Alberta's Growth

EDMONTON, Feb. 22.--Bleven new villages, five new towns, and fifty-five rural municipalities were established in the province of Alberta dur-ing 1912. When the province was in-augurated there were two chartered cities, fifteen towns and thirteen villages in Al-berta. At the close of last year there were five chartered cities, 44 towns, and 73 vil-lages, in addition to the 55 rural municipalities organized under the new act. under the new act.

Thirty-Year-Old Infant

Freak Party Craze Reaches Lon-

LONDON, Feb. 22 .- The freak York itself never devised anything stranger than the "Baby Party" held in the residence of Edward Storer at Bayswater last night. A score of ar-

assembled in a room labeled "The Nursery," which was filled with toys, rocking horses, dolls, Teddy bears, Wires Spat Fire.

ing, and wall day morning, and working was pain-ful and perilous. Accident policies and rubber heels did not save some people from humbs and bruises. Many nervous navigators of the pavements abruptly obeyed the laws of gravity. Most of these injuries were more an noying than serious. Dignity suffered not the laws of gravity.

noying than serious. Dignity suffered more than anatomy. But at least one leg was broken, and several people were stunned by hard falls. The dity horseshoers and the people who put on rubber heels while you wait did a good business. The street cleaning department had men on the job scattering sand on the principal streets. The citizens attend ed to their particular sections of side-walk with salt, sawdust, and ashes Before this was done there was mint a tumble. Horses not provided with non-skids in the shape of hoofchains or sharp-ened "corks" had an uncomfortable time, and milk deliveries were de-layed. The street car hervice was horses of courses were de-layed. The street car hervice was times at a solut and the form door when a polleeman dissolved his fright and assured him that his cash was in no danger. Zaidin then trundled back when a polleeman dissolved his fright and assured him that his cash was in no danger. Zaidin then trundled back with his register. The building is owned by the To-moto General Trusts, and is damaged to the extent of \$500. Kamin had only \$1600 insurance on his stock, and estimates and fasoline which was stand allon can of gasoline which was stand the fire was thickest, had gone thru the battle without exploiding. The fire caused some stir among the shad Queen, and tied up the street car traffic on Queen street for about half in hour.

of Chippendale design. Among the various Grands bearing the name of "Ye Olde Firme" this is one of the most beautiful-in the opinion of some the most beautiful of all.

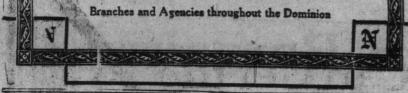

Thomas Chippendale was a furniture maker of Worcestershire, England, who lived in the reign of George I. Most of Chippendale's work was of the inlaid sort-lines elaborate and chippendale's work was of the initial soft-lines elaborate and delicate, though somewhat overwrought. His work reflected the culture of his age, and his genius in his particular line was fully recognized in his time. The Chippendale Art Piano of Ye Olde Firme conforms in every detail to the laws of form laid down by the old cabinet maker of Worcestershire

Mr. F. B. Robins on the Enormous Increase in Population of Toronto.

In an interview with The Lond nancial News recently, Mr. F. B. obins, president of Robins, Limited spoke of the great possibilities of Canada.

With a poplation not exceeding that of the whole of London, the oductive results of Canada and ner industrial prosperity must," he emarked, "be regarded as marvelous. It is well to remember that a country which is 3500 miles by 1400, in area, which is attracting settlers from east to west, requires imnense capital to assist in its develop-

Then east to west, requires immense capital to assist in its development. Canada's railway interests are growing at a relatively faster rate than nose of any country in the world. But those familiar with the resurces of the Dominion know that its progress of railway construction is necessary in order that the farmer may have facilities for the removal of his products."
Mr. Houtas then dealt with the need of money to provide improvements would be so provide improvements would be so whether is nearly 450,000, has increased by more than 100,000 in the last four years, and its rate of progress is now between 30,000 and 40,000 annually. Visitors for the first time coming from the old country are instanded not only by the commercial with the solves, and, speaking from experiments who invest most are those who visit the country. This has certaily be not into a solves who invest most are those who visit the country. This has certaily be in the case with those who visit the country. This has certail we be the counter with the commercial activity by the commercial activity by the commercial activity is infering very much from the last of the districts are arising, and for houses which may be described as of the indication of the further equirements of the further equirements of the indice class vith those who visit for further is under the case which there is an ever-indication of the further equirements of the indice class is the counter the districts are arising, and for houses which may be described as of the indice class the further equirements of the properties of the further equirements of the indice in the further equirements of the provements. But the dity of the curve requirements of the provements.

diture of nearly \$13,000,000 for im-provements. "There has been a remarkable ad-vance in the prices of business pro-perties, and land in and around the city. Sites in the business part of Toronto have doubled and trebled in value in a few years. Shortly bef.re I left I closed a sale of business premises, owned by the im-perial Lank of Canada, with a frontage of 30 ft. by a depth of 100 ft, at \$10,000 per foot front, ar \$300,000 for the site and the shop standing upon it. It is also perhaps

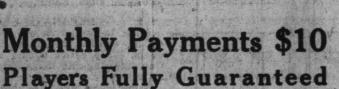

Below we give description of this big selling Player:

-Full 88-note scale.

-Compound six-point piston motor. -Loud and soft pedals, controlled by pneumatic buttons.

- -Player pedals fold under instrument when not
- -Tone rich, deep and mellow.
- -Action light and double repeating.

-The most simple and easily operated player

A Few Examples of the Player-Pianos that are priced practically irrespective of profits

The enormous success of this big Player-Piano Sale is attributed to the variety of different makes represented, and offering a really dependable and artistic Player at a price that is within the reach of those of moderate incomes, that price being

\$100 to \$150 Below Actual Selling Value

You cannot risk delay now, for we have only one carload left to sell at these prices. De-cide to come in Monday and confirm our claims. You may wait long before such an opportunity recurs at these prices.

Take a motor run with us along the Good Roads leading to Fairbank Heights --- just twenty minutes from corner Yonge and King streets --- and you will quickly appreciate the fact that the next section to come into the city is Fairbank Heights. All around this sub-division land is sold out, and built up. What were market gardens a year or two ago is dotted with comfortable homes. Four street car lines serve the near-by district. It is the near-by territory to twenty-five factories -- within easy walking distance of these factories, making the property an ideal and convenient spot for workingmen's homes. For in this fast-growing city---soon-to-be a city of a million people---one must seek healthful and desirable homes outside the city's congested centres.

The Belt Line Site

- -Fairbank Heights will be a great factory district.
- -With the Belt Line, newly rebuilt and operated by the Grand Trunk, the cheapest railway sidings in Toronto are here. The Belt Line runs through Fairbank Heights, establishing the land on both sides as most desirable for factory purposes.
- -A great opportunity for the investor, as well as manufacturer.
- -Fairbank Heights is a junction point of Dufferin St., Eglinton Ave. and Vaughan Road-all Good Roads territory.

M. S. BOEHM & COMPANY, LIMITED

Toronto With a **Million** People

- -The Telegram, which was not to be charged with having Big Eyes, in its issue of 14th inst. says: "Toronto may get its million even before ten years fly," and publishes a half-page map showing Toronto's wonderful growth.
- -The hope of the home-builder an absolute necessity with the manufacturer, who cannot afford to pay centre-Toronto prices-is to plan his home or factory in a place like Fairbank Heights.
- -Buy in Fairbank Heights to-day if you would profit by a vision of the future. Lots 25 feet frontage by from 135 to 200 feet deep.

