La reliure serrée peut causer de l'ombre ou de la  
distortion le long de la marge intérieure

Blank leaves added during restoration may  
appear within the text. Whenever possible, these  
have been omitted from filming/  
Il se peut que certaines pages blanches ajoutées  
lors d'une restauration apparaissent dans le texte,  
mais, lorsque cela était possible, ces pages n'ont  
pas été filmées.

Additional comments:/  
Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire  
qu'il lui a été possible de se procurer. Les détails  
de cet exemplaire qui sont peut-être uniques du  
point de vue bibliographique, qui peuvent modifier  
une image reproduite, ou qui peuvent exiger une  
modification dans la méthode normale de filmage  
sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks  
to the generosity of:

Library of Congress  
Photoduplication Service

The images appearing here are the best quality  
possible considering the condition and legibility  
of the original copy and in keeping with the  
filming contract specifications.

Original copies in printed paper covers are filmed  
beginning with the front cover and ending on  
the last page with a printed or illustrated impres-  
sion, or the back cover when appropriate. All  
other original copies are filmed beginning on the  
first page with a printed or illustrated impres-  
sion, and ending on the last page with a printed  
or illustrated impression.

The last recorded frame on each microfiche  
shall contain the symbol → (meaning "CON-  
TINUED"), or the symbol ▽ (meaning "END"),  
whichever applies.

Maps, plates, charts, etc., may be filmed at  
different reduction ratios. Those too large to be  
entirely included in one exposure are filmed  
beginning in the upper left hand corner, left to  
right and top to bottom, as many frames as  
required. The following diagrams illustrate the  
method:

L'exemplaire filmé fut reproduit grâce à la  
générosité de:

