GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*
Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus:

Commercial Summary.

Merchants, Manufacturers and other business men should bear in mind that the "Journal of Commerce" will not accept advertisements through any agents not specially in its employ. Its circulation—extending to all parts of the Dominion—renders it the best advertising medium in Canada—equivalent to all others combined, while its rates do not include heavy commissions.

—It is now estimated that the new crop of French prunes will aggregate 900,000 boxes of 55 lbs. each. Some sellers are talking of 30 francs for September shipment, but others do not believe the market will go above 26 to 27 francs.

—SHIPMENTS of shellac from Calcutta during the first half of July were 3,000 cwt. to United Kingdom, 4,000 cwt. to United States and 400 cwt. to Continent.

—THE new Newfoundland tariff imposes duties of 5 cents a pound on sugar, 3 cents a pound on bacon and hams, 25 cents a barrel on flour, and has heavy duties on petroleum, tobacco, oats, hay and other necessities, most of which the people would get free if the island was part of Canada.

—EXPORTS of catch from Rangoon from January 1st to July 15th, amounted to 5,840 tons, against 7,080 during the corresponding period last year. This includes 1,140 tons shipped to America via Calcutta, against 820 tons last year.

—LATE mail reports note sales of camphor in the London market to the extent of 350 piculs China, August delivery, at 165s. This price is about 15s advance over what sales were made at a few weeks previous.

—THE long-continued drought has done harm to the crops in the parishes along the shores of the lower St. Lawrence. Hay has been a failure and in many localities grain and potatoes promise anything but well. The district of Quebec has, however, suffered much less from the drought than the country either to the east or west of it. The hay crop is a good average one and is all safely housed, and oats and potatoes promise well. The same remark applies to the Lake St. John and Saguenay countries.

Tents, Flags, Awnings, Camp Furniture, Horse Covers, Window Shades, Laces, Fringes, etc., Embroidered Piano Scarfs, Table Covers, Baby Carriage Robes, Eton Jackets, etc., etc.

LYMAN'S
FLUID
COFFEE

It is fragrant, delicious, and can be prepared in a moment.

It is Economical because there is no waste, as no more need be prepared at a time than is used. 2nd. It requires less sweetening than other coffee, as the bitter part is extracted during process of manufacture. 3rd. One cupful gives more satisfaction than two of any ordinary coffee.

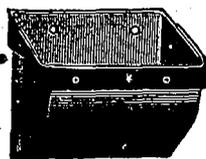

Buy a bottle from your druggist or grocer, and you will never want any other.

as asking an extension, a short time ago—G. Brouillette, manufacturer of shoes of this city, is trying to settle at 35 cents in the dollar, in cash—S. Charette & Co., general storekeeper, The Brook, Ont., is endeavoring to compromise at 50 cents in the dollar—Andrew Newton, an old Woodstock tailor has assigned. He seems to have fallen behind the times and his trade gradually left him until he could no longer keep afloat—E. A. Sentenne, men's furnishings of this city, has assigned with liabilities of \$1,100. He started two year's ago with limited means, and in a

—FIRST come, first served, is the motto of MacLean, Waldron & Co., Montreal.

very poor stand—Noe. Forget, general storekeeper of St. Lucie de Doncaster, has assigned owing \$2,000. He compromised at 25 cents in the dollar in August 1893, and since then it has always been a struggle with him.

—THE Insurance Company of North America has declared a semi-annual dividend of 6 per cent.; the Girard Fire and Marine will pay its usual 5 per cent. quarterly one; 3 per cent. semi-annual by the Union, of Philadelphia, is announced, and the Fire Association pays one of 10 per cent.

—THE Security Trust Company is the title of a new company recently organized under an old charter. The new enterprise starts off with a cash capital of \$500,000. Its promoters intend to do a life insurance business, but will confine their business entirely to the under-average class, it being in no sense a competitor of the regular life insurance companies.

REFERRING to indigo a London report says: "At auction 534 serons Guatemala were offered and the assortment was good; all descriptions were readily placed, ordinary red and good ordinary and good middling qualities suitable for Spanish and Italian markets showing much advance, dull, and mixed being in least demand; 40 serons were withdrawn and 94 bought in. Lobos good and fine sold at 4s 3d to 4s 5d, being 2d to 4d dearer; ordinary to middling, 3s 8d to 4s 1d, 4d to 6d higher. Cortes, good to fine, 4s to 4s 3d, 2d to 4d better; good ordinary to middling, 3s 8d to 4s 9d to 6d dearer; ordinary, 2s 9d to 3s 3d, 6d firmer; low to very ordinary, 1s 8d to 2s 6d, 3d to 6d higher.

FOR SALE in FLORIDA.

A FERTILE TRACT OF LAND of 20 to 25 acres between and partly covering the margins of Lakes Florida and Kludeer, lying within 1 1/4 miles of Interlachen on the Florida Southern Railroad, and about 17 miles due west of Palatka. Oranges, peaches, sweet potatoes, cotton and all sub-tropical fruits and plants are grown in the vicinity. An orange garden, neglected latterly owing to distance from owner, is on the place. Returns from a grove of 3 acres at Green Cove Springs, some 22 miles north east, show an aggregate of \$3,000 to \$5,000 a year. The lakes abound with fish. Climate remarkably healthy. Interlachen is a winter resort for many Northerners troubled with lung affections. Several Montreal people permanently reside there.

Journal of Commerce.

MONTREAL, FRIDAY, AUGUST 2ND, 1895.

CURRENT EVENTS.

It is now decided that when Lord Salisbury meets his Cabinet again he will have the moral support of a majority of 155 members. In fact he has gained the most remarkable Parliamentary victory of the past century, and it is therefore of interest to our business community to enquire why he did so. It is primarily because he

put forward no factional programme to an electorate already wearied of political surprises. He simply promised that his legislation should be firm, reasonable and sensible; and that it should do as little as possible towards disturbing the existing condition of things. He showed the electors that the bulk of the extremists, socialists and faddists were amongst his opponents, and he asked them to assist him in reducing them to a condition of innocuous desuetude. Their reply was a complete endorsement of his views. The support afforded to him came from all classes. Everyone, from the working man to the peer, felt that the time had come to call a halt to the threatened socialistic interference by legislation in their own personal liberty. The labor candidates were defeated as thoroughly as the more aristocratic of their associates, and the wave of reaction in favor of a policy of common-sense and non-interference with existing industrial and business conditions did not cease until it had engulfed almost the entire Liberal party. Englishmen are not yet prepared for a paternal government, and resent class legislation promptly. The middle classes more especially feel that it is time that political attention was directed to needed reforms in England, which they think will be carried out more thoroughly by the party now in power. Mercantile interests viewed the vacillating foreign policy of Lord Rosebery with alarm, as weakening England's prestige in the East and thus endangering her commercial supremacy, and the financial classes were irritated at the supineness with which he permitted Russia to interfere in the matter of the Chinese loan. The local veto law alienated the working classes, and as a result an overwhelming majority of the electorate decided that it was time that a change should be made.

The insurrection in Cuba is now becoming a direct menace to commerce. The insurgents have forbidden the grinding of sugar-cane, even if it is raised, and have stopped the curing of tobacco. One of their manifestoes forbids the shipment of all products from plantations to any city under Spanish control. It forbids the grinding of any cane, either this or next crop, under penalty of the burning of the cane fields and plantation buildings, and what is more convincing, it says any planter going contrary to this edict will be considered a traitor to the Cuban cause and if caught will be tried by court martial and executed if found guilty. Under these circumstances planters are leaving their cane unground, and field work for next season is virtually abandoned. The cane, now left to nature, will grow with the weeds, and will, of course, contain some sugar. But how much will be valuable in a commercial sense remains to be seen. In the meantime the unpaid workmen and field hands are joining the insurgents as their only means of getting a livelihood. Some of them have been formed into guerilla crops at the expense of the Havana merchants and cigar manufacturers; but the bulk are going to join the insurgents simply because they cannot remain on the abandoned plantations without money and exposed to the cruelty of both opposing armies. They are simply driven by force of circumstances into a lawless life. This will naturally affect next year's supply of sugar from Cuba; but as this year's was exceptionally large (the figures showing 1,008,000 tons visible crop with receipts not yet ended) its effect on the world's markets is still only trifling.

ASSESSMENT SYSTEM.

MUTUAL PRINCIPLE

Mutual Reserve Fund Life Association

E. B. HARPER, Founder.

Home Office, cor. Broadway and Duane St., New York.

40 MILLION DOLLARS SAVED IN PREMIUMS 40

The total cost for the past 14 years for \$10,000 insurance in the Mutual Reserve amounts to less than Old System Companies charge for \$4,000 at ordinary life rates—the saving in premiums being equal to a cash dividend of nearly 60 per cent.

1881. THE ELOQUENCE OF RESULTS, 1895

No. of Policies in Force, over.....	98,000
Interest Income, annually, exceeds.....	\$ 135,000
Bi-Monthly Income exceeds.....	800,000
Reserve Emergency Fund, exceeds.....	\$3,923,000
Death Claims Paid, over.....	22,000,000
New Business received in 1894, over.....	\$1,000,000
Insurance in Force exceeds.....	300,000,000

*Not a single dollar of the accumulated or invested Reserve Fund has ever been used or required either for the payment of death losses or for any other purpose.

AGENTS WANTED.

The trouble in the Philippine Islands is another factor in the sugar situation. The large supplies of crude jaggery sugar coming from those islands may possibly be seriously lessened by the revolt of the natives against the merciless tyranny of the Spanish rule. All this points to a firmer tone in the future of the sugar market; but no immediate effects will likely be felt owing to the large stocks on hand at most distributing points.

Grand Master Sovereign, of the Knights of Labor, has issued a manifesto to his own organization, the farmers alliance, the people's party, and the other kindred faddist clubs, calling upon them to institute a general boycott on all national bank bills in dealings between individuals. He does not state, however, whether he will refuse the salary he receives as a professional agitator in case it is tendered to him in the objectionable currency. Of course, the absurdity of the thing is apparent on its face. It is true that national bank notes, as between individuals, are not legal tender and can be refused, if offered by one individual to another, without impairing the validity of the debt. At the same time, in case a national bank note should be declined by a creditor, the debtor has only to present it to the Treasury for redemption, when a legal tender will be issued which the creditor will be obliged to accept. It will be seen, therefore, that the boycott of the national bank note can only have a temporary effect. It is not likely, then, that working men will take the useless and profitless step of endeavoring to compel their employers to pay them only in legal tenders or metal, simply at the behest of such an irresponsible individual as Grand Master Sovereign who merely has a nominal control of a moribund order like the Knights of Labor. Mr. Sovereign had better take to heart the lesson afforded to him by the fate of Eugene V. Debs, who only one year ago tied up all railroad operations in Chicago, ordered 100,000 men to become idle, and forced 22 railroads to cease traffic. To-day Mr. Debs is in jail. The quasi-dictator has fought his case through every court in the United States with the result that the cause of law and order has been finally and definitely upheld.

The prompt and vigorous action of President Cleveland in sending Federal troops into the state to repress the wanton destruction of property, regardless of the protests of a socialistic Governor, has been endorsed by the highest judicial authority in the land, and the lesson has been inculcated that the means of redressing wrong are through the Courts and the ballot-box, and that no wrong, whether real or fancied, carries with it any legal warrant to invite as a means of redress the co-operation of a mob with its accompanying acts of violence or the institution of ridiculous and annoying boycotts.

The examination of the vast and hitherto unknown territory of Labrador is to be followed by an equally thorough investigation of that immense tract of country which lies between the Height of Land at the head waters of the Ottawa, and James Bay, and which has an area computed at 35,000 square miles. Although climatic conditions, as in the case of Labrador, prevent as yet its actual settlement, there are lumbering and mineral possibilities which only a thorough survey can disclose, and which might render it remunerative to capital. It is to be hoped, therefore, that its exploitation will be a thorough one, and that more especially its resources in the shape of merchantable timber will be accurately ascertained. Canada needs all her sources of wealth, and it is possible that their number may be added to by the intended explorations, in which case the expenditure on the projected survey will be more than amply repaid.