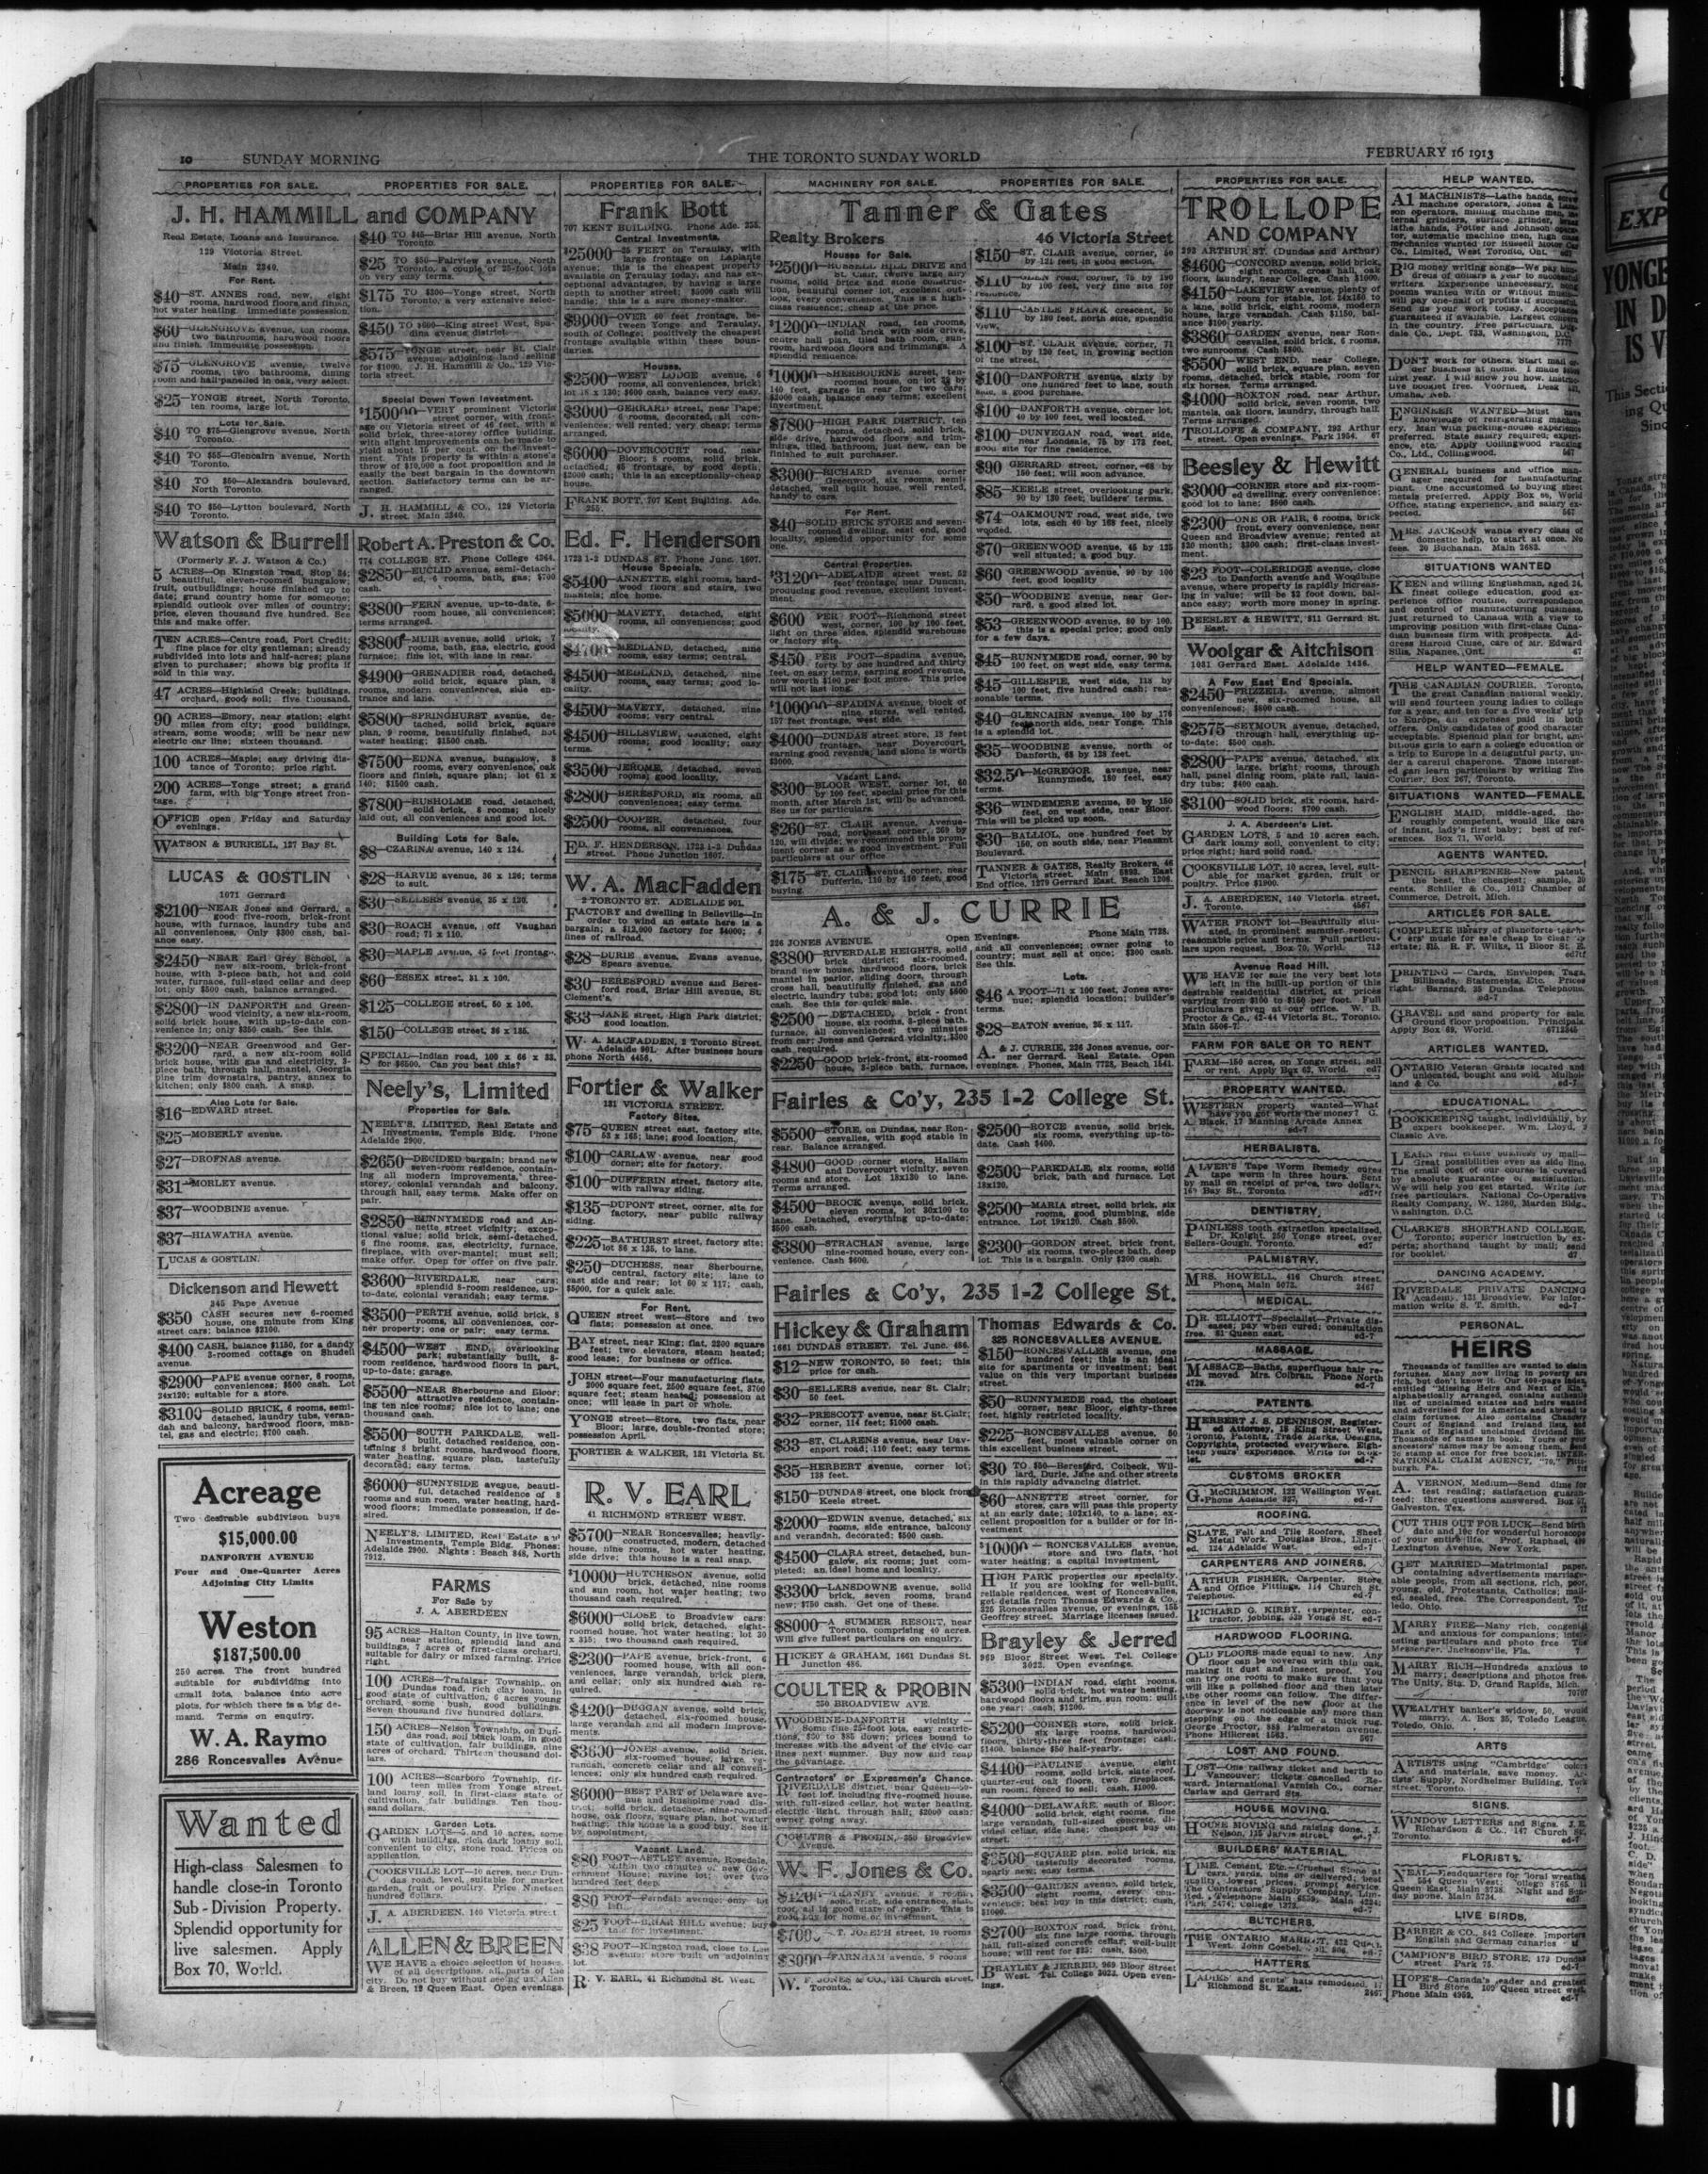

NO INTEREST OR TAXES IF PAID WITHIN A YEAR.

RTICLES WANTE

This Section Has Been Enjoytures Built on this System-Real Estate Board ing Quite a Movement Would be a Fine Thing for Toronto. Since the First of the Year.

SUNDAY MORNING

CITY

EXPANSION

YONGE STREET

J. A. Gibson of the realty firm of Gibson Bros., just returned from a visit to some of the American cities, comes back declaring that values of Toronto property, and more particu-larly central property, are not too high as compared with the values prevail-ing in progressive and growing Am-erican cities. He cites Detroit and Cleveland as centres which afford the best compa-rison with Toronto, as these cities, al-Yonge street, the best known street in Canada, has always had an attrac-tion for the real estate investor. The main artery of the city, the chief commercial thorofare, and the busiest spot since earliest days, Yonge street has grown into an importance that today is expressed in three blocks of \$10,000 a foot property, and nearly two miles of real estate worth from \$1000 to \$15,000 a foot. The last four years has seen a

of \$10,000 a 1000 real estate worth from \$1000 to \$15,000 a foot. The last four years has seen a great movement of buying and sell-ting, from the bay to Bloor street, and beyond to the C. P. R. crossing. Scores of properties in that length have changed hands three and four, t and sometimes five times, and always at an advance. Heavy purchasing of big blocks, the intent of which is kept discreetly veiled, has but intensified the general movement, and incited still further buying. Fortunes, a few of them even big for this city, have been made in the move-ment that at the bottom was only a natural bringing of prices up to true values, after many years of inertia and overlooking of the city's growth and Yonge street's possibilities from a retailing standpoint. And now The Sunday World predicts 1913 is the first of five years of im-provement to the street, of construc-tion of large buildings, buildings equal to the needs of the city, and commensurate with the prices now obtainable. The next five years will be important on lower Yonge street, for that period will see a complete change in its appearance. Upper Yenge's Turn. centres which afford the best compa-rison with Toronto, as these cities, al-his property from a non-rev the hardly keeping pace with the rapid growth of Toronto, are both very pro-gressive and have undergone great de-highest class."

strowth of Toronto, are both very pro-gressive and have undergone great de-velopment in the past ten years. and cleveland, with 625,000, has added about 200,000 to its population in the same period. In neither of these cities (contrary to the opinion expressed by some people here), is it possible to se-cure property similar to our best cen-tral property at a lower figure than ob-tains here, altho the area of both-the American cities is from 50 per cent. Streater than that of Toronto. Our population has more than doubl-ed in the past ten years, having now reached the figure of 475,000; our build-ing permits are 50 per cent. more than those of the above cities, and our bank clearings nearly double theirs for the year 1912. "The lessoce, or owner, of the build-ing, is able to secure what he wants, a revenue-producing building, or ons suitable to the requirements of his building, secures a first mortgage, of unquestionable security." Read Estate Board. Mr. Gibson says that another point which impressed him in visiting the American cities is the high level to which the real estate board in all the larger cities, of which all the leading brokers are members, and each board in each city being part of the National Association of Real Estate Exchanges. In this way the brokers work together rather than against one another, and they, as well as the en-tire community, are greatly benefited "in connection with recent develop-"

Gibson remarked.

MARKET HAL

for that period will see a complete change in its appearance. Upper Yonge's Turn. And, while lower Yonge street is. entering upon great constructional de-velopments, upper Yonge street, in North Toronto, is just barely com-mencing on a real estate movement that will be just as interesting to really followers as the property ac-tion further south. The prices won't reach such high levels. In that re-gard the process cannot be ex-pected to prove so spectacular, but it will be a highly important adjustment of values to suit new conditions of Gibson remarked. "In connection with recent develop-ment in the downtown section of De-troit and Cleveland, one notices the great number of large, expensive build-ings recently created, and wonders that a more marked improvement of central property has not taken place in Toronto. A reason which may be advanced for this condition of things is the growing tendency of buyers to pre-fer the acquisition of valuable central property by 99-year lease rather than fer the acquisition of valuable central fects property either directly of indi-property by 99-year lease rather than by straight purchase in, the above cities and more especially is this the case in Cleveland, where more than 75 per cent. of the large buildings erected within the past few years stand upon growth. Upper Yonge street is in three parts, from the crossing to the old belt line, from there to Eglinton, and from Eglinton to the city limits.

belt line, from there to Eglinton, and from Eglinton to the city limits. The south and the top sections have had a gradual growth, and Yenge street values have kept in step with that growth. Prices have ranged right up to \$1500 a foot, this last figure being common when the Metropolitan Railway had to buy its station site near the C. P. R. crossing. The next highest property is about St. Clair, one of the cor-ners being held for a price of

of values to suit new con

the anticipatory movement on Yonge

the anticipatory movement on Yonge street is just as speedy. The Yonge street frontage of Glebe Manor was sold out two weeks ago, 356 feet of it, at \$135 a foot. The buyer of five lots the day after making his deposit resold at \$170 a foot. The Glebe Manor owners then set a price on the lots remaining of \$200 a foot. This is but an instance of what has been roing on in Davisville.