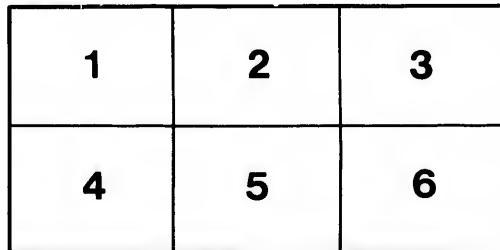

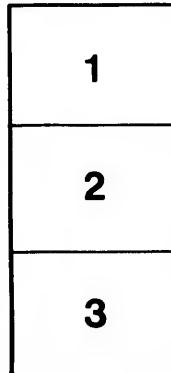

Library of Congress  
Photoduplication Service

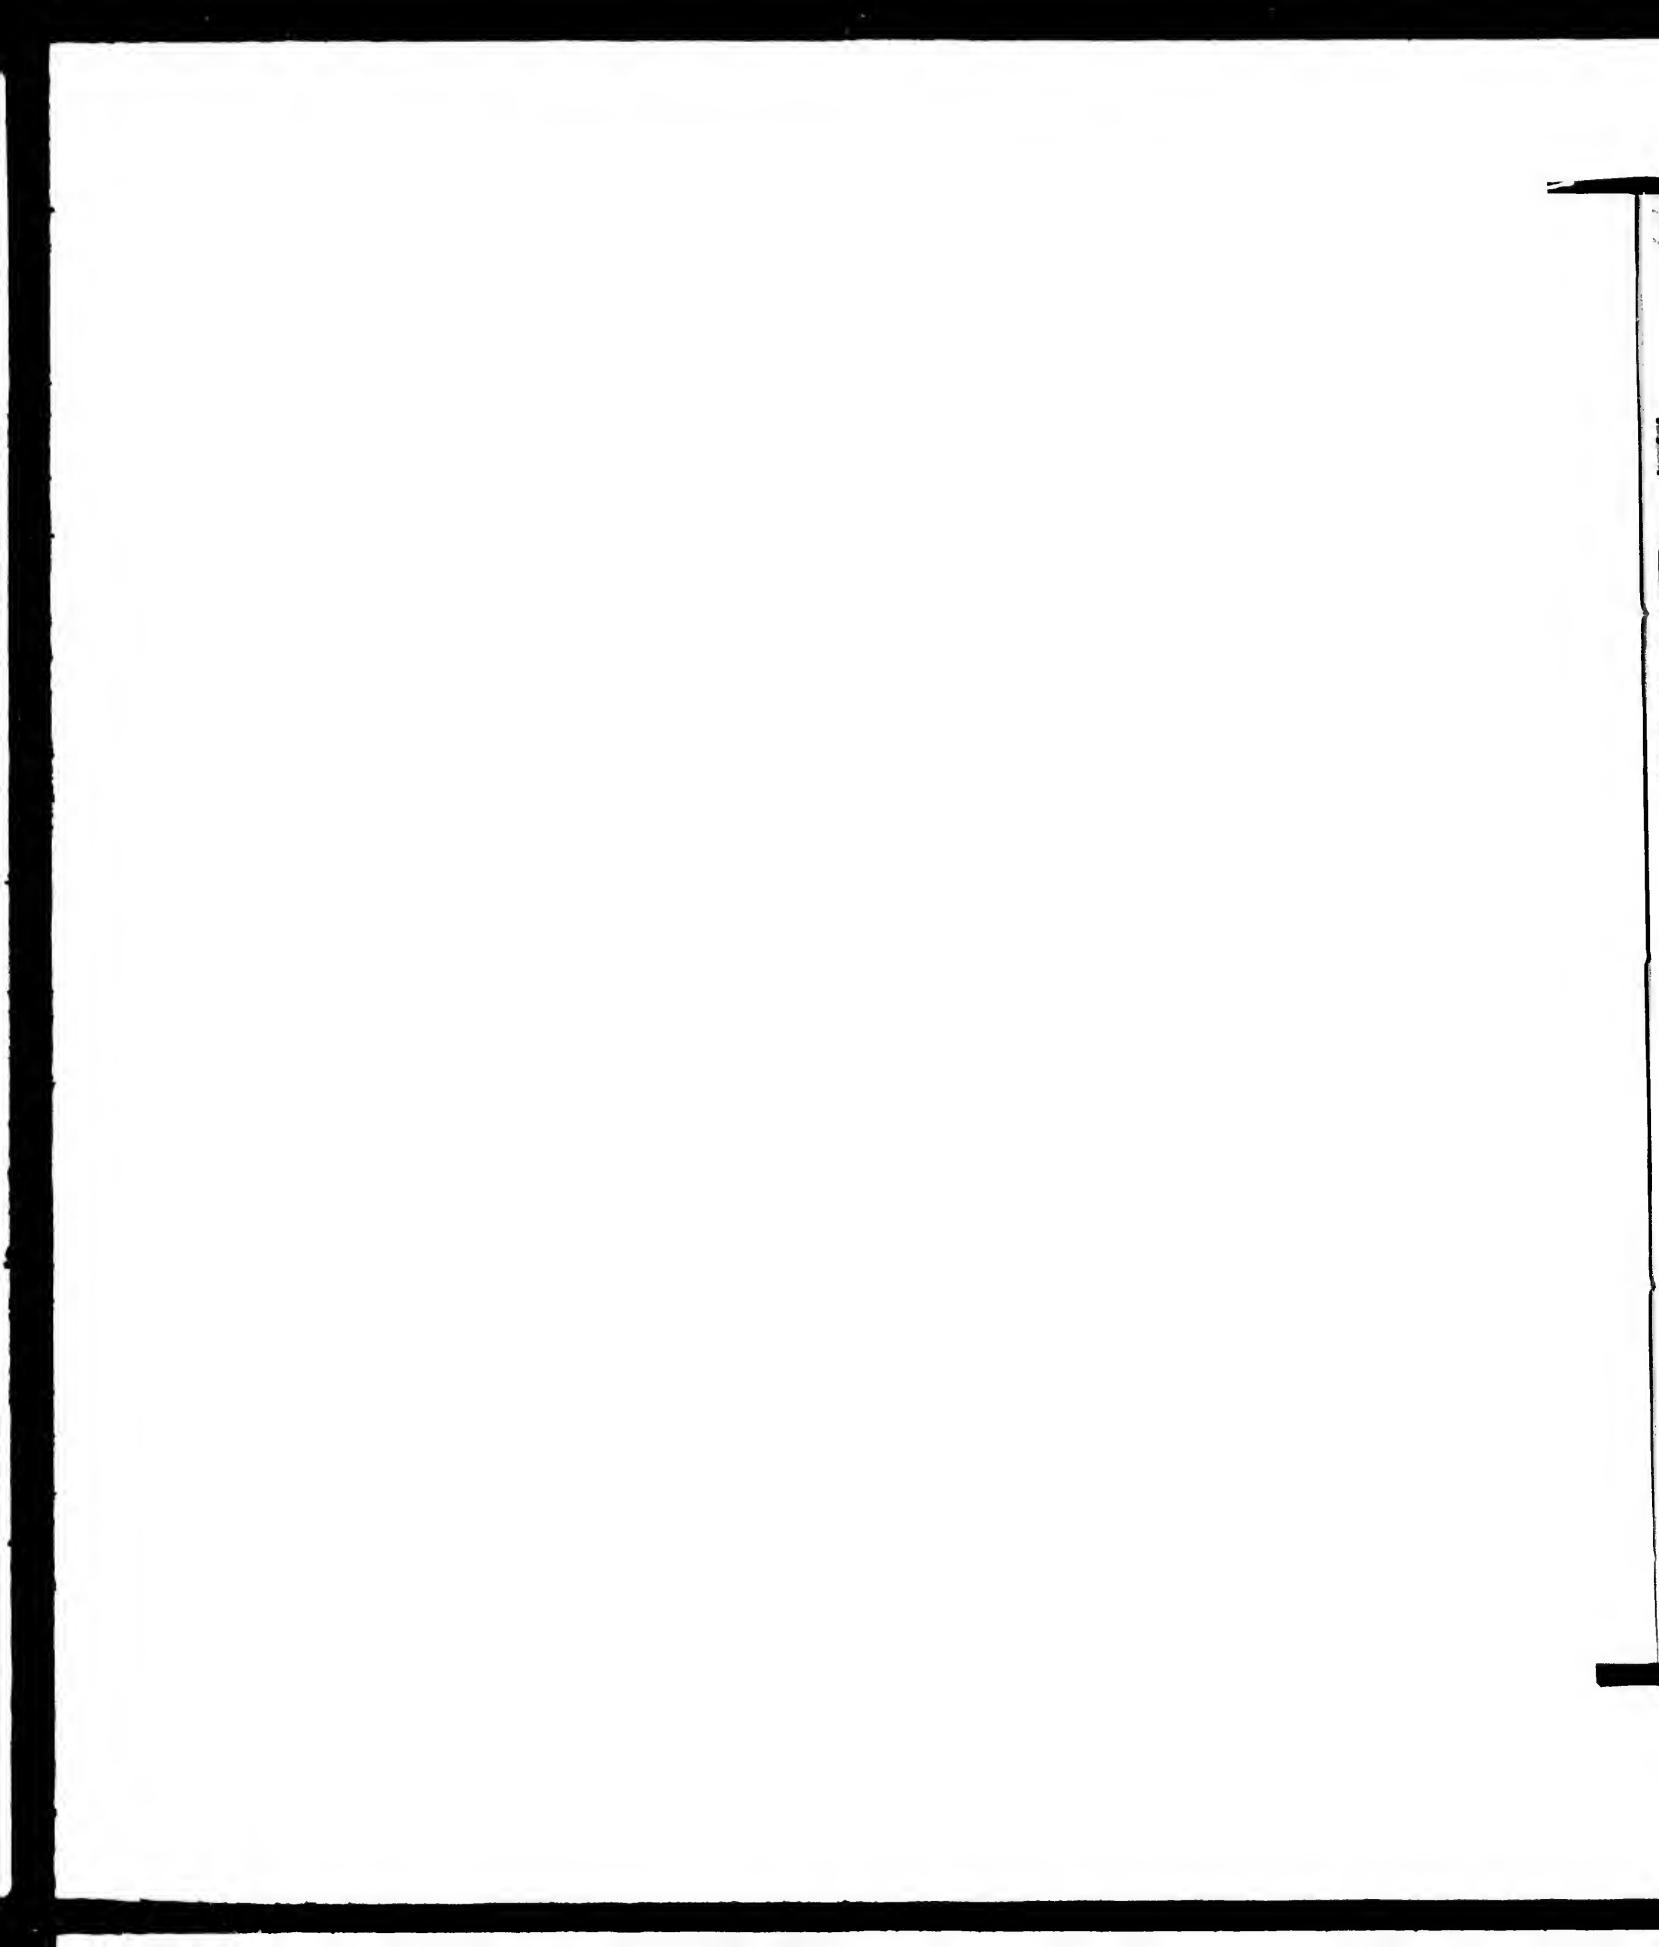

Les images suivantes ont été reproduites avec le  
plus grand soin, compte tenu de la condition et  
de la netteté de l'exemplaire filmé, et en  
conformité avec les conditions du contrat de  
filmage.

Les exemplaires originaux dont la couverture en  
papier est imprimée sont filmés en commençant  
par le premier plat et en terminant soit par la  
dernière page qui comporte une empreinte  
d'impression ou d'illustration, soit par le second  
plat, selon le cas. Tous les autres exemplaires  
originaux sont filmés en commençant par la  
première page qui comporte une empreinte  
d'impression ou d'illustration et en terminant par  
la dernière page qui comporte une telle  
empreinte.

