THE FACULTY OF MEDICINE

OF THE

University of Bishop's College.

The 28th Annual session of this Faculty will commence on Monday, 3rd October, 1898, and will be continued regularly until March, the usual Christmas vacation intervening.

The course leading to the degree of C.M., M.D., extends over four years, and consists of four sessions of six months each, and three Summer Sessions, of three months each, one only of which is compulsory; but the Faculty strongly recommends attendance upon the three summer courses, as fuller opportunities are afforded for practical clinical work. Students who require the Quebec licence will be given an extended course in order to comply with the Quebec laws.

The Faculty of Medicine of Bishop's College aims at imparting a thoroughly practical medical education, and its facilities for doing so are in many respects unequalled in Canada. In addition to the regular course of didactic lectures, students have the advantage of extensive and varied hospital privileges.

The Montreal General Hospital, Royal Victoria, Western Hospital, Hotel Dieu Hospital, and Montreal Dispensary afford every opportunity to students of this College to receive clinical instruction in Medicine and Surgery. At the Women's Hospital, special facilities are provided for the practical study of Obstetrics.

The College building contains large lecture rooms, several smaller lecture rooms for Practical Chemistry, Practical Physiology, Histology, Bacteriology, etc., and large, airy, well-lighted dissecting rooms at the top of the building, isolated from the rest of the class-rooms. Under the new Anatomy Act of the Province of Quebec, ample material for dissection is provided at moderate rates.

The Histological, Physiological and Bacteriological Laboratories are supplied with a complete outfit of Microscopes, Microtomes and other modern apparatus. The Pharmacological Laboratory, besides possessing a very complete cabinet of crude drugs and their preparations and alkaloids,

has all the necessary appliance and means for the making of B. P. preparations and every facility for teaching practical dispensing. Recently the Faculty has expended a large sum for apparatus in several departments, to facilitate practical teaching.

The Faculty is recognized by the Royal College of Surgeons, England, and the Royal College of Physicians, London. Class tickets for the various courses are accepted by these Colleges as qualifying candidates for examination. The Royal College of Physicians of Edinburgh, the Royal College of Surgeons of Edinburgh, the Faculty of Physicians and Surgeons of Glasgow, also accept the Diploma of this University, and exempt its holder from being examined on the subjects of the Primary branches and Matriculation. Such candidates are therefore only required to pass in the subjects of the Final Examinations, including Hygiene. The Scottish colleges acting conjointly grant only one examination, and therefore confer a triple qualification. The University of London, Eng., also recognizes the Bishop's College diploma.

The Degree of Medicine and Surgery of this University, being accepted by the licensing bodies of Great Britain, its possessor is entitled to the same exemptions as are allowed to all other holders of recognized colonial degrees. The College of Physicians and Surgeons of Quebec accept the degree without further examination, provided the holder of such degree has, previous to beginning the study of Medicine, passed the preliminary examination exacted by that Board.

The class tickets for the various courses are accepted as qualifying for the examination of the College of Physicians and Surgeons of Ontario, and the Matriculation examination of this Faculty is recognized by the General Medical Council of Great Britain and Ireland provided that all the subjects are passed at the same time.

The Medical degrees of this University are—Master of Surgery (C.M.) and Doctor in Medicine (M.D.). The degree of Master of Surgery is not conferred upon any person who does not at the same time obtain the degree of Doctor in Medicine.

The Dental College of the Province of Quebec is now affiliated to the University of Bishop's College, and the medical lectures of the Dental Course are given by Bishop's Medical Faculty. The degree granted is that Doctor of Dental Surgery (D.D.S.) (for announcement see page 61.)

Convocation for the conferring of Medical and Dental degrees is held in Montreal immediately after the close of the session.

HOSPITAL PRACTICE.

Montreal being the most populous city in the Dominion of Canada, as well as the commercial metropolis, affords in its large and well-equipped hospitals, greater opportunities to the medical student for acquiring practical experience with disease both medical and surgical than can be obtained elsewhere in the Dominion. Unfortunately, the larger the city the greater the extremes of wealth and poverty, and Montreal forms no exception to this rule. This condition of things adds to the opportunity of the medical student, for the wards of our numerous hospitals are in a chronic state of over-crowding with the sick and suffering, affording examples to the teacher and student of a great variety of diseases. Being a large manufacturing centre, and at the head of navigation, the greatest variety of accidents are daily presented to the student for illustration and instruction, and students are most urgently requested to spend as much time as possible in the hospital wards and in the out-door rooms of the hospitals and dispensaries, to familiarize themselves with the work for which they are preparing. The best students are those who spend as much time as is consistent with proper attention to their other work in reporting and dressing in hospital wards.

The Western Hospital is now a general one, receiving patients of both sexes. It is attended by a staff of fourteen physicians and surgeons, most of whom are members of this Faculty.

In addition to general medical and surgical cases, in the department for diseases of women, the various gynaecological operations are frequently performed. The large number of abdominal sections which are performed in this institution afford abundant opportunities for witnessing the recent advances in abdominal surgery. Members of the staff are in attendance daily at 12 noon, when clinics are held. These afford special advantages to students for studying in detail the essential clinical elements of the cases in the medical, surgical and gynaecological wards.

In the departments for diseases of the eye, ear, nose and throat and of the skin, ample opportunities are afforded for pursuing the study of these specialities. The large number of patients enables the physicians in attendance to impart instruction, by selecting cases for demonstration, and presenting points for comparison and contrast. Practice can be obtained in auscultation and other means of Physical Diagnosis.

The positions of resident House Surgeons are open to graduates of this College.

The dispensing department is in charge of a licensed pharmacist, and students are permitted to dispense under his supervision. Many useful and practical hints in the compounding of drugs, and a knowledge of their doses are thus acquired.

The Women's Hospital is entirely under the control of Bishop's College, and is directly under the superintendence of the Professor of Obstetrics, and from the large number of patients admitted affords greater facilities for acquiring a practical knowledge of midwifery than can be obtained in any other medical school in Canada.

The position of acting Resident Assistant Accoucheur in this Department is open to senior students of Bishop's College.

The Montreal General Hospital (200 beds) is situated within a few minutes walk of the College, and is visited daily by two physicians and two surgeons, besides two ophthalmic surgeons, two gynaecologists and two laryngologists. It has at great expense been thoroughly renovated and modernized and its pathological department and clinical laboratory are fully supplied with the most recent equipments for teaching purposes. This is essentially a hospital for acute diseases, as evidenced by the large number of patients treated annually—2342 Medical and Surgical last year, besides 40,000 consultations in the out-door department. It affords equal advantages to students of all medical colleges for obtaining a practical knowledge in every department of Medicine and Surgery. A ward used as a Children's Department will also greatly assist students in the study of diseases of children. A special department for the treatment of the diseases of the eye and ear, under the care of the Ophthalmic Surgeons, affords students ample facilities for studying this class of affections. Clinical instruction is given daily, and all operations performed in the presence of the students. Regular Clinical Lectures on Clinical Surgery and Clinical Medicine, open to students of this University, are delivered during the winter. In addition, clinics are given every Monday and Thursday by Dr. F. W. Campbell, Dean of the Medical Faculty of Bishop's College. Annual fee, \$5.00; perpetual, \$15.00.

The Royal Victoria Hospital. This hospital is situated on Pine Avenue, corner of University Street.

The erection of this magnificent pile of buildings, in commemoration of the jubilee year of the reign of Her Majesty Queen Victoria, was rendered possible through the great liberality of two of the city's greatest benefactors, Lord Strathcona

and Mount Royal and Lord Mount Stephen, each of whom gave half a million dollars and have more recently added an endowment which will afford revenue for the running expenses of the Hospital; the city contributed a large piece of ground for the use of the hospital. The hospital receives all classes of medical and surgical cases, and has special wards for Gynaecological and Ophthalmic Diseases. It can accommodate about 250 patients, and extends its charity to the afflicted from all parts of the Dominion as freely as to those from the city. There are three main buildings, a central administration block and two large wings, one for surgical, the other for medical cases; each has three large wards, 126 ft. by 26 ft. 6 in., besides several smaller ones; medical and surgical theatres capable of seating 250 students. There are laboratories for Clinical and Pathological Chemistry, Pathological and Bacteriological investigations and a mortuary. Students from all colleges are admitted on equal terms.

Annual fee, \$5.00. Perpetual tickets are obtained when the third annual fee is paid. Tickets are given at the hospital.

Hotel Dieu Hospital (250 beds). The oldest and largest hospital in the city, is situated within a short distance of Bishop's College. Attention is directed to the large number of Medical and Surgical cases to be seen in this institution. Besides many cases of acute illness this hospital affords accommodation to such chronic cases as require hospital care. Clinical lectures are regularly delivered. Fees for hospital attendance, \$4.00 yearly. Clinical lectures, \$8.00 each.

The Montreal Dispensary, with a staff of six attending physicians and an Oculist, Gynaecologist, Laryngologist and Dermatologist has an average daily attendance of about fifty patients. Being in close proximity to the manufacturing districts of the city, it has a large number of minor accidents brought to it for attention, thus giving an excellent opportunity for the practice of minor surgery—such as dressing wounds, bandaging, strapping, application of splints, etc. The student will have every advantage afforded him for acquiring practical knowledge in diagnosis and methods of treatment. A very large number of cases of diseases of the eye, ear and throat are treated in this institution, and students will be practically taught the use of the ophthalmoscope, laryngoscope, etc.

