

MAY NOT BUILD IN RESTIGOUCHE

Proposed C. N. R. Summer Hotel Project May Not Materialize

OFFICIALS HERE

Black Point Site Still Favored But Prices Asked Are Too High

A number of Railroad officials from Ottawa and Montreal were in town on Saturday en route to Dalhousie where they inspected a site in connection with the proposed hotel of the C. N. R. An official of the Department of the Railways & Canals at Ottawa, who was one of the party, informed the Graphic that nothing definite has been decided as yet but spoke favorably of the Dalhousie property. When asked about the Black Point site he said that the surroundings there were very favorable for the project but that it was not feasible from financial standpoint at the high prices asked by the landowners. He said he did not know whether the Railroad would build a summer hotel in Restigouche County or not but thought it very unlikely unless land could be obtained for a more reasonable figure than that demanded for it now.

Champion Mail Bag Sewer

Every 25th person in the United States could have a mail bag if those owned by Mr. Charles Hurley, Washington, D. C., had been equally distributed. She has been "sewing a mail bag" for 25 years and those interested in statistics figure she has stitched 4,000,000 separate bags.

THE NEW HOTEL TO OPEN SOON

Chateau Restigouche Will be Ready in About Ten Days

COST \$200,000

Reputed to be Largest and Best Equipped Now in Maritimes

With the possible exception of the building of Campbellton's two-up-to-date hospitals no local enterprise furnishes a better criterion of the town's general progress than the erection of the Chateau Restigouche. This fine large, modern hostelry will, it was announced this morning, be completed and thrown open to the travelling public in about ten days time. "So far it has been impossible to set any definite date for the opening, but it is expected that all arrangements will be completed within the next week or so and the stage set for this interesting event."

The new hotel which is a brick structure of three stories and a basement, the full size of the building is 100 x 92 feet with a front of classical brick. It is thoroughly up-to-date in every particular and will, until the completion of the Admiralty in St. John next winter, be the largest and best equipped hotel in the Maritime Provinces. When completed the Chateau Restigouche will cost approximately \$200,000. Recognizing the need for more and better hotel accommodations in Campbellton, the promoters of the new hotel have made careful provision for everything that would place the Chateau Restigouche in a position to give a measure of service commensurate with the demands of Campbellton as a growing commercial center. The new hotel has seventy-one rooms all with running water, both hot and cold, and thirty rooms with bath. The building will be clean-heated. Adequate provision has been made for fire protection, the necessary apparatus having been installed at a convenient point on each of the floors. The fire escape is located on the west side of the building. Provision has also been made for an elevator staff and an elevator will be installed later. Both the American and European plans will be used at the new hotel and guests are assured the best possible service. An improved bell system has been installed which provides a bell in every room and a device which will prove invaluable for an alarm in the event of fire.

Michigan Honors Court Poet

Mr. Robert Brydges, poet laureate of England, received the degree of Doctor of Letters at this year's commencement exercises at the University of Michigan. From left to right are Sir Robert; Benjamin Hanchett, Grand Rapids, Mich., a regent of the university; Miss Bina M. West, Port Huron, Mich., founder and supreme commander of the Woman's Benefit Association of the Macabees, upon whom the honorary degree of Master of Arts was conferred; and Miss Jean Hamilton, dean of the university.

FOURTEEN YEARS SINCE THE FIRE

Property Value of Town Has Nearly Reached 10 Million Mark

BURNT ON JULY 11

Brief Facts About Campbellton's Progress Since Disaster of 1910

Tomorrow, July 11th is a significant date in the history of Campbellton, because on that day fourteen years ago he town was laid in waste by a devastating fire. That the progress made since that time is truly remarkable is evident from the appearance of our growing town today. The years since the disaster of 1910 have been years of steady advancement and growth and only a few figures are needed as proof of a story that approximates to the incredible. Because of the fact that many valuable records were lost in the fire it is impossible to give the wealth of detail that would otherwise have been available. It is significant to note however that whereas real estate and personal property was assessed at \$2,175,000 in 1909 it is today valued on the assessment list of the town at \$5,528,100. To this large amount however must be added those properties which are exempt from taxation such as the schools, hospitals, new buildings, property of the Stetson Cattle Company, McLennan's Foundry, and several other properties. With these additions and an allowance for the increase through building over last years figures it is estimated that the total in round figures would come well up to the ten million mark. The amount of income assessed in Campbellton the year before the fire was \$455,500. In 1923 it was \$1,005,605. It is also very interesting to note that the major part of this great increase in property value has come about in the past eight years. In the year 1915 it stood at \$2,518,600, a very small increase over 1909.

DROWNED HERE WHILE BATHING

Nine-year-old Son of Mr. and Mrs. Jas. Robinson Victim of Bad Accident

The first fatality of the bathing season here occurred on Saturday evening near the ferry, west of town, when a nine-year-old son of Mr. and Mrs. Jas. Robinson lost his life while bathing. Only very meagre details of this particularly sad accident are available as no one was near enough at the time of its occurrence to discern its cause. It is known however that the little chap intended to go in bathing as his uncle, Mr. James Robinson, was with him before his bathing suit. The uncle informed the boy's father, fearing that an accident might happen, but when Mr. Robinson reached the wharf, the boy was nowhere to be seen. It is thought that having donned his bathing suit, the little chap must have fallen from the wharf.

Peter Arsenau of Mission Point, who happened to be nearby, saw the boy in the water with hands spread. Preceding that the youthful swimmer was in trouble he got out a boat and hurried to the rescue. He was too late however, and it was not until about 10:30 after two hours work with grappling irons that the body was recovered.

Owing to Coroner Martin's absence from town, Coroner Dabrowski of Dalhousie was called in to hold the inquest. After viewing the remains and securing all available information he gave permission for burial, deeming an inquest unnecessary.

The funeral of the unfortunate little fellow was held from the home of his parents on Tuesday afternoon. Rev. A. B. Humphreys and Rev. W. W. McNair officiated and, owing to the tragic nature of the little child's death, the services were very largely attended. The floral tributes were numerous and very beautiful, among them being—

Wreath—Father and Mother.

Sprays—Uncle James Alexander and Earnest Adams.

Sprays—Sunday School Teachers, Miss McGreeley.

Sprays—Mrs. D. C. Gallen.

Flowers—Alexander and Olga Robertson.

Wreath—Mrs. Fred W. Campbell.

Little Arnold leaves to mourn the loss of a beloved child, his bereaved parents, three brothers, Edmund, Stuart and Percy, and four sisters Evelyn, Dora, Eunice and Stella. To these the heartfelt sympathy of the community is extended in the loss of their loved one.

Forest Fires Reported Raging in Bonaventure

Blaze Located About 45 Miles North of Here—No Details Available

Though the extent of the loss is not known reports received from the distant forests of Bonaventure County are to the effect that fires which started there a few days ago, still raging. They, however, are the only ones of importance signalled to the Forest Protection Service.

Though a large number of forest rangers are engaged in the fight against the spreading flames, the difficulties of communication prevent the usual protection from being afforded and fear is entertained that the damage will be considerable before the fire is under control. The exact spot of the fire has not yet been given, but it is known that it is about forty-five miles north of the Bay Chaleur.

Conditions elsewhere are reported as satisfactory.

BOYS ARRIVE AT CAMP CHALEUR

Party of Thirty Youths Arrived At New Mills Friday—Prominent Men Among Directors

A party of about thirty boys of various ages, with camp directors arrived at Camp Chaleur, New Mills, N. B., from Cleveland, Ohio, on Friday morning, July 4.

The boys are from Lakewood, Cleveland, Cincinnati, Kenton, Canton, Oberlin, Ohio, and Charleston, West Virginia.

The party was met at New Mills by W. L. Lowther, Travelling Passenger Agent on Friday.

The directors of the camp are—J. D. Littlefield, Cleveland, superintendent; Sam Williams, head coach of the Football and Track team of Iowa State College, William Belger, of Kenton, Ohio; John Frautschi, of Alliance, Ohio; Mr. Hill, of Cleveland; John Kennedy, of Oberlin, Ohio; Dr. MacCreary, of Harvard Medical College, Cambridge, Mass., formerly an officer of the 86th Battalion, of the Canadian Expeditionary Forces; Pat Young, of the Cleveland Athletic Club, of Cleveland, Ohio, and middle-west Champion Diver. The directors are all at Camp Chaleur.

Dr. McMillan, a former New Brunswick boy, now of MacMillan Hospital, Charleston, West Virginia, who has a summer home at Jacquet River, is chief camp medical officer.

The party, it is expected, will remain at New Mills during July and August.

They were accompanied by Messrs. James J. D. Littlefield, Mrs. Sam Williams and Mrs. John Pfautz, of Cleveland.

Member May Aid The Gaspé Fishermen

Hon. J. E. Perrault Touring County—Likely to Suggest Amendments to Present Law

Hon. J. E. Perrault, Minister of Colonization, Mines and Fisheries, has been touring the Gaspé region and it is expected that further changes in the policy adopted regarding the maritime fisheries will be announced. The Minister's main object in taking that trip was to study means of opening new markets for the fishermen and also study a system by which fish could more easily reach large centres where it is in great demand.

Nothing has been divulged yet regarding the plans but it is understood that acting on the advice of delegations, which waited on him in the course of his journey, he will suggest important alterations to the law.

Mrs. Perrault accompanied her husband. During their sojourn on the coast Hon. Mr. Perrault and Mrs. Perrault are the guests of Hon. John Hall Kelly, M. L. A. at New Carlisle.

KING IS HOST TO NEWSPAPERMEN

Canadian Weekly Editors Guests at Garden Party and Other Functions

LONDON, July 7.—The Canadian editors now touring in the Old Country yesterday attended a garden party given by Their Majesties.

Yesterday, they were the guests of luncheon of Col. Grant Mordern, M. P. at his Buckinghamshire estate, at which Lord Birkhead, Col. L. S. Amery, T. P. O'Connor and Sir Hamar Greenwood were also present. Subsequently the Canadians had tea with Lord Burnham, president of the Empire Press Union.

HELD SESSIONS AT JACQUET RIVER

Miramichi Presbyterial Met There Last Week—Many Fine Papers and Addresses

The annual meetings of the Miramichi Presbyterial were held at Jacquet River on Thursday and Friday of last week. The sessions were well attended and proved interesting and helpful. Mrs. D. J. Bruce, of Campbellton Foreign Secretary of the W. M. S. for the Maritime Provinces attended and read a paper on "The Foreign Mission Situation Today." The three delegates from Campbellton were: Mrs. W. W. McNair, Mrs. N. C. McKay, and Mrs. John McLean. The feature of the opening session on Thursday evening was an address by the Rev. J. E. Forbes, returned from Trinidad. Mr. Forbes' address dealt in a comprehensive way with missionary work in the foreign field and was not only interesting but very instructive as well. Rev. C. F. McLennan of New Mills acted as chairman of the evening meeting.

At the Friday evening meeting Rev. A. D. Archibald of Bathurst spoke on "Missions," while the Rev. W. G. Woodward of Red Bank addressed the gathering on "The Churches Part in Foreign Mission Work." Both addresses were listened to with keen interest for both were covered with helpful information.

Treasurer's Report

Both sessions on Friday were given over to the reception of reports from the different departments. The Treasurer's report was very encouraging showing as it did a large increase over that of last year. The objective set the Presbyterial of Miramichi to raise was reached and showed a surplus over the amount asked. For Mission Missions the sum of \$4,228.21 was raised while for Home Missions the total showed \$1,330.46. In addition to this two extra contributions were furnished; one of \$500 to pay the expenses of Miss McCully to Korea and \$225 to Miss Maud McKinnon who is home on sick leave. Thus the total for the year showed \$5,558.70 as compared to that of the previous years' \$4,228.21.

The secretary's report was also encouraging. Thirty-one new members were added to the roll of the Presbyterial and there are now forty-one auxiliaries in the Miramichi Presbyterial.

Papers were also read at the meetings on Friday. The one on "The Foreign Mission Situation" was held both morning and evening on Sunday, and each evening during the week during this week. The one on "The Foreign Mission Situation" was held both morning and evening on Sunday, and each evening during the week during this week.

ANNOUNCE ENGAGEMENT

Mr. and Mrs. Michael Shannon announce the engagement of their youngest daughter Mary Gertrude to James Alexander Furlotte son of Mr. and Mrs. Alexander Furlotte of Jacquet River the marriage to take place Wednesday July 16th.

been such a cut in estimates, that it will be necessary to recall some of the workers. Another regrettable fact brought out was the lack of helpers. These conditions exist not only in Korea but also in British Guiana and Trinidad.