The statement of the foreign commerce of the United States during the fiscal year which ended on the 30th of last June shows that while the imports of merchandise increased, roughly, 89 millions of dollars, the exports fell off 84 millions. The result was that the trade balance in favor of the United States was only 64 million dollars during the past year, as against 237 million dollars in the year preceding. To this balance of \$64,316,570 must be added \$36,707,684 net excess of silver exports, and \$30,984,449, net excess of gold, making \$133,008,703 in all; but this total would have been largely reduced had not the government's arrangement with the bond syndicate checked the outflow of gold. The cause of this reduction is, of course, the number of disturbing conditions which checked trade during the early months of 1894. The changes in the tariff, the uncertainty as to the maintainance of gold payments up to the time of the making of the contract for the purchase of gold and sale of bonds with the Belmont-Morgan-Rothschild syndicate, and the low prices ruling for all articles and commodities, were important factors in reducing the trade balance; but it is to be hoped that the recovery brought about by the marked revival of business and the extension in every line of trade will soon bring the figures back to their normal proportions and that the results of the fiscal year of 1895 may show that the mercantile prosperity of our neighbors has once more regained its usual level.

||—THE total number of failures recorded in England during the first half of 1895 was 4,834 (2,570 bankruptcies and 2,264 deeds of arrangement), as against 6,306 in the first half of 1894. This seems to show a steady improvement in trade, and particularly so in the retail branches, where the failures this year were 4,088, as compared with 4,756 in the first six months of last year

A DEFECTIVE CLAUSE IN THE BANK ACT.

It is evident from the 86th clause of "The Bank Act" of 1890, that a supervisory power is given to the Minister of Finance and the Receiver General, over all the chartered banks, as, under that clause they "may call for special returns from any bank, whenever in his judgment, they are necessary to afford a full and complete knowledge of its condition." It is also provided that, "every bank which neglects to make and send in any such special return within thirty days from the date of the demand therefor by the Minister of Finance and Receiver General, shall incur a penalty of \$500 for each and every day such neglect continues."

The size of the penalty, \$500 per day, is quite enough to prove that what is intended is not some mere statement of the details in one or more of the items in the Monthly Return, or Annual Report, but an explanation of the position of the Bank in regard to its stability. This must be the intent of the clause, as the ordinary Monthly Return of a bank gives, presumably, "a full and complete knowledge of its condition." If then such return is a *bona fide* one, a banker, being asked for a special return, might very justly send the Finance Minister a copy of it with his compliments as being a complete, accurate and full statement of the bank's condition. The term "*Special Returns*" from any bank implies then, we submit, an explanatory statement of such bank's general condition,—not the details of any specific item. The size of the penalty seems also to imply that a banker might withhold such statement were there no such severe penalty imposed for negligence or unwillingness. In the case where a banker has nothing to be ashamed of, or whenever he is conscious that his monthly return is not open to adverse criticism, he would need no threat of being fined \$500 a day for withholding information from the Minister of Finance, to induce him to furnish whatever explanation that official desired.

What, then, is the probable nature of such an official enquiry? and what points would such "*Special Returns*" be most likely expected to elucidate? We have reason to believe, apart from the logical inference to be drawn from it, that the above clause is intended to give the Finance Minister the power to call for an explanation of a bank having allowed its available assets to run down to such a small amount as to put its creditors in peril, and thus to endanger public confidence in other banks. The proposal to compel the banks to hold a given percentage of cash reserves was not made a part of the Bank Act, and it seems to us that this clause was inserted to give the Finance Minister, as we have said, a supervisory power over the banks, so that when, in his judgment, any one of them was steering into a dangerous channel he could demand attention to his cautions and counsels.

The clause only gives permission, unfortunately, to the Finance Minister to call for "*Special Returns*;" it says he "*may call*" for them. It imposes no obligation upon him to examine the *Monthly Returns*; he is thus relieved from the responsibility of acting on what judgment he may form as to what the figures of any bank indicate. Had this duty been imposed on the Minister of Finance or on his deputy, the Banque du Peuple would long ago have been asked to explain what the management meant by such a reckless disregard of ordinary prudence in keeping their available assets so

low as has been done. A protest and caution from the Finance Minister would have awakened La Banque du Peuple to the dangerous course it was pursuing. Such intervention was contemplated by clause 86 of "The Bank Act"; and it is much to be regretted it was made nugatory by being so loosely worded. It has been strongly contended that bankers in Canada do not need any outside control, or any form of inspection except by their own officers—that their own good sense is their best protection. As a general rule this is so, but the suspended bank shows that "good sense" is at times not possessed by *all* bankers, and to provide for such a case it is desirable for this latest example of folly to be pointed out and checked by some outside authority.

THE OUTLOOK FOR SILKS.

It seems tolerably certain that the demand for silks will be heavy this fall and winter. The low prices ruling have brought this class of goods within the reach of people who have hitherto considered them as too expensive for their wear, and the continued call for blouses has accentuated the enquiry. At present silks are decidedly cheap; but how long they will remain so is yet to be seen. The raw material is hardening in value and the advance in the prices of dyeing and throwing is said to amount to at least 25 cents per pound. Under these circumstances the buyer can purchase freely to-day in the full security that the price is low enough to assure him that his selections will not depreciate in value during the time they are on his shelves, and that, under existing circumstances, any alteration in prices must certainly be higher.

Already both Swiss and French makers are well contracted ahead. In fact some long-headed buyers have already placed orders for next spring's goods in the way of fancy taffetas in order to secure prompt delivery. To so great an extent has this practice prevailed that manufacturers in many districts will not guarantee deliveries of spring goods before April or May and others prefer to book only fall orders at present. As to fall styles it is difficult to say what will rule; since such a diversity of styles is offered and prices are so low in all lines in comparison to cost. Besides one is never sure how the new colorings will take. Colors will certainly be brighter and more daring, and combinations that are almost loud are seen in fancy taffetas. It is true that few new shades are shown; but some of the new combinations are unusually pretty and striking. In staple lines satin duchesse, peau de soie, brocades in bewildering variety, gros grains, and damasses, are considered good stock to carry. Then silks for combination with woollen fabrics of more subdued tone are always good purchases, especially the plain glaces and changeable effects which are to continue in vogue for the coming season. Figured taffetas are also well picked up by buyers. Woven figured effects are preferred by the trade to printed, and are shown in much larger variety. In fact Swiss manufacturers (who produce most of this class of goods) have already booked heavy orders for next spring's styles besides their fall contracts with the American market. Fancy stripes, satin stripes, and chine effects overlaid with a small flower or design in contrasting colorings are also much in favor. One of the genuine novelties in the market is the so-called "chameleon" silk. This is a peau-de-soie which shows various colors according to

the light in which it is seen. Of course cheap imitations, made with a double warp and a single filling and which are really only changeable silks, are already in the market; but only the genuine chameleons will sell to the better class trade, and as they come in the full range of colors, and are shown in cashmere effects, plaids, lace designs, and brocade figures, buyers have a wide range to select from.

Brocaded patterns are noticeable for the bolder design of the flowers. Roses, asters, and chrysanthemums in deep navy, garnet, and dark myrtle on self-colored grounds are leading styles, and are expected to sell well. Plaids are a more dubious venture. But they are shown in a great variety of lines, and sell well with the commoner class of trade both in town and country. For fall wear armures in combinations of two or more colors will be good sellers, and there is a steady undercurrent of demand for striped effects. The new stripes are often broken or overlaid by lace patterns or floral designs and are modified in many other ways until they are really very pretty and novel. In colors there is nothing new. Probably the lighter shades of green may be fashionable later on; but at present the heliotropes and cornflower blues of last season still rule in the lighter colors, with black, and black and white in combination, always as good as wheat.

BRITISH BOARD OF TRADE RETURNS.

The British Board of Trade returns for the first half of the present year show that the improvement in every branch of industry and commerce has been steadily maintained; for it has to be remembered that, with the important exception of wheat, prices are still considerably below what they were in June, 1894, and hence that although the figures may be only equal in value, they indicate a much larger proportion of trade. Taking, then, first the imports for the six months we find that they amounted to £203,663,300, which is a reduction of £7,341,700 or 3.5 per cent. Yet the amount of each article imported was considerably larger, although their mercantile value had decreased owing to the general lowering of values. Live stock shipments from this continent, it is true, fell from 236,902 head in the first six months of 1894 to 174,667 head in 1895. On the other hand the value of frozen meat imported from Australia rose to \$8,433,000 for the six months and bids fair to go still higher, now that the new method of thawing the meat gradually and thus retaining the flavour is being more generally adopted.

Separating the articles in which Canada is interested we find that the imports of live cattle into Great Britain during the six months amounted in value to £3,861,000, and those of dead meat to £11,394,000; a comparison which is interesting. Dried and salt fish to the extent of £1,097,000 were imported, and these came largely from Newfoundland. Of butter the British isles took £7,243,861 worth in the genuine article; but it is also significant that £1,228,355 worth of oleomargarine and artificial butter were imported in the six months under review. Of cheese the imports amounted to £1,790,041, and of eggs to £1,860,410. Both of these show decreases; but in both instances the declines are due to depreciation in values and not to any decrease in the volume of importation. Wheat shows an increase of 54,756,000 bushels in quantity and

£1,668,800 in value, representing percentages of 21.3 and 18.5 per cent. respectively, while the imports of corn have declined 6,987,293 cwts. in volume and £1,225,000 in value.

In metals the imports fall heavily under those of the corresponding period of 1894, the increased imports of May and June not having overcome the falling off during the previous four months. In the raw material for textiles the shrinkage in total values is mainly due to lower prices. For instance the imports of cotton were 1,654,000 lbs., or 13.8 per cent. more in quantity; but in value they were worth £2,015,000 or 10.1 per cent. less than the importations for 1894. Jute shows an increase of 16.4 per cent., in quantity and a falling off of 17.4 per cent. in value. Wool imports reached 27,000,000 lbs. more than in the previous year, but the total value was 2.1 per cent. less. Rubber increased $2\frac{1}{2}$ per cent. in quantity and 5 per cent. in value; while lumber fell off $27\frac{1}{2}$ per cent. in value, and $26\frac{1}{2}$ per cent. in volume, owing to the heavy stocks which had accumulated at the close of last year.

Looking at the figures, then, in the aggregate, they show a fair percentage of improvement in the past as well as a satisfactory proportion of promise for the future. England is buying just as much as ever she was, only, unfortunately, our own share of the trade is not as large as it ought to be. In cheese alone we hold our own. In butter, eggs and bacon, Denmark is a formidable rival, and New Zealand is coming to the front as a dangerous competitor. Australian refrigerator carried meats compete with Canadian cattle with discouraging effect. Sweden and Norway are steadily securing the lumber trade of Great Britain and forcing us to confine our attention more and more to the markets of this continent. In fact we are not holding our own abroad as we ought to do. In face of improving markets in Britain our proportion of her trade is no larger. It may be that with the growing requirements of Canada the local markets are now the most profitable ones and that we have the market of sixty millions of people to the south of us to absorb any surplus. But the fact remains that our export trade to Britain is not increasing, and that, what we do have, shows only the barest margin of profit at the best.

AMERICAN CROP OUTLOOK.

Advices from the United States say that the reports on the wheat outlook are so irregular, and in some instances so conflicting, that satisfactory conclusions are difficult to reach. It is plain, however, that the later returns of threshing are more disappointing than otherwise in both yield and quality—more notably in the latter characteristic. No essential lowering of the aggregate figures for the winter wheat crop, however, seemed to be called for by information yet available. In many sections of Missouri, and to some extent elsewhere, there has been so much moisture that the proper handling of grain has been interfered with, and it is more or less damaged in the shock. Much of the grain already threshed and being offered to millers is ill-conditioned and of inferior quality. The offerings of winter wheat continue small for the time of year, and the prevailing information is to the effect that a widespread determination to hold the grain for higher prices exists among the farmers, to an extent more than usual. From the Northwest are many reports somewhat sensational, concerning damage to the wheat crop, but much of the information may be received with allowance for exaggeration. That the indications have been somewhat impaired appears probable, and estimates may be

moderately lowered. But that there remains as yet a promise for the spring crop as a whole of larger proportions than last year may be considered beyond doubt. The outcome of the oats crop continues to be well spoken of in the main, but there are instances of unfavorable effects from moisture and injury of quality. The general promise of the corn crop is well maintained, and much of the area has reached a point assuring good results, but good weather is still essential to carry the crop through favorably in a larger proportion of the area, some of which, especially in the central regions, are now urgently in need of moisture. Recent rains have improved grass lands materially in many localities of the west.

