The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par la première page et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsqu'un document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Statement by C. N. Bell

**SECRETARY OF
THE WINNIPEG BOARD OF TRADE,
SEPTEMBER 1st, 1910**

The importance of Winnipeg as a grain market is not fully realized in business circles throughout the world generally. The following statement shows the actual receipts of wheat at Winnipeg as compared with the actual receipts at the principal grain markets in the United States. It is to be noted that the figures for Winnipeg are taken from the Dominion Government Grain Inspector's records filed daily with the Winnipeg Board of Trade under Dominion Law, and are an exhibit of Western Canadian wheat actually received in the railroad yards in Winnipeg, and these statistics do not include grain shipped from Southern Manitoba direct to Duluth via the Great Northern Railway Company's lines, nor do they include

local deliveries, nor grain inspected at Calgary a percentage of which does actually pass through Winnipeg yards. It will be seen from the statements that Winnipeg, by a good margin, is the greatest actual wheat market on the North American Continent. During some years past it has been common with Western Canadians to predict that "some day" Winnipeg receipts would reach those of Minneapolis, which city for many years has been by a very large surplus the largest wheat receiving centre in the United States. The fact that the receipts at Minneapolis fell off as compared with the previous year, while those at Winnipeg increased by over fifty per cent. are most significant of what will follow in the near future when more than a mere fraction of Western Canada's lands are settled on and cultivated. The United States and Montreal wheat receipt figures given in this statement are taken from the annual report of the Minneapolis Chamber of Commerce, and compiled from returns secured by that Chamber from the

boards of trade or grain dealing associations at the points quoted. The figures from the United States points (and Montreal) are for the calendar year ending 31st December last, while the Winnipeg figures are for the crop year ending 31st August, 1910. It is particularly interesting to compare the receipts of wheat at Winnipeg with those at places like Chicago, Milwaukee, Kansas City and other old time grain centres. The receipts at Buffalo are not receipts that make a large market and indeed the receipts shown for Buffalo include a very large quantity of Manitoba grain handled on the Winnipeg Grain Exchange and merely shipped through Buffalo in the ordinary course of transportation.