The second paper, prepared by Mrs. Harold McVicar of Nash Creek on "The Why and How of Women's Missionary Work," and read at the afternoon session. This paper also showed careful study and was both interesting and instructive, being full of very helpful suggestions.

At the afternoon session a resolution of sympathy was passed which conveyed the sincere sympathy to the Presbyterial to the family of the late Margaret E. Gerrard, late Sec. of the Presbyterial Expense Fund.

General discussion on Mission Work was also a feature of the Presbyterial programme and this proved most interesting and helpful.

THE FIRST FLOOR

The new hotel has been given a distinctive and pleasing touch in the design of its entrance. Built on a sort of arch design it is particularly attractive. From the sidewalk the guest steps immediately within the shelter of the hotel, having accomplished the steps, he finds himself in the centre of the spacious and well-lighted lobby. This part of the new hotel which is about 60 x 40 ft. in area, is a most pleasing feature, being of 60 x 40 ft. in size. The floor of the lobby is of white and grey tiling in an attractive pattern. The large white pillars and attractive electric light fixtures add much to its appearance. The finishing here and throughout the rest of the first floor is in oak. The vestibule, completed the steps, he finds himself in the centre of the spacious and well-lighted lobby. This part of the new hotel which is about 60 x 40 ft. in area, is a most pleasing feature, being of 60 x 40 ft. in size. The floor of the lobby is of white and grey tiling in an attractive pattern. The large white pillars and attractive electric light fixtures add much to its appearance. The finishing here and throughout the rest of the first floor is in oak. The vestibule, completed the steps, he finds himself in the centre of the spacious and well-lighted lobby. This part of the new hotel which is about 60 x 40 ft. in area, is a most pleasing feature, being of 60 x 40 ft. in size. The floor of the lobby is of white and grey tiling in an attractive pattern. The large white pillars and attractive electric light fixtures add much to its appearance. The finishing here and throughout the rest of the first floor is in oak. The Meaning of Chevrolet's "Economical Transportation"

IT is more economical to travel by Chevrolet than by any other means. That is what it means to say that Chevrolet is the most economical form of transportation.

This implies, first of all, that Chevrolet costs the least per car-mile—that it is less expensive to operate than any other make of car.

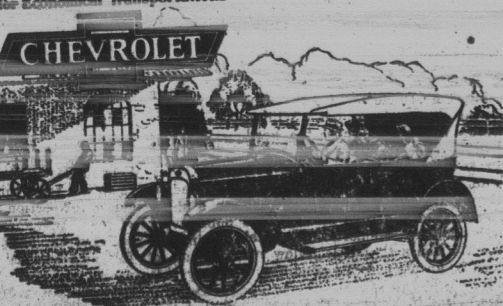

But, more than that, it means that Chevrolet is more economical than any other kind of transportation.

An investigation among Chevrolet owners of all classes, shows that it is not only more convenient—but also more economical—to travel by Chevrolet than by railway-train or trolley car. The information received gives an average of 30 miles per gallon of gasoline and over 1,300 miles per gallon of oil.

Chevrolet is easy to own. The G.M.A.C. plan of deferred payments will enable you to finance the purchase. Investigate the new Superior Chevrolet today.

CHAS. MARCIL ON CHURCH UNION

Member for Bonaventure Co.
Gives his Views in
the House

Ottawa, July 4.—On Monday, the 30th of June, Honorable Charles Marcil, M. P. for Bonaventure, made the following remarks in the House of Commons, in the Debate on the Bill to incorporate the United Church of Canada:

"As a member of the Private Bills Committee I was called upon by my constituency to devote more than ordinary attention to this bill. I have had the honour for a great number of years to represent that constituency in which close upon one-third of the people are English speaking Protestants. They were divided in their opinion upon this bill just as the others who are interested in this question, but not being a member of any of the churches immediately concerned my sole object was to try and bring about an understanding such as would promote Christian union generally. I strove to the best of my ability to effect such an understanding. I was in favour of union, and I supported the principle of union in the committee in deference to the request made by a large number of my constituents; but having received representations from a considerable number of others who are opposed to union, I thought I would furnish the dissenters with an opportunity of making good their case. Therefore, I supported the amendment that was inserted in the bill. I also had the honour of serving as a member of the sub-committee which sat for two or three days with the idea of trying to bring about an understanding. Having failed in these respects I now appeal to the majority in this the final court of appeal in favor of the idea contained in the amendment of the Hon. member (Mr. Duff). In my constituency the chief Presbyterian Church is located in New Carlisle, but some of the members of the congregation reside thirty or forty miles away from that town. They are scattered over a long coast line and it would be physically impossible for all these people to be assembled to gether at a certain date at a specific point to express their views on this important question. In fairness therefore to all parties concerned—those in favour of union as well as those opposed to it—I think the House would do well to find a means of giving both sides an opportunity of expressing their opinion in this country which is a good one, which has stood the test of time; it is that the will of the majority must prevail. In church matters I presume the same rule will have to apply, although doubtless there will be dissenters as there always have been. I am old enough to remember when the break occurred in the Presbyterian Church in the city of Montreal. I refer to the occasion when Sir Hugh Allan, and other members of the old Scottish Presbyterian Church Montreal refused to enter the new Presbyterian Church in Canada, but remained connected with the Presbyterian Church in Scotland. There will still be a Presbyterian Church in Canada even after the union which this bill accomplishes is brought about. For how long a period this will be no one can tell but it will continue for some time. In the meantime, in the best interests of the country, I think all fair means should be adopted, especially in view of the conditions in my own constituency which I have described, to obtain as complete an expression of opinion as possible. It is physically impossible to get all these people, many of them fishermen and lumbermen who are absent from home, together in the one place at a fixed hour—it is out of the question to obtain a complete expression of opinion. Therefore I think the principle of the ballot should be adopted which would be the best means of convincing all parties that the real opinion of the majority has been obtained. What better means could be used than that which is universal throughout the country, not only in parliamentary elections but in case of controversies of various kinds and which is secret? That is a vote by ballot. I think it would be wise on the part of the promoters of the bill to accept the suggestion that the law clerk of the House should be asked to draft a clause for insertion in the bill so that when the measure finally passes the House it will have some chance of rallying to its support the majority of those who are interested in it."

DROWNED IN PAIL

Fifteen Months Old Child is Found Dead by Mother.

Montreal, July 7.—Germaine Paris, aged 16 months, was drowned in a half-filled pail of water in a shed at the rear of her parents' home, 542 Lacordaire street, Longue Pointe. Mrs. Arthur Paris, the mother, was passing dinner at the time, and did not know of the accident until she went into the shed and saw her little daughter with her head in the bucket. A doctor was called, but the child was already dead.

PENETRATES THE WILDS OF ARABIA

Englishman Returns After Expedition—Locates Mysterious Desert Oasis

London, July 7.—Captain R. E. Chessman formerly private secretary to Sir Percy Cox in Baghdad, has just returned from an expedition into Arabia in the unknown territories of the Sultan of Nejd.

Accompanied by an Arab boy and guides supplied by the Sultan, he succeeded in penetrating the great Souf Desert from the north as far as the mysterious oasis of Jabrin, the position of which has been long a matter of speculation to geographers. He is the first European to reach this oasis.

Representative collections of geographical specimens of the desert fauna and flora have been brought back, many of which have proved new to science.

The Bedouin who inhabit this inaccessible region are the Ahl Murra, one of the Nomad tribes regarding which little reliable information has been obtainable up to the present.

The official description dismist them in a few lines. This savage and little-known tribe with physical and linguistic peculiarities, virtually pagan, are possibly the survivors of the pre-Arab population. They are ill-provided with domestic utensils or clothing in advance of the stone age, and are unashamedly predatory.

Captain Chessman, who went with introductions from the Sultan, was well received by them, and stayed six days in their midst.

Another important discovery made was that of a ruined site which there is every reason to suppose is Jerra, an ancient Phoenician port on the Persian Gulf. The position was that given by Ptolemy in his geographical list about the middle of the second century, since then all trace has been lost.

after dark, appeared before Magistrate Demers this morning and pleaded guilty to both charges. He was sentenced to 5 years in Dorchester Penitentiary on the first charge and 3 years on the last charge, to run 1877 and knew Louis Joseph Papineau concurrently.

AUSTRALIAN BOYS TOR CANADA

Party of Youths Ranging from 14 to 18 Will Dominion in August

Montreal, July 7.—Fifty boys ranging in age from 14 to 18 years, members of the Young Australia League, will make a tour of Canada in August of this year. The visit is a return of that made by the 101st Canadian Cordon Corps to West Australia in 1912.

The boys will arrive at Quebec on August 23rd, and will spend a full month in Canada, visiting such points as Montreal, Ottawa, Niagara, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Jasper, Park Lodge and Vancouver. They will also be the guests of the directors of the Canadian National Exhibition in Toronto. Their rail journey across Canada will be made in two special cars over the Canadian National Railways, and their itinerary will be so arranged that they will spend not less than twelve hours at any point. The boys are at present in Great Britain. They have been received by the King and Queen at Buckingham Palace and have been the guests of honor at the British Empire Exhibition. They have received more invitations than they could possibly accept, and in all large centres they have been liberally entertained by the Rotary Clubs, public schools and various civic bodies. It is understood that the federal and provincial governments of Canada are making arrangements to see that the boys' carry back to Australia the most favorable impressions of Canada.

Montreal, July 6.—On her annual visit to the lonely trading stations around Hudson's Bay, the Hudson Bay Company's steamer Nascopie, now in this port, will sail about July 14 with a cargo composed of everything from a statue for a Catholic mission to photographs for the factors and the Indians. On the return voyage she will bring the furs obtained by the Indians since her visit last year, which the steamer will carry to London for disposal at the big November fur auction. The Nascopie will also bring back from the Bay a certain amount of ivory, composed of walrus tusks and carvings of Indian manufacture for sale to curio hunters.

The Nascopie will visit dozens of lonely trading posts scattered along the shores of the bay. For many of the factors and their families, the steamer's annual visit constitutes their only tangible link with the outside world.

While the Nascopie visits, the posts in Hudson's Bay the steamer Bayfield, now, owned by the same company, will call at trading stations scattered along the Labrador coast and the shores of the straits.

ready for distribution. Nash said that each employee receiving stock must sign an honor agreement that he will not sell or transfer his stock during the next five years; and that during that time he will give the voting power of the stock to Nash.

Does Not Want More Riches Than is good for man's soul Says Cincinnati, in Refusing Thirty Thousand Dollars.

cinatian, in Refusing Thirty Thousand riches of this world than is good for man's soul."

This statement was made by Arthur Nash, known as "Golden Rule Nash," President of the A. Nash Company, manufacturing tailors, and when he refused to accept a \$30,000 increase in his salary offered by employees at their semi-annual meeting.

George Weedon, general manager of the California branch, proposed that Nash's salary be raised from \$30,000 to \$50,000 a year.

"Somebody said, 'I do not want a whole lot of money because I am afraid I will not go to heaven when I die.' I am too busy to think about where I am going when I die. My only object in life is to bring heaven here on earth," was Nash's reply to the proposal.

Thanking his employees, Nash said: "I would rather lose control of this concern than destroy the beautiful confidence you have in me. It was announced that the stock issued recently as a stock dividend is

George Weedon, general manager of the California branch, proposed that Nash's salary be raised from \$30,000 to \$50,000 a year.

"Somebody said, 'I do not want a whole lot of money because I am afraid I will not go to heaven when I die.' I am too busy to think about where I am going when I die. My only object in life is to bring heaven here on earth," was Nash's reply to the proposal.

Thanking his employees, Nash said: "I would rather lose control of this concern than destroy the beautiful confidence you have in me. It was announced that the stock issued recently as a stock dividend is

ready for distribution. Nash said that each employee receiving stock must sign an honor agreement that he will not sell or transfer his stock during the next five years; and that during that time he will give the voting power of the stock to Nash.

Does Not Want More Riches Than is good for man's soul Says Cincinnati, in Refusing Thirty Thousand Dollars.

cinatian, in Refusing Thirty Thousand riches of this world than is good for man's soul."

This statement was made by Arthur Nash, known as "Golden Rule Nash," President of the A. Nash Company, manufacturing tailors, and when he refused to accept a \$30,000 increase in his salary offered by employees at their semi-annual meeting.

TEACHERS TO MEET AT VICTORIA, B. C.

Special Train From Toronto via Canadian National Ry.