HOW TO TREAT A BURGLAR.

Owing to the number of burglaries now being committed the following hints as to the legal status of a householder suddenly confronted with one of those unpleasant intruders may be useful. In the first place if a man finds a burglar breaking into his house, or into a house he is occupying, he is not at liberty to shoot the burglar, unless that is necessary in order to prevent a completion of the burglary. He may, however, arrest the burglar, and if shooting is absolutely necessary in order to make the arrest he may shoot. If a burglar has broken into a house in the night-time the occupant may ordinarily shoot him. He may do so if he has good reason to suppose (and the cases are rare in which he has not) that an attempt to eject the burglar would put his own life in jeopardy. If a burglar has desisted from his attempt and is running away, the occupant of the house, or any other citizen, may arrest him and deliver him over to the authorities. In making the arrest he must not use any more force than is necessary, but so much he may use, however great it may be. If a citizen thinks a burglary is being committed in a neighbor's house his chief difficulty is in making certain of his facts. If it should turn out that the supposed burglar is not such, but was rightfully in the building, anyone who had attacked him might be called upon to answer for it. But this much is certain, that any citizen has a right to prevent the commission of a burglary or other felony anywhere, and to use all the force necessary to this end. Any citizen has also a right to pursue and arrest a burglar or other felon, and to use such force as may be necessary for this purpose. If a felony has in fact been committed or attempted, and if the person whom the citizen undertakes to arrest was guilty of it, then a reasonable discretion will be allowed the citizen in determining the amount of force which it is necessary to use. The jury will naturally be well disposed towards the accused, and even the law will look as leniently as possible upon any mistake he may have made in the use of a wise discretion. The Court of Appeals has stated the principle thus: "Without undertaking to define the boundary line which separates the lawful and authorized from the unauthorized and illegal acts of individuals in the protection of property, the prevention of crime and the arrest of offenders, it is enough that the law will not be astute in searching for such a line of demarcation as will take the innocent citizen, whose property and person are in danger, from the protection of the law and place his life at the mercy and discretion of the admitted felon. They will not be made to change places upon any doubtful or uncertain state of facts."

A CINCHONA COMBINE.

It is stated that an accredited agent of German and British quinine manufacturers has made proposals to all the cinchona planters in Java to make a contract for the purchase of their bark for a period of five years. The manufacturers propose to pay a fixed price of six cents per unit per half kilo. of bark, and, in addition to that, to allow the planters one-half of the profits on all sales of sulphate of quinine above 28 cents per ounce. The Java cinchona planters on their part would have to agree, severally and jointly, not to supply more than one-half of 235,000 kilos. of quinine in the bark, that figure

being estimated as the total annual consumption of the world. This would reduce the shipments of bark from Java to about one-half of their present quantity, the total exports from the island in 1894 having been equal to 211,750 kilos. of sulphate of quinine. Under the arrangement the German and English manufacturers together would monopolize the whole of the bark-supplies in Java, consequently the American and French markets would have to depend upon the supplies from British India, Ceylon, South America and Africa, and it would follow that acceptance of the proposed agreement by the Java people would lead to an immediate advance in the price of quinine. But it is more than improbable that any such combination could be arrived at. For one thing the planters are too unreliable. About three years ago, when a similar plan was proposed by leading merchants in Batavia, about one-half of the planters agreed to limit their shipments for a year to three-quarters of their estimated possible output. Very few of those who had agreed to do so, however, kept their promise, and the experiment ended in total failure. There is, therefore, every prospect that the present "corner" may be equally disastrous; more especially as the price offered is a small one.

FOREIGN GRAIN CROPS.

Advices from European sources as to the condition of crops all point to improved prospects for the coming harvest. In France there have been severe storms which have "laid" the wheat in some districts, but generally speaking the reports are very favorable, and it now seems likely that the crop may at least reach an average of, say 38,000,000 qrs., against nearly 43,000,000 qrs. last year. If this prove correct, France would have to import about 5,000,000 qrs. in the forthcoming season. In Germany the weather has been hot and forcing in most parts of the country, giving hopes of an earlier harvest than at one time seemed likely. The estimates as to the yield are rather varied; in the east the crops, especially of rye, appear to have suffered seriously, but in other parts of the country good crops of wheat, barley and oats are expected, but relatively poor of rye. In Austria wheat and rye cutting will commence in a few days; the prospective yield is a good one, and hay also is a good crop. In Hungary the wheat crop may after all nearly reach last year's figure but rye and barley will be decidedly smaller than last year. The latest official estimates give the probable wheat crop at 18,000,000 qrs., or equal to last year; rye 1 1/2 million qrs. less; barley 1 million quarters less and oats 500,000 qrs. less than last year. In Roumania the outlook for the wheat, rye and maize crops is described excellent. From Russia the crop reports are somewhat varied in character. Reliable reports, however, state that the hard wheat crop has suffered rather seriously. Generally speaking the weather had been favorable, except in the east and central provinces, where it would appear the outlook for the crops is least favorable. On the whole advices point to a better wheat crop than had been expected some weeks ago, but the yield will probably be decidedly below last year's abnormally good crop. Rye is very various, and also will be much below last year's enormous yield. In Italy harvest has commenced, and wheat is expected to give at least an average crop. The latest advices from Argentina report a favorable change in the weather and state that the sowing season for wheat and linseed was excellent.

GRAND TRUNK RAILWAY COMPANY.

Return of traffic week ending July 27, 1895:

	1895.	1894.
Passenger Train Earnings.....	150,265	147,813
Freight do. do.	185,955	180,680
Total do. do.	\$336,220	\$328,493
Increase 1895, \$7,827,		

THE KIEL CANAL.

The trade papers do not speak in favorable terms of the commercial value of the Kiel canal. The charge of 60 pfennings for each additional ton falls very heavily upon the small coasting vessels, which are those that would be most likely to require the canal. A steamer of 500 tons would pay \$75, and a steamer three times as large would pay \$180. It is complained in the first place that this is unjust to the smaller steamer, and in the second place that there is not much profit at these rates in using the canal. A steamer of 1,000 tons from Hamburg would find it a little cheaper to go around Denmark than to go through the canal; and from many other ports the disproportionate expense of going through the canal would be even greater. Besides, these are summer rates; winter rates are to be raised 25 per cent., and there is a question whether it will be possible to keep the canal free of ice in the winter.

THE POPULATION OF BRITAIN.

The total increase in the population of the British isles in the four years since the census of 1891 is somewhat over nine hundred thousand. The population in 1891 was 38,008,164; now it is 38,936,270. Inasmuch as the number of inhabitants of Ireland has decreased by nearly 200,000 in the period, the increase for England Scotland and Wales is more notable than appears on the surface. At this rate of increase, the population of Great Britain grows, proportionately, as rapidly as that of Canada, which is remarkable in view of the gain of Canada by immigration. The following are the detailed figures:

	1891.	1895.
England and Wales.....	33,363,414	34,423,288
Scotland.....	4,025,647	4,142,472
Ireland.....	4,704,750	4,522,882

A COCK-AND-BULL STORY.

Now is the time—news being scarce—when cock-and-bull, and fish and snake stories find their way into print. One of the latest of the former genus concerns reported attempts to fire certain buildings in Montreal and Toronto. It is claimed that certain large destructive fires were incendiary and that substantial evidence of this is forthcoming, the confessor being a principal party concerned in a recent fire in this city. The story goes that, driven to bay by demands for money settlements under alleged prearranged agreement, the said principal made a clean breast of the whole affair, including his own complicity in it. The alleged fire-bugs are said to have similar compacts in other places and great is the rejoicing in an office on St. James street, said to have received the confidences of the absent wholesaler.

How a man with a particle of sense could enter into such a compact with two or three rogues surpasses imagination; but knavery is proverbially shortsighted, and it may be that a man here and there, worried out of his common-sense by a series of misfortunes, may yield to the persuasions of dishonest men, and put himself in their power forever after. Perhaps it finds a parallel in the Faust of Goethe, but "He who sups with the devil should have a long spoon." Whatever the examination of Haynes (Boyd's bookkeeper) may elicit, it is not likely to show that the astute dealer put his head into so plain a noose.

A CHEAP FILTER.

A cheap and most efficient filter may be made by taking a very large, common garden flower-pot; over the hole in the bottom place a piece of sponge, on which put a layer of small stones; fill the pot two-thirds of the way up with a mixture of one part coarsely-powdered, freshly-burned charcoal, and two parts well-washed, clear, sharp sand; on the top lay a piece of thick flannel, which is to be pressed down in the centre, but tied securely over the rim. The flannel will form a basin into which the water to be filtered is poured, when it will be found to flow out rapidly and perfectly clear; the flannel should be frequently washed, and the sand and charcoal changed every three months. The action of this filter is superior to many of those sold at high prices, and it possesses the great recommendation of being easily cleaned.

THE BREWERIES OF THE WORLD.

The following table shows the number of breweries in different countries, and the quantity of beer produced :-

Countries.	Year.	Number of Public Breweries.	Beer produced, in Gallons.
North America—			
United States.....	1893	1,248	1,245,281,444
Canada	1893	125	17,175,356
		1,373	1,262,456,800
Europe—			
United Kingdom.....	1893	12,065	1,145,321,504
Germany	1891	25,241	1,159,897,992
Austria-Hungary.....	"	1,871	331,753,510
Belgium.....	"	2,892	220,000,000
France.....	"	2,761	208,476,026

ANNUAL CONSUMPTION OF BEER PER HEAD.

The average annual consumption of malt liquors per head in various countries may be set down as follows, the figures being generally calculated over a series of years, but no allowance is made for children and non-drinkers :-

Europe.	Gallons.
United Kingdom.....	28.74
Germany	19.88
Holland	19.05
Switzerland.....	8.15
Austria-Hungary.....	6.83
France.....	4.58
Sweden.....	2.52
North America.	
United States.....	16.08
Canada.....	3.51
Australasia.	
South Australia.....	20.04
Victoria	19.86
New South Wales.....	11.94
Queensland.....	10.23
Tasmania.....	10.02
New Zealand.....	7.06

—Mineral Water Journal.

NEW WAREHOUSES AND FACTORY.

McCaskill, Dougall & Co., varnish and japan manufacturers, Montreal, have just completed the building of their new warehouses and factory situated on the block of land bounded by Manufacturers, D'Argenson and St. Patrick streets, Canal Bank. The buildings are of the most modern design and of substantial character throughout, the walls being of double construction and hollow, with collars cement-floored, and containing large heating apparatus enclosed in fire-proof casing, supplying absolute uniformity of temperature throughout the settling and ripening departments, etc.

The tank and oil rooms, adjoining the storage and shipping warehouse are fitted with suction and force pumps from the factory, and are all fire-proof; the ceilings are covered with metallic lath, and the Royal Cement plaster, while the light is obtained from iron sky-lights, each ten by five feet, glazed with heavy rolled plate glass. No side lights exist.

The floor is of the firmest concrete and Portland cement, and the doors are all sheeted with metal.

The oil house adjoins the varnish tank house, and is of similar construction, entirely cut off by heavy iron sheeted doors.

In rear of the above building, facing on St. Patrick street, is the boiling and fusing house, built under the superintendence of an expert from London, Eng., and equipped with all the latest improvements and methods of construction for manufacturing the finest qualities of varnishes and Japans, rectifying, refining and boiling linseed oils, etc., the expensive plant for the above being imported expressly from England.

The buildings are electric-lighted throughout, and contain laboratories and testing apartments for ensuring absolute uniformity of products.

There is no manufactory in the world more completely furnished and equipped for the production of high-class varnishes and all appertaining to the same than the above-mentioned new works of McCaskill, Dougall & Co.

BAY OF QUINTE NOTES.