MATRICULATION.

According to the Medical Act of 1879, in order to register a diploma in Medicine in the Province of Quebec, and to obtain a license, it is necessary that all students must pass a preliminary examination before the examiners appointed by the Board, or produce a certificate of having passed an equivalent preliminary examination before a College or Licensing Board, recognized by the "Provincial Medical Board," elsewhere than in the Province of Québec. It is also absolutely necessary that students shall attend at least four full six-months' sessions at College, and of these they are obliged to attend their first session during the first year succeeding the obtaining of a certificate of qualification to study. The student before obtaining a diploma must have been engaged in the study of Medicine for a period of not less than four years after having passed the preliminary examination. Students who intend practising in other Provinces of the Dominion should pass the Matriculation examination accepted by the several registering boards of these Provinces.

Students intending to practise in Ontario are required by the Medical Council of that Province to pass their preliminary examination before commencing the study of Medicine. Those having the degree of B.A. and Matriculants of any University, and of most of the Medical Colleges and Boards in Her Majesty's Dominion, and not requiring the license of this Province, are exempt from this examination in this University. The B.A. degree is now accepted by the College of Physicians and Surgeons of Quebec. Students who do not desire the license of either Province must pass the Matriculation examination of this University, or present a certificate of an equivalent examination before a body authorized for that purpose, if not otherwise qualified as above indicated.

Attention is particularly directed to the importance of passing the Matriculation examination in the spring, as four full years of professional study are required from the date of Matriculation before a provincial license is granted either in Ontario or Quebec.

PRELIMINARY EXAMINATION OF THIS UNIVERSITY.

Examiners for Canada :

PRINCIPAL A. N. SHEWAN, M.A.

REV. G. ABBOTT SMITH.

REV. JOHN KER, D.D.

Examiner for West Indies :

W. MORRISON, M.A., Kingston, Jamaica.

Students who do not desire the license of either the Quebec or Ontario College of Physicians and Surgeons, and not otherwise qualified, will be examined by this University on 15th and 16th October, 1898, and in March, 1899, on the following subjects, after enregistration. Fee for examination, \$5.00. Enregistration, \$4.00.

COMPULSORY SUBJECTS.

(a) English language, including Grammar and Composition.

(b) Latin, including Grammar, Translation from Caesar de Bello Gallico, Books I. and II., or Virgil's *Æneid*, Book I., and Translation of easy passages not taken from such authors.

(c) Mathematics comprising (a) Arithmetic ; (b) Algebra, as far as Simple Equations, inclusive ; (c) Geometry, the subject matter of Euclid, Books I., II. and III., with easy deductions.

(d) Botany as in Gray's School and Field Book of Botany.

(e) One of the following Optional Subjects :—(1) Greek, (2) French, (3) German, (4) Italian, (5) any other Modern Language, (6) Logic.

The General Medical Council of Great Britain will only enregister students whose certificates show that all the above subjects, Botany excepted, have been passed at the same time.

COLLEGE OF PHYSICIANS AND SURGEONS
OF THE PROVINCE OF QUEBEC.

PROGRAMME OF PRELIMINARY EXAMINATION FOR 1898.

LATIN.—The Commentaries of Caesar, first five books. The Æneid of Virgil, bks. I. and II.—The Odes of Horace, bk. I. A sound knowledge of the Grammar will be required.

FRENCH.—Candidates whose mother-tongue is French will be required to have a critical knowledge of Molière's "Bourgeois Gentilhomme," of Fénelon's "Telemachus" and of the first three books of Lafontaine's fables. They will also be required to answer questions of grammar, of etymology and of analysis.

English-speaking candidates must translate into English, passages from "Telemachus" and answer questions of French grammar. Also, they will be required to translate into French short English sentences.

ENGLISH.—Candidates whose mother-tongue is English will be required to have a critical knowledge of one of Shakespeare's Plays—"Twelfth Night" for 1898—including also grammar, etymology and analysis.

French-speaking candidates must translate into French, passages from the first eight books of Washington Irving's "Life of Columbus," and answer questions of English grammar. They will also be required to translate into English short sentences from "Telemachus."

BELLES-LETTRES.—Principles of the subject and of Rhetoric; also History of the literature of the age of Pericles in Greece, of Augustus in Rome, and of English and French Literature of the 17th, 18th and 19th centuries.

HISTORY.—A general knowledge of the History of Greece and of Rome, and a more particular knowledge of British, French and Canadian History.

GEOGRAPHY.—A general knowledge of the subject, and more especially of England, France and North America.

ARITHMETIC.—Must include vulgar and decimal fractions, simple and compound proportion, interest, percentage and square root.

ALGEBRA.—Must include fractions and simultaneous equations of the first degree.

GEOMETRY.—The first three books of Euclid and principal propositions of the Sixth. Also the measurement of the lines, surfaces and volumes of the regular geometrical figures, without proofs.

CHEMISTRY.—Elementary principles as in Remsen's "Elements of Chemistry."

BOTANY.—Elements of the subject as in Gray's "How Plants Grow."

PHYSICS.—Elements, as in Peck's translation of "Ganot's Physics."

PHILOSOPHY.—Logic, as in Jevon's Logic, and Intellectual and Moral Philosophy as in Professor Murray's Handbooks.

N. B.—Candidates must produce certificate of good moral character.

The examinations will be held in September, 1898, at Quebec, and in July, 1899, at Montreal. Applications to be made to one of the secretaries of the College of Physicians and Surgeons at Montreal or Quebec, either of whom will furnish schedule giving text books and percentage of marks to be obtained, and exact date of examination.

Examination fee, \$20. Should the candidate be unsuccessful, one-half of the fee will be returned.

ENREGISTRATION, ETC.

At the commencement of every session students are required to enroll their names and residences in the register of the Medical Faculty. The Registration books shall be closed on the first day of December in each year.

An *annus medicus*, or medical session, is constituted by at least two full courses of 120 lectures each, or by one such course, and two courses of 60 lectures each, with previous enregistration.

Students of this University who do not reside in the city, on application to the Registrar, will be furnished with certificates, which, through the kindness of the railway authorities, will entitle them to return tickets to Montreal at greatly reduced rates.

Graduates are requested to kindly notify the Registrar of any change in their address or of any omission or error noticed in the calendar list of names and addresses. The Fa-

gulty would also feel thankful for the receipt of any interesting pathological specimens, and donations of books for the College Library which will be gratefully acknowledged.

While the Faculty feels bound to keep faith with the students in regard to the rules and regulations now in force, and appearing in this Calendar, (which hold good for the current Calendar year), it is understood that students will be governed by such regulations as may be passed from time to time by the Faculty.

COURSES OF MEDICAL STUDIES TO BE TAKEN UP EACH YEAR, AND EXAMINATIONS REQUIRED.

The course of studies and examinations are divided into primary, and final branches. The former are taken during the first and second years, and the latter during the third and fourth years. The marks for second course of Materia Medica and Therapeutics being included among the final branches.

The primary subjects are Chemistry, Practical Chemistry, Descriptive and Practical Anatomy, Physiology, Practical Physiology, Histology, Materia Medica and Therapeutics. The subjects included in the final course are :—Practice of Medicine and Neurology, Surgery, Obstetrics, Clinical Obstetrics, Pathology and Bacteriology, Gynaecology, Medical Jurisprudence and Toxicology, Hygiene, Ophthalmology and Otology, Laryngology and Rhinology, Diseases of Children, Psychiatry, Clinical Medicine and Clinical Surgery.

The student will attend the course of Medical studies and take the examinations as follows :

FIRST YEAR.

ANATOMY, PRACTICAL ANATOMY, PHYSIOLOGY, PRACTICAL PHYSIOLOGY, HISTOLOGY, CHEMISTRY, HOSPITAL ATTENDANCE.

Sessional examinations are held at end of term and the pass examination in Histology.

SECOND YEAR.

ANATOMY, PRACTICAL ANATOMY, PHYSIOLOGY, PRACTICAL PHYSIOLOGY, MATERIA MEDICA AND GENERAL THERAPEUTICS, CHEMISTRY, PRACTICAL CHEMISTRY, HOSPITAL ATTENDANCE.

The sessional examination on Materia Medica and general Therapeutics is taken, and the pass examinations on the remaining primary subjects.

THIRD YEAR.

MEDICINE AND NEUROLOGY, SURGERY, GENERAL PATHOLOGY AND BACTERIOLOGY, OBSTETRICS, CLINICAL OBSTETRICS, GYNÆCOLOGY, CLINICAL GYNÆCOLOGY, MATERIA MEDICA AND GENERAL THERAPEUTICS, MEDICAL JURISPRUDENCE AND TOXICOLOGY. PSYCHIATRY, HYGIENE, AUTOPSIES, CLINICAL MEDICINE AND SURGERY.

