THE

Canadian Agriculturist,

AND

JOURNAL OF THE BOARD OF AGRICULTURE

OF UPPER CANADA.

VOL. IX.

TORONTO, JUNE, 1858.

No. 6.

HARVEST PROSPECTS.

The accounts, both public and private, which have reached us respecting the state of the crops are, as usual, somewhat conflicting. Information of this kind is often the result of very united observation, and there is generally more or less a tendency in individual minds, as well as in the current of public opinion, to exaggerate either an evil or a good that may assume a characteristic form. Some accounts appear to assume that the wheat crop of Canada is generally promising, and at least an average; while others—and we are very sorry to say that these are by far the most numerous—would almost lead one to expect that our prospects are of the most gloomy description, and that the hopes of the husbandman are in a great measure doomed to disappointment. From all we can learn from a collation of numerous letters and reports, we are inclined to believe that the result will come out between these extremes, and nearer, we have reason to hope, the favourable point than the opposite. That our wheat crop will reach the full average of a number of years, is more than can be expected, when proper allowance is made for the positive injury that has already been too certainly ascertained to exist in a large number of localities, over a considerable area of the Province. The destructive effects of the midge are being most disastrously felt this season in various sections of the country, where this ipsiduous evil has hitherto been almost, if not entirely, unknown. Its progress westward is not only constant, but from late and present appearances, would seem to be more rapid than formerly. Much has been said and written upon this subject, which, notwithstanding, yet remains in a painful degree of obscurity; particularly in reference to practical preventives. However, investigations must be vigilantly pursued, deductions carefully drawn, and more light and control will assuredly be imparted in reference to this distructive pest. In our own columns we hope shortly to be able to insert additional information, derived from careful observations and extended experience, on this and other insects injur ous to farm

orops. The rust, too, has been recently and rapidly developed to a very injurious extent in some localities. This will probably be found the case at a distance from the frontier; the midge being principally confined to the older townships. In some parts of the country, particularly in low and moist situations, wheat has suffered severely from rust, but we hope this evil has not spread over extensive areas. Spring grain is generally promising, and the hay crop in most sections has been abundant, and upon the whole secured in excellent condition. Potatoes and maize were much injured on wet lands by the unusual quantity of rain that fell during May and the early part of June. On dry well tilled lands potatoes are looking well, and we have not heard, as yet, any well authenticated instances of disease. Live stock, having in general a good supply of food, are doing well.

The accounts of the crops in the United States are, as might be expected, varied; but it is sufficiently obvious that the wheat has suffered in different parts of the union from similar causes which have affected the same crop on this side; and it is doubtful whether the usual average will be obtained. In Britain and the grain growing countries of Europe generally, the prospect, according to the last reports, continues highly encouraging. Much, of course, will depend upon the state of the weather during the month of August; if the skies prove propitions the yield in Europe will be large, and prices consequently moderate.

TRIAL OF MOWING AND REAPING MACHINES.

The practical trial of mowing machines intended for competition at the Provincial Exhibition this Autumn, took place on the 7th July, on the farm of Col. E. W. Thomson, Dundas street, near Toronto. There were 11 competitors and 14 machines entered. The following are the names of the competitors:

R. & R. S. Patterson, Belleville, combined machine.

Chauncey Yale, St. Catherines, one combined and one single machine.

Darling & Aitchinson, Vaughan, single machine.

Haggart & Bros., Brampton, single machine.

Ira S. Leflar, Streetsville, " "

Bell & Lawrason, St. George, "

John Watson, Ayr,
Lutz, Cook & Co., Galt, combined

H. A. Massey, Newcastle, two combined machines.

Billington & Forsyth, Dundas, single "

Patterson & Bros., Richmond Hill, one single and one combined machine.

Of these manufacturers all had their machines upon the ground except Messrs Bell & Lawrason, who were detained beyond the time by the railroad train; of the rest one or two, from their machinery getting out of order or some other cause, retired from the contest after coming upon the ground. The weather was very propitious for the occasion, and there was a large number of visitors, all of whom seemed to take the greatest interest in the exhibition. The first field in which the machines were set to work was of heavy clover and much

laid; so that it was difficult for the machines to operate well; but in the second field, in which the machines were tested by the dynamometer, the crop was well mixed with timothy and stood up well; and in this field all the machines tested performed as well as could be desired, rendering it, no doubt, rather a difficult matter for the judges to decide between them.

