SCHEDULE

Of ACCOUNTS and STATEMENTS respecting the PUBLIC INCOME and EXPENDITURE of the CONSOLIDATED FUND of the PROVINCE of CANADA.

- No. 1—STATEMENT of the AFFAIRS of the PROVINCE of CANADA, on the 31st December, 1856.
 - 2.—STATEMENT of CONSOLIDATED FUND for 1856, including various Items transferred to that Account, as enumerated, from 31st January to 31st December, 1856.
 - 3.—A Statement exhibiting the Gross Revenue of the Province of Canada, for the year 1856; also, an Abstract of the Expenditure, including Expenses of Collection during the same period, and the State of the Consolidated Fund, on 31st December, 1856.

RECEIPTS.

- 4.—Statement of the Revenue from Customs Duties in the Province of Canada, during the year ended 31st December, 1856, received between the 1st February and 31st December, 1856.
- 5.—Statement of the Revenue arising from Duties on Licenses for Taverns, Shops retailing Spirituous Liquors, Stills, Billiard Tables, Hawkers and Pedlars, Steamboats, Ferrics, Auctioneers, and on Sales by Auction, during the year ended 31st December, 1856, received between the 1st February and the 31st December, 1856, applicable to the Consolidated Revenue.
- A Statement of the Total Receipts on account of Territorial Revenue of the Province of Canada, for the year ended 31st December, 1856.
- 7.—Statement of the Duties on Bank Issues, paid the Receiver General, pursuant to the Provincial Act of Canada, 4 and 5 Vic. cap. 29, in the year ended 31st December, 1856.

- No. 8.—Statement of the Revenue arising from Public Works, and Receipts on account of Interest on Loans to Public Works, in the Province of Canada, between the 1st of February and the 31st December, 1856.
 - 9.—Statement of Fines and Forfeitures, including Seizures, collected within the Province of Canada, between the 6th January and 31st December, 1856.
 - 10.—Statement of the Casual Revenue paid the Receiver General of the Province of Canada, for the year ended 31st December, 1856, consisting of Fees on Land Patents, and Instruments under the Great and Privy Seals, Copies and Certificates of Land Patents, including Interest on Public Deposits, and other Incidental Receipts.
 - 11.—Statement of the Revenue arising from Fees received from the Clerks and Deputy Clerks of the Crown and Pleas, in the Courts of Queen's Bench and Common Pleas; also, the Master, Registrar, and Deputy Registrars of the Court of Chancery, and the Clerk of Process, in virtue of the undermentioned Acts, between 1st February and 31st December, 1856, and forming part of the Consolidated Revenue Fund.

EXPENDITURE.

No. 12.—General Statement of the Expenditure made by the Receiver General out of the Consolidated Revenue Fund, on account of the Province of Canada, between 1st February and 31st December, 1856, under the Civil List Act, Schedules A and B, and various other Acts of the Legislature, including the Payments made under the Estimate 1856, as voted by Act 19 & 20 Victoria, cap. 86. Also, the Deductions made from the Revenue for Expenses of Management, Collections, &c., &c.

MISCELLANEOUS STATEMENTS.

- No. 13.—Statement of Payments made by the Receiver General of the Province of Canada, between the 1st February and the 31st December, 1856, on Account of the undermentioned Public Works, as provided for in the Estimates of the years 1851, 1852, 1853, 1854, 1855, and 1856, under Acts 14 & 15 Vic., cap. 46; 16 Vic., caps. 155 & 156; 18 Vic., caps. 4 & 90; and 19 & 20 Vic. cap. 86.
 - 14.—Statement of the Revenue arising from the Estates of the late Order of Jesuits, during the year 1856, and transferred to Lower Canada Superior Education Fund, as authorised by Act 19 Vic., cap. 94.
 - 15.—Statement of Tonnage Duties collected during the Season of the Navigation of the year 1856, at Quebec and Montreal, under Act 6 Will. 4, cap. 35, continued by Act 19 Vic., cap. 85, and the sums paid thereout to provide for the Mcdical Treatment of Sick Mariners.
 - 16.—Statement of Monics arising from the Sale of School Lands in Canada West, during the year 1856, under Act 2 Victoria, cap. 19, amended by 16 Victoria, cap. 86.

- No. 17.—Statement of the Amount of Fees received on Marriage Licenses, during the year 1856, in Canada West.
 - 18.—Statement of the monies received from the Rate or Duty imposed by Act 16 Vic., cap. 86, on Passengers or Emigrants arriving at the Ports of Quebec and Montreal, and the sums paid thereout for providing Medical Assistance, and enabling Indigent Persons of that description to proceed to the place of their destination, during the season of the Navigation of the year 1856, including also the Expenses of Quarantine at Grosse Isle and Quebec.
 - 19.—Statement of the Tonnage Duties collected at the Port of Quebec, during the year 1856, under Acts 14 & 15 Vic., cap. 25, and appropriated towards defraying the Expenses of the Quebec River Police.
 - 20.—A Schedule of Consolidated Municipal Debentures, Issued under the authority of the Act 16 Vic., cap. 22, prior to 31st December, 1856, the same bearing Interest at 6 per cent. per annum, on account of the several Municipalities hereunder enumerated.
 - 21.—Statement of the Consolidated Municipal Loan Sinking Fund, Upper Canada, constituted under the authority of Act 16 Vic., cap. 22, shewing the Amount received from the several Municipalities, as also, the Expenses payable therefrom, up to 31st December, 1856.
 - 22.—A Statement shewing the Receipts and Payments on account of Interest on the Consolidated Municipal Loan Debentures, Upper Canada, issued under authority of Act 16 Vic., cap. 22, up to 31st December, 1856.
 - 23.—A Schedule of Consolidated Municipal Debentures, Lower Canada, paid under the authority of the Act 16 Vic., cap. 22, and 18 Vic., cap. 13, prior to the 31st December, 1856, the same bearing Interest at Six per cent. per annum, on account of the several Municipalities hereunder enumerated.
 - 24.—A Statement shewing the Receipts and Payments on account of Interest on the Consolidated Municipal Loan Debentures, Lower Canada, issued under the authority of Acts 16 Vic., cap. 22, and 18 Vic., cap. 13, up to the 31st December, 1856.
 - 25.—Statement of Banks acting under the Act 13 & 14 Vic., cap. 21, from January 1st, 1856, to 31st December, 1856.
 - Rideau and Ottawa Canals in account with the Provincial Government of Canada, on the 31st December, 1856.
 - 27.—The Trinity House, Quebec, in account with the Government of Canada, for the year 1856.
 - 28.—Statement of the Amount of Fees received by certain Officers connected with the Administration of Justice in Lower Canada, including the Payment of their Salaries and Disbursements, for the year ended 31st December, 1856, in virtue of the Acts 13 & 14 Vic., cap. 37, amended by Act 16 Vic., cap. 196.
 - 29.—Statement shewing the Amount of Surplus Fees a vived from the Treasurers of the several Counties in Upper Canada, under the Acts 8 Fic., cap. 13, and 13 & 14 Vic., cap. 53, during the year 1856; and also the Deficiency of said Fund, chargeable to Consolidated Revenue, as directed by said Acts.
 - 30.—Statement of Debentures redeemed under Authority of Act 12 Vic., cap. 5, to 81st December, 1856.
 - 31.—Statement showing the Balance of Legislative Grants for Public Works, &c., authorized to be raised by Loan, the Debentures paid and redeemed during 1856, and the balance negotiable under the provisions of the Act 12 Vic., cap. 5, to the 31st December, 1856.

- No. 32.—A Statement showing the Amount at Credit of the Sinking Fund of the Province of Canada, up to the 31st December, 1856, the same being invested in reduced 3 per cent. Annuities.
 - 33.—A Statement of Debentures Issued on behalf of various Special Accounts, for which the Government is partially liable, up to the 31st December, 1856.
 - 34.—Seigniorial Tenure Commission in Account with the Provincial Government, for the year ended 31st December, 1856.
 - Trinity House, Montreal, in Account with the Provincial Government of Canada, for the year 1856.
 - 36.—Statement of Educational Funds, Canada East and West.
 - 37.—Statement of Payments made by the Receiver General of the Province of Canada, on Warrants issued during the year ended 31st December, 1856, on account of the Expenditure under the Estimate of 1847, as provided by Act 10 & 11 Vic. cap. 34.
 - 38.—Statement of Monies collected at Montreal, under Acts 12 Vic. cap. 112, and 13 & 14 Vic. cap. 94, on account of Law and other Fees, and for Duties on Tavern Licenses, issued for the City and County of Montreal, during the year 1856, the same being applicable towards the Erection of the New Court House, Montreal, as also the payments made on account thereof, between 1st February and 31st December, 1856.
 - 39.—Statement of Monies arising from Law and other Fees, collected in the County of Kamouraska, and of the Payments made thereout towards the Erection of a Court House and Gaol at that place, during the year 1856, under Act 12 Vic. cap. 112.
 - 40.—Statement of the Monies arising from Law and other Fees, collected in the District of Ottawa, and of the Payments made thereout, towards the Erection of a Court House and Gaol at Aylmer, during the year ended 31st December, 1856, under Acts 12 Vic. cap. 112, and 14 & 15 Vic. cap. 63.
 - 41.—Statement of Payments made to Municipalities, Canada West, ex-Municipalities Fund, Canada West; 18 Vic. cap. 2, and 19 Vic. cap. 16.
 - 42.—Recapitulation of the Public Debt of Canada, shewing the rate of Interest, when payable, and the Annual Amount of Interest payable thereon, on the 31st December, 1856.
 - 43.—A Memorandum of the Outstanding Debentures, representing the Public Debt of the Province of Canada, on the 31st December, 1856, and shewing when the same becomes redeemable.
 - 44.—Statement of Monies paid the Receiver General of the Province of Canada, on account of the Purchase of the several undermentioned Public Works, in virtue of the Acts 19 Vic. cap. 5, and 14 & 15 Vic. cap. 57; and repayment of Loans to Incorporated Companies, between the 1st February and 31st December, 1856.
- 45.—Statement of Revenue arising from Fees on Militia Commissions, Exemptions from Militia Duty, and Militia Fines, paid the Receiver General of the Province of Canada, between the 1st February and the 31st December, 1856, pursuant to the Act of Upper Canada, 2 Vic. cap. 9.
- 46.—Statement of the Revenue arising from Tavern Licenses in Canada East, received between the 1st February, 1856, and the 31st December, 1856, and of the Payments made thereout to the different Municipalities in Lower Canada, and towards the erection of Court Houses at Montreal and Aylmer, during the year ended the 31st December, 1856, as authorized by Acts 8 Vic., cap. 72; 12 Vic., cap. 112.; and 13 & 14 Vic., cap. 94.

- No. 47.—Statement of the Revenue derived from Law Fees received in Canada West, in virtue of the Act of Canada, 9 Vic., cap. 33, by various Officers of the Courts of Queen's Bench and Common Pleas, and Court of Chancery, between the 1st February, 1856, and the 31st December, 1856, being applicable to the Interest and Redemption of £3000, issued in Debentures, for the Law Society of Upper Canada, under the authority of the said Act.
 - 48.—Statement of Monies paid the Receiver General of the Province of Canada, by the County Treasurers and Chamberlains, Canada West, between the 1st February, 1856, and the 31st December, 1856, pursuant to Act of Canada, 13 & 14 Vic., cap. 68, intituled, "An Act to provide Funds for defraying the cost of the erection of the Lunatic Asylum and other Public Buildings in Upper Canada;" shewing, also, the Payments made therefrom.
 - 49.—Statement of Monies arising from the Sale of Common School Lands, including Rent, Interest, &c., in that part of the Province heretofore called Upper Canada, pursuant to an Act of Canada, 12 Vic., cap. 200, during the year 1856, also shewing the Deductions therefrom, and the Balance at Credit of that Fund on the 81st December, 1856.
 - 50.—Comparative Statement of the Net Revenue and Expenditure of the Consolidated Fund of the Province of Canada, for the years 1854, 1855, and 1856.
 - 51.—Statement of the Receipts and Expenditure of the Post Office Department for the Six quarters, from 31st March, 1855, to 30th September, 1856.
 - 52.—Statement of the Fces received by the Supervisor of Cullers at Quebec, for the Measuring, Culling, and Counting of Timber, and of the Payments therefrom, to the several Cullers, including the Salaries and Contingent Expenses of the Department, for the year ended the 31st December, 1856, as authorized by Act 8 Vic. cap. 49, and amended by 16 Vic., cap. 186; also, 9 Vic., cap. 16.
 - 53.—General Statement of Receipts and Disbursements of George Colley, as Deputy Supervisor of Cullers, at Sorel, during the Season of 1856.
 - A.—Statement of Warrants issued on the Receiver General of the Province of Canada, up to 31st December, 1856, in payment of various Expenses of the Civil Government of Canada, and for which a Supply is required.
 - B.—Statement of Payments made during the year 1856, in pursuance of the undermentioned Authorities, for which a provision is required.

W. CAYLEY,

#### RETURN

To an Address from the Legislative Assembly, to His Excellency the Governor General, dated the 5th May, 1856, praying His Excellency to cause to be laid before the House, "A Re-"turn of all Reports of Explorations and Surveys, if any " made by Engineers or others, since the year 1835, employed "to examine the Valley of the Trent, and the country west-" ward, to Lakes Simcoe and Huron, with the view of con-" structing a Canal from the Bay of Quinté to Lake Huron."

By Command,

T. LEE TERRILL,

Secretary.

Secretary's Office, Toronto, 3rd March, 1857.

> CROWN LANDS DEPARTMENT. TORONTO, 23rd May, 1856.

Sir,—I have to acknowledge the receipt of your letter of the 8th instant, requesting me to furnish you, for the information of the Legislative Assembly, with a Return of all Reports of Explorations and Surveys, if any, made by Engineers and others, since the year 1835, employed to examine the Valley of the Trent, and the country westward, to Lakes Simcoe and Huron, with the view of constructing a Canal from the Bay of Quinte to Lake Huron, and to inform you, in reply, that the Reports are not of record in this Department, but are contained in the Appendices to the Journals of the Legislative Assembly of Upper Canada, for the Sessions of 1833-34, 1837-38, and 1839-40.

For subsequent operations, reference should be had to the Department of Public Works.

I have the honor to be, Sir,
Your most obedient servant,

JOSEPH CAUCHON, Commissioner of Crown Lands,

The Hon George E. Cartier,

ne Hon George E. Cartier, &c. &c. &c. &c. &c.

Public Works, Toronto, 21st February, 1857.

Sir,—As requested by your letter of the 27th of last May, I am directed to inclose to you herewith copies of Reports of Mr. Samuel Keefer and Mr. James Lyons, upon the Survey for a proposed "Trent Canal," and to state that they are the only Documents in this office connected with "Trient Surveys."

This Department has been in existence only since 1841.

I have the honor to be, Sir,

Your obedient servant,

THOMAS A. BEGLY,

Secretary.

E. A. Meredith, Esq., Assistant Secretary.

> BOARD OF WORKS, MONTREAL, 23rd April, 1846.

Sir,—In reference to Mr. Lyons's Survey for a Canal to connect the reach above Heely's Falls, upon the River Trent, with the Bay of Quinté, I have the

honor to report as follows:

The Otonabee, which empties itself into Rice Lake about twelve miles from the lower end, has been made navigable as far up as Peterboro, and the object of the present Survey was to ascertain the practicability and expense of connecting the Rice Lake with Lake Ontario by an inland canal of the same size as the Rideau, corresponding with which the locks upon the Otonabee and Trent have been built.

The difference of level between Rice Lake and Ontario is about three hundred and sixty-five feet, so that the whole fall to be overcome is thirty-five feet more than that of the Welland Canal, which is three hundred and thirty feet.

The lock at Crook's Rapids, situated at the foot of Rice Lake, overcomes a fall of eight feet, and opens a navigation of fifty-three miles in extent, from Peterboro' to Heely's Falls, at which place the present Survey begins.

Between Heely's Falls and the mouth of the Trent, another reach of twenty and a half-miles of this river has been made navigable by means of a lock at

Chisholm's Rapids, the face of which is eight and three quarters feet.

This navigable portion of the Trent extends from Percy Landing nearly down to the widow Harris; and in order to complete the navigation, it is necessary to construct a Canal from Heely's Falls to Percy Landing, the distance by the river being twelve and a half miles, and the fall two hundred and thirty-two feer; and another from widow Harris' to the mouth of the Trent, the distance by the river being nine miles, and the fall in that distance one hundred and ten and a half feet.

In the first Survey of the Trent made by Mr. Baird in the year 1833, he proposed to make this River navigable by means of a series of locks and dams, and in accordance with his plans the three locks above mentioned, and the dams with which they are connected, were undertaken by the Commissioners, and have since been completed under the direction of the Board of Works, for the purpose of taking advantage of the long reaches of the river, which are made available by their means.

But since the erection of the slides upon the Trent, and the great impetus that has been given to the lumber trade in consequence, it has now become sufficiently apparent that the system of locks and dams is neither a suitable nor a safe one to be adopted for this navigation.

Nor would it be wise (even supposing that the immense quantities of timber

descending the Frent could be conducted down it without injury to the works) to expend so large a sum as would be necessary to make this navigation, when the essential structures upon which its very existence depends, viz., the dams, are subject to annual and sudden floods, and the failure of only one of which might possibly cause the destruction of the whole.

In making the present Survey, it was therefore laid down as a fixed principle, that the Canal should be made inland, and beyond the influence of the floods; and notwithstanding it was evident from the formation of the country that both shores of the river were composed of stratified limestone, it was considered as the only

safe and proper mode of accomplishing the end in view.

From various reports made to me of the existence of ravines, which afforded facilities for making the Canal around Heely's Falls, I hoped to be able to find an inland route from thence to Percy Landing, but after much time and pains spent by Mr. Lyons in the search, no such favorable line could be found. He was therefore under the necessity of resorting to the bed of the river itself as the only practicable means of surmounting the obstacles to the navigation presented between Heely's Falls and Crow Bay.

This portion of the river comprehends his first section, which is one mile and thirty-five chains long, and the fall, which is seventy-nine and a quarter feet, is proposed to be overcome by eight locks. His estimate for this section is £46,255

10s. 5d. 🔥

I am fully persuaded, however, that this part of his plan will not answer, both on account of the interference of the lumber trade with his proposed navigation, as well as the danger to which his works must be subject in consequence of floods

Company of the Section

and descending timber and masts.

In the first place, his navigation would be stopped or suspended during the running season for timber; and in the second place, it is in danger of being totally destroyed. If no better route than this can be found, this section must be reported as impracticable; but I am not prepared to pronounce it so, because I conceive that, at an additional expense, it is possible to carry the Canal along the brow o the hill until the level of the table land on the west side is attained, and then to descend from it into Crow Bay. The Survey made by Mr. Lyons was completed too late in the season to admit of further examination upon this point.

The second section of Mr. Lyons' Survey is as favorable as could be expected, when it is taken into consideration that the line for the Canal must necessarily pass through rock cutting; and he has been enabled to select a very good line upon the west side of the river, out of reach of the floods; and away from the banks of the river.

The fall in this distance is one hundred and fifty three feet, and can be overcome by twelve Locks addiscessimate for it is £112,738 12s. 11d. At the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contro

The third section, from the widow Harris to the Bay of Quinte, is also as favorable as can be expected, from the rocky nature of the country through which it must pass. The route selected is upon the west side of the river; and the selection appears to have been judiciously made. The length of this section is very nearly nine miles. The fall is one hundred and ten and a half-feet, and is surmounted by nine locks. His estimate for it is £96;809; 10s. 8d.

The entire length of Canal comprehended in these three sections is eighteen and a quarter miles. The total fall to be overcome is three hundred and forty two and three fourths feet; the number of locks required is twenty nine; and the total cost is estimated by Mr. Lyons at £255,304 8s.

Upon the careful review of the estimates, I am convinced that Mr. Lyons has not made sufficient allowance for the difficulties to be encountered in carrying the proposed works into execution.

I have taken the sections turnished by him calculated the quantilies and

affixed prices such as works of the same class now under contract with the Board have been taken at, and in this manner my estimate for the

> Second section ..... 189,383 Third section..... 144,465

Total......£399,303 This amount is exclusive of land damages, which it is impossible to estimate

with any degree of certainty.

It is unnecessary to take up your attention with the details of this estimate, or to point out all the differences between this and the one furnished by Mr. Lyons; but I will merely observe that a lock of twelve feet lift, one hundred and thirty-five long in the chamber, thirty-three feet wide, and with four and a half feet of water on the sills, including gates and working gear complete, is estimated by Mr. Lyons at £3,547, and by me at £4,700.

Alter the experience of the last six years, as to the cost of stone locks in various parts of the Province, I am quite safe in saying that locks of the size and description intended for this navigation cannot be built for the sum stated by Mr.

Lyons. Those of the Welland Canal have cost upwards of £6,000 each.

I have therefore to observe, in conclusion, that, according to the best judgment I can form of the projected improvement of the Trent, my opinion is, that it would require an appropriation of £400,000 to cover the cost of it, independently of the expense of land damages; but that as regards the first section, from Heely's Falls, to Crow Bay, a different line from that surveyed by Mr. Lyons must be selected; and as regards the other two sections, it may be found, upon further examination, that trifling deviations may be made in the line by which the Canal may be improved without additional expense.

I have the honor to be, Sir,

Your obedient servant,

Your obedient servant, (Signed,) SAMUEL KEEFER, Engineer Board of Works.

The Hon. Hamilton H. Killaly.

Cobourg, 24th March, 1846.095

Sm,-I have the honor of herewith submitting to you the issue of the Surveys intrusted to me by orders of the Board, of two lines of Canals, the one being to connect Rice Lake with the Bay of Quinté, and the other, uniting the waters of Lake Ontario with the said Bay by a canal.

In reporting on those contemplated improvements, many considerations presents themselves, and I availed myself of every means within my power of arriving at a

just conclusion.

With regard to the first named work, it certainly appears most desirable that the waters of the Trent should be made available; they pass through a fine country! rapidly filling up with settlements, and every day being cleared from the forest which is giving place to cultivated farms.

In the neighbourhood of Crow River there are extensive ore beds; the working of which is prevented soleby by the want of some means of transport; and the people in that section have always been led to believe that it was the intention of

the Government to open up the navigation.

The long stretch of water communication runs in a diagonal line across the two districts of Colborne and Newcastle, presents great facilities for trade and communication runs in a diagonal line across the merce, and as it was my duty last year to enter fully into the advantages likely to be derived from the improvements made under the direction of the Board it is therefore not necessary for me on the present occasion to recapitulate those arguments, but merely to refer to the map of the two districts which at one view will present the great extent of country that would be benefitted by those improvements.

The Report on the Peterboro' and Asphodel road, and the other information required from me by the Board, will be prepared and forwarded as soon as possible.

I have the honor to be,

Sir,

Your most obedient servant.

(Signed.)

JAMES LYONS.

Thomas A. Begly, Esq. Secretary, Board of Works, &c. &c. &c.

#### IMPROVEMENT OF RIVER TRENT.

REPORT on the practicability of connecting the Reach above Heely's Falls and the Bay of Quinté by a Canal inland and using those sections of the river which

are at present navigable.

The strong objections against damming the bed of a river in any instance, particularly where there is a strong current, rendered it necessary to make a most careful examination of the country between Heely's Falls and Crow Bay; a ravine was pointed out by the inhabitants, which has always been considered practicable and which is shewn on the plan of this section.

In the hope of finding it so regardless of its distance, I commenced a line of levels, and at a distance of 33 chains, 85 links, from the river, arrived at a level 11.76 feet above the top of the dam, and at a distance of 1 mile, 42 chains, 59 links,

obtained a level 51 feet above the same point.

I then had to return to the bed of the river.

The plan and section will shew the plan proposed for its improvement: its cost per estimate will amount to £46,255 10s. 5s., which will carry the navigation to Crow Bay, a very fine sheet of navigable water not less than 10 feet deep at its lowest level: the distance from Heeley's to Crow Bay by the bed of the river is 1 mile, 35 chains, 40 links, and the difference of level lowest water 79.246 feet.

The next section inland is from Crow Bay to Percy Landing, a distance of 8 miles, 69 chains, 29 links, with a difference of level 153,102 feet; the shape of the ground selected is admirably adapted, which will appear by an examination of the section: the cuttings and embankments are not great, but entirely through solid

rock—the cost as per estimate amounts to £112,738 12s. 11d.

From Percy Landing the river is made navigable by the lock of Chisholm's Rapids for a distance of about 14 miles: from thence to widow Harris' it is not navigable, there being two bars with only 31 feet of water covering them, but by the improvement embraced in the estimate of the 3rd and following section, its navigation will be made complete: the probable distance is 6 miles, 42 chains, 70 links.

From widow Harris' to the point near the mouth of the river where the first lock was originally proposed (and which is in part excavated from thence towards the river) a distance of 7 miles, 77 chains, 30 links inland, and the difference of level 110,472 feet will cost as per estimate £96,309 19s. 8½d., making the cost of the improvement from Heeley's Falls to the Bay of Quinte, amount to £255,804, 3s. 01d, and making the navigation from Peterboro to the mouth of the Trent complete and to correspond with the vessels adapted for the Rideau Canal.

As before observed the section throughout the whole of the inland route could not be much more favorable so far as regards the shape of the land and its course it crosses very few streams, and it happens that the surface of the largest of these comes on a level with the surface level of the Canal, and can be discharged in their

former bed without any extra expense.

In the final location of the inland route, trifling savings may be effected by slight deviations from the line presented.

(Signed,)

JAMES LYONS.

College of the College

ESTIMATE of the probable cost of constructing a Canal inland, to connect Heeley's Falls and the mouth of the River Trent—40 feet wide at bottom in rock, perpendicular side slopes on embankment, 2 to 1 Locks, 135 × 38 × 9

## TORONTO:

FRINTED BY JOHN LOVELL, YONGE STREET.

# RETURN

To an Address from the Legislative Assembly to His Excellency the Governor General, dated the 3rd instant, praying His Excellency to cause to be laid before the House, "a Copy of the Report of Walter Shanly, "Esquire, on the Valley of the Ottawa, made in March last."

By Command.

T. LEE TERRILL,

Secretary.

SECRETARY'S OFFICE,

Toronto, 9th June, 1857.

(Copy.)

TORONTO, 4th March, 1857.

Sir,—On the 19th September last, I received instructions from you to make an exploratory survey through the interior of the Southern Valley of the Ottawa to extend from the Chats Lake, on the Ottawa River, to some eligible place of harborage on the Georgian Bay.

The survey, it was stated, was to be made with a view to ascertaining the facilities existing for the construction of an arterial line of Railway through the heart of the Valley, as well as for the purpose of obtaining a general knowledge of the characteristics, as regards soil, timber, &c., of the almost untrodden forest region lying between the western limit of the County of Renfrew, and the eastern coast of Georgian Bay. The selection of the point of departure from the waters of the Ottawa, as well as of the terminating point on those of Lake. Huron, was left wholly to myself.

Huron, was left wholly to myself.

After passing what is termed the "new District Line," the present western boundary of Renfrew, the territory on the line of exploration, apart from the lumbering operations carried on upon portions of the Bonnechere and Madawaska Rivers, may be considered as one vast and uninhabited wilderness; I deemed it unsafe, therefore at the advanced period of the year when my instructions were received, to attempt a regular and systematic Railway survey, with consecutive lines of levels, &c.; the necessarily slow progress of which would have involved a winter campaign in a region where every pound of provisions camp-equipage, &c., requisite, for the maintenance of those engaged on the excamp equipage, &c., requisite for the maintenance of those engaged on the exploring service, would have had to be carried with them, on the backs of men,

as they advanced into the interior; care being also had to provide sufficient supplies to support the parties, their work being completed, on their homeward route: not the least arduous part of such an undertaking, when it is remembered that on finishing the survey, they would find themselves, in the depth of winter, far in the interior, and many weary days' journey from the nearest settlements. I considered also that the obtaining of a proper knowledge of what manner of country it is, that constitutes the only remaining unsurveyed portion of Upper Canada, below the 46th parallel, might justly be looked upon as the primary object of the exploration, while the expense of making a Railway survey, on chance, through a terra incognita, could be judiciously deferred, where the expediency of constructing the road would hinge almost wholly on the result of the former inquiry. Under the circumstances, then, as the Commissioners have been already apprised by my letter of the 2nd October, I determined to limit my first operations to a general reconnoissance of the district to be explored; the boundaries and extent of which may be described as follows:—

The westerly line of the County of Renfrew, above noted, under the designation of the "new district line," forms the westerly boundary of this unsurveyed tract. The Georgian Bay, from the mouth of the Severn to that of the French River, limits it on the west. It extends southward to the rear line of the double tier of Counties fronting on Lake Ontario; while the waters of the French River and Lake Nipissing, of the Matawan and the Ottawa, define its outline on the

north.

The Map of Canada accompanying this Report should be referred to by those desirous of comprehending the extent of territory contained within the clines above described, and which may be taken as equal to a parallelogram of about 160 miles long, by 90 miles wide, enclosing in round numbers, some 15,000 square miles, or about ten millions of acres.

In reporting the completion of such a survey as I have deemed it expedient to make, I will, with your permission, state the mode of operation adopted for carrying out the wishes of the Commissioners, before proceeding to detail the facts that

have been elicited.

The choice of the first exploratory line through a forest country must ever in a great measure, be governed by chance; and that laid down for the guidance of the explorers in this instances probably possesses the same merit of being as likely to present a fair average of the characteristics of the wilderness; concerning which information was sought, as any that could have been selected in that manner. It is, as nearly as possible, central to the District in question; and follows, besides, the valleys of two of the largest streams, the Bonnechere and the Maganatawan, which receive the water-shed of the country draining Eastward to Ottawa and Westward to Lake Huron.

I divided the work into two sections; entrusting the task of exploring the Western half to Mr. B. W. Gossage, and the Eastern to Mr. Duncan Sinclair. P.L.S., both of them I knew to be well-skilled in "wood-craft," and they have proved themselves in all other respects fully qualified for the proper discharge of the somewhat arduous duties of the survey.

In instructing them as to the courses they were severally to follow, I selected "Byng Inlet," (the mouth of the River Maganatawan,) as the point of departure from the Georgian Bay: the confluence of the Bonnechere and Ottawa Rivers was the chosen starting point from the East; and Great Opeonga Lake seated in the heart of the District, was fixed upon as the goal for which the two parties were to steer, and there unite their surveys.

By the end of September, two efficient parties, each consisting of about this teen persons, principally "Voyageurs," of the half-breed caste, had been assem-

bled; and on the 9th October, the one under command of Mr. Gossage entered the Forest from Bying Inlet. On the following day, the other party, with Mr. Sinclair at its head, commenced operations at the eastern extremity of the

It was expected on both sides, that the appointed place of rendezvous would be reached by the middle of December; and, true to their calculations, on the twelfth day of that month the western party struck, just where it was intended it should, the southern extremity of Opeonga Lake, having accomplished something over 112 miles. The other party closed at the same point on the seventeenth, being then on their 95th mile, making the entire distance, from water to water, two hundred and eight miles, as near as may be. A line has thus been distinctly marked out through the forest from the waters of the Ottawa to those of Lake Huron, with posts set and numbered at the end of each mile.

In describing the features of the route, I will commence at its eastern extremity, and proceed westward.

The first forty-three miles from the mouth of the Bonnechere River lie within the County of Renfrew, and through a district to a considerable extent settled. There is excellent farming land along and adjacent to the valley of the stream, which also presents fine water-power, concentrated for the most part at the cascades or chutes, from three to twelve miles apart, and from 25 to 90 feet in height, the spaces between the falls or rapids being generally comparatively still-water, with a depth of from six to ten feet. The portion of the River lying within the County (43 miles) has an estimated fall of about 290 feet.

On crossing the County line, at "Golden" Lake, there entering upon unsurveyed territory, the land continues to be of a fair and level quality to the 45th mile: thence to Round Lake, eight miles, is low and swampy, with no near indications on either side of a change for the better.

From Round Lake, for some twenty miles, bringing us to the 73rd mile of the route, is over a barren, arid, sandy plain—wooded with red pine—and shewing huge hummocks of rock protruding here and there above the surface. To the south of this section of the Survey, isolated tracks of good hard-wood land, may be descried amid the lofty and broken hills which stamp the outline of the country in that direction: but to the north Mr. Sinclair describes it as sandy, stoney, and mountainous, with scarce a living tree or animal remaining from the destruction of last summer's fires.

At the 72nd mile, the Bonnechere there assuming a northerly direction, the line leaves the valley of the river and keeps on its westerly course towards the southernmost point of the Great Opeonga Lake, the waters of which find their outlet to the Ottawa by the Madawaska River.

The first seventeen miles after leaving the valley of the Bonnechere, that is to say, from the 72nd to the 89th mile, are over very rough and hilly land.

Great forests of red pine stretch away to the north, towards the Valley of the Pettawawa, and the head-water of the Bonnechere. The same description of timber, of majestic growth, abounds also to the southward.

From the 89th mile to the Lake, six miles, the country continues to exhibit a rugged and hilly surface, but the forest partaking more of a hard-wood character, indicates some approaching amendment in soil; which however, still harsh and rocky cannot yet be favourably spoken of as possessing any allurements for the agricultural settler.

The 95th mile terminates the Eastern division of the Survey; of which as has been said, the first forty-three miles lie within the limits of civilization, and through a fine fertile tract of land; of the remaining fifty-two miles the leading characteristics may be summed up, as follows:—

45th to 53rd do	Fair level land Low and swampy.			. 8 do
72nd to 89th do	Arid and rocky, re Broken hilly land; do	chiefly pine t	timber	. 17 do
				52 miles.

The average of this section of the Ottawa Valley, as indicated by this line of survey, is not then inviting for settlement. To the north of the line nothing better than the average thus obtained, is to be looked for: the lands bordering the Ottawa River itself, as well as those belonging to the intermediate Valley of the Pettawawa, both well-known, being closely kindred in their nature to the decidedly sterile land-track upon the more inland route traversed by Mr. Sinclair. South of his line too, the average has been found to obtain for some considerable distance; and there can be little doubt that the more genial features of soil, &c., which are occasionally to be discovered further in the interior, about the head waters of the York branch of the Madawaska, for instance, must be taken as the exception, rather than the rule, in sketching in the general topography of that section of the country.

On his homeward route, Mr. Sinclair made a long detour to the north, crossing to the upper extremity of Great Opeonga Lake, and thence striking for the sources of the Bonnechere, whence he followed the course of that stream downwards to his point of departure from it on the main line of Survey, viz., the 72nd mile. He reports the salient features of the country on the upper waters of the river as not at variance with those encountered further inland. The natural wealth, of the district, which, in that particular, is not inconsiderable, being mainly concentrated in noble forests of red pine.

In describing the route from Lake Opeonga to Lake Huron, I will continue to reckon the mileage from the east, counting the 113th mile from the Georgian Bay, the 96th from the mouth of the Bonnechere.

As we proceed westward, a growing change is perceptible in the character of the country, and on nearing the point where the waters begin to flow in the direction in which we are advancing, the domain of the red pine is visibly on the wane, while the white pine, and those descriptions of hardwood, such as beech, maple and elm, which are commonly accepted as indications of "good land," gradually begin to predominate.

From the 95th to the 118th mile the surface of the country is rough and rolling, traversed by frequent rocky ridges and deep glens, or swelling into great "sugar loaf" hills, from whose lofty crests the vast expanse of forest can be overlooked in all directions as far as the eye can reach. With occasional patches of good land, the soil is generally sandy, and not deep. The timber, mixed hard wood and white pine, much of the latter being of good quality.

The dividing ridge between the waters tributary to the Ottawa, and those whose flow is to the west, is passed on the 118th mile from the mouth of the Bonnechere, one hundred miles from the Georgian Bay.

Between the 118th and 150th mile, the line traverses thirty-two miles of what may be termed good land; the rock, however, still cropping out here and there in strongly marked ridges. The soil is deep sandy loam, with occasional sevidences of a heavy subsoil. The timber, chiefly hardwood of large growth, beech, maple and elm, but still with a considerable mixture of very fine white pine. Lateral explorations, carried some distance on either side of the centre line, seem.

1st 05th to 110th --- 1

to establish the existence of a broad tract of land fit for settlement in this part of the unsurveyed territory.

We have next a stretch of about nine miles, bringing us to the 159th mile post, over an undulating surface, the soil very good; deep sandy loam over lying clay. The timber, beech, maple, elm and ironwood. Here also the lateral explorations are of satisfactory results, as showing a continuance, north and south, of the favorable features encountered on the direct line of survey.

At the 158th mile the "Distress" River falls into the Maganatawan, from the north. Its course was explored for about eight miles and found to water a beautiful tract of alluvial land.

From the 159th to the 178th mile, the ground is of rough, rocky character, with generally some light sandy soil of inconsiderable depth. The timber is mixed hardwood and pine; short intervals of tolerably good land are met with now and again, and much fine heavy timber of the latter description.

178th to 198th.—Twenty miles, much resembling the preceding section, but with all its harsher features exaggerated. Intervals of good pine, red as well as white, relieve the hard outline of the country.

The last ten miles of the route, from the 198th mile to the mouth of the River, demand but few words of description. Granite rock, flat, naked, and save for occasional patches of scrubby pine, tamarack, &c., utterly barren.

The following exposition of the characteristics of the Western half of the survey, may be condensed into 6 subdivisions, thus:-

1st.—95th to 118th mile. Rough, rolling, rocky surface, sandy soil,
mixed timber, and some good white pine 23 miles
2nd.—118th to 150th mile. Much good hardwood land
3rd.—150th to 159th mile. Very good ditto
4th.—159th to 178th mile. Rough, rolling, and rocky: good mixed to 178th
To Trottimber, but very light soil and the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the soil of the
5th.—178th to:198th mile. Very rough and rocky, little soil; some the second
very good pine
6th.—198th to 208th mile. Utterly barren
Total mileage from Lake Opeonga to Georgian Bay

The whole of which region is intersected with frequent, and, for the most part, rock-bound Lakes and streams, the water-shed of which, as has been said is westward for the last one-hundred miles of the route.

Of these subdivisions, the first and fourth, making an aggregate length of fortytwo miles, are of very similar character, presenting no doubt exceptional tracts of tolerably good, land, but on the whole of harsh, rugged and rocky aspect. White pine is somewhat abundant, and of good size and quality.

The second and third sections, taking in an east and west width of forty-one miles, intersect a well-timbered, well-watered tract of good, land, much of it very good, and stretching in a north-westerly direction, it is pretty well established to the vicinity of Lake Nipissing and the French River, and south and south east may be assumed to the waters of the Muskoka. Limits which give to this vast Oasis a north and south length of about 85 miles, causing it to embrace an area of some two and a quarter million of acres

I am led to assign the above boundaries to this favorable tract of country from certain observations made to the northward by myself in exploring the French River, towards the upper waters of which maple land is seen to approach its rocky margin from the south. I also ascended a large river, the Nanamatagolins, falling into the south-easterly angle of Lake Nipissing, and not far above its mouth found the land beginning to assume a cultivable appearance, improving the further I went up; while from Mr. Murray, the Assistant Geologist, who has explored this river almost to its source, I learn that its valley throughout presents an average of good hardwood land, and that its upper waters are in close proximity to those of the Maganatawan or its tributaries, approaching probably most near to that branch of the latter river herein before designated the "Distress."

In fixing the Muskoka River as the probable Southerly limit of this tract, Fam guided by information gathered from the notes of a survey carried along its valley, some years since, by Mr. Robert Bell, P.L.s., who reports a fair character of land bordering such portion of that river as would correspond with an extension in that direction of the broad belt described as good, on the line explored by my assistant, Mr. Gossage.

Of the fifth and sixth sections, covering the last thirty miles of the route, little that is flattering can be said. Whenever the pine timber, of which the former subdivision can boast some, of fair quality (both white and red) shall have been culled out, nothing will be left but the dry barren sand, or hard naked granite. The last ten miles is wholly through the broad margin of granitic rock which forms the harsh and forbidding coast of the Georgian Bay, from the mouth of the Severn upwards, and which I penetrated for some distance inland at two points, besides that traversed by the exploratory line from the mouth of the Maganata wan at Franklin Inlet, further south, and at the French River, further north. The entire frontier, with a width of from twenty to thirty miles, may be described as a region utterly without hope: to the last degree sterile and desolate, and destined, whatever changes human enterprise may gradually work in the interior to preserve for ever its harsh repellant attributes: the unenvied domain of the noxious reptiles that swarm unmolested on its cold, impenetrable surface. The adder, the rattlesnake, and the deadly copperhead.

I have above estimated the area of the unsurveyed territory at ten millions of acres; a tithe of which surface, the face of the country being pitted with countless lakes and ponds, and seamed by rivers and creeks without number, may safely be set down as water.

I do not think that less than two millions of acres can justly be allotted as the sterile domain of the red pine, when to those broad tracks described by Mr. Sinclair as occupying the Valley of the Bonnechere and the Pettawawa, and stretching southward towards the Madawaska, is added the margin along the Ottawa, the Matawan, and the French River, where only that species of timber is seen to thrive.

That the still more barren district, absorbing one and a-half millions of acres, assigned to the granite is not overrated in extent will, I am sure, be conceded by any observant "voyageur" who has traced its rugged outline from the Seven along the bleak coast of the Georgian Bay: Thence up the French River across Lake Nipissing, and down the Matawan and the Ottawa, a frontier line of not less than one hundred and eighty miles in length:

The belt of "good land" traversing the interior of the district from north to south is above set down as all good; too liberal a mode of estimating the quality

ties of "wild" land, even in the most favored sections of the Province. To arrive, however, at a fairer ultimate estimate of the probable quantity of land "fit for settlement," I deduct from these two million acres, one fifth (a tenth of the belt having been already called water) as its possible per centage of bad land.

The three and a half-million acres on the other hand, which are set apart as comprising the rough; rocky and hilly districts, wooded with hardwood and white pine, a class of surface which forms the most salient feature of the territory, embrace some isolated tracts of good land, the aggregate area of which I venture to assume at one-fifth of the whole; or 700,000 acres, adding which to the 1,600,000 which remain, after deducting a fifth from the area of the belt, we have in round numbers two and a quarter million acres of land fit for settlement in the Ottawa and Georgian Bay Valley, about one-fourth of the entire area of that sole remaining unsurveyed portion of Upper Canada lying south of the regions of Lake Nipissing.

I have above endeavored to render a faithful picture of the general aspect of the country as obtained from the several lines of exploration that have been carried through it, and believe that the form in which the information is sought to be conveyed portrays a really fair average of the leading characteristics of that section of the Province.

The conclusion I am led to deduce from the result of the survey is; that the Ottawa and Georgian Bay Valley is not a district into which emigration can be rapidly poured by any new process of colonization with the least nope of a successful issue to so hazardous an undertaking. On the contrary, any attempt to force settlement in opposition to the natural laws that govern the colonization of all new countries partaking of its harsh and inaccessible attributes, would be certain to end in failure, and in the mean time to entail incalculable suffering and misery on the earlier settlers, to whose lot it would fall to act the part of pioneers. The reduction to the purposes of cizilization of this portion of our public domain must, necessarily, be the result of the same course of patient unremitting labour that converted the rugged mountains of New Hampshire and Vermont into sheep-walks and pasture fields.

The country abounds in valuable pine timber which, beyond doubt, will gradually be sought out and brought to market. As the timber is felled, hewn, and removed, every locality suited to agriculture will be noted and secured. Settlement will thus follow on the trail of the lumberman, and the right of the squatter to the spot that he may have cleared and cultivated ere township boundaries have been fixed, or lot-lines run, must not be too narrowly construed. The land that has been classified above as fit for settlement, is of good wheat growing quality; the country is well watered throughout; healthy in no common degree; and, finally capable of, and therefore destined to maintain, if not a dense, at all events a hardy and intelligent population.

That the trade to be developed in that section of Canada will mainly follow the course of the great Ottawa River, I cannot doubt; for although the mouth of the River Maganatawan (Bying Inlet), and of some minor streams discharging into the Georgian Bay, can be made available as harbours for the shipment of lumber—and they will be—the inhospitable character of the coast will cause its rocky inlets to be shunned rather than sought, once that transient description of traffic shall have begun to decline. The principal avenues of commerce therefore, so long as the trade is purely of a local character, will be from the interior of the district, eastward; but when ships from Lakes Michigan and Huron shall have access to Lake Nipissing, a trade with the west and north-west may then find its way by rail through the heart of the Ottawa Valley; the best portions of which, described in this Report, being leasily accessible from two points on the

south-easterly coast of that splendid body of water. The time will come when thriving towns will spring up at the mouth of the Nanamatagolins River, setting up nearly due south from the lake, or on a noble bay, a little further north, which forms the outlet of another river, known to the Indians of Lake Nipissing as the "Wissi-Wassing."

In a geographical point of view, where the question of climate has to be considered, it may be observed that the most northerly limit of the unsurveyed territory is fully half a degree further south than the latitude of Quebec, the bulk of its area being comprised between the 46th and 45th parallels, lines that bound some of the most populous and fertile districts of Lower Canada : take, for instance, the County of Terrebonne on the north, and the County of Beauharnois on the south. There is then no reason to apprehend that climate will interpose any insuperable barrier to the settlement of the country where other conditions are propitious. At the same time I would state that the results of certain thermometrical observations made this winter, both in the interior and on the north. ern frontier, lead me to believe that the extremes of cold are likely to prove greater than in the District of Montreal, a difference that may be due to the greater elevation of surface in the former than in the latter section of the count try. Mr. Sinclair reports 34° below zero (Farenheit) on the 18th December 3 at Great Opeonga Lake, about one thousand feet above the level of the sea, while on the upper waters of the Matawan River, latitude about 46° 20'; and at an average elevation of 640 feet, the mercury has more than once sunk to the point at which it freezes, 39° below zero.

It is a difficult matter in migratory camps to keep meteorological records with the nicety that is essential to give them a high value, added to which difficulty the instruments for that purpose with which the surveying parties on the Ottawa were furnished, are not of the most reliable order. The mean of observations, however, taken at four different localities, agree sufficiently near to warrant, the conclusion that the cold in that region is excessive. It should be borne in mind at the same time, that the weather in the latter part of last December, and nearly the whole of January, was rigorous throughout the Province beyond the average of our winters.

It is mentioned in the early part of this Report that I did not deem it advisable at so late a period of the year as that at which the exploration was undertaken, to attempt to complete a Survey with a view to Railway "location." Before concluding my observations on the general characteristics of the Country however, I will touch in general terms on its configurations as bearing on the question of Railway construction.

The level of the Chats Lake, into which the Bonnechere River discharges, is as nearly as possible, that of the St. Lawrence below the Lake of the Thousand Isles; that is to say 225 feet above tide water at Three Rivers.

The elevation of Lake Huron is 572 feet above the same datum line. The ultimate ascent therefore from the Eastern extremity of the exploratory line to its western terminus on the Georgian Bay, is 347 feet; the distance 208 miles.

Mr. Sinclair has furnished me with data for accertaining the ascent on the eastern portion of the route, from which it appears that the Great Opeonga Lakell 800 feet above the Chats, 1025 feet above the Sea, and 453 feet above Hake Huron.

Of the height of the summit ridge, which is crossed about 12 miles west of Opeonga, I have not the means of making an accurate estimate, but from all I

can gather, it does not seem to exceed 125 feet above that Lake; assuming it at which, we have an extreme elevation of 1150 feet above Tide water, at a point nearly equi-distant between the Chats Lake, and the Georgian Bay, giving an elevation to be overcome in the first 108 miles, going west, of 925 feet; and a descent thence to the Western extremity of the line, 100 miles, 578 feet. These levels, if distributed with anything approaching average regularity, promise the attainment of a Railway route of not unfavorable features.

The general course of the line is with that of the principal Rivers, and the amount of bridging to be encountered consequently not very great. The prevalence of small Lakes, Hills, and Ravines, West of Opeonga Lake, will doubtless call for considerable curvature; but upon the whole, there is every reason to assume that without very materially departing from the exploratory. Line that has been run, a Railway, unobjectionable as to gradients, and general directness, may be constructed from the Chats Lake, to that part of the interior where the rough and rocky district; beyond the "belt of good land" (about fifty miles inland from Bying Inlet) has been described as commencing; and as respects the cost of such a line, it would be safe to estimate that it need not exceed the average to which we are becoming habituated in Canada, as we grow older in Railway experience; that is to say about Forty thousand dollars per mile. From the point referred to, which is near the junction of the Distress River, with the Maganatawan, the Public can never have any interest in the construction of a Railway further west on the explored route. The Maganatawan is navigable for five miles from its mouth, for vessels of such capacity as would be suitable for carrying Lumber to the various Ports on Lake Michigan, where that article of commerce will ever be in unlimited demand, and no doubt much of the Pine in the region I have been describing will eventually find its way to Western Markets, but those embarking in that traffic on the dreary Coast of the Georgian Bay, will have to tax their own resources and ingenuity, to find means for transporting the Lumber from the spot where the tree is felled, across the flat naked shelf of granite intervening between it and the place of Shipment in the Bays and Inlets of the Coast.

That a Railway will one day be pushed up through the heart of the Ottawa and Georgian Bay Valley, I look upon as scarcely problematical; and I feel equally convinced that such a line will be but the first step in the construction of a great Continental Railway, eventually, if no natural obstacles exist to arrest its progress, to sweep around the North shore of Lake Superior, and penetrate the line plains said to stretch along the Valley of the Saskatchawan. The earlier destination of a great North-West Railway, however, will be to the Sault Stemarie; a point that may yet become as great a portal for the traffic of the Northwest there entering Canada on its shortest Route to the Atlantic Ocean; as the Straits of Detroit now are, for the partially developed trade of the Western Prairies.

I have myself reconnoitered the country immediately bordering on Lake Nipissing, and am enabled to state that a level table land extends around its Eastern and Northern coasts. To the West of the Lake, the explorations lately made by Mr. Salter, seem to promise the existence of a Valley of fairly level land stretching in rear of LaCloche Mountains, towards Lake Superior, and giving reason to hope that a practicable route may thus be traced, to some point on the narrow channel through which the waters of that great fresh water Sea flow into Lake Huron. Once this latter question shall have been decided; it may be pronounced that there is a feasible Railway Route from the Chats Lake on the Ottawa, to the Sault Ste. Marie, at the outlet of Lake Superior, a distance of about 450 miles.

Such a line of Railway would follow the general course of the survey described in this report from the mouth of the Bonnechers River, for 150 miles nearly due

West; then assuming a Northerly direction, it would pass longitudinally through the belt of hardwood land already referred to, and follow down the Valley of the Nanamatagolins River, to near its junction with Lake Nipissing; thence keeping on the level plateau above noted, it would cross the Valleys of the Wissi-Wassing and Rivière de Vase, on the East side of the Lake, and that of Sturgeon River on the North, and so on around the shore, until reaching the Valley of the Widow River, it would again assume a Westerly direction to gain the Sault Ster. Marie.

From that point to Montreal the travelling distance by such a line would be about 630 miles, to Portland 920 miles; thus making the Sault Ste. Marie nearer to an Atlantic Port, by at least fifty miles, than Chicago is to New York. That a city rivalling the former in commercial importance, will ere long spring up somewhere on the shores of Lake Superior, is an event that one may safely venture to foretell: and for the commerce of the region which such city will be the Emporium, the shortest routes of communication with the Atlantic Sea-board will be almost wholly on Canadian soil, following the course of the great Ottawa River.

Having above depicted the general agricultural capabilities of the Ottawa Region in not very flattering colors, it may seem visionary to entertain the idea of so serious an undertaking by the people of this Province, as the construction of upwards of four hundred miles of railway through an inhospitable territory, But in its timber and in its minerals the country circumjacent to the line I have traced would possess at all events some important elements of local traffic, and there is besides a very considerable extent of habitable land north and west of Lake Nipissing, in addition to the large tract estimated as such in the Ottawa or Georgian Bay Valley. As I have already said, however, it is as a broad continental scheme. I would risk predicting that such an enterprise will yet be entered upon, and if Lake Superior can be encircled by the rail, will be but an initiatory step towards constructing, wholly through British territory, a great Atlantic and Pacific Railway, an enterprise with which the next generation may have to grapple, in so far, at all events, as to test the feasibility of a scheme of such high commercial importance in theory, that if practicable at all, no ordinary difficulties will always be allowed to stand in the way of its achievement. The day must not be so far distant either when its political bearings may aid the advancement of such a project. The "balance of power" on this side of the Atlantic will ever hold its seat in the North, using the term not as in the United States, in contradistinction to the South, but in the real cold North,—north of the great Lakes, and when to the westward of them, north of the 49th parallel To that section of the North American continent then, a great arterial line, such as I have ventured to foreshadow, may one day become a national necessity. In concluding this Report, however, I cannot avoid expressing the opinion, as the result of the surveys and explorations that have been made, that the time has not yet arrived for pushing railways further up the valley of the Ottawa, than, at furthest, to the limits of settlement in the County of Rentrew. The whole is respectfully submitted, and

I remain, Sir,
Your obedient Servant,

(Signed,) W. SHANLY
Esquire, Secretary,
epartment Public Works.

T. A. BEGLY, Esquire, Secretary, Department Public Works.

# RETURN

To an Address of the Legislative Assembly, praying His Excellency the Governor General to cause to be laid before the House a Copy of the Report of Comte de Rottermund, relative to the mines of Lakes Superior and Huron.

By command,

T. LEE TERRILL, Secretary.

Provincial Secretary's Office, Toronto, 11th May, 1857.

> DEPARTMENT OF CROWN LANDS, TORONTO, 8th May, 1857.

Sir,—I have the honor to transmit to you herewith a copy of the Report of Comte de Rottermund, relative to the mines of Lakes Superior and Huron, in accordance with the desire expressed in your letter of 7th inst., for the purpose of being laid before the Legislative Assembly.

I have the honor to be,

Sir,

Your obedient servant,

E. P. TACHÉ, Acting Commissioner of Crown Lands.

Hon. T. Lee Terrill, &c., &c.

(Translation.)

#### SECOND REPORT

Of the Explorations of Lakes Superior and Huron by Comte de Rottermund.

## INDEX.

Introduction.

Nature of the minerals and rocks collected on Lakes Superior and Huron.

Ores.

Geographical distribution of minerals, rocks, and orcs.

General form and structure of the masses.

Origin.

Their age.

Opinions of various savants.

## TO THE HONORABLE THE COMMISSIONER OF CROWN LANDS.

Sin,-In the first report which I had the honor to present to you, in the month of April, 1856, of my examination of the rivers of one part of Canada West, undertaken in pursuance of your instructions, as dated 12th June, 1855, I attempted to trace with a rapid pen the general geological constitution of the Canadian side of the two lakes, describing with greater minuteness certain portions of Lake Huron and the eastern side of Lake Superior, as far as the island of Michipicoten. My opinions were based on the origin of the mineral matters present, and chiefly on those metallic matters which form the wealth of those extensive districts.

This second report, which I have now the honor to address to you, is designed to bring under your notice the results of another journey which I have just completed in the same region. I have again visited the greater part of that country which I had in the first instance passed over with somewhat too much rapidity, and have extended my researches more westerly on Lake Superior, from the heights about Michipicoten, where I had stopped short in my first exploration as far as the western extremity of the Canadian shore, that is to say, near Pigeon River.

This new journey, although a rapid one, has produced important results; new facts have appeared in great numbers; various observations, hitherto of doubtful accuracy have been verified; some data, formerly incomplete, have been filled up; and in a greatly extended field for research, I shall henceforth have a larger basis on which to establish the general conclusions which I had, in my former work ventured to offer for your consideration.

In this second report which I have now the honor to present to you, it is my intention to give a summary of the progress which I have made in my late journey:—to specify the new discoveries made—and, with a view to simplicity of arrangement, to examine in succession, 1. The nature of the rocks and minerals of which the Canadian shores of the two lakes are composed, and particularly that of the ores, which is of such importance; 2. The geographical distribution of the mineral masses as they occurred in my journey; 3. Their general conformation and internal structure; 4. Their age.

#### NATURE OF THE ROCKS AND MINERALS.

In my first report I gave the following list of the rocks and minerals composing the Canadian shore of Lake Superior;

Various feldspathic rocks.

Grauwacke of different kinds.

Sandstone.

Molasse.

Various Jaspers.

Dioritic Rocks.

Pudding-stone.
Amygdaloids.

Brescia.

Limestone.

Serpentines.

Quartzose Rocks of various qualities.

Sands.

Clays.

Waved.
Arborescent.

Sardoine.

Agates, { Chalcedony.

Cornaline.

Chrysoprase.

Onyx, etc.

Chabasie.

Prehnite. Heulandite.

Mesotype.

Chlorite.

Zeolites.

Zircon.
Petrified vegetable substances.

To this list I shall now add, as the results of my late researches, the other kinds or varieties of rocks or minerals, here added.

1. Rocks.

Granite.

Pegmatite.

Leptinite.

Syenite.

Syemie.

Greenstone.
Amphibolite.

Trapp.

Mimosite. Porphyry. Eurite. Arkose. Marl. Clay. Tripoli. Retinite. Gneiss. Micaschist. Talschiste. Phyllade. &c. &c. 2nd. Minerals. Epidote. Asbestos. Analcime. Laumonite. Apophyllite. Stilbite. Lydian. &c. &c.

Of the numerous kinds of rocks and minerals named in the above lists, several, the most important, require particular notice. In designating them, particularly the rocks, I shall follow the nomenclature adopted by Messrs. Elie de Beaumont and Dufrénoy, in the explanation appended to their geological map of France. This nomenclature is generally adopted by the continental geologists, as being the most simple and natural. I shall also, in explaining their comparative meaning, adopt certain rocks of the classification of M. Cordier, professor in the Museum of Natural History. My specimens were exhibited during several months in the geological laboratory of that celebrated establishment, and were examined, with reference to their various properties, by the most skilful practitioners of the science in the capital.

I have been enabled, therefore, to determine the various species with the utmost exactness, and in this work I was ably assisted by Mr. Hugard, a young mineralogist, and a professor in the Museum, to whom I am under the greatest obligations. Moreover, the magnificent series composing the collection in the Museum, and containing the exact types admitted by the learned Professor, M. Cordier afforded me a certain and ready means of confirming the decisions in question. I insist on this point, for the statement of the true nature of the rocks of Lake Superior will be the principal feature in the present work, and must hereafter be the starting point of all my other publications on the same subject.

Certain errors into which geologists, of some repute, have fallen in describing the productions of the district under discussion must no doubt be ascribed to the erroneous classification of certain rocks, or to mistakes in the terms employed to designate them. These errors we shall avoid in future, by a rigorous definition of the several types which are the subjects of observation. Granite, a rock consisting of three essential minerals, quartz, feldspar, and mica, all crystalline, and in proportions apparently equal; the particles of various kinds are so mingled with each other as to produce a peculiar structure termed granitoidal, and this term is applied, by extension, to all similar arrangements in other rocks. Yet, though so designated, they are not to be confounded with granite properly so called. In certain varieties of rock, feldspar affects the form of well defined crystals, with a rectangular section, as in porphyry, as we shall see hereafter, and this structure is termed porphyroidal.

The three minerals composing granite are found, as we have observed, in proportions to all appearance equal; but it is very uncommon to meet with a large mass of granite containing in every part the same proportions of its components: occasionally quartz, sometimes feldspar or mica predominates, and there are specimens in which two of the elements become more abundant, while the third diminishes or disappears altogether. From this cause it happens that we have different varieties of granite or even particular descriptions of rock, as quartz, granular, feldspar and leptinite, &c. Quartz and feldspar uncombined with mica, pass into pegmatite: quartz and mica alone, or nearly so, without feldspar, or feldspar and mica without quartz produce other varieties termed laminar granite; and where the lamination becomes more apparent, these granites become even micachist and gneiss. Finally, granite may contain various accidental minerals, and chiefly amphibolic hornblende. This even tends sometimes to a These speculations on the subject of granite are not to be consitrue syenite. dered idle; the true intent and meaning of terms by which I must hereafter designate the different varieties of rock must first be ascertained, and on the other hand, all the varieties heretofore enumerated do in fact exist in the country which I am about to describe, genuine granite a little north-east of the Island of Montreal, between Cape Gargantua and Cape Choyé; on the shore, opposite the north of Michipicoten, &c.; pegmatite also in the above localities, is found with granite, which it traverses in veins; but we shall define the respective localities of these varieties, when we hereafter examine the geographical distribution of the several mineral masses. Syenite.—A rock consisting of feldspar, hornblende and quartz, in crystals and commingled as they are in granite. Its structure is therefore granitoidal.

Quartz is commonly found in less abundance than the two other elements. The feldspar composing it belongs to the orthose class; the hornblende is of the greenish-black variety, very ferruginous and amphibolic. Occasionally the quartz altogether disappears, and the rock then passes into the following variety:

Diorite.—Feldspar and amphibolic hornblende, crystalline, granitoidal structure, the feldspar of the albite species. This rock is generally found associated with the foregoing, and both are frequently met with in the same mass, in varying proportions. The true diorites are rare on Lake Superior. Syenite is found more frequently, particularly that kind which is nearly allied to granite. We shall instance Montreal River, the Rivulet between Otter Head and Pie River, as furnishing very fine specimins.

Greenstone.—This rock has been variously interpreted by geologists, and its true nature is even still a matter of discussion. The most ordinary meaning assigned to the term is a composition of hornblende and albite, the two elements being hardly distinguishable by the eye, or even combined by fusion. It is in this sense that we shall always use the term. Some French writers have mentioned it by the name of aphanite. Mr. Cordier applies to it various names, according to its varieties.

In certain cases it is not easy to distinguish greenstone from another species of rock which we shall find hereafter. This is mimosite. The two rocks have nearly the same external aspect, but the latter is composed principally of pyroxene. To us it has always seemed after repeated observation, that greenstone (amphibolic) was always associated on Lake Superior with serpentine matter, which is not found in true mimosite, and that the same rock (greenstone) often contains yellow copper pyrites, an ore which is absent in mimosite. As diorite is allied to syenite, so greenstone passes by insensible gradations into diorite.

The localities in which greenstone is found are Mamains, the Isles of St. Ignace, the coast of Kaministiquiac, Pigeon River, &c. I shall notice diorite at Rivulet.

Amphibolite or Amphibolic Rock.—Hornblende alone in the crystalline state; feldspar and quartz which entered into the composition of the preceding varieties; such as syenite and diorite, are altogether wanting here.

Amphibolite is usually an accident arising from the predominance of homblende in the masses of syenite or diorite. This rock is perfectly characterized

along the coast west of Michipicoten Harbor.

Trapp.—It is the same with trapp, in the pyroxenic rocks, as with greenstone in amphibolic rocks; trapp has been as variously described by geologists as that analogous species which is found in hornblend rocks. It has been converted into a connecting link, but imperfectly defined with a class in which have been included all the masses, the composition of which is rather problematical.

In our estimation trapp consists essentially of pyroxene and feldspar intimately combined. Its structure is compact, its color commonly blackish. Certain varieties are roughly divided in the prismatoidal form of columns resembling

those of basalt.

Trapp rock is extremely developed at various points of the east, north, and west coast of Lake Superior, being one of the principal rocks on that long line. Of the numerous places in which it is found we principally notice Cape Gargantua, Rivulet, the island of Michipicoten, the concession of McGill, Derbishire, &c. In one of the latter trapp is found in columns.

Mimosite.—This is composed, according to Mr. Cordier, of feldspar and pyroxene, both crystalline, and among the pyroxenic rocks, forms the pendant of diorite, in the amphibolic group. It is blackish, almost always finely granulated. Feldspar is tinged with green by the pyroxene, which, notwithstanding its scan-

tiness, gives its character to the rock.

As the volume of its components diminishes it passes into the basanite trapp of Mr. Cordier. By some authors mimosite is designated as dolerite. The layers of this rock are numerous around the lake; Agewan has one which is very fine, another is on the north-east and north shore opposite to the island of

Michipicoten, and others at Rivulet, the Isles of St. Ignace, &c.

Basalt.—It is difficult to distinguish basalt from trapp, except by its age. Both species are black, more or less compact, and composed of pyroxene and feldspar, &c. They present the same accidents of structure, and, were it not for the occurrence of certain geological peculiarities, it would be impossible to separate them. The most marked characteristic of basalt is the presence of peridot. It belongs to the class of volcanic productions. It is not our opinion that real basaltic rocks exist on the northern shore of Lake Superior. The writers who have spoken of the volcanic rocks of that region seem to us to have fallen into a serious mistake, giving an erroneous idea of the true geological constitution of the country, in which nothing of volcanic origin appears, according to the exact meaning of the term, that is, the matter modified at some epoch, by the action of fire; we shall therefore decline considering, as certain writers have done, that the trapp in decomposition and of prismatoidal form, mentioned as appearing at St. Ignace and Derbishire, is basaltic. It is comparatively modern.

Amygdaloid.—The name sufficiently indicates the specific character of this rock, inclosed in a dull looking opaque, compact, hard or soft, variously coloured crust, appear kernels generally almond shaped, the colour of which, equally various, contrasts with that of the interior of the crust. It is difficult to fix the exact mineral composition of this rock; it seems to be like that of the trapps pyroxenic and feldspathic. As to the nature of the kernel, that is more precisely determined, it is carbonate of lime, silex in various states, several kinds of silicates of the particular group of the zeolites, especially mesotype, stilbite, apophyllite, &c., besides a green earthy particular kind of matter, resembling chlorite. The professors of the old world give various names to amygdaloid rocks; Mr. Cordier terms them wacke, other writers designate them by the world.

spelite. It is one of the most important rocks in the region which engages our attention on account of its abundance, and especially on account of its metallic contents. This it is which yields the greater part of the metallic copper in our Canadian section of Lake Superior.

Eurite.—Compact or slightly granular feldspar; it is likewise not uncommonly named petro-silex. It is found on various points on the coast, from Kama-

nistiquiac to Pigeon River.

Porphyry.—A crust of petro-silex and crystals of feldspar, distinctly shewn in the map in form or color. Porphyry occasionally contains scattered particles of hyaline quartz. Quartzy porphyry, of hornblende, syenitic porphyry, of pyroxene, pyroxenic porphyry, and so on. The color of these porphyries depends in a certain degree on the nature of the accidental mineral, being red, black, or green, the latter, heavily charged with angite pyroxene has received the particular name of melaphyre. I noticed the porphyries chiefly in the island of St. Ignace, in Hopkins' Island, and near Rocke Debouts.