Scme of the Recent Deals. The first deal of the present period of activity was the sale of the Woods property just north of Davisville Methodist Church, on the east side. It was bought by the Cash-ler syndicate for \$60,000, being five acres, with \$400 feet on Yonge Etreet. Following shortly after

streat. Following shortly after came the transfer of John Mox-

on's five acres, opposite Glenwood avenue, and a quarter of a mile north of the Woods piece. It was bought by the Title & Trust Company, for clients, for \$50,000. Then Rich-

clients, for \$50,000. Then Rich-ard Hall sold his northeast corner of Yonge and Glenwood avenue, at \$225 a foot. Just south of Glenwood, J. Hinds' property was sold for \$140 a foot. It is broken up by a creek. C. D. Warren got a normal "in-side" price for the neighborhood when he sold 150 feet between Soudan and Glenwood for \$200 a foot. Negotiations are now under way

Negotiations are now under way looking to the acquirement by a syndicate of the glebe or Anglican church property; on the west side of Yonge street, and Samuel Dingle,

tion of the street

been going on in Davisville. Some of the Recent Deals.

<text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text>

quickly accomplish that end—then many of the smaller buyers and invest-ors may take the absence of large deals as an alarming sign. The one large transaction consum-mated during the week was the sale of the northeast corner of Yonge st. and Wilton avenue, from the Hender-son estate to the Gough-Sellers Invest-ments, Limited, at \$230,000, or \$2800 a foot. The size is 60.6 by 117.9 feet. In all probability new stores will go up on the property. The lower Yonge st. merchants look very favorably on this part of the street and there are signs

ST. LOUIS, Feb. 22.-Chi-cago will have nothing on St. Louis in the way of baseball infravations. C. Webb Murphy is going to start the games in the Windy City at 2.30 o'clock. "If it is possible we will commence our games at 3.80 this season," Prexy Britton of the Cardinals said in New York. "We may find that the fans prefer 8 p.m., but will en-deavor to start at 2.30. "I don't believe there are many people who can come at 8 o'clock inconvenient, and 1 knew there are many patrons who prefer the earlier hour so tater than 8 o'clock and have time for dinner and some en-tertainment in the evening,"

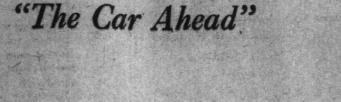

eral letters with requests for a pub-le expression of my opinion on the subject. I nope I will not be put down as a prijusiced old-timer when I say that in my opinion the quality of boxers has deteriorated in recent years. In point of science and skill, the stars of a decade or two ago, and this ap-plies to every class or division, ex-celled present-day boxers. For this condition of affairs the fol-lowers of boxing are to blame to a great extent. The public taste has cateriorated and along with it the class of boxing exhibitions. The box-fer who brings into play the skill and science with which nature has en-dowed him, and tuition has developed, is given scant encouragement and support by the present-day fight fans. Want the Sizep Producer. The average modern contest re-solves into a question of which box-cr lands the first convincing wallop. Wild swings and lunges are the or-der of the day. Let a contestant at-tempt to introduce a bit of feinting. ducking or footwork, or other clever stunts, and the crowd howle for the rough stuff." This does not tend to encourage boxers or to improve the character of the sport. There are a few really good boxers in the game at present, but I am-sorry to say they are in the minority. Packey McFarland is probably the most skillful modern exponent of the science, and ranking close to him are Mike Gibbons, Freddy Welsh, Willie Ritchie and Johnny Kilbane. But not to waste any more space than necessary and as evidence that present-day boxers do not class with the old-timers in point of skill, I will submit the names of a few stars of ten to twenty years ago in support of my argument. In the ranks of the heavies there were Peter Jackson, one of the starts. counter with Eddle Campi that he is entitled to a match with Johnny Cou-ien for the championship. The latters boxer, to judge from Williams' per-formance against Campi. Will have his work cut out to retain the title. Williams has issued a formal chal-lenge to the bantam champion and Tom McCarey has offered to stage the bout. Coulon has not as yet accepted the terms offered, and appears in no great hurry to try conclusions with the "Kid." When the boys boxed in New York-last summer the champion was The average modern contest re-relates the first convincing walk and on the terms offered, and appears in no relates the first convincing walk and on the terms offered, and appears in no relates the first convincing walk and on the terms offered, and appears in no relates the first convincing walk and on the terms offered, and appears in no relates the second state of the bunch. for no team can have too many good pitchers. I am ontident that there will be much im-provement in our pitching department the "Kid" When the boys boxed in New provement in our pitching department the "Kid" When the boys boxed in New provement in our pitching department the "Kid" When the boys boxed in New provement in our pitching department the "Kid" This constantion of the bunch of the second the terms offered, and appears in no provement in our pitching department the "Kid" When the boys boxed in New provement in our pitching department the "Kid" This constantion of the burn. Coulon may have the character of the sport. The made appears is no provement of the minority, provement appears the terms of the burn. Coulon may have the same at present, but i arm proving while Johnny's recent work indicated he had already hit be box as the waste ang the sever criticism for backing out of the match with Bombardier Wells. WASHINGTON, Feb. 22 .- There is good chance for Griffith to discover some real pitching talent out of the

Chance to Develop His

Youngsters Next Season.

a good chance for Griffith to discover some real pitching talent out of the corps of young twirlers that he will' take to Charlottesville, this spring. Every one of the youngsters comes highly recommended, and in one or two instances they have shown high-class form in the minor leagues. Bickers, the young giant who has never seen service in a professional league, is touted as having a chance to make a real great pitcher. It is, of course, not to be expected that any of these untried kids will make good right from the jump, but it is to the future that Griffith is looking. Dro-han, the Kewanee, Ill., twirler, has an enviable record, winning thirty out of 86 games, which is some performance in any company. A pitcher who can turn such a trick has something be-sides a smile, even tho he is working in a low-class minor league. Dent, who comes from Newark, did not shine, tho he won thirteen out of then the dig echap, who has shown enough to warant one of Griffith's friends to recommend him. . Griff will give much of his time to these young pitchers during the train-ing season. He is particularly anx-lous to develop one or two of them enough to warrant carrying them thru the season, even tho they are not worked regularly. . **Mitention to Pitchers.** T propose to give these young pit-ners every attention during the train-ing season." said Griff this morning. "It will mean a whole lot to us if we can get one or two competent twirlers out of the bunch, for no team can have too many good pitchers. I am confident that there will be much im-provement in our pitching denartment.

saving price.

Tudhope

Tudhope "6-48", \$2,500 f.o.b. Orillia **Electric Lighting and Cranking**

Save the Duty

Men too often judge a car by its price. Having decided to buy a \$2,000 or \$2,200 car, they are not interested in cars that sell for \$1,625. When you choose your car remember this. Do not class the Tudhope 4-36 as a \$1,625 Car. The Tudhope cars are built in Canada. They do not carry the 35% duty charge which is added to the price of imported cars or cars assembled from imported parts—a charge that increases the price without adding to value. The Tudhope cars can be bought at the duty-

The Tudhope cars have that massive and well-balanced appearance that marks the perfect car. They show care and skill in the details of body building, in upholstering, and in finish. The generous proportions—exceptional spring equipment, long wheel-base, big wheels: these are the things that bespeak comfort, freedom from rocking and jolting—a steady car. The accessories are well chosen ; Gray & Davis Electric equip-ment; Extra Tire; small things, perhaps, but evidences of our study for thoroughness.

Ride in a Tudhope car. Feel the quiet throb of the powerful motor. This big silent machine is the product of a factory that takes pride in its output. The Motors, Gears, Axles are built with the exacting care that is essential for comfortable touring and dependable service over Canadian roads.

Catalogue comparison will give some indication of the extra value we build into Tudhope cars. Remember we save the duty. But to appreciate what Canadian building actually means you must see the cars.

country, should have a finger in every international "All who are sorry for being parochial or provinc "All who truly repent of the great sin of mental in-

difference-

"Hold Up Your Hands."

Now, children, you are all invited to read The Toronto World and to go with the teacher on a picnic to Everybody's grove.

(Extracts from a popular prescription for running things in general most everywhere at once-by W. F. Maclean, M.P.)

ILLIAM FINDLAY MACLEAN is our national prize puzzle. He is the only editor in Canada whose autobiography is contained in the fyles of one newspaper; the only farmer in Canada who runs a metropolitan newspaper; the only M.P. that since ever he went into the house has regularly bucked everything he had a mind to whether government or opposition; the only farmer in Ontario with 1200 acres to be subdivided into suburban lots; the only univer-

sity graduate that ever took up a combination of newspaperism, politics and farming; the only editor that ever made an out-and-out platform for the government of Canada, which he did in 1900; the only newspaper proprietor who was ever unable to pay all salaries regularly and publish a paper and remain popular; the only able M.P. who stays away from Ottawa most of the time that he may be able to blow a trombone when he gets back; the only and original "Billy" Maclean, who believes he was always right, and the first editor to spend seven days

And it was living on the land, which he began to get by here a little and there a little after his first election, that helped to keep W. F. Maclean both poor and original. Riding down from his farm, Donlands, every morning, on a monopolistic street car, he was able to notice how the city was growing-most of the time westward. Some day it might decide to grow north and climb the hill. The World had grown from a four-page to an eight and a twelve and sometimes more. Toronto was growing

along with it. He expected it would. When he entered parliament in 1892 Toronto was beginning to wish it had never grown westward in the boom. When Laurier became premier in 1896, the editor of The World might have been expected to agree that it was time for a change. But at that time he was running for a second time in South York as a Conservative-which made some difference.

When the motor-car era began it's quite likely Maclean knew it was high time. But at that time he hadn't the price. Later on he got a car, which for a while was not seen much in the vicinity of The World office.

In an age of money-making materialism W. F. Maclean has spent very little of his time scheming how to make money. For a good part of his career he squeezed along without much. Once he was regarded by his admiring but somewhat unpaid staff as a needy adventurer because he suddenly bought a coonskin coat. But he needed the coat. Donlands was out in the drifts. The world and The World needed Maclean. Mere economics had little to do with the case. The editor was too busy making history to have much time for making money. Anyway money has a way of making itself.

Yorkville. Those in favor of it argued that the civic improvements to Yorkville would attract better citizens. The World went dead against it, on the ground that Toronto could not afford to bonus a suburb to take the kind of people she wanted herself. Yorkville is south of North Toronto, which is near Donlands, and a few weeks ago was annexed to Toronto.

St. Jacob's Oil was then being advertised on the board fences and in The Globe and The Mail. The World

devoted an editorial to a scathing rebuke of the oil and the fakirs that made it." In the same issue of The World were advertised a remedy for consumption. a cure for the drink habit. Brown's Household Panacea and an electric belt.

There was an eruption of fur coats on Toronto streets. The World editor had none. He printed half a column of evidence as to how certain well-known citizens got their coats.

"Winnipeg lots paid for mine."-J. J. Foy. A prominent distiller was reported to have said. "We raised the price a

quarter cent a gallon to pay for mine." In another issue the icon-

oclast editor denounced the Ottawa civic proposal to tax banks, insurance companies, gas companies and street-car companies-on the ground that all these institutions would take the tax out of the public's hide in the long run. Thereby proving that thirty-one years ago W. F. Maclean had no wool to be pulled over his eyes by cor-

had hysteria and headaches, he couldn't see on that basis why men shouldn't be debarred from voting because a lot of them got drunk, said that Canadian women rollicking out-of-doors didn't have those two H's much anyway, and that any woman should be allowed to vote if she wanted to.

But of course it was dog-days.

He was a tremendous admirer of Gladstone at home. but thought his foreign policy was a confounded illusion. When Hanlan was beaten by Trickett in Australia and some correspondent remarked that there was a devil of a fuss over it, but very few throwing up hats for the viotory of Oliver Mowat before the Privy Council, he reckoned that thousands of good people were interested in Ned Hanlan and ought to be.

About this time The World, at 18 King street east, was beginning to have premonitions of more than four pages. Suddenly at the head of the editorial page there was advertised-and for many days afterwards-a Hoe press and two binders for sale.

