## Four Women Wrote this Advertisement—

"Roy has never had such a fine-fitting, good-wearing suit as the one of grey tweed (I think it's called,) that I helped him to pick out at A. D. Farrah's last October"

"Being a woman, I do not know an awful lot about style in men's clothes, but I do know that my husband looks about 5 years younger and slenderer in his new suit from Farrah's"

"The courtesy, individual attention and unbounded willingness to please which you showed my son and myself, make me feel that all advertising does not lie like the thermometer on my cook's stove"

"I have to thank you for the free tickets you have given my boy for pressing and cleaning, with the purchase of his suit. I also compliment you on this novel idea which saves the wife and mother a lot of work and trouble"

### Pressing and Cleaning Service Free to Men

We have arranged to give all our customers, FREE, with the purchase of a suit or an overcoat, six coupons, which will entitle them to six free pressings of either a suit, overcoat or two pairs of pants at any one time, thus rendering them the utmost in service, and please remember that

*Our Fair-Price Banner waves over all*

Herring bone effects, hair lines, fancy mixtures, plain blues, grays, browns, in the fabrics that young men like best.

**\$16.<sup>50</sup> to \$42.<sup>50</sup>**

**A. D. FARRAH & CO.**

"The Advance House of the North Shore"

## PRELIMINARY EXAMINATION

The Preliminary Examination of the men, who were summoned to appear in the Police Court on the charge preferred against them by the Fraser Companies Ltd. was held last Wednesday morning before Police Magistrate J. R. Lawlor. The attendance was so large the Police Court Room was considered too small and the hearing was held in the Council Chamber. Mr. A. A. Davidson, K. C. represented the Fraser Companies Ltd. and Mr. Geo. M. McDade appeared on behalf of the men charged with the offense. The evidence of Mr. Donald Fraser, Vice-Pres. of Fraser Companies Ltd. was taken and occupied the morning session. During Mr. Fraser's evidence the two attorneys had a number of sharp arguments.

Mr. McDade objected to many questions put to the witness by Mr. Davidson but in almost every instance the Magistrate ruled that the questions were permissible subject to Mr. McDade's objection.

Mr. J. Martin, M. L. A. Labor Representative for Northumberland and Mr. J. E. Tighe Organizer for the I. L. A. were in attendance at the hearing.

The case was postponed until Thursday morning next at 10 o'clock when it will be continued. The case is being watched with close attention by both Labor and Capital, as it is considered a Test Case between the two factions.

## MASTERCRAFT FILMS TO BE SHOWN IN NEWCASTLE

For some time there has been a strong desire in Canada that motion pictures produced in England should be shown in the Dominion. Until quite recently the moving picture industry has been exclusively controlled by the American producers and distributing firms. This situation is now likely to be considerably changed. The Anglo-Canadian Picture Plays, Limited, a corporation composed entirely of Canadians, are importing into Canada every week one or more of the latest and have already commenced to release these features into Ontario and Quebec, and according to numerous reports their efforts have met with immediate success. These British productions are being shown at all the principal theatres and are proving equal, and in a number of cases far superior to those of other competitors.

Mayor M. F. Gregg, V. C., M. C. secretary-treasurer of the Anglo-Canadian Picture Plays, Limited, and Mr. Basil Horsfall, president of Horsfall Production, Limited, who are the Dominion Distributors for Anglo-Canadian, have been visiting the principal cities of the Maritime Provinces, and have succeeded in arranging for the new British Mastercraft production to be regularly shown, commencing at an early date, in the principal theatre of every city in Nova Scotia and New Brunswick.

Friday these gentlemen visited Newcastle and made arrangements with Mr. Richards whereby the public of this town will shortly see these new British Mastercraft productions. The first release will be "Alf's Button," which has proved a tremendous success in every theatre it has been shown in and will be run here on Tuesday.

## Notice to Advertisers

As Tuesday May 24th, is a holiday The "Union Advocate" will go to press on Monday, 23rd, and all change of advertisements must be received not later than Friday 20th inst.

## MILL OWNERS HOLD MEETING

A meeting of the mill-owners of the Miramichi was held in the Miramichi Hotel on Tuesday May 10th, at 2 p. m. The following were present R. A. Snowball, Boyd Eaton, Wm. Sullivan, L. J. O'Brien, J. W. Maloney, D. Fraser, J. W. Brankley, Mac O'Brien, A. J. Ritchie, W. G. Thurber, Wm Sinclair, J. P. Burchill, David Ritchie and R. Gill.

Matters of a routine nature were discussed, and most of the operators present claimed they were doing minor mill repairs and were all working a 10 hour day. Some of the operators announced that they intended to commence sawing as soon as their mills were ready, and did not anticipate any trouble in getting crews.

Up to the present, there has been no word of any lumber being shipped to the Old Country, and in conversation with Mr. F. E. Neale Chatham we learn that conditions are very serious in England. Every line of business is practically disorganized as a result of the Coal strike, the lumber-business being no exception. Naturally this is reflecting on business on this side, and Mr. Neale states that he does not look for any improvement for sometime. The lumber held by the Government here apparently is not going to be moved, or at least the greater part of it, because there is no tonnage being chartered, notwithstanding that there is a great deal of tonnage lying idle at the docks in England.

This is a very regrettable matter, as most of the mills are so badly piled up with sawn lumber, that if they are unable to ship they will be unable to saw this summer, and there will necessarily be a lot of unemployment here this season.

## HAPPY HOUR ON WEDNESDAY

Constance Binney, winsome star of stage and screen, will be the attraction at the Happy Hour theatre Wednesdays starring in "39 East," the Rachel Crothers' play in which she made the biggest triumph of her stage career, and is said to repeat her success on the screen.

Miss Binney opened in "39 East" early in the Spring of 1919 at the Broadhurst Theatre in New York. She carried off the honors of the opening performance and became in truth a star over night. After a long run in New York, "39 East" was sent on a tour of the principal cities, finally winding up in the early summer of 1920 in a brief return engagement on Broadway.

"39 East" gives Miss Binney the best role of her screen career, permitting her to give full reign to her girlish charm, her unsophisticated air, her dramatic and comic ability. It also permits her to do some of the dancing for which she first won the admiration of theatrical audiences.

Miss Binney has the role of Penelope Penn, a sweet daughter of a poverty-stricken minister. She goes to New York to remedy the family's financial affairs, and there she takes a room at a boarding house, located at "39 East." She makes the acquaintance of Napoleon Gibbs, another boarder, who falls in love with her at first sight.

After failing to obtain employment of her choice, Penelope is driven to accept an engagement in the chorus. She doesn't let the boarders know what she is doing for a living, and because they know so little about her, their suspicions are aroused. Finally, when she hasn't enough money to pay her board bill and her landlady threatens to put her out, she has "a piece of luck" and is asked to replace the prima donna, who has resigned from the show. Returning to the boarding house with plenty of money, she is welcomed with open arms—especially those of Napoleon Gibbs.

Miss Binney is surrounded by the same cast that supported her in the Napoleon Gibbs and is replaced in the stage production with the exception of

## RED CROSS CAMPAIGN

Modern science has found that a great many of the diseases of mankind are preventable; and before the war great progress had been made in arresting the spread of them, according to local Red Cross officials. But the war stepped in and diverted the attention of medical men from the work of arresting and preventing disease to binding up the wounds of men broken in battle and assisting those who were not mortally wounded to regain their health as speedily as possible.

Medical research work had demonstrated that typhus was almost extinct, typhoid was being rapidly stamped out of civilized countries and small pox was becoming infrequent.

The active campaign of the Canadian Red Cross includes much educational matter for residents of the Dominion that will prevent such diseases as those mentioned above from gaining a foothold. Many diseases result from unsanitary conditions and a too careless disregard for the things that bring good health and happiness.

During May and June the Canadian Red Cross will institute a membership campaign all across the Dominion, in an endeavor to have every person who supported the Red Cross in wartime put their shoulders to the wheel for the work that will make this country a better place to live in. Membership in this society only costs one dollar a year and Red Cross officials anticipate that the response will be very gratifying. Childs Membership 25c.

## LIEUT. COL. LOGGIE HALF A CENTURY IN PROVINCIAL SERVICE

Fredericton, May 12—When Lieutenant Col. T. G. Loggie, I. S. O., Deputy Minister of Lands and Mines, reached his office in the departmental buildings this morning he found a monster bouquet of fifty carnations in a basket upon his desk. They had been placed upon his desk by the department of lands and mines, including the forest service, and marked his completion of half a century in the provincial service. On May 11, 1871, Col. Loggie became a draftsman in the Crown Lands Office under the late Hon. F. J. Stevenson, then surveyor general. He had previously resided at Chatham, N. B.

About twelve years ago Col. Loggie succeeded the late W. P. Flewelling as deputy minister, and in 1917 the Imperial Service Order was conferred upon him, the medal being presented by the late Lieutenant Governor Ganong. Today congratulations have been pouring in upon Col. Loggie from all parts of the province.

