HARBOR GRACE STOVE DEPOT

Glass and Tinware Establishment.

To the east of Messrs. John Mann & Co
Mercantile Premises)

C. L. KENNEDY,

Begs to intimate that he has recently received a large assortment of the latest improved and very best quality of Stoves comprising Cooking, Fancy, Franklin and Fittings of all sizes English and American GOTHIC GRATES.

In addition to the above, the subscriber has always on hand—American Hatches, Harness Rings and Buckets, Sheath Knives and Belts, Wash Boards, Brooms, Clothes Lines, Water Pails, Matches, Kerosene Oil—best quality Turpentine, Stove Shoe, Paint and Clothes Brushes, Preserved Fruits, Condensed Milk, Coffee, Soaps, and a general assortment of Groceries, Hardware, Glassware, Tinware, &c.
American Cut Nails—all sizes—by the lb or keg.
Nov.

RAILWAY NOTICE.

THE NEWFOUNDLAND RAILWAY COMPANY will not recognise any CLAIMS on account of purchasers, unless they are authorised by the Chief Engineer, or

A. SHEA,
Agent.

ADVERTISEMENTS

HOUSEHOLD WORDS

HOLLOWAY'S PILLS AND OINTMENT

PURITY OF BLOOD ESSENTIAL TO HEALTH, STRENGTH, AND LONG LIFE.

THE PILLS

surpass all other Medicines for Purifying the Blood; they are available for all as a domestic and household remedy for all disorders of the STOMACH, LIVER, KIDNEYS AND BOWELS.

Congestion and Obstruction of every kind they quickly remove the cause, and in constipation and disordered condition of the Bowels, they act as a cleansing agent.

For Debilitated Constitutions and also Female Complaints these Pills are unsurpassed—they correct all Irregularities and Weaknesses from whatever cause arising.

THE OINTMENT

stands unrivalled for the facility it displays in relieving, healing, and thoroughly curing the most inveterate Sores and Ulcers, and in cases of BAD LEGS, BAD BREASTS, OLD WOUNDS

Gout, Rheumatism, and all Skin Diseases, acts as a charm.

Manufactured only at Professor HOLLOWAY'S Establishment,
533, OXFORD STREET, LONDON and sold at 1s. 1 1/2, 2s. 9d., 4s. 6d., 11s., 22s., and 33s., each Box and Pot, and in Canada, 36 cents, 90 cents., and \$1 50 cents., and the larger sizes in proportion.

Caution.—I have no Agent in the United States; nor are my Medicines sold there. Purchasers should therefore look to the label on the Pots and Boxes. If the address is not 533, Oxford Street, London, they are spurious. The Trade Mark of my said Medicines are registered in Ottawa, and also at Washington.

Signed THOMAS HOLLOWAY
533, Oxford Street, London.

Newfoundland Lights.

TO MARINERS.

[No. 2, 1881.]

ROCKY POINT, HARBOR BRETON, FORTUNE BAY.

Latitude 47° 27' 30" North.
Longitude 56° 47' 45" West.

The Light tower burnt down in June last has been replaced by a CIGULAR IRON one, in which, on and after 21st November a fixed white light will be exhibited nightly, from sunset to sunrise, at an elevation of 68 feet above the level of the sea, and illuminating the whole harbor seawards, excepting towards the Harbor Rock. This Rock bears N. E. & E. 230 yards distant; on this bearing the Light is obscured.

The illuminating apparatus is Dioptric of the 8th order, with a single argand burner. The Tower is painted Red and White in alternate horizontal bands.

[No. 3, 1881.]

HANTS HARBOR, TRINITY BAY.

Latitude 48° 01' 07" North.
Longitude 53° 15' 07" West.

A Wood Octagon Tower on a square base has been erected at this Harbor on the N. E. Head, on which, at an elevation of 65 feet above the level of the sea, a fixed red light will be exhibited nightly from sunset to sunrise on and after 21st November, and which will illuminate the whole harbor seaward.

The apparatus is Dioptric of the 8th order, with a single argand burner. The buildings are painted White.

JOHN STUART,
Surveyor.

Holloway's Pills and Ointment.—Influenza, Coughs, and Colds.—In diseases of the throat and chest, so prevalent in our changeable climate, nothing so speedily relieves, or so certainly cures, as these inestimable remedies. These disorders are too often neglected at their commencement, or are injudiciously treated, resulting in either case in disastrous consequences. Whatever the condition of the patient, Holloway's remedies will restore, if recovery be possible, they will retard the alarming symptoms till the blood is purified and nature consummated the cure, gradually restoring strength and vital nervous power. By persevering the use of Holloway's preparations, tone is conferred on the stomach and frame generally. Thousands of persons have testified that by the use of these remedies alone they have been restored to health after every other means had failed.