Serpentine.—The ophiolite of some writers. It is difficult to define this rock by its mineral components, easy to distinguish it by its external characteristics. Mineralogically considered, serpentine appears to be nothing but a particular state of various species, as of amphibole, tale, diallage, &c., generally with a mixture of oxydulated iron intimately combined with the mass. With respect to its external characteristics, serpentine is frequently of a greenish hue, of various shades, occasionally streaked, (hence the name). It is soft, tenacious, that is to say, difficult to break, smooth and soapy to the touch. Serpentine is nowhere found on Lake Superior in large masses, but it frequently accompanies the sulphurets of copper, particularly in the amphibolic rocks.

Gneiss.—Feldspar and mica. Quartz, if found in the mass at all, is purely accidental. The structure is crystalline, essentially laminated, which latter characteristic is perhaps the most important, to distinguish gneiss in certain cases from granite. We have remarked that these two rocks pass the one into the other by imperceptible gradations. The laminated structure of gneiss is particularly owing to the abundance of mica. The direction of the laminæ is parallel to the

largest face or plane of cleavage in the latter mineral.

Micaschiste.—Quartz and mica, crystalline, schistoid, a kind of gneiss in which quartz has taken the place of feldspar. It is still more laminated than gneiss, in consequence of the larger proportion of mica. Quartz is distinguished from this kind of rocks, otherwise nearly allied, by a peculiar glassy fracture which in feldspar is rather lamellated and spathic. A well marked type of

micaschiste is found at Bottle Creek, nearly opposite to Slate Island.

Talschiste.—Quartz and tale, crystalline, schistoid. In this rock the magnesian mineral supersedes the mica in the last mentioned. Talschiste is very much laminated, more even than micaschiste. Tale, which bears a great resemblance to mica, and which renders it difficult to distinguish between the two rocks, is, however, easily known by the inelastic flexibility of the laminæ, differing from the elastic flexibility of those of mica.

I followed a range of talschistes, somewhat petro-silicious, of considerable extent, along the west side of Michipicoten harbor; but the finest specimen of the

rock is to be found at Slate Island.

The three preceding rocks, gneiss, micaschiste and talschiste, are generally designated as crystalline schists. Together they form a well-defined system which, in the opinion of certain geologists, represents one of the most ancient portions of the solid crust of the earth; others, and among them the celebrated names of Debach, Elie de Beaumont, and Lyell hold that they belong to all the geological periods, and that they were originally argillaceous schists or clays metamorphosed by the contact or influence of eruptive masses, occurring after their formation.

Phyllade.—Talschiste rock may afford varieties, in which the two constituents become less and less crystalline, the talc especially passing imperceptibly into the compact kind or steatite. The result is a phyllade. This rock may also be considered as a schist hardened and saturated with talcose matter. It is studded with crystals, particularly of a metallic kind, as cubic iron pyrites, octahedral oxydulated iron, &c. The color is usually a clear green, or else a brick-red. The phyllades are represented to the north of Michipicoten River.

Schist.—A compound of argile of a laminated or fissite structure. It is of various degrees of hardness, but always harder than argile, the color generally grey, with tinges of various other colors. Tegular schist or slate, coticular schist, or whetstone, and various others according to the degree of consistency or com-

pactness.

The schists, if existing at all at any point of Lake Superior, are in such a state of disintegration, that their true nature can scarcely be distinguished. They are recognised by their structure only, at the Falls of the Kamanistiquiac, in the

Island of St. Ignace, in Derbishire, at Mamains, &c.

Argile.—A compound of silver, alumen, oxydes of iron and various others, in the earthy state, more or less piable of various colors. The varieties are numerous, according to their qualities and the uses to which they are applied: plastic clay with water becomes a paste; modelling clay has the same property; porcelain clay is the most pure, and is known as kaolin; potter's clay; fuller's earth, &c.

Limon.—A coarser matter than argile, and much more piable, leaving abundance of dust on the hand, not soapy to the touch, never plastic, and often tinged red or yellow by oxydes of iron. Otherwise, it is composed almost entirely of argile.

The limon deposited by the waters of the last cataclysm of the globe, on certain regions of Europe, particularly on that bordering on the Rhine, combines

all the characteristics above mentioned.

Tripoli.—On earthy substance, composed chiefly or almost entirely of very fine particles of silver. Tripoli is very friable, stains the fingers, and adheres to the tongue, scratches glass, polishes metal, &c. It is sometimes laminated, sometimes in mass, of a white or greyish color, and occasionally tinged with red from the sesqui-oxyde of iron. Certain tripolis are altogether formed of the remains of infusoria, or microscopic animals, of which the calapash is silicious. A rock which has great analogy to tripoli is met with in the Bay of Batchewanaung. It is laminated, very soft, and polishes metals perfectly, but contains a very large admixture of carbonate of lime.

Pudding-stone.—A rock composed of worn, rounded pubbles, in a crust or cement more or less homogeneous. The nature both of the pebbles and the

cementing paste is various. Generally, it is silicious.

All pudding-stone bears evidence in the most indisputable manner of the action of water. By this the rocks have been detached in fragments, by this they have been worn and rounded, and then left to be at a later period combined and cemented in a suitable menstruum. Such a mode of formation necessarily implies a certain hardness in the components.

Brescia.—As in pudding stone, portions are clearly detached differing in color, form, and volume from a mass which is more homogeneous, but these distinct portions instead of being rounded, are angular. The formation of a brescia does not necessarily imply the action of water moving it, it may be a result of other causes. The component parts in this state of the rock may be soft; brescia

is often a limestone formation.

Conglomerate.—An aggregation of heterogeneous substances of various forms, angular or rounded, of every kind in nature, thrown together by the action of water, in which the rocks being originally decomposed under the influence of

various currents of fluids have been subsequently cemented together by chemical action. The island of Michipicoten affords a magnificent specimen of conglo-

merate, in which the pebbles and the cementing paste are syenitic.

Grauwacke or psephite.—We gave a long explanatory notice of this rock in our former report. We shall on the present occasion only briefly recapitulate the former remarks. It consists of an argillaceous paste, with numerous particles of quartz, spangles of mica and fragments of crystalline and other schists; it principally belongs to the older earths, formed of the debris of primitive granites, and of gneiss, micaschists, talschists, and phyllades overlying them.

Sandstone.—This name generally designates a rock composed of small rounded particles of quartz, cohering only by juxtaposition or joined together by a cement, which is also silicious, or otherwise with an accidental but more or less considerable mixture of foreign substances, as mica, argile, feldspar, oxyde of iron, chlorite, &c. Hence there are very numerous varieties of this rock; pure sandstone, argillaceous sandstone, feldspathic sandstone, argile-micaceous sandstone, schistoid or psammite, argilo-calcareous sandstone or molasse, sandstone with chlorite or green sandstone, ferruginous sandstone, red sandstone, variegated sandstone, &c., &c.

In these several varieties the particles of quartz predominate, and we have said that they are rounded. This last characteristic shews that water in motion

influenced the formation of this rock.

The sandstones in certain cases acquire a high degree of compactness, the particles are no longer distinguishable, the fracture is smoother than in the ordinary varieties of the same rock, the cementing matter is more abundant, they receive a more brilliant polish, &c. They then receive the name of quartzites. These sandstones generally belong to the earlier period of the solid crust, and are accounted by certain geologists as the products of changes operated by fire. The sandstones are but little developed on the Canadian side of Lake Superior, much less so than on the southern shore. They are but rarely met with, and only in strips, as for instance on a few of the islands at the south-eastern extremity of the island of Michipicoten, and along the eastern side of Thunder Bay.

Sand.—It is scarcely necessary to state here what is generally understood by this term, those loose rounded particles, bearing marks of separation and motion in water, of various qualities, as quartzose sand, feldspathic sand, pyroxenic sand, &c. When more or less coarse it receives the particular name of

gravei.

Limestone.—This is composed of the carbonate of lime; it effervesces strongly even with the weaker acids. The varieties are numerous: laminated or spathic, lamellar or saccharoidal, concrete or alabaster, compact or lithographic, earthy or chalk, coarse, shelly, &c. Limestone rock is almost entirely wanting around the Canadian coast of the lake, while we shall find it very prevalent in Lake Huron.

Marl.—This is a mixture of limestone and clay in proportions seemingly equal: calcareous marl, if the carbonate of lime predominates, argillaceous marl, where the other element prevails. The marls have but little compactness; they

are rather earthy, soiling the fingers more or less.

Dolomite.—Double carbonate of lime and magnesia. Externally it very much resembles limestone, but it is considerably heavier, and dissolves with less effervescence in acids, at least when cold. It is generally found in the neighbourhood of masses, of crystalline formation and highly magnesian. The advocates of metamorphosis by fire generally attribute its natural properties to the influence of those masses which they suppose to be the products of cruption.

We now come, after the rocks, to the mineral species properly so termed, which are observed around the lake. With respect to these, I shall refrain from

giving their characteristics as I have done those of the other kinds of mineral substances; their nomenclature is not liable to difficulties like that of the rocks.

I shall only notice in this place some of the most remarkable, as quartz, island spar, zeolite, &c., and its several varieties.

This mineral is one of the most abundant contained in the masses which

compose the northern coast of Lake Superior.

In the crystalline or hyalin state as it is termed, it furnishes an element essential to granite, or rather it forms masses subordinate to various rocks. It sometimes even constitutes the gangue of the metalliferous filaments; in short, I have discovered it even in the cavities of certain amygdaloids in the island of Michipicoten, in small bi-pyramidal, hyalin, brilliant and very transparent crystals, lining the interior of such cavities.

Quartz is represented under an aspect not less important than the preceding, at different points on the Canadian coast of Lake Superior; as an agate it is particularly on the island of Michipicoten that I shall notice the species. In that rich locality the silicious mineral offers numerous varieties: chalcedony, sardoine, cornelian waved agate, onyx, the arborescent and the variegated agate. Some of these specimens would, no doubt, on account of their size, the brilliancy and the arrangement of their colours and their abundance, be worth cutting as articles of ornament, and might probably yield a good profit.

The agates are found almost exclusively with the trapps and amygdaloids; particularly the latter, around the lake. We shall find hereafter in what manner

they are embedded in those rocks.

Neither is quartz of the compact and perfectly opaque variety, or jasper uncommon on different parts of the coast, and like the agates, it is usually found with the rocks of trapp and amygdaloid. We admired a beautiful variety of uniform green ground, in the island of Michipicoten. We also picked up in the same place the black variety of jasper termed lydian, a stone which is of use as it is well known, as a test for gold in articles of jewellery. The orthose or potassian feldspar predominates among the granites and pegmatites at various points on the lake, salbite or sodiac feldspar, in the amphibolic rocks, and hornblende. A third species, concerning which we have not yet exactly determined, but which appears to us to be oligoclase or labrador, exists in pyroxenic rock. This last kind we found particularly in the trapp on the Derbishire Island, ou the southwest of the island of St. Ignace. It appears in the form of glassy particles or crystal plates, yellow, streaked, and shews the characteristic gutter of both the kinds of feldspar which I have named. I attach great importance to the existence of this feldspar, in the well known rocks of trapp of Lake Superior; I propose to make more particular study of them hereafter, and I do not doubt that they will furnish a safe means to determine the hitherto problematic age of those rocks; but whatever may be the case with these various species, feldspar is principally represented on Lake Superior, by the spathic or laminated variety, and by the lamellated kind; in one of these forms it enters as an essential ingredient into the composition of granitoidal rocks, as of granite, pegmatite, syenite, diorite, &c., on several points of the coast, as we shall see hereafter in describing the localities.

Mica.—This species enters as an essential element into the composition of granite; and, combined with a little quartz, it forms true micaschists.

Talc.—Is comparatively rare in our rocks; nevertheless, at Slate Island it

foms a magnificent laminated talschist, studded with decomposed garnets.

Amphibole.—The French mineralogists divide this species into two principal varieties, hornblende and tremolite; the former of a dark green color and fibrous laminated structure, the latter, white and of a cacillary or acicular structure. The hornblendic variety only is found in the rocks of Lake Superior, and it is important from its great abundance. Combined with feldspar and with hyalin quartz, we

know that it forms syenite, which will excite our admiration at Gargantua Rivulet, between Otter Head and Pike River, &c. With feldspar, albite in particular, without quartz, it forms diorites, as at Rivulet. These same elements more intimately mingled, and hardly distinguishable, afford greenstone which occurs so frequently at Mamainse in the islands near St. Ignace, &c. Uncombined and lamellated, it affords the well defined amphibolite of the western shore of Michipicoten harbor. In a word, the element of hornblendic amphibole is one of the most important on the Great Lake, on account of its extensive development.

Amphibole, when decomposed, and in the form of white fibres, gives asbestos,

which is found to the north-east of Pike River.

Pyroxene.—As in amphibole, so in pyroxene, mineralogists recognize two principal varieties. Augite, which is black, diopside, which is light green or whitish. Of these varieties, again, the former only is found in the rocks of the lake. We must however, confess, that hitherto, all our researches have not availed us to discover well-defined pyroxene agnite. It is on pure supposition, and basing our belief on deductions from geological considerations that we admit pyroxenic matter, particularly in trapps. It is certain that the blackish stone of rather crystalline grain, to our specimens, of which Mr. Cordier gave the name of mimosite, and which that savant therefore includes among the pyroxenes, has an appearance very different from that of the green stone or diorite, which are amphibolic rocks. The nature of the feldspar associated with the rocks of trapp—a feldspar to which we have already alluded—would be a fair criterion by which to decide the question: if that is the Labrador feldspar, the dark green or black matter found in connexion with it, may well be ptonounced to be pyroxene.

Epidote.—This mineral is scattered, but in a very accidental manner, throughout the syenitic rocks at Montreal River, on the island of Michipicoten, and at other points. At Slate Island it seems to form a compact rock. Its usual color

is a pistachio green; its form generally that of a crystal.

Zeolites.—Like the great majority of mineralogists, we understand by this term an aggregation of mineral varieties analogous in character, and externally bearing a strong family likeness, existing in similar circumstances, and generally scattered through the cavities of amygdaloid rocks. The species are numerous: those which have chiefly fallen under our observation, particularly at the island of Michipicoten, are the following:

Prehnite.
Heulandite.
Mesotype.
Analcyme.
Stilbite, &c.

Prehnite appears at Michipicoten and at Otter Head in the form of rounded concretions, mammilated on the surface, and slightly radiated. In color it is of a beautiful greenish grey. The specimens are sometimes intersected with native copper.

Heulandite.—This is in small bright red crystals, scattered principally on the surface of agates, where they are joined to the rocks containing them. We re-

marked it chiefly at the island of Michipicoten.

Mesotype.—I found in the island of Michipicoten, perfectly clear crystals of this interesting species. They were in form, long prisms, transparent, having four

sides, and terminating in pyramids with four triangular facets.

Analcyme appears in the same island, in the form of trapezohædia, the facets and apices of which are clean. These crystals are sometimes combined in masses. Their color is reddish, and their surface dull, no doubt from deterioration subsequent to their formation.

Stilbite.—This species has not appeared to me to offer any peculiar character-

istics, at least in the specimens which I collected.

Iceland Spar.—This is carbonate of lime in the spathic or lamellated state, and is rather common on Lake Superior: it is sometimes the gangue to the metal-liferous filaments, at other times it traverses other rocks in veins; it often fills the

rounded cavities of amygdaloid rocks.

It appears in certain positions excessively crystalline and transparent, and I have found some specimens which displayed in the most decided manner, the phenomenon of a double image reflected through the mass, that is to say, double refraction.

#### ORES.

The principal ores or mineral species in which the metallic elements predominate, which I shall notice, on Lake Superior, are chiefly copper, zinc, lead, iron, silver, gold and cobalt.

Native Copper,

Yellow Copper Pyrites,

Streaked do do

Malachite,

Azurite,

Sulphuret of Zinc, (blend) Sulphuret of Lead, (galena)

Lead containing Silver,

Iron Pyrites,

Sesqui-oxyde of Iron, (oligist)

Oxydulated Iron, (loadstone)

Hydrated sesqui-oxide of Iron, (limonite)

Native Silver, Native Gold,

Arseniuret of Cobalt, (rose) &c.

The native copper is one of the most important species among the ores of our Canadian shore of the Lake, as well as of the American side. It is found at many points. I notice it principally at the bay of Batchewaunaung, at Mamainse, at Pointe aux Mines, in the Island of Michipicoten, etc. It is embedded in the sand-stone, trapp, and more frequently in amygdaloid rocks.

It is occasionally found imperfectly crystalised; sometimes ramifying irregularly, often in angular or lamellated fragments and usually in amygdaloid rocks,

we find it filling the numerous cavities in tiers.

The sulphurets and other combinations of copper, such as the streaked pyrites (philipsite), the yellow pyrites, the carbonate, etc., are not found in the same positions as the pure ore. We meet with them more commonly in greenstone.

I ascertained their existence at Mamainse at Mica Bay, to the north of State Island, and along the north-west side of Thunder Bay. They furnish no very remarkable variety mineralogically speaking, if we except a very fine fibrous

banded malachite at Mamainse.

I have nothing further to add in this place relative to the ores above enumerated. They offer nothing remarkable except perhaps the native silver, the association of which with native copper is singular. These two metals are never intimately combined, even when found in greatest proximity in a common gangue. I found native silver at Mamaines and at the Island of Michipicoten.

Gold is found in small scales in the sand of the River Michipicoten, particu-

larly near the falls, above the rapids.

Oligistic iron exists also at Mamainse, blend and galena are found in the same district and along the north side of Thunder Bay.

### GEOGRAPHICAL DISTRIBUTION OF ROCKS, MINERALS AND ORES

We shall now recapitulate the principal mineral masses which we have described above, with reference to their composition, in order to cast a rapid glance over their general distribution along the Canadian coast of the great Lake. In making this survey it is natural to take things as they occur in the voyage: we shall therefore commence at the Falls of St. Mary, which is the southern outlet of the Great Basin, and coast along till we reach the opposite extremity, in the north-west, at Pigeon River.

At Pointe aux Pins, there is a tertiary deposit containing shells, preserved with their natural color, and therefore of recent formation. Some specimens which I collected at this place I deposited in the Museum at Paris, where Professor Valenciennes kindly promised to determine their character. In the same neighbourhood, at a spot which I cannot just now precisely ascertain, there is a layer of oxydulated iron (loadstone or magnet.) The ore lies in a pure laminated mass, bearing all the marks of an excellent material for mining operations.

Gros Cap.—Situated immediately to the north of Point aux Pins, shows a sort of rock of trap, in decay, of greyish color, with spots of a greenish yellow which look like epidote. Near the coast also I found a very compact limestone,

bright grey containing portions of red jasper.

To the west of Goulais Bay I found Parisian Island composed of variegated

limestone.

In the Bay of Batchewaunaung further north than the preceding places, are quartzose phylladiferous sandstone which at the same time contain a large proportion of decomposed feldspathic matters variously streaked with claret-colored red and green, the latter color resulting from the phylladian matter which it contains. This sandstone contains in places native copper.

Towards the north-eastern extremity of the Bay, there is also a rich bed of argillaceous marl in layers, of a pale rose color generally, but wavy in places,

and of a deeper shade.

The fine silicious particles which it contains readily give a fine polish to metallic surfaces rubbed with it; the effect is similar to that of tripoli, and with a view to this use, it might perhaps be worked to advantage. In the same neighbourhood I found a kind of decomposed brescia-form rock which may have con-

tributed to the formation of the laminated earthy rock above mentioned.

Mamainse, to the N.W. of the Bay of Batchewaunaung yielded me numerous specimens of rocks and minerals; a species of greenstone of mixed brown and yellow containing a few scattered particles of philipsite copper and malachite; the same, or a variety nearly allied to it, with lamellated oligist iron (sesqui-oxyde) and spathic limestone; a singular aggregation of coarse quality, composed of portions of quartz mixed more or less with a white earthy feldspathic matter slightly tinged with the sesqui-oxyde of iron; this rock seemed to bear some traces of decomposition; several varieties of a reddishrock appearing to be an indurated clay, occasionally schistoid and sonorous like certain tripolis. Specimens of this rock yield regular crystals of decomposed feldspar scattered through them. Can this be a detritus of old red porphyry? The occurrence of crystals of feldspar of that form which they usually have in porphyries, inclines me to think so.

To the preceding minerals which enrich the neighbourhood of Mamainse, I shall add the different ores of the numerous concessions at this point, that is to say, blue and green carbonate of copper, mixed with earth; fibrous banded malachite, as beautiful and as susceptible as the analogous rock of Siberia, streaked copper (philipsite) in veins the sahlebandes of which a serpentine; native copper in branching masses imperfectly crystallised at the surface with a gangue of

Iceland spar in some specimens, and hyalin quartz in others.

Occasionally a little silver is found among the metallic copper. We shall add also among the ores, sulphuret of zinc (blend) with argentiferous galena,

sulphuret of barium, etc. The working of certain mines at Mamainse dates from a very remote period; it was carried on by the Indians before the conquest. A rounded mass of mimosite shaped like a hammer, which was found in one of the mines, was used no doubt by the primitive inhabitants to crush the ore. At Mica Bay the streaked copper ore and yellow pyrites are found in a gangue of hyaline quartz crystallised in groups radiating from different centres and terminating in apices. At the same place we have a spathic limestone charged with earthy malachite.

At Pointe aux Mines not far from, and north of Mica Bay, I observed a sort of reddish concrete, with a preponderance of quartz, a little mica and carbonate of

lime, mingled with which was native copper.

The rapids of the river Montreal fall upon a very remarkable rock of orthose feldspar, very spathic with a little crystalline quartz; this is in reality, a coarse pegmatite. In the same neighborhood a certain description of syenite contains a substance having all the appearance of epidote, and which takes the place of hornblende; this is an extraordinary circumstance. The island of Montreal is also formed of sandstone, similar to that of the Parisian Isle already mentioned.

To the north and a little east of this island, the promontory on the shore is a granite with its three usual elements perfectly distinct, affording a peculiarity worthy of notice, namely, that it contains two species of feldspar; orthose, flesh colored, and albytes of a greyish white color in tiers due to the hemitropoidal laminæ which are characteristic of this species. We shall see hereafter, what use I make of the nature of these feldspars, to ascertain the relative age of the rocks which are

termed crystalline.

The last mentioned granite passes gradually into pegmatite by the diminution

or complete disappearance of the mica.

To the east of this promontory the point of Agewan affords first a kind of trapp or mimosite of crystalline structure, which appears externally in steps. This rock traverses crystalline quartz.

Before arriving at Cape Gargantua, following the line of coast we perceive a large quantity of syenitic masses of rose-colored laminated orthose feldspar, a little

quartz and some greenish particles of amphibolic matter.

At Cape Gargantua exists also a system of trapp rocks in regular layers, sometimes cellular and dull, resembling certain basanites in the possession of Mr. Cordier; and at other times more compact, with green amygdaloid stones and numerous agates; in all these rocks native copper abounds.

The islets off the Cape are also formed of cellular trapp where the surface is exposed to the atmosphere, and shows a tendency to amygdaloid structure inter-

nally. They are dark and appear to be decomposed.

One of the islets off Cape Gargantua also yields a black trapp, of which some specimens contain whitish crystalline particles, resembling internally the muscle of

the black schists of Brittany.

Between Gargantua and Cape Choyé again appear in places the same perfect granites and pegmatites which we have already noticed as existing at the promontory on the shore opposite the north side of the island of Montreal; we then find them all along the coast from Cape Choyé to the neighborhood of Michipicoten river.

Beyond Cape Choyé at Pointe Brulée there is a conglomerate of orthose and quartz; and on another point a rough concrete of hyaline quartz and spathic lime-

stone sprinkled with yellow copper pyrites.

To the north of Michipicoten river I traced a phylladian rock perfectly well-marked, more or less glossy according to the quantity of tale, of a greenish grey, very schistoid, and crossed at different points by small veins of crystalline quartz.

From Michipicoten harbor, following a direction along the coast at nearly an acute angle with the preceding direction, we find another variety of schistoid rock

a deep green talschist, very silicious in some places, containing some pieces of extraneous stone and shewing a few small veins of copper pyrites. Following a similar direction to the west of Michipicoten harbor, we observe a magnificent specimen of schistoid amphibolite, in which deep green fibro-lamellar hornblende is most strongly marked. The shore to the north-east and north of Michipicoten island shows a great quantity of mimosite.

To the north of the same island, pegmatites of rose-colored feldspar are very abundant, passing into syenite by a small quantity of amphibolic matter, moreover a very fine-grained granite showing a tendency to a laminated structure, and in some places passing into pegmatites, and especially into the kind above mentioned. Further on to the west along the coast at Rivulet, we meet with the most strongly marked trapp which we have hitherto encountered; at the same place we find

mimosite.

At Rivulet also begins a fine description of syenite, which is again met with at different points along the shore, and again, on a long stretch of beach to the north of Pic Island; reddish orthose feldspar very bright, deep green hornblende with the usual characteristics, with a little or no quartz, this rock becomes a diorite. At this place we may obtain very curious specimens which retain the substance of trapp on two parallel surfaces.

But we have now arrived at that portion of the coast which is opposite the north of the Island of Michipicoten, and have even gone a little to the west of it. We shall for a short time leave this direction, and proceed to Michipicoten Island

itself, which on every account deserves special consideration.

Michipicoten Island.—This island is so situated that a line drawn from the south-east of Mamainse, through the eastern extremity of this island would by its other extremity infringe upon the north-west of Otter Head. Its geological nature also resembles that of the two extreme points which we have just mentioned.

We shall particularly notice in this island, which we have specially studied, the following principal groups of mineral substances: amygdaloid trapp, agates, native copper, sandstone and conglomerate. We shall rapidly give some particulars concerning each of these, beginning with the last mentioned.

The conglomerate at Michipicoten is a very remarkable stone, which attracted our notice by its external appearance and its singular nature, which we had some

difficulty, at the first attempt, in determining.

It presents all the characters of a rock aggregated on a base imperfectly crystalline, of a dull fracture, reddish color, sprinkled with small green spots, and apparently syenitic. We see pebbles or rounded boulders of sizes varying from that of the fist to that of a pea or hazelnut and of the same composition as the base. This stone seems to possess all the properties of a conglomerate, that is to say, of a mass which we suppose to have been aggregated together by the water and derived originally from a syenitic porphyry or from syenite itself. It contains a sprinkling of sulphuret of copper and in some places malachite; metallic copper cannot be distinguished in it. Therefore, it cannot be of the same age as the sandstones which we are about to mention.

The sandstones in Michipicoten Island are composed of a large proportion of grains of quartz, and of a smaller quantity of red feldspathic particles, the whole colored with sesqui-oxyde of iron and impregnated with metallic copper.

The trapps offer for examination different varieties of structure and compactness. They pass gradually into the amygdaloid structure. The amygdaloid stones are even more various than the trapps properly so called; a base of different colors, dirty red, greyish, greenish, brown, etc.; compact or earthy texture in different degrees, round cells or cavities or prolonged oval openings, etc. The substances which fill up these cavities are very numerous; hyaline quartz in small bi-pyramidal crystals, stilbite in course of decomposition, red heulandite, laumonite, epidote, a green

substance peculiar to this variety of stone, Iceland spar, silica in different states, principally as agate. Of the latter alone there are numerous varieties, chalcedony, cornelian, agate of an amethystine color, banded agate, and geodes of agate with hyaline quartz in the centre, or crystals of amethyst, clouded or colorless, &c. The substance of the agate sometimes envelopes in a very curious manner rhombohedra of Iceland spar as large as the thumb. I have also found in amydaloid rocks a black jasper with a slightly resinous or Sydian fracture, a blood-red jasper, another variety of the same rock of a deep uniform green, which would yield a stone susceptible of a magnificent polish.

In the amygdaloid rocks, but external to the rounded cavities properly so called, I observed considerable quantities of Iceland spar equally distributed either in veins or in irregular masses, a fine variety of analcime in very well-defined trapesoidal crystals aggregated and united by a ferruginous band; the facets of these crystals are rather rough, have no brilliancy and seem to have undergone slight decomposition; specimens of well crystallised mesotype in four sided prisms terminated by quadrangular pyramids of a reddish color, like the preceding variety; green epidote or veins of limestone; a fine concrete prennite tuberculated externally, fibrous and often radiated internally, of the clear green color, for which it is well known, associated in some specimens to laminated apophyllite; numerous other varieties

the nature of which is not yet well determined.

Finally, the mineral of the greatest importance, with respect to utility, is the native copper which is embedded in the amygdaloid rocks; it takes all the forms of the cavities in the stone which contains it, and is usually more abundant when the amygdaloid rock is charged more or less with a soft green substance of a serpentine appearance. We also find it sometimes in a very compact variety of rock speckled with red, brown and green, containing much line when it is found scattered in a ramified form with pointed apices, and of a blackish color. Does it then contain silver? This last mentioned metal is not uncommon on the island, we have, in a manner leaving no cause for doubt, proved its existence in a gangue of red jasper and limestone. Let us now return to the spot which we left a short time ago on the line of coast to the north of Rivulet.

The portion of coast between Pic River and Otter Head is composed of an aggregation of granitic rocks; granite properly so called with an enormous amount of quartz and orthose feldspar, but very little mica, very feldspathic pegmatite of a rose-color crossed by white veins of crystalline quartz; syenite similarly charged with much feldspar and containing very little quartz; this latter mineral also in veins with epidote scattered through it. To the north of Pic River I found tale and asbestos accompanied by a vein of quartz.

The rocks to the north of Peninsula Harbour are of syenite. Pic Island is

formed of masses of the same nature.

L'Anse a la Bouteille, north-east from Slate Island, and opposite to it, possesses a formation of mica-schist very much laminated and micaceous. At the same place

I obtained a curious specimen of asbestos from a quartz chlorite.

More to the north of Slate Island a rock of greenstone is crossed by veins of spathic limestone and is sprinkled with yellow copper pyrites. The specimens are moreover encrusted with serpentine matter. Would not this be a good distinctive character in rocks of a blackish green or black, of a purely crystalline or perfectly compact structure, which show themselves so commonly along the coast which we have hitherto passed over; would not this character, we say, serve well to distinguish those of a pyroxenic composition from others which constitute amphibole? The serpentine matter seems to us to be generally associated with the latter, as well as the yellow copper pyrites, while both substances appear to us totally absent when under different ciacumstances we found a pyroxenic base.

This character might be added to that of the nature of feldspar to separate the two substances, amphibole and pyroxene, otherwise so difficult to be distinguish-

ed one from another as we have already seen.

The Ecrits to the north of Slate Island, are formed of pegmatite rose-colored

feldspar in large laminæ and a little quartz.

Slate Island is remarkable for its white talschist, rather glossy, much laminated and sprinkled with a quantity of brownish amorphous particles with a dull fracture, which seem to be decomposed garnets. In the same island there is a very hard amorphous rock of a pistachio green, which may be called compact epidote.

Lastly, I obtained a very extraordinary stone of a blackish color, with resinoid fracture mixed with small lamellated crystalline pieces of a vitreous fracture, probably a species of feldspar, the nature of which it would be very interesting to deter-

mine in order to decide the relative age of the rock.

Taken as a whole, it is precisely similar to that which French authors designate as stigmite, and which slightly resembles obsidian and retinite. We now reach a number of islands and islets situated on the north-east of the lake, and which give so decided a character to this part of the country. The islands are arranged in a line slightly curved toward the island of St. Ignace, the principal among them as regards size; from thence the direction is obviously from the north-east to the south-west. One of these islands towards the eastern extremity of the group, and due east from St. Ignace, and containing in its centre the concession of McGill, is formed of slightly amygdaloid trapp, and on the south shore in the same concession, we find a decomposing columnar or basaltic trapp as it is called. An analogous rock of similar shape exists at the north-east extremity of Royal Island.

At some distance from the trapp in the same concession, there is a deposit of a combustible material, of which the nature is frequently very resinous, and the fracture and external appearance like that of anthracite; however, the mineral is duller and more amorphous at other points and is in contact with the trapp.

In the island of St. Ignace we find a great variety of rocks; mimosite in crystalline grains in the neighborhood of trapp; syenite in contact with the same rocks; reddish dull quartzose porphyry in different stages of decomposition; one description of rock, of amorphous texture, incompletely compact, of a reddish color, mingled with schistoid masses in some places, and little fragments evidently rolled round in others, which would seem to have been a sort of porphyritic detritus perhaps, conjoined with the decomposed porphyry already mentioned and having undergone decomposition at a later period. Some islets near St. Ignace are of a compact greenstone.

Hopkins' Island is composed of decomposed porphyry, much resembling the rock which French geologists call argilophyr. One of the isles at the end of the group, that which bears the name of Derbyshire (the concession) is also one of the most interesting on account of its geological nature. We observe here amygdaloid rocks, basaltic trapp, other trapps interposed between limestone and reddish rocks, which divide into thin resonant slabs, and being very analagous to the red dull sub-compact rock which we have already noticed at St. Ignace; but they are much more fissile. At other points on the same island (Derbyshire) the previously mentioned less laminated red rock resembles much more that of St. Ignace. At Roche de Bout, near Agate Harbour, south-west from the island of St. Ignace, I shall notice a very remarkable mass of a bright red, with a petro-silicious base and slightly resinoid and concoidal fracture, containing particles of hyaline quartz and of vitreous lamillated feldspar scattered through it. This rock has a porphyroid appearance. It is crossed at certain points by irregular bands of grey quartzose petro-silex, and shows itself sometimes penetrated by balls of the same petro-silex, rough externally and easily detached from the gangue. It reminds us to a certain degree of the variety of porphyroid rock, with equally rounded nodules which the French call pyromeride and which is found in the island of Corsica. The balls here are not boulders, that is to say stones which we suppose to have been rounded by the motion communicated to them by water; it is a simple chance consolidation, which, up to a certain point, has been controlled by the law of retraction when the rock, still in the plastic

state, gradually hardened and became solid or reached a peculiar condition in the process of the re-decomposition of the rocks, concerning which but little is yet known.

Finally, in some of the more remote islands, I noticed a green chloritic rock, which was of compact texture, veined with yellow copper pyrites, and spathic limestone. Here we take leave of the islands, to proceed in our rapid exploration of the lake shore, taking the direction of Cape Thunder.

The mountainous range which runs along the east side of Thunder Bay is crowned with white sandstone containing particles of pure quartz slightly feldspathic. The northern side of this bay afforded a collection of rocks difficult to classify, among them a kind of conglomerate, having angular portions enveloped in a mass the components of which are so strongly amalgamated, that it is hard to separate so as to distinguish them. The composition of this rock seems to be principally feldspathic.

On the same line of coast I visited several concessions, and found the follow-

ing minerals chiefly:

Lamellated blende in a gangue of quartz in crystals which also contains angular portions of trapp. The same metallic sulphuret with a little galena in a crystalized hyalin quartz of various colors, chiefly amethyst, and here again angular fragments of trapp embedded in the mass. At certain points of this mineral district, we pick up magnificent clusters of crystals of amethyst hyalin quartz, and I broke off large specimens in which we have the singular phenomenon of great angular fragments of syenite, trapp, petro-silex, &c., in a gangue of hyalin quartz in beautiful crystals of several varieties.

At the Falls of Kaministiquia, westerly from Fort William, we first fall in with a very singular rock, of which we had at first some difficulty in determining the character. Black or of a deep brown, hard, so fissile as to yield laminæ of no more than a few millimètres in thickness, it is occasionally divisible into pseudo-regular solids of a variable number of sides, similar to the prismatoids of basalt. The composition of the rock seemed to bear some resemblance to that of trapp, but a question arose,—is the cementing crust a detritus of trapp, or did the substance of the trapp, expanding at the time of its formation, acquire this laminated structure? I am unable at present to answer this with any certainty. Occasionally it contains bands of silex. I traced it from the Falls of Kaministiquia along the north-west side of Thunder Bay, from whence it runs away in a north-easterly direction.

Among the rocks of which the coast from Kaministiquia to Pigeon River particularly consists, I remarked a green stone with some serpentine matter sprinkled with yellow copper pyrites. At one point I found an eurite of a very uniform texture, and here my tour of exploration was to close, for beyond this, learned geologists of the northern States have gone before us, with sedulous zeal of investigation. In the course of this journey, a long one, if measured by the distance travelled over, too short if we consider the difficulties of all sorts attending it, I have not done more than catch the general features of the region. By the force of facts collected, however, the landmarks which I have planted at intervals, and the verification of mineral substances on the spot, as here described, I have now succeeded in establishing, at least generally, the geological constitution of the country.

#### STRUCTURE AND ORIGIN OF THE MASSES.

Throughout the whole length of the Canadian shore of Lake Superior the external aspect of the land is more varied, and the structure of the mineral masses more complex than on the American side.

In the first place, looking at the external form and outline of the country, we find it intersected by several distinct chains. In the North-West we have one which takes a direction North 5°, 10° East; in the North-East we have two principal chains, one running North-East and South-East, two from North-East to South-The latter off Michipicoten on the eastern side takes a direction East 5 ° North, and subsequently returns to North-East. This chain afterwards becomes bi-furcated; one branch running to Michipicoten the other to Kewenaw Point. This is likewise the case with the former chain which divides and furnishes a branch parallel with the River Ottawa. With respect to the internal structure of the masses, we rarely find those beds or strata of aqueous formation, the regularity, uniformity, and continuity of which over large tracts, the position and the fossils render the explanation of them so simple and so easy. The rocks which present this structure and which may have been deposited by water, appear merely exceptional, in narrow isolated strips in the region before us. In the island of Michipicoten and at other points they are conglomerates. Sandstone is found in the island, towards the southern extremity of the eastern shore, along Thunder Bay, &c. To these stratified masses we might add the schists, or to speak more properly those reddish rocks of schistoid structure which appear at different points particularly westward from the Lake, and in some of the northern islands, St. Ignace, Derbishire, &c.; but those rocks bear deep traces of decomposition, and although in structure they are like the usual residua of water, their composition does not indicate precisely that kind of origin.

The greater part of the mineral masses lying to the west, north and east of the great Lake present accidents of form and position differing entirely from those of the preceding; there is no trace of stratification, in the exact sense of that term. Their forms are rounded or pointed, whether entire or divided, without regular internal divisions, varying as they succeed each other. Their mineral composition differs widely from that of watery deposits, consisting almost entirely of the silicates, (feldspar, amphibole, pyroxene, mica, &c.) They are frequently traversed by narrow bands, differing in nature from the rocks containing them. Those bands (threads, veins, or dykes, for by so many names are they designated, as the case may be) are generally at the middle or near the position of the metallic matter.

To introduce order into this chaos, in the face of so many various accidents the geologist depends almost entirely on his knowledge of the relative composition of the masses, of their relation to each other, and of the direction and dip of the bands which traverse them.

To recombine and re-arrange was a work of time and difficulty. Details of form and structure increased at every step. I have, however, endeavored to seize upon the most characteristic features of a system.

My views were particularly directed to a knowledge of the places abounding in the useful metals, those producing copper receiving a large share of my attention; in its native state, this metal is found exclusively on Lake Superior. It has been said to be found scattered through trapp, and even produced at the same time as that rock, but I have not found this altogether to be supported by facts. The veins of copper do, indeed, occasionally run side by side with the ridges of trapp, an arrangement which may have led to a conclusion that they are contemporaneous with it, but they frequently cut across such ridges at right angles. Beyond these we find but meagre traces of copper in the sandstones and conglomerates; it is more abundant, I confess, in the amygdaloids of trapp, but its presence in these is easily explained by the porous nature of the rock, and the immediate contact of the veins. I have thought moreover that the positions in which copper is found on the Canadian side of the Lake did not greatly differ from those yielding it on the southern shore. The position of the ore in various

7263*

parts of that region is perfectly well known, the workings much more numerous, of older date, and carried to greater depths and distances, have brought to light their minutest details, their productiveness, and their direction. Lately they have been described by experienced geologists, and more particularly by Mr. Rivet, a talented French Engineer, and professor in the Imperial School of the Mines at Paris. From his description we borrow a few details which will complete our information relative to the natural position of copper in our country, a position which does not greatly differ I must again observe, from that of the same ore on the opposite shore.

"The layers of copper," says Mr. Rivet, "at Point Kerwenaw and in Royal Island, exists in three conditions, at first different, but resulting from the same

" action.

"1st. In nearly vertical veins, evidently perpendicular to the direction of the ridges of trapp and the beds of conglomerate, crossing almost without de-

" viation these two strata and even the sandstones.

"2nd. In veins parallel to the ridges of trapp, either both in direction and inclination, or in direction only. The first are the veins of contact, interposed between ridges of a different nature, the second are real veins, nearly always accompanied by important veins penetrating between the ridges of the investing rock. They have hitherto not been explored, except in the trapp. They have never been sought for in the conglomerate, experience having proved that this stratum is not metalliferous."

Besides the research would be expensive, as it is mostly covered by alluvion. "3rd. Finally, the native copper is distributed in the ridges of a very porous amygdaloid; the richness of this bed is not great. The copper exists in it in quantity, only in the neighbourhood of the transverse veins or of the veins parallel to "the direction of the rocks."

Although I do not altogether adopt the views of M. Rivet, and the works carried on since his visit among us have furnished results not entirely in accordance with his assertions, nevertheless the description which he gives of the layers of copper to the south of Lake Superior is on the whole true, and is to a certain degree, equally applicable to analogous layers in the west, the north, and the east of the Canadian belt.

"The richness of the veins and the nature of their gangue," says moreover M. Rivet, "present an interesting connection with the rocks which they traverse. "In the conglomerates the veins have no sahlbande, and the gangue is nearly always white spathic limestone, milky, presenting well marked cleavages. "It is mixed with a little quartz."

"In the ridges of trapp the veins are also filled with spathic limestone, quartz, sulphuret of barium and chlorite; they show besides a peculiar circumstance which consists in the presence of angular masses of trapp of all sizes, and in that of different zeolites, especially prehnite, lanmonite, analcimes and epidote. The prehnite is most common. It is in mamillated crystals discributed in the geodes or neighbourhood of the copper; it is intimately mingled with quartz and feldspar, and forms a very hard compact gangue of a light green color, and which the miners consider as an indication of the richness of the ore.

"In the conglomerate the veins are generally single and well enclosed, their thickness varies from 0m.35 to 2m. in the trapp; on the contrary the lateral veins seem very common and are very often much separated from the principal vein; they have also the same description of filling in the corresponding bands. The thickness of the veins is very variable, exceeding 3m. in the wides and diminishing to 0m.15 or even 0m.10 in the narrowest parts; it is larger in the amygdaloids than in compact trapp, larger towards the north than towards the

"south. Its average bulk for the different veins would seem to range from 0m.25 to 0m.85. The veins sometimes contain a little silver as well as copper, the copper is found either native or in the state of ore such as copper pyrites, sultiplied in the state of ore such as copper pyrites, sultiplied in the state of ore such as copper pyrites, sultiplied in the sound alone in spathic limestone, but most frequently mixed with copper. These two metals are very firmly united, so that the copper may be worked cold without separating the silver, but they are never chemically combined; it is always a mixture, even so as to be discernible. Analysis does not show silver in those specimens of copper in which that metal is not clearly seen."

Now, it may be asked of me what was the source of all the rich concentrations of metal in the bosom of these rocks? You are already acquainted with my answer; I have already given it in my first report on the exploration of Lakes Superior and Huron; the primary source of all metals exists in the rocks which compose the solid crust of the earth; a powerful force selects them, separates them, disposes them according to certain settled rules; this power is electricity. It has acted energetically at different geological periods, it is still in action, and to its agency I attribute the formation of metalliferous veins and masses.

It is unnecessary for me to mention in this report all the laws according to which the rocks are decomposed and recomposed, since, when on the subject of the metallic formations which exist in different rocks, I have already described them in general terms in my previous reports. My opinion rests on most decided facts, observed carefully not only in the region which has been the chief object of my researches, but also in all parts of the globe where the presence of ore has been proved; among these facts I shall mention in particular the intimate connection which usually unites metallic matter with the gangue of the veins and with the rock which surrounds it.

At Lake Superior the phenomenon is striking; I have verified it under many circumstances, but it is not peculiar to this country; examples of the same connection have been noticed elsewhere.

"Often," says M. Burat in his treatise on the position and working of useful minerals, "the enclosing rock would seem to have exerted a considerable in"fluence on the composition of the veins. This influence seems to result from "two different sets of facts, the first purely mechanical, the second chemical."

In the first, may be classed the specimens of the veins of Galena in Derbyshire crossing at once the metalliferous limestones, the sandstones and the trapp rocks, which are interposed between the layers so as to present a repeated alternation; the veins large and rich in the limestone are shrunken, poor, and often altogether arrested in the sandstone and the trapps. At Andreasburgh it has frequently been remarked that the veins were richer and larger in the schists than in the Kieselschiefer. At Kronsburgh in Norway, the narrow veins traversing a gangue of spathic limestone into a layer of amphibolic micaceous gneiss, and some of the schistoid layers are penetrated by copper pyrites, galenic and blendic pyrites; these are termed Fahlbandes. It is only when they cross these fahlbandes that the veins contain sulphuret of silver and native silver, crystalised or filiform, and accompanied by pyrites and pyritic copper. This law of arrangement was proved to the depth of 565 metres.

Certain veins in Saxony and Bohemia, crossing the schistoid layers and porphyric masses are enriched in these last rocks whilst they are unproductive in the schist, without however, any change in their volume. Usually we observe different circumstances, such as the close adhesion of the vein to the rock which enriches it, and the facility with which this rock is penetrable by metallic substances, which would lead us to think that there must be a real affinity between it and the metallic ores; some veins at Joachims seem to demonstrate this affinity.

Elsewhere the author says, "We see that there are in metalliferous districts,

"certain general rules which guide us in the search after the richer portions of veinse." To these general facts based on the promise of the veins and the nature of the ence closing rocks we may add others, founded on the variation of the gangues and the relation which exists between certain of them and the ores.

"In nearly all the localities containing veins, there is an affinity of one par "ticular gangue for one particular ore, and expulsion for others. The result is, "that gangues such as hyaline quartz or chalcedony, sulphuret of barium and fluor "spar, will, in certain cases, be valuable indications to aid in the search for ore. "In other cases, an ore will serve as a gangue for another of greater value; an oxide "or carbonate of iron will accompany ores of copper." From these learned observations by M. Burat, we will lay aside certain deductions which would not agree with the theory published in my last report for the year 1856, and merely retain the facts; these are well established, and prove clearly that there is a close connection between the nature of the contents of the vein and the surrounding rock. these metallic substances came from the centre of the earth in a state of fusion, and were sent from below upwards to occupy their present position as has been alleged, why should they have shown such a decided preference for any particular rock. through which they passed? On the contrary in my theory, the principles of combination, being already disseminated through the rocks, naturally yield under the influence of electric action products generally allied to the mediums containing them.

It would have been of the greatest importance for me to be able to verify in a greater number of instances at Lake Superior, the affinity between the metallic matter and the rocks in which we find it concentrated; but 1 reserve this field of research for a more favorable occasion.

#### RELATIVE AGE OF DIFFERENT FORMATIONS.

The facts hitherto acquired concerning the geological nature of the Canadian shore of Lake Superior, and especially the observations which I have myself made, do not appear to me as yet sufficient to enable us to determine satisfactorily the different periods at which the different groups of mineral substances above described, were formed; all that I may say on this subject must, for the time, be considered hypothetical, and as such I shall make the following observations:

As we have seen while treating of their origin, the mineral masses which compose the northern shore, consist of two distinct groups; one the different parts of which evidently deposited by the waters, contain the fossil remains of organized life, or are regularly stratified; and these are represented around our great lakes by conglomerates, sandstone and limestone; the other group in which there is a total absence of fossil remains and in which the structure is more massive, and being composed of granite or other crystalline silicious rocks. The relative age of both could not be ascertained from the same characters. The geological era during which rocks of the first class were formed would be determined especially by the nature of the fossils which they might contain; but on the portion of the coast of Lake Superior which forms the subject of this report, fossiliferous deposits are rare, or indeed are altogether wanting at some points. If it be true, as has been alleged, that there is a connection of a mineralogical nature, of stratification, of direction, of dip, or even of continuation between the conglomerates and the sandstones which we have noticed at certain points of this region; for instance the coarse conglomer, ate of Michipicoten and the sandstones which constitute many of the islands towards the south-east extremity; if it is true we say that there is such a connection between those rocks on both shores, one necessarily partakes of the age of the other. The sandstone and conglomerates on the south or American side belong, it is said, to the lower Silurian period; the same rocks on the northern side would belong to the the same period, but the connection of which we have just spoken, has not been, to my knowledge satisfactorily proved; and moreover are we quite certain that the divisions on the south shore belong to the lower silurian period? We shall not hesitate to pronounce these divisions as of more modern date for reasons which we shall hereafter explain. With regard to the crystalline or azoic rocks (which are most strongly developed on the Canadian shore) as fossil remains and position are both wanting as means to determine their age, we must have recourse to other means, namely, to the peculiar mineral composition of each formation.

Casting a glance on the comparative scale of silicious rocks disposed according to their supposed order of formation, it is not difficult to perceive that at the lower stages hyaline quartz predominates with feldspar and mica; higher in the series the mica disappears, the quartz predominates in relative quantity and amphibole begins to show itself; at the third and highest level the quartz has itself disappeared and the amphibole gives way to pyroxene. One mineral only can of itself present varieties of difference, according to the level it occupies. Let us take the feldspar as an example. In the lower divisions of the scale of earths it is exclusively orthose (with potassa for a base), it is the feldspar of granite; we know it by its more or less decided flesh-color; its specific gravity is less than that of other varieties of the same nature; its tendency to silex is comparatively very great. In the middle divisions the orthose feldspar of silicious rocks diminishes or disappears altogether to give place to albite (with soda for a base) generally of a white color, of rather greater specific gravity and easily distinguishable by the retreating angles of its crystals, which circumstance is owing to the nature of the transposition of its laming, to which mineralogists give the name of emitrophy.

The higher divisions in the scale of the age of the silicious rocks are marked by the appearance of two other varieties of feldspar, first the oligoclase and then labrador; in oligoclase, the specific gravity goes on increasing; the color is of a greenish grey; it is without lustre and has a less laminated fracture; the tendency

to silex is less than in the two other varieties.

In labrador the specific gravity is much greater than in any other variety of feldspar; the color is variable; we perceive fine strix on the laminæ of fracture; it is less silicious than oligoclase and is the most modern of any associated with pyroxene; it constitutes a great number of volcanic rocks, even of modern date. To recapitulate, we find differences in feldspar depending on the age, the specific gravity which goes on increasing according to the recency of its date; on its tendency to silex, which diminishes inversely in the same ratio; and on an aggregation of other general characteristics.

Let us now apply this very important characteristic of the relative age of the silicious rocks to the mineral masses of the same order, which constitute our Canadian shore. If we examine these masses with regard to their composition, we find among them three principal groups.

1st. The granite and the subordinate rocks of the same class; in this first group mica is one of the essential elements, hyaline quartz abounds, the feldspar is of the orthose species, therefore, this we may consider the most ancient group.

2nd. Syenite and the two rocks generally found associated with it, that is to say, diorite and greenstone; here the mica gives way to the hornblend, and the quartz has nearly altogether disappeared; and as to the feldspar, albite is joined to the orthose variety, and even sometimes becomes exclusive; these rocks, in our opinion, should occupy a middle position in the scale of relative periods.

3rd. Mimosite with the trapps and amygdaloid rocks. In this group on Lake Superior, pyroxene evidently predominates, although I have not yet been able to prove this by satisfactory specimens. The feldspar belongs to the oligoclase or labrador, more probably to the latter, as I have been enabled to prove by a well marked

specimen from one of the islands on the north side of the lake. The feldspar associated with pyroxene undoubtedly places the trapp rocks in the most modern period.

Now that we know the relative ages of these three groups of azoic stones, let us enquire what may be their connections with those of the group containing fossil remains. The pure granite, free from accidental substances which we have observed at different points, was certainly anterior in formation to the conglomerates and sandstones. The syenites and other amphibolic rocks, although later than the granite which they divide at various points, would, in reality, be a lower formation than the same (conglomerates and sand sandstones.) In fact, in the conglomerate at Michipicoten Island, we distinguish rounded portions of syenite or of syenitic porphyry, and the base itself contains amphibolic matter. As to the pyroxenic rocks (mimosites, trapps and amygdaloids) they cross both the preceding masses; they are, therefore, of more recent formation than the latter, whether judging by this circumstance or by their composition. Their first formation commenced, no doubt, with the mimosites anterior to the most ancient conglomerates; subsequently, the true trapps were formed; the bands of these latter rocks alternate in many places with the conglomerates. Thus then, we have come in the determination of the absolute age of the trapp rocks, to the question, what is positively that of the sandstones and conglomerates? Forming his opinion by the whole of the rocks which compose my collection at the Museum of Natural History at Paris, and from their great similarity to those of certain parts of the European continent, the illustrious professor of geology at the museum, M. Cordier, thinks that the pyroxenic masses of Lake Superior date from the latter part of the carboniferous period. We shall quote the letter which he did me the honor to write on this subject, verbatim.

"Paris, 5th February, 1857.

"SIR,—The beautiful specimens of rocks obtained from Lake Superior and the "neighbouring country, which you have been kind enough to present to the Museum " of Natural History of Paris, as pyroxenic porphyry in process of decomposition, and "cupriferous trapp are, 1st-Mimosite; 2nd-Pyroxenic porphyry; 3rd-Wackes, "in some cases imperfect, in other finble, in some hardened and amygdaloid, all "formed by the decomposition of .: s pyroxenic rocks Nos. 1 and 2. With the ex-"ception of the abundance of copper which they contain, and the accidental presence "of a little native silver, they are in the aggregate as in detail, identically similar "to those which constitute the great system of pyroxenic rocks of volcanic origin "either intact or changed into the state of wackes which occupy so large an extent "in the district of Oberstein, in the Palatinate, a system with which I am perfectly "well acquainted; I do not doubt that your rocks are of the same period. "the formation of the great pyroxenic system of Oberstein unquestionably coincides "with the end of the carboniferous period, properly so called, for, in the first place "the rocks belonging thereto are the transverse containing boundaries of the coal-"fields of the country; on the other hand, all these coal-fields or pyroxenic strata in "the Palatinate are frequently covered by transgressive superstrata of conglomerates. "(psefites, Rothetodte Liegende of the Germans) which are partly composed of their " dèbris. Finally, all your pyroxenic rocks from Lake Superior and the surround-"ing region, whether entire, decomposed, amygdaloid or cupriferous are, in all "probability, the ultimate products of the great anthraxiferous or carboniferous "period of every geologist.

"Accept, sir, the assurance of my most distinguished consideration.

#### MUSEUM OF NATURAL HISTORY.

Paris, 5th February, 1857.

"Sir,—The beautiful collections which the Museum of Natural History wows to your generosity are now classed in the laboratories of the establishment, and we begin to have a more certain knowledge of what you have been pleased to give us. The whole collection has, according to your desire, been divided into three separate collections. The first is composed of rocks of the primary and secondary formations of the northern shores of Lake Superior and Lake Huron in Upper Canada. The number of specimens of rocks is three hundred and fifty-nine. The second comprehends the organized fossil remains (animal) of eighty and odd specimens.

"The beautiful specimens of orthoceres or of omoceres which you have added to our very rich collection of fossil cephalopods will complete the zoological chain of this very interesting class of mollusca, to which the researches of Messieurs De Verneuil, Agassiz, Hall, Froost and others have already added so many links. You have also enriched us with several terebratules or brachiopods which we required, and we must say the same of the crinoides.

"Finally, the third portion of your collection is formed of specimens of the indigenous woods of those northern regions, which have the rare merit among

"this class of collections of being well labelled.

"Accept, Sir, with the expression of our thanks that of our most distinguished consideration,

"The Professors, Managers of the Museum.

"FLORENZ,

" Manager.

" JOS. DÉCAINZ,

" Secretary.

" A. DE BRONGNIART,

"Treasurer.

"Another relic from Lake Huron showed us the lower phryngeals of some labroides, of which the fresh water lakes of America contain several species."

"A. VALENCIENNES."

Among the magnificent collection of specimens exposed to public view and arranged according to their age in the geological gallery of the Museum of Paris, M. Cordier has indeed classed the products of Lake Superior of which he had already received some specimens before ours, with the specimens of Oberstein and other places of similar geological composition in the carboniferous stage of the anthraxiferous period, and indeed, seeing these specimens thus placed in op position, it is impossible not to perceive the great analogy which there is between them—an analogy which shows a common origin. If my own observations had been more profound, I would here venture to make some remarks on the carbonaceous combustible found associated with trapp in the McGill concession, a combustible which presents in some specimens much analogy to real coal; would it not prove also that the age of the system is cocval with that of the coal formation; on another hand, does not the deposit of coal which I discovered at Quebec, the true origin of which can now be no longer doubtful, as I shall show hereafter, seem to establish a similar connection?

A SOLIT OF THE SE

If at a future period we obtain the necessary means to continue our researches, to examine the facts in their more minute details, and to verify upon the spot the relations of the different masses, we hope to be able one day to settle satisfactorily this difficult question.

#### LAKE HURON.

The general observations which we have made concerning Lake Superior, and the general conclusions which we have drawn from them concerning the origin and age of the great mineral masses of that region, are to a certain degree equally applicable to Lake Huron; the differences are simply in the details; a rapid journey along the north-east and north shore of this lake will easily make us acquainted with them.

For Lake Huron also we leave the south-east extremity of the Canadian shore, Penetanguishene Harbor, to finish our journey at the opposite extremity, at

Sault Ste. Marie.

One of the islets to the west of Robert's Bay is composed of syenite of schistoid structure; going westward, we meet the same rock, but now crossed by veins of feldspar several centimetres in thickness. At other points they are of white quartz, and further on, but still in the same direction, the syenite rock regains its massive structure, to the exclusion of any sign of laminated division.

Opposite the Giant islands I observed the same syenite rocks crossed in dif-

ferent directions by veins of quartz several decimètres in thickness.

Moose Deer Point furnishes also numerous instances of veins of feldspar in

granitoid rocks.

The same phenomenon of structure occurs at Sandy Islands; the rocks here run from east to west, with an inclination to the north, and the veins of feldspar have evidently a north-easterly direction.

At the Indian Isles a rock of amphibolic and schistoid structure is crossed by

numerous veins which run northward.

Bustard Island (*Ile aux Outardes*) is also syenitic. Near the mouth of French River the rocks lose their schistoid position, and now appear only in the massive state.

The *Pointe de Grondine* is composed of quartziferous syenite traversed by veins running from east to west; the mass itself runs north and south; the veins are of the same rocks, but of finer texture.

Near Philip Edward Island 1 found porphyric rock with jasper and bands of petro-silex.

Opposite Badgley Island there is a fossiliferous limestone, and before Fort Chibonang syenite again makes its appearance.

The middle part of Bell Island is limestone.

At Amédroz Island I likewise discovered the fossiliferous limestone, but more silicious than elsewhere, and with the fossil remains more decomposed.

Portlock Harbor is composed of trapps running north-west and south-east; and at at a short distance from the shore we observe a greyish white limestone of finely grained texture traversed by parallel bands of blackish silex. This causes it to present a striped appearance.

In the southern part of the Bear Camp, to the north of St. Joseph's Island, a white pure sandstone predominates with lumps of feldspar in a state of complete decomposition; this sandstone is stratified in horizontal layers.

At the north of George Island syenite is again visible.

Lake George presents at different points on its shores a pudding-stone, chiefly

composed of different varieties of quartz.

Independent of this chain of islets, over which we have so rapidly passed along the Canadian shore of the lake, I should mention the constitution of the great islands situated further from the shore, which present fossiliferous limestone regularly stratified. I shall notice chiefly Bedford, Amédroz, Serpent, Bigsby, Sulphur and Tessalon, and the great islands Manitoulin, Barrée, Cockburn, Drummond and St. Joseph. On several of these islands I collected a great number of fossils; my collection transported to Paris and presented to the Museum of Natural History, has been examined by different paleontologists, of whom some are authorities in the science. I shall mention in particular Messrs. Vernueil, Barrande and others. According to these two eminent geologists, the fossils of Lake Huron belong to the upper Silurian period. One of the islands furnished me with a new description of orthocere, of a remarkable nature, which M. Barrande was pleased to dedicate to me under the name of Orthoceres Rottermundii, at the general meeting of the Geological Society of France, which mark of respect was sanctioned by all the members of the Geological Society. One of these fossils is also in the possession of Sir Roderick Murchison, to whom I sent a specimen.

I discovered also at Owen Sound, at the eastern extremity of the lake, some fossil remains of fish, among which M. Valenciennes, Professor at the Museum of Natural History at Paris, recognized the lower pharyngeals of some Labroides or Chionis, of which the fresh waters of South America contain several species. Not far from the position of these fossils, there is a large surface covered with semi-solid bitumen, of which neither the extent nor the depth is exactly known. Several

workings have been established here.

The limestone is of a clear grey color, slightly argillaceous, compact, subgrained in some places, spathic in others, sometimes irregularly crystallized in its cavities, but nearly always literally composed of organic remains, among which may be distinguished many polypi. On some of the isles or islets nearer the shore, the limestone is sometimes found in contact with crystalline rocks; I found an instance of this to the west of the Indian Reserve No. 7, nearly opposite the middle of the north shore of the lake. One of the islands to the south of Spanish Islands, shows a similar arrangment; the limestone is traversed by dioritic veins. At George Island the same rock is traversed by porphyritic syenite.

The ores with which we meet at different points along the coast which we have just passed over, are numerous, especially towards the western extremity; we shall make particular mention of the rich workings at the Bruce and Wellington mines.

These are principally ores of copper, and particularly sulphurets of that metal, (philipsite, yellow pyrites, &c..) whereas, at Lake Superior, the native copper pre-

dominates with but few exceptions.

The decomposition of the rocks which gave origin to the metals on Lake Huron, has been rather horizontal than perpendicular to the surface of the earth; and generally the richness of the ore is in proportion to the amount of serpentine matter. The rocks which usually contain the ore are amphibolic in different stages of decomposition. The sulphurets are usually accompanied in the veins by quartz or iceland spar. At the north-east extremity of the lake, there exists a deposit of crystalline graphite, associated with spathic limestone.

#### LOWER CANADA.

I shall notice a mine of hydrated iron at Three Rivers near St. Maurice, which seems likely to yield a rich and excellent product; the ore is in slightly allular masses; it has a peculiar resinoid fracture which indicates the presence of a little

phosphorus. It is well known that this element combined with iron in small quantities, communicates to it in a remarkable degree the properties of ductility and malleability; in other words it produces what is called a soft iron. Limited time and an advanced season did not permit me to make observations with a view to a report of any length. It is necessary, as for every other object, to allow a sufficient time according to the importance of the spot; but I must here mention a fact of the greatest importance to the country.

It is the fossils on the Ottawa and near Quebec. The banks of the Ottawa possess some fossil remains, among which are those of a fish which M. Valenciennes has described under the name of *Mallotus Villasus*. It is the capelin of the French fishermen of Newfoundland, used by them for bait. Consequently the age of the

deposit where these fossil remains were found is comparatively modern.

Finally, I have again carefully studied the stratum of fossil carbonaceous combustible at Quebec, which I had announced and described in another report to the Corporation of Quebec, and which I considered as real coal both on account of its physical and chemical properties, and also of the period to which it belongs. A well known geologist disputed my opinion, called the substance by the name of hardened bitumen. (Vide the report of Gelogical exploration of 1854, and the sketch of the Geology of Canada addressed to the Geological Society of France, and published in the journals of the Society at Paris on the 7th May, 1855.)

Several specimens which I carried to Europe on my last trip, were submitted to the examination of the most competent savants. They have not the slightest doubt that the combustible in question is indeed coal, both physically and chemically

speaking, and that its formation dates from the carboniferous period.

I shall quote verbatim the decision of M. Charles D'Orbigny, a distinguished geologist, attached to the Geological Cabinet of the Museum of Natural History at Paris, and a member of the Geological Society of France.

This distinguished Professor was good enough to send me in writing his opinion

of the true specific character of this combustible, considered as a mineral.

Here is his letter:

"Sm,—In the collection of rocks and minerals which you have been good "enough to present to the Museum, is a specimen of combustible matter from Quebec, the nature of which you and the Hon. Mr. Drummond requested me to determine with precision.

"After examination I recognised this specimen to be hungry coal (honille "maigre) with impressions of stigmaria, which are perfectly characteristic of the

"coal fields.

"Yours, &c.

"CHS. D'ORBIGNY."

Paris, 25th February, 1857.

"Sir,—M. Brongniart has sent me a little note, which I enclose to you, writ"ten by himself for the determination of the fossil plant of coal, that is to say the
"stigmaria, a fossil very closely related to the sigillaria, so closely connected that
botanists regard the vegetable which I have just mentioned as the root of the
"sigillaria.

"I am, sir,

"Your obd't serv't,

"Member of the Institute and Professor of the Museum of Natural History

"at Paris, Jardin des Plantes."

Moreover, M. Adolphe de Brongniard, Professor at the Museum and member of the Institute of France, and the most illustrious botanist of the day for fossil vegetables, clearly saw in some of my specimens, impressions which he affirms to be those of the stigmaria, a species which characterises the fauna of the coal fields. insert also here, verbatim, this decision in his own hand:

"Stigmaria Ficoides .- These specimens certainly belong to this species char-

"acteristic of the coal fields.

" (Signed.) A. de BRONGNIARD."

Thus there cannot possibly be any further doubt as to the characters of these specimens. We shall be called at a future period, perhaps not very far distant, to extract from our own soil the combustible which we now obtain at great expense from foreign countries.

The importance of such a product would be incalculable.

It must have been already perceived by my report, that I have been to Paris with a collection of specimens, collected and found by myself during my explorations. But I think it right to mention that this vogage to Europe was undertaken for my personal satisfaction and at my own expense, with the consent of the Commissioner of Crown Lands for the time being.

I have also considered that it would be interesting to the public to hear, on certain disputed points, the opinion of those who hold high scientific positions and

whose decisions are not to be contemned.

I have the honor to be, sir,

Your obedient servant,

E. S. ROTTERMUND, Inspector of Mines for the Department of Crown Lands.

Toronto, 30th April, 1857.

TORONTO:
PRINTED BY JOHN LOVELL, CORNER OF YONGE AND MELINDA STREETS.

## RETURN

In pursuance of a Resolution of the Honorable the Legislative Assembly of the financial affairs of the Ontario, Simcoe and Huron Railway Company, shewing,—

1st. Their obligations or debts to the Government, with the several payments they have made on account of interest, &c.

2nd. A Schedule of the Company's funded debts to parties other than the Government, and stating whether any interest is due, &c.

