Easter Day Offering.

BY ALICE F. ALLEY

it was the Sabbath morning, still
The whole world felt the payous thrill
White, gladdens haster has
That Pay the purest whitest flower
That blooms in all the earth a bright tower
Had touched with unseen magic hand
The shadows the ring over the land
And changed to gold the gray

The Faster church bells sweet and clear Chimed through the valley, far and near Like some faint far-off strain. One bears in dreams. In this church, dim We knelt with reverent thoughts of Him And accured to bear again His voice Bidding our hearts once more rejoice. "Fear not I rise again!"

ind while the music from above flown floated, like pure thoughts of love. The door was pushed size, and justing switch a fact that she came with trusting stolle. A tiny fair-baired little musid. With sweet, blue eyes though half afraid Bright as a summer star.

She paused before the chancel rail. A little floweret, fair and frail. She seemed, herself to be. And in her hand with tender care. She held one blossour rich and rare. One snow-white rosebud, pure and sweet. A poem in itself to implete. The pleture scened to me.

She passed and watted wonderingly And someway then, we felt that also Had come to meet Him there. Hore ioningly the installed. As if in words it tried to tell. The thoughts that filled the baty hears, as there she stood, above, a part, lifefore the place of prayer.

t woodrous silence filled the place As waiting there with unturned face. She stood, "His little one, but then our Christ like uninster Turned tenderly and spoke to her What do you seek, my little girl." One teat-drop [ell agreat white pearl All glistening in the sun

'I want to see Christ if He shere
My mamma said the voice was ricar
As song of June-time lairds.
He sinsay came here haster inde
And I could find Him if I tried
I want to give thin the Will be gial
My haster rose twas all i had
the blessel, blessed words

The Christ is here, he answered her bo, quickly, through a sudden thur Of tears I saw her place. Before the cross, her heart's best gift Her one white rose, then upward his lier eagnest, love its ages, and say. I knew He d surely come to-day. With simple, child like grace.

She paused a moment while the Pasim flore apward through the alent calm. The looking taster light Just kinsel for flower like face. I knew His angels stuffed to see her so. Then down the acids and through the door. She passed as she had done before. From out our loving sight.

lictors the cross the blossom lay All through that boly I aster Day The shadows went and came The signows well and called And oct its yeals pure know white The supshine tell with softened sight to if the blessing lingered there. Crowning with solden flory rare. That offering "in his name.

the Land of Sllence.

BY FRANCES PREA

When the fever loft Margaret Hanson o weak and feeble that it was an effort to turn her head on the pillow, her first sign of interest in the life coming back to her again was wonder at the intense The nurse moved as if shed gtillings. with relvet, no one spoke aloud in the room, and the window tha had creaked so annoyingly all through the first nritable stages of her sickness moved back and forth without a wound

As she watched it she remembered that the had nanted some one to fasten it, but with the unreasonableness of the suck she had said to herself that: it they did not care enough for her comfort to see that it northed her without being told, she would never tell them. Some one must have noticed it and padded it

in some way for here it was, moving back and forth in the same old way, but without a sound.

'How very sick I have been!" she thought, as she glanced at her thin, winte hands, which she felt no melination to lift from the bed. "That must be the reason every one is so still, and no one speaks to me."

Then she slept and awakened, ate a little, and slept again with the know-ledge that life and strength were coming back to her but still the dreadful quiet which shut her in puzzled and perplexed her. She seemed to be an actor in a pantomine that grew more and more oppressire

I must ask the doctor how long it is necessary for me to he here with no one to talk to I must ask him at his next visit. I am certainly better and stronger this bright spring morning."

She was lying with her face turned to the creaking window, which had been opened to let in the fresh air. The branches of an apple tree full of pink. unopened buds almost filled it. thought of the chattering wrens that had a nest in the branches the year before, and hoped they would come back.
They were such noisy company in

the mornings, but what a relief their shrill songs would be now! They always treated me to a perfect carmival of song at itay break, no matter how badly I wanted to aleep. She raised herself in the bed with a

look of horror. On the nearest branch she saw a bird, who with open month was oxidently singing with a perfect abandon of ecstasy And she could not hear him!

This, then, was the life she had come back to and been so grateful to have The doctor who tried to comfort her told her thet as her strength returned she might regain ner hearing in some degree, but she turned away and refused to be comforted. The spring days length' eved and health returned, and with it strength to endure, but Margaret with

urew from all kinduous and sympathy
"Why should I pretend to enjoy
scoing any one, or why should people
with the best intentions endure trying to talk to me ! It is so distressing for them to short at mo, and it cuts mo to the heart when they laugh at my mistakes. It only makes no more miserable than I am I must endure living, but I can make no pretense of enjoying it

"But just think, wrote a friend, how much worse it would have been for you if the fover had left you blind ' You can at least look out over the earth and enjoy its beauties. You are not willout friends, if you will let them love you. You have a good home, and do not have to go into the world to live. Think more of your blessings, Margaret, and do not divell so persistently on what you have lost.

