes of the representative champions are, however, much different, the Dutch stroke being short and frequent, the English is medium, and the long sweeps of Donohue, Smart and Johnston is termed the American stride.

The skates worn by the skaters of the world differ considerably. The English skaters are partial to skates with long heels and curved toes, it being impossible for them to use the long, flat runners adopted by Norwegian skaters.

The Holland professionals, in order to have every advantage of free play to the ankle, wear no boots.

Previous to ten years ago the records made for fast skating should be considered unauthentic.

It was then thought possible for a man to skate a mile in a little over two minutes, or thirty-two miles an hour, but Johnson may be regarded as the speediest of all skaters, and his record is 2.56.

In ranking the fastest skaters in the world England would be represented by Lovejoy, America by John S. Johnson and Joe Donoghue, Holland by P. Pender, Germany by A. Norseng, Sweden by O. Grunden, Russia by A. Von Pauchin, and Canada by J. K. McCulloch.

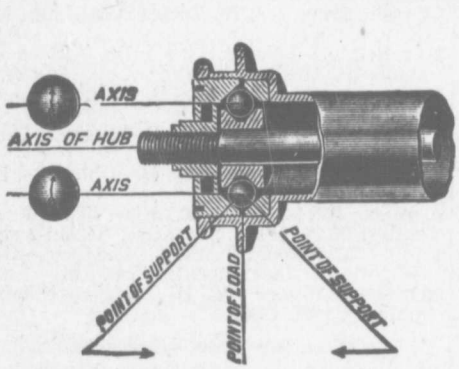
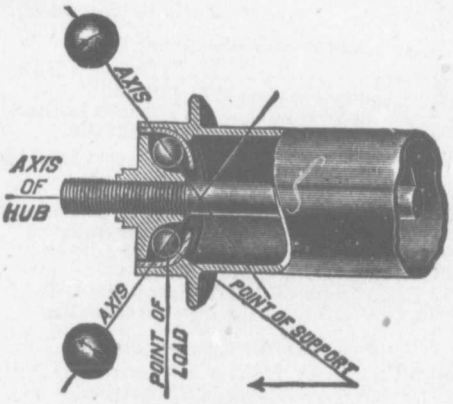
EVANS (E. & D.) AND DODGE WHEEL



E. and D. 4 point Bearing.



All Others.

We need not spend time to convince you of this fact; you know it by comparing the two bearings side by side.

In the E. & D. bearings all twisting and grinding of the balls is impossible; the load is supported from four points of contact; the oil cannot escape nor dust get in—We oil once a season only.

The other bearing is the direct opposite, the balls twist and wedge, cutting out cones and causing friction; the oil runs through to outside; dust gets in and clogs the pathway of the balls; load has one point of support only.

The moral of this object lesson is plain—Buy the Evans & Dodge Bicycle and get the best made.

The Hour Record.

Canada is not such a long way behind the other countries in regard to long distance work, taking the various records at the hour as a criterion. The record made by John Davidson has only been excelled in five countries, and of these Michael is responsible for three. It is a curious thing that these five are all held by Englishmen. The list is as follows:—

MINING.

The discovery during the last year or two of large bodies of high grade gold ores, in which dividend paying mines are being largely worked, has attracted the earnest attention of capitalists and mining men, not only throughout Canada, but throughout America and Europe.

We think it well to give a brief description of the gradual development of these mines up to the present.

In British Columbia the value of the output of minerals, other than coal, increased from $1,241,031 in 1894 to approximately $5,000,000 in the year 1895 as follows:—Trail Creek District 22,972 tons, yielding 45,950 ounces of gold, 2,572,850 pounds of copper; the Slocan District 9,309 tons of shipping ore, 30,000 tons of concentrates, yielding 1,837,100 ounces of silver, 17,145 pounds of lead; the Ainsworth District, 43,644 tons, yielding 605,550 ounces of silver; 28,906,800 pounds of lead; Nelson District, 3,707 tons, yielding 176,560 ounces of silver, 494,370 pounds of copper; West Kootenay placer gold $10,520, Cariboo, Cassair, Yale, Lillooet and East Kootenay placers $491,025; Fairview and Camp McKinney quartz $135,000.

Since this the output in Kootenay has continued to increase, especially in the Trail District, where many claims are already giving results which promise to make that sub-division one of the gold producers of the world. The average value of the ore is about $40 per ton, principally gold with a percentage of silver and copper, but far higher grades are found in the lowest levels, and in the case of the Leroy some of the richest ore already taken from that mine was found 500 feet below the surface.

Another characteristic of the Trail District is that nearly all the ore veins so far developed have been found to widen with depth.

All the country for miles around Rossland is staked out in mineral claims, and while some of them will undoubtedly prove disappointing to their sanguine holders, many of those under development are giving more encouraging results than were obtained on opening up the Leroy and War Eagle mines. Among the promising properties in this district are St. Paul, Iron Colt, Silver Bell, Lily May, Commander, The Big Three, California, White Bear, Enterprise, Mabel, St. Elmo, Monte Cristo and Norway claims; in the Ainsworth district The Delhi, and in the Slocan, the Ottawa, Ivanhoe Wonderful and Santa Maria.

This district has been constantly growing from a small number of claims located on the hill where the now famous mines are working, until, as work has uncovered a system of parallel veins or leads, in many of which the indications of finding ore are excellent, this area now extends three or four miles east and west from this centre, and one or two miles north and south.

To the west, and also to the east, across the Columbia River, most favorable reports concerning the discoveries of ore similar to that of Rossland are being made by prospectors and others who have examined these new localities.

Among these may be named the Victoria, the Alberta, the Daisy and the Careless claims belonging to the British-Canadian Development and Exploration Company, (Ltd.), and the Big Slocan sub-division is another mining centre; the discoveries in which were made in 1891. The mineralized area is about twenty miles in length by two miles in breadth, and notwithstanding the low price of silver, it contains over thirty mines of shipping ore, the gross earnings of sixteen of these mines of the present year, are estimated at $1,500,000, about one-third of which is available for dividends.

