VOL. 2

St. George, N. B., Wednesday, October 23, 1907.

No. 41

HOW ABOUT YOUR WINTER UNDERWEAR

Don't lose sight of the fact that we have the largest variety in town.

LADIES' WINTER COATS just received.

Then there's our range of DRESS SKIRTS; they are pretty hard to beat in quality and price.

Golf Jackets, Norfolks, Etc.

CORSETS A SPECIALTY. You cannot help being suited.

A large assortment of SHIRTWAISTS; white and colored BARGAINS IN BOOTS AND SHOES

J. SUTTON CLARK

St. George, N. B.

R. A. BURR, Eastport

Has a full line of Musical Instruments. Agent for Edison Phonograph and Victor Talking Machine. Full list of Records

BISHOP KINGDON DEAD.

His Lordship, Bishop Kingdon, head of the Church of England in New Brunswick, died at his residence in Fredericton late Friday evening.

His Lordship had been ill for a long time with heart trouble, the malady becoming so serious about a year ago that the appointment of a coadjutor became necessary, to relieve him of a part of his work.

Hollingworth Tully Kingdon, D. D., D. C. L., was born in London, England, April 16th, 1835. The family of which he was a worthy representative has been traced back to the year 1450 and an account of its origin, together with its coat of arms, may be found in books of heraldry.

BEGAN HIS EDUCATION

in St. Paul's school, London, where he was captain of the school. In 1853 he graduated at Trinity College, Cambridge. He was granted a place in the honor list in mathematics; but as he fell sick and could not finish the examination, he was not classed. He was then for a year at Cuddesdon College, under Canon H. P. Liddon, where he was elected scholar. He was ordained deacon by Bishop Wilberforce, of Oxford, and priest by Bishop Hamilton of Salisbury. For about three years and a half, he was curate of Sturminster Marshall, and he subsequently officiated in a like capacity for two years at Devizes. Then for a period of five years he was principal of Salisbury Theological College, after which for nine years he was curate of St. Andrews church, Wells street, London. Subsequently for some time he was vicar of Good Easter (a corruption of God's Easter) near Chelmsford.

WHILE THERE HE WAS ELECTED

Coadjutor of Fredericton and was consecrated on July 10, 1881. In the same year he received his degree of Doctor of Divinity at Cambridge, England, in 1892 that of Doctor of Divinity from King's College, Windsor, N. S., and later from Trinity College, Toronto.

A man of earnest purpose and scholarly attainments, Bishop Kingdon not only faithfully and efficiently performed the high duties of his sacred office, but has also contributed effectively by his pen and otherwise to advance the cause of religion and pure morality.

In 1890 Bishop Kingdon was appointed to deliver the Bishop Paddock lectures at the General Theological Seminary at New York, being the first alien to act in this capacity.

In 1888 and 1897 he attended the conference of Bishops at Lambeth, England. He was a deep student and a lover of books and the possessor of a large and valuable library, containing some works so rare as to be

ALMOST PRICELESS.

Among them is a Latin manuscript dated 1288. This collection he recently presented to Trinity church, St. John.

In 1890 Bishop Kingdon was married in the Cathedral, Fredericton, to Anna Beverly, daughter of Lieutenant Colonel Beverly Adino Robinson and widow of George Wm. Marsh. One child, a daughter, Anna Phillips-Renorden, was born of this union. Mrs. Kingdon's first husband, by whom she had two daughters, was a descendant of Archbishop Marsh of Dublin.

For the last two or three years the late Bishop Kingdon has been in poor health. On the second day of October, 1906, Rev. Canon Richardson, rector of Trinity, was made coadjutor bishop.

Stomach troubles, Heart and Kidney ailments, can be quickly corrected with a prescription known to druggists everywhere as Dr. Shoop's Restorative action upon the controlling nerves of the Stomach, etc.

SMALL POX IN

ST. MARTINS

Considerable excitement prevails in St. Martins over the development of a case of small-pox there, the victim being Rev. Fred J. Crisp, who resides with Mr. McIntyre, whose house has been placed under quarantine. The board of health authorities are investigating the matter and the patient will be brought to St. John.

Secretary Burns was notified last night and no information relative to the cause of disease has, up to the present been received.

It is known however, that Rev. Mr. Crisp, who for the past two years has been in charge of the St. Martins Methodist church, has been confined to the

house, and medical aid was not summoned until yesterday when the doctor after a careful examination discovered that his patient was suffering from an attack of small-pox and at once communicated the fact to Secretary Thomas M. Burns, who immediately sent up the ambulance and a local physician with instructions to vaccinate the inmates of the house, place it under quarantine and make a thorough

Investigation in order to locate the source of the disease.

On arrival in St. John the patient will be placed in the Isolation Hospital. Rev. Mr. Crisp is a young man unmarried.

Talking with the Times, Mr. Burns said that during the past summer the board had been conducting free (but not compulsory) vaccination at St. Martins and that this has not been taken advantage of by the family whom Rev. Mr. Crisp had been boarding. Mr. Burns thinks that the people of St. Martins are pretty well protected by vaccination and no very serious spread of the disease—probably none at all—is anticipated.

Thus far the present case is the only one in that locality of which the board of health are aware.

A weak stomach, causing dyspepsia, a weak heart with palpitation or intermittent pulse, always means weak stomach nerves or weak heart nerves. Strengthen these inside or controlling nerves with Dr. Shoop's Restorative and see how quickly these ailments disappear. Dr. Shoop of Racine, Wis. will mail samples free. Write for them. A test will tell. Your health is certainly worth this simple trial. Sold by All Dealers.

To Develop Iron Deposits

At Point Lepreau.

Sydney, Oct. 19.—The directors of the Lepreau iron mines, at a special meeting this morning at the office of Mr. C. V. Wetmore, received and accepted the offer made to them by the Dominion Iron and Steel Company to rent them areas at Point Lepreau. The lease will be made for eighty years and it is the intention of the new owners to begin prospecting at once. The iron deposits are believed to be very extensive and of a very high grade. The expectation is that for the present at least the new owners will confine their operations in New Brunswick to mining the ore and shipping it to the furnaces here in Sydney to be smelted.

The Steel Co. will pay 25 cents royalty on all iron taken out and must work the mine continuously. They will take treasury stock for their development at \$25 share value on hundred. Not more than two thousand shares will be given in any event, no matter how much money is spent developing. The board of directors is as follows: C. V. Wetmore, president; F. A. Crowell, vice-president; J. S. McLennan, Jas. F. Robertson, of good.

St. John, and F. P. Jones, general manager of steel works. At the meeting three-fourths of the stock was represented.—Globe.

Miss Pauline Law, of Pittsburg, aged 35 years, remained out with friends until 1 a. m., and when she came home, her father whipped her with his slipper. Pauline had her father arrested yesterday for assault and battery, but Magistrate Kirby discharged him, saying, "Your father has a perfect right to chastise you so long as you remain under his roof, and I agree with him in this, even though you are 35 years old. You are old enough to know you should come home before 1 a. m."

The latest crop report issued by the C. P. R. is again a most favorable one, showing that threshing is well on the way to completion throughout the West and that the yield of wheat averages at some points as high as 23 bushels to the acre, while at all points the amount of grain threshed has exceeded all expectations. On the Brandon, Arcola and Souris sections the yield is exceptionally high.

Odd Things Women Are Doing

Mrs. Winnie Blackman of Moorhead, Ia., doesn't like her husband's parents, and has therefore asked the courts for a divorce.

Mrs. Geo. W. Hillyard, who has for years held the tennis championship of England, was defeated this year. She says that her defeat was due to the fact that she ate too much before she played the final round.

The upper class girls of Bernard College compelled the freshmen to partake of lemonade out of a nursing bottle as part of the yearly hazing.

Mrs. Julia Sullivan of Lima, O., found a burglar ransacking her house. She tied him in a chair and telephoned for the police.

Miss Mamie George, 6 feet 5 inches tall, and 15 years old, was married to a man 5 feet tall in St. Louis.

Saula Konecki of East Tawas, Mich. disappeared from home a week ago. Five days afterwards she was found hiding beneath a barn, where she had been concealed all the time.

Seleny Sano, a Hungarian girl, traveled all the way from her home in that country to Chicago before her sex was discovered.

Maud Rice, 12 year, of Akron, O., was arraigned in court as a stubborn child. While the trial was going on, she stole a penholder from the judge's desk.

Ethel Storaas a telephone operator of Seattle, attempted to dry a pair of gloves on her hands after she had cleaned them with gasoline. They caught fire and she may lose both members.

Julia Kulkia of Cambridge O., bought her freedom and that of her 6 months babe from her husband for \$6. When she attempted to live with her lover she was arrested.

Oak Hill, Ill., women have formed a club to devise means of entertainment when their husbands leave them at home nights while they attend the club.

Mrs. Georgianna Snyder of Philadelphia found two burglars in her cellar. She fought them until the police arrived and, though severely injured, appeared in court against them next day.