"It does not help me to know it as worse to be blind, she answered "I pits all sufferers, but forover pressing on mo is this horror by night and by day -that I am, forover alone Everything that moves around me moves as in a aightmare I never succeed in shaking

So one by one Ler friends withdraw. She seldem left her home, and mysted no one to trut her. There were many who pitied her, but know of no way to each her, and as the years passed by they forget her even as she wished to be

fergotten. It was another day in early spring, flee years later, when Margaret walked down the streets of the village, and noticed the swelling birds on the likes, the tender green of the newly springing grass, and with a pany the pink buds on the apple trees. Those buds were so associated with her memory of the day when she hist learned of her deafness that she almost wished they would not bloom where she must see them.

The minister of the charch which she had attended years before smiled at her

from the door, and came out to write on

if is a late Easter, Margaret, but we have more blossoms for it. Will you not come in and see the blies? We would be glad to have you at the services tomorrow.'

"The Lord has afflicted me and turned His face from me," she answered, "I will not sung for gladness, col lly Christ is risen. One year is as another with me, except as it brings me nearer

the time when I shall endure no longer."
Poor child," sighed the minister, as she passed on, "so young and so bitter!
I wish I know how best to reach her."

Margaret passed on down the street: Near the end of it stood a house, small and sliably, and she remembered that just the day before there had been a poor little funeral from it.

"Some one who was needed and will be missed," she thought, "while I live

on."
"Will you come in here a little while?" It was the doctor who spoke.

She was glad to have him speak to her. He was one of the very few people she could hear without much effort. She turned in at the gate with him. He led her to a baby's onb in the corner of the one room.

"I want you to take him and care for He has no one in the wide world."

"How can I?" she protested. "I could not hear him if he cried or called. You cannot be in carnest."

"His lungs are sound. I think you could hear him. As if in proof of the doctor a assertion;

the baby raised its voice in a loud wail.
"I can hear him indeed," said she, with a laugh. "I will take him a few days until you can do better for him."

I might do better for him, possibly, but I do not know any way of doing hotter for her," thought the doctor.

The next morning she did not have time to think, as she always did, "One more day to get through as best I may " The baby must be washed and fed, and by her own hands, for, with the sweet tyrathy of babyhood, he would go to no one clee. She even sang to him as he nestled against her to sleep, and Margaret a old housekeeper amiled to herself

as she went about her work.
"I will watch and help her where she cannot hear, she thought, "but it is best for her to have the care of him. It's most like old times to hear her singing like that again "

Are you tired of him?" asked the doctor, a few weeks later. "I have a chance to place him in a good home new."

"It would break my heart to give him up, she answered. "I do not think I lived at all before I had him."

Well, I won't take him by force. The world is full of little ones needing liclp.

"And full of grown-up people needing to give it," said Margaret, softly I wish I could tell how much the baby

did for her. Almost before she realized it she was taking up her life where she had dropped it. Much as she toved the baby, she found that love alone would not do. Its little adments were matters of sual importance, and must be discussoff this feeling of unreality. Let me of vital importance, and must be discuss-alone, that I may learn to bear this as best I may in solitude."

One by one old friends who had long been what out came back at her call. Margaret torgot her dealness, her sensitivoness and loneliness as sho hing over the baby a crib. She forget her old fear that people might speak to her and aunoy her as she wheeled the boy in the sunshiny streets. For the baby s sake she went once more to the church, where the likes breathed out their fragrance, and in time sang almost with the old joytuluess, "Christ is riscu!"

The Lord had not forgotten me, 'she said, long afterwards. "My life can nover be what it might have been but "My life can He has given me strength to make the best of what is left. Though I dwell in thu land of mienco forever, it shall be a innd of hopefulness and love. —Louth r Companion.

#### Domestic Science.

It is said, that no other language in the world-except the cognate languages -contains a word fully equivalent to the English word "home," with all its holy associations, its tender memories, its potent influences, its vast and comprehensivo significance. Ours is in a peculiar sense a "nation of homes," and to this fact in a very considerable degree may be attributed the sterling excellences of the Angle-Saxon character and the domination of Saxon ideas and civilization, and in the preservation of our home life in all its purity lies our hope and confidence in the final triumph of S won ideals. This being the case it is self-evident that anything which tends to enhance the attractiveness and atability of the home is worthy of the warmest public approbation and support. Hence it seems rather inexplicable that the science of Domestic Economy should be the last in the round of human know ledge to receive a specific place on the school curriculum. All other trades and professions are limited in their scope and each one directly concorns but a amali part of the community, while Domostic Science is intimately associated with the comfort, the happiness, the physical health and the potential useful noss of every man, woman and child in the state, yet heretofore, while all other fields of human endeavor have received due attention from educationists-and properly so-nothing has been done for the mothers and the home-makers. The first steps are now being taken for the removal of this anomoly, and there should be no difference of opinion as to the great need and the transcendent importance of the new Domestic Science that has recently been introduced into the educational systems of Ontario and other progressive states and countries, and which should—and we hope seen

will-be taught in every town and city in the Province. It is to the credit of England that, though somewhat behind many other countries in her general educational system, yet in this intensely practical and utilitarian phase of educa tion she was one of the pioneers and occupies a high rank. In 1891 there were 12,000 pupils in England taking a Domestic Science course, in 1896, 200,000. and now over 3,000,000. In Germany and Sweden it is now a compulsory subject in all schools, and in the United States it has been introduced in many of the largest cities. A few years ago the Ontario Educational Department took hold of it and established at Hamilton a Normal School of Domestic Science, and efforts are now being made to establish schools in all the larger places. Many of the more progressive towns have promptly and eagerly avail ed themselves of the opportunity offered of instructing the children in so useful a branch, but much difficulty is being found in inducing semi-school bounds to adopt it or even to investigate or inform themselves relative to its scope and purpose, the idea prevailing with too many trustees, including most members of the Belleville Board, that what was good enough for them in their boyhood is good enough now, henceforth and forever more The propaganda of this new idea in education is in the capable hands of Mrs Hoodless, President of the Normal School of Domestic Science. She is a lady of time talents and persuasive powers, and is abundantly endowed with that pre-requisite of success—a thorough belief in and an enthusiastic devotion to her work. Wherever she has spoken she has been greeted with crowded houses, and great and hopeful interest was taken in the subject she so ably advocated.