3rd. A Schedule of the Company's debts other than the above, &c.

4th. A list of the Shareholders' names, places of abode, &c.

5th. An account of moneys, &c., paid Presidents, Directors, &c.

6th. Company's Income for 1855 and 1856, &c.

7th. An account of Contracts for Steamers on Lake Huron, &c.

8th. Transactions of the Company for the year ending 30th June, 1856.

GEO. BEATTY,

Secretary.

Dated Toronto, July, 1856.

#### 1st. GOVERNMENT GUARANTEE.

The Company stands indebted to the Government, for and on account of the guarantee of the Province, in the sum of £475,000 sterling.

For this amount the Province has a first charge on the road by virtue of the Guarantee Act, and as a further security, the Company have executed bonds and mortgages to the Province upon "the whole of the Company's line of Railway "from the City of Toronto to Collingwood Harbor on Lake Hu ron, and all the "ground belonging to the said Company, enclosed or to be enclosed, and lying "between the said termini, together with all the station-houses, wharves, store-"houses, engine-houses and other buildings thereon erected."

The interest on the £475,000 sterling of guarantee was regularly paid prior to the 1st day of January, 1856. The total of interest paid by the Company, including the charge for commission, is £47,924 10s. currency.

Since the 1st January, 1856, the Company has made default.

The Company cannot furnish the dates or amounts of each of the Provincial Debentures issued for their advantage, as the Government Debentures were issued and transmitted direct from the Government to the Provincial Agents in London, nor can the Company state the amount of interest advanced by the Government on their behalf, or to whom paid.

The names of the Sharcholders, with their places of abode, &c. &c. &c., is set out in the Schedule annexed, marked A.

#### 5TH. PRESIDENTS AND DIRECTORS.

The amounts paid to Presidents since 1851 are as follows:

Unadjusted claims .....

Mr. Boulton to June, 1852, £200, viz.: £170 in money, and £29 10s. in stock. Mr. Berczy to December, 1852, £200, viz.: £148 10s. in money, and £51 10s. in stock. Mr. Morrison from December, 1852, to July, 1856, was voted in all £3,000, of which he received £1571 in money, £332 10s. in stock, and there remains still unpaid £1096 10s.

The total amount paid to Directors for attendance at board meetings, &c., from the beginning to the present time, amounts to £2113 19s., of which amount £1549 14s. was paid in money and £554 5s. in stock.

This is exclusive of the amount paid Mr. Capreol, viz.: £11,152.

#### 6th. income,

Amounts received during the year ending 1st July, 1855, Passengers	£25,613 17 4 27,606 0 10
	£53,219 18 2
Amounts received during the year ending 1st July, 1856,—Passengers	£35,271 17 '9 37,122 13 '9
	£72,394 11 6
Increase	£19,174 18 4

The foregoing only includes the local traffic of the line. The lake business is noted below.

The income for the next twelve months is estimated at an advance of 75 per cent. on the previous year.

#### 7TH. STEAMBOAT CONTRACTS.

The Company, with a view of developing the business of the line, entered into contracts in 1855 for a tri-weekly line of large steamers from Collingwood to Lake Michigan Ports, and a weekly line to Green Bay; the charter money for five first class steamers amounted to £21,750.

The amount paid on account of the business for that year, 1855, was £120,698 2s. 1d., and the amount received on account of the same was £92,374 12s. 5d., shewing a loss of £28,323 9s. 8d. For this year, 1856, the contract for similar service amounts only to the sum of £6,250, and for 1857 it is confidently expected the service will be performed without any charge to the Company.

RETURN OF THE TRANSACTIONS OF THE ONTARIO, SIMCOE AND HURON RAIL-ROAD FOR YEAR ENDING 30TH JUNE, 1856.

Length of Road open	94 miles.
"Branches owned by Company, laid	1.5 "
" Double track,	3.6 "

## PORT DALHOUSIE AND THOROLD RAILWAY.

(Copy.)-No. 1.

STATEMENT of the AFFAIRS of the PORT DALHOUSIE and THOROLD RAILWAY COMPANY, on the 21st day of March, 1855, prepared in compliance to a circular of the 1st instant, of the Clerk of the Legislative Assembly.

This Company was incorporated under a special Act, 14 &	£	· s.	d.	£	s.	d.
15 Vic. cap. 51, with a capital of Seventy-five thousand pounds (£75,000). The amount of Stock subscribed on the			* , 2		ir.	
Stock Book is 1,092 shares, £25 each, £27,300, on which there had been paid up to the present moment	1			18825		0
The outlay has been as follows, viz.:— To Engineers Department	654	9	2	10020

do Superstructure, including 583 tons of Railway Iron do Incidental Expenses	8244 446	14	4 <del>1</del> 0		A 12,	1 115
Balance on hand			·	15227	19	91
Dalance on namu	,•••••	••••	£	3597	0	21

With the above expenditure the Company have graded the whole of their line from Port Dalhousie to St. Catharines, which is now ready for the superstructure, and a contract has been entered into to complete the remaining portion between St. Catharines and the Thorold Station on the Great Western Railway.

The Railway Iron already purchased and delivered is sufficient for the entire line up to the Thorold Station, and the Directors are in hopes of placing this section in running order during the coming summer.

(Signed,) GEO. RYKERT

## REPORT.

The Select Committee to whom was referred the investigation into the affairs and position of the Woodstock and Lake Eric Railway and Harbor Company, especially with reference to certain alleged bribes given to certain of the late Directors by certain of the present Directors of the said Company, to the great loss and injury of the Municipalities interested in the said Railway, beg leave to report:

That they have carefully examined the evidence taken before them relative to the subject matters of the said reference, from which they find that the original Act of Incorporation of the said Company was passed in the year 1847, but remained dormant until 1852, when efforts began to be made by the then Directors professedly to give effect to the provisions of the said Act, to obtain further time for the commencement of the works, and to enable the said Company to continue their road from Simcoe or Port Dover, in the County of

Norfolk, to Dunville, in the County of Haldimand.

That in October of the latter mentioned year, by a Report then made to the Stockholders, signed by the President and Secretary of the Company, (a copy of which is hereunto annexed, marked A), it was represented that "the Capital Stock of the Company' (£250,000) "had been all subscribed for, and was held "by parties perfectly responsible, but who would willingly transfer a portion "thereof either to municipalities or individuals," and William Gray, Esquire, of Woodstock, together with the Rev. W. A. Landon, of the same place, were deputed to visit the municipalities of Norwich, Windham, Simcoe and Woodhouse. to request their assistance and co-operation in the performance of the work. That the said Landon and Gray, in pursuance of their instructions, proceeded to visit the said municipalities for the gaid purpose; that among other inducements to that end, it was represented to the municipalities by the said parties, "that "the position, character and standing of the several members of the Board of "Directors" (the personnel of which soon after the said Landon and Gray had entered on the objects of their mission was changed) "were such as to supply "the public with the best guarantee for the faithful and honorable discharge of "the affairs of the Company, there being connected with the said Board several persons then holding high positions, high in social rank, having a "character of their own to sustain, and as also being responsible for their friends, many of whom also occupied exalted positions." That it was also represented that a certain amount of bona-fide stock was subscribed, though the said Landon, in his evidence hereunto annexed, states, "that he never dwelt much on that fact, not placing much reliance on it himself." That the said Landon and Gray also, under the authority of the said Directors, assured the municipalities that no part of the moneys which might be advanced by them would be expended, except a small amount for surveys and preliminary expenses, until the means of completing the whole work was in the hands of the Company. That a contract had been entered into between the Directors, and the late Samuel Zimmerman. Esquire, by which the latter bound himself to supply two thirds of the money necessary to construct and equip the road, for which he was to be paid one third in bonds of the Company, one-third in stock, and one-third in cash, and that under

this arrangement, even should the road pay but two per cent. of the cost of working expenses, the municipalities would be secured in their loans because these loans reached but one-third the cost of construction. Through these and similar representations, many persons were induced to support the scheme, who were otherwise averse to it, and aided by these municipalities, who appear to have fully confided in the assurances thus made them, an application to Parliament for a renewed Charter and an extension to Dunville was successful, an Act for these purposes having passed on the 14th June, 1853. Soon after By-laws were passed by the Municipalities, granting aid by way of loan to the Company, amounting in all to £145,000. The said Landon and Gray in their evidence state that the representations made by them to the Municipalities on the faith of assurances made, and in pursuance of instructions from members of the Board of Directors in nearly every instance and on every essential particular, subsequently proved to be false. From their evidence, as well as from that of all the other witnesses examined before Your Committee having cognizance of the facts, it is distinctly proved, and indeed not attempted to be disputed, that instead of bona fide stock to a large amount existing, the only stock really held was to an amount barely sufficient to enable the holders, (seven or eight in number) to qualify as Directors, notwithstanding which, at the election of Directors, stock to the amount of several hundred thousand dollars was pretended to be represented and actually. voted on. It also appears that even on the stock really held, not more than fifty pounds was ever paid by any one of the parties elected as Directors; that in short the subscriptions were entered into merely to delude the Municipalities into the adoption of the fraudulent schemes of certain of the Directors and others acting with them for their own advantage. Being thus successful in the accomplishment of their designs, the further proceedings of certain of the Directors and their accomplices in guilt, are marked by a degree of recklessness and violation of faith and honorable dealing, which Your Committee find it difficult to select words to characterize as they deserve. Dissensions having arisen between a majority of the Board and one of their number, the latter was ejected on the ground that, because he had not paid up his calls on the stock subscribed by him it became forfeited. A most extraordinary ground of objection Your Committee submit, for a body to take who had themselves paid but a nominal sum on their own stock; and when it is further considered, as appears from the evidence of the Secretary of the Company, that no calls were ever officially made on the Stockholders.

This dissention led to a chancery suit, instituted by the rejected director to recover his seat, which terminated in his favour, and in the costs on both sides being paid, of course, out of the moneys of the unfortunate municipalities, as no other means were available. In pursuance of this decision of chancery, the successful litigant, Mr. Light, took his seat at the Board of Directors the day before the annual election for the year, but was turned out next day by a majority of votes, both parties voting on the fictitious stock pretended to be held by them. About this time a claim appears to have been urged by Colonel Light for certain alleged expenses incurred by him seven or eight years before; and out of the moneys of the municipalities he was paid the sum of \$5,936.

As an instance of the glaringly unscrupulous manner in which the objects of certain of the parties interested in duping the municipalities were effected, Your Committee beg to direct the attention of Your Honorable House to the following, the particulars of which will be found in the evidence of Mr. Hodge, the associate engineer of the Company. Among the municipalities granting loans to the Company was the township of Windham. After the passage of the by-law and its ratification by the rate-payers, it became the duty of the Reeve of the township to hand over to the Railway Company, under certain conditions, the necessary papers to enable them to obtain Government debentures, under the by-law. To do this

the Reeve referred to had what he called "scruples," according to the statement of the witness. Means were soon found to remove them. A sub-contractor was sent to him with an envelope containing \$500, which was quietly handed to him. The scruples were removed, and, as witness states, twenty minutes after, the necessary papers were in the hands of the Secretary of the Company; subsequently the messenger carried the Reeve another envelope containing an additional \$500, one hundred of which he deducted for his own services in negotiating the transaction, and the balance he handed to the Reeve as payment in full for the removal of his scruples.—Your Committee have no comment to make on facts so discreditable to all parties concerned.

On the obtainment of the moneys by the means thus described from the municipalities, in direct violation of their undertaking through the said Landon and Gray, and of bonds given by them to the same effect to the municipalities, the directors, without expending a single farthing of their own means in the construction of the road, proceeded to dispose of the moneys loaned them. In the like violation of the said assurances the said directors changed the tenor of the said alleged contract by converting it from a credit to a cash one, without the knowledge or consent of the municipalities, and for his influence and exertions in obtaining the contract for Zimmerman and Company, Henry De Blaquiere, one of the directors, is distinctly proved to have received a bribe of no less a sum than \$50,000 under this contract, in which the said De Blaquiere admits he was a secret partner to the ex-The work on the road was at length begun, right of tent of one-fifth the profits. way to a considerable extent secured, and stations and depot grounds fixed upon. The municipalities, invigorated by this appearance of a serious intention to proceed with the operations of the works, and having their attention thus attracted from the frauds which have been practised on them, congratulated themselves on an approach to the realization of their long cherished expectations. These expectations, however, were not of long continuance.

In the fall of 1854 the uworks were suspended; from the evidence of Mr. Hodge it appears that the act al amount paid to sub-contractors for that part of the work done amounted to about £32,000, while the contractor received therefor, £87,000. How the remainder of the moneys were expended the testimony hereto attached will show. Throughout it exhibits unmistakeable evidence of bad faith, deceit, reckless extravagance, and mal-appropriation of the moneys entrusted to

the Company by the municipalities.

During the session of 1854 and 1855, a further extension of time and route was granted to the Company. Fresh promises were made, and again the hopes of the Municipalities revived, and again they went to work, with a will to carry into effect, as far as they could, the objects of the amended statute. Nothing practical, however, was accomplished. On the 10th of March, 1856, delegates, appointed by the several Municipalities, met at Paris; and a proposal made by Miles O'Reilly, Esq., of Hamilton, for a settlement of the difficulties existing, was agreed upon unanimously. This proposal will be found appended to the Act 19 Victoria, chapter 74; and to confirm and legalize the agreement referred to, the said Act was passed, subject to its ratification by the rate-payers of the Soon after, By-laws, in pursuance of its provisions, were sub-Municipalities. mitted to the rate-payers. While their decision was pending, and within a short time of the period fixed upon for taking the final vote, a fresh and wholly unexpected element of confusion presented itself, in the shape of a circular to the Municipalities (which is herewith annexed) from Mr. Isaac Buchanan and others, claiming to be the Directors of the Company directing the Municipalities to withdraw the said By-laws announcing that the charter had passed into Mr. Buchanan's hands, that the interests of the Municipalities was provided for, and effective measures taken to secure the immediate commencement and speedy

completion of the road. The bewildered Municipalities, it would appear, scarcely knew how to shape their course, under these new circumstances. The result, however, was the withdrawal of the By-laws, and a kind of half-way acceptance of the protection of Mr. Buchanan and his fellow Directors. But £11,000 of the interest of the Municipalities was paid. Then commenced a species of life and death struggle between Mr. Buchanan and his friends on the one side, and Mr. Zimmerman and his friends on the other—the unhappy Municipalities being, in the meantime, used as the mere playthings of both. Suffice it to say, without entering into details, which will be seen by a reference to the evidence attached to the report of Your Committee, Mr. Buchanan failed in his engagements, and once more the despairing municipalities were forced to fall back on their powers of endurance for relief. How Mr. Buchanan happened to become so much interested all at once in the affairs of a concern with which, up to the moment of his voluntary interference, he had no connection whatever, except to oppose and retard it, and how he contrived suddenly to obtain the control of the charter of the Company, became to Your Committee curious and interesting objects of en-His evidence annexed, given with great candour and commendable sim. plicity, supplies at one and the same time the motive and the mode of effecting the object. He states that his motive was simply to obtain for the Great Western Railway Company the control of the Southern Road from the Niagara to the Detroit Rivers—that having done their utmost to oppose the obtainment of the charters, when they could no longer prevent them, he believed they desired to possess them for their own purposes, with a view to the construction of these Roads, instead of a double track on their own line. This Mr. Buchanan declared His mode of obtaining this control, though singularly to be his only motive. successful in the instance referred to, is, Your Committee trust for the honour of public men and the sake of morality, one seldom resorted to in this country, and one which will not soon again be repeated. It simply consisted in the giving of a direct bribe of \$100,000 to obtain the removal of three of the Directors, and the substitution in their stead of three of his own nominees, he having previously succeeded in securing without purchase the remaining four to accede to and aid him in carrying out his plans for the transference of the charter to a rival Com-The correspondence on this part of the proceedings is annexed, and to its contents Your Committee beg to direct the special attention of Your Honorable House, in the hope that if no provision of law shall be found to exist, providing for the punishment of conduct so clearly iniquitous, some means will at all events be adopted to deter others from the commission of similar offences against justice and morality. From this correspondence it appears that Mr. Buchanan having as he believed, secured the Western Road, deemed it important also to obtain the control of the Eastern. While devising means to this end, a Mr. Van Voorhis comes most opportunely to his relief with a suggestion made by Mr. Hodge that for a consideration the coveted object could be gained. Mr. Buchanan, after a little prudent consideration, determines as to the sum to be offered, and the proposition of Mr. VanVoorhis being reduced to writing. Mr. Buchanan accepts The negotiations being concluded, Mr. De Blaquiere, who up to this point appears only in the back ground, steps in, receives \$100,000, and then with his two brother directors withdraws and allows Mr. Buchanan and his two nominces to take their places; Mr. Van Voorhiss, as the negotiator between the parties, receiving for his services an undertaking that he shall have a preference contract of thirty-five miles of road. Whether or not others shared in the profits of this shamcless transaction, Your Committee have not been able certainly to ascertain. It is due to Messrs. Barwick, McQueen, and Deedes, who were three of the retir ing holders of stock transferred, to remark that Mr. Buchanan states his belief that they did not participate in this bribe.

Since Mr. Buchanan's failure to fulfill his engagement, various steps have been taken to remedy the mishaps incident to his interference, all of which, so far as they have been stated to Your Committee, appear in annexed evidence, by which it also appears, that besides the means employed to obtain the control of the Woodstock and Lake Erie, similar measures, hardly less discreditable, were resorted to, to enlist the services of persons supposed to be influential on the Amherstburgh and St. Thomas end.

The directory of the Woodstock and Lake Erie; as at present constituted, consists of Mr. Thomas G. Ridout, President, Mr. Isaac Buchanan, Mr. James C. Street, Mr. Joseph A. Woodruff, Mr. R. G. Benedict, Mr. James Kintrea, and Mr. T. Ridout,-all of whom have been recently appointed, and neither of whom, excepting Mr. Kintrea, reside in or have any connection with the municipalities whose means are invested in the road. It further appears, from the evidence submitted to Your Committee, that the others of those gentlemen have been selected as the mere nominees of Mr. Buchanan, for the protection of his interests and those of the estate of Mr. Zimmerman, of the motive of the latter of which Your Committee have no information. It also appears, from the evidence of Mr. Buchanan, that the amount of stock subscribed by the others of the said directors, is barely sufficient to qualify them, and that on that stock they had paid nothing, but that fifty dollars each, or ten per cent., has been paid for them by Mr. Buchanan himself. The claim of Mr. Buchanan on the road consists of a sum of £47,000, composed of £25,000 paid to DeBlaquiere, £11,000 as for interest to the municipalities, eight thousand pounds for debts of which Your Committee have no detailed statements; and £3,000 being Mr. Buchanan's expenses for law and Chancery costs, expenses of trips of himself and others to England, and expenditure incident to the carrying out his project to control the said charters for the benefit of the Great Western Railway. Research for the

Notwithstanding the great length of the Report of Your Committee, many facts; remain to be brought to the notice of Your Honorable House, for a knowledge of which they beg to refer to the accompanying evidence and documents. That gross wrong has been practised by parties officially and otherwise in connexion with the said Company, is fully established, and that those concerned in the perpetration of such wrong, are individuals who have hitherto-occupied high and honourable positions in society and in public stations, is a circumstance of peculiarly humiliating and painful character. Your Committee have felt it to be their duty thoroughly to investigate the matters referred to thom, and plainly, and faithfully to state the facts, whomsoever they might affect. They do not consider themselves called upon to offer to Your Honorable House any specific recommendation in the premises, believing as they do that the discovery of a means of punishing the parties guilty of the outrages offences against morality, which it has been the disagreeable duty of Your Committee to bring to the notice of Your Honorable House, or the prevention of the recurrence of them, if no present remedy be found applicable, will more properly come within the province of the legal advisers of the Crown.

All of which is, nevertheless, respectfully submitted.

M. H. FOLEY, Chairman, DAVID CHRISTIE, GEORGE SOUTHWICK, WILLIAM NILES, JOHN FRASER.

Committee Room, May, 20, 1857.

It was resolved by the Committee, that the Hon. Mr. Morrison, being a member of the Government, should be excused from assenting to the report.

# ORDER OF REFERENCE.

# LEGISLATIVE ASSEMBLY,

THURSDAY, 29th April, 1857.

Resolved,—That a Select Committee, composed of

MR. FOLEY,
HON. MR. MORRISON,
MR. EPHRAIM COOK,
MR. FRAZER,
MR. CHRISTIE,
MR. SOUTHWICK, and
MR. NILES,

be appointed to investigate and report on the affairs and position of the Woodstock and Lake Erie Railway and Harbour Company, especially with reference to certain alleged Bribes given to certain of the late Directors of the said Company and others, by certain of the present Directors of that Company, to the great loss and injury of the Municipalities interested in the said Railway:—with power to send for persons, papers and records.

Attest, W. B. LINDSAY, Clerk of Assembly

# MINUTES OF EVIDENCE.

COMMITTEE ROOM, No. 41,

THURSDAY, 30th April, 1857.

The Select Committee to whom is referred the investigation of the affairs of the Woodstock and Lake Erie Railway and Harbour Company met,-

### MEMBERS PRESENT:

Mr. FOLEY. Hon. Mr. Morrison, Mr. NILES, MR. EPHRAIM COOK, Mr. Frazer, and Mr. CHRISTIE.

# MICHAEL HAMILTON FOLEY, Esq., in the Chair.

Read the order reference.

On motion of Mr. Niles, seconded by Mr. Ephraim Cook: Ordered, that Henry DeBlaquiere, Arthur A. Farmer and William L. Smart, Secretary to the Company, all of Woodstock, and Isaac Buchanan, of Hamilton, be summoned to appear before the Committee on Wednesday next, at 101 o'clock, a.m., to give evidence, especially with reference to certain alleged bribes given to certain of the late Directors of the Woodstock and Lake Erie Railway and Harbour Company and others, by certain of the present Directors of that Company, to the great loss and injury of the Municipalities interested in the said Company; and that the Secretary be instructed to produce all books, papers and other documents in his possession having reference to this subject.

The Committee adjourned till Wednesday next, at 10 o'clock a.m.

WEDNESDAY, 6th May, 1857.

Committee met.

MICHAEL H. FOLEY, ESQUIRE, IN THE CHAIR.

Mr. NILES,

Mr. FRAZER,

MR. E. Cook, and Hon. Mr. Morrison.

Isaac Buchanan, William L. Smart, A. A. Farmer, and Henry DeBlaquiere, Esquires, were in attendance.

William L. Smart, Esquire, called in and examined:

1. Are you Secretary to the Woodstock and Lake Erie Railway Company? and the first of the first of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of t -I am.

2. How long have you been Secretary to the Company?—Since October 1853.

3. Were you the first Secretary, or did you succeed any one?—No; I succeeded Mr. Robert Light.

4. Had the Company organized previous to your undertaking the Secretary-

ship?—Yes, I suppose they had, as the Stock was subscribed for.

5. Is the Stock Book in your possession?—No. I believe there was a Stock Book, but never saw it: what purports to be a copy of it is in my possession. I found it in the Company's office.

The Committee adjourned until 10 o'clock a.m., tomorrow.

THURSPAY, 7th May, 1857.

Committee met.

### MEMBERS PRESENT:

MICHAEL H. FOLEY, Esquire, in the Chair.

Hon. Mr. Morrison,
Mr. Niles,
Mr. Frazer, and
Mr. Ephraim Cook.

Examination of William L. Smart, Esquire, resumed.

6. You say you have a copy of the Company's Stock Book, can you produce it?—I can, and will produce it on Monday.

7. Can you say from memory what the amount of stock was?—About two

hundred and fifty thousand pounds.

S. Who were the subscribers, and what were they down for ?—Col. Light was down for £60,000, William S. Light, for £27,000, Robert Newton Light for £27,000, the others were H. C. Barwick, Henry De Blaquiere, D. S. McQueen, Edmund Deeds, Richard C. Elways, and Henry L. Turner.

9. Did they take the balance in equal proportions?—No.

10. Can you state the amount Mr. Barwick took?—He took £27,000, and Mr. DeBlaquiere £27,000.

11. What was the smallest sum taken?—The smallest sum taken was £2,600,

but I cannot tell the exact proportions.

12. Was any sum ever paid on the stock?—No: that I am aware of, and the

books do not show any ever paid.

13. Who were the directors at the time you became Secretary to the Company?—The Hon. Francis Hincks, Edmund Deeds, Arthur Farmer, Henry De

Blaquiere, H. C. Barwick, J. H. Cornell, and Andrew Thompson.

14. What amount of stock had the Hon. Mr. Hincks?—He had £250 worth on which he paid five per cent, and in order to qualify him as a director, Mr. Barwick took £250 more, but nothing was ever paid on that, and the stock was forfeited.

15. When did Mr. Hincks resign his presidency?—The first or second meet-

ing after I entered the Company.

16. Was Mr. Hincks ever called on to pay his stock?—Speaking from mem-

17. Why was he never called on?—I never had orders to call on any one to pay stock.

18. Was it ever intended that Mr. Hincks should be called on to pay stock?

—I cannot say, but presume it was.

19. Who succeeded Mr. Hincks in the Presidency?—Mr. Arthur Farmer.

20. What stock had he?—I cannot say.

21. Did he pay any stock?—I think he paid £12,10s. or £25, but cannot say

n. 22. What has he paid since?—Including first payment he has paid ten per which. cent., amounting in all to £50. (On recollection, Mr. Smart corrected himself as to Mr. Deeds, who did not become a Director till the 7th of March, 1854.)

23. What stock did he hold?—£500.

24. What was paid on it?—I believe he paid, 10 per cent. on all.

25. Was the Board complete after Mr. Deeds being appointed?-I believe

not, there was still one vacancy in the Board.

26. Of these six gentlemen who were Directors, were any of them partners in business?—I believe Mr. Farmer, Mr. DeBlaquiere and Mr. Deeds, were or had been partners in lumber business. I omitted to say that Mr. Light was a

Director at the resignation of Mr. Hincks.

27. When did Mr. Light cease to be a Director?—In March, 1854, the Board, declared his stock forfeited for non-payment of calls, and in the opinion of the Board ceased to be a Director. Mr. Light contested, and claimed his right to bea Director, on payment of calls due, and commenced a suit in Chancery to recover his right, which the Court confirmed on payment of calls due.

28. At whose expense was the suit carried on ?-At the expense of the Com-

pany.

29. What were the expenses?—I cannot say. On the 5th of June Mr. Light resumed his seat at the Board, but was defeated next day at the annual election.

30. Did any settlement ever take place between Mr. Light and the Com-

pany?—No. No claims were ever presented, except about £70 for costs.

31. What money did Col. Light receive?—He received £1,484 for moneys advanced in connection with the obtaining of the original charter, and expenses incident thereto.

Ordered, That twenty copies of the evidence given at each meeting be printed for the members of the Committee.

The Committee then adjourned.

SATURDAY, 9th May, 1857.

Committee met.

### MEMBERS PRESENT:

MICHAEL H. FOLEY, Esquire, in the Chair.

Mr. Ephraim Cook, Mr. Frazer, and Hon: Mr. Morrison.

Alex. McClenaghan, Esq., called and examined:

Resides in the Town of Woodstock; is Editor and Proprietor of a newspaper there. His information is derived from the published reports and statements of the agents of the Directors, In 1853, a statement was published by the Directors, in which it was stated that there was subscribed £60,000 of bona fide stock which was then available for the purposes of the Road. The statement referred to is the first published one of the Company. That statement was published to induce the Municipalities to grant loans: Can produce the statement, and will: The Municipalities were induced to grant loans under representations made by the Board to the extent of £145,000. The contract was let in the fall of 1858, and his knowledge is derivable from his having been present at a meeting of the Directors when the subject was discussed! The Directors were all present. The contract was, that Mr. Zimmerman was to have the construction of the Road at £10,000 per mile; payable, one third in the bonds of the Company, one third stock, and one third - . It such that a fine with the confidence to the state of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the confidence of the co

The contract was so represented to the Municipalities. The contract was changed from a credit to a cash contract. The cash contract was £7,000 per mile. The works proceeded on the terms of the last contract. One of the subjects of complaint at this meeting was that the contract had been changed without the knowledge or consent of the Municipalities. The effect of the change would make a serious difference to them if the line was not intended to go beyond Woodstock and Port Dover, because the amount of the stock and bonds of the Company, with the Municipal loans, was near the amount required to be paid to the contractor, and if the original contract had been adhered to; that money, together with the stock and bonds to be given to the contractor, would have sufficed to complete the Road. It was stated by Mr. Hincks, the President, that if the Road would pay three per cent. the Municipalities would be saved harmless. Of the £60,000 only £2,500, as he understood from the Directors, ever existed. On that amount calls to the extent of ten per cent. were made, and £125 acknowledged by the Company to have been actually paid. At an annual election of the Company held in June, 1854, stock to the amount of £53,000 was voted on by Messrs. Light and others in opposition to the existing Board, and the declaration of the scrutineers was that a larger amount was voted on by the Directors of the previous year, who were thus continued in the direction for the then current year. From that fact he infers that there must then have been upwards of £106,000 stock—how much more he cannot The persons elected as Directors at that election were, Mr. Farmer, Mr. DeBlaquiere, Mr. Deedes, Mr. Barwick, Mr. Andrew Thompson, John H. Cornell, and D. S. McQueen, the latter being merely a locum tenens for another. The bonds given to the Municipalities by the Company in consideration of their loans, provided that no part of the Municipalities' money should be used until the Company should be prepared with funds to complete the Road. That agreement was not carried out. The money of the Municipalities was used, and no money except that of the Municipalities was ever spent on the Road except the £125, and £12,500 said to have been loaned by the contractor. The Directors stated in the report of February, 1855, that the contractor had loaned the £12,500. Property at Woodstock was bought from Mr. DeBlaquiere while he was a Director for station grounds for the Company. A Committee, consisting of Messrs. Deedes, Barwick, and Thompson, were appointed by the Board to put a value on this land, and re-The value put on this property was £5,000 or £5,500. Mr. DeBlaquiere has been paid that sum. Mr. DeBlaquiere had been the owner of that property for six or eight months: it might be a year. The property was what was called Young's Brick Yard. It contained from four to six acres. The purchase was made while Mr. DeBlaquiere was a Director of the Company. Does not know what Mr. DeBlaquiere paid for this land. The property was situate north of the Great Western; and if used as a depot, the Wookstock and Lake Eric must have crossed the Great Western. About the time of the purchase, there was an application for a charter to construct a road from Woodstock to Stratford, which, if built, the land might have been useful for a depot. That charter was never ob-Mr. DeBlaquiere retired from the Board of Directors about the 11th of August last. Mr. DeBlaquiere acknowledged to witness in conversation, or allowed him to think, that he had retired for a consideration of £25,000. Mr. Buchanan stated to witness this morning that he gave £25,000 for the control of the road.

[In answer to a question by Mr. DeBlaquiere]—Had heard the Directors say in presence of the Municipal Delegates, that a large amount of stock was originally taken which was never intended to be held. Has never heard the Directors say, nor was it generally understood, that the stock was subscribed to save the charter. The published reports give a certain figure of stock, between £60,000 and £70,000. The charter required £60,000 to be subscribed, and the report set forth that it did exist. The Municipalities preferred giving loans to taking stock, because they were advised by Mr. Hincks and others connected with the road that it would be the

safer course for them, because if the road only paid three per cent. they would be secured under the contract originally entered into with Mr. Zimmerman. Thinks the contract was taken in 1853. Has never seen any contract, but it was generally believed it did exist.

[By Hon. Mr. Morrison.]—Do you know the fact of a contract being entered into for this road, at the rate of £10,000 a-mile, of your own knowledge, in 1853, or any other time?—I never saw such a contract. At a meeting of the Board of Directors with the Delegates of the Municipalities, in 1855, the subject of the £10,000 contract was discussed; and as a reason why it was changed, Mr. DeBlaquiere spoke of the desirability of changing it. He said the intention was to extend the road eastward and westward, and it would be better to change; but he regretted that the change to £7000 per mile had been made without consulting with the Municipalities. Do'nt know whether the Company purchased property from any other person than Mr. DeBlaquiere at Woodstock. They have bargained for other property, but witness does not know whether the purchase has been completed. Does not know what Mr. DeBlaquiere paid for the property sold by him to the Company. Cannot say whether or not Mr. DeBlaquiere purchased this property with a view to selling it to the Company. A Committee was appointed to ascertain whether the west end of the town was not more eligible for a depot than the east end where this property of Mr. DeBlaquiere lay. The question was submitted to the Chief Engineer of the Company and another Engineer of the Great Western, who reported that the east end was more eligible. This report was published. A former Engineer had previously reported in favor of the west end. This report had reference to the first The Chief Engineer referred to was Mr. Benedict. The Engineer who reported favorably of the west end was Mr. Light. It was made about the time of the obtainment of the Charter. Mr. DeBlaquiere gave witness as a reason for his retiring, besides the £25,000, that Mr. Buchanan being likely to secure the Amherstburgh and St. Thomas, it would be for the interest of the Woodstock and Lake Erie and of the Municipalities to be also in his power. Another reason given by Mr. DeBlaquiere for transferring the Road to Mr. Buchanan was, that Mr. Zimmerman, not having treated the Board as he thought he should have treated them, and finding his (DeBlaquiere's) influence over the other members of the Board slipping out of his hands, he thought, that to relieve himself from the unpleasantness of his position, it would be better to retire. Four of the Directors were decidedly in favor of Mr. Buchanan. Mr. Wilson of Woodstock is the owner of one lot, Mr. Walton of another bargained for by the Company.

Adjourned till 10 o'clock, a.m., on Monday.

Monday, 11th May, 1857.

Committee met.

MEMBERS PRESENT:

MICHAEL H. FOLEY, Esquire, in the Chair,

Mr. Frazer,

Mr. Cook, and

Hon. Mr. Morrison.

The evidence taken at the last meeting of the Committee was read.

Messrs. De Blaquiere, Smart, Buchanan, McClenaghan, and Hodge were in attendance.

John L. Hodge, Esquire, was examined:—Is an Engineer by profession, and resides at Hamilton; commenced the location of the Woodstock and Lake Erie

Railway in July, 1853, as associate Engineer with Mr. Benedict, who was Chief. Engineer. This was before the extended charter was obtained to the Suspension Bridge and St. Thomas. Was, in the Fall of 1853, employed by the Board of Directors to endeavour to obtain from the Township of Norwich a loan to the extent of £50,000; was successful in inducing the Township to grant such loan, and a meeting of the rate-payers was subsequently held to complete and ratify the grant. Mr. DeBlaquiere, one of the Directors, Mr. Smart, the Secretary, Mr. Ball, the Solicitor, and Mr. Cornell, another of the Directors, were present. Mr. De-Blaquiere, during the course of an address then delivered by him to the rate-payers stated, that upwards of £60,000 private stock had been subscribed. This meeting was at Otterville. Mr. Moore, of Norwich, enquired at that meeting why the Stock Books were closed. Mr. DeBlaquiere in reply stated, he thought he, Mr. Moore, had formerly had an opportunity, if he pleased, of becoming a Director, providing he had subscribed the necessary amount of stock. There were in 1854 or 1855 eight shareholders in the Company. In 1854, an Act of Parliament authorizing them to reduce their stock (is not certain as to the date or the exact terms of the alteration, they can be seen by reference to the Act.) In the fall of 1853 an attempt was made by Mr. DeBlaquiere, while he was a Director, to purchase a farm, or part of it, from Mr. Axford, in the neighbourhood of Simcoe, through which the line, as originally located, ran. Mr. James W. Ritchie, of Simcoe, stept in and became a competitor for the purchase of the same property. Mr. Axford would not sell to either of them. Witness was, after or during the carrying on of this negociation, ordered to make another survey. This property of Axford's lay on the south west side of the creek that divides Sincoe. He made another survey in pursuance of these directions, and fixed the line on the opposite side The line through the Axford property was decidedly the most of the creek. Mr. Benedict informed witness that in consequence of this alteration of route, Messrs. DeBlaquiere and Farmer had purchased the Davis Farm, through which the line of the new survey was to run. Mr. Benedict further stated, that it was the first instance he had ever known of a depot being fixed without a consultation with the Chief Engineer and before a line was located. The depot was not fixed on the Davis farm by either witness or Chief Engineer. It was in the absence of Mr. Benedict at the request of the Directors that the second line was The second line passed close in the rear of Mr. Campbell's house but on the opposite side of the creek, the property through which it went being at the time of the location Mr. Campbell's. On Mr. Benedict's return, witness and Mr. Benedict consulted together as to where on that property the most suitable place for a depot could be selected. The second line was run before the 28th October, 1853. Witness stated expressly that the level grade in rear of Mr. Campbell's house was the proper place for the depot and where the Town would be best accommodated, and at which point Mr. Benedict and witness then determined to locate it. The purchase of the Davis farm was made by Mr. De Blaquiere conditionally, and with the understanding that if not completed within a given time, a certain sum of money was to be forfeited. The purchase was not completed by Mr. De Blaquiere. Cannot say whether or not the purchase of the Davis farm would have been completed by Mr. De Blaquiere if the depot had been fixed there. The line of road could have been constructed cheaper and more decidedly for the interests of the Town and the Company through the Axford farm, than where it was afterwards fixed. Has no reason to say decidedly that the road would have run through the Axford farm if Mr. De Blaquiere had completed the purchase of it, any further than that that line would have been decidedly the most beneficial line for the interests of the Company, and even at the present time, provided the Southern Road passes through Simcoe, it would be profitable to abandon the work already done through the Town and locate the line across the Axford property. Four of the Directors of the Company formed a quorum. Remembers the letting of the

contract in the Fall of 1853 or Spring of 1854. Does not think that the letting was publicly advertised in the newspapers. Is only aware of the three Tenders being put in, viz: Valentine Hall & Co., Zimmerman & Co., and Ray and others, of Hamilton. Witness made an estimate of the value of the work to be done for Hall & Co. This estimate affording, as witness conceived, a fair profit amounting to £6,783 per mile. Mr. Hall and Mr. John Barwick, (a brother of one of the Directors) who was in connection with Hall, on the advice of Mr. De Blaquiere, raised their price at the time of letting. They had shewn their tender to Mr. De Blaquiere before the letting. Hall and Barwick had been assured by Mr. Hincks that they would obtain the contract. They did not obtain it. It was given to Zimmerman & Co. Cannot state why it was given. Believes it was given in consequence of Hall & Co. raising the price of their contract on the advice of Mr. De Blaquiere, that they lost it. Has no personal knowledge of any sum of money or other consideration having been given by Zimmerman & Co. to any of the Directors to obtain the contract. Has seen it stated in newspapers published at Woodstock. that such consideration was given. Was not employed by any of the Directors nor by any other person to induce the Reeve of Windham, for a pecuniary consideration, to negotiate respecting the loan to be given by that Township. Alexander McBean, a sub-contractor on the line, was so employed by John W. Dunkley, the Managing The facts are these: Mr. Hunt, the Reeve aforesaid, had Clerk of the Contractors. scruples affecting his mind about giving up the order of the Treasurer of the Township to the Secretary of the Company for the amount of the loan voted by the Township to the Company. To remove those scruples, and to induce Mr. Hunt to give up this order, a douceur of \$1000 (less \$100 retained by Mr. McBean, for his own personal services in the transaction) was paid quietly to Mr. Hunt. Five hundred dollars was first enclosed to Mr. Hunt, in an envelope which was delivered to him by Mr. McBean, and within 15 or 20 minutes, witness believes that the Secretary of the Company had the order from the Reeve in his possession. Mr. McBean informed witness that afterwards when the balance of \$500 was to be paid to Mr. Hunt, he (McBean) retained \$100 for his own services in the transaction. Does not think that the officers of the Company or the Directors were aware of this transaction. At a meeting held at Amherstburgh on the 7th of August last, two rival Boards for the Amherstburgh and St. Thomas line were elected. A dispute arose as to which was legally elected. One of these Boards was elected on the interest of Mr. Zimmerman—the other in that of Mr. Buchanan. Returning from Amherstburg next day, Mr. Van Voorhis suggested to witness, as a friend of Buchanan, that the control of the Southern line could be effected by obtaining the control of the Woodstock and Lake Erie and its extensions, and that for a consideration a sufficient number of the members of the Woodstock and Lake Eric Board of Directors could be induced to retire, and thus give Mr. Buchanan the control of the Charters of Witness communicated with Mr. Buchanan, and informed him of what had been stated by Mr. Van Voorhis. "Mr. Buchanan entertained the proposition, and concluded that the sum necessary to effect the object was £25,000. Witness is not aware of the precise sum paid, nor when, nor how it was paid, but saw a letter from Mr. Buchanan, some time afterwards, requesting Mr. DeBlaquiere, as he, Mr. DeBlaquiere, had not co-operated with Mr. Buchanan to the extent agreed upon, to refund the money. Messrs, Farmer, DeBlaquiere and McQueen retired to give place to Buchanan's nominees. Mr. Deeds was not in the Province at the time, and Mr. McQueen was Director in his place. Mr. Deeds could not have been aware of this transaction, as he was absent in England, and had been for some weeks previously. Has no doubt that £25,000 was paid by Buchanan to DeBlaquiere. Has no knowledge as to whether or not either of the other Directors shared in the amount. The expenses of making the location was about £400 per month, while under construction about £300. As far as the accounts go they show that but £125 was paid up. There was no other moneys used for the purposes of the Road than those of the Municipalities and the interest accruing on them. Will produce the Secretary's balance sheet, which will show the receipts and expenditures, and the sources from which the moneys made use of were derived. The cost of construction taken from the prices paid to sub-contractors, of the whole work, as nearly as witness could collect, having ascertained the prices paid to four sub-contractors out of five, by the contractors, on the 31st October, 1854, when the works were temporarily suspended, amounted to about £32,500, while the sum estimated to Zimmerman & Co., the contractors, was over £87,000. Witness knows of no schedule of prices attached to contract to govern monthly estimates, as is usually the case. Witness merely collected the actual monthly accounts of work made by their resident engineer, and handed the same to the chief engineer monthly, There never were any estimate books in the engineer department, where the usual form of item prices being allotted to the estimated quantities of work done, but only a book where at the close of each month the estimate was rendered and certified by the Chief Engineer, as so many miles or portions of miles of road executed at so much per mile. Witness does not know Mr. Zimmerman's legitimate profits, could not have come to anything like the difference between £32,500 and £87,000, the amount estimated in October, 1854. Does not know whether or not the Directors were aware that in October, 1854, the actual amount of work done was only £32, 500.

The Committee adjourned till 10 o'clock, A. M., tomorrow.

Tuesday, 12th May, 1857.

Committee met.

#### MEMBERS PRESENT:

MICHAEL H. FOLEY, ESQUIRE, in the Chair.
Mr. Frazer.
Mr. Ephraim Cook,
Hou. Mr. Morrison,
Mr. Christie.

The several witnesses were in attendance.

Mr. Hodge produced balance sheet of receipt and expenditure of the Woodstock and Lake Erie Railway and Harbour Company, and his examination being resumed, witness stated that his salary was £500 per annum. Mr. Benedict's salary was £750 and travelling expenses. Witness had a certain description of travelling expenses. The claims to right of way were decided on the judgment of parties employed. Is not aware of many arbitrations. Claims were settled both privately and by arbitration. Witness considers that twenty-five per cent. is a very good profit on a first class cash contract.

# [Cross examined by Mr. DeBlaquiere.]

Is not aware that two contracts were let, but knows that a plan of a credit contract was changed to a cash contract. Is not aware that the credit contract was signed, sealed and delivered, but knows there was a change. Will produce in writing Mr. Benedict's statement referred to yesterday respecting the purchase of Davis' farm by Mr. Farmer for himself and Mr. DeBlaquiere. Witness' impression was, that the change of route from the Axford property to the Davis farm was occasioned by Messrs. Farmer and DeBlaquiere not being able to purchase the former. The depot was never fixed on the Davis farm at the period referred

Is not aware whether the Directors themselves had fixed upon the depot. Stated yesterday that Mr. Benedict had said that it was the first instance he had ever known of a depot being fixed without consulting the Chief Engineer before the line was located. The impression from what witness has since seen and ascertained is, that Messrs Farmer and DeBlaquiere intended to make a speculation out of the fixing of the depot. There was a new line run, and afterwards a The third line was run at a time when there was but little prospect of the Directors coming to an agreement with Mr. Ritchie, who had purchased, after the second line was run, the property through which it went, from Mr. Campbell the owner. With reference to the above mentioned writing from Mr. Benedict, witness desires further to state that feeling annoyed at the contents of this letter from Mr Benedict, and on its receipt, he, witness, took the earliest opportunity of shewing it to Mr. DeBlaquiere and asking him verbally if ever witness had induced him to purchase the Davis property Mr. DeBlaquiere said that Mr. Farmer was foolish, that he, Mr. HeBlaquiere would put the matter all right. Pursued the same course with Mr. Barwick that morning. the impression from Mr. Benedict's letter that it was supposed he now had fixed the depot and he wished to set himself right. Made the estimate referred to in his evidence of yesterday as Mr. Hall's Engineer. Was in the employ of the Company at that time. There is nothing improper in an Engineer making out an estimate for a person under such circumstances. Cannot tell from recollection what was included in Mr. Hall's estimate. Interest, engineering, and right of way were included. Mr. Hall took his figures to Mr. DeBlaquiere, and Mr. De-Blaquiere advised him to raise his prices. The plans and specifications were, from the approximate estimate, a plan improperly adopted in this country. Witness judges of the estimate which ought to be put in, because he considered himself as shrewd as other Engineers, and because he had equal facilities with others by having access to the plans of the Company. If Hall and Co., had used the terms "according to the plans and specifications to be furnished" it would include right of way and other things—specifications of the manner of constructing the work. Mr. Hall's tender was for just the same work tendered for by Mr. Zimmerman. The terms vary in different specifications. Has seen the formal offer of Hall and Co. He gave them an estimate at so much per mile. That was to include right of way, fencing, superstructure, station grounds, rolling stock,-does not know about Engineering expenses, and he thinks certain contingencies and one year's interest. From what witness has heard of the other tenders, which he never saw, and from what he knows of Mr. Hall's, he considers Hall's the most preferable. Does not remember the terms as to payment of Hall's contract. Would rather say nothing of either tenders until the books are produced.

# [Cross-examined by Mr. Smart.]

There is a plan which Mr. Ritchie has of the property through which the line runs at Simcoe, which if produced will show a certain portion marked off upon it for depot grounds. This plan is not one of the Company's but got up by Mr. Ritchie himself after consultation with witness and Mr. Benedict. Met Mr. Smart with Mr. Benedict on one occasion at Simcoe. Has no belief as to whether or not a schedule of prices was attached to the contract. Has never seen the contract. He believes that if a schedule of prices were attached to the contract it would have been furnished to him by the Chief Engineer to enable him to make up or adopt a plan for making the monthly estimate. Mr. Benedict kept in his desk a plan for making up monthly estimates, to which witness had no access. Saw it once while Mr. Benedict was using it. Never asked for the schedule of prices attached to the contract.

## [Cross-examined by Hon. Mr. Morrison.]

Never informed any of the Directors that he suspected the estimates were improperly made up. The estimates were improperly made up. Did not inform the Directors because he did not consider it etiquette to interfere with the duties of the Chief Engineer. Would not say that the estimates were made by the Chief Engineer in a dishonest, but in an improper manner. Witness looked for his salary to the funds of the Company. Felt that he had a duty to perform to Mr. Benedict as well as to the Company. His duty to the Company was to attend to the work on the line. Was not in a position to meet with them at the Board. Never was requested to do so. Never intimated to the Company or any of the Directors, that their interests were not looked after by the Chief Engineer. To the best of his recollection never intimated to the Chief Engineer himself. Presumed it would be impertinent. Never intimated, to the best of his recollection, to any person that the Chief Engineer did not look after the interests of the Company.

By Mr. McClenaghan.]—Did Mr. Benedict, at any time in your hearing, or in conversation with you, in reference to the affairs of the Company, describe them as a swindle from first to last?—On one occasion, while talking over the affairs of the Company, (more than two years ago,) in a casual manner said, "It was a swindle anyway." The allusion was in reference to the conduct of the Directors. Witness thinks he must have mentioned this conversation to some person at or about the time of its taking place. Witness coincided in the opinion then expressed by Mr. Had no interest in Mr. Hall's contract. Made out his tender for him. Expected no interest in the contract. Mr. Hall's partners were Mr. Arnold, Mr. Morton, John Barwick, and Charles DeBlaquiere. This he had from Mr. Hall. Interested himself in making up Hall's contract because he was an old friend. Had no other interest whatever. Knew only of the amount of four sub-contractors. Estimated the fifth from the other four. Those amounts did not include engineering, nor anything else except the actual work of construction done by the sub-con-Made out this estimate with a view of discovering whether or not Mr. Zimmerman was not over-paid. It was made at no one's instance. Made this estimate immediately after the works were suspended, for the first time, &c., for his own satisfaction. Mr. Van Voorhis was a sub-contractor. Cannot tell exactly what he received. The others were Smith & Co., Alexander McBain, and one party who went away. Corrected his evidence of yesterday by saying three out of four contractors, instead of four out of five. Has a memorandum of how he made up the estimate. Cannot recollect now the exact amount of either sub-contractor's work. Can produce his calculations showing how the estimate was made up. Took the amount paid three contractors, and by that knows the average amount of work done, thereby arriving at the whole amount. When witness says the prices paid, he means the prices to be paid by Mr. Zimmerman. Will be glad to show to the Committee the means by which he arrived at his estimate. Recollects now that the fifth sub-contractor was for the bridges. Messrs. Bradley and Jenkins were the sub-contractors for the bridges. Can and will furnish the estimate made for the bridging. Cannot now speak from recollection as to the amount. It is a long time since he left the service of the Company, and owing to that circumstance and the dispersion of the Contractors, he has not now the same facilities for making his estimate. Has the data at his office on which the estimate is furnished.

The Committee then adjourned.

A. 1857.

WEDNESDAY, May 13th, 1857.

Committee met.

### MEMBERS PRESENT:

MICHAEL H. FOLEY, Esq., in the Chair;

Mr. EPHRAIM COOK,

Mr. FRAZER,

Mr. CHRISTIE,

Mr. Southwick, and

Hon. Mr. Morrison.

The several witnesses were in attendance.

The evidence of yesterday was read and approved.

The Committee deliberated.

Adjourned till to-morrow, at 10 o'clock a. m.

Thursday, May 14th, 1857.

Committee met.

#### MEMBERS PRESENT:

MICHAEL H. FOLEY, Esq., in the Chair:

Mr. Southwick,

Mr. EPHRAIM COOK,

Mr. Frazer, and

Mr. CHRISTIE.

John Barwick, Esquire, examined:—Resides at Woodstock. Remembers the letting of the Woodstock and Lake Erie Railway in the fall of 1853. Is not aware of the letting being advertised for in the newspapers. The way witness became informed of the letting was, that he was associated with Valentine Hall, and from him he learned that tenders were to be sent in by a certain day. Hall never informed witness how he knew that a letting was to take place; thinks it was generally known that a letting was to have taken place at the time of it. Witness's firm put in a tender. Mr. Hall and witness prepared a tender for the purpose of offering it, of which witness had a memorandum. This memorandum witness showed to Mr. DeBlaquiere before putting in the tender. This memorandum contained a statement of the prices mentioned in the tender. On shewing it to Mr. DeBlaquiere he remarked that he thought the prices were low, and further, that he thought there was likely to be difficulty on account of the tightness of the money market: After this conversation witness went to Mr. Hall and related to him the substance of it, and they concluded that it was advisable to increase the prices in their tender. His impression is that the first tender was £7,000 per mile cash; cannot state positively; or £7,300 on certain conditions mentioned in the contract. Did increase the price he thinks to £7,300 cash, or £7,600 on certain other condi-This tender was put in. This change of tenders was made in consequence of the conversation with Mr. DeBlaquiere above referred to. Witness's tender was not accepted: Mr. Zimmerman's was. Witness's Company was composed of Mr. Hall, Mr. Morton, of Kingston, Mr. John Arnold, Junior, of Toronto, Mr. Charles DeBlaquiere and witness. Cannot state what contract, witness's or Zimmerman's, was most advantageous for the Company. Witness believes that his Company had the ability to fulfil the contract if they had obtained it. Witness can only say that he felt disappointed. Would not like to say that he had been either wronged or deceived; disappointed is the word; he thinks it sufficiently conveys his meaning. After this witness received the appointment of arbitrator from the Company. The emoluments of this situation were left to be fixed by witness and the arbitrators who should be associated with him in each case. Thinks that the average remu-计可能记录数据 1805年出

A. 1857.

neration would be £1 5s. per day. Had about ten arbitrations: does not think they exceeded that. Cannot tell how there came to be so few. Believes Mr. Ball, the solicitor, negotiated with most of the parties, doing it privately. Knows the property called Young's Brick Yard. Knows nothing respecting it except what he saw in the public prints. Has known it for 19 or 20 years. Cannot speak as to the value of the property. Has nothing further to state.

[In answer to Mr. De Blaquiere:] Witness fully hoped to get the contract, and not getting it was disappointed.

[By Mr. McClenaghan.] Did Mr. Hall not inform you that overtures had been made by Mr. Zimmerman to induce Mr. Hall to refrain from putting in a tender, and that if he would do so he should have a position on the line?—Mr. Hall did mention that overtures had been made to him by Mr. Zimmerman, which if he had acceded to something advantageous in the shape of a contract or sub-contract would be given to him.

### [Witness then withdrew.]

Rev. W. H. Landon, examined :--Resides at Woodstock, is Clerk of the County Council of Oxford. The Woodstock and Lake Erie Company was chartcred several years ago, but the charter remained dormant till about 1852. About that time witness became associated with parties who were endeavouring to revive it. They succeeded in interesting the feelings of influential individuals in the vicinity, and in obtaining the aid of nearly all the Municipalities through which the line to Dover was to pass. Witness took an active part in inducing the Municipalities to grant aid to the work, but cannot say whether or not he considered himself or was considered by others an agent of the Company. Engaged in the work from a sincere desire to see what he considered an important improvement completed. In all his representations to the Municipalities, and at public meetings, and to individuals, acted in the most simple good faith, and always believed those representations to be true; thinks it probable that some of those Municipalities were influenced by those representations to decide on making the grants they did. Nevertheless some of those representations turned out to be false. As an instance he represented that if the road should pay only two per cent. of its costs of working expenses, the Municipalities would be secure in their loans, because those loans were only to reach one-third the expense of the cost of the road. Also represented to them that no part of the moneys advanced by the Municipalities except a small amount for surveys and preliminary expenses would be expended until the means of completing the whole work was in the hands of the contractors; also represented repeatedly, that a contract had been taken under which the contractor bound himself to supply two-thirds of the money necessary to construct and equip the road, for which he was to be secured by the Company's bonds for one; half and stock in the road for the remainder. Thus it was made to appear that the Municipalities could secure the construction of the road and its equipment by advance ing by way of loan an amount of money equal to one-third its cost, and that this loan would be secured by first mortgage on the road and its rolling stock. As a further, inducement he also after the re-organization of the Board, (that is when Mr. Farmer became President, and Mr. DeBlaquiere a member,) represented that the position? character, and standing of the several members of the Board, supplied the public with the best guarantee for the faithful and honorable discharge of its affairs. There were connected with the Board several persons then holding high positions—high in social rank; they were represented as having a character of their own to sustain, and as also being responsible to their friends, many of whom also occupied exalted positions. Through these representations many persons were induced to support the scheme who were otherwise averse to it. Thinks it probable that representations were made that a certain amount of stock had been bona-fide subscribed, but witness never dwelt on that fact as an inducement to the Municipalities, not placing much reliance

on it himself. Has received money from the Company towards remuneration for his services; the payments were very small sums, but cannot recollect the amount. Remembers to the best of his recollection receiving at three different times cheques of £25 each, another time a cheque for £25 or £50; is not sure but that in addition small payments of £2 or £3 have been made for horse hire and other similar disbursements; do not know that he was in the service of the Company. His labor commenced in 1852 and continued till recently. By saying this he does not know whether he was in the service of the Company: he means he had no permanent His instructions generally came from one or more of the Directors: generally from either Mr. DeBlaquiere or Mr. Barwick. His primary employment was the obtainment of these moneys from the Municipalities. The representations made by witness to the Municipalities, were made on the faith of assurances given him by, and in pursuance of instructions from, individual members of the Board of Directors. Nearly every one of these representations, or the greater part of them, turned out to be unfounded. Never suspected that the most essential of these statements were unfounded until after the stoppage of the works. Presumes that he received his information conveyed to the Municipalities, respecting the terms of the contract which he has described, from all the Directors. Has heard some of the Directors state publicly, at a public meeting of the rate-payers, that such were the terms of the contract. The first information witness got of the contract being changed, was about the time of the suppression of the works. The information of this change excited very great surprise in his mind. Never had any conversation with the Directors on the subject. Has heard a Director (Mr. De Blaquiere) remark that he regretted the Municipalities had not been consulted before the change was made. Has not publicly taken any steps since discovering that his statements were unfounded, to convince them of his own good faith. He had been long acquainted in the section of country interested, and was satisfied that those who knew him would not attribute any intentional wrong or misrepresentation to him. Has no knowledge of the circumstances connected with the letting. Had a conversation with Mr. DeBlaquiere shortly after the accession of the Buchanan nominees to the Board, in the room of Mr. DeBlaquiere and his retiring colleagues. Mr. DeBlaquiere simply informed him that the Board had changed; that himself and others had retired, and Mr. Buchanan and some of his friends had succeeded him; that the prospects of the Road had greatly improved by this change; and it was now certain of being constructed within a reasonable time, including the Woodstock and Dover line. The Young brick yard might be worth from £100 to £400 per acre. Cannot say what it was worth when sold to Mr. DeBlaquiere. Thinks the land was purchased by Mr. DeBlaquiere from Mr. Birtch in 1852 or 1853. On recollection, thinks it must have been later. Drew some of the writings; believes the prices stated in them are the true prices; but does not say that more was not paid.

# [Witness then withdrew.]

William Gray, Esquire, examined — Resides in Woodstock, and was the late Reeve of the Town. In 1852 was a Town Councillor. Was consulted with in connection with others of the Council on the subject of the Woodstock, and Lake Eric Railway. Was solicited by Mr. Barwick, Mr. DeBlaquiere and others of the Directors to assist in carrying on the operations of the road. They represented the advantages of the road to the Municipalities if means could be obtained for carrying it out, but as the Charter was about expiring for want of funds; it was suggested to propose a scheme to the Municipalities, and ask aid from them in carrying it out. The scheme was this: if one third, in the shape of Municipal aid could be obtained, one third of the bonds of the Company might be sold, and one third taken in stock by the Contractors. This was the scheme proposed to the Municipalities, and which influenced them to grant the aid which they did.

Witness was appointed a Commissioner by the Directors to aid and assist in carrying out the scheme. Waited on the different Municipalities and represented the scheme, describing the parties who had control of it as gentlemen of high standing and wealth, some of them holding a responsible position; also stated that bonds would be given to the Municipalities which would secure them against Mentions bonds because there were to be two descriptions of any possible loss. bonds. The one bond provided that no part of the Municipal money should be expended till the whole amount necessary for the construction of the road was obtained, excepting a small sum for preliminary expenses. The other bond provided for their security by giving them the first loan on the road. Also stated to the Municipalities that if the road paid two per cent. the Municipalities would be secured: Has heard Mr. Landon give his testimony. Witness made the same representations to the Municipalities as Mr. Landon describes himself to have made. those representations on the authority of the Directors. They were aware of his making those representations, and approved of his doing so. Mr. DeBlaquiere and others of the Directors informed witness that the contract had been let agreeably with these representations. These representations turned out to be unfounded; witness heard that the contract had afterwards been changed without the knowledge or consent of the Municipalities, and from his own personal knowledge he can state that such was the fact as far as the Municipality of Woodstock was con-Witness was surprised to find that the contract had been thus changed. and a knowledge of this fact occasioned much excitement and annoyance in the Municipalities. Complained to the Directors and told Mr DeBlaquiere that it was a breach of faith. There was a public meeting shortly after, at which Mr. De Blaquiere said he was sorry that it had been done, but an extended charter was to be applied for, and when it was obtained there would be sufficient means found to go on and complete the work. Ever since the work has been a source of trouble and vexation to the Municipalities, and the opinion prevails that through those means the charter and road will be lost; thinks that more than one of the Municipalities has confidence in Mr. Buchanan and some of the other Directors; mentioned to the Municipalities that there was stock taken, but does not think that that was an inducement to them to grant loans, because it was well known that some of the parties subscribing for that stock had merely done so to save the charter; mentioned to some of the Reeves that so soon as other stock was subscribed the parties holding the stock would transfer it to others; knows nothing of the personal or pecuniary considerations connected with the change of the contract; knows the Young brick-yard spoken, it was of very small value in 1852; should say, to the best of his judgment, it was worth from £40 to £50 per acre, and that was before the rise of property, and his opinion is as to the value of the land without any improvements; at the time of Mr. DeBlaquiere's purchase, thinks there were an old frame dwelling house and outhouses on the land; there were no improvements made between the time of his purchase and the time of the sale to the *Company; does not know when he made the purchase; has no personal knowledge nor information derived from the parties interested, as to the alleged pecuniary consideration given by Buchanan to DeBlaquiere; there never was, that he is aware of, any moneys other than the moneys of the Municipalities raised by the Directors of the Company for the purposes of the Road excepting one or two hundred pounds From all witness knows of the affairs of the Company he should say they were mismanaged; for the services rendered by witness he has never received any moneys. excepting four or five dollars for the hire of a horse and buggy. 

[In answer to Mr. DeBlaquiere.]

In speaking of the mismanagement of the Company he has special but not exclusive reference to the breach of faith which led to all the subsequent difficulties; does not remember any meeting at which a detailed statement of the affairs

of the Company was made; remembers sales of lands made by Mr. Hatch, in 1854; does not remember the prices, they ranged from two to six and seven dollars a foot and upwards.

[In answer to Mr. McClenaghan.]

Remembers on his return from the mission to the Municipalities a report being presented by the Directors; knows the statements made in that report were untrue; can produce a copy of that report; that report stated that there was £60,000 stock in the hands of responsible and reliable parties. Remembers of a proposition made by Mr. Zimmerman to purchase a part of the road. The only safety for the interests of the Town of Woodstock, with regard to this proposition, was in the Directors; the Directors had an interest in protecting Woodstock; could not say that he had confidence in them but the contrary. Recollects a proposition of Mr. Zimmerman to take the whole road and give the Municipalities bonds on the Southern Road for £75,000; a meeting was held at Woodstock to consider the proposition and its decision was favorable to it. It was said that that decision was obtained through the influence of Mr. DeBlaquiere, but does not remember whether or not he spoke for or against it; witness opposed it; considered it a sacrifice of the interests of the Municipalities.

[In answer to Mr. DeBlaquiere.]

The report he refers to was made after the Municipalities were first solicited for aid.

The Committee then adjourned.

FRIDAY, 15th May, 1857.

Committee met.

#### MEMBERS PRESENT:

MICHAEL H. FOLEY, Esq., in the Chair:
MR. EPHRAIM COOK,
MR. FRAZER,
MR. CHRISTIE,

Mr. Southwick.

THE evidence of yesterday was read.

Mr. William Gray, cross-examined by Mr. W. L. Smart. Secretary to the Company.

Do you consider that the private speculations, over which the Company had no command, along the line of road, were prejudicial to the road generally?—I believe the conduct of private speculators along the road has had an influence with regard to the arrangements that might have been made between the Company and Municipalities, and the parties desiring to have the control of the road. I believe the Municipalities had to make larger sacrifices than they would otherwise have done; that if it had not been these influences the Municipalities would have disposed of their interest in the Board at part.

Did you obtain reports alluded to by Mr. McClenaghan yesterday from the printer's office; and did you leave Woodstock for Walsingham intending to distribute them through the Municipalities?—Yes.

Did you distribute them, and if not, why?-I did not distribute them, because

in reading them over, I found they contained nonsense and falsehood.

When you met Mr. De Blaquiere did you point out these errors to him, and what did he say?—I showed the reports to Mr. De Blaquiere;—pointed out to him wherein they were untrue; and he quite agreed.

From this conversation did you infer, that he was a party to this Report, and knew what was contained in it until you showed himit?—From this Report I did not think he was a party to it, but that it was the first time he had seen it. It was signed by Col. Light, as President, and N. N. Light, as Secretary.

[By Mr. Ephraim Cook.] Did you consider there was any extravagance in the expenditure of the Municipal Loans?—I believe there was extravagance on the

part of the Directors in the purchase of station, and salary of officers.

What influence did Mr. DeBlaquiere bring to bear on the people of Woodstock to induce them to accept Mr. Zimmerman's first proposal?—I could not say from my own knowledge that Mr. DeBlaquiere used any influence on Mr. Landon, but he (Landon) and two or three others were the cause of it. I understood that Mr. Landon was the paid agent of the Company, and such was generally understood.

Did you ever receive any money other than the \$5 or \$6 mentioned yesterday

either directly or indirectly ?- I never did to my knowledge.

From what you know of Landon's services, do you think the sums mentioned by him in his evidence of yesterday as having been received by him were sufficient remuneration?—For the services rendered by Mr. Landon I consider the sums mentioned by him yesterday, as received by him, were more than sufficient remuneration—he might have rendered services I knew nothing of.

(At this stage of the proceedings, application was made by Mr. Smart, on behalf of the Woodstock and Lake Eric Company to adjourn until to-morrow; which, being submitted to the decision of the Committee was unanimously refused. Mr. Smart made a further application, that the Company be heard by Counsel before the Committee, which application was also on the like submission unanimously refused.)

