A TRIP TO ST. GEORGE

"The Granite Town" as seen by a writer in the
Eastport Sentinel.

(Eastport Sentinel)
The steamer Aurora made her annual trip to St. George last Saturday, and although the start was made in a dense fog, which hung about till the boat left St. Andrews, some two hundred were on board on her departure from the latter place. The steamer carried the fog with her until the mouth of the river was reached, and the sail up the ever-bending stream, with its rugged shores, was delightful, till rounding the last turn, we came in sight of the picturesque and bustling town of St. George, nestling in a valley surrounded by hills that are a source of wealth to many and of steady employment, with good pay, to many others, for the quality of the native granite from the "Granite Town" quarries is second to none, and the finished product is shipped the world over. As the steamer must go in and get out on the high water, there were scant two hours laid to wander about, consequently but few places could be visited. However, a number of the party called at the granite works of Taye, Meating & Co., where some of the finest work is turned out and many buildings throughout the United States and Canada contain portions that are excellent samples of the handwork of their expert cutters. The largest employing industry of St. George is the pulp mill, owned by New York capitalists and is said to be one of the best, but perhaps not the largest. This mill is a part of an extensive plant which also embraces a large sawmill, which manufactures into pulp wood the trees from thousands of acres of wood land controlled by the company. The approaches to the mill are placarded about with signs warning visitors that a pass must be procured from the office, the party was 'chaperoned' by Mr. Nick Meating, who secured from Mr. Murphy, the superintendent, permission for an inspection. The pulp mill is operated by electricity which is generated by an enormous dynamo, which also supplies power to the various granite industries in the town. The operation of the mill is a continuous performance, never stopping except for serious breakdown, and is operated by two shifts of men working 13 and 11 hours respectively. The output is some 60 tons of pulp in 24 hours, and the payroll amounts to about \$35,000 a year. A large three master was loading at the wharf which is the twelfth cargo shipped this season. St. George is built in a wild and rugged spot, and the natural and beauty of its location is enhanced by neatly kept houses and good roads and walks. The stores carry good stocks and the people seem to be prosperous and contented. They are dependent upon industries that alone are amenable to the demand of the market, and not like our city depending on the vagaries of fish, over the movement of which man has no control. A new hotel has been opened in St. George

"CHICKEN."

St. George Man In Auto Accident.

(Telegraph)

In Mill street a little before 10 o'clock on Saturday night, William Webster, of Hampton, was driving in his automobile and did not notice that the railway gates were lowered, struck the windshield of the car and Mr. Webster was struck on the head and a painful cut inflicted. He was taken into Mr. Hawker's drug store and Dr. Charles Pratt was summoned. After the wounds were dressed, the injured man was taken to his hotel in a coach, and the auto was driven to the garage.

WILSONS BEACH

Mr. and Mrs. Loring Bill of Boston are guests of Mr. and Mrs. J. W. Matthews.

Ernest Shields and Mr. Higgins of the firm of Hall & Fairweather, St. John called on the merchants here on Wednesday last.

A party of young folks in C. Lambert's naphtha launch "Nymph" chaperoned by Mrs. E. Lambert called on Mrs. Frank Lank on Wednesday afternoon. The party consisted of Messrs Harold Lambert, Goldwin Lord, Misses Lillia Lord, Mildred Irving, Fannie O'Brien and Mrs. C. A. Lambert.

Mr. and Mrs. Shattuck and Miss Moore of New Hampshire are enjoying the summer holidays at Galba Brown's. Rev. Mr. Goucher of the Baptist church in St. Stephen is a guest of Mr. and Mrs. Beverly Lank.

Since the squid have arrived the prospects in pollock fishing seem to be brighter, some of the fishermen making quite fair catches the last few days, but hake in the channel are reported very scarce.

Mr. and Mrs. Allen Porter of Lubec are guests on friends in this place.

Mark Twain at Chevy Chase.

"When Mark Twain came to Washington to try to get a copyright law passed, a congressman took him out one afternoon to Chevy Chase," said a correspondent.

"Mark Twain refused to play golf himself, but he consented to walk over the course and watch the congressman's strokes.

"The congressman was rather a duffer. Teeing off, he sent clouds of earth flying in all directions. Then to hide his confusion, he said to his guest:

"What do you think of our links here, Mr. Clemens?"

"Best I ever tasted," said Mark Twain, as he wiped the dirt from his lips with his handkerchief."

By The Way

When is the next baseball match?

The work on the public wharf is being pushed right along by Mr. Milliken and his crew.

Kennedy's well boring machine has arrived and the work of boring the well on the lower street will begin at once.

No less than seven automobile accidents are reported during the past week are reported in the Maritime Provinces, causing the death of three persons.

An editor works 365 days in a year to get out fifty-two issues of a paper, that's labor. Once in a while a subscriber pays a year in advance for his paper, that's capital. And once in a while some son-of-a-sea-cook of a dead beat takes the paper for two or three years then skips out without paying for it, that's anarchy.

Scribbler: I got a check for \$10 for that article of mine on how to live on 15 cents a day.

Scrawler: Then you can lend me \$2, can't you?

Scribbler: Sorry, old man, but I blew it all in.

'Hilda is at the dishes now. Will you wait?' her mother said.
'Gladly,' said the young man thinking he had found a prize.

Just then a crash came from the kitchen, and again he became undecided... Buffalo Post.

'Why do you call your new picture Dawn?'

'Because,' replied the bright young impressionist, 'few people know what dawn looks like; hence they are likely to take my word for it.' - Chicago Record Herald.

Fish are reported to be quite plentiful along the coast generally. Back Bay and Letete correspondents inform us of a scarcity of fish in their vicinity. Cheer up, Back Bay, the season is still young.

The Camp Utopia boys evidently underrate some of the teams they are to meet. We however wish them best luck. As we go to press we learn that were defeated by the Calais Stars, 13-0.

PERSONAL

Mr. Wm. McMaster wife and child, of Northfield, Vt., are visiting Mr. McMaster's mother.

Miss J. R. McCallum entertained a number of young people Wednesday afternoon in honor of her cousins Misses Nina and Vida McCallum of Digdegass.

Among the events of the week was the dance in the Drageorgian Hall given by Messrs Joseph Meating and Eldridge Craig. A large number of young people were present and expressed themselves as having had an enjoyable time. Refreshments were served about midnight and the company broke up about one o'clock. Excellent music was furnished by Miss Jennie Meating, pianist and Mr. John Mooney, violinist.

General News.

Ottawa, Aug. 1.--Hon. L. P. Brodeur minister of marine and fisheries and of the navy, has received from the French government the honor of being appointed an officer of the legion of honor one of the highest distinctions in the power of France to grant. The honor is conferred on Hon. Mr. Brodeur in recognition of his services in furtherance of the entente cordiale between France and her ancient colony, Canada, through the negotiations of the Franco-Canadian trade treaty of last year and also because of his position as a leading representative of the 2,000,000 French speaking people of Canada.

New York, Aug. 1.--Information has been received here that the government of the Province of Quebec has prohibited the exportation of pulp wood from lands held by settlers on ticket. Where full payment for lands has been made and ownership passes to the buyer the prohibition does not apply.

The action of the Quebec authorities is said to be the second step in their movement to prohibit the exportation of pulpwood which is used largely in the United States for the manufacture of printing paper. A previous prohibition had been placed on the exportation of wood cut from crown lands. Together the crown lands and settlers' lands have heretofore furnished about 47 per cent of the pulp wood brought from Canada to the United States.

Waterville, Me., Aug. 1.--When a local upholsterer went to the home of George K. Bonteale today to return some work he had been doing while the family was away at the seashore, he found that some stranger had been ransacking the house. Procuring assistance a search of the house was made and a young man found hidden under one of the beds.