The pass examinations in Materia Medica and General Therapeutics, Pathology and Medical Jurisprudence are held, and the sessional in the remaining branches. Lectures on Hygiene and Psychiatry will be given in the Summer session and examinations held at close of course, for all Students not requiring Quebec Board license, while those who do must pass these subjects before the Assessors at end of final year.

FOURTH YEAR.

MEDICINE AND NEUROLOGY, SURGERY; AUTOPSIES. OBSTETRICS, CLINICAL OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, OPHTHALMOLOGY AND OTOTOLOGY, LARYNGOLOGY AND RHINOLOGY, CLINICAL MEDICINE AND SURGERY.

The final pass examinations are held. By attending and finishing the courses as above, a definite amount of work is accomplished each year, and an equal division is made between the primary and final branches, and the student is required to work energetically from the beginning of the course.

MEDALS, PRIZES AND SCHOLARSHIPS.

The following medals, prizes and scholarships will be offered for competition during the ensuing Winter Session :
The Wood Gold Medal (value \$50).—A gold medal, presented annually, by Dr. Casey A. Wood, of Chicago, to the

student who has attended at least two sessions at Bishop's College, and at the final examination has the highest aggregate number of marks on all the subjects of professional examination in both primary and final branches.

The Robert Nelson Gold Medal (value \$60).—Presented annually for the best special examination in surgery, open to all candidates who have taken honors in the aggregate on the final branches, and who have attended at least two sessions at Bishop's College.

The David Medal.—In 1880 the Faculty founded a Scholarship, which was afterwards named the "David Scholarship," in honor of their late Dean. Owing to changes having occurred in the arrangement of lectures, it has been decided that in future this prize shall consist of a silver medal, to be known as the "David Medal," which will be awarded to the student who obtains the highest number of marks in the primary examinations.

Chancellor's Prize.—A prize in books given annually by R. W. Heneker, Esq., Chancellor of the University, to the student who passes the best final examination. (This prize is not open to the "Wood" Gold Medalist.)

The Wood gold medal, the Nelson gold medal, the David silver medal, and the Chancellor's prize are awarded to those who have attended at least two sessions at Bishop's College.

Prizes in books will be given for :—

1. The best examination in Histology.
2. The best dissecting and examination in the Practical Anatomy course in the first year.
3. The best dissecting and examination in the Practical Anatomy course in the second year.

A scholarship, consisting of a reduction of one-half the fees in all theoretical subjects of the Medical course, will be awarded to the applicant showing the highest aggregate of marks taken in the Provincial Matriculation Examinations of each year. Applications for this scholarship will not be received later than the 1st October, following the examinations.

A scholarship, consisting of a reduction of one-half the fees in all theoretical subjects of the Medical course, will be awarded to a graduate in Arts from Lennoxville, who shows the highest aggregate of marks in the Arts Course. Applications for this scholarship will not be received later than the 1st of September following the graduation.

No student can receive a medal or prize who has not taken honors in the examination.

EXAMINATIONS.

Written or oral examinations will be held from time to time by each professor upon the subjects treated of in his preceding lectures, and every such examination shall be counted as a lecture. Each professor shall, at intervals, call a roll of the names of the students attending his class. Evidence of regular attendance will be required before admission to examination.

On all subjects in which attendance on one course of lectures only is required, pass examinations will be held at the end of the course.

On subjects where two courses of lectures are required, a sessional (written only) examination will be held at the end of the first session, and the pass examination on that subject at the end of the second course. The student will not be allowed to go up for his pass examination on any subject until he has passed the sessional.

Students who fail to pass any sessional examination or the primary pass examination, may make application to the Faculty for a supplemental examination, which, if granted, will be given at the beginning of the following session, said application in the primary pass examination to be accompanied by a fee of five dollars for each subject. Sessional supplementary examinations are free of charge. Marks taken at supplementary examinations count for pass only, not for honors.

Students must have passed all their primary examinations before being permitted to go up for the pass examination in the final subjects.

The total number of marks given for any subject in which two courses are required will be divided as follows: One-quarter for sessionals and three-quarters for pass examinations.

To obtain first-class honors, at least seventy-five per cent. of the marks must be taken; second-class honors, at least sixty-five per cent.; to pass the ordinary examination at least fifty per cent.

Students exempt from the first year of a subject for sufficient reason are allowed only a pass standing (*i.e.*, in sessional marks), but may present themselves at the end of the session for the sessional examination also if they wish to compete for honor standing.

Students rejected in their final year on Medicine, Surgery or Obstetrics must attend another session and pass all the

final subjects again on which they were examined that year, when they take a future examination ; but if they fail on a minor final subject, then a supplementary examination on that subject alone may be allowed at the discretion of the Faculty, and at such time as may be determined upon.

Certified Class Tickets from recognized Medical Schools are accepted where such schools reciprocate with us.

Certificates of pass examinations from recognized Medical Colleges must be submitted to the Faculty for decision as to acceptance.

TABLE OF FEES.

---------------------------------	-------

Students who can attend the hospitals and dispensaries also during the summer sessions throughout their course will find it greatly to their advantage to do so, as more extended practical information may thus be obtained.

Dresserships and Clinical clerkships can be obtained at the Montreal General, Royal Victoria, and Western Hospitals by making an early application. Graduates at Bishop's College are eligible for the positions of Resident Medical Officers in the Montreal General Hospital; six are appointed annually on or about the 10th of April, and in the Western General Hospital, where two are appointed in April.

QUALIFICATIONS FOR THE DEGREE OF C.M., M.D.

Candidates for graduation in Medicine and Surgery must give sufficient evidence by certificates:—

1. Of having matriculated or possessing equivalent qualifications.
2. That they have attended two six-months' courses of lectures in each of the following departments in Medical Science:—General or Descriptive Anatomy, Principles and Practice of Medicine and Neurology, Surgery, Obstetrics, Chemistry, Physiology, Materia Medica and Therapeutics.
3. That they have attended one winter and one summer course in General Pathology and Bacteriology; two three months' courses in Gynæcology; one three months' course in Medical Jurisprudence and Toxicology, Diseases of Children, Hygiene, Practical Chemistry, Ophthalmology and Otology, also a course of Lectures on Laryngology and Rhinology, and also a course of not less than twenty-five demonstrations in Practical Histology. Practical courses on Pathological Histology. Courses in Psychiatry and Medical History and Ethics.
4. That they have attended two six-months' courses of lectures on Clinical Medicine and Clinical Surgery.
5. That they have attended two six-months' courses of Practical Anatomy.
6. That they have taken two courses of Clinical Obstetrics of twenty-four lessons each or one of forty-two.
7. That they have attended for at least twenty-four months, or four periods of six months each, the Medical and Surgical practice of a hospital in which are contained not less than 100 beds, under the charge of not less than two physi-

cians or
least six
pensary, c

cians or surgeons, and that they have been engaged for at least six months in compounding medicines at a hospital dispensary, or with a duly licensed practitioner.

8. That they have attended at least twelve cases of Midwifery, either in a lying-in hospital, or in a private practice, under the supervision of a regular medical practitioner.

9. They shall furnish evidence of having reported at least six medical and six surgical cases.

Candidates for the degree must, on or before the first day of March, deliver to the Registrar of the Medical Faculty a declaration, in their own handwriting, that they have completed twenty-one years of age (or that they will have done so before the day of graduation).

Also a statement of studies, accompanied with proper certificates, and the graduation and registration fee.

The following oath will be exacted from the successful candidate before receiving the degree :

SPONSIO ACADEMICA.

In Facultate Medicinae Universitatis :

Ego, A..... B....., Doctoratus in Arte Medica, titulo jam donandus, sancto coram Deo cordium scrutatore, spondeo :—me in omnibus grati animi officiis erga hanc Universitatem, ad extremum vitae halitum perseveraturum ; tum porro artem medicam, caute, caste et probe exercitaturum ; et quoad in me est, omnia ad aegrotorum corporum salutem conducentia, cum fide procuraturum ; quae denique, inter medendum, visa vel audita silere conveniat, non sine gravi causa vulgaturum. Ita praesens mihi spondenti adsit Numen.

LECTURES.—SESSION 1898-99.

PRINCIPLES AND PRACTICE OF MEDICINE AND NEUROLOGY.

PROFESSOR FRANCIS W. CAMPBELL.

ASSOCIATE PROFESSOR, J. BRADFORD McCONNELL.

It is proposed in these lectures to give a definition and history, with the etiology, symptoms, diagnosis, prognosis, complications, sequelae, pathology, and treatment of the more important constitutional affections, as well as of the diseases which attack the principal organs of the human body. The distribution of the course will have, as far as possible, some reference to the different systems and organs, the diseases of which will be considered in separate groups.

The lectures will be illustrated by plates, diagrams, pathological specimens, microscopical preparations, etc.

A few lectures will be given on Medical History and Ethics.

Particular attention will be given to the special Pathology of the different diseases and their therapy.

The course of lectures on Diseases of the Nervous System will include, first, an outline of the various methods and tests employed in the diagnosis of these affections, the use of the ophthalmoscope, electricity, aesthesiometer, etc.; then a general consideration of the chief Diseases of the Brain and Spinal Cord, and of their membranes and nerves.