## JURY DISAGREES IN STEEVES CASE

Hopewell Cape, Albert Co., May 16—After being out nearly four hours the jury in the case of O. Gaius Steeves, charged with the murder of his wife, Lucy Steeves, near Pine Glen on February 15th last, reported to the court this afternoon that they could not agree on a verdict. The jurors were then discharged and after a formal motion by the Crown, Chief Justice McKeown fixed July 12th next as the date for a re-trial of the accused.

Eight of the jury were for conviction for manslaughter, while the other four were for acquittal. None of the jurymen, it is reported, were for finding the accused guilty of murder as charged in the indictment.

Senator Fowler applied for bail for the accused, but this was denied by Chief Justice McKeown, and the prisoner was remanded to jail to await his second trial.

Henry Hull, who had the role of Napoleon Gibbs and is replaced in the picture by Reginald Denny. John S. Robertson was the director and Kathryn Stuart did the continuity.

### Allies' Terms Accepted By The Germans

Berlin, May 10.—The Reichstag tonight accepted the Allied ultimatum. The vote was 220 to 175. Chancellor Wirth, prior to the vote, announced that the government had accepted the ultimatum. He asked that the Reichstag give an immediate answer.

The Reichstag assembled at nine o'clock tonight and Dr. Wirth announced the formation of a new cabinet, with himself as Chancellor and foreign minister.

#### The New Cabinet

The other members of the cabinet are:

Gustav Bauer (former Chancellor) vice-chancellor and minister of the treasury.

Herr Brauns (Centrist) minister of economics.

Herr Schiffer (Democrat) minister of labor.

Robert Schmidt (Socialist) minister of justice.

General Groener (Socialist-Democrat) minister of transportation.

Andres Hermes (Centrist) food controller.

George Gradner (Majority Socialist) minister of the interior.

Herr Gessler (Democrat) minister of agriculture.

Herr Silberschmidt (Majority Socialist and Labor leader) minister of defence.

reconstruction.

#### Democrats There Too

The Democratic Party was not officially represented in the new cabinet in the first instance, but in response to a request from the Clerical and Social Democrat parties permitted General Groener and Herr Gessler to retain the portfolios they held in the Fehrenbach cabinet. It is understood, however, that Herr Gessler will act as minister of defence only temporarily, his retention in that office being due to his knowledge of the Silesian situation.

### Hon. P. J. Veniot Speaks To Good Roads Convention

Halifax, May 10.—"I think it is the duty of this convention," said Hon. P. J. Veniot, Minister of Highways for New Brunswick, addressing the convention of the Canadian Good Roads Association here this afternoon. "to tell Ottawa our ideas about the administration of federal aid to roads. The federal authorities will never have the right idea about it until they understand provincial conditions. For example, they will give New Brunswick forty per cent. up to \$240,000 expended, on roads for five years and you may expend it in two years if you like. But they will give you only forty per cent of the actual cost of the work. They do not consider organization, engineer's work and other necessary expenditures which amount to from fifteen to twenty per cent. of the cost of the roads and supervises their construction, why should it not pay proportionately for their maintenance."

Mr. Veniot favored permitting the Department of Highways or Public Works tendering for roads work in the provinces.

J. L. Beckwith, ex-Mayor of Victoria, B. C., was inclined to agree with Mr. Veniot but A. E. Jennings, of Toronto editor of the Canadian Engineer, raised strong objection to the idea of highways departments and departments of public works tendering on road contracts. He considered that it was the business of governments to govern and not to build roads and manufacture. According to reports, the United Farmer Government of Ontario was shortly to embark on manufacturing which Mr. Jennings claimed, was almost tantamount to an introduction of the Soviet system.

A Sterling MacMillan, chairman of the Nova Scotia Highways Board, said that within two or three weeks tenders would be called for by that body for some hundred and sixty miles of federal aid roads, and the board itself would tender in every case.

Others who spoke during the afternoon sessions were G. C. Parker, of the Ontario Roads Department; Alexander Fraser, assistant chief engineer of the Quebec Department of Highways; A. M. Rankin, M. P. P. Collins Bay, Ont.; E. R. Henderson, Mayor of East Kildonan, Manitoba, and President of the Manitoba Good Roads Association; C. A. Mullin, of Montreal; C. W. Dill, chief engineer and superintendent of roads for Saskatchewan; Hon. George S. Henry, former Minister of Agriculture for Ontario, and R. D. Patterson, of the New Brunswick Good Roads Association.

### Scouting

The citizens of one hundred and fifty-nine towns and rural communities in the Province of Ontario know the value of the Boy Scouts because they see them every day walking their streets, playing their games and doing their work. And as a group there are no better, brighter and more promising boys than those same Boy Scouts.

Any boy in New Brunswick, twelve years of age or over, may become a Boy Scout if he promises to keep the Scout Law and Scout Promise and

### BECAME SO THIN SHE WAS AFRAID

"FRUIT-A-LIVES" Made Her Well, Strong and Vigorous

MADAME ARTHUR BEAUCHER 805 Cartier St., Montreal.

"I suffered terribly from Constipation and Dyspepsia for many years. I felt pains after eating and had gas, constant headache, and was unable to sleep at night. I was getting so thin that I was frightened and saw several physicians who, however, did not seem able to help me.

At last a friend advised me to take 'Fruit-a-lives'. I did so and soon I felt some relief. I continued with 'Fruit-a-lives' and in a short time, the constipation was banished, I felt no more pains or headache or the disagreeable sensations that follow dyspepsia. Now I am well, strong and vigorous."

Madame ARTHUR BEAUCHER. 50c. a box, 6 for \$2.50, trial size 25c. At all dealers or from Fruit-a-lives Limited, Ottawa, Ont.

prepares himself for simple tests on the composition and history of the Union Jack and can make several cordage knots.

The plan is to group a number of boys (preferably not more than 32 in any one "troop" as they are designated) under the leadership of a "Scoutmaster" a carefully selected, clean, intelligent, boy-loving volunteer leader, always a man of sterling character and mature judgement.

Each Troop and Scoutmaster are under the supervision of a "Troop Committee" of responsible citizens, usually officials of the church, school, community association, club or other organization with which the Troop is connected.

Through such leadership the boys of the troops are kept interested in a program of play activities that are health-giving and educational. They take long tramps, studying nature in all its forms. They learn woodcraft, and how to take care of themselves in the open. They have troop meetings each week for study, handicraft, experiments, demonstrations, etc., and go into camp every summer under trained directors.

In a hundred ways the boys' time is occupied. The program is so varied and so fascinating to the boy that he simply hasn't time or opportunity to trail with an idle gang or to turn into the evils that beset the path of the idle boy.

Full information regarding the formation, registration and conduct of Boy Scout Association, 24 Ritchie Building, St. John. Commencing with this issue new notes and items of general interest regarding the movement will be published almost every week in these columns.

### MacKinleyville School Standing

Number of days school was in session 21.

Percentage of attendance 91  
Perfect attendance—Dorothy MacGregor, Nina Clarke, Vincent Duthie, Howard MacKinley, Lillian Clarke, Clarke, Stephen Duthie, Stella MacRichard Dawson, Edna Clarke, Archie Lean, Lorna Clarke, Helen MacGregor and Fred Harrigan.

Absent one day—Johnnie Harrigan.

Pupils who excelled on monthly written examination.

Grade V.—Stella MacLean 95; George Dawson 93; Howard MacKinley 93.

Grade IV.—Dorothy MacGregor 94; Vincent Duthie 87; Stephen Duthie 83

Grade III.—Richard Dawson 81; Harold Clarke 82.

Grade II.—Mary McLean 88; E. Clarke 89; Archie Clarke 80.

Grade I. (a)—Robert MacKinley 80; John Harrigan 80; Clara Clarke 83; Geraldine Walsh 95; Sammie Clarke 88.

(b)—Fred Harrigan 97; Margaret McKinley 94; Kathleen Duthie 90.

(c)—Inez Clarke 80; Helen MacGregor 83; Irene Clarke 84.

### Cheap Method Of Heating And Lighting Home

Sunny Brae, May 8.—Frank E. Jonah C. N. R. conductor, in his home at 642 Main street, Moncton, has a shale reducing plant in operation that looks like a wonder and bids fair to revolutionize the power, fuel and lighting problems. Into a tiny air-tight retort he puts five pounds of shale from Indian Mountain, six miles north of Moncton, which he treats by a process of his own. The retort is in the centre of a cylinder and has a gas jet beneath it but within the outer cylinder. The air passing through the outer cylinder is heated and heats the latter, which in turn heats the room, thus solving the heating problem. From the retort through a coiled tube comes gas of eight one-candle power jets, and also oil, which collects in a tank below partly filled with water. From the five pounds of shale comes about a pint of first-class petroleum, eight candle-power of light and enough heat for the room, the light and heat lasting about five hours. A ton of the shale would heat and light a house for ten weeks and in the meantime produce forty-nine gallons of oil, one gallon of which, the inventor says, will burn as long as five gallons of kerosene. The Indian Mountain country for about nine square miles is full of shale. Mr. Jonah's invention will enable every family to install a shale retort of its own, to manufacture its own heat and light and produce oil for power and light outside it is maintained.