Un des symboles suivants apparaîtra sur la  
dernière image de chaque microfiche, selon le  
cas: le symbole → signifie "A SUIVRE", le  
symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être  
filmés à des taux de réduction différents.  
Lorsque le document est trop grand pour être  
reproduit en un seul cliché, il est filmé à partir  
de l'angle supérieur gauche, de gauche à droite,  
et de haut en bas, en prenant le nombre  
d'images nécessaire. Les diagrammes suivants  
illustrent la méthode.

## WAYSIDE FLOWERS.

### PREFACE, SERIES III.

**N**early August some of the big summer weeds have begun to show their tall heads along the wayside. Among the first which appear are the common milkweed and its near relation the aesthetic, crimson-toned swamp milkweed. The daisy fleabane has now expanded to considerable proportions, and the golden-rayed Rudbeckia waves its head above the thin grass-blades of some sandy field too poor for the farmer to cultivate. It is fortunate that nature lavishes her innocent gold where it is not endangered by the mowing-machine.

Now is the time when the wild rose spreads its garlands over the old weather-beaten stone wall, and gives us entrancing bits of color harmony in pink and gray; and when the roses are gone the fireweed

picks up the keynote of color and continues a soberer rendering of it in pale magenta.

There are still some of the daintier flowers which abide with us, and the frail Sabbatias, the Chrysopsis, the milkwort, and the Gerardia dot the wayside with charming bits of pink and yellow. The purple-blue heads of Brunella are always in evidence all summer long, and the meadow beauty continues to bloom. But some of the larger weeds are now showing their strength, and before long they will be peeping over the fence into the neighboring field, counting their chances of wafting a few seed where there seems to be more elbow room. White snake-root, and its relative, Joe Pye-weed are now in their prime; but before long the golden-rod will try to choke them out, of life. Golden-rod demands *all* the wayside!

F. SCHUYLER MATHEWS.

**Series 3.**

**Black-eyed Susan.**  
*Rudbeckia hirta.*

**Rattlesnake Plantain.**  
*Goodyera pubescens.*

**Black-eyed Susan.**

*Rudbeckia hirta.*

Family . . . COMPOSITÆ, Composite.  
Color . . . Deep golden-yellow, madder-brown  
center.  
Blooms . . . July, early August.  
Environment, Meadows, pastures, and old fields,  
poor soil.  
Height . . . 1 ft. to 2 ft.  
Habitat . . . Me. to Wis., and southward.  
Character: Very rough, hairy stems and lea-  
ves; stiff.

**Rattlesnake Plantain.**

*Goodyéra pubescens.*

Family . . . ORCHIDACEÆ, Orchis.  
Color . . . Greenish-white.  
Blooms . . . July.  
Environment, Woods, under evergreens, and damp  
rich woods.  
Height . . . 6 ins. to 12 ins.  
Habitat . . . Me. to Fla., west to Mich. and Minn.  
Character: A white-veined, dull blue olive-  
green leaf; insignificant flower-spike.

Series 3.

American Centaury.  
*Sabbatia chloroides.*

Sea Pink.  
*Sabbatia stellaris.*

Slender Sabbatia.  
*Sabbatia gracilis.*

Slender Sabbathia.  
*Sabbatia gracilis.*

**American Centaury.**

*Sabbatia chloroides.*

Family . . . GENTIANACEÆ, Gentian.  
Color . . . Crimson-pink, rarely white, green-yellow center edged with ochre, golden stamens.  
Blooms . . . July.  
Environment, Borders of brackish ponds.  
Height . . . 1 ft. to 2 ft.  
Habitat . . . Mass. to Fla. and Ala.

Character: The largest and most beautiful of the genus. Delicate flowers; wiry or firm stems.

**Sea Pink.**

*Sabbatia stellaris.*

Family . . . GENTIANACEÆ, Gentian.  
Color . . . Pink, of crimson tone, rarely white, marked like *S. chloroides*.  
Blooms . . . July, early August.  
Environment, Salt marshes.  
Height . . . 10 ins. to 14 ins.  
Habitat . . . Mass. to Fla.

Character: Loosely branched; calyx lobes usually one-half the length of corolla. Difficult to distinguish from the next. (See "Gray's Manual.")

**Slender Sabbathia.**

*Sabbatia gracilis.*

Family . . . GENTIANACEÆ, Gentian.  
Color . . . Pink, of crimson tone, rarely white, marked like *S. chloroides*.  
Blooms . . . July, early August.  
Environment, Brackish marshes.  
Height . . . 9 ins. to 14 ins.  
Habitat . . . Nantucket, Mass., and N. J. to Fla., and La.

Character: Stem very slender; calyx lobes as long as corolla. (See Gray.)

**Series 3.**

**Wild Swamp Rose.**  
*Rosa Carolina.*

**Golden Aster.**  
*Chrysopsis falcata.*

### Wild Swamp Rose.

*Rosa Carolina.*

Family . . . ROSACEÆ, Rose.  
Color . . . Pale or deeper pink.  
Blooms . . . July-August.  
Environment, Borders of swamps and streams.  
Height . . . 1 ft. to 7 ft.; usually tall.  
Habitat . . . Me. to Fla., west to Minn. and Miss.  
Character: Variable, somewhat narrow dull  
green leafage; seed-receptacle globose.

### Golden Aster.

*Chrysopsis falcata.*

Family . . . COMPOSITÆ, Composite.  
Color . . . Golden yellow.  
Blooms . . . Late July, August.  
Environment, Dry, sandy soil on the coast.  
Height . . . 4 ins. to 10 ins.  
Habitat . . . Pine barrens of N. J. to Nantucket  
and Cape Cod, Mass.  
Character: Low, somewhat spreading; very  
woolly, gray stems.

Series 3.

Common Milkweed.  
*Asclepias Cornuta.*

### **Common Milkweed.**

*Asclepias Cornuti.*

- |               |  |
|---------------|--|
| Family . . .  | ASCLEPIADACEÆ, Milkweed.                         |
| Color . . .   | Lilac brown and very pale dull lilac.            |
| Blooms . . .  | July—August.                                     |
| Environment,  | Rich ground, roadsides and meadows,<br>coppices. |
| Height . . .  | 2 ft. to 5 ft.                                   |
| Habitat . . . | Common.  |
| Character:    | Rigid; cottony surface to leaves and<br>stem.    |

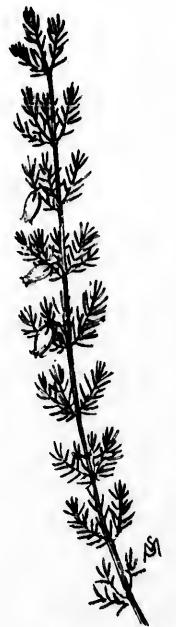

Series 3.