Some of these lectures will be given at the Western Hospital where Clinical material will be used for practical demonstration.

PRINCIPLES AND PRACTICE OF SURGERY.

LECTURER, ROLLO CAMPBELL.

INSTRUCTORS, HERBERT TATLEY, GEO. FISK.

This course of lectures will be practical, and will include the principles on which the science of Surgery is formed, and also the chief rules for its practice.

It will be divided into three parts, General, Special and Regional. General surgery will embrace the following subjects : Surgical Bacteriology, the process of repair, the traumatic fevers, Inflammation, Suppuration, Ulceration, Abscess and Fistulae, Gangrene, Septicæmia, Pyæmia, Erysipelas Tetanus, Scurvy, Tuberculosis and Scrofula, Rhachitis, Contusions and Wounds, Syphilis and Tumors.

Special Surgery.—Surgery of the Vascular and Osseous Systems, Fractures, Dislocations, Diseases of Muscles, Tendons and Bursae, Surgery of the Nerves, Glands, Lymphatics and Joints, Surgical Diseases of the Skin and its appendages.

Orthopædic Surgery. — Regional Surgery. — Diseases and injuries of the Head, Neck and Spine, Surgery of the Digestive and Respiratory tracts, and on account of the great progress recently made in Abdominal Surgery, special attention will be given to that region ; Diseases and Surgery of the Genito-Urinary organs, Venereal and Rectal Diseases. When required, charts, specimens, and instruments will be shown, and the uses of the latter fully explained.

OPERATIVE SURGERY.

Operations will be performed on the dead body, the different forms of surgical instruments, apparatus, etc., shown, and their uses explained.

Senior students will have the opportunity of performing operations themselves on the dead subject under the guidance of the Professor.

DISEASES OF THE EYE AND EAR.

PROFESSOR J. W. STIRLING.

The course will consist :

1. Of systematic lectures delivered at 8 a.m., at which the symptoms, diagnosis and treatment of the more important diseased conditions of the eye and ear and their appendages will be discussed.

The lectures will be illustrated by drawings, diagrams, etc.

2. Of clinical instruction in the eye and ear department of the Montreal Dispensary on Monday, Wednesday and Friday, at 2 p.m., where opportunities will be afforded for practising the use of the Ophthalmoscope.

OBSTETRICS AND CLINICAL OBSTETRICS.

PROFESSOR REDDY.

W. BURNETT, DEMONSTRATOR.

This subject will be considered in the following order :
Pregnancy, including Abortion and Premature Labor.
Natural Labor, Complex Labor, etc.

Obstetrical Operations, the Puerperal State and its management.

The principal Obstetric operations, such as Version, Forceps, Craniotomy, etc., are performed on the Edgar-Parvin Mannikin.

Each student will receive practical instruction at the Women's Hospital and in his final year have entire charge of the cases to which he may be called.

GENERAL PATHOLOGY, PATHOLOGICAL HISTOLOGY AND BACTERIOLOGY.

PROFESSOR MACPHAIL.

A. J. RICHER, Demonstrator of Bacteriology.

The instruction in these subjects extends over a period of nine months, namely, one Winter and one Summer Session. The lectures will deal with the principles of General Pathology, and the Pathological Histology of the diseased conditions of the human body. The demonstrations will be upon the material acquired at the autopsies of the week, and the lectures will be illustrated as well by recent specimens, sections and preparations.

The following practical courses are obligatory upon all students :—

1. The performance of post-mortem examinations. Each student is required to perform or assist in performing six autopsies.

2. Bacteriology. All students are required to be familiar with the common forms of Bacteria, and to make themselves proficient by practice in the isolation staining and detection of them.

3. A practical course in Pathological Histology in which students will learn the methods of preparing, staining, mounting and examining diseased tissues.

PHYSICAL DIAGNOSIS.

PROF. W. G. STEWART.

In this course the various methods of eliciting the physical signs of disease will be taught ; the use of the stethoscope and other mechanical aids in diagnosis. The topography of the chest and normal physical signs will be demonstrated on the living subject. Disease in selected cases occurring at the Western Hospital, will also be demonstrated from time to time, and the students will be examined in rotation upon the work done.

GYNÆCOLOGY.

PROF. PERRIGO.

This course will embrace the following subjects :

1. Abnormalities.
2. Diseases of the external Genitals, including the injuries of the Perinæum.
3. Diseases and injuries of the Vagina ; Vesico and Recto Vaginal Fistule.
4. Diseases and injuries of the Uterus, including Stenosis, Subinvolution, Metritis, Endometritis and Fibroids ; Deformities, Displacements and Lacerations.
5. Diseases of the Fallopian tubes, including Salpingitis Hydro and Pyosalpinx and Tubal Gestation.
6. Diseases of the Ovaries, Ovariectomy and other forms of Abdominal Surgery.
7. Pelvic Peritonitis, Pelvic Cellulitis and Pelvic Abscess.
8. Diseases of the Female Bladder and Urethra.

At the out-patient department of the Western Hospital there will also be a course of instruction in practical diagnosis and treatment.

CLINICAL GYNÆCOLOGY.

PROFESSOR A LAPHORN SMITH.

At the Montreal Dispensary, every Monday and Thursday, at 3 p.m.

During the summer, students of the third and fourth years will be taught bi-manual examination and minor gynæcological operations, as well as other methods of treatment ; two students being taken in turn each day. Every Saturday, at 10 a.m., from April to October, major operations will be performed in their presence at the Western Hospital, and clinical lectures given on the cases.

DISEASES OF THE THROAT AND NOSE.

PROFESSOR GEO. T. ROSS.

This course will impart a general knowledge of the diseases commonly met with in these organs. Inflammation, growths and injuries of the Throat, Nose, and Naso-Pharynx will be dwelt upon, and their effect on the general system explained. Interesting cases attending the Clinic at the Western General Hospital will be lectured upon. Colored plates, photographs and diagrams will be used to make the course thoroughly practical.

MEDICAL JURISPRUDENCE.

(Including Toxicology.)

PROFESSOR W. H. DRUMMOND.

The purpose of these lectures is to bring as far as possible, within a reasonable compass, the application of medical knowledge to medico-legal investigation.

DISEASES OF CHILDREN.

PROFESSOR WILLIAM BURNETT.

This course will include a series of lectures on the Diseases of Infancy and Childhood. The dietetic and hygienic management of children will also be considered.

MENTAL DISEASES.

PROFESSOR J. V. ANGLIN.

Insanity in its various forms will be lectured upon in this course, and the subject treated from a Medical as well as a Medico-legal basis, with occasional demonstration of cases at Verdun Hospital for the Insane.

MATERIA MEDICA AND GENERAL THERAPEUTICS.

Professor ROBERT WILSON.

FRANCIS O. ANDERSON, Demonstrator of Practical Pharmacy.

This course comprises :—

medicine. The lectures will be illustrated by colored plates, dried preparations and a complete cabinet of drugs and their preparations.

2. The attendance during the Summer Session of a course of Practical Pharmacy and Dispensing and special Therapeutics. This includes (a) The actual making of many of the more important preparations of the Pharmacopoeia, together with the dispensing of prescriptions, under the direction of a graduate in Pharmacy ; (b) The delivery of a course of short lectures on special Therapeutic measures, such as Electrotherapy, Sero-therapy, Dietetics, Massage, Hypnotism, etc.

PRACTICAL HISTOLOGY.

PROF. ARTHMAN BRUERE.

The course will consist of fifty meetings for practical work in the laboratory of the College. Students will be instructed in the methods of preparing the tissues and organs of the body for examination with the microscope. Special attention will be paid to comparative histology.

CHEMISTRY AND CHEMICAL PHYSICS.

PROF. J. T. DONALD.

The object of this course is, in brief, to teach the general truths of Chemistry, in order that the student may be prepared to pursue in an intelligent manner the intimately related professional course, *e.g.*, Physiology, Materia Medica, Hygiene, etc. At the same time the more important elements and compounds are discussed, special attention being paid to those of hygienic and dietetic interest and of importance in medicine and pharmacy.

Diagrams, charts, specimens and experiments are freely used with a view to making the course as practical as possible.

PHYSIOLOGY.

PROFESSOR ARTHMAN BRUERE.

The lecturer's aim will be to impart a good general knowledge of Human and Comparative Physiology. The lectures will be largely illustrated, and numerous experiments

will be performed before the class. Electro-physiology, the physiology of the sense organs and of the central nervous system will be especially dwelt upon. Practical instruction in the use of Physiological instruments and in Physiological Chemistry will be given to senior students.

DESCRIPTIVE AND SURGICAL ANATOMY.

LECTURER F. J. HACKETT.

Five lectures, weekly, are given on this subject.

The course will be illustrated by diagrams, models, plates, moist and dry preparations, blackboard drawings, and special recent dissections, etc.

Written examinations are held upon each of the completed sections of the course. Comparative Anatomy, Anomalies and Malformations will be fully discussed in their relation to the subject.

Embryological points of interest will be dwelt upon when necessary.

The College is in possession of a complete collection of moist and dry preparations, viz., dissections of the central Nervous System, various regions of the body and of cross sections of the entire cadaver.