At Kingston Cheese Board the prices fell last Saturday to 7½c.—The burnt district in Tweed will be rebuilt.—H. P. Abrams, hotel keeper, Verona, has assigned.—The water in Kingston harbour is 27 inches lower than it was at this time last year.—Mrs. Dey's residence at Harrowsmith was partially destroyed by fire last week.—A large number of pea harvesters have been sold in Prince Edward this year.—Mr. Stearne, Kingston, has this season paid \$20,000 to a resident of Pembroke for fur skins.—Stover & Bicknell, Camden East, shipped over 12,000 lbs. of fleece wool to the United States market.—The Irondale Railway is approaching Bancroft. The trade of North Hastings will be diverted to Lindsay and Toronto.—Thomas Grahams, Tweed, has sold his livery business to James A. Armour, Campbellford, and Andrew Orr, Hastings.—At Belleville, on Tuesday, there were boarded 2650 boxes of white and 540 boxes of colored cheese at 7¼ to 7½c.—An expert is at Verona drilling for oil and he says he is confident that oil in paying quantities will be struck at that point.—Large shipments of pigs are being made from Harrowsmith and other stations along the Bay of Quinte Railway.—A frame house occupied by John Bowen, on the Kingston Road near Belleville, was destroyed by fire last Saturday evening. Insured for \$500.—Building operations continue very brisk in Belleville.—Kingston water rates are to be reduced fifteen per cent.—On Friday, the barn of Asa Pixley, Longbois' was burned and his drive house injured. The property was insured for \$1,000.—Mr. C. E. Bartlett, Napanee, shipped a car load of sheep to Montreal, on Tuesday.—Mr. John G. Fennell, has bought out the hardware business of Mr. Thomas Johnston, Napanee, and will carry it on in the old stand.

—The report of the U. S. Geological Survey shows that during the calendar year of 1894 the copper mining industry resisted the tension of the year better than other branches of trade, both in base and precious metals. The export of copper was not so large as in 1893, but it was almost entirely in the form of refined product, the American producers having finally attained the aim of working at home all the furnace material of domestic origin. The product of American ores aggregated 360,844,218 pounds, against 337,416,848 pounds in 1893. The report says there were no notable discoveries of new deposits in 1894 and no indications of a sudden addition of consequence to producing capacities. There was, however, steady development in spite of adverse conditions, and unless the output is artificially restricted or reduced by accidents the production of 1895 promises to record a further advance under more favorable auspices commercially. The Lake Superior country outranks all others in productions and is followed by Montana and Arizona, these three localities yielding nine-tenths of the copper of the United States. The world's supply of copper in 1894 was 319,391 long tons, of which North America supplied 175,200 tons, and the United States continues to be the heaviest contributor to the English market.

—The second experimental shipment of California fruit to England did not result as well as the first. It is reported that pears brought \$2 less per box and a proportionate decline on plums. The former brought \$3.05 to \$3.08 per box, and plums and prunes from \$1.85 to \$2.20 per box, but even at these prices, after the freight charges are deducted, there is a profit in these shipments. The reason ascribed for the high prices at the first sale was the fact that the pear crop of France is small this year and the first shipment naturally brought higher prices than the succeeding one.

—LETTERS from Newfoundland say that the construction of the trans-insular railway is progressing rapidly; the workmen are laying a mile of track per day, and there seems no doubt it will be completed as called for by contract, by the 1st of September, 1896. The cod fishery, too, continues extra good, but with this drawback, that the greater the catch, the smaller the price. This will lessen the good results so earnestly hoped for, but nevertheless the people generally will meet the coming winter better prepared to cope with its rigors than for many years past. Forest fires of vast extent have been devastating some of the best wooded areas of the interior, and destroying several farms and settlements. This is one of the worst drawbacks to future progress—destroying so much fine timber—and it is largely due to the carelessness of railway navvies or hunters.

—THE close of July was signalized by a gathering of the Canadian officers and agents of the Standard Life, who under the marshalling of General Manager Wm. M. Ramsay and Superintendent J. H. Balfour, were entertained at dinner that evening at the St. Lawrence Hall in this city. Among those present were: G. P. Payne, I. A. Mills, W. Buchner, A. Gillean, J. F. Martin, G. M. Hunt, F. W. Doran, J. J. Hanratty, J. W. Kerr, C. Hunter, F. W. Gates, jr., G. H. Allen, L. E. Percy, S. S. Davls, W. C. Austin, A. Short, G. Maclean, J. S. Smith, E. H. Brown, J. A. Downs, W. E. Findlay, E. Champagne, L. D. Hudon and S. Ramsay. It is needless to say that the reunion was a most agreeable one with such hosts, and with such a company as the Standard.

—THE Grand Trunk Railway Company have scarcely seen daylight through a western case, involving something akin to \$250,000, when claims on account of the Craig Road (P. Q.) accident come pouring in upon them. The Company will probably be considered fortunate in the latter case if they escape with disbursements of \$50,000. It is evident that railway men have other matters to concern them besides prospective dividends to stockholders.

—ACCORDING to information from the European market prices on lemons are lower on this side than in any other consuming market, and statements to that effect receive confirmation in the inquiries received from European markets during the past week. On Saturday several sales were made in New York for export to England, and it is stated that negotiations are pending for the purchase of other lots. This is the first time within five years at least that European buyers have come to this market for supplies. They want large sizes over there and it would appear that these can only be obtained on this side, at prices European buyers are able or willing to pay.

—J. H. DORE & Co., dry goods of this city, have assigned, with liabilities of about \$15,000. J. H. Dore was the only partner. He started a number of years ago and did well for some years but subsequently went behind and assigned in October, '93, when he effected a settlement at 70 cents in the dollar at 3, 6, 9 and 12 months. He has had hard work to get on since and finally has had to give it up and assign.

—LAIRD & Co., general store, Tara, has assigned. J. N. Laird started in 1891. He was at one time of Parker & Laird, in Hillsdale, who failed in '87, and afterwards re-started in the name of his wife as J. Laird & Co., who assigned in July, '90. In the September following he opened in Doon, and afterwards removed to Galt, and then to Tara. He obtained an extension in February, '93, and in December of that year assigned, recommencing again under cover of a nephew's name it is understood.

—FORTIER & Co., furniture dealers of this city have assigned owing about \$28,000. They started in 1889 on a moderate capital and soon worked up a good trade. But they sold mainly on the instalment plan and thus accounts piled up upon their books which they were unable to collect. This year things became more difficult and finally they became discouraged and decided to assign. They show a fair surplus, but it is all in book-debts not easily realized upon.

—SPECULATING in stocks has caused another young and rising bank clerk to become a defaulter. George Porter, paying teller of the Quebec branch of the Bank of Montreal, has been arrested on a charge of embezzling the funds of the bank and has acknowledged his guilt. The amount of the defalcation is not exactly known; but it is expected that the bank will lose very little as much of the stock he holds is good, and the balance will be recovered from his sureties.

—ACCORDING to the statistics recently issued by the British Board of Trade it appears that more than 50 per cent. of the 926 strikes in 1894 were not successful. The number was greater than ever before, but the proportion of successful strikes was unusually small. There is food for reflection in these figures for those who think that the advancement of the cause of labor depends upon strikes.

—AMONG the firms already chronicled as in difficulties the following have succeeded in effecting compromises with their creditors: Fraser & Timm, a small shoe firm of Eganville, have settled at 60 cents in the dollar, cash—J. White & Co., liquors, Windsor, Ont., have compromised at 75 cents—T. A. Corley, a city grocer, has settled at 30 cents in the dollar, on liabilities of \$1,800, after a little over a year's experience.

—A. L. BARLOW, coal merchant of this city, pleaded guilty to the charge of substituting fictitious weight cheques for the genuine ones and thus defrauding his patrons. He was fined \$500, and ordered to give bonds in a similar amount for future good conduct.

—O. J. MONDAY, clothier of this city, has assigned owing \$13,000. He was formerly of the firm of Langevin & Monday who assigned in July, 1892. He then compromised at 40 cents in the dollar and continued alone. Excessive competition in this line prevented his making any headway.

—HENRI MATHIEU, restaurateur, this city, has assigned, with liabilities of \$7000. He started on the 1st March last in the "Vienna Cafe." He was a good cook; but lacked business ability and means, and could not make a success of the cafe.

—C. THIBAUT, shoes, Montreal, is offering 40c in the dollar cash on liabilities of \$1900. He has been in business a couple of years but could not make it pay.

LEGAL RECORD, &c.

Week ended July 31st, 1895.

The following is a record of transactions and cases in our Canadian courts of law, comprising Writs Issued and Judgments rendered for sums of \$250 and upwards, and chattel Mortgages and Bills of Sale for sums of \$500 and upwards:

WRITS ISSUED, PROVINCE OF QUEBEC.

July 22nd.

Baie St. Paul—F. Dufour vs. Jos. Bolly et al. \$ 350
Montreal—Dme. M. Z. Decary vs. B. Leduc 600
St. Sebastien—N. Demers vs. M. Raymond 600
St. Victor de F.—J. A. Bureau vs. J. Rouillard. 507

July 23rd.

Melbourne—D. A. McCaskill vs. G. B. Coram \$2,424
Montreal—J. Bisson vs. A. Cote, \$4,570; J. C. McLaughlin, et al vs. Dme. F. Dufort et vir, \$5,000; A. J. Darling vs. J. M. Ferris, \$300; F. X. T. Voscelle vs. H. Laurier, \$300; N. Bricault vs. Dme. Zoe Pare, et vir, \$300; Dme. A. Lapiere vs. M. Phelan, \$688.
Quebec—J. Slessor et al vs. A. Royer 576
St. Anne de Bellevue—Mrs. A. Raymond vs. A. Aumais. . 1,200

July 24th.

Beauport—Emma Vallee et vir vs. Eleonore Binet et vir. \$2,000
Montreal—Dme. A. Lapiere vs. A. Laniel 450
Quebec—E. Paradis vs. J. E. Turgeon et al. 266

July 25th.

Enfant Jesus du Me—N. Bricault vs. Dme. J. B. Belanger, \$300.
Mile End—J. Brisson vs. A. Cote \$ 457
Montreal—Dme. M. A. C. Symes vs. T. S. Vipond 250

July 26th.

Montreal—Hon. L. F. R. Masson vs. C. Campbell, \$300; J. F. Grant vs. M. H. Seymour et al, \$477; Dme. S. Madill vs. E. Silverson, \$1,000.

July 29th.

Montreal—J. P. Whelan, et al vs. Robert Cowans et al, esq1, \$2,000; Lowe, Donald & Co. vs. Finlayson & Grant, \$266; Dme. G. Sheppard vs. W. V. F. Samuel, \$972.
Quebec—A. Legare vs. D. Arcand, \$1,500; Hon. Sir A. P. J. R. Caron vs. E. Pacaud, \$25,000.
St. Colomb de Sillery—S. Pichette vs. Hon. E. J. Price. \$187,000

July 30.

Montreal—Dme. E. Brunet vs. L. Archambault, \$300; F. Barrette vs. Delle A. Bourbonniere, \$400; W. J. Kyle vs. T. Clarke, \$250; R. R. Goold vs. N. Deschamps, \$500; J. Rowntree vs. W. S. Kennedy, \$800; C. Laisleur vs. I. Leblanc, \$301; Trust & Loan Co. vs. N. Prefontaine, \$3,120; A. H. Blouin vs. De H. F. Rutherford, \$1,465; M. Vineberg vs. H. Silverman, \$396; J. B. Trudel vs. Montreal Roofing Co., \$889.

Quebec—La Society de P. P. d q.....	\$ 988
St. Epiphane—J. Shelyn vs. B. Beaulieu.....	262
St. Esprit—C. Lafleur vs. I. Leblanc.....	301
St. Michel—P. Rheume vs. L. S. Forgues.....	496

WRITS ISSUED, PROVINCE OF ONTARIO.

July 22nd.

Brooke—C. W. Pray vs. W. Ellis.....	\$ 258
Cooksville—Archdale, Wilson & Co. vs. Mary A. Ferguson.....	695
Murray—J. Lawlor vs. W. J. Hill et al.....	5,000
Plympton—Ann Gammon vs. J. Jones et al, exrs.....	800
Sidney—T. S. Denys vs. W. K. Mabec.....	521
Toronto—Building & Loan Assn. vs. Jas. Beatty, \$2,500; M. B. Harman vs. R. B. Green et al, \$650.	

July 23rd.

1889	245,859,000

—It is stated that an agreement will shortly be signed under the terms of which the kerosene oil trade of the Mediterranean, Sweden and Norway will be left exclusively to the Russian oil producers, while for the remainder of Europe Russia will export 85 per cent. of the required quantity and American companies the remaining 65 per cent.