Maritime Province teachers will do well to note that in connection with the 1924 Conference at Victoria, B. C., to be held from August 12th to 16th, under the auspices of the Dominion Educational Association, special train arrangements have been made by the Canadian National Railway.

There will be a special train to the Pacific coast, leaving Toronto at 3.00 p. m. on July 25th, and numerous optional stops may be taken for the return journey.

The special train will be one of the finest, of all steel equipment, with most modern type of compartment.

observation cars, Library-Buffet car, Standard Sleepers and Dining. Nothing will be lacking in the way of entertainment. There will be a radio in the observation car and a phonograph will be placed in the dining car to be used for concerts, or dancing if so desired.

From all Maritime Province points to Toronto the regular train service of the Canadian National Railway is of the finest. It might be noted that the special train will stop at Jasper Park from Thursday, July 25th to Sunday August 3rd, and the educational party will thus have three days in that delightful playground of the Rockies. The cars will be used for sleeping accommodation, while meals will be had at the famous Jasper Park Lodge.

No more delightful trip could be devised for the teachers who are to make this tour across Canada by Canadian National Lines.

July 2-29th.

FERGUSON & WALLACE

THE DISASTER OF 1910

A Brief Historical Sketch of Campbellton and the fire which blotted our thriving town from the map on Monday, July 11th, 1910.
(From the report of the Campbellton Relief Committee, published a year after the fire.)

Below appears a brief historical sketch of the Town of Campbellton and a short account of the disastrous fire which laid the town in ashes on July 11th, 1910. Because of its ruthless destruction of property and the wrecking of many promising commercial enterprises, the Campbellton disaster is an unpleasant memory but with tomorrow the fourteenth anniversary of that calamitous event, it is retrospective glance across the years should be productive of a great or spirit of civic pride in a town which has made such remarkable progress in so short a time.

Starting as a small village, growing within thirty-five years into a thriving town of six thousand; swept out in a night and rebuilt in a year. This, in a sentence, is the history of Campbellton.

On the south bank of the Restigouche river at the head of deep water navigation, Campbellton the most northerly town in New Brunswick is situated. It would be hard to find a better location in the whole of the Dominion. To the south of the town is a range of low wooded mountains; one of these the Sugar Loaf mountain rises to a height of nearly a thousand feet. To the north at the foot of the town down the river which forms the boundary line between New Brunswick and Bonaventure County, Quebec. At this point the river is nearly a mile wide and beyond, stretching from east to west is another range; off-shoot of the Laurentian mountains.

Campbellton was first settled in 1798 by John Duncan, native of Aberdeen, Scotland. This man came to New Brunswick in 1773 bringing with him a young man named Robert Adams and established a trading post at Church Point the first settlement in Restigouche. Later John Adams moved down the river and settled on the present site of Campbellton. He called his place "Wateryside" and it included all the present Duncan property down to the old site of the Baptist Church. Campbellton was further settled by colonists. The descendants of these first settlers are still living in the town. In the early years of its history Campbellton was called Martin's Point after Captain Martin who had a ship building yard on the point. Afterwards it came to be called Campbellton in honor of Lord Campbell Governor of New Brunswick. These places were gained their livelihood by fishing; for the Restigouche is noted all over America for its splendid salmon fishing. They were also farmers in a small way.

In the vicinity of Campbellton were large timber forests, and although the earliest settlers gained a livelihood by farming and fishing it was not long before the lumber industry began to be developed. This business was originally carried on principally in square lumber which was shipped to England. When mills began to be built the industry was further developed and deals were sent and sent to the English market. The first mill was owned by Pollock and Gilman who afterwards sold out to Andrew Ritchie.

The lumber industry has steadily increased. In 1890 less than twenty million feet of lumber were floated down the Restigouche. In 1910 nearly one hundred million feet. At the time of the fire, in Campbellton and vicinity there were fourteen mills, of which the Shives Lumber Company mill at Athol and the two at Richfordville were the largest, employing between them about two hundred men. In 1901 the village of Campbellton was almost destroyed by fire, only a few buildings escaping. The people were so busy rebuilding that they had no time to build their homes and life rolled on in much the same quiet way until the coming of the railway. With the advent of the Intercolonial Railway, a new epoch opened in the history of Campbellton. In 1876 the line was completed and Campbellton made a divisional point. The coming of the I. C. R. was a great event for Campbellton, opening up the country for settlers and giving opportunities for developing business. Campbellton was incorporated in 1888. It then had a population of fifteen hundred. The next mayor was John McAllister, a former M. P. for the county.

With the incorporation of the town followed many civic improvements, first of which was the completion of a first class water system, later an electric light plant was established and in 1902 an up to date sewerage system.

At the time of the fire Campbellton had a population of six thousand and covered the site of the present town, but the buildings for the most part were wooden. It had been built up by the first Post Office, the Royal Bank of Canada, the Commercial Bank of Canada, five churches and a Salvation Army barracks.

John Convent and a large general store, the Town of Campbellton Office, and the Maritime Province. Besides fourteen mills there was a large wood working factory and two foundries and machine shops. A large amount of business was transacted. It was a busy, prosperous town, rapidly becoming a city.

Such was Campbellton on Monday noon, July eleventh, 1910, when Tuesday morning dawned it was a mass of smoking ruins. Now occurred the fire which swept the town from the map, destroying its six thousand inhabitants' homes and destroying six million dollars' worth of property.

Monday morning dawned fine and clear but by noon a north west wind sprang up which in the early afternoon increased to a gale. The first alarm sounded about two thirty. A spark presumably from the corner of Richard's mill, had lighted on a shed nearby and aided by the strong, high wind and the dryness of everything, for there had been continuous hot, dry weather for over a week, was making rapid progress by the time the fire brigade arrived on the scene. All that the firemen could do then was to prevent the flames from spreading to the adjoining buildings and in three quarters of an hour after the alarm sounded the fire was apparently under control, and the usual crowd gathered at the scene of excitement was beginning to melt away when the second alarm blew.

A cinder had fired Richard's mill and the sparks falling in the lumber yard set fire to the shingles which the wind whirled far and wide, over the exposed town. By that time there was no way of stopping the flames, for fanned by the high wind and fed by the inflammable material on every side, the fire soon reached the main fire which was thundering and roaring through the centre of the town, five distinct fires had started in other sections ignited by flying cinders. These fires rapidly spread and made paths for themselves. In every part of the town flames were burning. Dense clouds of smoke rolled towards the sky and settled like a pall over the burning town. The sound of the flames sounded like a low rumbling thunder, accentuated every now and then by the sharp crack of some explosion. The heat was intense. As the fire spread its path momentum smaller fires were merged in the larger, until Campbellton was an immense seething furnace. During the night the fire burned itself out leaving waste and debris in its track.

Although the fire brigade fought valiantly they soon realized that they were totally unable to cope with the situation. The town was constructed almost entirely of wood, and was consequently highly inflammable. So, when aided by a gale it can readily be conceived how doubly easy was the work of destruction. To add to the difficulty the water pressure was low on account of the quantities of water being used all over the town. Fifteen minutes after the second alarm blew it was apparent that the whole town was threatened. Men on horse back galloped through the streets, warning people of the danger and calling out every available man to the assistance of the fire brigade.

In half an hour the fire fighters were forced to abandon the fight, driven back by the immense walls of flame, blinding smoke and scorching heat. An attempt to stop the advance of the flames by dynamiting of their possessions it was possible to do. By forty in the afternoon assistance had arrived from Dalhousie and by that time the fire was beyond human control.

As soon as the people realized that their town was destined to complete destruction, and that all efforts to save their homes from the advancing flames were useless they bent all their energies in saving what little of their possessions it was possible to carry. The sick and feeble were taken to places of safety. People living near the waterfront were rescued by boats and steamers in the harbor. A grain carried some as far as Dalhousie Junction. Others fled to the hills beyond the town. From the boats and steamers in the harbor and the hills beyond the town, all through the long night thousands of weary watchers witnessed the destruction of their town. Families were separated. Men watched the work of a life time disappear in a night. Reports of death came in every few minutes. No one slept. Through the long anxious hours the people of Campbellton waited in dread of what the morning would reveal.

A new day dawned, bring a fuller realization of the waste and desolation that a few short hours had wrought. The prosperous town of yesterday was now a field of smoking ashes. Not a tree or a blade of grass remained. The devastation was indeed complete. Here and there a building still stood, a few shops, reminding one of the strength of tombs in the half light of the early morning. The heavy with smoke. The wind had veered round to the north and was driving the smoke in the direction of the town.

It was a scene well calculated to remain in the memory. Thousands of people with misery depicted on their faces gazed with gloomy eyes

First and Last Hardest Golfing Shots Says Hagen

New York, July 7.—Walter Hagen winner of the British open Golf crown says the two hardest shots for him in a big championship golf tournament are the first and last tee shots.

"I've been playing the game for years," relates Hagen, "but I never fail to experience an emotion somewhat akin to stage fright when I step up to hit the first shot in a championship. I imagine this is due to the faith I have in the first shot as a barometer. If it gets away in good style, I feel rather assured that I am not in for a low score."

"The last tee shot is a terrific ordeal, especially if you have a chance for the championship. Even if you are leading by four or five strokes, the threat of possible disaster is inescapable. You have visions of a badly trapped ball, an unplayable lie, a complete loss of control. The nerve pressure is at its greatest during the final moments."

Hagen is, no doubt, right. At Oakland Hills, in the open championship, Cyril Walker, who was destined to win the title, didn't make more than three or four wild tee shots all during the tournament. Of one these came at the 18th tee on the final round, the last tee shot he was asked to make.

Walker tore into the ball too quickly, got his hands in ahead of the club head, aimed badly to the right and was almost completely stayed by a tree. Fortunately, he was able to get the ball, and played a safety shot out on the open.

Had the ball been in the rough a foot or so farther Walker might have had to spend several shots getting out and the title which seemed so surely his would have gone to another.

Davey Robertson, grayhaired Detroit professional, in this same tournament needed a three at the 17th and a four at the 18th to tie with Bobby Jones, who had finished with 300. Robertson was on the short green with his drive, and then took three putts. On both greens he missed three-footers.

The finishing pressure was too tight, even for this season campaigner.

TO HOLD PLEBISCITE IN SASKATCHEWAN

Prohibition Question to Be Decided July 16

Regina, Sask., July 7.—The eyes of students of prohibition throughout the world are turned to Saskatchewan to see whether the province will follow Quebec, Alberta, Manitoba and British Columbia in turning to government sale as the best method of dealing with liquor. The question will be before the voters in a provincial plebiscite July 16.

The province of Saskatchewan has been dry since 1916. A plebiscite in 1920 continued the dry regime by a vote of 86,949 to 55,259. Last year a petition for sale of liquor under provincial control was denied by the Saskatchewan government. When the province was made dry and when it was kept so, women voted, as they will in July.

Shigawake

Misses Montgomery and Aheer were the guests of Miss Ludie Young for a few days last week.

Miss Bert Finney of Montreal is sending a few weeks with her parents Mr. and Mrs. James Almond.

Mr. and Mrs. W. Smith and family are visiting Mr. and Mrs. B. Allan.

at the awful scene.

There have been larger fires in the history of Canada but none where the destruction was more complete. With the exception of a few houses which by some miracle escaped the flames, the town was completely destroyed and the people rendered homeless and for the time being helpless. There was absolutely no shelter for the six thousand people nor was there and food to feed them.

But the news of the disaster had flashed over the wires to all parts of Canada, awakening the sympathy of every Canadian. A carload of provisions arrived from Bathurst at eight o'clock Tuesday morning. Dalhousie, Newcastle, Chatham and Moncton also rushed relief to the sufferers as soon as word reached them.

All telegraphic and telephonic communications, and only the most meagre details of the disaster could be obtained. Anxious relatives and friends all over Canada and the United States were waiting for further details. The press did its parts in informing the public of the awful calamity and urging them to send immediate relief.

Canada responded nobly to the appeal for help. Money, provision, and clothing came in from every corner. A carload of tents, property of the Canadian Department of Militia arrived on Thursday. These were much needed for the people encamped in the fields were suffering from

QUARTERLY MEETING OF THE PESBYTERY OF MIRAMICHI HELD AT NEW CARLISLE

Sessions Largely Attended—the First Time Such Meetings Were Held on the Gaspe Coast.