Mr. Jonah's laboratory has been visited by many people, some from a considerable distance, even from Europe.

Mr. Jonah says that the price of gas can be reduced to twenty cents for 1,000 cubic feet, and the price of oil, gasoline, cylinder oil; kerosene and several other grades about six in all which can be made from his product—greatly reduced.

### CASTORIA

In Use For Over 30 Years  
Always bears the Signature of *Dr. J. C. Hutchins*

### Your Daughter

IS your daughter at that critical age, approaching womanhood, when nothing is so important to her as mother's care and mother's advice?

It is during this time that her whole future health and happiness may be at stake.

With most girls this important development takes place at a time when school work is most exacting and the nervous system is consequently under a most severe strain.

An enormous quantity of rich, red blood is necessary to meet the demands of the system, and, this failing, there is the development of anaemia, chlorosis or some form of nervous trouble, such as St. Vitus' dance.

Most mothers now know about Dr. Chase's Nerve Food and the promptness with which it enriches the blood and builds up the nervous system of the growing girl.

It is mother's duty to see that a reasonable amount of rest and sleep is obtained, that the food is wholesome and nutritious, and that the treatment is used regularly and persistently so as to keep up an abundant supply of pure, rich, nourishing blood.

Dr. Chase's Nerve Food 50 cents a box. All dealers, or Edmandson, Bates & Co., Ltd., Toronto. The portrait and signature of A. W. Chase, M.D., are on every box of the genuine.

### BOOM ROAD

Boom Road, May 9th—Mrs. Wm. Allison has returned home after spending the past week with her sister Mrs. Elijah Astles of Strathadam.

Mrs. Ernest Kelly of Chatham spent last week with her sister Mrs. James Matchett.

Messrs. Boyd and Wilson Bell of Newcastle biked to Boom Road last Sunday, the guest of their grandparents Mr. and Mrs. Wm. Allison sr.

Miss Lottie M. Jardine of Lowell Mass is visiting her brother Mr. John C. Jardine.

Mr. and Mrs. Benj. Sherard and

three children, Harold, Byron and Margaret were the guests of Mrs. Fred Whitney of Whitneyville last Sunday.

Miss Dorothy Mutch of Whitneyville spent Sunday evening with Miss Jessie Jardine.

Mrs. Elmer Allison of Whitneyville spent Wednesday with her mother Mrs. John Stewart.

Mrs. John Sherard Jr. who was in Maine last week on important business has returned home.

Mrs. Charles Mullen spent last week with her daughter Mrs. Alfred Batzley of Whitneyville.

Mrs. Osborne Sherard spent the week-end with her mother Mrs. Archibald Menzie of Whitneyville.

### THE MISERY OF BACKACHE

Removed by Lydia E. Pinkham's Vegetable Compound.

Meaford, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for backache, and I also had a female weakness. I felt dizzy and nervous, and was without energy. I had to force myself to do my work, and was always tired. Saw a Pinkham advertisement which induced me to take the Vegetable Compound, and my back gradually stopped aching and I felt lighter in spirits. I am recommending the Vegetable Compound with pleasure to all I meet who complain as I did."—MILDRED BROOK, Meaford, Ont.

### Woman's Precious Gift

The one which she should most zealously guard is her health, but she often neglects to do so in season until some ailment peculiar to her sex has fastened itself upon her. When so affected women may rely upon Lydia E. Pinkham's Vegetable Compound, a remedy that has been wonderfully successful in restoring health to suffering women.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Would you like to hear the phonograph Mr. Edison uses?

It's an Official Laboratory Model. We have its exact duplicate. Come in and hear how perfect are its RE-CREATIONS of music. Know what kind of instrument the greatest of phonograph experts has installed for his personal use.

**Allied Demands All Acceded**

London, May 11—Premier Lloyd George announced in the House of Commons this afternoon Germany's complete acceptance of all the Allied demands. His announcement was greeted with prolonged cheers.

Dr. St. Hamer handed the German reply to the Prime Minister at eleven o'clock this morning and Mr. Lloyd George immediately telegraphed the news to all the governments concerned.

**Text of the German Agreement**  
The text of the reply as delivered to the Prime Minister began as follows:

Mr. Prime Minister—In accordance with instructions just received, I am commanded by my Government, in accordance with the decision of the Reichstag and with reference to the resolutions of the Allied powers, of May 5, 1921, in the name of the New German Government to declare the following:

"First, the German Government is fully resolved, first to carry out without reserve or conditions its obligations as defined by the reparations commission.

"Second, to accept and carry out without reserve or condition the guarantees in respect of those obligations prescribed by the reparations commission.

"Third, to carry out without reserve or delay the measures of military, naval and aerial disarmament notified to the German Government by the Allied powers in their note of January 29, 1921, those overdue to be completed at once and the remainder by the prescribed date.

"Fourth to carry out without reserve or delay the trial of war criminals and to execute the other unfulfilled portion of the treaty referred in the first paragraph of the note of the Allied governments of May 5.

"I asked the Allied powers to take note immediately of this declaration.

(Signed) **ST. HAMAR.**  
Mr. Lloyd George in giving the terms of the reply to the Commons said "this is complete acceptance of every demand."

**Big Drop In Butter Price**

Ottawa, May 14—Creamery butter has dropped to 32 cents a pound in Ottawa. This is a drop of eight cents from the price yesterday and a reduction of twenty-eight cents a pound in a little more than ten days.

The April price was sixty cents a pound. Cheese has also dropped from thirty cents a pound to fifteen or sixteen

**"Its Grandest In The World"**

**St. John's Woman Says Tanlac Restored Her Health After Four Years of Suffering**

"I suffered for four years before I got Tanlac, but since this medicine restored my health six months ago I have been feeling just fine," said Mrs. E. Gayton, Walsh Square, St. John's New Foundland.

"I had indigestion and dyspepsia, could hardly eat enough to keep me up and what little I did eat would bloat me until the pain was often so bad I just had to lie down. My nerves were so shattered I could scarcely sleep, and just any little noise would upset me completely.

"I had dreadful headaches and always felt so tired I could barely stay up, and just before I got Tanlac I couldn't even look after my household. The fact is, I was in such a miserable condition that I was afraid to be left alone even for a few minutes.

"I tried a lot of different medicines but nothing relieved me until I got Tanlac, but it certainly made me feel like a different person. My appetite is so good now that I am always ready to eat, and I can eat anything I want without the least trouble. My nerves are so quiet I sleep like a child every night and never have a headache or the least worn out feeling. I am certainly in fine condition and I just think Tanlac is the grandest medicine in the world."

**Resumption of Passenger and Freight Service between St. John and Boston**

With the resumption of service, the International Line will offer great advantages between St. John and Boston for the transportation of both passengers and freight. The passenger service is particularly attractive, and from the outlook at the present time, the tourist travel will be unusually heavy during the coming summer season.

The Steamship GOVERNOR DINGLEY will leave St. John every Wednesday at 8 a. m. and every Saturday at 4 p. m. (Atlantic Time). The Wednesday trips will be via Eastport and Lubec, while the Saturday night trips will be to Boston direct. The Steamship GOVERNOR DINGLEY has been refitted and equipped for the burning of oil fuel. The staterooms are commodious, well ventilated and the meals served will be the best the market affords.

For the expeditious transportation and handling of freight the International Line will render the best possible service in connection with the Metropolitan Line steamers between Boston and New York via the Cape Cod Canal, which has special facilities for the transportation of automobiles, horses and express freight.

**SUNNY CORNER**

Sunny Corner, May 12—Mrs. Walter O'Neil is visiting her mother Mrs. James Hyland.

Mr. and Mrs. Leroy Morrison spent the week-end in Sunny Corner.

Mrs. George Matchett, Nelson, is visiting Mrs. Hiram Matchett this week.

Miss G. H. Tozer was in Boom Road on the 7th.

Mrs. Michael Hogan was a visitor in Renous and Newcastle on Monday and Tuesday.

Miss Ida Mullin and M. B. Nolan spent last week in town.

Mr. Michael Hogan is having his residence moved down to his blacksmith shop.

Mrs. Emma Campbell who has been visiting her aunt Mrs. Alfred Leach for the past month returned to her home in Chatham on Monday.

Messrs. Albert Tozer and James McDonald have gone to Nelson for a few weeks.

Mr. and Mrs. Samuel Mullin spent the latter part of the week at the farmers home here.

Mr. Vincent Hogan, who has been attending the Moler Barber College in Montreal has completed his course and returned home.

**DEGREE CONFERRED**  
At the Encenia of the University of New Brunswick on Thursday afternoon the Honorary Degree of Doctor of Law was conferred upon Lord Beaverbrook, in absentia.

