GATES BROS.,
120 GRANVILLE STREET. - HALIFAX.

Our ORGANS were awarded the DOMINION MEDAL AT PHILADELPHIA in 1876, for PURITY of TONE. WON SIX PROVINCIAL PRIZES. They have no equal for TONE in the Dominion—no Superior in America. They are the most POWERFUL REED ORGAN manufactured, yet soft, full, round, deep, and sweet-toned,—having the GRAND ORGAN SWELL, which enables the performer, in an instant, to *swell* the tone from a whisper to a grand burst of harmony. Church Organs a specialty. Pianos, Church, and other Organs Tuned and Repaired, and for Hire cheaper than any other house in the Dominion. Instruments Warranted Six Years, and exchanged at any time. Old Pianos, Organs, Melodeons, taken in exchange for new.

Special Discount to Churches, Societies and Lodges, Clergymen and Teachers. No Fancy Price for Repairing at Gates Bros., nor Bogus Price Lists. In buying a Piano, you need not pay a fabulous price for a name.

WHITE, BLUE, RED, ORANGE & GREEN.

Made of Good American Cotton, with great care, correctly
numbered, and warranted full Length and Weight.

WE would ask the purchasers of Cotton Warp to remember that our
Yarn is spun on Throstle Frames, which make a stronger yarn
than the Ring Frames, used in making American yarn.

It is also better twisted and more carefully reeled; each hank being
tied up in 7 leas of 120 yards each. This makes it much more easy to
wind than when it is put up without leas—as the American is—and also
saves a great deal of waste.

Those acquainted with weaving will understand the great advantage
it is to them to use yarn put up in this manner.

COTTON CARPET WARP,

Made of No. 10 Yarn, 4-Ply Twisted.

WHITE, RED, BROWN, SLATE, &c., ALL FAST COLORS.

Each 5 lb. bundle contains 10,000 yards in length, and will make a
length of Carpet in proportion to the number of ends in width.

We have put more twist into this Warp than it formerly had, and
it will now make a more durable Carpet than can be made with any
other material. Since its introduction by us, a few years ago, it has
come into very general use throughout the country.

All our goods have our name and address upon them. None other
are genuine.

Commence the New Year by patronizing SMITH'S Drug Store.

JANUARY.—Fortunately for the country, Nova Scotian Agriculture has entered upon an entirely new phase within the last dozen years. Our Agriculturists are, in many districts, zealously seeking after scientific methods of culture, introducing labour saving machinery, and improving their live stock by the introduction of "blue blood." The advantages resulting from all this are such as to arrest the attention of cultivators even in the most backward backwood districts, and we may soon hope to see our Province take a first rank among Agricultural Countries. The latest germ of development that has attracted attention is the impetus given to cattle raising by the recently established system of live cattle exportation to

Europe. Now that an unlimited market presents itself our Agriculturists may freely enter upon cattle raising. To do this successfully and profitably it is necessary to start with good calves. These should be from thorough-bred bulls, and for best either Herefords or Devons may be used, but the Short Horn Durhams are preferred before all others, chiefly because they reach a great size in a short period. If there is an Agricultural Society in your district the best way is to join it, and obtain the use of its thorough-bred stock; if not you can purchase a young bull from an established breeder at a reasonable price. If your selection is delayed till the spring months you will have to pay a higher price and have fewer to select from.

Try SMITH'S PERUVIAN TONIC, an excellent appetizer.

FEBRUARY.—In former years we have urged the importance of extra care in the feeding of live stock at this severe season. In view of the cause, recently established by the careful investigation of eminent Veterinarians, of the severe losses of cattle in Picton County, we feel it a duty to repeat our former recommendation:—February is the trying month for cattle, and most of the animals that pine and die in the spring months have really been sacrificed long before. Feed well at this season, not over-much, but judiciously. Calves and young stock will not thrive on dry hay alone; they require the hay to be cut and mixed with meal, crushed grain, or mill stuff of some sort. All animals at this season should have roots, especially young stock. If fed entirely on dry feed their first stomach will be so distended that they will lose all shape, and never afterwards be presentable in the exhibition ring. More serious results than this follow, for when spring thaws come the animals will be sure to scour, get thin, and possibly die. Ignorant farmers wonder why so many

animals die. Intelligent farmers are as apt to wonder why so many live. Let us enquire briefly into the *rationale* of feeding. All the food of animals consists of several bodies having distinct properties, and it is to the relative proportions of these that different food materials owe their differences in feeding value. Hay, besides woody matter which is nearly useless, contains starch, sugar, gum, oil; these are *non-nitrogenous*; and maintain the warmth of the body and produce fat. It also contains albuminous bodies, which are *nitrogenous*; these repair waste and afford material for the growth of the flesh. Hay, grain, straw, roots, vegetables, all contain these fat-formers and flesh-formers; if we wish to produce fat on an animal we feed Indian corn or some other food rich in fat-formers; if the object is to produce flesh, on the other hand, we feed oats or wheat rich in flesh-formers. For milk, the best of all food is green grass, or in winter time, hay, well made from young grass, supplemented by succulent roots such as mangels.

