REPORT  
OF THE  
MEDICAL SUPERINTENDENT  
FOR THE YEAR  
1874.

---

*To the Honorable the Commissioner of Public Works and Mines :*

SIR,—I have the honor to submit the seventeenth annual report of the Nova Scotia Hospital for the Insane, showing its “condition, progress, and requirements.”

At the date of last report the number under care was two hundred and sixty-eight (268.) The admissions for 1874 have been sixty-seven (67), and the discharges fifty-six (56), leaving on the record at the end of the present year, two hundred and seventy nine (279.)

Of those who were discharged, six (6) were improved ; thirty-six (36) recovered, and fourteen (14) died.

The whole number under care for the past twelve months was three hundred and thirty-five (335.) The daily average, (which last year was two hundred and sixty-six (266), and at that time by far our highest, has this year been two hundred and seventy eight (278.)

In the sixteen years the Hospital has been in operation, nine hundred and seventy-nine (979) have been admitted; and of these, seven hundred (700) have been discharged, as follows, namely, one hundred and ninety-six (196) have died; twenty (20) have been removed unimproved; seventy-four (74) have been benefited to a greater or less extent; and four hundred and ten (410) have been discharged as recovered.

The proportion of recoveries to admissions has this year been nearly fifty-four per cent (53.73); while the mean of all former years was rather less than forty-two per cent (41.80.)

The mortality rate for 1874 has been five per cent (5), on the average number under care—the corresponding rate of all former years having been six per cent (6.)

*Reckoned on the whole number for the year* the mortality rate has been only a fraction over four per cent (4.18.)

The relative number of recoveries among males and females is shown in the tables forming the appendix. The comparative rate of recovery of the two sexes, while it varies from one year to another, has averaged almost precisely the same for the whole period, namely 41.8 for males, and 42.8 for females.

The mortality rate has been much lower this year among the female patients, being less than

three per cent (2.75) on the average number, against seven and one half per cent (7.57) on the male side. Carrying the reckoning however over the whole series of years, the difference is less marked, namely, seven per cent (7.1) for males and five and one half per cent, nearly, (5.4) for females.

This summary of statistics shows at a glance the results of Hospital treatment, and exhibits an array of figures that will bear comparison with those of either English or American Asylums.

The admissions have been less numerous than last year, only the most urgent and hopeful cases being received, owing to the crowded state of the Hospital.

This condition of our wards is now happily remedied on the women's side, and when the requisite repairs shall have been completed, the same may be said of the opposite side. Until these have been attended to, however, this crowding is almost unavoidable.

The number of discharges has been precisely the same as in 1873. Two patients who had materially improved, were removed to a Military Asylum in England; four were taken home at request of friends; benefited, but not recovered. Of the remaining discharges seventeen (17) men and nineteen (19) women were recovered; and ten (10) men and four (4) women died.

The deaths, except in one instance, were due to

natural causes. One patient, far advanced in years, whose improvement verged upon recovery, and who had to some extent the liberty of the grounds, met with a dislocation of the shoulder by falling when endeavoring to make his escape. Owing to this accident, he was supposed to be incapable of intentional self injury, and a less strict oversight of his movements was kept. He took advantage of this, to commit suicide by strangulation while in bed. A coroner's inquest was held, and full particulars of the case were reported at the time.

---

## COMPLETION OF THE HOSPITAL.

---

This event marks an era in our history, and deserves more than a passing notice.

It is now sixteen years since the first portion of the Hospital was opened. The part then built consisted of two sections of the South Wing, and gave accommodation to ninety (90) patients. A third section, completing the South Wing, was added two years subsequently, increasing the capacity so far as to afford room for thirty (30) additional inmates.

The admissions continuing steadily to increase, the Centre Building and one section of the North Wing were put under contract; and in 1868 these were opened for the reception of patients—our

numbers at that time having amounted to one hundred and ninety (190.)

The removal of the officers of the Hospital from their temporary quarters to the centre building, gave additional room in the South Wing, and this with the first section North were soon occupied to their fullest extent. Our numbers were augmented year by year, until in 1874 we have had a daily average of two hundred and seventy-eight (278.)