When he was dragged into the light, he was found to be clothed throughout in clothing belonging to Mr. Bonteale. He had taken a bath and a shave in the bathroom and made himself perfectly at home, selecting such clothing as he desired to wear and packing two grips with silverware and property that could be sold readily.

When arraigned in the municipal court this afternoon the respondent gave the name of Roy Garrison, but refused to give any further information about himself, taking the matter very coolly and seeing only the humorous side. He was bound over to await the action of the grand jury and ordered committed in default of bail.

Late Shipping.

ARRIVED

Twenty-five special gold, silver and bronze medals, of significant sterling silver trophies, six generous cash amounts, gold watches, etc., are to be given by private concert at the Dominion Exhibition, St. John, N. B., September 15th to 18th, in addition to the \$25,000 prize offered.

MC2465 POOR DOCUMENT

THE GRANITE TOWN GREETINGS

Despair and Despondency

No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued.

Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

It allays inflammation, heals ulceration and soothes pain. It tones and builds up the nerves. It fits for widowhood and motherhood. Honest medicine dealers sell it, and have nothing to urge upon you as "just as good."

It is non-secret, non-alcoholic and has a record of forty years of cures.

Ask Your Neighbors. They probably know of some of its many cures.

If you want a book that tells all about woman's diseases, and how to cure them at home, send 31 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Advice—revised, up-to-date edition, in paper covers, in handsome cloth-binding, 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

Census of Forest Products.

The census of the forest products of Canada, to be taken on Jan. 1, 1911, will embrace square, waney or flat timber, logs for lumber and miscellaneous products.

In the first class are included ash, birch, elm, maple, oak, pine and all timber cut as square, waney or flat, and in the enumeration will be reported for cubic feet and value.

Logs for lumber, which are included in the second class, are in such woods as elm, hickory, hemlock, oak, pine and spruce. They will be enumerated in the census of quantities of 1,000 feet board measure, with the value in the same unit.

Miscellaneous products of the forest include bark for tanning, fence posts, firewood, hoop and hop poles, masts and spars, piling, pot and pearl ashes, railroad ties, staves, stave bolts and heading, telegraph poles including telephone and other poles for electric wires, wood for pulp, and the furs and skins of forest animals undressed, and they will be enumerated by number and quantity and value.

The census of forest products will be taken chiefly from farmers and the lessees of timber limits.

Heaviness at Pit of Stomach

A Feeling of Uneasiness Before and After Meals is Quickly Cured With Nerviline.

Nearly every one gets an occasional attack of indigestion and knows just what that heavy feeling means in the stomach. I was subject to stomach derangements and my health was seriously hampered on this account. After meals I belched gas, had a weighty sensation in my stomach and over my left side. The first relief I got was from Nerviline—I used it three times a day and was cured. I continue to use Nerviline occasionally, and find it a wonderful aid to the stomach and digestive organs.

The above letter comes from Mrs. P. R. Stetson, of Brockton, and of the exceptional power of Nerviline is furnished by A. E. Rossman, the well-known upholsterer of Chester, who writes: "Let everyone with a bad stomach use Nerviline, and I am sure there will be few sufferers left. I used to have cramps, rumbling noises, gas on my stomach and severe fits of indigestion. Nerviline was the only remedy that gave me relief. And I found it so entirely satisfactory that I would like to have my letter of recommendation published broadcast in order that others may profit by my experience."

You'll find a hundred uses of Nerviline, it's a trusty household remedy that sells to the extent of a million bottles per year, that's the best proof that it must cure and give unlimited satisfaction. Refuse anything offered in place of Nerviline, in two sizes 50c and 25c, at all dealers, or The Catarthozone Co., Kingston, Ont.

Now, professor, having heard my daughter sing, tell me what I ought to do with her.

"Sir, if I told you what you ought to do with her the law would undoubtedly hold me as an accessory."

Campobello Moose Astray.

Eastport, Me., July 19 Capt. Lem Collins of the sloop Hiram K. was scanning the weather point the other morning from the Seacoast Canning company's wharf when he saw a huge, rounded back rising and sinking on the surface of Passamaquoddy Bay.

"That she blows!" he yelled to Ezra Ratson. "That's the second whale I've seen come into shallow water this year. It's a—Holy Smoked Haddy! What in thunder's that?"

The supposed whale swimming leisurely toward this town's water front from the direction of the Canadian Island of Campobello, raised a half-cow half-head out of the sea. It had big goggle eyes, enormous ears, and a great pendulous upper lip.

Ezra Ratson, who has made the acquaintance of every man in these waters, leveled his shots at it.

"Gee whiz!" said he. "There ain't no such fish! It's a seaserpint!"

On came the creature toward the shore. It presently reached shallow water and stood up on four long legs.

"It's a camel!" said Bill Capper of the sloop Marv.

"Tain't!" said a man from the interior.

"It's a moose, and 350 pounds if it's an ounce."

It turned out to be Campobello island's long vaunted moose. For years the exploiters of the Canadian island as a resort have included 'moose' in the attractions, a word which reads the same, singular or plural. Campobello was believed to have only one solitary moose, but this fact was whispered in confidence.

When Campobello heard that the truth saving moose had left the island, there was weeping and wailing and gnashing of teeth. Word was sent over to Eastport that if a single hair of that moose's head was touched there would be a reopening of the War of 1812. The republican citizens of this town replied that, inasmuch as the moose had left the British island crossed the line of demarcation in the middle of the channel, it was now a good American citizen.

At that the Campobello folks cited the laws of the State of Maine and swore that republican citizens would be fined \$500 if they laid hand on that moose; to which the citizens retorted that the British islanders had better not try to ferry the animal back so long as it stood on American soil, and under the same cited laws.

The moose, in the meantime stood on the beach, too astonished to care much. The Rev. Joseph Norwood, the sardine city's sea-going parson, fed it out of hand and took the occasion to drop a few remarks on the "wonders of the deep."

The Campobello corporation then wires its attorneys in Boston inquiring as to its rights to the moose. The attorneys wired back.

"The moose is yours, but you'll have to get extradition papers."

So the matter stood at a deadlock. The moose strolled around Eastport with a following that seemed to consider it the best thing since the circus came with a dromedary four years ago. The Campobello folks came over to identify it, and made the startling discovery that it was a young cow moose. Campobello's lone moose, when last seen, was a bull with five antlers. Yet the young moose came from Campobello.

The problem is still unsolved. In the meantime the moose that invaded Eastport has strolled on a trip for the interior, its path guarded by all the game laws of Maine.

Stephen Chalmers.

Call them "Murphies"

A Toronto journalist was spending some days in Northern Quebec where he desired to air his knowledge of French. He arrived at a small inn where the occasional tourist found a resting-place. There was a waitress of the heavy-footed order, who attended silently upon a table of hungry sportsmen.

"Avez-vous des pommes de terre?" asked the Toronto man in such French as he could muster. There was no response. Once again he said pompously, "Avez-vous des pommes de terre?"

The girl looked with impatience upon the would-be Gaul and said angrily: "Aw, go on—what's de matter wid the potatoes?"

How Old is the Earth?

Washington, July 26—Old Mother Earth, like femininity through all time, but with far greater success than most of her sex, has defied man to learn her age. Scientists smile at their defeat. Their latest estimable credits her with "Not above 70,000,000 years or below 65,000,000 years." This estimate given official stand today through publication by the Smithsonian Institution, is the result of studies by Frank Worth Clark and George F. Butler, of the United Geological Survey, who have followed the subject with considerable interest.

Pigs is Pigs

Magistrate—You admit you stole the pig?

Prisoner—"I 'ave to."

Magistrate—"Very well, then. There has been a lot of pig-stealing going on lately, and I am going to make an example of you, or none of us will be safe."

—Taitler.