Julia Pollett, a Swiss girl, travelled 75000 miles to marry her lover of school days.

Owing to a scarcity of labor in Ogdenburg, Wis. women took their places as teamsters on the new railroad being built.

Miss Joie Collins of Catawagus, Pa., was caught in a fire in her home. She lowered herself 30 feet to the ground, then called to the boy to jump and caught him before he touched the ground.

A will signed by three sisters one of whom died, was admitted to probate at Norristown, Pa., last week.

Mrs. Wm. Fries at St. Louis horse whipped a girl whom she alleged had had been intimate with her husband. When the case came up in court the woman was discharged and the judge fined the girl \$10.

A New York woman, in a destitute condition made an offer to sell any amount of her cuticle to a hospital for skin grafting purposes.

Miss Margaret Sutton of Bloomington, Ia., went into a church in that city and closed the door after her. There was a spring lock on the door. After four hours of imprisonment she discovered a telephone in the pastor's study and summoned aid to release her.

French doctors have discovered a method of removing birthmarks by means of radium.

## A MAN AND A MOB.

### The Way Lyon Playfair Handled the Lancashire Strikers.

During the great labor riots in Lancashire about the middle of the last century the ready resources of Lyon Playfair saved one of the only two mills which remained open at the time. The government was anxious that these two should continue in action, and supplied the workmen engaged with muskets. But a great force of strikers advanced upon one of the two, and it was obvious that the day was lost. The mob meant to wreck the place. Playfair, who was a friend of the owner, appeared in haste among them, keeping the proprietor out of sight. He put the case frankly to the strikers. The gates of the mill were closed, but the numbers of the strikers made them irresistible; hence it was of no use their all going in and wrecking the place. Let a few of them enter the premises, remove the plugs from the boilers, and then without damage to the works, secure their stoppage. Even a disorderly mob, bravely met by a man of courage and tact, will listen. So did this one. Playfair's proposition seemed fair, but might not treachery be behind it?

He immediately put their doubts at rest by offering himself as hostage. He would accompany the deputation while the others kept guard over the works. The men agreed, and Playfair strove with the men chosen. Together they went to the boilers and withdrew the plugs. This stopped the works, but did no other damage. While thus engaged Playfair was able to listen to the story of the leaders, and found many of their demands most reasonable and such that he favored it. It was possible readily to concede them. The little party returned from their innocent wrecking and found the mob honorably preserving order. The strikers gave them a couple of sovereigns with which the buy food, and they returned him three times three in cheers. They remained only one other mill to close, that at Clitheroe, and upon this the strikers now marched. Again they were thwarted, but this time not by pacific means, but by the might of the military.

## SUPERSTITIOUS.

General Grant believed in dreams. Nelson, the English naval hero, always carried a horseshoe with him into battle.

Prince Bismarck of Germany would never sit down to a dinner with this ten at the table.

President Davis of the Confederacy believed that the presence of children brought him luck.

James G. Blaine would never turn back to re-enter his home even if he had forgotten something.

The father of Nicholas II. of Russia guided his actions by the advice of an American spirit medium.

Admiral Farragut says he used to be guided by a still, small voice which told him what to do in battles.

The czar of Afghanistan, the sultan of Morocco and Zanzibar and the khedive of Egypt all maintain official astrologers.

A certain colored gentleman recently saluted a large colored lady of the Amazonian type in the following language: "Yuh lookin' mighty fascinatin' this evenin', Sal."

Sal hauled off and knocked him out. Then, looking him out of an inclination to get up, she said, "Now, yuh jest lay that till I get an' find out what dat word 'fascinatin'' means."

Next day the aforesaid colored gentleman presented the said Sal with a copy of Webster's Dictionary, saying, "I might want ter salute yuh ag'in, so jes please look up the meaning of some of these heah complimentation terms."

Sal promptly refused to accept the present upon the ground that one would have to know the word in order to look it up.

Gowns From the Undertaker's.

"You'll be astonished when I tell you," said a man who knows, "but it's a fact that dressmakers sometimes send to a fashionable undertaker for a gown when they have a hurry order. There was a time when undertakers carried only shrouds in stock, but in this age of luxury the big concern have a line of what are known in the trade as 'ladies' fine burial dresses.' Such materials as silk, tulle, pongee, faille and chiffon taffeta are used for these dresses, and they are made in the prevailing style. The dressmakers know this, and if they can't find what they want in one of the regular shops, they don't hesitate to call on the undertaker."

As He Viewed It.

Stranger (in small town)—I saw by the papers that a boy lives here who was born with no legs and no arms. I am a dime museum manager, and I should like to find him.

Citizen—No use hunting him up. His parents won't exhibit him.

"Why not? Well, it beats all what blessings fall to folks as can't appreciate 'em."

Never Touched Him.

Nodd—Would you mind returning the book you borrowed of me last year?

Todd—Some oop borrowed it of me and hasn't returned it yet. Did you ever see anything like the way some people act about a thing like that? They have no sense of honor.—Life.

## ABOARD A MAN-OF-WAR.

### Life Largely Made Up of Scrubbings, Regulations and Inspections.

The day's programme aboard a man-of-war is calculated to make the boy who wants to run away to sea sit up and think twice. It varies somewhat according as the ship is in port or at sea and under different circumstances, but in any case, from 5 o'clock in the morning till 7:30 at night, it is a rather strenuous round of scrubbings and drills. The recruit realizes very soon that the expression "shipshape" means a good deal.

Starting the morning is a tremendous cleaning time, called "field day," which is followed by a half holiday in the afternoon, and on Sunday morning the captain himself inspects his ship from keel to truck. The marine band is stationed just below on the hurricane deck, and the bluejackets stand on the port side of the quarter deck and the marines on the starboard, all ready for inspection.

But they don't get scrubbings, regulations and inspections. On the larger ships the government furnishes athletic supplies, and each man-of-war has her champion boxer and baseball and football teams. These teams are managed or supervised, at least, by officers, and many an ensign or lieutenant who has won his "xy" at the Naval academy plays shoulder to shoulder with his bluejackets. Such familiarity would have scandalized old Commodore Peter beyond words.—St. Nicholas.

## A PARASITE CREEPER.

### New Zealand's Vegetable Caterpillar is a Most Peculiar Plant.

The most extraordinary object I have ever seen is the New Zealand vegetable caterpillar. The caterpillar is a parasite creeper which first destroys its forest host and then craves it to death and, usurping its skeleton, becomes a tree itself. If the tree seedling is dug up it is found to be sprouting not from a seed, but from the head of a perfectly formed caterpillar.

It is supposed by some that the caterpillar, which on dissection proves to be internally the exact counterpart of its living insect relative, swallows the tiny tree seed while living and, burrowing into the ground, becomes, instead of a chrysalis, the germinating form of the seed, which by some agency turns its unfortunate foster mother into wood.

Others, however, contend the caterpillar itself is produced by the rat, urging in support of their theory that by its burrowing from a seed the shoot would grow out of different parts of the caterpillar instead of invariably growing out of the head.

The insect is recognizable in yellowish, about four inches long and is fully extended. I have seen them freshly dug up and others that have been kept for years, and all exhibit appearance of a perfect insect carved in wood.

The Elevator Eyes.

One of the greatest hardships suffered by men who run elevators in the tall office buildings downtown is the bad eyes they get from the cars. The cars are run at a high rate of speed, and as the men have to look straight ahead of them most of the time, their eyes soon feel the strain of the constant motion.

"I've worked in the subway," remarked one of these elevator men, "and I thought that was pretty bad, but it isn't a patch to the way my eyes feel after a day's work in these cars. If you ever run across an elevator man who seems unusually bad tempered toward the close of the business day, just look at his eyes and you will be apt to forgive him. They generally show the strain that has been put on them for eight or ten hours."

As Exemplified.

A learned professor was dining with the Diltses and the table was set with the best wine that Mrs. Dilts's china closet afforded. The guest was particularly interested in the display and admired it greatly. Picking up the plate in front of him and noting the stamp of the manufacturer on the bottom of it, he remarked:

"I presume you know that china, or the art of making it, was discovered by accident?"

Just then there was heard in the kitchen, where the maid was busily at work, a loud crash.

"Yes," answered Mrs. Dilts, with a pained smile, "and most of it is broken in the same way."

Wigs and Fans.

"There is one thing I want to warn you about," said the wigmaker to the man who was buying his first wig, "and that is the electric fan. Whenever you see an electric fan in motion give it a wide berth. If you don't it is apt to embarrass you. Electric fans and wigs are deadly enemies. Nothing outside of an Indian and a tomahawk will hit a wig from the wearer's head quicker than an electric fan in motion."

A Fair Tale.

Dear little Maude awoke about 2 o'clock the other morning and asked mamma to tell her a fairy tale.

"It's too late, darling," mamma replied. "Daddy will be in shortly, and he'll tell us both one."

Our Language.

"He's the coming man," said the boy.

"Yes; he's one of the best fellows going."