This increase caused such crowding and inconvenience as were highly objectionable, but so great was the pressure for admission, that this state of affairs could not be avoided. It afforded us very great relief when in October of the present year, the possession of the remainder of the North Wing was formally handed over; and by the latter part of December, we had every one of the new wards occupied

The portion of the North Wing recently finished consists of two sections, each three stories in height, and completes the Hospital according to the original design. Owing to the sudden declivity of the ground at the North, a third story was added to the last section, giving an additional ward on the female side of the house.

The workmanship on the new wings has been thorough and satisfactory, reflecting great credit on the contractors Messrs. Brunton and McNab.

The advantages derived from the completion of the Hospital are greater than can well be des-

cribed, and can only be fully appreciated by those who, under similar circumstances, have experienced the same relief.

First.—It puts an end, at least for some time to come, to our overcrowding. This serious evil is now happily remedied.

Second.—The men and women, who have unavoidably been housed under the same roof heretofore, now occupy separate wings of the Hospital. This is a most important change for the better, and carries out the original design. It removes permanently a difficulty under which we have labored for the past sixteen years.

Third.—The unrestricted access of numerous workmen to our premises, and their daily presence under the very windows of the Hospital, is no longer a source of trouble.

Fourth.—The improvements on the grounds can now be satisfactorily carried out with a view to permanency. Up to this time the planting, terracing, and grading have only been partial; each addition to the Hospital having necessitated a change of our working plan, to some extent.

Fifth.—The completion of the Hospital affords us the means of thorough classification of the patients. We have now nine wards for women on the North, and eight for men on the South. Of the necessity for this separation and classification every one is well aware. It is perhaps more

---

requisite in our case than in County or State Asylums, since we receive private patients, as well as those of the humbler classes.

From these and other considerations it is a matter of great moment that our building has at last been brought to its present condition. Constructed in accordance with the well-matured plan recommended by the Association of American Superintendents, it is admirably adapted to the use for which it is designed; and having been completed, it now stands as a monument of the liberality of our Legislature and people.

---

## EXTENSION OF THE HOSPITAL.

---

Before it was practicable to complete the North Wing of the Hospital, additional land was not only desirable but indispensable. This urgent want had been pointed out in former reports, and after repeated endeavors to secure what was required, additional land was this year obtained both on the North and South boundaries. It was indeed a great acquisition, the importance of which is of course more easily appreciated by those resident at the place; but even to the eye of a visitor, the improvement is quite noticeable.

The addition includes rather more than six acres

of land, lying in close proximity to the Hospital. The Southern portion affords an excellent exercising ground for the men, most conveniently situated, overlooking the harbor and surrounding country, while the Northern portion gives us space for an independent entrance road, long and urgently required.

### NEW ENTRANCE.

No sooner was the title perfected to the land recently acquired, than a new road was made. This at first connected the old entrance road at the rear, with the road leading to the wharf, and with that in front of the building. Over the former of these, all the fuel for our use in winter had to be carted, and the want of this connection would have led to much additional expense in truckage, as well as delay in discharging the cargoes of coal.

The next step was to open a suitable approach to the Hospital from the Dartmouth highway. Owing to the great declivity of the ground on the North (already alluded to) it became necessary to locate the road nearer to the new wing than would otherwise have been desirable. By filling up extensive hollows with boulders and broken stone, a substantial road of good width and of easy grade, was opened before the setting in of winter.

urgently

The work on this roadway was done almost entirely by the patients, who set about it with a hearty good will. It led to the clearing up of land in the vicinity, since several hundred tons of stone were used in making it.

A suitable gate, constructed of wood and iron, of good design, combining lightness with strength, has been placed at the main entrance, on the extreme north east corner of the newly bought land.

This location of the road brings visitors by an easy and direct route to the front of the Hospital, avoiding the out buildings and their surroundings, and keeping at some distance from the patient's windows.

At the point of intersection of the shore road with the main approach, a gas pipe has been laid; and when lamp-posts are provided, the access to the building will be easy and safe in the darkest nights.