**The Application Of Nitrate of Soda**

Nitrate of Soda dissolves readily when brought in contact with moisture and if applied to the surface soil it will soon be dissolved and taken up. If the rains are heavy there may be some loss by percolation; however, there are seldom rains heavy enough after early May to cause any percolation of water through the soil, unless the soil is of a very open nature and consequently there is likely to be little loss of plant-food from this cause.

Nitrate of Soda supplies nitrogen in a readily available form and because of this is one of the most valuable of the nitrogen supplying fertilizers. In the spring nitrates in the soil may be very deficient because of their depletion by drainage from the soil, caused by fall and early spring rains. Liberation of nitrogen in the humus cannot take place until the soil warms and the nitrifying bacteria become active; hence the suitability of nitrate of Soda for furnishing nitrogen early.

Nitrate of Soda may cause injury if applied in large quantities, because of the sodium chloride it contains and care in its application is necessary. The application usually should not exceed three hundred pounds per acre; one ounce per square yard is equal to three hundred pounds per acre. If evenly-distributed and worked into the soil, this quantity will not cause injury and larger amounts are generally not necessary. The application may vary from one hundred to larger the amount used the more care is necessary to secure an even distribution by mixing it well into the three hundred pounds per acre.

Orchard trees are usually spaced thirty-three feet apart which would be forty trees to the acre; and two and a half pounds per tree scattered on the area in which the tree is growing, should give all the nitrogen required for early vigorous growth. This would be at the rate of a hundred pounds per acre. It may be desirable in some cases to increase this, but annual spring applications of this amount should be sufficient to give the desired early growth. This should be applied by the middle of May and a later application of a like amount may be necessary if a heavy set of fruit is made and the soil not very fertile.

It is not a good plan to overfeed at one time, and for this reason two applications may be more conducive to well developed growth than an excess applied at once. An even surface distribution is also desirable, for, if this not done, certain areas may have an excess and other areas none. Nitrate of Soda should be put through a sieve and the lumps thoroughly pulverized before it is used, thus making possible better and more even distribution.

Many transplanted garden plants, after they have become established, such as tomatoes, cabbage, celery and the garden-annual flowering plants, may be stimulated into active growth by scattering a little Nitrate of Soda around them just before a rain. It is well to use judgment however, as a little too much may injure the roots and kill the plant. The fertilizer should be kept from the foliage as it will cause injury.

Pastures grasses or lawns may be started into strong growth by scattering one hundred pounds of this fertilizer per acre when the grass is dry just before a rain. It should be kept in mind that Nitrate of Soda is poisonous for stock and because of its salty nature they are fond of it, so care should be exercised not to leave it where stock can have access to it. Pastures where it has been used should not be grazed for a period after it is applied, in order to give ample opportunity for it to be completely dissolved.

Nitrate of Soda applied at the rate of fifty to a hundred pounds per acre when the grain is about two inches high, will give materially increased yields and usually more than pay for the cost of the material and application. In tests made at the Experimental Station, Kentville, the yield of wheat was 16.3 bushels where no Nitrate of Soda was used and 19.80 bushels where a hundred pounds per acre was applied as stated above, an increased yield of 3 1/2 bushels. The soil in this case was a sandy loam of low fertility.

TAKE YOUR DISCOUNT

The tax bills for the Town of Newcastle will soon be issued. The valuations have all been made by the Assessors and the finding of the taxation rate is now being worked out. After this is completed it is only a matter of filling out the bills and having them delivered, which work takes but a short time. A discount of five per cent is allowed up to the 7th day of June and for ten days thereafter a discount of 2 1/2 p. c. is allowed. Taxes are like death, sure to come and must sooner or later be met. The Finance Committee this year are desirous of collecting as much of the assessment during the discount period as they possibly can, and would esteem it a favor if all persons who possibly can take advantage of the discount and pay their taxes during the discount period. To the ratepayer, nothing is to be gained by them in not taking the discount, but rather a bit of dust on the inside of our necks—could always hunt up a good "throat wash"—but times have changed. Didn't I see in the last Town Report as one of the Assets—"WATERING CART". It looms up there every year with the road machine, stone-crusher, public square, town hall, band-stand, etc. etc. We see most of the other assets but where— for the love's sake is the WATERING CART. The weather is getting nice and warm and I'm sure it wouldn't hurt the poor dear to take her out for a few hours every day—and wouldn't it please the poor housekeeper who has been shining up all spring but dare not open a door or window.

Dear Sir:  
Your editorial re. "Reckless driving of Automobiles" through the streets

ratepayers cannot expect the same results from our town officials, as we otherwise would, when they are obliged to devote a large amount of their time endeavoring to secure funds to carry on the town's business. If funds were on hand this extra work would not be necessary and the time required for such work could be more profitably employed in the interests of the town. Then there is the matter of interest which the town is required to pay to the Bank for the use of money it has had to borrow, while at the same time the tax payers owe a much larger amount to the Corporation, which if paid would eliminate the necessity of borrowing from the Bank, and would reduce each year's assessment by the amount paid out for interest. Considering these vital points in connection with our town's finances, it would be a progressive step on the part of all ratepayers to arrange to pay their taxes during the discount period, and thus provide our Town Council with sufficient funds to carry on satisfactorily the business of the town. Will we not try it this year and see the good results which will follow?

Your editorial re. "Reckless driving of Automobiles" through the streets

of Newcastle was timely, and appreciated by all good citizens and I hope it will have the effect of making the authorities act and give their Police Officers instructions in their duties in this respect at least. There are a few drivers still whirling round the streets at 25 to 30 miles per hour—turning corners at the same speed without thinking it necessary to "toot" their horns.  
Just make an example of them Mr. Policeman. Take an hour at the Lonsbury corner—afternoon and evening—see how much business you could do. Find out how many of these reckless drivers—who are threatening the lives of our citizens, who find it necessary to use the streets on foot—are possessed of a License to drive a car. Go to it now! Don't wait until some poor unfortunate is killed or crippled for life by these fools. Stop the reckless driving of cars through the streets by unlicensed drivers.

Yours very truly  
A FOOT PASSENGER  
Newcastle, N. B.  
May 12, 1921

Editor of "Advocate"

Dear Sir:—  
Will you kindly give me space in your valuable columns to draw the public's attention to the present unsatisfactory condition of affairs which exists in Our Fire Company.

All is not well with the Newcastle Fire Company, and such has been the case for some months. Something is wrong and the ratepayers of the town should ascertain what the trouble is. This department is a most important one and all property owners should be interested in both the members of the company and the methods governing them. In years past the Town of Newcastle was proud of its Fire Company, and had indeed very good reason for such pride. In these days the members were a class of men who could always be depended upon, and each and everyone of the members took a deep interest in their work. The meetings were conducted along business lines and both meetings and practise nights were well attended, while at present a practise for the Fire Company is a matter unthought of. When an alarm for a fire was sent in the members of the company responded in a body and had everything so arranged that on their arrival at the scene of a fire, each man knew what duty he had to perform, did it and in consequence no unnecessary confusion was indulged in. The general public realized that their Fire Company was one which they could rely on, and consequently the firemen were not interfered with by the public. Such is not the existing condition of our Fire Company at the present time of writing. A large number of the members of the Old Fire Company have resigned from that body, no doubt for some cause which is not apparent and the places of these old experienced firemen have been filled by men of inexperience. The reason for these resignations is also a matter which should be deliberated on by the public. At the annual meeting of the Fire Company for the election of officers held on Thursday evening May 5th, it was impossible for the company to decide on the appointment of a Chief for the ensuing year. This does not appear as if there was very much harmony existing among the members, as years ago the chief of the Company held office for years at a time. There must be a reason for all these existing troubles and the public should endeavor to have them sifted to the bottom. At the fire early last Wednesday morning in Mr. James Forest's residence, it was not known by the members of the company who was in charge as it was impossible for them to come to any decision at

## Linen Industry in Canada

Dominion Linens, Ltd., Mangling and Ironing Department, showing Callanders, Hydraulic Mangles, Folding and Measuring Machines. Total floor space about half acre.