The great republic shall live as long as the poorest citizen freely expresses his personal and political opinion, and no longer.—Baltimore American.

## Behind the Choir Curtain

By VIRGINIA BLAIR.

Copyrighted, 1917, by P. C. Eastman.

There had been an immense amount of irreverence in the choir before the new soprano came. The tenor and the contralto and the bass and the old soprano had flirted from the opening anthem to the benediction, and as they were hidden from the congregation by a green baize curtain had been no scandal, although certain members of the session had complained of weird sounds that had seemed to echo from the organ loft and die in the steeple.

With the advent of the new soprano, however, came a different state of affairs. Both the tenor and the old soprano had flirted from the opening anthem to the benediction, and as they were hidden from the congregation by a green baize curtain had been no scandal, although certain members of the session had complained of weird sounds that had seemed to echo from the organ loft and die in the steeple.

But they don't get scrubbings, regulations and inspections. On the larger ships the government furnishes athletic supplies, and each man-of-war has her champion boxer and baseball and football teams. These teams are managed or supervised, at least, by officers, and many an ensign or lieutenant who has won his "xy" at the Naval academy plays shoulder to shoulder with his bluejackets. Such familiarity would have scandalized old Commodore Peter beyond words.—St. Nicholas.

"Oh, she's too good to be true," the bass told the tenor as they went home together one Sunday in May.

"She is perfect," the tenor declared fervently. "We are a lot of sinners, and she has come among us like a life-saint to make us ashamed of ourselves."

It was discovered after three weeks that the bass had given up smoking.

"There's nothing half so sweet in life as love's young dream," she wiped her eyes as she said it, and the bass found himself weeping and their friends.

"Do you really think that young love is as steadfast as the love of old friends?"

"I have just found that out," said the bass and squeezed her hand under the hymn book.

And under the hymn book of the soprano the hands of the two young lovers met.

"The beautiful part is that you told me in church," said the soprano, with her blue eyes lighted with divine fire.

"Yes, that is the beautiful part," said the tenor, who enters a regiment of the army, barely able to read and write, comes out, if he be a man of ambition and industry, at the end of three years in possession of the fundamentals of an English education. His official stands to him not only in the relation of military director, but in the relation also of a teacher and a friend. There is no career open to an American boy, unless it be that of a teacher, which offers a large and a certain opportunity that of the army or navy officer to minister to the service of men.—President H. S. Pritchett in Atlantic.

The Size of the Sea Horse.

The popular mistaken idea as to the size of the sea horse is a constant source of amusement to the guards at the aquarium. According to them, visitors, after looking at the big sea cow and peering into the tank where the turtles lead a placid life, next begin to hunt around among the inhabitants of the big floor tanks to find the sea horse.

"It's rather not talk about such things in church if you don't mind," the soprano said softly, and the contralto agreed hastily and gave her earnest attention to the preacher.

"But tell me one thing," the tenor said to the contralto confidentially in choir practice, "how are we going to ask her? Her mother walks home with her after all the services, and she hasn't asked us to call, and she won't talk about secular things in church and there you are."

"Is love a secular thing?" the contralto questioned sentimentally.

"But I think it is divine," the tenor said.

Things came to something of a climax when the soprano's mother was taken sick.

"Now is your chance," said the contralto, all in a flutter, as she leaned toward the tenor.

But the bass was already beginning the prayer.

"I had hoped you might let me," the tenor said as he stammered over two chairs to get to her.

"Why not both of you?" said the soprano. "It's on your way home, and you will be company for each other the rest of the way."

"Oh, the aggravation of her!"

grasped the tenor as he went to get his hat, and the bass said things to himself in a dark corner.

The soprano invited them in, and her mother sitting in a big chair, and they had tea and muffins served by the angelic hands of the soprano, who seemed more desirable than ever in this setting of domesticity.

"We might as well meet it like men," the bass told the tenor as they went home afterward. "We both love her, and if we are ever going to get a chance to ask her one of us will have to stay away next Sunday night, and the other one can take her home."

"Well," the tenor agreed, "but how shall we decide who will take her?"

"I'll toss a nickel," said the bass. "Heads I win." And he forthwith flipped one, and it turned up tails.

"Just my luck," said the bass gloomily, "but if you have the good looks I have the brains, and I shall know how to plead my case when the time comes."

The tenor was jubilant.

"I shall have first chance," he said.

When he talked to the contralto on Sunday morning the bass was not satisfied. The tenor is young and handsome, and I won't be in it."

The contralto comforted him.

"If I had the choosing I should pick you," she said, and she squeezed him in her voice made the bass turn and look at her. She had on her new summer hat, and her hair was prettily brown where it had grown out, and there was about her an effect of youth and jauntyness that belied her forty years.

But, and her hair was prettily brown where it had grown out, and there was about her an effect of youth and jauntyness that belied her forty years.

"You are always my good friend," he said and squeezed her hand ever so gently as he rose to sing a duet with the tenor.

In the solo part the tenor's voice rang out with such a note of triumph that the soprano caught her breath as she heard it. It was as if he sang, "I love, love, love" and yet the words were sacred. Within the breast of the little soprano something new stirred, something that was touched with the breath of divinity, so that it seemed no sacrifice for her to think of it in church.

"How beautifully he sings!" she heard it. It was as if he sang, "I love, love, love" and yet the words were sacred. Within the breast of the little soprano something new stirred, something that was touched with the breath of divinity, so that it seemed no sacrifice for her to think of it in church.

## UNLESS.

Lassie smiled softly. "Ah, Guy, you do not understand the depth of a woman's love," she said. "Indeed, the memory of our brief happiness will be my paradise, the brightest star in all my sky. When you have gone---halting over the word---I must think more of my old father. Poor old father! I have neglected him lately, but there will be plenty of time to make up to him for it. And you---you will marry soon; she has waited long and patiently---"  
"How can you talk so calmly," Guy interrupted hoarsely, "when the very thought of leaving you, of making this other my wife, is torture unbearable to me? After all, a woman's love is but a poor thing when compared to the love a man gives." The next moment his arms were about the little trembling figure, and he was pressing hot, penitent kisses upon the pale, flower-like face.  
"Forgive me, dear heart!" he murmured, contritely. "I am cruel!"---his face almost hid in my heart to carry you off, right away from everyone---to have you and hold you for my very own, and set the world at naught? Are you afraid?"---feeling the slight form shiver in his embrace. "Say, child, you are safe. I would not harm a hair of your head. You are so young," he continued in low, tender tones, looking deep into her steadfast eyes, "that in time forgetfulness may come to you, and you may learn to love Bill Adams. You know he loves you, Lassie"---drawing her closer in quick jealousy.  
"I cannot tell what might have been," Lassie answered, a trifle wearily; "but this I do know that when first I saw you, lying cold and helpless down on the beach, where the tide had left you, I felt what the future held for me, and I do not complain. Perfect love asks nothing---expects nothing," she said softly, and so I may go on loving you to my life's end, and no one will be the worse. And if things should be very hard for you, if the clouds seem very black, just whisper to yourself that somewhere there is one heart whose every beat is for you."  
"Dear heart---dear heart!" said all Guy could say as he framed her face in his two hands and fastened his eyes upon it.  
Suddenly a new hope was born in Lassie's heart, and she cried eagerly:---  
"Perhaps when she learns that you do not really love her she may release you. Oh, Guy she cannot keep you when she knows you do not love her!"  
"You do not know Annette Feather-sham," Guy said, fiercely, "she is not like you, dear, and love does not enter into the bargain. But enough of her!" he cried, impatiently. "We have only a few minutes left for each other. Put your arms around my neck, and lay your lips to mine. You have been very shy, little Lassie, just like a frightened sea-bird; but now that it comes to fare-well---oh, good heavens!" he burst out passionately, as he gazed into the still, white face of the girl he loved, "it is too bitter!"  
Lassie opened her eyes and tried to smile into his haggard face.  
"See," she said, "I am quite brave. Do not fear for me. I have had my summer-time, and the winter must follow; but I have gathered the roses freely, and they will always be fresh in my heart. Now say good-bye---say it quickly, Guy---for, parting is worse than death." A sob choked her utterance, and with a stifled cry, she hid her face in his breast.  
For a moment he held her so; then lifting her head, he kissed her, lingeringly, solemnly, and put her from him.  
Earth, sea and sky were flooded in glory as the sun sank to rest "neath a canopy of golden beauty tipped and bordered with crimson and purple, like the royal robes of some earthly thing. Deeper and deeper glowed the radiant orb of light, until the murmuring waves took unto themselves a lesser glory; and all the mighty ocean was wrapped in scarlet splendor.  
"At the foot of one of the gullies at Lassie, watching the sunset, and by her side stood Bill Adams.  
He was looking with the watchful eyes of a faithful dog upon her small white face faintly touched with the sky's reflection, and as he looked a sigh of bitterness and heartache escaped his lips.  
Lassie heard and her great brown eyes