These specimens are open for study by the class.

SURGICAL APPLIED ANATOMY.

The lectures and demonstrations on this important subject will be given during the summer session.

This course will be illustrated by plates, moist and dry preparations, and special dissecting operations upon the cadaver.

The anatomy of the various ligations, amputations, excisions, etc., will be systematically discussed.

Special attention will be directed to Abdominal and Pelvic Anatomy.

HYGIENE OR STATE MEDICINE.

LECTURER, A. J. RICHER

The lectures on this subject, the importance and value of which are now universally admitted, are intended :—

To teach the application of Sanitary Science to questions concerning Public Health.

To an
tioner in

their work.

To afford rules for the conduct of the Medical Practitioner in Sanitary Inquiries, Municipal Sanitation, School Hygiene, etc.

To inculcate the use of suitable Hygienic Measures in the prevention and arrest of Contagious Diseases.

To confer such knowledge of the principles of State Medicine as it is desirable that every medical man should possess.

PRACTICAL CHEMISTRY.

PROFESSOR JOSEPH BEMROSE.

Work in the Laboratory for Practical Chemistry is continued throughout the Winter months, and is intended to afford to the student a knowledge, by personal experiment, of the more important elements and compounds used in medical practice, special attention being paid during the first half of the session to the reactions of those of a poisonous nature, both inorganic and organic. Afterwards the preparation of the volumetric solutions of the British pharmacopoeia and quantitative estimations of the fixed and volatile Alkalies, Oxalic, Arsenious and Hydrocyanic Acids, Iodine, Bromine, and their compounds; also the separation and recognition of the alkaloids in the tinctures and extracts of Nux Vomica, Cinchona, Opium, etc.

To each student is allotted a working space furnished with a full set of reagents; also the necessary apparatus, for which a deposit of \$5 will be required, to be returned at the end of the session, less an amount sufficient to cover breakages.

Special students who desire the course of Chemistry only will be admitted to the Lectures and Laboratory on enrolment, and payment of fees.

PRACTICAL ANATOMY.

F. J. HACKETT. LECTURER AND DEMONSTRATOR.

GEO. FISK AND G. A. LACOMBE, DEMONSTRATORS.

GEO. HALL, D. MCNAMARA, W. H. SMYTH,
ASSISTANT DEMONSTRATORS.

The dissecting room is open daily from 8 a.m. to 10 p.m., except on Saturday, when it is closed at 5 p.m.

Ample opportunities are afforded for dissecting fresh subjects. Demonstrators will be in attendance daily, to direct and assist students in their dissections, and examine their work. The dissecting rooms are supplied with every

requisite for the comfort and convenience of students, due regard being observed for sanitary measures. Every possible facility will be afforded students in this most important department.

Students during dissection of each extremity are examined on the muscles, arteries, nerves, etc., of the extremity as they are exposed. Certificates are granted as soon as the student shows by examination a thorough knowledge of the anatomy of the part and its practical bearing in relation to Medicine and Surgery.

CLINICAL MEDICINE.

PROFESSOR J. BRADFORD MCCONNELL.

CLINICAL SURGERY.

Daily clinics will be given in the above subjects, and one or more lectures weekly at the Western Hospital. Opportunities will be afforded here for the reporting of cases, surgical dressing, and practice in Clinical Chemistry and Microscopy; but owing to lack of the required number of beds at present in the Western Hospital, in addition to what can be attended of the above, students of this University are required to attend the Clinical Courses, Autopsies and other work at the Montreal General, Royal Victoria, or Hotel Dieu Hospitals, where our students receive the same attention, and are accorded the same privileges as those from other teaching bodies; but the pass examinations will be conducted at the Western Hospital.

REFERENCE AND TEXT BOOKS RECOMMENDED.

SURGERY.

Text Books.—Bryant, Walsham, Treeves, Martin, Moulin, American Text Book of Surgery, Warren's Surgical Pathology, Wharton's Minor Surgery, Wharton and Curtis, Erichsen.

Books of Reference.—Gant, Agnew, Gross, Hamilton on Fractures, Berkley Hill, Keyes, Allingham, Gerster's Surgery, Senn's Principles of Surgery, Dennis' System of Surgery, Roswell Park's System of Surgery.

OPERATIVE SURGERY.

Text Books.—Kocher, Jacobson, Treeves.

Books of Reference.—Holmes' System, Gant, Gross, Agnew.

MEDICINE AND NEUROLOGY.

Books Recommended.—Osler, Strumpell, Flint, Wood & Fitz; for reference, the American System of Medicine: Hirt's Diseases of the Nervous System, Gowers, Gray, Dercum, Mills, Tyson, Hughes, Ewald.

EYE AND EAR.

Text Books.—Swanzy's "Diseases of the Eye," and Field's "Diseases of Ear," Deschweintz "on the Eye," Norris and Oliver.

OBSTETRICS.

Text Books.—Playfair, 6th Amer, 8th Eng. Davis.

Operative Obstetrics.—Grandin and Jarman.

Books of Reference.—Am. Text Book of Obstetrics Winckel.

PATHOLOGY.

Text Books.—Joseph Coat's Manual of Pathology; Principle of Bacteriology, A. C. Abbott, 4th Edit.; Pathogenic Bacteria, Jos. McFarland, Pathological Technique, Mallory and Wright.

PHYSIOLOGY.

Text Books.—Forster's Physiology, Manual of Physiology by Professor Stewart, American Text Book.

PHYSICAL DIAGNOSIS.

Text Books.—Loomis, Brown, Fenwick.

Books of Reference.—Vierordt, Da Costa, Musser.

ANATOMY.

Text Books.—Morris, McAllister, Gray.

For Reference.—Quain's (last edition), Holden's Osteology.

PRACTICAL ANATOMY.

Books Recommended for use in the Dissecting Room—Heath's Manual of Dissection, Cunningham's Practical Anatomy, Ellis' Demonstrations of Anatomy, Holden's Dissector. (Am. Ed.)

MENTAL DISEASES.

Clouston "on Mental Diseases."

CHEMISTRY.

Text Books.—Balfour Stewart's "Lesson in Elementary Physics," Attfield's Chemistry, Remsen's Introduction to the Study of Chemistry, Bartley's Medical Chemistry, Witthau's Medical Students' Manual of Chemistry, Remsen's Organic Chemistry, Fowne's Chemistry, Wurtz elements of Modern Chemistry.

PRACTICAL CHEMISTRY.

Text Books.—Attfield or Odling, Simon.

HISTOLOGY.

Text Books.—American Text Book; Stirling's Histology, Schafer's Elements, Stohr. Piersol's Normal Histology.

MATERIA MEDICA AND THERAPEUTICS.

Text Books.—Bruce's Materia Medica, Shoemaker's Materia Medica, Hare's Therapeutics, Culbreth's Materia Medica and Pharmacology, H. C. Wood's Principles and Practice of Therapeutics. Lectures on Pharmacology, by C. Binz, 2 vols.; translated by A. C. & P. A. Latham. Lectures on Action of Medicines, by Lauder Brunton.

GYNÆCOLOGY.

Text Books.—Thomas & Mundé, Garrigues. American Text Book.
Books of Reference.—Keating & Co. Pozzi. Allbutt.

DISEASES OF CHILDREN.

Text Books.—Diseases of Infancy and Childhood, Holt, Lewis Smith. American Text Book. Therapeutics of Infancy, by Jacobi. Rotch.

MEDICAL JURISPRUDENCE.

Text Books.—Guy's Forensic Medicine; Taylor's Medical Jurisprudence; Blandford on Insanity; Allan McLane Hamilton's Legal Medicine. Herald.

THROAT AND NOSE.

Text Books.—Burnett; Lennox Browne, Williams, Hutchison, McBride.

HYGIENE.

Books Recommended.—Traité d'Hygiène, par M. Levy; Wilson's Handbook of Hygiene; Practical Hygiene, by Parkes; Robe's Text Book.

SURGICAL APPLIED ANATOMY.

Text Books.—Shields, Treves, McLellan's Regional Anatomy.

CLINICAL MEDICINE AND SURGERY.

Books Recommended.—Musser's Medical Diagnosis, Vierordt's Medical Diagnosis, R. Von Jaksch, Wethered's Medical Microscopy, Purdy's Practical Urinalysis and Urinary Diagnosis. Hare's Practical Diagnosis. Simon's Clinical Diagnosis.

Heath's Guide to Surgical Diagnosis, and the text books recommended in the Course on Surgery. Tyson's Practical Examination of Urine. Black.

MISCELLANEOUS.

Practice of Massage, Eccles; Medical Climatology, Solly; Lippincott's Medical Dictionary, Foster's Encyclopedic Medical Dictionary, Cabot's Clinical Examination of the Blood. Anæsthetics, Turnbull. Gould's Medical Dictionary; Practical Dietetics by Thompson; Food in Health and Disease, Yeo. Venereal Diseases—Taylor, Hayden, White & Martin. Skin Diseases—Hyde, Jackson, Shoemaker—Duhring Cutaneous Medicine.

RESULTS OF EXAMINATIONS.

SESSION 1897-98

PRIMARY SUBJECTS.