The quarterly meeting of the Presbytery of Miramichi in Zion Church, New Carlisle, P. Q., June 25 to 26 was an event of more than passing interest both for the Presbytery and for the people of Northern New Brunswick and the Gaspe Coast. It was the first time that Presbytery met in quarterly session in New Carlisle or on any part of the Gaspe Coast, and the occasion was marked by the opening and dedication of the New Carlisle School Home for Girls, the first to be established by the Presbyterian church in eastern Canada.

A unique feature of the occasion was that every member of the Presbytery in attendance had come to New Carlisle by auto, several having come from as far as Chatham, and others starting by train had joined auto parties along the route. The members present included Revs. L. McLean, F. W. Thompson, A. D. Archibald, J. H. A. Anderson, C. F. McLennan, George Gough, W. W. McNair, and Roland Davidson, ministers; and Messrs. Jos. Henderson, Charles Campbell, P. A. Fyfe, J. R. McPherson, T. H. McNair, R. F. C. Mair, A. Ferguson and J. O. Sherer, elders. Dr. James Ross, Home Mission Superintendent, was also present.

The first session was held on the evening of June 25th, with the congregation present, the choir giving assistance in the service of worship. Two addresses were given of popular interest, the first by Rev. A. D. Archibald who brought a message from the recent Assembly at Owen Sound, and the second by Dr. James Ross who gave a practical and informing address on Home Missions. The officers-elect for the ensuing six months are Rev. W. Girdwood, moderator, Rev. A. D. Archibald, Clerk and Rev. J. H. A. Anderson, Treasurer.

The treasurer's report, audited by Messrs. C. F. McLennan and H. F. C. Mair, was adopted as follows:

Receipts.
Balance on hand, \$143.42
From Congregations during year, 427.12
From members of Trav'lg Exp. Bd., 140.00
Sundries, 8.66
Total, \$719.20

Expenditures.
Salary of Clerk, \$200.00
Members' Trav'lg exp. reg. mtgs., 801.00
Miramichi Pub. Co. printing minutes, 94.30
Committees' expense, 16.50
Bal. on hand, 79.65
June 20, 1924, \$719.20

This morning seditur on Thursday was taken up largely with hearing the final report of the committee charged with the building of the School Home for Girls. Rev. J. F. McQuay and J. S. Gordon, Esq., chairman of the committee gave reports stating that the building was complete at a cost within \$20,000.

The funds being provided by the Home Mission Board from the Forward Movement Peace Thank Offering. The work had been well done in every particular and the completed building will accommodate thirty girls in residence with expansion possible as required. Mrs. L. A. Moore President of the W. M. S. being present, was called upon to give a statement from the point of view of the society. She was very graciously welcomed to the platform and spoke of the interest and practical help accorded by the W. M. S. in furnishing the home and providing bursaries. Dr. James Ross spoke for the Assembly Home Mission Board. Presbytery forwarded by wire to the Home Mission Executive meeting in Toronto their nomination of Mrs. Ada Sowerby of Ecclesine, P. Q. as Superintendent of the Home.

Appointments of special meetings in the service.

After the adjournment of Presbytery, members and visitors sat down to a banquet in the Masonic Hall provided by the ladies of the congregation. Toasts and responses were indulged in, and after a hearty vote of thanks to the ladies and good people of New Carlisle for the hospitable P. entertainment, the festive gathering concluded with Auld Lang Syne and the National Anthem.

AN ACADEMY OF CRIMINOLOGY

Organization is Completed in California After Many Weeks of Preparation

Los Angeles, July 8.—Organization of the Southern California Academy of Criminology is announced here by Chief of Police August Vollmer, who is an authority on criminology. The organization has been perfected by Chief Vollmer and Dr. E. C. Moore, president of the University of California, Southern Branch, after many weeks of preparation and discussion in which scientists, educators and policemen collaborated with bootleggers, burglars and other more or less notorious members of the underworld. The purpose of the academy is the "scientific compilation of community opinion on the cause and conditions of crime and the best methods of crime prevention." The membership includes appellate court judges, university officers and police officials. Only men and women of recognized ability in the field of criminology and sociology will be admitted into the organization, it was stated.

One of the methods to be utilized in gaining first-hand knowledge of crime and criminals will be a series of lectures by law violators, and by leaders of such alleged anti-government organizations as the Communists.

The Presbytery were made to be held in Dalhousie, July 9th, and in New Mills, July 10th, for the purpose of visitation of these congregations respectively.

The Sunday School and Young People's Society Report, deferred from the March meeting was given by the convener in which analysis was made of the data submitted from the several congregations of the bounds.

At the afternoon seditur the Presbytery held the dedication service of the school Home. Public worship was conducted by the presiding Moderator Rev. J. H. A. Anderson, assisted by Revs. A. D. Archibald and L. H. McLean. Rev. F. W. Thompson gave a brief historical statement of the movement to provide suitable Home for the Protestant girls of the Gaspe Coast seeking the higher education made possible by the High School of New Carlisle. J. S. Gordon, chairman of the building committee handed the keys of the Home to the Presbytery.

The solemn words of dedication were spoken by the Moderator, prayer was offered by Rev. W. W. McNair, hymn, "O God of Bethel" was sung with heartiness and reverence. Addresses suitable to the occasion were then given by Rev. J. F. McQuay of New Carlisle, Mrs. L. A. Moore, president of the W. M. S., Rev. L. J. King, Inspector of Protestant Schools, Charles McBurney of the Department of Education, Quebec, the Rev. Rural Dean DeGruy of the Anglican Church and Dr. James Ross of the Board of Home Missions. A cordial letter of congratulation was read from the Anglican Bishop of Quebec pleading sympathetic co-operation with the Presbyterian Church in this praiseworthy effort in the interests of higher education. Mrs. Dr. Morrel of New Carlisle on behalf of the local chapter of the Daughters of the Empire presented a beautifully framed picture and on her own behalf the nucleus of a library for the Home. Every available space in hall and adjoining rooms was occupied with the many interested visitors who shared newsheds terrified.

After the adjournment of Presbytery, members and visitors sat down to a banquet in the Masonic Hall provided by the ladies of the congregation. Toasts and responses were indulged in, and after a hearty vote of thanks to the ladies and good people of New Carlisle for the hospitable P. entertainment, the festive gathering concluded with Auld Lang Syne and the National Anthem.

SEEK REDUCTION OF MFG. COSTS

One Object of Industrial Institute to be Held in Toronto.

Toronto, July 1.—Necessity for the economy of human effort in industry will be brought home to manufacturers by the forthcoming visit to the University of Toronto of 10 members of the council of the National Institute of Industrial Psychology of Great Britain. The psychologists, who will be headed by Dr. Myers, director of the bureau, are attending the Toronto meeting of the British Association for the Advancement of Science, Aug. 6-12.

Organized in 1921 as a public service for the purpose of applying scientific knowledge to the human aspects of industry and commerce, the National Institute has married out investigations which have resulted simultaneously in the reduction of manufacturing costs in certain processes and in improvements of conditions for the workers themselves.

The movement was sponsored originally by industrial magazines of Great Britain, anxious to improve working conditions for their employees, and it has the sympathy and financial backing of large corporations.

Success crowned the earliest efforts of the institution, and in many cases it was found that substantial reductions could be made in manufacturing costs by slight alterations in the methods of dealing with material, so as to eliminate physical fatigue through unnecessary handling or to minimize mental strain by making work for certain tasks. As the outcome of a study of the manufacture of articles from tinplate, it developed that those employed in soldering their hands moved more easily in straight lines or circles. The former were put to soldering objects with corners on them, while those of more artistic temperament were allowed to work on round cans. This resulted in an increase of production with the same amount of effort, but the authorities of this particular factory were unaware that their workers possessed a natural adaptation of this kind, before the Institute took over the problem.

It is significant that the efforts of the psychologists are appreciated most highly by the operatives themselves, and the general result of the investigations seems to have been the fostering of a better spirit between the workmen and the employers whenever experiments have been made.

The reports of the Institute draw attention to the huge sums of money which are spent annually in perfecting the chemical composition of materials or in applying new discoveries in pure science to the requirements of an industrial process, and the logical inference is drawn that an equal study of human effort and energy, one of the largest and frequently most expensive commodities in manufacturing, is of equal importance.

Pointing out that the work of the committee is of two kinds: the Journal of the Institute, in which its researches are reported, said recently: "We are on the one hand applying the results of scientific research to the everyday needs of commerce and industry, and on the other are carrying out new research at each step in the investigations where we are faced with new and unsolved problems." The activities of the body are directed from the central office at London, where a library and statistics supplied by manufacturers are maintained, and the researches are of two kinds—observation and experiment in the factory proper; and

TWO LIVES LOST 5 BOYS MISSING

Man and Woman Known to Have Perished in Steamer Fire

Baltimore, Md., July 7.—Two persons, a negro man and woman, are known to have lost their lives when the bay steamer Three Rivers was burned off Cape Cove early today, a wireless dispatch from a newspaper reporter on board to his paper stated. Three hundred and fifty passengers were rescued and are proceeding to Baltimore on the steamer Middlesex. The Three Rivers was bound from Orisfield, Maryland, to Baltimore.

Later it was learned that five newboys, all members of the Baltimore Evening Sun's newboys band, were missing. Steamers Allegheny to the Baltimore, passengers were taken off by the Chesapeake and Atlantic Railroad, and the Three Rivers said she was burned to water's edge; that the passengers were rescued by the Allegheny and Middlesex and were all on board the Middlesex bound for Baltimore. It mentioned no casualties. The Three Rivers was loaded with her capacity with Baltimore people.

The development of concrete problems in the psychological laboratory. A further object of the bureau is the direction of human effort in the channels for which it is best suited, or in other words, the elimination of misfits by extensive vocational selection and subsequent vocational guidance.

Intelligence tests now applied in the psychological laboratory are broadened and amplified so that natural aptitude for such callings as secretarial work, or mechanical occupations, may be revealed. Other tests are devised to discover the extent to which a course of training has been successful in preparing prospective candidates for such positions. They aim to supplement, and eventually to replace, examinations in various subjects which are usually imposed with such unsatisfactory results.

Commenting on the work which the Institute is doing, Prof. E. A. Bost, director of the psychology laboratories in the University of Toronto, said to the Canadian Press: "The Institute met with success from the first, and it has many concrete achievements to its credit. It is something more than a group of scientists, as leading industrialists of Great Britain had faith in its future, and have co-operated from the start."

The success of the National Institute resulted in the establishment of a similar committee in the United States, but the parent body is still well in the lead as far as concrete results are concerned. C. S. Myers, C. B. E. M. D., F. R. S., director of the N. I. P., in the front rank of experimental psychologists. He won universal recognition.

FOREST FIRE IN RESTIGOUCHE CO.

Outbreak Occurred at Tracey Brook—Put Out by Fire Fighters from Kedgwick.

Fredericton, July 6.—A forest fire located on Tracey Brook, in Restigouche county, which was sighted yesterday afternoon by the St. Quentin look-out, has been reported to the Department of Lands and Mines. A crew of fire fighters were despatched last evening from Kedgwick to fight the flames.

This morning a report from Three Brooks, Victoria county, stated that the fire occurring in that vicinity yesterday on ground land had been placed under control this morning. The outbreak covered about an acre of land.

Reports of smoke in Sanbury county were received from the Mount Hope look-out this morning, but up until early this afternoon the exact cause of the smoke and the location of the fire had not been determined.

BROADLANDS Douglass McKimley and son, of Broadlands, New Brunswick, N. B., accompanied by Mr. Cecil Fleet of Nelson, N. B., motored to Broadlands, P. Q. last Friday.

Mrs. Emma Dickson and daughter, Mrs. H. B. McKimley and Mrs. J. Norma McKimley of Broadlands, P. Q., are visiting relatives in Ottawa, Ont., and Aylmer, P. Q.

tion prior to 1914 as director of the psychological laboratory at Cambridge. During the war he acted as consultant to court martial boards and there frequently fell upon his shoulders the grim responsibility of whether they were to face a firing party or whether, on account of their mental condition, they could not be held responsible for their actions. Dr. Myers will present a paper in the psychology section of the British Association meetings dealing with the Conception of Fatigue, and he will discuss psychological factors of muscular efficiency in industry.

Cyril Burt, psychologist to the education department of the London County Council, is another member in the education and psychology sections. His contribution will be a lecture entitled Tests for Scholarship of the institute who will be prominent and promotion.

HARBOR AND RIVER ESTIMATES FOR N. B.

The Various Amounts Voted in the House of Commons Last Night.