grew full of trouble as she put out her little thin hand and touched his arm.  
"Bill," she said gently, "why do you fret so? Is it any use fighting against what has to be? Besides"---dreamily---"I do not wish it otherwise."  
"But what of me?" Bill cried, unable to control his love and longing. "Oh, my dearie, I would have been so good to you---so tender! The force of my love would have compelled yours, and I would have been patient; I would have waited years."  
"It would have been no use, Bill," Lassie said, shaking her head.  
"No, not now---not after Guy Wind-ham. Hang him, the coward!"  
Lassie half rose to her feet, a burning flush dyeing her white cheeks. Then she sank back again, her face growing paler and paler and her eyes wide and very bright. After a short pause she spoke.  
"Bill, you must never speak like that again," she said, with quiet determination. "I think if you guessed how it wounds me you would spare me. Listen!---her voice sinking to a whisper. "I have not long to live---only a few days, maybe. Nay---holding up her hand---"let me speak now, then we will banish the subject altogether. I have never been strong---you know my mother died quite young---and when she---when we had each other good-bye I think my heart broke, though I tried, oh so hard to be brave and strong. Now my father is dead and there is nothing more to live for. For weeks and months after Guy went I hoped against hope that somehow he would be able to come back to me, but twelve months have passed, and now hope is dead. My dream is o'er, and so is my life. Do not blame him, she repeated earnestly, laying both hands on his rough sleeve, "and when I am gone think kindly of us both."  
Bill Adams stood with clinched hands and set teeth; in his heart a passionate revolt, in his soul a wild longing for the love that was denied him.  
"If I could do something," he said at length, moving restlessly. "Will nothing keep you with us a little longer?"  
"No, there is nothing to be done: I am just waiting patiently for the end," Lassie answered calmly. "Now help me indoors, old friend. See, I lean on you to the last"---smiling into his face.  
"Look! the sun is set, and the night air grows chilly; it is time for me to rest."  
Up the uneven pathway which led to the churchyard on the cliffs Guy Wind-ham sprang with buoyant footsteps. His heart was singing for very gladness, and his lips were a smile of joyous anticipation.  
"I wonder will she be at the wicket?" he murmured, thinking aloud. "She said I should find her waiting, and my little Lassie is too true to change."  
Then he laughed softly to himself, as a fancied picture rose before his mental vision.  
"I can see her eyes grow darker and deeper, I can see the rich blood in her cheeks, I can almost hear the cry of surprised delight with which she greets me. What a dreary year this has been. But now I am free---free! Surely---yes, surely, she is standing there!" And he quickened his footsteps, only to draw back as he recognized not Lassie, but Bill Adams, standing, a solitary figure by the churchyard gate.  
At that instant Bill looked up, and met Guy Wind-ham's glance.  
"You!" he exclaimed, a light flashing over his gloomy face. "You!"  
"Yes, it is I," Guy replied. "I have come back to Lassie, I am free at last, and so I have come to claim her. Where is she?" his voice trembling with eager emotion.  
Bill dropped his head upon his arms, felled over the gate, and answered in dull, heavy tones:---  
"You are too late!"  
"Too late?" Guy repeated sharply, a strange fear tearing at his heart-strings. "What do you mean? Has she forgotten me soon? But where is she? I must see her if only to hear the truth from her own lips. Where is she?"  
Bill pointed with a trembling hand towards a little grass-grown grave, not many yards away, a simple white stone marking the head.  
"She is there," he said unevenly.  
Guy started as though a bullet had struck him; every drop of blood drained from his face, leaving him pale as death; then, with a bound, he reached Bill's side and gripped his shoulder.

SYNOPSIS OF  
**Canadian North-West**  
**Homestead Regulations.**

Any even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.  
Application for entry must be made in person or by the applicant at a Dominion Lands Agency or Sub-agency for the district in which the land is situated. Entry by proxy may, however, be made at an Agency on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.  
The homesteader is required to perform the homestead duties under one of the following plans:  
(1) At least six months' residence upon and cultivation of the land in each year for three years.  
(2) A homesteader may, if he so desires, perform the required residence duties by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of his homestead. Joint ownership in land will not meet this requirement.  
(3) If the father (or mother, if the father is deceased) of a homesteader has permanent residence on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of the homestead, or upon a homestead entered for by him in the vicinity, such homesteader may perform his own residence duties by living with the father (or mother).  
(4) The term "vicinity" in the two preceding paragraphs is defined as meaning not more than nine miles in a direct line, exclusive of the width of road allowances crossed in the measurement.  
(5) A homesteader intending to perform his residence duties, in accordance with the above while living with parents or on farming land owned by himself must notify the Agent for the district of such intention.  
Six months' notice in writing must be given to the Commissioner of Dominion Lands at Ottawa, of intention to apply for-patent.

Rates for yearly or quarterly contracts on application.

All Communications intended for publication must be accompanied by the writers name and address.

GREETINGS PUBLISHING Co. has a well equipped Job Printing Office, and turns out work with neatness and despatch.

GREETINGS PUBLISHING COMPANY  
WEDNESDAY, OCT. 23, 1907

### HON. W. S. FIELDING.

He is the man of the hour in the Maritime Provinces. To do him honor in this his quarter of century jubilee of his political life, the thousands from all parts have hastened to Halifax, the city of his birth. Twenty thousand it is said, thronged the streets, as, accompanied by his chief Sir Wilfrid Laurier, and other members of the Cabinet, he was conducted to Empire Rink where 8000 thronged the building, and many more were obliged to remain without.

The tribute is a great one, but then he is a great man. As Finance Minister he has been a marked success, occupying the position longer than any predecessor and doing for the Dominion what none have ever done. When he took office there were annual deficits amounting to about a quarter of a million dollars; during the eleven years he has held office, this record of deficits has been changed to a surplus of about eight and a half million dollars per annum.

Yes, independent of politics we feel that it is but right that we should join our tribute of praise to such a man.

He is to the Laurier Ministry what Sir MacKenzie Bowell was to the MacDonald. Indeed these two men are similar in many respects while they stand out in contrast with Cartwright and Foster who in turn occupied the office.

Because of his position Hon. Mr. Fielding is much before the public, and thus far his bitterest political opponent can find but little to say against him. His budgets are clear, though he has no Gladstone rhetoric with which to gild his figures.

He is a high type of business man and the Dominion has reaped the benefit of his fine ability. His "Fielding Thrift" will stand out on the pages of Canadian history as one of the leading contributions to our Canadian prosperity.

When it shall become known we doubt not that the French Treaty will stand out as one more expression of the business acumen of our Minister of Finance, and will mark an era in the history of the country. Proud may any country be of such a man, and such a man may be justly proud of the people's continued confidence.

### HON. WM. PUGSLEY.

Coming from Nova Scotia where he honored the gathering assembled to lay tribute before Scott's representative, Canada's Premier comes to New Brunswick to honor his youngest associate in the Cabinet—Hon. Dr. Pugsley—Minister of Public Works.

Mr. Pugsley is yet to be tried in Federal politics but, judging from his past record in Provincial matters, we feel that

HON. WILLIAM PUGSLEY

The Premier has made no mistake in calling him to the responsible position of Minister of Public Works.

He is not one of those brilliant men this Province has furnished the Dominion to help mould Canada's destiny.

He is an able lawyer, one of the ablest of the Dominion, a forcible and eloquent speaker, a clear-headed business man, and without doubt, will make a success of his department. He was one of the speakers at the Fielding Celebra-

tion and won the heart of staid Halifax by his assurance that though coming from St. John, he would not forget Halifax in the work of his department. It is the purpose of his Sussex admirers to give a banquet in his honor in the near future, and the men of Sussex will honor themselves by so doing.

### Rev's F. M. Young and A. B. O'Neill Have Silver Jubilee.

Two of our St. George boys have recently celebrated the silver jubilee of their priesthood. They are the Rev. F. M. Young now of Parrboro, N. S., and the Rev. A. B. O'Neill of Notre Dame, Ind.

In their earlier boyhood days they were boys together in the schools of the day, but these being unequal to the demands of such students their ways began to diverge, the former going to Fredericton in 1869 and the latter to Memramcook in 1872.

After taking a full preparatory course, followed by a complete B. D. Theological course and post graduate Ph. B. course Mr. Young was ordained into the Baptist ministry at Antigonish in 1882, since which time he has been in active service without any interruption. His pastorates have been, Antigonish, Dorchester, Bridgetown, North Sydney and Parrboro where he has been stationed for over four years.

His best work was at Bridgetown, N. S., where he continued as pastor for about twelve years. When he left in 1900 this church was numbered among the strongest and best in the Maritime Provinces. At different times large city churches have sought his services as pastor, but thus far he seems to have preferred the larger towns. At his silver jubilee the following figures were given, Sermons—2731. Addresses 1290. Received in fellowship, 740. Married, 400. Banns, 621.

Such are some of the visible results of a very busy life.

Besides his work as a pastor, Mr. Young has been engaged largely in literary work, and now having reached his fiftieth year, he is at his best both preacher and writer. As a preacher he is counted one of the brightest in his denomination.