It is believed by many of the oldest and best informed miners that mineral wealth, equal to that of any part of the Province, lies in Cariboo, the rivers of that district having yielded in past years nearly $50,000,000 in gold.

The auriferous deposits are very rich, and extend over a large area.

Perhaps the greatest factor that will deter-

mine the progress of mining, and realization of the wealth that is undoubtedly now locked up in the mountains, is the means of communication and transport.

In order to make possible the concentration of ores, fuels and supplies at the most favorable points, railroads must be built, and in this particular the new British Columbia mines are at a disadvantage.

Favored by the trend of the mountains and rivers, American railroads are, however, rapidly entering from the south to transport Kootenay ores to the American smelters.

A narrow gauge railroad, thirteen miles long, has also been built, connecting Rossland and the principal mines with Trail, on the Columbia River, where a smelter has been erected capable of treating 250 tons of ore per day.

The Canadian Pacific Railway proposes to extend its line from a point opposite Robson, on the Columbia River, to Trail, and also a branch to Vernon, in order to serve the mines situated near Rossland.

These important works indicate the permanency of the mines in the Trail District.

Many claims in this district are now being carefully examined and bonded or bought which better means of access and egress now being completed will render possible their being worked.

The consensus of opinion of many mining men who have studied the conditions and surface showings at Rossland, is that few camps have ever shown so many favorable indications, though the output this year will not show the predicted increase over that of last year, on account of the want of transport for ore, and the insufficiency of the smelter at Trail to treat the ore produced.

The table below will give an idea of the extent of the mining operations at this camp:

PRODUCTION.

Total number of tons smelted to July 1, 1896	27,685
Total number of ounces of gold.	45,234
" " " silver.	67,793
" " lbs. of copper.	1,265,362
" gross value recovered by the smelters.	$1,007,007

Average net values per ton gold, 1.67 oz.; silver, 2.5 oz.; copper, 2.3%, value, $37.18.

In the West Kootenay District, the neighborhood of Nelson, is the chief mining centre, near which are located the far-famed Silver King Mine, owned by English investors, also the Exchequer and Cleopatra gold claims which are being vigorously worked with gratifying results, assays ranging from $17 to $340 in gold per ton.

COST OF MINING.

The following is the cost of labor:—Miners $3.00 to $3.50 per eight and ten hour shifts; trammers and top men $2.50 per ten hours; engineers $3.50 to $4 per ten hours; lumbermen and blacksmiths $3.50 to $4.00 per ten hours; foremen $4.00 to $5.00 per day. The cost of driving tunnels or drifts depends much upon the nature of the rock; in exceptional places, where the ground is much broken, the cost is from $7.00 to $10.00 per foot, but in the solid tough diorite from $10.50 to $30.00 a foot.

Toronto is rapidly becoming the centre of the mining industries of Canada, and here are located the offices of the different mining brokers who pay particular attention to mail orders, and it is as important to buyers to have a broker as it is to have a banker. The following gentlemen are particularly identified with the mining interests:

Campbell, Currie & Co., Captain I. Currie, and H. Kitclay, who took a special course in the School of Practical Science.

A. W. Ross & Co., an account of whose operations is given elsewhere in this work.

C. F. Clough & Co., represented in Toronto by Mr. Piggott, who has been all over the different mining districts.

ONTARIO.

Gold is very widely distributed in the Province of Ontario, having been found in many points between the townships of Madoc and Marmora in the east and the boundary of Manitoba, more than 900 miles to the Northwest.

In the eastern part of the Province it has been obtained to a greater or less extent at several points east of the town of Peterboro', such as Deloro, Belmont and Madoc, near which are the widely known Ledyard gold mines.

Attention is, however, specially directed at present to the main gold region of Ontario, which extends for more than 250 miles from Moss township westward, and which is at least 130 miles wide. Here the number of locations, usually of forty acres each, taken up for gold mining purposes within the last four years runs into the hundreds. Many of these will, of course, not prove workable mines, but, on the other hand, new finds are constantly being made.

In addition to gold bearing veins there are other kinds, such as fahlbands, widebands of schist, heavily charged with sulphides.

Nearer Rat Portage are the Lake of the Woods gold fields, which extends some twenty miles both east and west of the town, and to about forty miles to the south, embracing an area of some 1,600 square miles. The gold exists entirely in quartz veins, lying in green Keewatin schists, granites and greenstones.

Fissure veins and contact deposits are frequently met with, and many locations which are partly developed are of great promise as far as surface indications are concerned.

The general trend of the veins varies from north-westerly to due north, and south and due east and west. Their general mineralogical and geological character corresponds with that of several important gold fields.

The minerals usually associated with the quartz are iron pyrites, copper pyrites, galena and zinc blende. The quartz, generally speaking, is free milling, few deposits of refractory ore having yet been found in the district.