Self-Heal.  
*Brunella vulgaris.*

Bedstraw.  
*Gálium aspréllum.*

Milkwort.  
*Polygonatum polyzoma.*

Bell Heather.  
*Erica cinerea.*

#### Self-Heal.

*Brunella vulgaris.*

Family . . . LABIATÆ, Mint.  
Color . . . Purple, rarely white, in a somewhat  
                rusty-leafy head.  
Blooms . . . July—September; southward in June.  
Environment, Roadsides, borders of fields, borders  
                of woodlands.  
Height . . . 6 ins. to 10 ins.  
Habitat . . . Me. to Fla., and west.  
Character: Low and spreading.

#### Bell Heather.

*Erica cinerea.*

Family . . . ERICACEÆ, Heath.  
Color . . . Lavender-pink, or pinkish purple.  
Blooms . . . July—August.  
Environment, Low, sandy ground.  
Height . . . 8 ins. to 10 ins.  
Habitat . . . Nantucket only, adventive from  
                Europe.  
Character: Small evergreen shrub; minute, firm  
                leafage.

#### Bedstraw.

*Galium asprellum.*

Family . . . RUBIACEÆ, Madder.  
Color . . . White.  
Blooms . . . July—August.  
Environment, Damp, shady ground near streams,  
                alluvial soil.  
Height . . . Climbing about 4 ft.  
Habitat . . . Northern New England to N. C.,  
                west to Minn., Iowa and Mo.  
Character: A rough, sticky, tender vine.

#### Milkwort.

*Polygala polygama.*

Family . . . POLYGALACEÆ, Milkwort.  
Color . . . Dull, crimson-red, æsthetic in tone.  
Blooms . . . July—August.  
Environment, Dry, sandy soil.  
Height . . . 6 ins. to 9 ins.  
Habitat . . . Common.  
Character: Leafy, with fertile root-flowers also.  
(See Gray.)

Bell Heather.  
*Erica cinerea.*

Series 3.

Daisy, Fleabane.

*Erigeron strigosus.*

Family . . . COMPOSITÆ, Composite.  
Color . . . White, sometimes tinged lilac.  
Blooms . . . July—September.  
Environment, Fields and roadsides.  
Height . . . 1 ft. to 18 ins.  
Habitat . . . Common.

Character: Miniature, daisylike, thinly leaved.

Swamp Milkweed.

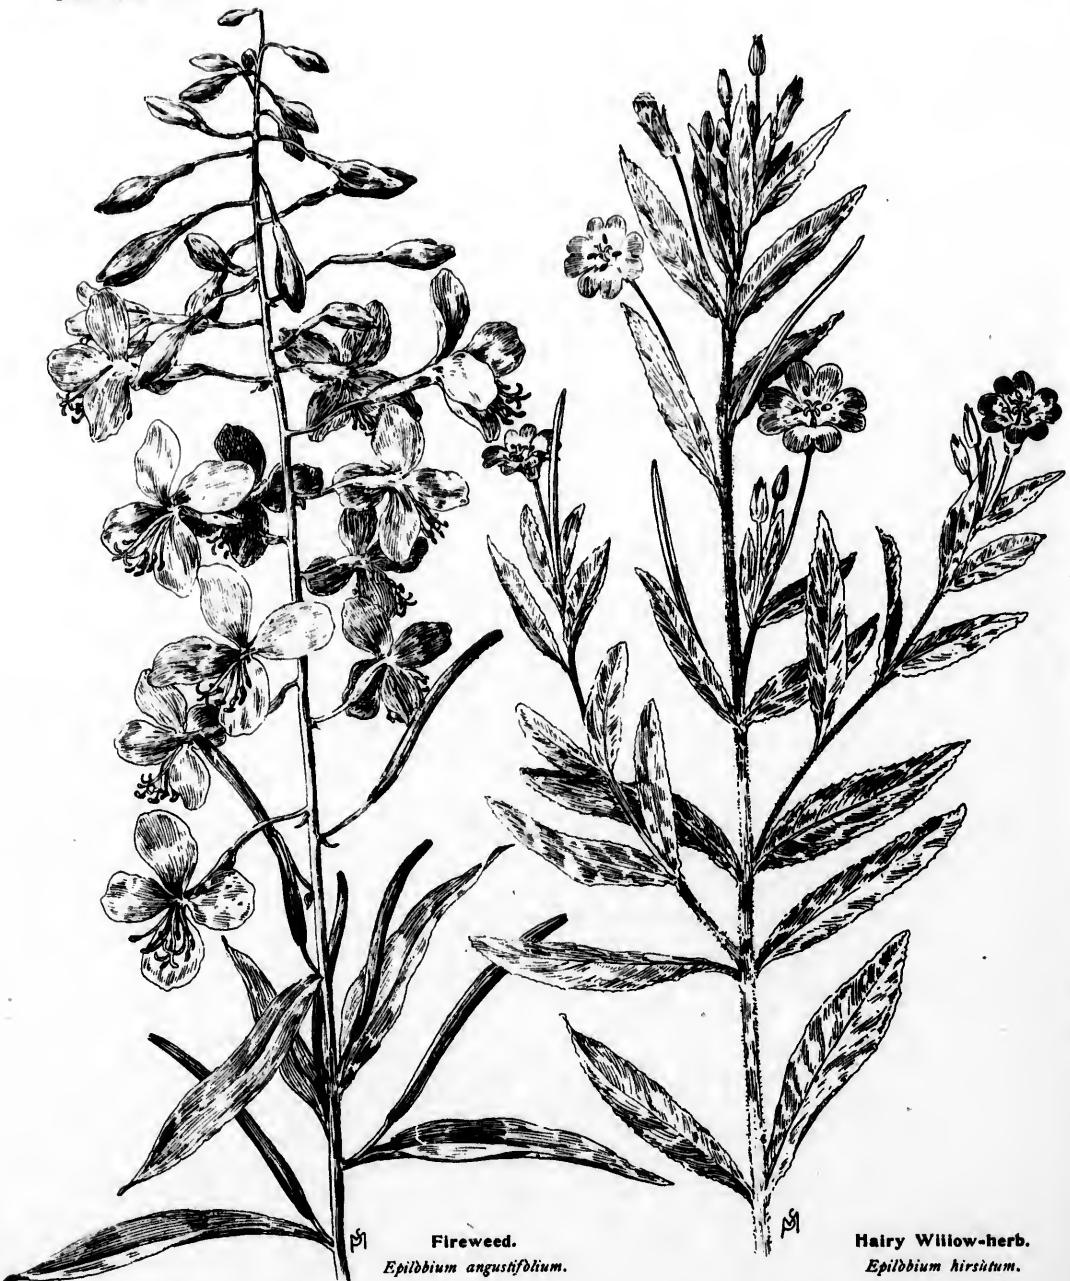

*Asclepias incarnata.*

Family . . . ASCLEPIADACEÆ, Milkweed.  
Color . . . Dull, whitish crimson, æsthetic in  
tone.  
Blooms . . . July—August.  
Environment, Swamps.  
Height . . . 2 ft. to 3 ft.  
Habitat . . . Common.