A book on Rheumatism, by Dr. Shoop of Racine, Wis., tells some plain truths, and in a plain and practical way. Get this treatment of Dr. Shoop's Rheumatic Remedy for some disheartened sufferer in your vicinity. Make a grateful and appreciative friend of some one who is discouraged because of the failures of others to help him. Help me to make this test, and I'll certainly help you suffering friend.

Admiral Hitchborn once had a Chinese servant, named Chow, whom he brought with him from the East. One day Chow asked permission to go to a funeral.

"All right," said the admiral. I suppose you will put a lot of food and sweetmeats on his grave as they do in China?"

"Allee same China," Chow replied.

"Now, Chow," continued the admiral, when do you think the dead Chinaman will come to eat the food you leave on his grave?"

"Allee same time Mexican man comes up to smeller flowers you leave on his grave," Chow answered urbanely.

FATHER MORRISCY'S REMEDIES.

Cured a Truro Lady of Both Lung and Kidney Troubles.

Truro, N.S., Jan. 14th, 1910.

Father Morrissey Med. Co., Ltd.

For some time I had been troubled with a very dry cough and pain in my lungs. I made up my mind to try your medicine, and had used one bottle of No. 10 (Lung Tonic) when the pain left me and I felt much better.

My kidneys troubled me quite a lot also, and I purchased a box of your No. 7 (Rheumatism and Kidney Cure) and since taking the tablets I have had no pain in my side or back. I spent quite a lot of money in medicines, but none of the remedies I tried ever helped me, until a lady friend showed me your advertisement. I am now fat and healthy, and your remedies have saved me from the grave.

(Miss) MARTHA WHITE.

None of Father Morrissey's remedies have ever been heralded as "cure-alls." The wise priest-physician prescribed a special remedy for each kind of disease—a remedy skillfully devised to cure that particular trouble and that only.

No. 10 (Lung Tonic), besides curing colds, inflammation, pneumonia, bronchitis and other diseases of throat and lungs, strengthens these organs and gives them vigour to resist a return of the trouble.

No. 7 Tablets stimulate weak kidneys so that they can properly perform their function of filtering from the blood the impurities that cause rheumatism.

The action of both these remedies is hastened if Father Morrissey's Liniment is applied freely externally.

No. 7 Tablets for Kidneys and Rheumatism are put up in 50c. boxes; No. 10 (Lung Tonic) in 25c. and 50c. bottles; and Father Morrissey's Liniment in 25c. bottles. At your dealer's, or from Father Morrissey Medicine Co., Ltd., Chatham, N.B.

ACADIA SEMINARY A First Class School for Girls and Young Women

A STANDARD

To prepare for Complete Living. All Courses we arranged with this end in view.

AN OPINION

"What impressed the writer (in the Educational Review) was the admirable system that prevails in the management in every department of work; the kindly personality and tact; the genial sympathy in the relations between teacher and pupil and the interest which each one seemed to feel in the work of the day. An Education Under Such Conditions is a Great Asset."

INFORMATION

The new catalogue of Acadia Seminary has just been issued. It contains full information concerning Collegiate Studies, Music, Oratory, Art, Household Science, Business, etc. There is provided just the course you need to fit you for a complete living. The next term opens September 7, 1910.

THE GRANITE TOWN GREETINGS

**Crushed Coffee—
what it is**

By a process of crushing between steel rollers, instead of grinding, the skin, which remains in the eye of the bean after roasting, is separated from the kernel and removed by air suction, while the kernel is broken into small even grains. These grains when steeped, being free of the skin or chaff, settle quickly, leaving the liquid clear and bright, and give the true coffee flavor.

Estabrooks' Red Rose crushed Coffee is as easy to make as Red Rose Tea. Directions are in each tin.

Estabrooks' Red Rose Coffee

Try it for Breakfast To-morrow

Estabrooks' Coffee for Breakfast and Red Rose Tea for other meals.

IF YOUR BUSINESS IS NOT WORTH ADVERTISING, WHY NOT ADVERTISE IT FOR SALE?

**The flavor lingers.
The aroma lingers.
The pleasure lingers.
And you will linger over your cup of CHASE & SANBORN'S SEAL BRAND COFFEE.**

in 1 and 2 pound tin cans. Never in bulk.

WELCHPOOL MARKET
GEORGE M. BYRON, Manager

Jokers' Column

Teacher—John, you may tell us how to make a Maltese cross.
John—Step on its tail.

—
"How do you know they're married?"
"Can't you see? He's making her halt her own books."

—
Nurse—But if you really wish the baby to be a little boy, perhaps we could get the doctor to change her.
Master Bobby—I can't think he'd do it nurse, because, you see, we've used her four days.

—
"A million dollars seems a trifle high, daughter."
"But he has a patent of nobility, dad."
"Well, let's be a bit cautious. When does this patent expire?"

—
"My daughter, Gladys Mae, has become quite an elocutionist."
"Yes," peevishly replied the next door neighbor, "so I hear!"

—
Artist (condemningly to workman who has carefully carried down his masterpiece)—Ah! you seem to be very busy my man.
Workman—Yes, sir, it's marvellous the rubbish I 'eaves in and 'eaves out of 'ere every year. It's positive 'arfural for a bloke wot 'as as heve for color.

—
"What're you coming home with your milk pail empty for?" demanded the farmer. "Didn't the old cow give anything?"
"Yep," replied his chore boy, "nine quarts and one kick!"

—
"That," said the distinguished author, pointing to a little red-headed impossibility, age six, who was standing on his head in the middle of the drawing room during the musical—"that is my second edition."

—
"Not an edition-de-looks, evidently," suggested the acid old man to whom he had made the confession.

—
"If you would wear button shoes," suggested her father, "they would not come untied."
"I know it," replied she, "and if they did not come untied I could not ask a person whom I have in view to tie them."

—
The farmer had been taken to the art gallery. He stopped before a barnyard study.
"That picture isn't true to life," he said.
"What's wrong?" his host asked.
"Who ever saw a cow that wasn't flapping her tail?" he demanded derisively.

—
Senator La Follette said of a notorious financier the other day:
"He got rather a setback in a talk he had last session with one of our men."

—
"Money?" he said. Bah! There are thousands of ways of making money."
"Yes, but only one honest way," our man remarked.
"What way's that?"
"I thought you wouldn't know it," was the reply.

—
Love's young dream appears to have met with an interruption somewhere, judging by the following pathetic war-tail, in The Ancestral Herald of a recent date:—O. D.— No; father's home—V. R.

—
"De man dat puts his energies into givin' advice," said Uncle Eben, is like a pussion dat 'ud rather lend out his lawn mower dan cut his own grass."

—
Tell someleversing Rheumatic sufferer, that there is yet one simple way to certain relief. Get Dr. Shoop's book on Rheumatism and a free trial test. This book will make it entirely clear how Rheumatic pains are quickly killed by Dr. Shoop's Rheumatic Remedy—liquid or tablets. Sent no money. The test is free. Surprise some disheartened sufferer by first getting for him the book from Dr. Shoop, Racine, Wis.

MOUNT ALLISON COLLEGE

The question as to where to send your son or daughter for further education is answered by the Mount Allison advertisements in to-day's issue. There is no better preparatory school for boys than the Mount Allison Academy—one of the oldest of its kind in Canada. There is no better Commercial College in eastern Canada than the one in connection with the Academy. A residential school, the Academy and Commercial College is one in which the most thorough instruction is given under conditions which make for the proper development of character.

The Mount Allison Ladies College—in which includes the College of Literature and Science, the Conservatory of Music, the Massey-Treble School of Household Science, the Owens Museum of Fine Arts the Oratory Department is the largest in the Dominion. All its teachers are specialists, the members of the Conservatory staff having been trained abroad. Its equipment is extensive and thoroughly modern. The school aims to be, and is, a home-like institution where the development of the individual student along all lines is sought. In this fact is the reason why the school has attained its leading position among Ladies Colleges.