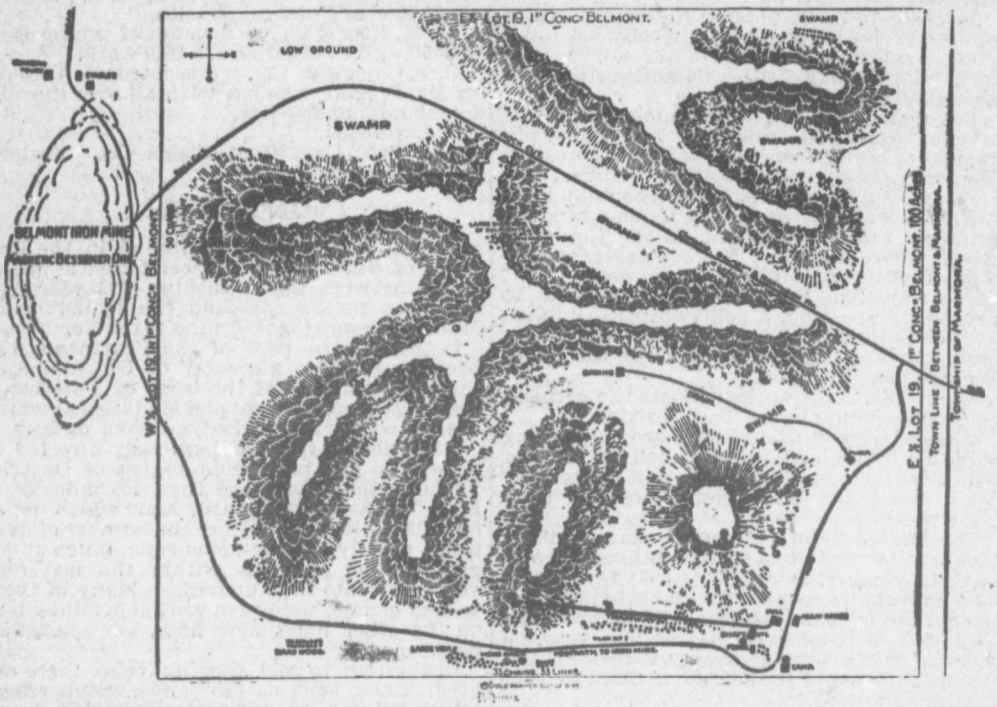
Development work has been carried out in many properties, and as a general rule most gratifying results have been obtained, notably in the Sultana Mine, near which is located the Tache Mines. Here at a depth of 300 feet the quartz is still free milling, and of high grade.

Several veins of three or four feet in width, and giving assays of from half an ounce to several ounces per ton, have been partially developed, or are now in course of development.

The other producing mines in these fields are the Regina and the Golden Gate. In this latter mine $1,600 in gold bricks have been produced with the aid of the Gold Hill stamp mill during the past eight weeks.

Full particulars may be learned on addressing Mr. A. Blue, Inspector of Mines, Toronto.

Plan showing the E 1-2 Lot 19, in 1st Con., Belmont Township, in the County of Peterboro', Ontario, Canada, the property of the Ledyard Gold Mines Co., Ltd.



In 1893 Mr. H. P. Brummel, the Mining Engineer of the Geological Survey of the Dominion of Canada, made a thorough inspection of the mine and pronounced it entirely free from arsenic, and a good paying ore; also a number of good sized veins which have all the appearance of true fissure veins.

Canada is rich in economic minerals. 110 miles east of Toronto is a large deposit of magnetic iron ore suited to make the highest grades of tool steel, being rich in iron and very free from impurities. Into this Belmont mine a Railway has been built which connects with The Canadian Pacific Railway and The Central Ontario Railway, giving easy access to Lake Ontario, whence the ore can be shipped to any point on the great lakes. Adjoining the Belmont iron mines is the property of the Ledyard Gold Mines Co., (Ltd.), in which are several veins of quartz containing free gold and auriferous pyrites, on which considerable development work has been done. These mines can be reached by all rail route, in about five hours from Toronto.

ARTHUR WELLINGTON ROSS

WAS born in Nairn, County Middlesex, Ontario, in 1846. His early days were spent principally in Ontario, but he was one of the first to go to the great North-West, and there is hardly an enterprise or an undertaking in those early days but with which Mr. Ross was intimately associated.

He took the deepest interest in the discovery and development of coal and other minerals from the Lake of the Woods to the Rocky Mountains, as he was one of the very first to learn of the possibilities of the Lake of the Woods as a gold producing region, and spent much time and money in exploring and developing mines near Rat Portage. In fact the history of the Province is the history of Mr. Ross, as he was connected with nearly every enterprise that tended to develop and promote its best interests, such as building bridges, local railways, erecting gas works and water works in Winnipeg.

He was one of the first to press upon the Government the idea of establishment of national parks along the line of the Canadian Pacific Railway across the continent, and it was by his advice that the National Park site at Banff was chosen.

It is safe to say that this park would not have been established but for his persistent efforts.

Mr. Ross also took an active interest in pushing the construction of the Hudson Bay Railway, and the examination of Hudson Bay as to the feasibility of the route for navigation purposes.

In 1883 Mr. Ross was President of the Winnipeg Consolidated Gold Mining Company, and also the Argyle Gold Mining Company, both of which Companies developed their properties and for a certain time had stamp mills at work on them, but owing to the lack of support through want of faith on the part of the general public the work had to be abandoned on both properties.

It was owing to Mr. Ross' enterprise and energy that anthracite was discovered in the Rocky Mountains as in the spring of 1883, he fitted out a party at his own expense and sent them to explore for the precious metals in the Rocky Mountains in advance of railway construction. Instead of finding the precious metals the party discovered the anthracite at Banff for Mr. Ross, and hence he

was the original owner of these mines. The property was afterwards sold to McLeod Stewart, and his associates at Ottawa.

During the celebrated boom in Winnipeg, which arose out of the rapid construction of the Canadian Pacific Railway, he was *par excellence* the business man and capitalist of the whole North-West, and among all the busy men of that time, none had so little time to spare as he.

He was not only a daring speculator but he saw in advance the wants of the country in a business way, and took part in supplying them, and, when the Howland Syndicate was formed to build the C.P.R., and representative men met from all the Provinces, Mr. Ross was chosen to represent the West as a Director.

The collapse of the boom, could not but injure the financial standing of one with such tremendous interests in that country. Older and more experienced men than he, who prided themselves on their cautiousness and conservatism rather than upon their enterprise found themselves involved in the general collapse, which followed the inflation of that time. Mr. Ross strove manfully to meet all obligations and at great personal sacrifice.

Mr. Ross was one of the first to impress upon the Press of Canada, and Toronto in particular, the necessity of constructing the Crow's Nest Pass Railroad in the interest of the mines in Kootenay.

He had never lost his faith in the unbounded wealth and fertility of the resources lying waiting to be developed in the mines of the West.