It is the hope and desire of the Education Department that classes in Domes tio Science be established in connection with the various public and high schools throughout the Province. Those are not meant to be mere cocking classes, although that is included. The girlsall girls-would be expected to work in the demestic kitchen and, if possible, the boys in a workshop, at least two or three hours a week. The children would be taught where our spices come from and how to use them in preparing toods, how to manago a stove, not how to make fancy dishes but how to prepare digestiblo food, getting the bost results from economical exponditure, and minimizing time and money. They are taught to be expert and painstaking and to build up strong bodies, and cheerful disposi tions. Lossons are given in the laws of health and the children made to understand what is essential to a well managed. healthy home. Moreover, the effects of this training where it has been adopted have been to develop in a marked degree the intellectual eleverness, mental activity and executive ability of the chil dren, and it has been abundantly do monstrated that manual training in schools exerts a very potent and healthy moral influence on the pupils and is a most effective counteractant to eigarette smoking, street-corner leating, vilo lan guage and precocious wickedness manifested by so many of our boys, and to the different but no less regrettable faults and weakness of the girls. Surely anything that would have these benchcent effects and would help to correct the ovil tendencies of the youth of our land, should be cordially welcomed and heartily supported by overyone who is interested in the welfare and advance ment of the state. Too many women do not know how to make home comfortable and attractive, where juded enorgies can be renewed and fresh hope

are incapable of providing the means for supporting even a humble demicile. Hence there seems to be a growing tendency towards the loosening of homo ties and the weakening of the home in fluences. It is quite time, therefore, and of the utmost importance, that an intelligent effort should be made to counteract these deplorable tendencies. and towards this end the new Domestic Science should very insterially contribute. We hope it will not be long cre this branch of knowledge will be taught in every school along with the relatively much less useful subjects of lustory, geography, &c., and will occupy on overy selicit and college curriculum the conspication place that its great importance ments

# The Chinese School at Chefoo, Chine

We are in receipt of letters containing the financial statement of the above school, covering the year of 1900. Though the report is necessarily much condensed it is novertheless most intere ting reading. Mrs. Vills in whose charge the school is, has accomplished a great deal and the future holds much of promise. She has a number of boys under instruction and with the assistauco of a native teacher is gradually educating them and fitting them for lives of usefulness. Some of them are orphans, some have been left in this condition by the recent uprising of the Boxers. It has been the aim of Mrs. Mills and her assistant to keep the facts of the dreadful massacres from their pupils, but being like most deaf children exceedingly observant, they have gamed some knowledge of what has been passing. It seems most wonderful that the school and its inmates should have escaped the notice of the blood thirsty hordes which have surrounded them. But they have been in no way molested. Some \$2,535.91 has been contributed to the support of the school during the past year, the larger part by persons residing in other countr. M. who have taken an interest in the work. It costs about \$200.00 per month to maintain the school. There is at present a mortgage of \$5,500 upon the plant and the time limit given is only three years. Often, Mrs. Mills has drawn upon her private bank account to keep the school running. It is a good work being done in a far country and one deserving of all assistance that can be given. In order to add: a little to their income, the teachers and pupils have taken up photography and they have been successful in selling quite a large number of their photographs. They have also learned to make fancy candies, which they sell. Where such wills are shown ways are bound to be opened, yet a little assistance new and then is never aims, in any good work. We are pleased to note that the deaf of Canada have contributed their into to this most worthy cause. They are credited with the sum of \$43.77. Part of this amount was collected during the Convention held here just June and the balance from other sources.

#### Vagants "with a Story" are Frauds.

The majority of the "men with a story (vagrants) are frauds. The exproseion is often beard, however, "Oh, well, help then anyway! It is better to help many frauds than to let one gennine caso suffer That argument is all right provided there are any genuine cases. But are thereany genuino cases? There is on record a statement of the late Doctor John Hall that in all the years of his experience in New York City he had nover found one. is a blind man, the compositors are all deaf and dumb, the pressnork is per-formed by the blind, the papers are folded and wrapped by the blind. The present editor of the Beacon then says that the paper was soon discontinued for lack of sufficient patronage. Could the chitors of our American unite papers give some information about that paper and the persons concerned therowith? - W K

#### WINDSOR NOTES.

From our win Correspondent

Rev. Mann, is to give a lecture and hold services on the last Sunday of the mouth we are told, and I am sure this lovely weather will induce an unusually large number to go, and bring the child-

Our friend from Chatham, George Henry, paid a pleasant visit to Windsor lately. He expects to join the Clerc Pleasure Club shortly, and become a full fledged member of Detroit society.