A calendar of the Academy and Commercial College will be sent free on application to Mr. J. M. Palmer, M. A. Sackville, N. B. The Ladies College calendar will be sent free on application to Dr. B. C. Borden, Sackville, N. B.

Nothing in the way of a Cough is quite so annoying as a tickling, teasing, wheezing, bronchial Cough. The quickest relief comes perhaps from a prescription known to druggists everywhere as Dr. Shoop's Cough Remedy. And besides it is thoroughly harmless that mothers give it with perfect safety even to the youngest babies. The tender leaves of a simple mountain shrub, give to Dr. Shoop's Cough Remedy its remarkable curative effect. It is truly a most certain and trustworthy prescription. Sold by all dealers.

Will Meet at the Big Show.
NEWSPAPER VISITORS WILL CONVEY AT ST. JOHN IN SEPTEMBER.

On March 10th last a delegation of New Brunswick newspaper men visited St. John upon the invitation of T. H. Estabrooks, President of the Board of Trade, and discussed matters pertaining to the mutual interest of all sections of the province. This convention, informal as it was, resulted in much good, not only in a full and free discussion while in St. John, but through extended newspaper articles from all sections of the province afterwards. Indeed, the gathering was looked upon as so good an idea that arrangements are soon to be made to repeat the convention on a greater scale during the Dominion Exhibition, to be held in St. John from September 5th to 15th. At this time the Exhibition Executive will set apart a special day for the entertainment of the newspaper visitors, and a thorough and official inspection of the manufactured products and natural resources of the province will be made throughout the Exhibition buildings, when comparison with other Canadian displays will be of special benefit. A further discussion of provincial affairs will follow.

A tickling or dry cough can be quickly loosened with Dr. Shoop's Remedy. No opium, no chloroform, nothing unsafe or harsh! Sold by all dealers.

The man who handles the local department of a newspaper learns after due experience not to expect even briefly expressed thanks from a column of pleasant things, but he knows as surely as cometh the winter that that a single line in which there is an unintentional representation will cause some one to be heard from as if from a house top. And we may add that when he has made pleasant mention 999 times of some person, place or thing but on the thousandth time fails to do so, he must not expect to be forgotten. The omission may have been from accident, inadvertence or even an entire lack of knowledge. It matters not. The simple fact remains and he will be judged by that.—Review.

Falling Hair
Ayer's Hair Vigor promptly destroys the germs that cause falling hair. It nourishes the hair-bulbs, restores them to health. The hair stops falling out, grows more rapidly.

Dandruff's
Ayer's Hair Vigor just as promptly destroys the germs that cause dandruff. It removes every trace of dandruff from the scalp and keeps the scalp clean and in a healthy condition.

Does not Color the Hair
We wish you to positively and distinctly understand that Ayer's Hair Vigor does not affect the color of the hair, even to the slightest degree. Persons with the whitest or the lightest and most delicate blood hair may use it freely without having the hair made a shade darker.

Ingredients: Sassafras, Glycerin, Quinine, Sodium Chloride, Capaicin, Sarsaparilla, Water, Perfumes.

Show this formula to your doctor. Ask him what he thinks of it.
J. C. AYER COMPANY, Lowell, Mass.

Surplus or Deficit?

(By Arthur McArthur in Canadian Courier.)

The financial statement of the Intercolonial Railway as issued by the Minister of Railways is one of those little masterpieces that make politics interesting even to the butterfly beside the road. It delighted both the Liberals and Conservatives. The Liberal editors yodded 'a surplus! Ha, ha!' The editors touched their top notes shrieking 'A deficit! Ho, ho!' But I must say I think the Conservative editors are unfair. They know in their hearts that if the statement had been one of the kind sometimes issued by master of financial finance, one of those lion-headed, copper-bottomed statements from which it would be possible to argue nothing but a surplus, they would be so mad they would bite the furniture.

As matters stand they are able to fume and fume and sorer' to their hearts content and they do not give Mr. Graham credit for giving them what they really wanted. On the contrary they make believe that they are real peevish with him.

They claim to have found the deficit they were looking for and are laughing right to it in spite of the fact that the Liberal editors are trying to lure them away with the surplus derived from the same statement. As for myself, not having a pass over the Intercolonial Railway I have no opinions as to which group of editors is right.

New Potato Pest.

A potato pest new to all who have seen it has been shown to us by Van Knowles of Fairfield. He has noticed it for the last few weeks upon his potatoes, of which he has only a few hills and which are now about destroyed by it.

The 'bug' is mostly green in color, with one heavy black stripe on which wing near the back and a light stripe near the outside edge of the wing. It is apparently a beetle of some kind. It is less than half the size of the regular 'potato bug' is firm considerably thinner, and is much livelier, flying quickly away upon being disturbed. It begins eating the leaves at the top of the hill, and eats out the green filling, or chlorophyll, of the leaves, only the network remaining, and curling up into a dry and brownish mass. Mr. Knowles has sent specimens to State Entomologist Hitchings of Augusta for examination and report.—Fort Fairfield Review.

Ladies Orchestra at St. John Fair.

Madame Renfrew's Orchestra of twenty five ladies will be one of the big musical features of the Dominion Exhibition in St. John, N. B., Sept. 5th to 15th next. The organization ranks highest in musical circles of America, and is being brought to St. John at a very considerable expense. The comely bevy of young ladies dress most attractively in different costumes from day to day, are their programmes are a happy commingling of popular, classical, household, religious, and national music. They have numerous specialty numbers, in imitation of animals, minstrel troupes, and among the party are some veritable comedienne, who create merriment as well as delight from the musical standpoint. Madame Renfrew's Orchestra will be heard after noon and evening at a central point in the main buildings, and to ensure the thorough enjoyment of its programmes special seating provision will be made nearby. During the afternoons and evenings, brass bands will supply music in front of the Grand Stand and round about the grounds.

RUINING A TOWN

Some Sage Advice that Applies Here as Well as Elsewhere.

If there be anyone better than another to ruin a town, it is for those who live in it apologizing for its existence. There are always some who are ready to say, by their actions at least, that this place don't amount to much. They will tell you that the town is dead, that no one could think of stopping here; that some town adjacent is more respectable, more enterprising, has better people, better enjoyments, is ahead of us in everything. This is all wrong. Even if true, no one should ever admit it, when it comes to making a comparison. Every good citizen of the town, should take a special local pride in all that pertains to home.

The schools, the churches, the amusements, the business, pleasures, the picnics, the celebrations, in fact everything should be looked on by our own people as just as good as can be gotten up elsewhere. The town that says 'We can't' will always succeed. The town that says 'Oh, I don't know, I think it won't amount amounting to much,' is never of much force. If you have no local pride, borrow some.

A Trying Ordeal.

The marriageable girl in Tunis has a trying ordeal to go through after her betrothal to the man not of her choice, but whose choice she is. She has to be fastened to the required size before the ceremony can take place.

As soon as the betrothal takes place she is taken to a room and there coopered up till the fastening process is concluded. Silver shackles are fastened round her wrists and ankles, and the task of her parents and future husband is to increase her bulk till her wrists and ankles fill up the shackles. If the husband is a widower or has discharged his first wife the girl has the shackles of the first spouse placed on her, and she must fill them out.

It takes a long time to do this as a rule; and sometimes it cannot be accomplished in spite of all efforts. It is open to the future husband to cry off the bargain or waive the condition. In the case of a bachelor he takes care to see that the shackles and anklets are not too large, but if he is being forced into the marriage by his parents he is a great stickler for custom. Stout girls are more quickly snapped up in Tunis.