Isaac Buchanan, Esq., examined: - Resides in Hamilton, and is a Director of the Woodstock and Lake Erie Railway and Harbor Company. In July last became connected with the Amherstburgh and St. Thomas Railway Company, in order to offer the stock of that Company to the shareholders of the Great Western The value of that charter consisted in securing the ex-Railway Company. tension comprised in the Woodstock and Lake Erie to the East, at the Suspension Bridge, and witness made an arrangement, that on condition of his being shown on the 7th of August, at the election of Directors of the St. Thomas and Amherstburgh Company at Amherstburgh, to be in possession of the west of St. Thomas,—the eastern line should not be given to Mr. Zimmerman. Mr. Zimmerman was to be allowed to control the line east of St. Thomas, if he succeeded in getting the control of the Amherstburgh and St. Thomas. In these circumstances a proposal was made to witness by Mr. J. B. Van Voorhis, or Mr. John L. Hodge. Witness cannot remember which first spoke to him, but the proposition, which was afterwards in writing, was signed by Van Voorhis, and witnessed by Hodge. The object of the proposition was as witness has stated above, and had in view, especially to make sure that the money advanced by the Municipalities would retain any security, which could arise from the Woodstock and Lake Erie Railway being found associated under any circumstances with the through line. The proposition was as follows: in writing:

Proposition of J. B. Van Voorhis to Isaac Buchanan:

"That Mr. Buchanan, on getting unquestioned possession of the Amherstburgh and St. Thomas Railroad, say before 14th August, shall be prepared to pay one hundred thousand dollars in cash, besides the small sums paid up on the private stock of the Woodstock and Lake Erie Road in consideration of the following: The whole shares held in the Woodstock and Lake Erie Railway will be transferred into the names of such persons as Mr. Buchanan may point out, and such persons as Mr. Buchanan may nominate will be appointed Directors of said Company; and if Mr. Buchanan insists on it, we are also to furnish him with undertakings by the

"various Municipal bodies who hold the Company's bonds to the effect that they will agree not to convert these bonds into shares, but will within six months be prepared to receive cash for them at par, or at any time hereafter to exchange them for bonds of the Great Southern Railway. "Hamilton, 5th August, 1857.

(Signed,) "J. B. VAN VOORHIS."

"JOHN L. HODGE, Witness.

Witness's reply in writing was as follows:

"Hamilton, 5th August, 1857.

"J. B. Van Voorhis, Esq.,

"Sir,—On behalf of yourself and friends interested in the shares connected with the Woodstock and Lake Eric Railway and Harbour Company, whose Charter I am at present striving to get control of, I promise you on my arriving at the control of the direction of the Amherstburgh and St. Thomas Railway, which I promise to do upon the seventh current, to pay over to such parties as do give me the control of the Woodstock and Lake Eric Railway and Harbour Company, the sum of £25,000 currency. The details of this agreement are in a paper headed 'Proposition by J. B. Van Voorhis to Isaac Buchanan.'

"I am, Sir,
"Your obedient servant,

(Signed,) "ISAAC BUCHANAN."

Witness desired to control the Woodstock and Lake Erie Railway, for the bona fide purposes of enabling the Great Western Railway to subscribe the whole stock, namely, one million of pounds currency; and the parties with whom he negotiated were prepared to do so, on his paying as he did, in the case of the Amherstburgh and St. Thomas, the first instalment of £100,000. He found, however, that it would be safer for him to take over to himself the power of allocating these shares than to allow the then present holders of the stock to subscribe the Since consummating the arrangement at Amherstburgh, a circumstance in London, England, connected with some Bills of Exchange, drawn by the Great Western Railway, in payment of station grounds on the Sarnia branch, had shown some little appearance of the rise of an opposition party within the Great Western Railway, and it was a great object with witness to contract his responsibility to the smallest sum he could. The arrangement contained in the proposition of Mr. Van Voorhis was carried out, and the whole £25,000 paid over by witness to Mr. Henry DeBlaquiere, although the shares transferred to witness were only those already subscribed, belonging to the parties for whom Mr. Van Voorhis acted, being eighty shares, or £2,000 on which there was paid but £200. Witness now found, for the first time, that Van Voorhis was not himself a shareholder, but the parties who transferred the stock to witness, pursuant to the aforesaid proposition, were Mr. Edmund Deeds, D. S. McQueen, Judge of the County Court of Oxford; J. G. Vansittart, Arthur Farmer, W. L. Smart, and Henry DeBlaquiere; witness was not aware till the time of the transfer, who the parties were, or whether he was in communication with any Director of the Company. He knew that the parties communicating with him must have spoken to three out of seven of the Directors, so far as to get their consent to retire from the Board. There were in the Board already. a majority, or four out of the seven, friends of witness, whom he could trust as trustees for the Great Western Railway, namely, Andrew Thompson, J. G. Wilson, J. H. Cornell, and Hugh C. Barwick, but witness insisted. that every Director should be made agreeable to witness, and declined the negociation on any other footing, Has no sources of knowing who shared the

Has heard that Hugh C. Barwick, Mr. De Blaquiere. Deedes, and Judge McQueen, knew nothing particularly of the negociation and received no share. This is mere hearsay. Who got it, he don't know. He This transaction, nor none of the circumstances paid the amount to DeBlaquiere. connected with it, were mentioned on the Books nor at the Board. Merely knew Judge McQueen and Mr. Farmer very slightly, and had never seen DeBlaquiere, to his knowledge, until the time of the closing of the negociation, or at the earliest on 7th August. The other Directors, namely, J. G. Wilson, Andrew Thompson, J. H. Cornell, and Hugh C. Barwick, did not sell their shares, and neither asked nor received any premium thereon. They received no consideration of any kind for assistance given to witness in carrying out his plans. After the arrangement with DeBlaquiere was completed, the Directors of the W. & L. E. Company, of which witness was then President, issued a circular to the Municipalities, of which he believes the following to be a copy:

### CIRCULAR

By the President and Directors to the Municipal Councils.

W. & L. E. R. & H. Co., Woodstock, Woodstock, Aug. 11, 1856.

SIR.—We have to intimate to your Municipality the reconstruction of this Board, and we are happy to inform you that the W. & L. E. R. & H. Co. being placed in a solvent position, is prepared, independently of the assistance contemplated by the late Act, to pay all the interest due on the Company's Bonds to your Municipality, and all the Company's other debts at once.

We take the earliest opportunity of making known to you the altered circumstances of this Corporation, that you may at once disallow the By-law which you

have published, as now unnecessary.

And, we may mention, that we have no doubt that the capitalists of England who now control the stock, will enable us to proceed at an early day with the work on the line from Woodstock to Port Dover, as well as the whole Great South Western Railway from Amherstburgh to the Suspension Bridge, which is now also controlled by them.

We are, Yours respectfully,

> ISAAC BUCHANAN, President. HUGH C. BARWICK, Vice President.

Andrew Thompson,
John H. Cornell,
J. G. Wilson,
Andrew Smith,
Gilbert Moore,

Directors.

The By-law referred to in this circular was one which was before the rate-payers and had been adopted by the several Municipal Councils interested, in pursuance of the Act of last session for transferring the road to Miles O'Reilly, according to an agreement attached to said Act. The reason for refusing to accept the aid from the Municipalities was, that the experience of the Great Western Railway had been against any advantage arising from allowing any of the Municipalities to interfere in the direction of the Company, so that it seemed an object for witness and those acting with him, not to lay themselves under any obligations to the Municipalities. These By-laws were all withdrawn or become inoperative in consequence of this circular. The interest of the Municipalities, due up to 1st of

January, 1856, was paid, amounting to £11.600. That is all the interest that was paid. The other promises made in this circular were not fulfilled. J. B. Smith. Esq., M. Q. P., the London Chairman of the Great Western Railway, had three or four years before originated the idea of building a second track for the Great Western on the Southern charters, and he (Smith) wrote to the Vice-President in Canada immediately on hearing that witness had succeeded in securing the Western charter, expressing his own thanks, and assuring witness, and those acting with him, that when the London Board should meet on the following Tuesday they would receive a vote of thanks and approval of what witness had done, which would in due time be confirmed at a meeting of the shareholders. In the meantime, however, Mr. Brydges the Canadian Managing Director of the Great Western, had taken sides with Mr. Zimmerman, who was opposing witness. Mr. Brydges had written to London impugning the motives of witness and Vice-President. Mr. Radcliffe, who was acting with witness, as well as those of all the other Canadian Directors who were all acting with witness, as far as they legally could as Directors, namely the Mayor of Hamilton, Henry McKinstry, and Colonel Gourley, there being no other Canadian Directors in this country at that time. On the Friday on which Mr. Smith, the chairman, wrote to Canada as above mentioned, Mr. Peter Buchanan was in London, and slept that night at the house of Mr. Gill, another Director and now President of the Great Western Railway. Mr. Peter Buchanan was not told of the correspondence alluded to or of any intention to dishonour certain bills, which Mr. Radcliffe had drawn on the London Board, otherwise he would have remained in London till the next Tuesday's meeting of the Board, and would have telegraphed to Mr Harris, the then President of the Company, who was then in Liverpool, to be also present, when, with Mr. Smith, a majority of the London Board would have sustained the Canadian Board in securing the Southern charters.— Without the least suspicion of the course intended by Mr. Robert Gill in conjunction with Mr. Beatty, another Director whom witness's friends had got appointed to the Board for the express purpose of securing justice to Mr. Brydges at a former period, Mr. Peter Buchanan left London on Saturday. On the Tuesday, Mr. J. B. Smith found himself overruled by Mr. Gill and Mr. Beatty, who refused to accept bills for £40,000, which Mr. Brydges had written was the money of the Great Western Company misappropriated to purchase shares in the Southern Line. Mr. Smith protested against the course taken, and refused to continue to act with Mr. Gill and Mr. Beatty, and also complained of Mr. Harris and Mr. Peter Buchanan having, through our confidence in Mr. Gill and Mr. Beatty, neglected to be present, and in disgust he tendered his resignation, which Mr. Gill and Mr. Beatty on the moment availed of the opportunity to accept. Thus terminated the Directors of the Woodstock and Lake Eric Company's abilities to carry out the promises of the Circular of the 11th August, addressed to the Municipalities, and they consequently never were carried out. Mr. Gill and all other persons of influence in the Great Western Railway had up to that time acquiesced in the policy of getting possession of the Southern Road, admitting the building of it to be a mere question of time. The time had come when the Great Western, by asking for a second track, had deprived themselves of any plea of justice in longer resisting the building of the Southern line, and the shareholders seeing the building of it inevitable, although the Great Western as a Company could not legally move in the matter until a Board elected by the Southern Board could be got to amalgamate the two charters, and it was supposed unanimous in approval of the London chairman, Mr. Smith's views.

[By Mr. Southwick.] Were you instructed by the English Board or Canadian Board of Directors to take the steps you did to obtain control over the Amherstburgh and St. Thomas Company, and also the Woodstock and Lake Erie Company?—I was not instructed by either the English or Canadian Board

to take any steps to obtain the Southern charters, but all the Canadian Directors present, except Mr. Brydges, approved of the steps I took, supposing that all the English Directors were committed to the policy, and believing that every influential shareholder, both in Canada and England, held the same policy.

The gentlemen associated with witness in the direction of the Woodstock and Lake Erie Road agreed with witness in the propriety of transferring both roads, the Woodstock and Lake Erie and the Amherstburgh and St. Thomas, to the Great Western. Believed then, and believes now, that every intelligent shareholder of the Great Western must be in favour of his step, looking simply to the interests of the Great Western Railway. Witness thinks that, freed from personal considerations, the Great Western Railway would still be glad to adopt Mr. Smith's views, and will still endeavour to build their second track upon the Southern Line, although witness himself has not now any connection with the Great Western Railway, except as a private shareholder. That is not one of the objects witness now has in view in connection with the Woodstock and Lake Erie Road, although he rejoices in this or any other security that the road will be immediately constructed in one way or other. Witness founds his belief that the Great Western will still endeavor to build the Southern Road on knowing that it would be for the interests of the shareholders, and being aware that this is known by a great many, believes a great majority of the shareholders themselves. knows that a shareholder in Canada wrote, since the refusal of the Southern charter, to the Secretary in London, to ascertain if really there was any reasonable objection to the Great Western building its second track on the Southern Line, and that Mr Baker, the Secretary, replied that the Great Western Railway was still looking to build the Southern Road, and that their objection was its being forced upon them prematurely. Mr. Baker stated that they were aware that they could get the charters when prepared to build the road, which witness supposes was meant to be through Mr. Zimmerman. This information witness Witness believes he was told this by one of the has on the best authority. Directors of the Woodstock and Lake Erie Railway, who was in the Board subsequent to the 11th Aug., but who has since retired; but it was a matter of notoriety, and can be verified. Thinks this information is known to the present Directors of the Great Western. Witness resigned the presidency of the Woodstock and Lake Erie Company in January or February last, in pursuance of an agreement made in England with Messrs. Wythes and Zimmerman. Became a Director again after Mr. Zimmerman's death, in order to get through the work, without which he cannot get back his money. This and endeavouring to fulfil his agreements about building the road and otherwise, which Mr. Zimmerman had assumed, are the objects of his remaining a Director; Mr. Zimmerman's death prevented, until Mr. Morrison's appointment afterwards, any President being appointed. The present Directors are Thomas G. Ridout, residing at Toronto, President; witness himself, residing at Hamilton: Joseph A. Woodruff, residing at Niagara; R. G. Benedict, residing at Niagara Falls; James Kintrea, residing at Woodstock; James C. Street, residing at Hamilton, and Thomas Ridout, Junior, residing at Toronto. Neither one of these Directors, with the exception of Mr. Kintrea, resides in the Municipalities interested as bondholders, and not one of them has any official connection with the said Municipalities. The Directors must each hold five shares to quality them as Directors, amounting to £125 each, on which ten per cent must be paid. That ten per cent. has been paid for all these Directors by witness, and they all owe him the amounts respectively. Witness preferred their owing him these sums, and refused to receive them in cash, holding that Mr. Zimmerman ought to relieve witness under his agreement made in England on 26th September last, of the whole stock in both the western and eastern charters, and that witness could not be called upon to give up unconditionally, such a portion thereof as would give the control out of his

hands till paid for the whole. These Directors are, in fact, his mere nominees to secure to him the payment of his moneys and enable him to fulfil his engagements. The chief interest the present shareholders have is connection with the estate of Mr. Zimmerman, which is bound to witness under the agreement in England.

The Committee then adjourned.

Monday, May 18th, 1857.

Committee met.

#### MEMBRES PRESENT:

MICHAEL H. FOLEY, Esquire, in the chair:

Mr. Ephraim Cook,

MR. CHRISTIE,

Mr. FRAZER, and

MR. SOUTHWICK.

Isaac Buchanan, Esquire, re-called. Mr. Zimmerman's obligation to witness arose in the following way: Witness's movements never had in view depriving Mr. Zimmerman of a fair contract for building the Southern Road, to the offer of which witness always considered him (Zimmerman), entitled in lieu of the contract for doubling the Great Western's track, which work this Southern project was meant to supplant. When, therefore, the Directors in London of the Great Western Railway represented witness's action in Canada, witness at once ceased to oppose Mr. Zimmerman; having no object in doing so, the controversy with him having been in no way personal, but only as to whether he should be master or servant in the matter of the control to be given out on the Southern line by the Great Western Railway. Mr. Wythes, the best known Contractor in connection with the Great Western Railway, and who had built the Hamilton and Toronto Branch, was to have had a half share in the contract for doubling the track of the present line of the Great Western Railway. Witness's simple proposal to these gentlemen was that he would get out of their way and give them all the assistance he could since the Great Western Railway preferred this. Merely made this a condition that his outlay should be refunded to him gradually as the work advanced, and the agreement between them was embodied in a document signed by Messrs. Wythes and Zimmerman and Mr. Peter Buchanan at Liverpool, on the 26th of September. The agreement provides for the refunding to Mr. Buchanan, by Wythes and Zimmerman, of £25,000, which is the £25,000 paid to De Blaquiere by witness. amount paid by witness on account of the Woodstock and Lake Erie Railway and Amherstburgh and St. Thomas, including the above, was £52,000; £11,600 was for the interest of the Municipalities, £6,800 paid through the Woodstock and Lake Erie Directors for the debts of that Company, the balance of about £8000 was to cover preliminary expenses paid or expected to be paid. Of this witness has himself paid out about £3,000 in surveys, expenses to England by parties, witness himself, Mr. McLeod, Mr. Hodge and Mr. Wallace, as well as for expenses of Chancery proceedings and other necessary expenses in anticipation of the amalgamation. Witness intended to apply any balance to remunerate parties who have hitherto worked in the matter for an insufficient salary, trusting to him getting the Great Western Railroad to do them justice eventually. balance of £5000 has really not been paid at all. In the first place, witness intended to add to the remuneration of Mr. Wallace, Mr. Greer, Mr. Radcliffe, June, and such others as he supposed had drawn more than the small payments already made to them—then intended to give the balance to Mr. McLeod and Mr. Park, to apply to claims at Amherstburg, prior to witness's interfering with the Charter of the St. Thomas and Amherstburgh Road. These parties were not given to understand that they had any claim to this, but originally there was an understanding with William Wallace, John McLeod, and Theodore Park, that in case the Great Western Railway took the Charter, each of them should receive a proportion of £25,000 being 21 par centum on the capital stock of that company; it being arranged that each shareholder of the Great Werstern Railway who had £100 of stock in the Great Western Railway, should have it in his power to take the same stock in the Southern, about to be amalgamated with the Great Western Railway, and for this that he would pay £102 10s. for the £100 of nominal stock. This was to be paid to influential parties after the Road was opened, so as to secure their influence during its construction, and to deprecate their opposition in taking up the right of way. The original idea was to reserve £5000 of this for small expenses, and to give paid up shares to the extent of £5000 each, to four individuals, namely, William Wallace, John McLeod, Theodore Park, and Arthur Rankin, but with none of them was there any written agreement, except with Wallace, who, on transferring his shares, stipulated for a premium to the extent stated, and which witness agreed to conditionally, on the Great Western Railway carrying out the arrangement. Any arrangement with parties was previous to their connection officially, or as Directors with the Amherstburgh and St. Thomas Railway, and there was no arrangement whatever at any time with Directors of the Woodstock and Lake Eric Railway. Of course it was evident that three of the Directors of the Wood stock and Lake Erie Railroad must have agreed to retire, so that witness, for the Great Western Railway, could be put in possession of the control of that Company, and this in direct manner was the only way in which witness could have any knowledge that part of the stock which he was acquiring, was to be transferred by them, as he never had any direct communication with any Director on the subject. There was no inducement held out to the four remaining Directors of the Woodstock and Lake Erie Company, beyond the conviction held by every one, that the Great Western Railway, taking it up, was the only chance of the Road being built. There were no moneys paid to any of these Directors. There were no moneys paid at St. Thomas, nor any inducements held out to the parties, they having no stock of any consequence. There was sufficient paid in on stock for two or three parties in St. Thomas, who had subscribed £250, to enable them to qualify as Directors. Cannot say positively who the parties were. Cannot remember from the circumstance that the payments were illegally deposited in the wrong Bank, and therefore not considered payments. Is not aware of any inducement being held out that the whole stock would be paid. The temporary salary of the incumbent, Thomas Hodge, was £250, no part of which was paid, that witness is aware of, and the same or a similar amount to the Assistant Secretary, William McKay, no part of which was paid. Of course these parties had claims on the Company, and no part of what witness had referred to as preliminary expenses. The date of the arrangement as to the division of the £25,000 among McLeod and others, was on the 15th July, 1856, previous to the transfer of the stock to witness.

[By Dr. Southwick.] Did you in your endeavours to obtain the control of the Woodstock and Erie Road extensions, pledge yourself or make any arrangement as to the point on the Woodstock and Erie Road, from which the extension to St. Thomas should start?—No such pledge was made, in the negotiations, but on the new Board being appointed, it was strongly pushed that the majority of the Municipalities would support witness more strongly, if this Road came by Otterville, and it was understood that the Board would favor this. This was expressed in a circular to the Municipalities.

John B. Van Voorhis examined.—Resides at Woodstook, is a contractor. Remember making Mr. Buchanan a proposition in writing relative to his obtaining the control of the Woodstock and Lake Erie Railway, which witness presumes is the one put in by Mr. Buchanan in his evidence or a copy of it. Before making that proposition, had had conversation with Mr. Buchanan relating to it, and had called on Mr. De Blaquiere on the subject, but not on any of the other Mr. De Blaquiere did not authorize the making of the proposition, but in consequence of conversations had with him, witness did make it. Mr. De Blaquiere wanted some time to consider what he should do. Did not say that he wanted to communicate with any of the other Directors. Witness had no communications direct or indirect with any of the Directors but Mr. De Dlaquiere. After the receipt of Mr. Buchanan's reply to witness's proposition, he communicated with Mr. De Blaquiere. Was not present when the money was paid to Mr. De Blaquiere, but Mr. De Blaquiere told witness afterwards that it was all right. Do not know whether any of the Directors shared with Mr. De Blaquiere in this money. In consideration of witness's own services in connection with this transaction, he was to receive thirty-five miles of a contract. Witness became a contractor on Woodstock and Lake Erie in December, 1854, or thereabouts. Witness's contract was for grading, fencing, putting in sluices &c., in Woodstock to a little below Otterville. He did not complete his contract; because the work was stopped in the following October. Mr. Benedicts was the Chief, and Mr. Hodge the Assistant. The calculations of estimates were made by assistants, and by them delivered to Mr. Benedict, who gave them to Witness never knew the amount of work that was to be done, nor saw the schedule of prices. The amount of work done by witness was about \$50,000. which he was paid. Cannot tell what the contractor, Mr. Zimmerman, got for this, but was informed by the Assistant Engineer that Mr. Zimmerman had made 100 per cent. on it. Knew that Mr. Hodge felt annoyed at Mr. Zimmerman at the time, and thought he might have been told this to get up a little feeling between witness and Zimmerman. Most of the work done by witness is left in an unfinished state; so far as done, it was well done. Knows nothing of the circumstances under which Mr. Zimmerman obtained the contract. In answer to Mr. DeBlaquiere, witness thought that the best thing the municipalities could do was to accept Mr. Buchanan's offer. Still thinks it the best if he would carry it out, but knows he has not. Considered Buchanan's offer more favorable than the O'Reilly agreement as it existed at the time. Do not believe that the O'Reilly agreement would have been acceded to by the Municipality, whether Buchanan's offer had been made or not. There was a clause in the By-law submitted by O'Reilly, requiring the Municipalities to take the bonds of the amalgamated Company, or any other Company, and with that clause he does not believe the rate-prayers would have ratified it. Does not know whether or not he has seen the specifications attached to Zimmerman's contract—those attached to my part of the work were very exacting.

The Committee then adjourned.

Tuesday, 19th May, 1857.

Committee met.

### MEMBERS PRESENT:

MICHAEL H. FOLEY, Esq., in the chair:

MR. CHRISTIE,
MR. SOUTHWICK.
MR. FRAZER, and
Hon. Mr. Morrison.

William L. Smart, Esquire, Secretary to the Company, recalled: Produces copy of original stockbook—copy is as follows:

Copy of Stock of the Woodstock and Lake Erie Railway and Harbour Company.

We, whose names are hereunto signed in the annexed lists, hereby agree to become stock-holders in the "Woodstock and Lake Erie Railway Company," and to take the number of shares set opposite our respective names, and bind ourselves to make payments thereon, and do all other matters and things in relation to the same, required by the Act of Incorporation, or that may be required by the Board of Directors of the Company.

Woodstock, 1st July, 1848.

	,	50000	£250000

Statement marked A A, put in as detailed statement of expenditure up to 31st December, 1855. The amounts were examined by delegates from the municipalities, who sat five days on them. Cannot now tell to whom the item for printing, "£17 19s." in statement produced, was paid; cannot tell whether or not the books show to whom it was paid; at the time that item was paid was not Secretary. Mr. Barwick kept the books then. The item £69 3s. 5d., marked "incidental," is made up of several items. Thinks the books will show to whom the several amounts, making up this item, were paid. Gray was paid £4 3s. 3d. expenses to Port Dover; Arthur A. Farmer, £25 expenses to Quebec; postage, 19s. 6d.; expenses on breaking ground, (cost of luncheon at Matson's,) £39 2s. 6d. The incidental expenses of May, 1853, were paid to Arthur Torrence; expenses to Quebec, £25 2s. 6d.; telegraph, 5s.; galvanizing spades, £1 5s.; telegraphs, 10s.; expenses for June, telegraphs, &c., 10s.; Arthur Farmer going to Quebec, £25; "Progress" newspaper, 2s. 9d.; For July, D. S. McQueen, £1 5s.; Arthur Farmer, and William Gray, expenses to Otterville, £1 6s. 3d.; horse hire, £11

15s.; For August, stationery, £2 1s. 9d.; For October, Henry DeBlaquiere's travelling expenses to New York, £11 5s.; Rev. Mr. Landon, £25; postage, 21s.; John Thompson, attending municipal election, 10s.; Barwick, expenses to Cayuga, £4; Secretary's expenses to Port Dover, £1 12s. 3d.; Express Company, 8s. 7d.; Secretary's expenses at Otterville, 2s. 6d.; For November, Secretary's expenses to Otterville, 6s. 3d.; President's and Chief Engineer's expenses to Montreal, £18 10s.; maps, £2 5s.; telegraphic, £4 6s. do. 6s., Secretary's expenses to Niagara, Hamilton and Toronto, £6 8s. 6d.; printing, 10s.; Groble for table, £11 5s.; seal, 6s.; for getting safe in house, £2 10s.; books, £7 1s. 3d.; Secretary's expenses to Toronto, £5 17s. 6d.; wood crossing, £1 5s.; DeBlaquiere's and Secretary's travelling expenses, £3 17s. 3d.; For December—President, Directors and Secretary's expenses at Otterville, 7s. 6d., horse hire, £10 10s.; postage, £1 15s. 2d.; Secretary's travelling expenses, £5 13s.; S. Quinte, £1 2s. 6d.; Express Company, 11s. 6d.; casual, 2s. 6d. For January, 1854—Telegraph, £2 17s. 1d.; sundry expenses, 5s.; postage, £1 13s. 3d. The items under the head of "travelling and incidental" are composed all through the detailed statement AA, of items similar to the above, and are chiefly items paid the Directors, and officers' travelling expenses, postage and telegraph. There was land bought from three of the Directors, namely, Mr. Thompson, Mr. DeBlaquiere, and Mr. Wilson. The latter was in partnersnip with Mr. Walsh, and witness's impression is that the land was bought from Walsh. DeBlaquiere has been paid for land, £5250. The land bought from Mr. Thompson was sold cheaper than the market value. The cash book does not show what was paid to Mr. Thompson; can form no idea of what the amount was; it would not be a large sum. The agreement with Mr. Wilson and Mr. Walsh was at the rate of £50 per acre; thinks the amount purchased was about 8 acres, paid them £250. Harbour came into the hands of the Company on 27th June. 1853. There was agreed to be paid for it £12,000; it has not all been paid. The balance due to White & Cotton (£4590) is paid. The amount due the Government has not all been paid; there is about £6,000 due; what was paid was the moneys of the Municipality. The revenue of the Port Dover Harbour, clear of expenses, has been nearly £1000 a year. The receipts have been carried to the credit of the Company; cannot tell why the balance of £6000 has not been paid; has heard from DeBlaquiere himself that he was a co-contractor with Zimmerman in February, 1854, when the contract was let to Zimmerman; thinks DeBlaquiere has told witness that he received a sum of money about £6000 from Zimmerman, and Zimmerman's obligations for the balance of \$50,000. This was as witness understood, for his, DeBlaquiere's, share of the contract. (Col. Light's account is here produced by Mr. Smart, referred to in witness's evidence of 7th instant.)

I, Colonel Light, conscientiously believe the above sums given in my account are as correct as I can make them.

(Signed,)

A. W. LIGHT.

On the 27th of October, 1853, Mr. DeBlaquiere laid before the Board an agreement signed and sealed by John A. Axford, bearing date 21st October, 1853, whereby Mr. Axford offered to sell to the Company certain lands near Simcoe, for the price therein named, to which a memorandum was attached for the purpose of protecting the interests of the Agricultural Society, whose grounds were situated on the Axford property. This memorandum was signed by Mr. DeBlaquiere, but the proposition was signed by Mr. Axford. This propsoition was made in pursuance of a resolution by the Board, authorizing DeBlaquiere to see on what terms the land might be purchased. On the same day Mr. DeBlaquiere (he having previously entered into arrangements with Mr. Davis of Simcoe, as to the purchase of certain property in the vicinity of the town) informed the Board of the arrangement made by him, and proposed that if, on the Report of the Engineers, they should select a site for Depot, &c. on this land, he would be willing to give them as much land as the Engineer would deem necessary for that purpose. On neither of these propositions was there any action taken by the They run the lines, and all went through some part of Davis Board of Trade. Witness says that Mr. Hodge's statement on this subject is incorrect. At a meeting of the Board on the 15th February, 1854, (Mr. DeBlaquiere having, before this, abandoned his bargain with Davis, as shewn by a paper marked C., a copy of which is hereunto annexed) an offer was received from Messrs. Wilson and Walsh (who, in the meantime, had been the purchasers) for a sale of a certain portion of the Davis land for a station. A resolution was then passed, authorizing the President to purchase the necessary lands at £50 per acre—theright of way through the remainder of the property being given free. On the 8th of February, 1854, an agreement had been entered into with the Councils of Simcoe and Windham, whereby a joint station was to be located on the Windham side of Simcoc, and within its limits. The reason a new line was run about October 1854, was on account of the difficulty of dealing with Mr. Ritchie. The Board had received an application from Messrs. Van Norman and Kent. Has a report of the Chief Engineer dated 9th May, 1854, as to a change of route The paper marked D annexed, is that report. through Simcoe.

With reference to location of line at Woodstock through the eastwardly part of the town, witness states that by resolution of the Board of 15th February, 1854, the Engineers were directed to run a line through the eastwardly end of Woodstock, commencing at some point in the present located line in the Second Concession of East Oxford, running at about three or four miles from the point of the crossing of the Thames north, towards Stratford, and report to the Board at their next meeting, as to the capabilities of this route in comparison with the one

already run through the westwardly end of Woodstock. The paper marked E

annexed, is the Engineer's report upon it.

On this report the Board determined to adopt the route through the east end. Witness, on the 9th of June, 1854, purchased from Mr. Birtch thirteen lots adjoining of Mr. DeBlaquiere's brick-yard, for which he paid £1,375; these lots contained about 23 acres. Mr. Hodge and Mr. Charles DeBlaquiere were parties to the purchase. Mr. DeBlaquiere subsequently purchased Hodge's and Charles DeBlaquiere's share for £75 each; their shares were one-fourth each. Afterwards DeBlaquiere purchased witness's share at \$8 per foot: this was on the 1st October, 1856. Property is now lower than when witness purchased. Was present at meeting of 7th February, 1855: Mr. McClenaghan was present on behalf of the Press. Mr. DeBlaquiere stated to the meeting, with reference to alleged change of contract, what follows: "He drew the attention of the Municipal representatives at the present low price per mile at which the contract had been taken, contrasting it with the ruinously high price per mile at which it was originally proposed to let it." Mr. McClenaghan, in his paper of 28th February following, in reporting this meeting, says:—

"Had there been mismanagement in the directory—had there been aught in the line adopted to create a feeling of hostility towards the Company—had their been extravagance in the contract or neglect of the trust, that might reasonably, be laid to the charge of the members of the board of Directors, we would then suppose reasons might exist to operate against that further assistance solicited."

"With a knowledge of their true position, and with a consciousness that under all circumstances every thing that was done, was done for the best, the Board of Directors called together the representatives of the various municipal bodies,

"and fully and freely laid before them their condition."

"At that meeting we were present. We watched narrowly the conduct of the Directors, for we confess we entertained the popular notion as to the expenditure of the funds of the company. Others, doubtless prompted by the same spirit of strict enquiry, were equally anxious. The representatives of Simcoe and Woodhouse, and the Deputy Reeve of Windham, were most pertinacious in their enquiry; and the same might be also said of the representatives of Woodstock and Norwich, Contracts, agreements, receipts, and expenditure were all thoroughly canvassed, and we believe we hazard nothing in saying that whatever were the opinions of individuals at the commencement of the conference, there was but one feeling ere the meeting broke up—that of entire satisfaction, so far as it was in the power of the Board to manage."

The meeting was unanimous in approval of Zimmerman's contract, and after Mr. DeBlaquiere had spoken, several of the Directors stated that they agreed with what he had said. Each Municipality was represented. Knows Valentine Hall; he is a grocer: knows nothing of his means.

Henry DeBlaquiere, Esq., to the question,—Did you at any time receive a sum of money and certain obligations from Mr. Zimmerman, amounting in all to \$50,000 or thereabouts, in connection with certain transactions referring to Mr. Zimmerman's contract with the Woodstock and Lake Erie Railway Company?—Witness admits that he had an interest with Mr. Zimmerman to the extent of one fifth in the Woodstock and Lake Erie and its extensions, and that he, at various times, received from Mr. Zimmerman sums of money, partly on account of the rofits of the contract, the balance under an agreement made with him in 1855, ancelling witness's interest in said contract, the last obligations connected with which were paid on the 26th July, 1856, as shewn by a receipt setting forth the assignment to him, and now in possession of his estate. In all, these moneys and

obligations amounted to \$50,650, which he stated about \$24,000 was witness's one fifth of the profits of the work already done. Zimmerman's reasons for requiring witness to give up his interest were given him about the time of the first negociations with the Municipality, and were to the effect that the arrangements were such as would require the unfettered control of the whole contract. Witness also admits receiving from Mr. Isaac Buchanan \$100,000. Received this for complying with Mr. Buchanan's proposition as set forth in the correspondence of Mr. Van Voorhis and Buchanan. Mr. Buchanan having on his part agreed to assume the entire responsibility on behalf of the Great Western of all the indebtedness of the Woodstock and Lake Eric Railway, and fulfil the conditions of the bonds given by the Directors to the Municipalities, as embodied in a letter addressed by him to the Directors before becoming a member of the Board. None of the other Directors or shareholders shared with witness in this \$100,000. The other stockholders transferred their stock, some of them to witness, before this transaction, others to Buchanan's nominees, after it. Mr. Farmer, Mr. McQueen, Mr. Vansittart, Mr. Smart were those who transferred to witness. Witness paid them for this transferring to him 10 per cent. on their stock. That was the only consideration they received. Witness always held control of the stock in his own name. Mr. Farmer was aware of the negociation while it was going on. Mr. McQueen had come into the Board shortly before with the understanding that he was to refire when the Directors with whom he was considered to be personally liable on his original stock subscription deemed it advisable he should do so. The Young brickyard witness purchased on the 1st of January, 1853, for £970, besides £80 he paid for fencing and £50 paid for improving it. Sold  $6\frac{35}{100}$  acres for £5,250 in May, 1854, on a valuation based on sales of property made in the immediate vicinity of the property sold by him and connected with it.

C.

Know all men by these presents that a certain agreement, entered into on the 21st day of October last between Robert W. Davis and Henry DeBlaquiere, for the sale to the said Henry DeBlaquiere by Robert W. Davis of part of lots Nos. 1 and 2 in the 14th concession in the Township of Windham, has this day been cancelled and annulled by mutual consent, the said Henry DeBlaquiere forfeits the first payment of twenty-five pounds made by him and all liabilities and obligations on either side, in respect of said agreement ceased between said parties, to as full an extent as if the same had never existed.

In witness whereof the parties hereto have set their hands and seals, at Rowan Mills, this 14th day of December A. D., 1853.

In presence of

DUNCAN CLARK.

ROBERT W. DAVIS. HENRY DE BLAQUIERE

### ENGINEER DEPARTMENT,

Woodstock and Lake Erie Railway and Harbour Company, Woodstock, May 9th, 1854.

To the President and Directors of the Woodstock and Lake Eric Railway and Harbour Company.

In accordance with instructions communicated to the resident Engineer by the Secretary of the Company, under date of 15th April, the grading upon that portion of the line of your Railway between Stations 1673 × 69 and 1830 × 32, through the Town of Simcoe, has been discontinued, and a new route, passing through or "skirting Simcoe on the South West," has been surveyed, and I beg leave to report upon the same as follows, and to submit the following profile, table of grades and lineal arrangement in connection with the same, designating the lines as the "old route" and the "new route"

The new route is shewn on the map by a heavy line in red tint diverging from the old line on Lot No. 14 in the second concession of Windham, and again inter-

secting it on Lot No. 4 in the fourth concession of Woodhouse.

The new route is 873 feet longer than the old. By using grades that are practically the same in working the road, the amount or quantity of work will be about the same upon either route, but the character of the work will be materially changed, as will be seen by the following letter from the contractors, to wit:

# [COPY.]

## Woodstock, 4th May, 1854.

Six:—In answer to your favour of this date in regard to the contemplated change of line at Simcoe, we beg leave to say that we have no objection to its being done on condition that the Company pay us for the work already done, viz: one third of a mile of grading on the present line, and any extra price we may be required to pay our sub-contractors for excavation on the new line in consequence of its increased length of haul, which from a careful examination of the profile will be an average haul of about 4000 feet in about 60,000 yards, which is worth at least say ten cents per yard, and on which amount and price we are willing to compute the same. The Company to allow us for the additional length of the new line at the same rate per mile as the balance of the line under the contract. The Company of course to pay any damage that may have occurred to the sub-contractors in consequence of the suspension of the work during the pendency of the contemplated change.

Very respectfully your obedient servants,

SAML. ZIMMERMAN & CO.

R. G. Benedict, Esq., Chief Engineer, Woodstock & Lake Erie Railway & H. Co.,

Estimating the cost upon this basis, which I consider reasonable and fair, the new route will cost more than the old one, as follows:

For	d of mile of grading as per contract,	<b>\$4000</b>
66	additional length of line,	4629
66	extra haul,	6000
	<u> </u>	

\$14,629

Besides this tangible amount, another, in my opinion, more important question should enter into the comparison of the relative merits of the routes, and should not

be overlooked by your Board in arriving at a conclusion as to the most advantageous route for your adoption, which is, in looking forward to an extension of your road East and West as forming a portion of the Great Southern Railway line from the Suspension Bridge to Malden, connecting with the Michigan Southern Rail-Road at the latter point, and the numerous roads now built and terminating at the former.

There can hardly be a doubt at the present time that this great line through Canada will be chartered and built within a year or two, and as the value and importance of it, is entirely dependent upon its power to compete with its rival on the South shore of Lake Erie, or in other words upon its grades and lineal arrangement, whereby the rate of speed is governed or controlled, it should be the first object of your Board so to locate that portion of it covered by your charter that any future

survey or examination cannot make it desirable to adopt another route.

Having this object in view, I have revised and modified the grades and lines from Otterville to the intersection of the Dunnville route near Simcoe, several times, and thereby increased the amount of work very materially since the preliminary The change of route contemplated through Simcoe, besides increasing the distance makes it necessary to run the line through the, and upon one of the streets of that town to avoid heavy land damages, which is very objectionable in a road when speed is of prime Importance, not merely from the liability to accidents and 3 the loss of time, which cannot be avoided in such a location, but from the disposition that is in all cases manifested to annoy, restrict and extort from any company so situated by Municipal Councils; in fact it has now become a settled point with engineers; who have experience in those matters never to occupy a highway or street with their line of road unless an absolute necessity exists, neither is it clear by any means that the Company have the power to occupy a street unless some important engineering? difficulty prevents their finding a line elsewhere. The counsel of the London and Port Stanley Railway, Mr. Galt, has given his opinion within the last fortnight to that Company that they had not the power under the Act to occupy one of the streets of London without they could show by their engineer that a necessity existed for so doing, and as the same gentleman is Counsel for your company, he would most undoubtedly, say the same in this case.

After a careful examination and consideration of all the circumstances and points, as your Engineer, I should decidedly recommend that the route should not be changed, even should the amount on the old line somewhat exceed that on the

new.

All of which is most respectfully submitted.

ROSWELL G. BENEDICT,
Chief Engineer,
W. & L. E. R. & H. Co.

E.

To Messrs. A. A. Farmer,
Edmund Deedes, and
Hugh C. Barwick.

Committee to decide upon station grounds at Woodstock.

Gentlemen,—I herewith submit a comparative estimate of the cost of the two lines, designated the "East" and "West" from the diverging point in the main line on lot number 19 in the second concession of the Township of east Oxford to the west side of Dundas Street in the Town of Woodstock, including the grading of the station grounds on both routes as represented on the map accompanying.

### West route.

153,738 yards exeavation,	\$3~,434 50
1,800 feet additional length of superstructureat \$10,400 per mile	3.545 00
200 rods of fence additional	200 00
	\$42,179 50
$East\ route.$	
65,062 yards excavation at 25 cts.	\$16,265 00
	\$25.014.00

leaving a balance in favor of the east line of \$25,914. To this difference in cost should be added the expense of working and keeping in repair 1800 feet of road, amounting yearly to the sum of \$300, or an increase in cost of \$5000 making the total difference \$30,914.

Without taking into account the increased expense of constructing and working, I consider the east route the proper and most preferable one for the station or

depot of the Company at Woodstock, for the following reasons:

The west route in approaching the track of the Great Western Railway from the north and south is concealed by the bank on either side of the excavation of the latter road, and a train leaving the station of the Great Western Road going west could not see one entering or leaving the proposed station grounds of the Woodstock and Lake Erie road in time to prevent a collision.

Owing to the grade of the Great Western Railway at this point descending towards Cedar Creek immediately after leaving the Freight house of that Company, it would be still more difficult to prevent accidents and in my opinion forms one of the principal objections to the West route, which is agreed in by Mr. Reid, Division Engineer of the Great Western Railway with whom I passed over both lines, and who unhesitatingly gave his opinion in favor of the East route over the West without the knowledge of their comparative cost.

The position of the grounds on the East route is much in their favor, as they can be apparached on both sides, and from Dundas street easily, without heavy expense in forming streets, which is not the case in the west, and so far as the general prosperity of the Town is concerned, I do not know of any point that could be

selected to subserve it better.

Respectfully submitted.

ROSWELL G. BENEDICT, Chief Engineer.

No. 3.

Copy of a letter from Mr. Benedict to Mr. Hodge, in regard to Station, &c.

Hamilton, Oct. 28th, 1843.

JOHN L. HODGE, Esq.,

MY DEAR SIR:

On our way down from Woodstock to-night, Mr. Farmer informed me that the depot at Simcoc was fixed on the Farm of Mr. Davis, and that you had recommended it, and said that there was no other proper place for it in the vicinity of that Town, and in consequence of it Mr. DeBlaquiere and himself had purchased the farm. This is the first instance I have ever known of a depot being fixed without a consultation with the Chief Engineer, and before a line was located; but without reference to the selection, I am anxious to know how you can make it agree with the conversation we had together yesterday on that subject, when you expressly stated to me that the level grade directly in rear of Mr. Campbell's house on the opposite side of the pond was the proper place for it, and where it would accommodate the Town best; and why you recommended this location so far from the business centre of the Town, and why no mention was ever made of the conversation to me, even after I told you of the purchase of Mr. DeBlaquiere.

Yours truly,

ROWSELL G. BENEDICT.

# TORONTO:

PRINTED BY JOHN LOVELL, YONGE STREET.

# Proceedings of Standing Committee on Railroads, &c., in relation to the Great Southern Railway.

## MINUTES OF EVIDENCE.

Thursday, 7th May, 1857.

## COMMITTEE MET.

#### MEMBERS PRESENT:

HON. SIR ALLAN MACNAB, BART., CHAIRMAN.

Mr. Bellingham,

Mr. Bowes,

Mr. Brown,

Mr. Bureau,

HON. MR. Atty. Gen. CARTIER,

Hon. Mr. CAUCHON,

MR. CHRISTIE,

MR. CLARKE,

MR. DALY,

MR. A. A. DORION,

Mr. A.A. I Mr. Foley,

Hon. Mr. Lemieux,

Hon. Mr. Atty. Gen. MACDONALD,

MR. MONGENAIS.

Mr. Angus Morrison,

HON. MR. JOSEPH C. MORRISON,

MR. PAPIN.

MR. RANKIN,

Mr. SIMARD,

Hon. Mr. Spence,

MR. WHITNEY, and

Mr. WILSON.

The Committee took into their consideration Bill (No. 253) to incorporate the Great Southern Railway Company.

The Preamble being read,

Arthur Rankin, Esq., (a Member of the Committee,) appeared and addressed the Committee in support of the same, and prayed the Committee to be heard by Counsel, on the part of the Petitioners for the Bill.

Ordered, That Counsel be heard.

A. 1857

John O'Connor and Frank Powell, Esquires, appeared as Counsel on the part of the promoters of the Bill.

William Sladden, Esq., (Parliamentary Agent,) appeared on the part of certain Petitioners against the Bill, and prayed to be heard by Counsel.

Ordered, That Counsel be heard for Petitioners against the Bill.

Henry Eccles, Esq., Q. C., as Counsel for Isaac Buchanan and others, appeared and addressed the Committee, in opposition to the said Preamble.

Skeffington Connor, Esq., Q. C., also appeared on the part of other Petitioners against the Bill.

Alexander MacDonell, Esq., called in and Examined;

[By Counsel against the Bill.]

Ques. 1. Are you a Solicitor in Chancery, and have you been engaged in and suits respecting the Amherstburgh and St. Thomas Railway Company, if so state what has been done?—Ans. I am a Solicitor in Chancery, and have filed a Bill in the name of the Amherstburgh and St. Thomas Railway Company against Wallace and others; I got my instructions from Mr. O'Reilly, of Hamilton, acting on behalf of the late Mr. Zimmerman, and parties interested in one of the Boards of Direction. It is stated in the Bill, and I understood the fact to be so, that the suit was authorised by the Board of Directors, with which Mr. Zimmerman was connected, and also by the Provisional Directors. The main object of the Bill is to set aside the election of Directors, of the Board of which Wallace was one of the parties, who have all put in answers to the Bill, I think after the return of Mr. Zimmerman from England.

(Here Witness withdrew, with an instruction from the Committee to hand in his reply to the question in writing.)

The Committee deliberated and adjourned until 11 o'clock A. M. to-morrow.

Friday, 8th May, 1857.

#### COMMITTEE MET.

#### MEMBERS PRESENT:

HON. SIR ALLAN NAPIER MACNAB, BART., CHAIRMAN.

Mr. Bellingham,

Mr. Bowes,

MR. BUREAU,

MR. CHRISTIE.

Mr. CLARKE,

Mr. Folly,

Mr. Mongenais,

Mr. Angus Morrison.

Hon. Mr. Joseph C. Morrison,

Mr. PAPIN,

Mr. RANKIN,

Hon. Mr. Robinson,

MR. SIMARD,

Mr. James Smith,

HON. MR. SPENCE,

Mr. WHITNEY, and

Mr. WILSON.

The Committee resumed the consideration of Bill (No. 253) to incorporate the Great Southern Railway Company.

On motion of Hon. Mr. Morrison,

Ordered, That for the convenience of the Members of the Railroad Committee, the evidence shall be taken by a Sub-Committee, consisting at least of four Members, to sit from day to day between the hours of 10 and 2 o'clock. All disputed points on the part of the promoters or opponents of the Bill to be reserved for the full Committee.

John H. Greer, Esq., called in and Examined.

[By Counsel against the Bill.]

- Ques. 2. Are you acquainted with Mr. Buchanan and Mr. Rankin?—Ans. Yes.
- Ques. 3. Did you at any time last year hold any communication between these gentlemen in respect to the Amherstburgh and St. Thomas Railway?—Ans. I did.
- Ques. 4. At what time were those communications held, and what position did Mr. Rankin then hold in the Company?—Ans. It was between the 25th July and the 1st August; he was one of the Provisional Directors.
  - Ques. 5. Where did you meet Mr. Rankin?—Ans. I met him at Windsor.
- Ques. 6. What was the occasion of your going to Mr. Rankin, and by whose directions did you go?—Ans. I went there on the occasion of enlisting his goodwill and services for the Great Western Railway, and at the instance of Mr. Buchanan.
- Ques. 7. What took place when you so met him?—Ans. I first said to Mr. Rankin that I had come to see him on Railroad business from Mr. Buchanan; of course he was aware that there were important movements, and that he (Mr. Buchanan) would be desirous of his co-operation with him. I then asked him in what position he stood as regarded the opposite party to us, if he

were disentangled from Mr. Zimmerman and free to act with us. His answer was yes, that he was. I then reiterated that Mr. Buchanan would be very much pleased, as well as the friends of the Great Western Railway, if he would co-operate with him, and that that gentleman had sent me to him, he being one of the original promoters of the scheme of the Southern Road, that in a remunerative point of view he would be placed on as favorable a footing as other gentlemen who were similarly situated. Mr. Rankin naturally wished to know what that meant, I told him that there would be a fund accruing from two millions of stock, which would produce to Mr. Rankin something like £5,000. Mr. Rankin looked upon that proposition, I might say, with contempt; he looked to a different state of things altogether than a paltry £5.000; his object was to obtain a contract for the construction of a portion of the road, which ought to yield him £30,000 or £49,000. Mr. Rankin remarked that he considered, under the circumstances, that he was as well entitled to such favors as foreigners. I then said I had not any doubt on my mind that Mr. Buchanan and his friends would have pleasure in furthering his views in that respect as far as in their power lay, but at that stage of the business they could not talk on the matter of contracts. I then found it impracticable to accomplish the object of my mission or any part thereof, and mentioning to Mr. Rankin that I might shortly see him again, we parted.

Ques. 8. Did you then communicate with Mr. Buchanan —Ans. I then returned to Hamilton and orally communicated to Mr. Buchanan the result of my interview with Mr. Rankin, and which was as heretofore stated.

Ques. 9. Did you again meet Mr. Rankin. If so, when and where, and at whose request?—Ans. I again waited upon Mr. Rankin at his own locality, Sandwich, on the 1st of August, by request of Mr. Buchanan.

Ques. 10. What took place at your second interview with Mr. Rankin? Ans. I told him that I had again waited upon him at the request of Mr. Buchanan, to endeavor to obtain his co-operation, and hoped that something could be done. Mr. Rankin said that he thought something might be done: there existed a matter of dispute between the Great Western Railway and himself concerning the sale of a water-lot on the Company's Depot at Windsor. T said as I was ignorant of the ficts of the dispute I wished he would explain them to me. Mr. Rankin then said that he had sold the Company the said lot at a price that was very dissatisfactory to him. That he had endeavored through the Courts of Law, I think, on two occasions to dissolve the bargain, in vain. Mr. Rankin then added as a proposition, that if the Company would cancel that purchase and leave the value of the lot to arbitration, he would be content and meet our views as originally proposed. I then said that I thought I could take upon myse f to settle it as it could not involve a large sum, probably not more than £500 or £600. Mr. Rankin demurred to that proposition on my part, and added that the arbitration was what he wanted. I then said, as I was very anxious to further the closing of the matter, I would telegraph Mr. Buchanan on the subject. I accordingly wrote a telegraph at that time in Mr. Rankin

presence and which I read to him, to Mr. Buchanan at Hamilton, and which is as follows:

Windsor, August 2nd, 1856.

Isaac Buchanan, Esq.,
Hamilton.

An unsettled old sore exists between Company and Mr. Rankin about 403 feet front on the depot ground now in their use, Lot No. 86: Mr. Rankin is perfectly willing to submit this matter to arbitration in the usual way; an acquiesence will dispel all hostility and secure the entire friendship of Mr. Rankin. I strongly recommend the adoption of this course.

Answer me as soon as possible with authority to close.

(Signed,)

JOHN H. GREER.

Ques. 11. What answer did you receive from Mr. Buchanan, and did you communicate the same to Mr. Rankin?—Ans. I received Mr. Buchanan's reply on my departure for Hamilton, and which was:

"Hamilton, 2nd August, 1856.

"John H. Greer, "Windsor.

"I shall get the Railway to re-consider Mr. Rankin's case, on conlition that no sum over £500 be claimed.

(Signed,)

"ISAAC BUCHANAN."

The above telegraph I mailed at Windsor for Mr. Rankin, with the following letter:

"Windsor, 2nd August, 1856.

"A. Rankin, Esq., "Windsor.

"My dear Sir,—As I am not sufficiently acquainted with the actual position of your case I cannot urge you, but trust the offer is such as you can accept of, in order to have the vexed question set at rest, and this once done the bone of contention is removed, and most particular care, you may rely upon it, to deal with you otherwise in a way that must render you satisfaction, and to feel and know that you have been liberally and suitably acknowledged in the great South-western project, will be scrupulously observed, I therefore trust you will feel yourself justified in acceding to Mr. Buchanan's proposition, and that you will have the bond made out and sent down on Monday for ratification. In any case let me hear fully from you on Monday morning.

"In haste, yours sincerely,

"JOHN H. GREER."

The following telegraph I received at Hamilton previous to my departure for Windsor on this occasion, and which I should have mentioned sooner:—

"Windsor, 1st August, 1856.

"John H. Greer,

"Hamilton.

"Have got the Amherstburgh Book; if you choose to come up I will talk to you.

"A. RANKIN."

On Monday morning early I sent the following telegraph:-

"Hamilton, 4th August, 1856.

"To A. Rankin, Esq., "Windsor.

"Mr. Buchanan was unacquainted with transactions. I am authorized to inform you that the matter may be settled according to my telegraph to Mr. Buchanan on Saturday, which I read to you. In general matters Mr. Buchanan will be proud to act with you cordially and confidentially.

(Signed,) "JOHN H. GREER."

The same day (subsequently) I received the following telegraph from Mr. Rankin:

"Windsor, 4th August, 1856.

"To John H. Greer, Esq.

"Nothing but bond to arbitrate, under seal of Company, without condition as to price demanded, will do.

"A. RANKIN."

Ques. 12. Had you any further correspondence with Mr. Rankin?—Ans. No; that closed Mr. Rankin's correspondence and mine on the subject.

Ques. 13. When did you next see Mr. Rankin?—Ans. At Amherstburgh, on the 7th August.

Ques. 14. State what then took place between you?—Ans. I had no business interview with him on that day.

Ques. 15. What took you to Amherstburgh that day?—Ans. I went there for the purpose of being present at the election of Directors of the Amherstburgh and St. Thomas Railway.

Ques. 16. State what took place that day?—Ans. On the morning of that day hand bills were issued by us that a meeting of Shareholders would take place at noon, at the Town Hall, for the purpose of electing a Board of Directors. Copies of said hand bills were delivered by myself to the four provisional Directors, viz.: Messrs. Rankin, Larwill, Southwick and McBeth, who were considered to compose the conflicting interests. At noon the meeting was held, and a Board of Directors chosen, consisting of the following gentlemen:—John McLeod, Walter Wallace, Joseph B. Berthelot, William Duff, Theodore J. Parke, John G. Kolfage, James Dunbar, John W. Ridsdale, and Peter Menzies, after which John McLeod, Esq., was appointed President, and Theodore J. Park, Vice-President of the said Board of Directors.

And then he withdrew.

Adjourned until to-morrow at 10 o'clock, A.M.

Saturday, 9th May, 1857.

### SUB-COMMITTEE MET.

#### MEMBERS PRESENT:

MR. BELLINGHAM,
MR. BOWES,
MR. BUREAU,
MR. CLARKE,
HON. MR. JOSEPH C. MORRISON, and
MR. RANKIN.

Isaac Buchanan, Esq., called in and Examined;

[By Counsel against the Bill.]

Ques. 17. How did you become connected with the chartered Companies forming the Southern Chain of Railways, and with what object?-Ans. I got hold of the Stock of the Great Southern Railways to offer pro-rata to the Shareholders of the Great Western Company. I had been associated and working for the Great Western since its commencement, or eleven years ago, having moved the first resolution at the meeting originating it in 1845. I felt my interest and those of Hamilton identical with the Great Western Railway. Those co-operating with me had for many years objected to the construction of the Southern Road until the success of the Great Western Railway was secured. We had done this for the single reason that the Great Western Line was the best for the interior of Canada, and would never have been built if not built before the Southern Line which clearly is the best through route. The time had come when we had given up the feeling that with justice we could oppose the construction of the second line. This fact was yielded publicly by our application for a Charter to build a second track on the Great Western Line; for this second track the money was ready in London, and my movement in connection with the Chartered Companies forming the Southern chain of Railways had the simple object of getting for the Sharcholders of the Great Western Railway, the option or privilege of building their second track along the vastly more favorable line of the Southern Railway, instead of along the present circuitous and difficult line of the Great Western Railway. Mr. Harris, my partner, then President of the Line, was then in England, and from my long connexion with the Company, and having been a Director, it was thought that I was the natural party to move. I had the concurrence of all the Directors of the Great Western in Canada except Mr. Bridges. I had no object of personal profit; and any advantage which could be derived from purchasing lands at the various stations along the line, or any balance remaining which might be made of the two and a-half per cent. which had been laid aside for premiums to be given to the original promoters, or parties controlling the charters, were all to be applied to create a fund for annuities and other reliefs to the decayed or distressed employees of the Railroad; this fact is known to many parties outside the Great Western Railway, and among the rest to Mr. J. W. Keating, one of the petitioners for the

Great Southern Railway Charter now before the Committee. Mr. J. W. Keating was at that time engaged in the purchase, for the Great Western Railway, of station grounds on the Sarnia Branch, and was expected to be employed in the same duty along the Southern Line which led him into a knowledge of the views of Mr. Radcliff, the Vice-President of the Great Western, and of myself.

Ques. 18. How did you propose to effect that object as to the Eastern and Western lines?--Ans. The capital of the Western end was £1,000,000 currency, and the capital of the Eastern end was the same amount. We proposed to amalgamate the Eastern and Western Charters. The Acts of 18 Vic., chap. 179, and the 19 Vic., chap. 74, and the 18 Vic., chap. 183, provided for an amalgamation of these two charters with the object of forming one entire chain of Railway to constitute a through Southern Line. The Municipalities mentioned in the Act 19 Vic., chap. 74, passed last Session, have passed By-laws to carry out provisions of said amalgamation, and the Boards of Directors in the Companies formed under both the Eastern and Western Charters have passed amalgamation agreement. Serious difficulty was for some time experienced in arranging the amalgamation arising out of the rival protensions to the Presidency of Mr. Rankin and Mr. McLeod, who severally represented two rival Boards, elected under the Charter of the Amherstburgh and St. Thomas Railway. The late Mr. Zimmerman and I eventually fell upon a plan to get quit of this. We arranged that the Directors of the Woodstock and Lake Erie or Eastern link of the chain should pass the amalgamation agreement, and that this should be accepted and passed by both the rival Western Boards, thus giving no pre-eminence to either.

Ques. 19. Did you directly or indirectly reserve to yourself any interest?—Ans. I have answered this question before. I again repeat that in no way whatever did I expect to receive any personal advantage in connexion with the possession of these Charters, and that as a matter of fact I have received no such advantage.

Ques. 20. Did you ever offer Mr. Rankin fifty thousand pounds to secure his interest in promoting your views?—Ans. The only approach to such a thing was that he asked for a contract and that I said that no doubt the friends of the Great Western Railway, if we built the line, would have or receive a preference of the contract, he asked what I supposed Mr. Zimmerman would make by the contract of which we had given him a preference on the fifty miles of the Sarnia Branch of the Great Western Railway, Mr. Rankin repeated that he desired a contract; I said that I would introduce him to a practical contractor, who I had no doubt would co-operate with him, and through whom I had no doubt such an amount could be secured of him. I think I said the Company would do every thing they could to make the arrangement as secure as possible for Mr. Rankin, and with the concurrence of the contractor alluded to, with whom he was to be connected, might stop from each payment a certain per centage. Mr. Rankin said that he did not wish any such arrangement, for that he desired to be a party to any contract in the ordinary way having all the risks as well as all the profits of a contractor. The other contractor alluded to was the only one who had been spoken to about the preference of a contract, and except with Mr. Rankin, such an agreement has not been entertained with any other person, the services of this other contractor, were that he had arranged to get the Great Western Railway, the control of the Eastern Charter, a thing necessary to be accomplished before we took the responsibility of acquiring the million of pounds of stock, created by the Charter of the Anherstburgh and St. Thomas Company. The agreement with this gentleman, with whom I supposed Mr. Rankin would be associated as a sub-contractor, will be the best means of explaining the agreement which I proposed on behalf of the Great Western Railway, to have with Mr. Rankin. The agreement with this contractor Mr. J. B. Van Voorhis, is thus alluded to in my agreement made in England with Messrs. Samuel Zimmerman and George Wythes, by which it was arranged that in consideration of my transferring to them all my interest in both the Eastern and Western links of this Southern Railway Chain, I should get the moneys outlayed by me returned, during the progress of the roads' construction and the agreements I had made with others carried out. "And whereas the said Isaac Buchanan has "engaged to give J. B. Van Voorhis a preference to make 35 miles of the Woodstock "and Lake Eric Railway, not including superstructure, providing no other person "shall be willing to undertake the same on lower terms." "Now this agreement "witnesseth that the said Samuel Zimmerman and George Wythes shall give J. B. "Van Voorhis preference of a contract for the construction of 35 miles of the Wood-"stock and Lake Eric section of the amalgamated line, not including superstructure, "provided the said Samuel Zimmerman and George Wythes cannot enter into a "more advantageous arrangement with other parties." There was no idea of giving Mr. Rankin a greater price than any other respectable contractor, the contract proposed was in fact a thing whose only value consisted in the contractor being in the hands of friends bound in honor to give him a contract at fair prices even although other parties knowing of this arrangement might try to get an advantage over him by tendering under the usual rates. Except what is included in the foregoing, I am not aware that any thing passed between Mr. Rankin and me which could give rise to the idea of my having the desire to bribe him to support the interest of the Great Western Railway. except that admitting as I do and have ever done, that he, like others, had promoted the charter of the Amherstburgh and St. Thomas Railway, I intimated to him as to the others my readiness to acknowledge his claims by allocating to him a fifth part of the premiums which the Great Western Shareholders were to pay, or £5,000 currency, which sum, however, he spurned as being altogether inadequate to his pretensions.

I have made advances to the two Companies on the faith of the amalgamation, about		0	0
	£96,951	7	6
I have, besides the foregoing, a responsibility to pay up the balance of shares subscribed in the Amhersburgh and St Thomas Railway for £500,000	£450,000	0	.0
And a responsibility to pay up shares in the Woodstock and Lake Eric Road for £2,250		0	0
	£548,95.1	7	.6

From my previous evidence it must be evident that I entered into this responsibility expecting to be immediately relieved of it by the Great Western Railway. I may also mention that I have found it impossible subsequently to get relieved from it, in consequence of interruptions to the amalgamation, first from Mr. Rankin's Chancery suit, and afterwards from his personal pretensions connected with the Charters, together with the bringing in by Mr. Rankin of the present Bill for a new Charter to cover the same ground pre-occupied by Charters in my possession, which, as I have explained, I have been always ready to give over to any parties who could immediately construct the road, without any remuneration in any shape to me personally.

Of this, Mr. Morrison produced the best evidence in his explanation, when he put in to the agreement in reference to the Amherstburgh and St. Thomas and Woodstock and Lake Eric Companies, gone into in Liverpool on 26th September last, between Messrs. George Wythes and Samuel Zimmerman, and my brother, Peter Buchanan, for me. I may mention that the evils flowing from the unfortunate causes alluded to are not confined to myself, but are felt by hundreds of customers and correspondents of mine in this Province.

Ques. 22. Is the line under contract?—Ans. The line from the Detroit River on the west to St. Thomas is under contract, being 135 miles; the line from Simcoe to the Suspension Bridge is also under contract, being about 70 miles, and the only part of the through line which is not under contract, is the line between St. Thomas and Simcoc, being about 40 miles. There is also under contract the cross-road from Woodstock to Port Dover, about 40 miles. And upon all these contracts there has been paid to the contractors £150,000, viz: £100,000 on the Eastern end of the line, and £50,000 on the Western end of the line.

Ques. 23. Has the Hon. J. C. Morrison interfered in these matters, and what was the amount of his interference?—Ans. On 7th August last, the day on which the election of Directors of the Amherstburgh and St. Thomas Railway occurred, at Amherstburgh, the Hon Joseph C. Morrison appeared with his friend, Mr. Zimmerman.

Mr. Morrison was also a very old friend of mine, and he explained to me, that he felt it his duty to disregard all other considerations, and to interest himself in the

transactions then going forward, on account of his being the representative of Niagara, which is so vitally interested in the Southern line being no longer delayed. It is to Mr. Morrison subsequently being willing for the same purpose, to become President of the Southern line, about to be amalgamated under one company, that we were indebted for the amalgamation being on the eve of consummation, when Mr. Rankin's present movement alarmed the Capitalists, whom we expected to induce to subscribe £300,000, and to pay £30,000 before the 19th of this month, as directed by the Act of the Woodstock and Lake Erie Railway. I may mention that Mr. Morrison has been most anxious to see all Mr. Zimmerman's agreements fulfilled, and in connexion with Mr. Zimmerman's Trustees, was willing on behalf of Mr. Zimmerman's estate, to claim nothing in the way of prospective profit. They were willing, if Mr. Zimmerman's agreements were fulfilled, to be satisfied to give up all interest in the line on the following conditions, viz: the re-payment of Mr. Zimmerman's advances, the completion of the line to the Suspension Bridge, and the manufacture of the Railway Stock at the Niagara works, at the usual prices: I understood, therefore, that Mr. Rankin's application for the fulfillment of Mr. Zimmerman's agreement with him was viewed favorably, and was not settled in consequence of some additional claim made by him, arising out of a sub-contract, or subcontracts which he had promised to other parties. Mr. Morrison has all along expressed himself most anxious to have Mr. Rankin satisfied, simply in deference to the late Mr. Zimmerman having made the agreement, although no man could have expressed more suprise than Mr. Morrison, on hearing after Mr. Zimmerman's death, that such an agreement existed.

Ques. 24. What has been the cause of the works on the line not being proceeded with, prior to Mr. Zimmerman's death?—Ans. The causes of the works on the line not being proceeded with, prior to Mr. Zimmerman's death, were the impediments thrown in his way to amalgamation; had these impediments not existed, we could have got the money to build the road in January last, in England; subsequent to that month, the money market in England has been in a declining state, and the money could not have been got. There is nothing to prevent the works being proceeded with, and immediately completed, the first moment there is an improvement in the money market in England, if the roads are amalgamated and no competing charter granted. I before mentioned the answer to this question, viz: that the impediments to amalgamation, or in other words, to the progress to the works have been the existence of the Chancery suit and the pretensions to the Presidency of the Company of the Amherstburgh and St. Thomas Railway Company of Mr. Rankin.

Ques. 25. Since his (Mr. Zimmerman's) death were negotiations renewed for the purpose of amalgamating and settling the differences of the three Boards?—

Ans. Yes; they were renewed and were successful, and the three Boards of Directors have actually passed the amalgamation agreement, which I beg to hand into the Committee as follows:

#### INDENTURE OF AMALGAMATION.

THIS INDENTURE, made the Tenth day of January,* in the year of Our Lord One Thousand Eight Hundred and Fifty-Seven, between the Woodstock and Lake Erie Railway and Harbour Company, of the first part; and The Amherstburgh and Saint Thomas Railway Company of the second part.

