# CHIGNECTO POST.

Deserve Success and you shall Command it.

VOL. 14.—NO. 12.

SACKVILLE, N. B., THURSDAY, JULY 26, 1883.

WHOLE NO. 687.

**Farm and Household.**  
**Dominion Agricultural Experiments.**  
We give below some of the results of the experiments conducted during the past two years, at the Ontario Agricultural College and Experiment Station. Some of these results are of great importance, and all of them are of interest to the farmer. The management of this station is in very able hands, and results reported may be relied upon.  
1. Corn fodder newly cut and drawn from the field when green, cut into inch lengths, packed into a common rough stone root cellar half under ground, and weighted with 600 pounds per superficial square yard, can be preserved, except adjoining such a wall, for an indefinite time in a condition fit for animal food, at a cost not exceeding 1¢ per ton, exclusive of cultivation.  
2. In competition with Sweden turnips, ensilage corn fodder gave fifteen per cent. less milk, thirty per cent. less butter, and a poorer marketable butter in color.  
3. Damaged wheat can be very economically used in the fattening of cattle—nine pounds per head per day gave a daily increase of two pounds per head per day, at a cost of 4¢ per pound per head per day to the live weight.  
4. Rice meal, in the fattening of cattle, gave a daily increase of 1.81 pounds per head per day, by the use of six pounds per head per day, at a cost of about seven cents per pound live weight.  
5. Barley meal in cattle fattening requires a large amount of other foods in association, and 11½ pounds per head per day gave a daily increase of 2.14 pounds per head per day, at a cost of seven cents per pound live weight.  
6. Corn meal took the highest place in a daily ration of increase in the fattening of cattle: 9½ pounds per head daily gave 2.31 pounds per head per day, at a cost of 55 cents per pound of added animal weight.  
7. For use as the second best daily rate of increase at the least cost of all the regular cattle-feeding grains. Eight and one-half pounds per head daily gave a rate of 2.28 pounds, at a cost of five cents per pound of the weight added to the animal.  
8. A pure-bred Shorthorn steer can be brought to a weight of 1,700 pounds, when one month under two years old, or a daily rate of increase equal to 2½ pounds per day.  
9. Hereford grade steer calves can be made to average 611 pounds in 285 days, or a rate of 2½ pounds per day.  
10. Aberdeen Poll grade steer calves can be made to average 720 pounds in 275 days, or a rate of 2½ pounds per day.  
11. During the winter a 1,000-pound steer can consume daily ten pounds hay, thirty-nine pounds turnips, four pounds bran, and nine pounds of a mixture of grain, upon which it will add 2.11 pounds to its live weight.  
12. One pound of added weight to a 1,000-pound steer can be obtained from the use of various materials that contain eleven pounds of dry substances, chemically.  
13. By a large variety of experiments which several classes of cattle and many kinds of food, we find the actual cost of adding one pound to the live weight of a 1,000-pound animal is six cents to the feeder who grows his own materials, and nearly twelve cents when the food is bought in the regular market—manure and management not considered.  
14. Sugar beet, weight for weight with mangels and turnips, and in association with equal kinds and quantities of other foods, gave the highest returns in feeding cattle, or 2.70 pounds per head per day.  
15. Mangels gave 2.38 pounds per head per day under similar conditions to the sugar beet.  
16. Turnips (Swede) added 2.30 pounds per head per day to the average steer that weighed 1,061 pounds under conditions similar to mangels and sugar beet.  
17. There is either a simple natural reason, or a hidden chemical one in the fact that by the use of less grain and more roots, cattle gave a greater daily return in live weight.  
18. The present market for wool and mutton in Ontario, is best supplied to the profit of the farmer by the Shropshire Down shearing grade, which gives annually fourteen per cent. more value than any other in our experience.  
19. There is a remarkable uniformity in the annual value of wool and mutton from the grades of Cotswold, Leicester, Merino, Oxford Down and South Down, resulting from the differences in weight and value of both products.  
20. From nearly 5,000 observations, the following notes have been obtained as evidence of peculiarities, characteristics, or other indications of breeds of cattle:  
That there is no such class as a "general purpose" breed—one to do the best for the dairyman and the butcher.  
An average cow for dairy purposes should give twenty pounds of milk per day during 200 days every year; eight pounds of cream for every one hundred pounds of milk; forty-five pounds of butter for every one hundred pounds of cream, and fully ten pounds of cheese from every 100 pounds of milk.

