

THE
AMERICAN
ALMANACK
AND

Astronomical Ephemeris.

For the Year of our Lord CHRIST 1790.
Beginning after BISTEXTILE or LEAP YEAR.

Containing the Notes, Fasts, Feasts of the Church, the
Rising and Setting of the Sun, Moon and Principal fixed Stars, the
Moon's Age, time of High Water, besides more
Calculations of the same Matter never published in an Almanack.

By ABRAHAM ZAGUTUS, A.P.

JOVE saw the Heavens in a little Glass ;
And Laughing to the Gods, the world did pass :
Come then the powers of mortal care to far ;
In little orbs, my Labours need are.
The Name of the Poles, the faith of things,
The Name of Gods, this Brunswickian brings
To our Art ; Spirits inclod attend
I have several spheres, and with such motion bend
The living work ; each year the signed Sun,
Each month returns the counterfeit Moon.
And showing now her world, bold Industry
Shall proud to know the Heavens his subjects be.

St. JOHN

JOHN RYAN, at his Printing Office, No. 58, Prince
William Street. MDCCXC.

The ANATOMY of MAN's BODY, as governed by the
CONSTELLATIONS.

To Know where the Sign is.

First find the day of the Month, and against the day you have the Sign or Place of the Moon in the 7th Column. Then finding the Sign here, it shews the part of the Body it governs.

Upon the Twelve SIGNS.

- ♈ The Head and Face the Ram doth always rule :
- ♉ The Neck and Throat are governed by the Bull.
- ♊ O'er the Arms and Shoulders fill the Twins Preside ;
- ♋ Breast, Stomack, Ribs, the Crooked Crab doth guide.
- ♌ The Noble Lion rules the Back and Heart :
- ♍ The bashful Virgin claims the belly part.
- ♎ The Reins and Lions the equal Ballance weigh :
- ♏ The Scorpion o'er the secret parts doth sway.
- ♐ The curious Archer does the Thighs affect :
- ♑ So doth the Goat our bended knees protect.
- ♒ The Legs unto Aquarius's Lot do fall :
- ♓ The Fish our active Feet their portion call :

♀ Venus, will be evening Star till the 18th of March, then Morning Star till the end of the Year.

ECLIPSES for the YEAR 1790.

There will be Six Eclipses this Year ; Four of the Sun and two of the Moon, in the following Order, *viz.*

☉ Eclipsed April 14 at 8 o'Clock A. M. (Morning) a small Eclipse Visible about the Northern Polar Region, by reason of the Moon's North Latitude.

	H. M.	
☉ Eclipsed Visible { Of the Eclipse	5 46	
April 28 Beginning { Of total Darknefs	6 44	
Ecliptic Opposition	7 31	
Middle	7 32½	P. M. Af-
End { Of total Darknefs	8 21	ternoon.
{ Of the Eclipse	9 19	
Duration { Of total Darknefs	1 37	
{ Of the Eclipse	9 33	

Digits Eclipsed 20°. 1' from the South side of the Earth's Shadow.

This Eclipse begins at Moon setting at *Canton in East-India*, Rises near *Barbadoes*, and is near the Meridian at the *Cape of Good-Hope* at the beginning of the Eclipse, and ends at Moon's rising on the *West coast of America*.

II. ☉ Eclipsed invisible May 14th, at oh. 12m. in the Morning 6 in Longitude 11. 23°. 29½. ☉'s Latitude 1°. 13½ South. This Eclipse will be Visible in high Southern Latitudes.

IV. ☉ Eclipsed invisible October 8th, at 4h. 12m. A. M. 6 in Longitude 61. 15° 14' ☉'s Latitude 1° 27' South.

V. ☉ Eclipsed visible October 22d.

	H. M.	
Beginning { Of the Eclipse	6 32	
{ Of total Darknefs	7 39	
Ecliptic Opposition	8 29	
Middle	8 30½	P. M.
End { Of total Darknefs	9 22	
{ Of the Eclipse	10 29	
Duration { Of total Darknefs	1 43	
{ Of the Eclipse	3 57	

Digits Eclipsed 18°. 55' from the North side of the Earth's Shadow.