Ottawa, July 7.—Harbour and river votes in New Brunswick passed by the House of Commons last night are as follows:

New Brunswick—Bay Du Vin, wharf repairs, \$1,600; Bayside, wharf repairs, \$1,250; Black's Harbor, repairs to wharf approach, \$3,500; Cape Bald, breakwater repairs, \$3,200; Caraquet, rebuilding wharf, \$27,000; Cocagne Cape, wharf, \$14,000; Dipper Harbour, Gagetown wharf repairs, \$1,000; harbours and rivers generally, repairs and improvements \$900; Miscou Harbour, wharf reconstruction, \$5,500; Pointe Du Chene, breakwaters, \$1,000; St. John's, wharf repairs, \$1,000; Shediac Island wharf repairs, \$1,000; Shipigan Quibby repairs to rebuilding protection block, \$1,000.

TRAGEDY ENACTED IN NEW HAMPSHIRE

Eccentric Man at Exeter Shot and Killed Policeman and Another Man.

Exeter, New Hampshire, July 4.—Two men, one of them a police officer, were shot to death here last night, while attempting to quell a disturbance caused by boys. Parker McDuffy, an aged man, near whose home the shooting occurred, was arrested charged with murder. The dead are Patrolman Albert L. Colson and

Thomas Shaw.

London, July 7.—Not often does one hear of a cabinet minister acting as his own typist. Besides being able to read and write in nearly every European language, Tom Shaw, the Minister of Labor in the present British Government, has also no fewer than six different kinds of shorthand at his command. He has a typewriter for his own use at the Ministry of Labor, and rather than keep members of his staff after hours he will often type his own letters.

CANADA'S FISH

No man knows the why and wherefore of the appearance and disappearance of fish. They run here today, and there tomorrow; waters that have not known them for years will suddenly become empty and their return may be a matter of months or years. It has been proven that it is not merely a case of depleted stock, but a carrying out of the assertion that the place thereof shall know them no more—until such time as instinct sends them back to old feeding grounds. Therefore the recent report that the May catch of sea fish for the present year is less than that of a year ago may mean much more or little. The total catch for May this year on both the Atlantic and Pacific coasts of the Dominion was 78,536,000 pounds valued at \$1,861,979, compared with 78,998,600 pounds, valued at \$2,855,940 for May 1923. An increase is noted in the catches of cod, haddock, hake and sardines, with a decrease in halibut, herring, alewives, salmon, lobsters and mackerel. On the Atlantic coast the total catch of cod, haddock, hake and pollock was 10,320,700 pounds during May of last year. Local dealers and consumers are of the opinion that the sea fish this season is superior in taste and texture. The colder season has contributed to the healthiness of the fish, which are firm and as a rule running larger in size. An incident in the connection with the sale of fish locally is the reappearance on the streets of the cries of the little errand dealer, whose long drawn out "Fresh Mackerel" has brought back to many the realization of the almost utter disappearance of the house to house vendor of such supplies. The apple man still remains, with his tuneful "Pie-a-pull" but as a rule the field is left to the newsboys—all of which is a far cry from the subject of fish, which goes to prove that pens as well as fish run from their original starting points.

OLD AGE PENSIONS

Interest in the question of old age pensions is revived by the announcement that such a system will be recommended by a special committee of the House of Commons. An Ottawa despatch says it is estimated by the committee that nearly one hundred thousand persons would require to be pensioned under the proposed plan, and that the proposed amount of the pension is twenty dollars per month, and it is proposed that half the cost be paid by the Federal Government, and the other half by the Provincial Governments. The cost to the Dominion, according to the estimates, would be a little under \$12,000,000 per year. Of course the terms of the act would

Gratifying Progress Made In Education Since Fire in 1910

Campbellton School Property Now Valued at
 \$170,000- Scholars Number 950- Twenty
 Five Teachers Employed

VOCATIONAL TRAINING

In no branch of community life in Campbellton is the progress made since the disaster of 1910 more marked than in education. The forward stride has been not only steady, but noticeably rapid for nearly every passing year some progressive step has been taken to promote educational facilities in our town. The year before the Campbellton fire the value of school buildings here was \$20,000. The revenue from school taxes and government grant was \$8000. Today the town possesses school property to the value of \$170,000 and the revenue amounts to \$42,000. The valuation of school property has thus increased to eight and one half times what it was in 1910 while the revenue is now over five times what it was before the disaster of fourteen years ago.

The number of scholars in 1909-10 was 400 while for the term recently ended the enrollment totalled 950. Before the fire twelve teachers were employed on the staff of the two local schools.

Besides this growth shown so clearly by the above figures our two fine educational institutions are better organized and are much better prepared to meet with the requirements of the times. To the regular curriculum has been added a Domestic Science department and also a course in Commercial Training.

The Commercial Course While developments in connection with the schools of Campbellton might be regarded merely as a matter of evolution, the institution of vocational training here cannot be so classified, for it is a distinct addition to educational facilities here and a progressive step towards meeting a vital educational need of the day in an adequate way.

Vocational training was started here two years ago. It has proved very successful and is now a firmly established course. During the past term twenty-one students were enrolled.

This course in vocational or commercial training extends over a period of three years, through grades 9, 10 and 11, and on the completion of his course the student is given a High School Certificate from the Commercial Department. There are eleven different subjects concerned in this commercial course, namely, English, Grammar, English Literature, French, Bookkeeping, Short-hand, Typewriting, Spelling, Arithmetic and Commercial Law.

Just how much of the success of the commercial department of the High School here is due to the ability and conscientious work of Mr. J. E. Vallis, the instructor in this department, it is impossible to say but judging from available information in the connection it appears that we have been fortunate in securing a teacher who has such a thorough knowledge of his work. The fact that an assistant next term also speaks well for the progress being made. The new teacher who will assist the present instructor is Miss Greta Hayes of Nash Creek, a teacher of several years experience.

A commercial course has been added to the regular departments in the schools at Fredericton, Edmundston and St. Stephen while in Woodstock

provide a safeguard against imposition. If this matter were put to a vote it would probably be found that the country at large favored some such system, although it would not by any means result in closing up those institutions which society maintains for the benefit of those who are destitute. It would simply the problem of existence for a limited number of persons at an age when they would be unable to fend for themselves.

Use the Want Ad. way

Greatest Dope Cache in History

commercial training is given in a separate school. It is significant of Campbellton's progress in education to have such a course available in the High School here. Training of this kind is a growing need of the times. Comparatively few students enter colleges and with the completion of their High School course are forced to secure a business training through whatever means may offer. Having only a few very limited subjects their progress in business activities is greatly retarded. The commercial course in the schools eliminates this handicap for it provides the scholar with a general knowledge of the various subjects he will require to be familiar with when beginning a business course. Doubtless as time goes on a still greater number of students will take advantage of this splendid opportunity for practical business training.

The vocational evening classes which were carried on here last fall and during the past winter were equally successful. These classes had an enrollment of sixty-six during both terms and will be re-opened again this fall.

SURGEONS MEET IN P. E. I. THIS WEEK

Dr. Pinault Is Attending Sessions—Also Two Nurses From Hotel Dieu

The Maritime Provinces Section of the American College of Surgeons is holding its sessions in Charlottetown P. E. I. this week and Dr. L. G. Pinault, F. A. C. S. is attending the meetings. He is accompanied by Mrs. Pinault.

The word "American" does not mean that this is a Yankee organization but a pan American one including Canada, Mexico and South America. To become a fellow of the American College of Surgeons a doctor has to be in practice for at least eight years and devote 50 per cent of his work to surgery. He must also present records of fifty major operations performed by himself and fifty others with which he assisted. He must also promise on his honor never to practice division of fees with other medical men who refer cases to him for operation and to refrain from unnecessary surgical interference.

Two local nurses are also attending the meetings in Charlottetown. These are Sister Kerr and Sister Carroll both of the Hotel Dieu. They left here on Monday morning and assisted in the Hospital Conference which took up one session of the meetings at Charlottetown.

OBITUARY

Mary Vaughan McMillan In the death of their little daughter, Mary Vaughan, Mr. and Mrs. Reid McMillan have the sympathy of all. This bright little girl who was two years and five months old died early Thursday morning after an illness of only one week. Her sudden illness was diagnosed as peritonitis and an operation was deemed necessary. This temporarily helped her but she became very weak and finally succumbed.

The funeral services were held on Friday afternoon at 2 o'clock and were largely attended. The Rev. W. W. McMillan officiated. The floral offerings were numerous and very beautiful.

BRIDE AND GROOM WERE BOTH BLIND

A Unique Wedding at Toronto—The Bridesmaid Also Sightless

Toronto, July 4.—Rhodes Avenue Presbyterian Church was on Saturday evening beautiful, fragrant and decorated throughout with midsummer blossoms upon the occasion of a unique and dainty wedding, when Miss Betty, daughter of Mr. and Mrs. C. Hewison, of 138 Rhodes Avenue, became the wife of Melville Earl Salter of Oshawa, Ontario, both principals, the bridesmaid and most of the guests being blind. When a very small girl in the city of Manchester, England, during the coronation celebration upon the occasion of the King Edward's ascension to the throne of Great Britain, some over enthusiastic boy fired a gun close to the little girl's face ruining her eyesight. She attended the school for the blind in Liverpool and when her father moved to Canada, settled at the Brimford Blind Asylum, where she met Mr. Salter, who had been sightless since birth and is now an expert musician and piano tuner.

The bride was attended by an old school companion, also blind, in the person of Miss Alma Brunson.

Glenn Lott" laden with pulpwood shipped by the Howard Smith Paper Mills the "S. S. Canadian Harvester" with a cargo of pulpwood shipped by the St. Maurice Lumber Co. and the three-masted schooner "W. C. Wilkins" with a cargo of long lumber shipped by the Shepard and Morse Lumber Co. cleared from this port during the past week. Also the "S. S. Hochelaga" arrived in Sandy Beach a few days ago, with a cargo of coal.

TAG DAY The Jeanie Gordon Lodge will hold a Tag Day on Saturday July 12th.

Here and There

It is announced that vigorous efforts will be made by the Government of Manitoba to effect the actual settlement of 224,000 acres of vacant provincial land now under the administration of the Crown.

For the week ended June 21st traffic earnings of the Canadian Pacific Railway amounted to \$2,801,000, as compared with \$2,857,000 for the corresponding period of 1923. This is an increase of \$142,000 or 4.4 per cent.

Reports from the Rouyn gold fields of Quebec continue to indicate a great future for that territory. Development is proceeding apace and the English capital now flowing into Canada in search of good investments is interesting itself in this area.

Three carloads of seed grain are being shipped weekly from the provincial seed cleaning and marketing plant at Edmonton, Alberta. About 50,000 bushels of seed grain have been handled by the plant since last fall and 20,000 bushels more will be handled before the year's seeding is completed.

The International Paper Company intends to add two new machines to their plant in Three Rivers, Que., so as to increase their production from 100 to 140 tons daily. Another project is also under consideration, viz., to build a plant in Batiscan to enlarge the Three Rivers one.

Out of every dollar the Company earns the sum of 51 cents is spent by the Canadian Pacific Railway in the home markets of Canada for wages, materials, supplies, taxes and insurance. Figures recently issued show. In 1923 the total earnings of this great corporation were \$138,837,083, and the community in Canada directly benefited by the expenditure of 51 per cent of this huge amount in home markets.

The 1924 cut of the East Kootenai (B.C.) forest district gives promise of reaching a grand total of 150,000,000 feet. There is a particularly large growth in poles of longer lengths and in railway ties, and a cut of some 10,000,000 saw ties and the usual quantity of the heavy timbers is looked for. Another point is that there will probably be thirty-one per cent less cut than in 1923.

Canada now has the largest fleet of motor trucks in the world. The production of the world's motor trucks in 1923 was 164,440 units, of which the Trans-Canada produced 12,000, or 7.3 per cent. The United States came second, with 2,865,076 units, or 15.3 per cent, and Canada followed with 1,235,000 units, or 7.2 per cent.

June 1924 was the anniversary of the running of the Canadian Pacific Railway's famous transcontinental. This was not the Company's first transcontinental, as train began regular service between Montreal and Vancouver as far back as 1886, but for several years it was the crack Canadian Pacific line.

Splendid Record Of Campbellton Churches During Past 14 Years

Many Remarkable Facts Associated With Religious Work Here Since Disaster Of 1910

INTERESTING FIGURES

In the growth of a community there is obviously no factor more necessary or more constructive to its advancement and general prosperity than its churches. Probably this very factor has played a much greater part in the rapid advancement of our town, since the fire fourteen years ago, than is generally realized, for the history of our religious institutions record that is most gratifying in the achievements and truly admirable in the spirit of liberality, sympathy and interest and tenacious effort on the part of all those who have been associated with their work.