What is up with our friend from Brandord that we get no news from him for months at a stretch. Wake up, Brantee you are one of our brightest and wittest, we can't afford to lose you

We may been invited to visit the Day Schools for the deaf in Detreit and hope to do so at an early date, when we can

make up a party.

Of the Windsor boys who left to join the South African constabiliary, only two were accepted, one of them being John Sepher. He had a large circle of triends here, and was well known to the ical of Windsor and Detroit, as he was as well able to sign and spell as any pate almost. We all wish him succe in his new home.

I thought somebody said something about the convention, but I think it rather soon to be thinking, much less squabbling over it, and I hope (though nobody need record its that it will be held a few miles nearer Windsor than

Mr. Jas. Clarke, of the Clarke Electric to Detroit brother in law of Albert Sepuer, has just completed an invention that will be of great help to the deaf, especially those whose business requires early rising. It is an alarm clock, or rather as Mr. Clarko calls it an electric atarm clock. It is thatle to be attached to a bed, and is set like an ordinary among clock. There is some kind of a device attached that when the alarm goes off, say at 6 a. m., it beats a regular into on the two bells, and will not cease infit is serviced off. It makes enough corse to wake the deafest person on earth. Mr Clarke intends placing his invention on the market shortly and we feel that it will supply a long felt want for the deat. It will also be cheap.

We have just seen a deaf and domb child, born of deaf and dumb parents, and he was the brightest child we over saw for his ago 15 years). His name is Cyril Shutta, and his parents lately moved to Detroit from Havanua, but we believe they are now in London.

Is our Oltana correspondent trying to heat us by some inches. A deaf-mute, in Detroit, Mr. Sloane, has a boy under twenty years old, over seven feet high, tieorge Munroe, our young gunt, has three more years to grow yet as he is outs in now.

Mr. and Mrs. R. Stark, and Mr. and Mrs. McHagh, also Viola and Leo Stark, of Detroit, spent Sunday at Albert Sepner 8. Mrs. Lattle, Mother of your tiracie, and Mr. Deary, of Chatham, lather of doe Heary of your school, also called on us lately.

The Detroit Veier-Tribune devoted a whole page of its raliable paper to the of scenes around the grounds. It was very interesting-

One night Dan Gorman came over tion faction, and wandered into the vestibile of the Now Bank, mistaking it for a hotel. Officer Langton saw him go in and supposed h in to be a burglar. He telephoned for Banker Curry who came and they stole in upon the ansus-pecting man Hands up, Mr. Burglar, visions of promotion, glory, &c., floated before his even. Instead of throwing up his hands, the man produced a paper and pencil and wrote that he was look ing for a hotel to pass the night, and Langlois feeling like 30 cents tool. him to the Scott House Late is a bunden to the good mun these days, every one wants Caught any more burgiars

The Time of the Singing Birds ls Come.

those who know tell or that already the birds nests are coming back. Strange and welcome notes may be heard in forest and in held by those who have ears to hear. Now and then a single thrush, or a blue bird or an oriole has been seen on the fence. One well acquainted with all the feathered choir says that within another week birds of over two hundred spacies will return from the sunny glades of the South and from far off tropic islands. Many of us will not know when they come, nor hear the various notes they sing. Fortunate are they whose eyes can see the ditting wing returning, and whose ears can hear the sweetest music over heard on earth!

We have had the little sparrow all winter Dr Van Dyke mone of his late books makes a distinction between the talkable and the talkative. The talkative are like the sparrows who go on perpetually, without reason, without vailing for response and without pause. The talkable are the bright and reason able friends who talk easily and natur ally, but whose talk is converse, hearing as well as talking and so showing the spirit that is companionable. Sometimes in the long winter we have wearied of the talkative sparrow on the caves and the window sills. We will welcome the birds that now come to converse and be talkable

No more beautiful description of the coming of spring was ever written than that of Solomon, " For, lo, the winter is past, the rain is over and gone, the flowers appear on the earth, the time of the singing of bards is come." This poetry is notable for its exact truthful iess, and the absence of poetic license. It is the same springtime now. The only other scripture in which is mention ed the singing of birds is a verse of the Psalm CIV., "By the streams shall the fowls of the heaven have their habita tion, which sing among the branches." It may have been true then, as it is now, in the land of Israel that the singing of birds is not often heard. There are birds of gay plumage but not many whose notes are sweet. But even there, there was no mistaking the spring, "the time of the singing of birds is come, the voice of the turtle dove is heard in the

How much we are losing every day by reason of our ignorance! We ought to know the birds better than we do, and hear with some appreciation the bird talk from fence and trees and from the green grass or the blue of the sky all our learning how little of the wonder and beauty of this world we know! How much more is it true that in larger mysteries and glories of God's truth and grace, we are walking as with blinded over and unopened cars. What a happy awakening to an enternal spring when we hall begin to see and know as nover here, "and the time of the singing of birds is come!" - Central Presbyterian.

# Home, Sweet Home.

A contemporary relates the effect of a

crowded concert hall was unmoved, and many persons were weeping. A great singer had just finished a wonderfully touching and eloquent rendering of "Home, Sweet Home."

It is a beautiful song, and a young gul to an older woman who sat noxt to her, wiping the tear from her eyes as sha spoke.