—In moving the adoption of the annual report of the Hudson's Bay Co., Sir Donald Smith stated that the profits for the year under review were £80,275, which was increased by the amount brought forward to £25,305, of which £30,000 would be absorbed by the payment of the dividend recommended of 12s a share, leaving £25,305 to be carried forward. The directors trusted, considering the adverse circumstances against which they had had to contend, in common with all who were connected with business in America in the past year, that the result of the year's working would be regarded as satisfactory. The profit has been derived almost solely from the fur trade and the sale shops, the amount of land sold amounting altogether to only £13,479, compared with £28,840 in the previous year, which of itself was anything but a good result.

J. W. Mackenzie & Co.,

CLEARING SALE

OF SPRING AND SUMMER CLOTHING.

We are SELLING OFF all the remainder of our Spring and Summer Stock at

JOB PRICES.

A rare chance to pick up regular well made goods VERY CHEAP.

STOCK MUST BE CLEARED.

TERMS: NET CASH 30 DAYS.

J. W. MACKENZIE & CO.,

MONTREAL, April 19th, 1895.

33 Victoria Square.

Financial.

Thursday, Aug. 1st, 1895.

The principal financial features of the week are the proposed unification of the entire Argentine debt, and the announcement that the Grand Trunk will shortly issue a consolidated 4 per cent. debenture stock to meet its requirements. There is nothing new to chronicle in the Chinese war loan, beyond the belief that it will be paid in London and in the form of sterling exchange. As a result silver has fallen another sixteenth in London and is now only 30¼d, while in New York large commercial bars sell at 66½ to ¼, and fine government assay at 66¼ to ¼; or from ¾ to ½c lower than last week. Consols continue to advance, and are now quoted at 107 5-16 for money, and 107 7-16 for the account, with a brisk demand from those seeking sound investments. Money continues cheap. On call in London it is only ¼ per cent., and the rate of discount in the open market for both short and three months bills is 9-16 per cent. In New York call money lends at 1 per cent. and time money is quoted at 1½ per cent. for sixty days, 2 per cent. for ninety days, 2½ per cent. for four months, and 3 per cent. for six months, on good mixed Stock Exchange collateral. Commercial paper is quoted as follows: Prime endorsed bills receivable at 3 to 3½ per cent., choice single name paper at 4 to 4½ per cent., and good at 5 to 6 per cent. In this market call money is slightly easier at 4½ to 5 per cent. and discount is obtainable at from 6½ to 7 per cent.

In New York there was a better demand for sterling exchange and, under a very limited supply of commercial bills, both the posted and actual quotations were advanced. The rates were the highest yet obtained. Continental exchange was strong. Posted asking rates for sterling, \$4.80½ to \$4.90 for long bills and \$4.90½ to \$4.91 for demand. Actual rates are: Long bills, \$4.89 to \$4.89½; sight drafts,

\$4.90¼ to \$4.90½, and cable transfers, \$4.90½ to \$4.90¾. Francs are quoted at 5.16¼ for long and 5.15 for short; reichsmarks, 95½ to 95¾ for long and 95 15-16 to 96 for short; guilders, 40¾ for long and 40 7-16 to 40½ for short. In this market sterling was quiet but very firm. Between banks rates were 9¼ to 9½ for sixties, and 9 15-16 to 10 1-16 for demand. Cables were 10½ and New York funds ¼ to 3-16 discount. Over the counter rates were 10 to 10½ for sixties, 10¼ to 10½ for demand, 10½ for cables, and par for New York funds.

In Stock Exchange circles the week has been absolutely uneventful and the volume of business less than for some months past. Values show but little change, and what there is, is upward. Only 3,970 shares changed hands during the entire week and these were exclusively among professionals. The public holds strictly aloof, except for a small investment demand for bank shares. Outside of this trading consisted largely of "matched" sales and the movement all through was a narrow one. The following are the transactions of the week as per Chas. Meredith & Co., stock-brokers:

BANKS.	Shares.	Highest.	Lowest.	Last Year
Montreal	12	220½	220	219

MONTREAL WHOLESALE MARKETS

Thursday Evg., Aug. 1st, 1895.

The break in the dry weather, and the heavy rains of the early part of the week, benefited some lines of trade and proved detrimental to others. In the case of dry goods it brightened up orders by giving country merchants confidence; but it weakened the butter markets which had reached present prices mainly on the strength of the drought, and, as a result, conservative buyers look for lower prices. Eggs are arriving in excess of requirements, and the trade have more supplies than they can handle. Cheese is dull, because exporters and factory men are apart, and in the meantime stocks are accumulating. Still the factorymen hold for prices above those ruling for fancy stock in New York, and show no signs as yet of giving way. A fair average trade in all lines of groceries can be reported. Teas are active, and lines suitable to this market are readily taken up. Sugars are unchanged; and as the refineries are choked with stock, and their supplies of raw are pouring in on them, there is little promise of any advance in the near future. Canned goods are firmer, and the outlook for dried fruit is promising. Hay is strong under a good demand, and farmers are receiving nearly double the price they got a year ago. Hides continue firm; but there is a growing impression, in spite of sales to American buyers, that the stock in holder's hands is a larger one than they are willing to acknowledge. In paints a brisk jobbing trade can be reported. Turpentine is lower owing to unusually heavy receipts. In iron and the metals there are a number of minor advances and no declines. Pig lead is very firm at a sharp rise in value and coil chain, machinery steel, and black sheet are all marked up. In live stock unsatisfactory returns from late shipments have lessened the demand for export cattle, although sheep fully hold their own. Hogs are weaker in sympathy with Chicago

A Good Article
At a Fair Price

OUR CELEBRATED BRANDS

"Cable Extra,"
"Mungo,"
"El Padre," and
"Varsity."

Are as staple as flour, sell readily and always
demand. Millions of each brand sold an-
nually; sales constantly increasing.

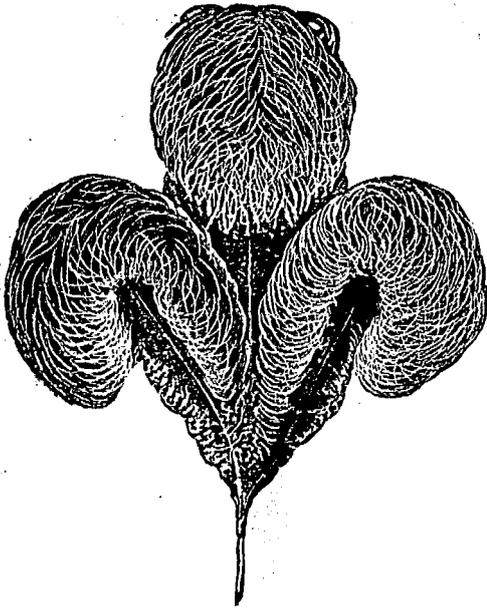

S. DAVIS & SONS,

The Largest Cigar Manufacturers in the
Dominion.

Staple chemicals are without feature ;
while quinine is stronger as the result of the
favorable outcome of the Amsterdam bark
sales. Wool is in a decidedly better posi-
tion. Canadian fleece is readily taken up
on American account at 28½ cents, and
nearly 400 bales of Cape wool to arrive have
changed hands at full rates. Flour re-
mains at last week's quotations with a
brisk local market and an improving ex-
port demand. Failures are few and mostly
unimportant. The returns from the cheese
factories are passing into circulation and
money receipts show an improvement.
In fact the situation generally is promis-
ing. The welcome rains will benefit the
root crops and the pasturage. The prices
for dairy produce, although low, are cer-
tainly remunerative, and as a general
rule the farmer is doing well. Certain sec-
tions, certainly, have suffered. But they
are the exception and not the rule; for the
great bulk of our agricultural community
have a fairly satisfactory outlook before
them.

ASHES—Receipts of both pots and pearls
have been fair. Pots sell at \$4.10 to \$4.20
for first sort. Seconds, \$4 to \$4.10. Pearls
about \$5. Received since 1st January
1,083 brls. Pots, 275 brls. Pearls. De-
livered since 1st January 1,020 brls. Pots,
237 brls. Pearls. In store 31st July at 6
p.m. 137 brls. Pots, 41 brls. Pearls.

BUTTER EGGS AND CHEESE—The market
for butter shows but little change since
our last report. There is a fairly good
trade doing this week both for local and
export account; but the heavy rains of
Tuesday and Wednesday gave the market
an easier feeling and it looks as if there
would be a drop in values in a very few
days. Certainly prospects are not so
favorable for higher prices as they were a
week ago. At present finest fresh cream-
ery is selling at 17 to 17½ cents for ex-
port and a fraction higher for local account
but exporters claim that there is no money
in it for them at these figures. Sales have
been made of Western dairy at 13½ to
14½c. Townships dairy sells at 15 to 16c.
In the low grades nothing is doing and,
it is difficult to give a quotation on these
qualities, as holders would jump at any
reasonable offer to get them off their
hands. Between 6 and 9 cents is a fair
range for stale goods. The receipts of
eggs continue large, and in excess of re-
quirements. In fact the market has now
more stock than it can handle and as a re-

Hydraulic Rams

Will raise 100 per cent. more water than any other ram in the market.

174 Centre St.,
NEW YORK CITY.

SEND FOR PRICE LIST AND TERMS.

West's Hand Tire Setter.

A truly wonderful and efficient machine for setting tires "cold" BY HAND without taking out the bolts.

Every blacksmith can now have one, and the saving in time, labor and fuel will more than pay for it every season.

Sets all light tires up to 1 3/4 x 7/8, wheels from 3 ft. to 4 ft., 4 in. diameter. Simple, strong and durable, easily operated by any intelligent person from the instructions accompanying each machine.

If castings break, duplicates will be furnished free. If bolts or wrenches break any blacksmith can mend them. A Good, Strong, Simple, Durable, Profitable Machine. The result of twenty-five years' experience in the business of setting them cold.

If you have heavier tires to set, get one of my Power Hydraulic Machines. If you buy one later, I will take the hand machine, at price paid towards it if you wish.

Mail address, 105 Meigs Street.

sult prices are weak and lower. Good fresh candled stock brings 11 to 11 1/2, while held and stale eggs range from 9 to 10 1/2 cents. Offers from England for Canadian pickled eggs for delivery in November and December have been received; but English prices have not yet risen to Canadian ideas. Cheese is dull and prices about 1/4 cent lower than last week. The cable remains at 88s 6d for both white and colored and although factorymen are still holding out it is evident they will have to come down to a lower basis before long as the stock is simply piling up. In fact it is believed that there are \$170,000 boxes in stock here now. Quebec cheese is selling at 7 1/2 cents. Ontario is nominal at 8 to 8 1/4, and Townships 7 1/2 to 8c. In the United States there is the same complaint that orders from England are light and in many instances at prices lower than the cheese can be obtained, and the only encouraging feature is the continued light receipts. Holders generally ask 7 1/4c for fancy colored and 7 1/2c for fancy white, and enough business has probably been done at those prices to warrant retaining them at outside figures, but they are certainly extreme as selling prices, the few buyers willing to operate rarely offering above 7 1/2c for colored or 7 1/2c for white, and some holders have accepted those prices rather than take chances of carrying their cheese.

CEMENT AND FIREBRICKS—Only a jobbing trade is doing in cement and no large sales are spoken of. Prices are unchanged. In small lots we quote: \$1.90 to \$2.05 for British cement and \$1.80 to \$1.90 for Belgian. Firebrick move out slowly at \$15 to \$21 per M as to brand.

CHEMICALS—There is no new feature in the market for staple chemicals. Buying is of a jobbing character and only for immediate requirements. There is but little enquiry for forward delivery. Quinine is stronger, owing to the fact that two-thirds of the stock of cinchona bark offered at the Amsterdam sales went off at full figures. In dye stuffs, gambier is unsettled. Holders offer at 4 1/4c ex-ship, New York. Indigo is very steady. Offerings are scanty and the advices from primary points are strong. Very little is doing in cutch beyond a small demand for actual wants. The other dye-stuffs are quiet and unchanged.