Base Ball Notes

July 14th will live long in the minds of the Florenceville team as they went down in ignominious defeat before their opponents, the Bloomfield team. The game was tightly contested from start to finish, and Florenceville might be termed as "dying hard" and seemed anxious all through to show their adversaries they were "up against something" and that they did not drive 13 miles for nothing; they certainly played a snappy game all through; but were powerless when confronted by the cat-like movements of the Bloomfield boys. The home team (Bloomfield) on the other hand, although they showed their superiority at every point of the game, acted the part of gentlemen and whenever the least doubt occurred were willing to give the visiting team the benefit of it. The respective teams took their places on the diamond at 4.30 p. m., and it was not until 6.30 that the umpire gave the decision of 13 to 10 in favor of Bloomfield. It must furthermore, not be overlooked that Florenceville, played 9 innings, the home team only 8.

WEDNESDAY, AUGUST 3, 1910.

Sir Wilfrid's Western Trip.

Accompanied by Hon. Mr. Graham, Mr. McDonald of Pictou and Mr. Pardee, the Chief Liberal whip, Sir Wilfrid is making a triumphant trip through the West. It is not often the Prime Minister makes such a trip.

It is five years since he was in the West, and then it was only to accompany the Governor-General, the occasion being the inauguration of the new provinces of Alberta and Saskatchewan.

A few years earlier he went west with King George V. These visits were not of a political character. Not since two years before he became premier has Sir Wilfrid made a tour of the West like this one, which of course, is in the interest of his own political party, although there is much evidence of interest in the man and the orator on the part of many who do not vote Liberal.

It means much for a man of his years to undertake a campaign of such length, probably not less than two months. The fatigue and inconvenience, though made as little as possible, must take much out of a man physically as well as mentally, for he is ever on the alert to meet men in the spirit of conciliation. Diplomacy is not easy work, but he has already shown himself a prince among diplomats.

This trip is one that is evidently imposed upon him by the vast extent of the Dominion, and the necessity that exists of establishing a commission between those who rule the country through Parliament and those who send them there. Distance is still a powerful factor in separating men from one another. The man on the prairie and the man on the seashore must have their different ways of looking at things. Newspapers, telegraphs, community of laws,—these do much but they cannot wholly eliminate this. The only way to be sure of understanding these different peoples is to visit them in their home, where mutual understanding may be had. This Sir Wilfrid is doing by addresses, meeting delegations, and mingling with the people, we find he is gripping the people and the situations so that expressions of satisfaction are heard from all sides.

If ever a representative of the people met with a right royal welcome from the people, Sir Wilfrid is that one in his tour through the West.

It is reported that Mr. Borden, the leader of the Opposition contemplates a similar tour in the Autumn.

Mr. Crowe's Letter

The letter of Harry J. Crowe to the English press, published elsewhere in this issue will be read with special interest. Mr. Crowe, a prominent figure in Canada's industrial life, having large timber interests in Newfoundland for the development of which he has been instrumental in securing the aid of English capitalists. From his wide acquaintance with British and Canadian statesmen and their problems, he is well qualified to give an opinion upon matters of international importance.

A commercial treaty between the great English-speaking nations, great Britain and her colonies and the United States such as is suggested by Mr. Crowe, is a possible consummation that must appeal strongly to all broad-minded individuals of these countries, not only as a means of preserving the commerce and building up the industrial life of these nations and a wise measure of political economy, but as the initiative of a movement which must result in the predominance of the English-speaking race, an amalgamation of power that would be unassailable by a foreign nation, and thus ultimately bring about universal peace.

Possibly the scheme may appear visionary at first glance, but a study of the problems and conditions which confront the various nations will convince that the scheme outlined would prove a solution for many of them.

In the case of great Britain there appears to be a growing sentiment toward a protective policy giving the colonies the preference. The objections or the extreme free traders would be in part overcome by extending this preference to include the United States market.

Canada and the other colonies would have the benefit of a great open market for the fast increasing products of their immense natural resources.

The United States would welcome the opportunity to get these natural products of which she is so greatly in need, and the privilege of having a preference over her rival, Germany, in the markets of great Britain would be an additional advantage and a strong inducement.

On the other hand the aggressive nations, Germany and Japan, who have apparent designs upon the commercial if not the political supremacy of the world, would receive their quietus and the war cloud that is becoming portentous would be dispelled.

Baseball.

St. George gave the Camp Utopia ball tossers a case of heart disease on Friday afternoon on the local diamond, from which, however, they recuperated in time to finish in the lead by the narrow margin of one run in the final score being 13-12. Shortly after four o'clock the two teams lined up for the fastest game yet witnessed by local fans. The game was fast from the first ball pitched to the last put out.

The following is a detailed account of the game.

FIRST INNING

H. Gillmor was the first man up for St. George but went out by the famous Ford-Vega route. O'Neill flied to short stop. D. Gillmor was tossed out, Smith to Vega. No RUNS.

Pedit opened for Utopia by fanning. Griffin walked. Smith hit a fly to centre which Gordon failed to get under and took two bases. Hernandez fanned. Ford singled and scored Griffin. Veazie fanned. ONE RUN.

SECOND INNING

Stewart went out on a foul to Veazie who made a spectacular catch. Gearson fanned but got to base on Pedit's error. Gordon got to base on Pedit's error, Gearson going to second. Young singled scoring Gearson and advancing Gordon to third. Johnson hit and on the over throw to first Gordon and Young scored. Melrose singled and H. Gillmor followed suit. O'Neill hit short and forced Johnson at the plate. D. Gillmor hit to Smith and retired the side. THREE RUNS.

Wolfe hit to O'Neill and was safe at first but was star gazing at second and was put out by O'Neill. Gearson caught Vega's fly. Casgrain struck out. Simms replaced Casgrain at second. No RUNS.

THIRD INNING

Stewart singled but was caught off first, getting the short end of a close decision. Gearson fanned. Gordon dribbled the base down to Vega and retired the side. No RUNS.

Pedit hit out a well placed grounder and made second. Griffin died, Melrose to H. Galloway. Smith sacrificed and Pedit scored on Gillmor's error. Hernandez hit safely. Ford got a

pass. Veazie hit over second and Gordon let the ball go through his legs to the grass, while Hernandez Ford and Veazie crossed the plate. Wolfe ended the agony by fanning. FOUR RUNS.

FOURTH INNING

Young singled to third and was called out trying to purloin the second sack. Johnson smote the atmosphere with vengeance but there was nothing doing. Melrose was robbed of a nice hit by Griffins fine catch. No RUNS.

Vega was given a free pass. Vega was out stealing second. Simms popped a foul to Gillmor. Pedit walked. Griffin flied to Gordon who erred in his duty, and advanced Pedit to second. Smith took corporal punishment and went to first with a bum wing. Hernandez also got in the way of the ball and forced Pedit's run in. Ford died Melrose to Hob. ONE RUN.

FIFTH INNING

(Wolfe replaced Smith on the slab, Smith took second and Simms centre field.) H. Gillmor singled, O'Neill went out in an infield fly. D. Gillmor forced Hob at second, the latter making a fine sprint for the bog. Stuart singled helping Gillmor to second, Gearson fanned spoiling a chance for scores. No RUNS.

Veazie fanned. Gearson misjudged Wolfe's easy fly, Vega forced Wolfe at second, but made third on O'Neill error, throwing low to first. Simms walked and Pedit fanned. No RUNS.

SIXTH INNING

Gordon popped a fly which was pie for Ford, Young went out by the well worn route Ford to first. Johnson was caught by the same trap. Ford's round. No RUNS.

Griffin died with the disease known as "Hole-in-bat." Smith sent a screacher through Stewart and swiped O'Neill's sack. Hernandez sent a dust raiser to Young which the third sacker booted to Stewart. Ford hit a nice two bagger through Gearson scoring Smith and Hernandez. Veazie fell a prey to Melrose's shoots. Wolfe popped an easy one to Melrose. Two RUNS.