The trial of reaping machines took place on Thursday, 22nd July, on the property of P. Howland, Esq., Dundas street, near the Humber. The weather was very favourable, and the wheat in excellent condition for the trial, sufficiently heavy and generally standing well up, with an occasional laid spot to test how the machines could get ever such places. The following named competitors appeared upon the ground:

John Watson, Ayr, single reaper.
Patterson, Bros, Richmond Hill, single reaper.
H. A. Massey, Newcastle, combined machine.
R. & R. S. Patterson, Belleville, combined machine.
Haggart & Bros., Brampton, single machine.
Bell & Lawrason, St. George, single machine.
Ira S. Leflar, Streetsville, single machine.
Johnson & Bros., Meadowvale, single machine,

The quantity cut by each machine was nearly 13 acres, and the time occupied from 55 to 61 minutes. The machines were afterwards tested singly by the dynamometer. The cutting of nearly all was highly satisfactory. There was, as at the mowing trial, a large number of interested spectators. The Judges at both trials were Messrs. Christie, Campbell, Bell, McKellar, McDougall, M. P. P.'s, and Messrs. John Dew and E. D. Norton, of Toronto, all of whom gave the fullest attention to the arduous task imposed upon them, so as to enalle them to form a correct and impartial judgment. They are to give in their report at the Provincial Exhibition.

THE CRYSTAL PALACE.

The foundation stone of this building, now in course of erection on the garrison common, Toronto, for the use of the Provincial Exhibition this Autumn, was laid on the 15th July, by the Hon. Mr. Vankoughnet, Minister of Agriculture, assisted by E. W. Thomson, Esq., President of the Board of Agriculture, and W. B. Jarvis, Esq., President of the Board of Arts and Manufactures. There was a large concourse of spectators, including nearly all the members of both branches of the legislature. A report of the addresses on the occasion will appear in the *Transactions*.

The building is now in a forward state, and will be finished by the energetic contractors, Messrs. Smith, Burke & Co., some days before the time required by terms of the contract.

THOROUGH BRED CATTLE.

A correspondent requests us to give some information about the registering of the pedigrees of thorough bred cattle. It is one of the rules of the Provincial Association that no animal will be allowed to compete in the pure bred classes unless the pedigree be first satisfactorily established. A registry is kept in the office of the Board of Agriculture for the purpose of recording such pedigrees, with the view of publishing a Canadian Herd Book when the number registered shall be sufficient; and the duties of the officers of the association will be much facilitated at a juncture when there is a great pressure of work, and the economy of time is consequently important, viz: at the period of receiving entries for the exhibition, if persons intending to exhibit thorough bred animals send the pedigrees for registration at an early date. Pedigrees should be made out as fully, but at the same time as clearly and distinctly as possible, giving the name, age, and colour of the animal, the name and residence of the breeder, and then the breeding of the animal. Give first the name of the sire; if he is a herd book animal no further account of him is necessary than the figure of reference; if he is not a herd book animal, his pedigree must be clearly traced (and this will be more conveniently done in a foot note) back to the herd book on the side of both sire and dam; after the name of the sire give that of the dam and of her sire, then of the grand dam and her sire, and so on; always tracing back directly through the female side. There is no charge for registering, but if a certificate is desired a fee of half a dollar will be charged for each. The following example from "Coates' English Short Horned Herd Book," will serve those not already familiar with the subject, as a guide to the manner in which pedigrees should be made out:-

MASTER BUTTERFLY, [13311].

Roan, calved July 14th, 1853, bred by and the property of Mr. Towneley, Towneley Park, Burnley;

got by Frederick (11489),

dam (Butterfly) by Jeweller (10354),

g. dam (Buttercup) by Garrick (3863), gr. g. dam (Barmpton Rose) by Expectation (1988),

gr. gr. g. dam by Belzoni (1709),

gr. gr. gr. g. dam by Comus (1861), gr. gr. gr. gr. g. dam by Denton (198).