The linen industry was initiated in Canada in 1902 by Mr. William Bery, now Vice-President of the Dominion Linens Limited, Guelph Ontario. Previous to this time, however, there had been several attempts at linen manufacture, and mills established in different parts of Canada, but all had resulted in failure. From the earliest period of human history till almost the close of the eighteenth century, linen manufacture was one of the most extensive and widely disseminated of the domestic industries of European countries. It was most largely developed in Russia, Austria, Germany, Holland, Belgium, Northern France, certain parts of England, the North of Ireland and throughout Scotland. In the latter part of the eighteenth century the invention of cotton spinning machinery gave the linen weaving industry a fatal blow. Domestic spinning and weaving began to shrink and with it hand loom weaving.  
In 1815, at Darlington, England, a machine was invented, which after many improvements and modifications has become the perfect system of machinery with which at the present day linen spinning mills are furnished. The discovery of a process for the mechanical spinning of linen yarn for weaving into cloth by power loom was much slower than in the corresponding case of cotton.  
There are two branches in the modern manufacture, spinning and weaving, to which may be added bleaching and various finishing processes. The flax fibre is received in bundles from the scutch mills and after having been classed into various grades according to the quality of the material, is labelled and placed in store ready for the flax mill.  
When the manufacture of linen in Canada was successfully started, the idea was to purchase yarns from the Continental and Irish spinning mills, who were being supplied with Russian flax, at a price much below that for which flax could be grown in Canada. As most of the linen manufacturers in Ireland were weavers only, buying their yarns from spinners, it was thought quite possible and feasible that the same method could be employed with success in Canada, and prior to the war, the linen business depended entirely on these imported yarns to keep their plants in operation.  
In the year 1913, it is estimated that Russia produced about 400,000 tons of flax, and other European countries, including Great Britain and Ireland, 100,000 tons.  
With the complete collapse of Russia in 1918, it became evident that if the linen business was to be continued in Canada, it would be necessary to establish a spinning plant here, to spin the Canadian grown flax, which with the improved methods of cultivation, were proven equal to or better than the Russian flax, on which the industry had relied previous to the war. A modern flax spinning plant, which would complete the chain of linen manufacturers and make the business a purely Canadian one has been installed at Guelph and is now in full running order. This plant has been equipped with the latest modern dry and wet spinning systems. To secure the highest quality of linen yarns, workers were brought from Belgium, via the C.P.R., who were experienced in water retting flax, similar to the finest Flemish and Belgian flax which are used for producing the highest grade linens.

their meeting on the preceding Thursday evening. Is this not a fine condition of affairs to be existing in a Fire Company? At this same fire, the water was being thrown over the roof on the piano and furniture which had been taken out of the house to a place of safety, and a citizen who for at least twenty five years had been a member of the Newcastle Fire Company (which was a Fire Company) noticing the danger which the furniture was in, spoke to one of the Firemen about it, who responded in a most insulting and impertinent manner. This fireman is one of the newly elected firemen and knows about as much about fighting fires as a child does. It is also said that he secured a 50% vote of the Fire Company at their meeting on Thursday evening for the position of Chief. Had he not been in the act of performing a public duty his impertinancy would have been severely checked by the old fireman who on account of his long experience knew right from wrong in matters of this kind. However after the fire was extinguished this inexperienced new fireman was asked by the old experienced man, if he then was prepared to stand by his utterances, which he made while performing his work as a fireman but characteristic of incapableness, simply said that he wished to have no further talk regarding the matter and requested the protection of the Police who was at the scene of the fire.

This is surely a deplorable condition for our Fire Company to be existing under, and it is high time for the Public to look into a public service of such importance, when a man who acted in such a manner as this, is in a position to secure a 50% vote of the company for the position of Chief. Would he not make an admirable chief and would we not have a most efficient company under such a Chief?

Thanking you for the courtesy of allowing me to use the space required for these observations, I am

Respectfully Yours

### OBITUARY

**MRS. JOHN STREET**

The death of Mrs. John Street, a well-known resident of Trout Brook, occurred at Miramichi Hospital on Tuesday evening, after a few days' illness of pneumonia.

**MRS. PATRICK MEAGHER**

The death occurred in the Hotel Dieu hospital, Wednesday night at ten o'clock of Mrs. Patrick Meagher. Deceased had been ill for the past two weeks, and was only admitted to the hospital on Wednesday.

Mrs. Meagher was the second daughter of the late Mr. and Mrs. Dennis McEvoy and was a life-long resident of Newcastle, where she was born about sixty-seven years ago. She was well-known for her many kind deeds to the sick and needy, and the news of her death will be learned of with sorrow by numerous acquaintances.

She is survived by her husband, two sisters, Mrs. William Keating, Boston; Mrs. William Ronan, Newcastle and three brothers, Thomas in the West, P. J. and William E. McEvoy of Newcastle.

The funeral was held last Friday morning at 9 o'clock at St. Mary's Church where requiem high mass was celebrated. Interment in St. Mary's cemetery. W. J. Hogan, undertaker.

**MRS. PATRICK CLANCY**

Many friends on the Miramichi will learn with regret of the death of Mrs. Clancy, widow of the late Patrick Clancy, of Derby, who passed away suddenly at her home Wednesday morning at 4 o'clock, after a few days' illness of pneumonia.

Deceased had been spending a week in Newcastle with her daughter, Mrs. A. J. Morrison, and had been in her usual good health and was home only a few days when the fatal illness set in.

The late Mrs. Clancy was eighty one years old, and was formerly Miss Elizabeth Taylor of South Esk. She is survived by one brother, William Taylor, a son, Thomas Clancy, station agent at Derby Junction; three daughters, Mrs. A. J. Morrison, Newcastle; Mrs. George McConnell, Derby Junction, and Miss Cecilia, Seattle, Wash. Her husband predeceased her three years ago.

The funeral was held Friday afternoon at 2 o'clock, interment in St. Patrick's cemetery, Nelson, Maher Bros, undertakers.

**P. H. LOGGIE**

The death of Mr. P. H. Loggie, which occurred at his home in Longville on Thursday last, removed one of the oldest and most respected residents of the town. The deceased was 89 years of age in October last, and had been identified with that place all his life. He enjoyed remarkably good health for a man of his years. He had been seriously ill at different times during the last few years, but until a few weeks ago, always recovered sufficiently to be around the house. Mr. Loggie was a successful farmer. He lived a quiet and unostentatious life, and in his home there was always a warm welcome for visitors.

The funeral was held on Saturday interment in Pine Grove.

The service was in charge of Rev. F. W. Thompson, assisted by Dr. Wylie, of Chatham. Knox Church choir sang effectively the hymns "Rock of Ages", and "Sometime we'll Understand." The pallbearers were George W. Loggie, Wilson Loggie, Allen Loggie, Alexander Loggie, Ray Morrison and M. Morrison all nephews of the deceased.

The late Mr. Loggie is survived by his widow (nee Elizabeth Morrison, of Burnt Church); one daughter, Mrs. Kenneth Grievie, of Nanaimo, B. C., and four sons, Harry and Elmer, in British Columbia, and Alexander and Clifford, at home.

The late Mr. Loggie was the last member of the old Loggie generation. The members of the firm of A. & R. Loggie are nephews of the deceased.

**SMALLPOX IN NORTHUMBERLAND**

### EARLY LIFE OF MINNIE STEVENS

News readers on all sides have heard with horror and have read in their Home Paper of the diabolical murder of the beautiful and clever Miss Minnie Stevens at Edmunston, N. B. It may add more interest, more painful interest too, when our Colchester readers learn that this charming girl lived her early days in this county.

When Minnie Stevens was but eight years of age she was adopted, from the Children's Home, Halifax, by Mr. and Mrs. George Stevens of Masstown. Mr. Stevens did a large mercantile business and was beloved and respected by everyone. These two kind-hearted people passed away to their heavenly home; but their daughter, married to Mr. Thomas Hill of Aylesford, with the same loving heart as her lamented parents, brought the orphan girl to live with her in her new home.

Mr. Fred Cox, former owner and editor of the Middleton "Outlook," tells the News that when she came to live in Aylesford Minnie was still a young child and retained the name Stevens, which her adopted father had given her.

She attended the public school and showed cleverness especially in composition. She wrote in the Provincial Exams, but got tripped up in mathematics.

Mr. and Mrs. Hill moved from Aylesford to the United States, Minnie remaining at Aylesford. (Mr. and Mrs. Hill have since returned and are now living at Kingston, N. S.) After the departure of the Hills Mrs. Lambert Patterson, Mrs. West and Mrs. Andrew McBride of Aylesford took a great interest in Minnie.

Minnie was about 23 years old at her death. She learned telegraphy very quickly. She had shown cleverness in writing stories. One of her stories was published in the Middleton "Outlook" and she won a \$10 prize in a magazine competition for story writing.

Minnie learned telegraphy at the Middleton office of the Western Union. She was a very pretty girl, and quiet, speaking little unless addressed. She held the esteem of every one in Middleton.

Mrs. Fletcher Croelman of Glenholme says that in her younger days Minnie attended the Masstown School and that Miss Stevens, afterwards Mrs. Hill, was very proud of her and continued the girl's education after she had taken her to Aylesford.

What we have written will convey the fact that this young girl, educated, clever and modest, was beloved by all. While in the pursuit of her profession, as a telegraph operator, in the town of Edmunston, N. B., she was attacked by a brute in human form, mutilated and her body thrown into the waters of a near by river; and, worst of all, this fiendish murderer is still at large and unpunished.

—Truro Daily News

### When Baby Is Sick

When the baby is sick—when he is cross and peevish; cries a great deal and is a constant worry to the mother—he needs Baby's Own Tablets. The Tablets are an ideal medicine for little ones. They are gentle but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation and indigestion, break up colds and simple fevers and make teething easy. Concerning them Mrs. Philippe Payen, St. Flavien, Que., writes: "Baby's Own Tablets have been a wonderful help to me in the case of my baby and I can strongly recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

### PERSONALS.

Mr. H. A. Powell of St. John was in town yesterday.

