TUESDAY MORNING, OST. 2, 1382.

THE HON. ISAAC BUCHANAN. The Hon. Isaac Buchanan, one of the noblest men that ever lived, has gone to his account; gone at the ripe old age of 74. The soul of honor, and the essense of generosity, his genial manner and open hand have cheered many a drooping spirit and them being a rejected applicant for admishelped on many a worthy cause. As a sion to University college here. We believe politician he was always honest, if some- we are correct in saying that every times mistaken; in commercial economy, he member of the staff of Queens cordially apmay be said to have been the father of Canadian protection. As a currency reformer, he denounced the present bank is uses as tain the go ahead, practical, liberal and eninjurious to the public. If he was often wrong in his conclusions, he was always right in his aims; and years ago University college, London, the his public utterances were never directed to prototype of its namesake here, took a new the furtherance of his own interests. When he advocated protection to native industries, he did so in opposition to his own interests, as an importer. He had one unfilled ambition-he desired to, become a senatorwhich fate witheld from him. This was the weakness of a generous mind, which may well be overlooked in so noble a nature.

During the lifetime of more than one generation Mr. Buchannan was extensively engaged in mercantile pursuits, the turnover of his firm being counted by millions. When the Great Western railway was built he made large profits by supplying it with iron. He afterwards staked a large sum in getting control of the Woodstock and Lake Erie railway, and though he got the control, he lost his money. This was the beginning of the financial weakening f of his firm, which afterwards went through more than oue disastrous experience. Finally the business was wound up, and Mr. Buchanan was a ruined man. But he rose superior to misfortune, and the integrity of his soul remained untarnished. That beautiful home of his on "che mountain," at Hamilton, was deserted, and in a few years fell into decay; the fine grounds, covering nine acres, from a paradise became a waste. It

has visited Hamilton, to see the wealthiest of its inhabitants content to broil under the brow of the "mountain," when any one of them might have purchased what remained of the magnificent Buchanan homestead for a song-a homestead situated on a fine elevation and s vept by the free and pure breezes of the country. It seemed as if they were willing to grovel where he had soared.

has been a surprise to every stranger who

Canada has seen few such men as Isaac Breanhan, as he was familiarly called; and it will in future see but few such. As a business man he developed serious defects, but they were all on the generous side. He would not press a debtor whom he beheved to be honest, and he piled up a mass of assets on which very little could be realized. With all his exertions, he did not accomplish much except the impression which he produced in-favor of pretection to home industries. His Industrial Politics of America produced n currency underwent changes in the natural course of development; but as a writer on the subject he will never be looked upon as an authority. But his aims were honest; and his memory will bear a sweet savor a so long as men are able to recall it.

Some years ago the University of Toronfo necessary ability and means can go n to her degree, and can compete by the way on the fairest possible terms for the honors and rewards flered by the university. This is as it should be, and the university in adopt ing this liberal policy has been fully endorsed by pub ic opinion,

We would like to be able to say as much for University college. As that is the only teaching institution in the province which prepares students for passing the young ladies who are undergradu test of the university, should seek to avail tuenselves pour sa defence. "Mon Dieu, non, M. le president," repon dit il, "seulement, jesthe currenter. The eyears ago one applied for admission, and was refused. Two years ago two or three applied, and they were refused. This year no fewer than five have applied, and the door of the college is still, shut in their faces. The college is still, shut in their faces. The culpric was about to be sentenced to death. The judge asked him if the responsibility of denying admission to certain persons, not on account of bad moral "only I have that on the said;" only I have that on the said; certain persons, act on account of bad moral character, or want of scholastic prepara-phan." And now, sir, after the late atrotion, but simply because they happen to be cross at empt. to kill the rights of the prowomen. And this in the last quarter of vince which was his political mother, are we the nineteenth certury and in a province

We might cite in reply dez no of better authorities in the United States and England, for President Eliot has had no experience of the mixed system and knows nothing about its working. We prefer, however, to content ourselves just now with a reference to what is taking place in two institutions, Queen's college ia Kingston and University college in London, England. The former has admitted ladies as students for two years past, one of result of practical experience; we are certhusiastic principal, Dr. Grant, does, as all who know him will readily believe. Two departure by admitting to its classes a young lady, the favorite private pupil of one of its scientific professors. Of course the privilege cannot now be refused to any other lady with the necessary academical qualifications and a good moral charact r. The council of University college, Toronto, may as well yield gracefully now and forestall an application to the courts and to the legislature.