On Monday of this week the Rev. Arthur Barry O'Neill, C. S. C., assistant editor of the Ave Maria, celebrated the silver jubilee of his priesthood. Father O'Neill is well known to the New Freeman readers who will be sure unite with us in offering congratulations to the Rev. Jubilarian.

Born in St. George, New Brunswick, in 1858, Father O'Neill entered St. Joseph's College, Memramcook, N. B., in 1872; and as a student, student-teacher, professor and director of studies, spent in that institution more than half his life. Immediately after his graduation with highest honors in 1877, he entered the novitiate of the Holy Cross Congregation, made his religious profession in 1879, and was ordained priest in Memramcook by the late Bishop Sweeney, on Oct. 7, 1882.

The brilliant promise of his student days was speedily realized in the career of the young priest. Within a few days he achieved exceptional distinction, not only as an efficient educator, but as an eloquent pulpit and platform orator. In the early nineties he spent two years at Notre Dame, Ind., filling the chair of English Rhetoric at Notre Dame University and acting as assistant to the Rev. Father Hudson, editor of the Ave Maria. Since that period he has been a constant contributor to the columns of that magazine, to whose home at Notre Dame he returned in 1904, as assistant editor without any professional work at the University.

Father O'Neill became known to the majority of priests in the United States and Canada in 1893-4-5, as the author of the series of papers on clerical topics contributed to the American Ecclesiastical Review. The perfect literary form of these articles, together with the lightness and touch and an abiding sense of humor noticeable therein, won for the young priest praise from authorities whose commendation was an honor indeed. Several years later, in 1899, he published a volume of poems, "Between Whites," a book in which the best Catholic reviewers accorded uniformly flattering notices, and from which Orby Shipley selected half a score of poems for reproduction in "Carmine Mariana," an English anthology in verse in honor of and in relation to the Blessed Virgin Mary. In Dr. O'Hagan's volume, "Canadian Essays," Father O'Neill's poetry is credited with "much of simplicity and purity of the poetic genius of Father Faber," and Maurice Francis Egan is on record as stating that "Between Whites" is worthy of a place among books of sweetness and consolation. It is "of the spirit pure, of the heart purified."

While the bulk of Father O'Neill's literary work has been done for the Ave Maria, he has also been a contributor to the Catholic World, Donahue's Magazine, the Rosary and other Catholic publications; and a few years ago wrote during some sixteen or seventeen months a weekly leader for the New Freeman—New Freeman.

## BY THE WAY

The fellow who knows it all has much to learn.

Don't let your political ambition overtop your discretion.

The serious feature about the present temperature is the scarcity of coal.

Get the new hotel ready for next summer, and every one will be happy.

Go back to the town meetings. They were always our model institutions.

What is needed now is a good thick white blanket to go with the temperature.

There are a good many ghosts walking about in Charlotte Co. politics nowadays.

It is Squire Wm. Hickey, Geo. McVicar and I. E. Gillmor. May the best man win.

If the telephone and telegraph poles were painted it would add to the appearance of the streets.

The highway act went through the house humming. Its tribulations are now coming with rumors of an election.

Not many years ago the municipal elections were very interesting, and spirited contests were held in nearly every parish.

If you wish to become a useful politician associate and confer with the people. Edward Everett Hale's advice to talk with somebody every day that knows more than you do, is always good counsel. It not only enlightens a young man, but it helps to take the conceit out of him.

The man who is worthy of being a leader of men will never complain of the stupidity of his helpers, of the ingratitude of mankind nor of the inappreciation of the public. These things are all a part of the great game of life, and to meet them and not to go down before them in discouragement and defeat is the final proof of power.

The long winter evenings will soon be here and some form of amusement should take the place of walking "round the square." The young folks enjoy each others company, and with the assistance of the old folks, an effort can be made to provide entertainment that will make the evenings a source of pleasure and profit to everyone.

The figures indicating the cost of running the town will compare very favorably with that of other towns. The citizens have it in their power to select the ablest men to represent them, and if the efforts of these representatives are not attended with good results, don't sit on the head of a barrel and condemn the work of your own appointments, you have the same power heretofore used to select other men, and compel consideration of town affairs to nearly meet your views. Don't be inconsistent.

### ADVANTAGES OF YETANG.

Railroads have 45 miles less haul to seaboard than any other Port in Canada.

Sea Voyage 40 miles less than to St. John, N. B.

No Currents in Harbor or approaches. No Ice. Open Year Round. No Dredging.

Dangers of Bay of Fundy eliminated. Insurance less than any Port in New Brunswick.

Pilotage and Harbor Dues less than any other Ports.

Approach by land for railroads, 2-10 of 1 per cent.

The depth of water allows Steamships to lay aloft at Wharves, and the entrance is such that any size Steamer may enter at any time of tide.

Four coal stoves for sale at Capt. Mahoney's. Anyone requiring a stove would do well to look at these.

The Pennfield Fair was held on Thursday, and was well attended by many people from the surrounding country. The exhibition of cattle and agricultural products was not as large as in previous years, but first class as to quality. The list of prize winners will be published next issue.

Yours for biggest values,

## HANSON BROS. St. George

Full line of Regent Brand Ready-to-Wear Clothes  
High Class Men's Furnishings

## Overcoats Par Excellence

It's quite an art to make an overcoat as it should be made. To have it stylish and at the same time to have it so well proportioned and the weight so evenly distributed that it will fit well and feel warm and comfortable without being burdensome.

For many years the makers of "BROADWAY" Clothing have excelled in this art of overcoat making and each season their garments have shown notable improvement. This year's overcoats are as near perfection as it is humanly possible for the best skill and care to make them. That's why we urge you to get your Overcoat here.

You'll get Style  
You'll get Comfort  
You'll get Service  
You'll save Money

It is simply a matter of pleasing your individual taste and meeting your idea of expenditure—for no matter what you select or what you pay you can't go wrong here. You're bound to get a satisfactory coat and you'll be sure to save from 25 to 30 per cent. of what you'd have to pay for as good a coat anywhere else.

## LOCAL AND SPECIAL

Hallowe'en only one week away. Insurance agents have been "doing" the town the past ten days.

Owing to the cold and damp weather many people are affected with influenza. Potatoes are showing a good yield, but on account of rot, there will be few to store.

At Gagetown, Oct. 17th, Col. McLean received the general nomination for the federal parliament.

The ratepayers should take notice that the election of county councillors will take place on Nov. 5th.

Mr. Geo. Franley was in St. John last week, where he purchased a big line of fur goods, which will be at once put on sale.

Councillor Geo. McVicar will again be in the field at the coming election. Mr. McVicar will go before the people on his record.

It is reported that the little island at the head of Lake Utopia, has been sold to Deer Island parties, who will build a summer cottage there.

Thomas Muherin of Lepreau has been appointed a labor act commissioner for the parish of Lepreau, in place of Samuel Stafford, deceased.

Monday Oct. 14, was the twenty-first anniversary of Eastport's last great fire, which destroyed the entire business portion of the city.—Sentinel.

Mr. A. G. Stewart of this town, shot a fine moose at Bonny River, on 16th inst. The carcass weighed 750 lbs., and was sold to H. McCranan & Sons.

Angus Turner, of Elmsville, will sell at auction on 29th inst, at his residence, all his stock, farming utensils, hay, oats, straw and household goods, etc.

A well developed strawberry was placed on our desk one day this week by Josie Nooding. This little Miss has found a number of green strawberries and blossoms lately.

Mr. and Mrs. Simeon Tatten have issued invitations to the marriage of their daughter, Ada Belle Winifred to Mr. William Hugh Boyd on Wednesday afternoon, Nov. 6th, at their residence, Pennfield.

Under the supervision of Mr. N. Meating the lower bridge is now in condition for foot passengers and light trucks to cross safely. Assisted by Arthur Dove and others, who worked like beavers, Mr. Meating deserves the thanks of the citizens in this effort for their comfort and convenience.

Friday evening a large party of the young people of the town assembled at the rooms of the Drageogian Club and participated in an evening of great pleasure. Music, dancing and games helped to pass away the time too quickly. It was a late hour when the happy affair came to a close and all present voted it the best yet.

A very successful chicken supper was held in Drageogian hall, Tuesday eve, 15th, under the auspices of the Catholic church. The attendance was very large, and enjoyable in every way. The ladies are to be congratulated on their efforts on this occasion, as the arrangements were perfect and everything was done for the comfort and satisfaction of every one. The receipts were large.

A despatch from Ottawa says that the N. B. Southern Railway has given notice that it will ask parliament to declare it a work for the "general advantage of Canada," to give it authority to build a bridge across the St. Croix at St. Stephen.

This is the first time that the question of a railway bridge across the St. Croix has been discussed, but hitherto it was prevented by the people of St. Stephen, who objected to its proposed site. By building across the St. Croix, the N. B. Southern, and this line is looked upon now as closely allied with the C. P. R., would have direct connection with the Washington Co. Railway, and a second and a much shorter railway route would then be opened up from St. John to Boston.