Bulk, volume, or per cent. of cream is no safe criterion of the quantity of butter in the cream; weight alone is the proper mode of judging.  
Breed, as much if not more than food, affects the quantity and quality of milk, cream, butter and cheese. In Ontario Experimental Farm experience, the Shorthorn is an average milkier, shorter in duration per season, low in specific gravity, high in per cent. of cream, proportionately in butter, and also high in cheese production. The grade of this breed approaches the nearest of any others to what is called a "general purpose cow."  
The Aberdeen Poll is low in quantity of milk, and the second highest of any in specific gravity. The grade of this breed is much improved in milking properties, giving a greater weight of cream, though a lower per cent. of it.  
The Hereford is not more prominent than the Shorthorn and Aberdeen Poll in regard to milk, except in proportion of butter from cream, in which it is highest. The grade of this breed is much improved in milking properties, giving a greater weight of cream, though a lower per cent. of it.  
The Devon is most distinct in highest specific gravity of milk, and the weight of cheese from milk. We have no experience with the grade of this breed.  
The Galloway milk appears to be of a peculiar texture—rich, or so small in butter globules as to rise very slowly and very indistinctly in the test tube.  
The Ayrshire is a particularly heavy milkier, giving five times her own weight per season. The milk is somewhat low in specific gravity and per cent. of cream, but is over the average in cheese production. The Ayrshire grade is not distinct in any respect except in duration of milking season.  
The Jersey is remarkable for proportion of cream, averaging thirty-five per cent., and giving a value of dairy products incomparable to any other breed in our experience.  
**Refrigeration in Fens.**  
The premonitory stage of yellow fever is characterized by an intense longing for refrigeration; fresh air, cold water, cooling fruits or fruit extracts. The fever-dreams of an ague-patient are crowded with visions of tree shade and mountain brooks. Even chills are accompanied by a burning thirst; and during the stage of an intermittent fever the temperature of the system is actually higher than during the sweating stage; according to Dr. Francis Home, respectively 104° and 99°.  
In the first place, remove the patient to the coolest available room in the house. The art of house cooling seems to have been lost with ancient civilization in Southern Europe. There is not a room in narrowest alley of the Naples quarter where open windows and tenanted roof would lead to a lower temperature from twenty to thirty degrees below that of the outer atmosphere. Create a draught, and if possible a cross-draught, without fear that the admission of air from a sun-blistered courtyard, for instance, would make the room equally uncomfortable; the thermal contrast itself will create an air-current, and the draught will be to the feeling than stagnant air of an actually lower temperature. The shade of a leafy tree is never more grateful when the surrounding fields tremble under the rays of a vertical sun. The evaporation of ice-water, or even of common cistern-water, will greatly aid the good work. Pour it into flat basins, tubs, etc., and place them in the center of the room, or get a wheelbarrow full of mangels and turnips, and place them at any pottery, put them close together on the floor and sprinkle them from time to time with cold water. The water will soak into the porous mass and evaporate more rapidly than from an impervious surface. A bundle of bathing sponges or a sheaf of bulrushes, suspended from the ceiling and sprinkled from time to time, will serve the same purpose; and, where ice is cheap, a dog's day siccose can be easily reduced to an April breeze. But the best time to begin the refrigeration-cure is an hour after sunset. On this continent alone, the night-air super-tension costs annually the lives of about fifteen thousand human beings; for at least one-half of the thirty thousand North Americans who succumb every year to yellow fever, ague, and congestive chills, could have saved themselves by opening their bedroom windows.—Dr. Felix Oswald, in Popular Science Monthly for August.

