THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the Rates of Premium quite as LOW as security to the Assured, and safety to the Office, security to the Assured, and salety to the Onice, will admit of.

The following are some of the advantages offered by this Society:

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One half of the Pretnium for the first five years may be paid by the Assured's own Note. These covers and got be noted, but may remain on Interest, to be deducted from the root, years the depth of the Assured.

thereat, to be deducted from the runn, as the depth of the Assured.

Insuers can at all times demand, as a right, a Loan to the extent of two thirds the amount of Premium they have paid—upon deposit of their Policy, and guaranteeing it will be kept in force. This important advantage removes the fear so many entertain of being obliged, through pecuniary emborragement, to let their Policies lapse, and at a time such a provision is absolutely needed for their families.

No Charge for Stamp Duty, nor for Medical Examination.

The Bonuses divided Answelly, either in Capb, Reduction of Premium, or in addition to the sum Assured, whichever of these three ways the Assured my each year deare, after being a Policy toolder for Four Years, at which period a Bonus is psyable for the Four Years—Annually afterwards. ration funds are how peacedly sufficient to meet the decisionly expenses attending the lighting, remaining, and repaising of our streets, it is most desirable that our Corporation, as a body, representing the whold population of our city; should judiciously tree of a persons of distinction, from the States and clauwings, who this viait Montreal during the Exhibition. We would not wish to see a rection distingtion of our public monies on this occasion; but Montreal, the principal city in the British American Colonies, should at least provide, and is called upon to provide, some inment for the distinguished strangers who will be present at the Exhibition.

We cannot be expected to entertain all who come, for thousands from all parts of America will fack in to our city—but we are expected at least to entertain a few—a little discrimination will of course be required to he agercised in selecting;—but we can see no great difficulty in this respect. Thousands of pounds will be spent by the strangers here; we shall be enriched by he strangers' money, by extending the right hand of hospitality to him - let ab also secure his friend-ship and kindliest beliags, worth more to as in our present close, relationship, with the States, than the few pounds we may expend to show that we do not disregard the claims of our enterprising

In a building which is to cost so much mosely, and occupy so conspicuous a place in the safety, we aspect not only a handsome exterior, but a resevenient interior—and that, we are told, is by no means the case in the plan selected. We should like to know, in the first place, whether the decigns were submitted to any competent professional men; and, in the second place, whether the decigns were submitted to any competent professional men; and, in the second place, whether the decigns would be worth having. Perhaps some of our contemporaries can assert these questions. The Last Courts are to held their sensions in the old Gaustrament House while the new Palais de Justice is in process of erection.

These remarks we lay before the public, whose voice, when its interests are concerned, should be heard.

In another place we have copied from the Globe a paragraph with respect to the Normal School about to be erected at Toronto. From this it appears that the plan sent in by Messra. She could derive no pleasure in viewing the articles on exhibition, while constantly sancyed as sine was the moment she entered the Hall. It the managers of the Fair had taken precatitionary measures to prevent the surioyance, it would have been much more creditable to them.

From Faneail Hall Mr. Stevens conveyed his guests through Washington Street out to the Highlands, where they had a fipe view of Boston. Miss Lind slighted, and had her first walk in America, enjoying the fine prospect. The party returned by Jamaica Poud, the grounds of Mr. Chickering, Mr. Perkin's Garden, the Reservoir and Linden Place.

When the carrage strived on Prospect Hill, in Roxtury Miss Lind slighted, and w Iked for more than half a mile, in preference to riding. She seemed as free as an wireleged bird. The New Normal School.

A meeting of the Council of Public Instruction for Upper Canada, was held in this City on Monday last, to decide on the competing designs for the New Normal School. There were present, Hon. S. B. Harrison, Rev. Jahn Jennings, Rev. Mr. Grassett, Joseph C. Morrison, Esq., M. P. P., J. S. Howard, Esq., and Dr. Ryerson.

The Council have concluded a bargain with the Hon. Peter McGill, for a site for the School. It is a block of seven acres within the City limits, and bounded by Church, Gerrard, Victoria, and Gould Streets. The sum to be paid for it is £4,508, and at that price it is very cheap. Designs for the building were duly tendered for, and a large number given in. The Council pronounced conditionally on their merits, as follows:

from the Price Current as follows:

"This lot of oil was shipped from Liverpool via New Orleans, consigned to S. M. Haughton, merchant, of Cincinnall, and sold as above, for the benefit of the consigned. We predicted some was the sold of the consigned with the first of the light prices in the latter, consequent noon a deficiency of seed—but we did not sup lose that the wants of our market would nitract the attention of Liverpool merchants. This shipment, we learn, paid but a small profit. The oil cost in Liverpool about 30 cents; to this add the American duty of ten cents, and 42 cents remain to pay freight, commission, and other charges. With present prices in Liverpool, and 100 @ 110c. here, the business of shipping hither might be made profitable. This matter is only parties to all the proceeds from the select of the mines—that they retained a valuable privilege never granted to their brothers in the U.S., that'e occupying for ever the coding band, the same occupying for ever the coding band, the same had a follow, excepting on those partients sold, or that may be sold by the Government to companies or individuals—that the territory for which their brothers of the United States received so large an brothers of the United States received so Jarge an annuity was of much larger extent and of much greater value. That it was a 7ich agricultural and mineral territory, and was now covered with mines and farms and villages and eites, and that it was to be expected that they should receive a far greater annuity than themselves for the b. rren and rocky hills of Canada—that while they were permitted to restain on the lands the same as heretofore, the Indians of the United States were constantly here permeaning from mines to piece; so that 100 @ f10c. here, the business of shipping hither might be made profitable. This matter is only important in showing that higher prices than are now current cannot prevail at the West, while in England them is a fore, the Indians of the United States were constantly being removed from place to place, so that all their instruction in farming and the arts was of little advantage to them.

Nuch were same of the arguments made use of both for and against the terms of the treaty, and whether the Government has driven a niggardly bargain with their Indians in this affair, as has been urged, or whether the aborigines have received a fair compensation for this immense cession of territory, we leave to others to decide. Terrible Accident and Leas of Life.

About noon Saturday, a dreadful accident occurred at the foot of Canal street, New York. As the steamer Pacific was backing out, for her trip to Liverpool, she was struck by the tide, bringing her against the ponderous shed erected there, and tearing it down. Accounts are conflicting as to the number killed; some say three or four bodies, who were drowned, have been recovered, but the only person named is Mr. James S. Wilson, a brother of the Deputy Clerk of the Common Council, who was killed on the spot, and was dreadfully mutilated by the timers falling on him. Dr. Beach had his leg broken; H. Jones, of the Police, had his head cut open, and John Lussala is among the wounded. Mr. Foote and Fremont.
Mr. Foote directly accused Mr. Fremont of seeking and urging legislation over the gold lands of California for his own private interest and y the following from the St. John, N. B. ries, of the Zist instant:

Ship F. P. Sage, at New York, from Liverpool, while close hauled, under single rected topsells, 9th ultimo, lat. 50 24, long, 14 20, was in contact with the ship The Duke, of St. John, N. B., running before the wind. The 19 was reparently desirous of speaking the F. P. S., and, when close on her beam, put his helm a port, and attempted to cross her bow. Tise, F. P. S. had cut-water and jib-boom carried away; the British ship had quarier cut dewn, milzed-mast carried away, also, main-yard wheel and round house. The F. P. S. bot top-guilant-masts and spit main-top-sail, no date, off George's Shoal, jia a hurricane which lasted 13 hours. Next day saw a shir steering W., with loss of fore and mizen top-mains and jib-boom.—[The Duke was from Quebec, bound to Liverpool.] two soon became involved in a personal struggle and fight.

Mr. Foote's blow brought blood, and there was Mr. Foote's now brought brook, and there was much confusion. The combatants were separated by Senator Clarke.

It is currently reported this morning that more serious results will follow. Mr. Fremont, it is said, has sent a challenge to Mr. Foote,

MOFFATS Life Pills and Phenix Bitters.

These Medicines have now been before the public for a period of FIFTEEN YEARS and during that time have maintained a high character in almost every part of the globe for their extraordinary and immediate power of restoring perfect health to persons suffering under nearly every kind of their art of the globe and the suffering under nearly every kind of their suffering time and the suffering time and their suffering times.

IN MANY THOUSANDS

of certificated instances, they have even rescued after all the deceptive neutrans of the day had at-terly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a sactial blessing. So great, indeed, has their efficacy inva-nably and infallisty proved, that it has appeared nably and infained proved, that it is appeared accreely less than miracelous to these who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in parifying the springs and channels of life, and enduing them with re-newed tone and rigor, that they were indebted for

their name.

Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDI-CINES are purely and solely vegetable; and contain neither Mercury, nor Antimony, nor Arsenic, nor any other numeral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though the powerful plants, the virtues of which though the powerful plants. ong known to several ladian tribes, and recently to some eminent pharmaceutical chemists, are alto-gether unknown to the ignorant pretenders to medical science; and were never before admini-

tered in so happily efficacions a combination. The first operation is to loosen from the coats of the stornach and bowels the various impurities and cradities coustantly setting round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleause these, and leave such ice of these well informed men against the quacicleanse the kidneys and the bladder; and, by the means, the liver and lungs, the healthful action urnary organs. The blood, which have a re-color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part

of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be inial.

PILES. As a remedy for this most distressing and obstinate maledy, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this corriplaint for upwards of THEATY-FIVE YEARS; and that he tried in vain every remedy prescribed within the whole compans of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cared in a very short time, after his recovery had been vonumed not only improbable, but absolutely impossible, by any human meants.

PEVER AND AGUE. For this scourge of the western country these Medicines will be found a safe, speedy, and certain

remedy. Other medicines leave the system subject to a return of the disease—a cure by these medicines is permuneal—TRY THEM, BE SATISFIED, AND BE CURED. Bilious Pevers and Liver Complaints.