Character: Leafy, and nearly or quite smooth.

Swamp Milkweed.  
*Asclepias incarnata.*

Series 3.

M Fireweed.  
*Epilobium angustifolium.*

M Hairy Willow-herb.  
*Epilobium hirsutum.*

**Fireweed.**

*Epilobium angustifolium.*

- Family . . . ONAGRACEÆ, Evening Primrose.  
Color . . . Magenta, lighter, or rarely white.  
Blooms . . . July—August.  
Environment, In waste places, and fire-swept woodland openings.  
Height . . . 3 ft. to 7 ft.  
Habitat . . . Me. to N. C., west to Minn., eastern Kan., and far north.  
Character: Willowlike foliage, drooping stamens and pistil, seed-pod long and curved, wildly white-silky after bursting.

**Hairy Willow-herb.**

*Epilobium hirsutum.*

- Family . . . ONAGRACEÆ, Evening Primrose.  
Color . . . Magenta, pale or deeper, of a crimson tone.  
Blooms . . . July—August.  
Environment, Waste ground, roadsides near villages.  
Height . . . 3 ft. to 5 ft.  
Habitat . . . Eastern States, naturalized from Europe.  
Character: Stout branching, and soft-hairy.

Series 3.

Meadow Beauty, Deergrass.  
*Rhêxia Virginica.*

Cardinal Flower.  
*Lobelia cardinalis.*

### Meadow Beauty, Deergrass.

*Rhëxia Virginica.*

Family . . . MELASTOMACEÆ, Melastoma.  
Color . . . Magenta, paler or deeper, purplish.  
Blooms . . . July—August.  
Environment, Sandy swamps.  
Height . . . 6 ins. to 20 ins.  
Habitat . . . Me. to Fla. along the coast, west to  
northern N. Y., Ind., Mo. and La.  
Character: Stem square, flowers and stems  
with slight hairiness.

### Cardinal Flower.

*Lobelia cardinalis.*

Family . . . LOBELIACEÆ, Lobelia.  
Color . . . Intense red, very rarely pink or even  
white.  
Blooms . . . August—September.  
Environment, Low grounds, beside bogs.  
Height . . . 18 ins. to 4 ft.  
Habitat . . . Common. The most intensely red  
wild flower.  
Character: Flowers in spikes; foliage dark and  
dull.

**Series 3.**

Jewelweed, Touch-me-not.  
*Impatiens pallida.*

Turtlehead.  
*Chelone glabra.*

Turtlehead.  
*Chelone glabra.*

#### Jewelweed, Touch-me-not.

*Impatiens pallida.*

Family . . . GERANIACEÆ, Geranium.  
Color . . . Pale golden-yellow, spotted terra-cotta.  
Blooms . . . July—September.  
Environment, Moist shady places, bending over rills, rich soil.  
Height . . . 2 ft. to 4 ft.  
Habitat . . . Common northward.  
Character: Pale blue-green leaves, which appear jeweled under water, limp, watery-stemmed, often covered with purplish-blue bloom, fading quickly.

#### Turtlehead.

*Chelone glabra.*

Family . . . SCROPHULARIA, Figwort.  
Color . . . White, dull pinkish or lilac-pink tinged.  
Blooms . . . August—September.  
Environment, Wet places, roadsides, river banks.  
Height . . . 1 ft. to 2 ft., rarely 6 ft. or 7 ft.  
Habitat . . . Me. to Minn., south to Fla. and Tex.  
Character: A turtle-back-shaped flower, remotely resembling *Gentiana Andrewssii*; tall, smooth stem.