SEVENTH INNING

Melrose was out Veazie to Vega. Hob died by the familiar route. O'Neill was safe on Wolfe's error. D. Gillmor's best was a liner to Pedit forcing O'Neill. No RUNS.

Vega's fly was swallowed by Young. Simms swung in vain. Pedit was safe on O'Neill's fumble. Griffin went out O'Neill to Gillmor. No RUNS.

EIGHTH INNING

Stewart hit to third and made third on third's error. Gearson hit to Griffin who muffed and Stewart ambled home. Gordon hit to Ford and was safe at first. Young walked filling the bases. Johnson was safe on Ford's error and Gearson scored. Gordon came in on a wild pitch Melrose hit for two bases and Young and Johnson scored. H. Gillmor was out on first. O'Neill hit into a double play. Four RUNS.

Smith was safe on a close decision at first. Smith as usual pilfered the second bag Hernandez was safe on O'Neill's wide throw, Ford's fly was easy for Johnson. Veazie hit to Johnson and three runs came in on the throw to the plate, Gillmor being thrown down and losing the ball. Wolfe was safe on first, Wolfe came home when Johnson let Vega's hit go through him. Vega was caught on third trying to stretch his two bagger. Simms fanned. FOUR RUNS.

NINTH INNING

D. Gillmor went out on a fly to Griffin, Stewart hit out a clean two bagger. Gearson hit to third but was safe on an error. Stewart took third, Gordon was also safe by third's poor throw to first. Stewart scored, Young walked, Melrose hit a timely two bagger bringing in three runs. H. Gillmor was safe on Pedit's fumble. O'Neill was safe on Wolfe's muff of an easy pop. Griffin and Wolfe exchanged places. D. Gillmor again forced O'Neill at second. FOUR RUNS.

Pedit walked but was forced at second when Griffin hit to Melrose. Smith hit to Stewart and forced Griffin at second. Hernandez hit to Johnson and Smith came in with the winning run. ONE RUN.

THE GRANITE TOWN GREETINGS

LOCALS

Gartley McGee has sold his fine mare "Jennie" to an outside party.

If your "Greetings" bill is not correct kindly inform us and we will gladly make the proper correction.

Messrs Hazen Magowan, Burpee Douglas, George Meating and Gabriel Craig spent the week end at Lake Utopia.

The St. Mark's Church Corporation has sold the gasoline launch "Jessie M" to G. D. Grimmer, St. Andrews.

Do you drink Red Rose Tea? If not, you are not getting the flavor and quality which you might get for the same money. Try a package.

A large number of our young people attended the ball given at Camp Utopia by the camp boys on Monday night. They report a "swell" time.

Mr. Henry Maxwell, wife and family who have been living in town for the past few months, have returned to their home at the canal.

The Schr. Francis Goodnow cleared for Newark, Conn., on August 1st, with 620 tons of pulpwood. She was towed out by the "Dolphin."

On Saturday last the St. Stephen Thistles defeated the St. Peter's baseball team at St. Stephen by a score of 4-1. St. Peter's hit home runs in the afternoon, by a score of 3-2.

The Campbellton relief fund is rapidly approaching the \$50,000 mark. Contributions are being received daily. The Campbellton people are asking for \$200,000 which they say will put them through the coming winter.

The Camp Utopia baseball team left for Calais yesterday afternoon where they played the Stars of that city yesterday afternoon. Their purpose playing St. Stephen, Woodstock and St. John while on the trip.

The largest vessel that ever came up the St. Croix to Calais is the steel bark, E. C. Mount, which is loaded with coal for the Washington Courier Rubber. She draws 27 feet 3 inches at mid 15 feet forward, and is 26 feet longer than the largest vessel that ever came to Calais.

The St. Mark's Church is to hold a big day in St. George soon. The baseball association has granted them the use of their grounds. Excursions will be run from all parts. A game of ball between two of the crack teams will be a feature. Watch for further announcements.

James Murray of Calais, met with a painful accident on Monday afternoon. He was driving a load of hay into Mrs. McLean's yard when he fell from the load to the ground, injuring his back. Dr. Taylor was in attendance. Mr. Murray will be confined to his bed for some little time.

Among the auto fatalities of the season is the death of Mrs. John Brine who was struck by an auto driven by Mrs. Prine at Bullfax on Friday afternoon. Mrs. Brine was arrested and charged with driving her auto in an irresponsible manner. She was released on \$2000 bail.

Clothed in the garb of a clergyman and accompanied by Miss LeNewe dressed in masculine garments Dr. Craven and Miss LeNewe were arrested on the Stm. Montrose on Sunday morning of Father Point. This concludes the second act of one of the most brutal murders in the annals of history. The accused will stand trial in London.

What might have been another Campbellton disaster was averted yesterday morning. When Capt. Lewis Simpson was passing the Young block on Carleton Street about 4:30 o'clock he noticed that smoke was coming from the door of the store occupied by Frank Murphy.

Quickly he gave the alarm and soon a score of fire fighters were on the spot. An entrance was made by breaking the glass on the front door and the blaze was discovered. Had the fire been given another fifteen minutes there is no doubt but that the fire would have had a far reaching effect. As it was a few buckets of water extinguished the blaze. The fire started from a cigar butt which had been thrown into a sawdust spout. The damage done was only slight.

PERSONALS

Herd Grass spent Sunday at home. J. E. Gilmor of Bonny River, was in town on Monday.

Cecil McGee of Back Bay was a visitor in town Monday.

J. Sutton Clark returned from St. John, on Friday's train.

Ivan Magee of St. John is visiting his sister Mrs. A. G. Brown.

Mrs. E. D. Harvey, left for Calais yesterday to visit friends.

Miss Mallin of St. John is visiting at the home of Rev. Fr. Carson.

Thos. McIntyre, returned from St. Stephen on Thursday's train.

Miss Nellie Mosner, has returned from a visit with friends in Calais.

Miss Eva Meating returned last week, from a visit with friends at Second Falls.

Adrian Cross is visiting in Amherst, the guest of Mr. and Mrs. Chip McAdair.

Fred Manroe of International Drug Co. was a business caller in town this week.

Fred Baldwin of Boston, Mass., is at home, owing to the serious illness of his father.

Hugh Phillips returned last week from a pleasant visit with relatives in the States.

Miss Blanche McGee of Back Bay, attended the S. S. Convention at Grand Manan.

Miss Dever of St. John is visiting at the home of her Uncle, Rev. Fr. Carson.

Mr. and Mrs. A. C. Tor and son have been spending a few days at Bocabec.

Rev. E. M. Fletcher of St. John, is a guest at the home of Mr. and Mrs. A. C. Kennebec.

Mrs. F. W. Nise of Westfield, N. B., is the guest of her sister, Mrs. Wm. McIntyre.

Mrs. Alfred Lee of Salem, Mass., is visiting at the home of Mr. and Mrs. West Phillips.

Mrs. French Meating entertained a number of friends with a sail up the river on Monday night.

Walter Burbank and Arthur Williamson of Bonny River, attended the dance on Friday evening.

Samuel Austin returned on Friday from St. John where he has been spending a few days.

Mrs. Bowen and daughter and Mrs. Edward Rankine, are in town guests of Mrs. Tracy Magowan.

Rev. A. B. O'Neill of Notre Dame Ind., was the guest last week of his brother, James O'Neill.

Miss Marjorie of St. Stephen, who has been visiting her sister Mrs. Dan Justason has returned to her home.

Miss Muriel Dick arrived yesterday from Lawrence, Mass., and will spend a few weeks at her home.

Messrs Gilmor and Savage went to Calais yesterday to attend the ball game between the Utopia's and Stars.