DRY GOODS—The heavy rains of the early part of the present week have cheered up the views of country merchants and travellers orders have shown a marked improvement in consequence. The break in the long continued spell of drought has so improved the root crops and pasturage that dairy interests have a far better outlook than they had a week ago and this has encouraged merchants to buy more freely. Although prices of cheese and butter are low, they are amply remunerative, and now the first returns are coming in farmers are buying more freely and money is coming in more regularly. The heavy hay crop and the high prices ruling in this province where \$10 to \$10.50 per ton is being paid for ordinary shipping No. 2 hay—which is nearly double what they were getting this time last year—have made the agricultural population prosperous and they are commencing to buy more freely and of more expensive goods. The city trade may be called a fair average for the last week in July, when so many of the largest buying class are away at the seaside or on the borders of the lakes. Suburban traders report trade unusually good for this season of the year. Manufacturers say orders are less than in June but they have no reason to complain. They are well sold ahead, and at good figures. Prices are very firm. Alpacas, mohairs and silks have developed unexpected strength, and in some lines of woollens advances are asked for repeat orders.

FLOUR AND GRAIN—There is a demand for flour for export; but as yet English

buyers are not prepared to meet miller's ideas in prices and only 1,000 sacks have been sold on London account. Locally business is good. Millers say the city demand shows a marked improvement over last week, more especially for Manitoba grades. We quote winter wheat patents, \$4.45 to \$4.50; spring wheats, \$4.40 to \$4.50; straight roller and strong bakers \$4.25 to \$4.35. Only a small jobbing business is doing in oatmeal on the basis of \$4.05 for standard. For feed the market is active and firm at \$17 for bran, \$19 for shorts, and \$22 to \$23 for mouille. In grain the market is very dull and prices are almost nominal. Peas afloat may be quoted at 78c and No. 2 oats at 40½ to 41c. No. 1 hard Manitoba is offered in the West at 92c. Cable advices to the Board of Trade were as follows: Cargoes off coast, wheat rather easier; maize, quiet; cargoes on passage and for shipment, wheat dull; maize, quiet; country markets, English, partially 6d to 1s dearer; French steady; Liverpool spot wheat, steady; spot maize, quiet; Minneapolis first bakers' flour, 19s 6d; Liverpool futures, wheat, steady; maize, quiet; wheat in Paris, 18.85 July and August; flour in Paris, 42.00 July, 42.10 August.

FRUITS—A brisk demand with a tendency to lower prices characterizes the fruit market. Buyers are inclined to cut rates and sellers are obliged to meet them. At auction there were offered two cars watermelons, two cars California plums and pears, one car apples and three cars bananas. Pears sold at \$1.60 to \$2; peaches at 75c to 82½c; plums at \$1.30 to \$1.70; watermelons at 18½c to 20c each; apples at \$1.50 to \$2.35 per barrel, and bananas at 45c to 72½c per bunch. In a jobbing way we quote melons, 19c to 22½c each; plums, 75c to \$2 per box; bananas, 40c to 65c for seconds, and 80c to \$1.25 for firsts; pears, \$1.75 to \$2 per box; peaches, \$1 per box; lemons, \$2.50 to \$3 per box, and oranges \$6 to \$8 for Valencias, and \$3 to \$3.50 for Sicilian. Coconuts run from \$3.50 to \$4. Onions are \$2.50 per crate for Bermudas and \$2 per bag for Egyptian. Potatoes are easy at \$1.25 per barrel for choice new stock.

GROCERIES—A fair trade can be reported in all lines of groceries. Teas are active and Japans ranging from 14½ to 17 cents are eagerly taken up where they can be found. Some lots of better class teas for which adequate prices could not be got here have been sold for Chicago account, but suitable lines for this market sell readily. Sugars are unchanged at 4½ for granulated and 3½ and upwards for yellows. But the refineries are choked with stock, their supplies for raw sugar are pouring in upon them and they would sooner shade present prices than hire outside storage. For a large lot 4.1-16 would not be sneezed at. Still August and September are always good sugar months, the contracts for forward delivery made before the revision of the tariff must soon run out, and then the refineries should be able to run off their accumulated stock at fair prices, more especially as the situation is stronger at primary points. Canned goods are firmer. Cannerymen are asking 82 to 82½c for corn and tomatoes. Peas are very scarce and we quote 85 to 87½c. Strawberries are about sold out. Holders ask \$2.15 for strawberries and \$2 for raspberries. Canned salmon are strong at \$4.50 to \$4.75 on coast and some British Columbia canneries will not quote at all. North River salmon are firm at \$4.35 to \$4.40 and Fraser River are held for \$4.50 to \$4.75. Sardines are strong. There is a light pack at all French points, and the supply of best brands is about cleaned up. It is reported from Eastport, Me., that the run of sardine fish this season is the lightest known in years. Packers are paying \$8 per hhd, which they claim will net them a loss at prices obtainable for packed sardines. Prunes promise to be higher. New crop Californias have sold, f.o.b. on coast, at 4½ for the four sizes or 6c in bags, f.o.b., for the three largest sizes.

The reports from Bosnia and Servia indicate small crops: but France will have a fair crop and the reports of shortage do not seem to have brought Canadian views up to French ideas of prices. In dried fruits, California three crown muscatels sell at 5½c. Mail advices from Smyrna state that the demand lately from the various markets has had the effect of nearly absorbing stocks of Sultana raisins, and before the beginning of fall it is expected supplies will be completely exhausted. As the weather has continued propitious throughout the growing season the expectations of a large crop is not likely to be disappointed. The quality is supposed to be superior to that of former years, as the berry will be better nourished. Small lots of Brazil nuts are arriving, but no advance in prices is anticipated as the stock in England is large and the least rise in values would attract shipments at once. It is reported that the entire stock of Sicilian filberts is in the hands of one holder who is asking higher prices. The first lots of new green Jamaica ginger are arriving and are held at 4½ to 5½ cents as to quality. The root is small but of fair quality for the season. Dry cod run from \$4 to \$4.50 and No. 1 green cod at \$4 to \$4.50, Labrador herring \$3.75 to \$4 and shore \$3 to \$2.50. Salt salmon in barrels, \$10 to \$11 for No. 1 small and \$12.50 to \$13.50 for No. 1 large. Salt sea trout \$7 to \$7.50. Canned lobsters \$6 to \$6.25. Canned mackerel \$3.85 to \$4 per case.

HAY—The market is strong under a good demand both locally and for export and considerable business has been done. At country points \$10 to \$10.50 has been paid f. o. b. cars for No. 2 export hay and along

side ship it sells at \$12 per ton. No. 1 straight timothy is very scarce and extravagant prices would be paid for it. Cables from England are firmer and a further advance in prices is expected.

HIDES AND LEATHER—The market continues firm, but there is a growing impression that local holders are stocked to the neck. One holder alone has 11,000 calfskins in stock and although there were sales this week of five carloads of beef hides and two carloads of calfskins on American account, tanners are holding off, while receipts are up to the average. Locally dealers pay 8½, 7½ and 6½ for No. 1, 2 and 3 respectively to butchers, while tanners pay one cent more for sorting, curing and inspection. Sheepskins are out; but dealers are paying 20c for clips and 30c for lambskins. Calfskins are firmly held and offers at 8 cents have been refused. Tallow is dull. For rendered 5½c is with difficulty procurable, and for rough 2½c is the nominal figure. Leather is quiet and unchanged. Shoemen are keeping out of the market at present in hopes of breaking prices, but tanners remain firm in their ideas as they have very few hides, comparatively, in their vats. Tanners will not buy hides, and shoemen will not buy leather, except just for immediate requirements. Each is trying to break prices for their raw material, and it remains to be seen how they will succeed.

IRON AND HARDWARE—Trade is duller in the heavy metals and hardware than it was a week ago, but the average of the whole month is much above that of last

year. There is an advance in copper and we mark up ingot to 11½ to 12 cents. Coil chain is dearer also. Prices for 5-16 chain are up to \$3.25 and the other sizes are marked up ten cents. Outsides prices of all grades of black sheet iron are also advanced as well as those of machinery steel. Pig lead has moved up sharply to \$3.10 to \$3.25, and what stock is offering is all in the one hands. Scotch pig is quiet and Canadian moves at \$16.50 to \$17 with the inside figure ruling. In the United States manufacturers have orders far ahead and are content to wait a while and let the market stand. But while the market this week is easier, there is nothing like weakness apparent. In all lines prices are fully up to last week's quotations, with demand firm and steady. The indications for fall trade are gratifying. For the first time in several weeks there has been no advance in the price of pig iron. Furnaces are pushing production, but stocks are no

MONTREAL & ST. HENRY.

accumulating. The nominal price for steel rails is now \$27. Plates, blooms and billets are in demand, with prices advancing, mill capacity crowded and high figures offered for immediate delivery, which is very difficult to secure. There is also activity in merchant steel with former prices quoted.

LIVE STOCK—The demand for export cattle is limited owing to the unfavorable way in which shipments are turning out. Best cattle bring 4 cents per pound. Sheep are better, as receipts are light, and values are firm at 3¼ to 3½ cents. Butchers cattle run from 2¼ to 3¼c, the latter for really choice. Cattle freights are firm and all the space for this week is taken up at 40 to 45s as to destination. Live hogs are weaker and sales were made at \$4.00 to \$5 per 100 pounds. Liverpool cattle cables report the market firmer, but values for Canadian stock show no improvement over a week ago, while for States cattle they are ¼ to ½c per higher.

Canadians are quoted at 11 to 11½c and States at 11¼ to 12¼c. The market for sheep was stronger and prices higher at 12 to 13c. At London prices were about the same as the above. A private cable from Liverpool quoted cattle at 11½c and sheep at 12c. A private cable from London quoted cattle at 11½c. Shipments for the week are 2,418 cattle, and 2,796 sheep.

PAINTS, OILS AND GLASS.—A tolerably brisk jobbing demand considering the season of the year can be recorded for paints. Severe competition keeps prices low, but the steadiness and continuousness of the enquiry prevents any concessions. Still there is no probability of any advance unless in white lead, which may be higher in the fall owing to the firm position of pig lead in Europe. Linseed oil is unchanged. It is said that new seed coming in is of poor quality, but the general belief is that the yield will be a normal one. Turpentine has declined to 44 cents owing to the heavy movement to the seaboard. The

total receipts are 3,000 barrels in excess of last year to date and it is believed that this months arrivals will exceed 40,000 barrels. Seal oil is in an unusual position for this market, there being an absolute absence of speculation. What lots are coming are sold in advance. We quote new steam refined pale seal at 32½ to 33c to arrive and spot lots at 35c. Newfoundland cod oil, 35c to 36c. Newfoundland cod oil, 65 to 70 cents for ordinary and \$1.10 to \$1.20 for Norwegian process.

PETROLEUM—There is absolutely no change in the position of petroleum. In fact the usual summer lull is on, although producers are chary of placing contracts ahead. In car lots current prices are:—Canadian 14¼c, American 18½c, water white 20c. In single barrels prices are 16c for Canadian, 19½c for American and 21c for water white. Benzine is strong at 14¼ to 16c for Canadian and 23c for American.

PROVISIONS—Some fair sized sales of bacon and hams are reported at a range of 9 to 11 cents; but both pork and lard are dull and weak. We quote Canadian short cut at \$16 for clear and \$18 for mess. Lard 9¼ to 10¼ in pails, and 7¼ to 7¾ for common refined. Cash quotations in Chicago closed: Mess pork, \$10 to \$10.12½; lard, \$6.12½ to \$6.15; short rib sides, \$5.85 to \$5.90; dry salted shoulders, \$5.62½ to \$5.75; short clear sides, \$6 50 to \$6 62½. In the Liverpool provision market bacon was stronger and advanced 6d to 8ds 6d to 8fs. Lard was weaker and declined 3d to 3s 3d. Pork was steady at 57s 6d.

RUBBER—The market for Para is quiet and buyers do not care to purchase beyond immediate wants. Latest cables from Para

LEHIGH VALLEY CREOSOTING COMPANY,

Office: No. 1 Broadway, New York. Works: Perth Amboy, N. J.

Built in 1886 by the Lehigh Valley Railroad Company.
Leased and operated by the Lehigh Valley Creosoting Co., incorporated 1887.

Lumber, Piling and Ties treated with Dead Oil of Coaltar (Creosote.) Creosoted Lumber, Piling and Ties Furnished.

Rail Connection at Perth Amboy with Lehigh Valley Railroad, Pennsylvania Railroad, and Central R.R. of N.J. Direct Water communication from New York Bay.