J. GODFREY SMITH, DRUGGIST, 147 HOLLIS STREET.

MARCH.—This is the month of preparation for the actual culture of the soil. which may be still frozen hard and covered with snow. One secret of successful farming is to be always ready for favorable weather. What preparations are now to be made? As soon as manure can be carted out on the frozen fields, let it be done. In bad weather see to the repair of implements. Calculate what seeds and artificial manures will be required, and send your orders at once to reliable houses. If you wait till the time comes for planting and sowing, you may be disappointed.

in obtaining what you want. In order to raise early plants for the vegetable garden and flower beds, a hot bed should be started this month. (See Instructions in former years' Almanacks.) If hay should become scarce, do not allow your cattle to suffer; but give them some middlings or bran with the cut fodder. Cattle allowed to "go down" at this season will take half the summer to recover.

A sure and safe medicine—SMITH'S ANTIBILIOUS PILLS.

APRIL.—This is the month when the cultivation of the soil actually begins; the operations of ploughing, harrowing, rolling, plaiting, cultivating, have now to be attended to as the season advances and as the weather may permit. The theory of cultivation of the soil may well claim more than a passing reflection from the intelligent farmer. All soils consist of a mixture of clay and sand, the clay holds water, the sand allows it to filter through. When the clay is in excess we have a clayey soil, when sand is in excess we have a sandy soil, and when both are equal we have a loam. In the first case the soil is too retentive of moisture, in the second, too porous, which form but a very small proportion of the soil, but are essential for its fertility. The principle ones are (1) phosphoric acid, (2) potash, and (3) ammonia. They are removed in greater or less quality by every crop, and

when they are taken out, the soil, whether clayey, sandy or loamy, becomes barren. To keep up fertility they must be restored. In stable manure we restore all these to the soil. The first may be restored in the form of bone dust or superphosphate of lime; these are special manures for turnips and grains, which take up a large quantity of phosphoric acid. The second ingredient of the soil, potash, often exists in an insoluble form, and is set free by processes of cultivation, liming, and exposure to the action of the atmosphere; it may be added in the form of plant ashes or kainit, a potash-soda mineral imported from Germany. The third substance, Ammonia, is abstracted from the rain water by the soil, and may be added in form of tannery waste, guano, gas water, blood, wool, hair and feathers. Every farm house should have its Flower Garden, the care of which may be relegated to one or more of the female members of the family, now that cheese factories and fat cattle are relieving them of the labor of butter making. The plants most suitable for a Farm Flower Garden are perennials that last over winter and come up in spring, but the more tender

JUNE.—All seed crops not yet committed to the soil should be put in without delay. After the 1st day of June it is not too early to sow any kind of seed suitable for our climate. The drill crops put in during April and May will now require attention, first in the way of hand hoeing, where this has to be done, and secondly by the use of the horse hoe or cultivator. But there are still some crops to be planted or sown. Put out cabbages and cauliflowers, but only in soil that has

in the Province who are not members of an Agricultural Society, or if no such Society exists in their district, then the duty devolves upon them this month of joining a Society or organizing a new one. There can be no general progress among our farmers without co-operation, for the obtaining of suitable thorough-bred animals of the very highest class is beyond the reach of individuals. The reason attention is called to the matter this month is that a new Society desiring to participate in the Legislative grant-in-aid must send in the declaration required by Sec. 13 of the Act before the first day of July.

JULY.—Notwithstanding what has been said in June, indicating that as the last month of seed-time, yet Turnip sowing may still be done. Some even prefer to sow their Swedes this month, and the soft Turnips for immediate feeding need not