Mrs. Sumie Lawrence entertained a party of friends to a motor boat sail to the lake on Monday afternoon.

Mrs. Jos. Chase and Mr. S. Johnson, spent Wednesday at Second Falls, guests of Mr. and Mrs. Manfred Sherwood.

Miss Dan French who has been the guest of her aunt, Mrs. Matthew Fallon, has returned to her home in Back Bay.

Paul Brine left on Friday for New York, where he will remain for a week, when he will return to Camp Utopia.

THE GRANITE TOWN GREETINGS

The Consolidation of English Speaking Races

(Continued from page 7)
The face of the globe, with unlimited resources and every variety of climate. With such a rich heritage and a population of hundreds of millions with whom to trade they would be absolutely independent of those countries where labor and other conditions could affect their commerce or power their standard of living.

The eastern countries are becoming more and more a menace to these English speaking nations and the day is approaching when it will be impossible for the latter to compete with countries like Japan, where skilled labor can be procured for less than a dollar a day, and where almost everything under the sun can be produced at a lower rate than these English speaking countries can afford, and without some protection the only way this competition can be met is to reduce wages and the standard of living to the Asiatic level.

Of these closer relations between the United States and the British Empire were established, the exports of Great Britain to the United States and the Colonies would be enormously increased, and any designs Germany may have in dislodging Great Britain from her position of mistress of the seas; would be checked. Many in this country do not believe Germany has any such designs, and are willing to drift along tranquilly and undisturbed, but why cry Peace, Peace when there is no peace and then pay the heavy penalty for waiting unprepared until the danger is upon us? We were staggered by the blow from Paul Kruger because we were indifferent to the preparations he was making for war; the same indifference upon the part of the country to the Colonies overtures for reciprocal trade relations if continued will gradually transfer a large part of their ever increasing trade into foreign channels, which when once established, will be difficult to recover, even when "John Bull wakes up" to realize what he has lost, and is prepared to offer preference. The consolidation of the British Empire, however, is of greater importance to Great Britain, and this must be impaired by the slacking of the Commercial tie which plays such an important part in this material age in binding countries together.

GROWING SENTIMENT IN U. S. FAVORS FREE IMPORTS

The Colonies I believe would be willing to share equally with the United States any preference granted to them by the Mother Country, if the United States without asking any further concession from the Colonies, will allow the free admission in her market of some of the Colonies natural resources to which I have previously referred. There is now a growing sentiment in the United States in favor of removing the duty on these articles as they realize these resources are being rapidly depleted in their own country.

The Colonies would then not only receive the preference for which they are waiting from the Mother Country but would also receive a preference in the markets of their Southern neighbors and kinsmen without diminishing the value of their preference to the Mother Country.

The United States should favor entering such a "Union" on some such terms as I have ventured to outline because she would have nothing to lose and everything to gain commercially as well as politically. If Great Britain adopted Protection—giving the Colonies a Preference—The United States if included would not long be in a position to hold her present trade with Great Britain and her Colonies. They now realize the importance of cultivating the markets of Great Britain and her Colonies and would I believe, be willing to give a quid pro quo to enter into such a commercial union with the other English-speaking nations.

IMPORTANT FOR GREAT BRITAIN TO PUT HER HOUSE IN ORDER

It is important for the United States to prepare to meet the Yellow Peril which is now threatening to attack her Commercial, Naval and Military Power, as it is for Great Britain to "put her house in order" to overcome Germany's determined designs upon the British Empire.

The union of these English nations would check the aggressive spirit of Japan which is now a great menace to the United States, and it would justify the latter in making any reasonable tariff concession to Great Britain and her Colonies, which would practically nullify the free admission of some of the natural resources of the Colonies and a Preference to Great Britain on goods imported by the United States from other countries for which she would receive a Preference in the largest consuming market in the world.

This would necessitate cancelling Great Britain's treaty with Japan which has ceased to serve any good purpose to the Empire, and it now stands in the way of uniting these English-speaking nations. As I have already said, the foreign trade of the United States, Great Britain and her Colonies would be increased, rather than impaired, by his Commercial Union, for if these enormous importing markets were united, they would secure concessions in nearly every foreign tariff by offering in return their intermediate Preference.

The commercial advantages, however, pall into insignificance as compared with the far-reaching beneficent influence such a union would have, not only within their own boundaries but upon other nations. The English-speaking nations would not only hold the balance of power which would enable them to preserve peace in the world, but such a consolidation would make them what they are destined to be, viz—The power to eventually bring about, not only universal peace, but universal free trade, and facilitate their mission as the mother of nations and parliaments, advancing civilization in the dark places of the world and promoting the welfare of all humanity.

HARRY J. CROWE.

A failing tiny nerve—no larger than the finest silken thread—takes from the Heart its impulse, its power, its regularity. The Stomach also has its hidden or inside it was Dr. Shoop who first told us it was wrong to drug a weak and failing Stomach, Heart or Kidneys. His prescription—Dr. Shoop's Restorative—is directed straight for the cause of these ailments—these weak and faltering inside nerves. This, no doubt, clearly explains why the Restorative has of late grown so rapidly in popularity. Druggists say that those who test the Restorative even find a wonderful merit. Any way don't drug the organ. Treating the cause of sickness is the only sensible and successful way. Sold by all dealers.

Process Exhibits at St. John Fair

The management of the Dominion Exhibition to be held in St. John, N. B., September 5th to 15th, have been successful in arranging with some of the most important manufacturers in Canada to demonstrate the making of their wares in Machinery Hall. There will be a woolen mill's loom in full operation, knitting machines at work, nail and tack making machines, foundry activities, printing processes, wood working novelties, boat and shoe manufacturing, electrical mechanics, motor boat demonstrations, etc., not to mention the mouth-watering process involved in the making of candies, fancy confectionery and baking. In order to accommodate numerous applicants for space and power, in the mechanical department of the approaching big show, the Exhibition Executive have been forced to make arrangements for increased facilities, and those who visit St. John next September will spend a great deal of their time within Exhibition gates watching these "process" exhibits.

Asaya-Neurall
THE NEW REMEDY FOR
Nervous Exhaustion
Indigestion, Heartburn, Dyspepsia and Constipation result more often from nervous exhaustion than from food. Dieting or pills will not avail. The only remedy is nerve repair. "ASAAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, quickens the appetite and digestion, and these disorders disappear. \$1.50 per bottle. Obtain from the local agent.

THE CONSOLIDATION OF ENGLISH SPEAKING RACES

Great Britain and Her Colonies and the United States, Advocated by Harry J. Crowe in the English Press.

The British Empire Club, 12 St. James Square, S. W., June 7th, 1910. Sir,

I am taking the liberty of submitting to your consideration a suggestion that as for its aim the union of the English-speaking race, the consolidation of which believe can be used to eventually bring about harmony among all nations.

Assuming that ere long Great Britain will adopt a tariff that will give her industries some protection from the system of dumping from highly protected countries, I would suggest as a step towards bringing about this union, a Commercial Preference between the United States, Great Britain and her Colonies, with a view of increasing the present volume of business between these countries as well as strengthening the sentimental tie.

In the past, the union of the English-speaking race who have so much in common, has presented such difficulties that the question would not be considered as practicable, but in view of what is now taking place in some of the other nations and the present relations between the United States and Canada, the way seems to be opening up for this union, making it not only more feasible, but necessary, or the commercial and political supremacy of the Anglo-Saxon race. Allow me to refer to my reasons for this opinion.

As you are aware, Canada has been patiently waiting a long time for the Mother Country to respond in some measure to the substantial preference with which the Government of Great Britain treated these overtures of the Colonies or closer trade relations, has compelled the Canadian Government to seek a preference in foreign markets, resulting in treaty with Italy, Germany, Belgium and the United States.