" Yes," was the teply, " and the senti ment to which it moves all these people is beautiful. How much happier the world would be if every one had as much principle as sentiment on the subject and followed out a plane, every day making home sweet!

The girl turned thoughtfully away. She hardly heard the next song was acknowledging to herself that in spite of her love for her home she made if unhappy every day of her life by her willfulness and quick temper

Experience is the nurse of faith.

How quickly a deflection widens into digression. Sooner than we think a a digression tendency may become a habit.

Courteousness and confidence should be united in every believer, the gospel requires them and provides for them.

The only faith that wears well and holds its color in all weathers is that which is woven of conviction and set I hope to be able to write something with the sharp mordant of experience.

# Mr. Forrestor's Lecture.

On Saturday evening, the 16th alt., Mr Forrester lectured to the pupils in ac chapel. He well knew the pupil's preddection for soldier stories, henco his orbject, -Sir William Wallace, the greatst hero Scotland over produced, Robert Bince and Lord James Douglas. He related a story about Sir William Wallaco defying three English soldiers who irmanded all the fishes he had just raught, the result being the killing of the three soldiers and his flight to the woods. Soon afterwards, he found him wif a leader of the Scotch people in heir struggle for independence. Mr. Forrester, being a native of Scotland, put his heart into his lecture and gave some most exeiting exploits of Wallace. showing that it was all owing to treachery that the here was at last captured and put to death. He then a lated how tried to imagine it was the real thing dolert Bruce took up the dead here s and poured down as much of the stuff work. The well known story of Bruco and the spider was told, and his wonder ful provess and muscular strength was down in many anecdotes, and how he st last secured the independence of his centry at the battle of Bannockburn. ford James Douglas proved himself Bruce's ablest heutenant in the fight for derty. Mr. Forrester kept the pupils in close attention on his lecture all the one. The pupils will hereafter have egreater respect for Sir William Wallaco und the Scotch. Mr. Forrester stated that at the present time, the Scot and Briton were ellowing each other in the defence of the British Empire, and a Scotchman can now love his country and I cacation months.

still be loyal to the British Crown. The fecturer sat very hard on the English and perhaps it was lucky for him that Mr. Burns was on duty that evening, if it had been Mr. Ninse, there would tikely have been wigs on the green that night. Miss James tried her best to stick up for her country. The pupils were so much pleased that they aske! Mr. Forrester to relate another inditary story, but the hour was late, he may, however, lecture agam some Saturd v mght before the warm weather comes. The meeting ther, broke up but not before a most unanimous vote of shacks had been passed.

-A littlegirl, whose home is in Belle ville, commenced her school course here last week.

-English subscribers hereafter, in addition to 50c a year, will be charged 20c, for postage, in all 70c for the Casanas Meri for the school year

-Wo were pleased to receive a call lately from Miss M. Baragar, who had to go home last session because of ill health. Her friends were pleased to see her much improved and she may be able to return to school again next year.

-- Tho main pipe connecting the waterworks pumphouse and the city, where it crosses the Moira River, broke the other day and we have had to fall back for our water supply to our own pump-ing plant at the bay until the break is repaired.

-Thoushicers and members of the boys Literary Society were photographed last week. Mr Mathison kindly released them from the work shops in the after noon for the purpose. A framed copy will be added to the shoe-shop collection of pictures.

-The pupils have probably had their last skate for this season and we would advise our boys to put their skates in their trunks at once. Many of them are careless in the matter and leave them around or hide them in some place expecting to find thom again when wanted next winter and are often dissappointed as they deserve to be

On Saturday evening, the 23rd ait. Mr. Madden favored the pupils with an intensely intersting and instructive lecture, on the growth of the German Empire and the Franco German war of 1870. He began away back with Frederick the Great and the wars with Austria down through the times of the 1st Napoleon, William I, and Napoleon III, bringing out prominently the iron hand and will of Bismarck in the welding together of the German States. Mr Madden well deserved the thanks of the pupils, as many of them left the chapel a great deal wiser than they entered it an hour or so

-A number of our small boys on a recent Saturday afternoon thought that a good drink of pop would be ince and decided to go into the sola water man ufacturing business. Their leader, a boy named Kirk, undertook the work and the others chapted in with their pennics. A parcel of soda was entered from the drug store and the stuff dumped into a couple of caus and stirred vigorously with a stick. We do not know if it was linking sods or washing sods that the drug clerk gave them but we know it did not fizzle worth anything. The boys s they could boys next day.

-Hearing people cannot account for the queer practice indulged in by the deaf in every school. When one of their school mate's birthday comes around, instead of a hearty hand shake and good wishes, the congratulations take the form of every imaginable harmless teas ing that boys can invent. Freshly B's birthday came last week and his foom mates had planued an early start after him in the morning, but when they woke the bird had flown and was in liiding. The boys, however, caught him after breakfast and dipped him into a snow bank and other pleasantries until he escaped into the shor shop where he was sate for the time being. Happy is the boy whose natal day comes during the

#### PERSONALITIES.

Mr J. S Gould, of Descrouts, with the Misser Sager, paid a visit to the Van Luven homestead at Odessa lately.

Miss D. Beatty, of Melrose, spent a few days in the city last week visiting her friends, Misses Butler and Irvine.