He had innumerable difficulties to surmount at his first bringing this to the notice of the people in the East, principally among whom were the different brokers, who were a unit in pronouncing it merely a fad of his, but his natural buoyancy proved equal to the occasion.

In the face of these obstacles Mr. Ross' naturally indominant spirit could not be suppressed and although the press, the brokers, and the public did their best to discountenance the project at first, he still maintained his abiding faith in the future mineral possibilities of the great west.

Mr. Ross opened up a small office, but for a considerable time the general public refused to believe what vast wealth was merely waiting to be taken from the ground. He still persevered and has now met with the success which he so thoroughly deserved.

Mr. Ross represented the people of Manitoba in Parliament for eighteen years, but he has retired from politics to attend strictly to business.

He has moved into his present commodious offices at No. 4 King Street East, and is handling only well known stocks, and is doing an exceptionally remunerative business, and is now being well supported.

Particular attention is being paid to mail orders from any part of Canada, the United States and England, and people communicating with Mr. Ross' firm can thoroughly rely on obtaining authentic information regarding any mining property, and he will be pleased to give them the benefit of his long experience in mining matters, and will quote stocks at the lowest possible price.

to their names appearing as shareholders, none will be published by this company.

The Board of Directors, as it stands, is provisional and subject to ratification at the first stockholders' meeting, and at the same time the Board will be completed by the addition of two more directors selected from among the shareholders, as the majority decide.

The **KOOTENAY** will operate in the Dominion of Canada exclusively and particularly in the Trail Creek district of British Columbia and the New Ontario gold fields. We have control of some of the best properties in these districts, but our especial attention at the present time will be given to taking up and actively developing the Southern Cross, Wolverine No. 2, and Iron Hill, owned by the Southern Cross and Wolverine Consolidated Gold Mining Company.

These properties adjoin the Crown Point, which, as everyone knows, is the most famous property in the South Belt. At the present time they have probably 200 or 300 tons of ore on the Crown Point ready to ship, which will average $58 per ton, also from 400 to 600 tons with an average value of $30 per ton.

The following is taken verbatim from the official report of William A. Carlyle, Provincial Mineralogist, to the Minister of Mines:

"South of the Crown Point grant are three claims, the Southern Cross, Wolverine No. 2, and Iron Hill, on the first of which is a Crown grant, owned by the Southern Cross and Wolverine Consolidated Gold Mining Company. On the Southern Cross are two open cuts and two tunnels, one 75 feet, the other 90 feet long, which are made in the very iron-stained diorite to develop a well-defined fissure, in which the ore in places widens out from nothing to two or three feet of solid sulphides. In the 90-foot, or working tunnel, at ten feet, is encountered what is probably the CrownPoint dyke, down along which a winze was sunk 25 feet with two or three feet of low-grade pyrrhotite, copper pyrites, and blende, when water caused work to be stopped. On the Wolverine there is a large exposure of iron-stained rock with stringers of sulphides, but no work has been done yet to develop the conditions that may prevail."

These properties have been tendered us on such satisfactory terms that we believe we can accomplish our purpose and put them on a paying basis at an early date.

In nine months we succeeded in making the COLORADO GOLD MINING & DEVELOPMENT COMPANY a dividend-payer, and we think we can do equally as well, if not better, with the **KOOTENAY EXPLORATION COMPANY, LIMITED** as the properties we have are of well-known merit, which need but proper development to make them among the best producers in their districts.

As we purchase only such properties as show an actual value, and will yield a return on the investment, and do not buy undeveloped "prospects," whose chief asset is "hope," the element of loss, so prominent in the average mining venture, is practically done away with. Then, too, the co-operation under our plan of so much capital would allow of failure after failure in our developments, and yet enable us to pay a handsome dividend if only one mine out of 20 proved good. The majority of miners have not sufficient means, nor are they in a position to procure necessary capital to develop their claims, even after their value has been successfully demonstrated, so that many of these properties can be purchased for figures which are nominal in comparison to their true value, and we expect to develop a large number of such properties.

You are not asked to subscribe for stock in a company having but one or two claims which cost but a few thousand dollars and were then

capitalized at a million, a small part of which was sold at such a price that more than paid for all the claims, including development work, leaving the officers of the company with a majority of the stock at no cost to themselves.

Under our plan all stand on an equal basis, and you are entitled to your share of the profits from all properties now belonging to the Company, or that it may acquire, and your proportion will be in just such ratio as the amount you have invested, as no stock is set aside for an officer or director, except as it is subscribed and paid for, the same as by any other shareholder, and all are equal participants in the profits as their interests may appear.

This is worthy of your serious consideration, for until the COLORADO GOLD MINING AND DEVELOPMENT COMPANY was brought out never before did the small shareholder have an equal chance with the promoters of the company.

We have a large number of applications to develop, lease, buy and operate mining properties all over this country, some of them undeniably good. It is such, after careful examination by experts and engineers and approved by us, that we take up. Statistics say that 97 out of every 100 who enter business fail. Can you imagine any such number failing to secure gold by mining if they invested the same capital and applied the same thought and work in that line?

TEN THOUSAND DOLLARS INVESTED IN OBTAINING GOLD FROM A MINE DIRECT CAN PAY YOU MILLIONS!

When you become a shareholder in this company you are as much of a miner in proportion to your investment as though the title was vested in you direct, as every dollar goes for the promotion of the interests of the whole company.

OVER-CAPITALIZATION, WITH A LACK OF SUFFICIENT TREASURY STOCK TO PROVIDE FUNDS FOR PROPER DEVELOPMENT RUINS MORE COMPANIES THAN ALL OTHER CAUSES COMBINED.

Every share of this company's stock is treasury stock, and ALL goes for development purposes, instead of nine-tenths of it remaining in the hands of the promoters at no cost to themselves, as has been done by the average mining company.

The profits from legitimate mining are enormous and the fluctuations in the value of stocks almost beyond belief.