Whereas, by the Act of the Parliament of this Province, passed in the sixteenth year of Her Majesty's Reign, entitled "An Act to empower any Railway Comi pany whose Railway forms part of the Main Trunk Line of Railway throughout "this Province, to unite with any other such Company, or purchase the property "and rights of any such Company; and to repeal certain Acts therein mentioned "incorporating Railway Companies," it was amongst other things enacted, that it should be lawful for any two or more of the Companies formed or to be thereafter formed, for the purpose of constructing any Railway, which should form part of the Main Trunk Line of Railway contemplated by the Legislature in passing the Act of the then last Session of the Provincial Parliament, entitled "An Act to make "provision for the construction of a Main Trunk Line Railway throughout the "whole length of this Province," to unite together as one Company, or for any one of such Companies to purchase and acquire the property and rights of any one or more of such Companies: And further, that it should be lawful for the Directors of any such Company as aforesaid, to agree with the Directors of any other such Company or Companies, that the Companies they respectively represent should be united as one Company, or that one of such Companies should purchase and acquire the property and rights, and take upon itself all the liabilities of the other or others; and by such agreement to fix the terms upon which such union or such purchase should take place,— the rights which the Shareholders of each Company should possess after such union or purchase, the number of Directors of the Company after such union, and who should be such Directors until the then next election—the period at which such next election should be held,-the number of votes which the Shareholders of either Company should respectively have thereat,—and the Corporate name of the Company after any such union, - the time when the agreement should take effect, - the By-laws which should apply to the united Company,—and generally to make all such conditions and stipulations touching the terms upon which such union or purchase should take place, as might be found necessary for determining the rights of the said Companies respectively, and of the Shareholders thereof, after any such union or purchase, and the mode in which the business of the Company should be managed and conducted after any such union.

And whereas, by another Act of the Parliament of this Province, passed in the sixteenth year of Her Majesty's Reign, entitled "An Act to extend the provisions of the Railway Companies Union Act to Companies whose Railways in tersect the Main Trunk Line, or touch places which the said Line also touches,"

^{*} This is the date on which it was originally, at Mr. Zimmerman's request, passed by the Wood stock or Eastern Board, and sent to the Municipalities and Rate-payers for their sanction. It was assented to by both the Western Boards on the twenty-eighth day of April.

it was amongst other things enacted, that the Act passed in the then present Session of the Parliament of this Province, and entitled, "An Act to empower "any Railway Company whose Railway forms part of the Main Trunk Line of Railway throughout this Province, to unite with any other such Company, or to purchase the property and rights of such Company; and to repeal certain "Acts therein mentioned, incorporating Railway Companies," and all the enactments and provisions therein contained, should extend and apply to and include any Railway Company whose Railway intersects the Main Trunk Line of Rail way contemplated by the Legislature in passing the Act of the then last Session of the Provincial Parliament, entitled, "An Act to make provision for the "construction of a Main Trunk Line of Railway throughout the whole length of this Province," or touches any city, town, or place which the said contemplated Main Trunk Line of Railway also touches.

And whereas, by the Acts of the Parliament of this Province, passed on the thirteenth day of August, one thousand eight hundred and fifty-one, chaptered respectively seventy-three and seventy-four, the Great Western Railway is declared to be and to form part of the said Main Trunk Line of Railway: And whereas the Railways of the said Company, severally and both of them intersect the Great Western Railway, (being part of the said Main Trunk Line) and touch certain towns and places which the said part of the said Main Trunk Line also touches, that is to say, the Town of Woodstock, in the County of Oxford, and the Town of Windsor in the County of Essex :- And whereas, by another Act of the Parliament of this Province, passed on the first day of July, in the year of our Lord one thousand eight hundred and fifty-six, entifled, "An Act to "amend and extend the charter of the Amherstburgh and St. Thomas Rail-"way Company," it was amongst other things provided that the said last mentioned Company was thereby empowered to unite with any other Railway Company whose Ralway should intersect that of the said Company, or should touch a place which their road should also touch, and that to such union the provisions of the said Acts firstly and secondly above referred to, should extend and apply: And whereas the Railways of the said Companies, parties thereto, intersect each other at the Town of St. Thomas, and both touch that place:

And whereas, by the Statute of the said Parliament, passed in the eighteenth year of Her Majesty's Reign, entitled. 'An Act to amend the Charter of the Woodstock and Lake Eric Railway and Harbour Company," it was also enacted amongst other things, that the said Company should have power and was authorized in pursuance of any resolution to that effect adopted at a Special General Meeting of the Shareholders duly convened for that purpose, and by and with the consent of the Municipalities then or thereafter interested in the said Company as Bondholders or Shareholders, or a majority of them signified by resolution to that effect, to amalg mate and unite with any other Railway Company in this Province, or to lease or sell their line of road or any portion thereof, and appurtenances, or the stock thereof, to any such of er Railway Company, or to purchase, buy out, or lease any other such failway Company, or the stock thereof, the whole upon such terms and conditions as should be agreed upon, which said amal.

gamation, purchase, lease or agreement, such other Railway Company was there by fully authorized to effect with the said Company upon a resolution to be adopted by the majority of the Shareholders of such other Railway Company at a Special General Meeting to be convened for that purpose, and upon the effecting of any such amalgamation, purchase, lease, or agreement, all the rights, privileges and powers of the Company so amalgamated with, leased or purchased by the said the Woodstock and Lake Erie Railway and Harbour Company, or by such other Company so amalgamated with, leased or purchased, should be merged in the said Woodstock and Lake Erie Railway and Harbour Company, or in such other Company, and should be held and applied by them the Woodstock and Lake Erie Railway and Harbour Company, in their own name or in the name of such other Company, as should be expressed in the Articles or Deed of amalgamation executed by the amalgamating Companies to all intents and purposes, as if the same had been granted originally to the said Company whose names shall be retained and expressed in such articles of amalgamation, and in addition thereto.

And whereas, by another Act of the Parliament of this Province, passed the nineteenth day of June, in the year of our Lord one thousand eight hundred and fifty-six, entitled, "An Act to amend the Act of Incorporation of the Woodstock "and Lake Erie Railway and Harbour Company," it was further provided amongst other things, that if the said Company should amalgamate or unite with any other Company or Companies, as provided in the third Section of the said Act next hereinbefore mentioned, it should not be necessary to retain the name of either of such Companies, but the Companies so amalgamating or uniting might decide and agree upon such name for the amalgamated Companies as they shall please, and should specify or designate such name in the Deed of amalgamation or the agreement to amalgamate or unite, and after such amalgamation or union, such name should be the corporate name of the amalgamated Companies, and under such corporate name they should be invested with and might exercise and enjoy all the rights, powers, privileges, property, benefits and advantages, which otherwise would appertain to the amalgamating Companies. and to all and every of them if such amalgamation had not taken place:

And whereas the several Municipalities of the Town of Woodstock, the Town of Simcoe, the Township of South Norwich, the Township of North Norwich, the Township of Windham, and the Township of Woodhouse, are respectively interested in the said the Woodstock and Lake Erie Railway and Harbour Company as Bondholders; and the said Municipalities or a majority of them have, in the terms of the said Act of Parliament passed as aforesaid in the eighteenth year of Her Majesty's Reign, entitled, "An Act to amend the Charter of the Woodstock and Lake Erie Railway and Harbour Company," consented that the said Company may amalgamate and unite with the said the Amherstburgh and St. Thomas Railway Company, and after such amalgamation that the amalgamated Companies may amalgamate and unite with any other Railway Company, on the terms and conditions herein set forth:

And whereas the said Companies, in pursuance of resolutions to that effect, adopted at Special General Meetings of the Shareholders of the said respective

Companies, duly convened for that purpose, have determined and agreed under and in pursuance of the authority in that behalf, conferred in and by the said several Acts of Parliament hereinbefore mentioned or referred to, and every of them, and of all other power and authority with which the said Companies are or may be invested for that purpose, that the said Companies should amalgamate and unite together under and in the name of "The Great South Western Railway Company," upon the terms and conditions (amongst others) hereafter more fully set forth, and have agreed and determined upon the said name of "The Great South Western Railway Company," as and for the Corporate name of the said Companies when amalgamated:

Now this Indenture Witnesseth, 1. That the said the Amherstburgh and St. Thomas Railway Company and the Woodstock and Lake Erie Railway and Harbour Company, in pursuance of resolutions to that effect adopted at Special General Meetings of the Sharcholdsrs of the said respective Companies, duly convened for that purpose, and by and with the consent of the majority of the said Municipalities interested in the said the Woodstock and Lake Eric Railway and Harbour Company as Bondholders, (no other Municipalities being in any way interested in the said Company,) in consideration of the clauses, stipulations and agreements hereinafter contained, and under and in pursuance and in execution of the powers and authority in that behalf granted or conferred in and by the said several Acts of Parliament hereinbefore mentioned or referred to, and of all other powers and authority with which they are or may be invested for that purpose either by Act of Parliament or otherwise, do, and each of them with the other, doth hereby agree to amalgamate and unite together as one Company, (such amalgamation to take effect at the time hereinafter appointed and provided) under and by the name of "The Great South "Western Railway Company;" and they do hereby specify and designate the said name, to wit: "The Great South Western Railway Company," as and for the Corporate name of the said amalgamated Companies; under which said Corporate name they are hereby invested with, and shall and may exercise and enjoy all the rights, powers, privileges, property, benefits and advantages which otherwise would appertain to the said amalgamating Companies, and to 'all and every of them, if such amalgamation had not taken place.

- 2. And whereas, the Capital Siock of each of the said Companies is One Million Pounds currency; it is hereby declared, determined and agreed that the Capital Stock of the said amalgamated Companies, under the said Corporate name of "The Great South Western Railway Company," shall be and is hereby fixed and settled at the sum of Two Million Pounds currency, being a sum equal to the combined capital of the said Companies before their amalgamation.
- 3. And whereas the shares in the Capital Stock of both of the said Companies before the said amalgamation, were twenty-five pounds currency each; and the several Shareholders in the said Companies, by the charters of the said respective Companies, and the several Acts of Parliament amending the same, were each entitled to one vote for each share; it is bereby further determined, declared, and agreed that every person or party having stock in the said the Woodstock and Lake

Erie Railway and Harbour Company, in shares of twenty-five pounds currency each, immediately before and at the time of said amalgamation, shall, immediately upon and after such amalgamation, be and become Shareholders of an equal num ber of Shares of the Capital Stock of the said amalgamated Companies; and on the application, in writing, of such person or party, the proper entries shall be made in the Stock Books or Share Registry of the said amalgamated Companies, showing such person or party to be the proprietor of the said Shares; and, on surrendering and yielding up to the Secretary or other proper Officer of the said amalgamated Companies, the Scrip (if any) formerly issued for such Stock or Shares, such person or party shall be entitled to receive the Scrip of such amalgamated Companies for such Stock; and that every person or party having Stock in the said the Amherst burgh and Saint Thomas Railway Company, immediately before and at the time of the said amalgamation, shall, immediately upon and after such amalgamation, be and become Shareholders in the Capital Stock of the said amalgamated Companies of the like number of shares so previously held in the said Company; and on application in writing, of such party or person, the proper entries shall be made in the said books of the said amalgamated Companies, showing such person or party to be the proprietor of such shares; and on surrendering and yielding up to the Secretary or other proper Officer of the said amalgamated Company, the Scrip (if any) formerly issued for such Stock or Shares, such person or party shall be entitled to receive the Scrip of the said amalgamated Companies for the Stock or Shares to which he may then be entitled, so that the Shares in the Capital Stock of such amalgamated Companies shall be of one uniform amount, and each of such shares shall be of the amount of twenty-five pounds currency.

- 4. And it is hereby further determined, declared and agreed, that each and every Sharcholder of Stock in the said amalgamated Companies, shall be entitled as well in the Election of Directors as upon all other occasions, to one vote, and no more, for each full Share of twenty-five pounds currency held by such Shareholders whereon ten pounds per centum shall have been paid up; and this provision shall apply as well to Stock or Shares to be subscribed after such amalgamation as aforesaid shall have been effected as to other Stock, provided always, that notwithstanding any thing herein contained, no Shareholder shall be entitled to vote on any Share in respect to which he shall be in arrear for calls made thereon; and if it shall happen that in converting the Stock or Shares held by any Shareholder before the said amal gamation, in either of the said Companies into even Shares of twenty-five pounds currency each, in the Capital Stock of the said amalgamated Companies, there shall remain an integral sum or portion of such Stock of an amount under twenty five pounds, the proprietor of such Stock shall be entitled to hold the same as an integral portion of a share, and to claim and receive proportionate dividends thereon; but such integral portion of a share shall not entitle the holder thereof to vote by reason or on account thereof, either in the election of Directors or otherwise.
- 5. And it is hereby further determined, declared, and agreed that aliens as well as British subjects, and whether resident in this Province or els where, may be Shareholders in the said amalgamated Companies; and all such Shareholders shall

be entitled to vote on their shares equally with British subjects, and shall also be eligible to office in the said amalgamated Companies.

- 6. And it is hereby further determined, declared, and agreed that the number of Directors for such amalgamated Companies (to be elected by the Shareholders) shall be eleven, who shall elect yearly from amongst themselves a President and Vice-President; and that the Directors of such amalgamated Companies shall, at and after the expiration of the current year, be elected yearly, on the second Tuesday in July, in each year, or at such other time at such place as the Directors for the time being shall, by Resolutions or By-laws, from time to time appoint or direct; and that the first Election of Directors for such amalgamated Companies (by the Shareholders,) after the said amalgamation, shall take place on the second Tuesday in July, in the year of our Lord one thousand eight hundred and fifty-seven, or at such other time as the Directors of such amalgamated Companies, by Resolution or By-law, shall appoint or direct; the current year herein mentioned being the period from the time this agreement is appointed to take effect until the second Tuesday in July, one thousand eight hundred and fifty-seven, inclusive; and the Directors for the time being of the said amalgamated Companies are hereby invested with, and authorized and empowered, after the said amalgamation, to exercise as well in filling up vacancies in their Board and the making of By-laws as in all other matters and things whatsoever, all and every the powers and authority which the Board of Directors of either or both of the said Companies hereby agreeing to amalgamate, might or could, before such amalgamation, lawfully exercise; and that in all things touching or concerning the Election of Directors for the said amalgamated Comdanies not herein provided for, the provisions of the original charter of the said the Amherstburgh and Saint Thomas Railway Company, and of the several Acts altering or amending the same, shall govern and be in force.
- 7. And it is hereby further determined, declared, and agreed, that for and during the current year, that is to say, from the time this agreement is appointed to take effect until the second Tuesday in July, 1857, the following persons shall be Directors of the amalgamated Companies, that is to say, that Hon. J. C. Morrison, George Southwick, Geo. McBeth, Joseph Sudworth, Thos. G. Ridout, Isaac Buchanan Joseph A. Woodruff,

  John McKay, John McLeod, and Theodore Park.
- 8. And it is hereby further determined, declared and agreed that such of the By-laws of the said the Woodstock and Lake Erie Railway and Harbour Company as are not inconsistent with the provisions of this agreement, nor with the spirit and object of it, shall be in force and apply to the said amalgamated Companies; any or all of the said By-laws, however, may be repealed or altered, and other and different ones made, from time to time, by the Directors of the said amalgamated Companies, that after this agreement shall be appointed to take effect, the qualification of a director in the said amalgamated Companies, shall be stock held in said Companies; by such Director to the amount of £250 at the least, on which ten per cent, at the least shall have been paid up; and that a quorum for the transaction of business

shall consist of such number of the Directors as shall be fixed by resolution or blaw of the board of the amalgamated Companies, and until the number for a quorum shall be so fixed, a quorum shall be composed of a majority of the Directors.

- 9. And it is hereby further determined, declared, and agreed that, immediately on this agreement taking effect, and the amalgamation herein contemplated of agreed upon being accomplished, the said amalgamated Companies shall, and hereby do, under and in the name of "The Great South Western Railway Company," assume and undertake the performance, payment, and discharge of all the debts contracts, engagements, and liabilities of both the said Companies hereby agreeing to amalgamate.
- 10. And it is hereby further determined, declared, and agreed that, in consideration of the clauses, provisions, stipulations, and agreements herein contained, the said Companies hereby amalgamating or agreeing to amalgamate, do, and each of them doth hereby grant, hargain, sell, surrender, assign, transfer, and set over unto the said amalgamated Companies, by and in the corporate name of "The Great South Western Railway Company," and their successors, all and singular the houses, lands, tenements, hereditaments, premises, railways, harbours, docks, channels, creeks, wharves, piers, buildings, erections, works, ways, waters, franchises, easements, rights, privileges, powers, advantages, goods, chattels, stock, credits, contracts, property, assets and effects whatsoever, which they the Woodstock and Lake Erie Railway and Harbour Company and the Amherstburgh and Saint Thomas Railway Company respectively or either of them have, hold, claim, challenge, demand, exercise, use, occupy, possess, or enjoy, or are or may be entitled to: To have and to hold the same to the said amalgamated Companies, by and in the said corporate name of "The Great South Western Railway Company," and their successors forever, from and after the time herein appointed for this agreement to take effect; to be by them at all times thereafter, by and under the said corporate name. had, held, exercised, leanzed, dealt with, possessed, used, and enjoyed in as full and ample a manner as the said amalgamating Companies respectively, or either of them. could, might, or would be entitled to have hold, exercise, realize, deal with, possess, use, or enjoy the same, or any part thereof, if the said amalgamation had not taken place or been concluded or agreed upon.
- 11. And it is hereby further determined, declared, and agreed, that the said amalgamated Companies shall and will put that portion of their Railway from Woodstock to Port Dover in running order simultaneously with the rest of their line of Railway.
- 12. And it is hereby further determined, declared, and agreed that (subject to the conditions hereinafter contained) this agreement shall take effect, and the said amalgamation and union be and become complete, effectual, and perfected at twelve o'clock noon on the

In Witness whereof, the said the Woodstock and Lake Erie Railway and Hair bour Company, and the said the Amherstburgh and Saint Thomas Railway Company have caused their respective Corporate Seals to be affixed hereto, the day and year first above written.

Signed, Sealed, and Delivered, in the presence of

Two other copies of this agreement exist, one in the possession of each of the rival Boards, under the Amherstburgh and St. Thomas Charter, which have both passed it.

Ques. 26. What was the cause of the amalgamation not being completed?—Ans. The cause of the amalgamation not being completed is the reluctance formerly alluded to of the capitalists, who were expected to subscribe £300,000 in the Woodstock and Lake Eric Railway, and pay £30,000: this reluctance has been caused by the introduction of the new through charter by Mr. Rankin, and in present circumstances the holders of the £750,000 stock subscribed in the Amherstburgh and St. Thomas Railway, on which £75,000 has been paid, feel that it would be imprudent to consummate the amalgamation until they see Mr. Rankin's Bill thrown out, as if it passed they would find themselves not only deprived of the power of proceeding with the construction of the amalgamated railways, but they would also find that the amalgamation had effected nothing except amalgamating their large subscriptions and deposits now lying in the Bank with the large debts of the Woodstock and Lake Eric Railway. It is the opinion of the Sharcholders of the Companies to be amalgamated, that if the new through charter were granted no southern road could be built.

Ques. 27. Have the three Boards of Directors and the two Lines of Railway passed resolutions to perfect the amalgamation in accordance with the intention of their charters and the Act of last session authorizing the passage of By-laws by the Municipalities?—Ans. The three Boards have passed resolutions and perfected the agreement under the provisions of the Act of last session, and the assent of the Municipalities has been obtained by the passage, by the ratepayers, of a necessary By-law in each Municipality.

Ques. 28. Upon what ground did Mr. Morrison, as the friend of the Zimmerman Estate, press the claim of Mr. Rankin to be carried out?—Ans. Mr. Morrison pressed this simply out of respect to the late Mr. Zimmerman.

Ques. 29. Upon what conditions did Mr. Zimmerman's Estate decline taking a share in the contract?—Ans. I have already stated these conditions, viz.: the repayment of his actual outlay, the completion to the Suspension Bridge of the Southern Road, the construction of the rolling stock at the Niagara works at the usual prices, and the offer to carry out his agreement with Mr. Rankin, which was understood to be his only agreement in writing.

Ques. 30. Are you acquainted with the localities of the present line of road between the Detroit and Niagara Rivers, and also with that proposed by the new Bill?

Ans. Yes; since 1830 I have known them intimately a member of the present line of road between the Detroit and Niagara Rivers, and also with that proposed by the new Bill?

Ques. 31. State the difference of length between them, assuming the former to pass through Otterville and Simcoe?—Ans. The difference of length will occur only between St. Thomas and Simcoe; the difference in that space would be from three to five miles. There are deep ravines on the straight line, and it is impossible to build a road on the straight line. The difference between the straight line and a line by Otterville might be seven miles, but the difference between any practicable route and the line by Otterville will not exceed four miles.

Ques. 32. How much of the Woodstock and Erie road can be used in the through line proposed under the amalgamated charter?—Ans. About seventeen miles, two-thirds of which is already graded, and the bridges built. I may mention that the bridges are built along the whole thirty-nine miles from Woodstock to Port Dover, and two-thirds of the whole graded.

The hour having arrived for the Sub-Committee to adjourn,

The Witness withdrew.

Monday, 11th May, 1857. 10 o'Clock, A.M.

#### SUB-COMMITTEE MET.

#### MEMBERS PRESEENT:

Mr. Bowes,
Mr. Mongenais,
Hon. Mr. J. C. Morrison,
Mr. Papin, and
Mr. Rankin.

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance.

Isaac Buchanan, Esq., called in and Examination continued.

Ques. 33. Is it true, as alleged in the petition of Mr. Keating and others, that there was no prospect of a satisfactory adjustment of the difficulties alluded to therein, at the time of presenting that petition?—Ans. Subsequent to Mr. Zimmerman's death there has been the same progress which would have been, had he lived, and probably more.

This fact was so notorious, having been published in every newspaper in the country in consequence of a malicious cry having been got up, that in the pro-

gress of transactions subsequent to Mr. Zimmerman's death his interest or estate had not been so well protected as if he had been alive.

To shew, therefore, that in giving out the contract I had attended scrupulously to the interests of Mr. Zimmerman's estate, I have produced and published the following evidence of transactions connected with the giving out of the contract.

The first document is a letter written by me to the representatives of George Wythes, and Samuel Zimmerman, who jointly had gone into an agreement, which was produced by Mr. Morrison at the first sitting of this committee, for a contract to build the whole line from the Detroit to the Niagara River. This agreement was dated in England, at Liverpool on the 26th September last.

With a view to the actually giving out of the Western half of this contract I wrote to the representatives of these contractors about a week after Mr. Zimmerman's death, as follows:

Hamilton, 21st March, 1857.

To J. C. Street, Esq., representing Geo. Wythes, Esq., of Reigate, England, and Miles O'Reily, Esq., for himself, and as representing the late Samuel Zimmerman, Esquire.

Gentlemen,-

Mr. McLeod is here and has repeated the former assertion of the Amherstburgh Board of the Amherstburgh and St. Thomas Railway, that they are led to prevent me carrying out my brother's agreement with Messrs. Wythes & Zimmerman only by the indications given by Mr. Zimmerman, of his not being prepared to abide by the charters as to the Western termini.

He offers on behalf of that Board to re-enact the By-law to secure my property in the Railway, and, with my consent, to give a contract securing the road to go to Amherstburgh, this seeming to be the best, if not the only way to satisfy all parties.

In present circumstances you seem the proper parties to assume the contract, afterwards to be transferred to, or held for, the parties who are to carry out the agreement aforesaid, to secure my outlay and responsibility for the Railway.

By now taking this contract you have it in your power to receive for them the substance of that which my brother undertook to put into their hands.

I, therefore, now call on you to take the contract offered, and if you do not do so, with you, must remain the responsibility of refusing this practical fulfilment on my brother's part of the agreement aforesaid.

Lam, Gentlemen,

Yours respectfully,

ISAAC BUCHANAN

To this letter I received the following reply:

Hamilton, C. W., 27th March, 1857.

Isaac Buchanan, Esq., Hamilton, C. W.

DEAR SIR,--

We have to acknowledge your letter of 21st inst., and to express ourselves prepared to take a contract from the Amherstburg and St. Thomas Railway Company, for the purposes therein contained, and having especial reference to the fulfilment of your brother's agreement of 26th September last, with Messrs. Geo. Wythes and Samuel Zimmerman; we, therefore, now give you this letter to shew the understanding on which you assent to the Board of Directors of the Amherstburg and St. Thomas Railway Company giving us the contract about to be gone into.

We are, dear sir,

Yours respectfully,

M. O'REILLY.

JAMES C. STREET.

Accompanying the foregoing letters I had also published, for the satisfaction of Parliament and the public, before this Bill was introduced by Mr. Rankin, a copy of the proceedings of the Board in giving out the contract, as follows:

Resolution of the Amherstburgh and St. Thomas Railway Directors, at a meeting held at Amherstburgh, on the 28th March last. It was moved by J. W. Ridsdale, seconded by Theodore J. Park, and carried unanimously:

That the Company do now enter into a contract for the construction of the road with Messrs. J. C. Street and M. O'Reilly, the former representing George Wythes, Esq., and the latter representing himself and the trustees of the late Samuel Zimmerman, said contract being for the sum of eleven hundred and twenty-five thousand pounds, and that the President be authorized to sign the same and attach to it the seal of the Company.

I may mention that a similar contract was being prepared in Hamilton, for the eastern half of the line, to be given out by the Woodstock and Lake Eric Railway and Harbour Company, when I received a telegraph from Mr. Morrison mentioning that adverse proceedings to our charters were likely to be commenced in Parliament. These proceedings, as embodied in the present Bill before this Committee, have also been the cause, as I before explained, of the amalgamation not being completed and the work not being advanced.

Ques. 34. Were you a party to the suit in Chancery between the rival Boards of Directors?—Ans. No.

Ques. 35. Do you know whether or not the suit referred to has been settled or compromised, and if so, how, when and where? Ans. I know that the Board of the Amherstburgh and St. Thomas Railway, at its meeting on the day when the amalgamation act was consented to between the Amherstburgh and St. Thomas Railway, as represented both by Mr. Rankin's and Mr. McLeod's Board, with the Woodstock and Lake Erie Railway, the proceedings all were based on the understanding that that Chancery suit was withdrawn, but otherwise I have no means, as being no party to the suit, to know whether or not instructions have been given to the Solicitor on both sides to that effect.

Ques. 36. Do you know the petitioners for the Bill in question, or any and which of them?—Ans. I know J.W. Keating, but not the others.

Ques. 37. Are they in a position to comply with the requirements of the proposed Bill?—Ans. Certainly not, as far as I know of.

Ques. 38. Do you know any other matter or thing which is material to the question under consideration?—Ans. In thinking over the questions which I answered on Saturday, I feel anxious to explain that, though the share of £5,000 of the  $2\frac{1}{2}$  per cent. premium on the Capital Stock, which was proposed to be divided among the original promoters of the railway, was the only thing that I ever offered to Mr. Rankin: that I consented also, on behalf of the Great Western Railway, that we should re-open an arbitration, as desired by him, in the former decision of which he thought great injustice had been done him, and I thought some little injustice might have been done him. I should also wish to mention what made those acting for the Great Western Railway so anxious not to leave Mr. Rankin in the position of an injured man, even according to his own ideas of right and wrong.

The Great Western Railway had suffered severely in the matter of the land for their right of way, through the interference of parties pretending to be aggrieved, and Mr. Rankin, as Member for the County, had much in his power in this way.

He had also actually threatened that he would use his influence in this way along the whole line, and would make any company who would not connect themselves with him pay a hundred thousand pounds more for right of way than they would otherwise do.

This threat was made to my agent, Mr. Greer, and a similar threat reported to have been used to Mr. Zimmerman we believed to be the cause of that gentleman's anxiety to have Mr. Rankin's co-operation, as we did not at that time know of the agreement to give Mr. Rankin a share of the contract or £25,000. I am also anxious to state that the interference of Mr. Radcliff, as the Vice President of the Great Western Railway, and myself, to get the Southern line as the second track of the Great Western Railway, had two simple objects. We saw that the safety of the lives of the public, no less than the interest of the Great Western Railway, required that the Southern should not be a competing line. The Great Western Railway had cost double what it ought to have done, and even with the most brilliant traffic—

[Mr. Powell, (Counsel for the Bill,) here wished to have recorded, that Mr Buchanan's mode of giving individual matter of opinion or individual motive is not possibly admissable in this case, especially as connected with the Great Western Railway.]

## (Mr. Buchanan proceeded.)

could not be expected to yield the dividends which we knew were to be insisted on by the shareholders in England, without a delay in going on with the permanent bridges and other structures of the Great Western Railway, thus causing great risk to the lives of the public.

Then as regards the interest of the Great Western Railway we saw that it can never compete with the Southern line in carrying cheaply.

The Southern line, as a double track with permanent bridges could be built for less than the single track of the Great Western Railway now costs, by some thousand pounds.

This was the cause of our anxiety to see the lines united, and we intended to satisfy the public that no monopoly would be caused by arranging in the amalgamation agreement that any monies carned over ten per cent. should first be laid out on permanent structures and station buildings, and afterwards applied to the reduction of fares.

We believed that the Southern line could carry passengers and freight direct from the Detroit to the Niagara Rivers for one half of that the Great Western could carry it.

The expense of each train on the Great Western Railway is 6s. currency per mile, which is more than the average revenue of lines in England.

And as an engine on the light grades of the Southern line could draw double the weight that it could on the heavy grades of the Great Western Railway, the cost to the Railway would not be more than one half, even if the fact that a double track carries more than double a single track were not considered—

It is calculated that it will carry four times as much.

#### CROSS-EXAMINATION.

## [By the Counsel in support of the Bill.]

Ques. 39. In what Bank did the notices emanating from the Provisional Directors of the Amherstburgh and St. Thomas Company require the deposit money in the Stock to be paid; and were the terms of such notices complied with by Board representing the Zimmerman interest?—Ans. In the Bank of Upper Canada. Before the Amherstburgh Board there was no evidence of any except Mr. McBeth. I believe the Zimmerman money was deposited in the Zimmerman Bank. I only know this by hearsay.

Ques. 40. Without reference to outlay connected with dishonored paper or other collateral expenses, how much actual and legitimate cash expenditure has been made by you on account of the Amherstburgh and St. Thomas Road, or the Woodstock and Erie Road respectively, and if any, what actual cash have you outlaid on account of the expenses alluued to in the first part of this question?—Ans. I have had nothing to do with dishonered paper, and have not paid anything as expenses thereon, nor am I bound to pay any expenses thereon; the actual cash outlayed by me was stated in my evidence on Saturday in detail, except the sum of £3,000, which, I believe, will be about half for the one Company and half for the other, and consists chiefly of cost of preliminary surveys, expenses to England, and other preliminary charges.

Ques. 41. Has any part of the money placed by you in the Bank of Upper Canada, to the credit of the Amerstburgh and St. Thomas Railway Company, been chequed out, and by whom, or does the whole amount deposited still remain in the Bank, subject to the order of the Company, or to any order?—Ans. The money placed by me in the Bank of Upper Canada, remains untouched in that Bank. On the completion of the contract of the 28th March, to Mr. Wythes and others, a check for it was given to them, viz.: £50,000, it being the arrangement under that contract that this and all monies raised in England should lie in the Bank of Upper Canada, at the credit of an account to be called "the Trustees of the Contractors and Company of the Amherstburgh and St. Thomas Railway," these Trustees being named to be Peter Buchanan and myself as Trustees for the Company, and Thomas G. Ridout and George Wythes, as Trustees for the contractors, two residing in England and two in this Province.

Ques. 42. Who signed the check spoken of by you in your last answer?—Ans. The check spoken of was signed at Amherstburgh, on 28th March, by John McLeod, the President, by order of, and in the presence of, the Board of Directors after the contract of Mr. Wythes and others had been sealed.

Ques. 43. Was the Chancery suit still going on when the cheque was signed, and would the Bank have honored the cheque while it was known that the Chancery suit was going on?—Ans. Mr. O'Reiley, the Solicitor of Mr. Zimmerman, from whom the instruction to commence the Chancery suit had issued, had some days before written to Toronto to stop the Chancery suit, and we understood on the 25th March that it was stopped. The proof of this being our understanding, is that it was upon this distinct understanding that Mr. McLeod and his board proceeded in giving out the contract. After returning from Amhurstburgh to Hamilton, I heard that in consequence of the "cry" that the Zimmerman estate had not got fair play, it was doubtful to what extent Mr. O'Reiley's orders had been acted on in the matter of the Chancery suit. I have no knowledge of the Bank having an injunction put upon the money. I believe there was no injunction in this suit.

The latter part of the question being repeated, witness answered: "I cannot tell."

Ques. 44 By whose authority did Mr. O'Reiley write to Toronto to have the Chancery suit stopped?—Ans. I am unaware.

Ques. 45. Have you any and what knowledge of the facts connected with the Wallace subscription? Who instigated Wallace to subscribe? Had Mr. Merritt anything to do with the matter?—State all you know in relation thereto. Ans. I supposed that the subscription was quite undoubted up to the period when Mr. Wallace and I were in England. I had previously been told that imputations against it had appeared in some newspapers in Canada, but placed no weight on such reports. The best proof that I considered it good, is that I paid £50,000 on it as the first instalment, trusting that Mr. Wallace would alterwards transfer the stock to me, which he did, and this is the stock transfer for £500,000 Stock with £50,000 paid, (which is shown to the committee.) Upon the 10th of September, in London, I heard repeated the imputations as to the goodness of the subscription, and I immediately called on Mr. Wallace, who at once agreed to proceed to the Mansion House and verify his subscription for £500,000 before the Lord Mayor; proof of this from the Lord Mayor's office I beg now to hand into the Committee. It is as follows:

To all to whom these presents shall come, I, David Salomens, Lord Mayor of the City of London, in pursuance of an Act of Parliament made and passed in the fifth year of the Reign of his late Majesty King George the Second, intituled, "An Act for the more easy recovery of debts in His Majesty's plantations and colonies in America," and also in pursuance of an Act passed in the sixth year of the Reign of his late Majesty King William the Fourth, intituled "An Act to repeal an Act of the then present Session of Parliament, intituled an Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the State, and to substitute declarations in lieu thereof, and for the more entire suppression of voluntary and extra judicial oaths and affidavits, and to make other provisions for the abolition of unnecessary oaths," do hereby certify that on the day of the date hereof, personally came and appeared before me, William Wallace, named in the declaration hereunto annexed, being a person well known and worthy of good credit, and who did before me solemnly and sincerely declare to be true the several matters and things mentioned and contained in the said annexed Declaration: in faith and testimony whereof, I, the said Lord Mayor, have caused the seal of the office of Mayoralty of the said City of London to be hereunto put and affixed.

Dated in London the eighteenth day of September, in the year of our Lordone thousand eight hundred and fifty-six.

REYNAL.

I, William Wallace, of Fort Erie, Canada West, Civil Engineer, at present in the City of London, do solemnly and sincerely declare that sometime in May last I was employed by certain gentlemen at Amherstburgh, in Canada West; to make a survey of the Amherstburgh and St. Thomas Railway, and on going to Amherstburgh and seeing the propriety of sufficient stock being subscribed to comply with the terms of the then existing charter, did in the month of May last past subscribe in my own name the sum of five hundred thousand pounds in the Stock Book of the Company opened by the Provisional Directors or the Commissional Commissional Commission of the Company opened by the Provisional Directors or the Commissional Commission of the Company opened by the Provisional Directors or the Commissional Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission of the Company opened by the Provisional Directors or the Commission opened by the Provisional Directors or the Commission of the Com

sioners named in the Act of Incorporation, and that I subscribed this sum for the purpose of organizing the Company, because there would be no object in subscribing a less sum, and I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the sixth year of the Reign of His Majesty King William the Fourth, intituled "An Act to repeal an Act of the present Session of Parliament, intituled an Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the State, and to substitute declarations in lieu thereof, and for the more entire suppression of voluntary and extra judicial oaths and affidavits, and to make other provisions for the abolition of unnecessary oaths.

WILLIAM WALLACE.

Declared at the Mansion House, in the City of London, this eighteenth day of September, 1856, before me,

D. SALOMENS,

Mayor.

That same afternoon Mr. Wallace admitted to me that the subscription had been originally in pencil, and my fears were for the first time aroused in case this should be considered as not a subscription in the eye of the law. It was Mr. Merritt who first came to me on the subject of Mr. Wallace's stock, so that he then viewed it as a legal subscription for £500,000.

Ques. 46. Was the deposit of £50,000 paid into the Bank by Wallace, or by whom and from whom did Wallace get the money to do so if paid in by him?—Ans: The £50,000 was paid into the Bank of Upper Canada by me, in the name of William Wallace, and the same was lent to William Wallace on the security of John McLeod and Theodore Park, that William Wallace would make the necessary transfer to me of the stock on which this was paid as an instalment.

Ques. 47. Did you know Wallace by report or otherwise, before or immediately after his subscription to the Stock, and if so did you consider his circumstances such as to warrant a bona-fide subscription to the amount of £500,000.—Ans. I had known Wallace for many years, though not intimately. I believed him to be an honest and truthful man, and various people to whom I referred assured me that this was his character. I suppose that Mr. Wallace would have had as little ability to pay the £500,000 as the petitioners for this Bill would have to construct the Amherstburgh and St. Thomas Railway! I knew that Mr. Wallace enjoyed the confidence of prominent people in Buffalo, among others Mr. Patchin the Banker, and owner of the Buffalo and New York City Railway. I understood that this road, formerly called the Attica Road, had been commenced in exactly the same way, by Mr. Wallace having subscribed for the whole stock in which the chief citizens of Buffalo afterwards carried him through. I felt satisfied that Mr. Wallace made the subscription of £500,000 bona-fide, but I feared that my money might be endangered through its being decided to have been done in pencil and afterwards in ink.

The hour having arrived for the Sub-Committee to adjourn,

The Witness withdrew.

onand Sight

Tuesday, 12th May, 1857.

SUB-COMMITTEE MET.

#### MEMBERS PRESENT:

MR. Bowes,

Mr. Bureau.

MR. CLARKE.

MR. CLARKE,

Hon. Mr. J. C. Morrison,

Mr. RANKIN, and

Mr. Jas. Smith.

The Counsel for the Bill were in attendance.

The Counsel for the Petition against the Bill were in attendance.

Isaac Buchanan, Esq. was called in, and Cross-Examination continued.

Ques. 48. Did you pay Wallace £50,000 or any and what sum, as a consideration for his transfer of the Stock in the Amherstburgh and St. Thomas Stock to you?—Ans. I paid into the Bank of Upper Canada by Mr. Wallace's orders, and in his name, £50,000, to the credit of the Amherstburgh and St. Thomas Railway, and it was understood that he should receive a premium on the Stock which he was to transfer to the Great Western Railway of £5,000, payable in paid up Shares, on the Southern Road being completed.

It was an object to retain the co-operation of Mr. Wallace, and the other original promoters of the Southern line, until it was finished.

[Mr. Powell, Counsel for the Bill,]

Again protests against Mr. Buchanan's circuitous mode of answering questions, by going into his individual motives, opinions, and calculations wholly unconnected with the matter of enquiry.

Ques. 49 Did you take proceedings in chancery against the Amherstburgh and St. Thomas Board, of which McLeod was President, and if so for what purpose and did you state in course of such suit that Wallace had acknowledged to you in England that the Stock in the Amherstburgh and St. Thomas Road had not been taken by him according to law?—Ans. I took proceedings in chancery against the Amherstburgh and St. Thomas Board, of which Mr. McLeod was President. The course of that suit was the attempted repeal of a By-law of that board, called By-law A, which I got passed as an amendment of an original contract with the members of that Board before I agreed to their appointment. The agreement is as follows. It is agreed between Theodore J. Park, John McLeod, and others who may here after sign this agreement, representing an original Stock, taken by such persons, in the Amherstburgh and St. Thomas Railway Companies, of the one part, and Isaac Buchanan of the other part.

In consideration of Shares in the Amherstburgh and St. Thomas Railway Company subscribed for by and in the name of William Wallace, amounting to five hundred thousand pounds, being assigned by the said William Wallace, to the said Isaac Buchanan, he the said Isaac Buchanan agrees to use the power which the assignment of the said Shares shall vest in him, to secure a terminus of the said Railway at Amherstburgh, as well as Windsor, and will make an understanding with the parties to whom he shall transfer such Shares, that they shall carry the said road to Amherstburgh; and it is further agreed between all the parties signing, and who shall sign their agreement, that the said Isaac Buchanan advancing or lending to subscribers the Stock of the said Company, the means of paying the deposit thereof, to entitle them to vote; every co-operation will be afforded by such persons, in satisfying the capitalists whom Mr. Buchanan expects to interest in the immediate construction of the Amherstburgh and St. Thomas Railway, especially that the Directors who shall be appointed at the first election of Directors of the said Company, upon the votes given in respect of such Stock, shall, from time to time, when required, retire from the Board of Directors, to make room for other gentlemen in England, or elsewhere, who may be wished by the Shareholders to be procured by Mr. Buchanan, to be Directors in the said Company.

Signed at Windsor, 15th day of July, A.D., 1856.

(Signed,)

JOHN McLEOD, THEODORE J. PARK, ISAAC BUCHANAN.

Afterwards Signed on 16th July.

## WILLIAM WALLACE.

These Directors feared that I could not carry out my agreement to take the road to Amherstburgh, and they proceeded to repeal the By-law, with the object, as it appeared to me, of giving out a contract.

I had already arranged a contract for the construction of the road in England, and I got an injunction to prevent a second contract being given out, and also to prevent the deposit in the Bank of Upper Canada being drawn for any other purpose than the English contract to Geo. Wythes and Samuel Zimmerman.

With regard to the last clause of the question, Mr. Wallace stated to me, as I have formerly said in England, that the Stock had been originally subscribed in pencil and afterwards put into ink. This I feared might possibly be viewed as an irregular subscription, as not being strictly in the way anticipated by the Charter, and I declared this in the bill which I fyled in Chancery, and on which I got an injunction to prevent all acts by the Directors until it was proved that my stock was good, or in other words, that my deposit ought to be subject to checks of the Amherstburgh and St. Thomas Railway Company.

Ques. 50. Was it one of the provisions of the By-law alluded to in your last answer, that the money invested by you in the Amherstburgh and St. Thomas Railway was not to be used without your consent?—Ans. Yes, and that no contract should be entered into without my consent.

Ques. 51. Can you produce any evidence to shew that Mr. Wythes authorized any person since Mr. Zimmerman's death to enter into or take action upon any contract on his behalf?—Ans. Mr. Wythes, after receiving in England from his agent, Mr. J. C. Street, of Hamilton, a copy of the contract made at Amherstburgh a fortnight after Mr. Zimmerman's death, or on 28th March, wrote to said agent that he would accept that contract.

Mr. Street was to have been here this morning to prove this, but I have just received from him from Hamilton the following telegraph:

TORONTO, 12th May, 1857.

By Telegraph from Hamilton.

To Isaac Buchanan, Russell's.

Throat and chest so affected that I cannot leave the house.

J. C. STREET.

Ques. 52. In what capacity did Mr. Henry De Blaquiere stand to the Woodstock and Eric Road or Company, and did you ever give or promise to give him £25,000 or any other sum for the purp se of buying up the control of the direction of said road?—Ans. In July last I did not know Mr. H. De Blaquiere even by sight, and I was not aware that he was a Director of the Woodstock and Lake Eric Railway, which I afterwards found to be the case.

I never had any communication with Mr. Henry De Blaquiere about the  $2\frac{1}{2}$  per cent. on £1,000,000, which, on behalf of the Great Western Railway, I had agreed to give to those holding the shares of the Woodstock or Lake Eric Railway, or the power to subscribe these shares to the extent of £1,000,000.

I desired the control of the Railway for the bond fide purpose of enabling the Great Western Railway to subscribe this £1,000,000 or the whole stock.

The parties from whom I got the control offered to get the Directors to allocate to any one for the Great Western Railway the whole stock of £1,000,000, but this would have required me to pay an additional £100,000 as the first instalment, and therefore, until we could hear from London, I preferred paying the premium arranged for, or £25,000, on the power to subscribe said £1,000,000 being transferred to me, by nearly the whole existing stock being transferred to me, and a Board being appointed on whom I could depend to allocate the Great Western Railway the balance of the subscribed shares at a future time.

As I have said I had no communication with Mr. De Blaquiere on this subject but when the shares came to be transferred to me I was introduced to him as one of those who were making the transfer to me, and I was told to pay the whole amount of premium, £25,000, to him, which I did.

What division of them he made, if any, among the other Shareholders who made transfers to me I am not aware; the whole transaction, as far as I am concerned was on paper embodied in two documents, which are as follows:

### Proposition by J. B. Van Vorhis to Isaac Buchanan.

That Mr. Buchanan, on getting an unquestioned possession of the Amherstburgh and St. Thomas Railroad, say on or before the 14th August, shall be prepared to pay one hundred thousand dollars in cash, besides the small sums paid up on the private stock of the Woodstock and Lake Eric Road, in consideration of the following:

The whole shares held in the Woodstock and Lake Erie Railway will be transferred into the names of such persons as Mr. Buchanan may point out, and such persons as Mr. Buchanan may nominate will be appointed Directors of said Company, and if Mr. Buchanan insists on it we are also to furnish him with undertakings by the various Municipal bodies who hold the Company's bonds, to the effect that they will agree not to convert these bonds into shares, but will, within six months be prepared to receive cash for them at par, or at any time hereafter to exchange them for the bonds of the Great Southern Railway.

Hamilton, 5th August, 1857.

(Signed,)

J. B. VAN VORHIS.

JOHN L. HODGE, Witness.

The other document is as follows:

Hamilton, 5th August, 1857.

### J. B. VANVORHIS.

SIR,—On behalf of yourself and friends interested in the shares connected with the Woodstock and Lake Erie Railway and Harbour Company, whose charter I am at present striving to get control of, I promise you on my arriving at the control of the direction of the Amherstburgh and St. Thomas Railway, which I confidently expect to do upon the 7th current, to pay over to such parties as do give me the control of the Woodstock and Lake Erie Railway and Harbour Company, the sum of £25,000 currency.

The details of this agreement are in a paper headed "Proposition by J. B. Van Vorhis, to Isaac Buchanan."

I am Sir,

Your obcdient servant,

ISAAC BUCHANAN

Ques. 53. Where did you obtain the money which you say you had paid into the Bank of Upper Canada for Wallace? Did you pay the ten per cent. upon any other stock than that of Wallace? if so, upon what stock? How much, did you so pay, and when and where did you deposit the same?—Ans. I borrowed the money to pay Wallace's stock from the Bank of U. C. I also paid £375, being ten per cent. on the stock of gentlemen at Amherstburgh who were fixed on as future Directors.

We were in doubt whether they all had paid their money into the Bank of Upper Canada, and I paid ten per cent, upon the stock of every proposed Director to make sure of this.

Some of them were found to have paid formerly their own instalment into the proper Bank, and in these cases of course 20 per cent. has been paid in such cases.

Ques. 54. Where has the work been done for which the £150,000 already spoken of by you has been paid, and when was that work done, by whom was it done, and under what contract?—Ans. Nearly the whole work done was done by Mr. Zimmerman on contracts of the Woodstock and Lake Erie Railway.

On the Amherstburgh and St. Thomas Railway the ground has only been broken formally, and a Resolution passed by the Directors at Amherstburgh on 28th March, after the contract to Messrs. Street & O'Reilly was signed, authorizing Mr. Street at once to proceed to sound for his gravel pits, a knowledge of whose position is required to guide the Engineer on the line.

Mr. Street's progress was interrupted by the proceedings of Mr. Rankin, in bringing forward the Bill now before the Committee, Mr. Rankin's step, it was known, would destroy all confidence in England, and render it impossible to build the road.

Considerable outlay has been made by Mr. Zimmerman and others, in preliminary surveys, and other preliminary expenses connected with the extensions, East and West, of the Woodstock and Lake Erie Charter, but I am not aware of any actual work having been done on them. Mr. Street was prepared to break ground on them the moment the £300,000 was subscribed, and the £30,000 instalment paid thereon, which has been delayed by the introduction of the Bill now before the Committee.

Ques. 55. Did Mr. Ratcliffe or any other person in Canada, acting with you in this matter, draw upon the Great Western Railway Company for any money to be applied in this transaction? If any, how much? And for what purpose? And was such paper honored, and if not, why not?—Ans. Mr. Ratcliffe, the Vice-President of the Great Western Railway, stated to the Bank of Upper Canada, that although the the Great Western Railway could not legally guarantee the Bank's loan to me to be used for the purpose of the Great Western Railway in securing for the Shareholders thereof, the offer of the Stock for the Southern Line, he would take care to work the Railway's account with the Bank of Upper Canada, in such a way, by leaving a similar sum at credit of the Railway in the Bank, as that the Bank should not have any inconvenience in thus going into the views of the Railway through advancing to me £50,000.

He promised to transfer from England to Canada such an amount, as that the Railway's balance in the Bank would be £50,000 more than otherwise would have been, until the Bank was relieved of the advance to me of that amount.

Mr. Bridges, the Managing Director, who was the only Director dissenting from the policy of the Great Western acquiring the Southern line, wrote to England misrepresenting this transaction, and by this means bills for £40,000 sterling, which the Company drew at the time, were dishonoured in London, as supposed to be connected with this arrangement; and other bills also, to a greater

mount than £50,000 currency, were also dishonoured, upon a false suspicion of having been drawn for moneys to invest in the Southern line.

We were led to adopt this plan from having seen its successful operation some years ago in a similar arrangement between the Government and the Great Western Railway.

At the period alluded to it was of infinite importance for Canada, in England, that the Great Western Railway should be finished and shewn to be a profitable investment.

Mr. Hincks said that the Government could not legally guarrantee the Bank of Upper Canada for a loan to the Great Western Railway, but that he would feel justified, looking to the interests of the Province, to agree that Government deposits should remain with the Bank of Upper Canada to enable that Band, without inconvenience to its commercial customers, to lend the Great Western Railway the money to complete that road, which the Bank of Upper Canada did.

Ques. 56. Has the stock, or any part of the stock, under the charter to extend the line of the Woodstock and Lake Erie Company, as now existing, been taken? if so, when were the books opened and the stock subscribed? Ans. The stock-books for the stock to build the extentions of the Woodstock and Lake Erie Company were ordered to be opened at a meeting of the Board held on 24th ult., and the Secretary has forwarded books to all the different towns specified in the Act.—I have not, however, heard of any stock being taken.

I believe that no stock has been taken as yet, in consequence of the introduction by Mr. Rankin of the Bill now before the Committee.

The hour having arrived for the Sub-Committee to adjourn,

The witness withdrew.

Adjourned until 10 o'clock A.M. to-morrow.

Wednesday, 13th May, 1857.

## COMMITTEE MET.

#### MEMBERS PRESENT:

Hon. W. B. ROBINSON, VICE-CHAIRMAN;

MR. BELLINGHAM,

Mr. Bowes,

MR. BUREAU,

MR. CHRISTIE,

MR. CLARKE,

MR. DALY,

Mr. A. A. Dorion,

Mr. Mongenais,

Mr. Angus Morrison,

MR. PAPIN,

MR. RANKIN,

Mr. SIMARD, and

Mr. Whitney,

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance.

Ordered, That the Sub-Committee, with the several parties, be allowed to adjourn to an adjoining Committee Room, to continue taking the Evidence, which Evidence to be put in the hands of the Clerk of the Railway Committee on the rising of the said Sub-Committee, each day.

Adjourned until to-morrow, at 11 o'clock A.M.

# Thursday, 14th May, 1857.

### COMMITTEE MET.

Mr. Papin,

Mr. RANKIN,

Mr. WHITNEY, and

Mr. WILSON.

Mr. Bowes was called to the Chair pro tem.

The Clerk laid before the Committee the proceedings of, and Evidence taken by, their Sub-Committee the previous day, as follows:

## Wednesday, 13th May, 1857.

#### SUB-COMMITTEE MET.

MEMBERS PRESENT:

MR. Bowes,

MR. CLARKE.

Mr. Angus Morrison,

Mr. Papin, and

Mr. RANKIN.

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance.

Arthur Rankin, Esq., M.P.P., Examined.

[By Counsel for the Bill.]

Ques. 57. Did you, in 1855, introduce a Bill similar to the one now introduced for a through line from Niagara to the Detroit River? State what you know in relation thereto, and all matters connected with the present Bill and the opposition thereto.—Ans. In 1855, I introduced a Bill to incoporate a Company to be called

the Amherstburgh and St. Thomas Railway Company, to construct a Railway from Amherstburgh, on the Detroit River, to St. Thomas, in the County of Elgin; during the same session of Parliament, a Bill was introduced and carried, authorising the Woodstock and Lake Erie Railway and Harbour Company to make extensions from their main line Eastwardly, to the Suspension Bridge, and Westwardly to St. Thomas, with power to amalgamate with the Amherstburgh and St. Thomas Railway Company, the same power of amalgamation having been given to the last named Company; one of the clauses of the Amherstburgh and St. Thomas Railway Company required that £500,000 of stock should be subscribed, before a Board of Directors could be elected by the shareholders, or before the Company could be properly organized in such a manner as to enable the said Board to carry out the provisions of the charter.

One of the clauses of the Act authorizing the extensions of the Woodstock and Lake Eric Railway and Harbour Company, and one of the conditions required to be complied with before amalgamation could take place between the two above named Companies was, that the Woodstock and Lake Eric Company should open books of subscription, in the manner, and at the places mentioned in the Act of Incorporation, and that so soon (the previous provisions of the Act having been complied with) as £300,000 of stock had been subscribed in the books of the said Company, and ten per cent. upon the said £300,000 paid into such chartered Bank as shall be designated by the Board, the Company should have power to consummate the amalgamation with the Amherstburgh and St. Thomas Railway Company, and to commence the building of their extensions, cast and west. The Act authorizing the extensions of the Woodstock and Lake Eric Railway Company received the Royal sanction on the 19th May, 1855, and it required that those extensions should be commenced within two years from the passing of the Act.

Soon after the prorogation of Parliament in 1855, books of subscription for stock in the Amherstburg and St. Thomas Railway Company were opened, in the manner required by the Act, at Amherstburgh, Windsor, Chatham, and St. Thomas; that immediately afterwards I entered upon an active canvass of the Counties of Essex and Kent, with a view to induce the rate-payers of those Counties to sanction the taking of stock on behalf of the County Municipalities; in pursuit of this object, I not only addressed public meetings in most of the Townships of the County of Essex, but I proceeded twice to various parts of the County of Kent, and addressed public meetings, urging upon the people there the same object. I once addressed the County Council of the County of Kent, at a special session of that body, convened for the express purpose of affording me an opportunity of urging upon them the propriety of subscribing for stock in the Amherstburgh and St. Thomas Railway Company. I twice visited St. Thomas, in the County of Elgin, once of my own accord, the second time at the request of the Reeve of St. Thomas, the member representing the East Riding of Elgin, and a number of the influential inhabitants of that County. On the occasion of ay second visit to St. Thomas, I addressed the County Council of Elgin in Council assembled, and the result of these exertions was, that By-Laws were submitted to the people in Essex, Kent and Elgin, proposing that each of these Counties should

positively dishonest ground, I at once resolved to adopt such a course with Mr. Greer as would lead him to suppose, that for a consideration I would consent to act with Mr. Buchanan. First, I told Mr. Greer that I was at liberty to take whatever course I thought proper. Mr. Greer then entered into an explanation of the advantages of a personal nature which I might derive from complying with the wishes of his principal, I gave Mr. Greer to understand that I was desirous of putting myself in a position to make something out of the Railway, and that the only honest means I knew of by which that could be done, would be to get a contract, or an interest in a contract for building the road. Mr. Greer left me under the impression that there would be no difficulty in arranging with me, and promised that on his return to Hamilton, after having seen Mr. Buchanan, he would write to me, which he accordingly did, in the following words:

Hamilton, 28th February, 1856.

MY DEAR SIR,—I now have the pleasure of redeeming my promise by writing you. In my interview with you on Saturday last, of course I had no object or desire to influence you against your interest, but I considered that I was doing you a service in letting you know that you are upon what I considered and still see to be a "losing Ticket."

My judgment in your circumstances would have decided that it was my interest to remain one of "the old Folks," as Mr. Merritt styles those "who have borne the burden and heat of the day" in respect to the Southern Road. They are all on one side and you and your friends on the other.

Now I believed in going to you, and I still believe that there is no feeling to exclude you or to deprive you of a share of any advantages which they might have to divide amongst themselves.

I, of course, could not assure you or any other friend of a contract, but I repeat what I felt authorised to say to you that looking to a contract you would be on the straight road to at least get a preference of the work on the same terms as strangers would offer to do it at, and this in Railroad matters is generally a ful enough calculation.

I am quite aware that all this is indefinite, but I do not see how it can be otherwise in the meantime, but indefinite as it is (I hope you will pardon me for expressing myself thus) I believe it to be more for your character as a politician, and interest as an individual than any promise you can have from other parties, and therefore it is that I have out of friendship laid my views before you which are in no way changed from what I have seen and heard since I have had the pleasure of seeing you at Sandwich.

I shall be happy to hear from you, and I hope announcing your intention of working harmoniously with those gentlemen with whom I am connected in the present undertaking.

Lam, my dear Sir, Sincerely,

Sincerely, your obedient servant,

JOHN H. GREER

Subsequent to the receipt of this letter, Mr. Greer again came from Hamilton to see me, and in a conversation at Windsor he went more freely into an explanation tion of the inducements which he was authorized to offer me in order to procure my co-operation with Mr. Buchanan. He dwelt largely upon the political advan-37 tages that I might expect to derive, and went more fully into the pecuniary inducements, so expressing himself without stating it in so many distinct words, as to lead me to suppose that I might realize at least £30,000, and that I could obtain a check? The manner in which I was led to infer that the £30,000 might for £5,000 at once. be obtained, was from a fund of £150,000 which Ir. Buchanan was to contrive to establish by some means, and which fund would be divided among five persons, of whom I would be one. The language used by Mr. Greer on this occasion, as wellas on all the others, was exceedingly vague, much in the style generally adopted by his principal, Mr. Buchanan—that which might mean either a great deal or nothing, as might best suit his purpose. On this occasion I told Mr. Greer that there was an unsettled dispute between the Great Western Railway Company and myself, about the value of a piece of property of mine, occupied by them; that an arbitration had taken place about the value of the property in question, some three or four years before, that the sum awarded was only £500, which had not been paid to me by the Company within the time required by their charter, and that subsequently I had declined to allow them to take it for the price awarded, and that I was desirous of having a new arbitration; that if Mr. Buchanan would induce the Company to consent to a new arbitration, it would remove the feeling of hostility from my mind which rendered me averse to acting with Mr. Buchanan. Mr. Greer again returned to Hamilton, under the impression that I would be willing to act with Mr. Buchanan on certain conditions.

A few days after, seeing Mr. Greer at Windsor, I succeeded in obtaining posession of the Stock Book in the manner previously described, and being desirous of obtaining some distinct and positive proposal from Mr. Buchanan for my co-operation, which would afterwards be used as evidence of his consciousness of the illegality of his position, I telegraphed Mr. Greer at Hamilton, informing him that I had got the Amherstburg Stock Book, and that if he chose to come up I would talk to him. To the best of my recollection Mr. Greer did come up, and we had another fruitless interview. At length on the 6th August, 1856, the day before the time fixed for the election of Directors at Amherstburg, Mr. Buchanan himself, accompanied by a son of the Hon. Mr. Merritt, called at my house, and after remaining for some time, he and his friend rose to take their departure. I accompanied them to the door, when Mr. Mcrritt walked to the road in front of the house, and got into a coach which was in waiting, while Mr. Buchanan lingered behind, and under the shade of one of the trees in the lawn, commenced his business proposals. He began by saying that he was most desirous that I should co-operate with him in his Railway plans. He was aware of the exertions I had made to advance the interests of the Southern Railway, and that no one could be more justly entitled to look for personal advantages out of the undertaking than I was. That he regretted that he had not hitherto had it in his power to offer me such direct and positive inducements to join him, as I might reasonably have expected, but that he was now in a position, being authorised

by those with whom he was acting on behalf of the Great Western Railway to do so, to make me the following distinct and positive proposal, viz: That if I would surrender the Stock Book; recognise the legality of his position, and act with him at Amherstburgh on the following day, and thus enable him to defeat Mr. Zimmerman, he was in a position to offer me a contract, or an interest in a contract to be given to Mr. Van Voorhis and others, with a guaranteed profit to me of £50,000. That I could have the option of being one of the contractors, with my name appearing in the body of the contract, or if I preferred that my name should not appear, the contract would be given to the other parties, but hened with the condition that the Board should have the right to stop the sum of £50,000 from the amount to be paid to them, and give the same to me. Mr. Buchanan also entered upon an explanation of other important advantages that I could derive, both politically and otherwise, from acting with himself and the Great Western Railway Company. He went on to say, that the Southern line was amalgamated with the Great Western; the Board of the amalgated Companies would represent the capital of some £6,000,000 or £7,000,000. That such a body of men must, as a matter of course, be able to exercise a vast amount of political influence, and that by acting with him, I could secure the exercise of that influence in my favor which would enable me to attain the highest political position in the country. If I desired it, he was authorized to offer me the position of Vice President of the Southern Railway, and in that capacity I should go to England to assist in completing the arrangements necessary to carrying out his intentions, and that I would thus be brought in contact with men of eminence and large capital, with whom I might be enabled to establish such connections as might, at some future time, in connection with any other project of a similar nature, prove highly advangeous.

Mr. Zimmerman with whom I had kept up a correspondence, and invariably informed of the repeated advances made to me by Mr. Buchanan through Mr. Greer, and whom I but a few days before "had visited at the Falls, for the purpose of communicating to him all that had taken place," was expected to arrive at Windsor that evening. In reply to Mr. Buchanan's advances I informed him that I would be at Windsor when Mr. Zimmerman arrived, and that I would immediately communicate to him what had passed between us; upon this Mr. Buchanan took his departure, and I met Mr. Zimmerman at Windsor in the evening, in order to arrange our plan of operations for the following day at Amherstburgh. On arriving at the last named place, on the morning of the 7th August, accompanied by Mr. Zimmerman, Hon. J. C. Morrison, and several other friends, I found the inhabitants of the Village assembled in great force about the streets, and evidently in a high state of excitement, having the day before addressed a circular to each of the members of the provisional Committee, requesting them to assemble at Horseman's Hotel, at 11 o'clock a.m., for the purpose of opening the books, in order to afford the qualified Shareholders present an opportunity of electing a Board of Directors. Mr. Larwill, Mr. McBeth, Mr. Southwick, and myself, four of the provisional Committe attended at the hour and place above mentioned, when Mr. Zimmerman and a number of other Shareholders being present, a Board of Directors was regularly elected of The other three members of the provisional Committee, though invited to do so declined at the house was a

to attend our Meeting, but with Mr. Buchanan and a number of others favorable to his pretensions, proceeded to the Town Hall, where they held another Meeting, and elected a Board of Directors, adverse to the interests of Mr. Zimmerman. Throughout the whole proceedings of the Meeting held at Horseman's, the Hon. Mr. Morrison acted as our adviser, and with his own hand framed the Resolutions, which he recommended us to adopt, in order that our proceedings might be legal.

About the beginning of September following, in compliance with the request of Mr. Zimmerman, acting under the advice of Mr. Morrison, a meeting both of: the Provisional Committee, and the elected Directors favorable to Mr. Zimmerman's interest was held at St. Thomas, when resolutions were unanimously adopted authorizing immediate commencement of a suit in Chancery against the Buchanan Board, and appointing Mr. Miles O'Reilly, a Committee to institute those proceedings.

Immediately after this meeting Mr. Zimmerman sailed for England, whither Mr. Buchanan had preceded him. On his return from England in October, Mr. Zimmerman informed me that he had concluded arrangements in England by which Mr. Buchanan had agreed, on his return to this country, to dissolve his Board of Directors, and abandon his pretensions to the control of the Southern Railway, on conditions (which Mr. Zimmerman consided both advantageous and satisfactory,) but the precise nature of which he did not reveal to me. Notwithstanding this, however, from causes which have only lately become intelligible to me, Mr. Buchanan was unable to induce his Board of Directors to assist him in completing the arrangement agreed upon between Mr. Zimmerman and himself in England,—but since the commencement of the present Session, the late Mr. Zimmerman called upon me at the House of Assembly, and placed in my hands certain papers which he recommended me to take copies, and which are as follows:

Understanding between John McLeod, Theodore Park and William Wallace, of of the first part, and Isaac Buchanan, of the second part.

1st. The parties of the first part agree cordially to co-operate with the party of the second part, enabling him to fulfil his agreement with Messrs. Zimmer man and Wythes, dated Liverpool, 26th of September, on the subject of the Amherstburgh and St. Thomas Railway, and they also agree to pay back to the party of the first part on the signing of this agreement, the sums lodged by him in the Bank of Upper Canada, as the first call of ten per cent. on stock.

2nd. In consideration of the foregoing, the party of the second part hereby makes over his interest in seven thousand five hundred pounds currency, being part of eight thousand pounds, secured to him by the agreement between him and Messrs. Wythes and Zimmerman aforesaid, to the parties of the first part, in equal proportions, viz. —Two thousand five hundred pounds to John McLeod, two thosand five hundred pounds to Theodore Park, and two thousand five hundred pounds to William Wallace, the party of the first part, being only entitled to

take £50,000 of Stock in the Amherstburgh and St. Thomas Railway Company; these By-laws, after having been advertised in the manner required by law, were all ratified by the rate-payers of the respective Counties; the Warden of the County of Essex subscribed his name in the Windsor Stock Book for £50,000, to be taken by the Municipality of the County of Essex, and the Reeve of the Town of Amherstburgh, having been duly empowered to do so, by a vote of Rate payers of that Municipality, subscribed his name in the Amherstburgh Stock Book for £20,000 on behalf of the rate-payers of the above named Town; am not aware whether the Wardens of Kent or Elgin ever signed their names, in either the St. Thomas or Chatham Stock Book, for the amount of Stock which they had been authorized to take on behalf of their respective Municipalities. That in addition to the Municipal Stock thus taken and authorized to be taken, private subscriptions for stock were obtained in the Amherstburgh Stock Book, to an amount in all exceeding £6,000; and in the Windsor Stock Book private subscriptions for stock were also obtained to the amount of several thousand pounds, but I cannot remember the precise amount, not having seen the Stock Book since the month of August last. Notwithstanding the exertions made by myself and other parties, in Kent and Elgin, we failed to obtain subscriptions for even half the amount required to be subscri ed, before the Company could commence operations under the authority of the Charter. On the assembling of Parliament at Toronto in February 1856, finding that the Woodstock and Lake Erie Railway and Harbour Company had not, as yet, made any exertion whatever towards obtaining ubscriptions for stock in their Books, which they had not even caused to be opened for subscription in the manner required by the Act authorizing them to make their extensions east and west, I introduced a Bill to amend and extend the Charter of the Amherstburgh and St. Thomas Railway Company, the object of the said Bill was, first, to reduce the amount required to be subscribed, by the Act incorporating the Amherstburgh and St. Thomas Railway Company, before a Board of Directors could be elected, from £500,000 to £250,000; and secondly, to authorize the Company to extend their line of Railway from St. Thomas Eastwardly to the Suspension Bridge, regardless of the Woodstock and Lake Erie cross road,-I succeeded in obtaining the amendment reducing the amount of Stock required to be subscribed, but failed to obtain the right to extend the Railway Eastwardly from St. Thomas, and up to the period of the passage of the Act to amend the original charter as described above, I had directed my whole time to the advocacy of the enterprise, defraying all my own expenses, and frequently the expenses of other parties who accompanied me; indeed, I had made it my sole business, neglecting my private affairs: when addressing public meetings on various occasions and at different place in the County of Essex, votes of thanks for my exertions were passed by the meetings. On all these occasions I made it a point to explain to my constituents, that while exerting myself to advance their interests, it was my intentiou to endeavour to obtain either the whole contract or an interest in the contract for building the Railway; after the prorogation of Parliament in 1856, on the 3rd of July of that year, I entered into a written agreement with the late Samuel Zimmerman, after having been repeatedly urged by him to do so, in fact, he first addressed himself to me on the subject in 1855, at Quebec.