necessarily be sown till the end of July. The ground should have undergone a thorough pulverization. Light sandy soil is the best for Turnips. They start best after the ground is warm, but the bulbs swell most rapidly during the cool dewy nights of Autumn. The soil cannot be worked too deep or made too fine for Turnips. Town manures are valued for this crop; and crushed bones have been applied with the best effects, either when covered in the drills in the manner of ordinary dung, or when sown by machine along with the seeds, so as to be in immediate contact with the latter. Guano has been largely used of late years. Superphosphate is very efficacious. One point of Turnip culture that is often neglected in Nova Scotia, although well understood elsewhere, is that the seed should be put in the moment the soil is prepared. drill gets dried up in the sun before the seed is committed to it, how can the latter be expected to germinate. Hoeing and weeding of all drill crops should be carried on actively this month and completed before haying time. Haying is the operation before which all others must give way. The secret of good hay making is fine weather, and the secret of the weather is to keep in mind that at this season we do not have many hot clear days in succession. If the day is clear and the temperature high, do not be tempted to mow too much; wait till the rain is clearing away and the air begins to cool. Then do your mowing early in the week, so that your hay will not have to lie over Sunday washing in the rain or bleaching in the sun.

ACRES.—Our farmers, at least those in the best farmed districts of the Province, are working into a mixed husbandry, so that cattle may not feed on hay all winter

and pasture in the summer, but feed in winter on straw and roots and coarse grain; and in summer partially or wholly on green fodder-in-doors. This is the only way to enrich a farm, or to attain to anything like high farming. We therefore advise you to plant as much clover as you can get room for, and to sow it in rows of tares or cereal oats or barley or Indian corn or rape, or any other green establishing for the cattle to grow or fatten upon when the pastures are all burnt up. After feeding for some time on such crops, they will be able to do without any more food until the ripening of fruit, destroy caterpillars, if any still remain; pick the early August apples, and send them into market. When the rains come, beds of strawberries may be made, and the garden planted with cabbages, cauliflowers, etc., etc.

The mushrooms now appear in the horse pastures. The eating of some of the

SEPTEMBER.—September is Exhibition month. If Exhibition Committees made their arrangements in time, the dates of each Exhibition would be duly foretold in its proper place in the daily calendar of this Almanack. Our Provincial Exhibition is usually held during the last week of September or first of October. In 1880 another Exhibition, open to the Province, was held in the City of Halifax. The New Brunswick Exhibition was held during the week following the Provincial one at Kentville. In 1880 the first Cape Breton Island Exhibition, and several local Exhibitions were arranged by the County and District Societies, such as the Yarmouth and Liverpool Exhibitions. when properly understood, but the frequent destruction of roots in the cellar shows that it is not always understood or carried out. Potatoes should be dug in dry weather, and allowed to dry completely on the surface before being put together in heaps or in the cellar: the best way is to put them on a barn floor and exclude the light, otherwise they will become green and acquire a bitter taste and poisonous qualities. Mangels, turnips and carrots should be topped and the fine root fibres cut off. Before storing they should, in like manner, be exposed to dry air that the wounds may heal over; if put at once into the cellar, the wounded tissue will begin to ferment, and a large portion of the roots will be rotted by contact. If facts such as these are kept clearly in view, no farmer need lose his roots. Of course the cellar must be kept well aired, cool and dry, and frost carefully excluded.

Chest and Bag Protectors at SMITH'S DRUG STORE.

NOVEMBER.—The previous month will have been occupied pretty well in securing the root crops. Now the whole strength of the farm should be thrown into fall ploughing. This is the most important operation, whether we view it as a means of preparing the soil for the future crop, or as a convenience to enable the farmer to have spring time for proper spring work. The addition of manure to a soil is not enough, the pulverisation, mixture, freezing, thawing and rain-washing of the soil are the processes by which its fertility is to be secured. Let us illustrate this:—Bone, an insoluble tribasic phosphate, receives the rain water which contains carbonic acid gas; this changes a portion of the bone into carbonate of lime, and the rest into bi-phosphate which gradually dissolves and becomes available to the plant. If the rain water drains away over the hard surface, or if the soil

lies soaked in stagnant water, and there is no passage of rain through it, this change cannot take place. When lime is added to the soil it quickly acts on the organic matter, but the lime must be diffused completely through the soil otherwise it becomes inert before it has had an opportunity of doing its work by being brought into actual contact with soil particles. The clay of the soil is a silicate of alumina; with lime, if the particles be brought together in presence of water, a double silicate of lime and alumina is formed. If soda be brought into contact with this the lime gives way and a double silicate of soda and alumina is formed. If potash be added, the soda gives way, and we have now a double silicate of potash and alumina; and lastly, potash will yield to ammonia, and thus ammonia will be collected from the air and rain, and become fixed in the soil so as to be available for plant growth.