Because of their interest on the fourteenth anniversary of the Campbellton Fire we have taken pains to secure a few facts and figures which show very clearly the remarkable progress and improvement made in Church work in Campbellton since the disaster of 1910. Owing to the fact that many valuable records were lost in the conflagration at that time it has been impossible to secure the details that would have been available had they not been destroyed in the fire. However, the comparative figures available are eloquent of the splendid progress made since that time.

Roman Catholic Church Before the fire the Roman Catholic Church property in Campbellton did not exceed \$25,000 in value while today the valuation shows an enormous increase. When the great structure of the new church here is completed it will cost about \$50,000. To this estimate of church property the large new School Building valued at \$50,000 and the fine new Presbytery valued at \$25,000 must be added. The total value of church property is complete their value will aggregate to the large sum of \$225,000. It is further estimated that the income of the Catholic Church here in 1923, the year before the fire, did not exceed \$5,000 while last year the net income over all expenses was \$10,000.

In its membership the Catholic Church here has also made much advance since the fire. The census of the town records show a membership of 3117. Figures such as these should prove most encouraging for they show clearly the gratifying results of proper organization, energetic effort and devotion to a great purpose.

St. Andrew's Presbyterian Church Before the fire St. Andrew's Presbyterian Church here had a membership of 119. The value of its property is conservatively estimated at about \$7000. Before the fire the only hall was a moderately sized wooden building which is now occupied by the leader of the Army here. In 1918 a fine new brick building was built. The new structure is of liberal dimensions and was erected at a cost of something over \$4000.

The Baptist Church The Church was burned July 11th 1910. Immediately the people put up a shack and worshipped in this for nearly two years.

The Baptist Parsonage which was

St. Andrew's Congregation
 St. Andrew's Presbyterian Church
 Campbellton, N. B.

1909	1923
Families	160 304
Communicants	238 521
Enrollment in S. School	264 628
Raised for all Missionary purposes	\$1185 \$2921
Raised for all congregational purposes	\$5981 \$7225
Total for all purposes	\$4176 \$10,146
Value of property	\$12,500 \$25,000

The Anglican Church Owing to the loss of records in the fire exact figures setting forth the progress of this institution were impossible to secure but the information available shows a satisfactory period of advancement.

Previous to the fire the property of Christ Church is placed at about \$5,000. Today this property is placed at \$12,000 while the income of \$3000 shows a very large increase over that of former years. This church now has members and adherents totalling 624, which incidentally shows a good increase in membership.

Wesley Methodist Church The history of the Methodist Church shows equally satisfying progress. Before the disaster of 1910 the church property was worth about \$9,150. Today its valuation is placed at \$17,700. The income prior to the fire was about \$2,600 as compared with \$5,000 for 1923. The progress is all the more remarkable when it is known that during the last decade or more there has been a decrease in supporting families from 97 to 76. The church is also much better organized than in former years, this improvement being particularly evident in the Sunday School Department.

The Salvation Army In the progress of local religious institutions since the fire, the Salvation Army has had its place and the passing of time has seen a steady increase in membership which now totals 116. The value of its property is conservatively estimated at about \$7000. Before the fire the only hall was a moderately sized wooden building which is now occupied by the leader of the Army here. In 1918 a fine new brick building was built. The new structure is of liberal dimensions and was erected at a cost of something over \$4000.

The Baptist Church The Church was burned July 11th 1910. Immediately the people put up a shack and worshipped in this for nearly two years.

The Baptist Parsonage which was

also burned was immediately built at a cost of \$4000. This money was raised and the building paid for by the time it was ready for occupancy.

The Church appointed a committee consisting of the trustees and deacons of the Church to secure a site, collect funds and go ahead with the building.

An architect was secured, the design accepted, and J. A. D. A. Harrell was given the contract. The building was begun in 1911 and finished in 1912. The cost of the building was \$2350 and the cost of the church building including bell and memorial windows was \$4100.

When the Church building was dedicated a mortgage of \$5000 on the building was still being carried but this was lifted in 1917.

In 1921 an additional piece of land lying next the church lot was purchased for \$1500, and in 1923 a pipe organ was placed in the Church at a cost of \$350.00. There is at present a balance due on the newly acquired land and organ.

The people responded nobly to the heavy task imposed upon them and have been generous in their gifts to denominational purposes.

Rev. J. H. Jenner, M. A. B. D., was pastor of the church during the building of their church edifice. In 1914 the present pastor Rev. W. Campbell became the leader of the Baptist Church here.

With this splendid record all those whose efforts have been a contribution towards the success have just reason for pride. The years have passed there has been no let or hindrance to the more general recognition of the great part the church is destined to play in a growing community, in an educational as well as a religious sense. This is realized more fully when one stops to momentarily speculate on what our town would be like had these several churches not survived the disaster of fourteen years ago. Imagination conjures up a picture that is not only without appeal to the commercial promoter but a vision of a community where even the average citizen, indifferent though he might be to religious responsibility would not consider it safe to live.

The years have passed there has been no let or hindrance to the more general recognition of the great part the church is destined to play in a growing community, in an educational as well as a religious sense. This is realized more fully when one stops to momentarily speculate on what our town would be like had these several churches not survived the disaster of fourteen years ago. Imagination conjures up a picture that is not only without appeal to the commercial promoter but a vision of a community where even the average citizen, indifferent though he might be to religious responsibility would not consider it safe to live.

With this splendid record all those whose efforts have been a contribution towards the success have just reason for pride. Sportlife Magazine, from the province's best of obtaining copy and thus a series of articles to be serially in successive issues. The articles later on a national and published in Europe. The guests had Negotiations are now and one or two persons in New to make arrangements to to this party which will e people.

Newsy Notes of Town and Country
Happenings Gathered by Graphic Reporters

EDITORS ADDRESSED BY
LLOYD GEORGE
London, July 8.—Lord Beaverbrook, native of New Brunswick and former Montreal financier who is now a newspaper publisher in London, has 500 guests at dinner tonight to meet the newly elected prime minister of Canada, who are now concluding a tour of Europe. The guests include Lloyd George, Lord Strathfield and Winston Churchill.

"We are welcome as kinsmen to the old Dominion," declared Lloyd George, addressing the gathering. "We have not forgotten what our partners in the Empire did with us in the name of honor and humanity when we accepted the most formidable challenges ever hurled. I have been to a few of the battlefields of what might have happened if that million men from overseas had not come."

Marjorie E. Connor

Mr. George St. Onge and several other citizens have received cards from H. B. Anslow from various places he has visited in Europe.

How to Make Delicacies From Fruits in Season

Fruits in season make the most acceptable desserts, whether cooked, uncooked or in the form of frozen dishes. Fruit cocktail, soups, pies, cobbblers, tarts, ices, frozen fruits and ice creams provide a wide range and home gardens yield a generous supply for our use.

Almost all diets include fruit in some form, so fruit dishes are usually very welcome. Fruit should be carefully washed or rinsed before preparing in any way for table use. Only perfect fruit should be chosen, fully matured and ripe but not soft or over ripe. Small fruits with hard seeds like gooseberries, blackberries and currants are pleasant when cooked in some form, even though they are simply strained and made into quick jellies. Raspberry seeds are more tender, and not so objectionable.

Strawberry Dimples.

Mix two cups of flour with four level teaspoons of baking powder. Cut in a heaping tablespoonful of butter and add a cupful and a half of rich milk, then work the mixture to a smooth dough. Wash, top and chop coarsely, a basket of strawberries and sprinkle them generously with sugar. Roll out the dough, then cut it in squares. Fill each square with berries and pinch the dough at the top, dumping fashion. Lay the dumplings on a floured plate and place them in the steamer. Let the dumplings steam three-quarters of an hour. Add to the remainder of the berries, a cupful of sugar and a half cupful of water. Let them cook gently for from five to ten minutes, then set them aside to use as hot sauce for the dumplings.

Apple Fritters With Currant Sauce. Make the usual fritter batter and add to it a cupful and a half of well-made apple sauce. Add a little grated nutmeg and a teaspoonful of vanilla and fry it in hot fat. Wash, stem and

stew in a pint of water, a full quart of fresh ripe currants. When they are soft, put them through a strainer. To a pint of the juice, add a half pint of sugar. Boil gently and the skin this juice and when the syrup is beginning to be thick, add to it a little butter and flour rubbed to a paste. Strain the sauce into a sauceboat when it is ready to serve.

Rhubarb And Pineapple Pie

Wash and cut up, rhubarb enough to make four cupfuls. Cover it with boiling water and boil it three minutes, then drain. Line two small pie-plates with good pie-crust. Add a cupful of sugar and a can of grated pineapple to the rhubarb and fill the pies with the mixture. Dredge the top with a little flour, dot it with a little butter and put on the top crusts. Bake the pie as usual.

Frozen Strawberries. Wash, top and halve a quart of fresh berries. Add two cupfuls of sugar and let the berries stew gently for eight minutes. When they are cool add a pint of cream, the stiffly-beaten whites of two eggs and a few drops of red coloring matter. There are several kinds of coloring that are perfectly harmless and give a pink tinge to the mass. Freeze as usual and let it stand a half hour to ripen, then serve the ice cream.

ED

How To Protect All Your Clothes From the Moths

Many women who consider themselves exemplary housekeepers have to admit that occasionally the moths get the better of them and steal in to do their damage when they least suspect it of them. Most of us know but little about these pests that feed at every opportunity on our most expensive woolen garments and furs.

There are two kinds of moths that float into our windows. One is the case-making moth, the other the webbing moth. The former is white or grayish in color, the latter is brown. They do not live long, for they themselves don't eat, but they lay eggs in woolens, rugs, furs, feathers and so on. They even infest piano-felts.

The case-making moth's eggs hatch out in about eight days in hot weather. The worm begins to feed on your possessions and makes a sort of cocoon for itself, which it leaves open at one end, so that it can reach out and get its meal easily from the lapel of father's dress coat or the front breadth of mother's dress. Meantime, as it eats and outgrows its shell, it keeps putting on extensions to keep itself covered. When its feeding days are over the little worm ties up its front door and goes to sleep until it is time for it to emerge as a moth. A short life, but a busy one has the moth, and he is a bandit that must be fought.

The first protection step is to clean the closets well. Then burn a small sulphur candle in the closet for a couple of hours.

Now for the garments themselves that are to be packed. We never know but that they may already be infected, the eggs being tucked away in the fold of the goods, where they cannot be seen. So the first thing to do is to brush the materials thoroughly, inside and out, in the edges of the hems and under plaits. Sponges of all spots with benzine or some other cleanser, then have the garments well pressed. Now they may be folded into tapers, or several thicknesses of newspaper, and placed in the trunk or closet. Pepper, tobacco, moth balls, insect powder, camphor, eucalyptus, leaves and cedar chips may be added, but they are not very efficient if moths are really about.

Most people unfortunately do not get their screens in until flying pests are about, with nothing to hinder their entrance. Also, owners are apt to hang things that are not in use at the back and dark end of the closet, without taking the precaution of cleaning them and removing all spots which would help, though not save them, if left there to long. Pressing with a good warm iron is sufficient to kill the eggs if they are present. Especially is this true of heavy woolens and men's clothing.

INTERESTING FIGURES

The report of vital statistics for New Brunswick for the months of March and April, issued by the Department of Public Health, shows some interesting comparisons regarding infant mortality. Taking the month of March, 131 infants were born in the City and County of St. John and eight infants died during the first year of their lives. In April 146 infants were born, and ten died during one year. In the County of Gloucester in March there were 113 births, and seventeen deaths under one year; in April the same number of births and nine deaths during the first year of life. The number of deaths was one thousand in St. John in March was 61.1 and in Gloucester, 150.8. In April the figures for St. John were 58.5, and for Gloucester 79.6. The rate per thousand in Westmorland in March was 107.7, and in April 52.5. In Northumberland March, it was 60.6, and in April 58.8. Madawaska made the most favorable showing, with 106.6 per thousand in March, and 186.8 in April. The best showing was made by Queens County, where no infant under one year died in March or April; but the total number of births in March was only thirteen, and in April twelve, compared, for example, with 113 in each month in Gloucester and 129 and 133 respectively in Westmorland. In Albert County there were

WOMAN SUFFERED FOR MONTHS

Weak and Nervous. Made Well by Lydia E. Pinkham's Vegetable Compound

Webbwood, Ont.—"I was in a very weak and run-down nervous condition, always tired from the time I got up until I went to bed. Sleep did not rest me at all. My sister recommended Lydia E. Pinkham's Vegetable Compound to me and others told me about it, but it was from my sister's advice that I took it. It did not take long, until I felt stronger, headaches left me and my appetite came back to me. I am a farmer's wife and have many things to do outside the house, such as milking, looking after the poultry, and other chores. I heartily recommend the Vegetable Compound to all who have the same trouble I had, for it is a fine medicine for women."—Mrs. L. E. PINKHAM, 252-264 St. Paul Street, Boston, Mass.