It must be understood distinctly that "Butterfly" is the dam of "Master Butterfly," and not of "Frederick" (11489), and that "Buttercup" is the dam of "Butterfly." Many persons commit the error of going from the name of the sire to that of his dam, instead of to that of the dam of the animal to be recorded. In cases where it is necessary to distinguish, the letter E. H. B. should be added to the figures of reference to denote the English Herd Book, A. H. B. the American Herd Book, and U. C. S. R. the Upper Canada Stock Register.

THE WHEAT FLY, MIDGE, &c.

The following communication on the subject of the Wheat Fly, has been forwarded to us by an esteemed contributor, with the view of having the suggestions contained in it, brought prominently before the attention of the farmers of Canada. We commend the subject most earnestly to the consideration of our readers, and that of all occupiers

of land. The suggestions below, if rigidly and universally acted upon, would perhaps not be so successful as to exterminate the fly entirely and at once, but there can hardly be a doubt, that they would be the means of checking its progress so far as to prevent it doing very material mischief, till in course of time, it should entirely disappear. It will be perceived that the writer agrees, in his practical suggestions, with the Rev. Mr. Hill, in his essay, concluded in the present issue:-

THE WHEAT FLY.

"Now is the time to destroy the midge, weevil and wheat fly, if we intend to pre-

vent the devastation of this year increasing tenfold at the next harvest.

All those classes of wheat fly which attack the wheat in the ear, are now in the state of the worm and chrysalis, and are on the ground in the fields where the wheat was grown, and in the barns where the crop is housed.

Sift out the worms from the wheat as you thresh and clean it, and burn them with all

Plough your wheat stubbles with the double American plough or with two ploughs following one another, so as effectually to bury all the stubble and the present surface

You thus bury and destroy all the worms which are now on the ground; they have

no legs and cannot get through more than an inch or two of soil.

The ground must not be ploughed again till next fall, but only cultivated on the surface, or you will bring the worms up again and they will come forth as flies.

Never mind losing the clover and grass which have been sown amongst the wheat. The clover and grass in the stubble field is the nursery of the next year's fly.

We recommend the above to the attention of all farmers, and also to Editors of all papers published in Canada."

Toronto, July 29th, 1958.

THE PROVINCIAL EXHIBITION—CIRCULAR.

To the Presidents and Directors of the respective Agricultural and Horticultural Societies, Mechanics' Institutes, and to the Public generally.

GENTLEMEN, -As the time for holding the Annual Provincial Exhibition at Toronto, on the 28th, 29th and 30th of September, and 1st of October, is now approaching, at the desire of our worthy President, D. B. Stevenson, Esquire, (whose present ill-health, I regret, prevents him from issuing the usual annual circular,) I beg leave respectfully to request your co-operation and assistance, in endeavouring to make the coming show, not only equally attractive and beneficial to the whole community with those of previous years, but also an honour to the people of Canada.

The steady progress of Agricultural Science, Arts and Manufactures, and the consequent improvement in the commerce of the country-although lately temporarily retaided-must be apparent to all; and it must also be pleasing to anticipate, through increased means placed at the disposal of the Board of Agriculture, that a further advancement in the welfare of the Province may be confidently looked for.

The continued prosperity of the Provincial Agricultural Association, does not depend so much for support upon its financial resources, as upon the cordial assistance of the various County Agricultural, Horticultural, and other Societies of like character; which support it has a right to expect, considering that the society was originally established for the promotion of the good cause in which they are all respectively engaged. It is, therefore, for the best interests of those societies and the public generally, that their united efforts should be employed in aiding the members of the Board of Agriculture to carry out the contemplated and varied improvements for which they are zealously striving.

To the encouragement afforded by a liberal premium list, and to the past excellent management of the Board of Agriculture, may be ascribed, in a great measure, the success which has heretofore attended the working of the Agricultural Association; and it is our duty, as well as our interest, to encourage and assist by every means at our disposal all those who may be willing to contribute to the ensuing Exhibition at Toronto, such specimens of their industry, skill or art, either as competitors or exhibitors, as may have a tendency to promote the cause of Agriculture, Arts and Manufactures in all their varied branches, and the general interests of the country. And it is hoped that, on that occasion, that very interesting portion of the Exhibition containing the Ladies' Department and the Fine Arts, will, as usual, command the attraction and admiration of the tens of thousands of visitors that may be expected there.