J. GODFREY SMITH, DISPENSING CHEMIST, 147 HOLLIS ST.

DECEMBER.—Under each month we have endeavoured to indicate matters that most urgently require the attention of the farmer. to improve the live stock of its district, which is accomplished by obtaining and keeping for the use of members superior male animals, such as bulls, rams and boars. Societies may also introduce seeds of new varieties of grain, roots, and also improved implements, and sell them to members at cost and charges. Exhibitions are held by some Societies or by the Societies of a County combining. The whole of the Societies of the Province meet on the second Monday of December, each in its respective district, when the members receive the Directors' Report, and select officers for the ensuing year. Full information as to the method of organizing Societies may be obtained on application to the Member of the Board for the District, (see Board of Agriculture in another part of the ALMANACK), or to the Secretary, Professor Lawson, Dalhousie College, Halifax.

The following clauses of the Medical Act (Chap 28, Revised Statutes, 4th Series,) are here published for the information of the profession and the public:—

8. Subject to the exceptions hereinafter made, no person shall practice physic, surgery or midwifery in Nova Scotia, unless his name shall be registered in the Book of Registry of the Provincial Medical Board, and unless he shall have received from such Board a license to practice.

16. Any person entitled to be registered under this chapter, but who shall neglect or omit to be so registered, shall not be entitled to any of the rights or privileges conferred by the provisions of this chapter, so long as such neglect or omission shall continue.

17. No person, otherwise fully qualified under this chapter, shall be refused registration or a license to practice on account of his adopting or refusing to adopt the practice of any particular theory of medicine or surgery. In case of such refusal by the Board, the party aggrieved shall have the right to appeal to the Governor in Council, who, upon due cause shown, shall issue an order to the Board to register the name of such person and to grant him a license to practice.

21. Every person who shall be registered under the provisions of this chapter, shall be entitled according to his qualification or qualifications to practice Medicine, Surgery, and Midwifery, or either or any of them, as the case may be, in Nova Scotia, and to demand and recover in any court of law reasonable charges for professional aid, advice and visits, and the cost of any medicine or other medical or surgical appliances rendered or supplied by him to his patients.

22. No person shall be entitled to recover any charge in any court of law for any medical or surgical advice, or for attendance, or for the performance of any operation, or for any medicine which he shall have both prescribed and supplied, unless he shall prove upon the trial that he is registered under this chapter.

24. No person shall be appointed as medical officer, physician or surgeon in any branch of the public service, or in any hospital or other charitable institution, unless he shall be registered under the provisions of this chapter.

25. No certificate required by any Act now in force, or that may hereafter be passed, from any physician or surgeon, or medical practitioner shall be valid, unless the person signing the same shall be registered under this chapter.

28. If any person not registered or licensed under the provisions of this chapter, or not being actually employed as a physician or surgeon in Her Majesty's naval or military service, practises Physic, Surgery or Midwifery

SABBATH SCHOOL ASSOCIATION.—This Society is intended to bring together once a year representatives of all the Sabbath Schools throughout the Maritime Provinces, in order to discuss the most approved methods of prosecuting their work. *President, A. McQueen. Secretary, S. Waddell, Halifax, N. S.*

HALIFAX INFANTS' HOME—The object of this Home is to receive and tenderly care for destitute infants. Its affairs are managed by a Committee of ladies. The annual expenditure amounts to about \$3000. It has no building of its own, and no endowment. The number of infants in the Home at any one time is about forty-two. When the children are about two years old they are given out to be adopted by families in the country. Over fifty have been thus provided for within the past four years. The Committee extends its care as far as possible to the mothers of the destitute infants, aiming thus at a double good. The Home is situated at the corner of Inglis Street and Tower Road. Miss Nordbeck, *Treas.*, Studley. Mrs E. M. Saunders, *Sec'y.*, Carlton Street.

ASYLUM FOR THE BLIND—Board of Managers, William Murdoch, Esq., who died in London in 1867, left by Will 25000 N. S. Currency towards endowing an Asylum for the Blind. This led to other gifts and the erection of a building at a cost of £3000,—capable of accommodating forty pupils. The Institution is really a school. There were ten boys and six girls on the Roll in 1876. Income from all sources £2,656. Expenditure \$2,918. Jas F. Avery, M.D., *Pres.*; John S. Maclean, V. Pres.; Geo Thomson, *Treas.*; M. H. Richey, *Corresponding Secretary*; M. Bowman, *Recording Secretary*; C. T. Fraser, *Superintendent*; Miss Jessie Forrester, *Teacher*; T. Blair, *Steward*; Mrs. T. Blair, *Matron*.