Miscellaneous.

NEWFOUNDLAND COPPER BO. NANZAS.

(Montreal Weekly Gazette.)

In my letter of November 3rd I referred at some length to an apparently very valuable deposit of copper recently discovered at Bay Verte, on the coast hitherto known as the "French Shore." Happily the name is no longer appropriate in any sense, as we can say the whole shore of the island is our own. I am now in a position to report another bonanza, in two small islands off Notre Dame Bay, called respectively Cann Island and Indian Island. These islands are situated to the south of Fogo Island, and not far from the harbor of Sel-dome-come-by. All the copper mines now opened are on the shores of Notre Dame Bay, or of one or another of its numerous bays. The bosom of the great Bay is studded with numerous islands, and the partial exploration to which they had hitherto been subjected has shown that some of them present very promising indications of being not less rich in mineral than the mainland, in proportion to their extent. In Sunday Cove Island, Pilley's Island, New World Island, and Twidlingate Island, deposits more or less valuable have been found. The copper ore in this region is found in lower silurian formations, and the peninsula lying between the various arms of Notre Dame Bay have hitherto been found richest in mineral deposits. Doubtless, this Bay, with its arms, has been scooped out by the denuding force of glacial action, and these peninsulas represent those portions of the lower silurian beds which have been able to resist the glacial denudation which has swept away from the surrounding region this ancient formation. The islands in the bay appear to correspond in character to the peninsulas, and may be regarded as relics of the old silurian beds, and consequently, as very promising fields for mineral explorers. Experience seems to confirm this view. There are two Cann Islands, called Great and Little; the former is about three miles in circumference, the latter about three-quarters of a mile. They are separated by a narrow "tickle" which is not more than 100 feet in width. There is deep water close to the land on both sides, where the mineral has been discovered. The lode was first found, more than two years since, in Little Cann Island, which it crosses completely, and reappears in Great Cann Island, where it has been traced for a considerable distance. During the past summer a few experienced miners were set to work with a view of thoroughly testing the lode. The results are of the most satisfactory character, and seem to place it beyond a doubt that there is a large and valuable deposit of copper of excellent quality. The miners found that the lode, which on the surface was six or eight inches, at the depth of four feet widened to five or six feet in breadth. They were able to trace it for about a mile in length. Samples of the ore found at the surface, and at the depth of three or four feet, were forwarded for analysis to Robert H. Richards,

Esq., Professor of Mining in the Massachusetts Institute of Technology, Boston. I have his assay before me, which shows that the ore contains ten per cent. of copper, and that its value is \$3 per unit, or \$30 per ton. This is unusually high per centage of copper in surface specimens. The rock with which the ore is associated is the usual chloritic slate, and pronounced by the miners "very favorable." On each side of the dyke containing the lode is a clearly defined wall, which seems to indicate that it is a true vein. Two miners who had had eighteen years' experience in various parts of the world, have stated in writing that "in all their experience in mining work they never saw better prospects for copper, both in quality and quantity, the ore being both valuable and abundant, and facilities for shipping very good." They farther say that "at Great Cann Island copper ore can be traced all around the Island, and that no fear need be entertained of the success of mining operations properly conducted. In Little Cann Islands mineral indications are still more abundant, being traceable everywhere."

Indian Island is about three miles from Cann Island, and is separated from Fogo Island by a "tickle." It is four miles in length and about a mile in breadth. Here a mineral deposit has been discovered no less than sixty feet in width and containing numerous copper veins intermixed. As yet it has not been tested, only surface specimens having been obtained, which, however, are of a most promising character. G. of judges have given a highly favorable opinion of this claim. In the same Island, at its north-eastern extremity, a vein of lead, yielding a large percentage of silver, has also been found, and, judging by the analysis of the specimens, it bids fair to throw the others in the shade. Professor Holloway of St. John's, Nfld., has given the following certificate of analysis:—

July 27th, 1881:

"Analysis of a sample of galena (sulphide of lead) submitted to me on behalf of the company by W. T. Salter, Esq.:

"The lode lies between the cubes of iron pyrites on the one side, and calc spar on the other. Crystals of iron pyrites and quartz occur in small quantity throughout the sample.

"The ore contains 70.25 of metal (lead and silver.) On cupellation 281 grains of metal gave 59 grains i. e., 59.100 of a grain of pure metallic silver. This result means that the ore will yield 48 oz. 20 dwts. 16 gr. per ton—a very encouraging result.

"R. E. HOLLOWAY, B.A., F.C.S."