My reason for declining to act with Mr. Zimmerman in the first instance was, that I was apprehensive that he was desirous of obtaining the control of the Southern line, for the purpose of retarding the building of that line, in consequence of some arrangement which I was led to believe existed between him and the Great Western Railway Company, it being then commonly reported that the Great Western Company had promised Mr. Zimmerman the contract for building their intended double track, on condition that he should contrive to prevent the building of the Southern line for a certain period of time, and that he should so snape his course, as to enable the Great Western Company to build the Southern line at some future period, should they feel it for their interest to do so. At Quebec I openly told Mr. Zimmerman what my reasons were for declining to act with him, and those reasons were briefly these: I had pledged myself to my constituents to do all in my power to secure the building of an independent line of Railway which should compete with the Great Western, and having made this pledge I felt that no inducement of a personal nature which could be held out to me, would justify me in acting with any party till I was thoroughly convinced that by so doing, I should place myself in a position which would enable me faithfully to redeem the pledge before alluded to; notwithstanding Mr. Zimmerman's assurances, that I had been misinformed as to his intentions, and that it was his determination to endeavour to build the Southern Railway, as a line competing with the Great Western Railway Company; he failed to remove my suspicions and I was unwilling to associate myself with him. during the last session of Parliament, I think, in the month of April 1856, Mr. Hodge, an Engineer, professing to be in the confidence of Mr. Buchanan, by whom he has since been employed in his professional capacity in various ways, called upon me, and suggested to me, that if I would go to Hamilton and see Mr. Isaac Buchanan, I could enter into arrangements with that gentleman, by which I could effectually defeat the plans of Mr. Zimmerman with reference to the Southern Railway, in fact Mr. Hodge distinctly intimated to me that it was the desire of Mr. Buchanan to obtain the control of the Southern line, for the Great Western Railway Company, and that if I would act with Mr. Buchanan, and assist him in carrying out his plans, I could more effectually serve my personal interests than by any other course I could possibly adopt. In reply to Mr. Hodge, when he first addressed me, I told him that if Mr. Buchanan desired to see me for any purpose, he would find me in Toronto attending to my Parliamentary duties. After the lapse of a considerable space of time, Mr. Hodge called upon me again and repeated the arguments he had before advanced in favour of my acting with Mr. Buchanan, in his endeavour to obtain the control of the Southern line, for the Great Western Railway Company, going more fully on the second occasion into an explanation of the advantages of a personal character, which I could secure by acting upon his suggestion. The effect produced upon my mind by the arguments of Mr. Hodge was that in acting with Mr. Zimmerman I should be more likely to secure the object I had in view, which was the building of a rival line to the Great Western, than by any other course I could adopt; in fact I became convinced that unless prompt means were taken to defeat the plans of Mr. Buchanan, all hope of the building of a Railway to compete with the Great Western would be destroyed. I therefore immediately determined to unite with Mr. Zimmerman in endeavouring to obtain

the control of the Southern line, believing that by that means alone I could secure for the people inhabiting the region of country bordering upon Lake Erie, and lying between the Niagara and Detroit Rivers, the completion of an enterprise so long and anxiously sought for, and of such vital importance to their interests. Acting upon this determination, I entered into a written agreement with Mr. Zimmerman, dated at the Clifton House, Niagara Falls, on the 3rd July, 1856, by which I agreed to unite with Mr. Zimmerman in endeavouring, first, to secure an amalgamation between the Amherstburgh and St. Thomas Railway Company and the Woodstock and Lake Eric Railway and Harbour Company. Secondly, that having accomplished that amalgamation, I should unite with Mr Zimmerman in applying for the contract for building the Railway from Amherstburgh to St. Thomas, with the understanding that if successful in obtaining the contract, I should be entitled to receive one-fourth of the profits arising from the same. It was, however, further agreed that Mr. Zimmerman should have the power (if he thought proper to avail himself of it, within twelve months from the date of the agreement) of purchasing my interest in the said contract for the sum of £25,000. was at that time one of a Provisional Committee of seven persons named in the Charter of the Amherstburgh and St. Thomas Company, whose duty it was to cause Stock-books to be opened in the manner and at the places designated in the Act, and upon the subscription of the amount of stock required to enable the Shareholders to elect a Board of Directors, to close those books, and convene a meeting of the Shareholders in the manner required by the Charter, for the purpose of affording them an opportunity of electing Directors, who should be clothed with all the powers conferred upon them by their Act of Incorporation. On the 5th July, 1856, a meeting of the Provisional Committee was held at St. Thomas, at which five of the members of that Committee were present. Mr. Zimmerman appeared at that meeting and proposed to subscribe, in his own name and in the names of certain friends of his, for a sufficient amount of stock to form the Company under the amended Act, on the following conditions: first, that he should be permitted to deposit the amount of the first call upon the stock, viz: ten per cent., in the Zimmerman Bank. Secondly, that after he had subscribed, the Provisional Committee should close the books, and convene a meeting of the Shareholders at Amherstburgh on the 7th August following. After some deliberation among themselves, the members of the Provisional Committee present, unanimously agreed to comply with the conditions proposed by Mr. Zimmerman, whereupon he entered his name in the Stock-book and produced powers of Attorney from several other individuals authorizing him to subscribe their names for various amounts, which, together with the amount he had himself subscribed, made up the sum required by the amended Act, for putting the said Act into effect. Immediately after which the Provisional Committee passed a Resolution declaring the books to be closed, and calling a meeting of the Shareholders at Amherstburgh on the 7th August. 1856. The two members of the Provisional Committee who were not present at St. Thomas at the meeting referred to, lived at Amherstburgh, and had not been requested to attend the said meeting—the Charter distinctly stating that the acts of the Provisional Committee or a majority of them should be lawful. The members of the Provisional Committee who were present at St. Thomas, had assembled at my request; I had not thought it necessary to request the attendance of the two members of the Provisional Committee residing at Amherstburgh; but on the third day after the meeting at St. Thomas, I went to Amherstburgh for the express purpose of informing them of what had taken place at St. Thomas on the 5th July. On arriving at Amherstburgh I called upon Mr. Kolfage, one of the Provisional Committee, and informed him of my having succeeded in getting a sufficient amount of stock taken up to enable the Company to commence operations. Mr. Kolfage was the person at whose store or shop the Amherstburgh Stock Book had been left, by direction of the Provisional Committee, for subscriptions. That on being informed by me of what had taken place at St. Thomas, he expressed in strong terms the gratification he felt at hearing there was at length a sprospect of a speedy commencement of operations.

The hour having arrived for the Sub-Committee to adjourn,

The Witness withdrew.

The Committee adjourned until to-morrow, at 11 o'clock.

Friday, 15th May, 1857.

#### COMMITTEE MET.

The Clerk laid before the Committee the proceedings of, and Evidence taken by, their Sub-Committee the previous day, as follows:

# Thursday, 14th May, 1857,

## SUB-COMMITTEE MET AT 10 O'CLOCK, A.M.

#### MEMBERS PRESENT:

MR. CLARKE,

Mr. Angus Morrison.

MR. PAPIN,

Mr. Foley, and

MR. RANKIN.

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance:

Arthur Rankin, Esq., M.P.P. Examination Continued.

(Continuation of Answer to Question 57.)

I continued to converse with Mr. Kolfage for a few moments, in course of which conversation I learnt from him that the only other member of the provisional Committee who lived at Amherstburgh, was then absent from Town. that occasion I omitted to ask Mr. Kolfage any questions about the Stock Book which had been left in his possession; the last time I had seen that Stock Book, it contained the subscriptions of the Reeve of Amherstburgh for £20,000, on behalf of the Municipality, and some £6,000 or thereabout, of private subscriptions, Mr. Kolfage did not intimate to me or give me any reason whatever to suppose, that any other subscription than those I have mentioned above, had been obtained since the time I had last seen the book; I therefore parted with him under the impression that he was rejoiced to hear the intelligence I had communicated to him. As nearly as I can remember, it was on the 14th July, certainly it was before the 15th of that month, Mr. Kolfage called on me at my residence near Windsor, and asked me in what Bank I would recommend him to pay his deposit of ten per cent. upon the £500 of stock he had subscribed for, in the Amherstburgh Stock Book, (he having been one of the first to subscribe.) I replied, that in my opinion it was immaterial where he made the deposit, so long as it was paid into any of the chartered banks of the Province, but I added that I had paid my deposit upon the stock I had subscribed for into the agency of the Bank of Upper Canada, at Chatham. After some further conversation, in the course of which Mr. Kolfage made no allusion whatever to the Wallace subscription in the Amherstburgh Book, nor did he say anything to lead me to suppose that any subscription whatever had been made in that Book since the time I had last seen it, when it contained only those to which I have above referred; he took his departure, saying, that he would make his deposit also in the Bank of Upper Canada, either at Windsor or Chatham. This conversation took place the day

before the last day on which the law required parties having subscribed for stock to make their deposits, in order that they might be entitled to vote as shareholders at the election of Directors, to take place on the 7th August following. days after this interview with Mr. Kolfage, a report reached me that some party or parties had subscribed for £700,000 of stock in the Amherstburgh Stock Book. I naturally became alarmed on hearing this report, and immediately went to Amherstburgh to see Mr. Kolfage, who, when I put the question to him as to whether there was any foundation for the report I had heard, answered in the affirmative; I then expressed my surprise at his not having communicated this intelligence to me before, to which he answered that he had not thought it necessary to do so. I then requested him to allow me to look at the Book, in order that I might see in what names this large amount of stock had been taken; he first declined to show me the Book, but on my pressing him he said he could not do so even if he were so inclined, since he had some time before handed the book to Mr. Parke, who still retained it in his possession. Mr. Kolfage, however, consented to accompany me to Mr. Parke's for the purpose of desiring him to show the book; we accordingly went to Mr. Parke's together, when Mr. Kolfage requested Mr. Parke to shew me the Book; Mr. Parke replied that he would have no particular objection to do so, if it were in his power, but that it was impossible, because his brother who was then absent in Buffalo or elsewhere, had carried with him the key of a large iron safe, in which the book had been placed for safe keeping. Mr. Kolfage was particularly anxious that the Book should, be shewn to me, and expressed some annoyance at the evident evasion of Parke, seeming to feel that the tale about his brother having carried away the key of the safe was a very improbable one. Mr. Parke, however, told me that he expected his brother to return home on the following Wednesday, and that if his brother was willing to shew me the book, he would send me word, in order that I might come down and see it. After the interview above referred to I met Mr. Zimmerman, by previous arrangement at London, in order that we might take advice from counsel as to the best mode of proceeding to get possession of the Book: the result was, that Mr. Beecher, Barrister, advised me to Replevin the Stock Book.

Acting under this advice. on the following Wednesday, without waiting to be sent for, I went to Amherstburgh accompanied by the Sheriff of Essex and Mr. O'Connor, Barrister, at Windsor, with the intention of executing the Writ of Replevin, which was directed against Mr. Kolfage. On our arrival at Amherstburgh I was advised, that as the Book was not in the possession of Mr. Kolfage, I could not take it out of the possession of Mr. Parke with that writ. Up to this time I had entertained doubts as to the truth of the story about the Book being in Mr. Parke's possession, and it was in consequence of these doubts that I had taken out the Writagainst Mr. Kolfage; but becoming satisfied from information communicated to me after my arrival in Amherstburgh, that the book really was in Mr. Parke's safe, I made no mention either to Mr. Kolfage or any of his friends, of my intention to Replevin the book. I, however, saw Mr. Thomas Parke in the street, and in conversation with him, I stated that as his brother had now returned with the key, hoped he would have no objection to shew me the book. Mr. Parke replied, that

when I had last called upon him, he told me that after his brother's return he would send me word if he was willing to shew me the book, and that as he had not sent me word, I could not complain at his having put me to the trouble of coming down a second time. It is not necessary for me to repeat all that passed between Mr. Parke and myself, it is sufficient for me to say, that he distinctly told me, that I could Upon this I returned to Sandwich, and acting under the advice not see the book. of Counsel, took out a writ of Replevin against the Messrs. Park and John McLeod. I was induced to take this course, in order that I might take the book out of the possession of any one of these parties, in whose keeping I might find it. On the third occasion of my visit to Amherstburgh I was accompanied by the Deputy Sheriff of Essex, and a gunsmith from Sandwich. The gunsmith having, by my direction, furnished himself with powder and fuze in order that if Mr. Parke should decline to open his safe and surrender the book, I might take the most effectual means of getting it, by blowing the safe open with gunpowder. We, however, had no difficulty in obtaining possession of the book on this occasion. Mr. Parke bowed to the authority of the law, and merely protesting against my conduct quietly handed over the book. On obtaining possession of it, I at once became satisfied of the fraudulent nature of the subscription for the following reasons: First, The party in whose name a subscription purporting to be for £500,000, was a mere man of straw, whom I had good reason to believe, was not worth £500, in the whole world. vidual I allude to was one William Wallace, a civil engineer, who a few months before had written to me (enclosing letters of introduction from the late Judge Strachan of Goderich, and Mr. Alexander Douglass of Fort Erie,) applying for employment in his professional capacity, for which employment some five or six hundred pounds a year would have been liberal compensation. Secondly, The manner in which the subscription was entered in the book, afforded (to my mind) clear evidence of fraudulent intention, for the following reasons: The Amherstourgh stock contained a heading, of which the following is a copy, together with the manner in which other parties had subscribed their names on the same page, above the name of Mr. Wallace, who it will be observed omitted to state the number of shares for which he intended to subscribe, and so placed his figures that but £500 appears under the column for £s, while the three other cyphers are placed under the column of shillings and pence, while further on, under the column for dollars and cents. appears the figures to represent \$2000, while the remaining three cyphers are under the column for cents:

### PROVINCE OF CANADA.

Amherstburgh and St. Thomas Railway Company. Capital Stock, One Million Pounds, currency, or \$4,000,0000,

In Forty Thousand Shares of Twenty-five Pounds, or \$100 each. Deposit, tenper cent.

We the undersigned respectively hereby bind ourselves to, and promise and agree to, and with the Amherstburgh and St. Thomas Railway Company to take the number of shares in the Capital Stock of the said Company, set opposite our

respective names, and to pay all calls thereon according to the Regulations or By-laws of the said Company, hereinafter to be passed.

NAME.	RESIDENCE.	No. of Shares	Amount in Halifax Currency and Dollars.				- 31 - 31
John A. Kane, R. A. Elliott, Wm. Bungy, Chellis M. Carpenter, Alex. Jones, Chas. McLeod, Chas. McLeod, William Bartlett Joseph Munger, Thos. Boyle, J. R. Berthelot, William Wallace,	Amherstburgh.	5 20 2 2 2 2 2 2 1 1 1 4	£ 125 500 50 50 50 25 100 250 500	s. 0 0 0 0 0 0 0 0 0 0	d. 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0	\$ 500 ,000 200 200 200 200 100 100 400 1,000 2,000	00 00 00 00 00 00 00 00 00

On the same day that I first went to Amherstburgh with the intention of Replevining the book with the Writ against Kolfage, Mr. Greer called at my house in the morning, and being told that I was not at home, he went to Sandwich, where, while waiting for the Sheriff to accompany me to Amherstburgh, I met Mr. Greer in the street. He told me that he had come from Hamilton on purpose to see me on Railway matters. Mr. Greer then requested me to afford him a private interview, and in compliance with his wish I accompanied him to an adjoining hotel, where, in a private room, Mr. Greer communicated to me the fact, that he had called upon me as an agent of Mr. Buchanan, who, as he alleged, was desirous of securing my co-operation in his (Mr. Buchanan's) plans to get the control of the Southern line of Railway. I cannot recall the exact words that passed between Mr. Greer and myself, but suffice it to say, that from what he communicated to me, I became satisfied that Mr. Buchanan was interested in what I after wards discovered to be the Wallace subscription. To save Mr. Zimmerman from ruin, it was absolutely necessary to establish the illegality of that subscrip-Mr. Greer gave me to understand that Messrs. Parke and McLeod, of Am herstburgh, were acting in concert with Mr. Buchanan in his plans with references to the Southern Railway, and that Mr. Buchanan was particularly anxious that I should join his party, in order, as he alleged, to prevent disputes arising thereafter, which disputes might have a damaging effect upon the prospects of the enterprise. Feeling that I was bound at all hazards to save Mr. Zimmerman, and well knowing that if Mr. Buchanan had been confident of the legality of his position, as a party interested or intending to become interested, in a subscription for an amount sufficiently large to enable him to control the Company, there could be no reason why he should concern himself about me. I at once looked upon his advances to me, through his agent, as strong evidence of a consciousness on his part of the unisoundness of his position, and feeling it to be of great importance I should secure some unmistakeable proof of the fact, that he felt that he stood on doubtful, if not

demand therefrom, his outlay for the Amherstburgh and St. Thomas Railway, which may not be recovered from the Company or amalgamated Companies.

3rd. The agreement now made is to be clearly understood as being instead of, and as setting aside all former agreements, written or verbal, between the parties of the first and second part.

TORONTO, 6th March, 1857.

John McLeod, Esq.,

In arranging the differences regarding the Amherstburgh and St. Thomas Railway Company, it is understood, and I hereby bind myself, that you and Mr. T. J. Park and Mr. William Wallace, will be paid by the Company two thousand five hundred pounds each, for your preliminary services to the Amherstburgh and St. Thomas Railway. The same to be paid in cash or paid up shares at par on the opening of the road.

I am Sir,
Yours &c.,
(Signed,) SAMUEL ZIMMERMAN.

Informing me at the same time that these were the arrangements finally agreed upon by all the parties named in the agreement, who were to meet in a day or two for the purpose of signing the same, and thus putting an end to all difficulties.

I next saw Mr. Zimmerman on the morning of the 12th March, the day on which he was killed, when, to my surprise, he informed me that new difficulties had arisen, owing to an increased demand having been made by Mr. McLeod. On the following Monday, when returning from Mr. Zimmerman's funeral, Mr. O'Reilly also told me that the reason why the papers had not been signed was because Mr. McLeod had demanded an additional £1,000 for himself. On Friday after Mr. Zimmerman was buried Mr. T. Galt called upon me, at the House of Assembly, when, in an interview which took place between us in the library, he stated that he had come to me to ascertain whether I would be willing to assist in carrying out an arrangement by which Messrs. Gzowski & Co. should be placed in the position occupied by Mr. Zimmerman before his death, with reference to the agreement concluded between Messrs. Wythes and Zimmerman, in England, on the 26th September last. To this I replied, that I did not feel myself at liberty to enter into new relations with any parties without first consulting the executors or representatives of Mr. Zimmerman. The very same evening I informed the Hon. Mr. Morrison (and one of the executors of Mr. Zimmerman) of what had taken place between Mr. Galt and myself. After this I had several interviews with Mr. Morrison, on all of which occasions I was assured by that gentleman that both he and the executors of Mr. Zimmerman fully appreciated the straightforward manner in which I had always conducted myself towards them, and that he would take no important steps in relation to the affairs of the Southern Railway without consulting me or letting me know of his intentions. Being unwilling to enter into any arrangement which would involve an acknow.

ledgment on my part of the honesty of the Wallace subscription, and the legality of the Board elected by Mr. Buchanan, which I felt would be tantamount to an admission that the course I had been pursuing was wholly unjustifiable, and finding that the executors of Mr. Zimmerman were negociating with other parties without consulting me, I at once felt relieved from any obligation to them, and having always been averse to the plan of amalgamating the Amherstburgh and St. Thomas and Woodstock and Lake Eric Companies, which I had only consented to during Mr. Zimmerman's lifetime, because, after having made two attempts, I found it impossible to get a charter for a through line, I determined, after consultation with some of my friends, and receiving assurances that I would be strongly supported, to make the attempt. Before I had decided upon this course, however, Mr. Vansittart, of Woodstock, called upon me and volunteered his services with a view to effecting a satisfactory arrangement between myself and the Buchanan party. Although our previous acquaintance had been very slight indeed he began by in iking protestations of regard amounting almost to friendship. He went on to say, that if I would be "good enough" to give him my confidence, he was persuaded he could render me important and valuable service; he next entered into a description of his circumstances, and concluded by informing me that he would expect to be paid for his services, and that he would like to have the amount he was to receive arranged beforehand. I at once saw through the real character of the man, and decided how to treat him: I accordingly began by telling him that before he could reasonably expect me to promise him any particular amount for his services, it would be but proper that he should explain what those services were to be, upon which he stated that he thought he could induce the parties with whom he proposed to negociate on my behalf, to carry out the arrangement between the late Mr. Zimmerman and myself, and that if he succeeded in doing so, he thought £2,000 would be a moderate sum for him to receive for so important a service. Being amused with the coolness of the proposal, and by the diplomatic style adopted by the little gentleman; and desiring still further to draw him out, I suggested that half the sum he had mentioned, or £1,000, would in my opinion be a sufficient compensation for a few days time spent in so interesting an employment. To this he replied that it was a delicate subject for a gentleman to discuss, but he thought my views were sufficiently liberal. Thus ended our first interview; immediately after which Mr. Vansittart set to work in carnest, and I must do him the justice to say that he was most industrious, for he flew up and down between Toronto, Hamilton and Woodstock for many days, At length discouraged by the fruitlessness of his exin a most wonderful manner. crtions, he begged me to give something in writing to shew that he really was authorized to act for me, and what I would be willing to do, whereupon I gave him the memorandum which he has since published, and by way of encouraging him to renowed exertions, I told him if he could get the parties he was negociating with to pay me £50,000 for my interest in the contract, I would allow him £10,000 for his trouble. This he declared to be positively munificent, and I need hardly add, that he a second time entered upon his negociations with renewed energy and with all the determination of a wily and profound diplomatist. From the time of the interview above referred to, I cannot recollect having seen anything of Mr. Vansittar till within the last few days. Why he did not return to me and report progress.

am at a loss to conjecture, unless it be that the sapient "Isaac" may have thought it advisable to retain him about his person as a confidential adviser. During the intercourse which took place between Mr. Morrison and myself, I repeatedly urged him to introduce a Bill to incorporate a new Company to build a through line from the Niagara River to the Detroit River, but though he admitted that an independent line would be far preferable to the proposed amalgamation between the Woodstock and Lake Erie, and the Amherstburgh and St. Thomas Companies, he expressed his fears that it would be impossible to carry the Bill, and I could not induce him to make the attempt. About a month ago, without having informed me of his intention to do so, Mr. Morrison went to Woodstock and entered into arrangements by which he was made President of the Woodstock and Lake Eric Railway Company; and from all I could learn, (for Mr. Morrison, though having daily opportunities of doing so, never held any further communication with me after his return from Woodstock) I was induced to believe that it was his intention to recognize the legality of a contract, said to have been recently given out by the Buchanan Board of the Amherstburgh and St. Thomas Railway Company; whose legality Mr. Morrison had throughout disputed. I should have mentioned before, that I had on more than one occasion before the death of Mr. Zimmerman, expressed both to him and Mr. Morrison, my surprise and disappointment, that after the laps of so many months, so little progress had been made in the Chancery suit. The answer always was, that they dared not press the suit lest the Court might decide against the legality of both Boards, but I never clearly understood why they should have been under any such apprehensions till within the last month; when having obtained possession of, and carefully read over all the statements and counter statements of the contending parties, I became strongly impressed with the belief (and I am convinced that any impartial person who will take the trouble to read all the chancery paper, must come to the same conclusion) that the taking of stock of the late Mr. Zimmerman, as well as on the part of Mr. Wallace, was all a show, and that in reality Mr. McBeth, Mr. Kolfage and myself were the only parties who had properly complied with the requirements of the charter, by paying our own money into a chartered bank, bona fide, and at the proper time.

Of the alleged deposit of £25,000 by Mr. Zimmerman, in his own Bank, to the credit of the Amherstburghand St. Thomas Railway Company, not one farthing has been expended, nor has a shilling of the money subsequently deposited by Mr. Buchanan to the credit of the same Company, ever been chequed out or expended. No work has ever been done upon the extension of the Woodstock and Lake Erie Railway Company, nor has any expenditure been made in work on the line of the Amherstburgh and St. Thomas Railway Company.

The condition of the charter for the extensions of the Woodstock and Lake Eric Railway Company, have not been complied with, and the time within which the Act requires that the building of those extensions should be commenced, will expire on Monday next, the 18th inst.

In conclusion I have only to state, in refutation of the charges brought against me by my opponents, "that I have introduced the Bill to Incorporate the Great

"Southern Railway Company from purely selfish motives, and with a view to "being bought off," as they express it; that on three different occasions within as many weeks, offers have been made to me, to induce me to abandon the stand which I have taken; which I had only to accept, to secure a larger fortune than I could ever dream of making by any other means. The last of these offers was from the Receiver General, in a memorandum in his own hand writing, in the following words:

"Mr. Rankins Bill to be carried through with a clause authorizing the stock now held by Mr. Buchanan to be stock in the through line. "The line to have power to amalgamate with the Woodstock line, and the payment of interest to be secured and paid to the Government for the Municipalities until the Woodstock line is completed, upon the £145,000 invested by the Municipality or to receive payment for the same in Bonds of the Southern line. The Provisional Directors to be satisfactory to all parties. The line to be proceeded with at once. Mr. Rankin to have secured to him his share in the contract as agreed with Mr. Zimmerman in July, 1856, by Messrs. Wythes and Buchanan.

I have, however, promptly rejected every proposal of compromise that has been made to me, simply because, I cannot consent for any pecuniary consideration whatever to become a party to the carrying out of plans conceived in barefaced and deliberate fraud.

Under the amalgamating scheme of Messrs. Buchanan and Morrison, the Capital Stock of the amalgamated Company would be £2,000,000, the first call of ten per cent. upon this capital would amount to £200,000, which would be appropriated as follows, viz:

Expenses of protest and damages on dishonored bills, drawn on the	
Great Western Railway Company last summer	£18,000
Amount paid by Mr. Buchanan on account of interest on the debt of	1,79
Municipalities last August	18,000
Amount paid to Mr. De Blaquiere by Mr. Buchanan in August last	
to get the control of the Woodstock and Lake Erie Railway	25,000
Amount paid to Mr. O'Reilly	7,500
Amount promised to be paid by Mr. Buchanan to Messrs. Park,	
McLeod and Wallace	"16.000
Debt of Municipalities	150,000
and the state of the state of the state of the state of the state of the state of the state of the state of the	· Children
	£224 000

The whole of this large sum would be drawn from the pockets of Share holders in England and expended as above before a single spade full of earth would be turned, or an hours work done towards the building of the Road be sides which, the amalgamating scheme would involve a useless and losing ex penditure of some £400,000 more in building the cross-road from Woodstock to Port Dover, making in all the round sum of £634,000 of worse than needless expenditure, out of the funds of the Company, purporting to be raised to build the Southern Railway.

The hour having arrived for the Sub-Committee to adjourn,

The Witness withdrew.

On Mr. Rankin requesting the Committee to resume the consideration of the Bill to incorporate the Great Southern Railway Company.

Ordered, That the Room be cleared of all persons excepting members of the House.

The Committee deliberated.

Mr. Bowes moved, That the Bill for the incorporation of the Great Southern Railway Company be taken into consideration on Tuesday next, and that it then be the first item on the order of the day.

On which the Committee divided, and the names being called for were taken down as follows:

Yeas:

Messrs. Bellingham,

Bowes,

Bureau, Christie.

Christie, Clarke,

Foley,

Macdonald, Atty. Genl.

Mongenais,

Papin,

Rankin,

Simard,

Smith, James,—12.

So it was carried in the affirmative and ordered accordingly.

The doors were opened.

Adjourned until Monday next, at 11 o'clock A.M.

Nays:

Messrs. Daly,

Lemieux,

Morrison, Angus,

Morrison, Jos. C.—4.

# Monday, 18th May, 1857.

### COMMITTEE MET.

#### MEMBERS PRESENT:

HON. W. B. ROBINSON, VICE CHAIRMAN;

Mr. Bellingham,

Mr. Bowes,

Mr. Brown,

MR. BUREAU,

Hon. Mr. Cauchon,

MR. CHRISTIE,

MR. CLARKE,

Mr. A. A. Dorion,

MR. FOLEY,

Hon. Mr. Lemieux,

MR. MONGENAIS,

Mr. Angus Morrison,

Mr. PAPIN,

MR. RANKIN,

Mr. Simari, and

MR. WILSON.

The Clerk laid before the Committee the proceedings of, and evidence taken by the Sub-Committee on Friday and Saturday last, as follows:

Friday, 15th May, 1857.

## SUB-COMMITTEE MET AT 10 O'CLOCK.

#### MEMBERS PRESENT:

Mr. Bowes,
Mr. Clarke,
Mr. Daly, and
Mr. Rankin.

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance.

John George Vansittart, Esq., called in and examined.

[By Counsel for Mr. Buchanan.]

Ques. 58. Had you at any time and when, any conversation with Mr. Rankin on the subject of his claims against the estate of Mr. Zimmerman. If yea; state the time, place and purport of such conversation?—Ans. I had several conversations with Mr. Rankin on the subject, the precise time I cannot state, but it was within a few weeks since. Those conversations took place, I believe, entirely in Toronto, and principally at Sword's Hotel, where Mr. Rankin was residing. The purport of such conversations, was the precise nature of Mr. Rankin's claims against the Southern Railway combination, as derived principally from Mr. Zimmerman.

Ques. 59. Did Mr. Rankin, on either of the occasions referred to, explain to you the particular nature of his claim. If so. What was it?—Ans. Mr. Rankin explained that his claim mainly rested on an agreement under seal from Mr. Zimmer nan, for a participation in the contract, for building the road West of St. Thomas, which I understood him to say, represented one-fourth of it. The value of his share in the contract, Mr. Rankin estimated at least £50,000. He afterwards expressed himself willing to agree with the existing combination under Mr. Buchanan, on having £25,000 secured to him, and stipulated for, by a redeeming clause in his agreement with Mr. Zimmerman. Mr. Rankin also gave me to understand, that by another arrangement with Mr. Zimmerman, he would have been entitled to name a sub-Contractor for a certain portion of the work which consideration he valued at £12,500.

Ques. 60. Did he then claim to be entitled to such share in the contract under his agreement with Mr. Zimmerman, or an equivalent therefor?—Ans. Mr. Rankin at first communicated to me his claim to share in the contract, without mentioning a redeeming clause. He afterwards made me aware of the condition that he should

accept £25,000 if Mr. Zimmerman chose to offer it in a specified time, as an equivalent for his share in the contract.

Ques. 61. Did he then say that he was about to introduce a Bill for the incorporation of a new Company, or that any necessity existed for such a Bill?—Ans. He did not. He mentioned his intention, if terms could not be agreed upon between Mr. Buchanan and himself, to introduce a Bill to legalize the proceedings of the Amherstburgh and St. Thomas Railway Company, of which he was President, with a view, as I supposed, of some subsequent amalgamation with the Woodstock and Lake Eric, or amalgamations existing with it, but he said nothing of an intention to seek a Charter for a new through line.

Ques. 62. Did he or not express a desire to proceed with the works of the Amherstburgh and St. Thomas line if his proposals were accepted, or a readiness in such case to aid in carrying out the old charter?—Ans. Mr. Rankin distinctly expressed his readiness to aid in carrying out the old charter, in conjunction with his own line, if the terms I prevailed upon him to agree to, were accepted.

Ques. 63. Did he use any threat that, in the event of his proposals being rejected, he would throw any obstacles in the way of the old charter being carried out?—Ans. Mr. Rankin always said, that if Mr. Buchanan did not make terms with him he would defeat his scheme.

Ques. 64. Did Mr Rankin depute you to act for him in respect of such claim? and if so, with whom did you communicate?—Ans. Mr. Rankin accepted my proffered mediation as negociator between himself and Mr. Buchanan. He preferred that I, as his agent, should communicate directly with Mr. Buchanan, but upon my representing that I had to deal with complicated interests, he gave me a discretionary power to communicate with whomsoever I thought it necessary, to attain the end. With this view, and under such sanction, I had interviews with Mr. Buchanan, the Hon. Mr. Morrison, Mr. O'Reilly, and with some gentlemen interested, or indirectly, as I supposed, concerned with the Woodstock Directors in the Railway Board. These communications were not, of course, all made in full, but tempered according to circumstances.

Ques. 65. What was the final result of your communications?—Ans. The failure of the negociation.

Ques. 66. Was any written proposition made by you or Mr. Rankin; if so, by whom was it drawn up?—Ans. A written proposition, by way of memorandum, was entrusted to me by Mr. Rankin, as his finally authorized basis for negociation. It was drawn up by his own hand.

Ques. 67. Produce such paper. Ans. I now produce the original memorandum:

(Copy.)

Memo, for Mr. Vansittart.

If Mr. Buchanan and Mr. Street (on behalf of Mr. Wythes) will bind themselves to carry out the arrangements entered into between Mr. Zimmerman and myself, with reference to the Amherstburgh and St. Thomas Railway, and to protect my interests to the full extent to which Mr. Zimmerman had agreed in writing over his own signature, and further, to protect the rights of all other parties, derived from the late Mr. Z., which have been reduced to writing and signed, I will at once abandon all opposition to their plans, and do my utmost to reconcile all conflicting interests.

Ques 68. Are you acquainted with the present line of road as contemplated from Detroit to the Niagara River; if so, is it a proper and desirable route?—Ans. I am not acquainted with the whole line, otherwise than by plans and maps, I have always conceived it to be a desirable route, and have heard it so described.

Ques. 69. As a matter of public opinion, is the Bill introduced by Mr. Rankin, a desirable one, or how otherwise?—Ans. As a matter of public opinion in my part of the county, the Bill introduced by Mr. Rankin is thought anything but a desirable one, and principally because it omits to protect the Municipalities and individuals in large sums of money, which they have subscribed, and which have been expended on the Road, in good faith, on existing acts of Parliament.

Ques. 70. State any other matter or thing known to you, bearing upon the question now under inquiry?—Ans. I well know that the success of Mr. Rankin's present scheme, and consequent defeat of the present combination, under Mr. Wythes and Buchanan, would produce a most injurious result upon the Municipalities interested, and particularly on property-holders and rate-payers in Woodstock. I may instance the fact, that two or three years ago when the Railroad was first considered secure, property in the Town of Woodstock immediately rose very considerably in value. Many persons purchased, relying upon the construction of the road, to protect that value. I myself bought some few lots, to the value of about £3,500, upon which a limited portion was paid down, and instalments with interest have to be made good. The failure of our Railway would cause this to become a serious embarrassment to me, in consequence of the reduction in value of such property, whereas the prosecution of the work, or the well known security of the undertaking, would at least protect me from loss. The amount may be small, but many others who may have ventured in the same way, on the good faith of the existing Railway Charter, feel with myself, from the same cause, great anxiety to see it protected. I have no sort of interest in the contracts, or Railway speculations in any other way, and I don't know that I can state any thing else bearing on the question.

Cross-examined [By Counsel for the Bill.]

Ques. 71. On whose account did you first call on Mr. Rankin in this matter?

Ans. On my own account.

Ques. 72. Did you not consult with any body beforehand about doing so:

Ans. No one was aware of my intention of putting myself in communication with Mr. Rankin, but Mr. McClenaghan of Woodstock, who felt interested for Mr. Rankin in the matter.

Ques. 73. Who are the individuals that Mr. Rankin's Bill fails to protect for monies expended by them, and what are the amounts?—Ans. I understand that Mr. Rankin's Bill fails to protect Mr. Buchanan, and I think also the estate of the late Mr. Zimmerman, in certain amounts expended, or liabilities incurred, though I am not sufficiently acquainted with their affairs to state the amounts. I may add, however, that many other individuals are indirectly interested, and will be losers by the failure of the old scheme, from having, like myself, ventured on certain outlays and undertakings in good faith on the charter.

Ques. 74. Have you always kept possession of the memorandum or answer which you say Mr. Rankin entrusted to you? If so, how did Mr. Buchanan and others get it for publication, and was it with your consent?—Ans. I have not always kept possession of Mr. Rankin's memorandum. I entrusted it in the first instance to Mr. O'Reilly, as the representative, with Mr. Buchanan and Mr. Street, the agent of Mr. Wythes, of the Zimmerman interests in the contract. Mr. Buchanan had himself previously informed me that it was impossible for himself or Mr. Street to treat directly with Mr. Rankin, but that Mr. Rankin's claims, as derived from Mr. Zimmerman, must come in with the general arrangement to be made with Mr. Zimmerman's executors, and that Mr. O'Reilly was the proper person to negociate them. I had been made aware by Mr. Rankin that an insuperable objection existed on his part to holding any communication with Mr. O'Reilly on the subject. I was at the same time fully sensible by repeated observations of Mr. Buchanan's, that the only way I could accomplish an arrangement with himself and Mr. Street, for Mr. Rankin, was through Mr. O'Reilly or by his co-operation. I felt, therefore, that this was one instance in my power to serve Mr. Rankin as his agent, in dealing with a third party with whom he could not communicate in person. In the instance in question, I failing to see Mr. Buchanan, in consequence of the necessity of my proceeding to Woodstock, and I consequently entrusted this memorandum of Mr. Rankin's, to Mr. O'Reilly to submit to Mr. Buchanan and Mr. Street. Mr. O'Reilly expressed his readiness to concur in protecting Mr. Rankin's claim under the late Mr. Zimmerman. I think it was on a Friday, or perhaps Thursday afternoon, that I saw Mr. O'Reilly and gave him the memorandum; on the following Monday a meeting was to be held at the Falls, of the late Mr. Zimmerman's executors, and persons interested with them, to determine whether they would carry on the Railway contract made by Mr Zimmerman, or substitute any parties to represent their interests in the matter, in short to determine some definite arrangement with respect to the road on the part of the Zimmerman estate, so I was informed. On this occasion, it was manifest that Mr. Rankin's views should be represented as forcibly as possible, in order to obtain a favorable consideration. the exhibition in Mr. Rankin's own hand-writing, of his willingness to accept definite terms, would strengthen the probability of their acceptance, and I therefore felt justified in leaving the memorandum in hands other than my own, to be produced, if necessary, at the Falls. It was done, however, with the distinct understanding that the memorandum was my private property, and was to be returned to me after the negociation was over. Its use forpublication, was certainly not with my consent.

Ques. 75. When did you purchase the lots you have alluded to? Ans. At different periods. I think in 1854.

### [By Counsel for the Bill.]

Ques. 76. Do you know anything of any arrangement between the Municipalities and Mr. O'Reilly, acting in the interest of the late Mr. Zimmerman, or for which an Act of Parliament was predicated. If so, state the purport of such arrangement, what steps were taken towards its accomplishment, by whose instrumentality the same was thwarted, with what object, and what means were used by the party opposing such an arrangement, to effect such purpose? Ans. I am really unable to say anything about it, as I had no participation in the arrangements referred to

The Witness withdrew.

Hon. Joseph C. Morrison called in and Examined.

[By Counsel for Mr. Buchanan.]

Ques. 77. Are you a Shareholder in any one or more of the amalgamated Companies. If not, were you so at any time, and when did you cease to be so?—Ans. I am not now, but I became a Shareholder in the Woodstock and Lake Erie Railway on the 10th of last month, and ceased to be one on the 10th of the present month.

Ques. 78. Have you any interest in the affairs of either of the branches of the amalgamated line? and if so, what is the nature of your interest therein?—Ans. I have no interest in the affairs of either of the lines.

Ques. 79. Have you any knowledge of the reason why the works upon the Amherstburgh and St. Thomas Road have not been proceeded with. If so, state the same?—Ans. The reason why the works on the Amherstburgh and St. Thomas Railway did not proceed, arises from the fact of a Chancery suit being instituted on the part of the Board of Directors, of which Mr. Rankin was the President, against the Board presided over by Mr McLeod, to try the validity of the Election of Directors. Since the death of Mr. Zimmerman the amalgamation of the two lines, and the proceeding with the works of the through line, was also impeded by the claim made by Mr. Rankin.

Ques. 80. When and under what circumstances did you become acquainted with the fact that Mr. Rankin claimed to be interested in the contract with the late Mr. Zimmerman; And what was the nature of such claim?—Ans. I think I first heard it from Mr. Rankin himself. The first knowledge I had of it, arose from my communicating to Mr. Rankin, that Mr. Buchanan, Mr. O'Reilly, representing the Municipalities, and Mr. Street, the representative of the English Contractors, all agreeing to amalgamate the three Boards of Directors, and agreeing to protect all nterests of the Municipalities and the Zimmerman Estate, and the repayment of advances made on account of the Roads. Upon communicating this to Mr. Rankin, he informed me upon speaking of the contract entered into by the Amherstburgh.

Board and Mr. Wythes, and that the Zimmerman Estate had consented to give up their interest in that Contract, that he (Mr. Rankin) had an interest of one fourth in the Contract. I did not then see the Contract, but immediately wrote to the Trustees for a copy, if they had one, which I received by Mail. I communicated this information to the parties concerned. The day after I received the copy, Mr. Vansittant, as the friend or Agent of Mr. Rankin called upon me, as representing the Zimmerman Estate for the purpose, and did state the claim of Mr. Rankin, as being £50,000, which he required to be secured before any amalgamation or settlement should take place. I told Mr. Vansittart that I had a copy of the Contract, and it had a condition of only £25,000, which I would press upon the Executors and all concerned to have secured to Mr. Rankin, it being Mr. Zimmerman's agreement under his own hand. Mr. Vansittart said that Mr. Rankin claimed under some other arrangement, which would secure a further sum of \$50,000 at least. I told Mr. Vansittart that it was totally out of the question. I had several other interviews with him. This claim so advanced was considered by all the parties so extravagant, that negotiations were broken off, and nothing more took place until Mr. Rankin gave notice of his Bill, which closed all chance of a settlement.

Ques. 81. Who is the President of the Company now desired to be abolished, and who is the Vice-President?—Ans. The President is A. Rankin, Esq., and the Vice-President is G. Macbeth, Esq., both members of the House-

Ques. 82. Did you make efforts to amalgamate the several existing Companies? If so, when, and how?—Ans. Previous to Mr. Zimmerman's death, I took no part in the efforts to amalgamate. Shortly after his death, being a particular friend of his, while alive, the Trustees of the estate requested me to advise them, and gave me authority to make the best arrangement I could, for the amalgamation of the several Companies, and the protection of the interests of the Estate. I communicated with all the parties, and arranged for an amalgamation and the early commencement of the work in the same way—upon, as I understood from Mr. Zimmerman on the day of his death, he contemplated, and as he informed me that day, would be done upon the ratifying of the By-laws of the Municipalities interested in the Woodstock Road which he expected to hear of that night. The three Boards of Directors within the last three weeks passed resolutions and agreed to the amalgamation as originally intended by the Act of last Session, and the By-laws of the municipalities.

Ques. 83. Did you at any time and when and why, become a Director in the Woodstock and Lake Eric Company. Are you still such? If not, when and why did you resign?—Ans. I became a Director, as I said before, on the 10th of last month, and was elected President. I resigned on the 10th of the present month, the Presidentship and Directorship, and transferred the stock which had been assigned to me by Mr. Vannorman to qualify me. I resigned because I only went into the Board with Mr. Ridout, the Cashier of the Upper Canada Bank, at the urgent request of the contending parties, and with a view of reconciling the differences existing. I did so most reluctantly, only with the hope of seeing the through line commenced immediately, and the interests of Municipalities protected. My Directorship was to end in June. But as I stated to the Board in my

resignation, I felt it my duty to disassociate with the Company, as the Parliamentary enquiry pending related to matters with which I had no connection.

Ques. 84. You say you failed to accomplish the objects you had in view when you went into the Board—to what do you attribute that failure? Ans. I attribute it principally to the difficulties arising out of the claim made by Mr. Rankin, and the proceeding with a Bill for a new Charter.

Ques. 85. Do you think that you could have accomplished that object, and that the works would have been proceeded with long since had it not been for the interference of Mr. Rankin. Ans. I think I could have done so.

Ques. 86. Did Mr. Rankin endeavour to stop the progress of the work, with a view to enforcing the parties concerned to yield to his demand. Ans. Mr. Rankin stopped the progress of the amalgamation, and the taking of the £300,000 of stock in the Woodstock Road, and if the amalgamation had been effected, and the Chancery Suit stopped, the works would have been proceeded with before now. Mr. Rankin instructed the Solicitor to proceed with the Chancery suit, a few days before he gave notice of his Bill, which further fact complicated the matter.

Ques. 87. What was the amount of the claims of the Zimmerman estate in relation to the matter? Ans. The Zimmerman estate claimed, as having been advanced by Mr. Zimmerman, monies to the amount of \$60,000 or \$70,000 on account of the Southern line, and \$50,000 advanced to the Woodstock Company on account of the Municipalities.

Ques. 88. Do you know any other matter or thing important to the question now under inquiry? If so, state the same.—Ans. I am not aware of anything in particular, other than what is detailed in the evidence.

Cross-examined [By Counsel for the Bill.]

Ques. 89. Was the ten per cent. upon the Stock taken by the late Mr. Zimmerman in the Amherstburgh and St. Thomas Road actually paid into any Bank? and if into the Zimmerman Bank, was there any particular reason therefor, and has such money, if so paid in, remained continually since available for the purpose of such road and no other? Ans. I have no knowledge myself, except as being told by the late Mr. Zimmerman that it was paid into the Zimmerman Bank, in pursuance of the order of the Provisional Directors. I know of no reason why it was paid into that Bank, except that Mr. Zimmerman was connected with it, and that the deposit receipts were signed by the Cashier.

Ques. 90. Upon what capital was the Zimmerman Bank originally established. Has it been sustained by the intervention or aid in any way of other Chartered Banks, and have the securities originally deposited with the Government remained continually available for their original purposes? Ans. It was originally established under the free Banking system. I don't know of its having been sustained by other Chartered Banks until after the death of Mr. Zimmmerman, when in consequence.

of a run on the Bank for gold, prior to his death and immediately after, when the other Chartered Banks agreed to sustain it, by taking the Bills as usual.

Ques. 91. Was the solvency of the Zimmerman Bank at any time questioned, and did the Receiver General's Department, during such period, leave large Government Deposits in said Bank? Ans. The solvency of the Zimmerman Bank was never questioned, until parties connected with the Southern Railway, for the purpose of injuring Mr. Zimmerman's position, as controlling the Southern Railway, rumored and created a run upon the Bank. With this exception, I know of no other reason. The Receiver General's Department have deposited large amounts in that Bank during that period.

Ques. 92. If the amount deposited upon the Zimmerman Stock in the Amherstburgh and St. Thomas Road had been withdrawn from the Zimmerman Bank, would it have affected the solvency of such Bank? Ans. I do not think it would have done so.

Ques. 93. Has paper of the late Mr. Zimmerman's falling due at New York or elsewhere, been protected by you, or in any way through your intervention or that of any other person connected with the Receiver General's Department, either shortly before or since the death of Mr. Zimmerman, and if so, what was the amount of such paper? Ans. I am not aware of any falling due, and none has been protected by me, or any person to my knowledge, in the Receiver General's Department.

Ques. 94. With what means could the works of the Amherstburgh and St. Thomas Road have been proceeded with, if they had not been stopped for the reasons you have before alleged? Ans. By means of Mr. Buchanan's subscription and the other Stockholders in the Road, as well by the raising of means in England, as contemplated by Mr. Buchanan and the parties interested.

The hour having arrived for Sub-Committee to adjourn.

The Witness withdrew.

## Saturday, 16th May, 1857.

#### SUB-COMMITTEE MET AT 10 O'CLOCK.

MEMBERS PRESENT:

Mr. Brown,

Mr. CHRISTIE,

Mr. CLARKE,

MR. FOLEY,

Mr. Angus Morrison,

Hon. Mr. Joseph Morrison, and

MR. RANKIN.

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance.

J. M. McLeod, Esq., called in and Examined.

[By Counsel for Mr. Buchanan.]

Ques. 95. State what the nature of your connection with the Amherstburgh and St. Thomas Railway Company is, and how and when you became so connected. Ans. In the year 1852, the Hon. W. H. Merritt communicated with Mr. Park of Amherstburgh and myself, and several other gentlemen with the intention of agitating or getting up petitions for the purpose of obtaining a charter for a sthrough line from the Detroit River to the Niagara River. Our negotiations and exertions continued till the Session of 1854, when Mr. Rankin was returned for the County During those two years, Mr. Park and myself visited most of the Municipalities from Amherstburgh to St. Thomas, and prevailed upon them to petition Parliament for the accomplishment of the above object. I was requested to attend the County Council of Kent, (I think in 1853) then in session, and to urge upon them the necessity of passing a Resolution, that they would take stock should a charter be obtained. I did so attend, and after hearing my exposition they unanimously passed a resolution, that the Municipality of the County of Kent should take £500,000 of Stock in the Southern Railway if a through charter could be This was before the election of Mr. Rankin, and before he had any connection with the Southern Road. In the session of 1854, at Quebec, the Hon. W. H. Merritt introduced a Bill for a through charter from the Detroit to the Niagara River, which Bill was rejected by the Railway Committee, (of which Committee Mr. Rankin was a member,) although petitioned for by all the Municipalities from Amherstburgh to St. Thomas. In the session of 1855, the half measure, called "The Amherstburgh and St. Thomas Railway" was passed, wherein a clause was inserted requiring £500,000 of Stock to be taken, and ten per cent. upon it to be paid thereon; That immediately thereupon four Stock Books were opened in the Towns of St. Thomas, Chatham, Windsor, and Amherstburgh. Subscriptions by

the Municipalities and private individuals were taken to nearly the amount of £200,000. Finding at that time that it was impossible to get the necessary amount of stock subscribed, it was proposed to have a Bill introduced in the session of 1856, for the reduction of stock, to one half the amount.

Ques. 96. When was the subscription of Mr. Wallace made. And whether or not was it a bona-fide one? Ans. While attending the Session of 1856 at Toronto, I found that it was the universal impression, that from the same combination of influence that defeated Mr. Merritt's through Bill in 1854, the amendment for the reduction of Stock would not be granted. Mr. Me.ritt, Mr. Park, and myselfin conjunction with some other gentlemen in Toronto, commenced negociations for the purpose of subscribing the full amount of Stock necessary to form the Company During these negociations in the early part of May 1856, Mr. W. Wallace of Fort Erie, C. W., Civil Engineer, came up to Amherstburgh for the purpose of making arrangements for the formation of the Company, and commencing a survey of the line. In conversation with him upon the subject, he stated, that the capital ists connected with the Michigan Southern Railway, the New York Central Railway, and the City of Buffalo, with whom he was intimately acquainted, had repeatedly expressed themselves to him, very favorable to the construction of the Southern Road, as forming the only link wanting for the connection of the Eastern and Western Railways in the United States, and that he had no doubt through his influence with them, and the confidence they reposed in him, they would advance the amount requisite to form the Company. He proposed to subscribe the whole amount of Stock himself and transfer it afterwards to these parties who should advance the aforesaid money. He told me that the Buffalo and Utica Road in the State of New York and some other Railway in the same State, of which I'do not now recollect the name, was organized and Stock taken by him in the same manner, and ultimately transferred to the Capitalists who built the Road. these Roads were built under his superintendence as Chief Engineer. On the eighth of May, the people of Amherstburgh, anxious to have the survey of the line commenced for the purpose of ascertaining the probable cost of the Road, held a meeting at which Mr. Wallace was authorized to commence the survey, and the sum of £250, was subscribed and paid to Mr. Wallace, in order to assist him to pay the expenses of the survey. At that meeting I was not present, being absent from home. On my return I was waited upon, I think by the Secretary of the meeting, for the purpose of obtaining my subscription to further the object of the survey, at which time he informed me, that Mr. Wallace had subscribed £500,000 necessary to form a Company thus carrying out his ideas communicated to me on A few days afterwards I met Mr. Wallace on his way from former occasions. Amherstburgh to Buffalo, when he informed me, that in fulfilment of his former proposition, he had subscribed the Stock, and was then on his way with the Stock Book in his possession, (having first obtained permission from the Director in whose custody the Stock Book was placed, by a Resolution of the provisional Committee) for the purpose of transferring the Stock to the Capitalists who should alvance the money. During the months of May, June, July, and August, the Survey was continued with.

Ques. 97. Were you, as one of the Provisional Directors, present at a meeting of such Directors at St. Thomas on the 5th July, 1856? If so, what proceedings were taken by them? Ans. I was not present at the clandestine meeting called by Mr. Rankin, one of the Provisional Directors, for the simple reason that I was never notified, although I believe I was present at every meeting of the said Directors held at St. Thomas or any other place, from the period of the granting of the charter. The proceedings taken by them as I afterwards saw advertised in the public prints, were, that they had closed the books, and that ten per cent. on the Stock subscribed was required to be paid within ten days of their meeting, otherwise the Stock subscribed would forfeit the right to vote at the election of Directors, which was to take place at Amherstburgh on the 7th August.

Ques. 98. Are you aware that two of the members of that Committee were not notified of the meeting, and if so, do you know why they were omitted by Mr. Rankin? Ans. Mr. Kolfage and myself, two of the Provisional Directors residing at Amherstburgh, were not notified of the meeting, and, of course, were not present. I am unable to give a reason, unless it was that Mr. Rankin feared that something might leak out of his private arrangement with Mr. Zimmerman, in connection with the £25,000, he having called the meeting on no authority but his own.

Ques. 99. What arrangement was made with Mr. Buchanan on the subject of his paying the necessary deposits upon the Stock subscribed for? Ans. About the 10th July I'was first aware of the meeting of the Directors at St. Thomas. I, therefore, at once communicated with Mr. Wallace and Mr. Park, and we concluded to proceed to St. Catherines to see Mr. Merritt, and to Buffalo to see Mr. Patchin the Banker. and other capitalists, for the purpose of raising the ten per cent. on the Wallace subscription. We first had a communication with Mr. Merritt, when it was agreed that we should deposit our joint notes for £25,000 in the Banks at St. Catherines, in order to obtain a discount thereof, which we did, and that we would proceed to Buffalo and try there to obtain from the capitalists with whom Mr. Wallace had been negotiating, the other £25,000. On our way to Buffalo we accidentally met Mr. Patchin on board the steamer Clifton, on his way to Buffalo, who agreed with Mr. Wallace that he would come down to St. Catherines on the Monday following, and deposit in the Bank there the £25,000, and take a transfer of the Stock which that amount represented as the ten per cent. Mr. Park and myself then proceeded on to Amherstburg, and on the Monday morning following, we, to our astonishment, received a telegraph from Mr. Buchanan of Hamilton, (with whom, up to that time, we never had any communication on the subject) stating that he was on his way to Amherstburgh, with the money to pay in the ten per cent. on the Wallace subscription. We therefore proceeded to Windsor in order to meet Mr Buchanan, and ascertain the meaning of the telegraph. We met him there, when he proposed to advance the money on the Wallace subscription, if we would guarantee the transfer of the stock by Mr. Wallace to him. We objected, and wanted to know his reasons for obtaining the stock, as we were suspicious that he wished to obtain possession of the Charter, for the purpose of transferring it to the Great Western Railway company, and thus prevent the Road being built, as we imagined that it would be for the interest of the Great Western Railway to

Mr. Buchanan explained that the money was already have no opposing line. subscribed in England for the building of a double track on the Great Western Road, and that the Canadian Directors, as well as the stockholders in England had decided that it would be preferable to build the Southern line of Railway, which would be cheaper and of easier grade, than a double track on their own Road. We then asked him what guarantee he would give us that the Road should be built as he represented; he said the best guarantee he could give was the paying in of the money into the Bank, to the credit of the Amherstburgh and St. Thomas Railway Company, in the names of the parties in Amherstburgh, who had subscribed stock, and make them Directors in the Company, and that he would also give us his own written guarantee that the Road should have its western terminus at Amherstburgh as well as Windsor. (See agreement in Mr. Buchanan's evidence.) We were under the impression that this arrangement would be preferable for the interests of the Company to making it over to American capitalists, and concluded the arrangement with Mr. Buchanan. We then proceeded to Hamilton, when Mr. Buchanan handed to me the following certificate of deposits of which the original is now produced, and the following is a copy:

> Office, Bank Ufper Canada, Hamilton, 15th July, 1856.

I hereby certify that William Wallace has deposited in this Branch the sum of fifty thousand pounds currency (£50,000) to the credit of the Amherstburgh and St. Thomas Railway Company, as a payment on shares subscribed by him, in said Company.

(Signed,)

ALFRED STOWE; Store

Cashier.

It was also agreed that as the time did not admit of notifying the parties in Amherstburgh, who had subscribed stock to pay in the ten per cent., that Mr. Buchanan should also advance the money for them, and that they were to give their notes at ninety days for the respective amounts paid for them, which notes were subsequently given, and the certificates of deposit were issued by Mr. Stowe, Cashier Bank of Upper Canada, Hamilton, and worded similarly to the Wallace certificate, to the following parties: -J. R. Berthelot, £25; John McLeod, £100; Theodore J. Park, £100; J. W. Redsdale, £25; Peter Menzies, £25; William Duff, Sen'r, £25; Bartley Elliot, £25. The originals of which certificates are now produced. I mentioned to Mr. Buchanan that I had been at a great expense, and a great loss of time since 1852, in assisting to obtain the Charter, and that I should likely be called upon before the completion of the Road to expend more time and money in the furtherance of that object, and that I ought to be remunerated for the same. It was then verbally agreed, that on the completion of the Road, two hundred shares of the Company should be allowed to me That I never to this moment have received one dollar for remuneration of services or expenses, with the exception of the part payment of my expenses while in England, by Mr. Buchanan.

Ques. 100. Were you present at a meeting held at Amherstburgh on the 7th August, 1856? If yea, who were present and what proceedings were taken? Ans. I was present at a meeting of the Shareholders of the Amherstburg and St. Thomas Railway Company, called by the Secretary (appointed at Mr. Rankin's meeting of Provisional Directors on the 5th July at St. Thomas) to meet in the Town Hall, at 12 o'clock, noon. At which meeting the before mentioned certificates of deposit were produced, and nine Directors appointed of whom I was chosen Chairman. I was not notified of any other meeting, but Mr. Rankin met me in the street and asked me into Mr. Horseman's Hotel, to try and come to some arrange-While in the room, with some other gentleman, he tried to form a meeting of Shareholders under the Zimmerman subscription; I objected to the legality of the meeting, and left the room. In the morning before these meetings took place, Mr. Zimmerman was introduced to me. He said he wished to make some arrangement with me-he remarked that he found that he had got the wrong sow by the ear, that he saw that morning that he was in the wrong boat, that he was entirely in my power, and that if I would only side with him, I could name my price. answered, that I would not betray the interests confided to me, for any amount he could offer to me. In the afternoon I was waited upon by Mr. Woodruff and Mr. McMicken, and informed that I was appointed a Director in their Board. I would state that at the Meeting held in the Town Hall, the Secretary produced the following certificates of deposit, made in the Zimmerman Bank, to the credit of the Amherstburgh and St. Thomas Railway Company in the names of the following parties, and for their respective amounts: S. Zimmerman, \$80,000; M. Zimmerman, \$10,000; R. G. Benedict, \$2,000; J. W. Dunklee, \$2,000; Jno. Spalding, \$2,000; J. A. Woodruff, \$2,000; G. McMicken, \$800, and James Zimmerman, \$400, making in all the sum of \$99,200. Also a certificate of deposit from the Bank of Montreal at St. Thomas, in the name of G. Southwick, Esq., M. P. -P., for the sum of twenty-five pounds, also to the credit of the Amherstburgh and. St. Thomas Railway-the originals of which I now produce.

The hour having arrived for the Sub-Committee to adjourn,

The Witness withdrew.

On Motion of Mr. Brown, Ordered, That the Sub-committee now sitting to receive Evidence on the Great Southern Railway, have leave to sit during the day, notwithstanding the House being in Session, and that in the event of either of the parties objecting thereto, that the Chairman do ask leave of the House for the sitting of the said Sub-Committee.

Adjourned until tomorrow, at 11 o'clock, A.M.

Tuesday, 19th May, 1857.

#### COMMITTEE MET.

#### MEMBERS PRESENT:

HON. SIR ALLAN NAPIER MACNAB, BART., CHAIRMAN,

MR. BELLINGHAM,

Mr. Bowes,

Mr. Brown,

Mr. BUREAU,

Hon. Mr. Atty. Gen. CARTIER,

Hon. Mr. Cauchon,

MR. CHRISTIE.

MR. CLARKE,

MR. DALY,

Mr. Antoine Aime Dorion,

Mr. Foley,

Hon. Mr. LEMIEUX,

Hon. Mr. Atty. Gen. MACDONALD,

Mr. Mongenais,

Mr. Angus Morrison,

Hon. Mr. JOSEPH C. MORRISON,

Mr. Papin,

Mr. RANKIN,

Hon. Mr. Robinson,

Mr. SIMARD,

Mr. James Smith,

Hon. Mr. Spence, and Mr. Wilson.

The Committee resumed their further consideration of Bill (No. 253) to in corporate the Great Southern Railway Company.

The Clerk laid before the Committee the proceedings of, and Evidence, taken before their Sub-Committee the previous day, as follows:

### Monday, 18th May, 1857.

#### SUB-COMMITTEE MET AT 10 O'CLOCK,: A.M.

#### MEMBERS PRESENT:

Mr. Clarke,

MR. FOLEY,

Mr. Mongenais,

Mr. Angus Morrison, and

MR. RANKIN.

The Counsel for the Bill were in attendance.

The Counsel for the Petitioners against the Bill were in attendance.

J. S. Vosburgh, Esq., called in and Examined.

[By Counsel for Mr. Buchanan.]

Ques. 101. Where do you reside, and your occupation?—Ans. I reside at Chatham, and am a merchant.

Ques. 102. Were you one of the four petitioners for the present Bill? Why did you sign the petition, and have you, or not, withdrawn your name therefrom, if so, how and why?—Ans. On the 16th April last, Mr. Rankin called on me at Russell's Hotel, Toronto. After the ordinary conversation of the day, he said he wished to see me on a matter of business privately, and after stepping aside he began conversing with me on the subject of the Great Southern Railway.

All I knew of the matter at that time was, that there existed chartered companies for the Woodstock and Lake Erie and St. Thomas and Amherstburgh Railways, which, by virtue of their original charters and amendments thereto, had the power to construct links of the whole line from the Niagara to the Detroit River. That some of the capital stock was taken up and the required ten per cent paid in; that two different boards of directors had been elected for the St. Thomas and Amherstburg line, that the late Mr. Zimmerman and Mr. Rankin, Mr. Isaac Buchanan and Mr. John AcLeod, together with a number of others, were contending for the right to control the Railway or the construction of it, and that a suit in Chancery had been instituted.

At that time Mr. Rankin told me the McLeod party wished to get rid of him, (Rankin) altogether; that they would sell the charter to the Great Western Railway or hold it in abeyance, that all they wanted was to make something out of it that they had repeatedly offered him £25,000 to cease his opposition which he had indiginantly refused, and that his only object was to accomplish his undertaking and carry the road through and make good his pledges to the people of Essex and Kent, and which he was working hard for; that he had stirred up the Chancery suit, and that the whole matter was surrounded with insurmountable difficulties as it was

then, and that the only way to ever get our road was to get a new charter, and solicited my name to a petition praying Parliament to grant a charter to incorporate the Great Southern Railway Company, and I, taking everything he said in good faith, signed the petition.

Since that time I have had opportunities of satisfying myself that those representations were such as I should not have placed the least confidence in, and indeed acting under these convictions, I did on the 15th of May, inst., address a letter to the Chairman of the Railway Committee requesting him to withdraw my name from the petition which I had signed as above.

The following is a copy of the letter referred to.

Toronto, 15th May 1857.

To the Chairman of the Committee on Railways, Canals and Telegraph Lines, Legislative Assembly.

Sir:—Some time since I was induced by A. Rankin Esq., M. P. P. and under a misapprehension of the facts of the case, to sign a petition to the Parliament of Canada, praying for a new charter for the Great Southern Railway now under consideration by your Committee. I now beg to withdraw my name from said Petition.

I was not aware it was to be used in connection with a notice published by others in the Official Gazette, and with which I had nothing to do, nor was I aware of there being such notice.

My sole object if possible was to facilitate the construction of this great public improvement.

Instead of which I apprehend the present course is calculated to retard if not altogether prevent the same from being carried into effect.

I have the honor to be,
Sir,
Your most obedient servant,

J. S. VOSBURGH, Chatham.

Before sending this letter I felt that Mr. Rankin had deceived me, and I more over felt that I might innocently be made the means of prejudicing or injuring in some way the interests that have grown up under existing charters; had I sufficiently understood the merits of the question when I was solicited to sign and did sign the petition, it would have undoubtedly been more than sufficient to prevent me from doing so.

The Witness withdrew.

J. M. McLeod, Esq., called in, and Examination continued.

[By Counsel for Mr. Buchanan.]