**Butter Packages.**  
Mr. Tinkham, of North Pomfret, Vt., has invented a butter package which is a novelty and is thus described in an exchange: "Mr. Tinkham's package consists of a small spruce box nicely made, nearly square, though somewhat greater in length than in width, of the exact capacity of five pounds of butter, though each parcel is placed upon the scales and weighed to a nicety. Before placing the butter in the box, a sheet of specially prepared paper, which is the product of wood pulp, and both tasteless and odorless, of a light buff color and not costing over ten cents per pound, is used as a separator and weighed to a nicety. The butter itself is really rendered the package almost impervious to the air. A shipping case is provided, made of pine or spruce, sufficiently large to contain twelve five-pound packages. This case is lined inside and the twelve packages covered with a piece of fabric, made up of wool and hair known as steam-felting. This felting is from ½ to 1 inch in thickness, and costs about \$1 to each case. It forms a complete protection to the butter from the atmospheric changes for at least thirty-six hours after packing, even in the hottest weather. Butter shipped from Vermont to Boston arrives in splendid condition.  
Among the advantages of this package are these: Neatness in cutting for the table above rounded packages, better adaptation in size to the wants of the consuming population, and a saving in freight above butter packed with ice, also the absence of moisture, which is so frequently noticed in ice-packed butter. The package is unpeppered.  
**Different Herbs as Medicine.**  
On the authority of the Medical Record, asparagus is a strong diuretic, and forms part of the cure for rheumatic patients at such health resorts as Aix-les-Bains. Sorrel is cooling, and forms the staple of that *soupe aux herbes* which a French lady will order for herself after a long and tiring journey. Carrots, as containing a quantity of sugar, are avoided by some people, while others complain of them as indigestible. With regard to the latter accusation, it may be remarked, in passing, that it is the yellow core of the carrot that is difficult of digestion—the outer, a red layer, is tender enough. In Savoy, the peasants have recourse to an infusion of carrots as a specific for jaundice. The large sweet onion is very rich in those alkaline elements which counteract the poison of rheumatism. If slowly stewed in weak broth, and eaten with a little Neapolitan pepper, it will be found to be an admirable article of diet for patients of studious and sedentary habits. The stalks of cauliflower have the same sort of value, only too often the stalk of a cauliflower is so ill-boiled and unpalatable that few persons would think you for proposing to them to make part of their meal consist of so uninviting an article.  
**Early and Late Out Hay.**  
The following comparison in feeding early and later cut hay, was made at the State College farm of Maine, and is copied by the Maine Farmer by permission of Secretary Gilbert from advance sheets of his next report:  
It was found that 270 lbs. of mixed grain and 720 lbs. of early hay, produced 990.12 lbs. of milk, which yielded 52.98 lbs. of butter, and the milk contained 37.36 lbs. of fat. The same quantity and quality of grain as above, fed in connection with 720 lbs. of late hay, gave 921.15 lbs. of milk, which yielded 48.25 lbs. of butter, the milk containing 35.3 lbs. of fat. In this test the comparative value of the early and late hay for milk production was as 100 to 93.84; or, the daily feeding ration of 20 lbs. of early hay was equal to 21.42 lbs. of late hay for the same purpose. There was practically no difference in the amounts of butter obtained from each fodder. It was feared that the appetites of the animals might not be as good for the late as for the early hay, but such was not the case, as was shown by the fact that the early hay was consumed in only two days, while the late hay was consumed in three days. In only two of the six changes from early to late, was there any dislike exhibited, and this was overcome during the first day of feeding upon it.  
**What They Do With Poultry.**  
The Poultry Yard says:—In France, when poultry are dressed, the waste products are scrupulously saved. The feathers are carefully collected and sorted, and when dried are sold to dealers. The intestines are boiled, the fat skimmed off, mixed as food for poultry, and the liquor fed to pigs. The combs and kidneys are sold to pastry cooks, the first for decorating and the latter for use in the head, neck and foot are sold to hotels, restaurants, etc., for flavoring sauces, or boiled down to make chicken jelly.  
One of the most successful and benign combinations ever effected is that of the medicinal oils of which Thomas' Eucalypti Oil is composed. This medicinal compound not only possesses remedial efficacy of the highest order, but, because it contains no alcohol, its influence is not weakened by evaporation, which is the case with a great many oils of doubtful efficacy, which have an alcoholic basis. It is an incomparable specific for affections of the throat and lungs, relieves chronic hoarseness and feebleness of the voice, and is a superb remedy for tonsillitis, pharyngitis, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. Swelling of the neck, tumor, neuralgia, laryngitis, rheumatism, piles, and other diseases which can be effected by outward treatment, yield to its operation with greater promptness and certainty than to that of any other remedy, and when used internally, it is equally efficacious. Dysentery, bilious troubles, piles, scorbutic affections, and consumption—breeding malarial—catarrh. DUNLAP BROTHERS &amp; COMPANY,

July 28 AMHERST, N. S.

## WHEEL RAKES

## AND MOWERS.

WE HAVE NOW AT OUR STORE AND AT THE RY. STATION:

55 COSSITT BROS' Ithaca Pattern Wheel Rakes.

So well known and so fully appreciated as the Best Rake in the market. We also have ONE CAR LOAD.

55 RAKES known as the MASSON RAKE.

Which we now for the first time introduce in the market, and we believe it to be a Rake without a superior. As a PRIZE TAKER at the Quebec and Ontario Exhibitions it is a great success. It is purely a Self-Dumper. I saw and examined it first in September last at the Toronto Exhibition, where it took first prize. There it was held worthy of FIRST PLACE, and so also in western Nova Scotia, where it has been sold for the two last seasons. We ask for a close examination.