Mrs H Moore, of Toronto, spent a few days in the city the guest of Miss Irvine. She left last Tuesday for Kingston, where she will visit Mr. and Mrs. McRae.

-Messis. Corbett and Hubbard, of Owen Sound, will shortly be at work on the boats running into Collingwood and will then be frequent visitors among the mutes there.

-Mr. W. H. Hazhtt, of Toronto, called to see his little boy here lately. He is travelling for the Queen City Plate Glass and Mirror Company and was only ablo to stay a short time.

-Messrs Taylor, of Singhampton. and Middleton, of Horning's Mills, were in Collingwood on the 17th, St. Patrick's Day They were heartily welcomed to the hospitable home of Mr. and Mrs. Morrison.

-The Orangemen of Eastern Ontario lately assembled in Belleville. Three of the delegates from Carleton County visited the Institution during their stay. They were acquainted with several of our former pupils who two near them, especially Mr John Patrick and Mr. M. Hodginy.

The Grand Jury attending the Spring assizes called up to see us on the 20th alt. Owing to the abscuce of Mr. Mathison, Mr. Coleman was their conductor through the Institution. They arrived at about II a. m. and the time was too short to allow a thorough inspection of the building, classes and industrial departments before dinner, so the usual visit to the shops was emitted.

The Grand Jury visited the Institute for the Deaf, in Winnipeg, last week and noted that they were more than pleased with the excellent work being done there by Principal McDeemid and his able as sistants. The new and handsome addi-tion is about completed and we can The new and handsome addireadily see the great need of such a building as the crowding in the old part handicaps to a great degree the work of the Institute.

-Our old friend Luddy fell into the hands of an advertising swindler at Oaklands B. C. The man claimed to be a doctor and advertised for an as sistant. Linddy applied and was accepted, and afterwards the so-called physician coaxed \$50 out of him. Finding that he had been duped, Linddy had the man up in court who will now have to pay it back at \$3 per week until full restitution is made

# Blird's Nest Changed the Road.

Some years ago General David S. Stauley of the United States Army was leading a force across the plains. was laying out the route for a great rail road. There were two thousand men, twenty-five hundred horses and mules and a train of two hundred and fifty wagons heavily laden.

One day the general was riding at the

head of a broad column when suddenly his voice rang out, Halt! A bird's nest lay on the ground directly in froat of him.—In another moment the horses would have trampled on the nest-The mother bird was flying about and chirping in the greatest suriety. But the bray general had not brought out his army to destroy a bird's nest. He halted for a moment, looked at the

little birds in the next below, and then gave the order, 'Left oblique.'

Men, horses, mules and wagons turned aside, and spared the home of the help less bird. Months and even years after, those who crossed the plants saw a great tend in the trail. It was the bend made to avoid crushing the bird's nest. Truly, great hearts are tender hearts, and the loving are the daring. - Young People's

CHAPPED HANDS -The simplest remedy is found in overy one's kitchen closet, and is common starch. Reduco it to an impalpable powder, but it in a mushin bag, keep it in the table drawer. Whenever you take your hands out of the dish water or suds, who then dry with a soft towel, and while yet damp, shake the starch bag all over them and rub it in. The effect is most agreeable.

Peace is the harmony in the soul that health is in the body -Clarendon.

#### The Akoulalion,

We have received several inquiries from adult deaf persons and from parents of the deaf regarding the Akontalion, the instrument for the relief of deafness. the recent exhibition of which in New York City was reported at great length in the press throughout the country. We do not believe that this, or any other instrument, can remedy all cases of deafness, but we consider it a great im provement on any other that we have examined. The fact that the volume of sound can be increased or diminished at pleasure gives it a great advantage, making it possible to accommodate it to varying degrees of deafness. It would seem that any one who can hear with an car-tube or trumpet should find the contrivance of great value. A few others whose sense of hearing is too slight to respond to ordinary devices might find this helpful because of the great intensiheation of sound through the electric current. But it is not possible that it could benefit in the slightest degree a case in which any of the essential apparatus of hearing is destroyed. It should also be understood that the power of the instrument to make a deat recommendation of the instrument to make a deat recommendation. of the instrument to make a deaf person hear sound does not maure his hearing through it all the sounds that enter into speech. There are many people who, without any artificial aid, can licar some sounds as well as any one, but are deaf to other sounds and to certain tones of the human voice. Experiment will probably prove, in time, that the majorty of those who are able to hear sound through the akoulahou are similarly aitmateri.

In our schools for the deaf may be found examples of all kind of deafness. and as several of these schools are now testing the akoulalion with a view to demoustrating its practical value, those who think of buying the instrument would do well to wait until they report

results. - Mt. Arry World.

#### Day by Day.

"I don't behave I can ever be much of a Christian, 'said a little girl to her mother.

"Why?" her mother asked.

" Because there's so much to be done if one wants to be good," was the reply. 'One has got to overcome so much and bear so many burdens, and all that. You know how the unnister told all about it last Sunday."
"How did your brother get all that

wood into the shed last spring? Dad he do it all at once or little by little?"