Every now and then, when out of a daily subject. Maclean rang in a live editorial on Canadian independence. That kept him casually busy for years. He was the first editor to make a live, clear issue of the fact that Canada couldn't be measured by either Imperial federation or annexation. When somebody wanted the duty taken off wheat he made it as clear as a pimple on a man's nose that cheaper wheat never would lower the cost of living, because the infernal middleman was always on the job to boost it up again. And in the days when The World was getting a reputation there was an era of hard times which every little while he did his best to prove would be over almost any day.

Then one day when a lot of people and editors became fussed up over the destiny of Canada he up and said, "Canada has more destiny to the square mile than any other country on earth. We are over-weighted with destiny. Suppose we let things work themselves out and talk less about it."

Browsing thru periodicals he came across an article by Goldwin Smith describing the horrors of the Chicago stockyards. He immediately cracked up the virtues of gradually becoming vegetarian.

We notice here on a front page a fine ad, for the Forepaugh circus coming to town in September.

and Glynn.

linking as differently as possible from every other editor.

But he's not quite the only remarkable William in the world. Canada has at least another; the United States another; and Germany another. Up till the time W. T. Stead died, England had another. And in those days the three Williams, Stead, Hearst and Maclean, were by all odds the most brilliant unconventional alliance of untrammelled newspaper intellects ever known in the world's history. The sum total of what these three Williams could teach the world was at least equal to what the greatest living William, the Kaiser, knows about everything in general. Up till a year ago there was another original William in The World office-yclept Greenwood. Among the many brilliant ideas put forward by W. H. not long after he came on The World was-that W. F. Maclean should go on a tour, after the manner of William T. Stead, interviewing all the crowned heads of Europe. I have often wondered what might have happened if W. F. and Wilhelm ever got into the same room-alone. Stead admitted when he was in Canada last that the Kaiser had refused to grant him an interview. I don't think that would have been a sufficient preventive to W. F. Maclean, who has more newspaper instinct to the cubic inch than any other editor in Canada. It was only last summer that Maclean attended an Old Boys' Reunion of the Clan Maclean in Duart, Scotland. That may have been historically interesting. But it would be much more spectacular in the eyes of the whole world if Maclean would arrange a joint conference of remarkable Williams.

The picture on this page is a casual snapshot on Parliament Hill. Minus the overcoat and the don't-carea-continental hat, it might resemble Tommie Burns at the thirteenth round and still ready for more. Behind him is the blur of parliament house, where some days ago he shot a few holes in the Government Bank Act and threw out his ideas about the German scare and the Borden navy.

Maclean has spent thirty years of his life denouncing monopolies, tyrannies and oligarchies. And for thirtytwo years he has aimed to make The World a monopoly. When other editors printed anything that seemed to be original, he could turn the files of The World and show that he had it in print years ago.

He was born in Hamilton; son of John Maclean, journalistic father of the National Policy. He attended Toronto University; an uncommonly restless youth and a puzzle to the faculty. In those days economics was not seriously on the curriculum or he would have eaten it alive. After he left college he was for a while a reporter on The Globe. He needed the money. I think the cityeditor then is dead now, or he would have weird tales of William on assignments. At the age of 26 Maclean started The Toronto World on King street east, near the corner of Yonge. When he was 38 he entered parliament as an Ind. Con. member for South York. The World has twice moved since 1880; once round the corner to Yonge street; four years ago to a new building on Richmond street, next to Simpson's store.

W. F. is a prize cattle-raiser. He knows how many pounds of butter per annum should be the output of a diligent Jersey, how many barrels of apples on a good tree of Baldwins, how to prevent cholera in hogs and the difference betwence 1200 acres next door to a big city and the same acreage fifty miles out. Most of his life he has been a sort of prophet. Years ago on the front page of The World every Monday morning was a long report of the sermon by Dr. Wild, another prophet, who also lived on a farm.

"Let us then be up and doing. With a heart for any fate;

Still achieving, still pursuing, Learn to labor and to wait."

Poetry is often useful to illustrate the lives of men. I have sometimes fancied a subject for Sam Hunter, The

World cartoonist; W. F. Maclean up at Donlands, doing his best to keep a space-hungry town from climbing the hill to get hooks on his beloved Shore Acres; writing editorials to convince people that there were no town lots for sale anywhere near Donlands; sticking up signs on his fences-"Subdivisionists keep out."

To estimate W. F. Maclean is a good deal harder than trying to measure the wealth of the 23 men said to be at the basis of Canadian finance. It's worse than trying to measure the value of a chunk of gold quartz with a footrule. Gold varies. Sometimes it isn't all gold. Sometimes it's iron pyrites.

However, long before gold and silver were discovered in Northern Ontario The World was started as the first one-cent morning paper in Canada. It began with four pages of seven columns each-shortly after New Year's, 1880. It was a very sedate-looking sheet. Most of the type was small; no scare headlines. On the editorial page of the early issues was a sketch of a telegraph pole. The first issues dealth with a live variety of topics, and dealt with them so well that in 1912 the proprietor advised his news editor to look up the old files that he might behold what an almighty good sheet he himself got out in the early '80's.

The young editor carried a good-sized axe right at the beginning of the trail. In 1882 land sharks were operating in Winnipeg with Ontario money. Maclean went after them front-page and editorial. He raised the dickens with the C. P. R. monopoly in the west and gave The Globe fits because it was bucking the N. P. He lambasted partyism. He administered Hail Columbia to a New York paper because it patronized Lord Lorne and accused Canada of flirting with annexation. He came out hard for manhood suffrage. He shouted for lower postage-advocating a two-cent rate and giving all the modern reasons for the same. He ridiculed the holy show of opening the Ontario Legislature, concerning which he said:

"This aide-de-camp, cocked-hat, cannon-firing, goldlace, body-guard business merits nothing but laughter and contempt.'

It was shortly afterwards that Frank Oliver did the same thing at Regina-but not for publication.

At that time there was a movement on foot to enlarge Toronto by adding the suburb north of what is now the busy man's corner at Bloor and Yonge, and known as

porations. Half a page of one issue was devoted to a grandiloquent circus-poster ad. concerning the opera "Patience," then produced for the first time in Canada, following the aesthetic craze inaugurated by Oscar Wilde in the sunflower era. The same opera was given in Ca-

> and Sullivan revival. In 1882 the editor wrote a reply to a subscriber who wanted him to define "crank," then becoming popularized like "boycott:" He explained that one-half of society is engaged in grinding an axe while the other half

nada recently in the Gilbert

turns the grindstone; once in a while the man at the crank gets tired and wants to grind an axe of his own; thus he is described as "flying off the handle" or as a "crank."

This seems to have been a personal allusion.

Bellamy's "Looking Backward" seems to have been somewhat anticipated by W. F. Maclean. The world was a vast movie show to William; and he did his share in working the films. There was blooming little of anything in the heavens above or the earth beneath or the waters under the earth that he hadn't it sized up somehow before it happened. There never has been anything so well established that Billy Maclean didn't feel called of destiny to take a whack at it to see what it was made of or why it was there. If ever he saw a plug hat on the sidewalk he kicked blazes out of it to see if there was a brick inside.

When most editors were explaining the Salvation Army by slum theology, Maclean observed that a lot of young folk preferred to get a job soldiering in the Army to doing harder work somewhere else. In spite of the N. P. he had a bad opinion of the tactics of John A. When The Mail and The Globe jumped on The Telegram at the time of the printers' strike, Maclean said that John Ross Robertson was a deuce of a fine man; tho the two editors are not so chummy now. Away back in '84 he said it was time for a railway commission-when the C. P. R., which he was forever boosting, wasn't finished by a year. He advised Trinity College to federate with Toronto University; a feat only accomplished a few years ago. In '84 he advocated Sunday cars as a good aid to churchgoing, which in those days was a live issue in The World under the caption, "Why do people go to church?" He gave the city council fits for filthy streets. but advised householders to have clean yards and lanes at the same time. When Oliver Mowat was in England enlarging the area of Ontario, Maclean wished more power to his Grit elbow. When the Greeley expedition became a horror in the Arctic Circle he said there was too much Arctic agony, and that the world would be better off without the North Pole and a lot of false heroworship.

Here's one that even he may have forgotten. August 4, 1884, commenting on an article in Lippincott's, poohpoohing votes for women because women so often

When Lord Dufferin was made Viceroy of India. Maclean wished him luck and hoped he would live to see some Canadian governor-general of Canada. No doubt about this-the state some day would probably assume control of the C. P. R.

When Canada had less than six millions he predicted fifty, but condemned pauper immigrants. He shouted for an Anglo-Canadian cable, British news to Canada being colored by Yankee transmission. And he was soon to begin clamoring for two-cent railway fares; seemed to have got the idea originally from the fact that the Grand Trunk carried people at cut rates to the Montreal Carnival-why not regularly? The N. P. should be extended to railways. telegraphs and telephones-anticipating the Halifax platform by twenty years and more.

Item-a new press installed; announcement on the editor's page.

A subscriber wrote in airing his views about the abuse of telephones, then a new thing. Maclean wrote a leader on the subject, setting forth that the head of an office should not be expected to answer calls, switchboards should be installed, also booths for private conversation; further-it was a decided abuse of privilege when a creditor rang up wanting a check or a bank manager to whine about an overdraft.

Maclean never believed in over-concealment

Just for variety: the first full-page ad. The World ever had was March 18, 1885, advertising the growth of Toronto Junction from 50 to 300 souls inside a year or so. This ad.-one-quarter the entire space of The World -was repeated several times. Ten cents a line-or so; found money and much needed. Perhaps after all-journalism might be advertising. Rather odd that Maclean said nothing about the

Riel Rebellion till it was a fact. However, he was no friend to Riel nor to the French movement in the west: the in a later editorial he eulogized the virtues of French-Canadians—in Quebec. He advocated a standing militia of a thousand men for the west.

Then came the pow-wow about Sunday newsboys, six years before The World established its Sunday edi--first in Canada; the editor explaining that the pious Globe broke the Sabbath more by letting its M paper to press on Sunday than by getting the Sunday to Saturday and merely selling it on Sunday.

And so the story keeps on spinning itself out, day by day and year by year till, thanks to The Toronto World, the 19th century got to a close without a collision between the earth and Mars. On October 9 of the last year of that century W. F. Maclean brought all his propaganda up to date by formulating a new National Policy instead of the old N. P., which he had endorsed so long as he thought it was good for anything. This recipe for curing the ills of Canada on the eve of a general election included

Rounding off Confederation by taking in Newfoundland; Imperial federation based upon preferential trade; protection of Canadian industries and a measure of reciprocity with all countries consuming Canadian products; state-owned cables between Canada and Britain and Canada and Australia; nationalization of telegraphs and telephones as part of the postal service; a national fast Atlantic service; Canadian terminals for Canadian trunk lines; extension of the Intercolonial westward; a Tailway commission for the main purpose of controllin rates: no railway subsidies without state control and ownership; regulation of trusts and public ownership of utilities with provincial jurisdiction.

In all America where is there a newspaper proprietor with such a climatic cumulative career? And outside of Col. Watterson of Kentucky, what editor now in business can be put down as so violently, constructively peculiar a . character? The Toronto World has always been a rendezvous for odd people, just as from time to time it has attracted many of the brightest and sanest pens in Canadian journalism. But all the oddities of all the queer people in that office, and all the sanity of the sanest, were never quite a match for W. F. Maclean, who before ne kicks the bucket will do a lot of things in the category of the unexpected.

A High Wind on Parliament Hill.

EDITORIAL "The New Freedom"

Last week editorial notice was taken of a recent and striking declaration of his political faith and policy made by Mr. Woodrow Wilson, now on the eve of his inauguration as president of the United States. This makes an exposition of his views on current questions, especially those of an economic character, of peculiar importance and no apology could be made for recurring to other parts of his articles, now published in book form under title of "The New Freedom." In our previous article, the general situation in the United States was under review and the fact that business men are afraid of a hidden power organized, subtle, watchful, interlocked, complete and pervasive. Mr. Wilson here, no doubt, refers to the "Money Trust" that combination of a few men of many millions, who thru their directorates control industries, banks, trust companies and other corporations totalling up to \$13,500,000,000 of capitalization. His book contains a scathing arraignment of "Big Business" and not only reiterates his attacks upon the trusts of the United States, but sounds a new warning to the great financial interests of the country. It is considered to be one of the most remarkable ever put in the field, both by reason of the bitterness of its arraignment of the present financial system and on account of its pre-inauguration exploitation of a future presidential policy. No earlier chief executive of the United States, since the Declaration of Independence, has anticipated the feat of Mr. Willson.