LET US LOOK AT A FEW EXAMPLES:

The discovery of the Crown Point's Bonanza on the Comstock Lode advanced the price of its stock within a year from $2 a share to $1825 and lifted stock of Belcher, the adjoining mine, from $1.50 a share to $1525, then the capital stock was well "watered" and the price per share became proportionately less. During five years this mine paid out nearly $16,000,000 in dividends.

Alpha, another mine on the Comstock Lode, fluctuated between $3 and $1570 per share within five years, with many lesser changes during that time.

It is as certain as the sun shines that if the mines in British Columbia and other favored parts of the Dominion prove one-quarter part as good as experts and mining engineers report them to be that we shall see one of the greatest booms in mining properties this country has ever seen. Good, bad and indifferent will advance, but if the investor will be a little conservative and look into the scheme that is presented to him, studying its possibilities of profit, and going in at the beginning, he may rest assured that profits surely await him. A thousand per cent. over the actual cost is only a fair return in mining.

Already the original shareholders of the COLORADO GOLD MINING AND DEVELOPMENT COMPANY are deriving an income at the rate of 60 per cent. per annum. That company expects to double its present rate of dividends early in the new year and when the improvements, now under way, are completed, it will be four times the present amount.

We believe the **KOOTENAY EXPLORATION COMPANY, LIMITED,** will be equally successful, and invite you to join us, and should be pleased to receive your subscription for the number of shares desired. Price, 10c per share.

ONE HUNDRED AND FIFTY THOUSAND SHARES HAVE ALREADY BEEN TAKEN UP AT THIS PRICE.

Subscription books are now open at the office of LOWNSBROUGH & CO., bankers and brokers, 22 King-street east, Toronto, Ont., where J. GRANT LYMAN, Managing Director, will be pleased to receive your subscription. No certificate will be issued for less than 100 shares.

The Province of Ontario has a mineral bearing belt 1,000 miles long by 100 miles wide, north of the great lakes from Ottawa river to Lake of the Woods, more easily reached by lake or railway than any other mineral district of the continent.

Exploration has shown the gold districts of the province to be extensive and rich, and new finds are constantly being made. In the western fields the ore is mainly free milling, and wood, water and labor in abundance provide the requisites for economic working. The yield of gold for the year ending 31st October, 1895, was $50,-281; and in the period from 1st November, 1895, to 20th September, 1896, it reached $142,605.

Crown lands are sold at $1.50 to $3 per acre, or leased at 60 cents to $1 per acre, for the first year, and 15 to 25 cents for subsequent years.

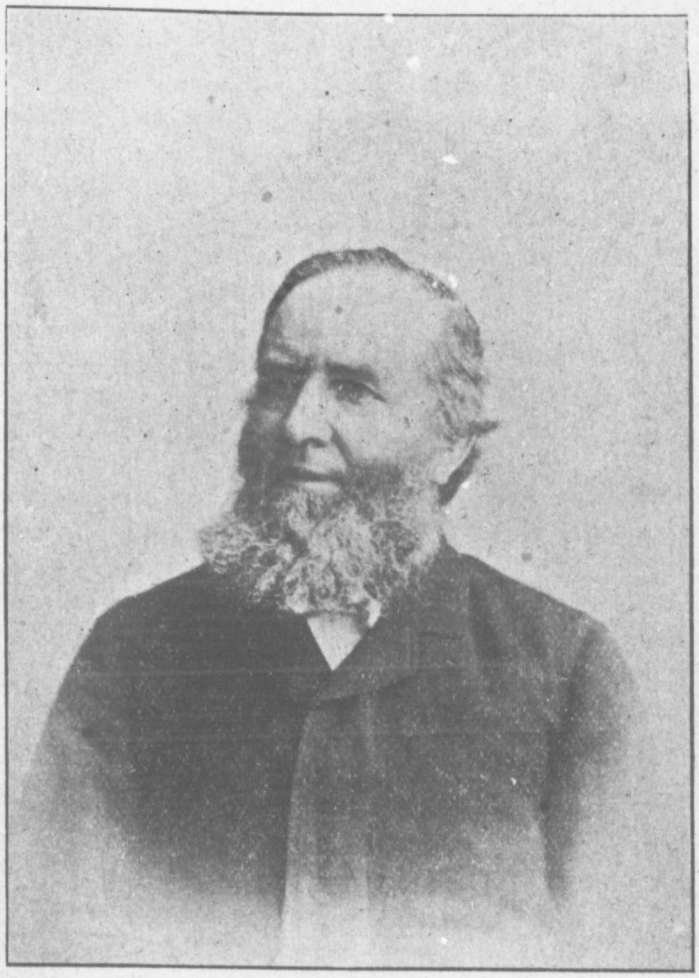
ECZEMA! DR. CHASE'S OINTMENT



REV. CHAS. FISH, Methodist Minister, Toronto.

Few men better known or more highly esteemed in the ministerial ranks in Canada than the gentleman whose portrait accompanies this. Although now retired from the more active work in the ministry, he has held almost all the more important charges throughout Ontario as a pastor in the Methodist Church. He is one of the pioneer preachers. A few words of his to fellow-sufferers will be taken in the spirit which he intends them, feeling that in publishing to the world the great benefits he has derived from his great cure he is but doing his first duty to man, and, in a measure, fulfilling the old command, "Do unto others," etc.

About ten years ago I felt the beginnings of what is commonly known as Eczema. The disease commenced in my ears and spread entirely over both sides of my head and also developed on my hands. During those ten years I was a great sufferer. I tried many supposed remedies, and some of the best physicians—specialists on skin diseases—treated me. Beyond affecting temporary relief, I received no more benefit and all failed to effect a cure. Some time ago I was led from reading and investigating some reliable testimonies I read in the newspapers to try Dr. Chase's celebrated Ointment. The first box gave me so much relief that I felt warranted in persevering. As I write this I am just commencing on the fifth box, and, judging from the rapid improvement effected, I am certain that before the box is completed I shall be completely cured. I think my cure almost a marvel, and shall be pleased at any time to answer any inquiry from like cause. Having suffered so much myself, I give this testimony for the benefit of others.