Mr. J. D. Creaghan was a visitor to St. John last week.

Mr. Blanchard McCurdy left last Tuesday for Montreal.

Mrs. George Stables returned last Friday from Amherst.

Mr. E. A. Reilly, K. C., of Moncton was in town on Saturday.

Mrs. J. H. Phinney is a patient at the Miramichi Hospital.

M. M. Schaffer of Blackville was a visitor to town on Monday.

Miss Helen Armstrong returned from Youghall on Friday.

Mr. and Mrs. D. W. Stohart motored to Richibucto on Friday.

Mr. and Mrs. Cameron Smith returned from Boston Mass. on Thursday.

Mr. Frank Ward, Station agent at Harcourt was a visitor to town last week.

Mr. John S. Scott, of the Financial Times was a visitor to town last Thursday.

Mrs. G. E. McGrath and little son returned from Campbellton on Friday's Limited.

Miss Dora Harper of Chatham Head spent a few days of last week with friends in town.

Mrs. Wm. Russell, and Mrs. F. Robideaux of Shediac visited Miss Agnes Russell last week.

Mr. John Russell spent a few days of last week in Fredericton returning home on Thursday.

Mrs. Allan Menzie of Fredericton is visiting her parents Mr. and Mrs. David Stewart, Whitbyville, N. B.

Mr. R. Melrose was taken to the Miramichi Hospital on Sunday, suffering from typhoid fever and bronchitis.

Mrs. O. N. Brown and little son George of New Glasgow are visiting Mrs. Brown's parents Mr. and Mrs. R. H. Gremley.

The many friends of Miss Mary Johnstone will be sorry to learn that she is confined to the Miramichi Hospital through illness.

Mr. Arthur Sharp, who spent a few weeks visiting his sister Mrs. J. R. Lawlor, left for his home in Buffalo, New York on Thursday.

Mrs. R. H. Armstrong returned home last week from New York City where she was visiting her daughters Miss Annie and Kathleen.

Mr. and Mrs. A. G. Putnam entertained the members of St. James' Presbyterian Church Choir at their home last Thursday evening.

Mrs. Johnathon Harper who spent the winter with her daughter, Mrs. Wm. Henderson of Donaldson, returned to her home in Bastville on Thursday.

Mrs. E. M. Wilson and two children of Calabogie, Ontario arrived last week to spend the summer with Mrs. Wilson's parents Mr. and Mrs. John P. Ashford.

### A Woman's Health Needs Great Care

**When the Blood Becomes Watery a Breakdown Follows.**

Every woman's health is dependent upon the condition of her blood. How many women suffer with headache, pain in the back, poor appetite, weak digestion, a constant feeling of weariness, palpitation of the heart, shortness of breath, pallor and nervousness. Of course all these symptoms may not be present—the more there are the worse the condition of the blood, and the more necessary that you should begin to enrich it without delay. Dr. Williams' Pink Pills are a splendid blood-building tonic. Every dose helps to make better blood which goes to every part of the body and brings new health to weak, despondent people. Dr. Williams' Pink Pills are valuable to all women but they are particularly useful to girls of school age who become pale, languid and nervous. There can be neither health nor beauty without red blood which gives brightness to the eyes and color to the cheeks and lips. Dr. Williams' Pink Pills build up the blood as is shown by the experience of Mrs. Jos. E. Veniotte, West Northfield, N. S., who says: "For several years I was in a bad state of health. I was pale and nervous, my appetite was poor, and I suffered from weakness, headaches and a feeling of oppression. I got so nervous that I was afraid to stay in the house alone. All this time I was taking medicine, but it only did not help me, but I was growing weaker. Finally I decided to try Dr. Williams' Pink Pills, and after using six boxes I felt much better. I had a better appetite, slept better and felt stronger. However, I continued taking the pills for a couple of months longer and now I am feeling as well as ever I did. I give all the credit to Dr. Williams' Pink Pills, and hope that my experience may be of benefit to some other weak woman."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

### Destroying Weeds By Means Of Chemicals

While the hoe and the cultivator are likely to remain as the two most efficient weapons to use in the combat with weeds there are certain cases where the use of some chemical may be extremely desirable. A good example of the latter is the case of a grain crop infected with an annual such as Wild Mustard where it is possible by spraying with Iron Sulphate or Copper Sulphate to injure the weed to such an extent that it is unable to ripen its seeds.

There are also numerous plots of waste ground in town, miles of roadsides all over the country, railroad tracks, and large areas of stony or rocky ground that cannot be cultivated, where the employment of chemical means for keeping down weeds would be profitably considered.

The spray should be applied in fine mist weather when there is a probability that no rain will fall during the next 24 hours. The amount of spraying mixture will vary somewhat with the kind of sprayer machines used but as a general rule at least 60 gallons are necessary to cover an acre. The spray should be applied while the weeds are young.

The chemical substances that are most employed for killing weeds are sulphate, common salt, caustic soda, sulphate, common salt, caustic soda, sodium arsenite, carbolic acid, orchard heating oil and fuel oil. After the use of some of these the soil remains sterile until the chemical has been washed out by rain. In calculating the strength to be used it has to be remembered that a gallon of water weighs 10 pounds.

Sulphuric Acid or oil of vitriol has a corrosive effect on the spraying apparatus and can be used only in a weak solution varying from 3 to 10 per cent. It has no injurious effect on wheat, oats, or barley crops and has a fertilizing effect on the soil.

Iron sulphate or copperas is used in a solution of 15 to 20 per cent but cannot be applied with safety to a crop of beans or flax.

Copper sulphate or bluestone can be used instead of iron sulphate but only in a solution of 1½ to 2½ per cent.

Common salt or sodium chloride is used in a strength of 20 to 25 per cent. It checks the growth of other plants besides weeds until it has been washed out by rain.

Caustic soda or sodium hydrate is

### Groceries Affected By Sales Tax Changes

St. John Telegraph: J. Hunter White, secretary of the New Brunswick Wholesale Grocers' Association, last night received a telegram from A. C. Tyke, secretary of the Canadian Wholesale Grocers' Association, as follows: "The following formerly exempt are now subject to one and one-half per cent. sales tax, effective today: Flour and oatmeal in packages under forty-eight pounds each; rolled oats; canned goods of all kinds, including condensed and evaporated milk; coffee, cornstarch, cornmeal, dried and evaporated fruit, kilm, macaroni, vermicelli, maple products, rice, sago, tapioca salt starch, soup syrup, tea, jam, jellies, marmalade, yeast, smoked, pickled and dried meats. Regarding pot and pearl barley, fried beans, whole and split peas yet undecided. Will give ruling tomorrow. Cottole and crisco exempt."

For Sale By: DICKISON & TROY

used in a 5 per cent solution. It kills all kinds of vegetation.

Sodium arsenite is used at the rate of 2 pounds to 60 gallons of water. It is very poisonous and the powder is dangerous to health if inhaled. It kills all vegetation.

Carbolic acid is used in a solution of 12½ per cent or stronger.

Orchard heating oil is applied at full strength in a fine mist. It destroys all vegetation but is not poisonous and does not injure the soil.

Fuel oil can be used on waste ground or garden paths. After its use the soil remains sterile for a considerable period.

Of the various patent weed killers "Atlas A" was tested during the summer of 1920 on various weeds and gave good results.

### The Control of Swarming

Swarming is the natural method by which bees increase, but is a hindrance to the best results in honey production; especially is this true of comb honey production.

The uncertainty of swarming, the reduction of the honey crop through a division of the working force of the colony, the possibilities of losing swarms and the difficulty of controlling swarming without considerable labour, all make the control of swarming the biggest problem in bee management without considerable labour. Colonies do not all require the same treatment. Swarming may often be prevented by the following manipulations. The introduction of a young queen, giving ample room for brood rearing just previous to and during the early part of the clover flow. Providing plenty of super room for storage of honey. Giving adequate ventilation during the hot weather by raising the front of the hive on small blocks to enlarge the entrance. Raising a few combs of emerging brood from the brood next to a super to relieve congestion of the brood chamber. The destruction of queen cells before they are far advanced.

Colonies that have made advanced preparation for swarming and have capped cells or cells ready to cap over, will often require more drastic treatment.

The destruction of queen cells every nine or ten days requires too much labour and is not always effective.

In localities where the swarming season is short, the separation of queen and brood is usually effective.

### Through Rail Service To Pacific Coast

**Canadian National Railways Offer Most Direct Connections With Fast Through Trains From Montreal.**

The finest train service to the Pacific Coast is afforded by the Canadian National Grand Trunk "Continental Limited" now leaving at 9.00 p. m. daily from Bonaventure Station, Montreal.

The route of this finely equipped all steel train to the coast is via Ottawa, North Bay, Cochrane and via the Transcontinental to Winnipeg and by Grand Trunk Pacific to Saskatoon and Edmonton and via Canadian National Railways to Vancouver, the finest of scenic routes through the Rockies and over the smoothest roadbed.