The president-elect not only attacks the trusts and monopolies, but makes it clear that he will do all in his power to legitimately restore trade competition and individual opportunity and to disentangle community centralization which, he says, has become dangerously co-ordinated.

Mr. Wilson severely animadverts on Ex-president Roosevelt and his program of benevolent monopoly; strongly advocates an advance policy of the initiative, referendum and recall, with the exception of the recall of the judiciary, charges the existence of a money trust, and expounds at length his political philosophy.

Altho not the actual author of the book, he explains that it is a collection of the more suggestive portions of his campaign speech-es arranged by William Bayard Hale, and with such interpolations as render the work an actual exposition of his views. The book is signed by Mr. Wilson, who contributes a preface. In this he says:

"This book is an attempt to express the new spirit of our politics and to set forth in large terms, which may stick in the imagination, what it is that must be done, if we are to restore our politics to their spiritual vigor again and our national life, whether in trade, in industry or in what concerns us only as families and individuals, to its purity, its self-respect and its Christian strength and freedom.

Under the topic "Monopoly or Opportunity?" Mr. Wilson writes:

"I admit the popularity of the theory that the trusts have come about thru the natural development of business conditions in the United States and that it is a mistake to try to oppose

THE TORONTO SUNDAY WORLD

MR. PRESIDENT

The Motor Industry

FEBRUARY 23 1913

A certain sacred island in Central nature shall be buried in ruin and the Asia is described in one of the volumes last day of the world shall come which has been used as a text-book of the southern pole shall crush as it modern occultism. It is explained in falls, all the regions of Africa, and this volume that when India is in- the north pole shall overwhelm all scriminately mentioned that it is not the countries beneath its axis." In the India of modern days that is the second Epistle of Peter, iii., 3-14, meant, but the India of the archaic there is a reference to the sameperiod, when countries which are now events. Great stress was laid by the known to us by other names were all ancients on the knowledge of the called India. "There was an Upper, precise locality of the poles, but for a Lower, and a Western India," says a reason rather different from any Madam Blavatsky, "the latter of that would occur to a modern which is now Persia-Iran. The coun- of science. The ancients did not tries now named Thibet, Mongolia and regard the events of the cosmos as in Great Tartary, were also considered any way attributable to mere chance by the ancient writers as India." It If the axis of the earth shifted, it was in this India of the ancients that did so for good and sufficient reasons, which would be as precise and definite as the change of the seathe cradle or at least one of the seven pradles of humanity is to be sought. There was a vast inland sea, which sons from summer to winter. All the extended over middle Asia, north of movements of the earth were astothe proud Himalayan range, and its clated with, and in fact recorded by western prolongation. An island the zodiac and its twelve signs. These twelve signs were the symbols of the which for its unparalleled beauty had twelve houses of the regular figure no rival in the world, was inhabited by the last remnant of the race which in the series of Platonic solids preceded ours. . . . It was they who known as the dodecahedron. This imparted Nature's most weird secrets to men, and revealed to them the in-effable, and now lost Word. This Word, which is no word, has traveled once round the globe, and still lingers as a far-off dying echo in the hearts of some privileged men." To quote again, "the Island, according to be-lief, evists to the situation of these inner points of force lief, exists to the present hour; now, as an oasis, surrounded by the dread-ful wilderness of the great Desert, the Gobi-whose sands 'no foot hath crossed in the memory of man.'" Elsewhere may be read the statement would coincide with dodeca made about "the Imperishable Sacred Land." "This Sacred Land," is stated was the Pit (or the infernal regions, never to have shared the fate of the figuratively and cosmologically). The other three continents, Latona, Lem-uria and Atlantis because it is the only first continent. Astronomically and one whose destiny is to last from the beginning to the end of the present cosmic period. It is the cradle of the seat of Brahma, the throne of the first man, and the dwelling of the Jupiter, etc. Any student who cares last divine mortal, chosen as a future to take a globe and lay it out with seed of humanity, when the globe goes either a dodecahedron or an loosa-into its night of rest, to become in hedron, will discover some things, reits reawakening, the seed of the next markable coincidences, and so forth race. "Of this mysterious and sacred with the notable places of the earth land very little can be said, except,

Man, of course, flourished on all perhaps, according to a poetical exthese earlier continents, and indeed. ression in one of the commentaries had reached upon them a higher dethat the pole-star has its watchful eye gree of knowledge, culture, and reupon it, from the dawn till the close finement than what he calls civiliza-

the processes by which they have been built up.

"I answer nevertheless, that this attitude rests upon a confusion of thoughts. Big business is no doubt to a large extent necessary and natural. The development of business upon a large scale, upon a great scale of co-operation, is inevitable and, let me add, is most probable. But that is a very different matter from the growth of trusts, because trusts have not grown; they have been artificially created.

"For my part I want the pigmy (little business) to have a chance and I foresee the time when the pigmies will be so much more athletic than the giants that it will be a case of Jack-the-Giant-Killer. I take my stand absolutely, where every progressive ought to take his stand, on the proposition that private monopoly is indefensible and intolerable. And I will fight my battle. And I know how to fight it. I am perfectly willing that they (the trusts) should best any competitor by fair means; but I know the foul means they have adopted and I know that they can be stopped by law. What we want to do is to disentangle this colossal 'community of interests.'"

The Roosevelt Progressive Party next comes under the fire of the president-elect. After an analysis of Progressive party tenets Mr. Wilson finds that:

"the new party legalizes monopoly and systematically subordin-ates working men to them and to plans made by the government both with regard to wages and with regard to employment.

"Take the thing as a whole, and it looks strangely like economic mastery over the very lives and fortunes of those who do the daily work of the nation; and all this under the overwhelming power and sovereignty of the National Government.

"The man who is leading the new party has not changed his point of view since he was president of the United States . it is surprising that such a man was not again chosen president of the United States and allowed to patent the present processes of industry and personally direct them how to treat the people of the United States."

With regard to the money trust, Mr. Wilson writes:

"Our system of credit is privately concentrated. The growth of the nation, therefore, and all our activities are in the hands of a few men, who, even if their actions be honest, necessarily check and chill and destroy genuine economic freedom. The great monopoly of this country is a monopoly of credit. So long as that exists, our old variety and freedom and individual energy of development are out of the question."

Mr. Wilson also alleges that monopoly has made invention un welcome and almost impossible, and warns the Republican party that it is being deluded into playing false with the enlisted.

Mr. Wilson reiterated his intention of pruning the Republicar protective tariff, but scouted the idea that he is an advocate of free trade.

Again, says the writer, manufacturing monopolies are so interlaced in personal relationships with the great shipping interests and with the great railroads that they can often largely determine the rates of shipment. Unless commerce commissions are absolutely sleepless, "you can get rebates without calling them such at all. If I wanted to make a special rate on a special thing, all I should have to do is to put it in a special class in the freight classification, and the trick is done. And when you reflect that the twenty-four men who control the U. S. Steel Corporation, for example, are either presidents, vice-presidents or directors in 55 per cent. of the railways of the United States, reckoning by the valuation of those railroads and the amount of their stock and bonds, you know just how close the whole thing is knitted together in our industrial system and how great the temptation is. These twenty-four gentlemen administer that corporation as if it belonged to them. The amazing thing to me is that the people of the United States have not seen that the administration of a great business like that is not a private affair; it is a public affair."

On Monday the city council will pass on the recommendations of the board of control to make each member of the board responsible for a department of civic business. This proposition was supported in the board of control by Mayor Hocken and Controllers McCarthy and O'Neil, but it was opposed by the other members on the ground chiefly that they did not want to be tied down to one department-or in other words that they should be free to strike a head wherever they see it.

Dividing the Responsibility

The proposition deserves support for many reasons. It should facilitate the business of the city council. It should prevent any overlapping of responsibility which occurs under the present system. It specializes the work of the controller at the head of each department. Toronto is too large for one man to thoroly acquaint himself with the whole business of civic administration. We pay our controllers \$2500 a year and it is not to be expected that for such a salary these men should give their whole time in order to get thoroly into touch with everything that is going on, therefore we have men fussing about here and there scratching the surface all along the line and not getting down to real facts. By making each controller responsible for one department he should have time to thoroly investigate that de-partment and be responsible to the city council and to the people for its efficient administration. If we do not pay the controllers enough for this work by all means let the salary be raised.

Glasgow's Progressive Government

Glasgow, Scotland, according to a writer in The National Magazine, is the "most progressively governed city in the United Kingdom." The city owns all its public services, makes them render efficient service to the people at low rates and makes them yield each a yearly profit, part of which goes to take up bonded debt and part into a common good fund, out of which the city is gradually substituting comfortable, healthful, municipally-owned tenements for the villainous and disease-breeding slum tenements which grew up in Glasgow, as they have done in most other large cities, under the pressure of the demand for private profit.

Glasgow supplies its citizens with cheaper gas and electric light, cheaper street car service and better than are enjoyed by the residents of any American city. Glasgow's municipal slaughterhouse, in which all animals intended for food for Glasgow's 1,000,000 people are killed and dressed for market, is a huge institution, set right in the heart of the city, yet so clean that one could pass within a hundred vards of it and never suspect its existence by reason of any odor in the air.

The municipal abattoir and market insure the healthfulness of all meats eaten in Glasgow, and help mightily to hold down prices by eliminating a lot of middlemen who take tolls on this business in other cities.

In a few years the automobile industry has grown to immense proportions. Today it is the Imperishable Sacred Land was a the Imperishable Sacred Land was a the Imperishable sacred Land was a not only the affluent who are able to go about in continent at the north pole, and there mos into 6000 years, the professor their own cars but many of the moderately well Capt Party assorted as Capt. Cook off people are adopting this means of transportation as the most convenient. Reliable cars are tinent at the North Pole, but merely made today for less than one thousand dollars and lee afloat on a polar sea. Latona, or when one considers the cost of a good horse and the necessary outlay for keep it is not such a great step after all from the possession of a horse pro- tropical as Arctic fossils testify, was pelled vehicle to one driven by gasoline.

or imported at large cost. These two, not necessarily always together, were distinguished patrons of the zoo. Na-turally, being on The World, and Bil-ly's—no W. F.'s; for thirty years ago people employed graceful and respect-ful diction in naming public men— brothers, they held a large place in the affections of the gang proper, but were, perhaps, not so ardently esteem-ed by the less gifted and schooled ele-ment. Jim would play with the big ment. Jim would play with the big brown bear, "Peter the Great," while carefully storing away in his fine mem-ory an interview with some leading politician, who had dropped into zoo-land at Harry Piper's special request, and who would not have the remotest idea he was being drawn into free and public and one provide a drawn of the second embroidered expression of opinion on vital issues, until he read The World story next morning—and fainted or fied

to the back country. "I say, Mr. Piper," drawled Jim, one day, appearing before the manager with his hand wound in a handker-chief, "will you please teach Peter to manifest less effusiveness? I was shaking with him a while ago, and he wasn't satisfied to simply take my

A Mammai's Monolog. Furthermore, the mad impulse is on to drag in John L. Lewis and ruthless-ly expose him also as an old-time fre-quenter of the Zoo. John didn't have oversight of one of the evening stars when he cheerfully obeyed orders on the old Mail assignment book and strolled to the Zoo to interview the mighty and morose whale. It was jolly George Harrington who surrep-titiously had undertaken to fill the screll with punishments, in Alex. Low-rie's absence, and who feelingly cau-tioned the assignee, as he lent him his spring overcoat, not to be so inquisi-tive or intimate with the dead whale