CHAS. FISH,
Methodist Minister.

192 Dunn Avenue, Toronto.

Anyone suffering from Eczema, Piles, or any kind of skin disease can obtain a free box by writing Edmonson, Bates and Co'y, Toronto, and mentioning this Annual. This shows confidence on the part of the proprietors.

THE TEMPLE BUILDING.

The illustration on the preceding page represents the magnificent Temple at the corner of Bay and Richmond Streets, Toronto, belonging to the Independent Order of Foresters. This building is being erected under the special superintendence of the Supreme Chief Ranger, Dr. Oronhyatekha, which is a sufficient guarantee that it will be, if not the best, certainly among the best and most complete of its kind in the Dominion. The erection of this handsome structure was commenced in the spring of 1895, the corner-stone being laid by His Excellency the Earl of Aberdeen, Governor-General of Canada, on the 30th of May in that year, since which time the work has been prosecuted with vigor, and will be completed during the present year.

The first two storeys are built of Credit Valley stone, and the remaining eight storeys of brownish red brick, trimmed with Credit Valley and Connecticut brown stone. The foundations and the walls in thickness and in strength are sufficient to sustain a building of fourteen storeys. The structure is lined throughout with fire-proof brick, and the steel therein is wholly protected by fire-proof terra cotta. In fact, the whole building will be as fire-proof as modern science can make it, there being nothing to burn, except the window frames and sashes.

The main elevator shaft will contain two of the most modern and up-to-date elevators that can be found, which will be the largest in the city, and will be operated by electricity. The elevator shaft will have nothing in it to burn, as it is separated from the rest of the building by solid brick walls with steel doors, and the floors within it will all be of tile. The stairs will be of steel, slate and marble. There is to be a second elevator shaft in the rear of the building, which will be likewise isolated and completely fire-proofed.

The roof will be composed of fire-proof terra cotta and tiles, and the architect affirms that any number of bon-fires could be built thereon without affecting it in the least, or injuring the building in any way.

There are four tiers of fire-proof vaults in different parts of the structure, built from the foundations, with brick and fire-proof terra cotta, and extending to the ninth storey. These will be furnished with doors and locks of the latest and most approved kind, with a view to securing for their contents ample protection against both fire and burglars.

There are to be two standing water pipes with steam pump to make pressure, and with suitable hose attachments on each floor, to be used not so much for protection against fire within as to assist in extinguishing fires that may occur in adjacent buildings, which will be the chief source of danger to the Temple, so far as fires are concerned. The Temple will be heated by steam, and lighted by electricity produced on the premises. Special attention has been given to the subject of ventilating every room in the Temple.

The ninth and tenth scoreys will be used for lodge purposes. The Bay street

section will contain a magnificent lodge room 90 feet in length by 49 feet in width, with a clear ceiling of 25 feet in height. In the Richmond street section there will be a smaller lodge or chapter room, 23 feet by 36 feet, with spacious ante-rooms, preparation room, committee rooms, smoking room, cloak room, toilet room, and a banqueting room capable of seating three hundred at a time, with an adjoining kitchen containing all modern conveniences. In the rear of the Richmond street section, and occupying the sixth and seventh storeys will be a spacious assembly room with suitable ante-rooms, and beneath this, in the fourth and fifth storeys, will be the Court rooms, and suitable ante and toilet rooms. The remainder of the building will be devoted to office rooms. The Supreme Court officers and staff will occupy the whole of the eighth storey.

There will be two main entrances, one from Richmond street, and the other from Bay street, both leading directly to the elevator and main stairway.

"The Temple Building," which is the name of the new structure, will not only be an ornament to the city, but will be a credit to the Independent Order of Foresters who are erecting it. The architect, Mr. George W. Gouinlock, has certainly succeeded in producing an excellently planned and ornate edifice, and so well proportioned that few would think, when looking at it, that it is the highest building yet erected in Canada. "The Temple Building" will be a worthy companion to the magnificent new Civic Building standing but half a block away.

There could be no better evidence of the foresight and shrewdness of the Supreme Chief Ranger of the Foresters than is afforded by the selection of the present site for an office building, located, as it is, within half a block of the new City Hall, within 200 feet of the City Registry offices, and but a block away from Osgoode Hall, while from the corner of Queen and Yonge streets, of Richmond and Yonge streets, or of King and Bay streets, either of which is only a block distant, street cars radiate to every part of the city.

That "The Temple Building" is likely to prove a profitable investment for the Foresters goes without saying. In the first place the major portion of the site was purchased for a mere song, and in the second place the contracts for the erection of the building were most advantageously placed ; and the indications are that before the Temple is completed the whole of the available space will be taken. All the office rooms in the rear portion of the Richmond street section are already rented, while many of those located in the Bay street section are spoken for. It is understood also that representatives of several of the Masonic lodges are seriously considering the advisability of securing accommodation in this up-to-date building, which, in our opinion, will be a move in the right direction, especially as we learn that the necessary accommodation has been offered upon very reasonable terms.

The Supreme Court, under the Amendments to its Act of Incorporation, secured in 1896, maintains a deposit of $100,000 with the Government of the Dominion of Canada, makes annual returns to the Department of Insurance, and is subject to a strict Government Inspection; also maintains a deposit of £20,000 sterling with the Government of Great Britain and Ireland, and a deposit of $50,000 with the Insurance Departments in the United States, and makes annual returns to these several Departments.

The following most important legislative provision relative to the liabilities of the members, was also secured:

10. The liabilities of any member of the Society shall be limited to the assessments, dues, fees, capitation tax and fines of which, at the date at which he ceases to be a member by withdrawal, explusion, suspension or non-payment of assessments or dues or otherwise, notice has been actually given by the Society, or which under its constitutions and laws have matured and become due; Provided that no member, or his beneficiary, shall be entitled to any pecuniary benefit of the Society during the time such member is in default with respect to the payment of any assessments, dues, fees, capitation tax or fines; and the provisions of this section shall be printed on each and every policy issued by the Society.