Series 3

Purple Gerardia.  
*Gerardia purpurea.*

White Snake-root.  
*Eupatorium ageratoides.*

**Purple Gerardia.**

*Gerardia purpurea.*

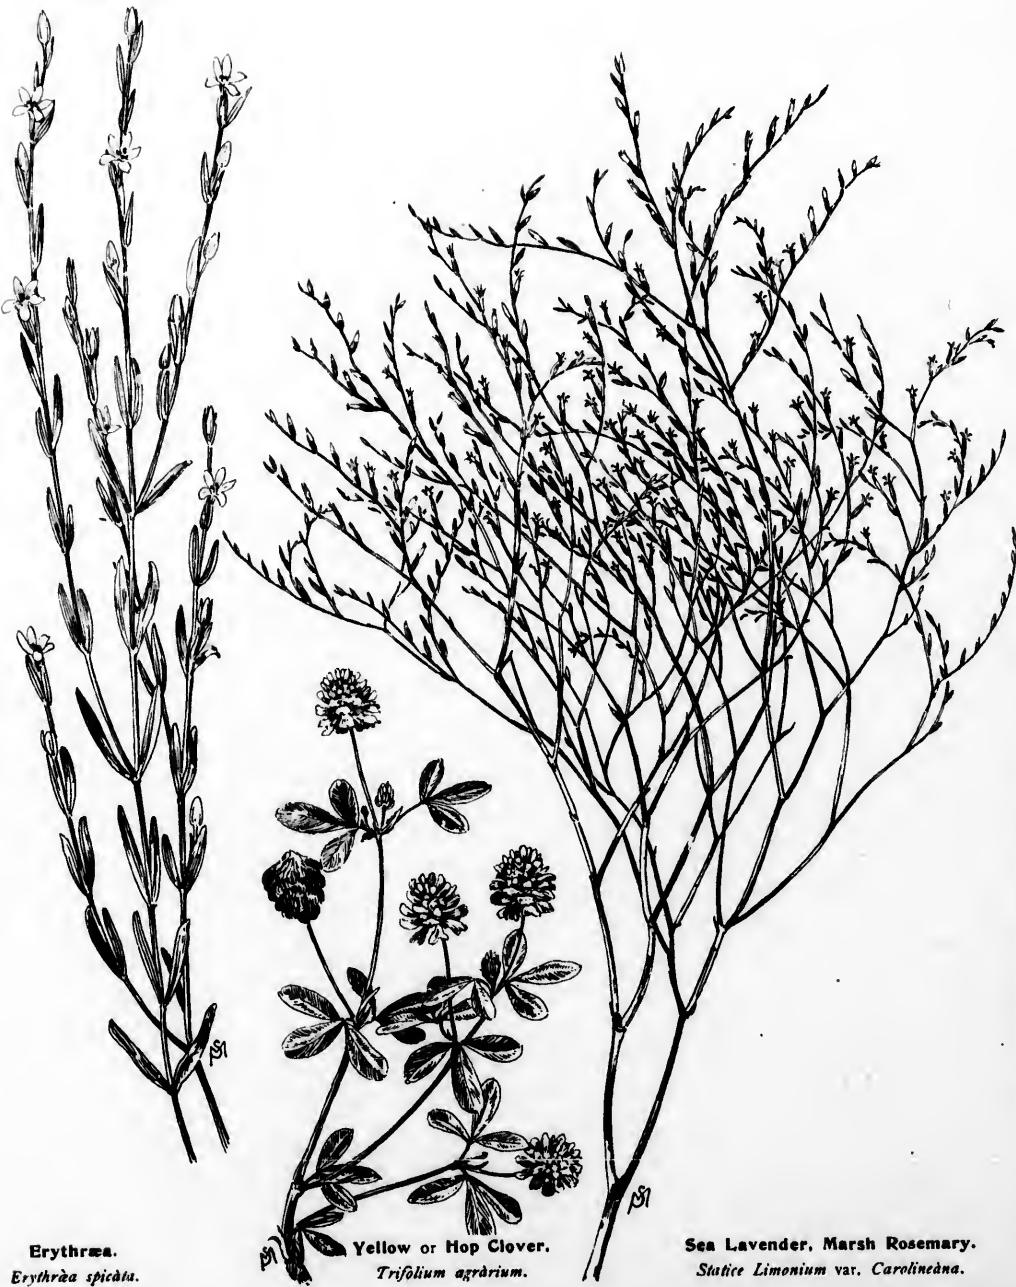

Family . . . SCROPHULARIACEÆ, Figwort.  
Color . . . Magenta-purple, and purple, lighter  
or deeper.  
Blooms . . . August-September.  
Environment, Low grounds, roadsides.  
Height . . . 1 ft. to 2 ft.  
Habitat . . . Near the coast, from Me. to N. J.,  
and in region of the Great Lakes.  
Character: Somewhat downy flowers; long, rigid  
and widely spreading branches.

**White Snake-root.**

*Eupatorium ageratoides.*

Family . . . COMPOSITÆ, Composite.  
Color . . . White.  
Blooms . . . August.  
Environment, Woodlands, copses.  
Height . . . 2 ft. to 3 ft., rarely 4 ft.  
Habitat . . . Common northward.  
Character: Smooth branching, long-stemmed  
leaves; ageratumlike flowers.

Series 3.

Erythrea.  
*Erythrea spicata.*

Yellow or Hop Clover.  
*Trifolium agrarium.*

Sea Lavender, Marsh Rosemary.  
*Statice Limonium var. Carolineana.*

*Erythraea.*

*Erythraea spicata.*

Family . . . GENTIANACEÆ, Gentian.  
Color . . . Pink or reddish magenta.  
Blooms . . . August.  
Environment, Sandy soil, and seashore.  
Height . . . 6 ins. to 10 ins.  
Habitat . . . Nantucket, Mass., and Portsmouth,  
Va., naturalized from Europe.

Character: Flowers spiked along one side of  
the simple or rarely forked branches

**Yellow or Hop Clover.**

*Trifolium agrarium.*

Family . . . LEGUMINOSÆ, Pulse.  
Color . . . Pale, dull golden-yellow.  
Blooms . . . July-September.  
Environment, Sandy fields and roadsides.  
Height . . . 5 ins. to 1 ft.  
Habitat . . . Me. to Va., naturalized from Europe.

Character: Low, spreading.

**Sea Lavender, Marsh Rosemary.**

*Statice Limonium var. Carolineana.*

Familie . . . PLUMBAGINACEÆ, Leadwort.  
Color . . . Lavender, much eclipsed by the green  
stems.  
Blooms . . . August-September.  
Environment, Salt marshes.  
Height . . . 1 ft. to 2 ft.  
Habitat . . . Along the coast from Me. to Tex.

Character: Very branched, naked stems; tiny  
flowers.

Series 3.

Wild Sunflower.  
*Helianthus giganteus.*

Long-leaved Sundew.  
*Drosera intermedia* var. *Americana.*

### Wild Sunflower.

*Helianthus giganteus.*

Family	COMPOSITÆ, Composite.
Color	Golden yellow, light in tone, yellow center, greenish at times.
Blooms	August-September.
Environment	Copse, low thickets, swamps.
Height	3 ft. to 10 ft.
Habitat	Common northward.
Character	Straight, tall, hairy stems; showy flowers, few and slender-stemmed.

### Long-leaved Sundew.

*Drosera intermedia* var. *Americana*.

Family	DROSERACEÆ, Sundew.
Color	White flower, plant with reddish stems, reddish bristles.
Blooms	July-August.
Environment	Bogs and wet places.
Height	3 ins. to 4 ins.
Habitat	Me. to Minn., Ind. and southward.
Character	Flower opens only in sunshine; the leaf-glands exude drops of clear fluid which look like dew, hence the name. It is an insect-catching plant.