Ques. 103. State all that took place after the Meeting to which you have referred? -Ans. On the 14th of August, at the urgent request of Mr. Buchanan, I left for England in order to assist in explaining matters to those parties there interested in the Southern Railway. Mr. Buchanan and Mr. Zimmerman followed me to England the succeeding week, and while there they entered into an agreement with George Wythes, Esq., to arrange and settle all their disputes. We all returned to Canada in order to carry out this arrangement. While in England the question of Amherstburgh not being the Western terminus was never mooted, either by Mr. Wythes or Mr. Zimmerman, but after coming back here, from remarks made to me by Mr. Zimmerman during the periods of negotiation, I became convinced that it was his intention to run the Southern line into the Gfeat Western at Kamoka or some other point on that road, for I saw by drawing an air line from Sarnia to the Suspension Bridge, it runs straight through the terminus of the Sarnia branch of the Great Western at Kamoka, and every day convinced me more and more that route would eventually be adopted if I gave up the position I held. After repeated fruitless attempts at negociation, Mr. Zimmerman, finding it no use to dissemble any longer, at last fairly and openly acknowledged to me, that it would be impossible for him to build the road to Amherstburgh, and I have since learned that it was his principal object to attach the Eric and Ontario road to the Southern line, and that if he attached both it and the Amherstburgh and Windsor termini to the scheme, that the incubus on it would be too great for him to get the Capitalists in England to take it up, but he perhaps could do it with only the Erie and Ontario road attached to it. I judged this to be so, partly from remarks made to me while in England by Mr. Gill and Mr. Wait, both gentlemen having large interests in the Great Western road, who, while I was urging on them the superior facilities of the Southern line, to a double track on the Great Western, their answer was "why should we build seventy or eighty miles of a road through a country which both Mr. Zimmerman, and their managing Director in Canada, Mr. Brydges, had represented to them as an interminable swamp, and that it would be more to their advantage to strike their own line as near as possible, where it entered on the plateau of Lake Erie, thus avoiding the grades necessary to descend to Hamilton on the plateau of Lake Ontario, and then rising to the Suspension Bridge, which is back again to the plateau of Lake Erie." That point as I said before was their terminus of the Sarnia branch at Kamoka, and I have been led to believe that if that could be accomplished the Great Western Company intended removing their workshops from London to Kamoka, and thus make Kamoka the central head quarters. From these circumstances I was determined not to give up either the position I held, or the money deposited by Mr. Buchanan in the Bank of Upper Canada, and subject to my cheque as President of the road. until I had a guarantee that the Southern road proper, would be built from St. Thomas, through the Southern portions of the Counties of Elgin, Kent, and Essex. Our negociations continued repeatedly without effect, until the 27th January last, when Mr. O'Reilly, as the representative of Mr. Zimmerman and Mr. Buchanan, equested me to come down again to Hamilton, and try if we could not come to

some arrangement. I proceeded to Hamilton, and my proposition then was, as it always has been, to insure the road being built to Amherstburgh and Windsor. through Elgin, Kent, and Essex, and I will do anything you can honorably require of me. After three days spent in persuading me to give up my position, on the 30th of January an agreement was drawn up and signed by Mr. O'Reilly, as the representative of Mr. Zimmerman; James C. Street, Esq., as representing George Wythes, Esq., of Reigate, in England, Isaac Buchanan, Esq., of Hamilton, and by Mr. Park, of Amherstburgh, and myself, which set forth that the Railway should be built both to Amherstburgh and Windsor, and to conserve the interests of the Western portion of the country. Both Mr. Park and myself were, to have s in the Direction of the amalgamated Board until the completion of the road. I also received a letter from Mr. O'Reilly and Mr. Street, pledging that I should be Vice-President of the Company until the road was finished. in order to make the interests of the West more secure. This agreement was to be subject to the approval of Mr. Zimmerman, who was then in New York, but who was to meet us the following week in Toronto, but when he came and met us there, he repudiated the arrangement as to the Western termini, for the reasons I have mentioned before, therefore was the arrangement we had completed annulled. I would here state that afterwards at Norton's Hotel, in Woodstock, Mr. Zimmerman, after again repeating his inability to fulfil the terms of the Charter as to the Western terminus, offered me the sum of fifteen thousand pounds currency to be paid immediately, and that I would also receive from him favors in the shape of interests in, contracts which would not fail to be satisfactory to me, if I would retire and agree to their arrangements; this I steadily and unswervingly refused to do, unless the terms of the Charter were carried out as to the Western terminus, and thus no arrangement was ever come to by us. In Mr. Rankin's evidence, he, publishes an agreement purporting to have been entered into between Mr. Park, Mr. Wallace, Mr. Buchanan, and myself, and signed by us on the 6th of March; that for the sum of £2,500 to be paid to each of us, we were to resign our position, and pay back to Mr. Buchanan his money. In answer to this I would state, that neither Mr Park, Mr. Wallace, or myself ever saw or heard of any such document, and that if our names are attached to any such agreement, we pronounce the same, to be a forgery, and the contents thereof, so far as we are concerned, a base and unmitigated falsehood, and that I never received any such letter as Mr. Rankin. publishes from Mr. Zimmerman. It must be a bad case indeed that requires such falsehoods to bolster it up, and despicably low in the scale of morality must the man be who can descend to such subterfuges to give credit to his assertions. A. fortnight after the death of Mr. Zimmerman, I came to Hamilton and had an interview with Mr. Buchanan, when it was proposed that the Amherstburgh Boardin, should re-enact a certain bye-law, let out the contract to Mr. Street, as representing George Wythes, Esquire, of England, and to Mr. O'Reilly, as representing the est to of the late Mr. Zimmerman, Mr. O'Reilly (being the only agent that Mr. Zimmerman had during his life empowered to negociate either with the Munician palities interested in the Woodstock and Lake Erie Road, or with us as representing the Amherstburgh and St. Thomas Railway, and also that the Amherstburgh Board

should be remodelled preparatory to an amalgamation with the Woodstock and Lake Erie Railway and Harbour Company. Thereupon Mr. Buchanan wrote to Mr. O'Reilly and Mr. Street, asking them to accept the contract, and thus practically fulfil the arrangements entered into in England between Mr. Peter Buchanan, Mr. Wythes, and Mr. Zimmerman; they therefore agreed to accept the contract on those conditions, which contract was duly entered into, signed and sealed by those gentlemen, and by myself, as President of the Company, binding them to build the Railway from St. Thomas to Amherstburgh and Windsor, to be commenced by the first day of July in the present year, and finished on or before the first day of July, 1859. The amount available and paid into the Bank on said contract is seventy-five thousand pounds currency, equal to 300,000 dollars; and the clause referring to the termini of the Railway is thus expressed: "That the Contractors shall and will for the consideration hereinafter mentioned, at their own costs and charges, construct, build, make, and ballast for the said Company, in a good and workmanlike and substantial manner, under the direction of the Chief Engineer of the said Company, a Single Track Railway from the Detroit River, at or near Amherstburgh, to the town of St. Thomas, or as near it as may be found convenient, and also a Single Track Branch Railway from some point on the aforesaid main line of Railway in the Township of Colchester, or within two miles of the limits. thereof, to the village of Windsor." Thus the Contract is in the exact terms, of the Charter so far as regards the termini; the above contract was signed, sealed, and delivered on the 28th of March last, and sent to England for the acceptance of Mr. Wythes; and Mr. Street last week officially notified me, as President of the Company, that he had received a communication from Mr. Wythes, stating that he had accepted the contract and all its conditions, and that the work would at once be proceeded with. Over £3000 have already been expended in surveying the line from Amherstburgh and Windsor to St. Thomas; the building of the road would now have been going on were it not for the detention caused by the Bill now introduced into the House by Mr. Rankin, because the estate of the late Mr. Zimmerman would not agree to pay him £25,000 for services which he never performed; the reasons why Mr. Zimmerman consented to that agreement were probably because Mr. Rankin constantly threatened that unless his interests were protected in preference to any other person's, he would cause the right of way to cost £100,000. more than it otherwise would do; except for this particular reason, the influence of either or any of the Western members was just as great as that of Mr. Rankin, and worth as much to Mr. Zimmerman. Mr. Rankin's attempts to brand a dead man's name with dishonor, will only recoil with tenfold force on himself; his assertions in his evidence of the liabilities of the present existing charters are entirely unfounded, in fact, and have no basis but in his own imagination; the £18,000 expenses on dishonored bills is a fabrication, as there are no such charges made, and no dishonored bills that have not been paid for; the £18,000 paid for interest to the Municipalities by Mr. Buchanan, for moneys advanced by them to Mr. Zimmerman on his contract for building the Woodstock and Lake Erie Railway is a legitimate debt, and must be paid whether the road is ever finished or not, as a certain amount of work has been done for the monies on which this interest is payable, and the estate of the late Mr. Zimmerman, is still liable for the balance, or for the fulfillment of the contract for

building that part of the road. His next item is the £25,000 paid to Mr. DeBlaquiere, and is the only one that can be objected to, and of course is set off by the same amount that Mr. Rankin is trying to screw out of the parties who have vested interests in the charters. The next item of £7,000 to Mr. O'Reilly, is wrong: his information on that point is incorrect; a certain amount was to be paid by the contracttors to Mr. O'Reilly for his services as Solicitor and as agent for the parties who made the arrangement with the Municipalities, and has nothing to do nor in any shape connected with the incubus asserted by Mr. Rankin as to be borne by the road. The next item is the £16,000 to be paid to Messrs Park, Wallace, and myself—I can say this, no such sum was ever agreed to be paid to us, but it is strange that Mr. Rankin in one column of his evidence produces a document which he asserts was signed by us as late as the 6th of March, by which we were only to receive £7,500, and in the next he puts it down at £16,000. I will dispose of that item by assorting that no other arrangement ever existed between Mr. Buchanan and myself than the verbal one I have already mentioned in the former part of my evidence. The next item is the debt due the Municipalities of £150,000, it should be £145,000, and that is disposed of in the same manner as the former one of £18,000, interest on the same amount; the £145,000 was paid to Mr. Zimmerman on the contract, and the estate is liable for the amount, for finishing the contract for building the road. £400,000 for building the Woodstock and Lake Eric Railway cannot be called an incubus, as the original cost of any Railway might with the same justice be called an incubus on its welfare, as there are about 20 miles of the Woodstock and Lake Erie cross-road which forms part of the Main Southern Line, and would be used as such, and there is no doubt but that the Railway from Woodstock to Port Dover would pay better than the London and Port Stanley, and that road paid five per cent. in the Moreover the Woodstock and Lake Erie Railway own first year of its existence. the Docks and Harbour of Port Dover, the best, safest, and most commodious harbour on Lake Eric, and is, in fact, worth a large amount to the Railway. In reference to the concluding remarks in the evidence of Mr. Rankin, in which he says, "it is simply because I cannot consent to countenance the misrepresentations which must be resorted to in order to entrap people on the other side of the Atlantic into the scheme that I have felt my duty to decline the offers of both Mr. Buchanan and Mr. Morrison;" he himself has very truthfully and eloquently answered those remarks in his Memorandum to Mr. Vansittart, wherein he agrees to sell all his interest in the road and abandon all opposition if he will only be guaranteed his anxiously coveted £25,000, that amount would be a salve to all his qualms of conscience. In his agreement with Mr. Zimmerman, dated 3rd July, 1856, he is to receive £12,000 down, and £13,000 when the road is completed to Amherstburgh and Windsor. As I have already shewn that it never was the intention of Mr. Zimmerman to build the road to those places if he could help it, Mr. Rankin by that agreement virtually sells the charter, the country, and all its interests for the sum of £12,000, the £13,000 he would never receive; thus he would have been bought and sol for Forty-eight thousand dollars.

On the 29th of April last, the Board of which I am President met and passed resolutions to amalgamate with the Woodstock and Lake Erie Railway Company, and on the same day the Board of which Mr. Rankin is President, and of which I am a

Director, met also and passed corresponding resolutions, and also came to an understanding that the Chancery suits should be stopped and an entire assimilation and amalgamation of the three Boards should take place and go on with the Road at once; Mr. Rankin was not present at the meeting of this Board, it was presided over by Mr. MacBeth, M.P.P., the Vice-President in Mr. Rankin's absence, thus Mr. Rankin still holds his presidency over a Board of Directors whose existence he wishes to abolish by his present Bill, thus presenting the strange anomaly of a President at the head of a Company pressing a Bill through Parliament for the purpose of destroying its charter.

Cross-examined [By Counsel for the Bill.]

Ques. 104. Were you present when the agreement between the late Mr. Zimmerman, Wythes and Buchanan, was entered into at Liverpool?—Ans. I was not.

Ques. 105. Have you seen the agreement?—Ans. Mr. Ratcliffe, Junior, met me in Detroit, during last winter, and shewed me an agreement, which he said had been entered into in England.

Ques. 106. What was the substance of the contract given Messrs. O'Reilly and Wythes, that you speak of?—Ans. That they were to finish the road by the 1st July, 1859, for the sum of £1,125,000 sterling, subject to the arrangements made in England by Messrs. Buchanan, Wythes and Zimmerman. (See Mr. Buchanan's letters to Messrs. O'Reilly and Street.)

Ques. 107. Have you at any time repudiated being a Director of the Board of which Mr. Rankin is President? or have you ever accepted such position; if so, when and why?—Ans. I was never asked to repudiate my position as Director, and I never was called to accept such position until the 28th April last, when the two Boards met for the purpose of assimilating and amalgamating with the Woodstock and Lake Erie Board.

Ques. 108. Have you ever been notified to attend a meeting of Mr. Rankin's Board before the death of Mr. Zimmerman? if so, did you attend; or if not, why not?—Ans. I never was.

Ques. 109. Did you act as a member of that Board at the meeting of which you speak; if so, why? Ans. I did, for the purpose of having the differences arranged and coming to a settlement.

Ques. 110. Were you not the President of the antagonistic Board?—Ans. I was.

Ques. 111. Were the 200 shares which you were to get, by your agreement with Mr. Buchanan, for your services, to be paid up shares?—Ans. They were.

Ques. 112. Who paid the expenses on the bills drawn by Mr. Radcliffe on the Great Western Railway Company in England, which were protested? Ans. Did not know there were any expenses on protested drafts.

- Ques. 113. How do you know that Mr. Rankin's statement about the £18,000 is a "fabrication?"—Ans. I have been informed so by Mr. Buchanan, and no such amount has ever been passed by the Board of Directors, nor was ever spoken of.
- Ques. 114. What accounts have been passed by the Board of Directors?

  Ans.—I have no recollection at present.
- Ques. 115. Who made the survey, and what amount has been paid by the Company for it?—Ans. Mr. Wallace made the survey, and was paid by Mr. Buchanan, and his account presented to the Company; I do not know the amount
- Ques. 116. Have you any personal knowledge of matters transacted by the Board of which Mr. Rankin is President? Ans. None, with the exception of that meeting at which I was present, at which nothing was done but passing resolutions as mentioned in answer 7.
- Ques. 117. Have yea, with or without others acting with you, had any conference with the late Mr. Zimmerman, other than the one at which he repudiated the agreement drawn by Mr. O'Reilly?—Ans. I have had repeated interviews, both before and after.
- Ques. 118. Have you, at any of those interviews, advanced any claims for yourself personally?—Ans. No.
- Ques. 119. Where should the required deposit of ten per cent. to qualify shareholders to vote at the election of Directors on the 7th of August last, have been paid in?—Ans. In the Bank of Upper Canada.
- Ques. 120. Have you ever considered the Board of Directors, of which Mr. Rankin is President, a legally constituted Board?—Ans. Not being a Chancery Lawyer, I cannot say.
- Ques. 121. Does not the legality of your own Board depend upon the illegality of the other?—Ans. I answer the same as to the former question.
- Ques. 122. Has the Board of Directors of which you are President, with your knowledge and consent, answered differently in the Court of Chancery?—Ans. I have no recollection at present what the answer was.

The witness windo w.

J. Berwick, Esq., called in and Examined.

[By Counsel for Mr. Buchanan.]

- Ques. 123. Are you the Warden of the County of Oxford, and how long have you been so, and how long have you been a member of the County Council?—Ans. I am Warden of the County of Oxford, and was elected in January last I have been a member of the District and County Courts of Oxford for the last ten years.
- Ques. 124. Have you had any communication with the members of the County Council on the subject of Mr. Rankin's Bill. If so, what are your own and their views upon the subject?—Ans. I had communication with several members of the County Council, on the subject of Mr. Rankin's application for a charter, and more

particularly with the Reeves of North and South Norwich, and with many members composing the Council of the Town of Woodstock, which two Municipalities have an interest in the Woodstock and Lake Eric Company to the amount of £75,000. Their views with respect to Mr. Rankin's Bill are, that the passage of the Bill would prove injurious, and indefinitely postpone the construction of the Woodstock and Lake Eric Road.

Ques. 125. Had you, or the Council, either collectively or individually any notice of the Bill in question before it was introduced, or any reason to suppose that Mr. Rankin contemplated such a measure?—Ans. I had no other notice, except from the public prints.

Ques. 126. Was it generally understood and supposed that the works of the amalgamated Companies would be proceeded with at once; and if so, what steps were taken by the Municipalities upon such understanding?—Ans. It was. The Municipalities, I believe, carried out all the agreements with Mr. O'Reilly.

Ques. 127. What is the general public opinion on the subject of Mr. Rankin's Bill, is it generally considered a judicious measure, or the reverse?—Ans. I should say that the general opinion, in the County of Oxford, is against Mr. Rankin's Bill. It is not a judicious measure. The feeling of the Municipalities of Oxford is, that even admitting that mismanagement and mistakes may have been made, in carrying on the undertaking of the Woodstock and Lake Erie Railway and Harbor Company, they do not see why that should prejudice their interest, and be urged as a pretext for granting a charter which would prevent the completion of the Road referred to indefinitely.

Cross examined [By Counsel for the Bill.]

Ques. 128. Have you or your brother been a Director in the Woodstock and Lake Erie Company?—Ans. I have not, but my brother, H. C. Barwick, has been.

Ques. 129. Upon what conditions did the Municipalities consent to give their aid to the Woodstock and Lake Erie Company?—Ans. When the loans were made to the Woodstock and Lake Erie Railway Company, they were made on the condition, that a certain amount of Stock should be subscribed, and that the Road should not be proceeded with until they had funds, or a fair prospect of procuring funds to complete the same.

Qees. 130. Has the aid of the Municipalities been expended according to those conditions?—Ans. No.

Ques. 131. Did you ever tender for the contract to built that Road; if so, why did you not obtain it.—Ans. I was one of the firm of Valentine Hall & Co., who tendered for the construction of the Road. We did not obtain it because I understood that Mr. Zimmerman's tender was a lower one.

Ques. 132. Are you aware if any impropriety in the mode in which the contract was given to Mr. Zimmerman?—Ans. I beg to refer you to my evidence given before the Committee appointed to enquire into the management of the Woodstock and Lake Erie Railway Company, of which Mr. Foley is Chairman.

Ques. 133. Have you heard from Mr. DeBlaquière, or any other good authority, that Mr. Zimmerman paid (or was to pay) him \$50,000 or any other sum for obtaining the Contract for him, Mr. Zimmerman?—Ans. I never heard from DeBlaquière and only know it from what I have read in Newspapers.

Ques. 134. What is the actual value of the work done by Mr. Zimmerman on the Woodstock and Lake Eric Road, and what is the present state of such work?

Ans. I am not possessed of sufficient information to answer the question.

Ques. 135. Did the Municipalities, in the early part of 1856, enter into any arrangement with Mr. O'Reilly, acting on the part of Mr. Zimmerman: If so, what were the terms of that arrangement? Ans. I know there was an arrangement entered into, but do not know the terms.

Ques. 136. Was that arrangement carried out: And if not, why not? Ans. I cannot say.

The witness withdrew.

Mr. J. G. Kolfage, Esq., called in and examined.

[By Counsel for Mr. Buchanan.]

Ques. 137. Are you one of the Provisional Directors of the Amherstburgh and St. Thomas Railway Company?—Ans. I am one of the Provisional Directors of the Amherstburgh and St. Thomas Railway.

Ques. 138. Were you present at the meeting of Directors held at St. Thomas on the 5th July, 1856, and if not why not?—Ans. I was not present, for the reason that I was never notified. I have been present at all former meetings since the passing of the Act granting the charter, with the exception of this one. mer meeting of the Directors, held in Chatham, by a resolution, the Amherstburgh stock book was put in my possession for the purpose of obtaining subscriptions, in which book the Municipality of Amherstburgh, by the Reeve, subscribed for £20,000, and different individuals subscribed the further amount of some £7,000 or over, up to the 30th September. 1855. The statement as set forth in Mr. Rankin's evidence, of the subscription in the Amherstburgh book, is incorrect; he shewing that only about £1300 had been subscribed up to the time he last saw the stock book, which was on the day of the meeting in St. Thomas, in Sept., 1855. The whole of the above £7000 was taken previous to that time, with the exception of £375 subscribed by three persons, and the Wallace subscription. At that meeting, in September, 1855, there not being sufficient stock subscribed to form the Company, the book was transferred back to me to obtain further subscriptions.

Ques. 139. Did Mr. Rankin at any time, and when and where, explain to you the reason why you had not been notified of the meeting referred to, and what was that explanation?—Ans. I was not satisfied. On the Monday following the meeting at St. Thomas, on 5th July, called by Mr. Rankin, and of which I had no notice, I met Mr. Rankin; he then told me what had taken place, that he had allowed Mr. Zimmerman and his friends to take all the stock that was required to form the Company, and that he would choose his own Directors. I then asked him why he did not notify Mr. McLeod and myself that there was a meeting called by him, so

that we might be present; he said he did not think it necessary, and moreover there was not sufficient time, it was done in such a hurry. I told him he might have telegraphed us, he answered that he was not aware there was a telegraph to Amherstburgh, at which I was very much surprised, as the telegraph wire from Windsor to Amherstburgh passes directly over the gate leading to his house; I then asked him what guarantee he had got from Mr. Zimmerman that the terminus would be at Amherstburgh; he said he had none, neither had he asked for one, as he well knew Mr. Zimmerman would give none. I expressed very great dissatisfaction, he answered he did not care whether the people of Amherstburgh were satisfied or not, he had done the best he could; which last remark I suppose alluded to the £25,000 agreement which he then had in his possession, but did not tell me of. He also said the best thing the people of Amherstburgh could do, would be to receive Mr. Zimmerman and his friends cordially on the 7th of August, and get up a good champagne dinner for them. I returned to Amherstburgh the same evening very much dissatisfied, and called on Mr. Park, and told him that if the ten per cent. on the Wallace subscription was not raised, Amherstburgh was done for, as I believed Mr. Rankin had sold the charter to Zimmerman. Mr. Park answered there was no danger, as the money was sure to be raised. I, therefore, emphatically contradict Mr. Rankin's evidence wherein he states that he believed I was rejoiced at the arrangement with Mr. Zimmerman. I afterwards called on Mr. Rankin at his house, to ascertain in what Bank Mr. Zimmerman had deposited his ten per cent., for if it had been paid into the Zimmerman Bank I doubted the validity of the subscription of stock, as a resolution had been passed by the Provisional Directors at a meeting held in St. Thomas in the September previous, according to the Act of Parliament requiring the ten per cent. to be deposited in the Bank of Upper Canada or its agencies. Mr. Rankin answered it was immaterial, that Mr. Zimmerman had deposited his money in his own Bank, but that he (Mr. Rankin) had deposited his in the Bank of Upper Canada, ten per cent. on the £1000 stock subscribed by him. He then asked me how much was subscribed in my book since he had last seen it in September, 1855. I answered there were subscriptions, but that as I had not added up the amount I could not say how much they amounted to. I also told him that the people of Amherstburgh as well as myself, were very much dissatisfied with him for the course he had pursued, and with the sudden closing of the books and the call so suddenly for the ten per cent on the subscription. He said that he had done all he could for Amherstburgh, and any person that was not satisfied by paying in the ten per cent. on the subscription, it would not matter, as Mr. Zimmerman would take the whole amount of stock, but that in the event of the road not being built to Amherstburgh, he would get me a contract which would be worth to me ten thousand pounds.

Ques. 140. Do you know anything of the Wallace subscription? If yea, state all you know concerning it.—Ans. At a meeting of the people of Amherstburgh, on the 8th of May, 1856, held for the purpose of obtaining a sum of money to assist Mr. Wallace in making a preliminary survey in order to obtain an approximation of the probable cost of the road, I having the stock book at that meeting, at which Mr. Wallace was present, he, Mr. Wallace, asked me whether I

would allow him to take the amount of stock necessary to form the Company, which he would do in the same manner that he did in commencing the Buffalo and Utica road, and the Buffulo and New York City, and the State Line road in the State of New York, he then and there with my permission subscribed the £500,000 necessury to form the Company. He then asked if I would have any objection to him taking the stock book to Buffalo in order to induce capitalists to enter into the operation. I told him I had no objection, provided Mr. Park would guarantee that the book should be returned to me, that I might produce it at the next meeting of Di-Mr. Park did so, and Mr. Wallace took the book with him. In Mr. Rankin's evidence he gives a copy of the Amherstburgh stock book, in which he tries to shew that the Wallace subscription was made in such a manner that it might mean either £500 or £500,000, and that the thousand more were put in the shilling column; that is easily accounted for, as the columns for pounds was ruled so narrow that no more than three figures could be inserted in the £ column, and of course necessitated the putting of the thousands in the shilling column, thus blowing into thin air the great objection Mr. Rankin has made to the Wallace subscription.

#### Cross-examined [By Counsel for the Bill.]

Ques. 141. Were you not aware that Mr. Rankin had, before Mr. Wallace subscribed, introduced a Bill into the House of Assembly, to decrease the amount required to be subscribed, in order to form the Company? Ans. I was aware of it; but the Bill had not passed at that time.

Ques. 142. Why did you not inform Mr. Rankin that the full amount had been subscribed; and that it was, therefore, unnecessary for him to push the Bill to decrease the amount, any further? Ans. Because we had not ready at that time the 10 per cent. on the £500,000.

Ques. 143. Did Mr. Wallace subscribe his name and amount with pencil or in ink? Ans. 1 believe he subscribed his name in pencil.

Ques. 144. When was it inked over? Ans. When the book was returned to me, which was before the meeting called by Mr. Rankin to close the Book.

Ques. 145. Have you been promised, or have you received, anything to recompense you for your time or trouble in the affairs of the Company, of which you are Director? Ans. Never; with the exception of Mr. Rankin's promise.

The witness withdrew.

[J. H. Greer, Esq., called in, and Examination continued.

Ques. 146. Why did Mr. Buchanan avail himself of your assistance, as mediator between himself and Mr. Rankin? Ans. As a friend of Mr. Buchanan and the Great Western Railway, and also of Mr. Rankin, Mr. Buchanan thought I was a most suitable person. As a proof of the terms of friendship on which I quitted the employment of the Great Western Railway, having been an employée of that

Company for nearly twelve months; and having left the Company's employ at my own request the Board of Directors were pleased to pass the following Resolution, of which the present is a copy:—

"Office of the Great Western Railway Company, "Hamilton, Canada, Sept. 7, 1854.

John H. Greer, Esq.:

"Dear Sir,—Your letter of the 29th August, tendering your resignation of your functions, has been read to the Board; and I am instructed to inform you, that your resignation is accepted, with an expression of regret, as the Board consider you to have been an energetic and conscientious officer in the duties latterly committed to your charge.

"As the Board has decided that your undivided attention must be devoted to the Company's business while you remain in its service, I am further instructed to inform you that if you decide upon quitting the service on the 31st ult. (August) three months additional salary will be granted you, as a mark of appreciation of your services, which I shall be happy to hand you on application.

"Yours very truly,

"BUCKSTON BAKER, Secretary."

Ques. 147. Did Mr. Rankin make any threat, at any time, of such a nature as to induce Mr. Buchanan to seek his co-operation in the undertaking of the Companies: If so, state the time, place, and nature thereof? Ans. During my first interview with Mr. Rankin, at Windsor and Sandwich, he boasted with all confidence, (as I thought to strengthen his position,) that if he were not in the interest of the Company to build the road, that he would cause the right of way to cost any other Company £100,000 additional.

The witness withdrew

George Hardison, Esq., called in and Examined.

[By Counsel for Petitioners against the Bill.]

Ques. 148. Do you know Mr. Wallace?—Ans. I have known Mr. Wallace for some ten or twelve years, and during the greater part of that time I have been intimately acquainted with him.

Ques. 149. Do you know anything of Mr. Wallace's subscription of £500,000 in the stock of the Amherstburgh and St. Thomas Railway Company? State what you know on these points?—Ans. I have had several conversations with Mr. Wallace on the subject of the Amherstburgh and St. Thomas Railway during the past year, and I am aware that he was a zealous promoter of the project, as he had been for several years back of the entire Southern line of railway. At the earliest period of his advocacy of this line of road, it was then known as the Niagara and Detroit Rivers' Railroad Company. He attended a session of the Legislature at Montreal in 1849, for the purpose of extending the time for the completion of that

work before the expiration of the Charter, but was defeated by the local adverse privileges which were brought to bear againt it. Shortly after the charter was obtained for the Amherstburgh and St. Thomas Railway in 1855, Mr. Wallace expressed to me his intention of renewing his exertions for the furtherance of that enterprise. On a subsequent occasion, after an elapse of several months, he stated to me that books of subscription for the stock had been opened, but that a very small amount had as yet been subscribed, and he feared that the amount necessary to organize the Company would not be taken nor procured by the parties having it in charge, and he had therefore determined to take measures to secure a subscription for the requisite amount, feeling confident that he would succeed as he had done on former occasions in railway projects in the City of Buffalo and other parts of the State of New York, and stated a fact, which I was previously aware of, that he had personally subscribed the entire amount required by the charter for the western portion of the New York Central Railroad, which stock he afterwards succeeded in apportioning among other individuals. Mr. Wallace became the Chief Engineer in the construction of that road, and in its completion held the office of superintendent for a period of six or seven years. With reference to the £500,000 subscribed in the Amherstburgh and St. Thomas Railway, Mr. Wallace, after repeated conversations with me, in which he expressed his intention of subscribing the said amount of £500,000, stated that he conceived it necessary to take that amount, as he feared that Parliament would not reduce the amount, for which an application had been made sometime in the month of May, 1856. He informed me that he had subscribed that amount, and had made arrangements with capitalists for the money.

Ques. 150. Were you employed by the Amherstburgh and St. Thomas Railway Company to procure the right of way for their road, and what did you do in that way?—Ans. I was employed by the Company to procure the right of way, and visited five Townships for that purpose, and entered into agreements with about one half the owners of lands for the prices of such lands with the right to enter upon them. This was between the 7th August and sometime in the month of October. I also took possession of the line by breaking ground at the Town of St. Thomas.

Ques. 151. Have you had any conversations with Mr. Rankin on this head, or otherwise, with regard to the Amherstburgh and St. Thomas Railway, if so, state them?—Ans. I never met Mr. Rankin, and therefore never had any conversation with him.

Ques. 152. Can you state anything else of importance to the matter under inquiry?—Ans. I was present at the election of Directors held in the Town Hall of Amherstburgh on the 7th August last, and I was also present at two meetings of Board of Directors, over which Mr. McLeod presided as President, and I acted as Secretary, pro tem.

Cross-examined [By Counsel for the Bill.]

Ques. 153. By which of the contending Boards of Directors were you employed to make agreements for right of way? Were you furnished with and did you

pay any money on the contracts?—Ans. I was employed by the Board of which Mr. McLeod is President. I was furnished with no money, and paid none, except my own personal expenses.

The witness withdrew.

G. Macbeth, Esq., M.P.P., called in and Examined.

[By Counsel for Mr. Buchanan.]

Ques. 154. Were you one of the Provisional Directors of the Amherstburgh and St. Thomas Railway Company? Will you state how you became connected with the Company?—Ans. I was one of the Provisional Directors, and first became connected with the Company, by my name being inserted in "the Act of Incorporation" as such, at Quebec; I was then Member for the County I now represent.

Ques. 155. Did you subscribe stock in the Company, and for what amount? Had you any personal interest beyond your stock in the Company, and were you elected a Director thereof?—Ans. I subscribed for £1500 of stock in 1855. Some alterations were subsequently made in the charter, but my subscription remained. I was present at the meeting held at St. Thomas in July, as a Provisional Director. The Books were that day closed, and I paid the ten per cent. on my subscription into the Bank of Upper Canada, in London. I was interested as a land owner, and also for constituents, the Road running through nearly sixty miles of the County I represent. Beyond this I had no personal interest other than that of others, inhabitants of the County.

Ques. 156. Did you take any and what part in the proceedings of the Company after your Election or previous thereto?—Ans. I took no active part, previous to the meeting at Amherstburgh. I was then chosen by the Stockholders as a Director, and took part in the meetings of the elected Board, which I had previously done as a Provisional Director.

Ques. 157. Has Mr. Rankin delayed or prevented the progress of the Company and its works since the death of Mr. Zimmerman? State what has passed upon this head?—Ans. Since Mr. Zimmerman's death I always counselled forgetting previous differences, and urged an amalgamation with the Amherstburgh and St. Thomas and Woodstock and Lake Eric Companies. Combinations of various interests were involved, and I believed that it would require our united strength to build the Road. I had good grounds for believing that the amalgamation would take place, though aware that it was not easy to reconcile personal feelings, and personal interests. It was some time subsequent to Mr. Zimmerman's death, that I learnt with surprise that the amalgamation was delayed owing to the extraordinary demand made by the President of the Board (Mr. Rankin.) There were other demands as I understood, but of less moment, and in short, that no one so far could be found to assume Mr. Zimmerman's interests and engagements, incumbered with so large an amount as £25,000 which I understood to be the sum claimed by Mr. Rankin for his services.

Ques. 158. Had you, previous to this, communication with Mr. Rankin, and had he at any time informed you that he had a personal interest in the Company or its contracts, to the amount of £25,000 or any other amount, or did he assert the contrary and say he had no interest?—Ans. We had necessarily many verbal communications, being at the same Board, and having worked together for the Road. On no occasion did I get the slightest hint that he was personally interested in the Company beyond his position as representative of Essex. He never mentioned it on any occasion that he intended to have any interest; on the contrary, I have heard him repeatedly declare that he had no interest whatever, but the interests of his constituents and the general welfare, or words to that effect. He told me in Toronto, subsequent to Mr. Zimmerman's death, that he proposed introducing a Bill to confirm the Acts of the Rankin Board, inasmuch as he believed that to be the legal Board, and thereby to defeat our opponents of the McLeod Board. He then assured me that his only object was the discomfiture of the McLeod Board; I promised him my support, as I sympathized with him, believing that he had been injured politically by a prominent member of that Board, and further I believed that were the acts of the Rankin Board confirmed, an amalgamation would have been the more readily arrived at. never on any occasion hinted that he had any other desire or object of a personal nature than proving to the world that his course was straightforward and honest, and to maintain his position as a Director.

Ques. 159. If you had known that Mr. Rankin either had or intended to have any interest in the contracts or affairs of the Company to the amount of £25,000, or any other amount, would you have voted for him as President, or allowed him to continue such without remonstrating?—Ans. I cheerfully concurred in his being elected President of the Board, and voted for him; but had I known that he had any contract or agreements in his pocket, I would not have sat at the same Board with him.

### Cross-examined [By Counsel for the Bill.]

Ques. 160. Did you immediately after the election of Directors at Horseman's Hotel go to the Town Hall in Amherstburgh in company with Mr. Salter, and give notice to Mr. McLeod that he had been elected a member of your Board, and did you require his attendance at a meeting of such Directors, to be held at Amherstburgh on the same day?—Ans. I was sent on one occasion, but not for his purpose. I may have accompanied the person sent, but I do not remember it.

Ques. 161. At what particular time before Mr. Zimmerman's death did the claim of Mr. Rankin prevent the amalgamation you speak of ?—Ans. I speak of the amalgamation urged by myself subsequent to his death.

Ques. 162. How often did you and Mr. Rankin meet at the Board as Directors after the election of the 7th August last? And where and for what purpose did you meet?—Ans. We sat that day, and on one other occasion, I think.

The witness withdrew.

W. L. Smart, Esq., called in and Examined.

[By Counsel for Mr. Buchanan.]

Ques. 163. Are you Secretary of the Woodstock and Lake Erie Railway Company?—Ans. I am.

Ques. 164. How many Municipalities have made loans to the Company, and to what amount?—Ans. Six: To the amount of £145,000. The Municipality of the Town of Woodstock, £25,000; North Norwich, £30,000; South Norwich, £20,000; Windham, £25,000; Town of Simcoe, £25,000; Woodhouse, £20,000.

Ques. 165. From what other sources has the Company received money, and to what amount?—Ans. A loan from Messrs. Zimmerman & Co., of £12,500, made upon the same terms as the money loaned by the Municipalities. The Company are also indebted to Mr. Isaac Buchanan in the sum of £18,500. The receipts of harbor tolls, rents of land, and payments on stock, &c., would amount to nearly £10,000 more.

Ques. 166. Has the money been expended, and how?—Ans. Yes; it has been expended in the construction of the Road, the purchase of the right of way, law expenses, and incidental expenses. The contractors pay the engineering expenses and municipal interest.

Ques. 167. In 1855 an Act was obtained to allow the Company to amalgamate with any other Company, what has been done under this?—Ans. Under that Act, three different and definite propositions were received from Mr. Zimmerman. The final one which, on the 13th Sept., was accepted by the various delegates of the municipalities, gave Mr. Zimmerman ten days for his final decision thereon, and was accepted on his behalf by Mr. Galt, his agent, would have been carried out, but for the interference of the Hamilton and Port Dover Company, which produced a proposition signed not only by their own Directors, but also by some of the leading and richest parties in Hamilton. This proposition contained the offer of amalgamation on equal terms. It was referred to the Municipalities interested by the Directors of the Woodstock Company, and after several weeks occupied by the Municipalities in investigating the affairs of the Hamilton and Port Dover Company, a decided majority of the Municipalities communicated to the Woodstock Directors their objection to amalgamate with that Company. On the 10th March, 1856, these Municipalities entered into an agreement with Mr. O'Reilly, of Hamilton, subject to the approval of the Board, to transfer the Road to his nominees. To carry out which agreement, the Company's Act of 1856 was passed.

Ques. 168. How is it that steps have only lately been taken to amalgamate with the St. Thomas and Amherstburgh Companies?—Ans. In the month of August, 1856, Mr. Buchanan became President of this Company, and in the December following, a resolution was passed by the Board to amalgamate with the St. Thomas and Amherstburgh Railway Company, and a communication was immediately addressed to the President of that Company, to which no reply was then received; but on the 10th January, this Company consented to amalgamate by becoming parties to an agreement for that purpose—which agreement has since been laid before

the six Municipalities before mentioned, and has since been carried in the affirmative by all of them.

Ques. 169. In August, 1855 did the late Mr. Zimmerman offer to buy the road from Otterville to Dover, including Harbor, and at what price?—Ans. In August, 1855, Mr. Zimmerman offered to buy that portion of the road lying between Otterville and the Harbor, a distance of 23 miles, for what it had cost. This sum was estimated by the Chief Engineer at \$399,626 50., and it was proposed by him (Mr. Zimmerman) and approved of by the Board, that this sum should have been expended in completing that portion of the road between Woodstock and Otterville, a distance of  $16\frac{1}{2}$  miles, which could be done, according to the estimate of the Chief Engineer, for \$300,552, leaving a surplus for the general purposes of the Company of \$99,074 50.

Ques. 170. Why was not this accepted?—Ans. The Municipalities South of Otterville finding that Mr. Zimmerman would undertake to complete the road to Dover, refused to allow their proportion of the sum to be paid, to be expended on the road between Woodstock and Otterville, but required that the respective shares should be applied in the reduction of their debt.

Ques. 171. In May 1856 was an Act obtained authorizing the carrying out of this agreement?—Ans. There was in June, 1856.

Ques. 172. What has been done under this agreement?—Ans. The necessary By-Laws sanctioned by that Act have been laid before the rate-payers and various Municipalities by whom they have been carried.

Ques. 173. What have you actually paid for right-of-way for the Woodstock and Lake Erie Company?—Ans. The sum actually paid for right-of-way will be between £28,000 and £30,000.

Ques. 174. What is the value, at the present time, of all the Real Estate and Harbour of the Woodstock & Lake Erie Company?—Ans. About £45,000.

Cross-Examined [By Counsel for the Bill.]

Ques. 175. Was the agreement made by the Municipalities with Mr. O'Reilly adhered to or not? If not, by which party was it broken? And why?—Ans. The agreement made by the Municipalities and Mr. O'Reilly was laid before the Stockholders and Directors in an official form, for the first time, at the annual election in June following, when it was, as a part of the President's report, approved of. The necessary By-laws, as drafted by Mr. O'Reilly and myself, were subsequently submitted to the Municipalities. Previously to the vote of the rate-payers being taken Mr. O'Reilly requested the Council of each Municipality to defer the By-law.

Ques. 176. Had Mr. Buchanan, or any person in his behalf, interfered in the meantime? And did he manage to obtain the control of the Company?—Ans. Not that I am aware of. On the 11th August he became President, and then obtained control of the road by acquiring a majority of the Stock.

Ques. 177. By what means did Mr. Buchanan become President? And was it not in violation of the agreement with Mr. O'Reilly?—Ans. Mr. Buchanan

first became a Director, and then was duly elected President, on its becoming vacant. It was in no violation of the agreement with Mr. O'Reilly.

Qes. 178. Who were the parties that resigned to make way for Mr. Buchanan's nominees? And was it not by arrangement?—Ans. On the 11th August last Mr. Henry DeBlaquiere, Mr. A. Farmer "the President," and D. S. Macqueen resigned their seats at the Board, when Mr. Buchanan, Mr. Andrew Smith, and Mr. Gilbert Moore were elected Directors in their place. I am not aware that it was by any previous arrangement.

Ques. 179. Did those parties, or any of them, receive any sum for so resigning? Ans. Not to my knowledge.

Ques. 180. How has the loan of £12,500 from Mr. Zimmerman been expended? And to whom was it paid?—Ans.. In the construction of the road. It was paid to the firm of Messrs. Zimmerman & Co., Contractors.

Ques. 181. What amount of debentures was deposited in the Zimmerman Bank? And from which Municipalities were they obtained?—Ans. In October 1854, I was sent to Quebec for the purpose of obtaining from the Government, the debentures under the Simeoe & Windham By-laws, amounting to £50,000. The Deputy Receiver-General refused to hand me over the debentures unless I would undertake not to part with them below par, of which he required proof. I made a partial arrangement with the Commercial Bank to take them, but from the delay in sending me certain papers, the Bank refused to take them, and to enable me to get them out of the hands of the Deputy Receiver-General; Mr.Courtwright, co-contractor of Mr. Zimmerman, undertook to induce the Zimmerman Bank to take them at par, and on the Deputy Receiver General being assured of this, he gave me the debentures. Mr. Zimmerman was then in England, and the Company were, at that time, indebted to their contractors about £28,000. The amount paid into the Bank to discharge this indebtedness and to carry on the works, was £45,000. The balance being sent to Woodstock.

Ques. 182. At what period was the account of the Woodstock & Lake Erie. Railway Company changed from the Bank of Montreal? And for what reason?—Ans. It never was changed.

The witness withdrew.

Mr. Kintrea, of Woodstock, called in and Examined.

[By Counsel for Mr. Buchanan.]

Ques. 183. Are you the Treasurer of the County of Oxford? And how long have you been so?—Ans. I am Treasurer of the County of Oxford, and have been so for nearly 4 years. I know the County for nearly 15 years.

Ques. 184. In case Mr. Rankin's Bill become law, how, in your opinion, would the several Municipalities be thereby affected in a pecuniary point of view?—

Ans. The town of Woodstock I do not consider as being able to meet her engagements to the Municipal Consolidated Loan Fund. Nor do I think that the townships of North and South Norwich are able to meet their engagements, should Mr. Rankin's Bill become law. Should the Legislature pass Mr. Rankin's Bill, the Municipalities mentioned would be debarred from the only means by which they could meet their indebtedness to the Government. These are the only Municipalities indebted to the Consolidated Loan Fund in the County of Oxford, on account of the road.

The witness withdrew.

On motion of Sir Allan N. MacNab:

Ordered, That the Counsel for and against the Bill be called on to state if their evidence was closed.

The Counsel in support of the Bill stated that their evidence was closed.

The Counsel for the petitioners against the Bill stated that their evidence was also closed.

On motion of Mr. Papin;

Ordered, That Counsel be now heard in order to close their case.

On motion of Mr. Brown;

Ordered, That after Counsel has been heard, the further consideration of the said Bill be postponed until the whole evidence has been printed and placed in the hands of the Members of the Committee, provided that such day be not later than Friday next.

Dr. Conner, Q. C., appeared and addressed the Committee against the Preamble of the Bill, and then he withdrew.

Adjourned until to-morrow at 11 o'clock, a.m.

### Wednesday, 20th May, 1857.

#### COMMITTEE MET.

#### MEMBERS PRESENT:

HON. SIR ALLAN NAPIER MACNAB, BART., CHAIRMAN

MR. BELLINGHAM,

Mr. Bowes,

Mr. Brown,

Mr. Bureau,

Hon. Ms. Atty. Gen. CARTIER,

Hon. Mr. Cauchon,

Mr. CHRISTIE,

MR. CLARKE,

Mr. DALY,

Mr. ANTOINE A. DORION,

Hon. Mr. Atty. Gen. MACDONALD,

Mr. Mongenais,

Mr. Angus Morrison,

Hon. Mr. Joseph C. Morrison,

MR. PAPIN.

MR. RANKIN,

Hon. Mr. Robinson,

Mr. SIMARD,

Mr. James Smith,

Hon. Mr. Spence, and

Mr. WILSON.

The Committee resumed the further consideration of Bill (No. 253) to incorporate the Great Southern Railway Company.

John Eccles, Esq., Q.C. appeared and addressed the Committee against the said Bill, and then he vithdrew.

Frank Powell Esq., appeared and addressed the Committee in support of the said Bill, and then le withdrew.

Adjourned until Friday next at 11 o'clock, a.m.

### Friday, 22nd May, 1857.

#### COMMITTEE MET.

#### MEMBERS PRESENT:

Hon. SIR ALLAN NAPIER MACNAB, BART., CHAIRMAN.

MR. BELLINGHAM,

Mr. Bowes,

Mr. Brown.

MR. BUREAU,

Hon. Mr. Atty. Gen. CARTIER,

Hon. Mr. CAUCHON,

MR. CHRISTIE, Mr. CLARKE.

MR. DALY.

MR. ANTOINE A. DORION,

Mr. Foley,

Hon. Mr. LEMIEUX,

Hon. Mr. Atty. Gen. MACDONALD,

MR. MONGENAIS,

MR. ANGUS MORRISON,

HON. MR. JOSEPH C. MORRISON,

Mr. PAPIN,

Mr. RANKIN,

Hon. Mr. Robinson,

Mr. SIMARD,

MR. JAMES SMITH,

Hon. Mr. Spence, and Mr. WILSON.

The Committee resumed the further consideration of Bill (No. 253) to incorporate the Great Southern Railway Company.

Mr. Rankin put in the following memorandum:

#### MEMORANDUM.

The Great Southern Railway Company to assume the debt of the Municipalities d acquire their rights.

When the through line is finished and paying eight per cent, the Great Southern Company to lend the Municipality £200,000, to enable them to build the road from Woodstock to Port Dover.

The Great Southern Railway Company to refund to the Zimmerman Estate the full amount expended by the late Mr. Zimmerman, on account, either of the Amherstburgh and St. Thomas Railway, or the extension of the Woodstock and Lake Erie Railway Company.

The Preamble being again read:

On its adoption the Committee divided, and the names being called for, were taken down as follows:

$\mathbf{Y}$ eas :	Nays:
Messieurs Bellingham,	Messieurs Brown,
Bowes,	Daly,
Bureau,	Dorion, A. A.,
Cartier, Atty. Gen.,	MacNab,
Cauchon,	Morrison, Angus,
Christie,	Morrison, Jos. C.
Clarke,	Robinson,
Foley,	Smith, James,
Lemieux,	Spence, and
Macdonald, Atty. Gen.,	Wilson.—10.
Mongenais,	•
Papin,	
Rankin, and	

So it was carried in the affirmative, and the Preamble was adopted.

Adjourned until Tuesday next, at 11 o'clock.

Simard.—14.

### Wednesday, 27th May, 1857.

#### COMMITTEE MET.

#### MEMBERS PRESENT:

Hon. W. B. ROBINSON, VICE-CHAIRMAN.

Mr. Bowes,
Mr. Christie,
Mr. Clarke,
Mr. Daly,
Mr. Foley,

Hon. Mr. Atty. Gen. Macdonald, Mr. Mongenais, Mr. Angus Morrison,

Hon. Mr. Joseph C. Morrison,

Mr. Papin,
Mr. Rankin.
Mr. Simard,
Mr. James Smith, and
Mr. Wilson.

The Committee resumed the further consideration of Bill (No. 253) to incorpoate the Great Southern Railway Company.

First Clause being read, was amended as follows:

Page 1, Line 15, strike out "A.B.C.D., &c.," and insert "George Southwick, "Joseph Lang, Duncan Campbell, James M. Salmon, William Fitch, John Fraser, "James Farley, Asa Howard, Rodolph Johnson, Thos. Woodbridge, John Mercer, "Thomas Keating, James Woodbridge, Joseph Mercer, Niles Miller, Charles G. "Fortier, Theodore Malott, John Ferres, Joseph Miller, Charles Baby, Fclix Laffarty, "Robert Elliot, William Scott."

The said Clause, as amended, was adopted.

Second Clause was read and adopted.

The Third Clause being read was amended as follows:

Page 2, Line 2, strike ont "Town of Simcoe and St. Thomas and," and insert "Town of Simcoe, and thence direct to St. Thomas via."

Page 2, Line 4, strike out "Windsor" and insert "Sandwich."

he said Clause as amended was adopted.

The Fourth Clause was read and adopted.

The Fifth Clause being read, was amended as follows:

Page 2, Line 29, fill up the blank with "George Southwick, M.P.P., of Saint "Thomas, in the County of Elgin, James Farley, of the same place, John Frazer, of "Pelbam, in the County of Welland, William Fitch, of Canboro', in the County of "Haldimand, Duncan McCall, of the Township of Woodhouse, Paul John Salter, "of Windsor, in the County of Essex, James Webster, of Guelph, in the County of "Wellington, John Mercer, of Chatham, in the County of Kent, Francis H. Burton, "of Port Hope, in the County of Durham, Michael Foley, M.P.P., of Simcoe, in the "County of Norfolk, and Thomas Woodbridge, of Sandwich, in the County of Essex."

Mr. Wilson moved that Robert Reynolds, Esq., of Amherstburgh be added to the list of of Provisional Directors.

On which the Committee divided, and the names being called for, were taken down as follows:

Nays: Messieurs Bowes, Messieurs Daly, Morrison, Angus, Christie, Smith, James, and Clarke, Foley, Wilson,-4. Papin, and Rankin,—6.

So it was decided in the negative, and the said Clause, as amended, was adopted.

The Sixth Clause being read, was amended as follows:

Page 2, Line 35, after "dying" insert "resigning."

The said Clause, as amended, was adopted.

Yeas:

The Seventh Clause was read and adopted.

The Eighth Clause being read, was amended as follows:

Page 3, Line 35, fill up the blank with "Eight."

The said Clause, as amended, was adopted.

The Ninth, Tenth, Eleventh, and Twelfth Clauses were severally read and adopted.

The Thirteenth clause being read, was amended as follows:

Page 4, line 43, strike out "five" and insert "seven."

The said Clause, as amended, was adopted.

The Fourteenth and Fifteenth clauses were severally read and adopted.

Ordered, That the following clauses A and B be added to the Bill, and do follow the 15th clause:

#### (Clause A.)

"The Company by this Act incorporated shall repay to those Municipalities "which have loaned moneys to the Woodstock and Lake Erie Railway and Harbour "Company, the full amount of the principal and interest of such loans as they "severally become due, deducting therefrom the moneys which have been paid by, " for, or on account of the said Municipalities to the Receiver General for interest "on loans effected by them from the consolidated Municipal Loan Fund of Upper "Canada, and should the Woodstock and Lake Erie Railway and Harbour Company "desire to proceed with the construction of their Line of Railway from Woodstock "to Port Dover, the Company by this Act incorporated shall after their Railway "from the Niagara River to the Detroit River has been finished, and within six "months from and after the day on which the first dividend at the rate of eight per "centum shall be paid to the Shareholders of this Company, lend a sum not exceed-"ing two hundred thousand pounds to the said Woodstock and Lake Erie Railway "and Harbour Company, to enable such Company to finish the Railway aforesaid "from Woodstock to Port Dover or finish and equip the same, at the option of the "Municipalities, and on such terms as may be agreed upon between the said Muni-"cipalities and the Company by this Act incorporated."

#### (Clause B.)

"And whereas the late Samuel Zimmerman and Isaac Buchanan, Esquires, "have expended considerable sums of money on account of the extensions of the "Woodstock and Lake Erie Railway and Harbour Company and on account "of the Amherstburgh and St. Thomas Railway Company; It is enacted "that the Company by this Act incorporated shall refund in bonds of the Great "Southern Railway Company payable seven years after the dates thereof respectively, "and bearing interest at the rate of six per centum per annum, to the executors of "the said Samuel Zimmerman, the full amount of expenditure, being in all the sum "of thirty thousand and five hundred pounds, and to the said Isaac Buchanan the "full amount of his expenditure, being the sum of twenty-three thousand and five "hundred pounds."

The Sixteenth clause was read and adopted.

The Seventeenth clause being read was amended as follows:

Page 6, line 9 add to the clause, "Provided that any deposits in any bank "made on any stock subscription under the authority of said Acts, or either of them, "shall be paid back to the party who deposited the same, or his assigns."

The said clause as amended was adopted.

The Seventeenth and Eighteenth (and last) clauses were severally read and adopted.

Schedule A was read and adopted.

Ordered, That the said Bill be reprinted as amended.

Ordered, That the Vice-Chairman do report the said Bill, as amended, to the House this day.

Applications for Shares to be made to Messrs. LAURENCE, CAZENOVE and PEARCE, Auction Mart, London, Brokers; or to WILLIAM

CHAPMAN, Esq., 2, Leadenhall Street.

The government and legislature of Canada have by various Acts incorporated several Companies for the construction of different sections of the Main Trunk Line of Railway throughout the Province; and Acts of the Canadian Parliament have also been passed authorising the amalgamation of all the Companies whose railways intersect or join the Main Trunk Railway with the Grand Trunk Railway Company, so as to form one Company, under the name of the "Grand Trunk Railway Company of Canada." Arrangements are accordingly in progress for a fusion of the Grand Trunk Railway Company of Canada East, the Quebec and Richmond Railway Company, the St. Lawrence and Atlantic Railway Company, the Grand Junction Railway Company, and the Toronto and Guelph Railway Company, with The Grand Trunk Railway Company of Canada, forming together 964 miles of Railway (including a Bridge over the St. Lawrence at Montreal, which will be constructed under the superintendence of Robert Stephenson, Esq., M. P., and A. M. Ross, Esq.), with a combined capital of nine million five hundred thousand pounds, and for a lease in perpetuity of the Atlantic and St. Lawrence Railway from the point of its junction with The Grand Trunk Railway to the City of Portland, 148 miles, whereby access is obtained to the Atlantic at one of the natural Harbours of the Western Continent.

The capital is
made up as follows:
Amount already raised in Shares, and spent
on Works of the St. Lawrence and Atlantic
and Quebec and Richmond Railways
Amount already raised on Bonds

£9,500,000

£683,400 733,000

£1,416,400

Reserved in Shares and Debentures for the Shareholders in the St. Lawrence and Atlantic and Quebec and Richmond Railways on the amalgamation, and for the Bondholders of the Ontario, Simcoe and	3 7 10 10	thair,
Huron Railway Company		2.254.000
Leaving	· · . · · · · · · · · · · · · · · · · ·	£7,246,000
This amount will be created and apportioned as follows:	1	,
Stock in 144,920 Shares of £25 each Debentures of £100 each, payable in 25 years, bearing interest at 6 per cent. per annum, payable half-yearly, in London, and con- vertible into Shares on or before the first day of January, 1863, at the option of the	,	£3,623,000
And Debentures, convertible into Bonds of the Provincial Government of £100 each, payable in 20 years, bearing interest at 6 per cent. per annum, payable half-yearly, in London		1,811,500
		£7,246,000

Of these 144,920 Shares, it is proposed now to issue one-half, viz. £1,811,500 in Shares, and the same amount in Debentures, the other half having been agreed to be taken by the Contractors, who, however, engage to give to the holders of such Shares, on the 1st July, 1854 (twelve months after the anticipated opening of the St. Lawrence and Atlantic section of the Railway), the option of taking, in equal proportions, two thirds of such remaining moiety; that is to say, every holder of 30 such Shares will, on the 1st July, 1854, be entitled to claim 20 Shares more at par, together with an equal amount of Debentures, also at par. Such additional Shares and Debentures to bear interest at 6 per cent., from the said 1st July, 1854.

£200 of Debentures (one-half of each description) will be issued at par

with each £200 of Shares.

By the law granting the Provincial aid, it is provided that the bonds of the Province shall be issued as the works advance. These bonds will, therefore, be held in trust, to be delivered pro rata to the holders of the convertible debentures.

Interest at the rate of 6 per cent. per annum, from the completion of the amalgamation, until the entire works are finished, will be paid half-yearly, in London, in Sterling, on the amount from time to time paid up on each Share. The Dividends, as declared, will also be payable in sterling in London.

The Dividends, as declared, will also be payable in sterling in London. The first payment in respect of the Shares and Debentures will take place on allotment, as follows, viz:—£5 on each share, and 20 per cent. on each Debenture, to be paid at the Company's Bankers in London, Liverpool or Canada. The remainder will be called up by instalments, not exceeding £2 10s. per share, and 10 per cent. per debenture, at intervals of not less than four months between each call, and the first call will not be made until the

expiration of six months from the date of allotment. Subscribers will, however, have the privilege of anticipating the calls upon the Debentures receiving six per cent. interest on the amount paid up in advance.

The description and objects of The Grand Trunk Railway are fully set

forth in the appendix, to which especial reference is craved.

The more prominent points therein are:

1. The completeness of the system of Railway, engrossing, as it does, the traffic of Canada and the State of Maine, and precluding injurious competition.

2. The large amount of Government guarantee and of Canadian capital invested—being two million eight hundred thousand pounds sterling.

3. The fact that 250 miles of the Railway are now open for traffic—to

be increased to 390 miles by the close of the present year.

4. The execution of the whole remaining works being in the hands of most experienced contractors; the eminent English firm of Messrs. Peto, Brassey, Betts, and Jackson, having undertaken six-sevenths thereof, including the St. Lawrence Bridge.

5. The cost of the Railway being actually defined by the contracts already made, whereby any apprehension of the capital being found

insufficient is removed.

In the Appendix will also be found the data for the following summary of probable revenue.

	£1,479,660 591,864	On 1,112 Miles, at an average of above £25 per mile, per week	
£887,796	278,100	Interest on debenture debt, £4,635,200 . Rental of Atlantic and St. Lawrence Rail-	
338,100	60,000	way	
£549,696	3	Thus showing a profit on the share capital, £4,864,800 of nearly 111 per cent.	

Application for shares may be made to Messrs. LAURENCE, CAZNOVE, & PEARCE; or to WILLIAM CHAPMAN, Esq., in the following form:

#### FORM OF APPLICATION FOR SHARES.

To the Directors of

THE GRAND TRUNK RAILWAY COMPANY OF CANADA.

I request you will allot to me
Shares of £25 each, with the proportionate amount of Debentures of each class in the capital of the above-named Railway, and I agree to accept the same, or any less number, and pay the deposit of £5 on each share, and 20 per cent. on each class of Debentures, and to sign any Deed which may be required for giving effect to my Subscription.

Dated the	day of	1	1853.

### No. 2.

## APPENDIX.

The Grand Trunk Railway of Canada, with the Atlantic and St. Lawrence Railway of Maine, 1,112 miles in length, with an uniform gauge of 5 feet 6 inches, as now brought under the notice of the British public, offers the most comprehensive system of Railway in the world. Protected from the possibility of injurious competition, for nearly its entire length, by natural causes as well as by legislative enactment, it engrosses the traffic of a region extending 809 miles in one direct line from Portland to Lake Huron, containing a population of nearly three millions, in Canada, Vermont, New Hampshire and Maine. At Portland it connects with the system of railways reaching eastward towards the province of New Brunswick, and hereafter to Halifax in Nova Scotia, as well as southward, by lines already existing, to Boston and New York. At the frontier of Canada it again unites with other lines to Boston and the great manufacturing districts of New England. From Richmond it runs eastward to Quebec and Trois Pistoles, 253 miles, giving direct access to the great shipping port of Canada in summer, and hereafter by rail to the Atlantic at Halifax by Trois Pistoles and Mirimichi, forming the only route to the great fisheries of the Gulf of St. Lawrence and the eastern timber, coal, and mineral district of New Brunswick. At Montreal it again meets three railways now in operation to Boston and New York. At Prescott it receives the tributary line from Bytown and the vast timber districts of the Ottawa, 60 miles, now in course of early completion; and on the opposite side of the St. Lawrence, the northern New York road to Ogdensburg will pour its stream of passenger traffic upon the trunk line. At Kingston, the Rome and St. Vincent railroad, also from New York, becomes its tributary. From thence to Toronto, it receives the entire produce of the rich country north of Lake Ontario, through the channels of Belleville and Peterborough branch, and several other new lines already in progress to construction, and all tributary to the main Trunk road. At Toronto, the Ontario, Simcoe and Huron railroad, 100 miles now nearly finished, pours on the traffic of the region around Lake Simcoe and Georgian Bay. At the same point is also met the Great Western railway by Hamilton to Detroit, 240 miles, now in a forward state for completion, by which communication is had with the southern part of Western Canada, as well as with the railways in operation from Detroit to the states of Michigan, Illinois and Wisconsin.

From Toronto, westward, the line passing through the heart of the western peninsula of Canada ensures to the grand Trunk the exclusive traffic of the finest part of the province; while at its terminus at Sarnia it debouches at the very outlet of Lake Huron, avoiding the shallows of the Detroit and St. Clair rivers below—a point the most favourably situated for the navigation extending through Lakes Huron and Michigan, and hereafter through Lake Superior. At Sarnia, the American railroads now in course of construction place the Grand Trunk line in the most direct communication with the arterial lines to the Great West and the Mississippi, a region whose

advance in population and wealth has been regarded as almost fabulous. and yet whose resources are still very partially developed; while the traffic of the copper and iron districts of Lake Superior, the most valuable and extensive in the world, with the coal of Michigan, will accumulate on the railroad at this point, reaching ocean navigation at Montreal in much less time and by the same mileage that it can now pass by boat to the waters of Lake Ontario, 350 miles above that city.

The Grand Trunk Railway of Canada, it will be therefore seen, commencing at the debouchure of the three largest lakes in the world, pours the accumulating traffic in one unbroken line throughout the entire length of Canada into the St. Lawrence at Montreal and Quebec, on which it rests at the north, while on the south it reaches the magnificent harbours of Portland and St. John on the open ocean. The whole future traffic between the western regions and the east, including Lower Canada, parts of the states of Vermont and New Hampshire, the whole of the states of Maine, and the provinces of New Brunswick, Nova Scotia, Prince Edward's Island, and Newfoundland, must therefore pass over the Grand Trunk Railway.

This great and comprehensive scheme of railway communication throughout the most wealthy, populous, and important colonial dependency of Great Britain, is not now offered as a new project to the public. It comes with the guarantee of the province of Canada, which has embarked upwards of two millions sterling in the enterprise; it is supported by the most intelligent, far-sighted men in the colony; and it has the security of nearly half a million sterling of private Canadian capital invested therein; while a conviction of the great benefits of unanimous action has provided a combination of railway interests probably never before seen, and ensuring such an energetic and harmonious working of the entire line, as cannot but produce 到了一个人 人名 人名 好 打 五樓

the most satisfactory results.

The Grand Trunk Railway does not rest for its success altogether on anticipations. The entire section from Portland to Montreal, of 290 miles, is now in operation for 250 miles, and will in July next be fully connected, making the shortest and most easy communication between the river. St. Lawrence and the Atlantic Ocean. This part of the line forms in itself a complete railway, opening up an entirely new channel for the western trade, and giving an outlet in winter for the produce of Eastern ('anada, as well as of that of Western Canada east of Kingston. The line from Quebec to Richmond brings Montreal and Quebec within six hours of each other, and opens to those cities the most direct access to the ocean at Portland, Boston, and New York, passing through a most populous and fertile part of Eastern Canada. To Montreal, until the completion of the western section of the Trunk line, the produce of the countries surrounding the great lakes is brought through the most magnificent inland navigation in the world; and the opening of the line to Portland at once secures the supply of the markets of Maine, New Brunswick and Nova Scotia with breadstuffs, receiving in return, viâ Portland, British and American manufactured goods, West Indian produce, &c. The lines from Montreal to Portland, and from Richmond to Quebec, already known as the St. Lawrence and Atlantic and Quebec and Richmond Railways, will be in full and continuous operation in the course of the present summer, comprehending 390 miles of railway, for which the capital has been entirely provided, with a very small

exception. The receipts on 72 miles, in Canada, from the mere local business, for the first twelve months from their opening at 20th October, 1851, were £34,000. On 91 miles of the line from Portland, now under lease, were, for the same period, £38,000. Assuming the same rate per mile on the entire distance of 390 miles, a gross income of £172,300 will be at once obtained from local business; when the total traffic, if estimated by the receipts per mile of the Ogdensburg road, £25 per mile per week, the latest American railroad offering any parallel, will amount to a sum of £507,000, independent of the great future development of the country opened up by the line. It may be assumed that the revenue of the Company, from the sections to be completed in 1853, will not fall short, at once, of £304,200 per annum, nett, allowing 40 per cent. for working expenses, and deducting £60,000 for lease of Portland line, would leave nearly equal to the charge for the entire mortgage debt of the Company, and thus from actual present earnings securing to the bondholders their interest, on all the capital intended to be raised by debentures.

It is proposed, simultaneously with the construction of the railroad westward, to proceed with the bridge over the St. Lawrence at Montreal. A work of this stupendous character, required to span a navigable river of two miles in width, can only be undertaken by a large combined capital, The site selected is at the and is justified by its paramount importance. sole point on the river St. Lawrence, from the great lakes to its mouth, where a bridge can be placed without interfering with the navigation. And also at that point no less than 1,595 miles of continuous railway, now in operation, with a very insignificant exception, from New York, Boston, Portland, and Quebec, arrive on the south shore of the river, opposite to Montreal, a city containing 60,000 inhabitants. On the northern shore, the railways either in progress or completed, including the western section of the Grand Trunk, number already 967 miles, exclusive of projected lines. The completion of this link is essential to the satisfactory and "economical working of the Grand Trunk Railway; and it has therefore been incorporated with the entire line. It will be constructed according to the plans and under the superintendence of Robert Stephenson, Esq., C.E., (who is about to visit Canada for this purpose,) and Alexander McKenzie Ross, Esq., C.E.; and the structure will be of that substantial character which a work of such magnitude requires.