PHENOMENAL GROWTH OF THE I.O.F.

The Independent Order of Foresters was founded at Newark, New Jersey, on the 17th of June, 1874. In 1881 the Order was re-organized, and changed from a death assessment Society to its present plan, and began business under the new system, July 1st, 1881, without a dollar in its treasury. After having paid all Benefit claims, and heavy management expenses, incurred chiefly in planting the Order in new territory, there remains a princely sum in the surplus, as shown below. To-day it extends over the major portion of the United States, all of Canada, and throughout Great Britain and Ireland. The government of the Order is vested in a Supreme Court, and in the High and Subordinate Courts scattered throughout its jurisdiction, and is not only representative, but thoroughly democratic, and simple in the extreme.

The following tabulated figures will show the marvellous growth of the Order since its re-organization :

DATE.	MEMBERSHIP.	SURPLUS.	PER CAPITA.	DEATHR'TE PER 1000.

Oct., 1896	99,018	1,891,101	19 09	....

Surplus on 1st Dec., 1896, $2,001,665.

The unexampled prosperity and growth of the I.O.F. are due to the fact that its foundations have been laid on a **Solid Financial Basis**, and every department of the Order has been managed on business principles, thereby securing for all Foresters large and varied benefits at the lowest possible cost consistent with **Safety** and **Permanence.**

THE FUNDS OF THE ORDER.

Every safeguard has been thrown around the funds of the Order. In the first place, the Subordinate Courts collect the monthly assessments from the individual members and send them direct to the Supreme Secretary. The Subordinate Courts are authorized to send these remittances only by Post Office or Express Money Orders, or by Bank Draft; each to be made payable to the order of the Bank selected by the Executive Council.

After the funds are in the Bank, not a dollar can be withdrawn except on the joint cheques of the Supreme Chief Ranger, Supreme Secretary and Supreme Treasurer. Only a sufficient amount is kept in the Bank on deposit to enable the Executive to meet all claims promptly as they accrue ; the balance of the funds being safely invested in first mortgages, debentures and Government securities, and can be withdrawn only on the combined order of the whole seven members of the Executive Council.

COST OF JOINING THE I.O.F.

FEES PAYABLE BY CHARTER MEMBERS.

1.—The Charter Fee of	$100 00
[If there be 20 Charter applicants each would pay towards the Charter $5.00; if there be 25 applicants each would pay $4.00; if there be 40 applicants each would pay only $2.50 towards the Charter Fee.]	
2.—The Registration Fee, which is 50 cents for each $500 of Mortuary Benefit taken (say for $1,000)	1 00
3.—The Certificate Fee for Certificate of Membership	1 00
4.—The Medical Examination Fee (say for $1,000)	1 50
[The Medical Examination Fee is $1.50 for $500 or $1,000 of Mortuary Benefit, $2.00 for $2,000 or $3,000, and $3.00 for $4,000 or $5,000 Mortuary Benefit.]	

REPAYMENT TO CHARTER MEMBERS.

Each Charter Member is entitled to be repaid by his Subordinate Court the amount contributed by him towards the payment of the Charter Fee, such payment to be made out of the first initiation fees received by the Subordinate Court after its Charter is closed, but not until a dividend has been declared, as provided in Section 117 (8 and 9) of the Constitutions and Laws.

FEES PAYABLE ON JOINING AN EXISTING COURT.

A Candidate for Initiation into an existing Court, and taking $1,000 of Mortuary Benefit, must pay the following fees:

1.—The Deposit Fee which must accompany his Application for Membership	$1 00
2.—Initiation Fee, which must be not less than	2 00
3.—The Registration Fee, which is 50 cents for each $500 of Mortuary Benefit taken	1 00
4.—The Certificate Fee, which pays for the Certificate of Membership	1 00
5.—The Medical Examination Fee, which is as above	1 50
	$6 50
A Candidate taking $2,000 of Mortuary Benefit would be required to pay $1.00 extra Registration Fee and 50 cents extra for Medical Examination Fee, thus making the total cost of admission	$8 00
If taking $3,000 Mortuary Benefit, the cost would be	9 00
If taking $4,000 Mortuary Benefit, the cost would be	11 00
If taking $5,000 Mortuary Benefit, the cost would be	12 00

WHEN BENEFITS COMMENCE.

Members of the I.O.F. are under the protection of The Supreme Court and come under full benefits (a) as soon as they have passed the Medical Board (b) have paid their Initiation and other required Fees, and (c) are initiated into the Order.

In most of the other societies, members are not entitled to full benefits until six months after initiation.

MEMBERSHIP NON-FORFEITABLE.

Once admitted, you cannot forfeit your membership, except by your own act of non-payment or other breach of the Constitution and Laws. If your Court becomes defunct, or you remove to a place where there are no Courts, you can become a member-at-large and make your payments direct to the Supreme Court, and thus continue your membership.

Are making Boots that FIT so nicely, that one does not have a dread to wear them the first time, or what is known as breaking in a boot. They make boots that fit the feet, and not force the feet to fit the boots, this is done by being acquainted with the anatomy of the foot, so shaping the boot and modeling it as to give ease and comfort.

To Accomplish This, They Use the

"PATENT CANVAS INSOLE"

To make the boot light, flexible, and silence the noise and squeak, and in combination with the "Patent Canvas Insole" they use cork. to shut out dampness and wet, thereby making a COMPLETE and perfect boot, not a corn creator, but a corn destroyer.

Ask your boot and shoe dealer, to show you these boots, and then buy them, be comfortable, happy and satisfied, knowing that you have got good value for your money.

FACTS

ABOUT THE

Canada Life Assurance Co.