Like the Maine Central, the Washington Co. railway is under control of the Boston and Maine, which in turn is part of the New York, New Haven and Hartford system.

The executive committee of Fishermen Union will meet at St. George Wednesday October 30th.

When the weather conditions are taken into consideration, the state of the streets is surprisingly good.

Miss Louise Riordan is to be congratulated on her success in the winning the beautiful doll at the supper Tuesday evening.

Palmer Bailey met with an accident on Monday while running the surface machine in Epps, Dods & Co's mill, and as a result has a badly bruised finger.

Unusually large orders are coming in to the granite concerns. This industry has been kept busy all summer. As cold weather approaches it is very encouraging to know that prospects are so good.

Several residents of Calais are likely to be residents of New Brunswick for some time. The Maine Supreme Court has imposed fines of \$200, with imprisonment of sixty days in jail, on a number of violators of the prohibitory liquor law.

A game of base-ball was played Saturday when the Young Canadians went down to defeat at the hands of Grade 8. Seven innings were played, Battery Grade 8 Maxwell and Irish, Young Canadians Parks and Johnson, Umpire Edwin Hibbard. A good sized crowd was present to witness the contest, the close of the base-ball season.

Mr. Simmons contractor, has been in town and has seen the last of the details of work in connection with the bridge, attended to. Wet weather has delayed the work considerably, but the steel is not yet here, and it may be some weeks before the bridge is open for traffic. Mr. Simmons has many other contracts and has earned a reputation for doing excellent work.

The damage done to the numerous fish weirs along the American and Canadian shores during the great storm of Tuesday of last week is said to have been greater than at first reported, many of them being left wholly unfit for further business this year, and as the season is now so far advanced, it would not pay to make the large repairs needed, consequently many will be left until the coming spring before receiving attention from their owners.

The regular meeting of Court Martine of the Independent Order of Foresters, took place in their rooms on Queen street on Wednesday evening. The death claim of John Cowie was before the meeting. It was reported at the time Mr. Cowie was drowned that it was due to his being intoxicated, and his brother Foresters wish to correct this impression. Mr. Cowie had taken typhoid fever and was ordered by his doctor to go to his home in St. John from St. Stephen and in boarding the boat at St. Stephen he became dizzy and fell overboard.—Federation paper.

## BUSINESS LOCALS

The dressiest lot of Overcoats in town at Jas. O'Neill's.

A few snaps at Hanson Bros. 25c. and 50c. Ties at 15c. 50c. and 75c. Fall Caps at 25c. and 50c.

**JOHN MARSHALL A MUCH MARRIED MAN.**

It is alleged against Jas. Marshall, a 61 year old man of New York, that he possesses 100 wives, scattered about America. This was the charge brought against him by Marjorie Friel, who has him arrested for obtaining all her goods and chattels by false pretences. Marshall had posed as the father of Mrs. Edith Ross' who ran a big matrimonial agency in Philadelphia, and it is believed that he was the guiding spirit in the concern. When Marjorie Friel invited the police into Marshall's home they made a remarkable haul. They seized no fewer than 2,000 letters answering Marshall's advertisement, "Wanted a Wife, wealthy refined, elderly gentleman, alone, generous, will make a devoted husband." Among these love missives were several of \$20,000, who were pining for a home and children. One wrote that she had a husband, but was tired of him and wanted a new one, with money enough to divorce the old. A widow confessed to being fair, and forty, but said she was lonely. One girl in her teens, admitted she was not beautiful but virtuous, and "beauty" was only skin deep, anyway. Farmers' daughters by the hundreds, wrote that they were sick of country life, servant girls pleaded tired of the kitchen, school teachers declared that they were tired of teaching the young idea to shoot. Marshall had classified all those with dowries at the top, those with the natural goodness at the bottom.

**DRINK PLENTY OF GOOD, PURE WATER**

"The people here do not drink enough water to keep healthy," a well known authority. "The numerous cases of stomach trouble, kidney and bladder diseases and rheumatism are mainly due to the fact that the drinking of water, nature's greatest medicine, has been neglected. Stop loading your system with patented medicines and cure-alls, but get on the water wagon. If you are really sick why, of course, take the proper medicines--plain common vegetable treatment, which will not shatter the nerves or ruin the stomach."

When requested for such a prescription for the cure of rheumatism and kidney trouble the answer was: You must make the kidneys do their work; they are the filters of the blood. They must be made to strain out the blood the waste matter and acids that cause rheumatism; the urine must be neutralized so it will no longer be a source of irritation to the bladder, and, most of all, you must keep these acids from forming in the stomach. This is the cause of stomach trouble and poor digestion. For these conditions I would suggest the following prescription which is composed of only vegetable ingredients, which can be obtained from any good prescription pharmacy. Any one can mix them by shaking well in a bottle. Flax Extract of Dandelion, one-half ounce; Compound Kargon, 1 ounce; compound syrup Sarsaparilla, 3 ounces. To be taken in teaspoonful doses after each meal and at bedtime, but don't forget the water. Drink plenty and often. This valuable information and simple prescription should be posted up in each household and used at the first sign of an attack of rheumatism, headache or urinary trouble, no matter how slight.

A weak stomach, causing dyspepsia, a weak heart with palpitation or intermittent pulse, always means weak Stomach nerves or weak Heart nerves. Strengthen these inside or controlling nerves with Dr. Shoop's Restorative and see how quickly these ailments disappear. Dr. Shoop of Racine, Wis. will mail samples free. Write for them. A test will tell. Your health is certainly worth this simple trial. Sold by All Dealers.

**SPANKED A MOOSE AND PAID FOR IT**

A despatch from Patten, Maine, says: A tenderfoot sportsman, who didn't know any better, slapped a cow moose on the rump with a barrel stave, and wondered why the indignant animal wrecked his camp, chased two pretty women up a tree, and terrorized the whole party until the guide returned. The foolhardy sportsman was L. B. Longstreet, of Boston. One of the women was his wife and the other Miss Alice Fisher's niece. In company with J. T. Barbour, also of Boston, Mr. Longstreet pitched camp in the moose timber a fortnight ago to study nature and fish. Mr. Barbour and the guide had left

camp for an afternoon's trouting, when Mrs. Longstreet reported to her husband that a strange animal, looking something like a cow, was tramping the croquet grounds in the rear of the tents.

Mr. Longstreet removed his glasses, placed them in his pocket and swatted the moose where he would have spanked a disobedient child. Next instant he received a solar plexus blow that sent him sprawling.

Mrs. Longstreet shouted in fright. The shout was extremely ill-advised, for it attracted the attention of Mrs. Moose to her, and with a low, hollow bellow she gave chase. The pursued women saw little chance in flight, so they negotiated two low-limbed spruces, where they clung panting and shrieking, while Mr. Longstreet shinned another.

Being unable to reach the trio, the moose started in to wreck the camp, and she made a good job of it.

For a couple of hours the party remained there. Then the guide and Mr. Barbour appeared. The guide took in the situation from a distance, and managed to sneak up to the overturned tents unobserved. Procuring a two-foot looking glass from Miss Fisher's demolished "boudoir," he got a line on the descending sun, and flashed the rays upon the moose. The effect was instantaneous. The animal started, blinked, turned tail and ran, calling to her young to follow.

**COLLINS AND THE DEATH PENALTY**

Moncton, N. B., Oct. 15.--That many people in Albert county believe that Thomas F. Collins should suffer the death penalty for the murder of Mary Ann McAuley is shown by the fact that the petition asking for commutation of his sentence to imprisonment for life is not being signed as anticipated. The petition has not yet reached many parts of Albert county, but it has gone through Hillsboro and up as far as Coverdale and a few days ago it is said there were only eighty names attached. Collins, it is said, has not yet given up hope. He still maintains his innocence of the crime. In jail lately he has spent much time in writing letters thanking those who have worked for him and shown him kindness during his long imprisonment.

**Hem Wing, Laundry,**  
Fred Hem, First-Class Laundryman. Work Done Quickly. Laundry finished on Wednesday, Friday and Saturday.

**Boyd's Hotel,**  
ST. GEORGE, N. B.  
First-Class Livery and Sample Rooms in Connection.

COINS THAT ARE BASE

Metals and Methods Used in Making Counterfeits.

HOW THEY MAY BE DETECTED

Spurious Coins Cannot Stand the Tests of Weight, Diameter and Thickness—Only Pieces That Are Swathed, Plated or Filled.

The most dangerous counterfeits are struck from a die and are usually imitations of gold coins. Molds of various kinds are extensively used, but counterfeits so made are inferior to those made with a die.

In counterfeits made from a mold, the metal is usually of a different composition than that of the genuine coin.

Among the most dangerous counterfeits of gold coins are those of a composition of gold, silver and copper.

Various metals are used by counterfeiters, principally platinum, silver, copper, brass, antimony, aluminum, zinc, type metal, lead and the numerous compositions.