From Maritime Province points there is connection by Ocean Limited with the Continental Limited daily and by the Maritime Express daily except Sunday. The Maritime arriving in Montreal at 7.40 p. m. affords the most direct connection, but passengers by the Ocean Limited still have the advantage of a day spent in Montreal. The Maritime arriving at Lewis at 1.50 p. m. affords connection with train No. 11 leaving Quebec daily for Cochrane at 5.00 p. m. This train makes connection at Cochrane with the Continental Limited, so it will be seen there is really a choice of two distinct routes.

There is also the through service to the Pacific coast by train leaving Toronto daily at 10.30 p. m. via Sudbury, Port Arthur, Fort William and Winnipeg. Connection for this is made by the Ocean Limited to Mon-

tréal and the Grand Trunk International Limited to Toronto.

Particulars of these splendid rail services to the coast will be explained by all C. N. ticket agents, and folders and illustrated matter may be obtained by application of any of the City Ticket Offices (or by writing the General Passenger Dept., Moncton, N. B.

### Campbellton Hotel Is Sold

It is understood that the St. Louis Hotel, Campbellton, has been disposed of by the proprietor, Mr. Isaac Boudreau. The purchaser is Mr. A. M. Thompson, former proprietor of the Carlyle Hotel, Woodstock, N. B. The purchase price is said to be in the vicinity of \$50,000, the transaction being negotiated by Mr. A. D. Holyoke, the organizer of the Central Trust Company.

### Mail Contract

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 24th June 1921 for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 3 times per week on the route Grainfield and Renous from the 1st October next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Grainfield and Renous, and at the office of the Post Office Inspector: Post Office Inspector's Office: St. John, N. B., May 7th, 1921. H. W. WOODS, Post Office Inspector.

### Time-Table S.S. "Alexandra" Season 1921

STEAMER "ALEXANDRA" WILL MAKE THE FOLLOWING TRIPS:

Leave Chatham each morning for Newcastle at 7.00 a.m. and return to Chatham leaving for down river points at 8.45 a.m. calling at Gordon's and Oak Point, on Monday, Wednesday, Friday and Saturday.

Loggieville daily.

Burnt Church, twice daily except Monday, Wednesday and Friday on return only.

Neguac daily.

Hardwick, Tuesday and Thursday.

Escuminac, Monday, Wednesday and Friday.

### Importance Of Early Cultivation In The Orchard

If a cover crop has been left over the winter in an orchard it should not, as a rule, be allowed to grow in the spring until there is a good crop to plough under, especially in districts where droughts occur, but the land should be ploughed as soon as it is dry enough to work, not waiting for the plants to grow up; thus much moisture which would otherwise be transpired by the leaves of the plants will be saved and the chance of suffering from drought lessened.

A good setting of fruit depends very much on an ample supply of moisture in the ground at blooming and setting time, and if there should be a drought after a heavy crop of clover or vetch has been ploughed under late in the spring, conditions will not be at all favourable.

After the land has been ploughed, it should be kept well harrowed during the early part of the season to conserve the moisture as it has been found that there is a rapid decrease of moisture unless the surface soil is kept loose. Early cultivation is desirable also because it is important to get the soil warmed up as soon as possible by letting the air in and so making conditions favourable for growth early in the season. The greater activity in growth there is in the early part of the season, the more likely is there to be a good set of fruit, especially on rather old trees where the flow of sap through the fruit spurs is not as free as in younger trees, and if there are drying winds and a drought there may not be sufficient moisture to hold the fruit on the trees. An application of nitrogen on some soils has been found very useful in promoting greater activity of growth in the early part of the season and so better ensuring a setting of fruit.

### ECZEMA Defied Doctors & Specialists

"For three years doctors treated me for a terrible attack of eczema," writes Madame Alphonse Lariviere, 671, Red, man St. Fall River, Mass. "Each in turn gave up the case as incurable. I then went to a specialist who charged \$20 but did me absolutely no good."

"Though one could hardly have been more discouraged at the time when I heard about Zam-Buk, I decided to try it. I applied dressings of the balm regularly and for bathing purposes used only Zam-Buk Medicinal Soap. Very soon there was such decided improvement that I was encouraged to continue. The combined use of Zam-Buk and Zam-Buk Soap soothed and thoroughly purified my skin of disease." Zam-Buk's SKIN-SOOTHING ESSENCES penetrate to the root of eczema, ulcers, ringworm, poisoned sores, etc. Zam-Buk not only clears away unsightly surface eruptions like pimples, blotches and rashes—it literally uproots eczema and other obstinate skin disease from the underlying tissues.  
 The first dressing of Zam-Buk soothes and cools the skin and ends irritation. Then when it has antiseptically purified the diseased parts, Zam-Buk promotes a new growth of clear healthy skin. All dealers 50c. box.

**Zam-Buk**  
 Skin Sufferers! Obtain a FREE TRIAL BOX by sending 1c. Stamp to Zam-Buk Co., Toronto.

### HOW YOU CAN TELL GENUINE ASPIRIN

Only Tablets with "Bayer Cross" are Aspirin—No others!

There is only one Aspirin, that marked with the "Bayer Cross"—all other tablets are only acid imitations. Genuine "Bayer Tablets of Aspirin" have been prescribed by physicians for nineteen years and proved safe by millions for Pain, Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis. Handy tin boxes of 12 tablets—also larger "Bayer" packages, can be had at any drug store. Made in Canada. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

### Civil Service Com. Not Fit to Make All Appointments

Ottawa, May 10—Alex. Johnston, Deputy Minister of Marine and Fisheries, was the third deputy head of a department to come before the special committee on the Spinney Bill amending the Civil Service Act, and urge that certain appointments be taken from under the jurisdiction of the Civil Service Commission. Mr. Johnston said his department could judge fitness of candidates for employment better than the commission. The operation of the present Civil Service Act had had a most demoralizing effect on his employees.

The unrest in the Civil Service might not be permanent but Mr. Johnston could not see the end in sight. "Could a union like Union 66 have been formed and could it have written impertinent letters to the Prime Minister with impunity under the old act?" asked General Griesbach.

"Well," said Mr. Johnston, "it was not formed under the old system." Mr. Johnston had not notified any serious overmanning of departments under the old system.

Classifications had produced an immense amount of unrest among all classes of civil servants.

Referring to delay in appointments Mr. Johnston said one man had been appointed by the commission six months after he died.

Hon. W. J. Roche, chairman of the commission, declared this was a fair tale. It was classification of the position and not appointment in this case.

Mr. Roche declared that delay in appeals by employees of the Marine and Fisheries Department was caused by the refusal of Mr. Johnston to appear on the board of hearing. When Mr. Johnston left the Department for a time his successor had gone before the board of hearing and the cases were disposed of.

Dr. R. H. Coulter, Deputy Postmaster-General, and R. R. Farrow, Deputy Minister of Customs, will be called when the committee meets at 8.30 o'clock tonight. Dr. Roche will also give evidence.

### Ergot In Grain

Ergot is very widely known because of its injurious effects upon animals that are fed with grain containing ergot or that graze upon badly infected grass. The ergot is a bluish black, horn-like body with a white interior, and is produced on infected plants of the grass family in the place where the seed would normally be found. They are found easily on the head of the growing plant because they are twice or three times the size of the seed.

Ergot is found principally on rye; also on many other grasses such as rye grass, blue joint, Kentucky blue grass, Canada blue grass, red top, timothy, wild rice and others. It occurs occasionally on wheat. The ergot is produced as the result of a fungus disease attacking the plant. When rye or other grasses are in flower, the very small pores or seeds of the fungus are blown on to the flowers, penetrating into them and causing the production of the ergot in place of seed. To complete the life history of the fungus, it lives over the winter in the ground, or in storage bins in the form of the black, horn-like body or ergot; in the spring the ergot in the ground, either left there all winter or sown with the grain that spring, sends up one or several outgrowths with a knob-like end; these produce an abundance of smaller bodies, which in turn bear the spores, spoken of above, which are blown by the wind and infect the flowers opening that summer.

The actual loss to the grain crop by this disease is slight but the serious effect on cattle eating the ergotted grain, the losses from hay having to be destroyed because of the presence of ergot in the grass, make the disease a serious one, and everyone should know the precautionary measures to adopt in order to get rid of it. The effect on animals is that they become thin and rough haired. Further symptoms are slow circulation in the extremities, gangrenous sores on the teats or mouth, and sloughing off of parts of the tail, ears or hoofs. Abortion may also follow as an additional effect.

The following are the best precautionary measures to adopt:—  
 1. Fields should be examined occasionally for the presence of ergot, and if large quantities are found the grass should not be used for hay or pasture.  
 2. Ergot may be lessened by cutting susceptible grasses about flowering time, so checking the spread of the

fungus.  
 3. Badly infested hay lands should be burned over.  
 4. If seed is found to contain ergot, it should be immersed in a 20% salt solution; the ergot floats up to the surface of the liquid and can be skimmed off.