The vein from which this sample has been taken can be traced at intervals for nearly half a mile. Forty-eight ounces of silver to a ton of ore is a rich yield. The whole of these mining claims on the Cann Island and Indian Island are held under mining license from Government by a company of six persons, of whom J. O. Fraser, W. T. Salter, and J. T. No. 111, Esqrs., are the leading members, Mr. Salter having been the original organizer of the company. Negotiations for working them on an extensive scale early next spring have been concluded with a strong company of American capitalists. The miners who were sent to examine and report on Indian Island have certified that the prospects for obtaining copper, lead and silver, are excellent. I believe it is the first instance in which lead and silver have been found in proximity with copper in this country. Whether the lead is in a different formation from the copper is not stated. But I expect to find that this is the case. These repeated discoveries of mineral all go to prove that our Island is rich in precious metals, and that if the slight explorations now carried out have given such remarkable results, the future is likely to bring with it far richer discoveries when the country has been opened up by railways and thoroughly examined. Apart altogether from our fertile lands, there is enough in the mineral treasures, which beyond all doubt the island contains, to warrant the construction of a trunk line of railway—such as that now under construction.

BISHOP MULLOCK'S MEMORIAL ALTAR.

A TRIBUTE WORTHY OF HIM AND OF THOSE WHO HAVE THUS EN-SHINED THEIR APPRECIATION OF HIS WORTH.

About twelve months ago His Lordship Dr. Power announced his proposal of a Memorial Altar in St. Patrick's Church, for his predecessor Bishop Mullock, and a subscription was opened to raise the necessary funds. The altar was soon after ordered, was sent in due course by the artists, Messrs. Hall & Co., of Boston; and on the 6th inst., the Feast of Epiphany, it was inaugurated by His Lordship the Bishop, assisted by a large number of his priests, with a solemn and brilliant ceremonial.

The Altar of pure white marble inlaid with mosaic, is a *chef d'œuvre*, of chaste and religious beauty. The unlettered in art will be struck instantaneously, on viewing it, with a sense of its admirable appropriateness to its objects, and with a reverential awe which words but feebly interpret; while the examiner with artist eye will delight to scan its every minute detail—finding not mere faultlessness, but that perfection of design and finish which denotes that art has exhausted its cunning to produce this splendid work.

The day of Epiphany, or first manifestation of our Lord to the Gentile world, was fittingly chosen for the first celebration of the Divine mysteries on this new Altar. It was meet too that it should proceed with Pontifical pomp and fulness of ritual; that no observance should be omitted which could symbolize the Most High and the Veneration and love of the Church for the memory of her departed Pastor cherished with heart-warm affection. Nothing was wanting in the function of the day which could aid to give expression to these sentiments; and the vast congregation which thronged the church of St. Patrick testified how profound was their impression of the sacredness of the occasion.

To all who knew and loved the great bishop gone, as they trust, to his place in the Church triumphant, the day's celebrations were as gratifying as they were holy, and their memory will be long green as that of the virtues of the Dead. The white marble of the altar typified the sincerity and endurance of their feelings in his regard; and the presence of mitred Prelate and vested priests recalled their late Bishop once again to his altar-throne, surrounded by his devoted ministers and people. And not to that days' memorials, and the congregation there present, are confined the remembrance of Bishop Mullock and aspirations for his soul's eternal peace. The intelligent mind of this country, without distinction of creed, dwells often and gratefully, not upon the character and deed of the great Churchman alone, but upon the bright intellectual light, and the ever earnest thinker and worker for the country's welfare. No man's heart was ever more filled than his with the thoughts of Newfoundland and all its interests, and none ever labored with purer devotion to speed their progress. If the spirit which animated him in this direction had a fault, it might have been that he was too impatient of the paces of advancement and longed to accomplish it with a bound. His information on those subjects, both great and minor, was exhaustive; and on none more complete than that of the home of his adoption. Founded on this was a conviction of the great resources of the colony and of the great future to be achieved from it. The first published idea of a Telegraph from here to the United States, the germ of the Atlantic Telegraph, was given by his pen; he gave all his influence to the movement for steam communication, and forecast the construction of a Railway—in a word he was foremost to urge every measure of public improvement; was fit and always ready to cope with obstacles, and sighed only when they proved invincible even to his courageous zeal.

No monument was needful to commemorate a man with his record of services to his Church and to his kind. Nevertheless is the tribute worthy of him and of those who have thus enshrined their appreciation of his worth.—*Nfld.*

As diphtheria is at present very prevalent in several parts of our Bay, and is looked upon by many to be a very simple disease, we publish the following for the information of our readers.

DIPHTHERIA.

BOARD OF HEALTH, 31 PEMBURTON SQUARE, BOSTON.