Among the most dangerous counterfeits of gold coins are those of a composition of gold, silver and copper.

They are a low grade gold, and the acid test shows they lack the fineness of standard gold used by the United States mint, which is 900 fine, or 21.9 carats.

These counterfeits average from 400 to 800 fine. Platinum counterfeits are dangerous, as the metal used gives required weight, and they are heavily silver plated, with fair ring, and some are only slightly below the standard weight.

The most dangerous counterfeit of silver coins is made of a composition of antimony and lead, the former metal predominating. These counterfeits are of the dollar, have a fine appearance, are heavily silver plated, with fair ring, and some are only slightly below the standard weight.

Some pieces among the smaller coins are made of brass, struck from a die, and when heavily plated are fair imitations. They lack required weight, except in a few instances. Counterfeits of type metal, lead and other compositions are much lighter than genuine.

Those having required weight are much too thick.

Genuine coins of all kinds, for the sake of gain, are tampered with in various ways. These operations are confined almost entirely to gold coins, which are sweated, plugged and filled.

Sweating is removing a portion of the gold from surface of coin. The process does not interfere with the ring, and as the portion removed is generally slight the coin is left with a very fair appearance, weight only being defective. The principal method of sweating are the acid bath, filing the edges, and the operator finding a profit in the small quantities of gold removed from numerous pieces.

The average reduction in value of coins subjected to these processes is from one-twentieth to one-tenth.

Plugging is done by boring holes in the coin, extracting the gold and filling the cavity with a cheaper material. The larger coins—double eagles, eagles (twenty and ten dollar pieces)—are used for this purpose.

The small surface of the plugging material, where it shows on the edge of the coin, is covered with gold and the reading retouched with a file or machine.

The average loss in value to coins treated in this way is from one-eighth to one-sixth. Coins of this kind are very dangerous, as they are perfect in appearance, only the edges having been tampered with.

Filing is most commonly done by sawing the coin through from the edge or reading, removing the interior portion and replacing it with a cheap metal. Coins of all denominations from quarter eagle to double eagle are subjected to this process. When platinum is used to replace gold extracted the coin has same weight as genuine. By this process coins lose four-fifths of their value, as the original surfaces are left only of paper thickness.

When edges have been covered with gold and reading restored the coin has the appearance of being genuine, having correct size and weight and a fair ring. Sometimes the covering of gold on edges is so thin that filling can be distinctly seen when other and less costly filling than platinum is used coins are of light weight and have a bad ring. If of correct weight they are too thick.

Another method of filling is sawing the coin partly in two, from edge of reading on one side, leaving a thin and thick portion. The thin side of the coin is turned back and the gold extracted from center of thicker portion. The cavity is filled with base metal and sides pressed back into original position and soldered or brazed together. It is difficult to give average loss to coins treated in this manner, as hardly any two seen have the same amount of gold taken from them.

For detecting counterfeit coins compare impress, size, weight, ring and general appearance with genuine coin of same period and coinage. The three tests of weight, diameter and thickness should be applied for it is almost impossible for the counterfeit to comply with these three tests without being genuine metal.

HE QUOTED ST. PAUL.

A Bishop Blunder and the Clever Way It Was Corrected.

A certain bishop of one of the middle states is described as a man who possessed great learning, but had not the saving sense of humor. In "Reminiscences of Bishops and Archbishops" Bishop Potter gives an instance of the absence of this quality.

It happened on one occasion that an episcopal election had come up for review in the house of bishops, and questions as to the bishop elect were being asked and answered with considerable freedom. A bishop who knew the bishop elect in a very intimate way was on his feet and was being catechized, when a bishop called out, "What kind of wife has our brother elect?"

"His present wife," began the bishop, "was challenged, when the middle state delegate sprang to his feet.

"One moment," he cried. "Do I understand my brother right? Did he say 'his present wife,' and am I to understand that by that phrase he means to imply that the brother elect has had a previous wife? Because, so, I do not vote for his confirmation. St. Paul says, 'A bishop must be the husband of one wife.'"

For a moment the house, in which were a number of bishops who, having been bereaved of their earthly partners, had supplied their places, sat still in stunned silence, until the prelate, whose sense of humor was as keen as the last speaker's was feeble, rose in his place and said, "Do I understand that the bishop regards the language of the apostle which he has just quoted as mandatory?"

"Certainly," exclaimed the man who had objected.

"Very well, then, Mr. Chairman," said the interposing bishop blandly, "if the bishop regards the language of St. Paul, when he says that a bishop must be the husband of one wife, as mandatory, I should like to ask him what he proposes to do with the bishop of—naming a bachelor bishop—who hasn't any?"

There was a shot of laughter, amid his place and said, "Do I understand that the bishop regards the language of the apostle which he has just quoted as mandatory?"

"Certainly," exclaimed the man who had objected.

"Very well, then, Mr. Chairman," said the interposing bishop blandly, "if the bishop regards the language of St. Paul, when he says that a bishop must be the husband of one wife, as mandatory, I should like to ask him what he proposes to do with the bishop of—naming a bachelor bishop—who hasn't any?"

CONDITIONS ON MARS.

Days and Years and Light and Heat on the Red Planet.

The day on Mars is of about the same length as ours—24 hours, 39 minutes, 23 seconds. Mars makes her orbit around the sun in a little more than 687 days; therefore the seasons are almost twice as long as they are with us. The atmosphere of Mars is rich in watery vapors. Occasions can be seen, and at the poles thick ice, which melts when summer comes. The variations in temperature are extreme. Mars receives only half as much solar heat as our globe does. The sun appears half as large, and the nights receive their light from two moons, which are smaller than ours—Deimos and Phobos.

The weight is such that one of our kilograms would only weigh 376 grams there. A man is only able to carry his own weight on his back. Transported to Mars, he could carry three times as much, something like 225 kilos. In taking observations of Mars through the telescope one can see a distinct red disk, marked with more or less brilliant spots. Some of the spots which are greenish are the oceans; other very red ones are the continents, greater in extent than the oceans, which is the opposite to the way the earth is disposed. The most brilliant spots are the ice covered regions of the poles and the clouds are almost equally bright. The atmosphere of Mars is more transparent than ours, and its sky is incomparably clear.

The waters of Mars are more divided and distributed in inland seas joined by long arms, which are sometimes curving, but often almost rectilinear, and which mark the brilliant surface with dark lines, just as the line of lead divides the panes of glass in our church windows. All these dark lines form a pattern which is relatively symmetrical and which does not seem to have been made by chance. A plan so regular must have been designed, and for a long time the observers of Mars have been disposed to consider these lines as canals dug by the inhabitants of the planet for the needs of their civilization.—Charles Torquet in Metropolitan Magazine.

Some of the spots which are greenish are the oceans; other very red ones are the continents, greater in extent than the oceans, which is the opposite to the way the earth is disposed. The most brilliant spots are the ice covered regions of the poles and the clouds are almost equally bright. The atmosphere of Mars is more transparent than ours, and its sky is incomparably clear.

The waters of Mars are more divided and distributed in inland seas joined by long arms, which are sometimes curving, but often almost rectilinear, and which mark the brilliant surface with dark lines, just as the line of lead divides the panes of glass in our church windows. All these dark lines form a pattern which is relatively symmetrical and which does not seem to have been made by chance. A plan so regular must have been designed, and for a long time the observers of Mars have been disposed to consider these lines as canals dug by the inhabitants of the planet for the needs of their civilization.—Charles Torquet in Metropolitan Magazine.

The weight is such that one of our kilograms would only weigh 376 grams there. A man is only able to carry his own weight on his back. Transported to Mars, he could carry three times as much, something like 225 kilos. In taking observations of Mars through the telescope one can see a distinct red disk, marked with more or less brilliant spots. Some of the spots which are greenish are the oceans; other very red ones are the continents, greater in extent than the oceans, which is the opposite to the way the earth is disposed. The most brilliant spots are the ice covered regions of the poles and the clouds are almost equally bright. The atmosphere of Mars is more transparent than ours, and its sky is incomparably clear.

Cough Caution

Never, positively never poison your lungs. If you cough—run from a simple cold only—you should always feel, and see the limited bronchial tubes. Don't blindly suppress it with a sedative pill. It's better to let your lungs finally come about. For twenty years Dr. Shoop has consistently warned people not to use cough mixtures or secretions containing Opium, Chloroform, or similar poisons. And now—little by little—Congress says "Put it on the label, if you please, by the way, it's not a law by law on the label. And it's not only safe, but it is said to be by those who know it best a truly remarkable cough remedy. Take no chance then, particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the Dr. Shoop package with others and note the difference. No poison marks there! You can always be on the safe side by demanding

**PENNFIELD CENTER. ST. ANDREWS**

(Too late for last issue.)  
Mr. and Mrs. Caleb Justus were given a surprise Tuesday evening on the thirty-seventh anniversary of their wedding when their children and grandchildren and a number of friends met at their home, extending congratulations, and wishing them many happy returns of the day. A pleasing part of the occasion was the presentation of an address and a handsome dinner-set. Mrs. Daniel Justus of St. George gave the address which was fittingly replied to by Mr. Justus.