Another Nervous Woman Finds Relief Port Huron, Mich.—"I suffered for two years with pain in my side, and if I worked very much I was nervous and just as tired in the morning as when I went to bed. I was sleepy all the day and didn't feel like doing anything, and was so nervous I would bite my finger nails. One of my friends told me about Lydia E. Pinkham's Vegetable Compound, and it helped me so much that I soon felt fine."—Mrs. CHAS. J. BROWN, 502-504 St. Paul Street, Boston, Mass.

Women who suffer from any feminine ailment should try Lydia E. Pinkham's Vegetable Compound.

FASHIONS & FOIBLES

by Shirley Sharon

For the Summer vacation either at the shore or in the country, in "the great open spaces" of the West or in the conventional resorts of the East, the sports costume is universal.

A London jury after looking over a collection of French sports costumes reached the conclusion that women's dress was becoming standardized. Certainly a sports costume with its slip-over blouse and wrap-around skirt is a type that one sees everywhere on smartly dressed women. The sleeveless blouses are made of the tub silk, silk broadcloth, crepe de Chine, pongee, etc., and the skirt usually of flannel or camel's hair. Paris has introduced the tricorn hat in an effort to break the stranglehold of the cloche and it is proving very successful.

only eight births in March and thirteen in April. The figures show that in the counties which have a large Acadian population the birth rate is much higher, but also that in Gloucester and Madawaska the number of deaths of infants under one year is higher by comparison; and that there fore in these counties there is room for much infant welfare work. The total number of births in New Brunswick in March was 956, compared with an average of 1,041 for the last five years. In April the number was 1,011, compared with an average of 1,004. Marriages also showed a decrease, being 144 in March and 167 in April compared with 148 and 220 of an average for five years. Deaths in March were 425, compared with a five year average of 383; and in April 422, compared with 455. In March 35 children died under the age of one year, and in April 38. There is no doubt whatever that of these 168 infants who died nearly all might have been saved with proper maternity and infant care. Hon. Dr. Roberts has frequently pointed out that it is better to save the lives of our own children so that they may grow up to manhood and womanhood, than to bring immigrants who have no knowledge of or any respect for the ideals of Canadian life. The vital statistics point a moral. We are not yet paying sufficient attention to maternity care and infant welfare work.

CANADA ABLE TO HANDLE

Without Recourse to Foreign Markets Say New York Bankers

New York, July 9.—Canada will be able to handle her own wheat requirements without recourse to foreign markets, New York bankers said today. It was thought that the Canadian national issue might be offered here, but the bankers pointed out that Government bonds in the Canadian market is now said to be so strong that it is expected little new capital will have to be drawn from outside countries.

2 FOREST RANGERS ARE DROWNED

Caught in Whirlpool on Kinnegevis River—Menger Details of Tragedy

Quebec, July 7.—News reached the Forest Protection Service this afternoon of a tragedy which occurred last week in the Temiscamungue district in the course of which two forest rangers, named J. Monet and J. Bellemare, lost their lives by being drowned while on duty.

According to the meagre details available, the two men had been looking after the fire protection about one hundred miles north of Ville Marie and were in their southward journey to come back to a central point and were canoeing down the Kinnegevis River.

The river is partially navigable until a point known as the Clay Hill rapids where there is a portage. For some reason or another, however, the two men decided to keep on and were caught in the whirlpool where their canoe became a toy of the waters for some time. They attempted to row against the current but it proved too strong and before they could reach the shore their frail craft was dragged over the falls.

Though efforts were made by other forest rangers, to trace the bodies a message received this morning by M. Henri Keffer, Director of the Protection Service indicated that this had not been successful. As soon as the bodies have been recovered an inquest will be held by the Coroner of Ville Marie.

IMMIGRATION TO CANADA INCREASES

Substantial Advance Over Corresponding Period Last Year Noted in Department Statement for April and May.

Ottawa, July 7.—Substantial increase over the corresponding period last year in immigration to Canada is noted in a statement issued by the department. In April, 1924, a total of 19,330 people came to Canada to settle, including 9,410 British, 1,838 Americans and 8,082 from other countries. In May, 1924, a total of 19,499 entered Canada, of which, 10,861 were British, 1,739 Americans, and 6,834 from other countries, a total for the two months of 38,824. The total for April, and May, 1923 was 27,297. The figures represent an increase of thirty per cent. in British immigration, a decrease of fifteen per cent. in entries from the United States and an increase of 103 per cent. in immigration from other countries.

LAKE LOUISE CHATEAU BURNED

Famous "Palace in the Clouds" Reduced to Heap of Debris

Lake Louise, Alta., July 5.—Two fire-blackened walls and a heap of smouldering debris was all that remained today of the original Lake Louise Chateau, the famous "Palace in the Clouds." Fire which broke out in the main kitchen Thursday night razed the whole structure to the ground and was checked only when the concrete walls and the steel fire doors of the new wing of the Chateau were reached. Six persons, all members of the staff, five Japanese and one white man were burned and injured when they jumped to safety from the second floor, but of the two hundred guests, all escaped.

Canadian Pacific Railway officials are busy engaged in settling claims for damage and personal belongings and, consequently, are unable to give an official estimate of the damage.

It was stated, however, that it would reach nearly \$500,000. The fire is thought to have originated through an overloaded stove in the kitchen. The building and contents, outside of the guests' belongings, were fully covered by insurance.

The simple, sure way to keep that schoolgirl complexion

Youthful complexions are becoming the rule—even in middle life and later years. For millions now follow a simple rule—a method you, too, may easily employ.

Do this at night

Cleanse the skin regularly, authorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the skin.

Then rinse again. Then—If skin is dry—apply a little cold cream. That is all. Skin as cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way: You cannot find a more effective, more beautiful, more economical skin treatment than Palmolive Soap is blended of rare

oils and olive oil—famous for mild, but thorough, cleansing qualities since the days of Cleopatra. And it is inexpensive. All dealers carry Palmolive Soap. Try it for just one week. See how it does improve your skin. Note well the name and wrapper. Palmolive is never sold unbranded.

Costs so little that you may enjoy it for the bath also.

Volume and efficiency produce 25c quality for 10c

MIRAMICHI SOUTH DROWNED AT EXMORE

Joseph Taylor Fell From Logs Into River While on Stream Drive

Newcastle, N. B., July 6.—Joseph Taylor, aged 18, years, of Exmore, about 25 miles from his place, was drowned yesterday afternoon while helping his father stream drive at Exmore. He was standing on the logs when he fell off and was drowned.

The body was recovered in about five minutes and everything done to resuscitate him but no avail, life being extinct when he was taken from the river. He is survived by his parents, Mr. and Mrs. Milton Taylor, and several brothers and sisters.

For damage and personal belongings and, consequently, are unable to give an official estimate of the damage.

It was stated, however, that it would reach nearly \$500,000. The fire is thought to have originated through an overloaded stove in the kitchen. The building and contents, outside of the guests' belongings, were fully covered by insurance.

OLD LADY APPEALS TO THE COURTS

Asks For Court Order That Grandchild Spend Holidays With Her

Toronto, July 8.—The love of a grandmother for her grandchild was revealed in the civil courts when Mrs. Frances Nidd, of North Bay, made an application before Mr. Justice Wright to have the seven-year-old daughter of her daughter spend her summer holidays with her in North Bay. For over a year and a half, Mrs. Nidd had made a monthly trip from North Bay to Ottawa, a journey of 400 miles, in order to see the little girl.

Mrs. Nidd is the wife of J. T. Nidd, railway conductor. Their daughter, who is now engaged in business with her aunt in New York, was married to Mr. Graham at Ottawa in 1918. They had one child, difficulties led to an alimony action, which was decided against the mother in 1922 before Mr. Justice Lennox. In the same year the husband was granted a bill of divorce. The judgment provided that the grandparents were to have access to the child once a month.

It has not been heard of since Mrs. Nidd declared she would be getting her grandchild and promised to provide funds for the visit and to give bond for her safe return.

Mr. Graham, father of the little girl, said he had arranged for her to spend the summer at Lake Deschambault, with a number of her cousins, with whom she was happy.

Shigawake, Que.

Mr. and Mrs. Alfred Allan are receiving congratulations on the arrival of a nice baby girl at their home on Saturday June 28th.

Mrs. Carville and four children of Calgary are visiting Mrs. Carville's mother, Mrs. John Stone Shigawake.

Mrs. Canon Almond of Montreal and son John and little Miss Rosemary have taken up their residence at the Cordon Kinglow for the summer.

The picnic given by Miss Carson for her pupils and their parents was a great success. Beautiful weather, pleasant site, with lots to eat, and drink go far towards making a good time.

Miss Carson left for her home in

NEW WAY TO FIND FOREST FIRES

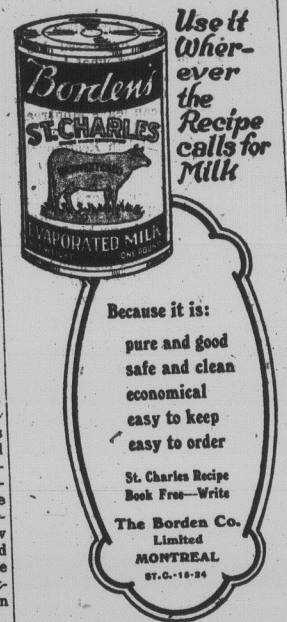

Restigouche Outbreaks Located By Triangulation From Reports of the Look-outs

Fredericton, July 8 Reports received to-day by the Department of Lands and Mines from the look-out at Five Fingers in Restigouche county stated that the forest fire at Tracey Brook, about three miles beyond the inter-provincial boundary north of Tracey in the province of Quebec, was dying down.

This fire which was at first thought to be in Restigouche county was located by triangulation from reports received from the St. Quentin and Mount Carleton look-outs in the province of Quebec and the Forest Service of the Department of Lands and Mines. A second report was received giving the angle of direction of this fire which was also sighted by the Mount Carleton look-out some time later. The look-out towers and location of the intersection showed the location of the fire to be across the inter-provincial boundary.

The first report of the outbreak was received from the St. Quentin look-out giving the angle of direction from St. Quentin. A second report was received giving the angle of direction of this fire which was also sighted by the Mount Carleton look-out some time later. The look-out towers and location of the intersection showed the location of the fire to be across the inter-provincial boundary.

The Great Impersonation

A stirring story of love and adventure. By E. PHILLIPS OPPENHEIM

Published by arrangement with The British & Colonial Press Limited.

(continued from last week)

CHAPTER VI
Dominey spent a very impatient hour waiting in his sitting-room at the Carlton, waiting for Seaman. It was not until nearly seven that the latter appeared.

"Are you aware," Dominey asked him, "that I am expected to call upon the Princess Eiderstrom at seven o'clock?"

"I have your word for it," Seaman replied, "but I see no tragedy in the situation. The Princess is a woman of sense and a woman of political insight. While I cannot recommend you to take her advice into your confidence, I still think that a middle course can be judiciously pursued."

"Bubbish," Dominey exclaimed. "As Leopold von Ragastin, Princess Eiderstrom's claimant, upon me and my liberty, claims which would altogether interfere with the career of Eiderstrom."

With methodical nervousness, Seaman laid his hat, gloves and walking stick upon the connecting bedroom, closed and fastened the door and extended himself in an easy chair.

"Sit opposite to me, my friend," he said. "We will talk together."

Dominey obeyed a little reluctantly. His companion, however, ignored his demure.

"Now, my friend," he said, beating upon the palm of one hand with the forefinger of his other, "I am a man of common sense and I do things in a business way. Let us take stock of position. Three months ago last week we met by appointment at a certain hotel in Cape Town."

"Only three months," Dominey muttered.

"We were unknown to one another," Seaman continued. "I had only heard of the Baron von Ragastin as a devoted German citizen and patriot, engaged in an important enterprise of the Kaiser, on account of a certain underhanded happening in Hungary."

"I killed a man in a duel," Dominey said slowly, with his eyes fixed upon his companion's.