ALSO WE OFFER

25 COSSITT BROS' MOWERS.

Which we have sold for years. They need no recommendation. ALL CHEAP for cash, and for sale on LIBERAL TERMS.

Sackville, June 20, 1883.

J. L. BLACK.

## !!WHAT WE ARE DOING!!

WE ARE OFFERING ONE LOT OF

NUNS' BEIRGE WORTH 20 CTS. PER YARD FOR 20.

To be sold at Public Auction, on SATURDAY, THE 22ND DAY OF SEPTEMBER, next, at 10 A.M., at the Court House, in Dorchester, between the hours of twelve o'clock noon and five o'clock in the afternoon:

ALL the right, title, interest, property, claim, and demands of the late William D. Knapp, since deceased, his personal rights, and right of entry, both at law and in equity, at the time of the receipt of the execution in this case, on 19th day of January last, A.D. 1883, of, in, and to all singular the land and premises situated in the Parish of Sackville, in the County of Westmorland, bounded and described as follows: On the south-east by the main public highway leading from Crane's Corner to the Four Corners, on the south-west by lands of Christopher W. Cole, on the north-west by lands of Eliza B. Knapp, containing one half acre, more or less, together with all buildings and appurtenances to the same belonging, or in any way appertaining; and the Lands and Premises situated in the Parish of Westmorland, in said county, described in an Indenture of Mortgage from Daniel Brown to the said William D. Knapp, registered in the Westmorland Records on the 2nd day of June, A.D. 1871, in Libro E. 3, Folio 167, No. 29,578. Also all other real estate of the said William D. Knapp, wherever situated or howsoever described within any bailiwick, the same having been seized under and to be sold by virtue of an execution issued out of the County Court of the County of Westmorland at the suit of Frank H. Morris vs. the said William D. Knapp.

ROBERT A. CHAPMAN, Sheriff.  
 Dorchester, June 11, 1883.

## Mail Contract.

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on 27th July, for the conveyance of the mails to the Province of New Brunswick, for four years, one per week each way, between Lewis Mountain and Petticoat from the 1st of October next.

The conveyance to be made in a suitable vehicle drawn by one or more horses. The mails to leave Petticoat on Friday of each week at 11:15 o'clock a.m., or as soon as practicable after arrival of day mail train from St. John reaching Lewis Mountain in two hours and thirty minutes from hour of despatch.

Returning to leave Lewis Mountain at 4:45 o'clock p.m. on the same day. Printed notices of the terms of the proposed Contract may be seen, and blank forms of tender may be obtained at the Post Office of Lewis Mountain and Petticoat.

JOHN MCILLIAN, C. O. Inspector.  
 St. John, 15th June, 1883.

## 1883. EXHIBITION. 1883.

An Exhibition will be held in St. John, New Brunswick, commencing Oct. 2nd, 1883. Open to Exhibitors from every part of the Dominion.

The Dominion Government, the Provincial Government, and the City of St. John have promised liberal grants of money towards the Exhibition, and the creation of new buildings in addition to those already on the ground, and for the general management of the Exhibition. The Exhibition will be open for all kinds of Agricultural Products, Live and Dead Stock, and Machinery and Manufactures in Metals, Wood, and other materials, Domestic Manufactures, and Fine Arts.

Freight will be carried at reduced rates. Space in the buildings and grounds will be given free.

This will be the largest and most thoroughly representative Exhibition ever held in the Maritime Provinces, and offers an excellent opportunity for the Manufacturers of the Dominion to show their productions to the people of the Maritime Provinces, and to the people of the United States and Canada, and to the people of the Dominion.

The Exhibition will be open for all kinds of Agricultural Products, Live and Dead Stock, and Machinery and Manufactures in Metals, Wood, and other materials, Domestic Manufactures, and Fine Arts.

## CAPTAIN JACK.

A Sketch of the Bay of Fundy.

CONTINUED.