Principles of Prevention

Outstanding among these is the organization of sanitaria and dispensaries. Dispensaries. Dispensaries, the not so often heard of as sanitaria, are of great value. They are local institutions in which patients may be examined. ficers of such a place make it the base ncers of such a place make it the base of operations for a neighborhood. They can supervise the homes from which tuberculous persons come and often give valuable advice which may result in saving additional lives in a household. On the other hand, where mans-he avoids because he prefers a meai to a fight any day. So the first thing to do in working for the pre-vantion of tuberculosis is just to see household. On the other nand, where tuberculosis already exists, the proper sanitarium treatment may be advised. Sanitaria are of value from two standpoints. In the first place they that everyone is healthy. Many Children Have Tuberculosis. It is well known now that a large rumber of children always have tuberremove people who may be infective from homes where they may be an absolute menace to their friends and ulosis of one kind or another and relatives and thus prevent the spread that often it is latent. To prevent outof the disease. Then, in addition to conferring the advantage of systemabreaks of the disease either before or after these children grow up as a prob-lem. With this question as with that tic treatment, they teach patients how to take care of themselves so that when they go back to the world they will be able both to care for their own health and keep from infecting others. Then there is the education of the public. This, since after all it is the raturity, the prey alike of disease and public. This, since after all it is the attitude of the public towards such subjects that decides them, is perhaps the most important of all. Many agencies are now undertaking this In this respect the schools are the places towards which preventive measures must be alread. People do People do not receive the knowledge of how to work, and now the question of tuberculosis is of more interest in the publive a healthy life by diving inspira lic mind than it ever was before. Writers, private organizations and medical health departments are spreading the doctrines of fresh air, good food and good housing, while the "don't spit" signs are occupying a little province of their own. Prevention Better Than Cure. It is perhaps not curious that most of the money spent on tuberculosis so far has been largely on cure instead of prevention. Cure has been an ideal of the past, hard to banish and difficult to supplant as the classic doctor's pill and potion. Still we are beginning to realize that it is absurd to permit dusty, ill-ventilated factories or sweat-shops to manufacture consumptives, as well as other articles; that it is criminal to permit dark. filthy houses to exist and breed dissease; that it is more than criminal to compromise the future existence of est bonds. Unfortunately, however, Alladin's lamp, like the goloshes of children because of neglect in and out of school. Small wonder it is, perhaps, that fortune, is lost now-a-days, and we subduing liniment." For Rheumatism Nerviline is a therefore, I cures what Tve gleaned in dep sociological subduing siniment." This Week,

ring scenes of early Canadian history. The pictures were made by the British American Film Co. and the first of the series will be The Battle of the Longue Sault." It is a representation, with careful attention to historical ao-curacy of the heroic sacrifice of Dol-lard des Ormeaux and sixteen com-panions, when the Iroquois threatened to destroy. Ville Marie (Montreal) in May 1660. This picture was produced inst summer at Johnstone's Point, on the banks of the St. Lawrence River, across from historic Lachine. Here the company have a long lease on a large tract of government owned land, which is almost ideal to the eye of a motion picture man. Almost every setting that could be desired on water, or land, is to be found. Dense woods, open clearings, still pools, rushing streams are there in variety, and in the primitive state of several centuries ago. Here, last summer, the camp comedy entitled "College Life," and is supported by a capable company of ten people. As a special attraction on this week's bill, Manager Shea has chosen Maud Lambert, the musical comedy star, and Ernest Ball, the composer, who will be seen in their new of-fering. They are favorites with Shea-goers. Miss Lambert has a pleasing personality and a good voice, and she is well supported by Mr. Ball at the plano. The Daivis Family, European acrobats and balancers, appear here for the first time in their sensation-al act, and are sure to please. Lew Hawkins comes back, after an ab-sence of many seasons, and the Ches-terfield of ministrelsy has an entirely new offering of songs and stories. Willard Simms may be called the minute his name is spoken, and he is always a scream in "Flinders' Fur-nished Flat," and the after burlesque. W Dolly Morrissey is a dainty singing comedienne with a repertoire of songs, and Ellis and Ross are com-edy acrobats, who are out of the or-dinary. New kinetograph pictures close the show. ago. Here, last summer, the camp was located and almost daily the woods resounded to the thrill war-whoops of Indians on the warpath. The citizens of Montreal soon learned of the interesting scenes which were being reproduced close by and on fine

days hundreds of people would cross Lake St. Louis in boats of all des-criptions seeking permission to land and watch the work. All would-be spec-tators were turned back, however, as the producers were not then ready to make everything public. NOTICE

make everything public. The scenes they missed were thril-ling in the extreme. Hundreds of genuine Iroquois in full warpaint tred the virgin sod with all the haughty pride of their ancestors of three hun-dred years ago. They crept silently thru the underbrush with the stealthiness born of their race. These Indians were not painted white men or reser-vation halfbreeds. They were actual "Redskins," secured at great expense from the little old Indian village of Caughnawaga, just above the Lachine Banids Histrionic chility accurate

No theatrical or operatic engage-ment of any kind that has ever been played in the City of Toronto has caused so much comment and brought forth so many expressions of enthusi-asm as that of the Montreal Opera Company which on Monday enters on its third and last week at the Alex-andra Theatre. Working under the handicap of changes inevitable in all grand opera companies when the weather becomes changeable and the fact that it is the Lenten season when many music lovers do not attend the theatre, it has won a wide popular sup-port and every visitor has become its rdent champion

For this week a series of productions are announced, most of which are established favorites and which no opera house anywhere can afford to omit from its prospectus. It will also bring to the city two noted singers who have sung in the leading opera houses of the world, Maria Gay and Alice Neil-sen. These distinguished artists were not named in the original announcements and their engagement shows the

mous and which she has sung many times at Covent Garden. Madame Gay is generally regarded as the finest Car-Edith Taliaferro

men since Calve retired from the op-eratic field, but her methods are all her own and she gives an entirely unique picture of the gypsy siren. Needless to say this opera will not fail to draw a large audience.

Miss Alice Nellsen's first appearance Young American Actress in "Rewith the company in this city will be made on Tuesday night, when Pucci-ni's "Madame Butterfly," an opera that has commanded immense enthusiasm ever since its first production, and which has made Puccini one of the wealthiest musicians that ever lived. This season Miss Neilsen is as before the leading soprano of the Boston Grand Opera; and has sung the role

Selay ib oquist Lyric by Lyric by

By Lady Duff-Gordon ("Lucile.")

AM sending you this week a few of the newest real fashions from abroad. These beautiful pictures will show you the latest—no, the newest tendencies—of the Spring fashions, and I am sure that you will agree with me in thinking them rarely beautiful. Every woman who longs to be considered chic will be guided by these tendencies when she plans her Spring wardrobe.

To be individual and at the same time to be picturesque is the highest art. For instance, notice the really beautiful picture gowns that I am showing you this week. They are like nothing more than the quaint little pictures that beautify the old-fashioned bandboxes, and I call them my "Bandbox dresses" to those who understand.

The Shepherdess dress in the first picture is a delightfully dainty creation in shell-pink satin. The panniers are just like those worn by the dainty Dresden china shepherdesses of the days of Watteau. These panniers and the bottom of the skirt are edged with a deep band of tiny pink and red roses on a blue and gold background.

Leon Bakst'

Evening

Costume,

Showing.

the "Coat'

Overdress.

Another "Picture Bandbox" gown is shown in the opposite corner. This I created in the loveliest of pink tulle. The foundation of the robe is flesh-colored satin. On this the tulle is draped to form double panniers, each of which, as you will notice, is bound with white swansdown. The skirt is a bare forty inches at the hem, and this is held in with a deep band of silver lace. The most chic part of this delightful gown is the remarkable little green and silver brocade bodice that forms a boare. This touch M green is adorable on the delicate pink. Where it fastens at the back there is a motif of French blue taffetas "The Green Forest" Afternoon Gown, Showing the Latest Skirt.

ornamented with a wreath of light pink and green roses.

I am showing you another evening costume this week. In this I have allowed my love for the sumptuous and gorgeous full play. There is a time for simplicity and also a time for extravagance, and in my "Leon Bakst" costume I have revelled in the sumptuous. The foundation of this unusual costume is very simple, merely a double robe of purple and blue chiffon, h anging straight and svelte from the shoulders.

Over this is draped a wonderful coat robe of black and gold. The foundation of black chiffon is literally weighted down with the heavy gold flowers. The drapery is arranged every time that the gown is donned, and when in its place the effect is as of a slender figure swathed in a mist of shadowy purples and gleaming gold.

Just under the bust the coat is held in place with a jewelled band. The headdress carries out this Oriental idea, the tight turban being bound with the jewelled band.

As you will see by the hat worn with the green velvet gown, the passion for the A New Lucile "Bandbox" Gown of Pink Tulle and White Swansdown, Combined with Silver Lace. C

hat petite is still with us. Many of the latest show no brim at all. And their only decoration is an aigrette placed at an angle toward the back. This green gown, by the way, shows

THE CYCLE.

If I wait where the vine's snowy flower Twines the doorway that leads to my bower, In a long green gown, like a lily ensheathed, My hair unbound and its meshes enwreathed With the crocus pale or the snowdrop's gleam— Love, will you come?

If I wait in the sweet, pulsing night When its soft, warm depths are alight With the mystical glory and glamor of love, And the stars in their courses swing silent above; When the earth murmurs low in her dream-Love, will you come?

If I wait in the fields shorn at noon, Lying bare 'neath the great harvest moon, And the stubble doth pierce my tender feet As I linger, still eager thy coming to greet; Tho the wheels of thy charlot run slow, Love, will you come?

If I wait where the grim, dead year Enshrouded, lies cold on his bier, and the flame of my spirit is burning low In the biting frost and the driving snow-When my nerveless lip hath forgotten thy name, Love, will you come?

has always taken thought to have various articles of her apparel a "proper match." This device of har-mony may be illustrated further by picturing to ourselves a home ar-ranged for occasions of different im-port: say first, a festal gathering; then, to get entirely different sur-roundings, imagine it under the sad circumstance of death. You can readily realize the difference in the surroundings, the difference in the tone of everything, altho the under-lying background may remain the same. The details of decoration, of dress, of many exterior and apparent-ly petty things are of an entirely op-posite nature under the different con-ditions. Each is in keeping with the circumstances. It is this idea of the harmony of surroundings with mental moods which is the basis of what t rmony of surroundings with mental ods which is the basis of what I ve chosen to call "atmosphere" in

Let us carry the illustration a little Let us carry the illustration a little further. Imagine a sunny June day when the promise of spring has burst into blossom, and over against this put a memory picture of a gray, driz-zly November sky, over a landscape of leafless trees. Need I ask you what mood a poet would wish to arouse to describe in either case? Wouldn't you feel that there was something out of tune if he tried to make you luxur-iously happy to the accompaniment of

lected by sthe winner. There will between pictures in the series, one pic-ture will be publisher each week. No person can win more than one prize. Two weeks from date of publication will be allowed for answers. Address: Literary Editor, Sunday World, To-ronto, and mark envelope "Book Con-

In opening his latest volume, "The look of Woodcraft and Indian Lore,

Book of Woodcraft and Indian Lore," Ernest Thompson Seton gives a startl-ing example of the need to teach some of the boys of this modern age how to play outdoors: "This is a time when the whole nation is turning toward the outdoor life, seeking in it the physical regen-eration so needful for continued na-tional existence—" he says.... "Half our diseases are in our minds and half in our houses. We can safely leave the rest to physicians for treat-ment.

Famous Pianist, Head of Imperial Meisterschule, Vienna, at Massey Hall March 26.

ment. "Sport is the great incentive to out-door life: nature study is the intellec-tual side of sport. "I should like to lead this whole nation into the way of living out-doors for at least a month each year, reviving and expanding a cus-tom that as far back as Moses was deemed essential to the national well-being. Massey Hall March 26. To no other musical event of the season will more interest be attached than to the appearance of the cele-brated pianist, Leopold Godowsky, who plays at Massey Hall on March 26, in

deemed essential to the national well-being. "Not long ago a benevolent rich man, impressed with this idea, char-tered a steamer and took some hun-dreds of slum boys up to the Cats-kills for a day in the woods. They were duly landed and told to 'go in now and have a glorious time.' It was like gathering up a netful of cat-fish and throwing them into the woods saying, 'Go and have a glorious time.' "The boys suked around and sul-lenly disappeared. An hour later, on being looked up, they were found in groups under the bushes, smoking cards-the only things they knew. "Thus the well-meaning rich man learned that i is not enough to take men out of doors. We must also teach them to enjoy it." HOW EDISON INVENTED THE

made a hit, did he? I am glad—and teime, old man, how long will we have to
wait at Gib for the P. & 0.?"