DEAF AND DUMB INSTITUTION (Göttingen Street.) This Institution has been in operation for twenty-one years. Over two hundred pupils have been under instruction there. It is supported partly by grants from the Governments of the Maritime Provinces, and partly by voluntary contributions—most of the pupils being too poor to pay for their board and education. The pupils range in age from five years up to twenty-five. Those who have the full benefit of an education here are able to express themselves with fluency. *Patron*, His Honor the Lieut.-Governor of Nova Scotia. *Chairman*, Hon. D. McN. Parker, m.p. *Secy.*, Rev. John Forrest. *Principal*, Albert Woodbridge. *Assistant Teachers*, John Logan and Miss Logan. *Matrons*, Mrs. Vincovoe. *Cycicians*, Hon. D. McN. Parker, m.p., Dr. Moren. *Dentist*, Dr. Alfred Cogswell.

HOME FOR THE AGED—This place is intended to afford a comfortable retreat to respectable women of advanced years whose means of livelihood are very limited. Fifty dollars a year paid by the inmate or by a friend secures all the comforts of a home. Number of inmates twenty-two to twenty-four. The Institution owes its existence to the thoughtful liberality of the late William Murdock, Esq. President, Mrs. W. S. Stirling. *Secretary, Miss Forrest. Treas. Miss A. Nordbeck.*

PROTESTANT ORPHANS' HOME—Protestant Orphans, two years old, and upwards, are admitted to this Institution. It enjoys considerable endowments. Comfortable homes in the country are sought out and secured for boys and girls as they grow up. *Secretary, Mrs R. Pickford. Treasurer, Mrs J. H. Liddell. Physician, Dr Lawson.*

TEMPERANCE DIRECTORY.

SONS OF TEMPERANCE.—The first Division was organized at Yarmouth, Nov. 17, 1847. The Grand Division was organized April 22, 1848. There are now one hundred and sixty-three Subordinate Divisions (163) with about ten thousand members,—twenty-five Bands of Hope with 2200 members; and eight Sections of Cadets with 250 members: *Grand Worthy Patriarch*, Rev. George Christie, Bedford, Halifax Co.; *Grand Scribe*, J. Parsons, B. A., Halifax; (Office 197 Hollis St.) *Agent and Lecturer of Grand Division*, Thomas Hutchings. Quarterly session of G. D. held in different parts of the Province in January, April and July. The annual session is held each Autumn in Halifax.

UNITED TEMPERANCE ORDER (formerly British Templars).—Grand Lodge of Nova Scotia organized in 1863. Has now about 66 Lodges containing about 2000 members; Juvenile Lodges 6 with 274 members; *President*, John H. Taylor, Gays River Road, Halifax Co., *Secretary*, Adam Carson, Pictou.

The next Annual Session is to be held in Pictou in the first week of July, 1881.

I. O. OF GOOD TEMPLARS OF THE WORLD.—The first Lodge organized at Economy, Colchester County, July 4, 1864. Grand-Lodge of Nova Scotia formed February 5th, 1867; there are now 96 Subordinate Lodges with 4500 members; 10 Juvenile Temples with 450 members; *G. W. C. T.*, Rev W. G. Lane, Mid Musquodoboit, Halifax Co.; *G. W. S.*, Howard Stewart, Truro.

The next Annual Meeting will be held at Stellarton beginning the first Tuesday in October, 1881.

I. O. OF GOOD TEMPLARS, LOYAL.—Grand Lodge of Nova Scotia re-organized Nov. 21, 1876, about 65 Subordinate Lodges, and about three thousand members; 8 Juvenile Temples with 300 members; *G. W. C. T.*, Dr J. S. Calder, Bridgewater; *G. W. S.*, I. J. Hingley, Oxford, Cumberland.

Next Annual Session will be held at Amherst first Tuesday July, 1881.

THE BLUE RIBBON CLUBS within the past three years have been organized in nearly every County of the Province. The enrolled membership increased with remarkable rapidity, especially in the Counties of Yarmouth, Digby, Annapolis, Colchester, Cumberland, Pictou, Cape Breton and Halifax. The aggregate membership in the Autumn of 1878 was estimated at 20,000. After that date some of the Clubs ceased in active work; some died; others were changed into Societies of other names; and the membership now in the Province is not nearly so large as in 1878. At this date (Autumn of 1880) the enrolled membership of the various Temperance organizations in Nova Scotia is (approximately) as follows:—

Sons of Temperance and Cadets, &c.	12,000
United Temperance Order, (British Templars)	2,274
I. O. G. Templars, (of the World)	4,500
I. O. G. Templars, (Loyal)	3,300
Roman Catholic T. A. Societies	3,500
Protestant Church Temperance Societies	2,000
Reform, or Blue Ribbon Clubs	10,000
Women's Temperance Unions	3,000