'So yer see, Mister, it was because they had a kind of dislike for Dixon as caused John Daggett's friends to feel sorry for Polly. But they were surprised too. They all knew Polly. She lived near the boat dock at St. Andrews, near the smoke landed, and whenever the logs from Whale Cove hove in sight she was sure to leave whatever play or work she was about, and stand at the end of the long wharf waiting for the boat. Then when the smoke had landed, and the old folks were sellin' off the cargo, we young ones would go rompin' along the shore. In some of the rough games Polly sort of looked up to Daggett as the strongest of us, and she was a good deal of a trust him too, for it was once, as Ned Dixon was surly to Polly, that Daggett gave him such a flickin' as I guess he never forgot nor forgave. He was always tryin' to be kind and gentle to Polly, and she seemed loyal to him. An' so they grew up together to be a plain fisherman an' she to be one of the likeliest lasses about St. Andrews. But long after the childish games had been given up, she was a waiting for the boat, an' of all the smoke in the fleet, Mister Daggett's was mostly the first in. There was hardly a short-cut in the harbor—it might be but a strip of water between a cluster of rocks in the shore—so he didn't know, an' so he got ahead of his fellows toward the long wharf where Polly stood waitin' for him. An' so matters went on till the fishermen at whale Cove felt pretty certain as he was soon agoin' to bring pretty Polly Goodwin o' St. Andrews to the house his father had left him; an' yer may guess, Mister, as his friends were surprised when he come back from St. Andrews that day, an' says, when they begins a runnin' him about, 'Boys! yer father's daughter took her place. Fact is, Mister, they were too surprised to say anything right off, an' it was some time before the Harringtons asks:

'How did yer feel about it?'

'She told me she didn't care.'

'An' I'll say a word, says Ike, 'an' all my share o' to-morrow's catch as the match ain't none o' her makin'. Why, man, we ain't none of us so blind but what we've seen as she's been set on yer these many years.'

'Not just then—not just then,' faltered Daggett. 'She couldn't poor child, for she was tryin' to hard to keep from cryin' to say I thought I knew then as she didn't care for Ned Dixon, an' I was so to it.'

'Her father's in with Dixon an' his gang, an' he knows Dixon's got a bigger pile than I. An' then he's afeard o' Dixon, too; for it ain't so easy for smugglers ashore as it is at the Southern Cove, an' if Dixon should get mad, and peach, there's no knowin' what might happen. It's hard to hear, as yer all knows, for Polly an' I have been friends these many years, an' many a time in the storm an' in the calm, the thought of her has warmed me like sunshine. All I hope for is as Dixon will be good to her—so good as to make her forget me, for we've grown up together and worked hard together. But grumblin' is no use, and I ain't goin' to make Polly feel bad by bopin' around!'

'An' that, Mister, is how Polly Daggett came to get spoiled to Ned Dixon, an' Dixon no sooner got spoiled than he fitted up his house at Whale Cove right opposite to the boat dock, and took Polly for his wife. There, that was kind o' hard on Daggett; but I told yer how I didn't believe as Dixon had ever forgot the lickin' Daggett gave him, an' I guess he settled at whale Cove just out of spite. Daggett was more quiet than before, but he went about his work as usual, an' tried to be as friendly as ever with the fellows. Polly, too, became kind o' quiet, an' folks got to say after a while as she was some what odd. Not that she hadn't a smile for everyone, but there were lines in her face as never changed even when she smiled. She an' Daggett saw precious little o' one another, for he worked hard, got out early in the boats an' come in late. Daggett was more quiet than year after year, till it began to get around how as Dixon, who had kept steadily at smugglin' was beginnin' to smuggle some o' his crooked whiskey into himself. He staid away as good as dead, an' the Cove, an' when he did come here he was noisy and quarrelsome. Polly still wore a smile for all us, but it seemed as the lines on her face were gettin' deeper. It weren't many years after that afore a smuggler score an' more sprits into himself, an' were beginnin' to give Polly hard words. At any rate, he got to quarrellin' more, an' if it hadn't been for the folks were fond of his wife, he'd a had trouble time an' again. Daggett had notice to say when he heard 'em talkin' about Polly an' her troubles; he never staid to hear an' out. But he got more quiet like as years went on, an' sat near the window a lookin' out through the dark at the road. He saw a light there an' often he saw a shadow fall on the hangin'. An' people talkin' about Polly's troubles, when he knew about 'em himself, an' when he saw as great as a light there, he'd a had a burnin' till late into the night, an' had seen a shadow come and go, an' now an' then stand drawin' back the hangin' as a face peerin' up at him, an' down the road, till at last, when there was no more light, he'd a had a look at the light world, an' an' wonder it was he waited for him at all; for now, whenever Dixon came, he would go staggerin' past her up stairs, unless he had only a good reason for it, an' then he'd stop to curse and swear. 'One night it was very late before the light went out; Daggett had left

the window, an' was goin' up stairs when he heard a noise across the way. There was a loud knock at Dixon's door, an' a moment later he heard Dixon's voice. 'Hurry up yer blamed idiot! What are yer leavin' me standin' out here for? Didn't I tell yer as I'd be home to-night? Why ain't yer waitin' for me?'