"But why do they give you a de-gree?" persisted the Picture; "you never studied at Oxford, did you?" Stuart moved slightly in his chair and shook his head. "I thought I told you." he said, gently. "No, I never studied there. I wrote some books on --things, and they liked them." "Oh, yes, I remember now you did tell me," said the Picture; "and I told Aunt Lucy about it, and said we would be in England during the season, when you got your degree, and she said you nust be awfully clever to get it. You always treat her so distantly." "Do I?" said Stuart, quietly: "Tm

sat in the armchair with the same grace-ful pose and the same lovely expression, and smiled sweetly at the encircling dark-

miles to keep in touch with. In the days I served as a Volunteer (and what good sport I had) the only indian troops employed as any part of the Strait's garrison were Sinks and Pathans, as Sappers and Miners. Now practically all the Soldiers there are Native Regiments. But one thing strikes me as curious. Ridout brought with him to the Tanglin Club, one night in 1908, I think, a Major Cayley, R. G. A. I remember Major Cayley well—a big, heavy man, strong ab-normally, remarkably agile, fine bil-liardisti good singer—all-round re-markable man, but the most silent person about himself I ever met. Rid-out tole us about his adventures in extraordinary places—God-forgotten holes like the Khyber Pass and equal desolation—and even Ridout, I believe, did not know really where the Major originally came from. Personally I decided Somersetshire for the perfect way he got the dialect in "Old Uncle Tom Cobleigh An' All."

Conject of any arm, properly officered, with an A gintant and a Sergeant-Major (regulars) is deadly competition for the honor, the efficiency, the smartness and THE ECONOMY of the Corps, can give any healthy, level-headed young min, more result pleasure, more lasting enjoyment and more, in-finitely more results in general physical fitness and mental alertness, than any practically codectless a thietic game there is in this little world.
And--if you account military training a not desirable thing, you are simply postponing its day of arrival.
And--if you account military training ing a not desirable thing, you are simply postponing its day of arrival.
Convey anything useful to its readers that an provide the subjects thereof." the self-depresenting comment "Most of users to here the subjects thereof." the average and the subjects thereof." the average any healthy postponing its day of arrival.

A FAILURE

Guess I've bin a failure, as fur ez I kin see, When a feller like Hank Jones is so far ahead of me.

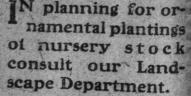

There is the story told of a dispute in which a bolsterous, ill-bred fellow called his adyersery "no gentleman." "I suppose you think yourself one?" was the reply. "Certainly I do." responded the bulk "Then," said the other, "I am no offended that you don't think m one."-Tit-Bits.

THE ONTARIO MOTOR LEAGUE.

Every motorist in Ontario should give his heartiest support to the membership campaign of the Ontario Motor League, which is now in full blast. The Ontario Motor League is an organization of all the motorists of this province; it is working for proper traffic regulations, sane motor vehicle laws, improved highways, sane driv- Famous Transcontinental Car ing, road signs, and touring advice. The league has done great work along these lines in the last year.

It secured the raising of the local speed limit.

Instituted with success a system of road scouting to offset police persecution.

Retained counsel to appear in test cases and appeal cases in the courts.

Brought about the defeat of adverse bills in the legislature. Held conferences with civic officials and police commissioners on the subject of traffic regulations.

Engaged detectives to investigate automobile outrages; parties and electric lamps. The utility and putting tacks on Weston Road had to flee the country to escape comfort of this absolutiv reliance feaarrest.

Warned motorists against speeding and reckless driving.

Urged license exchange with other provinces and neighboring and two searchlights can be switched states of the United States, receiving practical assurance of exchange on by pressing a button, with Quebec at least, from the provincial secretary.

Encouraged Toronto-Hamilton permanent highway project, and stood behind good roads schemes in various parts of the province.

Co-operated with Ontario Good Roads Association in the forming of a Good Roads Educational Association.

Appeared before the board of railway commissioners to protest

against level crossings over main highways. The membership of the league was increased from 1481 at the end of 1911 to 2229 at the end of 1912. The membership is now 2400 and steadily increasing.

The league has widely extended its influence by the formation of affiliated clubs thruout the province. There are now fifteen such clubs with headquarters at Ottawa, Kingston, Peterboro, Hamilton. Berlin, Galt, Niagara Falls, Brantford, Woodstock, St. Catharines, London, Aylmer, Stratford, Chatham and Windsor, These clubs mobile show is the wire wheel, which have a membership of 1000 and heartily support the work of the reappears after long disuse. In the league

CAN

Increase the efficiency of your motor car by using ZIP. All along the road magnificent motor cars are rendered 100 per cent. inefficient by punctures and flat tires.

ZIP prevents loss of air from punctures and leaks, thus keeping tires up to pressure, overcoming 75 per cent. of tire troubles and increasing tire mileage at least 50 per cent.

ZIP IS NOT A FILLER, it flows inside the tube and occupies only 4 per cent. of the air space.

To load a tire with Zip-simply jack the wheel up, let air out and put Zip in through the valve stem, inflate the tire again, all in a few moments, then motor without fear of puncture trouble. Zip is guaranteed to be non-injurious to tires. See demonstration at the Toronto Auto Show, or at our

showroom, 471 Yonge Street, corner Wood.

Zip Company, Limited TORONTO

An Invitation **MOTOR SHIP** MOTOR BOAT

The Automobile Editor has received, The Automobile Editor has received a special commercial motor engine number of The Metor Ship and Motor Boat from the publishers in London. Anyone interested in marine engines especially for commercial purposes should make a point of seeing this number. It contains much interesting material in regard to internal combus-tion engines, which burn beave of tion engines which burn heavy oil. Much interesting data in regard to the operation of large oil engine vessels is given. The internal combustion enis given into internat combustion en-gine will soon be a powerful factor in the navigation of the Great Lakes, and it is to be hoped that the English firms who manufacture engines of this type will not ignore the enormous mar-ket Canada will undoubtedly offer in the near future. The special number of The Motor Boat is well illustrated and filled with interesting material

In a general way, the indications of reezing in a cooling system are those of obstructed circulation. One possible exception might be cited, where the water has frozen with the car

the water has frozen with the car standing, when it might be found difficult or impossible to turn the motor over, owing to the pump being held from rotating by the ice. In runding on the road, however, the first symptom noticed would be a sluggish action of the engine. In-vestigation might reveal nothing un-usual, and the driver would pro-ceed. Soon the motor would labor harder than ever, and upon raising the hood, the whole engine would be harder than ever, and upon raising the hood, the whole engine would be found to be excessively hot, and pro-bably steaming and smoking. The top of the radiator might be hot, while the bottom was cold, or even frozen. To proceed further would be disas-trous, so a careful examination must locate the neture and extent of locate the nature and extent of the locate the nature and extent of the damage. If the circulating system has been injured to an extent ren-dering it inoperative, some expedient must be adopted to keep the motor cool. The radiator is the part most likely to be frozen cool. The radiator is the part most likely to be frozen. If it is of the tube type and only a few pipes are cracked, the rubber tubing may be disconnected from the lamps, cut into proper lengths, and split down the side. These can then be placed around the tubes and bound with string or elec-tric tape. Cellular radiators, if in-jury is local, can be plugged by fill-ling the leaking parts with heavy rub-

Meet Your Friends at Norwalk Booth

Make our exhibit a rendezvous where you can meet your friends. Tell them to go to the Transportation Building. They can't miss our exhibit. Anyone would recognize those long, graceful, underslung cars without even looking at the name plate.

You will look at the three Norwalk models in our exhibit and their outward appearance will enthuse you, as only a thing of beauty can. We are glad you appreciate beauty of design-but that is not the impression we want you to carry away about Norwalk cars. We want you to know and understand the principle that Norwalk cars are built on.

The Underslung principle, the principle that assures absolute safety in motor driving.

Our demonstrators are there to show you over every part of the car. Their enthusiasm is genuine, because they have seen these cars in operation and know what they can do.

ASK QUESTIONS examine the cars from name plate to rear axle, and you will come away convinced that Norwalk cars are cars of absolute exclusiveness.

Economy in Running.

A Princely Coupe --- The Cadillac

Aside from the fact that it is a Cadillac with all that the name implies, we believe we are justified in describing this as the most sumptuous car of its type ever built.

You may key your expectations as high as you please. There is no danger of disappointment.

Consider first, convenience.

You enter the Coupe at either side. Your foot presses a lever and the engine

444444

starts. You press a button and the electric lamps

are lighted. You are ready-immediately.

And you ride in such luxury that the imag-

Ination cannot surpass it.

By luxury we mean both motion and the "creature-comforts."

Let your critical eye turn where it will-

You literally cannot conceive a more princely equipage.

Or, if you wish, with an addittional body, you may transform it into an open car.

And, it is a Cadillac, the Prince of Coupes. The price is \$2,500 F. O. B. Detroit.

The Interior Arrangement

The filterior Arrangement The filterior arrangement of the Cadillac Coupe. The filter's seat is about 8 inches forward of the wide rear seat. This gives greater el-bow room. To allow entrance from the driving side, the driver's seat folds back. There is ample room on the wide rear seat for two passengers beside the driver and the fourth passenger occupies the front seat, which may also be folded up if desired. The trimmings and appointments are elegant in the extreme. The four side windows may be lowered and they are specially made to be vibration proof, whether up or down.

there is nothing that is not super-excellent.

It is an every-day-in-the-year car, always comfortable, winter or summer, rain or shine.

HYSLOP BROS., LIMITED,

Make your Car sure-footed

Men buy Goodyear Non-Skid Treads because they have overcome the faults common to other skid-preventing treads.

> NO-RIM-CUT NON-SKID

TIRES

GOODYEAR NON-SKID BLOCKS DIS-TRIBUTE THE WEIGHT. Widely separated projections of hard rubber have been found

to press in and bruise the fabric. The Good-

year diamond-shaped blocks are close together and wide at the base. Under pressure they spread out. The weight of the car is carried evenly over the whole tread.

GOODYEAR NON-SKIDS DO NOT OVER-

which keep the rubber cool.

GOODYEAR NON-SKIDS GRIP. This per-fect Non-Skid Tread, with its diamond-shaped blocks, its countless angles and edges facing in every direction, gets a firm grip of the road and adds much to the power and safety of the

Fit all

Standard Rims

GOODYEAR NON-SKIDS ARE SPRINGY. Heavy bars of rubber or uneven projections make hard, dead tires that jolt the motor and working parts of the car out of adjustment. Riding over Goodyear Non-Skids will prove that they are as springy and full

of life as plain tires, (JOOD) YEAR

In the Fall of 1910 we bought out the Durham Rubber Company's Factory at Bowmanville, lock, stock and barrel, and turned it into a Goodyear plant.

That was less than three years ago. Ever since, we have had factory extensions on our own hands. The growth of our Tire sales has called for unusual growth at our factory. These figures tell the story:

Floor space, 1911, 26,000 square feet Floor space, 1912, 89,000 square feet

No-Rim-Cut Tires are giv-ing the double mileage. They are saving car owners

Look up the Goodyear Dealer.

Do you want to STOP SKIDDING?

where the should be the case. The wheel bearings, and steering head ball races should always be kept thoroly well oiled; in fact, the wheel bearings are best packed with gear grease, which keeps the water and mud out, and is very unlikely to melt and leak away. All the working parts of spring forks should also be kept wear taking place. Careful Driving. The amount of work a man ob-tains from his machine is largely due to the way in which he drives it, and the amount of care he bestows on it

GOODYEAR NON-SKIDS ARE SKID-RESISTING TO THE END. When, after thousands of miles, the centre blocks wear down, the angles and edges of the side-blocks In 1911 we made......37,750 Tires In 1912 we made......51,000 Tires HEAT. Most heavy tires heat up quickly. Goodyear Non-Skids are air-cooled. The Our present output is 500 tires small blocks are separated by deep air channels per day.