Creosoting is employed successfully in the protection and preservation of Timber used for:

- | | | | |
|--------------|---------------------|-----------------------|-------------|
| Breakwaters, | Floating Elevators, | Underground Conduits, | Buildings, |
| Coal Docks, | Dry Docks, | Foundation Timbers, | Coal Bins, |
| Bulkheads, | Dredges, | Telegraph Poles, | Box Drains, |
| Wharves, | Vessels, | Paving Blocks, | Bridges, |
| Dykes, | Scows, | Cross Ties, | Trestles, |
| Cribs, | Boats, | Fence Posts, | Culverts. |

This process is the only one known to be absolute proof against the destruction of marine works by the teredo, and is a sure preventive against rot or decay of timber under any conditions. Recommended by the "Committee on the Preservation of Timber" of the American Society of Civil Engineers, as the most effective process for marine works and timber in very wet situations.

Creosote Oil is not dissolvable in water like metallic salts and the heavy grades made from coal tar will not wash out in running water. Creosoting with COAL TAR CREOSOTE under high pressure, after the proper desiccation and preparation of the timber, is NOT A NEW PATENTED PROCESS. Its success when well done, is certain. Introduced in England over 60 years ago and since thoroughly tested in all parts of the world.

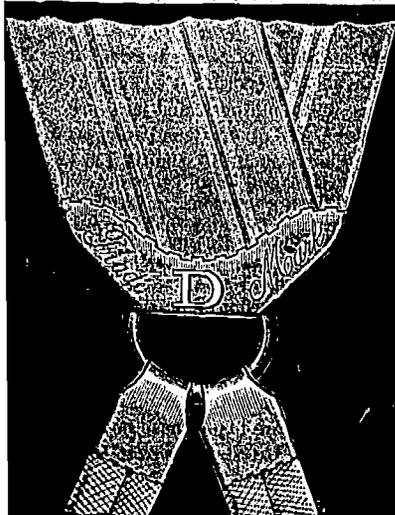

Address: H. COMER, sup't

Lehigh Valley Creosoting Company,

No. 1 BROADWAY, N. Y.

quote island fine at 5,100 reis and coarse 2,600 reis. Central American and African grades are dull. New York figures are 70 to 78c for fine and 46 to 54c for coarse Para.

WOOL—The American demand for Canadian fleece continues and their agents are picking up all they can secure at 23½¢ which seems to be a high price in comparison with the figures offered for foreign wools. About one third of the 1,200 bales Cape to arrive per "Albatross" have been sold at from 13½ to 15c. Buenos Ayrean and Australian wools unchanged. The wool sales which have just closed in London were distinctly satisfactory. Of the 390,000 bales offered only 34,000 bales were held over. The sales opened with prices materially higher, and despite the heavy early offerings and the inaction of continental operators in the early portion of the sales, the market steadily gained strength until the closing rates were the best of the series. This improvement was doubtless due largely to the activity of American dealers, who purchased heavily throughout, taking over 60,000 bales. These purchases embraced a much more varied selection of wools than usual. The continental buyers towards the latter part of the series were obliged to make up for lost time in order to secure their supplies. They recognized the fact that the advance in values was too firm to be dissipated, and this added to the activity of the market. Yorkshire operators also purchased freely throughout the series. Cross-breds were especially sought for, in consequence of the prevailing fashions in cloth running largely to the bright hair varieties. These reflect the highest advance in prices, coarse growths advancing 1½d. Fine growths sold well, but not with much keenness.

There's Style about this fastener for the back of a Brace. It is Small Neat Durable. Can't Break Away. And unlike the multitude of big tin Clasps that are objectionable to the wearer who don't want his back covered with metal. It's a seller every time.

TORONTO WHOLESALE TRADE.

(Revised by Telegraph).

TORONTO, Aug. 1, 1895.

There is no change in business conditions this week. Better results than had been anticipated are expected of the grain

crops, and a satisfactory movement of merchandise is looked for this autumn. Latest accounts from Manitoba are favorable, many good authorities estimating the yield of wheat at 25 to 30 million bushels. A few lots of new white wheat have sold

in Ontario within a few days at 74c. Money is easy with call loans at 4½ per cent. and prime commercial paper discounted at 6 to 6½ per cent. Sterling exchange is very strong in sympathy with the New York market. Stocks are quieter and the general tone firmer. Commerce sold at 135¼, Imperial at 180, Cable at 157½, C. P. R. at 53, Farmers' Loan at 105½, Western Canada at 150, Union at 110.

BUTTER, &c.—Market quiet, with no changes in prices. Choice tub is quoted at 16 to 16c. Medium 11 to 12c, and inferior to 7 to 10c. Pound rolls 17 to 19c and creamery 17 to 19c. Eggs are firm at 11 to 11½c per dozen in case lots. Cheese quiet at 8½c to 9c in a jobbing way.

DRESSED HOGS—Receipts are very light and prices rule firm. A few lots of fresh sold during the week at \$6.50 to \$7.

FLOUR AND GRAIN—Flour dull and unchanged, there being little or no demand. Straight rollers are quoted at \$3.75 to \$3.85, Toronto freights and Ontario patents are quoted at \$4.15. Manitoba patents nominal at \$4.75, and strong bakers at \$4.50. Wheat dull with buyers and sellers apart. White and red sold west at 77 to 78c, and on Northern at 79c. New white sold at 74c west. No. 1 Manitoba hard is very dull, and steady at 93c. Toronto freights. Barley is purely nominal. Oats steady at 37c on track, and 32½ to 33½c outside. Peas dull at 58 to 59c outside and rye at 58c. Bran higher at \$15.50 to \$16 and shorts \$19. Oatmeal is steady at \$4.00 for car lots.

GROCERIES—A better demand is reported for sugars, and the market is firm. Granulated sugars are selling at 4¼ to 4½c, and yellows at 3½ to 4c, according to quality. Dried fruits steady. Valencias are quoted at 8c up, and currants at 4c up. Teas quiet at unchanged prices. Canned vegetables firm at 90c.

HARDWARE—Business fair with good demand for harvesting implements. Prices generally are firm.

HIDES AND SKINS—Hides quiet and unchanged with cured quoted at

SURETYSHIP.

at 9c to 9 1/4c. Green unchanged at at 8c for No. 1 and 7c for No. 2. Calfskins 7c to 8c. Lambskins are firm at 40c, and pelts 25 to 30c. Tallow dull at 5 1/2 to 5 3/4c, the latter being the selling price.

LIVE STOCK—Receipts of cattle moderate, and prices a shade better for good butchers. The best shippers sold at 4 1/4 to 4 3/4c per lb. and others 3 1/2 to 4c per lb. Butcher's cattle steady, with choice quoted at 3 1/2 to 3 3/4c. Inferior butchers sold at 2 to 2 1/2c. Sheep are firm at 3 1/2 to 4 for export. Spring lambs unchanged at \$1.75 to \$2.75 each. Hogs are firm, the best bringing 5.20 to \$5.40, weighed off cars, and thick fats \$4.70 to \$5.00. Sows \$4.00 per hundred.

PROVISIONS—Trade fair, with little change in quotations. Mess pork \$15.75 to \$16 and short cut \$16 to \$16.25. Long clear bacon sells at 7 1/4 to 8c, hams at 11c to 12c, rolls 8 to 8 1/2c. Lard is firm at 8 1/2c for tierces, 8 3/4c to 9c for tubs and 9 1/2c for pails. Beans dull at \$1.30 to \$1.40. Potatoes sell at 40c per bushel for new. Dried apples 5 to 5 1/2c, and evaporated 6 1/2 to 7c.

WOOL—Receipts have fallen off, and prices are about steady at 23 to 23 1/2c for fleece. Unwashed 14 to 14 1/2c. Pulled wools dull at 20 1/2 to 21 1/2c for supers, and at 22c to 23c for extras.

JAS. McMILLAN COMPANY

Established 1855

SMOKELESS

Furnace AND Fuel Saver

THE OLDEST BOILER SETTERS AND FURNACE BUILDERS in CHICAGO.

Our Furnace is constructed on scientific principles. It can be put in in one day. No iron to burn out. A great protection to the boiler. Can use any fuel. Perfect radiation and combustion guaranteed.

JAMES McMILLAN CO., 21 So. Canal St. Chicago.

MANUFACTURERS OF

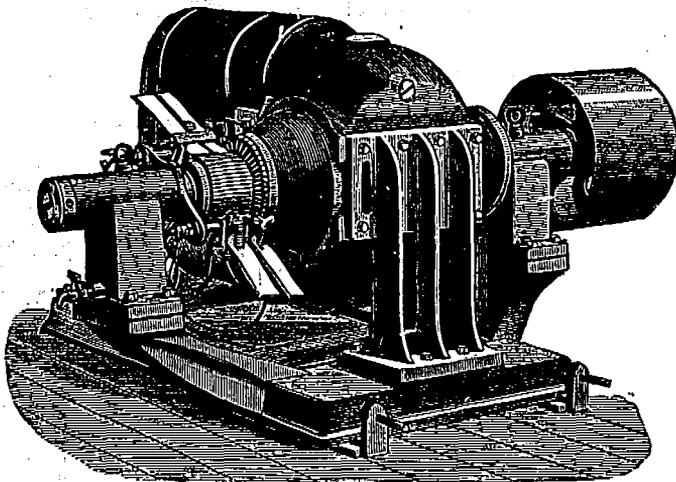

Constant Potential Dynamos and Motors

of all sizes & voltages for lighting and power

ADVANTAGES CLAIMED:

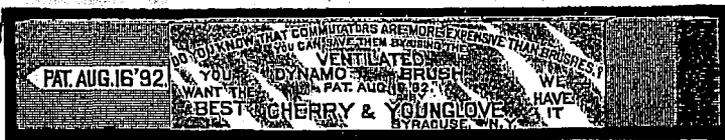

Substantial construction; smooth running and durable; well protected from external injury; parts easily removed for repairs. Automatic Self-Lubricating Journals; wastes no oil; current generated with least sparking—consequently small wear of Commutator and brushes.

Perfectly self regulating and so simple any man of ordinary ability can run them.

KAY ELECTRICAL MANUFACTURING CO., 263 James Street, North, Hamilton, Ont.

Cherry-Younglove Ventilated Dynamo Brush.

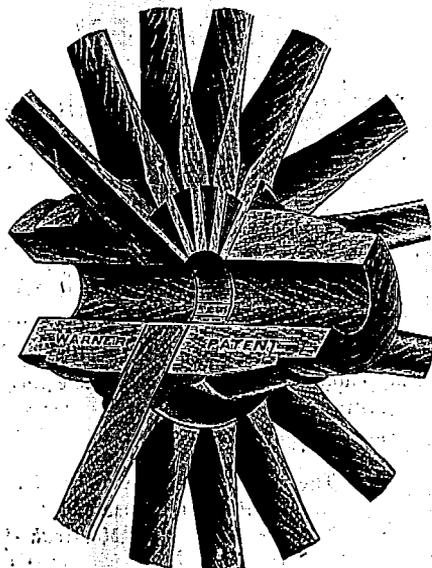

Does not spark, heat or cut the commutator of a dynamo, and operates in the satisfactory manner that a practically operative BRUSH should.

Our PATENTED construction insures requisite ventilation, sufficient elasticity and ready and positive longitudinal adjustment. By the use of these brushes your commutator will last indefinitely; they insure a steady current. Be sure that you secure our PATENT DYNAMO BRUSH, duly marked or stamped with our names thereon (see cut of brush).

SPECIAL NOTICES.

THE HANSON HYDRAULIC RAM.