In addition to the honors secured-by successful competition, this year's increased premium list, as will be seen by examining the printed lists, now in circulation, offers greater inducements than any of previous years; particularly in the Mechanical and Manufacturing Departments, with the view to bringing those interests more prominently before the public.

As a proof of the success resulting from the encouragement afforded to Mechanical genius, it was gratifying to witness the achievement obtained in the improved Mowing and Reaping Implements, when testing their working powers as labor saving machines, at the recent trials which took place near Toronto. These trials, both in grass and grain, have proved most conclusively that the time is not far distant when these machines will be as necessary adjuncts to the farm, as that important implement, the plough, itself.

The difficulties in some instances heretofore experienced by exhibitors and others, through the want of waterproof buildings and suitable space in which to exhibit the finer articles of Manufactures, the productions of the Ladies' Handiwork, and the Fine Arts, &c., will happily be obviated at the coming show, as Toronto and its neighborhood, with an enterprize worthy of its people, have now in course of construction, and at a very considerable cost, a magnificent structure composed principally of iron and glass, to be perfectly water proof, and suitable for all the requirements of that or any similar exhibition which may be holden there; so that those engaged in the finer branches of manufacture, or the more costly productions of art for the exhibition, have a perfect guarantee for security and protection to their articles. This edifice, when completed, which will be before the holding of the show—will not only be a credit to Toronto but the Province at large; and possess an attraction, from its novelty and beauty of structure, as well as its richly filled courts during the time of the Exhibition, rarely to be seen in this country.

A. difficulty and much inconvenience in obtaining accommodation have been experienced at some of the places where the Provincial Exhibitions have heretofore been held, so that many persons have been thereby deterred from visiting these great expositions of Canadian Industry and Arts, Toronto, from its magnitude and ample accommodation, affords sufficient assurance that nothing need be feared on that account In addition to the private enterprize of the citizens, in seeing that the public are properly provided for, we have the guarantee of an excellent committee of management, and the immediate surveillance of the members of the Board of Agriculture, to warrent

that ample provision will be made for accommodating all visitors and exhibitors, with their animals and articles, at fair and reasonable charges.

Through the liberality of the large steamboat owners, I am authorized to state for the information of the public, that the usual reduced rate of fare, only, will be charged during the show week; and there is little doubt of a like liberal course being adopted by "he enterprising managers of the railroads throughout the country.

I have the honour to be, gentlemen,

Your obedient servant,

Kingston, July 29th, 1858.

WILLIAM FERGUSON.

1st Vice President, Agricultural Association.

MARKHAM PLOUGHING MATCH.—On Tuesday last was held in this place the Ploughing Match of the season. Never before in Canada has there been brought together to test their skill, side by side, so many first class ploughmen as we saw together on this occasion. Canadians and Scotchmen, "Englishmen and Yorkshiremen,"—the comparatively youthful as well as the veteran, all alike true knights of the ploughshare—contended manfully for the prizes. The field selected was on the farm of Captain Armstrong, and of a heavy clay, some rather wet, some broken and rolling, while a considerable portion of the field was very good. We believe every competitor was what is styled a "crack ploughman," and had, in his time, carried off premiums at smaller matches.

The day was as pleasant as was ever experienced under a pure Canadian atmosphere, the sun shone brilliantly, and it was just warm enough to be agreeable. Precisely at fifteen minutes past ten o'clock, the Union Jack was hoisted, and the ploughs started, and continued their work steadily until 2 p. m.; some,

whose lands were larger than others, were allowed a proportionate extra time to finish their work.

JUDGES: Messrs. Alex. Gibb, York; Thomas Aunan, Pickering; George Evans, Scarboro'; Walter Dalzel, Vaughan; James Clark, Markham.

Successful Competitors:—Dougald McLean, 1st Prize, Iron Plough, \$40; Archibald Shaw, 2nd do., \$25; Duncan McLean, 3rd do., \$20; William Hood, 4th do., \$15; Matthew McDennie, 5th do., \$10; John H. Sylvester, 6th do., 38; James McLean, 7th do., \$7; John Bushby, 8th do., \$6; James Weir, 9th do., \$5; Simpson Rennie 10th do., \$4. Total \$140.—From the Markham Economist, April 29th.