## SYSTEMATICAL INDEX.

Series. Pp.	Series. Pp.	Series. Pp.
<b>RANUNCULACEÆ, Crowfoot.</b> Herbs with numerous stamens, and usually more than one pistil, all the parts of the flower distinct, and inserted on the receptacle. Calyx often colored like corolla, when the latter is wanting.	<b>Wood Sorrel, <i>Oxalis Acetosella</i></b> 1-21 <b>Yellow Wood-Sorrel, <i>Oxalis corniculata</i> var. <i>strigula</i></b> . . . . . 1-15 <b>Jewelweed, Touch-me-not, <i>Impatiens pallida</i></b> . . . . . III-19	or twice as many stamens as petals, both inserted in the throat of the calyx, anthers of peculiar shape opening by a small hole at the apex.
<b>POLYGALACEÆ, Milkwort.</b> Herbs with very irregular flowers. Calyx persistent of 5 sepals; 3 of them small, viz.: 2 on the lower, and 1 on the upper side of the blossom, and 1 on each side called wings, which are larger, colored and would be taken for petals. Within these on the lower side, are 3 petals united into 1 body, the middle one keel-shaped and often bearing a crest. Stamens 6 or 8 concealed in the hooded middle petal. Leaves simple, entire, alternate or whorled.	<b>Fringed Polygala, Flowering Wintergreen, <i>Polygala paucifolia</i></b> . . . . . 1-19 <b>Milkwort, <i>Polygala polycarpha</i></b> . . . . . III-11 <b>Milkwort, <i>Polygala cruciata</i></b> . . . . . IV- 5	<b>Meadow Beauty, Deergrass, <i>Rhexia Virginica</i></b> . . . . . III-19
<b>PAPAVERACEÆ, Poppy.</b> Herbs with regular flowers, calyx mostly of two sepals which fall when the blossom opens, petals twice or 3-5 times as many, numerous free stamens. Juice usually milky or colored and narcotic.	<b>Bloodroot, <i>Sanguinaria Canadensis</i></b> . . . . . 1- 7	<b>ONAGRACEÆ, Evening Primrose.</b> Herbs or shrubs with showy perfect and symmetrical flowers in fours (rarely in two to sixes) throughout. The calyx tube bearing the petals, and as many or twice as many stamens. Styles always united into one.
<b>FUMARIACEÆ, Fumitory.</b> Delicate and smooth herbs. Sepals 2, scale-like; 4 larger irregular and closed petals, the two outer with spreading tips, and 1 or both spurred or saccate at base, the 2 inner and smaller united by their tips, which inclose the anthers of the 6 stamens in 2 sets along with the stigma. Compound leaves.	<b>Dutchman's Breeches, <i>Dicentra Cucullaria</i></b> . . . . . 1- 5	<b>Fireweed, <i>Ephedrum angustifolium</i></b> . . . . . III-15 <b>Hairy Willow-herb, <i>Ephedrum hirsutum</i></b> . . . . . III-15 <b>Evening Primrose, <i>Enothera biennis</i></b> . . . . . IV- 7
<b>CARVOPHYLLACEÆ, Pink.</b> Herbs with regular flowers with not over 10 stamens, 2-5 styles or sessile stigmas, mostly separate to the base. Calyx persistent. Petals sometimes minute or wanting. Opposite entire leaves.	<b>Long-leaved Stitchwort, <i>Stellaria longifolia</i></b> . . . . . II- 5	<b>UMBELLIFERÆ, Parsley.</b> Herbs with small flowers in compound umbels calyx with 5 minute teeth or none, 5 petals, 5 stamens and 2 styles. Stems usually hollow. Leaves alternate, more commonly compound.
<b>HYPERICACEÆ, St. John's-wort.</b> Perfect flowers with many or few stamens (usually in 3 or 5 clusters) inserted on the receptacle. Leaves opposite, entire, simple.	<b>Upright-leaved St. John's-wort, <i>Hypericum adpressum</i></b> . . . . . IV- 7	<b>Wild Parsnip, <i>Zizia aurea</i></b> . . . . . 1-13
Common St. John's-wort, <i>Hypericum perforatum</i> . . . . . IV- 7	<b>ROSACEÆ, Rose.</b> Plants with regular flowers, numerous (rarely few) distinct stamens inserted on the calyx, 1 or 1+ pistils, which are quite distinct. Calyx of 5 or rarely 3, 4 or 8 sepals, united at the base. Petals as many as the sepals, and inserted with the stamens on the edge of a disk that lines the calyx tube. Leaves alternate and stipulate.	<b>CAPRIFOLIACEÆ, Honeysuckle.</b> Shrubs, or rarely herbs; stamens as many as the lobes of the corolla and borne on its tube. Leaves opposite without stipules.
<b>GERANIACEÆ, Geranium.</b> Herbs with regular flowers on the plan of 5, stamens 10, herbage scented. Leaves simple, variously lobed or even dissected. (In <i>Oxalis</i> leaves compound, of 3 orbicular leaflets, and flowers usually open only in sunshine.)	<b>Wild Meadow-sweet, <i>Spiraea salicifolia</i></b> II-19 <b>Hardhack, Steeple-bush, <i>Spiraea tomentosa</i></b> . . . . . II-19 <b>Purple Flowering-Raspberry, <i>Rubus odoratus</i></b> . . . . . II-17 <b>Wild Swamp Rose, <i>Rosa Carolina</i></b> . . . . . III- 7	<b>Twin Flower, <i>Linnaea borealis</i></b> . . . . . 1-13
Wild Geranium, Cranesbill, <i>Geranium maculatum</i> . . . . . I-25	<b>SAXIFRAGACEÆ, Saxifrage.</b> Flowers mostly perfect with as many or twice as many stamens, and fewer styles or stigmas than there are petals or sepals. Stamens and petals generally borne on the calyx.	<b>RUBIACEÆ, Madder.</b> Shrubs or rarely herbs, stamens as many as the lobes of the corolla and borne on its tube. Entire opposite leaves with stipules between them, or else (as in <i>Gallium</i> ) the leaves whorled without stipules.
Herb Robert, <i>Geranium Robertianum</i> . . . . . IV- 9	<b>FOAMFLOWER, False Miterwort, <i>Tiarella cordifolia</i></b> . . . . . I-17	<b>BLUESWEET, <i>Quaker Ladies, Houstonia cerulea</i></b> . . . . . II- 3
	<b>DROSERACEÆ, Sundew.</b> Bog herbs, with regular five-petaled flowers, and bristly fringed leaves in a tuft at the root. Insectivorous plants.	<b>BEDSTRAW, <i>Galium asprellum</i></b> . . . . . III-11
	Long-leaved Sundew, <i>Drosera intermedia</i> var. <i>Americana</i> . . . . . III-25	<b>COMPOSITÆ, Composite.</b> The largest family of flowering plants. Corollas either tubular or (funnel-formed and lobed) or strap-shaped, sometimes both kinds in the same head; when the marginal strap-shaped corollas form what are called ray flowers, those of the central part of the head are called disk flowers. There are almost always five stamens, and the anthers are united in a common tube through which the style passes.
	MELASTOMACEÆ, Melastoma.	<b>WHITE SNAKE-ROOT, <i>Eupatorium ageratoides</i></b> . . . . . III-21
	Plants with opposite simple 3-7 ribbed leaves, no stipules, as many	<b>golden Aster, <i>Chrysopsis salicifolia</i></b> III- 7
		<b>LANCE-LEAVED GOLDEN-ROD, <i>Solidago lancolata</i></b> . . . . . IV-19
		<b>BLUE-STEMMED GOLDEN-ROD, <i>Solidago caesia</i></b> . . . . . IV-21
		<b>WHITE GOLDEN-ROD, <i>Solidago bicolor</i></b> . . . . . IV-17
		<b>SMOOTH GOLDEN-ROD, <i>Solidago serotina</i></b> . . . . . IV-13
		<b>GRAY GOLDEN-ROD, <i>Solidago nemorals</i></b> . . . . . IV-15