The following circular is issued for the purpose of more widely extending the knowledge of a few well-attested facts concerning Diphtheria, and reminding all persons that greater care should be exercised to prevent the spread of this most-dreaded disease. Diphtheria is contagious and infectious and may be easily communicated, either directly or indirectly, from person to person. It may be conveyed directly in the act of kissing, coughing, spitting, sneezing, or indirectly by infected articles used, as towels, napkins, handkerchiefs, etc. The poison clings with great tenacity to rooms, houses, articles of furniture and clothing, and may occasion the disease, even after the lapse of months. Diphtheria attacks all classes at all ages, and all seasons of the year. By preference it attacks children and those who debilitated from exposure to filth, dampness or foul air, from whatever source. When a case of diphtheria occurs in any family, the sick persons should be placed in a room apart from the other inmates of the house, and should be nursed, as far as possible, by one person only. The sick chamber should be well warmed, exposed to sunlight, and well aired; its furniture should be such as will permit of cleansing without injury, and all extra articles, such as window and table drapery, woolen carpets, upholstered furniture, and all hangings, should be removed from the room during the sickness. The physician and the nurse as a rule, should be the only persons admitted to the room. Visitors to the infected house, should be warned of the presence of a dangerous disease therein, and children especially should not be admitted. All clothing removed from the patient or the bed should be at once placed in boiling water, or in a tub of disinfecting fluid (8 oz. sulphate zinc, 1 oz. carbolic acid and three gallons of water), by the nurse before being carried through the house or handled by any other person. They may be soaked in this fluid for an hour, and then placed in boiling water for boiling. It is better not to use handkerchiefs, cleansing the nostrils and mouth of the patient, but rather soft rags, which should be immediately thrown away after use. All vessels for receiving the discharges of the patient should constantly contain some of the disinfecting fluid. Water closets and privies in the house should be disinfected daily with a solution of copperas—two pounds to a gallon of water. Every kind and source of filth in and around the house should be thoroughly removed, and disinfectants freely used. Cleanliness tends both to prevent and mitigate the disease. Drains should be put in order, and ventilated by a four-inch straight pipe extended above the higher point of the roof of the house in every instance, terminating at a distance from any chimney or other ventilator. Children in the family should not attend school or mingle with other children until the patient is wholly recovered, and all infected articles have been disinfected. On the recovery or death of the patient the most thorough disinfection should follow. The room and all articles in it should be at once subjected to the fumes of burning sulphur, as follows: Close the room tightly and burn 2½ pounds of sulphur to each thousand cubic feet of space. After four or six hours open the room and expose it to the air and sunlight for a week. Anything that can be boiled without injuring may be so treated. The walls and ceilings should be dry rubbed or lime washed, and the floors washed with soap and water, to which may be added a little carbolic acid. When death occurs, the body should be immediately placed in the coffin, and finally closed. No public funeral should ever take place at the house where the patient died, nor elsewhere, unless the coffin remains hermetically sealed.

By direction of the board of health,
G. E. Davis, Jr., Clerk.

On the 27th ult. a mineral train was standing on the line between Middleborough and Stockton awaiting another mineral train. While waiting there the engine boiler burst. It was blown over the van in front and six wagons. The engine driver and fireman living at the time of the explosion, were killed. Two men were injured. The killed are John Robinson, engine-driver; Frank Hill, fireman; and George Smith, guard; Thomas Waters and Frank Watson, injured. Another death occurred later in the night—that of Thomas Nelles, guard of the train of which the engine exploded.

AGENTS FOR HERALD

The following gentlemen have kindly consented to act as our agents, all intending subscribers will therefore confer a favor by sending in their names and subscriptions that they may be forwarded to this office.

- Brigus—Mr. P. J. Power, School Teacher
- Bay Roberts—Mr. G. W. R. Hierlihy

THE CARBONEAR HERALD

"Donest labor—our noblest heritage."
CARBONEAR, JAN. 20, 1882.

ITALY.

A new phase of the Italian question is forcing itself on the attention of European statesmen. Circumstances are every day occurring, which prove more and more clearly that the actual position of the Pope cannot for very long be suffered to remain what it is. A King and a Pope in the same city, each independent of the other, and each recognizing no superior earthly authority, is a practical contradiction which cannot enjoy protracted existence. Rome is too limited an area for the exercise of two such powers. The Catholic world and even the non-Catholic governments which have Catholic subjects, cannot permit the difficulty to cumber the earth. The wisest well wishers of King Humbert are in full accord; and their opinion is every day gaining adherents even among his most trusted Italian counsellors.