### IMPROVEMENTS INTRODUCED IN THE NEW WING.

---

While carrying out the original design of the Hospital, it was found practicable to improve in some respects upon the portion first built. Cast-

iron stairways, instead of granite, had already been used in the last extension; in the new wing, substantial hand rails were added, which are found to be very serviceable.

Window glass of extra thickness has been supplied in the halls devoted to excited patients, and the panes being small they cannot be broken, except by using a stone or other heavy instrument.

In six rooms on each flat of the North Wing, sliding shutters have been provided, controlled by lock and key.

A drying closet heated by steam, has been added to each bath room; and the floors of the bath rooms and water closets are of tiles instead of wood, adding to the appearance as well as the durability.

Electric bells, communicating with the medical office, have been introduced in the several wards, in lieu of the ordinary house bell.

The external walls of the entire new wing are built hollow, and connected by cast iron ties, an interspace of two inches having been left. They are covered with mastic—blocked off to resemble free stone—while internally they are coated with cement, and finished with plaster.

The flues for heating and ventilation are built in the internal walls only, the latter being carried into a horizontal shaft in the attic, and thence to open outlets.

Internal double sashes are provided for winter use, in all room and corridors that have more than one window. These sashes are jointed and hinged, eighteen inches from the top, so that the window can be opened for ventilation when required.

The improved heating arrangement of the North Wing was fully described in last year's report. Its essential point consists in having a separate coil of steam pipe for every hot air flue.

---

### ALARM OF FIRE.

---

About midnight on the 13th May we were aroused by our next door neighbor, Mr. Minchu, with the appalling announcement that the Hospital was on fire. From his residence he had seen the flames burst forth from a window in the South wing, and on hastening to the spot we found that one of the inmates had made a bold attempt to destroy the building. He had placed his bed and bedding close to the window, and these together with the window casing were entirely consumed, and about six feet square of the floor deeply charred. The fire would doubtless have extended to the upper story had it not been thus fortunately discovered, and if the roof had ignited, there is no saying what the result might have been.

The alarm being given, the officers of the Hospital were promptly in attendance, and no confusion or panic occurred. The hose and branch were already in position and connected, so that an abundant supply of water was immediately at our command.

The flame and smoke having issued through the window, the patient himself was uninjured. The only sufferer by the event was the man in the room immediately above, who to avoid suffocation, wisely wrapped his head in a woolen coat, and laid prostrate on the floor. He was immediately extricated, and suffered but little inconvenience, beyond the terrible fright to which he had been subjected. He has since been discharged, recovered.

None of the other patients were disturbed; and the debris being cleared away, it was not long before all the employes had resumed their respective places.

The incendiary had doubtless concealed a match for this particular purpose; nor can we very well guard against a similar contingency in the future, without curtailing the privilege the patients enjoy of smoking tobacco.

Our watchman had that night been placed on special duty near the centre building; hence it was no fault of his, that the alarm came from an outside source.

As a precautionary measure an electric bell has been placed in the Engineer's apartment, so that he can instantly be called in any emergency.

## ACKNOWLEDGMENTS.

---

From the opening of this Hospital, sixteen years ago, no annual report has ever been wanting in an extensive list of donations and benefactions. A generous community has not failed to appreciate the charitable aspect of the Hospital—and they justly class the insane in the same list with those deprived of special senses; as the blind, and the deaf. They considerately provide for the sick and suffering, the poor and the desolate, and recognize our patients as being no less entitled to their sympathy and aid.

Hence the many spontaneous and liberal contributions to the Hospital; the kind attendance of professionals and amateurs at our theatrical and musical entertainments; as also the means readily provided for excursions, sleigh drives, and the like.

For this commendable liberality on the part of the public, we are indebted in no small degree to the generosity of the members of "the Fourth estate, in affording gratuitous announcements of our various entertainments as they occur, and in noting the donations received from time to time, thus keeping the institution clearly on the list of "the local charities."