"It was not an 'underhanded act,'" there are duels. A fight between two young men, in defence of the honour of or to gain the favour of a young lady in their own station of life, has never been against the conventions of the Court. On the other hand, to become the lover of the wife of one of the greatest nobles in Hungary, von Ragastin is still remembered."

"There is no bottom to our purse, nor any stint. Neither must there be any stint to our loyalty," he added gravely.

"In this instance," Dominey pointed out, "I should have had no place whatever in English social life, and I should have received no welcome from those with whom I imagine you desire me to stand well."

"Again I make no complaints," Seaman declared.

"There is no bottom to our purse, nor any stint. Neither must there be any stint to our loyalty," he added gravely.

"In this instance," Dominey pointed out, "I should have had no place whatever in English social life, and I should have received no welcome from those with whom I imagine you desire me to stand well."

honor makes necessity is looked upon very differently."

"I had no wish to kill the Princess," Dominey protested, "nor was it at my desire that we met at all. The Prince fought like madman and slipped, after a wild lunge, on to the point of my stationary sword."

"Let that pass," Seaman said. "I am not of your order and I probably do not understand the etiquette of some nations. I simply took upon you as a culprit in the eyes of our master, feel that he has a right to demand from you much in the way of personal sacrifice."

"Perhaps you will tell me," Dominey demanded, "what more he would have had I have spent weary years in a godless and fever-ridden country, raising up for across a great trophy of natives. I have undertaken other political commissions in the Colony which may bear fruit. I am to take up the work for which I was originally intended, for which I was given an English education. I am to repair to England, and under such identity as I might assume after consultation with you at Cape Town, I am to render myself so far as possible a persona grata in that country. I do not wait for our meeting. I see a great chance and I make use of it. His companion, however, ignored his demure."

"Now, my friend," he said, beating upon the palm of one hand with the forefinger of his other, "I am a man of common sense and I do things in a business way. Let us take stock of position. Three months ago last week we met by appointment at a certain hotel in Cape Town."

A fight between two young men, in defence of the honour of or to gain the favour of a young lady in their own station of life, has never been against the conventions of the Court. On the other hand, to become the lover of the wife of one of the greatest nobles in Hungary, von Ragastin is still remembered."

"There is no bottom to our purse, nor any stint. Neither must there be any stint to our loyalty," he added gravely.

"In this instance," Dominey pointed out, "I should have had no place whatever in English social life, and I should have received no welcome from those with whom I imagine you desire me to stand well."

"Again I make no complaints," Seaman declared.

"There is no bottom to our purse, nor any stint. Neither must there be any stint to our loyalty," he added gravely.

"In this instance," Dominey pointed out, "I should have had no place whatever in English social life, and I should have received no welcome from those with whom I imagine you desire me to stand well."

"Again I make no complaints," Seaman declared.

were friends over here in England, at school and at college, and there are many who will still remember the likeness between us. Perfectly though I may play my part here and there there may be doubts. These will be doubts no longer if I am to be dragged at the chariot wheels of the Princess."

Seaman was silent for a moment. "It is a heavy responsibility," he said, "but I am ready to accept it. It is for a few months only. What is your proposition?"

"That you see the Princess in my place at once," Dominey suggested eagerly. "Point out to her that for the present, for political reasons, I am and must remain Eiderstrom Dominey to her as to the rest of the world. Let her be content with such measure of friendship and admiration as Sir Eiderstrom Dominey might reasonably offer to a beautiful woman whom she has met to-day for the first time, and I am entirely and all my heart at her service. But let her remember—that even between us two, in the solitude of her room as in the drawing-rooms where we might meet, it can be Eiderstrom Dominey only until my mission is ended. You think perhaps that I say unbecoming things upon this. I do not. I know the Princess and I know myself."

Seaman glanced at the clock. "At what hour was your appointment?"

"It was not an appointment. It was a command," Dominey replied. "It was to be at Belgrave Square at seven o'clock."

"I will have an understanding with the Princess," promised Seaman, as he took up his hat. "Dine with me downstairs at eight o'clock on my return."

Dominey, depending about an hour later, found his friend Seaman already established at a small, far-away table set in one of the recesses of the grill room. He was welcomed with a little wave of the hand, and cocktails were at once ordered.

"I have done your errand," Seaman announced.

"Since my visit I am bound to admit that I realise a little more fully your anxiety."

"You probably had not met the Princess before?"

"I had not. I must confess that I found her a lady of somewhat overpowering temperament. I fancy my friend, Seaman continued, with a twitch at the corner of his lips, "that somewhere about August next year you will find your hands full."

"August next year can take care of itself," was the cool reply.

"In the meantime," Seaman continued, "the Princess understands the situation and is, I think, impressed. She will at any rate do nothing rash. You and she will meet within the course of the next few hours, but no reasonable time to proceed. As I drove back here after my interview with the Princess, I decided that it was time that you made acquaintance of the person who is chiefly responsible for your presence here."

"Precisely! You have maintained, my young friend," Seaman went on, "a brief pause during which one waiter had brought their cocktails and another receiver their order for dinner, a very discreet and laudable silence with regard to those functions, those instructions which were committed to writing. They are here."

Seaman touched his forehead and drained the remaining contents of his glass.

"My instructions are to trust you absolutely," Dominey observed, "and, until the greater events stir, to concentrate the greater part of my energies in leading the natural life of the man whose name and place I have taken."

"Quite so," Seaman acquiesced.

He glanced around the room for a moment or two, as though interested in the people. Satisfied at last that there was no chance of being overheard, he continued:

"The first idea you have to get out of your head, my dear friend, if it is there, is that you are a spy. You are nothing of the sort. You are not connected with our country—rememberably perfect system of espionage in the slightest degree. You are a free agent in all that you may choose to say or do. You can believe in Germany or fear her—whichever you like. You can join your cousin's husband in his crusade for National Service, or you can join me in my efforts to cement the bonds of friendship and affection between the citizens of the two countries. We really do not care in the least. Choose your own part. Live yourself thoroughly into the life of Sir Eiderstrom Dominey, Baronet, of Dominey Hall, Norfolk, and pursue exactly the course which you think Sir Eiderstrom himself would take."

"This," Dominey admitted, "is very broad-minded."

"It is common sense," was the prompt reply.

"With all your ability, you could not in six months' time appreciably affect the situation either way. Therefore, we choose to have you concentrate the whole of your energies upon one task and one task only. If there is anything of the spy about your mission here, it is not England or the English which are to engage your attention. We require you to concentrate wholly and entirely upon Terloff."

"Terloff?" he repeated. "I expect to work with him, but—"

"Empty your mind of all preconceptions," Seaman insisted. "What you will do with regard to Terloff will grow upon you gradually as the situation develops."

"I am on the point of telling you," Seaman said, "that I have made an appointment for you to see him at eleven o'clock to-night at the Embassy. You will go to him at that hour. Remember, you know nothing of the man, and you are waiting for instructions. Let speech remain with him alone."

CHECK 5 CIGAR

Enjoyment in Every Puff!

Be particularly careful not to drop him a hint of your knowledge of what is coming. You will find him absolutely satisfied with the situation, absolutely content. Take care not to disturb him. He is a mission of peace. So are you."

"I begin to understand," Dominey said thoughtfully.

"You shall understand everything when the time comes for you to take a hand," Seaman promised, "and do not in your zeal forget, my friend, that your duty to establish and maintain your position as an Englishman. So far all has gone well?"

"Perfectly, so far as I am concerned," Dominey replied. "You must remember, though, that there is your end to keep up. Berlin will be receiving frantic messages from East Africa as to my disappearance. Not even my associates were in the secret."

"That is all understood," Seaman assured his companion. "A little doctor named Schmidt has spent many marks of the Government money in frantic cables. You must have endeared yourself to him."

"He was very faithful associate," Seaman declared, "and by my nearest living relative, and incidentally I have discovered the one far-seeing person in England who knows what is in store for us."

Seaman was momentarily anxious. "Whom do you mean?"

"The Duke of Worcester, my cousin's husband, of whom you were speaking just now."

"He reminds me of the geese who saved the Capitol," he said. "A urbane man obsessed with one idea. It is queer how often these 'fanatics' discover the truth. That reminds me, he added, taking a small book from his waistcoat pocket and glancing it through. "His Grace has a meeting to-night at the Holborn Town Hall. I shall make one of my usual interruptions."

"If he has so small a following, why don't you leave him alone?" Dominey enquired.

"There are others associated with him," was the placid reply, "who are not so insignificant. Besides, when I interrupt I advertise my own little hobby."

"These—these English are strange people," Dominey remarked, glancing around the room after a brief but thoughtful pause. "We advertise and boast about our colossal wealth, and yet we are incapable of the slightest self-sacrifice in order to preserve it. One would have imagined that our philosophers, our historians, would warn us in irrefragable terms, by unanswerable scientific deduction, of what was coming."

"My compliments to your proposition," Seaman murmured, with a little bow. A propos of what you were saying, you will never make an Englishman—I beg your pardon, one of your countrymen—rebuke anything unpleasant. He prefers to keep his head comfortably down in the sand. But to leave generalities, when do you think of going to Norfolk?"

"Within the next few days," Dominey replied.

"I shall breathe more freely when you are securely established there," his companion declared. "Great things wait upon your complete acceptance, in the country as well as in town, as Sir Eiderstrom Dominey. You are sure that you perfectly understand your position there as regards your—er—domestic affairs?"

"I understand all that is necessary," was the somewhat stiff reply.

"All this is necessary is not enough Seaman rejoined irritably. I thought that you had wormed the whole story out of that drunken Englishman?"

"He told me most of it. There were just one or two points which lay beyond the limits where questioning was possible."

Seaman frowned angrily.

"In other words," he complained, "you remembered that you were a gentleman and not that you were a German."

"The Englishman of a certain order," Dominey pronounced, "even though he be degenerate, has a certain obstinacy, generally connected with one particular thing, which nothing can break. We talked together on that last night until morning; we drank wine brandy. I see the story of my own exile from my breast and laid it bare before him. Yet I know all the time, as I know now, that he kept something back."

There was a brief pause. During the last few minutes a certain tension had crept in between the two men. With it, their personal characteristics seemed to have become more than over the aristocratic Seaman the plebeian schemer, unabashed and desperately in earnest. He turned presently a little way across the table, his eyes had narrowed but they were more prominent than usual.

They were more prominent than usual.

"You should have dragged it from his throat," he insisted. "It is not your duty to nurse fine personal feelings. Heart and soul you stand pledged to great things. I cannot at this moment give you any idea what you may not mean to us after the trouble has come, if you are able to play your part still in this country as Eiderstrom Dominey of Dominey Hall. I know well enough that the sense of personal honour amongst the Prussian aristocracy is the finest in the world, and yet there is not a single man of your order who should not be prepared to die or cheat for his country's sake. You must fall into line with your fellows. Once more, it is not only your task with regard to Terloff which makes your recognition as Eiderstrom Dominey so important to us. It is the things which are to come later. Come, enough of this subject. I know that you understand. We grow too serious. How shall you spend your evening until eleven o'clock? Remember you did not leave England an orphan, Sir Eiderstrom. You must have your amusements. Why not try a music hall?"

"My mind is to full of other things," Dominey objected.

"Then come with me to Holborn," little man suggested. "It will amuse you. We will part at the door, and you shall sit at the back of the hall, out of sight. You shall hear the haunting eloquence of your cousin-in-law. You shall hear him trying to warn the men and women of England of the danger awaiting them from the great and rapacious German nation. What do you say?"

"I will come," Dominey replied in spiritless fashion. "It will be better than a music hall, at any rate. I am not at all sure, Seaman, that the hardest part of my task is over here will not be this necessity for self-imposed amusements."

(continued next week.)

QUEBEC MINISTER ENTHUSIASTIC

Non. J. E. Perrau Mines and Fisheries of The Coast—V Pounds of Salmon Fishermen's Co-op

Conditions in the Gaspé were reported as excellent yesterday morning by Hon. J. E. Perrau, Minister of Colonization and Fisheries, on his return from a inspection trip to this section of the province, where he spent two weeks.

Mrs. Perrau and her family, who are visiting in the Gaspé, are also in the latter section being a constant increase over last year, and the operations of fishermen began to show a marked improvement in the catching of the fish, which is the result of the better weather, the fact that the fishermen, taking care of the cooperative, had a better chance.

The Gaspé Belt Road. Another important condition of the development of the region the Gaspé belt road, which the latter announced will be completed next year, and the Campello, which is to allow the line rail the Gaspé belt road, the fact that the fishermen, taking care of the cooperative, had a better chance.