## SYSTEMATICAL INDEX.

	Series. Fr.	Series. Fr.
Heart-leaved Aster, <i>Aster cordifolius</i>	IV-23	as many as its divisions and opposite them; one style and stigma.
Purple-stemmed Aster, <i>Aster puniceus</i>	IV-17	Star Flower, <i>Trifoliate Americana</i> . . . . . 1-9
Rough-leaved Aster, <i>Aster radula</i>	IV-23	Four-leaved Loosestrife, <i>Lysimachia quadrifolia</i> . . . . . II-13
Willow-leaved Blue Aster, <i>Aster Novi-Belgii</i>	IV-13	Common Loosestrife, <i>Lysimachia striata</i> . . . . . II-13
Whit Heathlike Aster, <i>Aster ericoides</i>	IV-21	
Pascled White Aster, <i>Aster paniculatus</i>	IV-15	
Robin's Plantain, <i>Erigorob bellidifolius</i>	I-17	
Daisy Fleabane, <i>Eriogonum strigosum</i>	III-13	
Black-eyed Susan, <i>Rudbeckia hirta</i>	III-19	
Wild Sunflower, <i>Helianthus giganteus</i>	III-15	
Beggar-ticks, <i>Bidens frondosa</i>	IV-11	
Larger Bur-Marigold, <i>Bidens chrysanthemoides</i>	IV-11	
Fall Dandelion, <i>Lactuca canadensis</i>	IV-23	
LOBELIACEÆ, Lobelia.		
Plants with milky, acrid juice, alternate, simple leaves, and scattered, racemed or panicle flowers. The corolla irregularly 5 lobed and mostly split down, on the upper side; the 5 stamens united into a tube commonly by their filaments and always by their anthers; style only one.		
Cardinal Flower, <i>Lobelia cardinalis</i>	III-17	
Indian Tobacco, <i>Lobelia inflata</i>	II-15	
CAMPANULACEÆ, Campania.		
Herbs with milky juice, and scattered flowers, with regular 5-lobed (blue or white) corolla, and 5 stamens borne on the summit of the calyx tube. Style 1; stigmas several. Stamens separate. Leaves alternate.		
Harebell, Bluebell, <i>Campanula rotundifolia</i>	IV-5	
ERICACEÆ, Heath.		
A large family of shrubs, herbs, and small trees. Flowers almost all regular with as many or twice as many stamens as there are petals or lobes of the corolla. The heath and heather belong to this family and are distinguished by needlike evergreen leaves, and 4-lobed corollas.		
Mayflower, Trailing Arbutus, <i>Epigaea repens</i>	I-3	
Skin Leaf, <i>Pyrola elliptica</i>	II-7	
Bell Heather, <i>Erica cinerea</i>	III-11	
Indian Pipe, <i>Monotropa uniflora</i>	II-25	
FYMBAGINACEÆ, Leadwort.		
Known by the regular flowers with 5-lobed plaited corolla, 5 stamens opposite as many petals and almost separate from them, and 5 styles.		
Sea Lavender, Marsh Rosemary, <i>Statice Limonium</i> var. <i>Coriacea</i>	III-23	
PRIMULACEÆ, Primrose.		
Herbs with regular perfect flowers, the stamens borne on the corolla and		
perennial upon insects for fertilization.		
ORCHIDACEÆ, Orchis.		
Perennial herbs more or less dependent upon insects for fertilization.		
The six-parted perianth composed of three outer divisions answering to sepals, and the three inner (which alternate with the outer divisions) answering to petals; one of these which is larger and different from the others is called the lip or labelium. There are one or two stamens which are connected with the style; the pollen is mostly coherent in masses.		
Calopogon, Bearded Orchis, <i>Calopogon pulchellum</i>	II-11	
Snake's Mouth, <i>Pogonia ophioglossoides</i>	II-11	
Ladies' Tresses, <i>Spiranthes cernua</i>	IV-31	
Rattlesnake Plantain, <i>Goodyera pubescens</i>	III-3	
Greenish-White Orchis, <i>Habenaria tridentata</i>	II-9	
Smaller Green Orchis, <i>Habenaria Hookeri</i>	II-9	
Ragged Fringed Orchis, <i>Habenaria lacera</i>	II-9	
Smaller Purple-Fringed Orchis, <i>Habenaria pyramidalis</i>	II-11	
Showy Lady's Slipper, <i>Cypripedium spectabile</i>	II-21	
Moccasin-flower, Lady's Slipper, <i>Cypripedium acaule</i>	II-7	
IRIDACEÆ, Iris.		
Flowers perfect and showy, from a spathe of two or more leaves or bracts; divisions of the perianth in two sets (answering to sepals and petals). Style 1, or rarely 3-clift; stigmas 3 opposite the 3 stamens and the outer divisions of the perianth. Anthers face outward.		
Blue Flag, Larger, <i>Iris versicolor</i>	I-23	
Blue-eyed Grass, <i>Sisyrinchium angustifolium</i>	II-3	
LILIACEÆ, Lily.		
Large family with regular symmetrical flowers, usually with perianth of 6 parts, and as many stamens standing in front of the divisions. Chiefly herbs with entire leaves.		
Solomon's Seal, <i>Polygonatum biflorum</i>	I-19	
False Solomon's Seal, <i>Smilacina stellata</i>	I-9	
Canada Mayflower, <i>Maianthemum Canadense</i>	I-17	
Bellwort, <i>Oakesia satsivifolia</i>	I-15	
Adder's Tongue, Dog's-Tooth Violet, <i>Erythronium americanum</i>	I-7	
Wood Lily, Wild Red Lily, <i>Lilium Philadelphicum</i>	II-25	
Canada Meadow Lily, <i>Lilium Canadense</i>	II-23	
Wake-Robin, Birthroot, <i>Trillium erectum</i>	I-11	
Painted Trillium, <i>Trillium erythrorhizon</i>	I-11	
ARACEÆ, Arum.		
Herbs with pungent watery juice, small perfect or imperfect flowers in a fleshy head or spike called a spadix, usually furnished with the colored enveloping bract called a spathe.		
Jack-in-the-Pulpit, Indian Turnip, <i>Arisaema triphyllum</i>	I-21	

## ALPHABETICAL INDEX

OF THE FOUR SERIES OF WAYSIDE FLOWERS.

Series Pp.	Series Pp.	Series Pp.	Series Pp.	Series Pp.