1. The oldest company in the Dominion—established 1847.
2. The largest home company, having over 85 per cent. as much assets as all the other 10 Canadian companies combined.
3. A thoroughly time-tried and approved company. It has passed successfully through periods of financial distress, and ranks to-day as the soundest and most popular company in Canada.
4. It holds a unique place as a policy-holders' company. Its large profits earned for and paid to policy-holders has placed it in the front rank as a dividend paying company. Its thousands of satisfied policy-holders bear willing witness to its superiority.
5. Its moderate premiums, its liberal guaranteed values, its economical management, its strong financial position, its large profits—all these make it the best company to select.

The oldest, largest, strongest and best Life Assurance Companies in the world are Mutual Companies.

As Profits largely accrue from interest earnings, the **rate** of interest earned on a Company's investments may be taken as a fair index of its ability to give handsome dividends. **THE ONTARIO MUTUAL,** as per the Montreal Insurance and Finance Chronicle, Oct. 15, 1896, realized a **higher average rate (5.72 PER CENT.)** for the past five years, 1891 to 1895 both inclusive, than any other leading Life Company doing business in Canada.

It holds Reserves for the security of its policy-holders based on the Actuaries' Table, with **4 per cent.,** being higher than **the Government** standard.

Its dividends to policy holders under the first quinquennial distribution of profits, declared in 1896, were **10 PER CENT. HIGHER** than the **ESTIMATES** put in the hands of the Company's Agents for canvassing purposes in 1891.

Every desirable and popular form of policy issued at **LOWER RATES** than British or American Offices. Guaranteed Cash and Paid-up Values, and very liberal policy conditions.

MONEY TO LOAN on improved farms, church property, etc., at lowest current rates. Terms of payment easy. Costs low. Debentures purchased.

ROYAL

MILITARY COLLEGE OF CANADA

INFORMATION FOR CANDIDATES

THE ANNUAL EXAMINATION FOR CADETSHIPS IN THE ROYAL MILITARY COLLEGE will take place at the Headquarters of the several Military Districts in which the candidates reside, in JUNE 1897. Intending candidates who have matriculated in Arts, within 12 months previous to the Examination, in any chartered University of the Dominion of Canada, will be exempted from passing the Obligatory or preliminary examination.

In addition to the facilities the College affords for an education in Military Subjects, the course of instruction is such as to afford a thoroughly practical, scientific and sound training in all departments which are essential to a high and general modern education.

The Civil Engineering Course is complete and thorough in all branches. Architecture forms a separate subject.

The Course of Physics and Chemistry is such as to lead towards Electrical Engineering, Meteorological Service, and other departments of applied science.

The Obligatory Course of Surveying includes what is laid down as necessary for the profession of Dominion Land Surveyor. The Voluntary Course comprises the higher subjects required for the degree of Dominion Topographical Surveyor. Hydrographic Surveying is also taught.

Length of Course Four Years.

Five Commissions in the Imperial Regular Army are at present awarded annually.

Board and instruction $200, for each term, consisting of ten months' residence.

For further information apply to the Deputy-Assistant-Adjutant-General of Militia, Ottawa, before 15th May.

WE MAKE a Specialty of Stereotypes, Linotypes and Typograph Metals. Once a trial is made of our Metal you will use no other. It runs up sharp, giving a face unequalled by any other metal. Our Stereotype remains rigid on the press cylinders; the pressmen never complain, which speaks volumes. The following are some of the Newspapers, etc., who are using our Metals:

The Globe ..	Toronto, Ont.	Truro News	Truro, Nova Scotia

We make an Interchangeable Metal that may be used either as Stereotype, Linotype or Typograph, *i.e.*, either for stereotyping or use in the machines.

TIN, LEAD, BRASS AND COPPER DROSSES PURCHASED.

DEALERS IN ALL KINDS OF METALS.

WE LIKEWISE have extensive lines of BABBIT and ANTI-FRICTION METALS: Our XXX METAL has never been equalled; Our 2 x 2 METAL is equal to and better than any No. 1 on the market; Our 3 x 3 METAL is an all-round Metal, fit for any work; Our ALUMINOID is a surprise to all engineers and machinists, owing to its great tensile strength, and its great bulk in comparison with its weight. The following are a few of those who have been using our metals for years:

ANALYSIS AND ASSAYS MADE.

Manitoba Farm Lands

Manitoba Offers Special Advantages for New Settlers to Engage in Agriculture.

Climate and Soil Are well adapted for growing wheat, oats, barley, flax, millet, potatoes, and all kinds of vegetables. Native grasses are luxuriant.

Arable and Grazing Lands yet uncultivated are situated in different sections of the province as follows:

In the Red River Valley - -	**2,000,000 Acres.**
In Central and S.W. Manitoba -	**4,000,000 Acres.**
In Northwestern Manitoba - -	**4,000,000 Acres.**

These lands are very cheap, and can be purchased on easy terms at from $2.50 to $10.00 per acre.

FREE HOMESTEADS Homesteads can still be secured in the Lake Dauphin District between Lakes Winnipeg and Manitoba, as well as on the east of the Red River.

CROP OF 1895:

	Area Under Crop.	Average Yield Per Acre.	Total Yield.
Wheat.....	1,140,276 Acres.....	27.86 bus.....	31,775,038 bus.
Oats	482,658 Acres.....	46.73 bus.....	22,555,733 bus.
Barley.....	153,839 Acres.....	36 69 bus.....	5,645,036 bus.
Flax.....	82,668 Acres.....	16'8 bus.....	1,281,664 bus.

Total Grain Crop 61,366,472 Bushels.

Special attention is now given to stock-raising and dairying with most satisfactory results. There is ample room to increase the products of grain, cattle, hogs, butter and cheese three or even fourfold.

At no period in the history of the province has the time for settlement been so opportune as the present.

March and April are the best months for settlers to arrive. All necessary supplies can be purchased in the province, as required, and at less than half the prices paid twelve or fifteen years ago.