It is satisfactory to know that in the mat ter of fast trains we can beat our enterprising neighbors to the south. The Canada Atlantic runs, between Cotean and Ottawa, the fast at train in America, the distance, 78 4 miles, being made in one hour and thirty-four minutes. This represents a speed of fifty miles an hour, or allowing for two stops, fifty-two miles an hour. During one portion of the journey the speed is sixty miles. To give those who are familiar with Rubber Hose and Belting an idea of the capacity of our works, we may say that we can produce ten thousand feet of three-quarter inch three-ply Hose in one day; also nine thousand feet of six-inch four-ply Belting, and do this without materially interfering with our regular production.

Our machinery is of the best, and embraces all the latest improvements adapted to our business. We mention a number of the largest and most expensive pieces: 2 Steam Engines, 250 H. P. each; 7 Steam Boilers, 75 H. P. each; 8 Calenders or Spreading Machines: 33 Grinding Mills; 8 Hydraulic Presses, the largest weighing 86.000 lbs; 14 Screw Presses, the largest weighing 50,000 lbs; 11 Steam Heaters, for Curing Hose and Belting; 2 Belt Calenders; 1 Cutting Engine; 1 Winding Machine; 1 Measuring Machine; 2 Electric Light Machines.

This Company stamps its name on all its Goods. Do not purchase Hose that is unstamped. It is a common thing for makers to turn out slip-shod cheap wares and Disguise the source from whence they came by sending out the stuff unstamped. It will pay you to call and see our Immense Stock. We have the Largest and Best Equipped Rubber Fuctory in the World for the Manufacture of Vulcanized India Rubber Goods.

Our trade here has increased to such an enormous extent that in order to keep up with the demand we have purchased from Major Gray. M.P.P., Parkdale, the plot of ground situated on West Lodge avenue adjoining the Credit Valley. Grand Trunk, Toronto. Grey and Bruce, and Northern Railways, for the purpose of erecting thereon a Branch Rubber Factory. Works to be in full operation or or about June 1 1864.

Correspondence solicited and accorded same consideration, and buyers quoted same prices, as if personally present.

THE TORONTO WORLD TUESDAY MORNING, OCT. 2, 1883. "Nasal Respiration," We should always breathe through the nostrils and not by the mouth, as the latter tends to weaken the lungs and produce in-flamation of the throat and bronchial tubes. If you have already contracted any disease of the respiratory tract such as laryogitis,

bronchitis, catarrh, asfima, consumption or catarrhal deafness which is produced by catarrh, you should at once consult the sur-geous of the International Throat and Lung Lungham and Consult of these diseases and who use the spirometer invented by Dr. M. Souvielle of Paris, ex-aide surgeon of the French army, the only in-strument by which medicated air can be conveyed to the lungs through the nasal passages and without the aid of heat. Hundreds suffering from diseases of the lungs and throat are being cured monthly by these surgeons, who without the aid of this new and wonderful instrument the spirome-

ter would certainly die.

This great institution which is daily increasing its magnitude now has 18 physicians and surgeons connected therewith and offices in London, Eng., Montreal, P. Q., Toronto, Ont., Detroit, Mich., and Winnipeg, Man. ter would certainly die.

Physicians and sufferers are invited to try the instruments at the office free of charge. Persons unable to visit the institute can be successfully treated by letter addressed to the International Throat and Lung Insti-tute, 13 Philips' square, Montreal, or 173 Church street, Toronto, where French and

English specialists are in charge.

The Bear Stories Begin. A correspondent sends us the following from Millbridge : "Mr. James N. Ciarke of Millbridge shot a bear last Sunday which was one of the largest ever killed in this place. His body was six feet long, and he tip of nose to top of forehead, three-feet for inches around the body, and weighed 308 pounds without the entrails. He was it the act of killing a coming three year old heifer when Mr. Clarke shot him The heifer was so badly hurt—having both shoullers broken—she had to be killed."

From the Weekly (Toronto) Mail, Au₁, 2½,
Perhaps the most extraordinary success that has
seen achieved in modern medicine has been attained
by the Dixon treatment for Catarth. Out of two
housand patients treated during the past six
ouths fully innety per cent have been cured of
his stubborn malady. This is none the less startting when it is remembered that not five per cent or
attents presenting themselves to the regular practioner are benefited, while the patent medicines
and other advertised cures never record a cure at
di. Starting with the claim now generally believed
by the most scientific men that the disease is due to
he presence of living parasites in the tissue, Mr.
Dixon at once adapted his cure to their exterminaaon—this accomplished, he claims the externinacon—this accomplished, he claims the externinacon—this accomplished, he claims the Catarrh-A New Treatment xon at once adapted his cure to their extermina sm—this accomplished, he claims the externt is actically cured and the permanency is unques mod, as curse effected by hint two years ago arres still. No one elge has ever attempted to cur tarrh in this manner, and no other treatment have cured catarrh. The application of the remed simple and can be done at home, and the presension of the year is most favorable for a speed d permanent cure, the majority of cases bein red at one treatment.