Rome suited well as capital of Italy, when Italy meant the united political government of more than all Europe. The old Emperors whose soldiers had garrisons in Egypt, Asia, and Britain could judiciously make Rome the seat of Empire; for there were no enemies within a thousand miles. An advancing hostile army could reach Rome, only after subduing a hundred fortresses that lay outside. Rome though under-

fended itself against enemies in the immediate vicinity; was yet defended by many intervening strategic points against foreign foes; and the nearest of foreign foes was absent by a number of degrees of latitude and longitude. The case is quite different to day. The enemy is within a days march almost, and Rome itself is from its very location incapable of being made a fortress. The Italian King and ministry are beginning to realize this; and this no doubt is the beginning of the end.

Rome as the capital of the Catholic world required no strategical strength to speak of; Rome as political capital of Italy would require to be an almost inexpugnable stronghold. Hence, then, it is that both Pope and King, for good reasons on each side, for reasons of church and state, would be more happily situated if they were separate.

This view of the question has, within the last few weeks made immense advances in diplomatic circles all over Europe. The action of the German Emperor in opening communication directly with the Vatican, was probably that which first gave it prominent public importance. That action showed that in Prince Bismarck's opinion, at least, the only proper way to treat the Holy Father was to regard him as an independent sovereign; and a perfectly free sovereign he certainly is not, while a prisoner in the Vatican. What gives Bismarck's course more importance is, that, independently of his own sagacity, he himself at one time entertained different sentiments and for years attempted to realize them, while he was backed by all the strength of the German Empire. Britain has followed suit, and despatched an agent to hold direct communication with the Holy Father. The Pope in fact is gaining outside sympathy and strength to an extent that is astonishing; and the outside sympathy and strength is reacting on his jailers with a force that very soon they will be obliged to submit to and accept. This can be read in the signs of the times. It may take some time yet before all the effects are produced; but enough have already been produced to fill every Catholic heart with hope. The outbreak was not, since the revolution began, so bright at any one time as it is at present.

EDUCATION.

[FOR THE CARBONEAR "HERALD."
From our own Correspondent.

NORTHERN BAY R. C. SCHOOL.

The annual examination of this School took place a few days ago and was in every respect attended with a fair share of success considering the many drawbacks to which the majority of our schools in Newfoundland are subject such as the greater part of the male pupils being taken from school during the fishing season, and the irregular attendance from other causes. The following are the names of pupils who acquitted themselves most creditably on the occasion:

- M. Doyle " Thy Neighbor
- P. Hogan " Address to Our [Lady
- R. Hogan " The Child's Prayer
- J. March Prose *Love of Country

*Nearly the whole of the last mentioned piece was original and ran as follows:

LADIES AND GENTLEMEN,—

The subject I have chosen is one which I feel will engage your undivided attention and one which should in all places and at all times hold a prominent place in the thoughts of all, Love of Country,
"Breathes there a man with soul so dead
Who never to himself hath said
This is my own native land."

It matters not whether a man was born amidst the majestic splendor and unrivalled scenery of London life or on the fog bound shores of Newfoundland, nay, if he first saw the light in some remote corner of chilly, uninhabited Labrador, his birthplace is still the same sacred spot where childhood's hours flew gaily by unnoticed in their flight, a time which must be looked upon in after years as the happiest moments of life.

"The exile on a foreign strand
Where e'er his footsteps roam
Remembers that his father's land
Is still his cherished home."

It was love of country which made Washington's name eclipse all others to-day in the proud pages of American history.

It was love of country which brought death and desolation to many a happy home in Ireland, this was the noble cause for which immortal Emmet suffered and died, and this alone is the chief cause of Parnell's imprisonment at the present time.

I cannot picture in my youthful imagination where that land lies which if visited by me would make me forget

That there is a small island lies in the Atlantic,
Abounding with riches on land and in sea;
The home and the birth place of all Newfoundlanders,
The land which is dearer than any to me.

The examination then closed with a new song composed for the occasion, entitled "The Railway" and sung by six of the school-boys whose vocal abilities rendered lively the following lines:

THE RAILWAY.

Why not rejoice with pen and voice,
The Railway train is moving;
And soon 'twill come to Carbonear,
Our country is improving.
Our country is improving.
'Tis true we've got a lot to pay,
To keep the cars in motion;
But wealthy countries all agree,
That Railroads mean promotion.

Our mineral wealth may be explored,
Our fishermen get employment;
Our timber lands they may be worked,
And we'll live in wealth's enjoyment.
Country villages we may have,
So we must wait with patience;
And whilst we're waiting not forget
The boon of Education.

So clear the track 'way to the north,
Where copper ore lies sleeping;
'Tis time to know our country's worth,
Too long we have been dreaming.
Hope for the best, fear not the cost,
Of this great public highway;
Far brighter days on us may dawn,
Success attend the Railway.

Local and other Items.

To indite well and to write well are valuable accomplishments, but a good pen is helpful to the one, and indispensable to the other. Those of the Estabrook make are well known and widely appreciated.