Chemistry—Sessional examination—1st class honors—J. B. Morison, E. G. Mason, E. A. Tomkins, Wm. Watson, F. E. Skinner, H. B. Henriques, W. Rowell. Passed—A. D. C. Rob, D. L. Murray.

Pass examination—1st class honors—F. G. Henry, T. L. Crossley, C. A. Maguire, Miss M. Currie, F. O. Anderson, J. A. Butler, Chas. Adams, F. L. Wilkinson. 2nd class honors—Miss L. Runnells, D. McHarg, E. Dubeau, C. H. Christie, W. G. McCabe, C. H. Stewart. Passed—F. W. McKenna, E. G. Gale, A. Macdonald, S. G. Brown, G. H. O. Stevenson, A. C. Lopez.

Anatomy—Sessional and Supplemental—1st class honors—Jas. Gillespie, Edwin A. Tomkins ; James B. Morison and E. G. Mason, equal ; Watson Rowell, Wm. Watson, D. T. Smith ; G. H. Tuthill, F. E. Skinner and H. B. Henriques, equal. 2nd class honors—A. D. C. Rob, D. L. Murray, Robt. Elliott. Passed—A. D. Angus, F. O. Anderson, A. C. Lopez and S. G. Brown.

Final Examination—1st class honors—Fred. G. Henry, F. L. Wilkinson, F. O. Anderson, Alex. MacDonald, Alberto C. Lopez, Miss Lulu Runnells, J. E. Tanguay. 2nd class honors—J. A. Butler, J. K. Cleary, D. McHarg, F. Chris Nichol, E. G. Gale. Passed—J. A. Paddyfoot, Miss M. Currie, Fred W. McKenna, G. H. A. Stevenson, W. G. McCabe.

Physiology—Sessional and Supplemental—1st class honors—Jas. A. Gillespie, W. J. Rowell, James B. Morison, H. B. Henriques. 2nd class honors—E. G. Mason. Passed—Wm. Watson, F. E. Skinner, George H. Tutill, A. D. C. Rob, A. D. Angus, D. L. Murray, D. T. Smith, Edwin A. Tomkins, S. G. Brown, G. H. A. Stevenson, W. G. McCabe, F. W. McKenna, A. N. Gould, A. Macdonald, T. L. Larseneur, A. Lionais.

Pass Examination—F. G. Henry, Margaret Currie, Francis O. Anderson, F. L. Wilkinson, J. A. Butler, Lulu Runnells, Alberto C. Lopez, E. G. Gale, C. H. Christie, W. G. McCabe, Joseph H. Davis, Chas. W. Smith. 2nd class honors—Alex. Macdonald, G. H. A. Stevenson, Fred W. McKenna, J. Alton L. Harris, D. McHarg. Passed—E. Dubeau.

Physiological Chemistry—1st class honors—Francis O. Anderson, E. G. Gale, Lulu Runnells, Margaret Currie, J. H. Davis, W. G. McCabe, F. G. Henry, John Butler, F. L. Wilkinson, A. C. Lopez, Hyman Lightstone, F. W. McKenna. 2nd class honors—C. H. Christie, D. McHarg, Chas. W. Smith. Passed—G. H. A. Stevenson, Alex. Macdonald, E. Dubeau.

Histology—2nd class honors—Francis O. Anderson, Alberto C. Lopez, Fred. G. Henry, Margaret Currie, F. L. Wilkinson. Passed—John A. Butler, S. G. Brown, C. W. Smith, C. H. Christie, W. G. McCabe, D. McHarg, E. G. Gale, F. W. McKenna, Lulu Runnells, J. H. Davis, Alex. Macdonald, E. Dubeau, G. H. A. Stevenson, Hyman Lightstone.

Practical Chemistry—1st class honors—C. H. Christie. 2nd class honors—Miss M. Currie, S. G. Brown, E. Dubeau, F. O. Anderson. Passed—A. C. Lopez, A. Macdonald, Miss L. Runnells, E. G. Gale.

Materia Medica—Sessional and Supplemental—1st class honors—S. G. Brown, A. C. Lopez. Passed—C. H. Christie, J. A. L. Harris, Miss M. Currie, H. Lightstone, A. Macdonald, J. E. Tanguay.

Pass Examination—1st class honors—B. J. A. Robinson, F. A. Anderson. 2nd class honors—E. L. Sutherland. Passed—C. F. Crutchlow, J. L. Allan.

FINAL SUBJECTS.

Medical Jurisprudence—2nd class honors—B. J. A. Robinson, F. G. Crutchlow, E. L. Sutherland. Passed—H. Lightstone, J. E. Tanguay, J. A. L. Harris.

Diseases of Children—1st class honors—R. M. Stimpson, John Francis. 2nd class honors—Miss M. Gomery, J. A. Paddyfoot. Passed—Miss Hansford, J. L. Allan, McD. Ford, J. McIntyre, A. H. Newman,

LIST OF GRADUATES.

James Leslie Allan, Montreal ; John Francis, Aux Cayes, Hayti ; Angus McDonald Ford, Portneuf, Que. ; Miss Minnie Gomery, Montreal ; Miss Marion Hansford, Montreal ; John McIntyre, Montreal ; Archibald Hamilton Newman, Montreal ; Robert Methuselah Stimpson, Manchester, Jamaica, W.I. ; James Amos Paddyfoot, Jamaica, W.I. ; John Spencer Browne, Jamaica, W.I.

PRIZE WINNERS.

Junior Dissector's Prize—E. G. Mason. Senior Dissector's Prize—F. G. Henry and F. L. Wilkinson, equal. Histology—F. O. Anderson. David Silver Medal—F. O. Anderson. Wood Gold Medal—Miss Minnie Gomery. Chancellor's Prize—Jno. Francis.

CONVOCATION.

The Convocation for conferring degrees in Medicine was held in the Synod Hall, Montreal, on Wednesday, 13th April, when the degrees of C.M., M.D., was conferred upon each of the above graduates. Dr. A. McD. Ford gave the Valedictory address for the graduating class, and Prof. Stirling, on behalf of the Faculty.

DONATIONS.

Dr. Wheeler, Montreal—Quantity Medical Journals and Magazines.

Dr. McConnell, 32 vols. Medical Journals and Magazines.

1888 Practical Anatomy, Junior Prize.
1889 Practical Anatomy, Senior Prize.
1890 "David" Silver Medal.
1890 "Wood" and "Nelson" Gold Medals.
- ELLIOTT, C. E.
1887 Practical Anatomy, Junior Prize.
1889 "Wood" Gold Medal.
"Nelson" Gold Medal.
- ENGLAND, F. R.
1882 Botany, Prize.
1884 Primary Examination, "David" Scholarship.
1885 "Wood" Gold Medal, "Nelson" Gold Medal.
- FAIRFIELD, W. E.
1884 Botany, Prize.
1886 Primary Examination, "David" Scholarship.
1887 "Wood" Gold Medal.
1887 "Nelson" Gold Medal.
- FISK, GEO.
1891 Practical Anatomy, Junior Prize.
1894 "Wood" Gold Medal.
- FOLEY, JAMES LESLIE.
1878 Practical Chemistry, Prize.
1880 Final Examination, Prize.
- FORTIN, C. A.
1896 "David" Medal.
1897 "Wood" Gold Medal.
- FRANCIS, JOHN.
1898 Chancellor's Prize.
- FRELEIGH, EDGAR O'B.
1881 Practical Anatomy, Junior Prize.
- GAHERTY, DENNIS D.
1878 Primary Examination, Prize.
1879 Final Examination, "Wood" Gold Medal.
- GODFREY, ROBERT F.
1873 Practical Anatomy, Senior Prize.
- GOMERY, MISS MINNIE.
1895 Practical Anatomy, Prize.
Botany, Prize.
1896 Senior Dissector's Prize, "David" Medal.
1898 Wood Gold Medal.
- GILL, L. H. U.
1879 Practical Anatomy, Senior Prize.