To the press we owe thanks also for their continued kindness in forwarding nearly every news-

paper in the Province for the benefit of our inmates. We receive regularly:—

- The "Acadian Recorder." (daily).
- " "Christian Messenger,"
- " "Church Herald," (Toronto),
- " "Colonial Standard." (Pictou),
- " "Eastern Chronicle," (New Glasgow),
- " "European Mail," (London),
- " "Halifax Evening Express," (daily),
- " "Halifax Citizen,"
- " "Halifax Reporter and Times," (daily),
- " "Journal of Agriculture,"
- " "Morning Chronicle,"
- " "Morning Herald,"
- " "North Sydney Herald," (Cape Breton),
- " "Nova Scotia Farmer," (Annapolis),
- " "Presbyterian Witness,"
- " "Provincial Wesleyan,"
- " "Summerside Progress," (P. E. Island),
- " "Weekly Monitor," (Bridgetown),
- " "Western Chronicle," (Kentville),
- " "Windsor Mail," (Windsor),

The respective publishers will please accept our sincere thanks.

Mrs. Montagu, of Dartmouth, kindly continues to forward regular supplies of illustrated and other Australian papers.

The Ministers of the Gospel have given their attendance from week to week as heretofore, and have faithfully administered to the sick and dying.

Miss Dix, the justly celebrated philanthropist, who furnished our plans and selected the site many years ago, has acceded to the request of the

NOTE.—To the above list of free papers the "Weekly Graphic" has recently been added.

Commissioners and Superintendent, and has recently honored the Hospital by the gift of a valuable and excellent portrait, admirably executed, and handsomely framed, which now graces our Board Room, and forms a fitting memorial of one who has, in other respects also, been a benefactress to the Province.

Rev'd. A. Gray, of Milton, Queen's Co., kindly gave us a special evening service; and a few days afterwards, he exhibited a number of interesting views by means of the Stereopticon.

The late Rev'd. R. Warren, M. D., favored us with an exhibition of dissolving views; and the officers and members of the North British Society, enlivened our household with songs, readings and recitations.

The Gentlemen's Amateur String Band, of Halifax, kindly gave us an evenings entertainment, and for a similar enjoyment we are indebted to the Band of H. M. S. "Bellerophon." At the conclusion, the solo, duet, and quartette of "Good night--all's well" was exquisitely rendered, and being repeated in the open air, was heard in every part of the Hospital, and will long be remembered.

Mr. Thomas S. Hagarty, aided by Mr. Sharpe Bandmaster of H. M. S. "Bellerophon," and by Mr. J. Godfrey Smith, afforded our inmates a delightful concert, Miss Glennon, Miss Compton, and others kindly lending their assistance.

Messrs. Nannery & McDowall's theatrical troupe favored us with an enlivening entertainment, and Mr. Barnabee and associates gave an evening performance which was highly appreciated. The violin solo by a young lady, was enthusiastically received.

To the Managers of Messrs. Stone & Murray's Railroad Circus, we are again indebted for free admission for all the patients able to attend. The Directors of the Provincial Exhibition of Fruit, Stock, and Farming Implements, very thoughtfully gave free entrance to a like number. The crossing to and from Halifax on these occasions, was of itself highly enjoyable.

To Captain McKenzie and the Directors of the Halifax Steamboat Company, we owe thanks once more for our annual excursion in the good steamer "Mic-Mac."

The British American Book and Tract Society continue to send us large monthly packets of interesting and instructive periodicals, well assorted.

Four quarto volumes of valuable reports were received from the office of the Surgeon General of the United States Army at Washington.

We are under obligation to Messrs. A. Stephen & Son, for a Parian bust of Prince Albert, and for a number of framed Chromos, for our new wards.

To Thomas Mott, Esq., of Dartmouth, we are indebted for the privilege of making a roadway on his property, on our Southern boundary. This

served for a long period as our only means of communication between the wharf and the Fuel Yard, and was at that time the only route by which carriages had access to the front of the Hospital.

To the Grand Jury of Halifax County, J. R. Murray, Esq., Foreman, we owe thanks for the appropriation of their fees for the benefit of one of our indigent patients.

Contributions towards the purchase of a new Organ for the Hospital have flowed in most liberally. Through the kind aid of Miss Fairbanks, of Dartmouth, and of Mrs. George Downie, our Supervisor, last year's appeal has been nobly responded to. Sums varying from one dollar to one hundred have been handed in, amounting at the present time (January 1st.) to six hundred and sixty-three dollars (\$663). We hope to be able to append to this report, a statement showing the cost of the organ, and a list of the contributors.