'Just then Daggett, who had gone back to the window, saw the light again, an' heard some one at the door. At last a slight white figure held it open. Then he heard Dixon say again, 'yer blamed idiot, why weren't yer down waitin' for me as I told yer to do. Mind what I tell yer next time.'

'A moment later Daggett heard a cry of pain. He knew that the voice, Mister, the voice as he heard when he was played with little Polly Goodwin along the shore. He heard another cry, but before another came he was across the road an' his hand was at Dixon's throat. 'Unhand yer wife, villain!'

'He about to stand her, I say, or I'll throttle yer like a dog.'

'Save me! save me!' he heard Polly call out, at the sound of his voice, an' then he clutched with Dixon, who had let go of her as soon as he felt Daggett's hand on his throat. There was a short, fierce struggle, an' then Dixon went a spinny over the threshold out into the road, where he lay a moment without movin', while Daggett felt Polly's tremblin' form clingin' to him.

'Don't yer come back here again,' he cried to Dixon, 'don't yer come back here again to harm the lass, or by God I'll kill yer!'

'Dixon was up again, an' his face as white as paper, an' he hissed: 'I'll come back, mind yer. I'll come back; an' I won't come back alone. If there's law for me to be got in St. Andrews I'll get it. I can't say yer out the law will go to St. Andrews to-night, an' I'll be yer in iron. That's right yer hussy!' he called to Polly, hang on to arm, and shake agin him, for yer won't have him long to hang on to.'

Daggett pushed Polly back, an' closed the door, an' stood alone in the hall. Dixon, who had been away with a curse, an' walked toward the Cove, where the boats were moored. Daggett, though, didn't think he'd go to St. Andrews that night, an' he was dark, an' he saw other signs o' one o' those storms as yer know of that come up so sudden here, an' plays the devil while he lasts. But he felt as he must be near to Polly until day break, for he knew as it would go hard for her if Dixon was to come back. So he sat on the steps through the night an' the storm, while the wind howled around him an' the rain beat down.

'The next evenin', when he came away from the trawls, one of the fellows comes up to him an' says to him:

'Daggett, I guess it's best as yer should tell her.'

'Toll who?'

'I'll tell Polly Dixon.'

'What about?'

'Why don't yer know as Dixon's boat ha' floated ashore near Seal Cove. He must ha' been out in last night's storm.'

'It wasn't much Dixon had left, so Polly opened store here, an' it's been agoin' now three years. Folks used to ask Daggett how he took the news about Dixon's drownin', but he never told. Fact, Mister, he didn't talk much about her any more. But last evenin' some of her friends had grown up with him, seen him a-comin' toward 'em from the store, an' when he got to where they were a-cleanin' the catch, he steps an' says, quiet like: Boys, Daggett's gone an' took me this time!'

'An' that, Mister, is why Polly got more takin' ways than ever just now. John Daggett's a weather-baten old chap, but I reckon she knows as her heart beats as warm for her to-day as it did the day he first asked her to marry him. 'An' do yer be John Daggett? I asked Capt. Jack, who seemed to have finished, and was knocking the ashes out of his pipe.

'Well, he said, deliberately, 'I guess yer know him; but I guess yer ain't never met him in person. His name is John Daggett; but folks hereabouts calls him Captain Jack, likewise the 'fog horn.'

'Likewise the 'whistle,' I heard from behind, and turning around I saw him standin' in the store, and smiling down upon Captain Jack just as happily as if he was still pretty Polly Goodwin o' St. Andrews. -Gustav Kobbé in Harper's Christmas.

**COQUETING WITH CONSUMPTION.**—Some people, troubled with coughs seem absolutely to coquet with consumption, encouraging it by a total neglect of medicine, and again attempting to stave it off with ill-chosen cough remedies. How much wiser to eradicate it at the outset by using Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda. Promptitude in the use of this medicine cannot be strongly urged upon those who are thus tempted, as it is a disease so severe during the winter as our own. The public generally as well as the medical fraternity, is acquainted with the value, as a remedy for colds, coughs, and troubles of the purified oil of the Cod's liver. United with it in this standard Emulsion are the finest tonics in existence, namely, lime and soda hypophosphites, which the chief components, phosphorus, and vitamins of the blood, and invigorant of the system. Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda.