ALDERNEYS FOR KENTUCKY.—The Homestead states that John A. Taintor, of Hartford, recently shipped five head of Alderneys-four heifers and a bullto Hon. Jas. B. Clay, of "Ashland," and adds: "Finer animals of their race we have never had the pleasure of seeing." The Alderneys are superior for the dairy, and are gradually being introduced throughout the country.

DREADFUL FIRE IN SAGUENAY DISTRICT .- A dreadful fire caused by the clearing of lands has occured in the County of Chicoutimi, and has been carried by a strong wind springing up at the time, over the greater part of nine townships in the County, consuming all before it, and rendering desolate and houseless over 150 families, equal to 700 souls. By this calamity, it is said, that more than \$100,000 worth of property has been destroyed, besides an immense amount of fencing, with several costly bridges. More than a third of the seed sown this spring has also been destroyed, which will be very severely felt by the settlers, owing to their inability to procure seed and re-sow so late in the season. The residents of the county have come forward most liberally to relieve and assist the unfortunate sufferers, but the means of giving help in a new settlement of the kind, are necessarily inadequate to the absolute wants of the poor tlement of the kind, are necessarily inadequate to the absolute wants of the poor sufferers.

THIRTEENTH EXHIBITION OF THE

PROVINCIAL AGRICULTURAL ASSOCIATION,

TO BE HELD AT TORONTO,

On Tuesday, Wednesday, Thursday, and Friday, September 28, 29, 30, and October 1, 1858.

RULES AND REGULATIONS.

- "The Members of the Agricultural Societies of the several Townships within the County or Electoral Division or United Counties wherein the Annual Exhibition may be held, and the members of the said County or Electoral Division Society, shall be also members of the Association for that year, and have badges accordingly: provided the Agricultural Societies of the said Townships, or the Societies of the said Townships, or the Societies of the said County or Electoral Division or United Counties, shall devote their whole funds for the year, including the Government Grant, in the aid of the Association. The Office bearers of all County Societies shall have badges of free entrance during the Show.—By-law."
- 1. The payment of \$1 and upwards constitutes a person a member of the Agricultural Association of Upper Canada for one year; and \$10 for life, when given for that specific object, and not as a contribution to the local funds.
- 2. No one but a member will be allowed to compete for prizes except in classes xxi, xxix, xxxv, xxxvii.
- 3. All Entries must be made on printed forms, which may be obtained of the Secretaries of Agricultural Societies, or of Mechanics' Institutes, free of charge. These forms are to be filled up and signed by the exhibitor, enclosing a dollar for membership, and sent to the Secretary of the Association, Board of Agriculture, Toronto, on on Before Saturday, September 12, after which no entries can be taken except in the Horticultural and Ladies' Departments and Foreign classes.

Exhibitors in these Departments may enter articles up to Monday Evening, September 27, when the Books will be finally closed.

4. Blood Horses and Thorough-bred Cattle must be entered, and have their full pedigrees properly attested and sent to the Secretary in Toronto, not later than Saturday, September 11th. No animals will be allowed to compete as pure bred, unless they possess regular Stud and Herd Book pedigrees, or satisfactory evidence be produced that they are directly descended from such stock. All animals entered in the Stock Register, kept by the Board, will, be allowed to compete without further enquiry.

- 5. Badges from the Treasurer's Office will be furnished each member, which will admit himself only, free to every department of the Exhibition, during the Show. Life member admitted free.
- 6. Tickets of admission to those who are not members, 25 cents each time of admission Children under 14 years of age, half-price Carriages, including drivers, \$1; passenger to pay 25 cents each. Horsemen to pay 30 cents each admission.
- 7. Every article, other than live stock, exhibited for competition must be the growth, produce, or manufacture of Canada, except in class xxix. Live Stock, except in class xximust be the bona fide property of porsons residing in Canada, and must be exhibited in the name of the owner only. All premiums for articles, except Stock, are to be awarded to the manufacturers or producers only. To all Manufactured Articles, the Manufacturer's retail cash price shall be affixed, and to othe Articles, the price at which they can be supplied to purchasers.
- 8. Articles for Exhibition must be on the grounds on Monday, except live stock, which must be there not later than Tuesday at noon
- Discretionary Premiums will be awarded for such articles as may be considered worth by the Judges, although not enumerated in the List, and the Directors will determine the amount of premium.
- In the absence of competition in any defined the Classes, or if the Stock or articles exhibited be of inferior quality, the Judges will exercise their discretion as to the value of the premiums they recommend.
- 10. The Judges, Competitors, and Officers of the Association only will be permitted to enter the Show Grounds, until 12 o'clock, on Tuesday, at which hour Members will be admitted Non-Members will be admitted on Wednesday, at noon, and on Thursday and Friday morning after 8 o'clock.
- 11. No articles or Stock exhibited will be allowed to be removed from the grounds, till the awards are made. without the permission of the President, under the penalty of losing the premiums. An Auctioneer will be on the