George G. Dustan, Esq., Chairman of the Board of Commissioners, has renewed his former kindness by giving carriage drives in summer and sleigh drives in winter to a number of the patients and attendants.

Miss Dustan, of Woodside, has placed us under obligation by having consented to preside at the organ on Sundays, during the prolonged absence of our usual organist.

For the preparation of the numerous statistical tables appended to this report, I am once more

indebted to our worthy Bursar, Thomas McCulloch Esq.

For six weeks leave of absence kindly granted in the autumn, I have to return my best acknowledgments to the Honorable the Attorney General, ex-Commissioner—as also for his and your own generous support and encouragement under the difficulties incident to Hospital management.

## REQUIREMENTS.

The portion of the Hospital first built needs a thorough repair, more especially the windows and floors. A good opportunity for this is now afforded, by the transfer of the female patients to their new quarters.

The barn requires to be raised and repaired, or what perhaps is better, to be replaced by a new one.

The wharf should be lengthened very considerably, to afford a greater depth of water for vessels bringing coal and produce.

A porter's lodge is needed at the new entrance; and a mortuary on some part of the grounds, for the reception of the dead.

A better provision against fire, is one of our immediate requirements.

The laying out of the grounds, and the requisite grading, terracing, and planting, ought not to be longer delayed.

A new road East of the Hospital, at a greater distance from the rear of the building than the present highway, is certainly a desideratum.

The foregoing list embodies our chief requirements, which will doubtless be most economically met by being promptly attended to.

---

### CONCLUSION.

---

In accordance with the bye-laws, the "condition, progress, and requirements" of the Hospital have been pointed out. A summary of the events of the year has been given, and a statement of our indebtedness to individual benefactors.

It now remains to express our sincere gratitude to the Supreme Being for past mercies, and to invoke His blessing upon our future labors.

The last hour of the old year was spent by a large number of attendants and many of the patients, in our chapel, where songs of grateful praise resounded at the solemn midnight hour, and ushered in the coming year.

JAMES R. DEWOLF, M. D.,  
*Superintendent.*

## APPENDIX.

## ADMISSION OF PATIENTS.

IN order to be benefitted by Hospital treatment, Patients should be placed under care at an early stage of their disease. The Hospital being already filled, admissions are necessarily restricted to cases of recent occurrence, which by law have a preferential claim.

The first step towards the reception of a Patient into Hospital, is to ascertain whether there be a vacancy, by enquiring at the office of the Department of Works, or of the Medical Superintendent. *No patient should be sent until this enquiry is made. It will often save disappointment and expense.*

A full statement of each case, in answer to questions hereto appended, should be forwarded with the application, giving all the particulars, in as accurate and correct a manner as practicable, with the aid of those best qualified to afford the required information.

If the patient can be received, the insanity must be certified by two Medical men, separately, according to a printed form. *Attention is requested to a foot note on the Blank Certificate.*

Two good suits of clothing, at the least, should be sent with every patient. A third suit for occasional use is very desirable.

Those about to be committed to Hospital should *invariably* be informed of it *before leaving home*. Everything like deception must be scrupulously avoided. No promise as to the precise time of their return should ever be made. A twelve-month's residence, in every case should be provided for.

If the friends can afford the cost of maintenance, they are required to pay the first quarter's board, fifty dollars (\$50), in advance, at the office of the Works Department, and *an order from that office is required before admission*. If unable to pay the customary rate, the friends can petition for a reduction.

Those who have no means of payment, are chargeable to their respective counties, and for this class an order signed by two Justices of the Peace is required.

The Medical Certificates furnish the evidence on which the Justices grant their order. No depositions of witnesses are required, nor is a public investigation called for in any case.

## DISCHARGE OF PATIENTS.

When a patient recovers, the friends are notified, and upon their application, with the Medical Superintendent's Certificate, the order for discharge is granted by the Department of Works.

If the removal be desired before the patient is restored, and contrary to the advice of the Superintendent, the friends are required, before the order for discharge is granted, to enter into bonds for the safe keeping and proper care of the patient.