It is claimed that the Hanson new patent hydraulic ram which has been recently improved will raise at least 100 per cent. more water than any other ram in existence of a given size. The principal improvement is in the delivery valve, which consists of a circular leather washer, with a hole in the centre, which, when fastened down to its seat allows the water to pass through with less resistance to the rising column, than any other ram valve in existence. The valve mechanism which is provided with a flange, is made of composition brass, and

→ Steam Separators and Grease Extractors ←

For Extracting WATER, OIL and other matter from STEAM or other GASES

Simplest, Cheapest, Most Efficient **WHY ?**

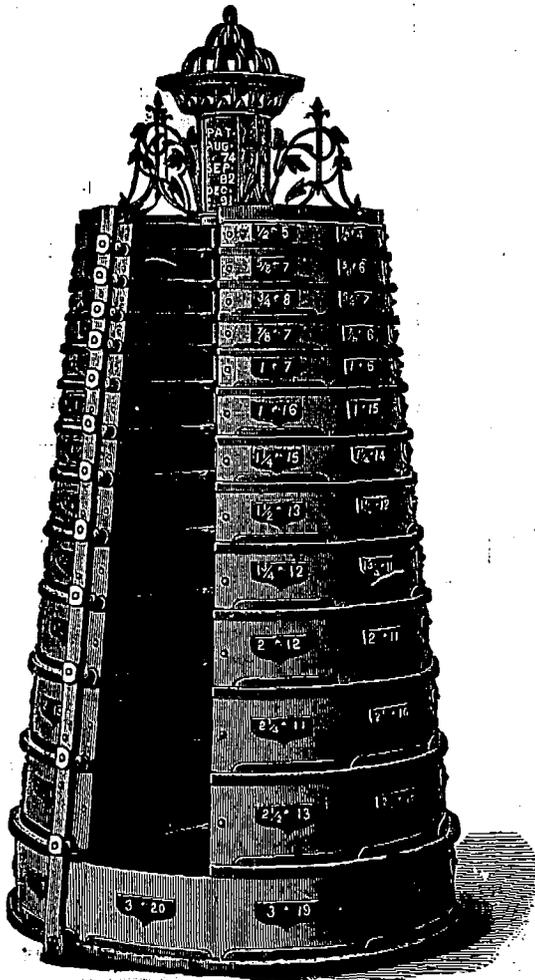

BECAUSE it is the only separator constructed on scientific principles.
BECAUSE it is the only device which immediately removes and isolates moisture from the currents of steam and effectually separates oil from ammonia gas.
BECAUSE the separating action is applied at each convolution of the worm, thereby combining several separators in one and constantly wringing the steam dryer.

Furnished on 30 days' trial.

 UTICA, N.Y.

finished all over, and is placed between the flanges of the body or base and the air chamber which are faced off true, and packed with suitable packing, thereby making a perfect joint, which is not the practice in other rams, and the whole fastened together with four slotted bolts and keys, which can be removed in less than a minute, thereby making the valve very accessible for repairs. The bolts are an easy fit in reamed holes, and can be easily removed in case of breakage. They can also be lengthened or shortened to suit variable thickness of flange packing.

To the depositors of La Banque du Peuple.

Up to the tenth of August next, we will take at par cheques on La Banque du Peuple, in payment of a limited number of pianos and organs of the following makes: Hazelton, Pratte, Newcombe, Berlin, Dominion and Ennis pianos. The Vocalion organs and the Molian at our ordinary prices.

Only one instrument sold to the same party.

To people living in the country who cannot come to our warehouses, we will

send illustrated catalogues with all necessary information to help them in selecting an instrument.

One price only as usual.

SUYDAM FLEXIBLE METAL PIPE JOINT

WHAT IS THIS FLEXIBLE JOINT?

It is an absolute steam joint under any steam pressure
 It is a practical flexible coupling for metal pipe.
 It will allow the joining of iron pipes so that the sections may be easily moved in any direction at will or rotate on a swivel.
 It is more durable and less expensive than rubber hose

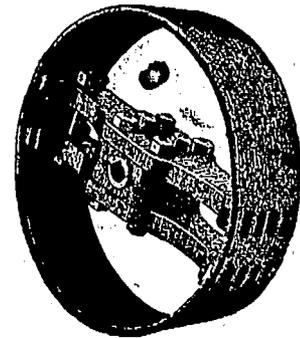

THE GILBERT BROS. ENGINEERING CO., LIMITED, SOLE MANUFACTURERS FOR THE DOMINION
 2666 Notre Dame St., - MONTREAL.

REID'S PATENT. Bent Rim Wood Split Pulleys.

No Glue in Rim like Segment Rim Pulleys, to be affected by Steam, Dampness or Moist Temperature.

THE REID BROS. MFG. CO., LTD.,
 106 Adelaide St., West,
 TORONTO, Ont.

R. H. BUCHANAN,
 Agent, - MONTREAL.

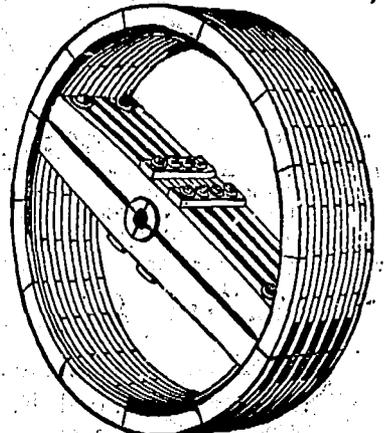

THE REEVES

WOOD SPLIT PULLEY

IS AS STRONG AS IRON.

It is a dead truss, being accurately balanced. Arms are built in such a way that when in motion they do not displace any more air than an iron pulley.
 Segments are all nailed. These pulleys never go to pieces.
 Pulleys from 6 inches diameter to 48 inches always in stock.
 Pulleys as large as 20 feet diameter made to order. Every Pulley guaranteed.

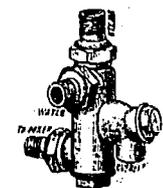

REEVES PULLEY CO.,
 TORONTO, Ont.

The Kingsley Patent Water Tube Safety Steam Boiler

Is the most Rapid and Economical in the World.

It economizes:—

- SPACE,
- FUEL,
- BRICKWORK,
- LABOR.

It gives absolutely
DRY STEAM.

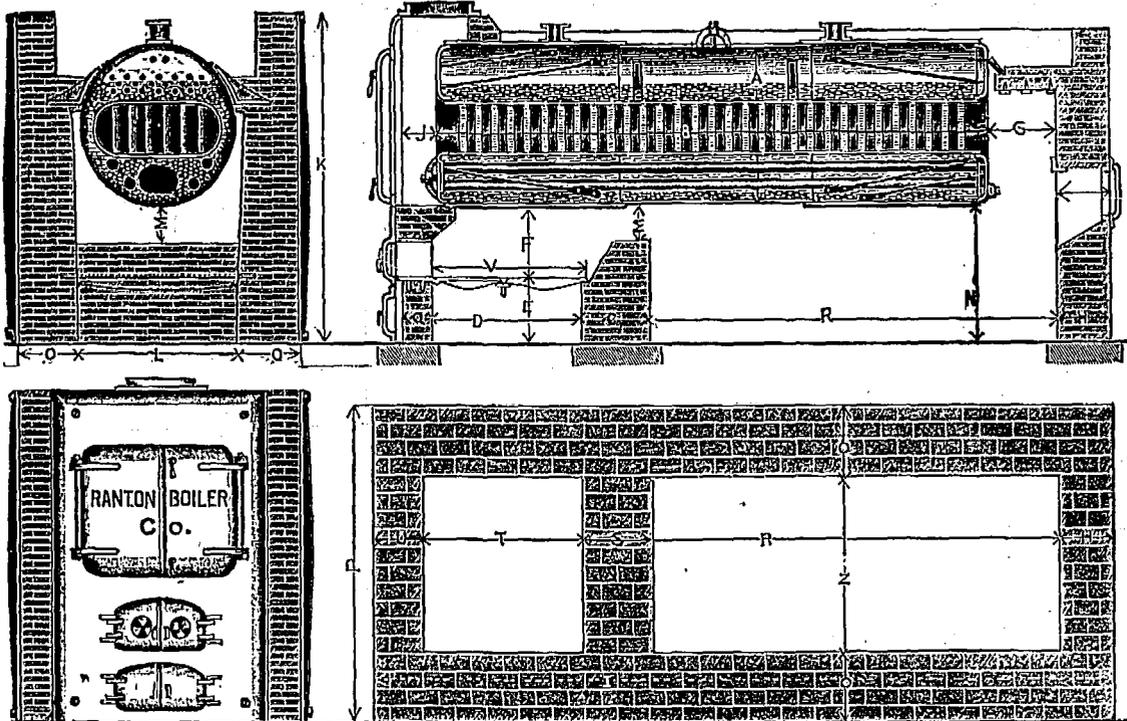

It will pay for itself in three years in the saving of fuel as compared with any other boiler now in the market.

Satisfactory references to Prominent Steam Users in Montreal, Quebec, St. John, etc., etc., . . . furnished on application to . . .

BOILERS NOW IN USE AT—Mobile Electric Street Railway Co., Mobile, Ala., 3 Boilers; Norwalk Tramway Co., South Norwalk, Ct., 2 Boilers; Hudson Electric Railway Co., Hudson, N. Y., 2 Boilers; Sing Sing Electric Railway Co., Sing Sing, N. Y., 3 Motors; Day Brothers & Co., Syracuse, N. Y., 2 Boilers; Adamant Mfg. Co., Syracuse, N. Y., 4 Boilers; Boston Plate and Window Glass Co., Boston, Mass., 2 Boilers; Hoffman Brothers & Drescher, Syracuse, N. Y., 1 Boiler.

THE RANTON PATENT BOILER.—This Boiler comprises the best features of both tubular and water tube boiler. It has been on the market three years, and has given the highest satisfaction wherever used. Its principal points of superiority are:

ECONOMY—Experience shows that the Ranton Patented Boiler is an economical one to use; some of our customers claiming a saving of one-third the amount of fuel used under other boilers in doing the same work.

EASE OF CLEANING—It will be seen at once that every part of the boiler being easy of access that it is easy to keep it clean. The vertical tubes will neither hold scale nor soot. These are valuable features, which persons in charge of steam plants will appreciate.

DURABILITY—Every boiler is made under the supervision of the inventor, of the best materials, in the most careful and workmanlike manner. Its construction admits of very strong bracing, and this, together with the ease of cleaning, ensures the probable life of the Ranton Boiler being longer than the ordinary. We will submit specifications and prices upon any size from 30 to 250 horse power.

Leading Hotels in Canada

ROSSIN HOUSE, TORONTO, Canada.

A. Nelson, Proprietor.

The proprietor has found necessary owing to the increased patronage of this popular Hotel to increase its capacity by an addition of 75 rooms, elegantly furnished en suite with baths, now ready for occupation. The latest exposed sanitary plumbing has been adopted throughout. THE ROSSIN is admittedly the largest, best appointed and most liberally managed hotel in the Province, having accommodation for 500 guests.

A. NELSON, Proprietor.

Made only by **SHERWOOD MFG. CO., 34 WASHINGTON ST., BUFFALO, N. Y.**

PERFECT PRESS MOTOR.

J. W. OLIVER, Editor-Proprietor of Yonkers, N.Y., "Statesman," says:

"I was associated with Robert Ho over 40 years ago and have been in the printing business all my life and used all kinds of motors. I can truly say that the Tuerk Motor has given me more pleasure than any piece of machinery I ever used. For ten years I used and am now using a No. 13 nut governor to run three large presses, a folder and several jobbers."

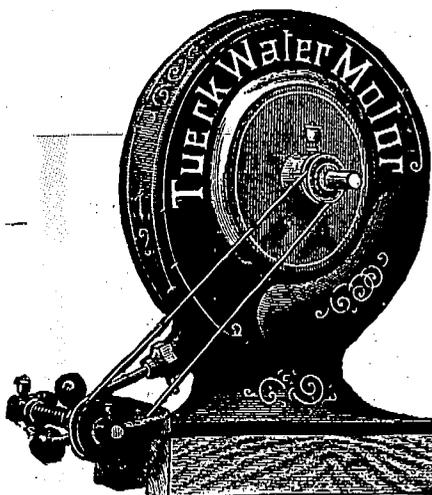

Note.—At Yonkers the water is metered, price averages about 12 cents per 1000 gallons, pressure 90 lbs. Motor running about all the time at a cost of from \$1.00 to \$1.25 per day. No other Water Motor in the market can come anywhere near this record for economy. Others have tried it.

FOR SALE ONLY BY

Tuerk Hydraulic Power Co.

WORTH KNOWING

"It is the safest and fairest policy I have ever seen,"

was the remark made by a prominent representative of one of the largest and best American Life Insurance Companies when he had carefully examined the Ordinary Life Policy of the Temperance and General Life Assurance Co.

This is the only policy offered to the Canadian public that can neither lapse nor expire, as to its paid-up value, till death ensues, after three annual premiums have been paid on it.