## Local and General News.

### CADET CORPS

The Bugle Band of the Cadet Corps have been putting in some strenuous practise during the last week, and have had several marches.

### COMPLETED NEW LINE

The N. B. Telephone Co. completed a new copper circuit between Blackville and Newcastle on Thursday morning. A marked improvement on this line is noticeable.

### SUCCESSFUL CONCERT

The concert given in the Bule School house last Thursday evening was a decided success in every particular. A large number from town patronized the entertainment and the building was taxed to its capacity.

### NEW HOTEL FOR BATHURST

It is understood that a new hotel will shortly be under construction in Bathurst to replace the one destroyed by fire. It is said the new hotel will be a modern structure to cost in the vicinity of \$200,000. Plans are now being drafted.

### BIG LOBSTER CATCHES

Reports from the North Shore are to the effect that Lobster fishermen are having big catches. A Richibucto man says that the fishermen are getting so many lobsters and herring that they don't know what to do with them. Big shipments are being made to Boston.

### NEW COMPANY

The Royal Gazette contains notice of incorporation of Miramichi Lumber Company, Limited, with head office at Boiestown and capital stock of one million dollars. This company is given power to carry on a general lumbering business in the Province of New Brunswick.

### GUTTED BY FIRE

The residence of James Forrest was badly gutted by fire early Wednesday morning. The fire was discovered about 3 o'clock a. m. having started in the attic. The building is practically destroyed. Most of the furniture was saved; the loss is fairly well covered by insurance.

### WILL SHIP BY WATER

The Bathurst Lumber Company makes the announcement that they have chartered a vessel to carry from eighteen hundred to two thousand tons of pulp to Philadelphia. The vessel which is a sailing craft of the name of M. Vivian Pearce, will be there to load early next month.

### HOME FROM THE WOODS

"Uncle" Henry Braithwaite, the veteran guide has returned from a two month's trip to the Miramichi woods. He reports that the ice has gone out of the lakes but that there is still considerable snow in the mountain regions of the north. Mr. Braithwaite says that bears have emerged from their dens and it is his intention to return to the woods in a few days to try his hand at trapping them.

### LABOR MEETING

There was a very large attendance of workmen at the meeting held Tuesday afternoon at 3.00 o'clock in the Labor Hall, Nelson. John Wallace of Nelson, presided. The meeting was addressed by John A. Martin, M. L. A. Messrs Tighe, Varily, J. P. Manderson and John Wallace. There was a general discussion of labor conditions on the Miramichi but no action was taken with regard to same, as matters of this kind will have to be decided by the respective branches of the I. L. A.

### Catarrh

Catarrh is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the System, HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work.

All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Messrs. C. G. Couds and Alex. S. Gremiey were in St. John last Thursday and Friday attending a reunion of the Scottish Rite Masons.

J. D. B. F. MacKenzie, Worshipful Grand Master and Robert Logie of Chatham also attended the reunion.

### NEW RESTAURANT

Mr. L. Mather has opened up a Restaurant on McCullam Street, opposite Sevisky's store and will be pleased to cater to the wants of his patrons.

### DRIVE SAFE

The drive of lumber, which is being driven by Mr. Wallace Johnson, on the Little South West Miramichi River was reported yesterday to be at Dennis', and is now considered to be safe.

### DANCE AND BRIDGE

The Anglican Young People are holding an Informal Dance and Bridge in the Town Hall tonight. Dancing begins at 8.30 and music will be furnished by the Martin Duo. The chaperones are Mesdames, W. F. True man, H. H. Ritchie, David Ritchie, S. V. Sisson and Chas. Sargeant.

### CAMP AT NEWCASTLE

The 1st Bn. Northumberland Regt. has received orders to be ready to go into Camp at Newcastle from June 23 to July 1. The 12th Brigade C. F. A., will also be at Newcastle from June 20 to 25 and will afterwards complete training at Petawawa. The Northumberland Regt. will be at peace strength about 525 men.

### GOOD OPPORTUNITY

A sale of Fancy Work and Aprons, combined with a Home Cooking Sale, will be held by the Ladies' Aid of St. James' Church, on Saturday afternoon, May 21st, at 3.30 o'clock in St. James' Hall. This will be a good opportunity to secure week-end wants and a cordial invitation is extended to all.

### EGG LAYING CONTEST

Vye A. Gibson, of Moncton, has a total of 530 eggs for his pen of ten Puff Orphingtons, entered in the egg laying contest at the Dominion Experimental Station at Fredericton. The contest began November 1st last and continues for a year. D. Mersereau, Russiagornish, leads with a total of 956 eggs, for his Barred Rocks, W. E. B. Tait, of Dorchester, has a total of 769 for his Barred Rocks. H. McEwen, of Chatham, 566, C. M. Pearl, Havelock, 685, H. Williston, Newcastle, 655, and B. A. Snowball, Chatham, 787.

### A Fresh-water Seal.

The seal is a typical marine animal, and hence the occurrence of a species of phoca in Lake Baikal, which is of fresh water and has no connection with the sea, is of special interest. Dr. Charles Hose has obtained skins and skulls of two specimens of the Baikal seal, which have been offered to the Museum of Natural History, where the species have not hitherto been represented. It is the only seal which habitually lives in fresh water, though the common seal will often resort to estuaries, and even ascend rivers, as one did some time ago in the Trent, as far up as Hazleford, where it was shot. The Vikare seal, again common in the Arctic regions, and also found in the north of the Baltic, occurs in Lakes Ladoga and Onega. It is able, however, to reach these from the Baltic by means of the Rivers Neva and Svir. The Baikal seals, on the other hand, have no communication with the ocean. Their occurrences in Lake Baikal, along with abundant salmon, point to a change in the physical geography of the district. They suggest that in former times an arm of the sea stretched from the Arctic Ocean to the site of the present lake.—Family Herald.

### An Elephant's Teeth.

The elephant has what a dentist calls "magazine gun teeth" because of the curious fact that when the big pachyderm wears off a front tooth it is replaced by the one just behind it, the whole row moving up a tooth. It is said this takes place continually, so Jumbo always is guaranteed a set of teeth, no matter how many he wears out.

### HORSE DROPPED DEAD

A horse attached to a sloven, owned by Edward Dalton and driven by a MacDonald boy dropped dead on the Kings Highway Monday afternoon.

### COMMISSION HERE

The N. B. hydro commission were in town last week and had several meetings with the Town Council and Commercial Club regarding the use of hydro electric power here.

### MISSIONARY SERVICE

Rev. W. B. Williston of the China Inland Mission will speak in St. James' Church on Thursday evening 19th inst. at 8 o'clock. Mr. Newton and his choir will assist in the service and all are cordially invited to come and hear Mr. Williston's Message. Mr. Williston has had a great number of year's experience in China and his lecture will be of much interest.

### THE BAD BOY PROPOSITION

There are no bad boys. We make this statement confidently, knowing that it will be endorsed by educators and all who have spent their lives in working on the boy problem. We will defend it in spite of all the broken windows, stolen apples and canned dogs in Christendom.

There are weak boys, boys who lack resourcefulness, boys whose ideals of right and wrong are distorted, but there never was a boy who did not naturally—consciously or unconsciously—do things that he believed to be right.

The trouble comes when parents, teachers and others who are responsible for the youngster's development fail to fill his time with useful activity. The forces of nature must operate. We cannot stop them while we take our afternoon nap. The wind must blow, the water must flow, and the boy's brain and muscles must work.

We put a wind-mill in the path of the wind and it draws water as joyously as it upsets the chairs on the veranda and whisks the family wash from the line. We put a water-wheel in the stream and it grinds the grain with the energy which it could otherwise dissipate in washing out its banks and rooting out the trees.

These things we know; yet we too often permit youthful energy, our most valuable asset, to run riot. We even attempt to dam it and then complain because it slops over and does damage.

The Boy Scout program is the milk in the stream of boy-hood. It provides something useful for every boy to do every minute. Knot tying, first aid and bandaging, signalling, trailing and swimming, errand and saving money, hiking, map making and map reading, practical study of flowers, plants and trees, earth and sky, are included in the Scout's program for the year.

After these a much broader field is opened, including foundation work in all the principal trades and professions.

A boy's first idle moment is the startingpoint of whatever trouble he makes in the world. It is also the big opportunity of the man who is wise enough and patriotic enough to turn natural energy into constructive channels. Already over 700 Scoutmasters are directing the activities of some 28,000 boys in the Dominion of Canada and the movement is only a little more than ten years old.

### Cause of Early Old Age

The celebrated Dr. Michenoff, an authority on early old age, says that it is "caused by poisons generated in the intestine." When your stomach digests food properly it is absorbed without forming poisonous matter. Poisons bring on early old age and premature death. 15 to 30 drops of "Seigel's Syrup" after meals makes your digestion sound.

# Closing out Business May 28

We expect to get our business in Newcastle closed up on May 28th, and until that time there will be one long list of Bargains. Although we have sold out some lines of Goods we still have a large stock, but early buyers will get best selection.