For the bridge an ample allowance of capital is made, and the work has been provisionally contracted for with Messis. Peto, Brassey, Betts, and Jackson, on the estimate framed by Messis. Stephenson and Ross. The Act, authorising the construction of this bridge by the Grand Trunk Railway Company, is now in progress through the Ganadian Parliament, under the sanction of the government.

The western section of the Grand Trunk line extends from Montreal to Toronto, 345 miles, and from thence to Samia, 172 miles. Contracts have been executed, with the approval of the Government and Board of Railway Commissioners in Canada, with the eminent English contracting firm of Messrs. Peto, Brassey, Betts, and Jackson, for the construction of the section to Toronto, 345 miles; from Quebec to Trois Pistoles, 155 miles, and the Grand Junction, 50 miles; and with the Canadian contracting firm of Messrs. C. S. Gzowski and Co., from thence to Samia, 172 miles.

The conditions of these contracts are for the construction of a first-class single-track railway, with the foundations of all the large structures sufficient for a double line, equal in permanence and stability to any railway in England, including stations, sidings, work-shops, ample rolling stock, and every requisite essential to its perfect completion, to the satisfaction of the Canadian Government.

By means of the arrangements entered into with the contractors, the proprietors of the Grand Trunk line are assured that, for the capital stated, they will secure the delivery of the whole railway, fully equipped and complete in every respect, and free from any further charges whatever.

The western section of the Grand Trunk commences at Montreal, and proceeds westward through the towns and villages of Lachine, St. Clair, St. Anne, New Longueuil, Lancaster, Charlottenburgh, Cornwall, Osnabruck, Williamsburgh, Matilda, Edwardsburgh, Augusta, Elizabeth Town, Yonge, Landsdowne, Leeds, Pitsburgh to Kingston, at the outlet of Lake Ontario, and the principal naval and military station in Canada West. From thence, continuing along the north shore of Lake Ontario, it passes through Ernest Town, Napanee, Shanonville, Belleville, Port Trent, Brighton, Colborne, Grafton, Coburg, Port Hope, Bond Head, Bowmanville, Whitby, Pickering, Scarboro' to the city of Toronto, which city contains 36,000 inhabitants.

At Toronto it meets the Great Western Railway, leading through Hamilton and the southern part of the western peninsula of Canada to Detroit; a connexion, of which the value may be judged from the favorable position in which the Great Western Railway of Canada now stands in London. This line itself forms a continuation of the Trunk line, although under a different Company, for 240 miles, now approaching completion. The Trunk road also here connects with the Northern Railroad to Lakes

Simcoe and Huron, 99 miles, to be finished during 1853.

This section occupies the important position of connecting the chief emporia of Eastern and Western Canada, the cities of Montreal and Toronto, numbering together nearly 100,000 inhabitants, besides passing through the towns already enumerated; and it also passes, throughout its entire length, through the most populous and cultivated districts of the

province.

The section west of Toronto to Sarnia passes through the towns and villages of Weston, Brampton, Georgetown, Acton, Rookwood to Guelph, Berlin, Peterburg, Hamburgh to Stratford, where it is intersected by a proposed line from Goderich, 45 miles north (for which £125,000 has been already raised by municipal subscription), thence through or near Downie, Fullarton, Blanchard, Usborne, Biddulph, Bosanquet, Warwick and Plymton, to the outlet of Lake Huron and the western extremity of the province at Port Sarnia; the whole course of the line being through the finest section of Western Canada, a district already well peopled, and most rapidly advancing in population and wealth.

It will therefore be seen that the western section of the Grand Trunkline, in its connexions, embraces the whole of Canada West, a district of 32,000,000 of acres, with a population doubling itself every ten years, and which, with a limited exception, must find in the Grand Trunk Railway their speediest, most direct, and cheapest intercourse; having neither

local railroads nor canals to compete with.

The past and present position of Canada is so ably stated in the despatch from His Excellency Lord Elgin, the Governor-General, dated 22nd December, 1852, and published by order of the House of Commons, that it is printed herewith, together with other information bearing generally on the prospects of the railway.

The route traversed by the Grand Trunk Railway and its tributaries

will be found set forth in the accompanying map.

That portion of the Great West, situate at the western extreme of the basin of the St. Lawrence, has received a larger share than any other portion of the country of the valuable addition to its riches, arising from the industry, intelligence and wealth of the hundreds of thousands who, within a comparatively brief period, have migrated to these regions.

Independent of the local traffic peculiar to this section, both in passengers and goods, through traffic of more than ordinary extent, consequent

on its geographical position, may safely be calculated upon.

Not the least important branch of traffic will arise from the Ocean Steamers communicating with England, making Portland and, hereafter, Halifax, the port of embarkation, as the nearest and most accessible on the continent of America.

A further and important consideration in connexion with Portland, St. John's, and Halifax, is, that the navigation being never closed by ice, produce may, on the completion of the Grand Trunk Railway, be shipped there when otherwise there would be no ready means of forwarding it to

Europe.

Thus, with the exception of that portion through Nova Scotia to the port of Halifax (about 150 miles), the entire length of 1,400 miles, both by the southern route through the state of Maine, and by the northern route by Trois Pistoles, is for a great part in course of construction, and the remainder will shortly be commenced under highly favorable auspices, the immediate prosecution of that portion through Nova Scotia being now under the consideration of the Government of that province, whose future interests are so largely compromised in the speedy and perfect completion of the project, as to ensure their best and strenuous efforts for its early accomplishment.

#### ESTIMATES OF REVENUE.

The revenue from local business has been demonstrated by A. C. Morton, Esq., the distinguished American engineer, in an elaborate report addressed to the Governor of the state of Maine, to average, on the New England and New York railways, brought within the sphere of their action, three dollars, or 12s. 6d. sterling per head of the whole population. To apply this result to the population of Canada, which is in no respect inferior, might be considered as assuming too much, and for local business the population of the districts actually passed through will alone be taken. They amount to 740,000, which, at 12s. 6d. per head, will afford £462,500.

In this estimate nothing is put down for the passengers and traffic flowing on the Trunk Railway from the Bytown, Peterborough, Ontario,

Simcoe, and Huron, and especially the Great Western of Canada railways.

These lines together embrace a population of 363,000.

The through passenger business from Europe and the American Atlantic states to the Great West is enormous, the emigration from Europe alone amounting to nearly half a million of passengers annually, almost all seeking a new home in the fertile regions around the Great Lakes; while the business intercourse between the American population around the Great Lakes and that in the seaboard states, embracing together a population of six millions, is already immense, and daily increasing. As the Grand Trunk Railway will be the only united line on which passengers can pass without interruption or detention, as it is the easiest and most direct, it may safely be assumed that the traffic arising from this source between Montreal and Sarnia will not fall short of £125,000 per annum.

Lord Elgin's despatch, shows the tonnage in the river St. Lawrence, in 1851, to have been 450,400 tons; while on the Eric Canal it amounted to no less than 1,141,892 tons, independent of the large amount passing through other channels and railways. These statements sufficiently demonstrate the amount of business within the grasp of the Grand Trunk Railway, of which a fair share will undoubtedly be secured by it, especially as the above channels for Trade are entirely closed by frost from 15th December to 15th April. The amount of through goods traffic may be safely taken at the low estimate of 300,000 tons, at 20s. per ton, yielding £300,000.

#### GENERAL ESTIMATES.

567 miles on Western Section, estimated at £30 per mile per week	£884,520 0 0
Deduct Working Expenses, 40 per cent	£1,479,660 0 0 591,864 0 0

#### Rrport of Messrs. Benedict and Street.

TORONTO, 10TH APRIL, 1856.

SIR,

We have the honor to acquaint you for the information of His Excellency the Governor General, that on the 7th of last month, we met at the office of the Department of Public Works in this City, in compliance with the requests of the Commissioner, that we should proceed with the least possible delay to enter upon the duties connected with the office to which His Excellency had been pleased to appoint us, involving a general examination of the line of the Grand Trunk Railway, in pursuance of the 4th sub-section of the first clause of the statute of 18 Victoria ch. 174.

Having consulted and arranged with Mr. Killaly as to the course to be adopted that would most facilitate the procuring of the necessary information and acquiring a knowledge of the details, we adjourned to the office of the Contractors, where a room was at once placed at our command for our meetings, and the plans, sections, specifications, monthly estimates, contracts and other documents shewing the state and progress of

the works were unreservedly laid before us.

Knowing the desire of the Government to have our report and estimate as soon as practicable, we have labored assiduously and are now enabled

to submit the result of our examinations.

From the documents above adverted to, and the data furnished us by the Chief Engineer of the Company, we proceeded in the first instance to form an estimate of the cost of completing and equipping the line from this City to Brockville, being the portion to which our attention was more particularly directed by our letter of instruction from the Commissioners.

From these data, which give in detail the quantities of work of all classes, including station and other buildings, remaining to be done on the first day of February last, calculated at liberal rates, it appears that the cost of completing the line from Toronto to Brockville, exclusive of rolling stock and contingencies, would amount to £363,044, Halifax currency, at that date.

Having concluded these calculations, our next step was to proceed to Montreal to inspect the rolling stock finished and in progress, and then to return along the line in order to judge, from personal inspection, of the character of the several works, and the manner in which they have been executed, and also, by seeing the actual state of the excavations, embankments and other works, and comparing it with the sections furnished us, on which the estimate of completion is based, to be enabled to determine how far they were safely to be relied on.

At Montreal we devoted three days to a careful inspection of the depot grounds and buildings, which are constructed in a most creditable and substantial manner, and which, when fully completed, will be found second to none that we have seen on this continent. The several workshops are admirably provided, and every means and appliance are at hand to turn

out a large amount of work of the best description.

To the rolling stock we also gave the attention which so important a branch of Railway work demands: the result of our scrutiny was highly, satisfactory, both in regard to style of construction, and the suitableness of the materials.

After taking into account the amount of rolling stock finished and unfinished, and the value of materials prepared, we estimate the amount required to equip the line from Toronto to Brockville, as required by contract at £80,100 currency. It is to be observed that we have given the Company no credit for a large amount of rolling stock (22 Locomotive

Engines), stated now to be on its way from England.

Having concluded our surveys in Montreal, we returned to Brockville, by rail, and then followed the line to Toronto, and having devoted six days to this part of the road, and inspected all the important points, and compared the state of the works on the ground with that shown on the working sections, we are satisfied that the latter truly represent the progress of the work, and that the measurements derived therefrom, on which the estimate is based, may be relied upon.

In the foregoing it is shewn that we estimate the cost of completing the works and buildings of the line from Toronto to Brockville, at £363,044 Add for contingencies and interest on this sum, 10 per cent. 36,304 Also, to complete rolling stock on the same portion ....... 80,100

Total cost of completing line from Toronto to Brockville.... £479,448 Cy.

£37,051 Cy..

Although we have not had an opportunity of personally examining this portion of the Railway, and comparing its state as shewn on the sections from which the estimate is framed with the works themselves, yet from the satisfactory verification of the result of our other calculations, coupled with the fact of Mr. Killaly's having lately made an inspection of it, and being satisfied with the correctness of the documents, we have no doubt but that this estimate for its completion may be relied on.

In order to arrive at the whole cost of fully completing and equipping the road from Stratford to Brockville, it is necessary further to add a sum for the portion of it in front of this City, assuming this to be 10,000 pounds for the graded track to be furnished by the City, and 5,000 pounds for the

permanent way laid, the estimate for the entire line will be

Grand Total.....£531,499 Halifax Cy.

In conclusion we feel it our duty to state for the information of His Excellency, that in our opinion the works on this portion of the line so far as they have progressed, are in accordance with the terms of the contracts and specification—that the bridges, viaducts and important station buildings are constructed in the most permanent and substantial manner, and that the preparation which has been made, and the amount of materials provided, evince the intention of the Contractors to finish the road in a style creditable to them and to the Province.

We are, Sir,

Your obedient Servants,

ROSWELL G. BENEDICT, JAMES C. STREET.

Hon. George E. Cartier, Provincial Secretary.

The undersigned was a party to and engaged with Messrs. Benedict and Street in the several calculations and estimates referred to in the foregoing—in the correctness of the entire of which he fully believes. He did not accompany those gentlemen along the works between Toronto and Brockville, being otherwise much engaged, and having but a short time before made a very close inspection of them. He entertains strongly the same opinions as to the character of the works as those expressed by Messrs. Benedict and Street. The portion of the line from Toronto to Stratford he has likewise had a late opportunity of visiting, and he has no doubt of the correctness of the estimate for the completion of that section also, the works of which are not to be surpassed for sound and durable construction.

HAMILTON H. KILLALY, Asst. Commissioner Public Works.

Department of Public Works, Toronto, 8th April, 1856.

Montreal, 16th December, 1856.

## TO THE SECRETARY OF THE GRAND TRUNK RAILWAY COMPANY OF CANADA.

Sir,

Enclosed please receive final certificate, Montreal and Toronto section, in

favor of the contractors Messrs. Jackson, Peto, Brassey & Betts.

The entire work and equipment are completed and provided, so as to justify my recommending the Company to take the Line off the hands of the contractors.

And I am, Sir,

Your obedient servt.,

ALEXR. M. ROSS, Engineer.

Extract from Report of Walter Shanly, Esquire.

#### ENGINEER DEPARTMENT.

### TORONTO AND SARNIA DIVISION GRAND TRUNK RAILWAY,

Toronto, 13th December, 1856.

DEAR SIR.

The Western Section of our Line as far as yet undertaken from this city to St. Mary's, being now out of the Contractors' hands, I beg leave to report upon the condition of the works—cost—final estimate, &c.

The contract between the Company and Messrs. C. S. Gzowski & Co., entered into 1853, covers as you are aware the whole of our Western Sec-

tion from here to Sarnia-a distance of 167 miles.

The works, which had been partially commenced in 1852 on the first fifty miles, under the "Toronto and Guelph Railway Company," were pushed forward with much vigor in 1853 from Toronto to Stratford—and

to a certain extent between the latter point and Sarnia.

Early in 1854 it was decided under an agreement with the Great Western Railway Company, to suspend operations west of Stratford until 1856: and in June of the former year (1854) you called upon me to estimate the proportional value of the work on the two undermentioned subdivisions of the Toronto and Sarnia section—namely:

By far the heaviest portion of the work, mile for mile, is found on the first named subdivision—and is probably of more expensive character than that of any equal portion of other Canadian line. The bridging is especially heavy, and the average quantity of excavation per mile very large indeed.

I reported the apportionment of cost as follows:

Toronto to Stratford	
Stratford to Sarnia	468,890
The quantity of Rolling Stock embraced in the former	ŕ
sum, amounted to	
And in the latter to	58,080

Subsequent to the date of suspension there was permission given to proceed with the grading of the line as far as St. Mary's, making the length of road under construction west of Toronto instead of 88-97½ miles. And the estimate for the first subdivision was increased accordingly by the sum of £54,142.

An order was also given as recommended in your report to Sir C. P. Roney, of 22nd July, 1854, on the subject of the suspension to complete the rolling stock originally designed for the whole section—which order in

volved, as above estimated, a further expenditure of £58,080.

The estimated cost of completing the line according to contract stipulations for the half section between Toronto and St. Mary's, and furnishing the full quota of rolling stock for the whole section, then stood as follows:

Toronto to Stratford with its proportion of Stratford to St. Mary's		54,142
	_	

£1,019,332

Under the terms of their contract Messrs. Gzowski & Co. were only to furnish a limited amount of station accommodation, in the proportion of one to each ten miles of road. Five goods sheds only were to be provided for the whole line, two of which fall properly to the allocated estimate of the Stratford and Sarnia subdivision; of sidings the contract called for an amount equal to but 3 per cent of the length of the road.

The requirements even of our way traffic—the only description of trade we are yet in a position to command, would not have been nearly met by the above named extent of accommodation—on a representation of which to you I was authorized to provide for such further stations as our anticipated business seemed to demand. An increase of sidings from 3 to

10 per cent was also ordered.

On the part of the line now opened for traffic, Toronto to Stratford, we have fourteen established way stations-eleven of which are provided with passenger-houses—twelve with warehouses—nine with watering apparatus -and six with wood sheds. There are engine stables of stone and brick

at Guelph and Stratford, and a wooden workshop at Berlin.

In addition to the stations above named as "established stations" there are grounds provided for two others—one at Charlton, 4 miles, the other at Norval, 6 miles from Toronto. Both these stations more especially the latter which is well situated and very commodious, will come into early and very profitable use—for I feel satisfied that even with the large increase already made to our stations we are not yet fully provided in that particular.

The additional outlay incurred under the head of way stations amounts to......£21,100 And for increased sidings 6 miles......32,775

At Toronto station and Queen's wharf, a very large expenditure has been made. Some 10 acres of ground having been reclaimed from the lake and enclosed with a substantial breastwork of timber and stone giving a frontage on the water of some 1800 feet. A large engine stable, workshop, warehouse and wood shed, all of brick, have been erected, together with a commodious carriage-house of wood. There is also a temporary passenger house, with platforms, &c. and altogether the actual expenditure upon this station reaches the large sum of £28,680, being much in excess of what was originally contemplated, and the contractors consider themselves entitled to be allowed their actual expenditure on these works, over and above what may be deemed a fair interpretation of the contract. The

permanent passenger station, owing to the difficulty experienced in carrying our line through the city, is not yet commenced. By mutual understanding between the contractors east and west of Toronto, that building was to have been erected on joint account. Each party defraying half the costwhich was estimated at £12,000—one half of which sum should be charged against Gzowski & Co. in their final settlement with the Company.

With respect to the other works at this station, £10,000 would have covered the contractor's liabilities under the contract; deducting which from the gross expenditure above named . . . . . . £28,680

In view of the large area of valuable ground that has been made, worth in itself at least twice the whole amount of the additional expenditure upon the station, I would recommend a favourable consideration of this claim

and that it be allowed as it stands.

The last large item in the estimate is for constructing the abutments of all the bridges and all the large culverts for double instead of single track, £26,000, covering a very large additional quantity of masonry, excavation, embankments and foundation work. The bridging and culvert work between here and Stratford is enormous, both as regards the number of streams that are crossed and in the depths and widths of their valleys. The masonry of the Credit viaduct is over 120 feet in height.

The above claim has already been allowed for in the monthly cer-

tificates.

The remainder of the final estimate is made up of three items, viz: Account, Sundries, Engineering Expenses, &c., &c	<b>£2769</b> 1981	14	2,
Amount in currency	£5073	12	6
Which converted into sterling is	£4170	.0	0

The first item is for all expenses connected with the engineering outlay of this section of our line over and above the one per cent retained from the amount of the contract—and covers office expenses, postage, telegraph, draughting and copying charges—as well as salaries of Inspectors employed by me. And all other outlay properly chargeable against the Company in connexion with engineering for three and a half years up to the 1st June last.

The second item is for the water-lot (277 ft. front) at the foot of York Street in this City—where it is designed to erect our passenger station house—and which purchased by me nearly five years since for the Toronto and Guelph Railway Company, was at the time of the amalgation assumed by the contractors, and is now by them conveyed at its cost to the Grand Trunk. The present value of this property, judging from the price asked for adjoigning lots, is more than five times the amount at which it is rated in the estimates.

The third and last item is for smoke pipes, &c. &c. for the several engine stables on the line. The several items of expenditure above reported will sum up as follows:

Report of A. M. Ross, Esquire, and Appenaix to the same.

No. 4.

(Copy.)

20th December, 1856

To the Honorable John Ross, President of the Grand Trunk Railway Company.

Sir,—In finally reporting upon the completion of the Section from Montreal to Toronto, I have to make the following exceptions. In the neighbourhood of Gananoque, Brighton and Grafton, some top Ballasting remains yet in complete which cannot be done until the spring of next year, the value of this is estimated at £3,000 sterling; there is also a sum of £6,000 sterling retained as the proportion due to the Toronto Passenger Station, the building of which must be deferred until the side is fixed, upon the completion of the Esplanade. These are the only incomplete works comprised by reasonable intendment in the Contract amount of £3,000,000 stg. The amount (£15,000) provided for the Passenger Station at Montreal, you are aware has been absorbed in the enlarged accommodation required at Point St. Charles for the amalgamated lines.

The Contract amount for the establishment at Montreal, required for the Montreal and Toronto Section was £45,000, including the passenger Station. This amount has been exceeded in the buildings already erected to the extent of £47,497 7, as shewn by account marked A; the area covered by these buildings is nearly three times the extent of the plans attached to the contract, which provide only for the amount necessary for the section to which it refers (Montreal and Toronto,) the lines subsequently amalgamated with the Grand Trunk Railway East and West required the provision at Montreal ultimately, determined upon and proceeded with to the extent described, which are ample as at present arranged until the bridge is completed, when it will doubtless become necessary to erect an independent passenger building as originally designed, although perhaps of much larger dimensions and similar in character to that lately constructed at Portland, which of the extent required may cost about £30,000. The shops for the repairs and construction of new stock have been amply supplied and furnished with the requisite machinery and tools for carrying on the works of the Establishment at a cost of £18,936 5 10 as shewn by account marked B.

At the period when the contract were let, provision only was made for an Establishment at Montreal sufficient for the requirements of the section between Montreal and Toronto, 333 miles. The cost of this was computed at £45,000 stg., and may be considered as a liberal apportionment for the

purpose intended.

The subsequent amalgamation of the various sections of the Grand Trunk Railway to be united by the Victoria Bridge at Montreal, indicates the propriety of a re-arrangement of these Works, so as to afford an Establishment of sufficient magnitude to accommodate the requirements in repairs and construction of Rolling Stock for 900 miles of Railway, hence the apparently large expenditure under this head.

In addition to this a further expenditure has been incurred of a very important character connected with the transport of freight in bulk across the St. Lawrence by the construction of a wharf of considerable extent in deep-water below the Bridge, and communicating by rail with the Station at Pointe St. Charles until the Victoria Bridge is completed, which will depend entirely upon the amount of funds furnished for its prosecution.

This connection with the River is necessary for carrying on the Goods Traffic of the Railway without breaking bulk, the only means by which the trade can be secured at a price which would justify the selection of the

Grand Trunk Route from the West.

The cost of this work as shewn by Account marked D, is £17,673

10s. 1d.

This is now completed and ready for use on the opening of the navigation in the Spring, and for the future this wharf will enable seagoing vessels to come alongside and discharge their cargoes at once into the Railway cars for transport westward.

Its construction is similar to that usually adopted in this Country for wharf purposes and corresponding with the Toronto Esplanade. In point of cost it is fully 20 per cent lower than that paid for the works of the Esplanade by the City of Toronto, and in this respect cannot be otherwise

regarded than as cheaply obtained.

The next account of any importance arises in consequence of the very insufficient means provided by the Contract in reference to Sidings, which was limited to 3 per cent only upon the mileage; this has been increased to full 10 per cent as the least possible amount necessary for the most ordinary requirements, and I may here take occasion to add that within the next three years, five or six per cent more will be found necessary, which will amount to nearly twenty miles additional track. The excess already provided on this head amounts to the sum of £125,353 as per Account D, and contains not only the additional sidings found to be necessary at the Road Stations, that at Montreal alone amounting to six additional miles, but also the Branches into the various ballast fields along the Line as well as the connecting link with the Ottawa Railway near Prescott and Mile, the extension to the Market Hall at Toronto and also the Branch Line to Lyn Mills, three quarters of a Mile.

Maps of all the Stations are prepared shewing to extent and arrangement of the sidings as they now exist, and from which the amount has been made up and verified by the Resident Engineers of the respective districts.

The next item of expenditure already incurred beyond the Contract requirements has reference to the mason y of the Bridges; the foundations of all these structures were required to be brought up to water surface or surface of the ground, as the case might be, of sufficient width for a double track.

This has been done, and in addition, I directed the abutments of all the Bridges to be at once finished to the top, because to prepare the foundations only of such portions of a Bridge would, when required to be built to the top, endanger the Railway whenever the embankments would be interferred with, as must be the case in every instance where an abutment has to uphold an embankment.

To obviate this, I had them built to the necessary height at once; and I have certified for the payment accordingly, as beyond the provisions of the Contract.

The propriety of so doing of coure rests with me; and I am convinced that no one who can properly appreciate the object gained will question it; the amount of the account is £18,552 10s. Od. as per statement E.

The next account is that of the Road Stations, marked F, shewing

an excess under this head of £28,994 sterling.

It will be remembered that in my report to the London Board, (21st. February, 1855,) I suggested that in order to meet the increased demand for Stations we should be allowed to construct those enumerated in the contract in a less costly manner by the substitution of timber stations instead of stone or brick, and so endeavour as far as practicable to cover the cost of the increased number required, by the economy thus recommended; the idea however of substituting timber for brick or stone, created at the time so loud a clamour throughout the country generally, participated in by the representatives in Parliament, that the demand for brick or stone had to a great extent to be submitted to, and the consequence is that instead of being enabled to cover the cost of the additional stations erected, by the substitution of less costly structures, the account marked F shews an excess on this head of £28,994 sterling, as above stated.

The account marked G amounting to £5,192 15s. 0d. has been incurred in consequence of a request by the Board of Works for improvements at St. Anns connected with the navigation which they insisted upon the Railway Company constructing at that place, consequently this expenditure

could not have been avoided.

The next account marked H is one which in the aggregate will amount to £10,220 11s. Od sterling, and is for the extension of the line from the Don Station at Toronto to the point where it unites with the east end of the Esplanade between East street and Berthley street, a distance of 800 yards. The filling in and crib work necessary for this extension is considerable, extending as it does to nearly half a mile, the cost of which is made out in the same ratio as paid by the City of Toronto for similar work in the construction of the Esplanade.

This work is now in progress, but not quite complete, an amount of £3,287 13s. 5d. was paid on account in July last, the remainder will have

to be certified when the work is complete.

The contract provides only for Engine Houses at Moutreal, Kingston and Toronto. It has however proved absolutely necessary that small Stables or Engine Houses should be built at shorter intervals, and they have been provided at Cornwall, Brockville, Belleville and Cobourg as shewn in account marked I amounting to £19,000.

#### A summary of these statements will stand as follows:

Amount of Contract, Montreal and Toronto	£3,000,000	0 0
Account marl ed A. Station buildings at Montreal.	47,497	7 0
B. Tools for machine shops	18,936	
C. Landing wharf at Victoria bridge	17,673

These results shew an excess of about 9½ per cent. upon the estimate cost of 333 miles of railway, satisfactorily accounted for in eight items of expenditure, and when it is considered that these embrace an establishment at Montreal, suited for the maintenance of 900 miles of railway, furnished with all the requisite tools for carrying on the repairs and also the construction of new rolling stock of every description, an amount of additional sidings equal to fully 8 per cent. beyond the limited quantity prescribed by the contract, a landing wharf of capacious dimensions at Montreal, for facilitating the transport of goods in bulk across the river until the bridge is completed, as well as thirteen additional road stations, including four additional engine stables, where none had been provided for, I do think the advantages gained are fully equal to the cost and to the efficiency of the line indispensable even at this early stage of its operations.

I have already referred to the possible further outlay necessary for sidings which will be imperative to keep pace with the growing traffic, we have every reason to expect, and which must be stedfastly kept in view, as also an increase in rolling stock, which every days experience shews to be necessary, this is of the last importance, the difficulty already experienced in carrying the goods which offer at Toronto, unless promptly met, will militate against the character and efficiency of the line to an

extent which would permanently injure its prosperity.

The Locomotive Superintendent should immediately be authorized to provide additional engine-power. This he has ample means of accomplishing; and of expediting at the establishment at Point St. Charles, by prompt arrangements, with these objects in view, he will be enabled to keep pace with the growing requirements of the line. Additional rolling stock in box-cars he is now proceeding with to a limited extent, under instructions from the Finance Committee.

There is one point of great importance in the economy necessary for future operations in the repair of existing stock, as well as in the construc-

tion of new, and that is in reference to wheels.

In the new building at Point St. Charles, provision is made for an iron foundry 68 feet by 40 feet; this department should be immediately furnished with the requisites necessary for carrying on this important branch of busi-

ness. In the article of wheels alone a saving of several thousands a-year would accrue, and the difficulties heretofore experienced in obtaining the proper article of the proper kind would be at once obviated.

This is a point which should have immediate attention; and, under the management of the Locomotive Superintendent, a uniformity of design

or pattern would be adopted, and a large annual saving effected.

The broken metal would be re-cast upon the Company's premises, cost and trouble of transport avoided, and any sacrifice in its sale to other manufacturers saved.

The replacement of injured and broken rails is an item of expenditure connected with the maintenance of the road which will annually increase, and upon 940 miles of road will, in the course of a few years, amount to a

large sum.

At present there is upon the sections recently opened but little to contend with on this head beyond what is produced by the severity of the frost; this occurs at the rate of about one rail in a mile during the winter season, or in the ratio of 1 in 500, which does not amount to anything serious.

Those portions of the eastern section which have been in operation for six or seven years shew a different result, and the renewal upon the Portland line already amounts to 500 tons annually, in the ratio of 1 in 30, so that of 150 miles comprised in this section, 5 miles of rails will require to be annually replaced. To some extent inferior iron may account for this, although the chief cause of so premature a decay is owing to the insufficient completeness of the road at its commencement being open for some years when but partially The rails necessarily were badly used, twisted and broken, similar causes have produced similar results upon the St. Lawrence and Atlantic Line (Longueuil to Island Pond) although not to the same extent. Nevertheless the renewals upon this section have been considerable, amounting to the rates of about 1 in 50. The renewals required for the Portland section have for the last two years been economically managed; an arrangement was effected with a Manufacturer at Boston to re-roll our old rails for £5 stg. per ton, supplying a ton of new for every ton of old sent to the mill.

The cost of transport from Portland and back, including all charges being 10s. stg. per ton, so that for £5 10s. stg. per ton we have our rails renewed.

I do not think that for the present we can improve upon this arrangement in so far as the United States portion of the line is concerned. It is therefore with reference to the Canadian portion of the line (about 750 miles) that we must be prepared to deal and make such provision as is necessary for the requirements of this important branch of expenditure. There is at present no establishment existing in Canada where such work could be performed, and in view of the growing wants of the Railway in this particular, when to replace the ordinary wear and tear of 750 miles of Railway will require the re-rolling of 60 tons per week, equal to 3,000 tons per annum: (estimating the life of a rail at 25 years) it is necessary that what is required for carrying on this branch of the service should be provided.

A rolling mill of moderate extent capable of turning out a hundred tons per week if necessary, would in the Company's hands effect a saving of

£15,000 per annum.

The locality best suited for this purpose on every point of view is at Point St. Charles, and as soon as praticable the establishment required should be provided, the cost of which would not exceed the amount of one year's saving upon the above estimate.

There is one other item of expenditure I have yet to refer to, though of less consequence than any yet mentioned, it is still of importance sufficient to justify the Company becoming their own Gas Manufacturers for the establishment at Point St. Charles, where from five to seven hundred

lights will in the winter season shortly be required.

The charge for this article in Montreal is exorbitant, 12s. Stg. per thousand. I am quite certain that it can be produced, allowing reasonable remuneration for the outlay required, at forty per cent under the above cost, including every expense attending its production, which an outlay of

£4,000 would amply effect.

The repairs of the Permanent Way, an important item in the Current Expenses, has been arranged for throughout the whole of the lines in operation from Portland to Stratford, as also from St. Thomas to Richmond, and I consider upon very reasonable terms for three years, in eight contracts at an average of

£97 5 0 currency per mile for the first year,
93 15 0 do do for the second year,
93 5 0 do do for the third year.

The aggregate length thus let, being 856 miles. The parties engaged are all experienced in Railway works and well suited for their respective divisions.

The contracts have been prepared by Mr. Doucet, the Notary, of

Montreal, and have the specifications attached thereto.

In proceeding to report upon the Western Section from Toronto to St. Mary, I annex a very full report and accompanying account prepared agreeably to my instructions by Mr. Walter Shanly who has been in charge of that division from its commencement.

The observations I have already made in reference to Sidings and additional accommodation and Bridge abutments, apply equally to the Western Section, the details of which are amply shewn in Mr. Shanly's statements, a summary of which is as follows:

Contract Estimate, Toronto to St. Mary, 974 miles£961252
Additional Rolling Stock being that due to the Section from
St. Mary to Sarnia in full under the whole contract 58080
Additional Siding 6-2 miles 32775
Additional Station accommodation39780
Bridge Abutments26000
Sundries as per report
The period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of th

Against which I have deducted for Toronto Passenger Station one \( \frac{1}{2} \).  Cost due by this Section		. "
£1099977	0 0	):
Of this amount there was certified to 1st July last the sum of	9 6	;
Leaving a balance of which I have now certified £ 15468 1	0 6	

When it was determined to suspend the construction of the Line West of Ste. Mary's, it became necessary to define the relative amount and value of the work to be done upon the section proceeding with.

This was found to amount to the value of very nearly £10,000 per mile; leaving barely £6,000 per mile for the remainder. The work upon the suspended portion being very light, and with only one Bridge of small

extent comprised therein sufficiently accounts for this.

The rolling stock due to the Western portion valued at £750 per mile was also added to that of the Eastern End, swelling the amount of the part constructed to an apparently inordinate sum; although in reality for the work done and material in rolling stock supplied, the vast proportion only due to it has been taken to account and allowed for.

I have the honor to be, Sir,
Your obedient Servant,

(Signed,)

A. M. ROSS, Chief Engineer.

## Appendix to Report of A. M. Ross, Engineer.

#### Α.

## GRAND TRUNK RAILWAY OF CANDDA.

#### MONTREAL DIVISION.

Expenditure at Point St. Charles Station, Montreal, estimated in Contract as amounting to £45,000.

### [ No. 21. ]

Report of Messrs. Keefer and Shanly on the State of the R. R. Bridges in Lower Canada.

MONTREAL, 4TH APRIL, 1857.

SIR,

In compliance with the resolution of the Board of Directors transmitted to us by your letter of the 16th ultimo, and with further instruction received on 26th ultimo, we have made a careful inspection of all the Bridges on the Montreal and Portland, the Quebec and Richmond, and Saint Thomas Divisions of the Grand Trunk Railway, accompanied by the resident Engineer of each Division, and have now the honour to submit the following Report:

### Wooden Bridges.

Upon the Montreal and Portland Division there are now fifty-five Wooden Bridges, whose aggregate length measures 9355 feet or nearly one mile and three quarters.

With the exception of the one across the harbour at Portland, which is on piles, all these Bridges are built on the "Hon Truss" principle, which is a

simple Truss without an arc.

Of the old Bridges, the earliest were built in 1846, the latest in 1853. Some of these were rebuilt last year after the same plan, but with heavier Timbers, and preparations are now making to replace others in the same manner, as soon as the ice breaks up and passes off.

The old or first set of Bridges are in various conditions of safety or of insecurity, and demand constant and careful inspection to maintain them in a

reliable manner.

Those which were covered in shortly after they were built are in a pretty good state of preservation. The painting and decking of others without covering the sides, has been but an imperfect protection; but all of them were too lightly timbered in the first instance to endure for any length of time the great strain to which they are continually subjected, and for this reason, and in some instances from inferior workmanship and materials, have given indications of premature decay and failure. The unprotected ones have failed more rapidly and some of them are now propped up on bents.

The resident Engineers have given careful attention to the state of these Bridges. Some they have already replaced with wood, a few others with iron-timbers have been provided and framed, ready to put up for others as soon as the weather will permit—some have been strengthened by supplementary arcs, a wise precaution, and arrangements are now being made for repairing, covering and protecting all that are worthy of maintenance. Many

of them have been recently overhauled and put in good repair.

The large Bridge over the Richelieu at St. Hilaire was only painted and decked, not covered in, and although strengthened by an arc two years since, is now in an unsafe condition and should be replaced without delay. It was built in 1846, and had it been properly protected at that time would have lasted many years longer.

Several other Bridges are in the same unsatisfactory condition and must be rebuilt this season without loss of time. There are others again which must be replaced in one, two, three and ten years, and none of the old Bridges. however well protected can be expected to last more than five or six years

longer under the very heavy traffic which they will have to sustain.

The condition of these Bridges may be taken as a sufficient proof, that for the purposes of a first class Railway, such as the Grand Trunk, Wooden Bridges are but a temporary adaptation and should never be replaced with wood, except in cases of necessity, when, as in the present instance, with regard to some of these, it will be impossible to procure and put up iron within the time they are absolutely required. Unprotected Bridges submitted to heavy traffic, especially where coupled Engines are used, will not last out more than five or six years, and those which are covered and properly cared for, may last twenty years; but they are all liable to be burned up, and so for a time put a stop to business—which might cause more damage to the Company on that account than the entire cost of the Bridge itself.

We therefore consider it the interest of the Company and strongly recommend that arrangements should be made for having all the Wooden Bridges

replaced by Iron Tubes or Girders.

The Statement A herewith submitted is given for the purpose of exhibiting the difference in cost between wood and iron superstructures, omitting the cost of renewals of masonry which is common to both.

### Statement A.

The cost of replacing 7835 lineal feet of Bridging w	ith Iron Tu	bes or Gir-
ders will be	£136,920	Currency.
The cost of the same in wood	62,680	"
Making a difference of	-C 74 940	"

Taking the whole line through, the cost of Iron Bridges will be a little more than double that of Wood, but in the single instance of the Richelieu Bridge, the cost will be a little less than three times.

### Statement No. 1.

There are some bridges however which must be rebuilt at once in wood, because there is not sufficient time now to procure iron from England. In the Statement No. 1, is given a list of 15 Bridges which call for renewal this year without delay either in wood, stone or iron; the cost of which, including the repairs and reconstruction of masonry, is estimated at £29,930 cy., and the whole will have to be expended this year.

For all spans below 60 feet it is presumed Iron Girders can be had from England by the time they are required, but for Spans above 60 feet it will be necessary to adopt wood. It would be advisable to send an order for the Iron

Girders in this Statement as soon as possible.

The Masonry in the abutments of the Bridges South of the Boundary Line, although built of large Granite Blocks of good quality, has been laid up dry without mortar, and not in a workmanlike manner. Sufficient care was not observed in preparing the foundations, and many of the walls are rent and cracked, and it will be necessary before putting in the Tubes or Girders, to rebuild the greater portion of this Masonry—the cost of which is included in the accompanying statement.

In rebuilding in wood, we consider the best form for strength and durability is the "Burr arch and Truss" Bridge. It is a form which has stood the test of time, and is generally acknowledged to be the most reliable and satis-

factory. No truss of large span is suited for railway purposes unless combined with the arch, and the condition of the Bridges on this Line may be considered as confirmatory of this Statement.

### Statement No. 2.

In the Statement No. 2 is given a list of 21 Bridges, which should be replaced by Iron Tubes or Girders in one, two or three years, including the rebuilding of some of the abutments, estimated to cost £53,830. One third of this amount will be required in 1858, one third in 1859 and the remainder in 1860.

### Statement No. 3.

In the Statement No. 3 is given a list of 19 Bridges, to be replaced in Iron after 1860, or between f860 and 1877, estimated to cost £61,780, including the rebuilding of the Masonry where necessary.

### The estimated cost of Works.

In Statement No. 1 is	£29,930 53,830 61,780
Total	£145,540
Of the 15 Bridges to be renewed immediately five are to be of Wood, making 1975 feet of Truss Work, which should last for 20 years, at the expiration of which time a further expenditure will be necessary to replace them with Iron Tubes—the amount of such expenditure will be	
And the renewal of all the Bridges will then amount to	£175,540

The floor beams in all the existing Bridges are not strong enough to bear the weight put upon them, and yield too much beneath the pressure of Trains. They are generally about  $7 \bowtie 13$  with 15 feet bearings and  $2\frac{1}{2}$  feet apart from centre to centre—These should be all replaced by new beams  $8 \bowtie 15$  inches of the same length, and spaced in the same manner. The track stringers also are in most intances not of sufficient size, and at the ends of the Bridges commonly rest on the floor beam only instead of having a firm bearing on the masonry of the abutments, thus causing too sudden a change under the weight of an Engine from the firmness of the permanent way to the elasticity of the Bridge. New stringers  $11 \bowtie 14$  inches should be put in wherever the present ones are of less size and firm end bearings be given in every case.

### Covering of Bridges.

Of the 19 Bridges embraced in Schedule No. 3, several have never been covered in. Instructions should be issued to the Resident Engineers to have all such Bridges "housed" at once; previous to doing which the timbers of the trusses should be thoroughly examined, and any pieces showing symptoms of deterioration, taken out and replaced with sound material.

### Parapet Wall at Bacon's Falls.

Before concluding our observations on the works necessary to ensure the safety of Bridges and Viaducts on the Montreal and Portland section, we would beg leave to draw your attention to the embankment immediately south of the Bridge at Bacon's Falls, which is supported by a perpendicular retaining wall some 30 feet in height, at the foot of which and parallel to the line of road runs a rapid river. The edge of this retaining wall is within seven feet of the rail, and has no guard or parapet of any kind—presenting a fearful place for an accident, should a train happen to run off. A dwarf wall  $2\frac{1}{2}$  to 3 feet in height ought to be built here for some two hundred feet in length, and should be of the heaviest blocks of granite that can be had in that vicinity.

### Iron Bridges.

We have further to report that having inspected the Bridges on the Quebec and Richmond and Quebec and St. Thomas lines we find them all of excellent construction and in good order. On some of these structures we noted a guard stringer 12 X 12 inches bolted longitudinally on the bridge, along the outer edge of the footways on either side of the track, and would recommend a similar protection being placed on every Iron Bridge. We would also suggest that all these Bridges be repainted next Summer, and generally that the painting of all such structures be frequently renewed.

### Running Regulations for Wooden Bridges.

The Traffic Department should be advised to observe the following regulations in running Trains over the Wooden Bridges in their present condition.

1. That Coupled Engines should not go upon them.

2. That the speed of all Trains shall not exceed ten miles an hour over

any of the present Wooden Bridges.

3. That they go carefully and steadily not more than five miles an hour over all the Bridges enumerated in the Statement No. 1, until such time as they be rebuilt—the same rule to apply to Bridges at South, Paris, Mechanics' Falls and Passumpscott River.

4. That in consequence of the Switch at Mechanics' Falls Station being only 66 feet from the Bridge, all through Trains not stopping at that

Station shall haul up and go slowly through the Switch.

Running Regulations for Iron Bridges,—Quebec and Richmond and St. Thomas Branch.

10. That the speed of all Trains do not exceed ten miles an hour over the long Bridges—the Chaudière, the two Etchemius and the Boyer.

20. That Trains go slowly through the Switch at the junction near the

East end of the Chaudière.

Note.—The Switch near the East end of the upper Etchemin being a private Switch and unsafe, should be taken out and removed to a greater distance from the Bridge.

All which is respectfully submitted,

And we remain,
Sir,
Your obedient servants,

(Signed,)

SAMUEL KEEFER,

To John M. Grant, Esq., Secretary.

Grand Trunk Railway, Montreal.

### [ No. 22. ]

Memorial of the Grand Trunk Railway Company of Canada.

To His Excellency SIR EDMUND WALKER HEAD, Baronet, Governor General of Canada &c. in Council.

The Memorial of the Undersigned duly appointed by Resolution of the London and Canadian Boards of Directors of the Grand Trunk Railway Company of Canada.

Respectfully Sheweth:

That the present position of the Grand Trunk Railway Company and the pressure of their financial difficulties render it absolutely necessary for them to approach Your Excellency with the view of submitting a statement of their position, of their inability to make the Relief Act of last year practically available, and of the necessity which has thus arisen for such modification of the said Act and of the claims of the Province upon the Company as can alone enable them to fulfil their engagements and permit them to complete the Eastern and Western extentions and the Victoria Bridge and properly develope the traffic and resources of the Province which the Railway was designed to effect.

The Undersigned do not consider it necessary again to state to Your Excellency any of the circumstances under which the Grand Trunk Railway was originated nor the causes which have mainly operated to produce the present disastrous Crisis. The most important of these causes was entirely beyond the control either of the Government of Canada or of the Company, and while it cannot be denied that the war and the consequent high rate of money, have deranged all the financial arrangements contemplated at the initiation of the Enterprize, the Company have done all in their power

to overcome these difficulties unfortunately without success.

The position of the Province towards the Company has up to this time or rather till within the last year, been that of deriving all the benefits

of the undertaking without contributing to its cost.

So long as the Company possessed any available means they scrupulously met the interest on the Provincial Bonds and it may be fairly urged upon Your Excellency, that thus far the onus of this undertaking pregnant with the greatest possible benefits to the Province has been borne by

the English share and Bondholders.

It is Canada and Canadians only who have profited by the enormous increase in the value of land in the neighbourhood of the line, and in the expenditure of several Millions of English Capital;—private enterprize and labor have been stimulated to an extraordinary extent, and the producing power of the country largely increased: several of the chief Towns of Canada have also experienced to a surprising degree the full benefit of an awakened traffic yet only in its infancy.

Allowing therefore for the progress which Canada would have made, and the profits which Canadians would have realized independently of the Grand Trunk Railway, the undersigned think they are justified in saying that it has very largely contributed to the increased wealth and commercial prosperity of the Country in all probability in a far greater ratio than the value of the whole amount of Provincial aid pledged to the undertaking.

The effect on the Province of the construction of the Railway as relates to the Provincial aid, may be aptly compared to that of the Canadian canals which though unproductive as a source of direct and immediate revenue have undoubtedly repaid their cost tenfold in the development they have afforded to the trade and resources of the Province. The canals became a necessity after the construction, and even independently of the Eric Canal, and the altered circumstances of trade arising from the efforts of the Americans to extend their Railways from the Atlantic to the Great Lakes, in like manner, produced an absolute obligation on the part of the Province to undertake similar works, unless all the advantages of its situation as the great arterial outlet for the western country were to be practically surrendered.

This great national object has been attained through the Grand Trunk Railway, and it may be confidently affirmed that the whole amount of Provincial aid has already been abundantly reimbursed in the impetus given to the country. There is no question that the policy of affording that aid to a private company rather than to undertake the Railway as a Provincial work solely, was in every respect judicious, both as saving a large outlay of Provincial capital, and also as securing the Province from any charge whatever if the line proved as remunerative as was originally hoped, the worst that could happen to the Province being such a failure in the anticipated results as should leave the whole amount advanced chargeable on the ordinary revenues of the Country which have more than doubled since

the commencement of the Railway Works. It must also be remembered that equally as in the case of the Canals the Province did not confine its aid to those sections of the Railway which were most desirable commercially, but required the construction of a section in which the advantages secured are peculiarly those of the Province, and its inhabitants, and which assuredly would not have been selected as a field for investment by individuals. It is not the intention of the Company to dispute that they anticipated from the traffic of the western section a compensation for the loss on the Eastern, but the receipts thus far, would seem to prove that the traffic even on the Western sections, will not for a long time afford more than a fair return on the Capital invested, thus leaving the Eastern sections a dead weight on the Company: more than twelve hundred thousand pounds sterling have been already expended East of Richmond, and, by the relief Act, £525,000 more have been devoted to the extention Eastwards, with £125,000 for the Three-Rivers branch, thus making nearly two millions sterling which cannot be regarded as affording any revenue to the Company.

It is not contended that this outlay should not have been made, as it may be well urged, that this section of the Province stood in greater need than any other, of the ameliorating influences of improved communication; and also, that the whole expenditure east of Richmond will, when completed to Rivière du Loup, constitute two hundred and fifty miles of the future Provincial Railway to the Lower Provinces. But the Company respectfully submit that the expenditure has been crippling and in fact ruinous to them, while the Province and Provincial interests, have alone

benefitted by the outlay, and should be so regarded in considering the present position of the Company and its prayer for relief from the pressure

of the provincial claims upon it.

The Company do not desire to evade or postpone the works originally contemplated, and as yet unfinished, viz: the western line to Sarnia, the Victoria Bridge, and the eastern line to Rivière du Loup. They are prepared to carry out these works, and they do not desire the Province to increase in the least its present liabilities on account of the Railway, but they pray, that the present position of the Company towards the Province and their liabilities upon the Provincial Guarantee may be so altered as to revive the credit of the Company, and give them the means from the resources which they would then be enabled to raise, to complete the system of Provincial Railways originally contemplated.

The utmost extent of liability direct or indirect which they desire the Province to undertake, is that already granted, say £3,111,500, and for this sum, the Province will have received an expenditure of nearly or quite £12,000,000 sterling, giving it a Railway from the Atlantic to Sarnia, together with 250 miles complete of the Halifax line; uniting every City of the Province by Railway, and with the Victoria Bridge, making an unbroken chain of Railway communication throughout the length of the

Province from the waters of Lake Huron to the Ocean.

In urging this further upon Your Excellency it is the duty of the undersigned to state that having regard to the nature of the traffic which is developing over the Grand Trunk Railway, it has become manifestly necessary to make very large additions to the rolling stock and station accommodation of the Company to enable them to perform their task efficiently—and that without such expenditure much of the benefit to be anticipated from the construction of the line cannot be realized, the Capital thus required cannot be raised under the terms of the relief Act of 1856, which specifically appropriates the proceeds of the proposed loan, nor can it be raised on the credit of the Company subject to the existing claims. A necessity has thus arisen which compels a renewed application to the Province, or the Company would find themselves in the position of possessing an admirable road with traffic seeking transport over it, but unable to raise a shilling to provide sufficient engines, cars and station accommodation.

Besides the capital required to meet the wants of the additional traffic it has resulted that the accommodation of the trade of Montreal will require a large outlay in extending the line through the City to Hochelaga to connect with the Canadian line of Steamships, and also at Quebec for warehousing facilities in conjunction with that line, and a similar outlay at Kingston, as well as at other important points to connect with the navigable water. For all these purposes money must be obtained, and cannot be, if the relief Bill establish the final relations of the Province towards the Company.

The undersigned respectfully urge upon Your Excellency that the Grand Trunk Railway Company are engaged in a struggle with American interests for the trade of the west, that in this respect their interests are identical with those of the Province, and that it is therefore a subject of national importance to give the Company every facility for increasing their

accommodation to the public, and in placing them in a position to transact

the business intrusted to them with safety, accuracy and despatch.

The Canadian Line of Steamships may be justly regarded as a corollary of the Grand Trunk Railway designed for the same object and acting in precisely the same direction. The Legislature has in this instance largely and wisely subsidized a Line of Ocean Steamers to enable them to compete with other lines which tend to direct trade to American Ports and to American Railways. This line however can never produce the results expected from it unless the Railway which forms its connection with the interior be placed in the most efficient state for business. The effect of the subsidy of this Steamship Line is justly regarded as an inducement for produce to seek a market by way of the St. Lawrence, and equally so may the Provincial aid to the Grand Trunk Company be considered as repaid in the reduced cost at which it may enable the Railway to carry freight and passengers both ways along the same channel if the Province consent to relieve the Company from the immediate pressure of its claim.

The undersigned trust Your Excellency will be pleased to take the foregoing statements into consideration which they now submit for your information in connection with the present situation of the Company. In doing so they would respecfully add that the Honorable Mr. Napier, prior to the passage of the Relief Bill of 1856, very forcibly drew the attention of the Honorable the Inspector General to the existence of the claims on the Company which they are now about to submit and that they are in no other respect altered than from the additional requirements for traffic which

experience has since developed.

The most pressing liabilities of the Company are as follows:

Debts already incurred exceeding	£340,000
Bills accepted payable before 1st July	290,000
Additional Rolling Stock, sidings, station	
accomodation	380,000
Interest due in July	210,000
	1,220,000

To meet these liabilities no provision exists in the Relief Bill and as the only unissued shares of the Company are pledged by that Bill to the Province no other resource remains but a small issue of B bonds.

In the present feeling of the London money market towards the Grand Trunk Company, it becomes the duty of the undersigned to state that it is absolutely imposible to raise any money on the securities referred to. And even if the Province were to waive its claim upon the unissued shares it is perfectly certain that they could not be placed on any terms subject to the existing debt of the Company to its own bondholders and to the Province. It must therefore be plainly and frankly stated to Your Excellency that under existing circumstances no means can be raised to meet these requirements.

The undersigned now desire respectfully to draw Your Excellency's attention to the Relief Bill of last year and the means thereby provided for

completing the remaining works of the Company

The Shareholders of the Company have always regarded this Bill as extremely valuable to the Company recognizing as it does to a certain extent the equitable relations of the Province towards them, and they accepted it in the belief that the Province would not hesitate to take such further steps as would ensure the relief which it was intended to afford. But the Company could not avoid seeing that under this Bill no escape was afforded from the more immediate and pressing claims upon them nor were its provisions such as were at all calculated to raise the credit of the Company.

It was manifest that in no other way could the objects of the Relief Bill be obtained than by placing the Company in such a position as to raise on their own credit the money required for their works as well as to meet their other liabilities. The former object might have been expected to be attained under the Relief Act, but the latter as the result proved was absolutely defeated thereby, as the addition of £2,000,000 to the preference debt of the Company, could not but diminish its ordinary credit, and although the province undertook the provision of interest on its own bonds for five years, yet it required the deposit of the Company's securities therefor, consequently no diminution of charge upon the Company took place but only a postponement. Considerations of this nature appear to have operated in the minds of those dealing in the Money Market in London, and consequently not only was the Company's effort to issue its own bonds unsuccessful, but a marked disinclination has been shewn to invest in the preferential issue of £2,000,000, as it was universally agreed that the position of the Company was not materially improved and that it could not possibly proceed without further relief, the nature of which, it was feared, might even affect these securities. It may be also remarked that the conditions of the Relief Bill being such as to require the immediate payment of this large sum in advance of the necessity for its disbursement, operated very unfavorably in the present state of the money market.

The result has therefore in effect been to improve the Company's affairs only in so far as the Relief Bill has given the share and bondholders a confident hope in the future action of the Legislature of Canada, but not to enable the Company to raise the means either of proceeding with their proposed works or of discharging the existing claims upon them.

Notwithstanding this unfavourable impression the Company have by great exertion, and by straining their credit to the uttermost, been enabled to fulfil that condition of the Relief Bill which was most important to the province and which enjoined the completion of the line from St. Thomas to Stratford;—they also proceeded energetically with the Victoria Bridge, and they only now approach your Excellency and the Government and Legislature of Canada after having done all in their power to make effective the intention of the Act.

Your memorialists have thus endeavoured to bring before Your Excellency the exact position of the Company and their absolute necessities which may be summed up as follows:

First:—The provision of the capital for existing claims and additional accommodation for traffic.

Second.—Such a modification of the Provincial relations towards the Company as shall raise their credit and enable them to complete the line.

The first of these requirements can only legitimately flow from the latter, and it has been already shewn that the Relief Bill of last Session does not meet the necessities of the case as any aid which increases the indebtedness of the Company as well as their obligation to undertake further works, unless it also tend to the re-establishment of their credit is fallacious, and can only increase instead of diminishing their present difficulties.

Your memorialistse in behalf of the Company therefore respectfully submit to Your Excellney, that the time has arrived when the immediate wants of the Company as well as the completion of their remaining works call for a measure of effectual and permanent relief as any attempt to palliate this pressure, must hereafter necessitate a further application to the Province, while great injury to all interests concerned may meantime arise.

Previously to the Relief Act of last year, the Province stood in the position of first mortgagees being at the same time primarily liable to pay both the principal and interest of the bonds it had loaned to the Company. This prior claim upon the Company the Province has waived, and has Aurther relieved the Company from the obligation to pay the interest on the Provincial Bonds for a term of five years. Unfortunately however as has been already stated in this memorial, the terms upon which that relief was given were such as entirely to negative the hope that any sensible reaction in favour of the Company's Stock would follow, and the value of the release was wholly neutralized by the fact that the Company were about to incur a large increase of debt in respect of works not likely to be remunerative, without any corresponding release of an equal or greater amount of The measure has thus proved the Company's present indebtedness. wholly inoperative, and looking to the great advantages which have accrued and which will further accrue to the Province and people of Canada from 'the Railway, the undersigned respectfully state to Your Excellency that the objects of the Relief Bill can be in no other mode adequately attained than by such an extension of the term during which the Province will undertake the payment upon its bonds as will be equivalent to a relinquishment of the claim.

If this were done an immediate rise would take place in the value of the Company's Stocks and they would thus be enabled to raise all the additional capital required for new works as well as for the traffic accomodation and other claims amounting together to upwards of three millions of new capital or an amount equal to the debt surrendered by the Province and which it is otherwise absolutely impossible to raise. It is true that the Province would by this means actually release the Company from its debt, but it would ensure the expenditure of an equal sum to be raised by the Company on their own credit, to be devoted to works of great public utility, and it may fairly be assumed that the benefit which the Railway thus fully completed and equipped would confer upon the Province and upon its revenue, would amply compensate for the continued charge or subsidy of £180,000 per annum, which has been already assumed for five years with the certainty that it must continue as a charge if from the un-

fortunate state of their affairs the Company become as in all probability

they must become, insolvent.

Assuming that the works proposed under the Relief Bill are essential to the prosperity of the Province, it is plain that they must be undertaken at its own charge if the Company break down, and equally so must the

expenditure for traffic accommodation be made.

The result therefore to the Government if it were to assert its rights and to enter into possession of the Railway, would be immediately to create the necessity for a large increase to the Provincial indebtedness. while many grave objections may be raised to the Government incurring the responsibilities of a Railway Company in the management of the Line. The measure of the Provincial liability would be indefinite, and an exchange would be made of a positive liability of one hundred and eighty thousand pounds per annum, already known and provided for, against a very much larger liability subject to be reduced, from the profit of the Line under the management of the Government.

Your Excellency cannot also disregard the loss which Canada must sustain through a stoppage of the works, the injury to the commencing traffic and its diversion into other channels, as well as the damage to the business of the large towns through which the Line passes, and which it

has aroused into extraordinary activity.

These would necessarily follow the failure of the Company whatever course the Government pursued.

But it cannot be doubted that such failure would re-act most prejudi-

cially on all Canadian enterprises, seeking the aid of English capital.

Rightly or wrongly, the share and bond holders would bitterly complain, and the money market sensitive to a degree in such matters, would look shyly and critically, if it would look at all, upon similar undertakings in the Colony; especially when so many sources of investment are opening on the Continent of Europe with positive Government Guarantees, both of principal and interest, and which being nearer home

are therefore so much more under controul. The undersigned would earnestly entreat Your Excellency, to consider that looking at the present aspect of the Company's affairs, there exists no reasonable hope of the Company becoming in a position to resume their liability to the Province at the end of five years under the Relief Bill; that they are utterly unable to avail themselves of its permission to raise money, and that upon every consideration of the subject it is far better for the Province to deal finally with the question than that such a measure should be adopted as may perhaps imperil a greater amount of the money already so largely embarked by the Proprietors and still leave room for future application to the Legislature of Canada.

Your memorialists respectfully urge upon Your Excellency that the absolute relinquishment itself of the Provincial Lien would for five years entail no additional burthen upon the Province, nor would it occasion any increase to its taxation, while it may be confidently affirmed that the success of the Railway and the indirect advantages flowing from that suc-

cess would amply compensate for the outlay.

Your memorialists would further draw your Excellency's attention to the fact that the total relinquishment of the Provincial claim is justified by

the action of other Governments, and without referring to repeated similar action by the British Government in Ireland and elsewhere, even in Canada, the course taken by the neighbouring State of New York is essentially similar to that proposed in the present case.

That State having relinquished a claim of several millions of Dollars to enable the New York and Eric Railway to raise new Capital for the completion of its line; and equally so when the State of Michigan relinquished a very large sum advanced to the Michigan Central Railway.

In both these cases the importance of the undertakings was held to justify the surrender and certainly in neither case can the results be held to be at all equal to those flowing from the Grand Trunk Railway to this Province.

Canada has itself also recognized the same principle in the Act of last Session conceding 4,000, 000 acres of Land to the North Shore Railway, a concession equivalent to a large pecuniary aid, and thereby affording an inducement for capitalists to invest their means in an enterprize possessing the character of an important Provincial work.

Your memorialists therefore conclude by respectfully stating to your Excellency that the Grand Trunk Railway Company can only be placed in a position of credit sufficient to meet their existing liabilities as well as to complete their necessary works and to provide necessary traffic accommodation, either by an absolute relinquishment of the Provincial claim, or, by its postponement to the bond and share capital of the Company until the traffic on the line shall provide a certain fixed dividend.

The former mode would be final and conclusive on all points so far as the Province is concerned, and is in this respect perhaps the least objectionable; the latter course would require permission to be granted for indefinite extension of the Bond and Share Capital of the Company to meet its varied requirements, and in the case of a double track being hereafier necessary, objection might arise to its cost being placed in advance of the Provincial claim.

By either course however the immediate necessity would be met and the Company would engage to raise all the capital required for, and would complete the works named in the Relief Bill as well as provide for the increased traffic requirements. And the Company would further engage in the event of the Railway being undertaken to Halifax to make over to the Province, the Line Eastwards from Richmond to Rivière du Loup on account of the Provincial aid to be relinquished or postponed, should the Province desire to regard this Line as forming its contribution to the inter-Provincial Railway in any future negociations with the Imperial Government and the Lower Provinces.

[SEAL]

JOHN ROSS, Prest. Grand Trunk Railway Company of Canada,

EDMUND HORNBY.

Toronto, 20th March, 1857.

### EXTRACT

Giving the concluding remarks of the Inspector General on the Grand Trunk Bill, 28th April, 1857.

The original scheme of the amalgamated Grand Trunk Company embraced an unbroken line of road from Sarnia to Trois-Pistoles of 827 miles, connecting the River St. Clair, which forms the western limit of Canada, with the tidal waters of the St. Lawrence, at the point where the most direct communication can be had with New Brunswick and the Sister provinces. embraced a spur from Belleville to Peterboro' of 50 miles, and a branch from Richmond to Island Pond and Portland on the Atlantic, a further distance of 221 miles, making in all a railway communication of 1098 miles. The Prospectus shows that the entire cost of this line, exclusive of the Portland lease, was estimated at £9,500,000 sterling, equal to £11,558,333 currency, and that that sum was to place the road in efficient working order, with sufficient locomotive power, rolling stock and station accommodation, in the hands of the Company, without farther outlay of any kind. Stipulations having been made with the several railroad contractors that the contract price should include payment of interest by them on all advances until the several sections of the line were received over, no other provision was made to meet that charge; the Company relying, it would appear, upon the earnings and ability of the road to sustain itself, and provide all further expenditure. How far these expectations have been realized, the statements and accounts which have been laid upon the table will enable the House to judge. A length of 849 miles has been built and £10,547,586 currency expended to the first of January last, of which £628,799 have been absorbed in interest, after deducting the sums carried to the credit of Revenue account. By statement No. 3, page 27, it appears that the floating liabilities of the Company amount to £978,120, from which if the assets on the contra side in the shape of debts due to the Company, in cash bonds and bills receivable amounting to £250,191 are deducted, a floating uncovered balance against the Company remains of £757,929. To reduce which there remains in the hands of the Government, the sum of £161,476, currency, of unreleased debentures-To add

to the pressure of these liabilities, the experience of the last six months has shown that the extent of sidings and supply of locomotive power and rolling stock, although strictly in accordance with the stipulations of the contract, are wholly inadequate to the requirements of the road, or to admit of its being worked to advantage. Statement No. 13, page 30, gives an estimate of the amount required to supply these defficiencies, and to finish the works in hand, viz: rolling stock £198,000, extra sidings £51,000, works and stations along the line £135,000, Victoria bridge £760,211, making a total of £1,144,211. With the exception of the latter work no portion of the proposed aid of £2,000,000, preferential bonds is available for the pressing purposes just enumerated, and the certainty of loss which must attend any extension of the road before the means have been devised for supplying additional rolling stock and extra sidings necessary to its profitable working will sufficiently explain the present application to Parliament. By the Act of last Session the Company were authorised to raise a sum not exceeding £2,000,000 to be expended solely on new works; at that time the sections between Stratford and Brockville, a distance of nearly 300 miles had not been opened, and sanguine expectations were entertained of the productiveness of that portion of the road. These expectations from several causes, amongst which those just referred to are not the least prominent, have not been borne out, and the design of the present bill is to take off all restrictions imposed upon the company in the matter of raising money, to enable them to supply and work the road effectively. The Government, in justice to the sections of the country interested feel called upon to insist on the original conditions into which the Company entered, to carry the road West to Sarnia and East as far as Rivière du Loup; but by way of equivalent they recommend to the Legislature that all claims for interest on the guarantee should be forborne until the Company reap a return from their outlay. In the memorial submitted by the Company and printed with the other statements, their difficulties are stated in a clear and forcible light, but at the same time a strong assurance is given that some such relief as that offered by the bill will enable them to complete the road and to release them from their difficulties. construction of the line from Sarnia to the Gulf of St. Lawrence and the Atlantic, Canada will have obtained a positive and valuable result and will have

secured the great object for which the guarantee was given, if this object can be attained without loss, it will be a source of congratulation to all parties. If, on the contrary, this should not prove to be the case, the Government confidently rely that the Legislature will not hesitate to exercise forbearance towards the Company in respect of the loan. It has been said that English Capitalists in embarking their money in this enterprize, voluntarily ran the usual hazard of gain or loss, and that the engagements of the Province are clearly defined and limited by Parliamentary enactment. This is strictly true. Yet, no one can read the Prospectus which introduced this scheme to the English public, or turn to the Report of Lord Elgin, pointedly referred to in it, written in his most powerful style, and describing in glowing terms the prospects of Canada, or recall the manner in which the Government of the day. placed the enterprize before the world, without feeling that representations emanating from such high authority gave a character to this gigantic scheme which took it out of the category of ordinary speculations. This was no sordid speculation founded upon famine prices—this was no discreditable traffic in illicit gains—this was no scheme for getting rich by the sweat and the tears and the blood of the slave. It was and it is a noble enterprize intimately blended with the hopes of Canada, to grow with our growth and strengthen with our strength, destined to atchieve success with our assured prosperity, or to decline with our failing fortunes. Like the artery which draws its nourishment from the blood which it diffuses through the human frame, and carries to its utmost extremity, it is healthy and vigorous in the full exercise of its functions, but will shrink and decay should the nourishment be withdrawn, and the vital principle cease to flow through its channels.