By late advices from Mr. Tobin, an occasional correspondent of ours, we learn that the Bay-de-Verde wedding referred to in another column exceeded by far any enjoyment of the kind ever witnessed by him in this country, and fully equalled any occasion of the sort which it has been his lot to attend either in the United States or on the Continent. We too join with him in wishing the young couple a Happy New Year and a large measure of success through life.

The *Oulton*, Captain Layton, and owned by John Munn & Co., arrived just in time on Saturday to escape what has proved to be a very severe brush of weather. He made the run from Bristol to Harbor Grace in thirty-nine days having a continuance of westerly and north-west winds, with violent squalls. Captain Layton reports passing a large quantity of wreckage, viz., the bulwarks, stanchions and sail of a large vessel in lat. 48.30, N., and lon. 22, W. In mid-ocean a quantity of wrecked material was also met with. The day previous to her arrival the captain reports near this coast, were floating in every direction a very large quantity of deals and timber, which he supposes to be the cargo of a large lumber vessel recently lost.

By arrival of the coastal steamer *Curlew*, from the Westward, we learn that the schooner *Mary Elizabeth*, Captain Clarke, from Placentia Bay, ran ashore during a gale at the entrance of St. Pierre Harbor, and was totally lost; crew saved.—*Gazette.*

The Brigantine *Mary*, which arrived on Thursday from Pernambuco, passed a large vessel, bottom up, on the 4th inst., in lat. 33, lon. 63; and the Brigantine *Florence*, arrived on Saturday from Demerara, passed, in nearly the same latitude and longitude, a quantity of deals.—*Ibid.*

The steamer *Beat*, which left Little Bay on Sunday morning for Sydney, abandoned the voyage and arrived here this afternoon. She encountered much heavy ice and experienced considerable difficulty in forcing her way across the northern bays.—*Telegram*, Jan. 17.

The steamer *Lady Glover* made her first call to our harbor yesterday morning. We would be happy to see the *Glover* often call at this harbor during the winter months, and feel sure her enterprising owner would be fully repaid both in freight and passengers.

The "Lion" Disaster.

AN EYE-WITNESS.

PROBABLE EXPLOSION.

A Bay-de-Verde correspondent sends us the following particulars about the *Lion* disaster:—Between 5 and 6 o'clock, and after leaving the wedding, on Friday morning, in company with Thomas Moore, jr., we saw something in Baecaleen Tickle arising like a flash of lightning out of the water and lasting about four seconds, we reported what we saw, but very little attention was paid to it until Saturday when the report of the *Lion* disaster reached here. It is my opinion that as they had tight for the Island they were laying in the Tickle awaiting daylight and could not have water enough in the boiler and neglected to blow off steam, or, as the water was very low in the boiler and it being very hot, immediately the cold water would go into it an explosion would follow. I cannot understand how such a report as "that the people on the Island knew nothing of the disaster until the *Cabot* came" got currency in the St. John's press. Friday the people on the Island were engaged picking up wreckage, lumber, etc., on Friday night the "binacle fire" was lit on the Island, which means death, and intended to draw the attention of Mr. of Red Head Cove, whose duty is to bring out a boat on seeing the fire. It was this boat which picked up the

body of a woman killed by Mr. Christie that of Mrs. Christie Saturday they were of wreckage, and picked up on the I will send you a mail. It is false seen near Puffinbluff wreckage was in Cove, and there on at the time.

A man named Cristal, belonging to Cove, walked that Cove was house from the Saturday morning leaves a widow children to sudden loss.

Mr. G. Beaudry, a respected resident departed this day last, after but severe remains were last resting circle of rest and friends.

SUDDEN DEATH. Kane, a planter, suddenly in his yard, death being unexpected. We felt sympathy widow and friends.

Robert Balm Duff & Balmer, day per *Lady* for the purpose steamer to Bay. We wish this and prosperous Patterson, Crook took passage by

body of a woman, afterwards identified by Mr. Christian, Esq., J.P., to be that of Mrs. Cross, of Trinity. On Saturday they made further discovery of wreckage, and another woman was picked up on the following Tuesday, I will send you more particulars next mail. It is false about the hull been seen near Puffin Island, as all the wreckage was picked up in London Cove, and there was no wind or sea on at the time.

A man named Michael Forristal, belonging to Guss's Cove, walked over a cliff in that Cove while going to his house from that of a friend on Saturday night last. He leaves a wife and 6 small children to mourn his very sudden loss.

Mr. G. Best, an old and respected resident of this town, departed this life on Wednesday last, after a very short but severe illness. His remains were followed to their last resting place by a large circle of respectable relatives and friends.