ANADA'S TRADE INVERTED FROM GREAT BRITAIN
Concessions in the Canadian tariff to these foreign countries naturally reduce the value of the present preference to Great Britain, and will transfer a very large portion of Canada's rapidly increasing trade into foreign channels, which when established it will be very difficult for Great Britain to regain.

If preference for preference is granted the Colonies by certain foreign countries and refused by the Mother Country then we may find in the near future that the British Empire is more in name than in fact.

As you are aware, Canada now purchases from the United States goods to the value of about two hundred million dollars annually without tariff preference. With reciprocity between these two countries the volume of trade would be doubled.

The United States is now alive to the importance of Canadian trade, and the great future possibilities of her northern neighbor; she probably also appreciates that if Great Britain adopted a Protective Tariff, granting to the Colonies a preference before she secured a reciprocity treaty with Canada, it would be in her interests to participate with her brother kinsmen in this greater Commercial Union of English-speaking nations. Therefore, now is an opportune time

bringing about such a union, and continued indifference upon the part of Great Britain to this vital question might be a serious blow to Imperial interests.

SENTIMENT IN GREAT BRITAIN FAVORS PROTECTION

The recent British election was an evidence that there is a very strong sentiment in Great Britain in favor of adopting a Protective Tariff, granting to the Colonies a Preference but certain opposition exists in the Mother Country to the Colonies having exclusive Preference fearing that the cost of living would thereby be increased.

This opposition in the minds of these extreme British Free Traders would, I believe, be met if the United States entered their markets on all equal footing with the Colonies, thus enlarging the sphere of Preference and creating more competition.

The Colonies would naturally be unfavourable to the competition from the United States, but it is possible to meet this objection if the United States granted free admission from the Colonies of some of their natural resources, such as wool and the products of the forest, sea and the mines.

CANADA WOULD BENEFIT BY AN OPEN MARKET IN U. S.

Canada probably would feel more than the other Colonies this competition in the markets of the Mother Country, but owing to her geographical position and possessing abundance of these natural resources she would naturally receive the greatest benefit by the free entry of these resources into the United States.

I do not think the United States would suffer any disadvantage by the free admission of these natural resources from the Colonies. It would mean the conservation of raw material, which is being so rapidly depleted in the United States and would prevent the sharp advance in cost to their consumers, which is likely soon to take place, especially in the products of the forests.

I also believe it would mean a great advantage to the manufacturers and consumers of the New England States if they had free entry into their markets of coal and iron from the Maritime Provinces.

It would therefore appear that the United States would be making practically no sacrifice in granting these concessions to the Colonies.

UNITED STATES SHOULD GRANT IN RETURN FREE ENTRY

It will be admitted by all that the Colonies have a prior right to a preference in the Mother Country, not only because they are British Colonies and contribute to the defense of the Empire, but because of the preference they now grant to Great Britain in their tariffs, (I refer particularly to Canada) for which they have received no trade preference in return.

Therefore, if the Colonies waive their objections to the United States entering on an equal footing with them in the markets of Great Britain, the United States should grant in return the free entry from the Colonies of such resources as I have previously named without demanding in return concessions in the Colonial Tariffs.

Thus the Colonies would receive a preference in the markets of the United

States as well as Great Britain without granting to the former any reduction in her present tariff. This would enable the Mother Country to continue receiving the full benefit of the Canadian Preference, and would have the products of the United States entering her markets in competition and on an equal footing with the Colonies, which should meet the views of those who fear that an exclusive preference to the Colonies would lack the competition necessary to keep the values of the necessities of life down to their proper level.

This preference granted to the United States by Great Britain would give the former a portion of the trade on manufactured goods now enjoyed by such countries as Germany in this market, in consideration of which it would be reasonable for the United States to grant Great Britain preference on the goods imported by her from other foreign countries, thus not interfering with her own industries; and resulting in a large increase of exports from Great Britain to the United States.

EXISTING FOREIGN TREATIES OF NO ADVANTAGE

Great Britain's treaties with certain foreign countries will probably be in a way of granting at present an exclusive preference to the United States, but I presume these treaties difficulties can be overcome when the occasion requires it.

These treaties which have been of value in the past have served their good purpose, and are no longer of any particular advantage to this country or the world if the union of the English-speaking nations could be brought about.

There are foreign countries that are now desirous of having the most friendly relations with Great Britain and this union of the English speaking nations should not disturb this friendship, but rather strengthen it, for the moral support of Great Britain would then be greater, and she would then be a more valuable ally, and as for trade, the United States would not interfere much, if at all, with such countries as France and Italy in the British markets. The goods these countries are in a position to sell Great Britain after the latter adopts protection, are not the main natural products of the United States.

The English-speaking nations are the only nations that could be united to their mutual advantage on such a "Commercial Union," no other nations have so much in common; their language, aspirations and commerce are in harmony. The Colonies and the United States have now their largest market, in Great Britain, and in many staple times they find Great Britain the best market in which to buy.

A Preference such as I have ventured to outline would not only enormously increase trade between these countries, but with a united policy for outside nations as regards receiving or granting a preference, the English-speaking nations would hold a weapon that could be used to secure the most favored tariff concessions in all other countries.

MARKETS FOR EXPORTS WOULD RAPIDLY INCREASE

Some of our statesmen fear a preference to the Colonies would antagonize other nations, and that the loss of foreign trade would not be compensated by closer trade relations with the Colonies. Can this argument be made with equal force in connection with a commercial union that will include the United States with the Colonies? I believe however, that the markets of the Colonies for the exports of Great Britain will increase more rapidly in the future than those of any foreign nation.

These English-speaking nations united would secure greater concessions in foreign markets than are now enjoyed by Great Britain and would eventually tend to overcome this antagonism that is so feared, by removing the impression that Great Britain has neither the right nor the power to prevent foreigners making her a slaughter-market for their surplus manufactured goods, and that she has any weapon for lowering their high walls of protection now placed against her when she attempts to enter their markets.

The unfair foreign competition which our manufacturers and agriculturists now face, must discourage the investment of fresh capital in the industries of this country, as well as curtailing the output of their already established plants,

which will account in a measure for the heavy burden of taxation now felt in this country, and your increased number of unemployed, as well as the emigration of so many of your artisans and farmers. Under these conditions the taxation must be increasing much more rapidly in proportion to your earning power.

The combined import trade of the United States, Great Britain and her Colonies from other nations would be of such gratitude and importance that foreign countries who have been depending so largely on the markets, would be desirous of granting concessions in their tariffs in return for an intermediate preference in the markets of the English-speaking countries, that is, the latter to grant a preference between their general tariffs and the rates applying to themselves.

THIRTEEN MILLION SQUARE MILES OF THE RICHEST TERRITORY

If the nations that now fly the Union Jack and Stars and Stripes were united, they would have under their commercial and political control thirteen million square miles of the richest territory on

(continued on page 6)

Rheumatism

I have found a tried and tested cure for Rheumatism. It is a remedy that will straighten the distorted limbs of chronic cripples, nor turn bony growths back to flesh again. That is impossible. But I can now surely kill the pains and pains of this dreadful disease. In Germany—with a Chemist in the City of Darmstadt—I found the last ingredient with which Dr. Shoop's Rheumatic Remedy was made a perfect, dependable prescription. Without that last ingredient I successfully treated many, many cases of Rheumatism, but now at least it uniformly cures all curable cases of this heretofore much dreaded disease. These much like granular wastes found in Rheumatic Blood seem to dissolve and pass away under the action of this remedy as freely as does sugar when added to pure water. And then, when dissolved, these poisonous wastes freely pass from the system, and the cause of Rheumatism is gone forever. There is now no real need—no actual excuse to suffer longer with such pain. We sell it in medicine recommendation.