" Little by little, of course," answered

the girl. "Well, that's just the way we live a Christian life. All the trials and burdens won't come at one time. We must overcome those of to-day and let those of to morrow alone till we come to them. Of course there's a great deal of work to be done in a Christian's lifetime, in the performance of our obligations to God, and the discharge of the duties that devolve upon us; but that work is done just as Dick moved the wood-little by little.
"Every day we should ask God for

strength to take us through that day. When to morrow comes, ask again. He will give all we ask for, and as we need it. By doing a little to-day, a little to-morrow, and keeping on in that way, we accomplish great things. Look at life in its little by little aspect, rather than as one great task to be done all at once, and it will be easy to face it."

## At the End of the Journey.

A small boy sat quietly in a seat of the day coach on a train running betheen two of our Western cities. It was a hot, dusty day, very uncomfortable for travelling, and that particular ride is perhaps the most uninteresting day's journey in our whole land. But the little fel'ow sat patiently watching the fields and fences hurrying by, until a motherly old lady, leaning forward, asked sympathetically:

' Aren't you tired of tholong ride, dear, and the dust and the heat?

The lad looked up brightly and replied, with a smile: "Yes, ma'am, a little. But I don't mind it much, be cause my father is going to meet me when I get to the end of it.

What a beautiful thou lit it is, that when life seems wearisome and monotonous, as it sometimes does, we can look foward hopefully and trustingly and, like the lonely little lad, "not mind it much," because our Father, too, will be waiting to meet us at our journey's end.

#### Eastor-Tido.

Tis Fastertide the sunbeam fall. The earth is fair with bud and leaf U, may the clory of it all. Speak softly to the hearts in crief.

There in tred a acre to they lie.

Who were our joy, our all 0, cam
thar longing. bath, the hunau ery
To see our joyed and leet again

Peace peace and heart the fraction on The chill and gloom fied far away the violet blooming, sweet and fair. When mownifits spread but yestenias

The fifty lifting up its breath.
The quick fining eap in shind and tree till eap. "Where is the sting, O death
O grave, where is the victory?"

Each Fastertid the old earth sings An anthem sweet and true end at that all the ten ler growing things Dwell in the Resurrection song.

JEAN BLEWETI

#### Six Love Letters.

" Are there any more of those letters? When her father asked this question in an awful tone, Lucilla Richmond could not say No, and dared not say Yes, but as an informediate course burst into tears and sobbed behind her handker chief.

"Bring them to me, Lucilla," said her father, as if she had answered him, as indeed she had; and the girl, trembling and weeping, arose to obey him

Then Mrs. Richmond, her daughter's own self grown older, camo behind her husband's chair and patted him on the shoulder. "Please don't be hard with her, my dear," she said, coaxingly. "He s a nice young man, and it's all our fault after all, as much as here."

"Perhaps you approve of the whole affair, ma'am," said Mr. Richmond

"I-no-that is I only -" gasped the httle woman and hearing Lucilla com ing, she sank tuto a chair, blaming her self dreadfully for not having been present at all her daughter's music lessons

during the past year.

It was inexcusable in a poor music teacher, who should have known his place," Mr Richmond declared; and he clutched the little perfumed billet which had fallen into his hands, as he might a scorpion, and waited for the others with a look upon his face which told of no softening. At last six little white envelopes, tied together with blue ribbons, were taid at his elbow by his trem bling daughter.

"Lock these up until I return home this evening." he said to his wife: "I will read them then. Meanwhile Lucilla is not to see this music teacher on any

pretence whatever. Mr Richmond put on his hat and do parted, and Lucilla and her mother took the opportunity of falling into each other's

"It is so naughty of you," said Mrs. Richmond "But oh, dear, I can't blame you. It was exactly so with your father. and my father objected because of his poverty He used to be very remantic himself in the sold times. Such letters as he wrote to me. I have them in my desk yet. He said he'd die if I refused hitn.

So does Fred," said Lucilla.

"And that life would be worthless without me, and about my being beautiful, -- I'm sure he ought to sympathize a little," said Mrs. Richmond.

She went into her own room to put the letters into her desk, and as she placed them into one of the pigeon licles, she saw in another a bundle, fied exact ly as those were, and drow them out These letters were to a Lucilla also, one who had received them twenty years be-

having adjourned to the parlor, Mr. of depression, when we all feel as though Richmond sexted himself in a great arm, we would like to give up the struggle chair, and demanded, in a voice of thunder. "Those absurd letters, if you pleaso."

"Six letters—six shanicful pieces of decoption, facilia," said the indignant parent. "I am shocked that a child of mine should practice such duplicity Hem! lot mo see. Number one, I believe. June, and this is December. Half a year you have deceived us then, Lucilla. Let me see -ah' From the first moment I adore I you, bah! Nonsense. People don't fall in love in that absard manner With your smiles for a goal, I would win both fame and fortune, poor as I been victorious, and why not we? am? Fiddlosticks, Lucilla. A man who has common sense would always wait the results of an operation when he | Figure PROVINCIAL INSTITUTION FOR THE until he had a fair common content before

dropped the first letter and picked up , we undertake to branch out and follow another. The same stuff, he comment new lines planned by ourselves and un ted. I hope to lo not believe a word traceled, intherto, by a single human the says. Ah! now in number three he being. With the axo of energy in our i calls you an angel! on my soul. And what is this? Those these and more, on our way onward, who forbid me to see you can find no. With the stout staff of progress to aid us. on my soul! And what is thus? tault with me but my poverty. I am mont journey, and our minds set to go monest I am carrest in my efforts. I ahead no matter how great the obstacles, am by birth a gentleman, and I love you, there will be one result, and that is the from the depths of my soul. Do not let | goal at which we aimed -success. then sell you for gold, Lucilla. Great heavens, what napertinoned to your parents!"