SUDDEN DEATH.—On Tuesday evening last Mr. Michael Kane, a very respectable planter, suddenly dropped dead in his yard. The cause of his death being assigned to apoplexy. We tender our heartfelt sympathy to his bereaved widow and friends.

Robert Balmer, Esq., of the firm of Duff & Balmer, took passage on Monday per Lady Glover for St. John's, for the purpose of taking passage per steamer to Europe on Wednesday. We wish this gentleman a pleasant and prosperous voyage. Messrs. Patterson, Cron and McGregor also took passage by her.

Rumor is always busy in this planning "world of ours." The latest one is that James J. Rogerson, Esq., Her Majesty's Receiver General, &c., is about to nominate Captain Morrissey, D.F., as candidate for Bay-de-Verde the coming election. This gentleman visited his would-be constituency a short time since, and it is said he received a very dry reception there owing, he believes to the prevalence of the Permissive Bill. The Captain, unlike his nominator, is fond of just a "wee small drop" on a long journey, but his wish could not be gratified on this occasion, as some of them informed him they "never gave rum to strangers." In addition to this, Mr. Garland and James Evans, Esq., our esteemed agent, who we wish success, is also reported as about to offer themselves. Mr. Michael Knight, it is said, will be invited by certain persons on the Shore. We wish them all success, and hope the people of Bay-de-Verde will choose the more competent man of all.

By Telegraph.

HALIFAX, N.S., Jan. 12. Lord Lorne sailed yesterday on the Parisian from Liverpool for Halifax. The Spanish sovereigns met with a brilliant reception at Lisbon. Fears of republican manifestations in Germany have caused the arrest of fifty-five persons. A riot occurred on board the flagship Duke of Wellington at Portsmouth yesterday, because one hundred and fifty seamen were ordered to join other ships. The Mayor of Rome at a banquet given to the veterans, declared that the people would prefer to see the city laid in ashes to being again subjected to Papal domination. Latest advices from North Africa state that famine is being experienced in Tunis.

Jan. 13. Small-pox is spreading in New York, Philadelphia, Chicago, and other places, and it is stated that the disease is causing fearful ravages in Hayti. Advices from Washington say that Guitau's trial is approaching the close. The census of the Vatican shows that five hundred persons are living in the Palaces, one-third of whom are females. The population of Paris has reached nearly two millions and a quarter. Gladstone has remitted ten per cent. on the rentals of Hawarden. The restrictions of the German press are becoming more stringent every day. At Hawarden yesterday Gladstone decided the idea of introducing the

principle of the Irish Land Act into England. He states, however, that he would advocate a cheaper purchase of transfer land.

The coroner's jury returned a verdict of wilful murder against Dr. Lamson, who recently poisoned his brother-in-law, a young student.

It is stated that the German Government regards the French and English note to the Kœdive as a grave mistake, and one which England will rue.

A railway accident involving the death of nine persons occurred in New York yesterday. The Bank of Prince Edward Island resumes business about the first of February.

Jan. 16. Sir Richard Millan is dead. The Duchess of Connaught gave birth to a daughter yesterday.

It is stated the Czar has pardoned the Roman Catholic Polish Bishops. In the recent railway disaster near New York eight persons were killed and fifteen wounded. A Senator, a member of the House of Representatives, and a Times' reporter, are among the victims. The German Government is fitting out an arctic expedition. A Swedish steamer was lost at Calmer the other day, and fifteen persons were drowned.

Jan. 17. Five more sailors belonging to the lost steamer Jeannette have reached Irkutsk.

Leon Say has been elected President of the French Senate.

Twenty-one shocks of earthquake occurred in Switzerland in December, causing land slips and immense falls of rocks.

There is a dissension between Bismarck and the Crown Prince of Germany. Bismarck is disgusted with the reception the Emperor's rescript met in England.

The Quebec Legislature meets on 21st February.

The Rose Spinning Mill, Oldham England, has been burnt; loss, twenty thousand pounds sterling.

MARRIED. At Bay-de-Verde, on the 4th inst. by the Rev. G. J. Buttcock, P.P. Mr. John Turner, of Cottoli's Island Bonavista Bay, to Julia, youngest daughter of Thomas O'Neil, Merchant, Bay-de-Verde.

ADVERTISEMENTS. Public Notice.

WHEREAS A Requisition has been presented to the Stipendiary Magistrate at Carbonar from over one fifth of the Registered Electors of the Electoral District of Carbonar, requiring that a vote may be taken to determine as to whether two thirds of the qualified Electors polled are in favor of a Proclamation being issued by His Honor the Administrator, for the prohibition of the sale of Intoxicating Liquor in the above named District. I, the Administrator, do therefore under the provisions of the Temperance Act of 1871, 34 Vic., Cap. 7, Sec 2, appoint Monday the twentieth day of February next ensuing, for the purpose of taking such Polls to the matter aforesaid, viz., at CARBONAR, MOSQUITO, AND VICTORIA VILLAGE.