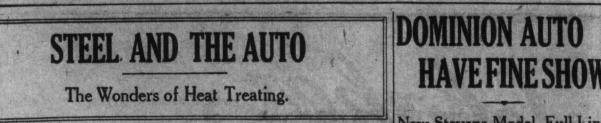

When men watch tire mileage so closely, what does this rapid growth signify?

48% of tire cost.

THE TORONTO SUNDAY WORLD

FEBRUARY 23 1913

In the big Peerless six-cylinder cars on display at the 1913 motor shows there are more than 50 different va-rieties of steel, many of which have been produced by heat treating, and the application to the motor car of the most recent discoveries in scien-tific metallurgy.

tific metallurgy. The Peerless Motor Car Company came to the conclusion some time ago that a scientific study of the struc-ture and nature of steels offered one of the greatest opportunities for the improvement of the modern mo-tor vehicle. A metallurgical engineer was retained and laboratories estab-

lished. Knowledge of steel and its treat-ment has been increased by investi-gations carried on in the plant. No one kind of steel can be made to serve for all parts of the chassis. To secure a material that will with-stand vibration, tortion, abrasion, shock, or a steady heavy pull, re-quired in each case a different sort of steel or the same steel treated in a different way.

The steel to a certain temperatures and cooling it in a certain way. The steel to a certain temperatures and cooling it in a certain way. The steel are atterned to a state atterned to a certain temperatures and cooling it in a certain way. The steel are to a certain temperatures and cooling it in a certain temperatures and cooling it in a certain temperatures and cooling it is a certain temperatures and cooling it is a certain temperature and cooling it is a certain temperature and the far are steel studed cooling at the steel to a certain temperatures and cooling it is a certain temperature and cooling it is a certain temperature and cooling it is a certain temperature and the far are steel studed coolince at the steel studed coolince at the steel studed coolince at the steel studed cool at the steel stude steel steel studed cool at the steel stude steel st

eters. Heat Treating. Some remarkable things are ac-complished in heat treating. The spe-cial alloy used in Peerless live axles, for instance, is heat treated to such a strength that a bar seven inches in diameter would hold up the combined weight of the 75,000 men in the United States army. And if a Peer-less steering knuckle were 27 inches in diameter it would sustain at one stage of its preparation the weight of the largest office building in the world — the Metropolitan, in New York.

York. But strength is not the only vir-tue required of the parts in which steel is used. They may be strong under a steady, heavy pull, and yet break under a quick, hard shock. So they have to be put thru other processes, by which some of their ex-cessive strength is traded for other qualities.

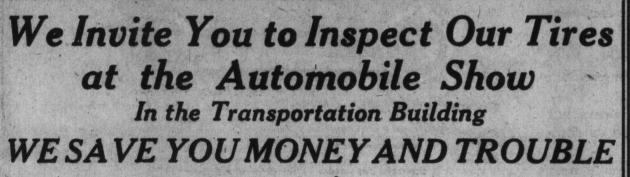

New Stevens Model, Full Line of Hudson Cars, Peerless Trucks and Colonial

Model of Napier Co.

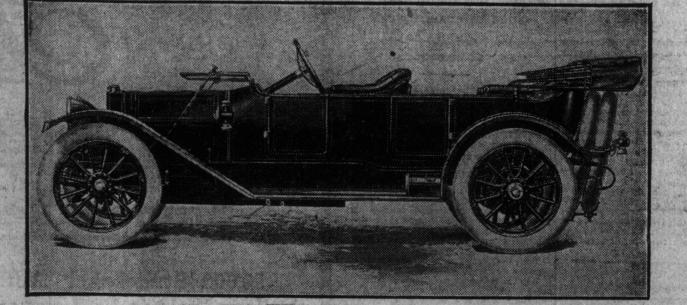

The Dominion Automobile Co. ex-hibits a Stevens-Duryea Model "C," '-passenger touring car in English Purple Lake. This car as shown is the only car that has developed some-hing really new in motor cars for several years, and this is not an ex-periment but an advance in design and construction the car being designed periment but an advance in design and construction, the car being designed from tread to top as a single piece of construction, i. e., the chassis and body are blended into one not only in appearance but in actual fact. With this car complete is exhibited a polished chassis of the same model, which will show all the desile of complete

nich will show struction of this car with the part Also a full line of the fame

Also a full line of the famous Hud-son cars—the masterpieces of a staff of 48 engineers who designed this car under the supervision of Howard E. Coffin, who is known as the fore-most automobile engineer in America. This exhibit will consist of a Model 37, 4-cylinder, 5-passenger touring car in blue, a Model 37, 2-passenger roadster in gray, and a model 54, six-cylinder, five-passenger car also in blue, and besides these cars they will show an ivory white chassis the same as was exhibited at the New York Automobile Show. The exhibit of commercial vehicles consists of a Peerless 5-ton truck with

The long stroke -a 40 H.P. KISSEL KAR-a history maker of the industry-a car of advanced superiority, comfort, flexibility and distinction.

EVERY INCH A CAR

LAST YEAR THE KISSEL KAR MADE A NAME FOR ITSELF IN CANADA

In offering the 1913 product to the user we have so far found it only necessary to say "IT IS A KISSEL"-what horse power do you require?

In the KISSEL CAR the new favor of the Six is simply the appreciation of the smoothness of the six cylinder—the steady stream of power obtainable only in the six cylinder, and with this superiority of the Six the Kissel Kar motor includes the flexibility of the long stroke.

Throw out the clutch, and let the car stand and the engine race-the engine vibration is hardly perceptible. That's the unequalled smoothness of the long stroke KISSEL KAR six cylinder motor.

Throw in your clutch—see how easily the car picks up speed. Leave your gears in high (fourth geared-up speed) and see how beautifully and comfortably you can idle. And if you want speed you can get more than you will often care to use except as reserve power.

This is the extreme of engine flexibility-easy control and masterful ability. For design we simply ask you to look at the above and judge for yourself.

THE TORONTO SUNDAY WORLD

Hidebaker **Only Studebaker Resources Make Possible** Studebaker Cars at Studebaker Prices

50,000 Studebaker Automobiles will be built and sold in 1913, and every part of every car will be built by the great Studebaker Corporation in our own factories which are the largest in the industry.

12,500 men are now at work in 13 large factories producing Studebaker automobiles, and it is only the immensity of our resources that makes possible Studebaker cars at Studebaker prices.

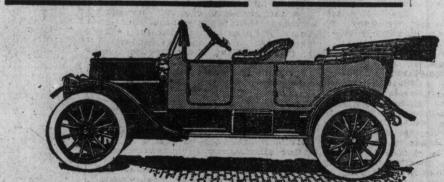

Every ounce of material that goes into Studebaker cars is tested in our own laboratories. Every vital steel part is heat treated from 3 to 6 times in our own ovens. Your safety is made sure because our steel is made hard as it ought to be.

The 1913 Studebaker cars are the most extraordinary value in the Canadian market. Just think of a six-passenger car, electrically-lighted and started, at \$1,500. It seems incredible.

And a powerful, splendidly-built six-cylinder car, fully equipped and richly upholstered, at \$1,800. Nothing to compare with it was ever seen under \$2.500.

The "25" at \$1,050 is slightly smaller than the other cars, but just as carefully built of the same tested material, and as completely equipped.

HE first thought which presents itself to the mind of the prospective motorist is that of COMFORT. A motor car, to satisfy, MUST be above all roomyrestful-luxurious-inviting.

Next comes the desire for Speed. The knowledge that, stored up in that staunch engine, is reserve force sufficient to conquer time and space if needs be, is essential to the pride of ownership.

And to grace of contour, pleasing lines, ertistic finish, in a word-Elegance, may be attributed the final decision of many a man in his choice of a car.

McLAUGHLIN SERVICE is supplied to McLaughlin motorists in all parts of Cana-da, through a chain of Branch Houses spanning the Country from coast to coast. This means absolute protection and se-curity, uninterrupted enjoyment, and the maximum return from every dollar invest-ed in/a McLaughlin car.

McLAUGHLIN CARS combine these three essentials with a moderate price and a minimum maintenance cost.

See Display at the Automobile Show or Send for Literature of 1913 Models

FACTS WORTH KNOWING

N February 18th, 1912, we made our first sale of Kelly-Springfield Auto Tires in Canada. Since that time just one year ago, we have sold Sixty Thousand Dollars Worth. This is not meant for a boast as to the amount we have sold, but the point we want to bring out is, We Have Not Had One Complaint or Been Called Upon to Make any Adjustments Whatever, why is this? Because the Kelly-Springfield Tires are made of the best material, by the highest grade of skilled workmanship, regardless of the cost. This object is to give Perfect Satisfaction to all users of Kelly-Springfield Tires as shown by record given.

Are you a user of Kelly-Springfield Tires? if not, we would like to talk this matter over with you and show you our 7000 Miles Guarantee Without a Blow Out or a Puncture.

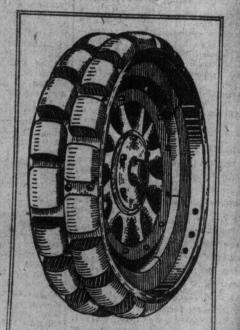

If you are going to buy a new car insist on having Kelly-Springfield Tires on, as the dealer only guarantees the car, not the tires. We guarantee our tires.

If you are interested in Truck Tires do not forget to see our patent fasteners for block tires, the only fastener that is made that gives perfect satisfaction after years of experience. No Bolts to Shear Off, Blocks Perfectly Tight and Giving the Greatest Mileage

Without Trouble. Do not forget to call and see us at the Automobile Show in the Transportation Building, or at our office.

Don't Forget We do All Kinds of Repairing With Kelly-Springfield Material. And All Guaranteed

TRUCKS SAVE MONEY

A few years ago the truck manufac-turer's problem was much more diffi-cult than it is today. The merchant or manufacturer who intended to pur-chase a motor fruck looked at the question of motorizing his delivery sustain as a nursely experimental sub-

system as a purely experimental sub-ject. Today the problem is entirely different. Most business men are ed-ucated to the fact that the motor livery expense exactly one-hair in comparison to the cost of the horse de-livery service. The buyer, therefore, looks at the purchase of the motor truck in an entirely different light. livery expense exactly one-half

a glib salesman of motor trucks makes a lot of persuasive statements. The question of the reliability of the manufacturer, the construction of the truck, predominates, and usually the com-pany's engineer decides the question as to the mechanical efficiency of the truck. Merchants Recognize Worth.

figure.

Also the company that has a large

Also the company that has a large interval of the problem is entirely. Also the company that has a large investment in plants and machinery, that manufactures the truck entirely that manufactures the truck entirely in its own factory from the raw ma-terial to the finished product, meets with much more consideration than a company that has but a small outlay in the manufacturing end, buying mo-tors, transmissions, axles, etc., and merely putting them. glib salesman of motor trucks makes

The motor truck field is getting to be enormous, as one after another of the many different and widely varied lines of business and trades discover that a properly built motor truck will do their work more efficiently. more quickly and more econo

than they could ever do it with the old horse-drawn method. The present method of building

The merchant now does not believe The that the motor truck is an expensive trucks that the motor truck is an expensive proposition and that he ought to use trucks to be up-to-date, as he prev-iously did. Two years ago I knew of cases where the operation of the truck was charged up to the advertising expense account, which plainly shows the manner in which the purchase was considered. the data the prev-to the truck is used every working day in the year. a. tight place, they don't hesitate to remind you of it. Better Days. As the result of the combladed ef-forts of the automobile designer, the metallurgist, and the manufacturer of accessories, automobiling has been made not only more pleasant, but safer and saner each year; so that the motorist who is a careful driver and who takes reasonable precautions has very little to fear nowadays. Dry cells no longer "go dead" unexpected-ly, the reliable and inexhaustible magneto' has taken their place; indeed fare to have a crank-shaft or a driving shaft break, or a gear strip. The old cry of "Get a horse!" is a back number; for now there are few-er horses on the road than cars, and it is an automobile ambulance that is called to take away sick and dis-abled animals. Of course, no amount of skill or science can safeguard the man who