of business.

- 12. Delegates, Judges and Members of the I'ress are requested and expected to report themselves at the Secretary's Office, immeliately on their arrival.
- 13. The Judges are to meet at the Secretary's Office on the Grounds, on Tuesday, at ! noon, to make arrangements for entering upon heir duties.
- 14. The Annual meeting of the Directors of . the Association, will take place on the grounds n Friday morning at 10 o'clock.
- 15. While the Directors will take every possible precaution, under the circumstances, to ensure the safety of articles sent to the exhibition, yet they wish it to be distinctly understood that the owners of the articles must themselves take the risk of exhibiting them; and that should any article be accidentally injured. bet or stolen, the Directors will give all the

ground after the premiums are announced, assistance in their power towards the recovery and every facility afforded for the transaction of the same, but will not make any payment for the value thereof.

> 16. The Treasurer will be prepared to commence paying the premiums on Saturday, 2nd October, at 9 a.m., and parties who shall have prizes awarded them are particularly requested to apply for them before leaving Toronto, or leave a written order with some person to receive them, stating the articles for which prizes are claimed.

> The Local Committee will make arrange ments with Steamboat and Railroad proprietor. for carrying articles and passengers at reduced

N. B .- In case the Directors shall require any particular information in reference to animals or articles taking first prizes, the owners will be expected to transmit it, when requested to do so.

Hay will be provided by the Association for the Horses, Cattle, and Sheep exhibited.

The Judges shall ascertain, in deciding on ; bull calves in any of the foregoing classes, whether the animal has been suckled or raised by pail, and make allowances accordingly. The exact age of young animals must be stated on the cards, and will be taken into consideration by the judges in making their awards; and any person understating the age of an animal will forfeit the premium to which he might otherwise be entitled.

breeding of animals in class ix.

Young cattle may compete, if the exhibitor think fit, in an older class than to which they properly belong, except in the case of 4 years old bulls, which will not be allowed to compete in the five year old class; but no animal will be allowed to compete in more than one of the foregoing sections.

An animal will not be allowed to compete as a 3 years old cow unless it has had a calf; but a two years old having had a calf will be allowed to compete as a two year old heifer, if the owner thinks fit.

Prizes will be awarded to animals of other breeds than those above mentioned, if deemed worthy.

The Essays will be expected to give an account of the existing Manufactures in Upper Science to the Canadian Farmer, \$60; second Suggestion 6 and their state of prosperity, with

No Prizes will be awarded unless the Essay:

W. EDWARDS. Secretary B. A. & J.

Prince Edwards Island.—The guarantee by the British Government of a loan of £100,000 to this Colony, at a rate of interest not exceeding 4 per cent. per annum, is hailed as a great boon, as it will enable the local government to purchase the fee simple of a large quantity of land held by absent proprietors, and thus open it to actual settlers. In 1767 the greater portion of the Island was disposed of by lottery, the tickets being distributed among officers of the Army and Navy, who had served in the preceding war, and other nersons who had claims upon the Imperial Government. The land was granted upon certain conditions. The proprietors were obliged to introduce one settler for every 100 acres, and to pay a quit rent varying from 2s. to 2s. 6d. per annum. The terms, however, were never enforced, and in 1830 the quit rent was abandoned altogether, and a land tax substituted. It was found that the large tracts held by nonresidents shut up the Island to actual settlers, and retarded its prosperity. The object of the loan is to buy back the laud and dispose of it in small lots for settlement.—Halifax Paper.