In cases of doubtful recovery, it is now customary to grant leave of absence "on trial" for a period varying from one to six months; if a relapse occur during this probationary period, the patient is at once re-admitted without any new formalities.

STATEMENT TO BE FORWARDED TO THE MEDICAL SUPERINTENDENT, WHEN APPLICATION IS MADE FOR THE RECEPTION OF A PATIENT.

1. Name of patient (in full),
2. Where born,
3. Son (or daughter) of,
4. Residence, County of,
5. Age, Last Birthday,
6. State as to marriage,
7. Number and Age of Children,
8. Occupation, (or that of Father or Husband),
9. Natural Disposition,
10. Habits, in Health—as to Temperance, etc.
11. Education.
12. Religion.
13. Age at first attack.
14. Insanity, how first manifested.
15. Number and duration of attacks.
16. Where under treatment, and when.
17. What relatives similarly affected.
18. Supposed cause, Remote,
19. " " Recent,
20. Duration of present attack.
21. State as to sleep,
22. Appetite for food,
23. State of bodily health.
24. Whether subject to Epilepsy.
25. Any faltering of Speech, or loss of power,
26. Present habits and propensities.
27. What Delusions.
28. Whether Suicidal (attempted or threatened), and how,
29. If dangerous to others, how,
30. Pecuniary Circumstances, (or to whom chargeable,)
31. Post-office address of nearest friend, and degree of relationship.
32. Other Particulars.

I Certify that to the best of my knowledge the above particulars are correctly stated; and I hereby request you to receive the above named \_\_\_\_\_ whom I last saw at \_\_\_\_\_ on the \_\_\_\_\_ day of \_\_\_\_\_, (being within one month from this date), as a person of unsound mind as a patient into the Nova Scotia Hospital for the Insane.

Name

Address

Degree of relationship (if any) or other circumstances of connection with the patient.

N. B.—If any of the particulars in this statement be not known, the fact to be stated. No patient to be sent to Hospital until a reply shall have been received to this statement.

**N. B.**—Two Certificates (dated within one month of the commitment) are required in every case. The second should not be signed by the father, brother, son, or assistant of the Medical Practitioner, who has signed the first certificate.

\* The facts upon which (from personal observation) the opinion of insanity has been formed should always be specified.

## NEW CHAPEL ORGAN.

THE sweet strains of music are, perhaps, nowhere better appreciated, or of more real service than in an Hospital for the Insane. From the first, no opportunity has been lost of providing musical instruments and musical entertainments for the inmates at Mount Hope. Fifteen years ago a subscription was set on foot, to enable us to buy a Piano Forte. On learning this, Edward Binney, Esq., with his accustomed liberality, gave us an excellent instrument, the best to be had in Halifax, and the money previously subscribed for the Piano, was thus made available for the purchase of an Organ.

A small second-hand one was bought, which served for several years for our Sunday services, and occasionally for practice on the part of such of the patients as could preside at the instrument. Frequent repairs were required, and these proved eventually of no avail, so that it became necessary to replace the old Organ by a new one.

We were greatly encouraged in making an appeal for this purpose, by the generous co-operation of a professional brother. Dr. J. E. Tyler, formerly Superintendent of the McLean Asylum, Boston, who with a friend contributed seventy-six dollars towards a new instrument. A friend in England offered twenty-five pounds sterling, and these handsome donations were speedily followed by others ranging from five to twenty dollars, which were cheerfully contributed, and very soon amounted to the sum required for a first-class Organ.

After diligent enquiry it was ascertained that Messrs. E. & G. G. Hook & Hastings, Organ builders, of Boston, would give by far the best satisfaction both as regards workmanship and efficiency, and could supply us much earlier than any other makers. An order was sent to this firm in January, and in precisely two months time the organ was in our chapel and tuned—and it has proved entirely satisfactory.

It is enclosed in a neat and substantial Walnut case, of handsome design, with decorated pipes, and has ten stops. Its tone is soft and rich, combining great sweetness with full effectiveness. Possessing as it does all the requisites of a chapel organ, it is well worth its price—One Thousand dollars, American currency. In-