This Eclipse begins near *Canton* at Moon's Setting, and Rises at *Yamouca* about the beginning of this Eclipse; and the Eclipse Ends at Moon Rising in *Japan*, so it is Visible to all parts of *Europe, Africa, America* and part of *Asia*.

VI. ☉ Eclipsed Visible November 6th.

	H. M.	
Beginning at	o 50.	} P. M.
Middle	1 56.	
End	3 o.	

Digits Eclipsed 5 nearly on Sun's Northern Limb.

If you would know the Interest of 100 Pounds for 1 week, 1 Month
3 Months, 6 Months, 1 year, look for 100l. on the side, and in the
next column, under 1 Week sh. 2s. 6d. for 1 Month sh. 10s. 0d.
3 Months sh. 16s. 6d. for 6 Months sh. 23s. 6d. and for 1 Year
sh. 30s. 0d. and so of the rest.

Thus the LEGAL way by which Men should,
To interest let their Silver and their Gold;
Yet worldly Mfers, when to raking fall,
With their Interest get the Devil and all.

TABLE shewing what proportion Currencies bear each other.

ADD,

- One-tenth to Sterling makes Quebec, New-Branswick or Halifax.
- One-fifth to Halifax makes Lawful.
- One-third to Sterling makes Lawful.
- One-fourth to Lawful makes Philadelphia.
- One-third to Lawful makes New-York.

DEDUCT,

- One-tenth from Quebec, New-Branswick, or Halifax, is Sterling.
- One-sixth from Lawful is New-Branswick.
- One-fourth from Lawful is Sterling.
- One-fifth from Philadelphia is Lawful.
- One-fourth from New-York is Lawful.

THOSE who reside on the South Side of the BAY of FUNDY will please to observe:

THAT in and about Minas Basin, Windsor, and that neighbourhood, at the full and change of the Moon, it is high water about twelve o'clock, and of neap tides, when the Moon quarters, it is high water about 6 o'clock.

At Cumberland and Annapolis, it is high water at the full and change of the Moon, about 15 minutes after 11 o'clock.

In five hours from the time of high water at Windsor, the river is fordable at Falmouth, and it remains fordable for three hours in the summer, and two hours in the winter season.

High water at Windsor about 50 minutes later than at Boston, and in Cumberland Basin and Annapolis Basin, nearly the same as at Boston.

Time of going through the FALLS.

THE Falls are level (or still-water) about three hours and an half on the Flood, and about two hours and an half on the ebb, which makes it possible four times in 24 hours, about 10 or 15 minutes each time. No other rule can be given, as much depends on the freshets in the River Saint John, and the time of high-water or full sea, which is often hastened or retarded by the winds, and in proportion to the height of them.

PRO BONO PUBLICO.

AT Rome, on the 10th of March last, a Lady had the misfortune to be severely burned, almost over the whole of her body, by her cloaths taking fire.—To give temporary ease to the raging torture under which she suffered, a domestic had recourse to some honey that lay at hand, and which had to good an effect, that at the end of nine days she was perfectly cured by the use of this remedy alone. Dr. Neil, a physician at St. Florentina, having been called in, was an ocular witness to this extraordinary cure, and published it for the information and service of his fellow-creatures.

22	24	26	28	30	32	34	36	38	40	42

TO find the hour of the day by this Table, take a staff, of what length you please, and (with a pair of Compasses) divide it into ten equal parts, making them upon the staff, then in some plain level place where the Sun shines, set it upright, and mark where the end of the shadow thereof falls; then measure with your staff, the length of the shadow, and note the parts it contains, which find out in this Table against the day of the month, and over head you have the true hour of the day. For example, suppose the 13th of May or 30th of July, I should find the shadow of the staff to be forty three parts and one quarter (that is four staff lengths three parts and one quarter) therefore seeking in the Table against the said days, I see over head that it

is then either 6 o'clock in the morning or 6 in the evening ; so that if your observation was in the morning it was 6 o'clock, or in the afternoon 6 o'clock.

By this example you may see the easy and excellent use of the Table, which is as ready as any moveable Sun Dial ; so that wherefoever you are, or travel, you may, having this Almanack about you, speedily have the true hour of the day.