- GROULX, V. J.
1885 Practical Anatomy, Senior Prize.
- HACKETT, F. J.
1800 Practical Anatomy, Senior Prize.
Botany Prize.
- HALL, GEO.
1893 Botany.
Junior Dissector.
1896 "Wood" Gold Medal.
- HENRY, F. G.
1897 Junior Dissector's Prize.
1898 Senior Dissector's Prize.
- LEWIS-LANDAU, MISS R.
1895 Chancellor's Prize.
- LAURIE, JAMES B. A.
1890 "Nelson" Gold Medal.
- LATOUR, ANDRE.
1878 Final Examination Prize.
- LEPROHON, RODOLPHE E.
1878 Practical Anatomy, Senior Prize.
- LONGEWAY, A. F.
1883 Botany Prize.
1884 Practical Anatomy, Senior Prize.
1885 Primary Examination, "David"
Scholarship.
1886 Final Examination, "Wood" Gold
Medal; "Nelson" Gold Medal.
- MACDONALD, MISS JESSIE HELEN, B. A.
1894 Practical Anatomy, Junior Prize.
1897 Chancellor's Prize.
- MASON, E. G.
1898 Junior Dissector's Prize.
- MAYNER, A. E.
1889 "David" Silver Medal.
1890 Chancellor's Prize.
- MEAGHER, HUGH A.
1876 Practical Anatomy, Senior Prize.
- MITCHELL, HOMER E.
1876 Practical Anatomy, Junior Prize.
1878 Primary Examination, Prize.
Practical Anatomy, Special Prize.
1878 Final Examination, "Wood" Gold
Medal.
- MCGREGOR, T. D.
1897 Senior Dissector's Prize.
- MCINTYRE, T. D.
1895 Junior Practical Anatomy Prize.
- NELSON, GEORGE W.
1878 Practical Anatomy, Senior Prize.
1879 Final Examination Prize.
- NICHOL, T. S.
1885 Practical Anatomy, Junior Prize.
- NICHOL, F. C.
1897 Histology Prize.
- OPZOOMER, W.
1895 Senior Practical Anatomy Prize.
1897 Nelson Gold Medal.
- PALMER, JOSEPH L.
1873 Practical Anatomy, Junior Prize.
- PICKEL, F. H.
1886 Practical Anatomy, Senior Prize.
1888 Final Examination, "Wood" Gold
Medal; "Nelson" Gold Medal.
- PURVIS, J. W. F.
1890 Practical Anatomy, Senior Prize.
1895 Final Examination, Chancellor's
Prize.
- SAUNDERS, JABEZ E.
1881 Botany Prize.
1882 Primary Examination, "David"
Scholarship.
1885 Chancellor's Prize.
- SHAW, GEORGE BEGG.
1873 Primary Examination, Prize.
Physiology, Prize.
Final Examination, Prize.
- SIROIS, E.
1890 Practical Anatomy, Senior Prize.
1883 Final Examination, Chancellor's
Prize.
- SMILEY, T. B.
1890 Practical Anatomy, Junior Prize.
1891 Practical Anatomy, Senior Prize.
1892 Botany, Prize.
1893 "David" Silver Medal. "Wood"
Gold Medal.

EXAMINATION QUESTIONS.

DESCRIPTIVE ANATOMY.

SESSIONAL EXAMINATION.

Examiners - - - - - DRS. HACKETT AND FISK

I. The adult heart. Give the landmarks for tracing its outline on chest wall ; average weight, structure, and describe its arterial and venous system.

II. The hip-joint. Describe the ligaments and arrangement of the synovial membrane, give arterial and nerve supply.

III. The Tibia. Give centres of ossification, and describe briefly.

IV. Give dissection to expose the brachial artery opposite the elbow joint, and mention the probable anastomosis consequent upon ligature of the artery at this point.

V. Give attachments of the following muscles, and explain their action and leverage : triceps-humeri, coraco-brachialis, lumbricales (hand), palmaris-longus, tibialis-anticus.

VI. Give landmarks for cephalic vein, external saphenous vein, internal mammary artery, middle lobe of right lung, and the ulnar and median nerves at the elbow.

PASS EXAMINATION.

I. The cavity of the thorax having been opened, what major steps would you take to expose the Vena azygos within that cavity ?

What tributaries open into it ?

II. Write a description of the Fornix.

III. The right innominate bone. Give its articulations and ligamentous connections with other bones.

IV. Give a description of the lymphatic glands of the axilla. From what regions do they receive the lymph stream ?

V. Name the muscles of the soft palate and pharynx. Give the attachments of each muscle and nerve supply as usually described, short notes on their actions and uses.

VI. The subject being in the position for dissection of the perineum, give the dissection necessary to expose the urethra from the bulb to the glands.

What do you understand by the triangular ligament, and what structures pierce it ?

CHEMISTRY.

SESSIONAL AND PASS EXAMINATIONS.

Examiner, - - - - - *PROF. DONALD.*

1. Sketch a thermometer showing absolute and centigrade scales.
2. What is meant by "specific heat" and by saying that the specific heat of Zinc is .0955?
3. Describe any form of electric cell and an experiment illustrating the statement that copper is electro-positive.
4. State mode of preparation and properties of any one of the mineral acids. Give the equation.
5. Describe fully one member of the Chlorine family. Explain clearly what you understand by "family of elements." Name any other family and the elements composing it.
6. Write brief notes on the following: sesquioxides, homology, nascent state, acid salt, double decomposition, spectrum analysis.
7. Describe in detail Marsh's test for Arsenic, or Fehling's test for reducing sugars.
8. State mode of preparation of Calcium Carbide and the preparation therefrom of Acetylene. Describe this gas.
9. Outline the processes involved in either the Leblanc, or the Ammonia process, for manufacture of Sodium Carbonate.
10. Calculate the weight of Lime (CaO) that can be obtained by ignition of one ton of Calcium Carbonate (CaCO_3).
11. Describe the chemical changes that occur in obtaining Acetic Acid from Malt.
12. Phenol: State its properties and uses and relationship to Benzene on the one hand and to tri-nitro-phenol on the other.

PHYSIOLOGY.

Examiner, - - - - - *PROF. BRUERE.*

SESSIONAL EXAMINATION.

- I. (a) State all you know about venous blood pressure.
(b) Mention the factors concerned in maintaining the blood flow in the veins.
- II. Describe the respiratory changes which go on in an active muscle.
- III. (a) What are the functions of the cervical sympathetic nerve?
(b) What is the effect of section of the trunk of the left cervical sympathetic nerve on the size of the pupil of the left eye?

- IV. (a) How are the vowels produced?
 (b) To what do they owe their special quality?
 (c) Account for the impairment of ordinary speech caused by the extensive destruction of the teeth.

PASS EXAMINATION.

- I. (a) Describe the development of the amnion.
 (b) Account for the presence of urea in the amniotic fluid.
 II. (a) Mention the important seats of heat production in the body.
 (b) State all you know concerning the nervous mechanism by which heat production is controlled in a homoiothermal animal.

(c) Account for the action of cocaine as a fever producing agent.

III. (a) Describe the development of the enamel organ of a temporary tooth.

(b) Give a detailed account of the structure and formation of enamel.

IV. Give a brief account of the influence of the circulation on the secretion of urine.

V. (a) Describe the mechanism concerned in intestinal peristalsis.

(b) What is the influence of the vagi and great splanchnic nerves on gastro-intestinal movements?

(c) Compare the action of strychnine with that of nicotine in stimulating peristaltic movements.

MATERIA MEDICA.

Examiner,

PROF. R. WILSON.

SESSIONAL EXAMINATION.

I. Classify and write what you know of the following drugs:—Felix Mas, Santonine, Calomel, Quinine, Sulphate of Zinc, Apomorphine.

II. What salts of silver are used in medicine? Describe the physiological action of the nitrate of silver on the human economy.

III. Write all you know about Digitalis.

IV. What dosage would you give of the following drugs, writing opposite each the indications which in your opinion would call for their exhibition:—Morphine Sulphate, Ether, Strychnine Sulphate, Strychnine Nitrate, Pumpkin seed, Purgative, Antimony and Potassium Tartrate, Carbolic Acid, Tincture of Aconite, Ammonium Chloride, Cocaine Hydrochlorate, Hydrochloric Acid, Antipyrine, Croton Oil, Tannic Acid, Hydrocyanic Acid, Fowler's solution.

V. Write at length on Mercury.

VI. What are : Citrullus Colocynthis, Rheum Palmatum Radix, Aloes, Calx Sulphurata, Sulphur praecepitum, and Sulphur sublimatum, Potassii et Sodii Tartras, Ecballium Elaterium, mentioning briefly the preparation most used, and dose.

PASS EXAMINATION.

I. Describe briefly the Physiology of Vomiting as related to drugs : Classify the Emetics as direct and indirect, giving your reasons. Describe your method of producing Emesis (a) in a case of poisoning by Carbolic Acid ; (b) Acute Indigestion with over-loaded stomach, both in the Adult, with prescriptions used.

II. What is wrong with the following prescriptions, correcting, when necessary, and substituting the Metric System of weights and measures.

R	Unguentum Zinci	℥ i.	Tr. Guaiacum	℥ iii

III. Write at length on the Physiological action of Bromide of Potash and Curara, comparing them. In what class of cases would you use them, and how?

IV. A lady, aged 35, suffering from Mitral Disease of the Heart, wishes fourteen teeth extracted, consults you as to advisability of taking an Anaesthetic. Would you give it? If not, why not; and if yes, what would you use? What precautions would you take, and what danger signals would you look for?

V. Mercury—Give source, Physical properties, Physiological action and Therapeutic uses. Give the chief preparations made from (a) the metal, (b) the chlorides, (c) the oxides, (d) the iodides, (e) the acids, and doses where used internally.

VI. (a) What is papain? Whence obtained, and for what used?

(b) Give directions for peptonising a pint of milk.

(c) For making wine whey.

(d) For peptonising beef tea.

(e) For preparation of beef tea.

(f) For making a charcoal poultice.

(g) Linseed meal poultice.

(h) In what class of cases would you advocate venesection?

(i) Write a prescription for Hyperacidity of Urine.

(j) For obstinate Constipation.

OBSTETRICS.

Examiners, - - - PROF. REDDY AND DR. BURNETT.

SESSIONAL EXAMINATION.