Mr. and Mrs. J. B. McDonough of Hartford, Conn., and Mr. Frank Miceaux of New York who have been spending a few weeks in Pennfield went to Eastport Thursday where they will be the guests of Mr. T. H. Buckman for a few days before returning to their homes.  
While the majority are rejoicing over the defeat of the cattle law, a few are feeling very sore. A canvas of the country made a few days ago, shows what the cattle law is doing, for miles where the law is in force not one pound of butter was to be found, while in Pennfield butter was found in abundance. Who would vote for the cattle law.  
Mr. John Welsh of the schr. F. and R. Given, is spending a few days with his friend Gilbert Justus.

Mrs. Sidney Justus who has been very ill, is not improving as fast as her friends would wish.

**ROLLING DAM.**

(Too late for last issue.)  
The many friends of Dr. J. J. Lawson are greatly pleased to hear that he is improving from his recent serious illness. His son Dr. H. B. Lawson lately a student of the Boston College Physician and Surgeon has been able and successfully attending to his father's practice during his absence.

Mrs. Robt. McKinney has been on the sick list this past week but is rapidly recovering.

Mr. Hugh Cass of Bonnie River spent Sunday with his sister-in-law, Miss Pheme McCann.

Mrs. Jack MacAllenan is able to be out again after her recent illness.

Mr. Harting of the firm of Hatheway Co., St. John, made a business trip here last week.

The ladies sewing circle of the Presbyterian church is to meet at Mrs. Joseph Greenlaw's, Greenock, Wednesday of this week. The opposition sewing circle will meet at Mr. William Mitchell's on Thursday.

McCann Bros. have opened up their mill and are saving laths.

Our school is running full blast, thirty five students being enrolled under one highly esteemed teacher, Miss Alice M. Collins.

In France there are 6,000,000 smokers, and of every fifteen there are eight who smoke a pipe, five who smoke cigars, and only two who are cigarette smokers. Still the French consume more than 800,000,000 cigarettes a year or enough to go around the world 500 times if they were placed end to end in a line.

On Monday last a very interesting incident took place at the Intermediate School, when Donald McMaster, Esq., K. C., presented the schools with a British flag, which he had purchased for that purpose during his recent stay in England. The clergymen of the different denominations, the board of trustees and a sprinkling of ladies were present. Judge Cockburn as chairman of the school board, introduced Mr. McMaster with a few earnest and appropriate words. Mr. McMaster's address was able and enlightening—urging and encouraging the children to "find the right track and forge ahead." Miss Osborne, the principal, thanked the generous donors of the flag in a few well chosen sentences, after which the children lastly sang "Rule Britannia" and God save the King.

Miss Amelia Kennedy visited St. Stephen's on Thursday.  
Mrs. B. R. Robinson returned to her home in Fredericton on Friday last.

On Thursday evening, Mrs. M. N. Cockburn delightfully entertained a number of her young friends. The guests were Misses Osborne, Gwen Jack, Lotty Hart, Bessie Hibbard, Amy Stuart, Rev. H. S. Rigney and Mr. McMann.

Mr. C. S. Everett and family are spending a few weeks in Boston.

Rev. J. S. Allen and Miss Allen left by Wednesday's train for Winnipeg, where they will make their future home.

Mr. and Mrs. T. A. Hartt are enjoying a trip to Boston.

Miss Cecil Hewitt pleasantly entertained a few friends on Thursday evening.

Mrs. R. E. Armstrong and Miss Elsie Armstrong were in St. Stephen last week.

Rev. H. S. Rigney who has recently been the guest of his parents here, returned to Campbellton on Friday.

Mrs. Alexander Russell, who has spent the last few years in the West, returned home last week. Her many friends are rejoicing in her improvement in health.

Miss Annie O'Neill is spending a few weeks in Boston.

Miss Bee Andrews was a guest at "The Anchorage" last week.

Miss Margaret Burton is visiting her brother in Cambridge, Mass.

Mrs. G. H. Lamb and Miss Dorothy Lamb returned on Saturday from a pleasant jaunt to Campbellton.

Miss Gertrude Stinson is visiting friends in Harvey, N. B.

Mr. Tamamura, of Japan, is the guest of Sir Wm. Van Horne at Coven Haven.

What might have resulted in a drowning accident occurred at Minister's Island Bar on Sunday morning last, through an attempt to cross the bar too late on the flood tide. As it was a valuable horse belonging to Hartt & Cuckley's Livery Stables was swept off and drowned, while the occupants of the carriage, Eugene Worrell aged 17, and Frank Miller aged 21, were saved from death by James B. Henderson who was crossing the channel in a boat at that time. Miller was slightly injured by a kick from the horse while struggling in the water, and

Cameron were guests of Mr. and Mrs. W. F. Hinds on Sunday.  
Winter is here, get out your fur coats.

**LYNNFIELD.**

Mrs. John Haste gave a party to the young folks of this place last Wednesday evening in honor of her brother, Irving Pinkerton, of Wildwood, N. H., who is visiting friends and relatives here after an absence of four years.

The Ladies' Aid of the Methodist church held a very enjoyable meeting with Mrs. M. M. Kirkwood on Thursday last.

Miss Lura Densmore, who has been spending the summer at her home here, has returned to Lowell, Mass.

Mr. Colin Marshall has gone to Danforth for the winter.

The marriage of J. Willard Densmore, of this place to Miss Emma E. Jackson of St. Stephen is announced to take place Wednesday, October 23rd.

Miss Hattie Traflet has returned from St. Stephen where she has spent two weeks.

Isaac Storr and son Henry of St. Andrews spent last week with W. H. Weeks.

Mrs. A. B. Gethell and Mrs. A. K. Marshall visited Mrs. Wm. Traflet on Saturday.

Mr. and Mrs. Wm. Traflet have returned from a visit with relatives at Lambert Lake, Maine.

Large game is reported scarce in this vicinity.

Clifford Thompson of Boston, is the guest of his aunt, Mrs. Elizabeth Haste.

Miss Matilda Traflet has been visiting her home in this place.

Among those soon to leave for the lumber woods are John M. Traflet and W. H. Weeks.

Pain anywhere, pain in the head, neuralgia, toothache, all pains can be promptly stopped by a thoroughly safe little Pink Candy Tablet, known by Druggists everywhere as Dr. Shoop's Headache Tablets. It simply means congestion—undue blood pressure at the point where pain exists. Dr. Shoop's Headache Tablets equalize this unnatural blood pressure, and pain immediately departs. Write Dr. Shoop, Saco, Me., and get a trial package. Large box 25 cts.—Druggists.

**BLACKS HARBOR.**

Mr. and Mrs. Martin Bradford, Mr. Ben Bradford and Misses Annie and Nellie Bradford visited friends in Lubec Sunday 13th.

Mrs. Chas. Cross and Effie and Gladys Wickerson visited St. George Friday.

Saturday was a very cold day.

Miss Carrie Snider of Macas Bay spent Sunday with relatives here.

Mrs. Mort Ludgate and Miss Marie Menley visited friends in St. George Friday.

Mr. and Mrs. Jno. McDowell visited friends in Beave Harbour Sunday.

Mr. and Mrs. Chas. Elliott left for Eastport Monday enroute for Boston where she will spend the winter.

The well owners are beginning to get the brush out of their wells.

**Says His Wife Prefers Young Boyne to Him.**

On May 27th, last, Rev. G. F. Scoville, rector of St. John's church, west end, united in marriage pretty seventeen-year-old Annie Reid, of Lever, Charlotte county, but who had been school teacher at Point Lepreau, and John Riley, aged 19, a sectionman employed by the Shore Line, also of Point Lepreau. Young Riley and his wife returned to the home of his father at Lepreau after the wedding, optimistic for the future; but they enjoyed but three short months of bliss. The trouble arose after Mr. and Mrs. Riley left the paternal roof to keep house on their own account. Then another young resident of Lepreau, Wm. Boyne, being enamored of the youthful Mrs. Riley, paid court while the hubby was at his day's work. The net result now is that Mr. Riley is boarding in Middle street, St. John west, and his wife is keeping company with young Mrs. Boyne at Lepreau.

The foregoing is the story told to the Times today by Mr. Riley, who feels very deeply for his wife's actions. He said that shortly after they had started house-keeping, tales had come to him of Boyne's attention to his wife. At first he did not believe it, but decided one evening while they were walking home to speak to her of the matter. She became angry, and left him but returned that evening. Later, without any warning she went to live with a family by the name of Laughlin Cameron at Lepreau and Mr. Riley claims that they are influencing his wife against him. Only Saturday last Mr. Riley saw Boyne and Mrs. Riley together at Point Lepreau. He has sent his wife money to pay her fare to St. John but she has not put in appearance. He also spoke to Boyne but the latter denies that he is paying attention to Mrs. Riley. Mr. Riley intends taking legal action in the matter.