Seven polling places in all, in the said District, and I hereby require all persons concerned to take due notice and govern themselves accordingly.

By His Honor's Command, EDWARD D. SHEA, Colonial Secretary.

Secretary's Office, } Jan. 13, 1882. }

LITERARY.

THE UNSIGNED LETTER.

"Arrah! who is it from?" says me grand-daughter Mary,
 An' "Who is it to?" says me grand-daughter Kate,
 An, they're both av 'em fools, an' there's none av 'em wary,
 An' nitch would believe in an emadhwaw's prate.

"Arrah! who is it from?" it's a jynt-stoek production,
 An' "Who is it to?" Its for nays-ther an' both,
 It took two graceless boys to complete its construction,
 It's a poor pony rushlight: now, who'll be the moth?

"Arrah! who is it from?" Why, they'd jeer av I towld 'em;
 An' "Who is it to?" Sure they'd laugh in me face,
 Though I know in me heart that the gossons have sowld 'em
 An' arc watchin' 'em now through some pane in the place.

"Arrah! who is it from?" From two heartless desayvers,
 An' "Who is it to?" Troth, yez nitch has yer choice,
 An' your gran'mother sighs for such aisy belayvers
 To be fooled by the thricks of com-hedherin' boys.

Grey and Gold.

CHAPTER IV.

Continued.

The rest of the bodies had been recovered, and the five brave men who had given their lives for their brethren lay side by side in the churchyard of the old church on the cliff, the tower of which formed a landmark for many miles. The doctor had not been seen; his hurt had proved more severe than it was at first imagined, and Katie began to fear they would have to leave Scourbeck without seeing him again. Miss Rye's croft was growing restless to be at home, once more, and by what plea could Katie urge her stay? So it was fixed that they should return home the following week.

It wanted but a few days of the one settled for their departure, when, at the close of a long day passed in-doors, her aunt, not being so well as usual, Katie took her way to her favorite nook just under the crest of the cliff. The evening was fresh and bright, the sun sinking into its watery bed, and long lines of brilliancy lay on the heaving billows. Sitting there in the silence and gazing out unconsciously over the sunny rippling sea, Katie pondered again over the thoughts and events of the last two months, and tried to brace herself for the inevitable return to the dreary Cardham existence. Would she could see Cecil once again! She would like to think he would miss her a little, not as she would miss him; that would not be possible, but enough sometimes to recall to mind some of their pleasant talks. Were she to see once more, she thought she could discover this much from his manner, and it would be some comfort in her daily round of petty duties to feel some one in the world who had occasionally a kindly thought for her.

Musing thus, Katie did not hear a footstep ascending the little rocky path; and not un-

til a long shadow came between her and the shining sea, was she conscious she was no longer alone: Cecil Rayleigh stood before her. A glad cry was on her lips, but checking it, she merely rose from her seat, and as he took her outstretched hand, eagerly, she said, quietly, but with a beating heart, the common-place words 'Good evening, Doctor Rayleigh. I am glad to see you again.'

'Are you, Miss Stewart?' said the young man, throwing himself on the grass beside her. 'Thank you. At one time I never thought I should sit here again.'

'Were you so nearly drowned?' said, Katie looking up quickly; and the bare memory of that dreadful scene chased the color from her cheeks.

'Very nearly' replied the doctor, gravely. 'It was a terrible moment when the boat went over. I don't know how it was, but often as I have been out in the life-boat before, I never was in such a sea—at least so it seemed to me then—as on that night. I remember striking against the boat as I rose the first time, but the rest was a blank until I woke up in my own bed and found Mr. Grey beside me. I heard that I owed my life to two of those brave fellows who risked theirs in trying to reach me. Thank God they were successful! for, after all life is very sweet. I am not tired of it yet. I saw you, Miss Stewart,' continued Cecil, after a moment's glance at the face whose bright eyes were shining through the mist of tears, 'and that sight helped to nerve my arm.'

'I—I had never seen a wreck,' stammered Katie, in some confusion, her color flashing back brilliantly.

'Forgive me,' said Cecil. 'I was not so egotistical as to infer you took a special interest in me, Miss Stewart; but,' he added, seeing Katie's agitation, 'we will not talk any more of that dreadful night. Look, is it not far too beautiful to-night to spoil such a scene by sad thoughts? Who would suppose that placid, sparkling sea could work such deadly mischief? To turn to other subjects—have you read the book I lent you, and do you like it.'

'What I have read I like very much,' replied Katie; but I am afraid I shall not be able to finish it. Aunt talks of going back to Cardham next week.'

To be Continued.