1. At what age does Menstruation begin—end? How long does each normal period last? Give its periodicity.

2. A married woman ceases to menstruate on March 1st, if pregnant, when may she expect to be confined.

3. At the end of the first two months on what sign would you depend to prove pregnancy,—on what sign at the end of the 4th month?

4. Mention the treatment to be adopted for the care of the nipples before labour, and after?

5. What is Nuchal displacement of the arm, and how would you manage it?

6. On your first visit after confining a woman, (say 10 hours) what are the questions to be asked from the patient,—from the nurse?

PASS EXAMINATION.

1. What precautions should always be taken when possible, with women you are engaged to confine? Describe the most important precaution briefly.
2. What are the characteristics of the masculine type of pelvis, how is it likely to affect the labour, what procedure will probably have to be adopted to complete labour, and what accident often occurs?
3. What is the supposed cause of Occipito-posterior positions, and how do they affect labour?
4. How would you perform Braxton Hicks Bipolar podalic version?
5. To what is Sepsis in the puerpura due? What symptoms would cause you to believe that a case was septic?
6. If the child is still-born, what would be your treatment to prevent a threatened Mastitis?

DISEASES OF CHILDREN.

Examiner,

PROF. W. BURNETT.

PASS EXAMINATION.

1. Discuss briefly the principles of therapeutics in infancy and early childhood.
2. Give the treatment of Diarrhoea.
3. Rickets—etiology, symptoms and treatment.
4. Broncho-Pneumonia—symptoms, diagnosis and treatment.

PATHOLOGY.

Examiner,

PROF. MACPHAIL.

- I. State the pathologic conditions which may arise from imperfect closure of the medullary canal in the embryo, and from imperfect closure of the "parts in front" of the embryo. Write a note on any one of these conditions.
- II. Explain the anatomical basis of hyperaemia.
- III. Describe the minute changes observed in
 1. Cloudy swelling,
 2. Coagulation necrosis,
 3. Amyloid degeneration,
 4. Indirect cell division,
 5. Atheroma.
- IV. Describe the typical minute local results of the operation of pyogenic organisms upon the tissues.
- V. Explain the origin of all the elements in granulation tissue.
- VI. Describe the minute structure of any two malignant tumours.

PRACTICE OF MEDICINE AND NEUROLOGY.

Examiners, - PROFS. F. W. CAMPBELL AND J. B. McCONNELL.

SESSIONAL EXAMINATION.

1. Into what classes are worms divided? Name those of each class, and the treatment of the three principal worms met with in the human body.

2. Name the various modes of death, and give an example of each.

3. Hæmatemesis—its cause, and generally outline the treatment.

4. State the principle which underlies the nomenclature of disease, and give an example of each form.

5. Give an outline of the treatment you would adopt in an ordinary uncomplicated case of typhoid fever, and for such special symptoms as meteorism and hæmorrhage from the bowels.

6. Describe the pathological conditions in the different forms of arterio-sclerosis, and state the chief causes of this condition.

PASS EXAMINATION.

1. Describe a case of Dysentery and give the treatment.

2. Symptoms and treatment of Carcinoma of the Stomach.

3. Atonic Dyspepsia—symptoms, cause and treatment.

4. Biliary Colic—symptoms, treatment during an attack and subsequently.

5. What are the chief causes of Aneurism? Give the physical signs of Aneurism of the ascending arch of the Aorta, and state the effect on the pupil and skin of pressure which destroys the cilio-spinal branches of the sympathetic.

6. Mention the chief symptoms of Angina Pectoris; distinguish it from pseudo-angina; what treatment would you recommend in both these affections?

SURGERY.

Examiners, - PROF. PERRIGO AND DR. R. CAMPBELL.

SESSIONAL EXAMINATION.

1. Define the following terms: Saprophytic, aerobic, ulceration, gangrene, caries, necrosis, erysipelas, thrombosis.

2. Describe in detail the microscopic changes occurring in the tissues during inflammation which goes on to suppuration.

3. Give the symptoms, nature of displacement and method of treatment of fracture of the surgical neck of the humerus.
4. What is an ulcer? (a) Distinguish between an acute and an indolent ulcer and give treatment for the latter.

PASS EXAMINATION.

1. Define the following terms : osteomyelitis, sequestrum, sinus, fistula, cloaca, saprophytic, sphacelus, gastrostomy, nephrectomy, sapremia, septic infection, pyaemia.
2. What are the principal differences between Benign and Malignant tumours? (a) Given a tumor of the female breast, how would you diagnose between adenoma, sarcoma, and carcinoma?
3. What are the diagnostic points of difference between hydrocele, varicocele, haematocele, scrotal hernia, and the various forms of sarcocele (simple, tubercular and syphilitic).
4. Give the symptoms, nature of deformity and treatment for intracapsular fracture of the femur. (a) How would you distinguish between a case of intracapsular fracture and a posterior dislocation of the femur.
5. What is meant by direct, indirect, infantile and congenital inguinal hernia. (a) Give a short description of the difference between MacEwan's, Bassini's and Halsted's operations for the radical cure of inguinal hernia.
6. Give the varieties, symptoms and results of stricture of the male urethra. (a) What are the methods of treatment, and mention to which kind of stricture they are applicable.

GYNÆCOLOGY.

Examiners,

PROFS. PERRIGO AND A. L. SMITH.

1. Give the causes, symptoms and treatment of tubal pregnancy.
2. What do you understand by prolapse of the uterus of the 3rd degree? Give treatment.
3. In what class of cases would you do Alexander's operation, and state the reasons of your choice?
4. What is Dysmenorrhoea? Mention the causes usually given.

LARYNGOLOGY.

Examiner,

PROF. G. T. ROSS.

1. Outline details of general and local treatment in Diphtheria, and state how much antitoxine is recommended for a case of Laryngeal Diphtheria in a child 2 years old.

2. Treatment of Acute Tonsillitis.
3. Differential diagnosis between membranous croup and Diphtheria, and between Acute Tonsillitis with exudation and Diphtheria.
4. Diagnosis between Syphilitic ulcer and Tubercular ulcer of the oro-pharynx where no bacilli can be demonstrated in the latter.

MENTAL DISEASES.

Examiner,

- - - - - PROF. ANGLIN.

1. Why is there more insanity among civilized than savage nations?
2. Distinguish between idiocy, imbecility and dementia.
3. Give some symptoms which might exist in a case under examination which would be sufficient to justify a certificate of insanity.
4. What lunatics are most likely to injure others?
5. Mention the best methods of inducing sleep in acute mania.

Dental College of the Province of Quebec

IN AFFILIATION WITH THE

UNIVERSITY OF BISHOP'S COLLEGE.

The course of instruction in this College is in accordance with the requirements of the National Association of Dental Faculties of the United States, and extends over three (3) years.

MATRICULATION.

All candidates for admission, except those who hold a degree in Medicine or Arts from a recognized British or Canadian University, must pass the matriculation examination of the Dental Association of the Province of Quebec, before they can register as students of this College.

INDENTURES.

Those students who intend to practice in the Province of Quebec must sign indentures before a Notary Public with a Licentiate of Dental Surgery in active practice in the Province, at the beginning of the College course; the Dental Act requiring three (3) full years as an indentured student after the matriculation has been passed.

COURSE OF INSTRUCTION.

Anatomy, Physiology, Chemistry, Histology and Embryology are taken in the Medical Department of Bishop's University, the remainder of the course is given in the Dental College building on Phillips Square.

First year—Anatomy, Physiology, Chemistry, Histology and Embryology.

Second year—Anatomy, Physiology, Chemistry, Operative and Mechanical Dentistry, Dental Technique, Dental Pathology and Therapeutics, Surgical Pathology, Dental Surgery and Anaesthetics, Orthodontia, Dental Materia Medica.
 Third year—Operative and Mechanical Dentistry, Crown and Bridge work, Practical work in Infirmary, etc.

EXAMINATION.

Examinations are held at the close of each session ; the student is not allowed to advance with his class unless he has passed in a majority of the subjects of his year.

The College year begins on the 1st of October and ends on 31st of March, with a vacation of ten days at Christmas.

REQUIREMENTS FOR THE DEGREE.

The degree of Doctor of Dental Surgery (D.D.S.) will be conferred by the University of Bishop's College on any student who has fulfilled the following requirements :

- Must be of full age of twenty-one years.
- Must be of good moral character.
- Must have passed all required examinations.
- Must have completed the full term of three years.
- Must have paid all College fees.

FEES.

- Matriculation, Ten dollars.
- Registration, Five dollars.
- College Tuition, One hundred dollars per annum.
- D.D.S. diploma, Twenty-five dollars.

The last thing at Night, the first in the Morning

Nestlé's
Food

NESTLÉ'S FOOD gives healthful sleep, builds firm, strong flesh and bone, and is safe.

NESTLÉ'S FOOD does *not* require the addition of cow's milk. Water only is needed in preparation for use.

The danger of disease being conveyed through the medium of cow's milk should be thoughtfully considered, when choosing a food for your baby.

For
Babies

Consult your doctor about Nestlé's Food, and send to us for a large sample can, and our book, "The Baby," both of which will be sent free on application.

LEEMING, MILES & CO.,
