

FRIDAY, MARCH 9, 1888. NO MONOPOLY.

The defeat of Mr. Higgins' legal profession bill is a matter of regret. It was a move in the direction of reform, and we have every reason to know was regarded as a popular measure. The provisions were not successfully imposed on the face of the house, and no good reason seems to us to have been given why it should not pass.

BRITISH COLUMBIA ABROAD.

We have received the Journal of the Society of Arts, containing the splendid paper of Agostino de Bosis on British Columbia. Historically, it is a valuable contribution, while it would seem that no detail respecting the resources of the Province had been neglected.

He had seen a good deal of Canada, but British Columbia took his fancy immensely, his journey over the Rocky Mountains and down the Pacific slope being one of the most magnificent he found on the face of the earth. The climate was very different from that on the eastern slope, the width before reaching the river ran more rapidly, and there were not the great level prairies to be found on the Atlantic side.

Mr. Neal said he had lately been to the northern portion of the coast of British Columbia towards Alaska, where there was abundance of fish, and he found the fishing industry much expanded. The difficulty the crofters would find in going there would be the distance from any market, and he did not think they would be able to do much except in the canning of salmon.

Mr. Higgins' amendment to the legal profession bill was a good one, and it is to be regretted that it was "killed." It was a more up-to-date measure than the former one, and it was a more up-to-date measure than the former one.

The Quebec resolutions formed the principal subject of Friday's debate in the Legislature of New Brunswick at the Legislature. Exception was taken to the reference in the Governor's speech to the resolutions, particularly to the transfer of the power of allowance to England.

Mr. Gravelle Smith next addressed the Society and was followed by Dr. Edmunds who said he spent his last annual holiday in British Columbia, and had very fair opportunities of judging of the healthiness of the climate, and of the prospect of any man who was worth anything at all making a comfortable home for himself there.

FISHERY CORRESPONDENCE.

The Papers Relating to the Fishery Interests Submitted and Released to the Senate. Interesting Correspondence between Secretary Bayard and Sir Charles Tupper Regarding the Proposed Extension of the Fishery Rights to the Senate.

WASHINGTON, March 8.—The Senate at six o'clock this evening released all the papers submitted to-day by the President in relation to the fishery interests between Canada and the United States. The letters of Secretary Bayard, transmitting documents by the President, and the correspondence between the two countries, are all in the possession of the Senate.

The chairman, Sir Francis Dillon Bell, K. C. M. G., C. B., said the papers were not only interesting in itself, but had been the means of eliciting a most valuable and able discussion, dealing with some of the questions which lay at the very root of the matter, and which were felt by both the old country and the new. It was only by such discussions that the real difficulties could be adequately brought out, and means suggested for overcoming them.

Mr. Secretary Bayard's letter of the 18th of March, 1887, Secretary Bayard's letter of the 18th of March, 1887, Secretary Bayard's letter of the 18th of March, 1887, Secretary Bayard's letter of the 18th of March, 1887.

EDITORIAL COMMENTS.

GREENWAY'S MISSION.

To Ottawa Brought about by Search for Peace and Unity. The Opinion is General that Disallowance is at an End.

Special to Winnipeg, Ont., March 8.—The conference arranged for between the Province and Manitoba governments, is naturally expected to result in a settlement of the long-standing dispute between the two provinces.

Mr. Greenway's mission to Ottawa is generally regarded as a success. The opinion is general that disallowance is at an end, and that the long-standing dispute between the two provinces is about to be settled.