I don't remember Fred saying any thing of that kind, said poor little Lucilla. He nover knew you would

object." Mr. Richmond shook his head, frown ed and then read on antil the last sheet lay under his hand. Then with an ejacalation of rage, he sprang to his text

Intamous he cried I'll go to him this instant I'll horsowhip him I'll Ill murder han. As for you, by Jove, I'll send you to a convent. Elopo-elope with a music teacher! Here, John, call a cab. 1 -

Oh, papa! you are crazy! said Lucilla. "Frederick nover proposed such a thing. Let me see the letter. Oh, that is not fred a—upon my word it is not Do look, papa, it is dated twenty years back, and Fronticks name is not Charles! Papa, these are your letters to manner, written long ago Mother's name is Lucilla, you know.

Mr Richmond ast down in his arm chair in silence, very red in the face.

"How did this occur " he said, stern ly, and little Mrs Richmond, retreating into a corner, with her handerchief to her eyes, sobbed

did it on purpose! You know Charles, it's so long ago, and I thought, you might not exactly remember how you fell in love with me at first sight, how papa and mamma objected, and how, at last we ran away together, and it seemed to me if we could bring it back all plainty to you as it was then, we might let Lucilla marry the man shall loves, who is good, if he is not rich. I do not need it to be brought back any plamer myself, women have more time to remember, you know. And wo've been very happy--have we not?"

And certainly Mr. Richmond could not deny that. The little ruse was favorable to the young music teacher, who had really only been sentimental, and had not gone one half so far as an elopoment, and in due course of time the two were married with all the pomp and grandeur befitting the auptinis of a wealthy merchant's daughter, with the perfect approbation of Lucilla's father

#### "He is Risen."

There is no period in the whole year that holds such a prospect of hope and happiness as does the Eastertide. The world renewed its youth upon the first Easter morn and the spirit of hope was born. None looked forward before them to aught save a future of mky blackness. whereas now there is a blaze of super natural brightness overhanging all the thoughts of that world which has in the great beyond, and we speak with bated : breath when conversing on that subject as did the prophets of old when they

approached Holy Ground. The conquest of the grave teaches a forc. A strange idea came into Mrs. Richmond's mind.

Richmond's mind.

Who she left the desk she looked gully and frightened. The dinner hour arrived, and with it came her lussband, angered and more determined than ever.

The meal was passed in silence; then, a chance for all of us. There are thought and force of destroyed and in silence; then, a chance for all of us. There are times a cattern of the matter of the mat we would like to give up the struggle | against the tide, and drift down stream with the current. All energy and hope have vanished, we feel that we are more helpless than the innocent babe, for we have engaged in the strife and encounter ed all its difficulties, and therefore know how great the fight must be in order to bush ahead to success and fame, where as the child has yet to learn, and is shielded from the rough edges in life's pathway by loving parents and friends. Do not think how great and scenningly unpossible the task is, but concentrate the mind upon the fact that other he ve-

The leveliest creature I andertake it. It is not as hard to tollow INNERAL in the track made by others as it is to over saw' Exaggeration, my dear. You m the track made by others as it is to make not plain, but such flattery is absuid.

Must hear from you or die? Dear, dear, brish, branches of the trees and piles of brish branches. dear how absurd! And Mr. Richmond rabbish will impede our progress when | Classes He s romantic, up hands we must how our way through all

Easter suggests bright things, and the very sound of the word seems to parsullen looks are as much out of place on t an Easter morn as would be a funeral processionata wedding. "Hors llisen"let the words be prophette of our own errenmstances. Let us rise from the depths into which we have tallen and ascend into the higher and bester places of life. Drop all the old associations that tend to be the millstone around the neck which drags as down, down-nover to rise again. Cut the cord that hinds the weight to us, and shake off the incumirance. It others will not riso with us, there is no reason why our progress should be ampeded by their laggard steps. better one saved than two lost.

Every moment is filled with oppor tunities, which, if neglected and suffered to pass by, will nover return, but will be lost to us forever. As Christ conquered the grave, let us vanquish our foes in life. All the world will rejected and burst forth in strains of sweetest include upon this glorious Easter morn. Our life will soom to be tinged with rose colored fitter, and everything that is dark will give place to that which is blithe and gladsome Harmony will supplant discord, hope will displace despair, and all life will seem to take on a new meaning, for instead of hearing the words." He Has Fallen we shall hear angel voices proclaiming in accents as sweet as the chine of silvery bells—' He is Rison.' -The Summary

A hardened conscience is one that has been seared and crusted by the fires of

I believe !! c first test of a truly great man is his humility. I do not mean by "humility" doubt of his own power, or hesitation in speaking his own opinions, but a right understanding of the relations between what he can do and say and the rest of the world's doings and sayings. All great men not only know their own business, but usually know that they know it, and are not only right in their man opinions, but usually know they are, only they do not think much of themselves on that account. They do not expect their fellow men to fall down and worship them, they have a curious undersense of powerlessness, feeling that greatness is not in them but through them. They do their work ! iceling that they cannot well help doing it. - Rushin.
